FEDERAL REGISTER

Vol. 86 Tuesday

No. 218 November 16, 2021

Pages 63307–64054

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 86 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

OFFICE OF GOVERNMENT ETHICS

5 CFR Part 2638

RIN 3209–AA63

Executive Branch Ethics Program; Technical Correction

AGENCY: Office of Government Ethics.

ACTION: Final rule; technical correction.

SUMMARY: The Office of Government Ethics (OGE) is issuing a technical correction to the executive branch ethics program regulation that describes OGE's written guidance, following the inadvertent removal of certain paragraphs in the regulation that occurred when it was revised in August 2020.

DATES: This final rule is effective November 16, 2021.

FOR FURTHER INFORMATION CONTACT: Patrick J. Lightfoot, Associate Counsel, or Margaret Dylus-Yukins, Assistant Counsel; Telephone: 202–482–9300.

SUPPLEMENTARY INFORMATION:

I. Background

On August 20, 2020, the U.S. Office of Government Ethics (OGE) issued new regulations at 5 CFR part 2611, which set forth processes and procedures for OGE's issuance of guidance documents as required by Executive Order 13891, ''Promoting the Rule of Law Through Improved Agency Guidance Documents'' (October 9, 2019). 85 FR 51301 (August 20, 2020). In that same August 2020 rulemaking, OGE made a technical modification to 5 CFR 2638.208 ''to replace the term 'guidance documents' with the phrase 'written guidance' in order to reduce any potential confusion'' with the new 5 CFR part 2611 regulation in which ''guidance document'' had become a specific term of art. *Id.* The regulations at 5 CFR part 2611 were later removed pursuant to Executive Order 13992, ''Revocation of Certain Executive Orders Concerning Federal Regulation'' (January 20, 2021). *See* 86 FR 25801 (May 11, 2021).

Although the intent of this technical change was to replace only that phrasing in 5 CFR 2638.208, OGE's instructions to the **Federal Register** were unclear, and resulted in the inadvertent deletion of paragraphs (a), (b), and (c) in 5 CFR 2638.208. To correct this error, OGE is issuing this technical rulemaking to add paragraphs (a), (b), and (c) back into 5 CFR 2638.208 as they existed before the August 20, 2020, amendments. OGE has made no substantive change to the text of these paragraphs, which will once again read as they did when 5 CFR part 2638 was updated in 2016. *See* 81 FR 76271 (November 2, 2016).

II. Matters of Regulatory Procedure

Administrative Procedure Act

Pursuant to 5 U.S.C. 553(b)(3)(A), as Director of the Office of Government Ethics, the notice and comment procedures are being waived because these amendments concern matters of agency organization, procedure and practice.

Regulatory Flexibility Act

As the Director of the Office of Government Ethics, I certify under the Regulatory Flexibility Act (5 U.S.C. chapter 6) that this final rule would not have a significant economic impact on a substantial number of small entities because it primarily affects current Federal executive branch employees.

Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. chapter 35) does not apply because this regulation does not contain information collection requirements that require approval of the Office of Management and Budget.

Unfunded Mandates Reform Act

For purposes of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. chapter 5, subchapter II), this final rule would not significantly or uniquely affect small governments and will not result in increased expenditures by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more (as adjusted for inflation) in any one year.

Executive Order 13563 and Executive Order 12866

Executive Orders 13563 and 12866 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select the regulatory approaches that maximize net benefits (including economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. In promulgating this rulemaking, OGE has adhered to the regulatory philosophy and the applicable principles of regulation set forth in Executive Orders 12866 and 13563. The rule has not been reviewed by the Office of Management and Budget because it is not a significant regulatory action for the purposes of Executive Order 12866.

Executive Order 12988

As Director of the Office of Government Ethics, I have reviewed this rule in light of section 3 of Executive Order 12988, Civil Justice Reform, and certify that it meets the applicable standards provided therein.

Executive Order 13175

The Office of Government Ethics has evaluated this final rule under the criteria set forth in E.O. 13175 and determined that tribal consultation is not required as this final rule has no substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

List of Subjects in 5 CFR Part 2638

Administrative practice and procedure, Conflict of interests, Government employees, Reporting and recordkeeping requirements.

Approved: November 9, 2021.

Emory Rounds,

Director, U.S. Office of Government Ethics.

For the reasons stated in the preamble, the U.S. Office of Government Ethics amends 5 CFR part 2638 by making the following technical correction:

PART 2638—EXECUTIVE BRANCH ETHICS PROGRAM

■ 1. The authority citation for part 2638 continues to read as follows:

Authority: 5 U.S.C. App. 101–505; E.O. 12674, 54 FR 15159, 3 CFR, 1989 Comp., p. 215, as modified by E.O. 12731, 55 FR 42547, 3 CFR, 1990 Comp., p. 306.

■ 2. Revise § 2638.208 to read as follows:

§ 2638.208 Written guidance on the executive branch ethics program.

This section describes several means by which the Office of Government Ethics provides agencies, employees, and the public with written guidance regarding its legal interpretations, program requirements, and educational offerings. Normally, written guidance is published on the official website of the Office of Government Ethics, *www.oge.gov.*

(a) *Legal advisories.* The Office of Government Ethics issues legal advisories, which are memoranda regarding the interpretation of government ethics laws and regulations. They are intended primarily to provide education and notice to executive branch ethics officials; prospective, current, and former executive branch employees; and individuals who interact with the executive branch.

(b) *Program advisories.* The Office of Government Ethics issues program advisories, which are memoranda regarding the requirements or procedures applicable to the executive branch ethics program and individual agency ethics programs. They are intended primarily to instruct agencies on uniform procedures for the executive branch ethics program.

(c) *Informal advisory opinions.* Upon request or upon its own initiative, the Office of Government Ethics issues informal advisory opinions. Informal advisory opinions address subjects that in the opinion of the Director do not meet the criteria for issuance of formal advisory opinions. They are intended primarily to provide guidance to individuals and illustrate the application of government ethics laws and regulations to specific circumstances.

BILLING CODE 6345–03–P

DEPARTMENT OF AGRICULTURE

Rural Utilities Service

7 CFR Part 1767

[Docket No. RUS–21–ELECTRIC–0019]

RIN 0572–AC53

Streamlining Electric Program Procedures; Correction

AGENCY: Rural Utilities Service, Department of Agriculture (USDA).

ACTION: Final rule; correcting amendment.

SUMMARY: On July 9, 2021, Rural Development's Rural Utilities Service referred to as ''the Agency'' or ''Agency'' published a document to streamline its procedures for the Electric Program borrowers, including its loan application requirements, approval of construction work plans, contract bidding procedures, contact approval procedures, system operation and maintenance reviews, long-range engineering plans and system design procedures. That document inadvertently published the incorrect accounting information. This document corrects the final regulations.

DATES: Effective November 16, 2021.

FOR FURTHER INFORMATION CONTACT: For information specific to this notice contact Michele Brooks, Director, Regulations Management, Rural Development Innovation Center—Regulations Management, USDA, 1400 Independence Avenue SW, STOP 1522, Room 4266, South Building, Washington, DC 20250–1522. Telephone: (202) 690–1078. Email *michele.brooks@usda.gov.*

SUPPLEMENTARY INFORMATION: The Rural Development's Rural Utilities Service is issuing a correction to the final rule that published July 9, 2021, at 86 FR 36199. In that rule, an inadvertent error provided the incorrect information in the Special Equipment section of part 119 § 1767.41. This correcting amendment provides the proper information.

List of Subjects in 7 CFR Part 1767

Electric power, Loan programs—energy, Rural areas, Uniform System of Accounts.

For the reasons stated in the preamble, the Rural Utilities Service corrects 7 CFR part 1767 with the following correcting amendment:

PART 1767—ACCOUNTING REQUIREMENTS FOR RUS ELECTRIC BORROWERS

■ 1. The authority citation for part 1767 continues to read as follows:

Authority: 7 U.S.C. 901 *et seq.,* 1921 *et seq.,* 6941 *et seq.*

■ 2. In § 1767.41, amend entry 119 by revising entry 3 to read as follows:

§ 1767.41 Accounting methods and procedures required of all RUS borrowers.

* * * * *

119 Special Equipment

* * * * *

■ 3. Meters, Meter Sockets, current and potential transformers, and other metering equipment recorded in Account 370, Meters.

* * * * *

Christopher A. McLean,

Acting Administrator, Rural Utilities Service, U.S. Department of Agriculture.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2021–0602; Project Identifier 2019–CE–022–AD; Amendment 39–21776; AD 2021–22–03]

RIN 2120–AA64

Airworthiness Directives; Diamond Aircraft Industries GmbH Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for all Diamond Aircraft Industries GmbH Model DA 42, DA 42 NG, and DA 42 M–NG airplanes. This AD was prompted by mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI identifies the unsafe condition as failure of the nose landing gear (NLG) actuator attachment lever and detachment from the NLG leg. This AD requires repetitively inspecting the NLG actuator attachment lever for cracks and damage and taking any necessary corrective actions. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective December 21, 2021.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of December 21, 2021.

ADDRESSES: For service information identified in this final rule, contact Diamond Aircraft Industries GmbH, N.A. Otto-Straße 5, A–2700 Wiener Neustadt, Austria; phone: +43 2622 26700; fax: +43 2622 26780; email: *office@diamond-air.at;* website: *https://www.diamondaircraft.com.* You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 901 Locust, Kansas City, MO 64106. For information on the availability of this material at the FAA, call (816) 329–4148. It is also available at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–0602.

Examining the AD Docket

You may examine the AD docket at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–0602; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the MCAI, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Penelope Trease, Aviation Safety Engineer, General Aviation & Rotorcraft Section, International Validation Branch, FAA, 26805 E 68th Avenue, Denver, CO 80249; phone: (303) 342–1094; email: *penelope.trease@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to all Diamond Aircraft Industries GmbH Model DA 42, DA 42 NG, and DA 42 M–NG airplanes. The NPRM published in the **Federal Register** on August 3, 2021 (86 FR 41786). The NPRM was prompted by MCAI originated by the European Union Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union. EASA issued AD 2019–0066, dated March 27, 2019 (referred to after this as ''the MCAI''), to correct an unsafe condition for Diamond Aircraft Industries GmbH (Austria) and Diamond Aircraft Industries Inc. (Canada) Model DA 42, DA 42 M, DA 42 NG, and DA 42 M–NG airplanes. The MCAI states:

> An occurrence was reported of a failed NLG actuator attachment lever, resulting in disconnection from the NLG leg. When the landing gear (LG) was retracted, the NLG actuator interfered with the rudder control rods, forcing the rudder into left-hand deflection. After lowering the LG, full rudder control was restored. The investigation results showed that the actuator lever failed due to a crack that had developed over a longer time period.
>
> This condition, if not detected and corrected, could lead to restricted rudder travel in LG retracted configuration, possibly resulting in reduced control of the aeroplane.
>
> To address this potential unsafe condition, [Diamond Aircraft Industries] DAI issued the applicable [mandatory service bulletin] MSB, providing instructions to inspect the affected part.
>
> For the reason described above, this [EASA] AD requires repetitive inspections of the NLG leg actuator attachment lever and, depending on findings, replacement of the NLG leg.

You may examine the MCAI in the AD docket at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–0602.

Discussion of Final Airworthiness Directive

Comments

The FAA received no comments on the NPRM or on the determination of the costs.

Conclusion

This product has been approved by the aviation authority of another country and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI and service information referenced above. The FAA reviewed the relevant data and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. This AD is adopted as proposed in the NPRM.

Related Service Information Under 1 CFR Part 51

The FAA reviewed Diamond Aircraft Mandatory Service Bulletin MSB 42–136/1 and MSB 42NG–078, dated January 24, 2019 (issued as one document) published with Diamond Aircraft Work Instruction WI–MSB 42–136 and WI–MSB 42NG–078, Revision 1, dated January 24, 2019 (issued as one document) attached. The service information contains procedures for repetitively inspecting the NLG actuator attachment lever and replacing the NLG leg assembly as necessary. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in **ADDRESSES**.

Differences Between This AD and the MCAI

The MCAI applies to Model DA 42, DA 42 M, DA 42 NG, and DA 42 M–NG airplanes. This AD does not apply to the Model DA 42 M airplane because it does not have an FAA type certificate.

Costs of Compliance

The FAA estimates that this AD affects 40 airplanes of U.S. registry. The FAA also estimates it will take about 1 work-hour per airplane to comply with the inspection required by this AD and no parts would be necessary. The average labor rate is $85 per work-hour.

Based on these figures, the FAA estimates the inspection cost of this AD on U.S. operators to be $3,400 or $85 per airplane.

In addition, the FAA estimates that any necessary replacement actions will take 6 work-hours and require parts costing $1,500, for a cost of $2,010 per airplane. The FAA has no way of determining the number of airplanes that may need these actions.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the

distribution of power and responsibilities among the various levels of government. For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2021–22–03 Diamond Aircraft Industries GmbH: Amendment 39–21776; Docket No. FAA–2021–0602; Project Identifier 2019–CE–022–AD.

(a) Effective Date

This airworthiness directive (AD) is effective December 21, 2021.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Diamond Aircraft Industries GmbH Model DA 42, DA 42 NG, and DA 42 M–NG airplanes, all serial numbers, certificated in any category.

(d) Subject

Joint Aircraft System Component (JASC) Code 3221, Nose/Tail Landing Gear Attach Section.

(e) Unsafe Condition

This AD was prompted by mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and address an unsafe condition on an aviation product. The MCAI describes the unsafe condition as failure of the nose landing gear (NLG) actuator attachment lever and detachment from the NLG leg. The FAA is issuing this AD to detect and correct cracks in the NLG actuator attachment lever, which could result in restricted rudder travel with the NLG retracted and reduced airplane control.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Definition of Airworthy Part

For the purposes of this AD, an airworthy part is an NLG leg assembly that has accumulated 1,800 or fewer hours time-in-service (TIS) since first installation on an airplane or that has passed the inspection (no cracks and no damage) required by paragraph (h)(1) of this AD.

(h) Required Actions

(1) Inspect the NLG actuator attachment lever for cracks and damage in the areas shown in paragraph 2 of the Instructions in Diamond Aircraft Work Instruction WI–MSB 42–136 and WI–MSB 42NG–078, Revision 1, dated January 24, 2019 (issued as one document) attached to Diamond Aircraft Mandatory Service Bulletin MSB 42–136/1 and MSB 42NG–078, dated January 24, 2019 (issued as one document) at the following applicable compliance times in paragraph (h)(1)(i) or (ii) of this AD:

(i) *For airplanes with an NLG assembly that has accumulated less than 1,800 hours TIS as of the effective date of this AD:* Within 200 hours TIS after the NLG assembly accumulates 1,800 hours TIS or within 12 months after the NLG assembly accumulates 1,800 hours TIS, whichever occurs first, and thereafter at intervals not to exceed 200 hours TIS; or

(ii) *For airplanes with an NLG assembly that has accumulated 1,800 or more hours TIS as of the effective date of this AD:* Within 210 hours TIS after the effective date of this AD or within 12 months after the effective date of this AD, whichever occurs first, and thereafter at intervals not to exceed 200 hours TIS.

(2) After each inspection required by paragraph (h)(1) of this AD, if there is a crack or damage on the NLG actuator attachment lever, before further flight, replace the NLG leg assembly with an airworthy part as defined by this AD.

(3) As of the effective date of this AD, do not install an NLG leg assembly on any airplane unless it is an airworthy part as defined by this AD.

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, International Validation Branch, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (j)(1) of this AD or email: *9-AVS-AIR-730-AMOC@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(j) Related Information

(1) For more information about this AD, contact Penelope Trease, Aviation Safety Engineer, General Aviation & Rotorcraft Section, International Validation Branch, FAA, 26805 E 68th Avenue, Denver, CO 80249; phone: (303) 342–1094; email: *penelope.trease@faa.gov.*

(2) Refer to European Union Aviation Safety Agency (EASA) AD 2019–0066, dated March 27, 2019, for more information. You may examine the EASA AD in the AD docket at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–0602.

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Diamond Aircraft Mandatory Service Bulletin MSB 42–136/1 and MSB 42NG–078, dated January 24, 2019 (issued as one document) published with Diamond Aircraft Work Instruction WI–MSB 42–136 and WI–MSB 42NG–078, Revision 1, dated January 24, 2019 (issued as one document) attached.

(ii) [Reserved]

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 97

[Docket No. 31397; Amdt. No. 3981]

Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule establishes, amends, suspends, or removes Standard Instrument Approach Procedures (SIAPS) and associated Takeoff Minimums and Obstacle Departure procedures (ODPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, adding new obstacles, or changing air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: This rule is effective November 16, 2021. The compliance date for each SIAP, associated Takeoff Minimums, and ODP is specified in the amendatory provisions.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of November 16, 2021.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination

1. U.S. Department of Transportation, Docket Ops-M30. 1200 New Jersey Avenue SE, West Bldg., Ground Floor, Washington, DC, 20590–0001.

2. The FAA Air Traffic Organization Service Area in which the affected airport is located;

3. The office of Aeronautical Information Services, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 or,

4. The National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email *fr.inspection@nara.gov* or go to: *https://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Availability

All SIAPs and Takeoff Minimums and ODPs are available online free of charge. Visit the National Flight Data Center at *nfdc.faa.gov* to register. Additionally, individual SIAP and Takeoff Minimums and ODP copies may be obtained from the FAA Air Traffic Organization Service Area in which the affected airport is located.

FOR FURTHER INFORMATION CONTACT: Thomas J. Nichols, Flight Procedures and Airspace Group, Flight Technologies and Procedures Division, Flight Standards Service, Federal Aviation Administration. Mailing Address: FAA Mike Monroney Aeronautical Center, Flight Procedures and Airspace Group, 6500 South MacArthur Blvd., Registry Bldg 29 Room 104, Oklahoma City, OK 73169. Telephone (405) 954–4164.

SUPPLEMENTARY INFORMATION: This rule amends 14 CFR part 97 by establishing, amending, suspending, or removes SIAPS, Takeoff Minimums and/or ODPS. The complete regulatory description of each SIAP and its associated Takeoff Minimums or ODP for an identified airport is listed on FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and 14 CFR part 97.20. The applicable FAA Forms 8260–3, 8260–4, 8260–5, 8260–15A, 8260–15B, when required by an entry on 8260–15A, and 8260–15C.

The large number of SIAPs, Takeoff Minimums and ODPs, their complex nature, and the need for a special format make publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, Takeoff Minimums or ODPs, but instead refer to their graphic depiction on charts printed by publishers or aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP, Takeoff Minimums and ODP listed on FAA form documents is unnecessary. This amendment provides the affected CFR sections and specifies the typed of SIAPS, Takeoff Minimums and ODPs with their applicable effective dates. This amendment also identifies the airport and its location, the procedure, and the amendment number.

Availability and Summary of Material Incorporated by Reference

The material incorporated by reference is publicly available as listed in the **ADDRESSES** section.

The material incorporated by reference describes SIAPS, Takeoff Minimums and/or ODPs as identified in the amendatory language for part 97 of this final rule.

The Rule

This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP, Takeoff Minimums and ODP as amended in the transmittal. Some SIAP and Takeoff Minimums and textual ODP amendments may have been issued previously by the FAA in a Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flights safety relating directly to published aeronautical charts.

The circumstances that created the need for some SIAP and Takeoff Minimums and ODP amendments may require making them effective in less than 30 days. For the remaining SIAPs and Takeoff Minimums and ODPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs and Takeoff Minimums and ODPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Procedures (TERPS). In developing these SIAPs and Takeoff Minimums and ODPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs, Takeoff Minimums and ODPs, and safety in air commerce, I find that notice and public procedure under 5 U.S.C. 553(b) are impracticable and contrary to the public interest and, where applicable, under 5 U.S.C. 553(d), good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Lists of Subjects in 14 CFR Part 97

Air traffic control, Airports, Incorporation by reference, Navigation (air).

Issued in Washington, DC, on October 29, 2021.

Thomas J. Nichols,

Flight Standards Service Manager, Aviation Safety, Standards Section, Flight Procedures & Airspace Group Flight Technologies & Procedures Division.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Title 14, Code of Federal Regulations, Part 97 (14 CRF part 97) is amended by establishing, amending, suspending, or removing Standard Instrument Approach Procedures and/or Takeoff Minimums and Obstacle Departure Procedures effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 97

[Docket No. 31398; Amdt. No. 3982]

Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule amends, suspends, or removes Standard Instrument Approach Procedures (SIAPs) and associated Takeoff Minimums and Obstacle Departure Procedures for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, adding new obstacles, or changing air traffic requirements. These changes are designed to provide for the safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: This rule is effective November 16, 2021. The compliance date for each SIAP, associated Takeoff Minimums, and ODP is specified in the amendatory provisions.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of November 16, 2021.

ADDRESSES: Availability of matter incorporated by reference in the amendment is as follows:

For Examination

1. U.S. Department of Transportation, Docket Ops-M30, 1200 New Jersey Avenue SE, West Bldg., Ground Floor, Washington, DC 20590–0001;

2. The FAA Air Traffic Organization Service Area in which the affected airport is located;

3. The office of Aeronautical Information Services, 6500 South MacArthur Blvd., Oklahoma City, OK 73169 or,

4. The National Archives and Records Administration (NARA).

For information on the availability of this material at NARA, email *fr.inspection@nara.gov* or go to: *https://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Availability

All SIAPs and Takeoff Minimums and ODPs are available online free of charge. Visit the National Flight Data Center online at *nfdc.faa.gov* to register. Additionally, individual SIAP and Takeoff Minimums and ODP copies may be obtained from the FAA Air Traffic Organization Service Area in which the affected airport is located.

FOR FURTHER INFORMATION CONTACT: Thomas J. Nichols, Flight Procedures and Airspace Group, Flight Technologies and Procedures Division, Flight Standards Service, Federal Aviation Administration. Mailing Address: FAA Mike Monroney Aeronautical Center, Flight Procedures and Airspace Group, 6500 South MacArthur Blvd., Registry Bldg. 29, Room 104, Oklahoma City, OK 73169. Telephone: (405) 954–4164.

SUPPLEMENTARY INFORMATION: This rule amends 14 CFR part 97 by amending the referenced SIAPs. The complete regulatory description of each SIAP is listed on the appropriate FAA Form 8260, as modified by the National Flight Data Center (NFDC)/Permanent Notice to Airmen (P–NOTAM), and is incorporated by reference under 5 U.S.C. 552(a), 1 CFR part 51, and 14 CFR 97.20. The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained on FAA form documents is unnecessary. This amendment provides the affected CFR sections, and specifies the SIAPs and

Takeoff Minimums and ODPs with their applicable effective dates. This amendment also identifies the airport and its location, the procedure and the amendment number.

Availability and Summary of Material Incorporated by Reference

The material incorporated by reference is publicly available as listed in the **ADDRESSES** section.

The material incorporated by reference describes SIAPs, Takeoff Minimums and ODPs as identified in the amendatory language for part 97 of this final rule.

The Rule

This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP and Takeoff Minimums and ODP as amended in the transmittal. For safety and timeliness of change considerations, this amendment incorporates only specific changes contained for each SIAP and Takeoff Minimums and ODP as modified by FDC permanent NOTAMs.

The SIAPs and Takeoff Minimums and ODPs, as modified by FDC permanent NOTAM, and contained in this amendment are based on criteria contained in the U.S. Standard for Terminal Instrument Procedures (TERPS). In developing these changes to SIAPs and Takeoff Minimums and ODPs, the TERPS criteria were applied only to specific conditions existing at the affected airports. All SIAP amendments in this rule have been previously issued by the FAA in a FDC NOTAM as an emergency action of immediate flight safety relating directly to published aeronautical charts.

The circumstances that created the need for these SIAP and Takeoff Minimums and ODP amendments require making them effective in less than 30 days.

Because of the close and immediate relationship between these SIAPs, Takeoff Minimums and ODPs, and safety in air commerce, I find that notice and public procedure under 5 U.S.C. 553(b) are impracticable and contrary to the public interest and, where applicable, under 5 U.S.C. 553(d), good cause exists for making these SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Air traffic control, Airports, Incorporation by reference, Navigation (air).

Issued in Washington, DC, on October 29, 2021.

Thomas J. Nichols,

Flight Standards Service Manager, Aviation Safety, Standards Section, Flight Procedures & Airspace Group Flight Technologies & Procedures Division.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Title 14, CFR part 97, (is amended by amending Standard Instrument Approach Procedures and Takeoff Minimums and ODPs, effective at 0901 UTC on the dates specified, as follows:

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

■ 1. The authority citation for part 97 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40106, 40113, 40114, 40120, 44502, 44514, 44701, 44719, 44721–44722.

■ 2. Part 97 is amended to read as follows:

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, Identified as follows:

DEPARTMENT OF COMMERCE

Office of the Under-Secretary for Economic Affairs

15 CFR Part 1500

[Docket No.: 210820–0165]

RIN 0605–AA53

Concrete Masonry Products Research, Education, and Promotion Order: Delayed Effective Date

AGENCY: Under-Secretary for Economic Affairs, United States Department of Commerce.

ACTION: Final rule; delay of effective date.

SUMMARY: This document delays the effective date of the final rule published on September 15, 2021, setting forth the proposed Concrete Masonry Products Research, Education, and Promotion Order, as authorized by the Concrete Masonry Products Research, Education, and Promotion Act of 2018, which establishes a Concrete Masonry Products Board (Board) composed of industry members appointed by the Secretary of Commerce (Secretary) to develop and implement programs of research, education, and promotion in the concrete masonry products industry. The effective date is delayed from November 29, 2021, to December 18, 2021. There have been longer-than-expected delays in delivery of timely completed ballots, and the Department wants to ensure it has time to adequately review and process all ballots received. The change in the effective date of the Order does not affect the referendum period which ends on November 15. If the referendum fails, the Department will publish a document in the **Federal Register** to withdraw the final rule before the effective date.

DATES: Effective November 16, 2021, the effective date of the final rule published September 15, 2021, at 86 FR 51456, is delayed until December 18, 2021.

FOR FURTHER INFORMATION CONTACT: Mr. Michael Thompson, Communications for the Commerce Checkoff Implementation Program, Office of the Under Secretary for Economic Affairs, telephone: (202) 482–0671 or via electronic mail: *michael.thompson@trade.gov.*

SUPPLEMENTARY INFORMATION: The Department of Commerce published a final rule on September 15, 2021 (86 FR 51456), establishing a Concrete Masonry Products Research, Education, and Promotion Order, as authorized by the Concrete Masonry Products Research, Education, and Promotion Act of 2018. The effective date of the final rule was November 29, 2021. This document delays that date to December 18, 2021, to allow the Department adequate time to review and process all ballots received.

Dated: November 9, 2021.

Kenneth White,

Senior Policy Analyst, Under Secretary for Economic Affairs.

BILLING CODE 3510–20–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 52 and 81

[EPA–R10–OAR–2020–0305; FRL–8878–02–R10]

Air Plan Approval; ID; West Silver Valley Redesignation to Attainment for the 2012 Annual $PM_{2.5}$ Standard

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is redesignating the West Silver Valley, Idaho nonattainment area to attainment for the 2012 annual fine particulate matter ($PM_{2.5}$) National Ambient Air Quality Standard (NAAQS). EPA is also approving a maintenance plan for the area that demonstrates continued attainment of the 2012 $PM_{2.5}$ NAAQS through the year 2031, which Idaho submitted along with the redesignation request for inclusion into the Idaho State Implementation Plan (SIP). Additionally, EPA is approving the 2031 motor vehicle emissions budgets included in Idaho's maintenance plan for $PM_{2.5}$, nitrogen oxides and volatile organic compounds. EPA is taking this action pursuant to the Clean Air Act (CAA or the Act).

DATES: This action is effective on December 16, 2021.

ADDRESSES: EPA has established a docket for this action under Docket ID No. EPA–R10–OAR–2020–0305. All documents in the docket are listed on the *https://www.regulations.gov* website. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through *https://www.regulations.gov,* or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information.

FOR FURTHER INFORMATION CONTACT: Claudia Vaupel, (206) 553–6121, *vaupel.claudia@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document whenever ''we,'' ''us,'' or ''our'' is used, it is intended to refer to EPA.

I. Background

On June 2, 2020, Idaho submitted a request for EPA to redesignate the West Silver Valley area to attainment for the 2012 annual $PM_{2.5}$ NAAQS under section 107(d)(3)(E) of the CAA. On September 15, 2021, EPA proposed to approve Idaho's SIP revision (86 FR 51318). An explanation of the CAA requirements, a detailed analysis of the submittal, and the EPA's reasons for approval were provided in the notice of proposed rulemaking. The public comment period for this proposed rulemaking closed on October 15, 2021. EPA received no comments during the public comment period.

II. Final Action

EPA is redesignating the West Silver Valley 2012 annual $PM_{2.5}$ nonattainment area and is approving the associated maintenance plan and motor vehicle emission budgets for the area. The designation status of the West Silver Valley under 40 CFR part 81 will be revised to attainment upon the effective date of this final action.

III. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Clean Air Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve State choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves State law as meeting Federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);

• Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);

• Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);

• Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);

• Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);

• Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);

• Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and

• Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

The SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and it will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by JANUARY 18, 2022. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2)).

List of Subjects

40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

40 CFR Part 81

Environmental protection, Air pollution control, National parks, Wilderness areas.

Dated: November 4, 2021.

Michelle L. Pirzadeh,

Acting Regional Administrator, Region 10.

For the reasons set forth in the preamble, 40 CFR parts 52 and 81 are amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart N—Idaho

■ 2. In § 52.670, the table in paragraph (e) is amended by adding an entry at the end of the table for ''West Silver Valley $PM_{2.5}$ Nonattainment Area Redesignation Request and Maintenance Plan'' to read as follows:

§ 52.670 Identification of plan.

* * * * *

(e) * * *

EPA-APPROVED IDAHO NONREGULATORY PROVISIONS AND QUASI-REGULATORY MEASURES

Name of SIP provision	Applicable geographic or nonattainment area	State submittal date	EPA approval date	Comments
*	*	*	*	*
West Silver Valley $PM_{2.5}$ Maintenance Plan.	West Silver Valley, ID	6/2/2020	11/16/2021, [INSERT **FEDERAL REGISTER** CITATION].	

PART 81—DESIGNATION OF AREAS FOR AIR QUALITY PLANNING PURPOSES

■ 3. The authority citation for part 81 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

■ 4. In § 81.313 amend in the table entitled ''Idaho—2012 Annual $PM_{2.5}$ NAAQS'' by revising the entry for ''Shoshone County (part)'' to read as follows:

Proposed Rules

Federal Register
Vol. 86, No. 218
Tuesday, November 16, 2021

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF ENERGY

10 CFR Parts 429 and 431

[EERE–2019–BT–STD–0018]

RIN 1904–AE12

Energy Conservation Program: Energy Conservation Standards for Distribution Transformers, Webinar and Availability of the Preliminary Technical Support Document

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Reopening of public comment period.

SUMMARY: On August 27, 2021, the U.S. Department of Energy (''DOE'') published a notification of a webinar and availability of preliminary technical support document that DOE conducted for purposes of evaluating energy conservation standards for distribution transformers. The notification provided an opportunity for submitting written comments, data, and information by November 10, 2021. DOE received requests from Cleveland-Cliffs Steel Corporation (Cleveland-Cliffs) and the National Electrical Manufacturers Association (NEMA) asking DOE for a 30-day extension of the public comment period. DOE has reviewed this request and is reopening the public comment period to allow public comments to be submitted until December 10, 2021.

DATES: The comment period for the RFI published on August 27, 2021 (86 FR 48058) is reopened. DOE will accept comments, data, and information regarding this notification received no later than December 10, 2021.

ADDRESSES: Interested persons are encouraged to submit comments using the Federal eRulemaking Portal at *www.regulations.gov.* Follow the instructions for submitting comments. Alternatively, interested persons may submit comments, identified by docket number EERE–2019–BT–STD–0018, by any of the following methods:

1. *Federal eRulemaking Portal: www.regulations.gov.* Follow the instructions for submitting comments.

2. *Email:* To *DistributionTransfromers 2019STD0018@ee.doe.gov.* Include docket number EERE–2019–BT–STD–0018 in the subject line of the message.

No telefacsimiles (''faxes'') will be accepted.

Although DOE has routinely accepted public comment submissions through a variety of mechanisms, including the Federal eRulemaking Portal, email, postal mail, or hand delivery/courier, the Department has found it necessary to make temporary modifications to the comment submission process in light of the ongoing Covid–9 pandemic. DOE is currently suspending receipt of public comments via postal mail and hand delivery/courier. If a commenter finds that this change poses an undue hardship, please contact Appliance Standards Program staff at (202) 586–1445 to discuss the need for alternative arrangements. Once the Covid–19 pandemic health emergency is resolved, DOE anticipates resuming all of its regular options for public comment submission, including postal mail and hand delivery/courier.

Docket: The docket for this activity, which includes **Federal Register** notices, comments, public meeting transcripts, and other supporting documents/materials, is available for review at *www.regulations.gov.* All documents in the docket are listed in the *www.regulations.gov* index. However, some documents listed in the index, such as those containing information that is exempt from public disclosure, may not be publicly available.

The docket web page can be found at *www.regulations.gov/docket?D=EERE-2019-BT-STD-0018.* The docket web page contains instructions on how to access all documents, including public comments in the docket.

FOR FURTHER INFORMATION CONTACT:

Mr. Jeremy Dommu, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Building Technologies Office, EE–5B, 1000 Independence Avenue SW, Washington, DC 20585–0121. Telephone: (202) 586–9870. Email: *ApplianceStandardsQuestions@ee.doe.gov.*

Mr. Matthew Ring, U.S. Department of Energy, Office of the General Counsel, GC–33, 1000 Independence Avenue SW, Washington, DC 20585–0121. Telephone: (202) 586–2555. Email: *matthew.ring@hq.doe.gov.*

For further information on how to submit a comment or review other public comments and the docket contact the Appliance and Equipment Standards Program staff at (202) 287–1445 or by email: *ApplianceStandardsQuestions@ee.doe.gov.*

SUPPLEMENTARY INFORMATION: On August 27, 2021, DOE published a notification announcing the availability of a technical support document and notification of a webinar on the preliminary analysis that DOE conducted for purposes of evaluating energy conservation standards for distribution transformers. 86 FR 48058. This webinar was held on September 29, 2021 and covered the analytical framework, models, and tools that DOE is using to evaluate potential standards for this equipment; the results of preliminary analyses performed by DOE for this equipment; the potential energy conservation standard levels derived from these analyses that DOE could consider for this product should it determine that proposed amendments are necessary; and any issues relevant to the evaluation of energy conservation standards for distribution transformers. In addition, the notification announced that DOE will be accepting written comments on these subjects on or before, November 10, 2021.

On October 29, 2021, NEMA requested a 30-day extension of the public comment period for this preliminary analysis. NEMA commented that given the volume of DOE analysis and number of questions posted, more time is needed to gather NEMA members together and prepare detailed industry responses. NEMA stated that manufacturers continue to face challenges in their businesses during the continued global pandemic and other supply chain disruptions and that more time will give greater opportunity to research and communicate accurate data and responses. (NEMA, No. 43 at p. 1) [1]

[1] The parenthetical reference provides a reference for information located in DOE's rulemaking docket. (Docket No. EERE-2019-BT-STD-0018, which is maintained at *www.regulations.gov/docket/EERE-2019-BT-STD-0018*). The references are arranged as follows: (Commenter name,

Cleveland-Cliffs also requested a 30-day extension of the public comment period for this preliminary analysis on November 5, 2021. Cleveland-Cliffs stated in their request that they are the only company in North America that procures Grain Oriented Electrical Steel, which is a critical and irreplaceable material used in distribution and dry-type transformers. Cleveland Cliff explained in their request that the preliminary analysis and technical support document is comprehensive and lengthy and that given the potentially significant impacts to transformer industry and specifically core steel selection, more time is needed to fully understand the impact to Cleveland-Cliffs' customer base and their business. (Cleveland-Cliffs, No. 44 at p. 1) [2]

DOE has reviewed the requests and is reopening the comment period to allow additional time for interested parties to submit comments. Therefore, DOE is reopening the comment period until December 10, 2021.

Signing Authority

This document of the Department of Energy was signed on November 9, 2021, by Kelly Speakes-Backman, Principal Deputy Assistant Secretary and Acting Assistant Secretary for Energy Efficiency and Renewable Energy, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on November 10, 2021.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

RIN 2120–AA64

Airworthiness Directives; Rolls-Royce Deutschland Ltd & Co KG (Type Certificate Previously Held by Rolls-Royce plc) Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for all Rolls-Royce Deutschland Ltd & Co KG (RRD) RB211 Trent 875–17, 877–17, 884–17, 884B–17, 892–17, 892B–17, and 895–17 model turbofan engines. This proposed AD was prompted by findings during engine overhaul of corrosion on the low-pressure compressor (LPC) front case assembly. This proposed AD would require inspection of the LPC front case assembly and, depending on the result of the inspection, accomplishment of the applicable corrective action(s), as specified in a European Union Aviation Safety Agency (EASA) AD, which is proposed for incorporation by reference (IBR). The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by January 3, 2022.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* (202) 493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For material that is proposed for IBR in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: *ADs@easa.europa.eu.* For RRD service information identified in this NPRM, contact Rolls-Royce plc, Corporate Communications, P.O. Box 31, Derby, DE24 8BJ, United Kingdom; phone: +44 (0)1332 242424; fax: +44 (0)1332 249936; website: *https://www.rolls-royce.com/contact-us.aspx.* You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call (781) 238–7759. The EASA material is also available at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–1004.

Examining the AD Docket

You may examine the AD docket at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–1004; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the EASA AD, any comments received, and other information. The street address for Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT: Nicholas Paine, Aviation Safety Engineer, ECO Branch, FAA, 1200 District Avenue, Burlington, MA 01803; phone: (781) 238–7116; email: *nicholas.j.paine@faa.gov*.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2021–1004; Project Identifier MCAI–2021–00480–E'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *https://www.regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM

contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Nicholas Paine, Aviation Safety Engineer, ECO Branch, FAA, 1200 District Avenue, Burlington, MA 01803. Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

EASA, which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2021–0114, dated April 23, 2021 (EASA AD 2021–0114), to correct an unsafe condition for certain RRD RB211 Trent 875–17, 877–17, 884–17, 884B–17, 892–17, 892B–17, and 895–17 model turbofan engines.

This proposed AD was prompted by findings during engine overhaul of corrosion on the LPC front case assembly caused by excessive movement between the Kevlar wrap and the fan case, which resulted in the anti-corrosion paint fretting away. The FAA is proposing this AD to address corrosion on the LPC front case assembly. This condition, if not addressed, could affect the containment integrity of the LPC front case assembly during a fan blade release event, resulting in damage to the airplane, or reduced control of the airplane.

See EASA AD 2021–0114 for additional background information.

FAA's Determination

These engines have been approved by the aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with the State of Design Authority, the FAA has been notified about the unsafe condition described in the EASA AD referenced in this AD. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Related Service Information Under 1 CFR Part 51

The FAA reviewed EASA AD 2021–0114. EASA AD 2021–0114 specifies actions for inspecting the LPC front case assembly and, depending on the result of the inspection, corrective action. This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in **ADDRESSES**.

Other Related Service Information

The FAA reviewed Rolls-Royce RB211 Trent 800 Series Propulsion Systems Alert Non-Modification Service Bulletin RB.211–72–AG774, Revision 4, dated October 13, 2020 (the NMSB). The NMSB specifies procedures for inspecting the LPC front case assembly for corrosion and taking corrective action.

Proposed AD Requirements in This NPRM

This proposed AD would require accomplishing the actions specified in EASA AD 2021–0114, described previously, as incorporated by reference, except for any differences identified as exceptions in the regulatory text of this proposed AD and except as discussed under ''Differences Between this Proposed AD and the EASA AD.''

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA initially worked with Airbus and EASA to develop a process to use certain EASA ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has since coordinated with other manufacturers and civil aviation authorities (CAAs) to use this process. As a result, the FAA proposes to incorporate EASA AD 2021–0114 in the FAA final rule. This proposed AD would require compliance with EASA AD 2021–0114 in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Using common terms that are the same as the heading of a particular section in EASA AD 2021–0114 does not mean that operators need comply only with that section. For example, where the AD requirement refers to ''all required actions and compliance times,'' compliance with this AD requirement is not limited to the section titled ''Required Action(s) and Compliance Time(s)'' in EASA AD 2021–0114. Service information specified by EASA AD 2021–0114 that is required for compliance with it will be available at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–1004 after the FAA final rule is published.

Differences Between This Proposed AD and the EASA AD

Qualified Shop Visit

EASA AD 2021–0114 defines a qualified shop visit as any scheduled shop visit where the affected part is exposed and substantial rebuild has not yet started, except shop visits for serviceability only. This proposed AD defines a qualified shop visit as the induction of an engine into the shop after the effective date of this AD for maintenance involving the separation of pairs of major mating engine flanges, with the exception of the separation of engine flanges solely for the purposes of transportation of the engine without subsequent engine maintenance.

Effective Date

Where EASA AD 2021–0114 requires compliance from its effective date, this proposed AD would require using the effective date of this AD.

Compliance

Where the service information referred to in EASA AD 2021–0114 specifies to inspect the affected part and contact the manufacturer for repair instructions if any corrosion is found exceeding the criteria as specified in the NMSB, this AD requires the removal of the affected LPC front case assembly from service if corrosion is found that exceeds the criteria specified in Appendix 2 of the NMSB.

Remarks

This AD does not mandate compliance with the ''Remarks'' section of EASA AD 2020–0114.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 98 engines installed on airplanes of U.S. Registry.

The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Perform ultrasonic inspection	8 work-hours × $85 per hour = $680	$0	$680	$66,640
Rework the LPC front case assembly	200 work-hours × $85 per hour = $17,000	18,724	35,724	3,500,952

The FAA estimates the following costs to do any necessary replacements that would be required based on the results of the proposed inspection. The FAA has no way of determining the number of aircraft that might need these replacements:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Replace the LPC front case assembly	140 work-hours × $85 per hour = $11,900	$932,000	$943,900

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

Rolls-Royce Deutschland Ltd & Co KG (Type Certificate previously held by Rolls-Royce plc): Docket No. FAA–2021–1004; Project Identifier MCAI–2021–00480–E.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by January 3, 2022.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Rolls-Royce Deutschland Ltd & Co KG (RRD) (Type Certificate previously held by Rolls-Royce plc) RB211 Trent 875–17, RB211 Trent 877–17, RB211 Trent 884–17, RB211 Trent 884B–17, RB211 Trent 892–17, RB211 Trent 892B–17, and RB211 Trent 895–17 model turbofan engines, as identified in EASA AD 2021–0114, dated April 23, 2021 (EASA AD 2021–0114).

(d) Subject

Joint Aircraft System Component (JASC) Code 7230, Turbine Engine Compressor Section.

(e) Unsafe Condition

This AD was prompted by findings during engine overhaul of corrosion on the low-pressure compressor (LPC) front case assembly caused by excessive movement between the Kevlar wrap and the fan case, which resulted in the anti-corrosion paint fretting away. The FAA is issuing this AD to address corrosion on the LPC front case assembly. The unsafe condition, if not addressed, could result in reduced integrity of the LPC front case assembly during a fan blade release, resulting in damage to the airplane or reduced control of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Except as specified in paragraph (h) of this AD: Perform all required actions within the compliance times specified in, and in accordance with, EASA AD 2021–0114.

(h) Exceptions to EASA AD 2021–0114

(1) Where EASA AD 2021–0114 requires compliance from its effective date, this proposed AD would require using the effective date of this AD.

(2) Where EASA AD 2021–0114 defines a qualified shop visit as any scheduled shop visit where the affected part is exposed and substantial rebuild has not yet started, this AD defines a qualified shop visit as the induction of an engine into the shop after the effective date of this AD for maintenance involving the separation of pairs of major mating engine flanges, with the exception of the separation of engine flanges solely for the purposes of transportation of the engine without subsequent engine maintenance, which does not constitute an engine shop visit.

(3) Where the service information referred to in EASA AD 2021–0114 specifies to contact the manufacturer for repair instructions if any corrosion is found exceeding the criteria as specified in the NMSB, this AD requires the removal of the affected LPC front case assembly from service if corrosion is found that exceeds the criteria specified in Appendix 2 of the NMSB.

(4) This AD does not mandate compliance with the ''Remarks'' section of EASA AD 2021–0114.

(i) No Reporting Requirement

Although the service information referenced in EASA AD 2021–0114 specifies to submit certain information to the manufacturer, this AD does not include that requirement.

(j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, ECO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ECO Branch, send it to the attention of the person identified in paragraph (k)(2) of this AD. Information may be emailed to: *ANE-AD-AMOC@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(k) Related Information

(1) For more information about EASA AD 2021–0114, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: *ADs@easa.europa.eu.* You may find this material on the EASA website at *https://ad.easa.europa.eu.* You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call (781) 238–7759. This material may be found in the AD docket at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–1004.

(2) For more information about this AD, contact Nicholas Paine, Aviation Safety Engineer, ECO Branch, FAA, 1200 District Avenue, Burlington, MA 01803; phone: (781) 238–7116; email: *nicholas.j.paine@faa.gov.*

(3) For RRD service information identified in this AD, contact Rolls-Royce plc, Corporate Communications, P.O. Box 31, Derby, DE24 8BJ, United Kingdom; phone: +44 (0)1332 242424; fax: +44 (0)1332 249936; website: *https://www.rolls-royce.com/contact-us.aspx.* You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call (781) 238–7759.

Issued on November 9, 2021.

Ross Landes,

Deputy Director for Regulatory Operations, Compliance & Airworthiness Division, Aircraft Certification Service.

[Docket No. FAA–2021–1002; Project Identifier AD–2021–00332–R]

RIN 2120–AA64

Airworthiness Directives; Sikorsky Aircraft Corporation Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for certain Sikorsky Aircraft Corporation Model S–76D helicopters. This proposed AD was prompted by reports that certain Thales global positioning system (GPS) satellite based augmentation system (SBAS) receivers provided, under certain conditions, erroneous outputs on aircraft positions. This proposed AD would require replacing affected GPS receivers and prohibit installing those GPS receivers. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by [January 3, 2022.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* (202) 493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact your local Sikorsky Field Representative or Sikorsky's Service Engineering Group at Sikorsky Aircraft Corporation, Mailstop K100, 124 Quarry Road, Trumbull, CT 06611; telephone 1–800–946–4337 (1–800–Winged–S); email *wcs_cust_service_eng.gr-sik@lmco.com.* Operators may also log on to the Sikorsky 360 website at *https://www.sikorsky360.com.* You may view this service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222–5110.

Examining the AD Docket

You may examine the AD docket at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–1002; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, any comments received, and other information. The street address for Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT: Nicholas Rediess, Aviation Safety Engineer, Boston ACO Branch, FAA, 1200 District Avenue, Burlington, MA 01803; phone: (781) 238–7159; fax: (781) 238–7199; email: *nicholas.rediess@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2021–1002; Project Identifier AD–2021–00332–R'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *https://www.regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI

as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Nicholas Rediess, Aviation Safety Engineer, Boston ACO Branch, FAA, 1200 District Avenue, Burlington, MA 01803; phone: (781) 238–7159; fax: (781) 238–7199; email: *nicholas.rediess@faa.gov.* Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The European Aviation Safety Agency (now European Union Aviation Safety Agency) (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2019–0004, dated January 11, 2019, and corrected on January 17, 2019 (EASA AD 2019–0004), to correct an unsafe condition for Thales AVS France SAS (Thales), formerly Thales Avionics SAS, GPS/SBAS receivers, Topstar 200 LPV, part number (P/N) C17149HA01 and C17149JA02, using SBAS, which are known to be installed on, but not limited to, certain Model ATR 42–500 and ATR 72–212A aeroplanes and Sikorsky Model S–76D helicopters. EASA advises of reports indicating that Thales GPS SBAS receivers provided, under certain conditions, erroneous outputs on aircraft positions. EASA AD 2019–0004 requires actions to prevent compromise of the safety margins when the receiver is used for Localizer Performance with Vertical guidance (LPV) and/or RNP–AR (Required Navigation Performance—Authorization Required) operations. Following the issuance of EASA AD 2019–0004, the FAA issued AD 2020–08–02, Amendment 39–21108 (85 FR 20586, April 14, 2020), to address the unsafe condition on these products.

After the issuance of EASA AD 2019–0004, EASA issued related EASA AD 2021–0013, dated January 13, 2021 (EASA AD 2021–0013), in response to a software update that was developed to ensure correct navigational performance of certain Thales GPS SBAS receivers installed on ATR–GIE Avions de Transport Régional, formerly EADS ATR—Alenia, Aerospatiale Matra ATR—ALENIA, Aerospatiale—Alenia, Aerospatiale—Aeritalia, Model ATR 42–500 and ATR 72–212A aeroplanes.

This proposed AD would require replacing affected GPS TopStar 200 LPV receivers installed on Sikorsky Aircraft Corporation Model S–76D helicopters. The FAA is proposing this AD to address erroneous aircraft position outputs from the GPS SBAS receivers, which could result in controlled flight into terrain, and subsequent loss of control of the helicopter.

FAA's Determination

The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Related Service Information Under 1 CFR Part 51

The FAA reviewed Sikorsky S–76D Helicopter Service Bulletin SB 76–017, Basic Issue, dated May 11, 2021 (SB 76–017). SB 76–017 specifies procedures for removing, updating, and installing GPS TopStar 200 LPV receivers. SB 76–017 also provides instructions for sending the GPS receiver(s) to Thales Authorized Repair Stations for the software update.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Proposed AD Requirements in This NPRM

This proposed AD would require replacing each affected GPS receiver and prohibit installing an affected GPS receiver on any helicopter.

Differences Between This Proposed AD and the Service Information

SB 76–017 requires returning the GPS receiver(s) to Thales Authorized Repair Stations for the software update, while this proposed AD would require replacing the GPS receiver(s) instead.

Costs of Compliance

The FAA estimates that this proposed AD would affect 22 helicopters of U.S. Registry and that operators may incur the following costs in order to comply with this proposed AD. Labor costs are estimated at $85 per work-hour.

Replacing a GPS receiver would take about 3 work-hours and parts would cost about $7,400, for an estimated cost of $7,655 per GPS receiver and $336,820 for the U.S. fleet.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

Sikorsky Aircraft Corporation: Docket No. FAA–2021–1002; Project Identifier AD–2021–00332–R.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by January 3, 2022.

(b) Affected ADs

This AD affects AD 2020–08–02, Amendment 39–21108 (85 FR 20586, April 14, 2020) (AD 2020–08–02).

(c) Applicability

This AD applies to Sikorsky Aircraft Corporation Model S–76D helicopters, certificated in any category, with Thales Global Positioning System (GPS) TopStar 200 LPV receiver part number (P/N) C17149HA01 installed.

(d) Subject

Joint Aircraft System Component (JASC) Code: 3457, Global Positioning System.

(e) Unsafe Condition

This AD was prompted by reports that certain Thales GPS satellite based augmentation system (SBAS) receivers provided, under certain conditions, erroneous outputs on aircraft positions. The unsafe condition, if not addressed, could result in controlled flight into terrain and loss of control of the helicopter.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

(1) Within 130 hours time-in-service after the effective date of this AD, replace each affected GPS receiver identified in paragraph (c) of this AD with GPS receiver P/N C17149RA01 in accordance with the Accomplishment Instructions, paragraphs A., C., and D., of Sikorsky S–76D Helicopter Service Bulletin SB 76–017, Basic Issue, dated May 11, 2021.

(2) As of the effective date of this AD, do not install a GPS receiver identified in paragraph (c) of this AD on any helicopter.

(3) Accomplishing paragraph (g)(1) of this AD terminates the requirements of AD 2020–08–02.

((h) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Boston ACO Branch, Compliance & Airworthiness Division, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (i)(1) of this AD.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(i) Related Information

(1) For more information about this AD, contact Nicholas Rediess, Aviation Safety Engineer, Boston ACO Branch, FAA, 1200 District Avenue, Burlington, MA 01803; phone: (781) 238–7159; fax: (781) 238–7199; email: *nicholas.rediess@faa.gov.*

(2) For service information identified in this AD, contact your local Sikorsky Field Representative or Sikorsky's Service Engineering Group at Sikorsky Aircraft Corporation, Mailstop K100, 124 Quarry Road, Trumbull, CT 06611; telephone 1–800–946–4337 (1–800–Winged–S); email *wcs_cust_service_eng.gr-sik@lmco.com.* Operators may also log on to the Sikorsky 360 website at *https://www.sikorsky360.com.* You may view this referenced service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222–5110.

Issued on November 8, 2021.

Lance T. Gant,

Director, Compliance & Airworthiness Division, Aircraft Certification Service.

AGENCY: National Transportation Safety Board (NTSB).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: For transparency of the agency's commercial space safety investigative authority, the NTSB is proposing adding Subpart F for Commercial Space Investigations to supplement its Investigation Procedures. By codifying its investigative role in commercial space transportation, the NTSB anticipates that Subpart F will enhance transportation safety by enabling the agency to carry out its statutory mission of conducting safety investigations, identifying necessary corrective actions, and preventing future space transportation accidents and incidents.

DATES: Submit written comments regarding this NPRM by January 18, 2022.

ADDRESSES: You may send comments, identified by Docket Number (No.) NTSB–2021–0008, by any of the following methods:

- *Federal e-Rulemaking Portal: https://www.regulations.gov.*
- *Email: rulemaking@ntsb.gov.*
- *Fax:* 202–314–6090.
- *Mail/Hand Delivery/Courier:* NTSB, Office of General Counsel, 490 L'Enfant Plaza East SW, Washington, DC 20594.

Instructions: All submissions in response to this NPRM must include Docket No. NTSB–2021–0008. All comments received will be posted without change to *https://www.regulations.gov,* including any personal information provided.

Docket: For access to the docket, go to *https://www.regulations.gov* and search Docket No. NTSB–2021–0008.

FOR FURTHER INFORMATION CONTACT: Kathleen Silbaugh, General Counsel, (202) 314–6080, *rulemaking@ntsb.gov.*

SUPPLEMENTARY INFORMATION:

I. Background and Purpose

The NTSB is an independent investigatory agency charged with determining the facts, circumstances, and causes of transportation accidents and incidents. The NTSB's investigation procedures are contained in part 831, which is divided into subparts. The procedures applicable to all modes of transportation are contained in Subpart A of 49 CFR part 831. Subparts B–E are specific to the type of transportation; Subpart B, for example, focuses on Aviation Investigations. The agency notes that the commercial space industry is a unique mode of transportation and the investigatory needs of a commercial space accident and incident—such as the reporting of commercial space accidents and incidents, and the preservation of wreckage, evidence, and records—are distinct enough to warrant its own subpart. Thus, the NTSB proposes the addition of Subpart F for Commercial Space Investigations.

The agency's statutory authority to investigate commercial space launch accidents derives from 49 U.S.C. 1131(a)(1)(F), which provides in pertinent part that the NTSB shall investigate and establish the facts, circumstances, and probable cause of any other accident related to the transportation of any other individuals or property when the Board decides the accident is catastrophic, the accident involves problems of a recurring character, or investigating the accident would carry out the NTSB's statutory mandate.

The NTSB has exercised this authority and both led and supported commercial space launch and reentry investigations for more than 20 years. For example, the NTSB investigated the February 9, 1993, procedural anomaly associated with the launch of an Orbital Sciences Corporation Pegasus expendable launch vehicle. The NTSB investigated the incident and issued safety recommendations to the U.S. Department of Transportation (DOT), the National Aeronautics and Space Administration (NASA), and Orbital Sciences Corporation.

The NTSB also led the investigation of the SpaceShipTwo test flight breakup on October 31, 2014, involving one fatality and one serious injury. In testimony before the Subcommittee on Aviation, Committee on Transportation and Infrastructure, United States House of Representatives on February 27, 2018, the NTSB's then Director of Aviation Safety (Director) referenced the SpaceShipTwo investigation, stating: ''[f]oremost among the safety issues identified was the need to consider and protect against human error for safe manned spaceflight, which is the responsibility of designers, operators, and overseers.'' The Director further testified that there are circumstances within commercial space when the definition of accident or incident would not be met, and the NTSB would not be involved.

The NTSB was requested to assist several significant noncommercial space investigations; including those involving the Space Shuttle Columbia and NASA Genesis. On February 1, 2003, when the Space Shuttle Columbia fatally broke up while reentering Earth, NTSB investigators launched immediately to assist NASA and the Columbia Accident Investigation Board with the investigation. Several NTSB performance engineers, radar specialists and weather experts conducted ballistic analysis of the vehicle debris and examined radar and weather data to define the wreckage area in order to locate debris. Six NTSB investigators also helped NASA engineers reassemble the shuttle at Cape Canaveral. Overall, more than 50 NTSB employees supported this investigation.

For the September 8, 2004, NASA Genesis sample-return capsule crash in Tooele, Utah, an NTSB investigator launched to the accident scene with NASA's mishap investigation board to document the site and recover wreckage, and to set up the investigation and develop the investigation plan. The NTSB Systems and Materials Laboratory investigators also participated by examining and documenting the vehicle's wiring harness, and by developing and reviewing portions of the final report.

As in all transportation modes, the NTSB neither regulates commercial space nor finds fault when investigating mishaps; instead, the NTSB's investigations focus on safety issues. Accordingly, the NTSB is proposing Subpart F to clarify the extent of the agency's involvement and the process that will be followed by all parties in an NTSB-led commercial space investigation.

In conducting commercial space investigations, the NTSB adheres to the terms memorialized in a Memorandum of Agreement (Agreement) with the Federal Aviation Administration (FAA) [1] and in a Memorandum of Understanding (MOU) with the FAA and the United States Air Force (USAF).[2] It is important to note that the Agreement and MOU were developed before commercial human spaceflight, or reusable launch vehicles, was realistically foreseen and so only address cargo operations. The purpose of the Agreement and MOU was to specify when the NTSB would initiate an investigation into a commercial space mishap.

The 1975 Reimbursable Memorandum of Agreement between NTSB and DOT establishes the relationships, notification procedures, coordination requirements, and reporting responsibilities of both agencies. The Agreement further identifies and describes the conditions and agreements that exist regarding the exchange of data, availability of resources, conduct of studies and other services, and reimbursement for services rendered. Significantly, the Agreement acknowledges that while the objectives of both agencies' investigations are similar, the Agreement expounds on the differences—the NTSB investigates accidents to determine their probable cause and propose recommendations; whereas the DOT investigates to determine compliance with its regulations, evaluate improvements that should be made to existing standards and regulations and/or the transportation system to improve safety, and take appropriate enforcement action for any regulatory violation.

The Agreement categorizes each mode of transportation into separate appendices that detail the investigative procedures for a specific area of transportation. Appendix H addresses commercial travel, which was added in 1985 and subsequently revised in 1999 with non-substantive edits. Appendix H clarifies that the NTSB will investigate all commercial space launch accidents resulting in known impact of a commercial launch vehicle, its payload or any component thereof outside the impact limit lines designated by the launch range facility; or a fatality or serious injury as defined in 49 CFR 830.2 to any person who is not associated with commercial space launch activities and not located on the launch range facility; or any damage estimated to exceed $25,000 to property which is not associated with commercial space launch activities and which is not located on the launch range facility. Appendix H notes that the agreement does not impair the NTSB's authority to investigate other commercial space launch accidents which, in the judgment of the NTSB, are subject to section 304(a)(1)(F) of the Independent Safety Board Act of 1974.[3] Appendix H provides that any other investigations of commercial space launch accidents by the NTSB, other than those described, will be subject to the mutual agreement of the NTSB and the FAA's Associate Administrator for Commercial Space Transportation (AST).

The MOU became effective in September 2004 and establishes the relationship among the NTSB, FAA, and USAF during space launch accidents and provides a guide to the exchange of information and participation in accident investigations.[4]

Both the Agreement and the MOU remain in effect. Notably, at the time both documents were signed, commercial human space launches were not viable. With commercial human space flight now a reality, however, the NTSB believes codifying its authority to investigate commercial space safety accidents and incidents in Subpart F is necessary. By transitioning and updating the information from the Agreement and MOU to Subpart F, the commercial space industry would have better clarity on when the NTSB would initiate an investigation of a commercial space mishap. This process will also allow industry to provide feedback to the NTSB through the rulemaking process for any future updates as the industry develops.

The NTSB acknowledges that the DOT's authority to license commercial space transportation activities stems from 51 U.S.C. Chapter 509 for Commercial Space Launch Activities. Significantly, that authority did not include the process for investigating commercial space accidents and incidents independent of any NTSB intervention. While 51 U.S.C. 50917(a) does mention that in carrying out Chapter 509 the DOT Secretary may ''conduct investigations and inquiries,'' it does not appear that Chapter 509 was designed to give the DOT the

[1] *https://www.faa.gov/documentLibrary/media/Order/FAA_Order_8020.11D.pdf.*

[2] *https://www.faa.gov/space/legislation_regulation_guidance/media/mou_space_launch_accidents.pdf.*

[3] *https://www.ntsb.gov/safety/safety-studies/Documents/SIR9302.pdf.*

[4] *https://www.faa.gov/space/legislation_regulation_guidance/media/mou_space_launch_accidents.pdf.*

independent authority to investigate commercial space accidents and incidents. Introduced in the House of Representatives as the Commercial Space Launch Act (Act) on June 5, 1984, Congressman Harold Lee Volkmer clarified that the Act assigned the DOT the responsibility for issuing and enforcing commercial launch licenses, and for encouraging private sector use of government-developed space technology.[5] He noted that the purpose of the bill was to promote economic growth, simplify licensing, and have the DOT oversee commercial launch operations and issue licenses to conduct such activities.[6] Based on the deliberations of other representatives, it is evident that the intent of the legislation was to encourage private sector participation in the commercial space industry for the benefit of the U.S. economy. This intent was further expressed by Senator Paul Seward Trible, Jr., who explicitly stated that the central purpose of the legislation was to encourage the growth of a commercial space launch capability.[7] He continued that the bill designated the DOT as the lead agency to encourage and facilitate expendable launch vehicle commercialization.

The NTSB further acknowledges that the Congress does not wish to discourage development of this emerging industry and has charged the FAA to primarily focus on protection of the public and that the spaceflight participants are taking part in an inherently risky mode of transportation. The NTSB recognizes the ''learning period'' is still in effect that limits regulations ''restricting or prohibiting design features or operating practices,'' and that there is a need to restrict the release of certain sensitive information to safeguard critical defense-related technologies in order to protect United States national security and foreign policy objectives (International Traffic in Arms Regulations (ITAR), and Export Administration Regulation (EAR)).

Consistent with this legislative history and the NTSB's statutory authority, the Board believes that codifying NTSB's commercial space safety investigations in Subpart F is warranted under 49 U.S.C. 1131(a)(1)(F). The Board notes that per 49 U.S.C. 1131(b), the NTSB has statutory priority over any investigation by a U.S. department or agency. The issuance of Subpart F would resolve the matters currently addressed in Appendix H with the FAA.

II. Section-by-Section Analysis

831.70 Authority

Section 831.70 references the NTSB's statutory authority under 49 U.S.C. 1131(a)(1)(F), which provides that the NTSB shall investigate and establish the facts, circumstances, and probable cause of any other accident related to the transportation of any other individuals or property when the Board decides that the accident is catastrophic; the accident involves problems of a recurring character; or the investigation of the accident would carry out the NTSB's statutory authority.

831.71 Purpose

Section 831.71 specifies that Subpart F establishes the agency's safety investigative procedures for commercial space accidents or incidents.

831.72 Applicability

Section 831.72 clarifies that the NTSB would investigate a commercial space launch or reentry accident, but may investigate a commercial space launch or reentry incident licensed by FAA AST.

831.73 Definitions

Section 831.73 establishes the terminology used in Subpart F.

831.74 Immediate Notification

In the event of a commercial space launch or reentry accident or incident, § 831.74 requires that licensees and permittees immediately call the NTSB's Response Operation Center.

831.75 Information To Be Given in Notification

Section 831.75 establishes what must be reported in the event of a commercial space launch or reentry accident or incident.

831.76 Preservation of Commercial Space Launch or Reentry Vehicle Wreckage, Payload, and Records

Section 831.76 addresses what a licensee or permittee must do when preserving the wreckage, payload, and records. The preservation of materials, documents, data, and wreckage is essential for the NTSB's safety investigation and the accompanying safety recommendations.

831.77 Nature of Investigation

Section 831.77 clarifies why the NTSB conducts its safety investigations, and that the agency determines probable cause and issues safety recommendations. This section further clarifies that the agency does not investigate all incidents; whether the NTSB investigates a launch or reentry incident is contingent on the circumstances of the mishap.

831.78 Relationships With Other Agencies

Section 831.78 allows for participation of other Federal agencies, but establishes the limitations and expectations of the participants.

831.79 Request To Withhold Information

While § 831.13 is applicable to Subpart F, the NTSB is adding § 831.79 to address the protection of defense-related technologies. The regulation is intended to safeguard U.S. national security and further U.S. foreign policy objectives.

831.80 Provision and Dissemination of Investigative Information

Section 831.80 provides that § 831.13 applies to commercial space investigations, but adds that the release of information will comply with the applicable export control regulations.

831.81 Commercial Space Investigation Interviews

Section 831.81 supplements the provisions contained in § 831.7, but puts the public on notice that interviews or statements conducted during an NTSB commercial space investigation will become part of the public record subject to the applicable export control regulations.

III. Regulatory Analysis

Because the NTSB is an independent agency, this proposed rule does not require an assessment of its potential costs and benefits under section 6(a)(3) of Executive Order (E.O.) 12866, Regulatory Planning and Review, 58 FR 51735 (Sept. 30, 1993). In addition, the NTSB has considered whether this rule would have a significant economic impact on a substantial number of small entities, under the Regulatory Flexibility Act (5 U.S.C. 601–612). The NTSB certifies under 5 U.S.C. 605(b) that this rule would not have a significant economic impact on a substantial number of small entities.

The NTSB does not anticipate this rule will have a substantial, direct effect on state or local governments or will preempt state law; as such, this rule does not have implications for federalism under E.O. 13132, Federalism, 64 FR 43255 (Aug. 4, 1999).

This rule complies with all applicable standards in sections 3(a) and 3(b)(2) of E.O. 12988, Civil Justice Reform, 61 FR

[5] 98 Cong. Rec. H. 3942 (daily ed. June 5, 1984) (statement of Rep. Volkmer).

[6] *Id.*

[7] 98 Cong. Rec. H. 3942 (daily ed. Oct. 9, 1984) (statement of Sen. Trible).

4729 (Feb. 5, 1996), to minimize litigation, eliminate ambiguity, and reduce burden. The NTSB has evaluated this rule under: E.O. 12898, Federal Actions to Address Environmental Judice in Minority Populations and Low-Income Populations, 59 FR 7629 (Feb. 16, 1994); E.O. 13045, Protection of Children from Environmental Health Risks and Safety Risks, 62 FR 19885 (Apr. 21, 1997); E.O. 13175, Consultation and Coordination with Indian Tribal Governments, 65 FR 67249 (Nov. 6, 2000); E.O. 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use, 66 FR 28355 (May 18, 2001); and the National Environmental Policy Act, 42 U.S.C. 4321–47 The NTSB has concluded that this proposed rule neither violates nor requires further consideration under those orders, statutes, E.O.s, and acts.

The Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3507(d)) requires that the NTSB consider the impact of paperwork and other information collection burdens imposed on the public. Here, proposed rule 831.74 directs the public to call the agency's Response Operations Center when reporting a commercial space accident or incident, and provide the information enumerated in proposed 49 CFR 831.75. The NTSB will use the information collected to determine whether to commence an investigation into the commercial space accident or incident. Additionally, the accuracy of the information collected will be used in issuing safety recommendations to prevent future commercial space accidents and incidents. However, because the NTSB anticipates that it will receive less than one notification of a mishap accident/incident per year, the agency will not submit an information collection request to the Office of Management and Budget. In other words, the NTSB is not imposing an information collection on ten or more persons to trigger the PRA.

List of Subjects in 49 CFR Part 831

Accident, Commercial space launch, Commercial space reentry, Incident, Mishap, Space transportation.

For the reasons set forth in the preamble, the NTSB proposes to add 49 CFR part 831 to read as follows:

PART 831—INVESTIGATION PROCEDURES

■ 1. The general authority citation for part 831 continues to read as follows:

Authority: 49 U.S.C. 1113(f).

■ 2. Add subpart F to read as follows:

Subpart F—Commercial Space Investigations

Sec.

Authority: 49 U.S.C. 1113(f), 1116, 1131(a)(1)(F); 49 CFR 831.2(d).

§ 831.70 Authority.

The NTSB conducts commercial space investigations under 49 U.S.C. 1131(a)(1)(F) and works closely with parties to the investigation to collect evidence related to a commercial launch or reentry accident. An investigation conducted under the authority of the NTSB has priority over any investigation conducted by another Federal agency, except those conducted by a commission initiated by the President of the United States.

§ 831.71 Purpose.

This subpart establishes investigative procedures specifically related to commercial space accidents or incidents.

§ 831.72 Applicability.

The regulations in this subpart apply when the NTSB is leading an investigation into a launch or reentry commercial space accident, or has elected to investigate a launch or reentry incident. This subpart pertains to:

(a) Initial notification and later reporting of commercial space launch and reentry accidents licensed by Federal Aviation Administration's (FAA) Associate Administrator for Commercial Space Transportation (AST), as specified in this part, wherever they occur.

(b) Preservation of launch or reentry vehicles, as specified in this part.

§ 831.73 Definitions.

As used in this subpart the following words or phrases are defined as follows:

Commercial space launch means a launch authorized to be conducted under a license or permit issued by the FAA.

Commercial space reentry means a reentry authorized to be conducted under a license or permit issued by the FAA.

Fatal injury means any injury which results in death within 30 days of the accident.

Launch or reentry accident means any mishap associated with an FAA-licensed or permitted activity resulting in:

(1) A fatal injury or serious injury to any person as a result of the operation of the vehicle; or

(2) The impact of hazardous debris outside the designated hazard area or designated landing site (excluding unmanned vehicles that cause no hazard to the public).

Launch or reentry incident means any mishap associated with an FAA-licensed or permitted activity resulting in:

(1) A malfunction of a safety-critical system (*i.e.,* flight termination system, etc.);

(2) A failure of the licensee's or permittee's safety organization, safety operations, or safety procedures; or

(3) A hazardous condition with increased likelihood of causing serious or fatal injuries to any person (*i.e.,* use of launch escape system).

Mishap means a launch or reentry accident, launch or reentry incident, failure to complete a launch or reentry as planned, or an unplanned event or series of events resulting in a fatality or serious injury.

Serious injury means an injury as defined under 49 CFR 830.2.

§ 831.74 Immediate notification.

In the event of a mishap, the licensee or permittee of any launch or reentry vehicle shall immediately notify the NTSB's Response Operations Center at 844–373–9922 or 202–314–6290.

§ 831.75 Information to be given in notification.

The notification required in § 831.74 shall contain the following information, if available:

(a) Date and time of the accident or incident;

(b) Launch vehicle;

(c) Launch/reentry licensee or permittee;

(d) Type of activity (launch, reentry, landing);

(e) Vehicle damage;

(f) Location of the launch or reentry vehicle with reference to some easily-defined geographical point;

(g) Number of persons involved, number killed, and number seriously injured; and

(h) Circumstances of the accident or incident.

§ 831.76 Preservation of commercial space launch or reentry vehicle wreckage, payload, and records.

(a) The licensee or permittee of a commercial space launch or reentry vehicle involved in an accident or incident for which notification must be given, is responsible for preserving the following until the Board takes custody thereof or a release is granted pursuant to § 831.12(b):

(1) Any wreckage and payload aboard the vehicle; and

(2) All records, including but not limited to all recording mediums, maintenance, and voice and video recorders, pertaining to the operation and maintenance of the launch or reentry vehicle.

(b) Prior to the time the Board or its authorized representative takes custody of the wreckage or payload, such wreckage or payload may not be disturbed or moved except to the extent necessary:

(1) To remove persons injured or trapped;

(2) To protect the wreckage from further damage; or

(3) To protect the public from injury.

(c) Where it is necessary to move the wreckage or payload, sketches, descriptive notes, and photographs shall be made, if possible, of the original positions and condition of the wreckage and any significant impact marks.

(d) The licensee or permittee of a launch or reentry vehicle involved in an accident or incident shall preserve and retain all streamed and digital data that is on board the launch or reentry vehicle, telemetered to an offsite location, or that is recorded remotely (*i.e.,* ground station, chase plane, etc.).

(e) The licensee or permittee of a launch or reentry vehicle involved in an accident or incident shall retain all records, reports, internal documents, and memoranda dealing with the accident or incident, until the Board authorizes its release.

§ 831.77 Nature of investigation.

The NTSB conducts investigations to determine the facts, conditions, and circumstances relating to a launch or reentry accident or incident. The NTSB uses these results to determine one or more probable causes, and to issue safety recommendations to prevent or mitigate the effects of a similar commercial space casualty launch or reentry accident or incident.

§ 831.78 Relationships with other agencies.

(a) The NTSB will provide for appropriate participation by other Federal agencies in any NTSB investigation. Such agencies may not participate in the NTSB's probable cause determination.

(b) Nothing in this section impairs the authority of any other Federal agency to investigate a commercial launch or reentry accident under applicable provisions of law. These agencies are expected to coordinate with the NTSB Investigator-in-Charge (IIC) to avoid interference with and duplication of the NTSB's investigative efforts.

§ 831.79 Request to withhold information.

In addition to the provisions established in § 831.6, the NTSB will not disclose any information subject to export control regulations related to defense and military technologies. The NTSB will coordinate with the appropriate government agencies to ensure all publicly-released investigative reports or public meetings comply with applicable regulations.

§ 831.80 Provision and dissemination of investigative information.

In addition to the provisions provided in § 831.13, the release of information will comply with the applicable export control regulations.

§ 831.81 Commercial space investigation interviews.

In addition to the provisions set forth in § 831.7, interviews or statements conducted during an NTSB commercial space investigation will become part of the public record subject to the applicable export control regulations.

Jennifer Homendy,

Chair.

Notices

Federal Register
Vol. 86, No. 218
Tuesday, November 16, 2021

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2021–0072]

Notice of Request for Extension of Approval of an Information Collection; Agriculture Organisms and Vectors; Import and Transport Permits

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request an extension of approval of an information collection associated with the regulations for safe importation and transport of organisms and vectors.

DATES: We will consider all comments that we receive on or before January 18, 2022.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to *www.regulations.gov.* Enter APHIS–2021–0072 in the Search field. Select the Documents tab, then select the Comment button in the list of documents.
- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS–2021–0072, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road, Unit 118, Riverdale, MD 20737–1238.

Supporting documents and any comments we receive on this docket may be viewed at *www.regulations.gov* or in our reading room, which is located in Room 1620 of the USDA South Building, 14th Street and Independence Avenue SW, Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799–7039 before coming.

FOR FURTHER INFORMATION CONTACT: For information regarding the VS permitting process for organisms and vectors, contact Dr. Troy T. Bigelow, Senior Staff Veterinarian, Organisms and Vectors Permitting, Animal Products Import and Export, Strategy and Policy, VS, APHIS, 1920 Dayton Avenue, Ames, IA 50010, (301) 851–3464. For more information on the information collection reporting process, contact Mr. Joseph Moxey, APHIS' Paperwork Reduction Act Coordinator, at (301) 851–2483; *joseph.moxey@usda.gov.*

SUPPLEMENTARY INFORMATION:

Title: Agriculture Organisms and Vectors; Import and Transport Permits.

OMB Control Number: 0579–0213.

Type of Request: Extension of approval of an information collection.

Abstract: The Animal Health Protection Act (AHPA) of 2002 (7 U.S.C. 8301 *et seq.*) authorizes the U.S. Department of Agriculture (USDA) to oversee the importation, entry, and movement in the United States of animals, pests or diseases, or any material or tangible object that could harbor them. Under the AHPA, USDA regulates certain organisms, vectors, and animal products that could pose a severe threat to animal health or to animal products through the risk of disease or pest introduction.

The Animal and Plant Health Inspection Service (APHIS) has the primary responsibility for implementing the provisions of the AHPA within USDA. APHIS regulations for these activities are contained in 9 CFR part 94 (animals and animal products), 9 CFR part 95 (animal byproducts), and 9 CFR part 122 (organisms and vectors). There is also a requirement for an individual or entity, unless specifically exempted under the regulations, to apply for and be granted, by APHIS, a permit authorizing specific import or transport activities for regulated materials prior to receipt of the requested materials.

The permit application process entails the use of forms designed to obtain critical information concerning individuals or entities seeking a permit, as well as the specific characteristics of the material to be permitted. This data is needed, in part, to allow APHIS to assess the risk of importing or transporting the material, as well as the biosecurity and biosafety mitigations in place at the receiving location. This, in turn, enables APHIS to ensure that appropriate safeguard, containment, and disposal requirements commensurate with the risk of the materials are implemented during transport, import, and upon receipt to protect against the spread or introduction of disease.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.,* permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 1.84 hours per response.

Respondents: Researchers, universities, research and development organizations, diagnostic laboratories, and other interested parties who possess, use, or transfer select agents or toxins.

Estimated annual number of respondents: 3,154.

Estimated annual number of responses per respondent: 1.

Estimated annual number of responses: 3,283.

Estimated total annual burden on respondents: 6,055 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request

for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 9th day of November 2021.

Jack Shere,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

Privacy Act of 1974; System of Records

AGENCY: Architectural and Transportation Barriers Compliance Board.

ACTION: Notice; proposed new system of records.

SUMMARY: In accordance with the Privacy Act of 1974, as amended, the Architectural and Transportation Barriers Compliance Board (Access Board or Board) is proposing to establish a new system of records titled, ''USAB.001—Reasonable Accommodation Records.'' This system of records covers records related to the administration, adjudication, and implementation of reasonable accommodation requests by agency employees and applicants for employment. The Office of Management and Budget has approved publication of this Notice after expedited review.

DATES: This Notice is effective on publication, with the exception of the routine uses. The routine uses will be effective 30 days after publication, unless comments are received that dictate otherwise. Written comments should be submitted December 16, 2021.

ADDRESSES: You may submit comments on this notice by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Email: privacy@access-board.gov.*
- *Mail:* Office of General Counsel, U.S. Access Board, 1331 F Street NW, Suite 1000, Washington, DC 20004–1111.

Instructions: All comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided.

FOR FURTHER INFORMATION CONTACT: Wendy Marshall, Attorney-Advisor and Privacy Officer, (202) 272–0043, *marshall@access-board.gov.*

SUPPLEMENTARY INFORMATION: The Access Board is publishing this notice to inform the public of the creation of a new system of records relating to accommodation requests from Access Board employees and applicants. Section 501 of the Rehabilitation Act of 1973 requires federal employers to provide reasonable accommodations to qualified individuals with disabilities who are employees or applicants, unless doing so would cause undue hardship. 29 U.S.C. 791. Similarly, Title VII of the Civil Rights Act of 1964 requires an employer, once on notice, to reasonably accommodate an employee whose sincerely-held religious belief, practice, or observance conflicts with a work requirement, unless providing the accommodation would create an undue hardship. 42 U.S.C. 2000e. Reasonable accommodations provide modifications or adjustments to: (1) The job application process; (2) the work environment; and/or (3) the manner in which a position is customarily performed. The proposed records system is necessary to allow the Access Board to collect and maintain records on employees or applicants who request reasonable accommodations based on either disability or sincerely-held religious belief, practice, or observance. Additionally, it will also enable the Board to track and report the processing of accommodation requests agency-wide to comply with applicable laws and regulations.

SYSTEM NAME:

USAB.001—Reasonable Accommodation Records.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

U.S. Access Board, 1331 F Street NW, Suite 1000, Washington, DC 20004.

SYSTEM MANAGER:

Director of Administration, U.S. Access Board, 1331 F Street NW, Suite 1000, Washington, DC 20004.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 29 U.S.C. 791 *et seq.;* 42 U.S.C. 12101 *et seq.;* 42 U.S.C. 2000e *et seq.;* 42 U.S.C. 2000bb *et seq.;* 44 U.S.C. 3101; 29 CFR 1605, 1614; Executive Order (E.).) 13164 (July 28, 2000); and E.O. 13548 (July 10, 2010).

PURPOSE(S) OF THE SYSTEM:

This system of records is intended to support the receipt, review, evaluation of requests made to the Access Board for reasonable accommodations (regardless of type of accommodation), the outcome of such requests, and the implementation of approved accommodations. Additionally, this record system is also intended to track and report the processing of requests for USAB-wide reasonable accommodations to comply with applicable laws and regulations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals covered by this system include prospective, current, and former Access Board employees (including, but not limited to, full-time and part-time employees, temporary hires, interns, and co-op students.) who have requested reasonable accommodations.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name and employment information of current or prospective employee needing an accommodation; requester's name and contact information (if different than the employee who needs an accommodation); date request was initiated; information concerning the nature of the disability or religious belief, practice, or observance and the need for accommodation, including appropriate medical or other documentation; occupational series; pay grade; essential duties of the position; details of the accommodation request, such as: Type of accommodation requested, how the requested accommodation would assist in job or allow job performance while accommodating the disability or religious belief, practice, or observance; the sources of technical assistance consulted in trying to identify alternative reasonable accommodation; any additional information provided by the requester relating to the processing of the request; whether the request was approved or denied; whether the accommodation was approved for a trial period; and, documentation between the employee and his/her supervisor(s) regarding the accommodation.

RECORD SOURCE CATEGORIES:

Subject individuals; individual making the request (if different than the subject individuals); medical and equal employment opportunity professionals; and the subject individuals' supervisor(s).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, disclosures outside the agency may be made as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

1. Law Enforcement—In the event that a system of records maintained by the Access Board to carry out its functions indicates a violation or potential

violation of law, whether criminal, civil, or regulatory in nature, and whether arising by general statute or particular program pursuant thereto, the relevant records in the system of records may be disclosed to the appropriate agency, whether federal, state, local, or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation, or order issued pursuant thereto.

2. Disclosure When Requesting Information—A record from this system of records may be disclosed to a federal, state, or local agency or to another public or private source maintaining civil, criminal, or other relevant enforcement information or other pertinent information, if and to the extent necessary to obtain information relevant to an Access Board decision concerning the hiring or retention of an employee, personnel security (*e.g.,* suitability/fitness determinations), or the letting of a contract.

3. Disclosure of Existence of Record Information—With the approval of the Access Board Executive Director, the Director of Administration (or his or her designee), the fact that this system of records includes information relevant to a federal agency's decision in connection with the hiring or retention of an employee, personnel security (*e.g.,* suitability, fitness determinations), retention of a security clearance, the letting of a contract, or the issuance of a license, grant, or other benefit may be disclosed to that federal agency.

4. Disclosure in Litigation—A record from this system of records may be disclosed in a proceeding before a court or other adjudicative body in which the Access Board, an employee of the Access Board in his or her official capacity, or an employee of the Access Board in his or her individual capacity if the Access Board (or the Department of Justice (''DOJ'')) has agreed to represent him or her is a party, or the United States or any other federal agency is a party and the Access Board determines that it has an interest in the proceeding, if the Access Board determines that the record is relevant to the proceeding and that the use is compatible with the purpose for which the Access Board collected the information.

5. Disclosure to the Department of Justice in Litigation—When the Access Board, an employee of the Access Board in his or her official capacity, or an employee of the Access Board in his or her individual capacity whom the Access Board has agreed to represent is a party to a proceeding before a court or other adjudicative body, or the United States or any other federal agency is a party and the Access Board determines that it has an interest in the proceeding, a record from this system of records may be disclosed to the DOJ if the Access Board is consulting with the DOJ regarding the proceeding or has decided that the DOJ will represent the Access Board, or its interest, in the proceeding and the Access Board determines that the record is relevant to the proceeding and that the use is compatible with the purpose for which the Access Board collected the information.

6. Congressional Inquiries—A record from this system of records may be disclosed to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of the individual.

7. Disclosure in Response to a Federal Data Breach—A record from this system of records may be disclosed to appropriate agencies, entities, and persons when: (1) The Access Board suspects or has confirmed that there has been a breach of the system of records; (2) the Access Board as determined that, as a result of the suspected or confirmed breach, there is a risk of harm to individuals, the Board (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with Access Board efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

8. Contractors, Experts, and Consultants—To contractors, experts, consultants, and the agents of thereof, and others performing or working on a contract, service, cooperative agreement, or other assignment for the Access Board when necessary to accomplish an agency function. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to Access Board employees.

9. Records Management—To the National Archives and Records Administration or to the General Services Administration for records management inspections conducted under 44 U.S.C. 2904 and 2906.

10. Gathering Information—To any source from which information is requested in the course of processing a grievance, investigation, arbitration, or other litigation, to the extent necessary to identify the individual, inform the source of the purpose(s) of the request, and identify the type of information requested.

11. Disclosure to a Federal Agency—To disclose information to a Federal agency, in response to its request, in connection with hiring or retaining an employee, issuing a security clearance, conducting a security or suitability investigation of an individual, or classifying jobs, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

12. Assistance to Federal Agencies and Entities—To another Federal agency or Federal entity, when the Access Board determines that information from this system is reasonably necessary to assist the recipient agency or entity in: (a) Responding to a suspected or confirmed breach or (b) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, program, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

13. Medical Providers—To physicians or other medical professionals to provide them with, or obtain from them, the necessary medical documentation and/or certification for reasonable accommodations.

14. Decisions Concerning Reasonable Accommodation—A record in this system of records may be disclosed, but only to the extent necessary, to individuals involved in processing a request for reasonable accommodation or in providing any accommodation granted, including medical professionals; agency counsel; individuals consulted outside of the Access Board, such as employees of the Equal Employment Opportunity Commission or other federal agencies concerning the Access Board's legal obligations; and vendors of assistive technology or other devices needed as accommodations.

15. Alternative Dispute Resolution—To appropriate third-parties contracted by the Access Board to facilitate mediation or other alternative dispute resolution procedures or programs.

16. Medical Emergency—To medical personnel to meet a bona fide medical emergency.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records in this system consist of electronic and/or hard-copy (paper) records. Paper files are maintained in locked file cabinets. Electronic records are maintained in restricted access folders on the Access Board's internal, cloud-based General Support System

(GSS), which is Fed-RAMP compliant. Access is limited to the system owner(s) and other agency personnel who have an official need for access to perform their duties (*e.g.,* IT administrators, agency litigation counsel). Access Board policy requires new employees to read and acknowledge the rules of behavior applicable to all agency information technology systems (including appropriate protection and handling of personally identifiable information) before getting access to these systems and complete annual cybersecurity awareness training.

POLICIES AND PRACTITCES FOR RETRIEVAL OF RECORDS:

Records are retrievable by a variety of fields including, but not limited to, the individual's name, date of request, and nature of accommodation request. Records are typically retrieved by requester name.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Electronic and paper records are retained in accordance with the National Archives and Records Administration (NARA)'s General Records Schedule 2.3, Employee Relations Records, Item ## 020 (administrative program files) and 021 (employee case files), which prescribes a three-year retention period. For administrative program files, the retention period dates from file supersession. For employee case files the retention period dates from either employee separation from the agency or conclusion of any appeals, whichever is later. When eligible for destruction, electronic records are securely destroyed or erased using methods prescribed by the National Institute of Standards and Technology. Hard-copy records are permanently destroyed by shredding or burning.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Access to system records is restricted to authorized Access Board personnel who are system owners or have an official need to access such records to perform their duties. Electronic records are stored in restricted-access folders on the Access Board's internal, cloud-based GSS. Access to electronic records is controlled by technical safeguards through assignment of system roles and permissions, secure log-ins, time-out features, firewalls, and cybersecurity monitoring systems. Access Board policy also requires all emails, email strings, and attachments that contain sensitive personally identifiable information to be protected by encryption or password protection before transmission, absent express waiver from an agency privacy officer. Paper records are maintained in locked file cabinets with access limited to those personnel whose official duties require access. When paper records containing personally identifiable information are photocopied, faxed, or scanned, care is taken to ensure that no copies are left unattended where they could be viewed by unauthorized individuals.

RECORD ACCESS PROCEDURES:

Individuals seeking access to, or notification of, any record contained in this system of records, or seeking to contest its content, may inquire in writing in accordance with instructions appearing in the Access Board's Privacy Act Implementation rule, 36 CFR part 1121, which also appear on the Access Board's website at *www.access-board.gov/privacy.*

CONTESTING RECORD PROCEDURES:

See ''Record Access Procedures,'' above.

NOTIFICATION PROCEDURE:

See ''Record Access Procedures,'' above.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

None.

Gretchen Jacobs,

General Counsel.

BILLING CODE 8150–01–P

DEPARTMENT OF COMMERCE

Census Bureau

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Spatial, Address, and Imagery Data Program

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on Friday, July 29, 2021 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: U.S. Census Bureau, Commerce.

Title: Spatial, Address, and Imagery Data Program.

OMB Control Number: 0607–1008.

Form Number(s): None.

Type of Request: Regular submission, Request for an Extension of a Currently Approved Collection.

Number of Respondents: 1,500 (500/year).

Average Hours per Response: 2.5 hours.

Estimated Total Burden Hours: 3,750 (1,250/year). Please note, this figure was miscalculated in the 60-day **Federal Register** Notice. It has been corrected in this notice.

Needs and Uses: The Spatial, Address, and Imagery Data (SAID) Program is a voluntary geographic partnership programs that collects data to update and maintain the U.S. Census Bureau's geographic database of addresses, streets, and imagery known as the Master Address File/Topologically Integrated Geocoding and Referencing (MAF/TIGER) System. The MAF/TIGER System is vital for the Census Bureau's data collection, processing, tabulation, and dissemination programs for the United States and Puerto Rico.

The geographic framework within the MAF/TIGER System enables the Census Bureau field personnel to navigate to the appropriate locations for data collection. It enables the Census Bureau to define geographic boundaries, including census blocks, and accurately link demographic data from surveys and the decennial census to census blocks, locations, and areas, such as counties, cities, and school districts for data tabulation and dissemination.

The SAID Program supports the Census Bureau's ongoing demographic surveys and 2030 Census planning efforts by continuing to improve address coverage, collect and update street centerlines, and enhance the overall quality and integrity of the MAF/TIGER System after major Census update programs have concluded. The SAID Program provides the Census Bureau with a continuous method to obtain current, accurate, and complete address, street centerline, and imagery data.

Since its inception, the SAID Program has allowed the Census Bureau to update addresses and street centerlines across the country, with participation covering nearly 89 percent of the housing units in the nation. Moving forward, the SAID Program will

continue to acquire addresses, street centerlines, and imagery in areas targeted for housing unit growth or change to continue updating and improving the MAF/TIGER System.

The SAID Program follows the process below:

- The Census Bureau invites partners in targeted areas each fiscal year, including tribal, state, county, and local governments; federal agencies; and other authoritative organizations.
- Partners are asked to provide a current address list with associated location points and attributes, a street centerline file, and/or imagery data for their jurisdiction that is no more than two years old.
- Partners upload the requested data files using the Secure Web Incoming Module (SWIM), deliver large imagery datasets on hard drives, or the Census Bureau acquires the files/data though direct download.
- The Census Bureau validates, then updates the MAF/TIGER System with the address and street centerline data provided by partners and uses the provided imagery for quality control and change detection.
- The Census Bureau uses these updated addresses, streets, and imagery to support Census Bureau field operations, decennial census operations, ongoing demographic survey response collection, and data tabulation.
- The Census Bureau provides partners feedback regarding the data they supplied, including an appropriate thank you letter and a detailed, non-Title 13 address report and/or TIGER/Line shapefile.

Affected Public: Tribal, state, county, and local governments and organizations as well as other federal agencies.

Frequency: Annual.

Respondent's Obligation: Voluntary.

Legal Authority: Title 13 U.S.C. 16, 141, and 193.

This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the collection or the OMB Control Number 0607–1008.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

Bureau of Industry and Security

Order Denying Export Privileges; In the Matter of: Manuel Valencia-Hermosillo, 303 E South Mountain Avenue, Phoenix, AZ 85042

On October 13, 2017, in the U.S. District Court for the District of Arizona, Manuel Valencia-Hermosillo (''Valencia-Hermosillo'') was convicted of violating Section 38 of the Arms Export Control Act, 22 U.S.C. 2778 (2012) (''AECA''), by knowingly and willfully attempting to export and cause to be exported from the United States to Mexico, 11,000 rounds of Wolf 7.62 × 39mm ammunition; 100 Palmetto State Armory 5.56 rifle magazines; and 100 Korean 7.62 × 39 rifle magazines, all of which were designated as defense articles on the United States Munitions List, without the required U.S. Department of State licenses. Valencia-Hermosillo was sentenced to 15 months in prison with credit for time served, three years of supervised release, and an assessment of $100. Valencia-Hermosillo has been placed on the U.S. Department of State debarred list.

The Export Administration Regulations (''EAR'' or ''Regulations'') are administered and enforced by the U.S. Department of Commerce's Bureau of Industry and Security (''BIS'').[1]

Section 766.25 of the Regulations provides, in pertinent part, that the ''Director of [BIS's] Office of Export Enforcement, in consultation with the Director of [BIS's] Office of Exporter Services, may deny the export privileges of any person who has been convicted of a violation of any of the statues set forth at 50 U.S.C. 4819 (e)(1)(B),'' [2] including Section 38 of the AECA. 15 CFR 766.25(a).[3] The denial of export privileges under this provision may be for a period of up to 10 years from the date of the conviction. 15 CFR 766.25(d). In addition, pursuant to Section 750.8 of the Regulations, BIS's Office of Exporter Services may revoke any BIS-issued licenses in which the person has an interest at the time of his/her conviction.[4]

BIS received notice of Valencia-Hermosillo's conviction for violating Section 38 of the AECA, and pursuant to Section 766.25 of the Regulations, has provided notice and an opportunity for Valencia-Hermosillo to make a written submission to BIS. BIS has not received a written submission from Valencia-Hermosillo.

Based upon my review of the record and consultations with BIS's Office of Exporter Services, including its Director, and the facts available to BIS, I have decided to deny Valencia-Hermosillo's export privileges under the Regulations for a period of seven years from the date of Valencia-Hermosillo's conviction. The Office of Exporter Services has also decided to revoke any BIS-issued license in which Valencia-Hermosillo had an interest at the time of his conviction.

Accordingly, it is hereby *ordered:First*, from the date of this Order until October 13, 2024, Manuel Valencia-Hermosillo, with a last known address of 303 E. South Mountain Avenue, Phoenix, AZ 85042, and when acting for or on his behalf, his successors, assigns, employees, agents or representatives (''the Denied

[1] The Regulations are currently codified in the Code of Federal Regulations at 15 CFR parts 730–774 (2021). The Regulations originally issued under the Export Administration Act of 1979, as amended, 50 U.S.C. 4601–4623 (Supp. III 2015) (''EAA''), which lapsed on August 21, 2001. The President, through Executive Order 13,222 of August 17, 2001 (3 CFR, 2001 Comp. 783 (2002)), which was extended by successive Presidential Notices, continued the Regulations in full force and effect under IEEPA. On August 13, 2018, the President signed into law the John S. McCain National Defense Authorization Act for Fiscal Year 2019, which includes the Export Control Reform Act of 2018, 50 U.S.C. 4801–4852 (''ECRA''). While Section 1766 of ECRA repeals the provisions of the EAA (except for three sections which are inapplicable here), Section 1768 of ECRA provides, in pertinent part, that all rules and regulations that were made or issued under the EAA, including as continued in effect pursuant to IEEPA, and were in effect as of ECRA's date of enactment (August 13, 2018), shall continue in effect according to their terms until modified, superseded, set aside, or revoked through action undertaken pursuant to the authority provided under ECRA.

[2] The Director, Office of Export Enforcement, is now the authorizing official for issuance of denial orders, pursuant to recent amendments to the Regulations (85 FR 73411, November 18, 2020).

[3] As codified at the time of the underlying conviction at issue, Section 11(h)(1) of the EAA, as amended, provided that: ''No person convicted of a violation of this chapter (or any regulation, license, or order issued under this chapter), any regulation, license, or order issed under the International Emergnecy Economic Powers Act [50 U.S.C. 1701, *et seq.*], section 793, 794 or 798 of title 18, section 783(b) of this title, or section 2778 of title 22 shall be eligible, at the discretion of the Secretary, to apply for or use any export license under this chapter for a period of up to 10 years from the date of conviction. The Secretary may revoke any export license under this chapter in which such person has an interest at the time of conviction.'' 50 U.S.C. 4610(h)(1).

[4] *See* notes 1 and 3, *supra.*

Person''), may not, directly or indirectly, participate in any way in any transaction involving any commodity, software or technology (hereinafter collectively referred to as ''item'') exported or to be exported from the United States that is subject to the Regulations, including, but not limited to:

A. Applying for, obtaining, or using any license, license exception, or export control document;

B. Carrying on negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of, forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or engaging in any other activity subject to the Regulations; or

C. Benefitting in any way from any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or from any other activity subject to the Regulations.

Second, no person may, directly or indirectly, do any of the following:

A. Export or reexport to or on behalf of the Denied Person any item subject to the Regulations;

B. Take any action that facilitates the acquisition or attempted acquisition by the Denied Person of the ownership, possession, or control of any item subject to the Regulations that has been or will be exported from the United States, including financing or other support activities related to a transaction whereby the Denied Person acquires or attempts to acquire such ownership, possession or control;

C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from the Denied Person of any item subject to the Regulations that has been exported from the United States;

D. Obtain from the Denied Person in the United States any item subject to the Regulations with knowledge or reason to know that the item will be, or is intended to be, exported from the United States; or

E. Engage in any transaction to service any item subject to the Regulations that has been or will be exported from the United States and which is owned, possessed or controlled by the Denied Person, or service any item, of whatever origin, that is owned, possessed or controlled by the Denied Person if such service involves the use of any item subject to the Regulations that has been or will be exported from the United States. For purposes of this paragraph, servicing means installation, maintenance, repair, modification or testing.

Third, after notice and opportunity for comment as provided in Section 766.23of the Regulations, any other person, firm, corporation, or business organization relatedto Valencia-Hermosillo by ownership, control, position of responsibility, affiliation, orother connection in the conduct of trade or business may also be made subject to theprovisions of this Order in order to prevent evasion of this Order.

Fourth, in accordance with Part 756 of the Regulations, Valencia-Hermosillo may file an appeal of this Order with the Under Secretary of Commerce for Industry and Security. The appeal must be filed within 45 days from the date of this Order and must comply with the provisions of Part 756 of the Regulations.

Fifth, a copy of this Order shall be delivered to Valencia-Hermosillo and shall be published in the **Federal Register**.

Sixth, this Order is effective immediately and shall remain in effect until October 13, 2024.

John Sonderman,

Director, Office of Export Enforement.

BILLING CODE 3510–DT–P

DEPARTMENT OF COMMERCE

Economic Development Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Requirements for Approved Construction Investments

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on September 3, 2021, during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: Economic Development Administration (EDA), Commerce.

Title: Requirements for Approved Construction Investments.

OMB Control Number: 0610–0096.

Form Number(s): None.

Type of Request: Revision and extension of a currently approved information collection.

Number of Respondents: 3,500.

Average Hours per Response: 2 hours.

Burden Hours: Hours: 7,000 hours.

Needs and Uses: To effectively administer and monitor its economic development assistance programs, EDA collects certain information from applicants for, and recipients of, EDA investment assistance. EDA may award assistance for construction projects through its Public Works and Economic Adjustment Assistance (EAA) programs. Public Works program investments help support the construction or rehabilitation of essential public infrastructure and facilities necessary to generate or retain private sector jobs and investments, attract private sector capital, and promote vibrant economic ecosystems, regional competitiveness, and innovation. The EAA program provides a wide range of technical, planning, and infrastructure assistance in regions experiencing adverse economic changes that may occur suddenly or over time.

EDA proposes to revise and extend the checklists and templates that constitute EDA's post-approval tool for construction projects. None of the edits are expected to increase the time burden on the respondent nor do the modifications change the type of information collected.

Affected Public: Recipients of EDA construction (Public Works or EAA) awards, including (1) cities or other political subdivisions of a State, including a special purpose unit of State or local government engaged in economic or infrastructure development activities, or a consortium of political subdivisions; (2) States; (3) institutions of higher education or a consortium of institutions of higher education; (4) public or private non-profit organizations or associations; (5) District Organizations; and (6) Indian Tribes or a consortia of Indian Tribes.

Frequency: As needed during the period of performance of financial assistance awards for construction projects.

Respondent's Obligation: Mandatory.

Legal Authority: The Public Works and Economic Development Act of 1965 (42 U.S.C. 3121 *et seq.*).

This information collection request may be viewed at *reginfo.gov.* Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the collection or the OMB Control Number 0610–0096.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

Narrow Woven Ribbons With Woven Selvedge From the People's Republic of China and Taiwan: Final Results of the Expedited Sunset Reviews of the Antidumping Duty Orders

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: As a result of these expedited sunset reviews, the Department of Commerce (Commerce) finds that revocation of the antidumping duty (AD) orders on narrow woven ribbons with woven selvedge from the People's Republic of China (China) and Taiwan would likely lead to continuation or recurrence of dumping at the levels indicated in the ''Final Results of Sunset Review'' section of this notice.

DATES: Applicable November 16, 2021.

FOR FURTHER INFORMATION CONTACT: Reginald Anadio, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3166.

SUPPLEMENTARY INFORMATION:

Background

On August 2, 2021, Commerce published the notice of initiation of the sunset reviews of the *AD Orders* [1] pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act).[2] In accordance with 19 CFR 351.218(d)(1)(i) and (ii), Commerce received notices of intent to participate in these sunset reviews from Berwick Offray LLC and its wholly owned subsidiary, Lion Ribbon Company LLC (collectively, the domestic interested party), within 15 days after the date of publication of the *Initiation Notice*.[3] The domestic interested party claimed interested party status under section 771(9)(C) of the Act.

Commerce received adequate substantive responses to the *Initiation Notice* from the domestic interested party within the 30-day period specified in 19 CFR 351.218(d)(3)(i).[4] Commerce received no substantive responses from any respondent interested parties. On September 20, 2021, Commerce notified the U.S. International Trade Commission that we did not receive an adequate substantive response from respondent interested parties.[5] In accordance with section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C)(2), Commerce conducted expedited, *i.e.,* 120-day, sunset reviews of the *AD Orders.*

Scope of the AD Orders

The products subject to the *AD Orders* are narrow woven ribbons with woven selvedges, and are currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers: 5806.32.1020; 5806.32.1030; 5806.32.1050 and 5806.32.1060. Subject merchandise also may enter under subheadings 5806.31.00; 5806.32.20; 5806.39.20; 5806.39.30; 5808.90.00; 5810.91.00; 5810.99.90; 5903.90.10; 5903.90.25; 5907.00.60; and 5907.00.80 and under statistical categories 5806.32.1080; 5810.92.9080; 5903.90.3090; and 6307.90.9889. The HTSUS numbers are provided for convenience and customs purposes. A full description of the scope of the *AD Orders* is contained in the Issues and Decision Memorandum.[6] The written description is dispositive.

Analysis of Comments Received

All issues raised in this review are addressed in the Issues and Decision Memorandum, including the likelihood of continuation or recurrence of dumping in the event of revocation of the *AD Orders* and the magnitude of dumping margins likely to prevail if the *AD Orders* were revoked. A list of topics discussed in the Issues and Decision Memorandum is included as an appendix to this notice. Parties can find a complete discussion of all issues raised in this review and the corresponding recommendations in the Issues and Decision Memorandum, which is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *http://access.trade.gov.* In addition, a complete version of the Issues and Decision Memorandum can be found at *https://access.trade.gov/public/FRNotices ListLayout.aspx.*

Final Results of Sunset Review

Pursuant to sections 751(c) and 752(c)(1) and (3) of the Act, Commerce determines that revocation of the *AD Orders* would be likely to lead to continuation or recurrence of dumping and the magnitude of the margins of dumping likely to prevail would be weighted-average margins up to the following percentages:

Country	Weighted-average margin (percent)
China	247.65
Taiwan	4.37

Notification Regarding Administrative Protective Orders

This notice serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a). DEPARTMENT OF COMMERCE

International Trade Administration

United States Travel and Tourism Advisory Board: Meeting of the United States Travel and Tourism Advisory Board

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Notice of an open meeting.

SUMMARY: The United States Travel and Tourism Advisory Board (Board or TTAB) will hold a meeting on Friday, December 3, 2021. The Board advises the Secretary of Commerce on matters relating to the U.S. travel and tourism industry. The purpose of the meeting is for Board members to discuss and potentially adopt recommendations for the Secretary in the areas of (1) top issues facing the sector related to climate change and (2) actions to provide for employment in the sector. The final agenda will be posted on the Department of Commerce website for the Board at *https://www.trade.gov/ttab-meetings* at least two days prior to the meeting.

DATES: Friday, December 3, 2021, 2:00 p.m.–3:00 p.m. EST. The deadline for members of the public to register for the meeting or to submit written comments for dissemination prior to the meeting is 5:00 p.m. EST on Wednesday, December 1, 2021.

ADDRESSES: The meeting will be held virtually. The access information will be provided by email to registrants. Requests to register (including to speak or for auxiliary aids) and any written comments should be submitted by email to *TTAB@trade.gov.*

FOR FURTHER INFORMATION CONTACT: Jennifer Aguinaga, the United States Travel and Tourism Advisory Board, National Travel and Tourism Office, U.S. Department of Commerce; telephone: 202–482–2404; email: *TTAB@trade.gov.*

SUPPLEMENTARY INFORMATION: *Public Participation:* The meeting will be open to the public and will be accessible to people with disabilities. Any member of the public requesting to join the meeting is asked to register in advance by the deadline identified under the **DATES** caption. Requests for auxiliary aids must be submitted by the registration deadline. Last minute requests will be accepted but may not be possible to fill. There will be fifteen (15) minutes allotted for oral comments from members of the public joining the meeting. To accommodate as many speakers as possible, the time for public comments may be limited to three (3) minutes per person. Members of the public wishing to reserve speaking time during the meeting must submit a request at the time of registration, as well as the name and address of the proposed speaker. If the number of registrants requesting to make statements is greater than can be reasonably accommodated during the meeting, the International Trade Administration may conduct a lottery to determine the speakers. Speakers are requested to submit a written copy of their prepared remarks by 5:00 p.m. EST on Wednesday, December 1, 2021, for inclusion in the meeting records and for circulation to the members of the Board.

In addition, any member of the public may submit pertinent written comments concerning the Board's affairs at any time before or after the meeting. Comments may be submitted to Jennifer Aguinaga at the contact information indicated above. To be considered during the meeting, comments must be received no later than 5:00 p.m. EST on Wednesday, December 1, 2021, to ensure transmission to the Board prior to the meeting. Comments received after that date and time will be transmitted to the Board but may not be considered during the meeting. Copies of Board meeting minutes will be available within 90 days of the meeting.

This Notice is published pursuant to the Federal Advisory Committee Act, as amended (FACA), 5 U.S.C., app., 9(c). It has been determined that the Committee is necessary and in the public interest. The Committee was established pursuant to Commerce's authority under 15 U.S.C. 1512, established under the FACA, as amended, 5 U.S.C. App., and with the concurrence of the General Services Administration.

Jennifer Aguinaga,

Designated Federal Officer, United States Travel and Tourism Advisory Board.

BILLING CODE 3510–DR–P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Baldrige Executive Fellow Program

AGENCY: National Institute of Standards and Technology (NIST), Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before January 18, 2022.

ADDRESSES: Interested persons are invited to submit written comments by mail to Maureen O'Reilly, Management Analyst, NIST by email to *PRAcomments@doc.gov.* Please reference OMB Control Number 0693–0076 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Dawn Bailey, Baldrige Performance Excellence Program, NIST, 100 Bureau Drive, Stop

1020, Gaithersburg, MD 20899, 301–975–3074, *dawn.bailey@nist.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

The Baldrige Performance Excellence Program seeks applicants for the Baldrige Executive Fellows Program, a one-year, leadership development experience for direct reports to the most senior leader in an organization or business unit leaders. Using the Baldrige Excellence Framework as a foundation, the program discusses impactful leadership through visits to Baldrige Award recipient sites and senior leaders, virtual discussions, and face-to-face peer training using an adult learning model. Fellows will discuss how to achieve performance excellence for their own organizations, stimulate innovation, and build the knowledge and capabilities necessary for organizational sustainability. Fellows will create a capstone project that tackles an issue of strategic importance in their own organizations; capstones have included innovating supply chains and customer relationship management systems, improving health systems and their communication with physicians, and creating balanced scorecards. The Baldrige Executive Fellows Program has been nationally recognized as a leading executive-development program as part of the leadership awards, sponsored by *HR.com*. The program is aligned with the Baldrige Program mission to improve the competitiveness and performance of U.S. organizations for the benefit of all U.S. residents. The Baldrige Program and its Malcolm Baldrige National Quality Award were created by Public Law 100–107 (The Malcolm Baldrige National Quality Improvement Act of 1987) and signed into law on August 20, 1987.

II. Method of Collection

Senior leaders interested in applying for selection as a Baldrige Fellow must provide the following package of material directly to the Baldrige Program:

1. A resumé, including email, postal address, and telephone contact information; and the name and email address of an assistant or alternate contact person.

2. An organizational chart that includes names and titles showing the applicant's position within the organization.

3. A recommendation letter from the applicant's highest-ranking official showing the organization's support of his/her participation in the program.

4. A list of key competitors (in order that the Baldrige Program may avoid creating a cohort that would be unable to share effectively due to competitive situations).

U.S. mail or other delivery service is one way to provide materials. Another secure way to provide materials is through the NIST Secure File Transfer Service (''N-files''). Information is collected one time per year (typically in September–December) for each cohort of Fellows.

Information is needed to make selection decisions that are based on (1) sector mix, (2) appropriate level within the organization, (3) likelihood to follow through, (4) diversity, and (5) no direct competitors with participating award recipients or other Fellows.

III. Data

OMB Control Number: 0693–0076.

Form Number(s): None.

Type of Review: Regular submission, extension of a current information collection.

Affected Public: Any senior or mid-level leader from business or other for-profit organizations; not-for-profit institutions; state, local, or tribal government; Federal government.

Estimated Number of Respondents: 24 per year.

Estimated Time per Response: 1 hour to gather materials.

Estimated Total Annual Burden Hours: 24 hours.

Estimated Total Annual Cost to Public: $0.

Respondent's Obligation: Voluntary.

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

National Oceanic and Atmospheric Administration

[RTID 0648–XB570]

Mid-Atlantic Fishery Management Council (MAFMC); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The Mid-Atlantic Fishery Management Council's Surfclam and Ocean Quahog Committee and Advisory Panel will hold a joint, public meeting.

DATES: The meeting will be held on Monday, December 6, 2021, from 9:30 a.m. to 12 p.m. For agenda details, see **SUPPLEMENTARY INFORMATION**.

ADDRESSES: The meeting will be held via webinar. Connection information will be posted to the Council's calendar prior to the meeting at *www.mafmc.org.*

Council address: Mid-Atlantic Fishery Management Council, 800 N State Street, Suite 201, Dover, DE 19901; telephone: (302) 674–2331; *www.mafmc.org.*

FOR FURTHER INFORMATION CONTACT: Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, telephone: (302) 526–5255.

SUPPLEMENTARY INFORMATION: The Mid-Atlantic Fishery Management Council's Surfclam and Ocean Quahog Committee and Advisory Panel will meet together, via webinar on Monday, December 6, 2021, from 9:30 a.m. until 12 p.m. The purpose of this meeting is to review and discuss the draft document being prepared for the Council to address issues related to the species separation requirements in the Atlantic surfclam and ocean quahog fisheries. The Committee may develop recommendations for next steps related to this issue, to be presented to the full Council at their December meeting.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Shelley Spedden, (302) 526–5251 at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 9, 2021.

SUPPLEMENTARY INFORMATION:

Agenda

The Committee will discuss Framework 34 (FW 34): Review specifications alternatives in FW 34 and make final recommendations. FW 34 will set specifications including acceptable biological catch/annual catch limit (ABC/ACLs), days-at-sea (DAS), access area allocations for Limited Access (LA) and Limited Access General Category (LAGC), Total Allowable Landings (TAL) for Northern Gulf of Maine (NGOM) management area, target-TAC for LAGC incidental catch and set-asides for the observer and research programs for fishing year 2022 and default specifications for fishing year 2023. Also on the agenda is Evaluation of Rotational Management: Review draft report and provide feedback. They will also receive an update on progress from the Scallop Survey Working Group. Other business will be discussed, if necessary.

Although non-emergency issues not contained on the agenda may come before this Council for discussion, those issues may not be the subject of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency. The public also should be aware that the meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Thomas A. Nies, Executive Director, at (978) 465–0492, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 9, 2021.

National Oceanic and Atmospheric Administration

[RTID 0648–XB586]

South Atlantic Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce

ACTION: Notice of public meetings.

SUMMARY: The South Atlantic Fishery Management Council (Council) will hold meetings of the following: Mackerel Cobia Committee; Snapper Grouper Committee; Southeast Data, Assessment and Review (SEDAR) Committee; Citizen Science Committee; and Outreach and Communications Committee. The meeting week will also include a formal public comment session and a meeting of the Full Council (partially Closed Session).

DATES: The Council meeting will be held from 8:30 a.m. on Monday, December 6, 2021, until 12 p.m. on Friday, December 10, 2021.

ADDRESSES: *Meeting address:* The meeting will be held at the Beaufort Hotel, 2400 Lennoxville Road, Beaufort, NC 28516; phone: (252) 728–3000. The meeting will also be available via webinar. Registration is required. See **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Kim Iverson, Public Information Officer, SAFMC; phone: (843) 302–8440 or toll free: (866) SAFMC–10; fax: (843) 769–4520; email: *kim.iverson@safmc.net.*

SUPPLEMENTARY INFORMATION:

Meeting information, including agendas, overviews, and briefing book materials will be posted on the Council's website at: *http://safmc.net/safmc-meetings/council-meetings/.* Webinar registration links for the meeting will also be available from the Council's website.

Public comment: Public comment on agenda items may be submitted through the Council's online comment form available from the Council's website at: *http://safmc.net/safmc-meetings/council-meetings/.* Comments will be accepted from November 19, 2021, until December 10, 2021. These comments are accessible to the public, part of the Administrative Record of the meeting, and immediately available for Council consideration.

The items of discussion in the individual meeting agendas are as follows:

Council Session I, Monday, December 6, 2021, 8:30 a.m. Until 10 a.m. (Closed Session) and 10 a.m.–12 p.m.

The Council will review applications for open seats on its advisory panels and the Socio-Economic Sub-panel of its Scientific and Statistical Committee. Participants for the SEDAR 82 assessment addressing South Atlantic Triggerfish and for the SEDAR 76 assessment for South Atlantic Black Sea Bass will also be reviewed and approved. The Council will receive a legal briefing if needed.

The Council will then meet in Open Session to receive reports from state agencies, Council liaisons, NOAA Office of Law Enforcement, and the U.S. Coast Guard. The Council will receive an update on the review of Standardized

Bycatch Reporting Methodology (SBRM) in Council Fishery Management Plans from NOAA Fisheries and recommendations on SBRM from its Scientific and Statistical Committee (SSC). Council members will review any Exempted Fishery Permit applications and additional topics as needed.

Mackerel Cobia Committee, Monday, December 6, 2021, 1:30 p.m. Until 5 p.m.

The Committee will review public hearings comments received for Coastal Migratory Pelagics (CMP) Amendment 34 addressing management measures for Atlantic king mackerel and Spanish mackerel in the South Atlantic and continue work on the amendment. The Committee will also review public hearing input received on CMP Amendment 32 addressing management measures to end overfishing for Gulf of Mexico cobia and is scheduled to recommend approval of the amendment for Secretarial review. The Committee will also review management options for draft CMP Amendment 33 addressing Gulf migratory group king mackerel.

Snapper Grouper Committee, Tuesday, December 7, 2021, 8:30 a.m. Until 5:30 p.m. and Wednesday, December 8, 2021, 8:30 a.m. Until 3:45 p.m.

The Committee will receive a presentation on the Ecopath Project on Red Snapper Recruitment including modelling team discussion and SSC comments. The Committee will discuss possible revisions to management of the Snapper Grouper fishery including framework options and items to consider for long-term management, and consider input from its Snapper Grouper Advisory Panel (AP) and the Private Recreational Reporting Workgroup. The Committee will also review a white paper on South Atlantic Snapper Grouper Commercial Fishing Permits and consider recommendations from the Snapper Grouper AP.

The Committee will receive a presentation from NOAA Fisheries Southeast Fisheries Science Center on the SEDAR 68 Scamp Research Track Assessment and review SSC recommendations. The Committee will review options and recommendations from the Snapper Grouper AP for the following draft amendments to the Snapper Grouper Fishery Management Plan (FMP): Amendment 51 addressing snowy grouper; Amendment 52 addressing golden tilefish; and Amendment 53 addressing gag, and is scheduled to approve the amendments for public scoping.

The Committee will also review proposed modifications to greater amberjack management through Amendment 49 to the Snapper Grouper FMP and is scheduled to approve the amendment for public hearings. The Committee will review public scoping comments and recommendations from the Snapper Grouper AP for Snapper Grouper Amendment 44 addressing yellowtail snapper management measures and continue work on Snapper Grouper Amendment 50 with modifications to red porgy management. The Committee will receive updates on projects for the South Atlantic Red Snapper Count and the Greater Amberjack Count in the Gulf of Mexico and South Atlantic, and review any additional recommendations from the Snapper Grouper AP.

Formal Public Comment, Wednesday, December 8, 2021, 4 p.m.—Public comment will be accepted from individuals attending the meeting on all items on the Council meeting agenda. The Council Chair will determine the amount of time provided to each commenter based on the number of individuals wishing to comment.

Council Session II, Thursday, December 9, 2021, 8 a.m. Until 9 a.m. (Closed Session)

The Council will meet in Closed Session to conduct an annual performance review of its Executive Director.

SEDAR Committee, Thursday, December 9, 2021, 9 a.m. Until 11 a.m.

The Committee will receive a report from the SEDAR Steering Committee and consider revisions to current Council processes and approvals relative to stock assessments due to changes in SEDAR. The Committee will review the Terms of Reference and schedules for the following: SEDAR 68 Scamp Operational Assessment; SEDAR 82 Gray Triggerfish Research Track Assessment; SEDAR 83 Vermillion Snapper Operational Assessment; and the SEDAR 86 Red Grouper Operational Assessment. The Committee will also review the 2024 golden Tilefish Operational Statement of Work and address stock assessment prioritization.

Citizen Science Committee, Thursday, December 9, 2021, 11 a.m. Until 12 p.m.

The Committee will receive an update on the Council's Citizen Science Program and the program's research priorities and consider approving for adoption.

Outreach and Communications Committee, Thursday, December 9, 2021, 1:30 p.m. Until 3 p.m.

The Committee will receive a report from the Outreach and Communications AP, receive an update on the status of the Sea Grant Fellowship for outreach, and receive a demonstration of the Council's new website.

Council Session III, Thursday, December 9, 2021, From 3 p.m. Until 5:30 p.m., and Friday, December 10, 2021, 8:30 a.m. Until 12 p.m.

The Council will present the 2020 Law Enforcement Officer of the Year Award, discuss any applications for Exempted Fishery Permits, consider any legal briefing, and any SSC recommendations not covered earlier, if needed. The Council will receive staff reports, a briefing on the Kitty Hawk Offshore Wind Project, and review the FMP workplan and upcoming meetings. The Committee will receive reports from earlier Council sessions and reports from the following committees: Mackerel Cobia; Snapper Grouper; SEDAR, Citizen Science, and Outreach and Communications. The Council will also receive a report from the November 2021 meeting of its Executive Committee.

The Council will receive reports from NOAA Fisheries Southeast Fisheries Science Center including an update on commercial e-logbook progress and from the Southeast Regional Office, including updates on the Southeast For-Hire Electronic Reporting Program, SAFE Report status, a protected resources update, and a blueline tilefish summary.

The Council will discuss other business, upcoming meetings, and take action as necessary.

Documents regarding these issues are available from the Council office (see **ADDRESSES**).

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for auxiliary aids should be directed to the council office (see **ADDRESSES**) 5 days prior to the meeting.

Note: The times and sequence specified in this agenda are subject to change.

SUPPLEMENTARY INFORMATION:

Agenda

The Advisory Panel will discuss Framework 34 (FW 34): Review specifications alternatives in FW 34 and make final recommendations. FW 34 will set specifications including acceptable biological catch/annual catch limit (ABC/ACLs), days-at-sea (DAS), access area allocations for Limited Access (LA) and Limited Access General Category (LAGC), Total Allowable Landings (TAL) for Northern Gulf of Maine (NGOM) management area, target-TAC for LAGC incidental catch and set-asides for the observer and research programs for fishing year 2022 and default specifications for fishing year 2023. Also on the agenda is Evaluation of Rotational Management: Review draft report and provide feedback. They will also receive an update on progress from the Scallop Survey Working Group. Other business will be discussed, if necessary.

Although non-emergency issues not contained on the agenda may come before this Council for discussion, those issues may not be the subject of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency. The public also should be aware that the meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Thomas A. Nies, Executive Director, at (978) 465–0492, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 9, 2021.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XB587]

Western Pacific Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Western Pacific Fishery Management Council (Council) will hold its 142nd Scientific and Statistical Committee (SSC), Executive and Budget Standing Committee, and 189th Council meetings to take actions on fishery management issues in the Western Pacific Region.

DATES: The meetings will be held between November 30 and December 9, 2021. For specific times and agendas, see **SUPPLEMENTARY INFORMATION.**

ADDRESSES: The meetings will be held by web conference via Webex. Instructions for connecting to the web conference and providing oral public comments will be posted on the Council website at *www.wpcouncil.org.* For assistance with the web conference connection, contact the Council office at (808) 522–8220.

The Council has arranged host sites only for the 189th Council meeting at the following venues: Cliff Pointe, 304 W. O'Brien Drive, Hagatna, Guam; BRI Building Suite 205, Kopa Di Oru St., Garapan, Saipan, Commonwealth of the Northern Mariana Islands (CNMI); and, Tedi of Samoa Building Suite 208B, Fagatogo Village, American Samoa.

FOR FURTHER INFORMATION CONTACT: Contact Kitty M. Simonds, Executive Director, Western Pacific Fishery Management Council; phone: (808) 522–8220.

SUPPLEMENTARY INFORMATION: All times shown are in Hawaii Standard Time. The 142nd SSC meeting will be held between 11 a.m. and 5 p.m. on November 30–December 2, 2021. The Executive and Budget Standing Committee meeting will be held between 3 p.m. and 5 p.m. on December 6, 2021. The 189th Council meeting will be held between 11 a.m. and 5 p.m. on December 7–9, 2021.

Please note that the evolving public health situation regarding COVID–19 may affect the conduct of the December Council and its associated meetings. At the time this notice was submitted for publication, the Council anticipated convening the meeting by web conference with host site locations in Guam, CNMI and American Samoa for the 189th Council meeting only. Council staff will monitor COVID–19 developments and will determine the extent to which in-person public participation at host sites will be allowable consistent with applicable local and federal safety and health guidelines. If public participation will be limited to web conference only or on a first-come-first-serve basis consistent with applicable guidelines, the Council will post notice on its website at *www.wpcouncil.org.*

Agenda items noted as ''Final Action'' refer to actions that may result in Council transmittal of a proposed fishery management plan, proposed plan amendment, or proposed regulations to the U.S. Secretary of Commerce, under Sections 304 or 305 of the MSA. In addition to the agenda items listed here, the Council and its advisory bodies will hear

recommendations from Council advisors. An opportunity to submit public comment will be provided throughout the agendas. The order in which agenda items are addressed may change and will be announced in advance at the Council meeting. The meetings will run as late as necessary to complete scheduled business.

Background documents for the 189th Council meeting will be available at *www.wpcouncil.org.* Written public comments on final action items at the 189th Council meeting should be received at the Council office by 5 p.m. HST, December 3, 2021, and should be sent to Kitty M. Simonds, Executive Director; Western Pacific Fishery Management Council, 1164 Bishop Street, Suite 1400, Honolulu, HI 96813, phone: (808) 522–8220 or fax: (808) 522–8226; or email: *info@wpcouncil.org.* Written public comments on all other agenda items may be submitted for the record by email throughout the duration of the meeting. Instructions for providing oral public comments during the meeting will be posted on the Council website. This meeting will be recorded (audio only) for the purposes of generating the minutes of the meeting.

Agenda for the 142nd SSC Meeting

Tuesday, November 30, 2021, 11 a.m. to 5 p.m.

1. Introductions
2. Approval of Draft Agenda and Assignment of Rapporteurs
3. Status of the 141st SSC Meeting Recommendations
4. Pacific Islands Fisheries Science Center (PIFSC) Director Report
5. Program Planning and Research
   - A. Report on the Territorial Creel Survey Expansion
   - B. Report on the Center for Independent Experts (CIE) Review of the Territorial Creel Survey Expansion
   - C. Improving Collaboration Between Stakeholders: Territorial Bottomfish Stock Assessment in the Pacific Islands
   - D. Report on the American Samoa Bottomfish Data Workshop with the Department of Marine and Wildlife Resources (DMWR)
   - E. SSC Working Group Report on American Samoa Bottomfish Data Evaluation
   - F. Council Coordination Committee (CCC) Reports
   - 1. Area-Based Management Working Group
   - 2. Environmental Justice
   - G. Public Comment
   - H. SSC Discussion and Recommendations
6. Protected Species
   - A. Hawaii Longline Fishery Seabird Mitigation Measures
   - 1. Modification of Seabird Interaction Mitigation Measures in the Deep-Set Longline Fishery (Action Item)
   - 2. Hawaii Shallow-Set Longline Fishery Experimental Fishing Permit
   - B. False Killer Whale Issues
   - 1. Report of the False Killer Whale Weak Hook Study
   - 2. Hawaii Longline Acoustic Monitoring Study
   - 3. Take Reduction Plan Research Priorities
   - C. Endangered Species Act (ESA) Consultations for the Hawaii Deep-set Longline Fishery, American Samoa Longline Fishery, and Bottomfish Fisheries
   - D. ESA and Marine Mammal Protection Act (MMPA) Updates
   - E. Public Comment
   - F. SSC Discussion and Recommendations

Wednesday, December 1, 2021, 11 a.m. to 5 p.m.

7. Pelagic and International Fisheries
   - A. American Samoa Longline Fishery Report
   - B. Hawaii Longline Fishery Report
   - C. Hawaii Community Tagging Program
   - D. Horizontal Movements, Utilization Distributions, and Mixing Rates of Yellowfin Tuna
   - E. SSC Working Group on Area-Based Management
   - F. International Fisheries
   - 1. South Pacific Regional Fishery Management Organization Science Committee
   - 2. 18th Western and Central Pacific Fisheries Commission (WCPFC) Regular Session
   - G. Public Comment
   - H. SSC Discussion and Recommendations

Thursday, December 2, 2021, 11 a.m. to 5 p.m.

8. Other Business
   - A. March 15–17, 2022 SSC Meeting Dates
9. Summary of SSC Recommendations to the Council

Agenda for the Executive and Budget Standing Committee

Monday, December 6, 2021, 3 p.m. to 5 p.m.

1. Financial Reports
2. Administrative Reports
3. Fall CCC Report
   - A. Area-Based Management Working Group
   - B. Environmental Justice
4. Council Programs
5. Council Family Changes
6. Meetings and Workshops
7. Other Issues
8. Public Comment
9. Discussion and Recommendations

Agenda for the 189th Council Meeting

Tuesday, December 7, 2021, 11 a.m. to 5 p.m.

1. Welcome and Introductions
2. Approval of the 189th Agenda
3. Approval of the 187th and 188th Meeting Minutes
4. Executive Director's Report
5. Agency Reports
   - A. NMFS
   - 1. Pacific Islands Regional Office
   - 2. PIFSC
   - B. NOAA Office of General Counsel Pacific Islands Section
   - C. Enforcement
   - 1. U.S. Coast Guard
   - 2. NOAA Office of Law Enforcement
   - 3. NOAA Office of General Counsel Enforcement Section
   - D. U.S. State Department
   - E. U.S. Fish and Wildlife Service
   - F. Public Comment
   - G. Council Discussion and Action
6. Program Planning and Research
   - A. National Legislative Report
   - B. Report on the Territorial Creel Survey Expansion
   - C. Report on the CIE Review of the Territorial Creel Survey Expansion
   - D. Improving Collaboration Between Stakeholders: Territorial Bottomfish Stock Assessment in the Pacific Islands
   - E. Regional Communications and Outreach Report
   - F. Advisory Group Report and Recommendations
   - 1. Advisory Panel (AP)
   - 2. Fishing Industry Advisory Committee (FIAC)
   - 3. Non-Commercial Fishing Advisory Committee (NCFAC)
   - 4. Social Science Planning Committee
   - 5. SSC
   - G. Public Comment
   - H. Council Discussion and Action

Tuesday, December 7, 2021, 4:30 p.m. to 5 p.m.

Public Comment on Non-Agenda Items

Wednesday, December 8, 2021, 11 a.m.–5 p.m.

7. Mariana Archipelago
   - A. Guam
   - 1. Department of Agriculture/Division Aquatic and Wildlife Resources Report

2. Isla Informe
3. The Pacific Community (SPC) Regional Technical Meeting on Coastal Fisheries and Aquaculture

B. CNMI
1. Arongol Falú
2. Department of Lands Natural Resources/Division of Fish and Wildlife Report

C. Advisory Group Report and Recommendations
1. AP
2. FIAC
3. NCFAC
4. SSC

D. Public Comment
E. Council Discussion and Action

8. American Samoa Archipelago
A. Motu Lipoti
B. DMWR Report
C. Report on the American Samoa Bottomfish Data Workshop with DMWR
D. SSC Report on the American Samoa Bottomfish Data Evaluation
E. SPC Regional Technical Meeting on Coastal Fisheries and Aquaculture
F. Advisory Group Report and Recommendations
1. AP
2. FIAC
3. NCFAC
4. SSC

G. Public Comment
H. Council Discussion and Action

9. Protected Species
A. Hawaii Longline Fishery Seabird Mitigation Measures
1. Modification of Seabird Interaction Mitigation Measures in the Deep-Set Longline Fishery (Final Action)
2. Hawaii Shallow-Set Longline Fishery Experimental Fishing Permit

B. False Killer Whale Issues
1. Report of the False Killer Whale Weak Hook Study
2. Hawaii Longline Acoustic Monitoring Study

C. ESA Consultations for the Hawaii Deep-Set Longline Fishery, American Samoa Longline Fishery, and Bottomfish Fisheries
D. ESA and MMPA Updates
E. Advisory Group Report and Recommendations
1. AP
2. FIAC
3. NCFAC
4. SSC

F. Public Comment
G. Council Discussion and Action

Thursday, December 9, 2021, 11 a.m.–5 p.m.

10. Pelagic and International Fisheries
A. American Samoa Longline Fishery Report
B. Hawaii Longline Fishery Report
C. Hawaii Community Tagging Program
D. Area-Based Management Working Group Reports
1. CCC Working Group
2. SSC Working Group

E. International Fisheries
1. WCPFC 17th Technical and Compliance Committee
2. WCPFC 17th Northern Committee Report
3. Permanent Advisory Committee
4. South Pacific Albacore Management Issues
5. Outcome of WCPFC 18th Regular Session

F. Advisory Group Report and Recommendations
1. AP
2. FIAC
3. NCFAC
4. SSC

G. Pelagic and International Standing Committee
H. Public Comment
I. Council Discussion and Action

11. Hawaii Archipelago and Pacific Remote Island Areas
A. Moku Pepa
B. Department of Land and Natural Resources/Division of Aquatic Resources Report (Legislation, Enforcement)
C. Green Turtle Management
D. Northwestern Hawaiian Islands Proposed National Marine Sanctuary Update
E. Advisory Group Report and Recommendations
1. AP
2. FIAC
3. NCFAC
4. SSC

F. Public Comment
G. Council Discussion and Action

12. Administrative Matters
A. Council Member and Staff Ethics Training
B. Financial Reports
C. Administrative Reports
D. Fall CCC Report
1. Environmental Justice

E. Proposed Coral Reef Projects
F. Council Family Changes
G. Meetings and Workshops
H. Standing Committee Report
I. Public Comment
J. Council Discussion and Action

13. Other Business
14. Election of Officers

Non-emergency issues not contained in this agenda may come before the Council for discussion and formal Council action during its 189th meeting. However, Council action on regulatory issues will be restricted to those issues specifically listed in this document and any regulatory issue arising after publication of this document that requires emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take action to address the emergency.

Special Accommodations

These meetings are accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Kitty M. Simonds, (808) 522–8220 (voice) or (808) 522–8226 (fax), at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 10, 2021.

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The New England Fishery Management Council (Council) is scheduling a public meeting of its Groundfish Committee via webinar to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

DATES: This webinar will be held on Tuesday, November 30, 2021, at 9:30 a.m. Webinar registration URL information: *https://attendee.gotowebinar.com/register/7597990804617351436.*

ADDRESSES: *Council address:* New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465–0492.

SUPPLEMENTARY INFORMATION:

Agenda

The Committee will consider the recommendations of the Recreational

Advisory Panel, Groundfish Advisory Panel, and Groundfish Plan Development Team. They willdiscuss draft alternatives and draft impacts analysis and make recommendations to the Groundfish Committee for Framework Adjustment 63 final action. The panel will make recommendations to the Committee, as appropriate, regarding possible 2022 Council priorities. Other business will be discussed, if necessary.

Although non-emergency issues not contained on the agenda may come before this Council for discussion, those issues may not be the subject of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency. The public also should be aware that the meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Thomas A. Nies, Executive Director, at (978) 465–0492, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 10, 2021.

National Oceanic and Atmospheric Administration

[RTID 0648–XB579]

Endangered and Threatened Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; Issuance of one Endangered Species Act (ESA) Incidental Take Permit and one ESA Enhancement of Survival Permit; Availability of the Final Environmental Assessment and Finding of No Significant Impact.

SUMMARY: Notice is hereby given that NMFS has issued one Incidental Take Permit and one Enhancement of Survival Permit to Sierra Pacific Land & Timber Company (SPL&T) for the Sierra Pacific Industries Habitat Conservation Plan (HCP) and Safe Harbor Agreement (SHA). The HCP/SHA was submitted pursuant to the Endangered Species Act (ESA) of 1973, as amended. NMFS has also prepared a Final Environmental Assessment (EA) and a Finding of No Significant Impact (FONSI) under the National Environmental Policy Act (NEPA) associated with NMFS' issuance of the Permits for the HCP/SHA. The Permits authorize incidental take of ESA-listed species as set forth in the HCP/SHA for a 50-year period.

DATES: The Incidental Take Permit (No. 24396) and the Enhancement of Survival Permit (No. 24397) were issued to SPL&T on September 29, 2021. Subsequent to issuance, the necessary countersignatures by the applicants were received on October 4, 2021. The expiration date of the permits is October 4, 2071. The issued permits are subject to certain conditions set forth therein.

ADDRESSES: The permits, the Final EA and FONSI, and other related documents available on the NMFS West Coast Region website at: *https://www.fisheries.noaa.gov/action/habitat-conservation-plan-and-safe-harbor-agreement-sierra-pacific-industries-forestland.*

FOR FURTHER INFORMATION CONTACT: Amanda Cranford, Sacramento, CA, at phone number: (916) 930–3706, or via email: *Amanda.Cranford@noaa.gov.*

SUPPLEMENTARY INFORMATION:

ESA-Listed Species Covered in This Notice

Chinook salmon (*Oncorhynchus tshawytscha*), (Evolutionary Significant Unit [ESU]): Central Valley spring-run ESU, and Sacramento River winter-run ESU

Coho salmon (*O. kisutch*), (ESU): Southern Oregon/Northern California Coast ESU

Steelhead (*O. mykiss*), (Distinct Population Segment [DPS]): California Central Valley DPS

Background

SPL&T is the largest private forest landowner in the state of California, with ownership currently encompassing approximately 1.79 million acres of timberland throughout the northern and central portions of the state. Sierra Pacific Industries (SPI) is the authorized representative and manager of SPL&T lands. Rivers and streams on portions of SPL&T lands in the Trinity River and Sacramento River basins provide habitat for anadromous salmonids, including species listed under the ESA. SPI's forestland management activities have the potential to adversely affect fish species and their habitats that are listed, or may be listed, under the ESA. Proposed activities under the permits include those activities necessary to implement the forestland management program, in addition to certain mitigation and conservation measures identified in the HCP/SHA.

Section 10(a)(1)(B) of the ESA authorizes NMFS to issue an Incidental Take Permit to non-Federal parties for the potential incidental taking of endangered and threatened species. The HCP provides an assessment of impacts, measures to monitor, minimize, and mitigate for those impacts, and procedures to account for unforeseen or extraordinary circumstances. Under the HCP, SPI will follow the Z'Berg-Nejedly Forest Practice Act and relevant public resource codes, including the current California Forest Practice Rules (CFPRs) for each year of the permit period. SPI fully complies with the CFPRs, which set prescriptive standards for natural resource protection minimization measures for all activities. The CFPRs set even higher standards for activities in Anadromous Salmonid Protection watersheds. SPI will also implement conservation measures described in the HCP that are designed to protect riparian resources and water quality.

The section 10(a)(1)(B) Incidental Take Permit also covers three species that are not currently listed under the ESA: Central Valley fall/late fall-run Chinook salmon (*O. tshawytscha*) ESU, which is designated as species of concern by NMFS; Upper Klamath/Trinity Rivers Chinook salmon (*O. tshawytscha*) ESU, which is currently petitioned for listing as threatened or endangered under the ESA and endangered under the California Endangered Species Act; and Klamath Mountains Province steelhead (*O. mykiss*) DPS, which has no current regulatory status. The non-listed species identified above do not currently have protective federal regulations against take, and a federal permit is not needed to incidentally take them. However, there may be a change in listing status during the permit term. If any of the above-mentioned non-listed species are listed as threatened or endangered in the future, the section 10(a)(1)(B) Incidental Take Permit would become effective immediately for these species.

The incidental taking identified in the SHA is authorized under a section 10(a)(1)(A) Enhancement of Survival Permit. The SHA addresses potential

impacts resulting from SPI's timber harvest activities on SPL&T lands in the Sacramento and Trinity River basins upstream of currently impassable dams, where NMFS is proposing to reintroduce populations of ESA-listed salmonids. The purpose of the SHA is to provide incentives for non-Federal property owners to voluntarily conduct beneficial management activities that either support or attract ESA-listed species. The beneficial management activities proposed under the SHA will improve habitat within the SHA Plan Area by using SPI's Road Erosion and Sediment Delivery Index (READI) model to identify sources of sediment from road runoff. Road watercourse crossing improvements will be applied, such as new drains and road surfacing, to reduce sediment delivery to the maximum extent practicable. SPI will also support ESA-listed species reintroduction efforts proposed by NMFS, which is expected to contribute towards the recovery of ESA-listed anadromous fish populations in the Sacramento River and Trinity River basins. These actions are expected to provide a net conservation benefit for ESA-listed salmonids.

On June 19, 2020, NMFS published a Notice of Receipt and Notice of Availability in the **Federal Register** (85 FR 37070; June 19, 2020) asking for public comments on the draft HCP/SHA and the associated draft NEPA EA. NMFS received three letters from the public expressing support for the HCP/SHA and the proposed issuance of the permits. No changes were made in response to the comments received, as none were suggested or requested by the public.

Authority

Section 9 of the ESA and Federal regulations prohibit the taking of a species listed as endangered or threatened. The ESA defines ''take'' to mean harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct. NMFS may issue permits under limited circumstances to take listed species. Section 10(a)(1)(B) of the ESA and implementing regulations (50 CFR 222.307) provide for authorizing take of listed species, incidental to, and not the purpose of, the carrying out of an otherwise lawful activity.

Enhancement of Survival permits are issued in accordance with Section 10(a)(1)(A) of the ESA (16 U.S.C. 1531 *et seq.*) and regulations governing listed fish and wildlife permits (50 CFR 222.308). NMFS issues permits based on findings that such permits: (1) Are applied for in good faith; (2) if granted and exercised, would not operate to the disadvantage of the listed species that are the subject of the permit; and (3) are consistent with the purposes and policy of section 2 of the ESA. The authority to take listed species is subject to conditions set forth in the permits.

Dated: November 10, 2021.

Angela Somma,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–P

BUREAU OF CONSUMER FINANCIAL PROTECTION

[Docket No. CFPB–2021–0020]

Agency Information Collection Activities: Comment Request

AGENCY: Bureau of Consumer Financial Protection.

ACTION: Notice and request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (PRA), the Bureau of Consumer Financial Protection (Bureau) is requesting to renew the Office of Management and Budget's (OMB's) approval for an existing information collection titled ''Certification of Vaccination.''

DATES: Written comments are encouraged and must be received on or before January 18, 2022 to be assured of consideration.

ADDRESSES: You may submit comments, identified by the title of the information collection, OMB Control Number (see below), and docket number (see above), by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Email: PRA_Comments@cfpb.gov.* Include Docket No. CFPB–2021–0020 in the subject line of the email.
- *Mail/Hand Delivery/Courier:* Comment intake, Bureau of Consumer Financial Protection (Attention: PRA Office), 1700 G Street NW, Washington, DC 20552. Please note that due to circumstances associated with the COVID–19 pandemic, the Bureau discourages the submission of comments by mail, hand delivery, or courier. Please note that comments submitted after the comment period will not be accepted. In general, all comments received will become public records, including any personal information provided. Sensitive personal information, such as account numbers or Social Security numbers, should not be included.

FOR FURTHER INFORMATION CONTACT: Documentation prepared in support of this information collection request is available at *www.regulations.gov.* Requests for additional information should be directed to Anthony May, Paperwork Reduction Act Officer, at (202) 435–7278, or email: *CFPB_PRA@cfpb.gov.* If you require this document in an alternative electronic format, please contact *CFPB_Accessibility@cfpb.gov.* Please do not submit comments to these email boxes.

SUPPLEMENTARY INFORMATION:

Title of Collection: Certification of Vaccination.

OMB Control Number: 3170–0075.

Type of Review: Extension of a currently approved information collection.

Affected Public: Individuals.

Estimated Number of Respondents: 1,500.

Estimated Total Annual Burden Hours: 125.

Abstract: The Consumer Financial Protection Bureau (CFPB or the Bureau) established safety protocols for both fully vaccinated and unvaccinated people. This information collection (*i.e.,* the Certification of Vaccination form) will ascertain individuals' vaccination statuses to the Bureau to comply with Executive Order 13991 titled ''Protecting the Federal Workforce and Requiring Mask-Wearing.'' In compliance with guidance from the Centers for Disease Control and Prevention (CDC) and the Safer Federal Workforce Task Force, the Bureau is collecting this information from fully vaccinated individuals so that they can comply with Bureau safety guidelines. The Bureau is also collecting this information from partially or unvaccinated individuals so that that other measures can be implemented to enforce Bureau safety guidelines (*e.g.,* wearing masks, physical/social distancing, regular testing, adherence to applicable travel requirements). The Bureau collects these data to promote the safety of Federal buildings, the Federal workforce, and others on site at agency facilities consistent with the COVID–19 Workplace Safety: Agency Model Safety Principles established by the Safer Federal Workforce Task Force and guidance from the CDC and the Occupational Safety and Health Administration. Specifically, Bureau staff will use these data for implementing and enforcing workplace safety protocols.

Request for Comments: Comments are invited on: (a) Whether the collection of

information is necessary for the proper performance of the functions of the Bureau, including whether the information will have practical utility; (b) The accuracy of the Bureau's estimate of the burden of the collection of information, including the validity of the methods and the assumptions used; (c) Ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record.

Dated: November 10, 2021.

Anthony May,

Paperwork Reduction Act Officer, Bureau of Consumer Financial Protection.

BUREAU OF CONSUMER FINANCIAL PROTECTION

[Docket No. CFPB–2021–0019]

Agency Information Collection Activities: Comment Request

AGENCY: Bureau of Consumer Financial Protection.

ACTION: Notice and request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (PRA), the Bureau of Consumer Financial Protection (Bureau) is requesting to renew the Office of Management and Budget (OMB) approval for an existing information collection titled ''Generic Information Collection Plan for the Collection of Qualitative Feedback on Bureau Service Delivery.''

DATES: Written comments are encouraged and must be received on or before January 18, 2022 to be assured of consideration.

ADDRESSES: You may submit comments, identified by the title of the information collection, OMB Control Number (see below), and docket number (see above), by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Email: PRA_Comments@cfpb.gov.* Include Docket No. CFPB–2021–0019 in the subject line of the email.
- *Mail/Hand Delivery/Courier:* Comment intake, Bureau of Consumer Financial Protection (Attention: PRA Office), 1700 G Street NW, Washington, DC 20552. Please note that due to circumstances associated with the COVID–19 pandemic, the Bureau discourages the submission of comments by mail, hand delivery, or courier. Please note that comments submitted after the comment period will not be accepted. In general, all comments received will become public records, including any personal information provided. Sensitive personal information, such as account numbers or Social Security numbers, should not be included.

FOR FURTHER INFORMATION CONTACT: Documentation prepared in support of this information collection request is available at *www.regulations.gov.* Requests for additional information should be directed to Anthony May, Paperwork Reduction Act Officer, at (202) 435–7278, or email: *CFPB_PRA@cfpb.gov.* If you require this document in an alternative electronic format, please contact *CFPB_Accessibility@cfpb.gov.* Please do not submit comments to these email boxes.

SUPPLEMENTARY INFORMATION:

Title of Collection: Generic Information Collection for the Collection of Qualitative Feedback on Bureau Service Delivery.

OMB Control Number: 3170–0024.

Type of Review: Extension of a currently approved information collection.

Affected Public: Individuals; Private sector; and State, Local, or Tribal Governments.

Estimated Number of Respondents: 500,000.

Estimated Total Annual Burden Hours: 125,000.

Abstract: This generic information collection plan provides for the collection of qualitative feedback from consumers, financial institutions, and stakeholders on a wide range of services the Bureau provides in an efficient, timely manner, in accordance with the Bureau's commitment to improving service delivery. By qualitative feedback, the Bureau means information that provides useful insights on, for example, comprehension, usability, perceptions, and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. The Bureau expects this feedback to include insights into consumer, financial institution, or stakeholder perceptions, experiences, and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative, and actionable communications between the Bureau and consumers, financial institutions, and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

Request for Comments: Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the Bureau, including whether the information will have practical utility; (b) The accuracy of the Bureau's estimate of the burden of the collection of information, including the validity of the methods and the assumptions used; (c) Ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record.

Dated: November 9, 2021.

Anthony May,

Paperwork Reduction Act Officer, Bureau of Consumer Financial Protection.

BILLING CODE 4810–AM–P

DEPARTMENT OF EDUCATION

Applications for New Awards; American Indian Vocational Rehabilitation Services

AGENCY: Office of Special Education and Rehabilitative Services, Department of Education.

ACTION: Notice.

SUMMARY: The Department of Education (Department) is issuing a notice inviting applications for Federal fiscal year (FFY) 2022 for American Indian Vocational Rehabilitation Services (AIVRS)—Assistance Listing Number 84.250P—to partner with Indian Tribes in providing eligible American Indians with disabilities with vocational rehabilitation (VR) services. This notice relates to the approved information collection under OMB control number 1820–0018.

DATES:

Applications Available: November 16, 2021.

Deadline for Transmittal of Applications: March 16, 2022.

Pre-Application Webinar Information: The Department will hold a pre-application meeting via webinar for prospective applicants on December 20, 2021, 2:00PM Eastern Time. Details about the pre-application meeting will be available at *https://ncrtm.ed.gov/RSAGrantInfo.aspx.*

ADDRESSES: For the addresses for obtaining and submitting an application, please refer to our Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on February 13, 2019 (84 FR 3768) and available at *www.govinfo.gov/content/pkg/FR-2019-02-13/pdf/2019-02206.pdf.*

FOR FURTHER INFORMATION CONTACT: Joy Harris-Summerville, U.S. Department of Education, 400 Maryland Avenue SW, Room 5056E, Potomac Center Plaza, Washington, DC 20202–2800. Telephone: (202) 245–8240. Email: *Joy.Harris@ed.gov.*

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION:

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The purpose of this program is to make grants to the governing bodies of Indian tribes located on Federal and State reservations (and consortia of those governing bodies) to provide VR services, including culturally appropriate services, to American Indians with disabilities who reside on or near such reservations, consistent with such eligible individuals' strengths, resources, priorities, concerns, abilities, capabilities, interests, and informed choice, so that such individuals may prepare for, and engage in, high-quality employment that will increase opportunities for economic self-sufficiency.

Priority: In accordance with 34 CFR 75.105(b)(2)(iv), this priority is from section 121(b)(4) of the Rehabilitation Act of 1973, as amended (Rehabilitation Act) (29 U.S.C. 741(b)(4)).

Competitive Preference Priority: For FY 2022, and any subsequent year in which we make awards from the list of unfunded applications from this competition, this priority is a competitive preference priority. Under 34 CFR 75.105(c)(2)(i), we award an additional five points to an application that meets this priority.

This priority is:

Continuation of Previously Funded Tribal Programs.

In making new awards under this program, we give priority to applications for the continuation of programs that have been funded under the AIVRS program.

Program Authority: 29 U.S.C. 741.

Note: Projects will be awarded and must be operated in a manner consistent with the nondiscrimination requirements contained in the Federal civil rights laws.

Applicable Regulations: (a) The Education Department General Administrative Regulations in 34 CFR parts 75, 77, 81, 82, and 84. (b) The Office of Management and Budget Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement) in 2 CFR part 180, as adopted and amended as regulations of the Department in 2 CFR part 3485. (c) The Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards in 2 CFR part 200, as adopted and amended as regulations of the Department in 2 CFR part 3474. (d) The regulations for this program in 34 CFR part 371.

II. Award Information

Type of Award: Discretionary grants.

Estimated Available Funds: The Administration intends to use approximately $4,369,250 for new awards for this program for FFY 2022. The actual level of funding, if any, depends on final congressional action. However, we are inviting applications to allow enough time to complete the grant process if Congress appropriates funds for this program.

Contingent upon the availability of funds and the quality of applications, we may make additional awards in subsequent years from the list of unfunded applications from this competition.

Estimated Range of Awards: $300,000–$550,000.

Estimated Average Size of Award: $546,156.

Estimated Number of Awards: 8.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 60 months.

III. Eligibility Information

1. *Eligible Applicants:* Applications may be made only by Indian Tribes (and consortia of those Indian Tribes) located on Federal and State reservations. The definition of ''Indian Tribe'' in section 7(19)(B) of the Rehabilitation Act is ''any Federal or State Indian tribe, band, rancheria, pueblo, colony, or community, including any Alaskan native village or regional village corporation (as defined in or established pursuant to the Alaska Native Claims Settlement Act) and a tribal organization (as defined in section 4(1) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b(1)).''

''Reservation'' is defined in 34 CFR 371.6 as ''a Federal or State Indian reservation, public domain Indian allotment, former Indian reservation in Oklahoma, land held by incorporated Native groups, regional corporations and village corporations under the provisions of the Alaska Native Claims Settlement Act; or a defined area of land recognized by a State or the Federal Government where there is a concentration of tribal members and on which the tribal government is providing structured activities and services.''

The applicant for an AIVRS grant must be—

(1) The governing body of an Indian Tribe, either on behalf of the Indian Tribe or on behalf of a consortium of Indian Tribes; or

(2) A Tribal organization that is a separate legal organization from an Indian Tribe.

To receive an AIVRS grant, a Tribal organization that is not a governing body of an Indian Tribe must—

(1) Have as one of its functions the vocational rehabilitation of American Indians with disabilities; and

(2) Have the approval of the Tribe to be served by such organization.

If a grant is made to the governing body of an Indian Tribe, either on its own behalf or on behalf of a consortium, or to a Tribal organization to perform services benefiting more than one Indian Tribe, the approval of each such Indian Tribe shall be a prerequisite to the making of such a grant.

2. a. *Cost Sharing or Matching:* Cost sharing is required by section 121(a) of the Rehabilitation Act and 34 CFR 371.40 at 10 percent of the total cost of the project.

b. *Indirect Cost Rate Information:* This program uses an unrestricted indirect cost rate. Applicants for this program are the governing bodies of Indian Tribes (or consortia of governing bodies) and have negotiated indirect cost rate agreements with a cognizant agency if indirect costs will be charged to the grant. For more information regarding indirect costs, or to obtain a negotiated indirect cost rate, please see *www2.ed.gov/about/offices/list/ocfo/intro.html.*

c. *Administrative Cost Limitation:* This program does not include any program-specific limitation on administrative expenses. All

administrative expenses must be reasonable and necessary and conform to Cost Principles described in 2 CFR part 200 subpart E of the Uniform Guidance.

3. *Subgrantees:* A grantee under this competition may not award subgrants to entities to directly carry out project activities described in its application. While subgrants are not permitted, under 34 CFR 371.42(a), grantees are permitted to provide the VR services by contract or otherwise enter into an agreement with a designated State unit (DSU), a community rehabilitation program, or another agency to assist in the implementation of the Tribal VR program, as long as such contract or agreement is identified in the application.

IV. Application and Submission Information

1. *Application Submission Instructions:* Applicants are required to follow the Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on February 13, 2019 (84 FR 3768), and available at *www.govinfo.gov/content/pkg/FR-2019-02-13/pdf/2019-02206.pdf,* which contain requirements and information on how to submit an application.

2. *Intergovernmental Review:* This competition is not subject to Executive Order 12372 and the regulations in 34 CFR part 79.

3. *Funding Restrictions:* We reference regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

V. Application Review Information

1. *Selection Criteria:* The selection criteria for this competition are from 34 CFR 75.210, have a maximum score of 100 points, and are as follows:

(a) *Need for Project and Significance* (10 Points): The Secretary considers the need for and significance of the proposed project. In determining the need for and significance of the proposed project, the Secretary considers the following factors:

(1) The magnitude of the need for the services to be provided or the activities to be carried out by the proposed project.

(2) The extent to which specific gaps or weaknesses in services, infrastructure, or opportunities have been identified and will be addressed by the proposed project, including the nature and magnitude of those gaps or weaknesses.

(3) The potential contribution of the proposed project to increased knowledge or understanding of rehabilitation problems, issues, or effective strategies.

(4) The extent to which the proposed project is likely to build local capacity to provide, improve, or expand services that address the needs of the target population.

(b) *Quality of the Project Design* (20 Points):

The Secretary considers the quality of the design of the proposed project. In determining the quality of the design of the proposed project, the Secretary considers the following factors:

(1) The extent to which the goals, objectives, and outcomes to be achieved by the proposed project are clearly specified and measurable.

(2) The extent to which the design of the proposed project is appropriate to, and will successfully address, the needs of the target population or other identified needs.

(3) The extent to which the proposed project will establish linkages with other appropriate agencies and organizations providing services to the target population.

(c) *Quality of Project Services* (20 Points):

The Secretary considers the quality of the services to be provided by the proposed project. In determining the quality of the services to be provided by the proposed project, the Secretary considers the quality and sufficiency of strategies for ensuring equal access and treatment for eligible project participants who are members of groups that have traditionally been underrepresented based on race, color, national origin, gender, age, or disability.

In addition, the Secretary considers the following factors:

(1) The extent to which the services to be provided by the proposed project are appropriate to the needs of the intended recipients or beneficiaries of those services.

(2) The likely impact of the services to be provided by the proposed project on the intended recipients of those services.

(3) The extent to which the services to be provided by the proposed project involve the collaboration of appropriate partners for maximizing the effectiveness of project services.

(d) *Quality of Project Personnel* (15 Points):

The Secretary considers the quality of the personnel who will carry out the proposed project. In determining the quality of project personnel, the Secretary considers the extent to which the applicant encourages applications for employment from persons who are members of groups that have traditionally been underrepresented based on race, color, national origin, gender, age, or disability.

In addition, the Secretary considers the qualifications, including relevant training and experience, of key project personnel.

(e) *Adequacy of Resources* (10 Points):

The Secretary considers the adequacy of resources for the proposed project. In determining the adequacy of resources for the proposed project, the Secretary considers the following factors:

(1) The adequacy of support, including facilities, equipment, supplies, and other resources, from the applicant organization or the lead applicant organization.

(2) The extent to which the costs are reasonable in relation to the objectives, design, and potential significance of the proposed project.

(3) The extent to which the costs are reasonable in relation to the number of persons to be served and to the anticipated results and benefits.

(f) *Quality of the Management Plan* (15 Points):

The Secretary considers the quality of the management plan for the proposed project. In determining the quality of the management plan for the proposed project, the Secretary considers the following factors:

(1) The adequacy of the management plan to achieve the objectives of the proposed project on time and within budget, including clearly defined responsibilities, timelines, and milestones for accomplishing project tasks.

(2) The adequacy of procedures for ensuring feedback and continuous improvement in the operation of the proposed project.

(3) The extent to which the time commitments of the project director and principal investigator and other key project personnel are appropriate and adequate to meet the objectives of the proposed project.

(g) *Quality of the Project Evaluation* (10 Points):

The Secretary considers the quality of the evaluation to be conducted of the proposed project. In determining the quality of the evaluation, the Secretary considers the following factors:

(1) The extent to which the methods of evaluation are thorough, feasible, and appropriate to the goals, objectives, and outcomes of the proposed project.

(2) The extent to which the methods of evaluation include the use of objective performance measures that are clearly related to the intended outcomes of the project and will produce

quantitative and qualitative data to the extent possible.

(3) The extent to which the methods of evaluation will provide performance feedback and permit periodic assessment of progress toward achieving intended outcomes.

2. *Review and Selection Process:* We remind potential applicants that in reviewing applications in any discretionary grant competition, the Secretary may consider, under 34 CFR 75.217(d)(3), the past performance of the applicant in carrying out a previous award, such as the applicant's use of funds, achievement of project objectives, and compliance with grant conditions. The Secretary may also consider whether the applicant failed to submit a timely performance report or submitted a report of unacceptable quality.

In addition, in making a competitive grant award, the Secretary requires various assurances, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

Applicants for the AIVRS program must provide evidence regarding the following special application requirements in 34 CFR 371.21(a)–(k). The application package includes a Special Application Requirements form in Section D that must be completed. An application is not complete without the Special Application Requirements form, provided in the application package, and will not be considered for review without that completed form. These requirements are:

(a) Effort will be made to provide a broad scope of vocational rehabilitation services in a manner and at a level of quality at least comparable to those services provided by the designated State unit.

(b) All decisions affecting eligibility for vocational rehabilitation services, the nature and scope of available vocational rehabilitation services and the provision of such services will be made by a representative of the Tribal vocational rehabilitation program funded through this grant and such decisions will not be delegated to another agency or individual.

(c) Priority in the delivery of vocational rehabilitation services will be given to those American Indians with disabilities who are the most significantly disabled.

(d) An order of selection of individuals with disabilities to be served under the program will be specified if services cannot be provided to all eligible American Indians with disabilities who apply.

(e) All vocational rehabilitation services will be provided according to an individualized plan for employment which has been developed jointly by the representative of the Tribal vocational rehabilitation program and each American Indian with disabilities being served.

(f) American Indians with disabilities living on or near Federal or State reservations where Tribal vocational rehabilitation service programs are being carried out under this part will have an opportunity to participate in matters of general policy development and implementation affecting vocational rehabilitation service delivery by the Tribal vocational rehabilitation program.

(g) Cooperative working arrangements will be developed with the DSU, or DSUs, as appropriate, which are providing vocational rehabilitation services to other individuals with disabilities who reside in the State or States being served.

(h) Any comparable services and benefits available to American Indians with disabilities under any other program, which might meet in whole or in part the cost of any vocational rehabilitation service, will be fully considered in the provision of vocational rehabilitation services.

(i) Any American Indian with disabilities who is an applicant or recipient of services, and who is dissatisfied with a determination made by a representative of the Tribal vocational rehabilitation program and files a request for a review, will be afforded a review under procedures developed by the grantee comparable to those under the provisions of section 102(c)(1)–(5) and (7) of the Rehabilitation Act.

(j) The Tribal vocational rehabilitation program funded under this part must assure that any facility used in connection with the delivery of vocational rehabilitation services meets facility and program accessibility requirements consistent with the requirements, as applicable, of the Architectural Barriers Act of 1968, the Americans with Disabilities Act of 1990, section 504 of the Rehabilitation Act, and the regulations implementing these laws.

(k) The Tribal vocational rehabilitation program funded under this part must ensure that providers of vocational rehabilitation services are able to communicate in the native language of, or by using an appropriate mode of communication with, applicants and eligible individuals who have limited English proficiency, unless it is clearly not feasible to do so.

3. *Risk Assessment and Specific Conditions:* Consistent with 2 CFR 200.206, before awarding grants under this competition the Department conducts a review of the risks posed by applicants. Under 2 CFR 200.208, the Secretary may impose specific conditions and, under 2 CFR 3474.10, in appropriate circumstances, high-risk conditions on a grant if the applicant or grantee is not financially stable; has a history of unsatisfactory performance; has a financial or other management system that does not meet the standards in 2 CFR part 200, subpart D; has not fulfilled the conditions of a prior grant; or is otherwise not responsible.

4. *Integrity and Performance System:* If you are selected under this competition to receive an award that over the course of the project period may exceed the simplified acquisition threshold (currently $250,000), under 2 CFR 200.206(a)(2) we must make a judgment about your integrity, business ethics, and record of performance under Federal awards—that is, the risk posed by you as an applicant—before we make an award. In doing so, we must consider any information about you that is in the integrity and performance system (currently referred to as the Federal Awardee Performance and Integrity Information System (FAPIIS)), accessible through the System for Award Management. You may review and comment on any information about yourself that a Federal agency previously entered and that is currently in FAPIIS.

Please note that, if the total value of your currently active grants, cooperative agreements, and procurement contracts from the Federal Government exceeds $10,000,000, the reporting requirements in 2 CFR part 200, Appendix XII, require you to report certain integrity information to FAPIIS semiannually. Please review the requirements in 2 CFR part 200, Appendix XII, if this grant plus all the other Federal funds you receive exceed $10,000,000.

5. *In General:* In accordance with the Office of Management and Budget's guidance located at 2 CFR part 200, all applicable Federal laws, and relevant Executive guidance, the Department will review and consider applications for funding pursuant to this notice inviting applications in accordance with:

(a) Selecting recipients most likely to be successful in delivering results based on the program objectives through an objective process of evaluating Federal award applications (2 CFR 200.205);

(b) Prohibiting the purchase of certain telecommunication and video surveillance services or equipment in alignment with section 889 of the National Defense Authorization Act of 2019 (Pub. L. 115–232) (2 CFR 200.216);

(c) Providing a preference, to the extent permitted by law, to maximize use of goods, products, and materials produced in the United States (2 CFR 200.322); and

(d) Terminating agreements in whole or in part to the greatest extent authorized by law if an award no longer effectuates the program goals or agency priorities (2 CFR 200.340).

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN); or we may send you an email containing a link to access an electronic version of your GAN. We may notify you informally, also.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Open Licensing Requirements:* Unless an exception applies, if you are awarded a grant under this competition, you will be required to openly license to the public grant deliverables created in whole, or in part, with Department grant funds. When the deliverable consists of modifications to pre-existing works, the license extends only to those modifications that can be separately identified and only to the extent that open licensing is permitted under the terms of any licenses or other legal restrictions on the use of pre-existing works. Additionally, a grantee or subgrantee that is awarded competitive grant funds must have a plan to disseminate these public grant deliverables. This dissemination plan can be developed and submitted after your application has been reviewed and selected for funding. For additional information on the open licensing requirements please refer to 2 CFR 3474.20.

4. *Reporting:* (a) If you apply for a grant under this competition, you must ensure that you have in place the necessary processes and systems to comply with the reporting requirements in 2 CFR part 170 should you receive funding under the competition. This does not apply if you have an exception under 2 CFR 170.110(b).

(b) At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multiyear award, you must submit an annual performance report that provides the most current performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to *www.ed.gov/fund/grant/apply/appforms/appforms.html.*

5. *Performance Measures:* For the purposes of the Government Performance and Results Act of 1993 (GPRA), and reporting under 34 CFR 75.110, the Department has established four performance measures for the AIVRS program. The measures are:

(a) Of all those exiting the program, the percentage of individuals who leave the program with an employment outcome after receiving services under an individualized plan for employment (IPE).

(b)(1) The percentage of individuals who leave the program with an employment outcome after receiving services under an IPE.

(2) The percentage of individuals who leave the program without an employment outcome after receiving services under an IPE.

(3) The percentage of individuals who have not left the program and are continuing to receive services under an IPE.

(c) The percentage of projects that demonstrate an average annual cost per employment outcome of no more than $35,000.

(d) The percentage of projects that demonstrate an average annual cost of services per participant of no more than $10,000.

Each grantee must annually report the data needed to measure its performance on the GPRA measures through the Annual Performance Reporting Form (APR Form) for the AIVRS program.

Note: For purposes of this section, the term ''employment outcome'' means, with respect to an individual, (a) entering or retaining full-time or, if appropriate, part-time competitive employment in the integrated labor market; (b) satisfying the vocational outcome of supported employment; or (c) satisfying any other vocational outcome the Secretary of Education may determine to be appropriate (including satisfying the vocational outcome of customized employment, self-employment, telecommuting, or business ownership). (Section 7(11) of the Rehabilitation Act (29 U.S.C. 705(11)).

6. *Continuation Awards:* In making a continuation award under 34 CFR 75.253, the Secretary considers, among other things: Whether a grantee has made substantial progress in achieving the goals and objectives of the project; whether the grantee has expended funds in a manner that is consistent with its approved application and budget; and, if the Secretary has established performance measurement requirements, the performance targets in the grantee's approved application.

In making a continuation award, the Secretary also considers whether the grantee is operating in compliance with the assurances in its approved application, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

VII. Other Information

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document and a copy of the application package in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *www.govinfo.gov.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit

your search to documents published by the Department.

Katherine Neas,

Acting Assistant Secretary, Office of Special Education and Rehabilitative Services.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

[Case Number 2021–004; EERE–2021–BT–WAV–0009]

Energy Conservation Program: Notification of Petition for Waiver of GE Appliances, a Haier Company, From the Department of Energy Miscellaneous Refrigeration Products Test Procedure

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notification of petition for waiver; request for comments.

SUMMARY: This notification announces receipt of and publishes a petition for waiver from GE Appliances, a Haier Company, which seeks a waiver for a specified miscellaneous refrigeration product basic model from the U.S. Department of Energy (''DOE'') test procedure used for determining the energy consumption of these products. DOE solicits comments, data, and information concerning the petition and its suggested alternate test procedure so as to inform DOE's final decision on the waiver request.

DATES: Written comments and information are requested and will be accepted on or before December 16, 2021.

ADDRESSES: Interested persons are encouraged to submit comments using the Federal eRulemaking Portal at *www.regulations.gov.* Alternatively, interested persons may submit comments, identified by docket number EERE–2021–BT–WAV–0009, by any of the following methods:

1. *Federal eRulemaking Portal: www.regulations.gov.* Follow the instructions for submitting comments.

2. *Email:* to *AS_Waiver_Requests@ee.doe.gov.* Include docket number EERE–2021–BT–WAV–0009 in the subject line of the message.

No telefacsimiles (''faxes'') will be accepted. For detailed instructions on submitting comments and additional information on this process, see the **SUPPLEMENTARY INFORMATION** section of this document.

Although DOE has routinely accepted public comment submissions through a variety of mechanisms, including postal mail and hand delivery/courier, the Department has found it necessary to make temporary modifications to the comment submission process in light of the ongoing coronavirus disease 2019 (''COVID–19'') pandemic. DOE is currently suspending receipt of public comments via postal mail and hand delivery/courier. If a commenter finds that this change poses an undue hardship, please contact Appliance Standards Program staff at (202) 586–1445 to discuss the need for alternative arrangements. Once the COVID–19 pandemic health emergency is resolved, DOE anticipates resuming all of its regular options for public comment submission, including postal mail and hand delivery/courier.

Docket: The docket, which includes **Federal Register** notices, comments, and other supporting documents/materials, is available for review at *www.regulations.gov.* All documents in the docket are listed in the *www.regulations.gov* index. However, some documents listed in the index, such as those containing information that is exempt from public disclosure, may not be publicly available.

The docket web page can be found at *www.regulations.gov/docket/EERE-2021-BT-WAV-0009.* The docket web page contains instruction on how to access all documents, including public comments, in the docket. See the **SUPPLEMENTARY INFORMATION** section for information on how to submit comments through *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT:

Ms. Julia Hegarty, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Building Technologies Office, Mailstop EE–5B, 1000 Independence Avenue SW, Washington, DC 20585–0121. Email: *AS_Waiver_Request@ee.doe.gov.*

Mr. Michael Kido, U.S. Department of Energy, Office of the General Counsel, Mail Stop GC–33, Forrestal Building, 1000 Independence Avenue SW, Washington, DC 20585–0103. Telephone: (202) 586–8145. Email: *Michael.Kido@hq.doe.gov.*

SUPPLEMENTARY INFORMATION: DOE is publishing GEA's petition for waiver in its entirety, pursuant to 10 CFR 430.27(b)(1)(iv).[1] DOE invites all interested parties to submit in writing by December 16, 2021, comments and information on all aspects of the petition, including the alternate test procedure. Pursuant to 10 CFR 430.27(d), any person submitting written comments to DOE must also send a copy of such comments to the petitioner. The contact information for the petitioner is:

John T. Schlafer, GE Appliances, A Haier Company, Appliance Park—AP2–225, Louisville, KY 40225. Email: *john.schlafer@geappliances.com.*

Submitting comments via www.regulations.gov. The *www.regulations.gov* web page will require you to provide your name and contact information. Your contact information will be viewable to DOE Building Technologies staff only. Your contact information will not be publicly viewable except for your first and last names, organization name (if any), and submitter representative name (if any). If your comment is not processed properly because of technical difficulties, DOE will use this information to contact you. If DOE cannot read your comment due to technical difficulties and cannot contact you for clarification, DOE may not be able to consider your comment.

However, your contact information will be publicly viewable if you include it in the comment or in any documents attached to your comment. Any information that you do not want to be publicly viewable should not be included in your comment, nor in any document attached to your comment. If this instruction is followed, persons viewing comments will see only first and last names, organization names, correspondence containing comments, and any documents submitted with the comments.

Do not submit to *www.regulations.gov* information for which disclosure is restricted by statute, such as trade secrets and commercial or financial information (hereinafter referred to as Confidential Business Information (''CBI'')). Comments submitted through *www.regulations.gov* cannot be claimed as CBI. Comments received through the website will waive any CBI claims for the information submitted. For information on submitting CBI, see the Confidential Business Information section.

DOE processes submissions made through *www.regulations.gov* before posting. Normally, comments will be posted within a few days of being submitted. However, if large volumes of comments are being processed simultaneously, your comment may not be viewable for up to several weeks. Please keep the comment tracking number that *www.regulations.gov* provides after you have successfully uploaded your comment.

[1] The petition did not identify any of the information contained therein as confidential business information.

Submitting comments via email. Comments and documents submitted via email also will be posted to *www.regulations.gov.* If you do not want your personal contact information to be publicly viewable, do not include it in your comment or any accompanying documents. Instead, provide your contact information on a cover letter. Include your first and last names, email address, telephone number, and optional mailing address. The cover letter will not be publicly viewable as long as it does not include any comments.

Include contact information each time you submit comments, data, documents, and other information to DOE. Faxes will not be accepted.

Comments, data, and other information submitted to DOE electronically should be provided in PDF (preferred), Microsoft Word or Excel, WordPerfect, or text (ASCII) file format. Provide documents that are not secured, written in English and free of any defects or viruses. Documents should not contain special characters or any form of encryption and, if possible, they should carry the electronic signature of the author.

Campaign form letters. Please submit campaign form letters by the originating organization in batches of between 50 to 500 form letters per PDF or as one form letter with a list of supporters' names compiled into one or more PDFs. This reduces comment processing and posting time.

Confidential Business Information. According to 10 CFR 1004.11, any person submitting information that he or she believes to be confidential and exempt by law from public disclosure should submit via email two well-marked copies: One copy of the document marked confidential including all the information believed to be confidential, and one copy of the document marked ''non-confidential'' with the information believed to be confidential deleted. Submit these documents via email. DOE will make its own determination about the confidential status of the information and treat it according to its determination.

It is DOE's policy that all comments may be included in the public docket, without change and as received, including any personal information provided in the comments (except information deemed to be exempt from public disclosure).

I. Background and Authority

The Energy Policy and Conservation Act, as amended (''EPCA''),[2] authorizes the U.S. Department of Energy (''DOE'') to regulate the energy efficiency of a number of consumer products and certain industrial equipment. (42 U.S.C. 6291–6317) Title III, Part B [3] of EPCA, Public Law 94–163, as amended (42 U.S.C. 6291–6309, as codified), established the Energy Conservation Program for Consumer Products Other Than Automobiles, which, in addition to identifying particular types of consumer products and commercial equipment as covered under the statute, permits the Secretary of Energy to classify additional types of consumer products as covered products. (42 U.S.C. 6292(a)(20)) DOE added miscellaneous refrigeration products (''MREFs'') as covered products through a final determination of coverage published in the **Federal Register** on July 18, 2016 (the ''July 2016 Final Rule''). 81 FR 46768. *Id.*

The energy conservation program under EPCA consists essentially of four parts: (1) Testing, (2) labeling, (3) Federal energy conservation standards, and (4) certification and enforcement procedures. Relevant provisions of EPCA include definitions (42 U.S.C. 6291), test procedures (42 U.S.C. 6293), labeling provisions (42 U.S.C. 6294), energy conservation standards (42 U.S.C. 6295), and the authority to require information and reports from manufacturers (42 U.S.C. 6296).

The Federal testing requirements consist of test procedures that manufacturers of covered products must use as the basis for: (1) Certifying to DOE that their products comply with the applicable energy conservation standards adopted pursuant to EPCA (42 U.S.C. 6295(s)), and (2) making representations about the efficiency of that product (42 U.S.C. 6293(c)). Similarly, DOE must use these test procedures to determine whether the covered product complies with relevant standards promulgated under EPCA. (42 U.S.C. 6295(s))

Under 42 U.S.C. 6293, EPCA sets forth the criteria and procedures DOE is required to follow when prescribing or amending test procedures for covered products. EPCA requires that any test procedures prescribed or amended under this section must be reasonably designed to produce test results which reflect the energy efficiency, energy use or estimated annual operating cost of a covered product during a representative average use cycle or period of use and requires that test procedures not be unduly burdensome to conduct. (42 U.S.C. 6293(b)(3))

MREFs are consumer refrigeration products other than refrigerators, refrigerator-freezers, or freezers. These products include coolers and combination cooler refrigeration products. 10 CFR 430.2. A ''cooler'' is a cabinet, used with one or more doors, that has a source of refrigeration capable of operating on single-phase, alternating current and is capable of maintaining compartment temperatures either: (1) No lower than 39 °F (3.9 °C); or (2) in a range that extends no lower than 37 °F (2.8 °C) but at least as high as 60 °F (15.6 °C) as determined according to the applicable DOE test procedure. The test procedure for MREFs is contained in the Code of Federal Regulations (''CFR'') at 10 CFR part 430, appendix A to subpart B of part 430—Uniform Test Method for Measuring the Energy Consumption of Refrigerators, Refrigerator-Freezers, and Miscellaneous Refrigeration Products (''Appendix A'').

Under 10 CFR 430.27, any interested person may submit a petition for waiver from DOE's test procedure requirements. DOE will grant a waiver from the test procedure requirements if DOE determines either that the basic model for which the waiver was requested contains a design characteristic that prevents testing of the basic model according to the prescribed test procedures, or that the prescribed test procedures evaluate the basic model in a manner so unrepresentative of its true energy consumption characteristics as to provide materially inaccurate comparative data. 10 CFR 430.27(f)(2). A petitioner must include in its petition any alternate test procedures known to the petitioner to evaluate the performance of the product type in a manner representative of the energy consumption characteristics of the basic model. 10 CFR 430.27(b)(1)(iii). DOE may grant the waiver subject to conditions, including adherence to alternate test procedures. 10 CFR 430.27(f)(2).

As soon as practicable after the granting of any waiver, DOE will publish in the **Federal Register** a notice of proposed rulemaking to amend its regulations so as to eliminate any need for the continuation of such waiver. 10 CFR 430.27(l). As soon thereafter as practicable, DOE will publish in the **Federal Register** a final rule to that effect. *Id.*

The waiver process also provides that DOE may grant an interim waiver if it

[2] All references to EPCA in this document refer to the statute as amended through the Energy Act of 2020, Public Law 116–260 (Dec. 27, 2020).

[3] For editorial reasons, upon codification in the U.S. Code, Part B was redesignated as Part A.

appears likely that the underlying petition for waiver will be granted and/or if DOE determines that it would be desirable for public policy reasons to grant immediate relief pending a determination on the underlying petition for waiver. 10 CFR 430.27(e)(2). Within one year of issuance of an interim waiver, DOE will either: (i) Publish in the **Federal Register** a determination on the petition for waiver; or (ii) publish in the **Federal Register** a new or amended test procedure that addresses the issues presented in the waiver. 10 CFR 430.27(h)(2).

If DOE ultimately denies the petition for waiver, DOE will provide a period of 180 days before the manufacturer is required to use the DOE test procedure to make representations of energy efficiency. 10 CFR 430.27(i). When DOE amends the test procedure to address the issues presented in a waiver, the waiver will automatically terminate on the date on which use of that test procedure is required to demonstrate compliance. 10 CFR 430.27(h)(3).

II. GEA's April 2021 Petition for Waiver and Interim Waiver

On April 9, 2021, DOE received from GE Appliances, a Haier Company (''GEA'') a petition (dated April 8, 2021) for waiver and interim waiver from the test procedure for MREFs set forth at appendix A to subpart B of 10 CFR part 430. (GEA, No. 1 at p. 1) [4] Pursuant to 10 CFR 430.27(e)(i), DOE posted the petition on the DOE website at: *www.regulations.gov/document/EERE-2021-BT-WAV-0009-0001*.[5]

The specific basic model subject to the petition was ''S–IHG–R'', which GEA described as an ''In-Home Grower''—a product with lighting, temperature, humidity, and nutrient water control that allows the user to grow plants within their home year-round. GEA stated that the average compartment temperatures of the In-Home Grower exceed the 55 °F standardized temperature required for testing under the existing DOE test procedure (see section 3.2 of appendix A) and, therefore, the product cannot be tested using the existing test procedure. GEA also described characteristics of this basic model that GEA stated would prevent the use of certain test setup, stabilization, temperature control, and energy use determination requirements in appendix A. (GEA, No. 1 at pp. 3–4)

In its April 8, 2021 petition, GEA submitted to DOE an alternate test procedure to determine the energy consumption of its In-Home Grower. (GEA, No. 1 at p. 6) GEA stated that its alternate test procedure would allow for the measurement of the energy use of this product where the requirements of the current DOE test procedure cannot be met. DOE received a follow-up correspondence from GEA on April 26, 2021, which provided a revised alternate test procedure.[6] DOE reviewed the alternate test procedure included in the April 26, 2021 correspondence as the requested alternate test approach when making the initial determination on the petition for waiver and interim waiver. GEA also provided additional correspondence on June 2, 2021, in which it clarified certain aspects of the proposed alternate test procedure included in the April 26, 2021 submission.[7] In the April 26, 2021, correspondence, GEA requested an alternate test approach in which two tests would be conducted for the subject basic model: one with the model operating as ''normal,'' and the other with the refrigeration system disabled to allow for identifying the energy contribution of the cooling system. GEA stated that the main purpose of the cooling system is to counteract the heat generated from the internal lighting, and that the requested alternate test procedure would be used to determine the energy consumption of the cooling system only. (GEA, No. 2 at p. 4)

On July 7, 2021, DOE published a notification of petition for waiver and denial of an interim waiver for the alternative test approach described by GEA in its April 26, 2021 correspondence. 86 FR 35766. In that notification, DOE acknowledged that, based upon GEA's petition, absent an interim waiver, GEA's In-Home Grower cannot be tested and rated for energy consumption according to the MREF test procedure on a basis representative of its true energy consumption characteristics. *Id.* at 86 FR 35768. However, DOE tentatively determined that GEA's proposed alternative test procedure would not result in a measurement of the energy use of the basic model that is representative of an average use cycle or period of use, and therefore the petition for waiver was unlikely to be granted as submitted. *Id.* Specifically, DOE determined that the requested test approach to isolate the refrigeration system energy consumption would not provide a representative measurement of energy use for the basic model during an average use cycle or period of use. 86 FR 35766, 35770. DOE requested comment on all aspects of the petition, including the suggested alternate test procedure and calculation methodology. *Id.*

III. GEA's September 2021 Petition for Waiver

On September 17, 2021, GEA submitted to DOE a new petition for waiver (''September 2021 petition for waiver'') for the same basic model with a revised alternate test approach.[8] The following two sections discuss specific aspects of GEA's September 2021 petition for waiver.

A. Requirements Sought To Be Waived

GEA requested to waive the current test procedure, calculations, and accompanying conditions for testing coolers as specified in section 6.2.2 of appendix A. GEA asserted that the In-Home Grower is fundamentally different from all other known miscellaneous refrigeration products. The primary assertion of the petition is that the basic model for which the waiver was requested contains design characteristics that prevent testing of the basic model according to the prescribed DOE MREF test procedure. GEA states that the In-Home Grower, when tested at its coldest setting in a 90 °F ambient temperature, cannot achieve the 55 °F standardized temperature required for the DOE MREF test procedure (see section 3.2 of appendix A). GEA stated that its testing in a 90 °F ambient condition resulted in compartment temperatures of 79.90 °F and 79.97 °F.

The DOE test procedure at appendix A simulates typical room conditions (72 °F) with door openings, by testing at 90 °F without door openings. 10 CFR 430.23(ff)(7). The test procedure directly measures the energy consumed during steady-state operation and defrosts, if applicable. Additionally, the DOE test procedure incorporates usage adjustment factors to account for differences in these user-related thermal loads for different types of consumer refrigeration products (*i.e.,* MREFs are typically used less frequently than a primary refrigerator-freezer in a household and thus have an adjustment

[4] A notation in this form provides a reference for information that is in the docket for this test procedure waiver (Docket No. EERE–2021–BT–WAV–0009) (available at *www.regulations.gov/docket/EERE-2021-BT-WAV-0009*). This notation indicates that the statement preceding the reference is document number 1 in the docket and appears at page 1 of that document.

[5] The petition did not identify any of the information contained therein as confidential business information.

[6] This document can be found in the docket for this test procedure waiver under Document No. 002.

[7] This document can be found in the docket for this test procedure waiver under Document No. 003.

[8] This document can be found in the docket for this test procedure waiver under Document No. 006.

factor of 0.55). See section 5.2.1.1 of appendix A.

GEA states that there is no need to elevate the ambient temperature for the test to account for door openings and loads because the In-Home Grower has a very low number of door openings and, after the initial loading with plants, will typically not have additional loads introduced. GEA seeks to waive the requirement for testing the In-Home Grower at a 90 °F ambient condition. See section 2.1.1 of appendix A. GEA instead requests to test the In-Home Grower in a 72 °F ambient condition, which it asserts better represents typical use of the product. GEA further stated that testing at a 72 °F ambient with the product temperature set to 60 °F (the minimum temperature set point) yields compartment temperatures between 59.15 and 61.41 °F. GEA also seeks to waive the requirement in section 6.2.2 of appendix A that performance be calculated at a standardized compartment temperature of 55 °F, since the In-home Grower is not capable of maintaining the 55 °F standardized compartment temperature specified in appendix A. Instead, GEA requests that the model be tested in the 72 °F ambient condition using default settings.

Additionally, GEA seeks to waive the existing DOE test procedure requirement to measure the internal compartment temperatures of the unit under test. See section 5.1 of appendix A. GEA claims that the rotation of the compartments significantly increases the test burden of temperature measurements, as the thermocouple wires would require a customized testing setup to avoid tangling of the wires and movement of the temperature masses. Under GEA's requested approach, compartment temperature measurements would not be necessary because no interpolation would be made to reflect performance at the standardized 55 °F compartment temperature. (GEA, No. 6 at p. 4)

GEA also seeks to waive the stabilization and test period requirements specified in sections 2.9 and 4 of appendix A, respectively. Specifically, GEA requests an 8-hour stabilization period (the duration of each rotation) and 24-hour test period (the duration of one full rotation) based on the rotation of the internal compartments, rather than based on compressor cycling as specified in appendix A. (GEA, No. 6 at p. 4)

B. Requested Alternate Test Procedure

GEA seeks to use an alternate test procedure to test and rate a specific MREF basic model. GEA's requested alternate test procedure addresses the test procedure requirements to be waived as discussed in the previous section of this document. GEA's requested approach also includes additional test instructions regarding setup and settings instructions.

Because the In-Home Grower supplies water and nutrients to plants during normal operation, GEA's suggested alternate test procedure provides instructions for filling nutrient tanks with ambient-temperature water prior to the start of the test.

The proposed alternate test approach also provides instructions for product settings, as the suggested test procedure would not be based on the product maintaining compartment temperature to the 55 °F standardized compartment temperature specified in appendix A. Specifically, GEA requests that the In-Home Grower be controlled via use of an application on a connected device and that the product be operated using default settings.

In summary, GEA's suggested alternate test procedure would measure the daily energy consumption of the basic model by providing:

(1) Directions for filling the nutrient water tanks with water at ambient temperature;

(2) A specific stabilization period of 8 hours (in place of the requirements of section 2.9 of appendix A);

(3) A specific test period of 24 hours (in place of the test period described in section 4.1 of appendix A);

(4) An ambient test condition of 72 °F (in place of the requirement in section 2.1.1 of appendix A);

(5) That no compartment temperature measurements be taken during the test (in place of the requirements in section 5.1 of appendix A); and

(6) That the product be controlled using an application from a connected device and operated using default settings. (GEA, No. 6 at p. 6)

IV. DOE Response and Request for Comments

As the September 17, 2021 petition is for the same basic model that is the subject of the petition addressed in the July 7, 2021 **Federal Register** notification, DOE is treating the September 17, 2021 petition as an amendment to the prior petition. DOE reiterates its determination from the July 7, 2021 notification that based on GEA's description of the In-Home Grower, the basic model meets the definition of a cooler in 10 CFR 430.2 for the following reasons:

1. The product consists of a cabinet used with one or more glass doors, as specified by GEA; and

2. The product maintains compartment temperatures no lower than 39 °F, as determined when tested in a 90 °F ambient temperature, as GEA specified that the compartment temperatures measured 79.90 °F and 79.97 °F under these conditions at the minimum temperature setting. 86 FR 35766, 35768.

The definition for cooler at 10 CFR 430.2 does not reference a specific design intent (such as storage of food or beverages) and does not require that the product be capable of maintaining a compartment temperature of 55 °F when tested in a 90 °F ambient temperature. *Id.* While DOE maintains its determination that the subject basic model meets the definition of a cooler in 10 CFR 430.2, DOE acknowledges the significant differences between this basic model and typical MREFs (and more specifically, coolers).[9] Based on the product design and operation details provided by GEA, DOE has tentatively determined that the basic model under consideration is substantially different than the coolers considered in the analysis used to develop the current cooler standards. DOE considered products for which the refrigeration systems were the main source of energy consumption, and in these products the primary purpose of the refrigeration system is to remove heat that enters the cooler compartment from the outside (*i.e.,* through the walls of the cabinet) in order to maintain the compartment at a temperature lower than the ambient temperature (see chapter 3 of the technical support document to the 2016 direct final rule, document number EERE–2011–BT–STD–0043–0118 found online at *www.regulations.gov*). However, the GEA basic model under question includes an array of lights that are used to facilitate plant growth, but which generate heat, such that the primary purpose of the refrigeration system is to remove heat that is generated internally within the compartment in order to maintain the compartment at approximately the same temperature as the ambient temperature. Based on this difference in function from the other cooler products addressed by DOE's regulations, the

[9] GEA stated in its September 17, 2021, petition for waiver that the subject basic model is fundamentally different from all other known MREFs. Specifically, GEA stated that: (1) The product has a fundamentally different purpose than other MREFs, which are for cooling and storing beverages and food; (2) the primary purpose of the refrigeration system in the product is humidity control; (3) because the product operates at or near ambient temperature, the product is uninsulated, unlike all other known MREFs, which are insulated; and (4) the product contains grow lighting, which both consumes energy and adds heat to the product.

design changes that would improve the efficiency of the subject basic model (*e.g.,* reducing lighting energy use, improving heat transfer through the cabinet walls to allow heat to be more easily transferred out of the cabinet) are significantly different than those considered for coolers during the 2016 rulemaking analysis (*e.g.,* increasing refrigeration system efficiency, improving cabinet insulation to reduce heat transfer through the cabinet walls). Therefore, DOE has tentatively determined that the current cooler energy conservation standards are not applicable to the subject basic model.

This approach is not dissimilar from prior actions taken by DOE to address products or equipment that had not been contemplated under the regulatory framework set out by DOE. For example, in the case of commercial refrigeration equipment, DOE has previously indicated that salad bars, buffet tables, and other refrigerated holding and serving equipment meet the definition of commercial refrigeration equipment. But these equipment operate in a unique manner compared to the other commercial refrigeration equipment that DOE considered when establishing its test procedures and standards. Nevertheless, DOE has determined that salad bars, buffet tables, and other refrigerated holding and serving equipment are covered as commercial refrigeration equipment, but that the current energy conservation standards do not apply to them. 79 FR 22277, 22281 (April 21, 2014).

DOE's 2009 beverage vending machines (''BVM'') energy conservation standards rulemaking and the 2007 distribution transformer energy conservation standards rulemaking are also examples of prior instances where DOE determined that covered products or equipment would not be subject to standards due to their unique design or operation. 81 FR 44914, 44920 (Aug. 31, 2009); 72 FR 58190, 58197 (Oct. 12, 2007).

When DOE initially considered energy conservation standards for BVMs, DOE did not consider combination vending machines as a separate equipment class, but instead considered that equipment with all other Class A and Class B BVMs. DOE later recognized that combination vending machines offered a distinct utility (*i.e.,* storage and vending of refrigerated and unrefrigerated merchandise) and concluded that those machines were a separate class of BVMs. DOE decided to not set standards for the equipment class at that time and reserved standards for combination vending machines (indicating that the Class A and Class B BVM standards were not applicable to combination vending machines) and modified the definition of Class A and Class B BVMs to accommodate a definition for combination vending machines. 74 FR 44914, 44920 (Aug. 31, 2009).

Similarly, in the 2007 energy conservation standards rulemaking for distribution transformers, DOE clarified that although underground mining distribution transformers are within the scope of coverage, it recognized that mining transformers were subject to unique and extreme dimensional constraints that impacted their efficiency and performance capabilities and did not establish energy conservation standards for underground mining transformers. In the final rule, DOE established a separate equipment class for mining transformers with the intent to develop the analysis required to establish an appropriate energy conservation standard in the future. 72 FR 58190, 58197 (Oct. 12, 2007). DOE later reached a similar conclusion in 2013 when it decided again not to establish standards for mining distribution transformers. 78 FR 23336, 23353–23354 (Apr. 18, 2013).

Accordingly, in light of these examples, DOE's tentative views with respect to the applicability of standards to the products at issue are consistent with its past approach in addressing novel products and equipment.

DOE understands, based upon GEA's petition, that absent a waiver, GEA's In-Home Grower cannot be tested and rated for energy consumption according to the MREF test procedure on a basis representative of its true energy consumption characteristics.

DOE has reprinted the September 17, 2021 petition for waiver, including the suggested alternate test procedure, at the end of this notification. DOE may consider including this alternate procedure, or a modified version of this alternate procedure, in a subsequent Decision and Order. DOE solicits comments from interested parties on all aspects of the petition, including the suggested alternate test procedure.

Signing Authority

This document of the Department of Energy was signed on November 9, 2021, by Kathleen B. Hogan, Acting Under Secretary for Science and Energy, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on November 9, 2021.

Re: Petition for Waiver Regarding Test Procedures for Measuring the Energy Consumption of an In-Home Grower Product

Dear Ms. deButts: GE Appliances, a Haier company (GEA) respectfully submits this Petition for Waiver requesting an alternate test procedure from the Department of Energy's (DOE) test procedure for Miscellaneous Refrigeration Products in 10 CFR 430 Subpart B, Appendix A. GEA's request is for a new product that allows users to grow plants within their home the entire year, known as an In-Home Grower. The product is designed to be used in an indoor, temperature-controlled environment with room temperatures from 60 °F to 80 °F. The product provides the lighting, temperature and humidity control, and nutrient water to grow an array of plants. As detailed below, there are numerous reasons that the existing DOE miscellaneous refrigeration products test procedures is not appropriate or impossible to use for the In-Home Grower.

1. About GE Appliances

GEA is a leading US manufacturer of home appliances. GEA offers a full suite of major appliances across seven brands as well as portable appliances. GEA has been a participant in and contributor to the DOE's home appliance energy conservation program since its founding more than 40 years ago. Indeed, GEA

supports the goal of the appliance efficiency program: Maximizing energy savings improvements that offer consumers real economic benefits and that do not diminish product performance. GEA devotes substantial resources to the development of new technologies to increase energy efficiency where they are feasible and engineering products to meet the demanding DOE energy efficiency requirements. GEA manufactures a substantial portion of its refrigerator products at its manufacturing facilities in Louisville, KY, Decatur, AL, and Selmer, TN. The products covered by this waiver request will be manufactured in the United States.

2. Basic Models for Which a Waiver Is Requested

There is no existing Product Class for the In-Home Grower. The Basic Model is S–IHG–R. The basic model will be distributed in commerce under the brand name ''Profile''.

The In-Home Grower allows the user to grow plants within their home year-round. The product provides the lighting, temperature and humidity control and nutrient water needed to grow an array of plants. The product is designed to be in a controlled environment with room temperature from 60 to 80 °F.

The product has a circular grow tower that is in the center of the product. The tower is divided into three equal-sized vertical sections, each comprising ⅓rd of a circular cross section (see Figure 1 below).[10]

[Figure]

Figure 1. Top View of In-Home Grower.

On each of the three sides of the tower are gardens. The three sides of the tower meet up with the curved interior walls of the product cabinet to create three chambers within the product. The tower rotates every eight hours. Each time the tower rotates, a section of the tower enters a new chamber. The front chamber is called the display chamber. This is the side of the garden the owner will see through the front glass doors. In the display chamber, there is no grow lighting. The back right and back left chambers are individually controlled for grow lighting, temperature, and humidity.

The product is primarily controlled by a smart-phone application and connection to the app is obtained through WiFi networking capabilities built into the product.

The grow lighting in the product is LED lighting. The lighting systems uses lamps with a variety of color spectrums. The selection and layout of these lamps is designed to optimize plant growth while minimizing energy consumption.

The product utilizes a vapor-compression cooling system that is primarily intended to control humidity in the product, but which also removes excess heat generated by the grow-lighting system in the rear two chambers.

3. Design Characteristic Constituting Grounds for the Petition

There are multiple reasons why the existing MREF test procedure at 10 CFR 430 Subpart B, Appendix A is either impossible to use or inappropriate to use for the In-Home Grower.

a. Even at the product's coldest setting, the internal compartment temperature does not reach the reference temperature of 55 °F for a miscellaneous refrigeration product when it is run in a 90 °F ambient. Per Table 1 in 10 CFR 430 Subpart B, Appendix A, Section 3.2.1.3, when this condition occurs, ''No Energy Use Rating can be established under the existing test procedure''. Therefore, interpolation to 55 °F is not possible, and the existing DOE interpolation method cannot be used to establish a test result.

b. There is no need to test at an elevated ambient temperature to account for door openings and loading as is the case with the current DOE miscellaneous refrigeration products test procedure. This is true for the following reasons.

i. The In-Home Grower is designed to operate with an internal temperature between 60 °F and 80 °F.

ii. Once loaded with plants, there are a minimal amount of door openings as the product is intended to grow the plants until they are grown and ready for use.

iii. Since the internal temperatures are closer to the ambient temperature, any door openings that did occur would only result in minimal heat addition to the interior.

c. The product has rotating compartments which makes taking internal temperature measurements burdensome if not impossible. Thermocouple wires for refrigeration tests run from inside the unit being tested to a panel box affixed to a wall. The internal compartments of the In-Home Grower rotate during operation. Unique fixtures and test setup would be required to avoid tangling of the wires, movement of the thermocouples, or pulling the wires out of the panel box.

d. The test procedure lacks appropriate setup provisions for this remotely controlled product that requires initial cycle selection and activation.

e. The product is fundamentally different from all other known miscellaneous refrigeration products. These differences include, but are not limited to, the following.

i. The product has a fundamentally different purpose than other miscellaneous refrigeration products, which are for cooling and storing beverages and food.

ii. The primary purpose of the refrigeration system in the product is humidity control.

iii. Because the product operates at or near ambient temperature, the product is uninsulated. This is unlike all other known miscellaneous refrigeration products, which are insulated.

iv. The product contains grow lighting, which both consumes energy and adds heat to the product.

4. Requirements Sought To Be Waived

GEA seeks to replace the current test procedure in Appendix A for Coolers, section 6.2.2, with the accompanying test conditions specified in Exhibit A, attached, for the In-Home Grower.

Instead of a 90 °F ambient, GEA has specified a 72 °F ± 1.0 °F ambient for the testing. This is representative of usage as the product is designed to be placed in an indoor, conditioned space with an ambient between 60 and 80 °F. Also, as stated above, there is no need to elevate the ambient for the test to account for door openings and loads as the product has a very low number of door openings and, after the initial loading with plants, will typically not have additional loads introduced.

The proposed test procedure does not have internal temperature measurements. Based on internal testing in a 90 °F environment, the internal temperatures of the two controlled compartments, at its coldest setting were 79.90 °F and 79.97 °F, well above the 55 °F reference temperature of the DOE MREF test procedure. Also, the rotation of the compartments significantly increases the test burden of temperature measurements as the thermocouple wires would require a setup to avoid tangling of the wires and movement of the temperature masses.

This product has no defrosting capabilities and can be tested similarly to a non-automatic defrost refrigerator. In order to capture a complete cycling of the growing chambers, GEA is proposing a test that has an 8-hour

[10] Product images provided with petition may be found at Docket No. EERE–2021–BT–WAV–0009 at *www.regulations.gov/docket/EERE-2021-BT-WAV-0009.*

stabilization period followed by a 24-hour test period. The growing chambers rotate 120° every 8 hours. This comprises one rotation for stability and three rotations for the test period.

5. Manufacturers of All Other Basic Models With Similar Design Characteristics

To GEA's knowledge, there are no products of this type in the marketplace.

6. Notice to Other Manufacturers

Pursuant to 10 CFR 430.27(c)(2), upon publication of this Petition for Waiver, GEA will notify in writing all known manufacturers of domestically marketed basic models of the same product class (as specified in 10 CFR 430.32) and of other product classes known to the petitioner to use the technology or have the characteristic at issue in the waiver. The notice will include a statement that DOE has published the Petition for Waiver in the **Federal Register** and the date the Petition for Waiver was published. The notice will also include a statement that DOE will receive and consider timely written comments on the petition for waiver. Within five working days of publication of this Petition for Waiver, GEA will file with DOE a statement certifying the names and addresses of each person to whom a notice of the petition for waiver was sent.

7. Conclusion

GEA respectfully requests that DOE grant this Petition for Waiver from the current test procedure for the specified basic models.

Very truly yours,
/s/
John T. Schlafer

Attachments:
Exhibit A—Alternate Test Procedure

Exhibit A—Alternate Test Procedure for In-Home Grower

Energy Consumption is Determined by the Formula:
E = EP * 1440/T

Where:

- E is the test cycle energy (kWh/day)
- 1440 = number of minutes in a day
- EP is the energy expended during three full rotations of the growing chambers (kWh)
- T is the length of time for EP (minutes)

Water in Tanks:

Fill the nutrient and supply tanks with water (72.0 ± 5.0 °F) prior to start of the stabilization period.

Stabilization:

The test shall start after a minimum 8-hour stabilization run for each temperature control setting. This constitutes one rotation of the growing chambers.

Ambient Temperature:

Measure and record the ambient temperature at points located 3 feet (91.5 cm) above the floor and 10 inches (25.4 cm) from the center of the two sides of the unit under test. The ambient temperature shall be 72.0 ± 1 °F (21.1 ± 0.6 °C) during the stabilization period and the test period.

Compartment Temperature Measurements:

No compartment temperature measurements are taken during the stabilization and test period.

Test Procedure:

Run the test using the SmartHQ App

1. Download the SmartHQ app on a connected device
2. Select ''Connect Appliance'' and then ''In Home Grower''
3. Follow the procedures per the SmartHQ app to set up the appliance.
4. Fill the nutrient and supply tanks with 72.0 ± 5.0 °F water.
5. Select ''Let's Start Planting'' from the main screen.
6. Select Garden 1 from the ''Select Garden'' screen
   a. Select the ''Default'' growing region.
   b. Select ''Next'' at the bottom of the screen
7. At the screen titled ''What do you want to plant in Garden x?'', select ''Choose Later''
8. Repeat this process for Garden 2 and Garden 3.
9. Select ''Start the Growing Cycle''
10. The first rotation (8 hours) is the stabilization period.
11. The next three rotations (24 hours) is the period where EP and T data are taken.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Basic Energy Sciences Advisory Committee

AGENCY: Office of Science, Department of Energy.

ACTION: Notice of open virtual meeting.

SUMMARY: This notice announces a meeting of the Basic Energy Sciences Advisory Committee (BESAC). The Federal Advisory Committee Act requires that public notice of these meetings be announced in the **Federal Register**.

DATES: Monday, December 6, 2021; 11:00 a.m. to 5:00 p.m.

ADDRESSES: This meeting is open to the public. This meeting will be held digitally via Zoom. Information to participate can be found on the website closer to the meeting date at: *https://science.osti.gov/bes/besac/Meetings.*

FOR FURTHER INFORMATION CONTACT: Kerry Hochberger; Office of Basic Energy Sciences; U.S. Department of Energy; Germantown Building, 1000 Independence Avenue SW, Washington, DC 20585; Telephone: 301–903–7661 or email: *kerry.hochberger@science.doe.gov*.

SUPPLEMENTARY INFORMATION:

Purpose of the Committee: The purpose of this Committee is to make recommendation to DOE–SC with respect to the basic energy sciences research program.

Tentative Agenda

- Call to Order, Introductions, Review of the Agenda
- News from the Office of Science
- News from the Office of Basic Energy Sciences
- Office of Science Distinguished Scientist Fellow Presentation
- Office of Science QIS Centers Presentation
- Roundtable on Foundational Science for Carbon-Neutral Hydrogen Technologies Presentation
- Panel Discussion: Science and Energy Technology Teams
- Facility Updates: LCLS, Neutron Scattering, NSRCs Presentations
- Pre-Committee of Visitors Overview: Workforce Development for Teachers and Scientists (WDTS) Presentation
- Public Comments
- Adjourn

Breaks taken as appropriate

Public Participation: The meeting is open to the public. A webcast of this meeting will be available. Please check the website below for updates and information on how to view the meeting. If you would like to file a written statement with the Committee, you may do so either before or after the meeting. If you would like to make oral statements regarding any of the items on the agenda, you should contact Kerry Hochberger at *kerry.hochberger@science.doe.gov.* You must make your request for an oral statement at least five business days before the meeting. Reasonable provision will be made to include the scheduled oral statements on the agenda. The Chairperson of the Committee will conduct the meeting to facilitate the orderly conduct of business. Public comment will follow the 10-minute rule. Information about the committee can be found at: *https://science.osti.gov/bes/besac.*

Minutes: The minutes of this meeting will be available for public review on the U.S. Department of Energy's Office

of Basic Energy Sciences website at: *https://science.osti.gov/bes/besac/Meetings.*

Signed in Washington, DC, on November 9, 2021.

LaTanya Butler,

Deputy Committee Management Officer.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

[Case No. 2021–009; EERE–2021–BT–WAV–0025]

Energy Conservation Program: Notification of Petition for Waiver of Nortek Global HVAC, LLC From the Department of Energy Central Air Conditioners and Heat Pumps Test Procedure, Notification of Denial of Interim Waiver, and Request for Comment

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notification of petition for waiver and denial of an interim waiver; request for comments.

SUMMARY: This notification announces receipt of and publishes a petition for waiver and interim waiver from Nortek Global HVAC, LLC (''Nortek''), which seeks a waiver for specified central air conditioner and heat pump basic models from the U.S. Department of Energy (''DOE'') test procedure used for determining the energy efficiency of these products. This notification also announces that DOE is declining to grant the request for an interim waiver from the test procedure for the reasons described in this notification. DOE solicits comments, data, and information concerning the petition and its suggested alternate test procedure so as to inform DOE's final decision on the waiver request.

DATES: Written comments and information are requested and will be accepted on or before December 16, 2021.

ADDRESSES: Interested persons are encouraged to submit comments using the Federal eRulemaking Portal at *www.regulations.gov.* Alternatively, interested persons may submit comments, identified by case number 2021–009 and Docket number EERE–2021–BT–WAV–0025, by any of the following methods:

1. *Federal eRulemaking Portal: www.regulations.gov.* Follow the instructions for submitting comments.

2. *Email: AS_Waiver_Requests@ee.doe.gov.* Include the docket number EERE–2021–BT–WAV–0025 in the subject line of the message.

No telefacsimiles (''faxes'') will be accepted. For detailed instructions on submitting comments and additional information on this process, see the **SUPPLEMENTARY INFORMATION** section of this document.

Although DOE has routinely accepted public comment submissions through a variety of mechanisms, including postal mail and hand delivery/courier, the Department has found it necessary to make temporary modifications to the comment submission process in light of the ongoing coronavirus (''COVID–19'') pandemic. DOE is currently suspending receipt of public comments via postal mail and hand delivery/courier. If a commenter finds that this change poses an undue hardship, please contact Appliance Standards Program staff at (202) 586–1445 to discuss the need for alternative arrangements. Once the COVID–19 pandemic health emergency is resolved, DOE anticipates resuming all of its regular options for public comment submission, including postal mail and hand delivery/courier.

Docket: The docket, which includes **Federal Register** notices, comments, and other supporting documents/materials, is available for review at *www.regulations.gov.* All documents in the docket are listed in the *www.regulations.gov* index. However, some documents listed in the index, such as those containing information that is exempt from public disclosure, may not be publicly available.

The docket web page can be found at *www.regulations.gov/docket?D=EERE-2021-BT-WAV-0025.* The docket web page contains instruction on how to access all documents, including public comments, in the docket. See the **SUPPLEMENTARY INFORMATION** section for information how to submit comments through *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT:

Ms. Julia Hegarty, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Building Technologies Office, Mailstop EE–5B, 1000 Independence Avenue SW, Washington, DC 20585–0121. Email: *S_Waiver_Requests@ee.doe.gov.*

Mr. Peter Cochran, U.S. Department of Energy, Office of the General Counsel, Mail Stop GC–33, Forrestal Building, 1000 Independence Avenue SW, Washington, DC 20585–0103. Telephone: (202) 586–9496. Email: *peter.cochran@hq.doe.gov.*

SUPPLEMENTARY INFORMATION: DOE is publishing Nortek's petition for waiver, pursuant to 10 CFR 430.27(b)(1)(iv), inclusive of all substantive portions thereof and absent any information for which petitioner requested treatment as confidential business information.[1] DOE invites all interested parties to submit in writing by December 16, 2021, comments and information on all aspects of the petition, including an alternate test procedure. Pursuant to 10 CFR 430.27(d), any person submitting written comments to DOE must also send a copy of such comments to the petitioner. The contact information for the petitioner is:

Matthew Lattanzi, Nortek Global HVAC, 8000 Phoenix Parkway, O'Fallon, MO 63368. Email: *matthew.lattanzi@nortek.com.*

Submitting comments via www.regulations.gov. The *www.regulations.gov* web page will require you to provide your name and contact information. Your contact information will be viewable to DOE Building Technologies staff only. Your contact information will not be publicly viewable except for your first and last names, organization name (if any), and submitter representative name (if any). If your comment is not processed properly because of technical difficulties, DOE will use this information to contact you. If DOE cannot read your comment due to technical difficulties and cannot contact you for clarification, DOE may not be able to consider your comment.

However, your contact information will be publicly viewable if you include it in the comment or in any documents attached to your comment. Any information that you do not want to be publicly viewable should not be included in your comment, nor in any document attached to your comment. If this instruction is followed, persons viewing comments will see only first and last names, organization names, correspondence containing comments, and any documents submitted with the comments.

Do not submit to *www.regulations.gov* information for which disclosure is restricted by statute, such as trade secrets and commercial or financial information (hereinafter referred to as Confidential Business Information (''CBI''). Comments submitted through *www.regulations.gov* cannot be claimed as CBI. Comments received through the website will waive any CBI claims for the information submitted. For

[1] The petition as submitted included the entire text of 10 CFR part 430 subpart B appendix M1. The reprint of the petition at the end of this notification includes only the substantive provisions of that appendix. The petition for waiver and petition for interim waiver is available in its entirety at *www.regulations.gov/docket?D=EERE-2021-BT-WAV-0025.*

information on submitting CBI, see the Confidential Business Information section.

DOE processes submissions made through *www.regulations.gov* before posting. Normally, comments will be posted within a few days of being submitted. However, if large volumes of comments are being processed simultaneously, your comment may not be viewable for up to several weeks. Please keep the comment tracking number that *www.regulations.gov* provides after you have successfully uploaded your comment.

Submitting comments via email. Comments and documents submitted via email also will be posted to *www.regulations.gov.* If you do not want your personal contact information to be publicly viewable, do not include it in your comment or any accompanying documents. Instead, provide your contact information on a cover letter. Include your first and last names, email address, telephone number, and optional mailing address. The cover letter will not be publicly viewable if it does not include any comments.

Include contact information each time you submit comments, data, documents, and other information to DOE. Faxes will not be accepted.

Comments, data, and other information submitted to DOE electronically should be provided in PDF (preferred), Microsoft Word or Excel, WordPerfect, or text (ASCII) file format. Provide documents that are not secured, written in English and free of any defects or viruses. Documents should not contain special characters or any form of encryption and, if possible, they should carry the electronic signature of the author.

Campaign form letters. Please submit campaign form letters by the originating organization in batches of between 50 to 500 form letters per PDF or as one form letter with a list of supporters' names compiled into one or more PDFs. This reduces comment processing and posting time.

Confidential Business Information. According to 10 CFR 1004.11, any person submitting information that he or she believes to be confidential and exempt by law from public disclosure should submit via email two well-marked copies: One copy of the document marked confidential including all the information believed to be confidential, and one copy of the document marked ''non-confidential'' with the information believed to be confidential deleted. DOE will make its own determination about the confidential status of the information and treat it according to its determination.

It is DOE's policy that all comments may be included in the public docket, without change and as received, including any personal information provided in the comments (except information deemed to be exempt from public disclosure).

I. Background and Authority

The Energy Policy and Conservation Act, as amended (''EPCA''),[2] authorizes DOE to regulate the energy efficiency of a number of consumer products and industrial equipment. (42 U.S.C. 6291–6317) Title III, Part B [3] of EPCA, Public Law 94–163 (42 U.S.C. 6291–6309, as codified), established the Energy Conservation Program for Consumer Products Other Than Automobiles, which sets forth a variety of provisions designed to improve energy efficiency for certain types of consumer products. These products include central air conditioners and heat pumps (''CAC/HPs''), the subject of this notification. (42 U.S.C. 6292(a)(3))

The energy conservation program under EPCA consists essentially of four parts: (1) Testing, (2) labeling, (3) Federal energy conservation standards, and (4) certification and enforcement procedures. Relevant provisions of EPCA include definitions (42 U.S.C. 6291), test procedures (42 U.S.C. 6293), labeling provisions (42 U.S.C. 6294), energy conservation standards (42 U.S.C. 6295), and the authority to require information and reports from manufacturers (42 U.S.C. 6296).

The Federal testing requirements consist of test procedures that manufacturers of covered products must use as the basis for: (1) Certifying to DOE that their products comply with the applicable energy conservation standards adopted pursuant to EPCA (42 U.S.C. 6295(s)), and (2) making representations about the efficiency of that product (42 U.S.C. 6293(c)). Similarly, DOE must use these test procedures to determine whether the product complies with relevant standards promulgated under EPCA. (42 U.S.C. 6295(s))

Under 42 U.S.C. 6293, EPCA sets forth the criteria and procedures DOE is required to follow when prescribing or amending test procedures for covered products. EPCA requires that any test procedures prescribed or amended under this section must be reasonably designed to produce test results which reflect energy efficiency, energy use or estimated annual operating cost of a covered product during a representative average use cycle or period of use and requires that test procedures not be unduly burdensome to conduct. (42 U.S.C. 6293(b)(3))

Beginning January 1, 2023, any representations, including compliance certifications, made with respect to the energy use, power, or efficiency of CAC/HPs must be based on the results of testing according to the test procedure contained in the Code of Federal Regulations (''CFR'') at 10 CFR part 430, subpart B, appendix M1, *Uniform Test Method for Measuring the Energy Consumption of Central Air Conditioners and Heat Pumps* (''Appendix M1'').

Under 10 CFR 430.27, any interested person may submit a petition for waiver from DOE's test procedure requirements. DOE will grant a waiver from the test procedure requirements if DOE determines either that the basic model for which the waiver was requested contains a design characteristic that prevents testing of the basic model according to the prescribed test procedures, or that the prescribed test procedures evaluate the basic model in a manner so unrepresentative of its true energy consumption characteristics as to provide materially inaccurate comparative data. 10 CFR 430.27(f)(2). A petitioner must include in its petition any alternate test procedures known to the petitioner to evaluate the performance of the product type in a manner representative of the energy consumption characteristics of the basic model. 10 CFR 430.27(b)(1)(iii). DOE may grant the waiver subject the conditions, including adherence to alternate test procedures. 10 CFR 430.27(f)(2).

As soon as practicable after the granting of any waiver, DOE will publish in the **Federal Register** a notice of proposed rulemaking to amend its regulations so as to eliminate any need for the continuation of such waiver. 10 CFR 430.27(l). As soon thereafter as practicable, DOE will publish in the **Federal Register** a final rule to that effect. *Id.*

The waiver process also provides that DOE may grant an interim waiver if it appears likely that the underlying petition for waiver will be granted and/or if DOE determines that it would be desirable for public policy reasons to grant immediate relief pending a determination on the underlying petition for waiver. 10 CFR 430.27(e)(2). Within one year of issuance of an interim waiver, DOE will either: (i) Publish in the **Federal Register** a

[2] All references to EPCA in this document refer to the statute as amended through the Energy Act of 2020, Public Law 116–260 (Dec. 27, 2021).

[3] For editorial reasons, upon codification in the U.S. Code, Part B was redesignated as Part A.

determination on the petition for waiver; or (ii) publish in the **Federal Register** a new or amended test procedure that addresses the issues presented in the waiver. 10 CFR 430.27(h)(2).

If DOE ultimately denies the petition for waiver, or if the alternate test procedure specified in the interim waiver differs from the alternate test procedure specified by DOE in a subsequent Decision and Order, DOE will provide a period of 180 days before the manufacturer is required to use the DOE test procedure or the alternate test procedure specified in the Decision and Order to make representations of energy efficiency. 10 CFR 430.27(i). When DOE amends the test procedure to address the issues presented in a waiver, the waiver will automatically terminate on the date on which use of that test procedure is required to demonstrate compliance. 10 CFR 430.27(h)(3).

II. Nortek's Petition for Waiver and Interim Waiver

By letter dated September 7, 2021,[4] Nortek filed a petition for waiver and interim waiver from the test procedure for CAC/HPs set forth in appendix M1, when effective.[5] The petition specifies the basic models to be considered under the waiver request. (Nortek, No. 1 at pp. 12–18). In its petition, Nortek asserted that appendix M1 contains errors in the calculations for capacity adjustment and power consumption for the indoor fan at part-load conditions, applicable to testing of two-stage coil-only CAC/HPs. (Nortek, No. 1 at p. 1). As such, Nortek claimed that the DOE test procedure evaluates its specified basic models in a manner unrepresentative of their true energy use; thereby providing materially inaccurate comparative data. *Id.*

Coil-only systems are indoor units that are distributed in commerce without an indoor blower or separate designated air mover. Such systems installed in the field rely on a separately installed furnace or a modular blower for indoor air movement. Because coil-only CAC/HPs do not include their own indoor fan to circulate air, appendix M1 prescribes equations that are used to calculate the assumed (*i.e.,* ''default'') power input and heat output of an average furnace fan with which the test procedure assumes the indoor coil is pared in a field installation. The resulting fan power input value is added to the electrical power consumption measured during testing. The resulting fan heat output value is subtracted from the measured cooling capacity of the CAC/HP for cooling mode tests and added to the measured heating capacity for heating mode tests. Separate fan power and fan heat equations are provided for different types of coil-only systems (*i.e.,* mobile home or space-constrained vs. ''conventional'' non-mobile home and non-space-constrained). In each equation, the measured airflow rate (in cubic feet per minute of standard air (''scfm'')) is multiplied by a defined coefficient (expressed in Watts (''W'') per 1,000 scfm (''W/1,000 scfm'') for fan power, and British Thermal Units (''Btu'') per hour (''Btu/h'') per 1,000 scfm (''Btu/h/1,000 scfm'') for fan heat), hereafter referred to as the ''default fan power coefficient'' and ''default fan heat coefficient''.

For coil-only units installed in mobile-home and space-constrained systems, appendix M1 defines a default fan power coefficient of 406 W/1,000 scfm and a default fan heat coefficient of 1,385 Btu/h/1,000 scfm. For coil-only units installed in conventional (*i.e.,* non-mobile-home and non-space-constrained) systems, appendix M1 defines a default fan power coefficient of 441 W/1,000 scfm and a default fan heat coefficient of 1,505 Btu/h/1,000 scfm.[6] (10 CFR part 430, subpart B, appendix M1, section 3.3.d) For testing of two-stage coil-only systems, appendix M1 requires testing at two load conditions: (1) Full-load, operating at full compressor stage, and (2) low-load (also referred to as part-load), operating at the lower compressor stage. The test procedure defines the relative air volume rates to use for each test. The part-load test has a lower air volume rate than the full-load test.[7] For both the default fan power coefficient and default fan heat coefficient, the same coefficient is used for both the full-load and part-load tests.

Nortek asserted that by applying the same default fan power coefficient and default fan heat coefficient to both the full-load and part-load tests, appendix M1 incorrectly establishes a linear relationship between indoor airflow and fan power (and fan heat); whereas, according to Nortek, a cubic relationship should be applied instead, citing the theoretical fan affinity laws that describe the relationship between fan power and airflow. (Nortek, No. 1 at p. 2) Nortek recommended an alternate test procedure that would define lower default fan power coefficients and default fan heat coefficients for the part-load tests, instead of applying the same coefficients to both the full-load and part-load tests, as is done in appendix M1. (Nortek, No. 1 at pp. 4–9) The lower coefficients recommended by Nortek are based on its analysis that incorporated theoretical fan power (based on fan affinity laws); estimates of fan motor efficiency (based on input from motor experts and Nortek's internal testing and experience); and estimates of the installed base of minimally efficient versus high-efficiency motor technologies (based on estimates from the 2015 energy conservation standards rulemaking). *Id.*

Nortek also requests an interim waiver from the existing DOE test procedure. DOE must review the petition for interim waiver within 45 business days of receipt of the petition. 10 CFR 430.27(e)(1)(ii). If DOE does not notify the applicant of the disposition of the petition for interim waiver, in writing, within 45 business days of receipt of the petition, the interim waiver is granted utilizing the alternate test procedure requested in the petition. *Id.* DOE will grant an interim waiver if it appears likely that the petition for waiver will be granted, and/or if DOE determines that it would be desirable for public policy reasons to grant immediate relief pending a determination of the petition for waiver. 10 CFR 430.27(e)(2).

III. Requested Alternate Test Procedure

EPCA requires that manufacturers use DOE test procedures when making representations about the energy consumption and energy consumption costs of covered products. (42 U.S.C. 6293(c)) Consistency is important when making representations about the energy efficiency of covered products, including when demonstrating compliance with applicable DOE energy conservation standards. Pursuant to 10 CFR 430.27, and after consideration of public comments on the petition, DOE may establish in a subsequent Decision and Order an alternate test procedure

[4] A petition submitted under 10 CFR 430.27 is considered ''received'' on the date it is received by DOE through DOE's established email box for receipt of waiver petitions or, if delivered by mail, on the date the waiver petition is stamped as received by the DOE. 10 CFR 430.27(e)(1)(iii).

[5] As noted, beginning January 1, 2023, any representations, including compliance certifications, made with respect to the energy use, power, or efficiency of CAC/HPs must be based on the results of testing according to the test procedure at appendix M1.

[6] For example, for a CAC/HP test conducted at an airflow rate of 1,640 scfm, the default fan power for a ''conventional'' installation would be calculated as (441 W/1,000 scfm × 1,640 scfm = 723 W); and the default fan heat would be calculated as (1,505 Btu/h/1,000 scfm × 1,640 scfm = 2,466 Btu/h).

[7] Specifically, the indoor air volume rate to be used for testing at part-load (*i.e.,* the ''cooling minimum air volume rate'') is the higher of (1) the rate specified by the installation instructions included with the unit by the manufacturer, or (2) 75 percent of the cooling full-load air volume rate (see section 3.1.4.2.c of appendix M1).

for the basic models addressed by an Interim Waiver Order.

Nortek seeks to use an alternate test procedure to test and rate the specified ducted, coil-only, two-stage CAC and HP basic models. Nortek's alternate test procedure would require the basic models of CAC/HPs identified in the petition to be tested according to the test procedure at appendix M1, as applicable, except using alternate equations in sections 3.3.d, 3.5.1, 3.7.c, and 3.9.1 for part-load test conditions. As discussed, these sections of appendix M1 are used to calculate adjustments to cooling and heating capacity and adjustments to system power consumption to account for the assumed power input of the indoor fan for coil-only systems. The alternate test procedure requested by Nortek would define lower default fan power coefficients and default fan heat coefficients for the part-load tests, instead of applying the same coefficients to both the full-load and part-load tests, as is done in appendix M1. (Nortek, No. 1 at pp. 4–9)

IV. Denial of Interim Waiver and Request for Comments

DOE has reviewed Nortek's petition for an interim waiver and the alternate test procedure requested by Nortek. In submitting a petition for waiver, a petitioner must demonstrate that the subject basic model contains one or more design characteristics which either prevent testing of the basic model according to the prescribed test procedures or cause the prescribed test procedures to evaluate the basic model in a manner so unrepresentative of its true energy and/or water consumption characteristics as to provide materially inaccurate comparative data. 10 CFR 430.27(a)(1). In determining whether to grant a request for an interim waiver, DOE considers whether: (1) It appears likely that the petition for waiver will be granted; and/or (2) it would be desirable for public policy reasons to grant immediate relief pending a determination on the petition for waiver. 10 CFR 430.27(e)(2).

Nortek does not claim in its petition for waiver that the subject basic models contain a design characteristic that prevents testing according to DOE test procedure. Instead, Nortek claims that the prescribed test procedures evaluate its coil-only, two-stage systems in a manner so unrepresentative of their true energy characteristics as to provide materially inaccurate comparative data.

In response to this claim, DOE first notes that default fan power coefficients and default fan heat coefficients have been used for both full- and part-load operation for many years prior to DOE having considered the issue explicitly in a 2005 rulemaking. *See* 70 FR 59122, 59128 (October 11, 2005) (''October 2005 Final Rule''). The question of whether a lower default fan power coefficient should be used for part-load operation was considered in the October 2005 Final Rule. After consideration of the issue, including consideration of stakeholder comments, DOE implemented a single default coefficient value into the test procedure. *Id.* The use of a single default fan power coefficient for both full- and part-load capacity was not changed in the most recent test procedure final rule (although the value of the coefficient was updated, with different values specified for mobile home and space constrained versus non-mobile home and non-space-constrained systems). 82 FR 1426, 1452 (January 5, 2017) (''January 2017 Final Rule). In the January 2017 Final Rule, DOE adopted the recommendations, including equations to represent the assumed power input of the fan, from a working group formed to negotiate a notice of proposed rulemaking for energy conservation standards for CAC/HPs. 82 FR 1426, 1452. In comments submitted during the course of that rulemaking, manufacturers, including Nortek, expressed support for the use of a single default fan power coefficient to represent both the full- and part-load test conditions for coil-only testing. 82 FR 1426, 1452.

In its petition for waiver, Nortek claims that lower default fan power and fan heat coefficients should be applied to part-load tests. The lower coefficients recommended by Nortek are based on its analysis that incorporated theoretical fan power (based on fan affinity laws); estimates of fan motor efficiency (based on input from motor experts and Nortek's internal testing and experience); and estimates of the installed base of minimally efficient versus high-efficiency motor technologies (based on estimates from the 2015 energy conservation standards rulemaking).

In reviewing Nortek's petition and its proposed alternate test procedure, DOE notes that Nortek's analysis is theoretical, based on the fan laws and estimates of motor efficiencies that Nortek described are based on input from motor experts and its internal testing and experience. Real-world fan motor efficiency can deviate, however, from theoretically predicted values due to a myriad of factors, which do not appear to be reflected in Nortek's analytically-derived estimates. Nortek did not submit any data demonstrating that its fan efficiency estimates are representative of field performance of furnace fans. As such, Nortek has not demonstrated that the fan efficiency values suggested in the petition would be more representative than the values specified in the current DOE test procedures. In contrast, the analysis conducted by DOE to develop the default indoor fan wattage for coil-only systems for appendix M1 was based on test data and product datasheets indicative of the performance of furnace fans in actual installation. *Id.* at 1451–1452. This data set and analytical approach was the same used to develop fan wattage levels when operating at the reference system external static pressure values for the purposes of determining Fan Energy Rating for furnace fans. (79 FR 499, 506; January 3, 2014). DOE believes that any consideration of an alternative fan wattage factor for part-load operation for coil-only systems should be based on a similarly rigorous analysis that includes real-world test data. Absent such data, DOE is unable to conclude that Nortek's petition for waiver will likely be granted. Further, DOE does not find that public policy reasons weigh in favor of granting immediate relief pending a determination on the petition for waiver. As discussed previously, use of the same default fan power and fan heat coefficients for full-load and part-load tests has been the industry standard for many years and manufacturers expressed their support for this approach in the January 2017 Final Rule. For these reasons, DOE is denying the interim waiver and requesting comment.

DOE makes decisions on waivers and interim waivers for only those basic models specifically set out in the petition, not future models that may be manufactured by the petitioner. Nortek may submit a new or amended petition for waiver and request for grant of interim waiver, as appropriate, for additional basic models of ducted, coil-only, two-stage central air conditioner and heat pumps.

While DOE declines to approve the use of Nortek's suggested alternate test procedure in an interim waiver at this time, DOE may consider including an alternate procedure in a subsequent Decision and Order. DOE solicits comments from interested parties on all aspects of the petition, including any alternate test procedure.

Signing Authority

This document of the Department of Energy was signed on November 9, 2021, by Kelly Speakes-Backman, Principal Deputy Assistant Secretary

and Acting Assistant Secretary for Energy Efficiency and Renewable Energy, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. Re: Petitions for Waiver and Interim Waiver on M1 Test Procedure for 2-Stage Central Air Conditioners and Air Source Heat Pumps

Dear Sir/Ms.: Nortek Global HVAC, LLC (Nortek) respectfully submits petitions for waiver and interim waiver to the Department of Energy (DOE) from certain provisions in the federal test procedure for central air conditioners and heat pumps in Appendix M1 to Subpart B of 10 CFR part 430 (Appendix M1). Specifically, Nortek is requesting waivers for ducted, coil only, 2 stage, central air conditioners, and air source heat pumps.

Nortek Global HVAC, LLC (Nortek) has been a world-class manufacturer of heating and cooling equipment for 100 years. We pride ourselves in upholding our mission of *creating a better tomorrow, every day.* As a company, we can achieve these standards through a unique combination of innovation, product performance, and responsive support. Nortek Global HVAC and its subsidiaries build and sell HVAC systems under the Maytag, Broan, Frigidaire, NuTone, and Reznor brands, among others.

I. Introduction

The federal test procedure in Appendix M1 indicates tests for coil only, 2-stage, central air conditioners, and air source heat pumps. However, there are errors in the required calculations for capacity reduction and increasing power usage during low stage operation. These errors cause the prescribed test procedure to evaluate the basic model in a manner unrepresentative of its true energy use; thereby, providing materially inaccurate comparative data.[1]

II. List of Basic Models

Per 10 CFR 430.27(b)(i), Nortek is providing, in appendix I of this petition, a list of basic models for which Nortek is seeking a waiver and interim waiver from the Appendix M1 test procedure.

III. List of Manufacturers

Per 10 CFR 430.27(b)(ii), Nortek is providing, in appendix II of this petition, a list of other manufacturers known to Nortek that distribute into commerce basic models similar in design characteristics to the basic models that are the subject of this petition.

IV. Grounds for Petition of Interim Waiver and Waiver

Appendix M1 Sections 3.3.d, 3.5.1, 3.7.c, and 3.9.1 provide equations for decreasing system capacity and increasing power usage for mobile home, space constrained, non-mobile home, and non-space constrained, ducted, two-stage, coil only systems. However, these equations are in error for low-stage operation. M1 incorrectly establishes a linear relationship between high stage and low stage operation for decreasing $\dot{Q}_c^k(T)$ and increasing $\dot{E}_c^k(T)$ where a cubic relationship should be applied. Fan affinity laws are very clear and stipulate for a constant wheel diameter the relationship between power and air flow rate is:

$P_1/P_2 = (q_1/q_2)^3$

where:

P_1 = low stage power
P_2 = high stage power
q_1 = low stage air flow
q_2 = high stage air flow

Source: *https://www.engineeringtoolbox.com/fan-affinity-laws-d_196.html.*

These errors amount to a failure in applying basic engineering principles that are fundamental to the design of HVAC systems. Furthermore, under the prescribed test procedure, a penalty of as much as 1 SEER2 point is realized depending on the application. One SEER2 point is substantial and renders the performance data incomparable to other systems (*e.g.,* single stage, variable speed).

Nortek understands that fan affinity laws apply only to the fan shaft power and do not account for the efficiency of the motor driving the fan. To account for motor efficiencies, Nortek has developed the below data based on input from motor experts and decades of internal testing and experience. This data was reviewed by a major motor supplier to the HVAC industry, and the efficiency estimates were confirmed to be reasonable but conservative relative to realized efficiency in the application.

Air flow %	PSC Eff estimate %	ECM Eff estimate %
100	62.6	80.0
95	59.8	79.0
90	55.2	79.0
85	53.1	79.0
80	50.0	78.5
75	46.9	78.0

The 2015 ASRAC negotiated rule for Energy Conservation Standards for Central Air Conditioners and Heat Pumps estimated the installed base for PSC and ECM motor to be 77% and 23% respectively.[2] Nortek viewed these estimates as conservative in 2015. And, considering the Fan Efficiency Rating (FER) regulation was implemented in July 2019, it's obvious the installed base is now much more concentrated in ECM motors. However, in the interests of maintaining a conservative approach to this wavier and interim waiver request, Nortek is maintaining the 77%/23% estimates for the purposes of developing blended watts/scfm values for a range of airflows. See below table which represents our recommendations for non-mobile home, non-space constrained, ducted, coil-only, central air conditioning and air source heat pump tests.

[1] See 10 CFR 430.27(a)(1).

V. Proposed Alternative Test Procedure

As required by 10 CFR 430.27(b)(iii), Nortek is providing the proposed revisions below to Appendix M1 as the alternative to evaluate the performance of the basic models listed in Appendix I of this petition. In addition, a redline markup with these revisions of Appendix M1 is included as Appendix III.

Section 3.3.d for mobile home and space constrained ducted coil-only systems

BILLING CODE 6450–01–P

For low stage operation, revise equation $\frac{1385\ Btu/h}{1000\ scfm} * \dot{\bar{V}}_s$ to:

3.412 BTU/h * P * $\dot{\bar{V}}_s$

And, for low stage operation, revise equation $\frac{406\ W}{1000\ scfm} * \dot{\bar{V}}_s$ to:

P * $\dot{\bar{V}}_s$.

Where P is the power consumption rate corresponding to the minimum airflow rate per the table below. Calculate W/scfm utilizing linear interpolation for minimum airflow values in between the values indicated.

Air Flow %	Blended Watts/SCFM
100%	0.406
95%	0.362
90%	0.329
85%	0.286
80%	0.251
75%	0.218

Section 3.3.d For non-mobile home, non-space constrained home ducted coil-only systems

For low stage operation, revise equation $\frac{1505\ Btu/h}{1000\ scfm} * \dot{\bar{V}}_s$ to:

3.412 BTU/h * P * $\dot{\bar{V}}_s$.

And, for low stage operation, revise equation $\frac{441\ W}{1000\ scfm} * \dot{\bar{V}}_s$ to:

P * $\dot{\bar{V}}_s$

Where P is the power consumption rate corresponding to the minimum airflow rate per the table below. Calculate W/scfm utilizing linear interpolation for minimum airflow the values in between values indicated.

Air Flow %	Blended Watts/SCFM
100%	0.441
95%	0.420
90%	0.382
85%	0.332

80%	0.291
75%	0.254

Section 3.5.1 For mobile home and space constrained ducted coil-only systems

For low stage operation, revise equation $\frac{1385\ Btu/h}{1000\ scfm} * \dot{\overline{V}}_s * \left[\tau_2 - \tau_1\right]$ to:

3.412 BTU/h * P * $\dot{\overline{V}}_s$ *[τ_2 -τ_1]

And, for low stage operation, revise equation $\frac{406W}{1000scfm} * \dot{\overline{V}}_s * [\tau_2 - \tau_1]$ to:

P * $\dot{\overline{V}}_s$ *[τ_2 -τ_1]

Where P is the power consumption rate corresponding to the minimum airflow rate per the table below. Calculate W/scfm utilizing linear interpolation for minimum airflow values in between the values indicated.

Air Flow %	Blended Watts/SCFM
100%	0.406
95%	0.362
90%	0.329
85%	0.286
80%	0.251
75%	0.218

Section 3.5.1 For non-mobile home, non-space constrained home ducted coil-only systems

For low stage operation, revise equation $\frac{1505\ Btu/h}{1000\ scfm} * \dot{\overline{V}}_s * [\tau_2 - \tau_1]$ to:

3.412 BTU/h * P * $\dot{\overline{V}}_s$ *[τ_2 -τ_1]

And, for low stage operation, revise equation $\frac{441W}{1000scfm} * \dot{\overline{V}}_s * [\tau_2 - \tau_1]$ to:

P * $\dot{\overline{V}}_s$ *[τ_2 -τ_1]

Where P is the power consumption rate corresponding to the minimum airflow rate per the table below. Calculate W/scfm utilizing linear interpolation for minimum airflow values in between the values indicated.

Air Flow %	Blended Watts/SCFM

100%	0.441
95%	0.420
90%	0.382
85%	0.332
80%	0.291
75%	0.254

Section 3.7.c For mobile home and space constrained coil-only heat pump systems

For low stage operation, revise equation $\frac{1385\ Btu/h}{1000\ scfm} * \dot{V}_s$ to:

3.412 BTU/h * P * $\dot{V}_s$

And, for low stage operation, revise equation $\frac{406\ W}{1000\ scfm} * \dot{V}_s$ to:

P * $\dot{V}_s$.

Where P is the power consumption rate corresponding to the minimum airflow rate per the table below. Calculate W/scfm utilizing linear interpolation for minimum airflow values in between the values indicated.

Air Flow %	Blended Watts/SCFM
100%	0.406
95%	0.362
90%	0.329
85%	0.286
80%	0.251
75%	0.218

Section 3.7.c For non-mobile home, non-space constrained coil-only heat pump systems

For low stage operation, revise equation $\frac{1505\ Btu/h}{1000\ scfm} * \dot{V}_s$ to:

3.412 BTU/h * P * $\dot{V}_s$

And, for low stage operation, revise equation $\frac{441\ W}{1000\ scfm} * \dot{V}_s$ to:

P * $\dot{V}_s$

Where P is the power consumption rate corresponding to the minimum airflow rate per the table below. Calculate W/scfm utilizing linear interpolation for minimum airflow values in between the values indicated.

Air Flow %	Blended Watts/SCFM
100%	0.441
95%	0.420
90%	0.382
85%	0.332
80%	0.291
75%	0.254

Section 3.9.1 For mobile home and space constrained coil-only heat pump systems

For low stage operation, revise equation $\frac{1385\ Btu/h}{1000\ scfm} * \bar{V}_s$ to:

3.412 BTU/h * P * $\bar{V}_s$

And, for low stage operation, revise equation $\frac{406\ W}{1000\ scfm} * \bar{V}_s$ to:

P * $\bar{V}_s$.

Where P is the power consumption rate corresponding to the minimum airflow rate per the table below. Calculate W/scfm utilizing linear interpolation for minimum airflow values in between the values indicated.

Air Flow %	Blended Watts/SCFM
100%	0.406
95%	0.362
90%	0.329
85%	0.286
80%	0.251
75%	0.218

Section 3.9.1 For non-mobile home, non-space constrained coil-only heat pump systems

For low stage operation, revise equation $\frac{1505\ Btu/h}{1000\ scfm} * \bar{V}_s$ to:

3.412 BTU/h * P * $\bar{V}_s$

And, for low stage operation, revise equation $\frac{441\,W}{1000\,scfm} * \dot{\bar{V}}_s$ to:

$$P * \dot{\bar{V}}_s$$

BILLING CODE 6450–01–C

Where P is the power consumption rate corresponding to the minimum airflow rate per the table below. Calculate W/scfm utilizing linear interpolation for minimum airflow values in between the values indicated.

Air flow %	Blended watts/SCFM
100	0.441
95	0.420
90	0.382
85	0.332
80	0.291
75	0.254

VI. Petitions for Waiver and Interim Waiver

Per 10 CFR part 430.27(b)(2), Nortek is applying for a waiver and interim waiver of the applicable test procedure requirements for the basic models listed in Appendix I.

Given the fundamental engineering technical errors regarding the equations for capacity reduction and increasing power usage for low stage operation, Nortek contends the petition for waiver is likely to be granted. Without waiver relief, Nortek will be forced to make representations of efficiency (SEER2) that Nortek knows are understated by almost a full SEER2 point resulting in incomparable performance data versus other systems (*e.g.,* single stage, variable speed). Nortek respectfully requests immediate relief (interim waiver) pending a determination of the petition for waiver.

In addition, Nortek will suffer financial harm if DOE does not grant its waiver and interim waiver request. Without an interim waiver, Nortek will be forced into overdesigning its twostage central air conditioning systems and air source heat pumps by as much as a full SEER2 point depending on application. Furthermore, Nortek estimates this overdesign to add an incremental cost of approximately [Redacted] per unit. To the consumer, a [Redacted] incremental manufacturing cost adder amounts to approximately [Redacted] given the multiple steps in the distribution channel. Nortek urges DOE to consider the public relations difficulties of unnecessarily adding incremental cost and misrepresenting the efficiency of these air conditioners to the public.

VII. Closing

Industry and AHRI are aware of the technical error described in this waiver request. And, AHRI has formed a working group to amend 2023 AHRI Standard 210/240 (Performance Rating for Unitary Air-Conditioning and Air-Source Heat Pump Equipment). However, although the proposed amendments are fundamentally aligned with Nortek's waiver and interim waiver request, Nortek does not believe the 210/240 amendment process and likely subsequent DOE test procedure amendments can be completed in sufficient time to provide Nortek with opportunity to develop these systems in time to meet the January 1, 2023, implementation compliance date for central air conditioning and air source heat pump systems. Nortek is currently developing these systems and requires certainty regarding this waiver and interim waiver to ensure implementation in our product designs in time for the January 1, 2023, compliance date for central air-conditioning and air-source heat pumps.

Nortek respectfully requests DOE grant its petitions for waiver and interim waiver of the M1 test procedure for the models listed in Appendix I. We further request an expedited determination of these waivers so that Nortek can promptly continue development of these systems to meet the January 1, 2023, SEER2 energy conservation standard implementation date. If further information is needed to assist DOE in its determination of these waivers, please contact Matt Lattanzi at *matt.lattanzi@nortek.com* (314–604–3996).

The unredacted version of this waiver and interim waiver request contains confidential commercial information within the meaning of 5 U.S.C. 552(b)(4) and are protected from disclosure under 18 U.S.C. 1905. Pursuant to 10 CFR 429.7, Nortek requests that this submission be treated as confidential and not disclosed pursuant to any FOIA request, and declares that: (1) Such information is customarily treated as confidential within the industry because its public release would cause competitive injury; (2) such information is not generally known by or available from other sources; (3) such information has not previously been made available to others without obligation concerning the information's confidentiality; (4) public disclosure of the information would result in competitive injury to Nortek by allowing competitors to learn information about Nortek's sales volume; (5) such information will not lose its confidential nature due to the passage of time; and (6) disclosure of such information would be contrary to the public interest because it would undermine free and open competition for the sales of covered products, which benefits consumers.

Sincerely,

/s/

Matthew H. Lattanzi,
Senior Director of Regulatory and Legislative Affairs, Nortek Global HVAC, LLC, matt.lattanzi@nortek.com.

cc:

Appendix I

Appendix II

The following are manufacturers of other basic models distributed in commerce in the United States and known to Nortek to incorporate design characteristics similar to those found in the basic models that are the subject of the petition for interim waiver and waiver:

- Aaon
- Advanced Distributor Products, LLC
- Allied Air Enterprise, LLC
- Allstyle Coil Company
- Aspen Manufacturing, LLC
- Bosch Thermotechnology Corp
- Carrier Corporation
- ECR International
- Fujitsu General America, Inc.
- GD Midea Heating & Ventilating Equipment Co., LtD.
- Johnson Controls, Inc.
- Lennox International Inc.
- LG Electronics U.S.A., Inc.
- Mitsubishi Electric Cooling and Heating
- Mortex Products, Inc.
- National Comfort Products
- Rheem Manufacturing Company
- Samsung Electronics Co. Ltd.
- Trane Technologies
- Unico, Inc.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings

Take notice that the Commission has received the following Natural Gas Pipeline Rate and Refund Report filings:

Filings Instituting Proceedings

Docket Numbers: RP22–193–000.
Applicants: Equitrans, L.P.
Description: Compliance filing: Compliance Filing—Order No. 587–Z to be effective 6/1/2022.
Filed Date: 11/8/21.
Accession Number: 20211108–5049.
Comment Date: 5 p.m. ET 11/22/21.

Docket Numbers: RP22–194–000.
Applicants: Rager Mountain Storage Company LLC.
Description: Compliance filing: Compliance Filing—Order No. 587–Z to be effective 6/1/2022.
Filed Date: 11/8/21.
Accession Number: 20211108–5050.
Comment Date: 5 p.m. ET 11/22/21.

Docket Numbers: RP22–195–000.
Applicants: USG Pipeline Company, LLC.
Description: Compliance filing: Order No. 587–Z Compliance Filing to be effective 6/1/2022.
Filed Date: 11/8/21.
Accession Number: 20211108–5069.
Comment Date: 5 p.m. ET 11/22/21.

Docket Numbers: RP22–196–000.
Applicants: Equitrans, L.P.
Description: § 4(d) Rate Filing: Negotiated Rate Agreement Effective 11/1/2021 to be effective 11/1/2021.
Filed Date: 11/8/21.
Accession Number: 20211108–5164.
Comment Date: 5 p.m. ET 11/22/21.

Docket Numbers: RP22–197–000.
Applicants: KO Transmission Company.
Description: Compliance filing: KO—Order No. 587–Z Compliance Filing to be effective 6/1/2022.
Filed Date: 11/8/21.
Accession Number: 20211108–5210.
Comment Date: 5 p.m. ET 11/22/21.

Docket Numbers: RP22–198–000.
Applicants: Panhandle Eastern Pipe Line Company, LP.
Description: Compliance filing: NAESB 3.2 Compliance to be effective 6/1/2022.
Filed Date: 11/9/21.
Accession Number: 20211109–5067.
Comment Date: 5 p.m. ET 11/22/21.

Docket Numbers: RP22–199–000.
Applicants: Trunkline Gas Company, LLC.
Description: Compliance filing: NAESB 3.2 Compliance to be effective 6/1/2022.
Filed Date: 11/9/21.
Accession Number: 20211109–5070.
Comment Date: 5 p.m. ET 11/22/21.

Docket Numbers: RP22–200–000.
Applicants: Rover Pipeline LLC.
Description: Compliance filing: NAESB 3.2 Compliance to be effective 6/1/2022.
Filed Date: 11/9/21.
Accession Number: 20211109–5071.
Comment Date: 5 p.m. ET 11/22/21.

Docket Numbers: RP22–201–000.
Applicants: Sea Robin Pipeline Company, LLC.
Description: Compliance filing: NAESB 3.2 Compliance to be effective 6/1/2022.
Filed Date: 11/9/21.
Accession Number: 20211109–5074.
Comment Date: 5 p.m. ET 11/22/21.

Any person desiring to intervene or protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Regulations (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

Filings in Existing Proceedings

Docket Numbers: RP21–1023–001.
Applicants: Pine Prairie Energy Center, LLC.
Description: Compliance filing: MBR Authority Info Notice, Compliance Dkt. No. RP21–1023–000 to be effective N/A.
Filed Date: 11/8/21.
Accession Number: 20211108–5000.
Comment Date: 5 p.m. ET 11/22/21.

Docket Numbers: RP21–1024–001
Applicants: SG Resources Mississippi, L.L.C.
Description: Compliance filing: MBR Authority Info Notice, Compliance Dkt. No. RP21–1024–000 to be effective N/A.
Filed Date: 11/8/21.
Accession Number: 20211108–5001.
Comment Date: 5 p.m. ET 11/22/21.

Docket Numbers: RP21–1025–001.
Applicants: Cadeville Gas Storage LLC.
Description: Compliance filing: MBR Authority Info Notice, Compliance Dkt. No. RP21–1025–000 to be effective N/A.
Filed Date: 11/5/21.
Accession Number: 20211105–5187.
Comment Date: 5 p.m. ET 11/17/21.

Docket Numbers: RP21–1026–001.
Applicants: Monroe Gas Storage Company, LLC.
Description: Compliance filing: MBR Authority Info Notice, Compliance Dkt. No. RP21–1026–000 to be effective N/A.
Filed Date: 11/5/21.
Accession Number: 20211105–5199.
Comment Date: 5 p.m. ET 11/17/21.

Docket Numbers: RP21–1027–001.
Applicants: Perryville Gas Storage LLC.
Description: Compliance filing: MBR Authority Info Notice, Compliance Dkt. No. RP21–1027–000 to be effective N/A.
Filed Date: 11/5/21.
Accession Number: 20211105–5202.
Comment Date: 5 p.m. ET 11/17/21.

Docket Numbers: RP21–1126–000.
Applicants: Portland Natural Gas Transmission System.
Description: Report Filing: CP20–16–000—WXP Notification of Commencement November 1, 2021 to be effective N/A.
Filed Date: 11/5/21.
Accession Number: 20211105–5108.
Comment Date: 5 p.m. ET 11/17/21.

Any person desiring to protest in any the above proceedings must file in accordance with Rule 211 of the Commission's Regulations (18 CFR 385.211) on or before 5:00 p.m. Eastern time on the specified comment date.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

eFiling is encouraged. BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RM98–1–000]

Records Governing Off-the-Record Communications; Public Notice

This constitutes notice, in accordance with 18 CFR 385.2201(b), of the receipt of prohibited and exempt off-the-record communications.

Order No. 607 (64 FR 51222, September 22, 1999) requires Commission decisional employees, who make or receive a prohibited or exempt off-the-record communication relevant to the merits of a contested proceeding, to deliver to the Secretary of the Commission, a copy of the communication, if written, or a summary of the substance of any oral communication.

Prohibited communications are included in a public, non-decisional file associated with, but not a part of, the decisional record of the proceeding. Unless the Commission determines that the prohibited communication and any responses thereto should become a part of the decisional record, the prohibited off-the-record communication will not be considered by the Commission in reaching its decision. Parties to a proceeding may seek the opportunity to respond to any facts or contentions made in a prohibited off-the-record communication and may request that the Commission place the prohibited communication and responses thereto in the decisional record. The Commission will grant such a request only when it determines that fairness so requires. Any person identified below as having made a prohibited off-the-record communication shall serve the document on all parties listed on the official service list for the applicable proceeding in accordance with Rule 2010, 18 CFR 385.2010.

Exempt off-the-record communications are included in the decisional record of the proceeding, unless the communication was with a cooperating agency as described by 40 CFR 1501.6, made under 18 CFR 385.2201(e)(1)(v).

The following is a list of off-the-record communications recently received by the Secretary of the Commission. The communications listed are grouped by docket numbers in ascending order. These filings are available for electronic review at the Commission in the Public Reference Room or may be viewed on the Commission's website at *http://www.ferc.gov* using the eLibrary link. Enter the docket number, excluding the last three digits, in the docket number field to access the document. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov* or toll free at (866) 208–3676, or for TTY, contact (202) 502–8659.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. PL21–3–000]

Technical Conference on Greenhouse Gas Mitigation: Natural Gas Act Sections 3 and 7 Authorizations; Supplemental Notice of Technical Conference

As announced in the Notice of Technical Conference issued in this proceeding on September 16, 2021, the Federal Energy Regulatory Commission (Commission) will convene a Commission staff-led technical conference to discuss methods natural gas companies may use to mitigate the effects of direct and indirect greenhouse gas emissions resulting from Natural Gas Act sections 3 and 7 authorizations. The technical conference will be held on Friday, November 19, 2021, from approximately 9:00 a.m. to 3:30 p.m. Eastern time. The conference will be held virtually.

Attached to this Supplemental Notice is a revised agenda for the technical conference, which includes the final conference program and expected speakers. The conference will be open for the public to attend virtually. Registration is not required and there is no fee for attendance. Information on this technical conference, including a link to the public webcast, is available at *www.ferc.gov/GhG-mitigation.* The conference is also posted on the Calendar of Events on the Commission's website, *www.ferc.gov.* Transcripts will be available for a fee from Ace Reporting, (202) 347–3700.

Commission conferences are accessible under section 508 of the Rehabilitation Act of 1973. For accessibility accommodations, please send an email to *accessibility@ferc.gov,* call toll-free (866) 208–3372 (voice) or (202) 208–8659 (TTY), or send a fax to (202) 208–2106 with the required accommodations.

For more information about this technical conference, please contact *GHGTechConf@ferc.gov.* For information related to logistics, please contact Sarah McKinley at *sarah.mckinley@ferc.gov* or (202) 502–8368.

Dated: November 9, 2021.

Kansas: Notice of Modification to Kansas' Research, Development and Demonstration (RD&D) Permit Provisions for Municipal Solid Waste Landfills (MSWLF)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: On May 10, 2016, EPA issued a revision to the regulations allowing Research, Development and Demonstration (RD&D) permits to increase the number of permit renewals allowed to six, for a total permit term of up to 21 years. On October 19, 2016, Kansas Department of Health and Environment (KDHE) submitted a notification to EPA Region 7 regarding a modification by policy to its RD&D program. EPA acknowledges receipt of Kansas' notification regarding a modification to its RD&D program, and that Kansas' notification meets the requirements set forth in the **Federal Register** document that published on May 10, 2016.

DATES: The modification to the Kansas RD&D permit program will become applicable on November 16, 2021.

FOR FURTHER INFORMATION CONTACT: Marcus G. Rivas, U.S. EPA Region 7 Land, Chemicals and Redevelopment Division; 11201 Renner Boulevard, Lenexa, Kansas 66219, (913) 551–7669, *rivas.marcus@epa.gov.*

SUPPLEMENTARY INFORMATION:

A. Background

On March 22, 2004, EPA issued a final rule amending the Municipal Solid Waste Landfills (MSWLF) criteria in 40 CFR part 258 to allow for RD&D permits (69 FR 13242). This rule allows for variances from specified criteria for a limited period of time, to be implemented through state-issued RD&D permits. RD&D permits are available only in states with approved MSWLF permit programs that have been modified to incorporate RD&D permit authority. On May 10, 2016, the EPA issued a revision to the regulations allowing RD&D permits to increase the number of permit renewals allowed to six, for a total permit term of up to 21 years (40 CFR 258.4).

While states are not required to incorporate this new RD&D permit provision into their previous approved MSWLF program, those states interested in increasing the total length of time for which RD&D permits can be issued, from 12 years to 21 years, must provide notification to EPA in accordance with 40 CFR part 239.

On September 4, 2009, Kansas received approval of its RD&D permit program (74 FR 45769). Kansas' RD&D provisions can be found in Kansas Statutes Annotated (K.S.A.) Chapter 65—Public Health, Article 34—Solid Waste and Kansas Administrative Regulations (K.A.R.), Agency 28—Kansas Department of Health and Environment, Article 29—Solid Waste Management. On October 19, 2016, KDHE submitted a notification to EPA Region 7 of its modification of its RD&D program through policy, increasing the total length of time for which RD&D permits can be issued from 12 years to 21 years as described in the **Federal Register** document that published on May 10, 2016, (81 FR 28720) and at 40 CFR 239.12.

B. EPA Acknowledgment of Notification

In today's **Federal Register** document, EPA acknowledges receipt of the notification provided by Kansas of its modification by policy in increasing the total length of time for which RD&D permits can be issued from 12 years to 21 years, and that Kansas' notification meets the requirements set forth at 81 FR 28720 and 40 CFR 239.12.

Authority: This action is issued under the authority of section 2002, 4005 and 4010(c) of the Solid Waste Disposal Act, as amended, 40 U.S.C. 6912, 6945 and 6949(a).

Dated: November 8, 2021.

Edward H. Chu,

Acting Regional Administrator, Region 7.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–9259–01–OW]

Meeting of the National Drinking Water Advisory Council

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of a public meeting.

SUMMARY: The U.S. Environmental Protection Agency's (EPA) Office of Ground Water and Drinking Water is announcing a virtual meeting of the National Drinking Water Advisory Council (NDWAC or Council) as authorized under the Safe Drinking Water Act (SDWA). During this meeting the NDWAC will primarily focus discussions on developing advice and recommendations to EPA on targeted issues related to revisions to the Consumer Confidence Report rule, as required by the America's Water Infrastructure Act of 2018.

DATES: The meeting will be held on December 1, 2021, from 10:30 a.m. to 5:30 p.m., eastern time; and on December 2, 2021 from 10:00 a.m. to 5:30 p.m., eastern time.

ADDRESSES: This will be a virtual meeting. There will be no in-person gathering for this meeting. For more information about attending, providing oral statements, and accessibility for the meeting, as well as sending written comments, see the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Elizabeth Corr, NDWAC Designated Federal Officer, Office of Ground Water and Drinking Water (Mail Code 4601), U.S. Environmental Protection Agency, 1200 Pennsylvania Avenue NW, Washington, DC 20460; telephone number: (202) 564–3798; email address: *corr.elizabeth@epa.gov.*

SUPPLEMENTARY INFORMATION:

Attending the Meeting: The meeting will be open to the general public. The meeting agenda, including additional topics for discussion, and information on how to register for and attend the meeting online will be provided on EPA's website at *https://www.epa.gov/ndwac* prior to the meeting.

Oral Statements: EPA will allocate one hour for the public to present oral comments during the meeting. Oral statements will be limited to five minutes per person during the public comment period. It is preferred that only one person present a statement on behalf of a group or organization. Persons interested in presenting an oral statement should send an email to Elizabeth Corr, at *corr.elizabeth@epa.gov* by noon, eastern time, on November 23, 2021.

Written Statements: Any person who wishes to file a written statement can do so before or after the Council meeting. Send written statements by email to *corr.elizabeth@epa.gov* or see the **FOR FURTHER INFORMATION CONTACT** section if sending statements by mail. Written statements received by noon, eastern time, on November 23, 2021, will be distributed to all members of the Council prior to the meeting. Statements received after that time will become part of the permanent file for the meeting and will be forwarded to the Council members after conclusion of the meeting.

Accessibility: For information on access or services for individuals with disabilities, or to request

accommodations for a disability, please contact Elizabeth Corr by email at *corr.elizabeth@epa.gov,* or by phone at (202) 564–3798, preferably at least 10 days prior to the meeting to allow as much time as possible to process your request.

National Drinking Water Advisory Council: The NDWAC was created by Congress on December 16, 1974, as part of the Safe Drinking Water Act (SDWA) of 1974, Public Law 93–523, 42 U.S.C. 300j–5, and is operated in accordance with the provisions of the Federal Advisory Committee Act (FACA), 5 U.S.C. App. 2. The NDWAC was established to advise, consult with, and make recommendations to the EPA Administrator on matters relating to activities, functions, policies, and regulations under SDWA. General information concerning the NDWAC is available at: *https://www.epa.gov/ndwac.*

Jennifer L. McLain,

Director, Office of Ground Water and Drinking Water.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–9258–01–OA]

Notification of Public Meetings of the Science Advisory Board Radiation Advisory Committee Augmented for the Review of Revision 2 of the Multi-Agency Radiation Survey and Site Investigation Manual

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA or Agency) Science Advisory Board (SAB) Staff Office announces two virtual public meetings of the SAB Radiation Advisory Committee (RAC) Augmented for the Review of Revision 2 of the Multi-Agency Radiation Survey and Site Investigation Manual l(MARSSIM), Revision 2 (Public Comment Draft).

DATES: The public meetings will be held on Monday December 6, 2021, and Thursday December 9, 2021. The meetings will be held from 1:00 p.m. to 5:00 p.m. (Eastern Standard Time) on both days.

ADDRESSES: The meetings will be conducted virtually. Please refer to the SAB website at *https://sab.epa.gov* for details on how to access the meetings.

FOR FURTHER INFORMATION CONTACT: Any member of the public who wants further information concerning this notice may contact Dr. Diana Wong, Designated Federal Officer (DFO), via telephone (202) 564–2049, or email at *wong.diana-m@epa.gov.* General information about the SAB, as well as any updates concerning the meetings announced in this notice can be found on the SAB website at *https://sab.epa.gov.*

SUPPLEMENTARY INFORMATION:

Background: The SAB was established pursuant to the Environmental Research, Development, and Demonstration Authorization Act (ERDAA) codified at 42 U.S.C. 4365, to provide independent scientific and technical advice to the Administrator on the technical basis for Agency positions and regulations. The SAB is a Federal Advisory Committee chartered under the Federal Advisory Committee Act (FACA), 5 U.S.C., App. 2. The SAB will comply with the provisions of FACA and all appropriate SAB Staff Office procedural policies. Pursuant to FACA and EPA policy, notice is hereby given that the SAB MARSSIM Panel will hold two virtual public meetings to discuss its draft report regarding the draft *Multi-Agency Radiation Survey and Site Investigation Manual (MARSSIM), Revision 2 (Public Comment Draft).* The Panel will provide advice to the Administrator through the chartered SAB regarding this document.

The SAB MARSSIM Panel held a public meeting on January 11–14, 2021. The purpose of that meeting was to develop responses to the peer review charge on the agency's draft *Multi-Agency Radiation Survey and Site Investigation Manual (MARSSIM), Revision 2 (Draft for Public Comments)*). The purpose of these virtual public meetings is for the Panel to discuss these responses and draft report. The two public meetings will be conducted as one complete meeting, beginning on December 6, 2021, and if necessary, will continue on December 9, 2021.

Availability of Meeting Materials: Additional background on this SAB activity, the meeting agenda, draft report, and other materials for the meetings will be posted on the SAB website at: *https://sab.epa.gov.*

Procedures for Providing Public Input: Public comment for consideration by EPA's federal advisory committees and panels has a different purpose from public comment provided to EPA program offices. Therefore, the process for submitting comments to a federal advisory committee is different from the process used to submit comments to an EPA program office. Federal advisory committees and panels, including scientific advisory committees, provide independent advice to the EPA. Members of the public can submit relevant comments pertaining to the meeting materials or the group conducting this SAB activity. Input from the public to the SAB will have the most impact if it consists of comments that provide specific scientific or technical information or analysis for SAB committees and panels to consider or if it relates to the clarity or accuracy of the technical information. Members of the public wishing to provide comment should contact the DFO directly.

Oral Statements: In general, individuals or groups requesting an oral presentation on a public meeting will be limited to three minutes per speaker. Interested parties wishing to provide comments should contact Dr. Diana Wong, DFO (preferably via email), at the contact information noted above, by November 29, 2021, to be placed on the list of public speakers for the meeting.

Written Statements: Written statements will be accepted throughout the advisory process; however, for timely consideration by SAB RFT Review Panel members, statements should be received in the SAB Staff Office by November 29, 2021, for consideration at the public meeting(s). Written statements should be supplied to the DFO via email at the contact information above. Submitters are requested to provide a signed and unsigned version of each document because the SAB Staff Office does not publish documents with signatures on its websites. Members of the public should be aware that their personal contact information, if included in any written comments, may be posted to the SAB website. Copyrighted material will not be posted without explicit permission of the copyright holder.

Accessibility: For information on access or services for individuals with disabilities, please contact Dr. Diana Wong at *wong.diana-m@epa.gov.* To request accommodation of a disability, please contact Dr. Wong preferably at least ten days prior to the meeting, to give EPA as much time as possible to process your request.

Thomas Brennan,

Director, EPA Science Advisory Board Staff Office.

BILLING CODE 6560–50–P

EXPORT-IMPORT BANK

[Public Notice 2021–6042]

Agency Information Collection Activities: Comment Request

AGENCY: Export-Import Bank of the United States.

ACTION: Submission for OMB review and comments request.

SUMMARY: The Export-Import Bank of the United States (EXIM), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal Agencies to comment on the proposed information collection, as required by the Paperwork Reduction Act of 1995. EXIM's borrowers, financial institution policy holders and guaranteed lenders provide this form to U.S. exporters, who certify to the eligibility of their exports for EXIM support. For direct loans and loan guarantees, the completed form is required to be submitted at time of disbursement and held by either the guaranteed lender or EXIM. For MT insurance, the completed forms are held by the financial institution, only to be submitted to EXIM in the event of a claim filing. EXIM uses the referenced form to obtain information from exporters regarding the export transaction and content sourcing. These details are necessary to determine the value and legitimacy of EXIM financing support and claims submitted. It also provides the financial institutions a check on the export transaction's eligibility at the time it is fulfilling a financing request.

DATES: Comments must be received on or before January 18, 2022 to be assured of consideration.

ADDRESSES: Comments may be submitted electronically on *www.regulations.gov* (EIB 21–02) or by email to Donna Schneider <*donna.schneider@exim.gov*>, or by mail to Donna Schneider, Export-Import Bank, 811 Vermont Ave. NW, Washington, DC 20571. The information collection tool can be reviewed at: *https://www.exim.gov/sites/default/files/pub/pending/eib21-02.pdf.*

FOR FURTHER INFORMATION CONTACT: To request additional information, please Donna Schneider <*donna.schneider@exim.gov*>, 202–565–3612.

SUPPLEMENTARY INFORMATION:

Title and Form Number: EIB 21–02 Co-financing Certificate.

OMB Number: ####–####.

Type of Review: Regular.

Need and Use: The information collected will allow EXIM to determine compliance and content for transaction requests submitted to the Export-Import Bank under its insurance, guarantee, and direct loan programs.

Affected Public: This form affects entities involved in the export of U.S. goods and services.

Annual Number of Respondents: 25.

Estimated Time per Respondent: 30 minutes.

Annual Burden Hours: 12.5 hours.

Frequency of Reporting of Use: As required.

Government Expenses:

Reviewing time per year: 2.1 hours.

Average Wages per Hour: $42.50.

Average Cost per Year: $89.25 (time * wages).

Benefits and Overhead: 20%.

Total Government Cost: $107.10.

Bassam Doughman,

IT Specialist.

EXPORT-IMPORT BANK

[Public Notice 2021–6044]

Agency Information Collection Activities: Final Collection; Comment Request

AGENCY: Export-Import Bank of the United States.

ACTION: Submission for OMB review and comments request.

SUMMARY: The Export-Import Bank of the United States (EXIM), as a part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal Agencies to comment on the proposed information collection, as required by the Paperwork Reduction Act of 1995. The Multi-Buyer Policy: Reasonable Spread of Risk (RSOR) Exclusions Worksheet will be used by external customers, current policyholders and portfolio managers to determine eligibility of Export-Import Bank support under the RSOR Policy. Program changes that were made in 2017 have resulted in revitalized demand of the RSOR product in the marketplace. This form will be available on EXIM's website and will standardize the collection of required information into a user friendly format that can be submitted electronically via email or as an attachment to an EXIM Online application.

DATES: Comments should be received on or before January 18, 2022 to be assured of consideration.

ADDRESSES: Comments may be submitted electronically on *www.regulations.gov* (EIB 18–01) or by email to Cristina Conti <*cristina.conti@exim.gov*>, or by mail to Cristina Conti, Export-Import Bank of the United States, 811 Vermont Ave. NW, Washington, DC 20571.

The form can be viewed at: *https://www.exim.gov/sites/default/files/pub/pending/eib18-01.pdf.*

FOR FURTHER INFORMATION CONTACT: To request additional information, please Cristina Conti <*cristina.conti@exim.gov*>, 202–565–3804.

SUPPLEMENTARY INFORMATION: *Titles and Form Number:* EIB18–01 Multi-Buyer Policy: Reasonable Spread of Risk (RSOR) Exclusions Worksheet.

OMB Number: XXXX–XXXX.

Type of Review: New.

Need and Use: The Multi-Buyer Policy: Reasonable Spread of Risk (RSOR) Exclusions Worksheet will be used by external customers, current policyholders and portfolio managers to determine eligibility of Export-Import Bank support under the Reasonable Spread of Risk Policy.

Affected Public: This form affects entities involved in the export of U.S. goods and services.

Annual Number of Respondents: 60.

Estimated Time per Respondent: 15 minutes.

Annual Burden Hours: 15 hours.

Frequency of Reporting or Use: As needed.

Government Expenses:

Reviewing Time per Year: 60 hours.

Average Wages per Hour: $42.50.

Average Cost per Year: $2,550 (time * wages).

Benefits and Overhead: 20%.

Total Government Cost: $3,060.

Bassam Doughman,

IT Specialist.

BILLING CODE 6690–01–P

EXPORT-IMPORT BANK

[Public Notice: 2021–3041]

Privacy Act of 1974; System of Records

AGENCY: Export-Import Bank of the United States.

ACTION: Notice of new system of records.

SUMMARY: Pursuant to the Privacy Act of 1974 the Export-Import Bank of the United States (EXIM) is proposing a new system of records notice (SORN). EXIM is proposing EXIM 21–02 Reasonable Accommodation Records. This new SORN will include the authorities for maintenance of the system, the purposes of the system, the categories of individuals covered by the system, the

record source categories, and the records contained in the system, to include records of requests for accommodation based on physical and mental disabilities and sincerely held religious beliefs, practices, or observances.

DATES: The system of records described herein will become effective December 16, 2021.

ADDRESSES: You may submit written comments to EXIM by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the website instructions for submitting comments.
- *Mail or Hand Delivery:* Office of Information and Privacy, Export-Import Bank of the United States, 811 Vermont Avenue NW, Washington, DC 20571.

Commenters are strongly encouraged to submit public comments electronically. EXIM expects to have limited personnel available to process public comments that are submitted on paper through mail. Until further notice, any comments submitted on paper will be considered to the extent practicable.

All submissions must include the agency's name (Export-Import Bank of the United States, or EXIM) and reference this notice. Comments received will be posted without change to EXIM's website, *http://www.exim.gov,* including any personal information provided. Do not submit comments that include any personally identifiable information or confidential business information. Copies of comments may also be obtained by writing to Nakia Burton, Export-Import Bank of the United States, 811 Vermont Avenue NW, Washington, DC 20571.

FOR FURTHER INFORMATION CONTACT: Howard Spira, Chief Privacy Officer, Export-Import Bank of the United States, Office of Information and Privacy, 811 Vermont Avenue NW, Washington, DC 20571, 202–565–3844. For access to any of the EXIM's systems of records, contact Bassam Doughman, Records Management Officer, Office of Information and Privacy, 811 Vermont Avenue NW, Washington, DC 20571, or by calling 202–565–3168, or go to Privacy Act System of Records Notice (*exim.gov*).

SUPPLEMENTARY INFORMATION: EXIM is proposing to include the authorities for maintenance of the system, purposes of the system, the categories of records contained in the system, the categories of individuals covered by the system, the record source categories, a citation in the Routine Uses section, a citation in the Record Access Procedures section, and a citation in the Contesting Records Procedures section of EXIM—21–03—Reasonable Accommodation Records.

EXIM is including the Authority for Maintenance of the System by including citations to ''42 U.S.C. 2000e *et seq.,* 42 U.S.C. 2000bb *et seq.*'' and including Chapter 21 from Title 42 of the United States Code and Parts 1605 and 1614 from Title 29 of the Code of Federal Regulations. EXIM is including the purposes of the system that allows EXIM to maintain records on individuals who requested or received reasonable accommodation by EXIM because of religious beliefs. EXIM is describing the Categories of Records Contained in the System to include information concerning the individual's physical and/or mental disabilities and/or religious belief. EXIM is defining the Categories of Individuals Covered by the System by including the words ''physical and/or mental disabilities, and/or religious belief, practice or observance'' to include accommodation requests based on physical and/or mental disabilities and/or sincerely held religious beliefs and including ''equal employment opportunity professionals'' to Record Source Categories. EXIM is also including the citation to 29 CFR 4902.5 to the Contesting Records Procedures section.

A report will be sent to Congress and the Office of Management and Budget for their evaluation.

For the convenience of the public, EXIM's new system of records is published in full below.

Issued in Washington, DC.

Howard Spira,

Senior Vice President, Office of Information and Privacy, Export-Import Bank of the United States.

SYSTEM NAME AND NUMBER:

EXIM—XX: Reasonable Accommodation Records.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Export-Import Bank of the United States, 811 Vermont Avenue NW, Washington, DC 20571. (Records may be kept at an additional location as backup for continuity of operations.)

SYSTEM MANAGER(S) AND ADDRESS:

Reasonable Accommodations Coordinator, Office of Human Capital, EXIM, 811 Vermont Avenue NW, Washington, DC 20571.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

29 U.S.C. 1302; 44 U.S.C. 3101; 5 U.S.C. 301; 29 U.S.C. 701 *et seq.;* 29 U.S.C. 791; 42 U.S.C. 12101 *et seq.;* 42 U.S.C. 2000e *et seq.;* 42 U.S.C. 2000bb; 42 U.S.C. Ch. 21, 126; 29 CFR parts 1605, 1614, 1630; Executive Order 13164 (July 26, 2000); and Executive Order 13548 (July 26, 2010).

PURPOSE(S) OF THE SYSTEM:

The purposes of this system are: (1) To allow EXIM to collect and maintain records on applicants, current, and former employees and other individuals who participate in EXIM programs or activities with physical and/or mental disabilities, and/or sincerely held religious beliefs, practices, or observances who request and/or receive reasonable accommodation by EXIM; (2) to track and report the processing of requests for reasonable accommodation EXIM-wide to comply with applicable law and regulations; and (3) to maintain the confidentiality of medical and/or religious information submitted by or on behalf of applicants or employees requesting reasonable accommodation.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Applicants, current, and former employees of EXIM and visitors to Federal buildings who request and/or receive a reasonable accommodation or appropriate modifications from EXIM for a physical and/or mental disability, and/or religious belief, practice, or observance; Authorized individuals or representatives (*e.g.,* family members, union representatives, or attorneys) who submit a request for a reasonable accommodation on behalf of an applicant, current, or former employee.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name and employment information of applicants and employees requesting and granted or denied an accommodation; the requester's name and contact information (if different than the applicant or employee who needs an accommodation); date request was initiated; information concerning the nature of the disability or religious belief, practice, or observance and the need for accommodation, including appropriate medical or other documentation; occupational series; pay grade; requester's statement of a sincerely held religious belief and any additional information provided concerning that religious belief and the need for an accommodation to exercise that belief; essential functions of the position; details of the accommodation request, such as: Type of accommodation requested, how the requested accommodation would assist in job or allow job performance while accommodating the disability or

religious belief, practice, or observance, the sources of technical assistance consulted in trying to identify alternative reasonable accommodation, any additional information provided by the requester relating to the processing of the request, whether the request was approved or denied, whether the accommodation was approved for a trial period; and, documentation between the applicant and EXIM, employee and his/her supervisor(s) regarding the accommodation.

RECORD SOURCE CATEGORIES:

Subject individuals or individual making the request (if different than the subject individuals); medical and equal employment opportunity professionals directly or indirectly from an individual's medical provider or another medical professional who evaluates the request, directly or indirectly from an individual's religious or spiritual advisors or institutions; and the subject individuals' supervisor(s).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records or information contained in this system may be disclosed outside EXIM as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

a. To the Department of Justice, including Offices of the U.S. Attorneys; another Federal agency conducting litigation or in proceedings before any court, adjudicative, or administrative body; another party in litigation before a court, adjudicative, or administrative body; or to a court, adjudicative, or administrative body. Such disclosure is permitted only when it is relevant or necessary to the litigation or proceeding, and one of the following is a party to the litigation or has an interest in such litigation:

(1) EXIM, or any component thereof;

(2) Any employee or former employee of EXIM in his or her official capacity;

(3) Any employee or former employee of EXIM in his or her capacity where the Department of Justice or EXIM has agreed to represent the employee;

(4) The United States, a Federal agency, or another party in litigation before a court, adjudicative, or administrative body, upon EXIM General Counsel's approval, pursuant to 5 CFR part 295 or otherwise.

b. To the appropriate Federal, State, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, when a record, either on its face or in conjunction with other information, indicates or is relevant to a violation or potential violation of civil or criminal law or regulation.

c. To a member of Congress from the record of an individual in response to an inquiry made at the request of the individual to whom the record pertains.

d. To the National Archives and Records Administration (NARA) for records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

e. To appropriate agencies, entities, and persons when (1) EXIM suspects or has confirmed that there has been a breach of the system of records; (2) EXIM has determined that as a result of the suspected or confirmed breach, there is a risk of harm to individuals, EXIM (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with EXIM's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

f. To another Federal agency or Federal entity, when EXIM determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

g. To contractors, grantees, experts, consultants, or volunteers performing or working on a contract, service, grant, cooperative agreement, or other assignment for EXIM when EXIM determines that it is necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to EXIM employees.

h. To another federal agency or commission with responsibility for labor or employment relations or other issues, including equal employment opportunity and reasonable accommodation issues, when that agency or commission has jurisdiction over reasonable accommodation.

i. To an authorized appeal grievance examiner, formal complaints examiner, administrative judge, equal employment opportunity investigator, arbitrator, or other duly authorized official engages in investigation or settlement of a grievance, complaint, or appeal filed by an individual who requested a reasonable accommodation or other appropriate modification.

j. To another Federal agency, including but not limited to the Equal Employment Opportunity Commission and the Office of Special Counsel to obtain advice regarding statutory, regulatory, policy, and other requirements related to reasonable accommodation.

k. To a Federal agency or entity authorized to procure assistive technologies and services in response to a request for reasonable accommodation.

l. To first aid and safety personnel if the individual's medical condition requires emergency treatment.

m. To another Federal agency or oversight body charged with evaluating EXIM's compliance with the laws, regulations, and policies governing reasonable accommodation requests.

n. To another Federal agency pursuant to a written agreement with EXIM to provide services (such as medical evaluations), when necessary, in support of reasonable accommodation decisions.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records are maintained manually in paper and/or electronic form (including computer databases or discs). Records may also be maintained on back-up tapes, or on an EXIM or a contractor-hosted network.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records are retrieved by any one or more of the following: Applicant or employee name or assigned case number.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records are maintained and destroyed in accordance with the National Archives and Record Administration's (NARA) Basic Laws and Authorities (44 U.S.C. 3301, *et seq.*) or a EXIM records disposition schedule approved by NARA. Records existing on paper are destroyed beyond recognition.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

EXIM has established security and privacy protocols that meet the required security and privacy standards issued by the National Institute of Standards and Technology (NIST). Records are maintained in a secure, password

protected electronic system that utilizes security hardware and software to include multiple firewalls, active intruder detection, and role-based access controls. EXIM has adopted appropriate administrative, technical, and physical controls in accordance with EXIM's security program to protect the confidentiality, integrity, and availability of the information, and to ensure that records are not disclosed to or accessed by unauthorized individuals.

Electronic records are stored on computer networks, which may include cloud-based systems, and protected by controlled access with Personal Identity Verification (PIV) cards, assigning user accounts to individuals needing access to the records and by passwords set by authorized users that must be changed periodically.

RECORD ACCESS PROCEDURES:

Individuals, or third parties with written authorization from the individual, wishing to request access to their records in accordance with 12 CFR 404.14 or to amend records pertaining to themselves in accordance with 2912 CFR 404.18, should submit a written request to the Freedom of Information and Privacy Act Office, EXIM, 811 Vermont Avenue NW, Washington, DC 20571, providing their name, address, date of birth, and verification of their identity in accordance with 12 § 1404.14(d & e).

CONTESTING RECORD PROCEDURES:

Individuals, or third parties with written authorization from the individual, wishing to amend their records, in accordance with 12 CFR 1404.18 must submit a written request identifying the information they wish to correct in their file, in addition to following the requirements of the Record Access Procedure above.

NOTIFICATION PROCEDURES:

Individuals, or third parties with written authorization from the individual, wishing to learn whether this system of records contains information about them should submit a written request to the Freedom of Information and Privacy Act Office, EXIM, 811 Vermont Avenue NW, Washington, DC 20571, providing their name, address, date of birth, and verification of their identity in accordance with 29 CFR 4902.3(c).

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

None.

EXPORT-IMPORT BANK

[Public Notice: 2021–6043]

Agency Information Collection Activities: Comment Request

AGENCY: Export-Import Bank of the United States.

ACTION: Submission for OMB review and comments request.

SUMMARY: The Export-Import Bank of the United States (EXIM), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal Agencies to comment on the proposed information collection, as required by the Paperwork Reduction Act of 1995. EXIM's borrowers, financial institution policy holders and guaranteed lenders provide this form to U.S. exporters, who certify to the eligibility of their exports for EXIM support. For direct loans and loan guarantees, the completed form is required to be submitted at time of disbursement and held by either the guaranteed lender or EXIM. For MT insurance, the completed forms are held by the financial institution, only to be submitted to EXIM in the event of a claim filing. EXIM uses the referenced form to obtain information from exporters regarding the export transaction and content sourcing. These details are necessary to determine the value and legitimacy of EXIM financing support and claims submitted. It also provides the financial institutions a check on the export transaction's eligibility at the time it is fulfilling a financing request.

DATES: Comments must be received on or before January 18, 2022 to be assured of consideration.

ADDRESSES: Comments may be submitted electronically on *www.regulations.gov* (EIB 11–05) or by email to Donna Schneider <*donna.schneider@exim.gov*>, or by mail to Donna Schneider, Export-Import Bank, 811 Vermont Ave. NW, Washington, DC 20571. The information collection tool can be reviewed at: *https://www.exim.gov/sites/default/files/pub/pending/eib11-05.pdf.*

FOR FURTHER INFORMATION CONTACT: To request additional information, please Donna Schneider *donna.schneider@exim.gov,* 202–565–3612.

SUPPLEMENTARY INFORMATION:

Title and Form Number: EIB 11–05 Exporter's Certificate for Loan Guarantee & MT Insurance Programs.

OMB Number: 3048–0043.

Type of Review: Regular.

Need and Use: The information collected will allow EXIM to determine compliance and content for transaction requests submitted to the Export-Import Bank under its insurance, guarantee, and direct loan programs.

Affected Public: This form affects entities involved in the export of U.S. goods and services.

Annual Number of Respondents: 2,000.

Estimated Time per Respondent: 30 minutes.

Annual Burden Hours: 1,000 hours.

Frequency of Reporting of Use: As required.

Government Expenses:

Reviewing Time per Year: 167 hours.

Average Wages per Hour: $42.50.

Average Cost per Year: $7,097.50 (time * wages).

Benefits and Overhead: 20%.

Total Government Cost: $8,517.

BILLING CODE 6690–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1223; FR ID 56713]

Information Collection Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize

the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

SUPPLEMENTARY INFORMATION:

Title: Payment Instructions from the Eligible Entity Seeking Reimbursement from the TV Broadcaster Relocation Fund.

Form Number: FCC Form 1876.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit, Not-for-profit institutions and State, Local or Tribal Government.

Number of Respondents and Responses: 350 respondents; 350 responses.

Estimated Time per Response: 5 hours.

Frequency of Response: One-time reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection is contained in Middle Class Tax Relief and Job Creation Act of 2012, Public Law 112–96 (Spectrum Act) section 6403(a)(1)and Repack Airwaves Yielding Better Access for Users of Modern Services Act of 2018, Public Law 115–141, Div. P, (RAY BAUM'S Act) section 1452.

Total Annual Burden: 1,750 hours.

Total Annual Cost: No Cost.

Privacy Act Impact Assessment: No Impact(s).

Nature and Extent of Confidentiality: The information collection includes information identifying bank accounts and providing account and routing numbers to access those accounts. FCC considers that information to be records not routinely available for public inspection under 47 CFR 0.457, and exempt from disclosure under FOIA exemption 4 (5 U.S.C. 552(b)(4)).

Needs and Uses: The Commission is requesting Office of Management and Budget (OMB) approval for a three-year extension of this information collection.

The Spectrum Act requires the Commission to reimburse broadcast television licensees for costs ''reasonably incurred'' in relocating to new channels assigned in the repacking process and Multichannel Video Programming Distributors (MVPDs) for costs reasonably incurred in order to continue to carry the signals of stations relocating to new channels as a result of the repacking process or a winning reverse auction bid.[1]

The Commission decided through notice-and-comment rulemaking that it will issue all eligible broadcasters and MVPDs an initial allocation of funds based on estimated costs, which will be available for draw down (from individual accounts in the U.S. Treasury) as the entities incur expenses, followed by a subsequent allocation to the extent necessary. The reason for allowing eligible entities to draw down funds as they incur expenses is to reduce the chance that entities will be unable to finance necessary relocation changes.[2]

The information collection for which we are requesting approval is necessary for eligible entities to instruct the Commission on how to pay the amounts the entities draw down, and for the entities to make certifications that reduce the risk of waste, fraud, abuse and improper payments.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1183; FR ID 52700]

Information Collection Being Submitted for Review and Approval to Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Pursuant to the Small Business Paperwork Relief Act of 2002, the FCC seeks specific comment on how it can further reduce the information collection burden for small business concerns with fewer than 25 employees.

DATES: Written comments and recommendations for the proposed information collection should be submitted on or before December 16, 2021.

ADDRESSES: Comments should be sent to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Your comment must be submitted into *www.reginfo.gov* per the above instructions for it to be considered. In addition to submitting in *www.reginfo.gov* also send a copy of your comment on the proposed information collection to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.* Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Cathy Williams at (202) 418–2918. To view a copy of this information collection request (ICR) submitted to OMB: (1) Go to the web page *http://www.reginfo.gov/public/do/PRAMain,* (2) look for the section of the web page called ''Currently Under Review,'' (3) click on the downward-pointing arrow in the ''Select Agency'' box below the ''Currently Under Review'' heading, (4) select ''Federal Communications Commission'' from the list of agencies presented in the ''Select Agency'' box, (5) click the ''Submit'' button to the right of the ''Select Agency'' box, (6) when the list of FCC ICRs currently under review appears, look for the Title of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION: The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the

[1] Middle Class Tax Relief and Job Creation Act of 2012, Public Law 112–96 (Spectrum Act) § 6403(b)(4)(A)(i), (ii).

[2] Expanding the Economic and Innovation Opportunities of Spectrum Through Incentive Auctions, GN Docket No. 12–268, Report and Order, 29 FCC Rcd 6567 (2014) (''Incentive Auction R&O'') at 609.

following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

OMB Control Number: 3060–1183.

Title: Establishment of a Public Safety Answering Point Do-Not-Call Registry, CG Docket No. 12–129.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities; Federal Government; Not-for-profit institutions; State Local or Tribal Government.

Number of Respondents and Responses: 106,500 respondents; 1,446,333 responses.

Estimated Time per Response: 30 minutes (.50 hours) to 1 hour.

Frequency of Response: Recordkeeping requirement; Annually, monthly, on occasion and one-time reporting requirements.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for the information collection requirements is found in the Middle Class Tax Relief and Job Creation Act of 2012, Public Law 112–96, February 22, 2012.

Total Annual Burden: 792,667 hours.

Total Annual Cost: None.

Needs and Uses: The rules adopted herein establish recordkeeping requirements for a large variety of entities, including small business entities. First, each Public Safety Answering Point (PSAP) may designate a representative who shall be required to file a certification with the administrator of the PSAP registry that they are authorized to place numbers onto that registry. The designated PSAP representative shall provide contact information including the PSAP represented, name, title, address, telephone number and email address. Verified PSAPs shall be permitted to upload to the registry any PSAP telephone associated with the provision of emergency services or communications with other public safety agencies. On an annual basis designated PSAP representatives shall access the registry, review their numbers and remove any ineligible numbers from the registry. Second, an operator of automatic dialing equipment (OADE) is prohibited from contacting any number on the PSAP registry. Each OADE must register for access to the PSAP registry by providing contact information which includes name, business address, contact person, telephone number, email, and all outbound telephone numbers used to place autodialed calls. All such contact information must be updated within 30 days of any change. In addition, the OADE must certify that it is accessing the registry solely to prevent autodialed calls to numbers on the registry. An OADE must access and employ a version of the PSAP registry obtained from the registry administrator no more than 31 days prior to the date any call is made, and maintain record documenting this process. No person or entity may sell, rent, lease, purchase, share, or use the PSAP registry for any purpose expect to comply with our rules prohibiting contact with numbers on the registry.

Federal Communications Commission.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[IB Docket No. 16–185; DA 21–1398; FRS 57855]

Informal Working Group-1, Informal Working Group-2, Informal Working Group-3, and Informal Working Group-4 of the World Radiocommunication Conference Advisory Committee Schedule Their Meetings

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: This notice advises interested persons that Informal Working Group 1 (IWG–1), Informal Working Group 2 (IWG–2,) Informal Working Group 3 (IWG–3, and Informal Working Group 4 (IWG–4) of the 2023 World Radiocommunication Conference Advisory Committee (WRC–23 Advisory Committee) have scheduled meetings as set forth below. The meetings are open to the public.

DATES: IWG–3: Tuesday, December 14, 2021 (11:00 a.m.–12:30 p.m. EDT); IWG–4: Tuesday, December 14, 2021 (1:00 p.m.–2:30 p.m. EDT); IWG–1, Wednesday, December 15, 2021 (10:30 a.m.–12:00 p.m. EDT); IWG–2, Wednesday, December 15, 2021 (12:00 p.m.–1:00 p.m. EDT); IWG–3: Thursday, January 6, 2022 (11:00 a.m.–1:00 p.m. EDT); IWG–4, Thursday, January 6, 2022 (1:30 p.m.–3:00 p.m. EDT); IWG–1, Wednesday, January 12, 2022 (10:00 a.m.–12:00 p.m. EDT); IWG–2, Wednesday, Wednesday, January 12, 2022 (1:00 p.m.–3:00 p.m. EDT); IWG–3: Tuesday, January 18, 2022 (11:00 a.m.–1:00 p.m. EDT); IWG–4: Tuesday, January 18, 2022 (1:30 p.m.–3:00 p.m. EDT); IWG–2, Wednesday, January 19, 2022 (11:00 a.m.–12:00 p.m. EDT); IWG–1, Wednesday, January 19, 2022 1:00 p.m.–3:00 p.m. (1:00 p.m.–3:00 p.m. EDT).

ADDRESSES: The meetings will be held virtually.

FOR FURTHER INFORMATION CONTACT: Dante Ibarra, Designated Federal Official, World Radiocommunication Conference Advisory Committee, FCC International Bureau, Global Strategy and Negotiation Division, at *Dante.Ibarra@fcc.gov,* (202)-418–0610 or *WRC-23@fcc.gov.*

SUPPLEMENTARY INFORMATION: The FCC established the Advisory Committee to provide advice, technical support and recommendations relating to the preparation of United States proposals and positions for the 2023 World Radiocommunication Conference (WRC–23).

In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, this notice advises interested persons of the IWG–1, IWG–2, IWG–3 and IWG–4 of the WRC–23 Advisory Committee scheduled meetings. The Commission's WRC–23 website (*www.fcc.gov/wrc-23*) contains the latest information on all scheduled meetings, meeting agendas, and WRC–23 Advisory Committee matters.

Below is additional IWG meeting information:

BILLING CODE 6712–01–P

FEDERAL DEPOSIT INSURANCE CORPORATION

Privacy Act of 1974; System of Records

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Notice of New System of Records.

SUMMARY: Pursuant to the provisions of the Privacy Act of 1974, as amended, the FDIC is establishing FDIC–036 Ensuring Workplace Health and Safety in Response to a Public Health Emergency. This system of records maintains information collected in response to a public health emergency, such as a pandemic or epidemic, from FDIC personnel (including political appointees, onboarding employees, employees, detailees, contractors, consultants, interns, and volunteers), and visitors to FDIC facilities.

DATES: This action will become effective on November 16, 2021 The routine uses in this action will become effective on December 16, 2021 unless the FDIC makes changes based on comments received. Written comments should be submitted on or before December 16, 2021.

ADDRESSES: Interested parties are invited to submit written comments identified by Privacy Act Systems of Records by any of the following methods:

- *Federal eRulemaking Portal: http://regulations.gov.* Follow the instructions for submitting comments.
- *Agency website: https://www.fdic.gov/resources/regulations/federal-register-publications/.* Follow the instructions for submitting comments on the FDIC website.
- *Email: Comments@fdic.gov.*
- *Mail:* Shannon Dahn, Chief, Privacy Program, Federal Deposit Insurance Corporation, 550 17th Street NW, Washington, DC 20429.
- *Hand Delivery:* Comments may be hand-delivered to the guard station at the rear of the 17th Street NW building (located on F Street), on business days between 7:00 a.m. and 5:00 p.m.

FOR FURTHER INFORMATION CONTACT: Shannon Dahn, Chief, Privacy Program, 703–516–5500, *privacy@fdic.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to the Privacy Act, 5 U.S.C. 552a, FDIC is establishing a new system of records, FDIC–036 Ensuring Workplace Health and Safety in Response to a Public Health Emergency. FDIC is committed to providing all FDIC personnel with a safe and healthy work environment. When the Secretary of Health and

Human Services declares a public health emergency under Section 319 of the Public Health Act, FDIC may develop and institute additional safety measures to protect the workforce and those individuals entering FDIC facilities. These measures may include instituting activities such as requiring FDIC personnel and visitors to provide information before being allowed access to a FDIC facility, medical screening, and contact tracing. FDIC personnel may also need to provide information before being authorized to travel.FDIC will collect and maintain information in accordance with the Americans with Disabilities Act of 1990 and regulations and guidance published by the U.S. Occupational Safety and Health Administration, the U.S. Equal Employment Opportunity Commission, and the U.S. Centers for Disease Control and Prevention.

SYSTEM NAME AND NUMBER:

Ensuring Workplace Health and Safety in Response to a Public Health Emergency, FDIC–036.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Records are maintained at FDIC facilities in Arlington, Virginia and regional offices. Original and duplicate systems may exist, in whole or in part, at secure sites and on secure servers maintained by third-party service providers for the FDIC.

SYSTEM MANAGER(S):

Special Advisor to FDIC's Chief Operating Officer, 3501 Fairfax Drive, Arlington, VA 22226, *healthandsafety@fdic.gov.*

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sections 9, 11, and 12 of the Federal Deposit Insurance Act (12 U.S.C. 1819, 1821, and 1822); American with Disabilities Act, including 42 U.S.C. 12112(d)(3)(B), 29 CFR 1630.2(r), 1630.14(b), (c), (d)(4); Title VII of the Civil Rights Act, 42 U.S.C. 2000e; 29 U.S.C. 791; Workforce safety federal requirements, including the Occupational Safety and Health Act of 1970, 5 U.S.C. 7902; 29 U.S.C. Chapter 15 (*e.g.,* 29 U.S.C. 668), 29 CFR part 1904, 29 CFR 1910.1020, and 29 CFR 1960.66; Executive Order 13164; Executive Order 12196; Executive Order on Requiring Coronavirus Disease 2019 Vaccination for Federal Employees dated September 9, 2021; Executive Order 14042, Ensuring Adequate COVID Safety Protocols for Federal Contractors.

PURPOSE(S) OF THE SYSTEM:

The information in the system is collected to assist the FDIC with maintaining a safe and healthy workplace and respond to a public health emergency (as defined by the U.S. Department of Health and Human Services and declared by its Secretary), such as a pandemic or epidemic. These measures may include instituting activities such as requiring FDIC personnel to provide information before being allowed access to a FDIC facility, medical screening, contact tracing, to provide information before being authorized to travel, and to comply with applicable mandates related to a public health emergency. These measures may also include requiring visitor information to determine whether to admit an individual to an FDIC facility and to conduct contract tracing when necessary for those who have visited.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals covered by this system include FDIC personnel (including political appointees, onboarding employees, employees, detailees, contractors, consultants, interns, and volunteers) and visitors to a FDIC facility during a public health emergency, such as a pandemic or epidemic. FDIC may also maintain information on FDIC personnel's emergency contacts.

CATEGORIES OF RECORDS IN THE SYSTEM:

FDIC personnel information may include:

- Name;
- Contact information (*e.g.,* email address, phone number);
- Recent travel history;
- Whether they provide dependent care for an individual in a high-risk category;
- Health information, including:
  - Body temperature,
  - Confirmation of pathogen or communicable disease test,
  - Test results,
  - Dates, symptoms, potential or actual exposure to a pathogen or communicable disease,
  - Immunization or vaccination information, and
  - Information to support a request for exemption from a vaccination (*e.g.,* medical diagnosis or religious beliefs);
- Contact tracing information, including:
  - Dates when they visited the FDIC facility,
  - Locations that they visited within the facility (*e.g.,* office and cubicle number),
  - Duration of time spent in the facility, and
  - Whether they may have potentially come into contact with a contagious person while visiting the facility.

Information about visitors to FDIC facilities may include:

- Name;
- Contact information;
- Recent travel history;
- Health information, including:
  - Body temperature,
  - Confirmation of pathogen or communicable disease test,
  - Test results,
  - Dates, symptoms, potential or actual exposure to a pathogen or communicable disease, and
  - Attestation of vaccine status;
- Contact tracing information, including:
  - Dates when they visited the FDIC facility,
  - Locations that they visited within the facility (*e.g.,* office and cubicle number),
  - Duration of time spent in the facility, and
  - Whether they may have potentially come into contact with a contagious person while visiting the facility.

Information about emergency contacts may include:

- Name,
- Phone number, and
- Email addresses.

RECORD SOURCE CATEGORIES:

The information in this system is collected in part directly from the individual or from the individual's emergency contact. Information is also collected from security systems monitoring access to FDIC facilities, such as video surveillance and turnstiles, human resources systems, emergency notification systems, and federal, state, and local agencies assisting with the response to a public health emergency. Information may also be collected from property management companies responsible for managing office buildings that house FDIC facilities.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records or information contained in this system may be disclosed outside the FDIC as a routine use as follows:

(1) To appropriate Federal, State, local and foreign authorities responsible for investigating or prosecuting a violation of, or for enforcing or implementing a statute, rule, regulation, or order issued, when the information indicates a

violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule, or order issued pursuant thereto;

(2) To a court, magistrate, or other administrative body in the course of presenting evidence, including disclosures to counsel or witnesses in the course of civil discovery, litigation, or settlement negotiations or in connection with criminal proceedings, when the FDIC is a party to the proceeding or has a significant interest in the proceeding, to the extent that the information is determined to be relevant and necessary;

(3) To a congressional office in response to an inquiry made by the congressional office at the request of the individual who is the subject of the record;

(4) To appropriate agencies, entities, and persons when (a) the FDIC suspects or has confirmed that there has been a breach of the system of records; (b) the FDIC has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the FDIC (including its information systems, programs, and operations), the Federal Government, or national security; the FDIC and (c) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the FDIC's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm;

(5) To another Federal agency or Federal entity, when the FDIC determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (a) responding to a suspected or confirmed breach or (b) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach;

(6) To contractors, grantees, volunteers, and others performing or working on a contract, service, grant, cooperative agreement, or project for the FDIC, the Office of Inspector General for the purpose of assisting FDIC respond to a public health emergency;

(7) To a Federal, State, or local agency to the extent necessary to comply with laws governing reporting of infectious disease; and

(8) To the FDIC personnel member's emergency contact for purposes of locating a personnel member during a public health emergency or to communicate that the FDIC personnel member may have potentially been exposed to a virus as the result of a pandemic or epidemic while visiting a FDIC facility.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records are stored in electronic media and in paper format within individual file folders.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Electronic media and paper format are indexed and retrieved by employee name, employee identification number, office location, or office/division name.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

FDIC is in the process of creating a new records schedule for declared public health emergencies. FDIC maintains emergency contact information until superseded or obsolete, or upon separation or transfer of employee.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Electronic records are password-protected and accessible only by authorized personnel. Paper records are maintained in lockable file cabinets accessible only to authorized personnel.

RECORD ACCESS PROCEDURES:

Individuals wishing to request access to records about them in this system of records must submit their request in writing to the FDIC FOIA & Privacy Act Group, 550 17th Street NW, Washington, DC 20429, or email *efoia@fdic.gov.* Requests must include full name, address, and verification of identity in accordance with FDIC regulations at 12 CFR part 310.

CONTESTING RECORD PROCEDURES:

Individuals wishing to contest or request an amendment to their records in this system of records must submit their request in writing to the FDIC FOIA & Privacy Act Group, 550 17th Street NW, Washington, DC 20429, or email *efoia@fdic.gov.* Requests must specify the information being contested, the reasons for contesting it, and the proposed amendment to such information in accordance with FDIC regulations at 12 CFR part 310.

NOTIFICATION PROCEDURES:

Individuals wishing to know whether this system contains information about them must submit their request in writing to the FDIC FOIA & Privacy Act Group, 550 17th Street NW, Washington, DC 20429, or email *efoia@fdic.gov.* Requests must include full name, address, and verification of identity in accordance with FDIC regulations at 12 CFR part 310.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

None.

Federal Deposit Insurance Corporation.

Dated at Washington, DC, on November 9, 2021.

James P. Sheesley,

Assistant Executive Secretary.

BILLING CODE 6714–01–P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The public portions of the applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank(s) indicated below and at the offices of the Board of Governors. This information may also be obtained on an expedited basis, upon request, by contacting the appropriate Federal Reserve Bank and from the Board's Freedom of Information Office at *https://www.federalreserve.gov/foia/request.htm.* Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)).

Comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Ann E. Misback, Secretary of the Board, 20th Street and Constitution Avenue NW, Washington, DC 20551–0001, not later than December 16, 2021.

A. Federal Reserve Bank of Philadelphia (William Spaniel, Senior Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105–1521. Comments can also be sent

electronically to *Comments.applications@phil.frb.org:*

1. *Riverbank Financial, MHC, Carthage, New York;* to become a Delaware-chartered mutual bank holding company, and its mid-tier holding company, Riverbank Financial Corporation, to become a Maryland-chartered stock bank holding company, upon the conversion of Carthage Federal Savings & Loan Association, both of Carthage, New York, from a federal stock savings and loan association to a national bank.

Board of Governors of the Federal Reserve System, November 10, 2021.

Michele Taylor Fennell,

Deputy Associate Secretary of the Board.

BILLING CODE P

FEDERAL TRADE COMMISSION

Agency Information Collection Activities; Proposed Collection; Comment Request

AGENCY: Federal Trade Commission (FTC or Commission).

ACTION: Notice.

SUMMARY: The information collection requirements described below will be submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act (PRA). The FTC seeks public comments on the agency's shared enforcement with the Consumer Financial Protection Bureau (CFPB) of the information collection requirements in subpart N of the CFPB's Regulation V (Rule). That clearance expires on February 28, 2022.

DATES: Comments must be received on or before January 18, 2022.

ADDRESSES: Interested parties may file a comment online or on paper by following the instructions in the Request for Comments part of the **SUPPLEMENTARY INFORMATION** section below. Write ''Regulation V, subpart N; PRA Comment: FTC File No. P072108'' on your comment, and file your comment online at *https://www.regulations.gov* by following the instructions on the web-based form. If you prefer to file your comment on paper, mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW, Suite CC–5610 (Annex J), Washington, DC 20580, or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Constitution Center, 400 7th Street SW, 5th Floor, Suite 5610 (Annex J), Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: Requests for copies of the collection of information and supporting documentation should be addressed to Ryan Mehm, Attorney, Bureau of Consumer Protection, (202) 326–2918, Federal Trade Commission, 600 Pennsylvania Ave. NW, Washington, DC 20580.

SUPPLEMENTARY INFORMATION: *Title:* Regulation V, Subpart N (12 CFR 1022.130–1022.138).

OMB Control Number: 3084–0128.

Type of Review: Extension of a currently approved collection.

Abstract: The FTC shares enforcement authority with the CFPB for subpart N of Regulation V. Subpart N requires nationwide consumer reporting agencies and nationwide consumer specialty reporting agencies to provide to consumers, upon request, one free file disclosure within any 12-month period. Generally, it requires the nationwide consumer reporting agencies, as defined in Section 603(p) of the Fair Credit Reporting Act (FCRA), 15 U.S.C. 1681a(p), to create and operate a centralized source that provides consumers with the ability to request their free annual file disclosures from each of the nationwide consumer reporting agencies through a centralized internet website, toll-free telephone number, and postal address. Subpart N also requires the nationwide consumer reporting agencies to establish a standardized form for internet and mail requests for annual file disclosures and provides a model standardized form that may be used to comply with that requirement. It additionally requires nationwide specialty consumer reporting agencies, as defined in Section 603(w) of the FCRA, 15 U.S.C. 1681a(w), to establish a streamlined process for consumers to request annual file disclosures. This streamlined process must include a toll-free telephone number for consumers to make such requests.

As required by section 3506(c)(2)(A) of the PRA, 44 U.S.C. 3506(c)(2)(A), the FTC is providing this opportunity for public comment before requesting that OMB extend the existing clearance for the information collection requirements contained in the Rule.

Burden Statement

Because the FTC shares enforcement authority with the CFPB for subpart N, the two agencies split between them the related estimate of PRA burden for firms under their co-enforcement jurisdiction. Estimated PRA burden, excluding the halving (to be shown at the conclusion of this analysis), are as follows:

A. Requests per Year From Consumers for Free Annual File Disclosures

When the FTC last sought clearance renewal for the Rule, the Consumer Data Industry Association (''CDIA'') estimated that in 2016 and 2017, the nationwide consumer reporting agencies provided on average approximately 25 million free annual file disclosures through the centralized internet website required to be established by the FACT Act and subpart N. Based on its knowledge of the industry, FTC staff projected that the consumer reporting agencies provided no more than 6 million free annual file disclosures through the centralized toll-free telephone number and postal address required to be established by the FACT Act and subpart N. Accordingly, we estimated 31 million requests per year as a representative average to calculate PRA burden. We expect that the number of requests for free annual credit reports will rise over the next three years because of increases in the population and consumer awareness that they are entitled to a free annual report. As a proxy, we are now estimating 34 million requests per year as a representative average year to estimate PRA burden for purposes of the instant analysis.

The Commission, however, seeks more recent estimates of the number of requests consumers are making for free annual credit reports. In addition to data on the number of requests, data on how the number of requests has changed over time, and how these requests are being received—by internet, phone, or by mail—would be most helpful.

B. Annual File Disclosures Provided Through the Internet

Both nationwide and nationwide specialty consumer reporting agencies will likely handle the overwhelming majority of consumer requests through internet websites. The annual file disclosure requests processed through the internet will impose a *de minimis* hourly burden in personnel costs per request on the nationwide and nationwide specialty consumer reporting agencies, except for those requests that are redirected to the mail process.[1] However, consumer reporting agencies periodically will be required to adjust the internet capacity needed to handle the changing request volume. Consumer reporting agencies likely will make such adjustments by negotiating or renegotiating outsourcing service contracts annually or as conditions

[1] *See infra* note 5.

change. Trained personnel will need to spend time negotiating and renegotiating such contracts. Commission staff estimates that negotiating such contracts will require a cumulative total of 8,320 hours and $646,963 in labor costs.[2] Such activity is treated as an annual burden of maintaining and adjusting the changing internet capacity requirements.

C. Annual File Disclosures Requested Over the Telephone

Most of the telephone requests for annual file disclosures will also be handled in an automated fashion, with *de minimis* personnel costs needed to process the requests except for those requests that are redirected to the mail process.[3] As with the internet, consumer reporting agencies will require additional time and investment to increase and administer the automated telephone capacity for the expected increase in request volume. The nationwide and nationwide specialty consumer reporting agencies will likely make such adjustments by negotiating or renegotiating outsourcing service contracts annually or as conditions change. Staff estimates that this will require a total of 6,240 hours at a cost of $485,222 in labor costs.[4] This activity also is treated as an annual recurring burden necessary to obtain, maintain, and adjust automated call center capacity.

D. Annual File Disclosures Requiring Processing by Mail

Based on their knowledge of the industry, staff believes that no more than 1% of consumers (1% × 34 million, or 340,000) will request an annual file disclosure through U.S. postal service mail. Staff estimates that clerical personnel will require 10 minutes per request to handle these requests, thereby totaling 56,667 hours of time. [(340,000 × 10 minutes)/60 minutes per hour = 56,667 hours]

In addition, whenever the requesting consumer cannot be identified using an automated method (a website or automated telephone service), it will be necessary to redirect that consumer to send identifying material along with the request by mail. Staff estimates that this will occur in about 5% of the new requests (or 1,683,000)[5] that were originally placed over the internet or telephone. Staff estimates that clerical personnel will require approximately 10 minutes per request to input and process those redirected requests for a cumulative total of 280,500 clerical hours. [(1,683,000 × 10 minutes)/60 minutes per hour = 280,500 hours]

E. Instructions to Consumers

The Rule also requires that certain instructions be provided to consumers. *See* Rule sections 1022.136(b)(2)(iv)(A–B), 1022.137(a)(2)(iii)(A–B). Minimal associated time or cost is involved, however. Internet instructions to consumers are embedded in the centralized source website and do not require additional time or cost for the nationwide consumer reporting agencies. Similarly, for telephone requests, the automated phone systems provide the requisite instructions when consumers select certain options. Some consumers who request their credit reports by mail might additionally request printed instructions from the nationwide and nationwide specialty consumer reporting agencies. Staff estimates that there will be a total of 2,023,000 requests each year for free annual file disclosures by mail.[6] Based on their knowledge of the industry, staff estimates that, of the predicted 2,023,000 mail requests, 10% (or 202,300) will request instructions by mail. If printed instructions are sent to each of these consumers by mail, requiring 10 minutes of clerical time per consumer, this will total 33,717 hours. [(202,300 instructions × 10 minutes)/60 minutes per hour].

F. Labor Costs

Labor costs are derived by applying hourly cost figures to the burden hours described above. Staff anticipates that processing of requests for annual file disclosures and instructions will be performed by clerical personnel and estimates that the processing will require 370,884 hours at a cost of $7,013,416. [(56,667 hours for handling initial mail requests + 280,500 hours for handling requests redirected to mail + 33,717 hours for handling instructions mailed to consumers) × $18.91 per hour.[7]]

As elaborated on above, staff estimates that a total of 14,560 labor hours will be needed to negotiate or renegotiate outsourced service contracts annually (or as conditions otherwise change) to increase internet (8,320 hours) and telephone (6,240 hours) capacity requirements for internet web services and the automated telephone call center. This will result in approximately $1,132,186 per year in labor costs. [14,560 hours × $77.76 per hour[8]]

Thus, estimated cumulative labor costs are $8,145,602.

G. Capital/Non-Labor Costs

As in the previous PRA clearance analysis, FTC staff believes it is likely that consumer reporting agencies will use third-party contractors (instead of their own employees) to increase the capacity of their systems. Because of the way these contracts are typically established, these costs will likely be incurred on a continuing basis and will be calculated based on the number of requests handled by the systems. Staff estimates that the total annual amount to be paid for services delivered under these contracts is $12,454,200.[9]

H. Net Burden for FTC, After 50:50 Split

After halving the updated estimates to split the PRA burden with the CFPB regarding the Rule, the FTC's burden totals are 192,722 hours, $4,072,801 in associated labor costs, and $6,227,100 in non-labor/capital costs.

Request for Comments

Pursuant to Section 3506(c)(2)(A) of the PRA, the FTC invites comments on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate

[2] Based on the time necessary for similar activity in the federal government (including at the FTC), staff estimates that such contracting and administration will require approximately 4 full-time equivalent employees (FTE) for the web service contracts. Thus, staff estimates that administering the contract will require four FTE, which is 8,320 hours per year (four FTE × 2,080 hours/year). The cost is based on the reported May 2020 Bureau of Labor Statistics (BLS) rate ($77.76) for computer and information systems managers. *See Occupational Employment and Wages—May 2020,* Table 1, *available at https://www.bls.gov/news.release/pdf/ocwage.pdf.* Thus, the estimated setup and maintenance cost for an internet system is $646,963 per year (8,320 hours × $77.76/hour).

[3] *See infra* note 5.

[4] Staff estimates that recurring contracting for automated telephone capacity will require approximately 3 FTE, a total of 6,240 hours (3 × 2,080 hours). Applying an hourly wage rate of $77.76 (*see supra* note 2), estimated setup and maintenance cost is $485,222 (6,240 × $77.76) per year.

[5] This figure reflects five percent of all requests, net of the estimated one percent of all requests that might initially be made by mail. That is, 0.05 × (34,000,000 − 340,000) = 1,683,000.

[6] This figure includes both the estimated 1% of 34 million requests that will be made by mail each year (340,000), and the estimated 1,683,000 requests initially made over the internet or telephone that will be redirected to the mail process (*see supra* note 5).

[7] *See Occupational Employment and Wages—May 2020,* Table 1, *available at https://www.bls.gov/news.release/pdf/ocwage.pdf* (Office and administrative support workers, all others).

[8] *See supra* notes 2 and 4.

[9] This consists of an estimated $8,323,200 for automated telephone cost ($1.36 per request × 6.12 million requests) and an estimated $4,131,000 ($0.15 per request × 27.54 million requests) for internet web service cost. Per unit cost estimates are based on staff's knowledge of the industry.

of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of maintaining records and providing disclosures to consumers. All comments must be received on or before January 18, 2022.

You can file a comment online or on paper. For the FTC to consider your comment, we must receive it on or before January 18, 2022. Write ''Regulation V, subpart N; PRA Comment: FTC File No. P072108'' on your comment. Your comment—including your name and your state—will be placed on the public record of this proceeding, including the *https://www.regulations.gov* website.

Due to the public health emergency in response to the COVID–19 outbreak and the agency's heightened security screening, postal mail addressed to the Commission will be subject to delay. We encourage you to submit your comments online through the *https://www.regulations.gov* website.

If you prefer to file your comment on paper, write ''Regulation V, subpart N; PRA Comment: FTC File No. P072108'' on your comment and on the envelope, and mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW, Suite CC–5610 (Annex J), Washington, DC 20580; or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Constitution Center, 400 7th Street SW, 5th Floor, Suite 5610 (Annex J), Washington, DC 20024. If possible, submit your paper comment to the Commission by courier or overnight service.

Because your comment will become publicly available at *https://www.regulations.gov,* you are solely responsible for making sure that your comment does not include any sensitive or confidential information. In particular, your comment should not include any sensitive personal information, such as your or anyone else's Social Security number; date of birth; driver's license number or other state identification number, or foreign country equivalent; passport number; financial account number; or credit or debit card number. You are also solely responsible for making sure that your comment does not include any sensitive health information, such as medical records or other individually identifiable health information. In addition, your comment should not include any ''trade secret or any commercial or financial information which . . . . is privileged or confidential'' —as provided by Section 6(f) of the FTC Act, 15 U.S.C. 46(f), and FTC Rule 4.10(a)(2), 16 CFR 4.10(a)(2) —including in particular competitively sensitive information such as costs, sales statistics, inventories, formulas, patterns, devices, manufacturing processes, or customer names.

Comments containing material for which confidential treatment is requested must be filed in paper form, must be clearly labeled ''Confidential,'' and must comply with FTC Rule 4.9(c). In particular, the written request for confidential treatment that accompanies the comment must include the factual and legal basis for the request and must identify the specific portions of the comment to be withheld from the public record. *See* FTC Rule 4.9(c). Your comment will be kept confidential only if the General Counsel grants your request in accordance with the law and the public interest. Once your comment has been posted publicly at *www.regulations.gov,* we cannot redact or remove your comment unless you submit a confidentiality request that meets the requirements for such treatment under FTC Rule 4.9(c), and the General Counsel grants that request.

The FTC Act and other laws that the Commission administers permit the collection of public comments to consider and use in this proceeding, as appropriate. The Commission will consider all timely and responsive public comments that it receives on or before January 18, 2022. For information on the Commission's privacy policy, including routine uses permitted by the Privacy Act, see *https://www.ftc.gov/site-information/privacy-policy.*

Josephine Liu,

Assistant General Counsel for Legal Counsel.

BILLING CODE 6750–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Healthcare Research and Quality

Meeting for Software Developers on the Common Formats for Patient Safety Data Collection

AGENCY: Agency for Healthcare Research and Quality (AHRQ), Department of Health and Human Services (HHS).

ACTION: Notice of public meeting.

SUMMARY: AHRQ coordinates the development of sets of standardized definitions and formats (Common Formats) that make it possible to collect, aggregate, and analyze uniformly structured information about health care quality and patient safety for local, regional, and national learning. The Common Formats include technical specifications to facilitate the collection of electronically comparable data by Patient Safety Organizations (PSOs) and other entities. Additional information about the Common Formats can be obtained through AHRQ's PSO website at *https://pso.ahrq.gov/common-formats* and the PSO Privacy Protection Center's website at *https://www.psoppc.org/psoppc_web/publicpages/commonFormatsOverview.*

The purpose of this notice is to announce a meeting to discuss implementation of the Common Formats with software developers and other interested parties. This meeting is designed as an interactive forum where software developers can provide input on use of the formats. AHRQ especially requests participation by and input from those entities which have used AHRQ's technical specifications and implemented, or plan to implement, the Common Formats electronically.

DATES: The meeting will be held from 1:00 to 3:30PM Eastern on Thursday, December 16th, 2021.

ADDRESSES: The meeting will be held virtually.

FOR FURTHER INFORMATION CONTACT: Dr. Hamid Jalal, Medical Officer, Center for Quality Improvement and Patient Safety, AHRQ, 5600 Fishers Lane, Rockville, MD 20857; Telephone (toll free): (866) 403–3697; Telephone (local): (301) 427–1111; TTY (toll free): (866) 438–7231; TTY (local): (301) 427–1130; Email: *pso@ahrq.hhs.gov.*

SUPPLEMENTARY INFORMATION:

Background

The Patient Safety and Quality Improvement Act of 2005, 42 U.S.C. 299b–21 to 299b–26 (Patient Safety Act), and the related Patient Safety and Quality Improvement Final Rule, 42 CFR part 3 (Patient Safety Rule), published in the **Federal Register** on November 21, 2008, 73 FR 70731–70814, provide for the Federal listing of Patient Safety Organizations (PSOs), which collect, aggregate, and analyze confidential information (patient safety work product) regarding the quality and safety of health care delivery.

The Patient Safety Act requires PSOs, to the extent practical and appropriate, to collect patient safety work product from providers in a standardized manner that permits valid comparisons of similar cases among similar providers. (42 U.S.C. 299b–24(b)(1)(F)).

The Patient Safety Act also authorizes the development of data standards, known as the Common Formats, to facilitate the aggregation and analysis of non-identifiable patient safety data collected by PSOs and reported to the network of patient safety databases (NPSD). (42 U.S.C. 299b–23(b)). The Patient Safety Act and Patient Safety Rule can be accessed at: *http://www.pso.ahrq.gov/legislation/.*

AHRQ has issued Common Formats for Event Reporting for three settings of care—hospitals, nursing homes, and community pharmacies. As part of the agency's efforts to improve diagnostic safety and quality in healthcare, AHRQ is in the process of developing Common Formats for Event Reporting—Diagnostic Safety (CFER–DS). The CFER–DS is intended to help healthcare providers identify and report missed opportunities in the diagnostic process in a standardized manner across healthcare settings and specialties. Widespread use of the CFER–DS will make it possible to collect, aggregate, and analyze diagnostic safety-related information from healthcare providers across the country, which in turn can accelerate learning in this vital area of patient safety. Public comment has been received on a version 0.1 of the CFER–DS, and an Expert Panel convened by the National Quality Forum (NQF) is currently in the process of reviewing the public comments and providing feedback to AHRQ.

Federally listed PSOs can meet the requirement to collect patient safety work product in a standardized manner to the extent practical and appropriate by using AHRQ's Common Formats. The Common Formats are also available in the public domain to encourage their widespread adoption. An entity does not need to be listed as a PSO or working with one to use the Common Formats. However, the Federal privilege and confidentiality protections only apply to information developed as patient safety work product by providers and PSOs working under the Patient Safety Act.

Each version of the Common Formats is released with accompanying technical specifications, intended to provide direction to software developers and to PSOs that plan to submit data to the Patient Safety Organization Privacy Protection Center (PSOPPC) to ensure non-identification for transmission to the NPSD. For existing Common Formats for Event Reporting, technical specifications include the following:

- Data dictionary—defines data elements and their attributes (data element name, answer values, field length, guide for use, etc.) included in Common Formats;
- Clinical document architecture (CDA) implementation guide—provides instructions for developing a file to transmit the data from the PSO to the PSOPPC using the Common Formats;
- Validation rules and errors document—specifies and defines the validation rules that will be applied to the Common Formats data elements submitted to the PSOPPC;
- Common Formats flow charts—diagrams the valid paths to complete the formats (a complete event report);
- Local specifications—provides specifications for processing, linking, and reporting on events and details specifications for reports; and
- Metadata registry—includes descriptive facts about information contained in the data dictionary to illustrate how such data corresponds with similar data elements used by other Federal agencies and standards development organizations (*e.g.,* HL—7, International Standards Organization (ISO)).

Agenda, Registration, and Other Information About the Meeting

The December 16, 2021 meeting will be an interactive forum designed to allow meeting participants not only to provide input but also to respond to the input provided by others. The meeting agenda will include: An update of Federal efforts related to the PSO Program and Common Formats; discussion of the CFER–DS, including requesting feedback on planned technical support materials and general integration/implementation; and, planning for future meetings, including discussing potential topics of interest for regular future meetings with software developers. AHRQ requests that interested persons send an email to *SDMeetings@infinityconferences.com* for registration information. Before the meeting, an agenda and logistical information will be provided to registrants. Prior to the meeting, AHRQ invites review of the CFER–DS which can be accessed through NQF's website at *https://www.qualityforum.org/Common_Formats_for_Patient_Safety_Data.aspx.*

Dated: November 9, 2021.

Marquita Cullom,

Associate Director.

BILLING CODE 4160–90–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Toxic Substances and Disease Registry

[60 Day–2–0059; Docket No. ATSDR–2021–0008]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Agency for Toxic Substances and Disease Registry (ATSDR), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Agency for Toxic Substances and Disease Registry (ATSDR), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies the opportunity to comment on a proposed and/or continuing information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled Per-or-Polyfluoroalkyl Substances Exposure Assessments (PFAS EAs). This Revision information collection request (ICR) will allow ATSDR/NCEH to continue to conduct additional Exposure Assessments (EAs) that may be requested at military or non-military installations.

DATES: ATSDR must receive written comments on or before January 18, 2022.

ADDRESSES: You may submit comments, identified by Docket No. ATSDR–2021–0008 by any of the following methods:

- *Federal eRulemaking Portal: Regulations.gov*. Follow the instructions for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. ATSDR will post, without change, all relevant comments to *Regulations.gov*.

Please note: *Submit all comments through the Federal eRulemaking portal (regulations.gov) or by U.S. mail to the address listed above.*

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office,

Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329; phone: 404–639–7118; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected;
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses; and
5. Assess information collection costs.

Proposed Project

Per- or Polyfluoroalkyl Substances Exposure Assessments (PFAS EAs) (OMB Control No. 0923–0059, Exp. 06/30/2022)—Revision—Agency for Toxic Substances and Disease Registry (ATSDR).

Background and Brief Description

Per-or-polyfluoroalkyl substances (PFAS) are contaminants that have gained national prominence over the last decade. PFAS are a large group of man-made chemicals that have been used in industry and consumer products worldwide since the 1950s. Although some PFAS are no longer produced in the United States, many remain in the environment and may impact people's health.

The Agency for Toxic Substances and Disease Registry (ATSDR) and the National Center for Environmental Health (NCEH) are requesting a three-year revision information collection request (ICR) to continue to conduct PFAS exposure assessments (EAs) at both military or non-military locations known to have PFAS in drinking water, groundwater, or any other sources of water. Previously, ATSDR was approved to conduct up to five EAs per year, for which the agency completed a total of eight. Currently, ATSDR is seeking approval to conduct up to three EAs per year for a maximum of seven additional locations.

Originally authorized under the National Defense Authorization Act (NDAA) of 2018, ATSDR is also mandated under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), commonly known as the ''Superfund'' Act, as amended by the Superfund Amendments and Reauthorization Act (SARA) of 1986, to prevent or mitigate adverse human health effects and diminished quality of life resulting from the exposure to hazardous substances in the environment. NCEH can conduct EAs under the authority of Section 301 of the Public Health Service Act (42 U.S.C. 241).

The PFAS EAs are conducted using statistical sampling to produce unbiased estimates of exposure to PFAS in communities living on or near the chosen current or former military installations. The number of respondents per EA will vary, but we expect the number to be approximately 395, and to be determined by specific statistical methods.

The time burden associated with the EAs include the following collections:

- *Community Event Evaluation Survey:* ATSDR/NCEH will hold a public meeting prior to the start of the EA and attendees will be asked to complete a five minute Community Event Evaluation Survey. It is assumed that 163 of the 250 attendees will complete the survey at each EA site, resulting in a burden of 41 hours for three EAs.
- *Household Eligibility Screener:* ATSDR/NCEH anticipates asking approximately 269 adults in each household at each EA site to complete a five minute telephone script, resulting in a burden of 66 hours for three EAs.
- *Estimation of Number of EA Respondents by Age Group:* Based on the criteria in the Household Recruitment Phone Script, 149 households are assumed to provide the target sample size of 395 respondents at each EA site, with a total of 1,185 respondents for three EAs. Based on 2017 Census estimates of average household size (2.5), and number of adults (1.9), and children under 18 years of age (0.6) in the household, we are able to estimate the annual number of respondents by age group as the following for three EAs: 900 adults ≥18 years and 284 children (165 aged 3–11 years and 119 aged 12–17 years).
- *Biological Testing Tracking:* All of the EAs use biological sampling for PFAS (blood and urine). A biological testing tracking form for the testing event will be provided to ensure that all appropriate forms are completed and all biological samples are collected. The testing will take 20 minutes, resulting in a burden of 395 hours annually for three EAs.
- *Adult Consent for Biological Testing:* 300 adults at each EA site will be administered a 10-minute consent form for testing of blood and urine for PFAS, resulting in a burden of 150 hours annually for three EAs.
- *Parental Permission Form for Biological Testing:* A parental permission form will be administered to the parents of 284 children aged 3–17 years for testing of blood and urine. The parental permission form will take 10 minutes resulting in a burden of 47 hours annually for three EAs.
- *Child Assent Form for Biological Testing:* Children aged 12–17 years (119) will assent to the testing of blood and urine for PFAS. The child assent form will take approximately 10 minutes, resulting in a burden of 20 hours annually for three EAs.
- *Adult Exposure Questionnaire for Biological and Environmental Testing:* 300 adults at each EA site will be administered an exposure questionnaire. The time associated with administering the questionnaire and completing the biological sampling is approximately 30 minutes, resulting in a burden of 450 hours annually for three EAs.
- *Parent Proxy for Child Exposure Questionnaire for Biological Testing:* 165 parents will respond to the 15-minute questionnaire for their children, 3–11 years, resulting in a burden of 41 hours annually for three EAs.
- *Child Exposure Questionnaire for Biological Testing:* Annually, 119 children will respond to the 15-minute child questionnaire for themselves (age 12–17 years), resulting in a burden of 30 hours annually for three EAs.
- *Household Recruitment Script for Environmental Testing:* ATSDR/NCEH will administer a five minute environmental recruitment script to 69 heads of households, resulting in a burden of six hours annually for three EAs.

• *Consent for Environmental Testing:* ATSDR/NCEH will obtain consent to test 10% of EA households for tap water and indoor dust samples using a 10-minute consent form for an annual total of 45 households, resulting in burden of eight hours annually for three EAs.

Environmental Sample Collection: ATSDR/NCEH will complete sampling at 45 households for three EAs deemed eligible for the EA for testing of tap water and indoor dust samples. The sampling will take 30 minutes, for an estimated burden of 23 hours annually for three EAs.

ATSDR estimates the annualized time burden is 1,277 hours. Participation is voluntary, and there are no costs to participants other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden hours
EA Community Members	Community Event Evaluation Survey	489	1	5/60	41
EA Participants (all ages)	Biological Testing Tracking	1,185	1	20/60	395
EA Adults	Household Eligibility Screener	807	1	5/60	66
	Consent	900	1	10/60	150
	Exposure Questionnaire (Adult) for Biological and Environmental Testing.	900	1	30/60	450
EA Parents	Parental Permission	284	1	10/60	47
	Exposure Questionnaire (Child) for Biological Testing (Parent Proxy).	165	1	15/60	41
EA Children	Assent	119	1	10/60	20
	Exposure Questionnaire (Child) for Biological Testing (Child completed).	119	1	15/60	30
EA Heads-of-Households	Household Recruitment Script for Environmental Sampling.	69	1	5/60	6
	Environmental Sampling Consent Form	45	1	10/60	8
	Environmental Sample Collection Form	45	1	30/60	23
Total					1,277

BILLING CODE 4163–70–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Toxic Substances and Disease Registry

[30Day–22–0047]

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Agency for Toxic Substances and Disease Registry (ATSDR) has submitted the information collection request titled ''Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery'' to the Office of Management and Budget (OMB) for review and approval. ATSDR previously published a ''Proposed Data Collection Submitted for Public Comment and Recommendations'' notice on March 26, 2021, to obtain comments from the public and affected agencies. ATSDR did not receive comments related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

ATSDR will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery (OMB Control No. 0923–0047, Exp. 01/31/2022)—Extension—Agency for Toxic Substances and Disease Registry (ATSDR).

Background and Brief Description

The information collection activity provides a means to garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Federal government's commitment to improving service delivery. By qualitative feedback we mean information that provides

useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study.

This feedback will provide insights into customer or stakeholder perceptions, experiences, and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative, and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

The solicitation of feedback will target areas such as: Timeliness, appropriateness, accuracy of information, courtesy, efficiency of service delivery, and resolution of issues with service delivery. Responses will be assessed to plan and inform efforts to improve or maintain the quality of service offered to the public. If this information is not collected, vital feedback from customers and stakeholders on the Agency's services will be unavailable.

ATSDR will only submit a collection for approval under this generic clearance if it meets the following conditions:

- The collections are voluntary;
- The collections are low-burden for respondents (based on considerations of total burden hours, total number of respondents, or burden-hours per respondent) and are low-cost for both the respondents and the Federal Government;
- The collections are noncontroversial and do not raise issues of concern to other Federal agencies;
- Any collection is targeted to the solicitation of opinions from respondents who have experience with the program or may have experience with the program in the near future;
- Personally identifiable information (PII) is collected only to the extent necessary and is not retained;
- Information gathered is intended to be used only internally for general service improvement and program management purposes and is not intended for release outside of the agency (if released, the agency must indicate the qualitative nature of the information);
- Information gathered will not be used for the purpose of substantially informing influential policy decisions; and
- Information gathered will yield qualitative information; the collections will not be designed or expected to yield statistically reliable results or used as though the results are generalizable to the population of study.

Feedback collected under this generic clearance provides useful information, but it does not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: The target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential nonresponse bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior to fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

As a general matter, information collections will not result in any new system of records containing privacy information and will not ask questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private.

This is an extension of the previously approved collection. There is no cost to respondents other than their time. The total estimated annualized burden is 7,075 hours.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Type of collection	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
Individuals and Households; Businesses and Organizations; State, Local, or Tribal Government.	Small discussion groups	300	1	90/60
	Request for customer comment cards/complaint forms/post-conference or training surveys.	1,500	1	15/60
	Focus groups of customers, potential customers, delivery partners, or other stakeholders.	2,000	1	2
	Qualitative customer satisfaction surveys or interviews.	3,000	1	30/60
	Usability testing/in-person observation testing	1,500	1	30/60

Jeffrey M. Zirger,

Lead, Information Collection Review Office, Office of Scientific Integrity, Office of Science, Centers for Disease Control and Prevention.

BILLING CODE 4163–70–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[30Day–22–1046]

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled National Breast and Cervical Cancer Early Detection Program (NBCCEDP) Monitoring Activities to the Office of Management and Budget (OMB) for review and approval. CDC previously published a ''Proposed Data Collection Submitted for Public Comment and Recommendations'' notice on July 26, 2021 to obtain comments from the public and affected agencies. CDC received one non-substantive comment related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

National Breast and Cervical Cancer Early Detection Program (NBCCEDP) Monitoring Activities—(OMB Control No. 0920–1046, Exp. 11/30/2021)—Revision—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

CDC is requesting a Revision of the Information Collection Request (ICR) titled National Breast and Cervical Cancer Early Detection Program (NBCCEDP) Monitoring Activities (OMB Control No. 0920–1046). In the previous OMB approval period, information collection consisted of an annual NBCCEDP survey and clinic-level data collection. In the next OMB approval period, information collection will consist of a revised NBCCEDP survey, revised clinic-level data collection, new quarterly program update, new service delivery projection worksheet, and the addition of previously approved minimum data elements (MDEs; OMB Control No. 0920–0571, Exp. 03/31/2022) to increase efficiency. The number of respondents will remain the same and the total estimated annualized burden will increase from 683 to 1,228.

Breast and cervical cancers are prevalent among U.S. women. Evidence shows that deaths from both breast and cervical cancers can be avoided by increasing screening services—mammography and pap tests—among women. However, screening is typically underutilized among women who are under- or uninsured, have no regular source of healthcare, or who recently immigrated to the U.S. To improve access to cancer screening, Congress passed the Breast and Cervical Cancer Mortality Prevention Act of 1990 (Pub. L. 106–354) which directed CDC to create the National Breast and Cervical Cancer Early Detection Program (NBCCEDP). The NBCCEDP currently provides funding to 70 awardees under ''Cancer Prevention and Control Programs for State, Territorial, and Tribal Organizations (DP17–1701).'' The purpose of NBCCEDP is to increase breast and cervical cancer screening rates among women residing within defined geographical locations (as determined by the funded program) who are at or below 250% of the federal poverty level; aged 40–64 years for breast cancer services, and aged 21–64 years for cervical cancer services; and under- or uninsured.

In 2022, CDC will issue a new Notice of Funding Opportunity (DP22–2202) to continue this mission. Consistent with programmatic changes, the information collection plan has also been redesigned to update existing and add new data collection instruments and integrate the previously approved MDEs into this single approval package to increase efficiency of information collection for the NBCCEDP.

CDC proposes five forms of information collection. First, the NBCCEDP Survey will be submitted to CDC annually and collects information to monitor awardees' TA needs, partnerships, screening delivery, EBI implementation, and COVID–19 impact. Minor revisions to survey questions, response options, and formatting will be included under DP22–2202. Second, clinic-level data will be submitted to CDC at baseline and annually for all partnering health system clinic sites—an estimated six clinics per awardee for breast cancer data and six clinics per awardee for cervical cancer data. Clinic-level data includes health system, clinic, and patient population characteristics; monitoring and quality improvement activities; EBI implementation; COVID–19 impact, and baseline or annual screening rates. Minor revisions were made to variable wording, formatting (*e.g.,* split or combined variables), and response options to improve data quality. Third, the Quarterly Program Update (QPU) will be submitted to CDC four times per year to monitor award spending, service delivery, staff vacancies, and program accomplishments and challenges. This is a new information collection. Fourth, the Service Delivery Projection Worksheet will be submitted to CDC annually to report the estimated number of women to be served for breast and cervical cancer. Finally, the Minimum Data Elements (MDEs) will be submitted to CDC twice per year to monitor patient demographics; breast and cervical cancer screening, diagnosis, and treatment; timeliness of services; and patient navigation. This information collection was previously approved (OMB Control No. 0920–0571, Exp. 03/30/2022) and will now be incorporated into this OMB approved package for increased efficiency for NBCCEDP information collection efforts.

This revised information collection will allow CDC to provide routine monitoring feedback to awardees based on their data submissions, tailor technical assistance (TA) as needed, support program planning, and assess program outcomes. OMB approval is requested for three years. Participation is required for NBCCEDP awardees. There are no costs to respondents other than their time. The total estimated annual burden is 1,228 hours.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hrs)
NBCCEDP Awardees	Annual NBCCEDP Survey	70	1	56/60
	NBCCEDP Clinic-level Information Collection Instrument—Breast.	70	6	45/60
	NBCCEDP Clinic-level Information Collection Instrument—Cervical.	70	6	45/60
	Quarterly Program Update	70	4	32/60
	Service Delivery Projection Worksheet	70	1	29/60
	MDEs	70	2	150/60

Jeffrey M. Zirger,

Lead, Information Collection Review Office, Office of Scientific Integrity, Office of Science, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–22–1105; Docket No. CDC–2021–0117]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies the opportunity to comment on a proposed and/or continuing information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled the One Health Harmful Algal Bloom System (OHHABS). OHHABS is a surveillance platform which captures data on harmful algal bloom (HAB) events and HAB-associated illnesses.

DATES: CDC must receive written comments on or before January 18, 2022.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2021–0117 by any of the following methods:

- *Federal eRulemaking Portal: Regulations.gov*. Follow the instructions for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to *Regulations.gov*.

Please note: Submit all comments through the Federal eRulemaking portal (regulations.gov) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329; phone: 404–639–7570; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected;
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses; and
5. Assess information collection costs.

Proposed Project

One Health Harmful Algal Bloom System (OHHABS) (OMB Control No. 0920–1105, Exp. 3/31/2022)—Revision—National Center for Emerging and Zoonotic Infectious Diseases (NCEZID), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Algal toxins from harmful algal blooms (HABs) include some of the most potent natural chemicals. These toxins can contaminate surface water used for recreation and drinking, as well as food sources, and HABs pose a threat to both humans and animals. Because animal illness may be an indicator of bloom toxicity, it is necessary to provide a One Health approach for reporting HAB-associated illnesses and events.

The One Health Harmful Algal Bloom System (OHHABS) was approved for data collection in 2016 and collects data on harmful algal blooms (HABs) and human and animal illnesses related to HAB exposures to support the understanding of HABs and the prevention of HAB-associated illnesses. As such, OHHABS is a centralized data source for voluntary public health surveillance of HAB events and HAB-associated illnesses using a One Health approach that takes into consideration information from the environment, animal cases, and human cases.

CDC requests OMB approval for an estimated 76 annual burden hours. There are no costs to respondents other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
OHHABS State Reporting Sites.	One Health Harmful Algal Bloom System (OHHABS) (electronic, year-round).	57	4	20/60	80/60
Total	.....	.....	.....	.....	76

[30Day–22–0920]

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled ''*Data Collection Through Web Based Surveys for Evaluating Act Against AIDS Social Marketing Campaign Phases Targeting Consumers,*'' to the Office of Management and Budget (OMB) for review and approval. CDC previously published a ''Proposed Data Collection Submitted for Public Comment and Recommendations'' notice on September 7, 2021 to obtain comments from the public and affected agencies. CDC received one comment related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

Data Collection Through Web Based Surveys for Evaluating Act Against AIDS Social Marketing Campaign Phases Targeting Consumers (OMB Control No. 0920–0920, Exp. 11/30/2021)—Extension—National Center for HIV/AIDS, Viral Hepatitis, STD and TB Prevention (NCHHSTP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

In response to the continued HIV epidemic in our country, CDC launched the Let's Stop HIV Together campaign (formerly known as Act Against AIDS), a multifaceted communication campaign to reduce HIV incidence in the United States in 2009. CDC has released the campaign in phases, with some of the phases running concurrently. Each phase of the campaign uses mass media and direct-to-consumer channels to deliver messages. Some campaigns provide basic education and increase awareness of HIV/AIDS among the general public, whereas others emphasize HIV prevention and testing among specific subgroups or communities at greatest risk of infection. CDC will also develop new messages to address changes in prevention science and subpopulations affected by HIV. The proposed study will assess the effectiveness of these social marketing messages aimed at increasing HIV/AIDS awareness, increasing prevention behaviors, and improving HIV testing rates among consumers.

This Extension of an ongoing study will allow for continued evaluation of the effectiveness of Let's Stop HIV Together social marketing campaign through surveys with consumers. A total of 6,445 respondents were approved for the previously renewed Generic ICR (0920–0920) in 2018, and since the approval date, 1,000 respondents were surveyed under the GenIC, ''Development of Messages for the Let's Stop HIV Together National Campaign''. The information collected from this survey was used to evaluate the acceptability and potential effectiveness of proposed concepts, messages, and taglines for a component of the Let's

Stop HIV Together campaign focused on HIV prevention that promotes proven, effective prevention strategies, such as pre-exposure prophylaxis (PrEP) and treatment as prevention (TasP). We are requesting a one-year extension to continue surveying target audiences.

Through this extension, we plan to reach the remaining approved 5,445 respondents. To obtain the remaining respondents, we anticipate screening approximately 30,880 individuals. Depending on the target audience for the campaign phase, the study screener will vary. The study screener may address one or more of the following items: Race/ethnicity, sexual behavior, sexual orientation, gender identity, HIV testing history, HIV status, and injection drug use. Each survey will have a core set of items asked in all rounds, as well as a module of questions relating to specific Let's Stop HIV Together phases and activities.

Respondents will be recruited through national opt-in email lists, the internet, and external partnerships with community-based and membership organizations that work with or represent individuals from targeted populations (*e.g.,* National Urban League, the National Medical Association). Respondents will self-administer the survey at home on personal computers. The annual response burden is estimated at 3,751 hours. There is no cost to the respondents other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hr)
Individuals (male and female) aged 18 years and older	Study Screener	30,880	1	2/60
	Survey Module	5,445	1	30/60

Centers for Disease Control and Prevention

[60Day–22–1318; Docket No. CDC–2021–0124]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies the opportunity to comment on a proposed and/or continuing information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled Requirement for Negative Pre-Departure COVID–19 Test Result or Documentation of Recovery from COVID–19 For All Airline or Other Aircraft Passengers Arriving into the United States from any Foreign Country and Requirement for Proof of COVID–19 Vaccination for Noncitizen, Nonimmigrant Air Passengers Arriving Into The United States From A Foreign Country. This proposed information collection is designed to ensure that CDC complies with Orders published October 25 and October 30, 2021, and to confirm that passengers who are coming into the United States via air travel have tested negative for or recently recovered from COVID–19, and that noncitizen, nonimmigrant passengers are fully vaccinated against COVID–19.

DATES: CDC must receive written comments on or before January 18, 2022.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2021–0124 by any of the following methods:

- *Federal eRulemaking Portal: Regulations.gov*. Follow the instructions for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to *Regulations.gov*.

Please note: Submit all comments through the Federal eRulemaking portal (*regulations.gov*) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329; phone: 404–639–7570; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected;

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology,

e.g., permitting electronic submissions of responses; and

5. Assess information collection costs.

Proposed Project

Requirement for Negative Pre-Departure COVID–19 Test Result or Documentation of Recovery from COVID–19 For All Airline or Other Aircraft Passengers Arriving into the United States from any Foreign Country and Requirement for Proof of COVID–19 Vaccination for Noncitizen, Nonimmigrant AirPassengers Arriving Into The United States From A Foreign Country (OMB Control No. 0920–1318, Exp. 5/31/2022)—Revision—National Center for Emerging and Zoonotic Infectious Diseases (NCEZID), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Since January 2020, the respiratory disease known as ''COVID–19,'' caused by a novel coronavirus (SARS–CoV–2), has spread globally, including cases reported in all 50 states within the United States, plus the District of Columbia and all U.S. territories. As of October 22,2021, there have been over 242,000,000 million cases of COVID–19 globally, resulting in over 4,900,000 deaths. More than 45,000,000 cases have been identified in the United States, with new cases reported daily, and over 733,000 deaths have been attributed to the disease. Many countries have begun widespread vaccine administration; however, 98 countries continue to experience high or substantial incidence rates (>50 cases per 100,000 people in the last seven days) and 65 countries, including the United States, are experiencing a high incidence of reported new cases at this time.[19]

SARS–CoV–2 spreads mainly from person-to-person through respiratory fluids released during exhalation, such as when an infected person coughs, sneezes, or talks. Exposure to these respiratory fluids occurs in three principal ways: (1) Inhalation of very fine respiratory droplets and aerosol particles, (2) deposition of respiratory droplets and particles on exposed mucous membranes in the mouth, nose, or eye by direct splashes and sprays, and (3) touching mucous membranes with hands that have been soiled either directly by virus-containing respiratory fluids or indirectly by touching surfaces with virus on them. Spread is more likely when people are in close contact with one another (within about 6 feet), especially in crowded or poorly ventilated indoor settings. Persons who are not fully vaccinated, including those with asymptomatic or pre-symptomatic infections, are significant contributors to community SARS–CoV–2 transmission and occurrence of COVID–19. New variants of SARS-CoV–2 have emerged globally, several of which have been identified as variants of concern, including the Delta variant. Some variants are more transmissible and some may cause more severe disease, which can lead to more hospitalizations, and deaths among infected individuals.

On October 25, 2021 CDC amended its January 25, 2021 Order, titled, ''*Requirement for Proof of Negative COVID–19 Test or Recovery from COVID–19 for All Air Passengers Arriving in the United States.*'' This amendment updates COVID–19 testing requirements for air passengers two years or older boarding a flight to the United States, depending on COVID–19 vaccination status. Those who are fully vaccinated will need to provide a negative pre-departure COVID–19 test conducted with a specimen no more than 3 days before travel to the US, as well as proof of being fully vaccinated. While those who are not fully vaccinated will need to provide a negative pre-departure COVID–19 test conducted with a specimen no more than one day of before travel to the U.S.

The Order requiring a negative COVID–19 test or documentation of recovery has a list of categorical exemptions that would not be subject to this information collection. These include, crew members of airlines or other aircraft operators who follow industry standard protocols for the prevention of COVID–19; airlines or other aircraft operators transporting passengers with COVID–19 pursuant to CDC authorization and in accordance with CDC guidance; U.S. federal law enforcement personnel on official orders; U.S. military personnel, including civilian employees, dependents, contractors, and other U.S. government employees when traveling on U.S. military assets; and any person who may apply and receive a time limited exemption for urgent humanitarian reasons.

Also on October 25, 2021, President Biden issued a Proclamation ''*Advancing Safe Resumption of Global Travel During the COVID–19 Pandemic*''. This Proclamation allowed CDC to issue an *Order Implementing Proclamation on Advancing Safe Resumption of Global Travel During the COVID–19 Pandemic* on October 25, 2021, followed by an amendment on October 30, 2021 which provided minimal updates and superseded the October 25, 2021 Order.

This Proclamation and Order will only apply to noncitizen, nonimmigrants. It will not apply to any person who is a U.S. citizen, U.S. national, lawful permanent resident, or immigrant. The Proclamation also does not apply to crew members of airlines or other aircraft operators if they follow industry standard protocols for the prevention of COVID–19. Some noncitizen, nonimmigrants who are not fully vaccinated, as defined by the Order, may fall into a category that allows them to be excepted to the requirement if they can present to an airline or aircraft operator that they meet the criteria for that category, such as letters confirming registration in a vaccine clinical trial, or U.S. military identification.

For information collection activities associated with these Orders, CDC requests OMB approval for an estimated 352,538,030 annual burden hours.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Air Passenger	Section 1 of Combined Passenger Disclosure and Attestation to the United States of America.	123,000,000	1	2	246,000,000
Noncitizen Nonimmigrant Air Passenger.	Section 2 of Combined Passenger Disclosure and Attestation to the United States of America.	90,000,000	1	1	90,000,000

ESTIMATED ANNUALIZED BURDEN HOURS—Continued

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Airline Desk Agent	Combined Passenger Disclosure and Attestation to the United States of America.	123,000,000	1	8/60	16,400,000
Air Passenger	Request Humanitarian Exemption to COVID–19 Test or Documentation of Recovery.	600	1	2	1,000
Noncitizen Nonimmigrant Air Passenger.	Request Humanitarian or Emergency Exception to Proof of Vaccination Requirement.	600	1	2	1,000
Air Passenger *(undergoing compliance check).*	Questions Asked to Air Passengers Going Through Compliance Checks.	1,230,000	1	5/60	102,500
Air Passenger *(undergoing compliance check with non-compliant documentation).*	Air Travel Illness or Death Investigation or Traveler Follow-up Form.	7,380	1	10/60	1,230
Noncitizen Nonimmigrant Air Passenger *(undergoing compliance check and using humanitarian or emergency exception).*	Air Travel Illness or Death Investigation or Traveler Follow-up Form.	190,000	1	10/60	31,667
Air Traveler *(for illness or death investigation).*	Air Travel Illness or Death Investigation or Traveler Follow-up Form.	1,700	1	15/60	425
Returned Inadmissible Passenger	Contact information collection for public health follow up.	835	1	5/60	70
Airline Representative	Contact information collection for public health follow up.	835	1	10/60	139
Total					352,538,030

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Submission for OMB Review; Intergovernmental Reference Guide (IRG) (OMB No.: 0970–0209)

AGENCY: Office of Child Support Enforcement, Administration for Children and Families, HHS.

ACTION: Request for public comment.

SUMMARY: The Administration for Children and Families (ACF), Office of Child Support Enforcement (OCSE), is requesting the Office of Management and Budget (OMB) to approve the Intergovernmental Reference Guide (IRG), with content and organizational revisions, for an additional three years. The IRG contains state and tribal child support information that assists state and tribal child support enforcement (CSE) agencies administering their respective programs. The current OMB approval expires on January 31, 2022.

DATES: *Comments due within 30 days of publication.* OMB is required to make a decision concerning the collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent directly to the following: *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

SUPPLEMENTARY INFORMATION:

Description: The IRG is a centralized and automated repository of state and tribal profiles that contains high-level descriptions of each CSE program. These profiles provide state, tribal, and foreign country CSE agencies with an effective and efficient method for updating and accessing information needed to process intergovernmental child support cases. Fourteen comments received after the 60-day **Federal Register** publication and comment period have resulted in revisions to the proposed state profile to clarify the content and amend the organizational format. No comments were received regarding the proposed tribal profile organizational changes.

Respondents: State and Tribal Child Support Enforcement Agencies.

ANNUAL BURDEN ESTIMATES

Information collection instrument	Total number of annual respondents	Number of annual responses per respondent	Average annual burden hour per response	Annual burden hours
IRG: State Profile Guide(states and territories)	54	18	0.3	292
IRG: Tribal Profile Guide	62	18	0.3	335

Estimated Total Annual Burden Hours: 627.

Authority: 42 U.S.C. 652(a)(7); 42 U.S.C. 666(f); 45 CFR 301.1; 45 CFR 303.7; and 45 CFR 309.120.

Mary B. Jones,

ACF/OPRE Certifying Officer.

BILLING CODE 4184–41–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Submission for OMB Review; Head Start Family and Child Experiences Survey (FACES) (OMB #0970–0151)

AGENCY: Office of Planning, Research, and Evaluation, Administration for Children and Families, HHS.

ACTION: Request for public comment.

SUMMARY: The Office of Planning, Research, and Evaluation (OPRE), Administration for Children and Families (ACF), U.S. Department of Health and Human Services (HHS), is proposing to collect data for a new wave of the Head Start Family and Child Experiences Survey (FACES) as well as a follow-up to a special data collection fielded in the fall of 2021.

DATES: *Comments due within 30 days of publication.* OMB must make a decision about the collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

SUPPLEMENTARY INFORMATION:

Description: The purpose of the FACES data collection is to support the 2007 reauthorization of the Head Start program (Pub. L. 110–134), which calls for periodic assessments of Head Start's quality and effectiveness.

FACES 2019 focuses on Head Start Regions I through X (which are geographically based); AIAN (American Indian and Alaska Native) FACES 2019 focuses on Region XI (which funds Head Start programs that serve federally recognized American Indian and Alaska Native tribes). Both studies will provide data on a set of key indicators for Head Start programs. Information about the Head Start program recruitment and center selection processes and on the fall 2019, spring 2020, and fall 2021 data collection activities for both FACES and AIAN FACES can be found here: *https://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=202005-0970-009.*

This 30-day notice describes:

- The spring 2022 round of FACES program- and classroom-level data collection.
- A follow-up in spring 2022 of the fall 2021 FACES and AIAN FACES child-level data collection.

FACES spring 2022 data collection will take place in 180 Head Start programs nationwide. Of the 180 programs, 60 will have participated in fall data collection and 120 will be added to participate in classroom- and program-data collection only. AIAN FACES will continue in the same 22 programs that participated in 2019, 2020, and 2021 data collection. Data collection activities will include teacher sampling (for the 120 FACES programs not part of fall 2021), parent surveys, teacher child reports, staff surveys, and, for FACES, classroom observations.

In the additional 120 programs added to FACES in spring 2022, data collection will begin with sampling of FACES teachers in 240 Head Start centers. Study team members will request a list of all teachers working with Head Start-funded children.

As in fall 2021, for the spring 2022 follow-up data collection, FACES will survey the parents of 2,400 Head Start children in Regions I–X (FACES 2019) and 800 children in Region XI (AIAN FACES 2019) and ask their Head Start teachers to rate children's learning skills and social and emotional skills. Parents of sampled children (2,400 for FACES and 800 for AIAN FACES) will complete surveys on the web or by telephone about their children and family. In all 202 programs (180 for FACES and 22 for AIAN FACES), Head Start teachers will rate each sampled child (approximately 10 children per teacher) using the web or paper-and-pencil forms. Teachers, program directors, and center directors will also complete a survey, also using the web or paper-and-pencil forms, about themselves and the services and instruction at Head Start.

Respondents: Parents of Head Start children; Head Start staff.

ANNUAL BURDEN ESTIMATES

Instrument	Number of respondents (total over request period)	Number of responses per respondent (total over request period)	Average burden per response (in hours)	Total/annual burden (in hours)
FACES 2019 spring 2022 special teacher sampling form from Head Start staff	240	1	.17	41
FACES 2019 special Head Start parent survey	2,400	1	.58	1,392
FACES 2019 special Head Start teacher child report	240	10	.17	408
FACES 2019 Head Start teacher survey	720	1	.67	482
FACES 2019 Head Start center director survey	360	1	.58	209
FACES 2019 Head Start program director survey	180	1	.67	121
AIAN FACES 2019 special Head Start parent survey	800	1	.58	464
AIAN FACES 2019 special Head Start teacher child report	90	9	.17	138
AIAN FACES 2019 Head Start teacher survey	90	1	.58	52
AIAN FACES 2019 Head Start center director survey	42	1	.50	21
AIAN FACES 2019 Head Start program director survey	22	1	.50	11

Estimated Total Annual Burden Hours: 3,339.

Authority: Section 640(a)(2)(D) and section 649 of the Improving Head Start for School Readiness Act of 2007.

Mary B. Jones,

ACF/OPRE Certifying Officer.

[FR Doc. 2021–24951 Filed 11–15–21; 8:45 am]

BILLING CODE 4184–22–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Community Living

Agency Information Collection Activities; Submission for OMB Review; Public Comment Request; Evidence Based Program Fidelity Surveys [OMB #0985–New]

AGENCY: Administration for Community Living, HHS.

ACTION: Notice.

SUMMARY: The Administration for Community Living is announcing that the proposed collection of information listed above has been submitted to the Office of Management and Budget (OMB) for review and clearance as required under section 506(c)(2)(A) of the Paperwork Reduction Act of 1995. This 30-Day notice collects comments on the information collection requirements related to the information collection requirements for the Evidence Based Program Fidelity Surveys [OMB #0985–New].

DATES: Submit written comments on the collection of information by December 16, 2021.

ADDRESSES: Submit written comments and recommendations for the proposed information collection within 30 days of publication of this notice online at *www.reginfo.gov/public/do/PRAMain.* Find the information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Written comments can also be submitted By mail to the Office of Information and Regulatory Affairs, OMB, New Executive Office Bldg., 725 17th St. NW, Rm. 10235, Washington, DC 20503, Attn: OMB Desk Officer for ACL.

FOR FURTHER INFORMATION CONTACT: Susan Jenkins, Administration for Community Living, Washington, DC 20201, 202–795–7369 or by email: *Susan.Jenkins@acl.hhs.gov.*

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, ACL has submitted the following proposed collection of information to OMB for review and clearance.

The Administration for Community Living (ACL) is requesting approval to collect data for the Evidence Based Program Fidelity Surveys [OMB #0985–New]. The Evidence Based Program Fidelity Surveys will be used by ACL to evaluate the fidelity with which ACL's grantee organizations, under the Older Americans Act, implement the required evidence-based programs. States that receive Older Americans Act funds under Title III–D are required to spend those funds on evidence-based programs to improve the health and well-being of their clients and to reduce disease and injury. Since 2003, the aging services network has been steadily moving towards wider implementation of disease prevention and health promotion programs that are based on scientific evidence and demonstrated to improve the health of older adults. The FY 2012 Congressional appropriations law included, for the first time, an evidence-based requirement related to Title III–D funds.

The results of this information collection will be used by ACL/AoA to:

- Effectively report its results to the President, to Congress, to the Department of Health and Human Services and to the public.
- Assess the effectiveness of ACL and its grantees in monitoring program fidelity.
- Aid in program refinement and continuous improvement.

Comments in Response to the 60-Day Federal Register Notice

A notice published in the **Federal Register** on, July 12, 2021 in 86 FR 13720. There were 0 public comments received during the 60-day FRN.

Estimated Program Burden:

ACL estimates the burden associated with this collection of information as follows:

Respondent/data collection activity	Number of respondents	Responses per respondent	Hours per response	Annual burden hours
Grantee: Program selection process and survey	103	1	2.00	206
Local Implementation Organization Survey	412	1	0.58	239
Total:	515	1	0.86	445

Dated: November 9, 2021.

Alison Barkoff,

Acting Administrator and Assistant Secretary for Aging.

BILLING CODE 4154–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–1992–N–0011]

Sanyasi Raju Kalidindi; Grant of Special Termination

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has issued an order under the Federal Food, Drug, and Cosmetic Act (FD&C Act) granting special termination of the debarment of Sanyasi Raju Kalidindi. FDA based the order on a finding that Dr. Kalidindi provided substantial assistance in the investigations or prosecutions of offenses relating to a matter under FDA's jurisdiction and that terminating Dr. Kalidindi's debarment served the interest of justice and protected the integrity of the drug approval process.

DATES: The order became effective September 15, 2021.

ADDRESSES: Comments should reference Docket No. FDA–1992–N–0011 and be sent to the Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Karena Cooper, Office of Scientific Integrity, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 1, Rm. 4218, Silver Spring, MD 20993, 301 796–1612.

SUPPLEMENTARY INFORMATION: In a **Federal Register** notice dated April 21, 1993 (58 FR 21470), FDA debarred Dr. Kalidindi from providing services in any capacity to a person with an approved or pending drug product

application under section 306(a) of the FD&C Act (21 U.S.C. 335a(a)). FDA based the debarment on a finding under section 306(a)(2) of the FD&C Act that Dr. Kalidindi had been convicted of a felony under Federal law for conduct relating to the development, or approval, of any drug product or otherwise relating to the regulation of a drug product.

Section 306(d)(4) of the FD&C Act provides that any individual debarred under section 306(a)(2) may apply to FDA for special termination of debarment. Pursuant to section 306(d)(4)(C)–(D), FDA may grant a request for special termination and limit the period of debarment to less than permanent but no less than 1 year if the Agency finds: (1) That the individual has provided substantial assistance in the investigations or prosecutions of offenses described in section 306(a) or (b) of the FD&C Act, or relating to any matter under the jurisdiction of FDA and (2) that doing so best serves the interest of justice and protects the integrity of the drug approval process.

On May 27, 1998, FDA denied a previous petition for special termination of debarment submitted by Dr. Kalidindi. On January 13, 2020, Dr. Kalidindi again petitioned for special termination of debarment under section 306(d)(4) of the FD&C Act. On April 10, 2020, FDA's Office of Regulatory Affairs proposed denying that petition and offered Dr. Kalidindi an opportunity to request a hearing on the proposal to deny the petition. On May 9, 2020, Dr. Kalidindi requested a hearing and, on June 8, 2020, submitted materials in support of his hearing request.

By a decision dated September 15, 2021, FDA's Chief Scientist granted Dr. Kalidindi's petition for special termination based on her conclusion that doing so best served the interest of justice and protected the integrity of the drug approval process. In so concluding, she found that there were no genuine and substantial issues of fact with respect to the level and scope of substantial assistance provided by Dr. Kalidindi in the investigation and prosecution of others for offenses described in section 306(a) or (b) of the FD&C Act, or otherwise relating to FDA's jurisdiction, and that the level and scope of such substantial assistance, among other considerations, justified special termination of his debarment after 28 years. The Chief Scientist's decision is available at *https://www.fda.gov/media/152270/download.* The decision is also available at *https://www.fda.gov/inspections-compliance-enforcement-and-criminal-investigations/fda-debarment-list-drug-product-applications/fda-expired-debarment-list-drug-product-applications.*

Dated: November 4, 2021.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket Nos. FDA–2020–E–2167 and FDA–2020–E–2168]

Determination of Regulatory Review Period for Purposes of Patent Extension; QINLOCK

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or the Agency) has determined the regulatory review period for QINLOCK and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of applications to the Director of the U.S. Patent and Trademark Office (USPTO), Department of Commerce, for the extension of a patent which claims that human drug product.

DATES: Anyone with knowledge that any of the dates as published (see the **SUPPLEMENTARY INFORMATION** section) are incorrect may submit either electronic or written comments and ask for a redetermination by January 18, 2022. Furthermore, any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period by May 16, 2022. See ''Petitions'' in the **SUPPLEMENTARY INFORMATION** section for more information.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before January 18, 2022. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of January 18, 2022. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket Nos. FDA–2020–E–2167 and FDA–2020–E–2168 for ''Determination of Regulatory Review Period for Purposes of Patent Extension; QINLOCK.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two

copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with § 10.20 (21 CFR 10.20) and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Beverly Friedman, Office of Regulatory Policy, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6250, Silver Spring, MD 20993, 301–796–3600.

SUPPLEMENTARY INFORMATION:

I. Background

The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98–417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100–670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug or biologic product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: A testing phase and an approval phase. For human drug products, the testing phase begins when the exemption to permit the clinical investigations of the drug becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human drug product and continues until FDA grants permission to market the drug product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Director of USPTO may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human drug product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA has approved for marketing the human drug product, QINLOCK (ripretinib) indicated for the treatment of adult patients with advanced gastrointestinal stromal tumor who have received prior treatment with 3 or more kinase inhibitors, including imatinib. Subsequent to this approval, the USPTO received patent term restoration applications for QINLOCK (U.S. Patent Nos. 8,188,113 and 8,461,179) from Deciphera Pharmaceuticals LLC and the USPTO requested FDA's assistance in determining the patents' eligibility for patent term restoration. In a letter dated December 14, 2020, FDA advised the USPTO that this human drug product had undergone a regulatory review period and that the approval of QINLOCK represented the first permitted commercial marketing or use of the product. Thereafter, the USPTO requested that FDA determine the product's regulatory review period.

II. Determination of Regulatory Review Period

FDA has determined that the applicable regulatory review period for QINLOCK is 1,741 days. Of this time, 1,586 days occurred during the testing phase of the regulatory review period, while 155 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 355(i)) became effective:* August 11, 2015. FDA has verified the applicant's claims that the date the investigational new drug application became effective was on August 11, 2015.

2. *The date the application was initially submitted with respect to the human drug product under section 505 of the FD&C Act:* December 13, 2019. FDA has verified the applicant's claims that the new drug application (NDA) for QINLOCK (NDA 213973) was initially submitted on December 13, 2019.

3. *The date the application was approved:* May 15, 2020. FDA has verified the applicant's claims that NDA 213973 was approved on May 15, 2020.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the USPTO applies several statutory limitations in its calculations of the actual period for patent extension. In its applications for patent extension, this applicant seeks 707 days or 947 days of patent term extension.

III. Petitions

Anyone with knowledge that any of the dates as published are incorrect may submit either electronic or written comments and, under 21 CFR 60.24, ask for a redetermination (see **DATES**). Furthermore, as specified in § 60.30 (21 CFR 60.30), any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must comply with all the requirements of § 60.30, including but not limited to: Must be timely (see **DATES**), must be filed in accordance with § 10.20, must contain sufficient facts to merit an FDA investigation, and must certify that a true and complete copy of the petition has been served upon the patent applicant. (See H. Rept. 857, part 1, 98th Cong., 2d sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Submit petitions electronically to *https://www.regulations.gov* at Docket Nos. FDA–2013–S–0610. Submit written petitions (two copies are required) to the Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Dated: November 3, 2021.

Lauren K. Roth,

Associate Commissioner for Policy.

[FR Doc. 2021–24978 Filed 11–15–21; 8:45 am]

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Submission to OMB for Review and Approval; Public Comment Request; Ryan White HIV/AIDS Program Client-Level Data Reporting System, OMB No. 0906–0039—Extension

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with of the Paperwork Reduction Act of 1995, HRSA is submitting an Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and approval. Comments submitted during the first public review of this ICR will be provided to OMB. OMB will accept further comments from the public during the review and approval period. OMB may act on HRSA's ICR only after the 30-day comment period for this Notice has closed.

DATES: Comments on this ICR should be received no later than December 16, 2021.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: To request a copy of the clearance requests submitted to OMB for review, email Samantha Miller, the acting HRSA Information Collection Clearance Officer at *paperwork@hrsa.gov* or call (301) 443–9094.

SUPPLEMENTARY INFORMATION:

Information Collection Request Title: Ryan White HIV/AIDS Program Client-Level Data Reporting System, OMB No. 0906–0039—Extension.

Abstract: The Ryan White HIV/AIDS Program (RWHAP), authorized under Title XXVI of the Public Health Service Act, is administered by the HIV/AIDS Bureau within HRSA. HRSA awards funding to recipients in areas of the greatest need to respond effectively to the changing HIV epidemic, with an emphasis on providing life-saving and life-extending medical care, treatment and support services for people living with HIV in the United States.

The RWHAP reporting requirements include the annual submission of client-level data in the Ryan White HIV/AIDS Program Services Report (RSR). The RSR is designed to collect information from grant recipients and their subcontracted service providers, funded under Parts A, B, C, and D of the RWHAP legislation. HRSA is requesting an extension of the current RSR with no changes.

A 60-day notice published in the **Federal Register**, 86 FR 44376 (August 12, 2021). There were were no public comments.

Need and Proposed Use of the Information: The RWHAP legislation specifies HRSA's responsibilities in administering grant funds, allocating funding, assessing HIV care outcomes (*e.g.,* viral suppression), and serving particular populations. The RSR collects data on the characteristics of RWHAP-funded recipients, their contracted service providers, and the patients or clients served. The RSR system consists of two primary components, the Recipient Report and the Provider Report, and a data file containing the client-level data elements. Data are submitted annually. The RWHAP legislation specifies the importance of recipient accountability and linking performance to budget. The RSR is used to ensure recipient compliance with the law, including evaluating the effectiveness of programs, monitoring recipient and provider performance, and informing annual reports to Congress. Information collected through the RSR is critical for HRSA, state and local grant recipients, and individual providers to assess the status of existing HIV-related service delivery systems, assess trends in service utilization, assess the impact of data reporting and identify areas of greatest need.

Likely Respondents: RWHAP grant recipients, as well as their subcontracted service providers, funded under RWHAP Parts A, B, C, and D.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN—HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Recipient Report	595	1	595	11	6,545
Provider Report	2,063	1	2,063	13	26,819
Client Report	1,532	1	1,532	113	173,116
Total	4,190	.....	4,190	.....	206,480

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Maria G. Button,

Director, Executive Secretariat.

[FR Doc. 2021–24922 Filed 11–15–21; 8:45 am]

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Meeting of the Advisory Committee on Blood and Tissue Safety and Availability

AGENCY: Office of the Assistant Secretary for Health, Office of the Secretary, Department of Health and Human Services.

ACTION: Notice.

SUMMARY: The U.S. Department of Health and Human Services is hereby giving notice that the Advisory Committee on Blood and Tissue Safety and Availability (ACBTSA) will hold a virtual meeting. The meeting will be open to the public. For this meeting, the committee will discuss and vote on a recommendation pertaining to a proposed update to the 2020 Public Health Service (PHS) Guideline for Assessing Solid Organ Donors and Monitoring Transplant Recipients for Human Immunodeficiency Virus, Hepatitis B Virus, and Hepatitis C Virus Infection. The following question will be posed to the committee: Does the available data support exempting solid organ transplant candidates who are ≤10 years of age at the time of transplant (and who have received postnatal infectious disease testing) from the recommendation for HIV, Hepatitis B virus, and Hepatitis C virus testing during the hospital admission for transplant but prior to anastomosis of the first organ?

DATES: The meeting will take place virtually on Wednesday, December 1, 2021 from approximately 11:00 a.m.–3:00 p.m. Eastern Time (ET). Meeting times are tentative and subject to change. The confirmed times and agenda items for the meeting will be posted on the ACBTSA web page at *https://www.hhs.gov/oidp/advisory-committee/blood-tissue-safety-availability/meetings/2021-12-01/index.html* when this information becomes available.

FOR FURTHER INFORMATION CONTACT: James Berger, Designated Federal Officer for the ACBTSA; Office of Infectious Disease and HIV/AIDS Policy, Office of the Assistant Secretary for Health, Department of Health and Human Services, Mary E. Switzer Building, 330 C Street SW, Suite L600, Washington, DC 20024. (202) 795–7608 or Email: *ACBTSA@hhs.gov.*

SUPPLEMENTARY INFORMATION: The ACBTSA is a discretionary Federal advisory committee. The Committee is governed by the provisions of the Federal Advisory Committee Act (FACA), Public Law 92–463, as amended (5 U.S.C. App), which sets forth standards for the formation and use of advisory committees. On the day of the meeting, please go to *https://www.hhs.gov/live/index.html* to view the meeting. The public will have an opportunity to present their views to the ACBTSA by submitting a written public comment. Comments should be pertinent to the meeting discussion. Persons who wish to provide written public comment should review instructions at *https://www.hhs.gov/oidp/advisory-committee/blood-tissue-safety-availability/meetings/2021-12-01/index.html* and respond by midnight November 26, 2021, ET. Written public comments will be accessible to the public on the ACBTSA web page prior to the meeting.

ACBTSA functions to provide advice to the Secretary through the Assistant Secretary for Health on a range of policy issues to include: (1) Identification of public health issues through surveillance of blood and tissue safety issues with national survey and data tools; (2) identification of public health issues that affect availability of blood, blood products, and tissues; (3) broad public health, ethical, and legal issues related to the safety of blood, blood products, and tissues; (4) the impact of various economic factors (*e.g.,* product cost and supply) on safety and availability of blood, blood products, and tissues; (5) risk communications related to blood transfusion and tissue transplantation; and (6) identification of infectious disease transmission issues for blood, organs, blood stem cells and tissues. The Committee has met regularly since its establishment in 1997.

Dated: October 27, 2021.

James J. Berger,

Designated Federal Officer, Advisory Committee on Blood and Tissue Safety and Availability, Office of Infectious Disease and HIV/AIDS Policy.

BILLING CODE 4150–28–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Submission for OMB Review; 30-Day Comment Request; Division of Extramural Research and Training (DERT) Extramural Grantee Data Collection (National Institute of Environmental Health Sciences)

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, the National Institutes of Health (NIH) has submitted to the Office of Management and Budget (OMB) a request for review and approval of the information collection listed below.

DATES: Comments regarding this information collection are best assured of having their full effect if received within 30-days of the date of this publication.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and instruments, contact: Dr. Kristianna Pettibone, Evaluator, Program Analysis Branch, NIEHS, NIH, 530 Davis Dr., Room 3064, Morrisville, NC 20560, or call non-toll-free number 984–287–3303 or Email your request, including your address to: *pettibonekg@niehs.nih.gov.*

SUPPLEMENTARY INFORMATION: This proposed information collection was previously published in the **Federal Register** on September 13, 2021, Volume 86, Number 74, page 50897–50898 and allowed 60-days for public comment. No public comments were received. The purpose of this notice is to allow an additional 30 days for public comment. The National Institute of Environmental Health Sciences (NIEHS), National Institutes of Health, may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended, revised, or implemented on or after October 1, 1995, unless it displays a currently valid OMB control number.

In compliance with Section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the National Institutes of Health (NIH) has submitted to the Office of Management and Budget (OMB) a request for review and approval of the information collection listed below.

Proposed Collection: DERT Extramural Grantee Data Collection, 0925–0757– REVISION—Expiration Date 11/30/2021, National Institute of Environmental Health Sciences

(NIEHS), National Institutes of Health (NIH).

Need and Use of Information Collection: In order to make informed management decisions about its research programs and to demonstrate the outputs, outcomes and impacts of its research programs NIEHS will collect, analyze and report on data from extramural grantees who are currently receiving funding or who have received funding in the past on topics such as: (1) Key scientific outcomes achieved through the research and the impact on the field of environmental health science; (2) Contribution of research findings to program goals and objectives; (3) Satisfaction with the program support received; (4) Challenges and benefits of the funding mechanism used to support the science; and (5) Emerging research areas and gaps in the research.

Information gained from this primary data collection will be used in conjunction with data from grantee progress reports and presentations at grantee meetings to inform internal programs and new funding initiatives.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 740.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total annual burden hours
NICHD Grantee	200	1	30/60	100
NIDCD Grantee	200	1	30/60	100
NIMH Grantee	200	1	30/60	100
NINDS Grantee	200	1	30/60	100
NCI Grantee	400	1	30/60	200
NIEHS Grantee (long form)	200	1	30/60	100
NIEHS Grantee (short form)	240	1	10/60	40
Total		1,640		740

Jane M. Lambert,

Project Clearance Liaison, National Institute of Environmental Health Sciences, National Institutes of Health.

Center for Scientific Review; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Nephrology and Hemodialysis Small Business Activities.

Date: November 23, 2021.

Time: 10:00 a.m. to 1:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Santanu Banerjee, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 2106, Bethesda, MD 20892, (301) 435–5947, *banerjees5@mail.nih.gov.*

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG–2010–1066]

Recreational Boating Safety Projects, Programs, and Activities Funded Under Provisions of the Fixing America's Surface Transportation Act; Fiscal Year 2021

ACTION: Notice.

SUMMARY: The Coast Guard is publishing this notice to satisfy a requirement of the Fixing America's Surface Transportation Act that requires a detailed accounting of the projects, programs, and activities funded under the national recreational boating safety program provision of the Act be published annually in the **Federal Register**. This notice specifies the funding amounts the Coast Guard has committed, obligated, or expended during fiscal year 2021, as of September 30, 2021.

FOR FURTHER INFORMATION CONTACT: For questions on this notice please contact Mr. Jeff Decker, U.S. Coast Guard, Regulations Development Manager, (202) 372–1507 or mail to: *RBSInfo@uscg.mil.*

SUPPLEMENTARY INFORMATION:

Background and Purpose

Since 1998, Congress has passed a series of laws providing funding for projects, programs, and activities funded under the national recreational boating safety program, which is administered by the U.S. Coast Guard. For a detailed description of the legislative history, please see the Recreational Boating Safety Projects, Programs, and Activities Funded Under Provisions of the Fixing America's Surface Transportation Act; Fiscal Year 2020 Notice published in the **Federal Register** on November 23, 2020 (85 FR 74741).

These funds are available to the Secretary from the Sport Fish Restoration and Boating Trust Fund (Trust Fund) established under 26 U.S.C. 9504(a) for payment of Coast Guard expenses for personnel and activities directly related to coordinating and carrying out the national recreational boating safety program. Amounts made available under this subsection remain available during the two succeeding fiscal years. Any amount that is unexpended or unobligated at the end of the three-year period during which it is available shall be withdrawn by the Secretary and allocated to the States in addition to any other amounts available for allocation in the fiscal year in which they are withdrawn or the following fiscal year.

Use of these funds requires compliance with standard Federal contracting rules with associated lead and processing times resulting in a lag time between available funds and spending. The total amount of funding transferred to the Coast Guard from the Trust Fund, and committed, obligated, and/or expended during fiscal year 2021 for each project is shown below.

Specific Accounting of Funds

The total amount of funding transferred to the Coast Guard from the Sport Fish Restoration and Boating Trust Fund and committed, obligated, and/or expended during fiscal year 2021 for each project is shown in the chart below.

Project	Description	Cost
46 USC 43 Compliance: Inspection Program/Boat Testing Program.	Provided for continuance of the national recreational boat compliance inspection program, which began in January 2001.	$3,888,425
46 USC 43 Compliance: Staff Salaries	Provided for personnel to oversee manufacturer compliance with 46 USC 43 requirements.	543,742
46 USC 43 Compliance: ..... Staff Travel	Provided for travel by employees of the Boating Safety Division to oversee manufacturer compliance with 46 USC 43 requirements.	26,274
Administrative Overhead	Supplies and Materials to support the RBS Program	298,965

Project	Description	Cost
Boating Accident Report Database (BARD) Web System.	Provided for maintaining the BARD Web System, which enables reporting authorities in the 50 States, five U.S. Territories, and the District of Columbia to submit their accident reports electronically over a secure Internet connection.	363,970
National Boating Safety Advisory Council	Provided for travel performed by NBSAC members, meeting room costs and administrative costs to support the NBSAC.	203
Contract Personnel Support	Provided contract personnel to conduct boating safety-related research and analysis.	730,822
Grant Management Training	Provided to facilitate staff training on new grant management requirements	159,421
Recreational Boating Safety Program Travel.	Provided for travel by employees of the Boating Safety Division to gather background and planning information for new recreational boating safety initiatives.	46,092
Reimbursable Salaries	Provided for 18 personnel directly related to coordinating and carrying out the national recreational boating safety program.	2,943,134

Of the $8.423 million made available to the Coast Guard in fiscal year 2021, $100,000 has been committed, obligated, or expended and an additional $8,901,048 of prior fiscal year funds have been committed, obligated, or expended, as of September 30, 2021. The remainder of the FY20 and FY21 funds made available to the Coast Guard (approximately $9.012 million) may be retained for the allowable period for the National Recreational Boating Survey, the expected reengineering of the Boating Accident and Reporting Database, and other projects, or it may be transferred into the pool of money available for allocation through the state grant program.

Authority: This notice is issued pursuant to 5 U.S.C. 552 and 46 U.S.C. 13107(c)(4).

Dated: November 9, 2021.

Wayne R. Arguin, Jr.,

Captain, U.S. Coast Guard, Director of Inspections and Compliance.

[FR Doc. 2021–24934 Filed 11–15–21; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2021–0002]

Changes in Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: Notice.

SUMMARY: New or modified Base (1-percent annual chance) Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, and/or regulatory floodways (hereinafter referred to as flood hazard determinations) as shown on the indicated Letter of Map Revision (LOMR) for each of the communities listed in the table below are finalized. Each LOMR revises the Flood Insurance Rate Maps (FIRMs), and in some cases the Flood Insurance Study (FIS) reports, currently in effect for the listed communities.

DATES: Each LOMR was finalized as in the table below.

ADDRESSES: Each LOMR is available for inspection at both the respective Community Map Repository address listed in the table below and online through the FEMA Map Service Center at *https://msc.fema.gov.*

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Mapping and Insurance eXchange (FMIX) online at *https://www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final flood hazard determinations as shown in the LOMRs for each community listed in the table below. Notice of these modified flood hazard determinations has been published in newspapers of local circulation and 90 days have elapsed since that publication. The Deputy Associate Administrator for Insurance and Mitigation has resolved any appeals resulting from this notification.

The modified flood hazard determinations are made pursuant to section 206 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.,* and with 44 CFR part 65.

The currently effective community number is shown and must be used for all new policies and renewals.

The new or modified flood hazard information is the basis for the floodplain management measures that the community is required either to adopt or to show evidence of being already in effect in order to remain qualified for participation in the National Flood Insurance Program (NFIP).

This new or modified flood hazard information, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities.

This new or modified flood hazard determinations are used to meet the floodplain management requirements of the NFIP. The changes in flood hazard determinations are in accordance with 44 CFR 65.4.

Interested lessees and owners of real property are encouraged to review the final flood hazard information available at the address cited below for each community or online through the FEMA Map Service Center at *https://msc.fema.gov.*

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2021–0002; Internal Agency Docket No. FEMA–B–2177]

Proposed Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: Notice.

SUMMARY: Comments are requested on proposed flood hazard determinations, which may include additions or modifications of any Base Flood Elevation (BFE), base flood depth, Special Flood Hazard Area (SFHA) boundary or zone designation, or regulatory floodway on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports for the communities listed in the table below. The purpose of this notice is to seek general information and comment regarding the preliminary FIRM, and where applicable, the FIS report that the Federal Emergency Management Agency (FEMA) has provided to the affected communities. The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: Comments are to be submitted on or before February 14, 2022.

ADDRESSES: The Preliminary FIRM, and where applicable, the FIS report for each community are available for inspection at both the online location *https://hazards.fema.gov/femaportal/prelimdownload* and the respective Community Map Repository address listed in the tables below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *https://msc.fema.gov* for comparison.

You may submit comments, identified by Docket No. FEMA–B–2177, to Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov.*

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Mapping and Insurance eXchange (FMIX) online at *https://www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: FEMA proposes to make flood hazard determinations for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These flood hazard determinations are used to meet the floodplain management requirements of the NFIP.

The communities affected by the flood hazard determinations are provided in the tables below. Any request for reconsideration of the revised flood hazard information shown on the Preliminary FIRM and FIS report that satisfies the data requirements outlined in 44 CFR 67.6(b) is considered an appeal. Comments unrelated to the flood hazard determinations also will be considered before the FIRM and FIS report become effective.

Use of a Scientific Resolution Panel (SRP) is available to communities in support of the appeal resolution process. SRPs are independent panels of experts in hydrology, hydraulics, and other pertinent sciences established to review conflicting scientific and technical data and provide recommendations for resolution. Use of the SRP only may be exercised after FEMA and local communities have been engaged in a collaborative consultation process for at least 60 days without a mutually acceptable resolution of an appeal. Additional information regarding the SRP process can be found online at *https://www.floodsrp.org/pdfs/srp_overview.pdf.*

The watersheds and/or communities affected are listed in the tables below. The Preliminary FIRM, and where applicable, FIS report for each community are available for inspection at both the online location *https://hazards.fema.gov/femaportal/prelimdownload* and the respective Community Map Repository address listed in the tables. For communities with multiple ongoing Preliminary studies, the studies can be identified by the unique project number and Preliminary FIRM date listed in the tables. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *https://msc.fema.gov* for comparison.

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY

[Docket Number–DHS–2021–0050]

Agency Information Collection Activities: Family Reunification Task Force Travel Questionnaire and Website Application

AGENCY: Department of Homeland Security (DHS).

ACTION: 60-Day notice and request for comments; Family Reunification Task Force Travel Questionnaire and website Application, extension without change.

SUMMARY: The Department of Homeland Security, will submit the following Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted until December 16, 2021. This process is conducted in accordance with 5 CFR 1320.1.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain*. Find this specific information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

SUPPLEMENTARY INFORMATION: On February 2, 2021, President Biden signed Executive Order 14011 (E.O. 14011), Establishment of Interagency Task Force on the Reunification of Families, in response to the prior Administration decision to intentionally separate children from their parents and legal guardians (families), including through the use of the Zero-Tolerance Policy. E.O. 14011 directs the Interagency Task Force on the Reunification of Families (Task Force) to identify children who were separated and facilitate and enable the reunification of the families. Additionally, E.O. 14011 directs the

Task Force to provide recommendations on providing additional services and support for the reunified families, including behavioral health services with a focus on trauma-informed care. The Secretary of Homeland Security is the chair of the Task Force and is joined by the Department of State, Department of Health and Human Services, and the Department of Justice.

To carry out the Task Force's mission to reunify families, DHS is extending the current information data collection. The purpose is to achieve efficiencies to process these individuals for a successful family reunification. To streamline the initial contact, assistance, and reunification travel coordination process, the Task Force has created a website application (Register | *together.gov* and Regístrese | *together.gov* (*juntos.gov*)) to create initial contact and a travel form to collect details and information the Task Force needs to make travel arrangements for the beneficiary and other traveling family members.

The information to be collected on the website application would include:

- A-Number
- Name of Separated Parent
- Contact Information of the Separated Parent (phone, email)
- Country of Birth
- Country of Citizenship
- Current Country Location
- Separated Parent Relationship to Child
- Separated Parent's Preferred Language
- Separated Child's A#
- Separated Child Name
- Separated Child's Date of Birth
- Separated Child's Country of Birth
- Separated Child's Country of Citizenship
- Whether Separated Parent is in contact with Child
- Whether Separated Parent has knowledge of Child's current location
- Name of Attorney, Advocate or Preparer
- Attorney, Advocate, or Preparer Contact Information

The information to be collected for travel would include: Name, Date of Birth, Gender, A#, Passport Number and Expiration, Phone Number, Email address, Language(s) spoken, Representative/Attorney name and contact information, Date of Embassy Appointment to obtain boarding foil, Identification of Special Assistance Requests, Departure Airport, Final Airport, Traveling requested time frame, Names of others in the traveling party. The data will be stored by the international organization coordinating travel for the families.

This information collection does not have an impact on small businesses or other small entities.

If this information is not collected, the Task Force will not be able to accomplish its mission to reunite families swiftly.

The assurance of confidentiality provided to the respondents for this information collection is based on the Privacy Impact Assessment DHS/ALL/PIA–091. The Systems of Records Notices that will be included in this ICR include DHS/USCIS/ICE/CBP–001 Alien File, Index, and National File Tracking System of Records, September 18, 2017, 82 FR 43556 DHS/USCIS–007 Benefits Information System, October 10, 2019, 84 FR 54622.

This information collection was constructed in compliance with regulations and authorities under the purview of the DHS Privacy Office, DHS OCIO, DHS Records Management, and OMB regulations regarding data collection, use, sharing, storage, information security, and retrieval of information.

There are no changes to the information being collected and there is no change to the estimated burden associated with this collection.

The Office of Management and Budget is particularly interested in comments which:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

Analysis

Agency: Department of Homeland Security (DHS).

Title: Family Reunification Task Force Travel Questionnaire and Website Application.

OMB Number: 1601–0031.

Frequency: Annually.

Affected Public: Members of the Public.

Number of Respondents: 3,000.

Estimated Time per Respondent: 20 minutes.

Total Burden Hours: 1,000.

Robert Dorr,

Executive Director, Business Management Directorate.

BILLING CODE 9112–FL–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7046–N–07]

Privacy Act of 1974; System of Records

AGENCY: Office of Chief Human Capital Officer, HUD.

ACTION: Notice of a new system of records.

SUMMARY: Pursuant to the provisions of the Privacy Act of 1974, as amended, the Department of the Housing and Urban Development (HUD), Office of the Chief Human Capital Officer (OCHCO) is issuing a public notice of its intent to establish a Privacy Act system of records titled ''HR Case Management Solution,'' HUD/OCHCO 01.

The purpose of this system of records is to allow HUD to collect and maintain records on individuals requesting or receiving reasonable accommodations and religious/medical exception requests.

DATES: This notice shall be applicable immediately, which will become effective December 16, 2021.

Comments will be accepted on or before December 16, 2021. This proposed action will be effective on the date following the end of the comment period unless comments are received which result in a contrary determination.

ADDRESSES: You may submit comments, identified by docket number HUD–2021–Docket Number not yet identified.

Federal e-Rulemaking Portal: http://www.regulations.gov. Follow the instructions provided on that site to submit comments electronically.

Fax: 202–619–8365.

Email: www.privacy@hud.gov.

Mail: Attention: Privacy Office; LaDonne White, Chief Privacy Officer; The Executive Secretariat; 451 Seventh Street SW, Room 10139, Washington, DC 20410–0001.

Instructions: All submissions received must include the agency name and docket number for this rulemaking. All comments received will be posted without change to *http://*

www.regulations.gov. including any personal information provided.

Docket: For access to the docket to read background documents or comments received go to *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Ladonne White, Departmental Privacy Officer, 451 Seventh Street SW, Room 10139, Washington, DC 20410–0001, telephone number 202–402–3559 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: In accordance with the Privacy Act of 1974, the Department of Housing and Urban Development (HUD) proposes to establish a new system of records titled, ''HR Case Management Solution.'' This system of records covers HUD's collection and maintenance of records on applicants for employment, employees, and other individuals who participate in HUD programs or activities who request or receive reasonable accommodations or other appropriate modifications from HUD for medical and religious reasons.

Title V of the Rehabilitation Act of 1973, as amended, prohibits discrimination in services and employment based on disability, and Title VII of the Civil Rights Act of 1974 prohibits discrimination, including on the basis of religion. These prohibitions on discrimination require Federal agencies to provide reasonable accommodations to individuals with disabilities and those with sincerely held religious beliefs unless doing so would impose an undue hardship. In some instances, individuals may request modifications to their workspace, schedule, duties, or other requirements for documented medical reasons that may not qualify as a disability but may necessitate an appropriate modification to workplace policies and practices.

The Office of the Chief Human Capital Officer (OCHCO), processes requests for reasonable accommodations from employees and applicants for employment, respectively, who require an accommodation due to a medical or religious reason; OCHCO also processes requests based on documented medical reasons that may not qualify as a disability but that necessitate an appropriate modification to workplace policies and practices. The request, documentation provided in support of the request, any evaluation conducted internally, or by a third party under contract to HUD, the decision regarding whether to grant or deny a request, and the details and conditions of the reasonable accommodation and exception requests are all included in this system of records.

SYSTEM NAME AND NUMBER:

Human Resource (HR) Case Management Solution, HUD/OCHCO–01.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

United States Department of Housing and Urban Development Headquarters location, 451 7th Street SW, Washington, DC 20410–0001.

SYSTEM MANAGER(S):

Director, Human Capital Information System Division (HCISD), Office of the Chief Human Capital Officer (OCHCO), 451 Seventh Street SW, Washington, DC 20410–0001.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The collection and maintenance of accommodation records is authorized by the Rehabilitation Act, 29 U.S.C. 791, and Title VII of the Civil Rights Act, 42 U.S.C. 2000e, as well as Executive Orders 13164 and 14043, and 29 CFR 1605 and 1614.

PURPOSES OF THE SYSTEM:

The purpose of this system is to allow HUD to collect and maintain records on individuals (including employees and applicants for employment) requesting or receiving reasonable accommodations and religious and medical exception requests. Another purpose of this system is to monitor, process, track and report the processing of reasonable accommodation and exception requests while ensuring compliance with applicable laws and regulations, including confidentiality requirements protecting information individuals submit in support of accommodation requests and exception.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current, former HUD employees and applicants for employment who request or receive reasonable accommodations or exceptions.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, home address, email address(es), home telephone number(s), work telephone number(s), work address, protected health information, religion, vehicle license plate, legal documents and records, evidentiary records, requesters, attorneys or representatives' names, fax number, office information, employment status, history or information, employee identification number, education records, case identifier and HUD ID, medical/religious exception requests, records, forms, documentation, reasonable accommodations applications, supporting documentation, and related data fields.

RECORD SOURCE CATEGORIES:

Information is obtained from the individuals or the representatives who request and/or receive a reasonable accommodation or medical and religious exceptions from HUD, directly or indirectly from an individual's medical provider or another medical professional who evaluates the request, directly or indirectly from an individual's religious or spiritual advisors or institutions, and HUD personnel who participate in the receipt, evaluation, review, decision and implementation of reasonable accommodation and exception requests, such as hiring officials, human resource officials, supervisors and managers, reasonable accommodation officials, attorneys, and deciding officials.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records or information contained in this system may be disclosed outside HUD as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

A. To a congressional office from the record of an individual, in response to an inquiry from the congressional office made at the request of that individual.

B. To contractors, grantees, experts, consultants, Federal agencies, and non-Federal entities, including, but not limited to, State and local governments and other research institutions or their parties, and entities and their agents with whom HUD has a contract, service agreement, grant, or cooperative agreement, when necessary to accomplish an agency function, related to a system of records, for the purposes of statistical analysis and research in support of program operations, management, performance monitoring, evaluation, risk management, and policy development, or to otherwise support the Department's mission.

C. To contractors, grantees, experts, consultants and their agents, or others performing or working under a contract, service, grant, or cooperative agreement with HUD or under contract to another agency when necessary to accomplish an agency function related to a system of records. Disclosure requirements are limited to only those data elements considered relevant to accomplishing an agency function. Individuals provided information under these routine use

conditions are subject to Privacy Act requirements and disclosure limitations imposed on the Department.

D. To appropriate agencies, entities, and persons when: (1) HUD suspects or has confirmed that there has been a breach of the system of records; (2) HUD has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, HUD, the Federal Government, or national security; and (3) The disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with HUD's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

E. To another Federal agency or Federal entity, when HUD determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to suspected or confirmed breach, or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

F. To appropriate Federal, State, local, tribal, or governmental agencies or multilateral governmental organizations responsible for investigating or prosecuting the violations of, or for enforcing or implementing, a statute, rule, regulation, order, or license, where HUD determines that the information would assist in the enforcement of civil or criminal laws and when such records, either alone or in conjunction with other information, indicate a violation or potential violation of law.

G. To a court, magistrate, administrative tribunal, or arbitrator while presenting evidence, including disclosures to opposing counsel or witnesses in the course of civil discovery, litigation, mediation, or settlement negotiations; or in connection with criminal law proceedings; or in response to a subpoena or to a prosecution request when such records to be released are specifically approved by a court provided order. Disclosures made pursuant to this routine use are limited to when HUD determines that use of such records is relevant and necessary to the litigation, provided, however, that in each case, HUD determines that the disclosure of the records is a use of the information contained in the records that is compatible with the purpose for which the records were collected.

H. To the Department of Justice when (a) the agency, or any component thereof; or (b) any employee of the agency in his or her official capacity; or (c) any employee of the agency in his or her individual capacity where the Department of Justice has agreed to represent the employee; or (d) the United States, where the agency determines that litigation is likely to affect the agency or any of its components, is a party to litigation or has an interest in such litigation, and the use of such records by the Department of Justice is deemed by the agency to be relevant and necessary to the litigation, provided, however, that in each case, the agency determines that disclosure of the records to the Department of Justice is a use of the information contained in the records that is compatible with the purpose for which the records were collected.''

I. To officials of labor organizations recognized under the Civil Service Reform Act when relevant and necessary to their duties of exclusive representation concerning personnel policies, practices, and matters affecting work conditions.

K. To the Office of Personnel Management (OPM), the Merit Systems Protection Board (and its office of the Special Counsel), the Federal Labor Relations Authority (and its General Counsel), or the Equal Employment Opportunity Commission when requested in performance of their authorized duties of exclusive representation concerning personnel policies, practices, and matters affecting work conditions.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Electronic Records are maintained and stored in a secured network environment. Paper copies records are stored and locked in cabinets.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Paper and electronic records are retrieved by the name, case number, HUD Identification number associated with the individual.

POLICIES AND PRACTICIES FOR RETENTION AND DISPOSAL OF RECORDS:

Destroy 3 years after employee separation from the agency or all appeals are concluded whichever is later, but longer retention is authorized if required for business use.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Electronic Records are maintained and stored in an electronic encryption database system. These records can only be access based off the user's rights and privileges to the system. A multifactor identification method is required which consists of the several layers of security to access the records, such as a valid common access card, access to HUD's network, a valid User ID and password, and a Personalized Identification Number (PIN).

RECORD ACCESS PROCEDURES:

Individuals seeking to determine whether this System of Records contains information on themselves should address written inquiries to the Department of Housing and Urban Development, Office of the Chief Human Capital Officer (OCHCO), 451 7th Street SW, Washington, DC 20410–0001. For verification purposes, individuals should provide full name, current address, and telephone number. In addition, the requester must provide either a notarized statement or an unsworn declaration made in accordance with 28 U.S.C. 1746, in the following format:

If executed outside the United States: ''I declare (or certify, verify, or state) under penalty of perjury under the laws of the United States of America that the foregoing is true and correct. Executed on (Date). (Signature).''

If executed within the United States, its territories, possessions, or commonwealths: ''I declare (or certify, verify, or state) under penalty of perjury that the foregoing is true and correct. Executed on (Date). (Signature).''

CONTESTING RECORD PROCEDURES:

The HUD rule for accessing, contesting, and appealing agency determinations by the individual concerned are published in 24 CFR part 16.

NOTIFICATION PROCEDURES:

Individuals seeking to determine whether information about themselves is contained in this system should address written inquiries to the Department of Housing and Urban Development, Office of the Chief Human Capital Officer (OCHCO), 451 7th Street SW, Washington, DC 20410–0001. For verification purposes, individuals should provide full name, office or organization where currently assigned, if applicable, and current address and telephone number. In addition, the requester must provide either a notarized statement or an unsworn declaration made in accordance with 28 U.S.C. 1746, in the following format:

If executed outside the United States: ''I declare (or certify, verify, or state) under penalty of perjury under the laws of the United States of America that the foregoing is true and correct. Executed on (Date). (Signature).''

If executed within the United States, its territories, possessions, or commonwealths: ''I declare (or certify, verify, or state) under penalty of perjury that the foregoing is true and correct. Executed on (Date). (Signature).''

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

BILLING CODE 4210–67–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7040–N–11]

60-Day Notice of Proposed Information Collection: Public Housing Agency Executive Compensation Information; OMB Control No.: 2577–0272

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, PIH, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: *Comments Due Date:* January 18, 2022.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW, Room 4176, Washington, DC 20410–5000; telephone 202–402–3400 (this is not a toll-free number) or email at *Colette.Pollard@hud.gov* for a copy of the proposed forms or other available information. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

FOR FURTHER INFORMATION CONTACT: Colette Pollard, Office of Policy, Programs and Legislative Initiatives, PIH, Department of Housing and Urban Development, 451 7th Street SW, (L'Enfant Plaza, Room 2206), Washington, DC 20410; telephone 202–402–3400, (this is not a toll-free number). Persons with hearing or speech impairments may access this number via TTY by calling the Federal Relay Service at (800) 877–8339. Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Proposal: Public Housing Agency Executive Compensation Information.

OMB Approval Number: 2577–0272.

Type of Request: Revision of currently approved collection.

Form Number: HUD–52725.

Description of the need for the information and proposed use: Pursuant to a notice issued annually (most recently PIH Notice 2019–21), HUD collects information on the compensation provided by public housing agencies (PHAs) to its employees. More specifically, under this collection PHAs are to report the compensation paid to the top management official, the top financial official, and all employees who are paid an annual salary over the compensation cap imposed by Congress in HUD's annual appropriations (Level IV of the Executive Schedule).

This reporting is similar to the information that non-profit organizations receiving federal tax exemptions are required to report to the IRS annually. Because PHAs receive significant direct federal funds HUD has been collecting compensation information to enhance regulatory oversight by HUD, as well as by state and local authorities. HUD provides the information collected to the public. The compensation data collected includes base salary, bonus, and incentive and other compensation, and the extent to which these payments are made with any Section 8 and 9 appropriated funds.

One of the primary purposes of this amendment to the PHA executive compensation information collection is to reduce the reporting burden on ALL PHAs by moving from an annual collection to collecting one year of data once every three years—this will reduce the reporting burden on PHAs by 66.7%.

While HUD may only collect PHA compensation data once every three years, PHAs are still subject to the annual compensation restrictions imposed by Congress. Therefore, all years remain subject to potential review by HUD to ensure compliance with the Annual Appropriations Act.

Respondents: Public Housing Agencies.

Estimated Number of Respondents: 4,000.

Estimated Number of Responses: 4,000.

Frequency of Response: Triennially (once every three years).

Average Hours per Response: One hour.

Total Estimated Burdens: The total burden hours is estimated to be 4,000 hours triennially. The total burden cost is estimated to be $128,080.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Dated: November 5, 2021.

Laura Miller-Pittman,

Chief, Office of Policy, Programs and Legislative Initiatives.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS–HQ–IA–2021–0052; FXIA16710900000–212–FF09A30000]

Marine Mammals; Issuance of Permits

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of issuance of permits.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), have issued the following permits to conduct certain activities with marine mammals. We issue these permits under section 104(c) of the Marine Mammal Protection Act of 1972, as amended.

ADDRESSES: Information about the applications for the permits listed in this notice is available online at *www.regulations.gov.* See **SUPPLEMENTARY INFORMATION** for details.

FOR FURTHER INFORMATION CONTACT: Brenda Tapia, by phone at 703–358–2185, via email at *DMAFR@fws.gov,* or via the Federal Relay Service at 800–877–8339.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service (Service), have issued permits to conduct certain activities with marine mammals in response to permit applications that we received. Section 104(c) of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), specifies the conditions for authorizing the taking or importation of a marine mammal for purposes of scientific research, public display, or enhancing the survival or recovery of a species or stock under the MMPA, providing that certain conditions are met. A permit may be issued for public display purposes to applicants which offers a program for education or conservation purposes that meets professionally recognized standards of the public display community, for which the applicant's facilities are open to the public on a regularly scheduled basis and that access to the facilities is not limited or restricted other than by charging of an admission fee. A permit may be issued for scientific research purposes when the taking is required to further a bona fide scientific purpose and does not involve unnecessary duplication of research. This notice only informs the public that, after going through a review of the submitted application, the Service has determined that all the issuance criteria of the MMPA have been met.

Availability of Documents

The permittees' original permit application materials, along with public comments we received during public comment periods for the applications, are available for review. To locate the application materials and received comments, go to *www.regulations.gov* and search for the appropriate permit number (*e.g.,* 12345C) provided in the following table:

Marine Mammals

Permit No.	ePermit No.	Applicant	Permit issuance date
672624	N/A	U.S. Geological Survey (USGS)	December 7, 2020.
73634A	N/A	Seward Association for the Advancement of Marine Science dba Alaska Sealife Center.	December 8, 2020.

Authorities

We issue this notice under the Marine Mammal Protection Act as amended (16 U.S.C. 1361 *et seq.*) and their implementing regulations.

Brenda Tapia,

Supervisor, Program Analyst/Data Administrator, Branch of Permits, Division of Management Authority.

BILLING CODE 4333–15–P

LEGAL SERVICES CORPORATION

Sunshine Act Meeting

TIME AND DATE: The Legal Services Corporation's (LSC) Board of Directors will meet Monday, November 22, 2021. The meeting will commence at 4:30 p.m., Eastern time, continuing until the conclusion of the Board's agenda.

PLACE:

Public Notice of Virtual Meeting.

LSC will conduct the November 22, 2021 meeting virtually via Zoom.

Public Observation: Unless otherwise noted herein, the Board meeting will be open to public observation. Members of the public who wish to participate remotely in the public proceedings may do so by following the directions provided below.

Directions for Open Sessions

Monday, November 22, 2021

- To join the Zoom meeting by computer, please use this link:
  - *https://lsc-gov.zoom.us/j/94947300234?pwd=a1FxNlNIbUdDaHdwWEFlOGYzSzltUT09*
  - Meeting ID: 949 4730 0234
  - Passcode: 112221
- To join the Zoom meeting with one tap from your mobile phone, please dial:
  - +13017158592,,94947300234# US (Washington DC)
  - +13126266799,,94947300234# US (Chicago)
  - Passcode: 112221
- To join the Zoom meeting by telephone, please dial any of the following numbers:
  - +1 301 715 8592 US (Washington, DC)
  - +1 312 626 6799 US (Chicago)
  - +1 646 876 9923 US (New York)
  - +1 408 638 0968 US (San Jose)
  - +1 669 900 6833 US (San Jose)
  - +1 253 215 8782 US (Tacoma)
  - +1 346 248 7799 US (Houston)
  - Meeting ID: 949 4730 0234
  - Passcode: 112221

Once connected to Zoom, please immediately mute your computer or telephone. Members of the public are asked to keep their computers or telephones muted to eliminate background noise. To avoid disrupting the meetings, please refrain from placing the call on hold if doing so will trigger recorded music or other sound.

From time to time, the Chair may solicit comments from the public. To participate in the meeting during public comment, use the 'raise your hand' or 'chat' functions in Zoom and wait to be recognized by the Chair before stating your questions and/or comments.

STATUS: Open.

MATTERS TO BE CONSIDERED:

Meeting Schedule

1. Approval of agenda
2. Consider and act on the Board of Directors' transmittal letter to accompany the Inspector General's Semiannual Report to Congress for the period of April 1, 2021 through September 30, 2021
3. Public comment
4. Consider and act on other business
5. Consider and act on adjournment of meeting

CONTACT PERSON FOR MORE INFORMATION: Jessica Wechter, Special Assistant to the President, at (202) 295–1626. Questions may also be sent by electronic mail to *wechterj@lsc.gov.*

Non-Confidential Meeting Materials: Non-confidential meeting materials will be made available in electronic format at least 24 hours in advance of the meeting on the LSC website, at *https://www.lsc.gov/about-lsc/board-meeting-materials.*

Dated: November 11, 2021.

Jessica L. Wechter,

Special Assistant to the President, Legal Services Corporation.

BILLING CODE 7050–01–P

OFFICE OF MANAGEMENT AND BUDGET

Determination of the Acting OMB Director Regarding the Revised Safer Federal Workforce Task Force Guidance for Federal Contractors and the Revised Economy & Efficiency Analysis

AGENCY: Executive Office of the President, Office of Management and Budget.

ACTION: Notice of determination; request for comments.

SUMMARY: The Director of the Office of Management and Budget (''OMB'') determines that compliance by Federal contractors and subcontractors with the COVID–19 workplace safety protocols detailed in the Safer Federal Workforce Task Force (''Safer Federal Workforce Task Force'' or the ''Task Force'') guidance (the ''Guidance'') to be issued on November 10, 2021, will promote economy and efficiency in Federal contracting by reducing absenteeism and decreasing labor costs for contractors and subcontractors working on or in connection with a Federal Government contract, and the Director approves the guidance. This notice accordingly rescinds and supersedes the Director's prior notice issued on September 24, 2021.

DATES: To be ensured consideration, comments must be received on or before December 16, 2021.

ADDRESSES: You should submit comments via the Federal eRulemaking Portal at *https://www.regulations.gov/.* Follow the instructions for submitting comments.

Please be advised OMB will post all comments received that relate to this notice of determination on *https://www.regulations.gov* without making any change to the comments or redacting any information.

All comments posted are available and accessible to the public. So, do not include any information you would not like to be made publicly available, such as Social Security numbers, personal addresses, telephone numbers, and email addresses. It is the responsibility of the commenter to safeguard personal information.

FOR FURTHER INFORMATION CONTACT: Cristin Dorgelo, 725 17th Street NW, Email address: *cristin.a.dorgelo@omb.eop.gov,* telephone number: (202) 456–4066. Because of delays in the receipt of regular mail related to security screening, respondents are encouraged to use electronic communications.

SUPPLEMENTARY INFORMATION: Section 2 of Executive Order 14042 (''Executive Order 14042'' or the ''order'') requires that, before Federal contractors and subcontractors must adhere to any guidance from the Task Force, the Director of OMB must approve such guidance and determine that such guidance will promote economy and efficiency in Federal contracting if adhered to by Government contractors and subcontractors. Based on my review of the Task Force's COVID–19 Workplace Safety: Guidance for Federal Contractors and Subcontractors, scheduled for issuance on November 10, 2021 (reproduced in relevant part in Part I below), as well as the economy-and-efficiency analysis presented in Part II below, and exercising the President's authority under the Federal Property and Administrative Services Act (see 3 U.S.C. 301) delegated to me through Executive Order 14042, I approve the Guidance and have determined that the COVID–19-workplace safety protocols detailed in that Guidance will promote economy and efficiency in Federal contracting if adhered to by Government contractors and subcontractors. This notice accordingly rescinds and supersedes my prior notice issued on September 24, 2021. 86 FR 53691.

This notice consists of the following sections. Part I consists of revised Guidance from the Task Force. Part II consists of an economic analysis of the COVID–19-workplace safety protocols detailed in such Guidance and the effect on economy and efficiency in Federal procurement. Part III addresses procedural requirements.

Part I. Safer Federal Workforce Task Force Guidance

On September 9, President Biden announced his Path Out of the Pandemic: COVID–19 Action Plan. One of the main goals of this science-based plan is to get more people vaccinated. As part of that plan, the President signed Executive Order 14042, Ensuring Adequate COVID Safety Protocols for Federal Contractors, which directs executive departments and agencies, including independent establishments subject to the Federal Property and Administrative Services Act, 40 U.S.C. 102(4)(A), to ensure that covered contracts and contract-like instruments include a clause (''the clause'') that the contractor and any subcontractors (at any tier) shall incorporate into lower-tier subcontracts. This clause shall specify that the contractor or subcontractor shall, for the duration of the contract, comply with all guidance for contractor or subcontractor workplace locations published by the Task Force, provided that the Director of OMB approves the Task Force Guidance and determines that the Guidance, if adhered to by covered contractors, will promote economy and efficiency in Federal contracting.

The actions directed by the order will ensure that parties who contract with the Federal Government provide COVID–19 safeguards in workplaces with individuals working on or in connection with a Federal Government contract or contract-like instrument. These workplace safety protocols will apply to all covered contractor employees, including contractor or subcontractor employees in covered contractor workplaces who are not working on a Federal Government contract or contract-like instrument. These safeguards will decrease the spread of SARS–CoV–2, the virus that causes COVID–19, which will decrease worker absence, reduce labor costs, and improve the efficiency of contractors and subcontractors performing work for the Federal Government.

Pursuant to this Guidance, and in addition to any requirements or workplace safety protocols that are applicable because a contractor or subcontractor employee is present at a Federal workplace, Federal contractors and subcontractors with a covered contract will be required to conform to the following workplace safety protocols:

1. COVID–19 vaccination of covered contractor employees, except in limited circumstances where an employee is legally entitled to an accommodation;

2. Compliance by individuals, including covered contractor employees and visitors, with the Guidance related to masking and physical distancing while in covered contractor workplaces; and

3. Designation by covered contractors of a person or persons to coordinate COVID–19 workplace safety efforts at covered contractor workplaces.

The order also sets out a process for OMB and the Safer Federal Workforce Task Force to update the Guidance for covered contractors, which the Task Force will consider doing based on future changes to Centers for Disease Control and Prevention (''CDC'') COVID–19 guidance and as warranted by the circumstances of the pandemic and public health conditions. It also sets out a process for the Federal Acquisition

Regulatory Council (''FAR Council'') to implement such protocols and guidance for covered Federal procurement solicitations and contracts subject to the Federal Acquisition Regulation (''FAR'') and for agencies that are responsible for covered contracts and contract-like instruments not subject to the FAR to take prompt action to ensure that those covered contracts and contract-like instruments include the clause, consistent with the order.

Covered contractors shall adhere to the requirements of this Guidance.

A. Definitions

Community transmission—means the level of community transmission as set forth in the CDC COVID–19 Data Tracker County View.[1]

Contract and contract-like instrument—has the meaning set forth in the Department of Labor's proposed rule, ''Increasing the Minimum Wage for Federal Contractors,'' 86 FR 38816, 38887 (July 22, 2021). If the Department of Labor issues a final rule relating to that proposed rule, this term shall have the meaning set forth in that final rule.

That proposed rule defines a contract or contract-like instrument as an agreement between two or more parties creating obligations that are enforceable or otherwise recognizable at law. This definition includes, but is not limited to, a mutually binding legal relationship obligating one party to furnish services (including construction) and another party to pay for them. The term contract includes all contracts and any subcontracts of any tier thereunder, whether negotiated or advertised, including any procurement actions, lease agreements, cooperative agreements, provider agreements, intergovernmental service agreements, service agreements, licenses, permits, or any other type of agreement, regardless of nomenclature, type, or particular form, and whether entered into verbally or in writing. The term contract shall be interpreted broadly as to include, but not be limited to, any contract within the definition provided in the FAR at 48 CFR chapter 1 or applicable Federal statutes. This definition includes, but is not limited to, any contract that may be covered under any Federal procurement statute. Contracts may be the result of competitive bidding or awarded to a single source under applicable authority to do so. In addition to bilateral instruments, contracts include, but are not limited to, awards and notices of awards; job orders or task letters issued under basic ordering agreements; letter contracts; orders, such as purchase orders, under which the contract becomes effective by written acceptance or performance; exercised contract options; and bilateral contract modifications. The term contract includes contracts covered by the Service Contract Act, contracts covered by the Davis-Bacon Act, concessions contracts not otherwise subject to the Service Contract Act, and contracts in connection with Federal property or land and related to offering services for Federal employees, their dependents, or the general public.

Contractor or subcontractor workplace location—means a location where covered contract employees work, including a covered contractor workplace or Federal workplace.

Covered contract—means any contract or contract-like instrument that includes the clause described in Section 2(a) of the order.

Covered contractor—means a prime contractor or subcontractor at any tier who is party to a covered contract.

Covered contractor employee—means any full-time or part-time employee of a covered contractor working on or in connection with a covered contract or working at a covered contractor workplace. This includes employees of covered contractors who are not themselves working on or in connection with a covered contract.

Covered contractor workplace—means a location controlled by a covered contractor at which any employee of a covered contractor working on or in connection with a covered contract is likely to be present during the period of performance for a covered contract. A covered contractor workplace does not include a covered contractor employee's residence.

Federal workplace—means any place, site, installation, building, room, or facility in which any Federal executive department or agency conducts official business, or is within an executive department or agency's jurisdiction, custody, or control.

Fully vaccinated—people are considered fully vaccinated for COVID–19 two weeks after they have received the second dose in a two-dose series, or two weeks after they have received a single-dose vaccine.[2] There is currently no post-vaccination time limit on fully vaccinated status; should such a limit be determined by the Centers for Disease Control and Prevention, that limit will be considered by the Task Force and OMB for possible updating of this Guidance.

For purposes of this Guidance, people are considered fully vaccinated if they have received COVID–19 vaccines currently approved or authorized for emergency use by the U.S. Food and Drug Administration (Pfizer-BioNTech, Moderna, and Johnson & Johnson [J&J]/Janssen COVID–19 vaccines) or COVID–19 vaccines that have been listed for emergency use by the World Health Organization (*e.g.,* AstraZeneca/Oxford). More information is available at Interim Clinical Considerations for Use of COVID–19 Vaccines | CDC.[3]

Clinical trial participants from a U.S. site who are documented to have received the full series of an ''active'' (not placebo) COVID–19 vaccine candidate, for which vaccine efficacy has been independently confirmed (*e.g.,* by a data and safety monitoring board), can be considered fully vaccinated two weeks after they have completed the vaccine series. Currently, the Novavax COVID–19 vaccine meets these criteria. More information is available at the CDC website.[4]

Mask—means any mask that is consistent with CDC recommendations.[5] This may include the following: Disposable masks, masks that fit properly (snugly around the nose and chin with no large gaps around the sides of the face), masks made with breathable fabric (such as cotton), masks made with tightly woven fabric (*i.e.,* fabrics that do not let light pass through when held up to a light source), masks with two or three layers, masks with inner filter pockets, and filtering facepiece respirators that are approved by the National Institute for Occupational Safety and Health or consistent with international standards. The following do not constitute masks for purposes of this Guidance: Masks with exhalation valves, vents, or other openings; face shields only (without mask); or masks with single-layer fabric or thin fabric that does not block light.

B. Requirements

Covered contractors are responsible for ensuring that covered contractor employees comply with the workplace

[2] CDC, When You've Been Fully Vaccinated (last updated Oct. 15, 2021), *https://www.cdc.gov/coronavirus/2019-ncov/vaccines/fully-vaccinated.html.*

[3] CDC, Interim Clinical Considerations for Use of COVID–19 Vaccines, *https://www.cdc.gov/vaccines/covid-19/clinical-considerations/covid-19-vaccines-us.html.*

[4] CDC, People who received COVID–19 vaccine as part of a clinical trial in the United States, *https://www.cdc.gov/vaccines/covid-19/clinical-considerations/covid-19-vaccines-us.html#vaccinated-part-clinical-trail.*

[5] CDC, Types of Masks and Respirators (Sept. 23, 2021), *https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/types-of-masks.html.*

safety protocols detailed below. Covered contractor employees must also comply with agency COVID–19 workplace safety requirements while in Federal workplaces.

Consistent with applicable law, agencies are strongly encouraged to incorporate a clause requiring compliance with this Guidance into contracts that are not covered or directly addressed by the order because the contract is under the Simplified Acquisition Threshold as defined in section 2.101 of the FAR or is a contract or subcontract for the manufacturing of products.

Agencies are also strongly encouraged to incorporate a clause requiring compliance with this Guidance into existing contracts and contract-like instruments prior to the date upon which the order requires inclusion of the clause.

1. Vaccination of Covered Contractor Employees, Except in Limited Circumstances Where an Employee Is Legally Entitled to an Accommodation

Covered contractors must ensure that all covered contractor employees are fully vaccinated for COVID–19, unless the employee is legally entitled to an accommodation. Covered contractor employees must be fully vaccinated no later than January 18, 2022. After that date, all covered contractor employees must be fully vaccinated by the first day of the period of performance on a newly awarded covered contract, and by the first day of the period of performance on an exercised option or extended or renewed contract when the clause has been incorporated into the covered contract.

A covered contractor may be required to provide an accommodation to covered contractor employees who communicate to the covered contractor that they are not vaccinated against COVID–19 because of a disability (which would include medical conditions) or because of a sincerely held religious belief, practice, or observance. A covered contractor should review and consider what, if any, accommodation it must offer. Requests for ''medical accommodation'' or ''medical exceptions'' should be treated as requests for a disability accommodation.

Should a Federal agency have an urgent, mission-critical need for a covered contractor to have covered contractor employees begin work on a covered contract or at a covered workplace before becoming fully vaccinated, the agency head may approve an exception for the covered contractor—in the case of such limited exceptions, the covered contractor must ensure these covered contractor employees are fully vaccinated within 60 days of beginning work on a covered contract or at a covered workplace. The covered contractor must further ensure that such employees comply with masking and physical distancing requirements for not fully vaccinated individuals in covered workplaces prior to being fully vaccinated.

The covered contractor must review its covered employees' documentation to prove vaccination status. Covered contractors must require covered contractor employees to show or provide their employer with one of the following documents: A copy of the record of immunization from a health care provider or pharmacy, a copy of the COVID–19 Vaccination Record Card (CDC Form MLS–319813_r, published on September 3, 2020), a copy of medical records documenting the vaccination, a copy of immunization records from a public health or State immunization information system, or a copy of any other official documentation verifying vaccination with information on the vaccine name, date(s) of administration, and the name of health care professional or clinic site administering vaccine. Covered contractors may allow covered contractor employees to show or provide to their employer a digital copy of such records, including, for example, a digital photograph, scanned image, or PDF of such a record.

The covered contractor shall ensure compliance with the requirements in this Guidance related to the showing or provision of proper vaccination documentation.

Covered contractors are strongly encouraged to incorporate similar vaccination requirements into their non-covered contracts and agreements with non-covered contractors whose employees perform work at covered contractor workplaces but who do not work on or in connection with a Federal contract, such as those contracts and agreements related to the provision of food services, onsite security, or groundskeeping services at covered contractor workplaces.

2. Requirements Related To Masking and Physical Distancing While in Covered Contractor Workplaces

Covered contractors must ensure that all individuals, including covered contractor employees and visitors, comply with published CDC guidance for masking and physical distancing at a covered contractor workplace, as discussed further in this Guidance.

In addition to the guidance set forth below, CDC's guidance for mask wearing and physical distancing in specific settings, including healthcare, transportation, correctional and detention facilities, and schools, must be followed, as applicable.

In areas of high or substantial community transmission, fully vaccinated people must wear a mask in indoor settings, except for limited exceptions discussed in this Guidance. In areas of low or moderate community transmission, fully vaccinated people do not need to wear a mask. Fully vaccinated individuals do not need to physically distance regardless of the level of transmission in the area.

Individuals who are not fully vaccinated must wear a mask indoors and in certain outdoor settings (see below) regardless of the level of community transmission in the area. To the extent practicable, individuals who are not fully vaccinated should maintain a distance of at least six feet from others at all times, including in offices, conference rooms, and all other communal and work spaces.

Covered contractors must require individuals in covered contractor workplaces who are required to wear a mask to:

- Wear appropriate masks consistently and correctly (over mouth and nose).
- Wear appropriate masks in any common areas or shared workspaces (including open floorplan office space, cubicle embankments, and conference rooms).
- For individuals who are not fully vaccinated, wear a mask in crowded outdoor settings or during outdoor activities that involve sustained close contact with other people who are not fully vaccinated, consistent with CDC guidance.

A covered contractor may be required to provide an accommodation to covered contractor employees who communicate to the covered contractor that they cannot wear a mask because of a disability (which would include medical conditions) or because of a sincerely held religious belief, practice, or observance. A covered contractor should review and consider what, if any, accommodation it must offer.

Covered contractors may provide for exceptions to mask wearing and/or physical distancing requirements consistent with CDC guidelines, for example, when an individual is alone in an office with floor to ceiling walls and a closed door, or for a limited time when eating or drinking and maintaining appropriate distancing. Covered contractors may also provide

exceptions for covered contractor employees engaging in activities in which a mask may get wet; high intensity activities where covered contractor employees are unable to wear a mask because of difficulty breathing; or activities for which wearing a mask would create a risk to workplace health, safety, or job duty as determined by a workplace risk assessment.[6] Any such exceptions must be approved in writing by a duly authorized representative of the covered contractor to ensure compliance with this Guidance at covered contractor workplaces, as discussed further below.

Masked individuals may be asked to lower their masks briefly for identification purposes in compliance with safety and security requirements.

Covered contractors must check the CDC COVID–19 Data Tracker County View website for community transmission information in all areas where they have a covered contractor workplace at least weekly to determine proper workplace safety protocols.[7] When the level of community transmission in the area of a covered contractor workplace increases from low or moderate to substantial or high, contractors and subcontractors should put in place more protective workplace safety protocols consistent with published guidelines. However, when the level of community transmission in the area of a covered contractor workplace is reduced from high or substantial to moderate or low, the level of community transmission must remain at that lower level for at least two consecutive weeks before the covered contractor utilizes those protocols recommended for areas of moderate or low community transmission.

3. Designation by Covered Contractors of a Person or Persons To Coordinate COVID–19 Workplace Safety Efforts at Covered Contractor Workplaces

Covered contractors shall designate a person or persons to coordinate implementation of and compliance with this Guidance and the workplace safety protocols detailed herein at covered contractor workplaces. The designated person or persons may be the same individual(s) responsible for implementing any additional COVID–19 workplace safety protocols required by local, State, or Federal law, and their responsibilities to coordinate COVID–19 workplace safety protocols may comprise some or all of their regular duties.

The designated individual (or individuals) must ensure that information on required COVID–19 workplace safety protocols is provided to covered contractor employees and all other individuals likely to be present at covered contractor workplaces, including by communicating the required workplace safety protocols and related policies by email, websites, memoranda, flyers, or other means and posting signage at covered contractor workplaces that sets forth the requirements and workplace safety protocols in this Guidance in a readily understandable manner. This includes communicating the COVID–19 workplace safety protocols and requirements related to masking and physical distancing to visitors and all other individuals present at covered contractor workplaces. The designated individual (or individuals) must also ensure that covered contractor employees comply with the requirements in this Guidance related to the showing or provision of proper vaccination documentation.

Frequently Asked Questions

Frequently Asked Questions regarding this Guidance can be found here: *https://www.saferfederalworkforce.gov/faq/contractors/.*

All Task Force Guidance, FAQs, and additional information for Federal contractors and subcontractors can be found here: *https://www.saferfederalworkforce.gov/contractors/.*

Part II. Economy-and-Efficiency Analysis

The following analysis outlines the ways in which the Guidance set forth in Part I will promote economy and efficiency in Federal procurement.

The Guidance requires vaccination of covered contractor employees, except in limited circumstances where an employee is legally entitled to an accommodation. It imposes requirements related to masking and physical distancing in covered contractor workplaces. And it requires covered contractors to designate a person or persons to coordinate COVID–19 workplace safety efforts at covered contractor workplaces.

The Guidance is issued pursuant to Executive Order 14042, which the President promulgated, in part, under the Federal Property and Administrative Services Act (FPASA). The FPASA, 40 U.S.C. 101 *et seq.* provides that the President ''may prescribe policies and directives that the President considers necessary to carry out'' the Act, which includes a purpose of ''provid[ing] the Federal Government with an economical and efficient system for . . . [p]rocuring and supplying property and nonpersonal services.'' 40 U.S.C. 101(1), 121(a).

This analysis of the economic impact of the Guidance is based on OMB's subject matter expertise and OMB's review and analysis of the academic literature on interventions to prevent the spread of COVID–19.

As explained below, the overall effect of enacting these protocols for Federal contractors and subcontractors will be to decrease the spread of COVID–19, which will in turn decrease worker absence, save labor costs on net, and thereby improve efficiency in Federal contracting. Indeed, numerous private companies have undertaken vaccine mandates that were announced or take effect before the Federal Government's mandate on Federal contractors takes effect and private companies have also imposed masking and physical distancing requirements at their workplaces. Just as these private businesses have concluded that vaccination, masking, and physical distancing requirements will make their operations more efficient and competitive in the market, we have concluded that the Guidance will realize economy and efficiency in Federal contracting.

A. COVID–19 Infection Imposes Significant Costs on Contractors and the Federal Government

The primary goal of the safety protocols is to reduce the spread of COVID–19 among contractor employees. COVID–19 is a highly communicable disease that tends to spread between people who are indoors, sharing space, and in close quarters—conditions common in typical workplaces.[8] There is also evidence that COVID–19 can be spread by asymptomatic individuals. One study estimated that more than half of transmissions come from individuals who do not have symptoms (Johansson et al., 2021). Individuals who do not have symptoms are likely to continue to report to work and therefore may spread the disease to their coworkers. As such, safety protocols applied even in the absence of observable illness among employees can meaningfully reduce the spread of COVID–19. Moreover, because employees working at a single workplace will regularly come into contact, safety protocols applied to all

[6] OSHA, Recommended Practices for Safety and Health Programs, *https://www.osha.gov/safety-management.*

[7] CDC, COVID–19 Integrated County View, *https://covid.cdc.gov/covid-data-tracker/#county-view.*

[8] See U.S. Environmental Protection Agency, Indoor Air and Coronavirus (COVID–19), *https://www.epa.gov/coronavirus/indoor-air-and-coronavirus-covid-19.*

employees in a workplace can meaningfully reduce the spread of COVID–19.

The CDC recommends that individuals remain isolated for ten days after symptom onset, which would mean workers who catch the virus can miss up to eight days of work.[9] Furthermore, those individuals could infect other workers, who would also miss eight days of work. Additional exposed workers would likely need to quarantine and would also miss work.

Workers unable to work generate substantial costs on employers. An imperfect proxy for the cost to an employer of a foregone hour of work is the worker's hourly pay. We calculate the average hourly wage for a Federal contractor to be approximately $31.51, making the average pay for eight days $2,016.[10] Wages are higher in Washington, DC, Maryland and Virginia, where many contractors are located, ranging from $33.36 in Virginia to $42.83 in Washington, DC, making the average pay for eight days in those areas $2,135 and $2,741, respectively. Such costs are substantial and, if borne by contractors, such costs would be expected to be passed on to the Federal Government, either in direct cost or lower quality, including delays.

Fortunately, vaccines, masks, and physical distancing have all been proven to reduce the prevalence of COVID–19 infection, and vaccines have been shown to greatly reduce the severity of breakthrough infections. And vaccines, masking, and physical distancing are all low-cost interventions.

B. COVID–19 Vaccination Reduces Net Costs

Requiring any workers who have not yet done so to receive a COVID–19 vaccine would generate meaningful efficiency gains for Federal contractors. COVID–19 vaccines provide strong and persistent protection against infection, illness, and hospitalization (see Tenforde, et al., 2021 and references). Reducing the number of infected people mechanically reduces transmission, and some preliminary evidence also indicates that vaccines also reduce transmission by people who contract ''breakthrough'' infections (Ke, et al., 2021). The vaccine requirement in the Guidance buttresses other workplace-specific safety protocols and provides protection against infection outside of the workplace, increasing the likelihood that the full set of protocols will prevent infection and illness and preserve the productivity of people working on or in connection with Federal contracts.[11]

Because vaccines are widely available for free, the cost of implementing a vaccine mandate is largely limited to administrative costs associated with distributing information about the mandate and tracking employees' vaccination status. Such costs are likely to be small.[12] Other costs of vaccination include employees quitting and using sick time when experiencing side effects from vaccination. However, based on experiences shared by private companies detailed below, we expect few employees to quit because of the vaccine mandate, and side effects lead to significantly less sick leave than COVID–19 infection. And unlike COVID–19 infection, side effects are not contagious to other employees.

Consistent with the view that COVID–19 vaccines promote economy and efficiency, numerous private companies have undertaken vaccine mandates that were announced or take effect before the Federal Government's mandate on Federal contractors takes effect. Led originally by companies like United Airlines and Tyson Foods, a wide and growing swath of private companies have determined that vaccine mandates are net beneficial to their companies.[13]

While anecdotal reports suggest that vaccine mandates may lead some workers to quit their jobs rather than comply, which could create some cost associated with replacing them, we know of no systematic evidence that this has been a widespread phenomenon, or that it would be likely to occur among employees of Federal contractors. In fact, the experience of private companies is to the contrary. For example, United Airlines reported in October 2021 that 99.7 percent of the airline's workforce complied with the vaccination requirements, Tyson Foods reported more than 96 percent of its workforce is now vaccinated, and healthcare providers such as California's Kaiser Permanente reported placing only two percent of employees on administrative leave for failing to comply with vaccine requirements.[14] And finally, even if some non-negligible number of workers were to quit rather than comply with a vaccine mandate, the cost of replacing those workers would be a one-time cost, while the benefits of increased vaccination (including among replacement workers, who would be vaccinated) would be long-lasting.

C. Masking and Physical Distancing Reduces Net Costs

COVID–19 is generally thought to be spread by respiratory particles and aerosols.[15] Masking and physical distancing have proven effective in reducing the spread of COVID–19. One study found that communities with the greatest physical distancing had a 31 percent lower risk of COVID–19 than communities with poor physical distancing, and that communities where individuals reported always using face masks outside of the home, even with poor physical distancing, had 62 percent reduced risk of COVID–19 compared to communities where face masks were never worn (Kwon et al., 2020). Another study found that full population masking reduces transmission of the virus by 25.8 percent (Leech et al., 2021). Similarly, a study of masking and ventilation improvements in Georgia schools found that COVID–19 incidence was 37 percent lower in schools where masks were required and 39 percent lower in schools with improved ventilation

[9] See Centers for Disease Control and Prevention, Recommendations for Ending Isolation (last updated Sept. 14, 2021), *https://www.cdc.gov/coronavirus/2019-ncov/hcp/duration-isolation.html#anchor_1631308518116.*

[10] This calculation uses the distribution of NAICS codes in the contractor population and average salary of those NAICS codes from the Occupational Employment and Wage Statistics program at the Bureau of Labor Statistics, *https://www.bls.gov/oes/.*

[11] Note that the other safety protocols discussed above will still be appropriate even after the vaccine requirement is implemented, *e.g.,* to protect against breakthrough infections and emerging variants of the virus, or for the benefit of workers who may be unable to receive a vaccine for medical or religious reasons, until such time as public health conditions improve and CDC guidance related to masking and physical distancing changes.

[12] For example, the Occupational Safety and Health Administration estimated that providing information would take ten minutes per firm (84 FR 61476 cl. 3) and that tracking employees' vaccination status would take five minutes per employee (id. 84 FR 61488 cl. 2).

[14] COVID Vaccine Some 5 Percent of Unvaccinated Adults Have Quit Their Jobs Over a Mandate Survey Shows CNBC (Oct. 28, 2021), *https://www.cnbc.com/2021/10/28/covid-vaccine-some-5percent-of-unvaccinated-adults-have-quit-their-jobs-over-a-mandate-survey-shows.html;* How Tyson Foods Got 60,500 Workers to Get the Coronavirus Vaccine Quickly, N.Y. Times (Nov. 4, 2021), *https://www.nytimes.com/2021/11/04/business/tyson-vaccine-mandate.html.* Vaccine mandates stoked fears of labor shortages. But hospitals say they're working, Washington Post (Oct. 16, 2021), *https://www.washingtonpost.com/health/2021/10/16/hospital-covid-vaccine-mandate/.*

[15] CDC, Prevent Getting Sick: How COVID Spreads (last updated July 14, 2021), *https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/how-covid-spreads.html.*

(Gettings et al., 2021). This research shows that masking, physical distancing, and improved ventilation will all reduce the likelihood that COVID–19 spreads among the contractor workforce. These preventative measures will decrease worker absence and allow contract workers to continue their work without the need to take time off to recover from COVID–19. Thus, mask wearing and physical distancing are likely to reduce the spread of COVID–19 within contractor workplaces, reducing worker absence and maintaining productivity.

The costs of masking and physical distancing are minimal. For example, contractors may have to pay for masks for their employees. Masks can cost as little as $0.13 per mask and would need to be provided only to employees who do not already have their own masks.[16] Physical distancing can often be done without additional costs. Numerous private companies like Walmart require all employees to wear masks and physically distance, embodying a judgment that these mitigation measures promote economy and efficiency in the workplace.[17]

D. Conclusion

For these reasons, it is OMB's expert opinion that the Guidance will promote economy and efficiency in Federal Government procurement. All plans for economic recovery and growth are predicated on the need to prevent additional spread of the COVID–19 virus and facilitate vaccinations, and no employer, whether public or private, can expect to see increased productivity or economic efficiency without a healthy workforce. The safety protocols that are set forth by the Safer Federal Workforce Task Force are meant to ensure that COVID–19 does not easily spread within the workplace, so that Federal contractor employees can continue to be productive.

Part III. Procedural Requirements

A. Public Contract Requirements Under Public Law 111–350

I am making my determination pursuant to a Presidential delegation under 3 U.S.C. 301. That determination is therefore not subject to the procedural requirements of Public Law 111–350, codified at 41 U.S.C. 1707. *See NRDC, Inc.* v. *U.S. Dep't of State,* 658 F. Supp. 2d 105, 109 & n.5, 111 (D.D.C. 2009) (when an agency acts pursuant to 3 U.S.C. 301, the agency ''stands in the President's shoes'' and that action is ''not reviewable under the APA''); *Detroit Int'l Bridge Co.* v. *Canada,* 189 F. Supp. 3d 85, 100 (D.D.C. 2016) (''Several cases have concluded that an agency's action on behalf of the President, involving discretionary authority committed to the President, is 'presidential' and unreviewable under the APA.''). To the extent that 41 U.S.C. 1707 is applicable to my determination set forth in this document, there are urgent and compelling circumstances that justify departing from the notice-and-comment and delayed-effective-date requirements in 41 U.S.C. 1707.

The notice-and-comment and delayed-effective-date requirements of subsections (a) and (b) of 41 U.S.C. 1707 ''may be waived by the officer authorized to issue a procurement policy, regulation, procedure, or form if urgent and compelling circumstances make compliance with the requirements impracticable.'' 41 U.S.C. 1707(d). This statutory exception is implemented in FAR section 1.501–3, which provides that ''[a]dvance comments need not be solicited when urgent and compelling circumstances make solicitation impracticable prior to the effective date of the coverage, such as when a new statute must be implemented in a relative short period of time.''

Urgent and compelling circumstances justify waiving the notice-and-comment requirement for this notice. This is a once in a generation pandemic, which has already resulted in more than 46,405,253 cases of COVID–19, hospitalized more than 3,283,045 Americans, and taken more than 752,196 American lives. The pandemic continues to present an imminent threat to the health and safety of the American people, including due to the emergence of the B.1.617.2 (Delta) variant, which is a variant of concern that spreads more easily than previously discovered variants of SARS–CoV–2. This threat reaches all Americans, including those working for Federal contractors and subcontractors. The Guidance directly addresses this imminent threat by requiring vaccination. The CDC has determined that the best way to slow the spread of COVID–19, including preventing infection by the Delta variant, is for individuals to get vaccinated. According to the CDC, vaccinated individuals are 5 times less likely to be infected and 10 times less likely to experience hospitalization or death due to COVID–19 than unvaccinated individuals. The Guidance thus promotes the most important, urgent public health measure to slow the spread of COVID–19 among Federal contractors and subcontractors—which is critical to avoiding worker absence and unnecessary labor costs that could hinder the efficiency of federal contracting.

The minimum delay required by subsections (a) and (b) of 41 U.S.C. 1707 is also incompatible with a fundamental purpose of issuing this determination. The Guidance set forth in Part I changes the vaccination deadline for Federal contractors from December 8, 2021, to January 18, 2022. If the determination implementing this change were required to comply with subsections (a) and (b) of 41 U.S.C. 1707 (requiring 30 days for comment, and another 30 days to become effective), the earliest possible effective date for this determination would be January 9, 2022. But waiting until January for this determination to become effective would prevent the change in deadlines from having practical effect, as Federal contractors and subcontractors would still be legally obligated to meet the December 8, 2021, vaccination deadline until this determination became effective. That alone establishes urgent and compelling

[16] Mask costs were taken from a search of Amazon and would likely be lower for a contractor who would be able to order in bulk.

[17] The Major Companies Requiring Workers to Get COVID Vaccines, Fortune (Aug. 23, 2021), *https://fortune.com/2021/08/23/companies-requiring-vaccines-workers-vaccination-mandatory/.*

circumstances to warrant making this determination immediately effective.

Additionally, even if there were no prior deadline that contractors and subcontractors were obligated to meet, urgent and compelling circumstances would still exist because the broader economy-and-efficiency purpose of this determination would be severely undermined by the minimum delay required under subsections (a) and (b) of 41 U.S.C. 1707. As an initial matter, such a delay would interfere with an important purpose of the Task Force Guidance—aligning the vaccination deadline for Federal contractors with the vaccination deadline for private companies under recent regulatory actions. In particular, the Occupational Safety and Health Administration (OSHA) issued an Emergency Temporary Standard (ETS) requiring employers with 100 or more employees to ensure their workers are fully vaccinated or tested for COVID–19 on at least a weekly basis, and the Centers for Medicare & Medicaid Services (CMS) issued a rule requiring health care workers at facilities participating in Medicare and Medicaid to be fully vaccinated. 86 FR 61402; 86 FR 61555. Those rules set a deadline of January 4, 2022, for employees to receive their final COVID–19 vaccination dose—*i.e.,* January 18, 2022, for a fully vaccinated covered workforce. The Task Force's decision to set the same deadline for Federal contractors and subcontractors will make it easier for private employers to administer successful vaccination policies across their workforce and will allow Federal contractors and subcontractors to implement their requirements on the same timeline as other employers in their industries.[18] For example, a large employer covered by the ETS may have some but not all of their workplaces covered by the vaccination requirement for Federal contractors and subcontractors. For such an employer, that would mean some workplaces are governed by the ETS and some by the Task Force Guidance. Or, an employer may have some workers covered by the CMS rule, and other workers covered by the vaccination requirement for Federal contractors and subcontractors. For employers in these circumstances, having the same deadline across all requirements will promote consistency and administrability of public health standards, and eliminate potential confusion and frustration that disparate deadlines could produce. It could also avoid needless costs in having multiple systems of records and internal accountability established for different deadlines. Ensuring that private employers do not need to meet different compliance dates across different Federal vaccination policies is thus important to the success of their vaccination programs and to promoting economy and efficiency in Federal procurement.

Moreover, in order for such alignment to be effective, employers require regulatory certainty in the near-term. An immediately effective notice gives contractors and subcontractors a clear understanding not only of their responsibilities under Federal law but also the deadline for complying with those responsibilities. By contrast, absent an immediately effective determination of that deadline, such employers would have to wait until comments are received and a determination is finalized to know with certainty the deadline for ensuring that their covered employees are fully vaccinated. That would cause much of the administrability problems and frustration that alignment is intended to avoid, undermining the critical efforts to curb the spread of COVID–19 among Federal contractors and subcontractors and preventing alignment of the relevant deadlines.

Compliance with the procedural requirements of 41 U.S.C. 1707(a) and 1707(b) would fundamentally undermine the effort to provide private companies with aligned deadlines and regulatory certainty, as outlined above. As noted above, under those requirements the earliest effective date for this determination would be January 9, 2022. Simply put, that is far too late to provide regulatory certainty for Federal contractors, as that is *past* the date that covered employees of covered Federal contractors must receive their final COVID–19 vaccination dose (January 4, 2022), and it is less than ten days before the deadline for covered contractor employees to be fully vaccinated (January 18, 2022). Thus, compliance with the procedural requirements of 41 U.S.C. 1707(a) and 1707(b) would undermine the success of the Federal Government's vaccination efforts and economy and efficiency in Federal procurement.

Thus, to the extent that it is found that my determination is subject to the procedural requirements in 41 U.S.C. 1707, I have concluded that urgent and compelling circumstances exist under section 1707(d). The requirements of this notice are accordingly effective immediately upon filing with the **Federal Register**. Additionally, to the extent that it is found that my determination is subject to the procedural requirements in 41 U.S.C. 1707, this determination is temporary, consistent with section 1707(e). And regardless of whether this determination is subject to the procedural requirements in 41 U.S.C. 1707, I am soliciting comment on all subjects of this determination, which would also be consistent with sections 1707(c) and (e), if those provisions applied.

B. Administrative Procedure Act

My determination is not subject to the procedural rulemaking requirements of the Administrative Procedure Act (APA).

As noted above, this determination is pursuant to a delegation from the President under 3 U.S.C. 301. When any agency acts pursuant to such a delegation, the agency ''stands in the President's shoes'' and its actions ''cannot be subject to judicial review under the APA.'' *NRDC* v. *State,* 658 F. Supp. 2d at 109 & n.5, 111.

Even if the APA were applicable, the notice-and-comment requirements of 5 U.S.C. 553 exempt ''a matter relating to agency management or personnel or to public property, loans, grants, benefits, or contracts.'' 5 U.S.C. 553(a)(2). This determination relates to procurement and contractors—*i.e.,* ''contracts'' under section 553(a)(2)—and is thus exempt from the APA's notice-and-comment requirements.

Moreover, even if the notice-and-comment requirements of 5 U.S.C. 553 were applicable, the good-cause exception is satisfied here. 5 U.S.C. 553(b)(3)(B) waives notice-and-comment requirements if ''the agency for good cause finds'' that compliance would be ''impracticable, unnecessary, or contrary to the public interest.'' Notice and comment is impracticable in situations where delay would result in harm. *See, e.g., Mack Trucks, Inc.* v. *EPA,* 682 F.3d 87, 93 (D.C. Cir. 2012). Applicable procedures are ''[i]mpracticable'' if ''the due and required execution of the agency functions would be unavoidably prevented by its undertaking public rule-making proceedings'' or negotiated rulemaking. *N.J., Dep't of Envtl. Prot.* v. *EPA,* 626 F.2d 1038, 1046 (D.C. Cir. 1980) (quoting S. Doc. No. 248, at 200 (1946)); *see also United States* v. *Cotton,* 760 F. Supp. 2d 116, 129 (D.D.C. 2011). Such ''good cause'' would also exempt an agency from the delayed effective

[18] Unlike the vaccination deadline for covered employees of Federal contractors, the vaccination deadline for Federal employees under Executive Order 14043 does not require alignment with private companies, because there is no subset of private companies also subject to Executive Order 14043. Thus, the exigencies of combatting the global pandemic require maintaining the current vaccination deadline for Federal employees of November 22, 2021.

date under 5 U.S.C. 553(d). For the reasons explained above, notice-and-comment rulemaking and a delayed effective date would be impracticable, because the resulting delay in the effective date would not provide Federal contractors and subcontractors sufficient time to ensure compliance in time for the January 18, 2022, vaccination deadline.

AGENCY: National Endowment for the Arts.

ACTION: Notice of meetings.

SUMMARY: Pursuant to the Federal Advisory Committee Act, as amended, notice is hereby given that 17 meetings of the Arts Advisory Panel to the National Council on the Arts will be held by teleconference or videoconference.

DATES: See the **SUPPLEMENTARY INFORMATION** section for individual meeting times and dates. All meetings are Eastern time and ending times are approximate:

ADDRESSES: National Endowment for the Arts, Constitution Center, 400 7th St. SW, Washington, DC 20506.

FOR FURTHER INFORMATION CONTACT: Further information with reference to these meetings can be obtained from Ms. Sherry P. Hale, Office of Guidelines & Panel Operations, National Endowment for the Arts, Washington, DC 20506; *hales@arts.gov,* or call 202/682–5696.

SUPPLEMENTARY INFORMATION: The closed portions of meetings are for the purpose of Panel review, discussion, evaluation, and recommendations on financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including information given in confidence to the agency. In accordance with the determination of the Chairman of September 10, 2019, these sessions will be closed to the public pursuant to subsection (c)(6) of section 552b of title 5, United States Code.

The upcoming meetings are:

Our Town (review of applications): This meeting will be closed.

Date and time: December 2, 2021; 11:00 a.m. to 1:00 p.m.

Our Town (review of applications): This meeting will be closed.

Date and time: December 2, 2021; 2:30 p.m. to 4:30 p.m.

Arts Education (review of applications): This meeting will be closed.

Date and time: December 3, 2021; 11:30 a.m. to 1:30 p.m.

Arts Education (review of applications): This meeting will be closed.

Date and time: December 3, 2021; 2:30 p.m. to 4:30 p.m.

Our Town (review of applications): This meeting will be closed.

Date and time: December 3, 2021; 11:00 a.m. to 1:00 p.m.

Presenting and Multidisciplinary Works (review of applications): This meeting will be closed.

Date and time: December 6, 2021; 2:00 p.m. to 4:00 p.m.

Museums (review of applications): This meeting will be closed.

Date and time: December 7, 2021; 11:30 a.m. to 1:30 p.m.

Museums (review of applications): This meeting will be closed.

Date and time: December 7, 2021; 2:30 p.m. to 4:30 p.m.

Presenting and Multidisciplinary Works (review of applications): This meeting will be closed.

Date and time: December 7, 2021; 2:00 p.m. to 4:00 p.m.

BILLING CODE 7537–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–201; NRC–2021–0175]

New York State Energy Research and Development Authority; Irradiated Nuclear Fuel Processing Plant; Western New York Nuclear Service Center

AGENCY: Nuclear Regulatory Commission.

ACTION: License amendment; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has issued an

amendment to Facility Provisional Operating License No. CSF–1, issued to New York State Energy Research and Development Authority (NYSERDA), the licensee, for the provisional operation of the Irradiated Nuclear Fuel Processing Plant located at the Western New York Nuclear Service Center (WNYNSC), in Cattaraugus and Erie Counties, New York. The provisional operating license was amended to update the Radiation Protection Program for the Retained Premises of the Licensed Area for ''modernization'' and as requested by the licensee, to clarify the licensee's health and safety responsibilities as the sole licensee.

DATES: The amendment was issued on November 5, 2021.

ADDRESSES: Please refer to Docket ID NRC–2021–0175 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2021–0175. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The ADAMS accession number for each document referenced is provided the first time that it is mentioned in this document.
- *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's Public Document Room (PDR), Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8:00 a.m. and 4:00 p.m. (ET), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Amy Snyder, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone: 301–415–6822, email: *Amy.Snyder@nrc.gov.*

SUPPLEMENTARY INFORMATION: The NRC has issued Amendment No. 33 to Facility Provisional Operating License No. CSF–1, issued to NYSERDA (the license), which revised the Provisional Operating License for the WNYSC, Irradiated Nuclear Fuel Processing Plant (the facility), located in Cattaraugus and Erie Counties, New York. The amendment and related documents are listed in the Safety Evaluation enclosed with the amendment (ADAMS Access No. ML21245A246). The amendment was effective as of the date of its issuance.

The NRC has issued an amendment to Facility Provisional Operating License No. CSF–1. The amendment updates the Radiation Protection Program for the ''retained premises of the licensed area'' for modernization. In addition, as requested by the licensee, the license is amended to clarify the NYSERDA's, the sole licensee, health and safety and other responsibilities under the license. NYSERDA defines the ''retained premises of the licensed area'' as the area consisting of the WNYNSC, not including the U.S. Department of Energy (DOE) West Valley Demonstration Project (WVDP) premises and the State Licensed Disposal Area. Although portions of the site are actively being decommissioned by DOE under the West Valley Demonstration Project Act, 42 U.S.C. 2021a note, Public Law 96–868, 94 Stat. 1347 (1980) (WVDPA), NYSERDA retains responsibility for the portions of the site known as the ''retained premises.''

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in Chapter I of title 10 of the *Code of Federal Regulations* (10 CFR), which are set forth in the license amendment.

A notice of consideration of issuance of amendment and proposed no significant hazards consideration determination and opportunity for hearing in connection with this action was published in the **Federal Register** on March 10, 2021 (86 FR 13762). No request for a hearing or petition for leave to intervene was filed.

Under its regulations, the Commission may issue and make an amendment immediately effective, where it has determined that no significant hazards consideration is involved. The Commission has applied the standards of 10 CFR 50.92 and has made a final determination that the amendment involves no significant hazards consideration. The basis for this determination is contained in the Safety Evaluation related to this action. Accordingly, as previously described, the amendment has been issued and made immediately effective.

The Commission prepared an environmental assessment (86 FR 60919), published on November 4, 2021, related to the action and has concluded that an environmental impact statement is not warranted because there will be no environmental impact attributable to the action beyond that which has been predicted and described in the Commission's final environmental statement for the facility dated November 1, 2021 (ML21245A012).

For further details with respect to this action, see the application for amendment dated March 11, 2020 (ML20076C310), as supplemented by letters dated October 28, 2020 (ML20311A200), July 15, 2021 (ML21202A212), September 10, 2021 (ADAMS Package Accession No. ML21281A019), and email dated October 12, 2021 (ML21286A001).

Dated: November 10, 2021.

For the Nuclear Regulatory Commission.

Bruce A. Watson,

Chief,Reactor Decommissioning Branch,Decommissioning, Uranium Recovery, andWaste Programs,Office of Nuclear Material Safety andSafeguards.

[FR Doc. 2021–24950 Filed 11–15–21; 8:45 am]

BILLING CODE 7590–01–P

PENSION BENEFIT GUARANTY CORPORATION

Privacy Act of 1974; System of Records

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of modified system of records.

SUMMARY: Pursuant to the Privacy Act of 1974 the Pension Benefit Guaranty Corporation (PBGC) is proposing changes to one system of records notice (SORN). PBGC is proposing to amend PBGC 21—Reasonable Accommodation Records. The amendment will expand the authorities for maintenance of the system, the purposes of the system, the categories of individuals covered by the system, the record source categories, and the records contained in the system, to include records of requests for accommodation based on sincerely held religious beliefs, practices, or observances.

DATES: The modified system of records described herein will become effective November 16, 2021.

ADDRESSES: You may submit written comments to PBGC by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the website instructions for submitting comments.
- *Email: reg.comments@pbgc.gov.* Refer to SORN in the subject line.
- *Mail or Hand Delivery:* Regulatory Affairs Division, Office of the General Counsel, Pension Benefit Guaranty Corporation, 1200 K Street NW, Washington, DC 20005.

Commenters are strongly encouraged to submit public comments electronically. PBGC expects to have limited personnel available to process public comments that are submitted on paper through mail. Until further notice, any comments submitted on paper will be considered to the extent practicable.

All submissions must include the agency's name (Pension Benefit Guaranty Corporation, or PBGC) and reference this notice. Comments received will be posted without change to PBGC's website, *http://www.pbgc.gov,* including any personal information provided. Do not submit comments that include any personally identifiable information or confidential business information. Copies of comments may also be obtained by writing to Disclosure Division, Office of the General Counsel, Pension Benefit Guaranty Corporation, 1200 K Street NW, Washington, DC 20005, or calling 202–326–4040 during normal business hours. (TTY users may call the Federal relay service toll-free at 1–800–877–8339 and ask to be connected to 202–326–4040.)

FOR FURTHER INFORMATION CONTACT: Shawn Hartley, Chief Privacy Officer, Pension Benefit Guaranty Corporation, Office of the General Counsel, 1200 K Street NW, Washington, DC 20005, 202–229–6321. For access to any of the PBGC's systems of records, contact D. Camilla Perry, Disclosure Officer, Office of the General Counsel, Disclosure Division, 1200 K Street NW, Washington DC 20005, or by calling 202–229–4040, or go to *https://www.pbgc.gov/about/policies/pg/privacy-at-pbgc/system-of-records-notices.*

SUPPLEMENTARY INFORMATION: PBGC is proposing to amend the authorities for maintenance of the system, purposes of the system, the categories of records contained in the system, the categories of individuals covered by the system, the record source categories, a citation in the Routine Uses section, a citation in the Record Access Procedures section, and a citation in the Contesting Records Procedures section of PBGC 21—Reasonable Accommodation Records.

PBGC is updating the Authority for Maintenance of the System by adding citations to ''42 U.S.C. 2000e *et seq.,* 42 U.S.C. 2000bb *et seq.*'' and adding Chapter 21 from Title 42 of the United States Code and Parts 1605 and 1614 from Title 29 of the Code of Federal Regulations. PBGC is expanding the one of the purposes of the system to allow PBGC to maintain records on individuals who requested or received reasonable accommodation by PBGC because of religious beliefs. PBGC is expanding the Categories of Records Contained in the System to include information concerning the individual's religious belief. PBGC is expanding the Categories of Individuals Covered by the System by adding the words ''or religious belief, practice or observance'' to include accommodation requests based on sincerely held religious beliefs and adding ''equal employment opportunity professionals'' to Record Source Categories. PBGC is also adding the citation to 29 CFR 4902.5 to the Contesting Records Procedures section and a **Federal Register** citation to PBGC's Prefatory Statement on Routine Uses to Routine Use 1. Additionally, upon review, it was noticed that the Routine Uses and the Record Access Procedures sections contained typographical errors. PBGC is amending the Privacy Act citation, changing it from 5 U.S.C. 522a(b) to 5 U.S.C. 552a(b) and fixing an erroneous reference from ''CRF'' to ''CFR.''

A report has been sent to Congress and the Office of Management and Budget for their evaluation.

For the convenience of the public, PBGC's amended system of records is published in full below with changes italicized.

Issued in Washington, DC.

Gordon Hartogensis,

Director, Pension Benefit Guaranty Corporation.

SYSTEM NAME AND NUMBER:

PBGC—21: Reasonable Accommodation Records

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Pension Benefit Guaranty Corporation, 1200 K Street NW, Washington, DC 20005. (Records may be kept at an additional location as backup for continuity of operations.)

SYSTEM MANAGER(S) AND ADDRESS:

Reasonable Accommodations Coordinator, Human Resources Department, PBGC, 1200 K Street NW, Washington, DC 20005.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

29 U.S.C. 1302; 44 U.S.C. 3101; 5 U.S.C. 301; 29 U.S.C. 701 *et seq.;* 29 U.S.C. 791; 42 U.S.C. 12101 *et seq.; 42 U.S.C. 2000e et seq.; 42 U.S.C. 2000bb;* 42 U.S.C. Ch. *21,* 126; 29 CFR Part*s 1605, 1614,* 1630; Executive Order 13164 (July 26, 2000); and Executive Order 13548 (July 26, 2010).

PURPOSE(S) OF THE SYSTEM:

The purposes of this system are: (1) To allow PBGC to collect and maintain records on prospective, current, and former employees with disabilities *or sincerely held religious beliefs, practices, or observances* who requested or received reasonable accommodation by PBGC; (2) to track and report the processing of requests for reasonable accommodation PBGC-wide to comply with applicable law and regulations; and (3) to maintain the confidentiality of medical *or religious* information submitted by or on behalf of applicants or employees requesting reasonable accommodation.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Prospective, current, and former employees of PBGC who request and/or receive a reasonable accommodation for a disability *or religious belief, practice, or observance* authorized individuals or representatives (*e.g.,* family members, union representatives, or attorneys) who submit a request for a reasonable accommodation on behalf of a prospective, current, or former employee.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name and employment information of current or prospective employee needing an accommodation; requester's name and contact information (if different than the employee who needs an accommodation); date request was initiated; information concerning the nature of the disability *or religious belief, practice, or observance* and the need for accommodation, including appropriate medical *or other* documentation; occupational series; pay grade; essential duties of the position; details of the accommodation request, such as: Type of accommodation requested, how the requested accommodation would assist in job *or allow job* performance *while accommodating the disability or religious belief, practice, or observance,*

the sources of technical assistance consulted in trying to identify alternative reasonable accommodation, any additional information provided by the requester relating to the processing of the request, whether the request was approved or denied, whether the accommodation was approved for a trial period; and, documentation between the employee and his/her supervisor(s) regarding the accommodation.

RECORD SOURCE CATEGORIES:

Subject individuals; individual making the request (if different than the subject individuals); medical *and equal employment opportunity* professionals; and the subject individuals' supervisor(s).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information about covered individuals may be disclosed without consent as permitted by the Privacy Act of 1974, 5 U.S.C. *552*a(b), and:

1. General Routine Uses G1 through G14 apply to this system of records (see Prefatory Statement of General Routine Uses *at 83 FR 6247 (Feb. 13, 2018)*).

2. A record from this system may be disclosed to physicians or other medical professionals to provide them with or obtain from them the necessary medical documentation and/or certification for reasonable accommodation.

3. A record from this system may be disclosed to another federal agency or commission with responsibility for labor or employment relations or other issues, including equal employment opportunity and reasonable accommodation issues, when that agency or commission has jurisdiction over reasonable accommodation issues.

4. A record from this system may be disclosed to the Office of Management and Budget (OMB), Department of Labor (DOL), Office of Personnel Management (OPM), Equal Employment Opportunity Commission (EEOC), or Office of Special Counsel (OSC) to obtain advice regarding statutory, regulatory, policy, and other requirements related to reasonable accommodation.

5. A record from this system may be disclosed to appropriate third-parties contracted by the Agency to facilitate mediation or other dispute resolution procedures or programs.

6. A record from this system may be disclosed to the Department of Defense (DOD) for purposes of procuring assistive technologies and services through the Computer/Electronic Accommodation Program in response to a request for reasonable accommodation.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records are maintained manually in paper and/or electronic form (including computer databases or discs). Records may also be maintained on back-up tapes, or on a PBGC or a contractor-hosted network.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records are retrieved by any one or more of the following: Employee name or assigned case number.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records are maintained and destroyed in accordance with the National Archives and Record Administration's (NARA) Basic Laws and Authorities (44 U.S.C. 3301, *et seq.*) or a PBGC records disposition schedule approved by NARA. Records existing on paper are destroyed beyond recognition.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

PBGC has established security and privacy protocols that meet the required security and privacy standards issued by the National Institute of Standards and Technology (NIST). Records are maintained in a secure, password protected electronic system that utilizes security hardware and software to include multiple firewalls, active intruder detection, and role-based access controls. PBGC has adopted appropriate administrative, technical, and physical controls in accordance with PBGC's security program to protect the confidentiality, integrity, and availability of the information, and to ensure that records are not disclosed to or accessed by unauthorized individuals.

Electronic records are stored on computer networks, which may include cloud-based systems, and protected by controlled access with Personal Identity Verification (PIV) cards, assigning user accounts to individuals needing access to the records and by passwords set by authorized users that must be changed periodically.

RECORD ACCESS PROCEDURES:

Individuals, or third parties with written authorization from the individual, wishing to request access to their records in accordance with 29 CFR 4902.4 or to amend records pertaining to themselves in accordance with 29 CFR 4902.5, should submit a written request to the Disclosure Officer, PBGC, 1200 K Street NW, Washington, DC 20005, providing their name, address, date of birth, and verification of their identity in accordance with 29 CFR 4902.3(c).

CONTESTING RECORD PROCEDURES:

Individuals, or third parties with written authorization from the individual, wishing to *amend, in accordance with 29 CFR 4902.5,* their records must submit a written request identifying the information they wish to correct in their file, in addition to following the requirements of the Record Access Procedure above

NOTIFICATION PROCEDURES:

Individuals, or third parties with written authorization from the individual, wishing to learn whether this system of records contains information about them should submit a written request to the Disclosure Officer, PBGC, 1200 K Street NW, Washington, DC 20005, providing their name, address, date of birth, and verification of their identity in accordance with 29 CFR 4902.3(c).

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

PBGC—21, Reasonable Accommodation Records (last published at 83 FR 6271 (February 13, 2018)).

BILLING CODE 7709–02–P

POSTAL REGULATORY COMMISSION

[Docket Nos. MC2022–19 and CP2022–21]

New Postal Product

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* November 17, 2021.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

II. Docketed Proceeding(s)

I. Introduction

The Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to negotiated service agreement(s). The request(s) may propose the addition or removal of a negotiated service agreement from the market dominant or the competitive product list, or the modification of an existing product currently appearing on the market dominant or the competitive product list.

Section II identifies the docket number(s) associated with each Postal Service request, the title of each Postal Service request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 (Public Representative). Section II also establishes comment deadline(s) pertaining to each request.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.[1]

The Commission invites comments on whether the Postal Service's request(s) in the captioned docket(s) are consistent with the policies of title 39. For request(s) that the Postal Service states concern market dominant product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3622, 39 U.S.C. 3642, 39 CFR part 3030, and 39 CFR part 3040, subpart B. For request(s) that the Postal Service states concern competitive product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3040, subpart B. Comment deadline(s) for each request appear in section II.

II. Docketed Proceeding(s)

1. *Docket No(s).:* MC2022–19 and CP2022–21; *Filing Title:* USPS Request to Add Priority Mail Contract 728 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 9, 2021; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3040.130 through 3040.135, and 39 CFR 3035.105; *Public Representative:* Gregory Stanton; *Comments Due:* November 17, 2021.

This Notice will be published in the **Federal Register**.

Erica A. Barker,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93546; File No. SR–CboeBZX–2021–075]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Reflect a Modification to the Permitted Components of the Tracking Baskets of the Invesco Real Assets ESG ETF and Invesco US Large Cap Core ETF

November 9, 2021.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 2, 2021, Cboe BZX Exchange, Inc. (the ''Exchange'' or ''BZX'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Exchange, Inc. (the ''Exchange'' or ''BZX'') proposes to reflect an amendment to the Reference Order relied upon by the Invesco Real Assets ESG ETF and Invesco US Large Cap Core ESG ETF, shares of which are listed and traded on the Exchange under BZX Rule 14.11(m).

The text of the proposed rule change is also available on the Exchange's website (*http://markets.cboe.com/us/equities/regulation/rule_filings/bzx/*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange adopted BZX Rule 14.11(m) for the purpose of permitting the listing and trading, or pursuant to unlisted trading privileges (''UTP''), of Tracking Fund Shares, which are securities issued by an actively managed open-end management investment company.[3] Exchange Rule 14.11(m)(2)(A) requires the Exchange to file separate proposals under Section 19(b) of the Act before listing and trading any series of Tracking Fund Shares on the Exchange. Pursuant to this provision, the Exchange submitted proposals to list and trade shares (''Shares'') of Tracking Fund Shares of the following funds under BZX Rule 14.11(m): Invesco Real Assets ESG ETF and Invesco US Large Cap Core ESG

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 88887 (May 15, 2020), 85 FR 30990 (May 21, 2020) (SR–CboeBZX–2019–107) (Notice of Filing of Amendment No. 5 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 5, to Adopt Rule 14.11(m), Tracking Fund Shares, and to List and Trade Shares of the Fidelity Blue Chip Value ETF, Fidelity Blue Chip Growth ETF, and Fidelity New Millennium ETF (''Approval Order'')). Rule 14.11(m)(3)(A) provides that ''[t]he term ''Tracking Fund Share'' means a security that (i) represents an interest in an investment company registered under the Investment Company Act of 1940 (''Investment Company'') organized as an open-end management investment company, that invests in a portfolio of securities selected by the Investment Company's investment adviser consistent with the Investment Company's investment objectives and policies; (ii) is issued in a specified aggregate minimum number in return for a deposit of a specified Tracking Basket and/or a cash amount with a value equal to the next determined net asset value; (iii) when aggregated in the same specified minimum number, may be redeemed at a holder's request, which holder will be paid a specified Tracking Basket and/or a cash amount with a value equal to the next determined net asset value; and (iv) the portfolio holdings for which are disclosed within at least 60 days following the end of every fiscal quarter. Rule 14.11(m)(3)(E) provides that ''[t]he term ''Tracking Basket'' means the identities and quantities of the securities and other assets included in a basket that is designed to closely track the daily performance of the Fund Portfolio, as provided in the exemptive relief under the Investment Company Act of 1940 applicable to a series of Tracking Fund Shares.''

ETF (each, a ''Fund'' and, together the ''Funds'').[4]

Among others, Invesco Actively Managed Exchange-Traded Fund Trust (the ''Issuer''), issued a second amended and restated application for an order under Section 6(c) of the 1940 Act for exemptions from various provisions of the 1940 Act and rules thereunder (the ''Application'').[5] On October 27, 2020, the Commission issued an order (the ''Prior Exemptive Order'') under the 1940 Act granting the exemptions requested in the Application.[6] The relief in the Prior Exemptive Order incorporates by reference terms and conditions of the same relief of a previous order granting the same relief sought by applicants, as that order may be amended from time to time (the ''Reference Order'').[7]

Under the Prior Exemptive Order, the Funds are required to publish a basket of securities and cash that, while different from the Fund's portfolio, is designed to closely track its daily performance (*i.e.,* the Tracking Basket). The Prior Exemptive Order provided that the Tracking Basket will solely consist of a combination of (i) select recently disclosed portfolio holdings (''Strategy Components''); (ii) liquid U.S. exchange-traded funds (''ETFs'') that convey information about the types of instruments (that are not otherwise fully represented by the Strategy Components) in which a Fund invests (''Representative ETFs''); and (iii) cash and cash equivalents. Exchange Rule 14.11(m)(4)(B)(iii)(c) provides that the Exchange will consider the suspension of trading in and will commence delisting proceedings for a series of Tracking Fund Shares pursuant to Rule 14.12 if, among other things, the Exchange is aware that the Investment Company is not in compliance with the conditions of any exemptive order or no-action relief granted by the Commission or the Commission staff under the 1940 Act to the Investment Company with respect to the series of Tracking Funds Shares. On August 5, 2021, the Commission issued an amended order to the Reference Order that, among other things, permits the Issuer to include select securities from which a Fund's investment are selected such as a broad-based market index (''Investment Universe'') in the Fund's Tracking Basket (the ''Amended Reference Order'').[8] The Funds will comply with this condition of the Amended Reference Order and the Exchange is updating the listing rule for the Shares accordingly. Except for the change noted above, all other representations made in the rule filing remain unchanged and will continue to constitute continuing listing requirements for the Funds. The Funds will also continue to comply with the requirements of Rule 14.11(m).

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[9] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [10] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The proposed rule change is designed to perfect the mechanism of a free and open market and, in general, to protect investors and the public interest. The proposed revision is intended to reflect the change in the Amended Reference Order that permits the Issuer to include select securities from the Fund's Investment Universe in the Fund's Tracking Basket. The proposed rule change would permit the Funds to operate consistent with the Prior Exemptive Order, which incorporates the Reference Order that may be amended from time to time. Furthermore, Exchange Rule 14.11(m)(4)(B)(iii)(c) provides that the Exchange will consider the suspension of trading in and will commence delisting proceedings for a series of Tracking Fund Shares pursuant to Rule 14.12 if, among other things, the Exchange is aware that the Investment Company is not in compliance with the conditions of any exemptive order or no-action relief granted by the Commission of the Commission Staff under the 1940 Act to the Investment Company with respect to the series of Tracking Funds Shares. By clearly identifying the change in the committed components of each Funds' Tracking Basket, the proposed Rule change will assist the Exchange in complying this aspect of the listing rule, as modified, consistent with section 6(b)(1) of the Act.[11] Except for the changes noted above, all other representations made in the respective rule filings remain unchanged and, as noted, will continue to constitute continuing listing requirements for the Funds.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Act. As noted, the purpose of the filing is to reflect an amendment to the Reference Order governing the listing and trading of these Funds. As noted, the effect of this filing is to allow an adjustment to the components of the Tracking Baskets for each of the Funds. The Exchange believes this will not impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act [12] and subparagraph (f)(6) of Rule 19b–4 thereunder.[13]

[4] *See* Securities Exchange Act Release No. 90686 (December 16, 2020) 85 FR 83657 (December 22, 2020) (SR–CboeBZX–2020–090).

[5] *See* File No. 812–15141, dated September 30, 2020.

[6] *See* Investment Company Act Release No. 34076, October 27, 2020.

[7] The Reference Order refers to the Fidelity Beach Street Trust, et al., Investment Company Act Rel. Nos. 33683 (Nov. 14, 2019) (notice) and 33712 (Dec. 10, 2019) (order).

[8] *See* Investment Company Act Release No. 34350, August 5, 2021.

[9] 15 U.S.C. 78f(b).

[10] 15 U.S.C. 78f(b)(5).

[11] 15 U.S.C. 78f(b)(1).

[12] 15 U.S.C. 78s(b)(3)(A)(iii).

[13] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires the Exchange to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

A proposed rule change filed under Rule 19b–4(f)(6) [14] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[15] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposed rule change may take effect upon filing. The Exchange states that the proposed rule change raises no novel regulatory issues because the Funds will continue to comply with the requirements of BZX Rule 14.11(m). The Exchange also notes that a similar proposal to amend the listing rules of other shares that BZX also lists and trades pursuant to Rule 14.11(m) is currently in effect.[16] For these reasons, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission waives the 30-day operative delay and designates the proposal operative upon filing.[17]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–CboeBZX–2021–075 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–CboeBZX–2021–075. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange.

All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly.

All submissions should refer to File Number SR–CboeBZX–2021–075 and should be submitted on or before December 7, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[18]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act Meetings

TIME AND DATE: Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Public Law 94–409, that the Securities and Exchange Commission will hold an Open Meeting on Wednesday, November 17, 2021 at 11:00 a.m.

PLACE: The meeting will be webcast on the Commission's website at *www.sec.gov.*

STATUS: This meeting will begin at 11:00 a.m. (ET) and will be open to the public via webcast on the Commission's website at *www.sec.gov.*

MATTERS TO BE CONSIDERED:

1. The Commission will consider whether to adopt amendments to the proxy rules relating to the use of universal proxy cards and related disclosures in director elections.

2. The Commission will consider whether to propose amendments to the proxy rules governing proxy voting advice.

CONTACT PERSON FOR MORE INFORMATION: For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact Vanessa A. Countryman from the Office of the Secretary at (202) 551–5400.

Authority: 5 U.S.C. 552b.

Dated: November 10, 2021.

Vanessa A. Countryman,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93545; File No. SR–NYSE–2021–65]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Its Price List

November 9, 2021.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the ''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on November 1, 2021, New York Stock Exchange LLC (''NYSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to to[sic] amend its Price List to (1) eliminate the underutilized additional credits for member organizations that add liquidity in Tape B and C Securities when qualifying for certain non-tier and tiered credits by adding liquidity in Tape A Securities; (2) eliminate the underutilized Adding Tier for Non-Displayed Providers in Tape A Securities; and (3) revise the requirements to qualify for the Tier 5 Adding Credit in Tape A Securities. The Exchange proposes to implement the rule change on November 1, 2021. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Price List to (1) eliminate the underutilized additional credits for member organizations that add liquidity in Tape B and C Securities when qualifying for certain non-tier and tiered credits by adding liquidity in Tape A Securities; (2) eliminate the underutilized Adding Tier for Non-Displayed Providers in Tape A Securities; and (3) revise the requirements to qualify for the Tier 5 Adding Credit in Tape A Securities.

The proposed revision to the Tier 5 Adding Credit responds to the current competitive environment where order flow providers have a choice of where to direct liquidity-providing orders by offering further incentives for member organizations to send additional displayed liquidity to the Exchange.

The Exchange proposes to implement the rule change on November 1, 2021.

Current Market and Competitive Environment

The Exchange operates in a highly competitive market. The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [4]

As the Commission itself has recognized, the market for trading services in NMS stocks has become ''more fragmented and competitive.'' [5] Indeed, equity trading is currently dispersed across 16 exchanges,[6] 31 alternative trading systems,[7] and numerous broker-dealer internalizers and wholesalers. Based on publicly-available information, no single exchange has more than 18% of the market.[8] Therefore, no exchange possesses significant pricing power in the execution of equity order flow. More specifically, the Exchange's share of executed volume of equity trades in Tapes A, B and C securities is less than 12%.[9]

The Exchange believes that the ever-shifting market share among the exchanges from month to month demonstrates that market participants can move order flow, or discontinue or reduce use of certain categories of products, in response to fee changes. With respect to non-marketable order flow that would provide displayed liquidity on an Exchange, member organizations can choose from any one of the numerous currently operating registered exchanges to route such order flow. Accordingly, competitive forces constrain exchange transaction fees that relate to orders that would provide liquidity on an exchange.

Proposed Rule Change

The Exchange proposes to eliminate certain underutilized additional credits for adding liquidity in Tape B and C Securities and the underutilized Adding Tier for Non-Displayed Providers in Tape A Securities, as follows.

Underutilized Additional Credits

Member organizations adding liquidity in Tape A Securities and meeting all of the requirements of the Non-Tier Adding Credit, the Tier 1 Adding Credit, the Tier 2 Adding Credit, the Tier 3 Adding Credit, the Tier 4 Adding Credit, the Tier 5 Adding Credit, the Tier 6 Adding Credit, the Step Up Tier 1 Adding Credit, the Step Up Tier 2 Adding Credit and the Step Up Tier 4 Adding Credit are currently eligible for an additional credit of $0.0001 per share (under the Non-Tier Adding Credit, Tier 3 Adding Credit, Tier 4 Adding Credit, Tier 5 Adding Credit, Tier 6 Adding Credit, and Step Up Tier 4 Adding Credit) or $0.0005 per share (under the Tier 1 Adding Credit, Tier 2 Adding Credit, Step Up Tier 1 Adding Credit, and Step Up Tier 2 Adding Credit) if the member organization also adds a specified amount of liquidity, excluding liquidity added as an Supplemental Liquidity Provider (''SLP''), in Tapes B and C Securities.

The Exchange proposes to eliminate and remove these additional credits from the Non-Tier Adding Credit, Tier 1 Adding Credit, Tier 2 Adding Credit, Tier 3 Adding Credit, Tier 4 Adding Credit, Tier 5 Adding Credit, Tier 6 Adding Credit, Step Up Tier 1 Adding Credit, Step Up Tier 2 Adding Credit and Step Up Tier 4 Adding Credit sections of the Price List. The additional credit has been underutilized by member organizations insofar as no member organization qualified for an additional credit year to date in any of the non-tier or tiers in which it is offered. As such, Exchange does not anticipate that any member organization in the near future would qualify for the additional credits that are the subject of this proposed rule change.

Underutilized Adding Tier for Non-Displayed Providers in Tape A Securities

Under the current Adding Tier for Non-Displayed Providers, the Exchange provides credits in Tape A securities for all orders, other than MPL Orders, from

[8] *See* Cboe Global Markets U.S. Equities Market Volume Summary, available at *http://markets.cboe.com/us/equities/market_share/.*

[9] *See id.*

qualifying member organizations that have at least

• an average daily trading volume (''ADV'') that adds liquidity to the Exchange during the billing month (''Adding ADV'') of 0.35% of Tape A consolidated ADV (''Tape A CADV''), excluding any liquidity added by a Designated Market Maker (''DMM'');[10] and

• Adding ADV of Non-Displayed Limit Orders of at least 4 million shares; and

• 35% of the Member Organization's Total Adding ADV is comprised of Non-Displayed Limit Orders.

A member organization that meets the above requirements receives a credit of $0.0023 per share ($0.0006 per share for Non-Displayed Limit Orders) if the member organization has an Adding ADV of at least 0.35% of Tape A CADV or a credit of $0.0026 per share ($0.0007 per share for Non-Displayed Limit Orders) if the member organization has Adding ADV of at least 0.45% of Tape A CADV.

In addition, Member Organizations meeting the above requirements and adding liquidity, excluding liquidity added as an SLP, in Tapes B and C Securities of at least 0.20% of Tape B and Tape C CADV combined will receive an additional $0.00005 per share.

The Exchange proposes to eliminate the Adding Tier for Non-Displayed Providers in its entirety and remove it from the Price List. The tier, including the additional $0.00005 per share credit, has been underutilized by member organizations insofar as no member organization has qualified for the tier since its introduction in April 2021. As such, Exchange does not anticipate any member organization in the near future would qualify for the credit that is the subject of this proposed rule change.

Alternative Qualification for Tier 5 Adding Credit

In response to the competitive environment described above, the Exchange has established incentives for its member organizations who submit orders that provide liquidity on the Exchange. The proposed fee change is also designed to attract additional order flow to the Exchange by incentivizing member organizations to submit additional displayed liquidity to the Exchange.

Under the current Tier 5 Adding Credit, the Exchange provides a $0.0017 credit in Tape A securities for orders, other than MPL and Non-Display Reserve orders, that add liquidity to the Exchange where a member organization's Adding ADV, excluding liquidity added as an SLP and as a DMM, is at least 0.29% of NYSE CADV. Further, member organizations that meet the above requirements and add liquidity, excluding liquidity added as an SLP, in Tape B and C Securities of at least 0.20% of Tape B and Tape C CADV combined, would receive an additional $0.0001 per share. As discussed above, the Exchange proposes to delete this additional credit as underutilized.

The Exchange further proposes to provide an alternative way for member organizations to qualify for the Tier 5 Adding Credit. As proposed, as an alternative to where a member organization's Adding ADV, excluding liquidity added as an SLP and as a DMM, is at least 0.29% of NYSE CADV, member organizations that have an Adding ADV, excluding liquidity added as an SLP and as a DMM, of at least 0.125% of NYSE CADV and two times more than the Member Organization's Adding ADV in Tape A Securities in Q1 2021[11] as a percentage of NYSE CADV would also qualify for the $0.0017 credit.

The Exchange believes that the alternative way to qualify for the Tier 5 Adding Credit will incentivize greater participation from member organizations to increase liquidity-providing orders in the Tape A securities they send to the Exchange to qualify for the Tier 5 Adding Credit, which would support the quality of price discovery on the Exchange and provide additional liquidity for incoming orders. As noted above, the Exchange operates in a competitive environment, particularly as it relates to attracting non-marketable orders, which add liquidity to the Exchange. The Exchange does not know how much order flow member organizations choose to route to other exchanges or to off-exchange venues. Based on the profile of liquidity-adding firms generally, the Exchange believes that additional member organizations could qualify for the tier under the revised qualification criteria if they choose to direct order flow to, and increase quoting on, the Exchange. However, without having a view of member organization's activity on other exchanges and off-exchange venues, the Exchange has no way of knowing whether this proposed rule change would result in any member organization directing orders to the Exchange in order to qualify for the new tier.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[12] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[13] in particular, because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The Proposed Change Is Reasonable

Elimination of Underutilized Credits and Adding Tier in Tape A Securities

The Exchange believes that the proposed elimination of the underutilized additional credits for member organizations that add liquidity in Tape B and C Securities when qualifying for certain non-tier and tiered credits by adding liquidity in Tape A Securities is reasonable because member organizations have underutilized this incentive. No member organization has qualified for an additional credit year to date in any of the non-tier or tiers in which it is offered. The Exchange does not anticipate any member organization in the near future qualifying for the rebate that is the subject of this proposed rule change. Similarly, the Exchange believes that the proposed elimination of the Adding Tier for Non-Displayed Providers in Tape A Securities is reasonable. No member organization has qualified for the rebate since it was adopted in April 2021, and the Exchange does not anticipate any member organization in the near future qualifying for the tier. The Exchange believes it is reasonable to eliminate credits when such incentives become underutilized. The Exchange also believes eliminating underutilized incentives would add clarity and transparency to the Price List.

Alternative Qualification for Tier 5 Adding Credit in Tape A Securities

As discussed above, the Exchange operates in a highly competitive market. The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, the Commission highlighted the importance of market

[10] Footnote 2 to the Price List defines ADV as ''average daily volume'' and ''Adding ADV'' as ADV that adds liquidity to the Exchange during the billing month. CADV is defined in footnote * of the Price List.

[11] The current Tier 6 Adding Credit uses ''1Q'', which the Exchange proposes to change to ''Q1'' for consistency and clarity.

[12] 15 U.S.C. 78f(b).

[13] 15 U.S.C. 78f(b)(4) & (5).

forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [14] While Regulation NMS has enhanced competition, it has also fostered a ''fragmented'' market structure where trading in a single stock can occur across multiple trading centers. When multiple trading centers compete for order flow in the same stock, the Commission has recognized that ''such competition can lead to the fragmentation of order flow in that stock.'' [15]

Given the current competitive environment, the Exchange believes that the proposed revision to the requirements for member organizations to qualify for Tier 5 Adding Credit represents a reasonable attempt to attract additional order flow to the Exchange. Specifically, the Exchange believes that the proposed revision is reasonable because it would provide further incentives for member organizations to route additional liquidity-providing orders to a public exchange, thereby promoting price discovery and transparency and enhancing order execution opportunities for member organizations. All member organizations would benefit from the greater amounts of liquidity that will be present on the Exchange, which would provide greater execution opportunities.

As noted above, the Exchange operates in a competitive environment, particularly as relates to attracting non-marketable orders, which add liquidity to the Exchange. The Exchange believes that an alternative method to qualify for the tier will provide greater incentives for member organizations to add more liquidity to the Exchange. The Exchange does not know how much order flow member organizations choose to route to other exchanges or to off-exchange venues. Based on the profile of liquidity-adding firms generally, the Exchange believes that additional member organizations could qualify for the tier under the revised qualification criteria if they choose to direct order flow to, and increase quoting on, the Exchange. However, without having a view of member organizations' activity on other exchanges and off-exchange venues, the Exchange has no way of knowing whether this proposed rule change would result in any additional member organizations directing orders to the Exchange in order to qualify for the Tier 5 Adding Credit.

The Proposal Is an Equitable Allocation of Fees

Elimination of Underutilized Credits and Adding Tier in Tape A Securities

The Exchange believes the proposal equitably allocates fees among its market participants because the underutilized additional credits and Adding Tier the Exchange proposes to eliminate would be eliminated in their entirety, and would no longer be available to any member organization in any form. Similarly, the Exchange believes the proposal equitably allocates fees among its market participants because elimination of the underutilized credits would apply to all similarly-situated member organizations on an equal basis. All such member organizations would continue to be subject to the same fee structure, and access to the Exchange's market would continue to be offered on fair and nondiscriminatory terms.

Alternative Qualification for Tier 5 Adding Credit in Tape A Securities

The Exchange believes the proposed rule change equitably allocates its fees among its market participants. The proposed change would continue to encourage member organizations to submit additional liquidity to the Exchange and execute orders on the Exchange, thereby contributing to robust levels of liquidity, to the benefit of all market participants.

The Exchange believes that providing an additional way to qualify for the Tier 5 Adding Credit would encourage the submission of additional liquidity to the Exchange, thereby providing customers with a higher quality venue for price discovery, liquidity, competitive quotes and price improvement. The proposed change will thereby encourage the submission of additional liquidity to a national securities exchange, thus promoting price discovery and transparency and enhancing order execution opportunities for member organizations from the substantial amounts of liquidity present on the Exchange. All member organizations would benefit from the greater amounts of liquidity that will be present on the Exchange, which would provide greater execution opportunities.

The proposal neither targets nor will it have a disparate impact on any particular category of market participant. Specifically, the Exchange believes that the proposal constitutes an equitable allocation of fees because all similarly situated member organizations would be eligible for the same credits if they meet the revised requirements for the tier. As to those member organizations that do not presently qualify for the adding liquidity credit, the proposal will not adversely impact their existing pricing or their ability to qualify for other credits provided by the Exchange.

The Proposal Is Not Unfairly Discriminatory

Elimination of Underutilized Credits and Adding Tier in Tape A Securities

The Exchange believes that the proposal is not unfairly discriminatory. The proposal is not unfairly discriminatory because it neither targets nor will it have a disparate impact on any particular category of market participant. The Exchange believes that the proposal is not unfairly discriminatory because the proposed elimination of the underutilized additional credits and Adding Tier would affect all similarly-situated market participants on an equal and non-discriminatory basis. The Exchange believes that eliminating credits that are underutilized and ineffective would no longer be available to any member organization on an equal basis. The Exchange also believes that the proposed change would protect investors and the public interest because the deletion of underutilized fees would make the Price List more accessible and transparent and facilitate market participants' understanding of the fees charged for services currently offered by the Exchange.

Alternative Qualification for Tier 5 Adding Credit in Tape A Securities

The Exchange believes that the proposal is not unfairly discriminatory. In the prevailing competitive environment, member organizations are free to disfavor the Exchange's pricing if they believe that alternatives offer them better value.

The proposed changes to the Tier 5 Adding Credit are not unfairly discriminatory because the alternate requirements to achieve the credit would be applied to all similarly situated member organizations and other market participants, who would all be subject to the same modified requirements to qualify for the tier and the same credits on an equal basis. For the same reason, the proposal neither targets nor will it have a disparate impact on any particular category of market participant. Accordingly, no

[14] *See* Regulation NMS, *supra* note 4, at 37499.

[15] *See* Securities Exchange Act Release No. 61358, 75 FR 3594, 3597 (January 21, 2010) (File No. S7–02–10) (Concept Release on Equity Market Structure).

member organization already operating on the Exchange would be disadvantaged by this allocation of fees. Further, the Exchange believes the proposal would incentivize member organizations to send more orders to the Exchange to qualify for higher credits.

The Exchange believes that the proposed changes would not permit unfair discrimination among member organizations because the tiered rates are available equally to all member organizations. As described above, in today's competitive marketplace, order flow providers have a choice of where to direct liquidity-providing order flow, and the Exchange believes there are additional member organizations that could qualify if they chose to direct their order flow to the Exchange. Finally, the submission of orders to the Exchange is optional for member organizations in that they could choose whether to submit orders to the Exchange and, if they do, the extent of its activity in this regard.

Finally, the Exchange believes that it is subject to significant competitive forces, as described below in the Exchange's statement regarding the burden on competition.

For the foregoing reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[16] the Exchange believes that the proposed rule change would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Instead, as discussed above, the proposal relates to the elimination of an underutilized credits and an adding tier and, as such, would not have any impact on intra- or inter-market competition because the proposed change is solely designed to accurately reflect the services that the Exchange currently offers, thereby adding clarity to the Price List.

In accordance with Section 6(b)(8) of the Act,[17] the Exchange further believes that the proposed rule change offering an alternative method to qualify for the Tier 5 Adding Credit would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Instead, as discussed above, the Exchange believes that the proposed change would encourage the submission of additional liquidity and order flow to a public exchange, thereby enhancing order execution opportunities for member organizations. As a result, the Exchange believes that the proposed change furthers the Commission's goal in adopting Regulation NMS of fostering competition among orders, which promotes ''more efficient pricing of individual stocks for all types of orders, large and small.'' [18]

Intramarket Competition. The proposed change is designed to attract additional order flow to the Exchange. As described above, the Exchange believes that the proposed change would provide additional incentives for market participants to route liquidity-providing orders to the Exchange. Greater liquidity benefits all market participants on the Exchange by providing more trading opportunities and encourages member organizations to send orders, thereby contributing to robust levels of liquidity, which benefits all market participants on the Exchange. The current and proposed credits would be available to all similarly-situated market participants, and, as such, the proposed change would not impose a disparate burden on competition among market participants on the Exchange.

Intermarket Competition. The Exchange operates in a highly competitive market in which market participants can readily choose to send their orders to other exchanges and off-exchange venues if they deem fee levels at those other venues to be more favorable. In such an environment, the Exchange must continually adjust its fees and rebates to remain competitive with other exchanges and off-exchange venues. Because competitors are free to modify their own fees and credits in response, and because market participants may readily adjust their order routing practices, the Exchange does not believe its proposed fee change can impose any burden on intermarket competition.

The Exchange believes that the proposed change could promote competition between the Exchange and other execution venues, including those that currently offer similar order types and comparable transaction pricing, by encouraging additional orders to be sent to the Exchange for execution.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A) [19] of the Act and subparagraph (f)(2) of Rule 19b–4 [20] thereunder, because it establishes a due, fee, or other charge imposed by the Exchange.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [21] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSE–2021–65 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSE–2021–65. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the

BILLING CODE 8011–01–P

SMALL BUSINESS ADMINISTRATION

[Docket No. SBA–2020–0048]

Termination of Nonmanufacturer Rule Class Waiver

AGENCY: U.S. Small Business Administration.

ACTION: Notification of intent to terminate the class waiver to the Nonmanufacturer Rule for radiology equipment.

SUMMARY: The U.S. Small Business Administration (SBA) is considering terminating a class waiver of the Nonmanufacturer Rule (NMR) for irradiation apparatus manufacturing, computerized axial tomography (CT/CAT) scanners manufacturing; CT/CAT (computerized axial tomography) scanners manufacturing; fluoroscopes manufacturing; fluoroscopic X-ray apparatus and tubes manufacturing; generators, X-ray, manufacturing; irradiation equipment manufacturing; X-ray generators manufacturing; and X-ray irradiation equipment manufacturing under manufacturing categorized under North American Industry Classification System (NAICS) code 334517 and Product Service Code (PSC) 6525.

[22] 17 CFR 200.30–3(a)(12).

DATES: Comments and source information must be submitted on or before xx/xx/xxxx.

ADDRESSES: You may submit comments and source information via the Federal Rulemaking Portal at *https://www.regulations.gov* under Docket ID SBA–2020–1148]. If you wish to submit confidential business information (CBI) as defined in the User Notice at *http://www.regulations.gov,* please submit the information to Carol Hulme, Attorney Advisor, Office of Government Contracting, U.S. Small Business Administration, 409 Third Street SW, 8th Floor, Washington, DC 20416. Highlight the information that you consider to be CBI and explain why you believe this information should be held confidential. SBA will review the information and make a final determination as to whether the information will be published.

FOR FURTHER INFORMATION CONTACT: Carol Hulme, Attorney Advisor, by telephone at 202–205–6347 or by email at *Carol-Ann.Hulme@sba.gov.*

SUPPLEMENTARY INFORMATION: An awardee of a Federal small business set-aside contract valued over $250,000.00, service-disabled veteran-owned small business contract, HUBZone contract, women-owned small business contract, or 8(a) contract must provide its own product or that of a small business manufacturer unless a waiver is in place. If the above-identified class waiver is terminated, small businesses will no longer be authorized to provide the product of any manufacturer regardless of size on the identified items, unless a Federal contracting officer obtains an individual waiver to the NMR.

Section 8(a)(17) and 46 of the Small Business Act (Act), 15 U.S.C. 637(a)(17) and 657s, and SBA's implementing regulations, found at 13 CFR 121.406(b), require that recipients of Federal supply contracts issued as a small business set-aside (except as stated below), service-disabled veteran-owned small business (SDVO SB) set-aside or sole source contract, Historically Underutilized Business Zone (HUBZone) set-aside or sole source contract, WOSB (women-owned small business) or economically disadvantaged women-owned small business (EDWOSB) set-aside or sole source contract, 8(a) set-aside or sole source contract, partial set-aside, or set aside of an order against a multiple award contract provide the product of a small business manufacturer or processor if the recipient is other than the actual manufacturer or processor of the product. This requirement is commonly referred to as the Nonmanufacturer Rule (NMR). 13 CFR 121.406(b). Note that the NMR does not apply to small business set-aside acquisitions with an estimated value between the micro-purchase threshold and the simplified acquisition threshold but continues to apply to socioeconomic categories over the micropurchase threshold.

Sections 8(a)(17)(B)(iv)(II) and 46(a)(4)(B) of the Act authorize SBA to waive the NMR for a ''class of products'' for which there are no small business manufacturers or processors available to participate in the Federal market. The SBA defines ''class of products'' based on a combination of (1) the six-digit NAICS code, (2) the four-digit PSC, and (3) a description of the class of products. As implemented in SBA's regulations at 13 CFR 121.1202(c), in order to be considered available to participate in the Federal market for a class of products, a small business manufacturer must have submitted a proposal for a contract solicitation or been awarded a contract to supply the class of products within the last 24 months.

In accordance with the SBA's regulations at 13 CFR 121.1204(a)(7), SBA will periodically review existing class waivers to the NMR to determine whether small business manufacturers or processors have become available to participate in the Federal market. Upon receipt of information that such a small business manufacturer or processor exists, the SBA will announce its intent to terminate the NMR waiver for a class of products. 13 CFR 121.1204(a)(7)(ii). Unless public comment reveals no small business exists for the class of products in question, SBA will publish a Final Notice of Termination in the **Federal Register**.

On October 31, 2007, the SBA published in the **Federal Register** a notice of intent to waiver the Nonmanufacturer Rule for Irradiation Apparatus Manufacturing (X-Ray Equipment and Supplies). The comments submitted in response failed to establish the existence of a small business manufacturer of these products. As such, on December 26, 2007, after the comment and notice period passed, SBA issued a class waiver for those products effective January 10, 2008. That notice can be found at 77 FR 73057.

On April 20, 2020, SBA received a request to terminate the previously issued waiver. The requester provided information that established the existence of a small business manufacturer of the identified products. Thus SBA is proposing to terminate the class waiver for irradiation apparatus manufacturing, computerized axial

tomography (CT/CAT) scanners manufacturing; CT/CAT (computerized axial tomography) scanners manufacturing; fluoroscopes manufacturing; fluoroscopic X-ray apparatus and tubes manufacturing; generators, X-ray, manufacturing; irradiation equipment manufacturing; X-ray generators manufacturing; and X-ray irradiation equipment manufacturing under NAICS code 334517 and PSC 6525. The public is invited to comment or provide source information on the proposed termination of the NMR waiver for these products.

More information on the NMR and class waivers can be found at *https://www.sba.gov/contracting/contracting-officials/non-manufacturer-rule/non-manufacturer-waivers.*

David Wm. Loines,

Director, Office of Government Contracting.

BILLING CODE P

SMALL BUSINESS ADMINISTRATION

Delegations of Authority

AGENCY: U.S. Small Business Administration.

ACTION: Notice of delegations of authority.

SUMMARY: This document provides the public notice of the delegations of authority for activities related to loans guaranteed under the Paycheck Protection Program (PPP) by the Administrator of the Small Business Administration (SBA) to the Associate Administrator for the Office of Capital Access (AA/OCA) and the redelegation of certain authority related to PPP loan activities to the Director of the Office of Financial Program Operations (OFPO) in the OCA, certain employees of OFPO, and an OCA Committee. In addition, this document provides the public notice of the delegations of authority for certain activities related to Coronavirus Disease 2019 (COVID–19) Economic Injury Disaster Loans (EIDLs) and EIDL Advances by the Administrator to the AA/OCA.

SUPPLEMENTARY INFORMATION: This document provides the public notice of the Administrator's delegations of authority with respect to the temporary 7(a) loan program titled the ''Paycheck Protection Program'' (PPP) under sections 7(a)(36), 7(a)(37), and 7A of the Small Business Act (15 U.S.C. 636(a)(36) and (37); 15 U.S.C. 636m) to the AA/OCA. Specifically, the delegation of authority related to SBA's review of PPP loans and final SBA loan review decisions, as well as the servicing, liquidation, and guaranty purchase of PPP loans. The delegation of authority related to guaranty purchases of PPP loans is consistent with the delegation of authority published at 68 FR 51048 (August 25, 2003) for guaranty purchases of other 7(a) loans. This document also provides that certain authority for PPP loan activities delegated to the AA/OCA is redelegated to the OFPO Director, certain OFPO employees, and to an OCA Committee. Finally, notwithstanding the Delegation of Authority No. 12–D, Revision 3 (58 FR 57891), which sets forth the authority delegated by the Administrator to the Assistant Administrator for Disaster Assistance for the purpose of administering SBA's Disaster Assistance Programs, this document provides the public notice of the Administrator's delegation of authority to the AA/OCA for certain activities related to SBA's Coronavirus Disease 2019 (COVID–19) Economic Injury Disaster Loans (COVID EIDLs) and EIDL Advances, including Targeted EIDL Advances and Supplemental Targeted Advances. All other delegations of authority for the purpose of administering SBA's Disaster Assistance Programs, remain as set forth in Delegation of Authority No. 12–D, Revision 3.

Delegation of Authority No. 12–H reads as follows:

Delegation of Authority No. 12–H.

I. The Administrator of the SBA, Isabella Casillas Guzman, pursuant to the authority vested in her by the Small Business Act, 15 U.S.C. 631, as amended, hereby delegates the following authorities related to loan activities of the Paycheck Protection Program (PPP) under sections 7(a)(36), 7(a)(37) and 7A of the Small Business Act, 15 U.S.C. 636(a)(36) and (37) and 15 U.S.C. 636m:

A. To the Associate Administrator for the Office of Capital Access (AA/OCA):

1. Loan Reviews and Decisions:

a. To take any and all action(s) in connection with SBA's review of PPP loans in accordance with the implementing guidance for the PPP issued by SBA and the Department of the Treasury, including but not limited to interim final rules, final rules, frequently asked questions, SBA notices, and official SBA forms, including instructions for those forms (collectively the ''PPP requirements'').

b. To make all final SBA loan review decisions, including but not limited to, whether the borrower:

i. Was ineligible for the PPP loan;

ii. Was ineligible for the PPP loan amount received or used the PPP loan proceeds for unauthorized purposes;

iii. Is ineligible for PPP loan forgiveness in the amount determined by the lender in its full or partial approval decision issued to SBA; and/or

iv. Is ineligible for PPP loan forgiveness in any amount when the lender has issued a full denial decision to SBA.

2. Servicing, Liquidation, Denial of Liability on a Guaranty on a PPP Loan, and Approve Initiation of Lawsuit to Recover Funds on a PPP Loan:

a. To determine whether the PPP lender complied with all SBA Loan Program Requirements related to servicing, liquidation, and litigation of its PPP loans, including but not limited to borrowers involved in bankruptcy.

b. Consistent with the delegation of authority published at 68 FR 51048 (August 25, 2003), to take any and all actions involved in denial of liability on guaranty purchase requests submitted on PPP loans and to approve the initiation of a lawsuit to recover funds on a PPP loan from a PPP lender, including but not limited to recovery of the processing fee paid to a lender that is found guilty of an act of fraud in connection with a PPP loan.

c. To approve the initiation of a lawsuit to recover funds on a PPP loan from a borrower, including but not limited to recovery of funds from the borrower's shareholder(s), member(s), or partner(s) if the shareholder, member, or partner knowingly used the funds for unauthorized purposes.

3. To amend, suspend, or revoke authority redelegated to any position listed below.

B. The authority delegated to the AA/OCA is redelegated to the Director, Office of Financial Program Operations, as follows:

1. Loan Reviews:

a. To determine and develop policy and procedures necessary for SBA staff in headquarters and relevant SBA loan centers, as well as applicable contractor staff, to conduct loan review activities related to PPP loans.

b. To oversee the performance of loan reviews of PPP loans by SBA staff in headquarters and relevant SBA loan centers, as well as applicable contractor staff.

2. Servicing, Liquidation, and Guaranty Purchase of PPP Loans:

a. To determine and develop policy and procedures necessary for SBA staff in headquarters and relevant SBA loan centers, as well as applicable contractor staff, to conduct servicing, liquidation,

and guaranty purchase activities related to PPP loans.

b. To oversee the performance of servicing, liquidation, and guaranty purchase activities of PPP loans by SBA staff in headquarters and relevant SBA loan centers, as well as applicable contractor staff.

C. The authority delegated to the AA/OCA is redelegated to the specific positions designated herein as follows:

1. Loan Specialists, SBA loan centers:

a. Reviewing Loan Specialist:

i. To review all documentation submitted by the borrower and lender in connection with a PPP loan and to request additional information from the borrower or lender as necessary to complete the SBA loan review in accordance with PPP requirements.

ii. To make a recommendation to the Approving Loan Specialist as to whether the borrower was eligible for the PPP loan; was eligible for the PPP loan amount received, or used the PPP loan proceeds for authorized purposes; and/or is eligible for PPP loan forgiveness and in what amount.

b. Approving Loan Specialist:

i. To review and concur with the Reviewing Loan Specialist's recommendation in paragraph 1.a.ii. above and make the final SBA loan review decision, except in the circumstances described in subparagraph b.ii. below.

ii. To escalate to the Higher Authority Review Team all recommendations when:

(1) The Approving Loan Specialist and Reviewing Loan Specialist agree that loan forgiveness will be denied in whole or in part; and

(2) The Approving Loan Specialist does not concur with the Reviewing Loan Specialist's recommendation, including when the Approving Loan Specialist and Reviewing Loan Specialist disagree on the amount of loan forgiveness the borrower is entitled to receive.

2. Higher Authority Review Team:

a. This team will consist of more experienced employees from the SBA loan centers.

b. This team will have the authority to perform Higher Authority Reviews (HAR). This team will also have the authority to make the final SBA loan review decision on all loan reviews escalated to the team unless the HAR team escalates a loan review to the Office of Capital Access Committee in accordance with paragraph 2.c. below. The Higher Authority Review will consist of separate reviews by a Reviewing Loan Specialist and an Approving Loan Specialist.

c. The HAR team, at their discretion, will have the authority, on a case-by-case basis, to escalate a loan review to the Office of Capital Access Committee for the final SBA loan review decision.

3. To the Office of Capital Access (OCA) Committee:

a. This committee will consist of the Director, Office of Financial Assistance (or designee); the Director, Office of Credit Risk Management (or designee); and the career Deputy Associate Administrator (DAA), Office of Capital Access (or designee).

b. The OCA Committee will have the authority to review and make a final SBA loan review decision, upon a majority vote of its members, on all loan reviews that are escalated after the Higher Authority Review.

II. Except for actions involved in the denial of liability on a guaranty purchase request submitted on a PPP loan and the decision to approve the initiation of a lawsuit to recover funds on a PPP loan from a PPP lender or borrower, the authorities delegated herein to the AA/OCA may be re-delegated. All other authority delegated herein to anyone other than the AA/OCA may not be re-delegated, except by the AA/OCA.

III. The Administrator of the SBA, Isabella Casillas Guzman, pursuant to the authority vested in her by the Small Business Act, 15 U.S.C. 631, as amended, hereby delegates the following authorities related to SBA's Coronavirus Disease 2019 (COVID–19) Economic Injury Disaster Loans (COVID EIDLs) under section 7(b)(2) of the Small Business Act (15 U.S.C. 636(b)(2)) and section 1110 of the Coronavirus Aid, Relief, and Economic Security Act (CARES Act) (Pub. L. 116–136), as amended, and EIDL Advances, including Targeted EIDL Advances and Supplemental Targeted Advances under section 1110 of the CARES Act, as amended, section 331 of the Economic Aid to Hard-Hit Small Businesses, Nonprofits, and Venues Act (Pub. L. 116–260), and section 5002 of the American Rescue Plan Act of 2021 (Pub. L. 117–2):

A. To the Associate Administrator for the Office of Capital Access (AA/OCA):

1. To establish and revise policies regarding the eligibility for and processing of COVID EIDL loans and EIDL Advances.

2. To procure supplies or services in support of the COVID EIDL loan and EIDL Advance programs, and in accordance with 41 U.S.C. 4701(a) and (b), as amended, the Federal Acquisition Regulations, SBA regulations, and applicable procurement policies.

3. This authority may not be redelegated.

IV. The authorities delegated to any position indicated herein may be exercised by any SBA employee officially designated as Acting in that position.

V. The authorities delegated herein can only be revoked or amended by the Administrator and in writing.

Authority: 15 U.S.C. 631; 15 U.S.C. 636(a)(36); 15 U.S.C. 636(a)(37); 15 U.S.C. 636(b)(2); 15 U.S.C. 636m; Sec. 1110, Pub. L. 116–136, 134 Stat. 281; Sec. 331, Pub. L. 116–260; and Sec. 5002, Pub. L. 117–2, 135 Stat. 4.

Isabella Casillas Guzman,

Administrator.

[FR Doc. 2021–24908 Filed 11–15–21; 8:45 am]

BILLING CODE 8026–03–P

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Notice of Product Exclusion Extensions: China's Acts, Policies, and Practices Related to Technology Transfer, Intellectual Property, and Innovation

AGENCY: Office of the United States Trade Representative (USTR).

ACTION: Notice.

SUMMARY: In prior notices, the U.S. Trade Representative modified the action in the Section 301 investigation of China's acts, policies, and practices related to technology transfer, intellectual property, and innovation by excluding from additional duties certain medical-care products needed to address the COVID–19 pandemic. The 99 exclusions for medical care products to address COVID–19 were published on December 29, 2020, and are scheduled to expire on November 14, 2021. On August 27, 2021, USTR requested comments on whether to extend the COVID exclusions. This notice announces the U.S. Trade Representative's determination to provide a 16-day transition period for all COVID exclusions (through November 30, 2021), and to extend 81 of the COVID exclusions for an additional 6 months.

DATES: To provide a transition period, this notice extends the 99 exclusions scheduled to expire on November 14, 2021, through November 30, 2021. Those exclusions receiving further extensions will expire six months after November 30, 20201, on May 31, 2022. U.S. Customs and Border Protection will issue instructions on entry guidance and implementation.

FOR FURTHER INFORMATION CONTACT: For general questions about this notice, contact Associate General Counsel Philip Butler or Assistant General Counsel Rachel Komito at (202) 395–5725. For specific questions on customs classification or implementation of the product exclusions, contact *traderemedy@cbp.dhs.gov.*

SUPPLEMENTARY INFORMATION:

A. Background

In the course of this investigation the U.S. Trade Representative imposed additional duties on products of China in four tranches. *See* 83 FR 28719 (June 20, 2018); 83 FR 40823 (August 16, 2018); 83 FR 47974 (September 21, 2018), as modified by 83 FR 49153 (September 28, 2018); and 84 FR 43304 (August 20, 2019), as modified by 84 FR 69447 (December 18, 2019) and 85 FR 3741 (January 22, 2020).

For each tranche, the U.S. Trade Representative established a process by which U.S. stakeholders could request the exclusion of particular products subject to the action. The U.S. Trade Representative later established a process by which U.S. stakeholders could request the extension of particular exclusions. Additionally, on March 25, 2020, the U.S. Trade Representative requested public comments on possible further modifications to remove Section 301 duties from medical-care products to address the COVID–19 pandemic. 85 FR 16987.

On December 29, 2020, USTR announced the extension of 80 product exclusions on medical-care and/or COVID response products; further modifications in the form of 19 product exclusions to remove Section 301 duties from additional medical-care and/or COVID response products; and that USTR might consider further extensions and/or modifications as appropriate. *See* 85 FR 85831 (the December 29 notice). On March 10, 2021, USTR announced the extension of these 99 exclusions until September 30, 2021, and that USTR might consider further extensions and/or modifications as appropriate. 86 FR 13785. On August 27, 2021, USTR published a notice requesting public comments on whether any of these exclusions should be further extended for up to six months. 86 FR 48280 (the August 27 notice). The August 27 notice stated that USTR would evaluate each exclusion on a case-by-case basis and the evaluation would examine whether the exclusion remains appropriate in light of recent developments including the spread of the Delta variant in the United States and increased domestic production of certain products, and taking account of the overall impact of these exclusions on the goal of obtaining the elimination of China's acts, policies, and practices covered in this Section 301 investigation.

On September 29, 2021, USTR announced the interim extension of these 99 exclusions through November 14, 2021, in order to provide time to review public comments submitted in response to the August 27 notice. 86 FR 54011.

B. Determination To Extend Certain Exclusions

Based on evaluation of the factors set out in in the August 27 notice, and pursuant to sections 301(b), 301(c), and 307(a) of the Trade Act of 1974, as amended, the U.S. Trade Representative has determined to extend certain product exclusions described in the December 29 notice for six months past the expiry of the remaining exclusions (until May 31, 2022), as set out in the annexes to this notice. The U.S. Trade Representative's determination considers public comments submitted in response to the August 27 notice, and the advice of advisory committees, the interagency Section 301 Committee, and the White House COVID–19 Response Team.

To provide a transition period for the expiring exclusions, the U.S. Trade Representative has determined to extend all 99 product exclusions described in the December 29 notice through November 30, 2021.

The exclusion extensions are available for any product that meets the description in the product exclusion. Further, the scope of each exclusion and modification is governed by the scope of the ten-digit Harmonized Tariff Schedule of the United States (HTSUS) subheadings and product descriptions in the annexes to this notice. U.S. Customs and Border Protection will issue instructions on entry guidance and implementation.

The U.S. Trade Representative may continue to consider further extensions and/or additional modifications as appropriate.

Greta Peisch,

General Counsel, Office of the United States Trade Representative.

BILLING CODE 3290–F2–P

Annex for COVID Extensions

Annex A

Effective with respect to goods entered for consumption, or withdrawn from warehouse for consumption, on or after 12:01 a.m. eastern daylight time on November 15, 2021, and before 11:59 p.m. eastern daylight time on November 30, 2021, each of the article descriptions of headings 9903.88.62, 9903.88.63, 9903.88.64 and 9903.88.65 of the Harmonized Tariff Schedule of the United States are modified by deleting "November 14, 2021," and by inserting "November 30, 2021," in lieu thereof.

Annex B

A. Effective with respect to goods entered for consumption, or withdrawn from warehouse for consumption, on or after 12:01 a.m. eastern daylight time on December 1, 2021 and before 11:59 p.m. eastern daylight time on May 31, 2022, subchapter III of chapter 99 of the Harmonized Tariff Schedule of the United States (HTSUS) is modified:

1. by inserting the following new heading 9903.88.66 in numerical sequence, with the material in the new heading inserted in the columns of the HTSUS labeled "Heading/Subheading", "Article Description", and "Rates of Duty 1-General", respectively:

Heading/ Subheading	Article Description	Rates of Duty		
		1		2
		General	Special	
"9903.88.66	Effective with respect to entries on or after December 1, 2021, and before June 1, 2022, articles the product of China, as provided for in U.S. note 20(sss) to this subchapter, each covered by an exclusion granted by the U.S. Trade Representative	The duty provided in the applicable subheading"		

2. by inserting the following new U.S. note 20(sss) to subchapter III of chapter 99 in numerical sequence:

"(sss) (i) The U.S. Trade Representative determined to establish a process by which particular products classified in heading 9903.88.01 and provided for in U.S. notes 20(a) and 20(b) to this subchapter could be excluded from the additional duties imposed by heading 9903.88.01. See 83 Fed. Reg. 40823 (August 16, 2018) and 83 Fed. Reg. 47326 (September 18, 2018). Pursuant to the product exclusion process, the U.S. Trade Representative has determined that, as provided in heading 9903.88.66, the additional duties provided for in heading 9903.88.01 shall not apply to the following particular products, which are provided for in the enumerated statistical reporting numbers:

(1) Disposable plastic filters of a kind suitable for filtering and dehumidifying a patient's breath in a medical device such as a gas analyzer (described in statistical reporting number 8421.39.8090)

(2) S-band and X-band linear accelerators designed for use in radiation surgery or radiation therapy equipment (described in statistical reporting number 8543.10.0000)
(3) Disposable electrocardiograph (ECG) electrodes (described in statistical reporting number 9018.11.9000)
(4) Ultrasonic scanning apparatus, each having dimensions not exceeding 122 cm by 77 cm by 127 cm, whether or not presented with transducer (described in statistical reporting number 9018.12.0000)
(5) Blood pressure monitors suitable for use by medical professionals (described in statistical reporting number 9018.19.9530)
(6) Digital peak flow meters suitable for use by medical professionals (described in statistical reporting number 9018.19.9550)
(7) Fingertip pulse oximeters suitable for use by medical professionals (described in statistical reporting number 9018.19.9550)
(8) Bismuth germanate crystals with set dimensional and surface finish requirements and used as a detection element in Positron Emission Tomography (PET) detectors (described in statistical reporting number 9018.19.9560)
(9) Magnetic resonance imaging ("MRI") patient enclosure devices, each incorporating radio frequency and gradient coils (described in statistical reporting number 9018.19.9560)
(10) Parts and accessories of capnography monitors (described in statistical reporting number 9018.19.9560)
(11) Disposable surface electrodes for Intra-operative neuromonitoring ("IONM") systems, each composed of a surface electrode pad, an insulated wire, and a standard DIN 42802 connector (described in statistical reporting number 9018.19.9560)
(12) Otoscopes (described in statistical reporting number 9018.90.2000)
(13) Anesthesia masks (described in statistical reporting number 9018.90.3000)
(14) Anesthetic instruments and appliances suitable for use in medical or surgical sciences, and parts and accessories of the foregoing (described in statistical reporting number 9018.90.3000)
(15) Electrosurgical cautery pencils with electrical connectors (described in statistical reporting number 9018.90.6000)
(16) Printed circuit board assemblies designed for use in displaying operational performance of medical infusion equipment (described in statistical reporting number 9018.90.7580)
(17) Combined positron emission tomography/computed tomography (PET/CT) scanners which utilize multiple PET gantries (frames) on a common base (described in statistical reporting number 9022.12.0000)
(18) X-ray tables (described in statistical reporting number 9022.90.2500)
(19) X-ray tube housings and parts thereof (described in statistical reporting number 9022.90.4000)
(20) Multi-leaf collimators of radiotherapy systems based on the use of X-ray (described in statistical reporting number 9022.90.6000)
(21) Parts and accessories, of metal, for mobile X-ray apparatus (described in statistical reporting number 9022.90.6000)
(22) Vertical stands specially designed to support, contain or adjust the movement of X-ray digital detectors, or the X-ray tube and collimator in complete X-ray diagnostic systems (described in statistical reporting number 9022.90.6000)

(23) Thermoplastic masks of polycaprolactone for the use of immobilizing patients, during the use of alpha, beta or gamma radiations, for radiography or radiotherapy (described in statistical reporting number 9022.90.9500)

(24) Inoculator sets of plastics, each consisting of a plate with multiple wells, a display tray, and a lid; when assembled, the set measuring 105 mm or more but not exceeding 108 mm in width, 138 mm or more but not exceeding 140 mm in depth, and 6.5 mm or less in thickness (described in statistical reporting number 9027.90.5650)

(ii) The U.S. Trade Representative determined to establish a process by which particular products classified in heading 9903.88.02 and provided for in U.S. notes 20(c) and 20(d) to this subchapter could be excluded from the additional duties imposed by heading 9903.88.02. See 83 Fed. Reg. 40823 (August 16, 2018) and 83 Fed. Reg. 47326 (September 18, 2018). Pursuant to the product exclusion process, the U.S. Trade Representative has determined that, as provided in heading 9903.88.66, the additional duties provided for in heading 9903.88.02 shall not apply to the following particular products, which are provided for in the enumerated statistical reporting numbers:

(1) 9025.19.8010
(2) 9025.19.8020
(3) 9025.19.8060
(4) 9025.19.8085
(5) Molded acrylonitrile-butadiene-styrene (ABS) tubes, of a kind used to effect the sterile transfer of fluid from a bag or vial to another container, each tube measuring 7.5 cm or more but not exceeding 23 cm in length, with an inner diameter of less than 0.65 cm and an outer diameter of less than 9 cm, one end having been angle-cut to form a spike, and having an integrated flange, less than 3 cm in diameter (splash guard) near the spike end and removable polyethylene caps on each end, put up in sterile packing (described in statistical reporting number 3917.29.0090)
(6) Rectangular sheets of high-density or low-density polyethylene, 111.75 cm to 215.9 cm in width, and 152.4 cm to 304.8 cm in length, with a sticker attached to mark the center of each sheet, of a kind used in hospital or surgery center operating rooms (described in statistical reporting number 3920.10.0000)
(7) Sheets and strips consisting of both cross-linked polyethylene and ethylene vinyl acetate, of a width greater than 1 m but not greater than 1.5 m, and a length greater than 1.75 m but not greater than 2.6 m (described in statistical reporting number 3921.19.0000)
(8) Polyethylene sheet and film laminated with spunbond-spunbond-spunbond nonwoven polypropylene fabric, measuring 1.12 m or more but not over 1.52 m in width and 1.93 m or more but not over 2.29 m in length, and weighing 55 g/m^2 or more but not exceeding 88 g/m^2 (described in statistical reporting number 3921.90.1500)
(9) Dispensers of hand-cleaning or hand-sanitizing solutions, whether employing a manual pump or a proximity-detecting battery-operated pump, each article weighing not more than 3 kg (described in statistical reporting number 8424.89.9000)

(iii) The U.S. Trade Representative determined to establish a process by which particular products classified in heading 9903.88.03 and provided for in U.S. notes 20(e) and 20(f) to this subchapter could be excluded from the additional duties imposed by heading

9903.88.03, and by which particular products classified in heading 9903.88.04 and provided for in U.S. note 20(g) to this subchapter could be excluded from the additional duties imposed by heading 9903.88.04. See 83 Fed. Reg. 47974 (September 21, 2018) and 84 Fed. Reg. 29576 (June 24, 2019). Pursuant to the product exclusion process, the U.S. Trade Representative has determined that, as provided in heading 9903.88.66, the additional duties provided for in heading 9903.88.03 or in heading 9903.88.04 shall not apply to the following particular products, which are provided for in the enumerated statistical reporting numbers:

(1) 3808.94.1000
(2) 3808.94.5010
(3) 3923.21.0095
(4) 3926.20.9050
(5) 4819.50.4060
(6) 5603.12.0090
(7) 5603.14.9090
(8) 5603.92.0090
(9) 5603.93.0090
(10) 6505.00.8015
(11) 8424.90.9080
(12) Sodium metal (CAS No. 7440-23-5), in bulk solid form (described in statistical reporting number 2805.11.0000)
(13) Disposable cloths of nonwoven textile materials impregnated, coated or covered with organic surface-active preparations for washing the skin, put up for retail sale (described in statistical reporting number 3401.30.5000)
(14) Mixtures containing 2-(dimethylamino)ethanol (CAS No. 108-01-0) (described in statistical reporting number 3824.99.9297)
(15) Silicon monoxide (SiO) (CAS No. 10097-28-6) in powder form (described in statistical reporting number 3824.99.9297)
(16) Flexible gas sampling tubes, pipes and hoses, of polyvinyl chloride, with lock connectors at each end (described in statistical reporting number 3917.33.0000)
(17) Flexible oxygen tubes, pipes and hoses presented with integrated molded connectors, of polyvinyl chloride (described in statistical reporting number 3917.33.0000)
(18) Container units of plastics, each comprising a tub and lid therefore, configured or fitted for the conveyance, packing, or dispensing of wet wipes (described in statistical reporting number 3923.10.9000)
(19) Sacks and bags of polymers of ethylene, reclosable, qualifying as Class 1 medical devices by the U.S. Food and Drug Administration under product code NNI (described in statistical reporting number 3923.21.0030)
(20) Injection molded polypropylene plastic caps or lids each weighing not over 24 grams designed for dispensing wet wipes (described in statistical reporting number 3923.50.0000)
(21) Hand pumps (other than for fuel or lubricants, not fitted or designed to be fitted with a metering device), each used to dispense a metered quantity of liquid soap or sanitizer (described in statistical reporting number 8413.20.0000)
(22) Hand pumps for liquids (other than those of subheading 8413.11 or 8413.19) of acrylonitrile butadiene styrene (ABS) plastics (described in statistical reporting number 8413.20.0000)
(23) Indicator panels incorporating LEDs, designed for use in medical infusion equipment (described in statistical reporting number 8531.20.0040)

(24) Data input devices each with display capabilities of a kind used for magnetic resonance imaging ("MRI") equipment, computed tomography ("CT") equipment, intraoperative X-ray ("IXR") equipment or patient monitors (described in statistical reporting number 8537.10.9170)
(25) Compound binocular optical microscopes (other than stereoscopic microscopes and microscopes for photomicrography, cinemicrography or microprojection), each with magnification of 40X or more but not exceeding 1,000X, weighing not more than 3 kg (described in statistical reporting number 9011.80.0000)
(26) Compound optical microscopes (other than stereoscopic microscopes and microscopes for photomicrography, cinemicrography or microprojection), each with magnification of 40X or more but not exceeding 400X, weighing not more than 15 kg (described in statistical reporting number 9011.80.0000)

"(iv) The U.S. Trade Representative determined to establish a process by which particular products classified in heading 9903.88.15 and provided for in U.S. notes 20(r) and (s) to this subchapter could be excluded from the additional duties imposed by heading 9903.88.15. See 84 Fed. Reg. 43304 (August 20, 2019), 84 Fed. Reg. 45821 (August 30, 2019), 84 Fed. Reg. 57144 (October 24, 2019) and 85 Fed. Reg. 3741 (January 22, 2020). Pursuant to the product exclusion process, the U.S. Trade Representative has determined that, as provided in heading 9903.88.66, the additional duties provided for in heading 9903.88.15 shall not apply to the following particular products, which are provided for in the following enumerated statistical reporting numbers:

(1) 3401.19.0000
(2) 3926.90.9910
(3) 4818.90.0000 prior to July 1, 2020; 4818.90.0020 or 4818.90.0080 effective July 1, 2020
(4) 5210.11.4040
(5) 5210.11.6020
(6) 5504.10.0000
(7) 6210.10.5010
(8) 6210.10.5090
(9) 6307.90.7200
(10) Face shields of transparent plastics, whether or not assembled (described in statistical reporting number 3926.90.9950)
(11) Bowls of molded plastics, with clips for retaining guide wires during surgical procedures (described in statistical reporting number 3926.90.9990 prior to July 1, 2020; described in statistical reporting number 3926.90.9985 effective July 1, 2020)
(12) Coverings, of plastics, designed to fit over wound sites or casts thereby forming a protective seal for keeping the covered area dry and debris free while showering or bathing (described in statistical reporting number 3926.90.9990 prior to July 1, 2020; described in statistical reporting number 3926.90.9985 effective July 1, 2020)
(13) Disposable graduated medicine dispensing cups of plastics (described in statistical reporting number 3926.90.9990 prior to July 1, 2020; described in statistical reporting number 3926.90.9985 effective July 1, 2020)
(14) Single-use sterile drapes and covers of plastics, of a kind used to protect the sterile field in surgical operating rooms (described in statistical reporting number 3926.90.9990 prior to July 1, 2020; described in statistical reporting number 3926.90.9985 effective July 1, 2020)

(15) Sterile decanters of polystyrene plastics, each of a kind used to transfer aseptic fluids or medication to and from sterile bags, vials or glass containers (described in statistical reporting number 3926.90.9990 prior to July 1, 2020; described in statistical reporting number 3926.90.9985 effective July 1, 2020)
(16) Cold packs consisting of a single-use, instant, endothermic chemical reaction cold pack combined with a textile exterior lining (described in statistical reporting number 6307.90.9889 prior to July 1, 2020; described in statistical reporting number 6307.90.9891 effective July 1, 2020)
(17) Hot packs of textile material, single-use (exothermic chemical reaction) (described in statistical reporting number 6307.90.9889 prior to July 1, 2020; described in statistical reporting number 6307.90.9891 effective July 1, 2020)
(18) Laparotomy sponges of cotton (described in statistical reporting number 6307.90.9889 prior to July 1, 2020; described in statistical reporting number 6307.90.9891 effective July 1, 2020)
(19) Single-use blood pressure cuff sleeves of textile materials (described in statistical reporting number 6307.90.9889 prior to July 1, 2020; described in statistical reporting number 6307.90.9891 effective July 1, 2020)
(20) Single-use stethoscope covers (described in statistical reporting number 6307.90.9889 prior to July 1, 2020; described in statistical reporting number 6307.90.9891 effective July 1, 2020)
(21) Woven gauze sponges of cotton in square or rectangular sizes (described in statistical reporting number 6307.90.9889 prior to July 1, 2020; described in statistical reporting number 6307.90.9891 effective July 1, 2020)
(22) Protective Articles (described in statistical reporting number 9004.90.0000 prior to January 1, 2021; described in statistical reporting number 9004.90.0010 or 9004.90.0090 effective January 1, 2021)".

3. by amending the last sentence of the first paragraph of U.S. note 20(a) to subchapter III of chapter 99 by:

   a. by deleting "or (13)" and by inserting "(13)" in lieu thereof; and

   b. by inserting "; or (14) heading 9903.88.66 and U.S. note 20(sss)(i) to subchapter III of chapter 99" after the phrase "U.S. note 20(ooo) to subchapter III of chapter 99", where it appears at the end of the sentence.

4. by amending U.S. note 20(b) to subchapter III of chapter 99 by:

   a. by deleting "or (13)" and by inserting "(13)" in lieu thereof; and

   b. by inserting "; or (14) heading 9903.88.66 and U.S. note 20(sss)(i) to subchapter III of chapter 99" after the phrase "U.S. note 20(ooo) to subchapter III of chapter 99", where it appears at the end of the sentence.

5. by amending the last sentence of the first paragraph of U.S. note 20(c) to subchapter III of chapter 99 by:

   a. by deleting "or (7)" and by inserting "(7)" in lieu thereof; and

b. by inserting "; or (8) heading 9903.88.66 and U.S. note 20(sss)(ii) to subchapter III of chapter 99" after the phrase "U.S. note 20(ppp) to subchapter III of chapter 99", where it appears at the end of the sentence.

6. by amending U.S. note 20(d) to subchapter III of chapter 99 by:

   a. by deleting "or (7)" and by inserting "(7)" in lieu thereof; and

   b. by inserting "; or (8) heading 9903.88.66 and U.S. note 20(sss)(ii) to subchapter III of chapter 99" after the phrase "U.S. note 20(ppp) to subchapter III of chapter 99", where it appears at the end of the sentence.

7. by amending the last sentence of the first paragraph of U.S. note 20(e) to subchapter III of chapter 99 by:

   a. by deleting "or (16)" and by inserting "(16)" in lieu thereof; and

   b. by inserting "; or (17) heading 9903.88.66 and U.S. note 20(sss)(iii) to subchapter III of chapter 99" after the phrase "U.S. note 20(qqq) to subchapter III of chapter 99", where it appears at the end of the sentence.

8. by amending U.S. note 20(f) to subchapter III of chapter 99 by:

   a. by deleting "or (16)" and by inserting "(16)" in lieu thereof; and

   b. by inserting "; or (17) heading 9903.88.66 and U.S. note 20(sss)(iii) to subchapter III of chapter 99" after the phrase "U.S. note 20(qqq) to subchapter III of chapter 99", where it appears at the end of the sentence.

9. by amending the last sentence of the first paragraph of U.S. note 20(r) to subchapter III of chapter 99:

   a. by deleting "or (10)" and by inserting "(10)" in lieu thereof; and

   b. by inserting ", or (11) heading 9903.88.66 and U.S. note 20(sss)(iv) to subchapter III of chapter 99" after "U.S. note 20(rrr) to subchapter III of chapter 99".

10. by amending the article description of heading 9903.88.01:

    a. by deleting "9903.88.60 or";

    b. by inserting in lieu thereof "9903.88.60,"; and

    c. by inserting "or 9903.88.66," after "9903.88.62,".

11. by amending the article description of heading 9903.88.02:

    a. by deleting "9903.88.61 or";

    b. by inserting in lieu thereof "9903.88.61,"; and

c. by inserting "or 9903.88.66," after "9903.88.63,".

12. by amending the article description of heading 9903.88.03:

a. by deleting "9903.88.56 or";

b. by inserting in lieu thereof "9903.88.56,"; and

c. by inserting "or 9903.88.66," after "9903.88.64,".

13. by amending the article description of heading 9903.88.04:

a. by deleting "9903.88.56 or";

b. by inserting in lieu thereof "9903.88.56," ; and

c. by inserting "or 9903.88.66" after "9903.88.64".

14. by amending the article description of heading 9903.88.15:

a. by deleting "9903.88.57 or" and by inserting "9903.88.57," in lieu thereof; and

b. by inserting "or 9903.88.66," after "9903.88.65,".

BILLING CODE 3290–F2–C

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Summary Notice No. 2021–0004]

Petition for Exemption; Summary of Petition Received; Skyways Air Transportation, Inc.

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice.

SUMMARY: This notice contains a summary of a petition seeking relief from specified requirements of Federal Aviation Regulations. The purpose of this notice is to improve the public's awareness of, and participation in, the FAA's exemption process. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of the petition or its final disposition.

DATES: Comments on this petition must identify the petition docket number and must be received on or before December 6, 2021.

ADDRESSES: Send comments identified by docket number FAA–2020–1190 using any of the following methods:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov* and follow the online instructions for sending your comments electronically.
- *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation, 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC 20590–0001, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.
- *Fax:* Fax comments to Docket Operations at (202) 493–2251.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *https://www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *https://www.dot.gov/privacy.*

Docket: Background documents or comments received may be read at *https://www.regulations.gov* at any time. Follow the online instructions for accessing the docket or go to the Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC 20590–0001, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Jake Troutman, (202) 683–7788, Office of Rulemaking, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591.

This notice is published pursuant to 14 CFR 11.85.

Issued in Washington, DC.

Caitlin Locke,

Acting Executive Deputy Director, Office of Rulemaking.

Petition for Exemption

Docket No.: FAA–2020–1190.

Petitioner: Skyways Air Transportation, Inc.

Section(s) of 14 CFR Affected: §§ 61.113(a) & (b); 91.7(a); 91.109; 91.119(c); 91.121(a)(1); 91.405(a); 91.407(a)(1); 91.409(a)(1) & (2); 91.417(a) & (b).

Description of Relief Sought: Skyways Air Transportation, Inc. (Skyways) seeks relief to operate the Skyways V2.50

vertical takeoff and landing unmanned aircraft system, weighing over 55 pounds (lbs.) but no more than 155 lbs., to conduct market research and demonstration flights. Operations will be conducted within visual line-of-sight during the daytime, below 400 feet above ground level, in remote sparsely populated areas of Class G airspace overland and overwater.

DEPARTMENT OF THE TREASURY

Alcohol and Tobacco Tax and Trade Bureau

[Docket No. TTB–2021–0003]

Proposed Information Collections; Comment Request (No. 84)

AGENCY: Alcohol and Tobacco Tax and Trade Bureau (TTB), Treasury.

ACTION: Notice and request for comments.

SUMMARY: As part of our continuing effort to reduce paperwork and respondent burden, and as required by the Paperwork Reduction Act of 1995, we invite comments on the proposed or continuing information collections listed below in this notice.

DATES: We must receive your written comments on or before January 18, 2022.

ADDRESSES: You may send comments on the information collections described in this document using one of the two methods described below—

- *Internet:* To submit comments electronically, use the comment form for this document posted on the ''*Regulations.gov*'' e-rulemaking website at *https://www.regulations.gov* within Docket No. TTB–2021–0003.
- *Mail:* Send comments to the Paperwork Reduction Act Officer, Regulations and Rulings Division, Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW, Box 12, Washington, DC 20005.

Please submit separate comments for each specific information collection described in this document. You must reference the information collection's title, form or recordkeeping requirement number (if any), and OMB control number in your comment.

You may view copies of this document, the relevant TTB forms, and any comments received at *https://www.regulations.gov* within Docket No. TTB–2021–0003. TTB has posted a link to that docket on its website at *https://www.ttb.gov/rrd/information-collection-notices.* You also may obtain paper copies of this document, the listed forms, and any comments received by contacting TTB's Paperwork Reduction Act Officer at the addresses or telephone number shown below.

FOR FURTHER INFORMATION CONTACT: Michael Hoover, Regulations and Rulings Division, Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW, Box 12, Washington, DC 20005; 202–453–1039, ext. 135; or *informationcollections@ttb.gov* (please do not submit comments to this email address).

SUPPLEMENTARY INFORMATION:

Request for Comments

The Department of the Treasury and its Alcohol and Tobacco Tax and Trade Bureau (TTB), as part of a continuing effort to reduce paperwork and respondent burden, invite the general public and other Federal agencies to comment on the proposed or continuing information collections described below, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Comments submitted in response to this document will be included or summarized in our request for Office of Management and Budget (OMB) approval of the relevant information collection. All comments are part of the public record and subject to disclosure. Please do not include any confidential or inappropriate material in your comments.

We invite comments on: (a) Whether an information collection is necessary for the proper performance of the agency's functions, including whether the information has practical utility; (b) the accuracy of the agency's estimate of the information collection's burden; (c) ways to enhance the quality, utility, and clarity of the information collected; (d) ways to minimize the information collection's burden on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide the requested information.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information has a valid OMB control number.

Information Collections Open for Comment

Currently, we are seeking comments on the following forms, letterhead applications or notices, recordkeeping requirements, questionnaires, or surveys:

OMB Control No. 1513–0013

Title: Change in Bond (Change of Surety).

TTB Form Number: TTB F 5000.18.

Abstract: The Internal Revenue Code (IRC), at 26 U.S.C. 5114, 5173, 5272, 5354, 5401, and 5711, requires certain alcohol and tobacco industry proprietors to post a bond as the Secretary of the Treasury (the Secretary) requires by regulation. The required bond ensures payment of alcohol and tobacco excise taxes by a surety if a proprietor defaults on those taxes. Changes in the terms of bonds are effectuated on form TTB F 5000.18, Change in Bond (Consent of Surety). Once executed by the proprietor and an approved surety company, the proprietor files the form with TTB, which retains it as long as the revised bond agreement remains in force. This collection is necessary to ensure the tax provisions of the IRC are appropriately applied.

Current Actions: There are no program or adjustments changes associated with this information collection, and TTB is submitting it for extension purposes only.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profits.

Estimated Annual Burden

- *Number of Respondents:* 120.
- *Average Responses per Respondent:* 1 (one).
- *Number of Responses:* 120.
- *Average per-Response Burden:* 1 hour.
- *Total Burden:* 120 hours.

OMB Control No. 1513–0020

Title: Application for and Certification/Exemption of Label/Bottle Approval.

TTB Form Number: TTB F 5100.31.

Abstract: The Federal Alcohol Administration Act (FAA Act) at 27 U.S.C. 205(e) requires that alcohol beverages sold or introduced into interstate or foreign commerce be labeled in conformity with regulations issued by the Secretary. Under the FAA Act, such regulations are to prevent deception of the consumer, provide the consumer with ''adequate information'' as to the identity and quality of the product, and prohibit false or misleading statements, among other things. Further, under the FAA Act, prior to an alcohol beverage product's introduction into interstate or foreign commerce, the producer, bottler, or

importer of the product must apply for and receive TTB approval of the product's label. For wines and distilled spirits, such respondents also may apply for exemption from label approval for products not sold or entered into interstate or foreign commerce. For distilled spirits, the TTB regulations also require approval of distinctive liquor bottles. Respondents use form TTB F 5100.31 or its electronic equivalent, COLAs Online, to request and obtain such approvals. If approved by TTB, the form also serves as a certificate of label approval (COLA), a certificate of exemption from label approval, or distinctive liquor bottle approval. This collection of information and its related form implement these statutory and regulatory provisions.

Current Actions: As for program changes, TTB is adding to its instructions to provide four new ''allowable revisions'' to alcohol beverage labels described on TTB F 5100.31 and COLAs Online. TTB is also expanding two allowable revision that were already provided. ''Allowable revisions'' are revisions that can be made to a label without requiring the submission of a new COLA application; see TTB Industry Circular 2021–1, at *https://ttb.gov/industry-circulars,* for details. These changes allow respondents more flexibility in changing labels without prior TTB approval and will reduce the overall number of COLA applications required to be submitted to TTB. As for adjustments, due to changes in agency estimates resulting from increases in the number of COLA applications TTB annually receives, TTB is increasing the number of annual respondents, responses, and burden hours associated with this collection.

Type of Review: Revision of a currently approved collection.

Affected Public: Businesses or other for-profits.

Estimated Annual Burden

- *Number of Respondents:* 12,500.
- *Average Responses per Respondent:* 16.4.
- *Number of Responses:* 205,000.
- *Average per-Response Burden:* 31 minutes.
- *Total Burden:* 105,917 hours.

OMB Control No. 1513–0026

Title: Claims for Drawback of Tax on Tobacco Products, Cigarette Papers, and Cigarette Tubes Exported from the United States.

TTB Form Numbers: TTB F 5200.17 and TTB F 5620.7.

Abstract: The IRC at 26 U.S.C. 5706 provides for the drawback (refund) of Federal excise taxes paid on tobacco products, and on cigarette papers and tubes, when such articles are subsequently exported in accordance with the bond and regulatory requirements prescribed by the Secretary. Under that authority, the TTB regulations in 27 CFR part 44 provide for drawback of excise taxes paid on such products shipped to a foreign country, Puerto Rico, the Virgin Islands, or a possession of the United States when the person who paid the tax files the prescribed claim and bond. The regulations require that respondents file such claims and certain supporting documentation using form TTB F 5620.7, while the required bond is filed using form TTB F 5200.17. In addition, respondents may file letterhead applications for relief from certain regulatory requirements regarding filing of supporting documentation showing export or loss. This collection ensures drawback is provided consistent with the statutory provisions.

Current Actions: There are no program changes or adjustments associated with this information collection at this time, and TTB is submitting it for extension purposes only.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses and other for-profits.

Estimated Annual Burden

- *Number of Respondents:* 13.
- *Average Responses per Respondent:* 1 (one).
- *Number of Responses:* 13.
- *Average per-Response Burden:* 1.385 hours.
- *Total Burden:* 18 hours.

OMB Control No. 1513–0027

Title: Removals of Tobacco Products and Cigarette Papers and Tubes without Payment of Tax.

TTB Form Number: TTB F 5200.14.

Abstract: The IRC at 26 U.S.C. 5704(b) provides that a manufacturer or export warehouse proprietor, in accordance with regulations prescribed by the Secretary, may remove tobacco products and cigarette papers and tubes, without payment of tax, for export or consumption beyond the jurisdiction of the internal revenue laws of the United States. That IRC section also provides that such persons may transfer such articles, without payment of tax, to the bonded premises of another such entity. In addition, the IRC at 26 U.S.C. 5722 requires such persons to make reports as required by regulation. Under those authorities, the TTB regulations in 27 CFR part 44 require tobacco product and cigarette paper and tube manufacturers and export warehouse proprietors to report such removals on form TTB F 5200.14. Alternatively, under the alternate procedure described in TTB Industry Circular 2004–3, respondents may submit a Monthly Summary Report of such removals if records maintained at the respondent's premises document the export of each removal. Under this information collection, respondents also submit letterhead notices to modify previously submitted information, and they submit letterhead applications to obtain authorization to use an alternative Monthly Summary Report procedure. The collected information ensures the appropriate payment of tax under the IRC.

Current Actions: There are no program changes associated with this information collection, and TTB is submitting it for extension purposes only. As for adjustments, due to a change in agency estimates, TTB is decreasing the number of respondents, responses, and burden hour associated with this information collection.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profits.

Estimated Annual Burden

- *Number of Respondents:* 280.
- *Average Responses per Respondent:* 18.
- *Number of Responses:* 5,040.
- *Average per-Response Burden:* 1.85 hours.
- *Total Burden:* 9,324 hours.

OMB Control No. 1513–0030

Title: Claims—Alcohol, Tobacco, and Firearms Taxes.

TTB Form Number: TTB F 5620.8.

Abstract: The IRC at 26 U.S.C. 5008, 5056, 5370, and 5705 authorizes the Secretary to provide for claims for taxpayer relief from excise taxes paid on distilled spirits, wine, beer, and tobacco products lost or destroyed by theft or disaster, voluntarily destroyed, or returned or withdrawn from the market. The IRC at 26 U.S.C. 5044 also allows for the refund of tax for wine returned to bond. In addition, the IRC at 26 U.S.C. 5111–5114, authorizes the Secretary to issue drawback (refunds) for a portion of the excise taxes paid on distilled spirits used in the manufacture of certain nonbeverage products. Finally, the IRC at U.S.C. 6402–6404 provides that taxpayers may be refunded on certain overpayments, while section 6423 sets conditions on such claims for alcohol and tobacco excise taxes. Under those IRC authorities, the TTB regulations require taxpayers to make claims using form

TTB F 5620.8. On that form, the respondent states the amount of and the reasons and circumstances for the claim. This collected information is necessary to ensure the tax provisions of the IRC are appropriately applied as it allows TTB to determine if submitted claims meet the statutory and regulatory criteria.

Current Actions: There are no program changes or adjustments associated with this information collection, and TTB is submitting it for extension purposes only.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profits; Individuals or households; and Not-for profit institutions.

Estimated Annual Burden

- *Number of Respondents:* 5,000.
- *Average Responses per Respondent:* 1 (one).
- *Number of Responses:* 5,000.
- *Average per-Response Burden:* 1 hour.
- *Total Burden:* 5,000 hours.

OMB Control No. 1513–0054

Title: Offer in Compromise of Liability Incurred under the Provisions of Title 26 U.S.C. Enforced and Administered by TTB; Collection Information Statements for Individuals and Businesses.

TTB Form Numbers: TTB F 5600.17, TTB F 5600.18, TTB F 5640.1.

Abstract: The IRC at 26 U.S.C. 7122 provides that the Secretary may compromise any civil or criminal case arising under it, including tax liabilities, in lieu of civil or criminal action. Under this authority, the TTB regulations require persons to submit offers in compromise for violations of the IRC on form TTB F 5640.1. Submitters use that form to identify the tax liabilities or violations being compromised, the amount of the compromise offer, and the reason for the offer. To support requests for installment payments of compromise offers, TTB may require individual and business respondents to supply information documenting financial hardship on TTB F 5600.17 and TTB F 5600.18, respectively. The collected information allows TTB to consider the offer in compromise in relation to the alleged violations of the law and the potential for a payment plan to address circumstances in which the individual or business is unable to pay an accepted offer in compromise immediately in full.

Current Actions: There are no program changes or adjustments associated with this information collection, and TTB is submitting it for extension purposes only.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profits; and Individuals or households.

Estimated Annual Burden

- *Number of Respondents:* 40.
- *Average Responses per Respondent:* 1 (one).
- *Number of Responses:* 40.
- *Average per-Response Burden:* 2.5 hours.
- *Total Burden:* 90 hours.

OMB Control No. 1513–0055

Title: Offer in Compromise of Liability Incurred under the Federal Alcohol Administration Act.

TTB Form Number: TTB F 5640.2.

Abstract: The FAA Act (27 U.S.C. 201 *et seq.*) requires certain alcohol beverage industry members to obtain basic permits from the Secretary, and it prohibits unfair trade practices and deceptive advertising and labeling of alcohol beverages. Under 27 U.S.C. 207, violations of the Act are subject to civil and criminal penalties, but the Secretary may accept monetary compromise for such alleged violations. Under that authority, the TTB regulations provide that a proponent or their agent may submit an offer in compromise to resolve alleged FAA Act violations using form TTB F 5640.2. The form identifies the alleged violation(s) and violator(s), amount of the compromise offer, and the reason(s) for the offer. TTB uses the information to evaluate the adequacy of the compromise offer in relation to the alleged violation(s) of the FAA Act and to determine if it should accept the offer.

Current Actions: There are no program changes or adjustments associated with this information collection, and TTB is submitting it for extension purposes only.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profits; and Individuals or households.

Estimated Annual Burden

- *Number of Respondents:* 20.
- *Average Responses per Respondent:* 1 (one).
- *Number of Responses:* 20.
- *Average per-Response Burden:* 2 hours.
- *Total Burden:* 40 hours.

OMB Control No. 1513–0090

Title: Excise Tax Return—Alcohol and Tobacco (Puerto Rico).

TTB Form Number: TTB F 5000.25.

Abstract: The IRC at 26 U.S.C. 5061(a) and 26 U.S.C. 5703(b) requires that excise taxes on alcohol and tobacco products be collected on the basis of a return, filed for the periods, at the times, and containing the information the Secretary requires by regulation. Under the IRC at 26 U.S.C. 7652(a), such taxes, at the same rates, are imposed on similar products manufactured in Puerto Rico and brought into the United States, and the majority of those taxes are subsequently transferred into the treasury of Puerto Rico. The TTB regulations in 27 CFR part 26 (for distilled spirits, wine, and beer) and part 41 (for tobacco products and cigarette papers and tubes), prescribe the use of TTB F 5000.25, Excise Tax Return—Alcohol and Tobacco (Puerto Rico) for the collection of the excise taxes imposed by 26 U.S.C. 7652(a). This collection is necessary to ensure the tax provisions of the IRC are appropriately applied.

Current Actions: There are no program changes or adjustments associated with this information collection, and TTB is submitting it for extension purposes only.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profits; Individuals and households.

Estimated Annual Burden

- *Number of Respondents:* 24.
- *Average Responses per Respondent:* 19.75.
- *Number of Responses:* 474.
- *Average per-Response Burden:* 0.75 hour.
- *Total Burden:* 356 hours.

OMB Control No. 1513–0112

Title: Special (Occupational) Tax Registration and Returns.

TTB Form Numbers: TTB F 5630.5a, TTB F 5630.d, and TTB F 5630.5t.

Abstract: Before July 1, 2008, various sections of chapter 51 of the IRC required alcohol industry members to register for and pay an annual special occupational tax (SOT). However, section 11125 of Public Law 109–59 permanently repealed, effective July 1, 2008, the SOT on alcohol beverage producers and marketers, non-beverage product manufacturers, tax-free alcohol users, and specially denatured spirits users and dealers, but any SOT liabilities incurred for periods before that date remain. Also, while most SOT requirements for the alcohol industry were repealed, 26 U.S.C. 5124 continues to require wholesale and retail alcohol dealers to register with the Secretary when commencing or ending business or when certain changes to existing registration information are necessary. In addition, the IRC at 26 U.S.C. 5731

and 5732 continues to require manufacturers of tobacco products and cigarette papers and tubes, as well as export warehouse proprietors, to register and pay an annual SOT by the use of a return. The registrations and SOT payments for such entities are due on or before the date of commencing business, and on or before July 1 of every year after that. Under the TTB regulations in 27 CFR part 31, alcohol industry members with pre-July 1, 2008, SOT liabilities use TTB F 5630.5a as the return for such liabilities, while wholesale and retail alcohol dealers register or report registration changes on TTB F 5630.5d. Under the TTB regulations in 27 CFR parts 40, 44, and 46, tobacco industry members use TTB F 5630.5t to register and pay SOT. This collection is necessary to ensure the registration and SOT provisions of the IRC are appropriately applied.

Current Actions: There are no program changes with this information collection, and TTB is submitting it for extension purposes only. As for adjustments, due to changes in agency estimates, TTB is decreasing the number of respondents, responses, and burden hours associated with this collection.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profits; Individuals or households; and Not-for-profit institutions.

Estimated Annual Burden

- *Number of Respondents:* 6,500.
- *Average Responses per Respondent:* 1 (one).
- *Number of Responses:* 6,500.
- *Average per-Response Burden:* 25 minutes.
- *Total Burden:* 2,708 hours.

OMB Control No. 1513–0140

Title: Voluntary Chemist Certification Program Applications, Notices, and Records.

Abstract: TTB offers the Chemist Certification Program as a service to the alcohol beverage industry to facilitate export of beverage alcohol to foreign markets. Many countries that require testing as a condition of entry for alcohol beverages accept a report of analysis of those alcohol beverages from a TTB-certified chemist. This certification program ensures that chemists, enologists, brewers, and technicians generate quality data and have the required proficiencies to conduct the required chemical analyses. This information collection includes the application, notice, and recordkeeping requirements associated with the TTB voluntary chemist certification program, including letterhead applications for certification, submission of certification test results, requests for TTB-affirmed reports of analysis, and notices of changes in chemist employment place or status. Under this program, certified chemists and their laboratories must also maintain usual and customary records regarding all analytical results conducted under the TTB certification, and records related to laboratory equipment, quality control policies, procedures and systems, and analyst training and competence.

Current Actions: There are no program changes or adjustments associated with this information collection, and TTB is submitting it for extension purposes only.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profits.

Estimated Annual Burden

- *Number of Respondents:* 310.
- *Average Responses per Respondent:* 1 (one).
- *Number of Responses:* 310.
- *Average per-Response Burden:* 1.33 hours.
- *Total Burden:* 412 hours.

Dated: November 12, 2021.

Amy R. Greenberg,

Director, Regulations and Rulings Division.

BILLING CODE 4810–31–P

DEPARTMENT OF THE TREASURY

Bureau of the Fiscal Service

Fee Schedule for the Transfer of U.S. Treasury Book-Entry Securities Held on the Fedwire Securities Service

AGENCY: Bureau of the Fiscal Service, Treasury.

ACTION: Notice.

SUMMARY: The Department of the Treasury (Treasury) is announcing a new fee schedule applicable to transfers of U.S. Treasury book-entry securities maintained on the Fedwire Securities Service (Fedwire) that occur on or after January 3, 2022.

DATES: Effective January 3, 2022.

FOR FURTHER INFORMATION CONTACT: Janeene Wilson, Bureau of the Fiscal Service, 304–480–6321.

SUPPLEMENTARY INFORMATION: Treasury has established a fee structure for the transfer of Treasury book-entry securities maintained on Fedwire. Treasury reassesses this fee structure periodically based on our review of the latest book-entry costs and volumes.

For each Treasury securities transfer or reversal sent or received on or after January 3, 2022, the basic fee will increase from $0.65 to $0.74. The Federal Reserve System also charges a funds movement fee for each of these transactions for the funds settlement component of a Treasury securities transfer.[1] The surcharge for an off-line Treasury book-entry securities transfer will increase from $70.00 to $80.00. Off-line refers to the sending and receiving of transfer messages to or from a Federal Reserve Bank by means other than on-line access, such as by written, facsimile, or telephone voice instruction. The basic transfer fee assessed to both sends and receives is reflective of costs associated with the processing of securities transfers. The off-line surcharge, which is in addition to the basic fee and the funds movement fee, reflects the additional processing costs associated with the manual processing of off-line securities transfers.

Treasury does not charge a fee for account maintenance, the stripping and reconstitution of Treasury securities, the wires associated with original issues, or interest and redemption payments. Treasury currently absorbs these costs.

The fees described in this notice apply only to the transfer of Treasury book-entry securities held on Fedwire. Information concerning fees for book-entry transfers of Government Agency securities, which are priced by the Federal Reserve, is set out in a separate **Federal Register** notice published by the Federal Reserve.

The following is the Treasury fee schedule that will take effect on January 3, 2022, for book-entry transfers on Fedwire:

TREASURY-FEDWIRE FEE SCHEDULE EFFECTIVE JANUARY 3, 2022

[In dollars]

	Fee
Basic Transfer Origination	0.74
Basic Transfer Received	0.74
Basic Reversal Origination ...	0.74
Basic Reversal Received	0.74
Off-line Origination and Receipt Surcharge	80.00

[1] The Board of Governors of the Federal Reserve System sets this fee separately from the fees assessed by Treasury. For a current listing of the Federal Reserve System's fees, please refer to *https://www.frbservices.org/financial-services/securities/index.html.*

Authority: 31 CFR 357.45.

Timothy E. Gribben,

Commissioner, Bureau of the Fiscal Service.

UNIFIED CARRIER REGISTRATION PLAN

Sunshine Act Meetings

TIME AND DATE: November 18, 2021, 12:00 p.m. to 2:00 p.m., Eastern time.

PLACE: This meeting will be accessible via conference call and via Zoom Meeting and Screenshare. Any interested person may call (i) 1–929–205–6099 (US Toll) or 1–669–900–6833 (US Toll) or (ii) 1–877–853–5247 (US Toll Free) or 1–888–788–0099 (US Toll Free), Meeting ID: 976 6673 2184, to listen and participate in this meeting. The website to participate via Zoom Meeting and Screenshare is *https://kellen.zoom.us/j/97666732184.*

STATUS: This meeting will be open to the public.

MATTERS TO BE CONSIDERED: The Unified Carrier Registration Plan Education and Training Subcommittee (the ''Subcommittee'') will continue its work in developing and implementing the Unified Carrier Registration Plan and Agreement. The subject matter of this meeting will include:

Proposed Agenda

I. Call to Order—Subcommittee Chair
The Subcommittee Chair will welcome attendees, call the meeting to order, call roll for the Subcommittee, confirm whether a quorum is present, and facilitate self-introductions.

II. Verification of Publication of Meeting Notice—UCR Executive Director
The UCR Executive Director will verify the publication of the meeting notice on the UCR website and distribution to the UCR contact list via email followed by the subsequent publication of the notice in the **Federal Register**.

III. Review and Approval of Subcommittee Agenda and Setting of Ground Rules—Subcommittee Chair
For Discussion and Possible Subcommittee Action
The Agenda will be reviewed, and the Subcommittee will consider adoption.
Ground Rules
Subcommittee action only to be taken in designated areas on agenda.

IV. Review and Approval of Subcommittee Minutes from the October 7, 2021 Meeting—Subcommittee Chair
For Discussion and Possible Subcommittee Action
Draft minutes from the October 7, 2021 Subcommittee meeting via teleconference will be reviewed. The Subcommittee will consider action to approve.

V. Audit Module 2 Development Discussion—UCR Operations Manager
The UCR Operations Manager will discuss and provide updates on development of the Audit Module 2.

VI. Other Business—Subcommittee Chair
The Subcommittee Chair will call for any other items Subcommittee members would like to discuss.

VII. Adjournment—Subcommittee Chair
The Subcommittee Chair will adjourn the meeting.

The agenda will be available no later than 5:00 p.m. Eastern time, November 11, 2021 at: *https://plan.ucr.gov.*

CONTACT PERSON FOR MORE INFORMATION: Elizabeth Leaman, Chair, Unified Carrier Registration Plan Board of Directors, (617) 305–3783, *eleaman@board.ucr.gov.*

Alex B. Leath,

Chief Legal Officer, Unified Carrier Registration Plan.

BILLING CODE 4910–YL–P

DEPARTMENT OF VETERANS AFFAIRS

Veterans and Community Oversight and Engagement Board, Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act (FACA), 5 U.S.C. app. 2, that the Veterans and Community Oversight and Engagement Board will meet virtually on December 2, 2021. The meeting will begin and end as follows:

Date	Time
December 2, 2021	3:00 p.m. to 7:00 p.m. Eastern Standard Time (EST).

The meeting is open to the public and will be recorded. Members of the public can attend the meeting by registering at the link below:*https://veteransaffairs.webex.com/veteransaffairs/onstage/g.php?MTID=e315893bd540f26b301ecaeeb04374025.*

The Board was established by the West Los Angeles Leasing Act of 2016 on September 29, 2016. The purpose of the Board is to provide advice and make recommendations to the Secretary of Veterans Affairs on: Identifying the goals of the community and Veteran partnership; improving services and outcomes for Veterans, members of the Armed Forces, and the families of such Veterans and members; and on the implementation of the Draft Master Plan approved by the Secretary on January 28, 2016, and on the creation and implementation of any successor master plans.

On Dec 2, the agenda will include opening remarks from the Committee Chair, Executive Sponsor, and other VA officials. There will be a comprehensive briefing from the Veterans Administration Greater Los Angeles Healthcare System (VAGLAHS) on Master Plan 2022 timeline and activities, Current and Future project status, and timeline, to include a side-by-side comparison of Master Pan 2016 and Master Plan 2022. The Board's Services and Outcome Subcommittee Master Plan will present a recommendation that introduces a dashboard to track Homeless Veterans, HUD VASH voucher utilization, and vacant master-leased properties.

A public comment session will occur from 4:10 p.m. to 5:10 p.m. Individuals wishing to make public comments are required to register during the WEBEX registration process. In the interest of time management, speakers will be held to a 5-minute time limit and selected in the order of event registration. If time expires and your name was not selected, or you did not register to provide public comment and would like to do so, you are asked to submit public comments via email at *VEOFACA@va.gov* for inclusion in the official meeting record.

To attend the meeting, use the registration instructions—Registration Instructions: Select the ''Register'' hyperlink in event status or the ''Register'' button located bottom center of the page. Attendees will then be asked to identify themselves by first name, last name, email address, affiliation (if any) and interest in making a public comment. Please select ''Submit'' to finish registration. You will receive a confirmation email from WEBEX shortly after registration. The confirmation email will include a calendar event invitation and instructions to join the meeting via web browser or telephone. Attempts to join the meeting will not work until the host opens the meeting approximately ten minutes prior to start time.

Any member of the public seeking additional information should contact

Mr. Eugene W. Skinner Jr. at (202) 631–7645 or *Eugene.Skinner@va.gov.*

Dated: November 10, 2021.

Jelessa M. Burney,

Federal Advisory Committee Management Officer.

Agency Information Collection Activity: COVID–19 Refund Modification

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Veterans Benefits Administration, Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden and it includes the actual data collection instrument.

DATES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Refer to ''OMB Control No. 2900–0891.''

FOR FURTHER INFORMATION CONTACT: Maribel Aponte, Office of Enterprise and Integration, Data Governance Analytics (008), 1717 H Street NW, Washington, DC 20006, (202) 266–4688 or email *maribel.aponte@va.gov.* Please refer to ''OMB Control No. 2900–0891'' in any correspondence.

SUPPLEMENTARY INFORMATION:

Authority: 38 CFR 36.4338(a).

Title: COVID–19 Refund Modification.

OMB Control Number: 2900–0891.

Type of Review: Extension of a currently approved collection.

Abstract: VA is temporarily expanding the list of loan modification options available to servicers that do not require VA's prior approval to include a new loan modification, the COVID–19 Refund Modification, to assist certain COVID-impacted veterans as they exit a COVID–19 forbearance. Under 38 U.S.C. 3720(a)(2), Congress has provided the Secretary with discretion ''[n]otwithstanding the provisions of any other law'' to set the terms and conditions to which the Secretary will consent to loan modifications. Additionally, while VA has outlined in regulation at 38 CFR 36.4315(a) the terms of loan modifications that do not require prior VA approval, VA may waive a regulatory requirement if VA finds the interest of the Government are not adversely affected and such waiver would relieve undue prejudice to a debtor, holder, or other person without impairing the vest rights of any person affected. 38 CFR 36.4338(a).

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at 86 FR 50210 on September 7, 2021, pages 50210 and 50211.

Affected Public: Individuals or Households.

Estimated Annual Burden: 25,800.

Estimated Average Burden per Respondent: 90 minutes.

Frequency of Response: One time.

Estimated Number of Respondents: 17,200.

By direction of the Secretary.

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration, Data Governance Analytics, Department of Veterans Affairs.

National Research Advisory Council, Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act, 5 U.S.C. App. 2, that the National Research Advisory Council will hold a meeting on Wednesday, December 8, 2021, by Webex. The teleconference number is 1–404–397–1596, conference ID 199 811 6717 or the meeting link is *https://veteransaffairs.webex.com/veteransaffairs/j.php?MTID=mee580294d1ca4b86e69b617fd028f134.* The meeting will convene at 11:00 a.m. and end at 2:00 p.m. Eastern daylight time. This meeting is open to the public.

The purpose of the National Research Advisory Council is to advise the Secretary on research conducted by the Veterans Health Administration, including policies and programs targeting the high priority of Veterans' health care needs.

On December 8, 2021, the agenda will include a discussion of fiscal year 2021 accomplishments in review; follow up discussion of diversity, equity, and inclusion activities in response to the NRAC recommendations; and discussion of subcommittee activities. No time will be allocated at this meeting for receiving oral presentations from the public. Members of the public wanting to attend, have questions or presentations to present may contact Rashelle Robinson, Designated Federal Officer, Office of Research and Development (14RD), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420, at 202–443–5768, or *Rashelle.robinson@va.gov* no later than close of business on December 3, 2021. All questions and presentations will be presented during the public comment section of the meeting. Any member of the public seeking additional information should contact Rashelle Robinson at the above phone number or email address noted above.

Dated: November 9, 2021.

LaTonya L. Small,

Federal Advisory Committee Management Officer.

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0892]

Agency Information Collection Activity Under OMB Review: Reimbursement of Preparatory (PREP) Course for Licensing or Certification Test

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Veterans Benefits Administration (VBA), Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden and it includes the actual data collection instrument.

DATES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Refer to ''OMB Control No. 2900–0892.

FOR FURTHER INFORMATION CONTACT: Maribel Aponte, Office of Enterprise and Integration, Data Governance Analytics (008), 1717 H Street NW, Washington, DC 20006, (202) 266–4688 or email *maribel.aponte@va.gov.* Please refer to ''OMB Control No. 2900–0892'' in any correspondence.

SUPPLEMENTARY INFORMATION:

Authority: Section 5, Public Law 116–154.

Title: Reimbursement of Preparatory (PREP) Course for Licensing or Certification.

OMB Control Number: 2900–0892.

Type of Review: Revision of a currently approved collection.

Abstract: The information collected on the VA Form 22–10272 will be utilized to permit beneficiaries to apply for reimbursement of approved preparatory courses taken to assist with preparing for a Licensing or Certification Test. VA will use data from this information collection to ensure eligible Post 9/11 GI Bill (chapter 33) and Survivors' and Dependents' Educational Assistance (DEA or chapter 35) can receive payment for attending the approved preparatory course. Without the utilization of this form, eligible beneficiaries will not be able to apply for the reimbursement they may be rightly entitled to pursuant to 38 U.S. Code 3315B.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at 86 FR 50211 on September 7, 2021.

Affected Public: Individuals or Households.

Estimated Annual Burden: 71 hours.

Estimated Average Burden per Respondent: 15 minutes.

Frequency of Response: Occasionally.

Estimated Number of Respondents: 285.

By direction of the Secretary.

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration, Data Governance Analytics, Department of Veterans Affairs.

DEPARTMENT OF VETERANS AFFAIRS

Advisory Committee on Minority Veterans, Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act, 5 U.S.C. App 2., that the Advisory Committee on Minority Veterans will virtually meet on December 7–9, 2021. The meeting sessions will begin and end as follows:

Dates	Times
December 7, 2021	11:00 a.m.–3:00 p.m.—Eastern Standard Time (EST).
December 8, 2021	11:00 a.m.–3:00 p.m. EST.
December 9, 2021	11:00 a.m.–3:00 p.m. EST.

This meeting is open to the public. To access the meeting, please click the link: Adobe Connect: *http://va-eerc-ees.adobeconnect.com/cmv_admin/.*

The purposes of the Committee are to: Advise the Secretary on the administration of VA benefits and services to minority Veterans; assess the needs of minority Veterans; and evaluate whether VA compensation, medical and rehabilitation services, outreach, and other programs are meeting those needs. The Committee makes recommendations to the Secretary regarding such activities.

On December 7, the Committee will receive briefings and updates from the Center for Minority Veterans, National Cemetery Administration, Veterans Experience Office, National Center for Veterans Analysis and Statistics, Office of Tribal Government Relations, and Veterans Benefits Administration. On December 8, the Committee will receive briefings and updates from the Board of Veterans Appeals, Veterans Health Administration, Center for Women Veterans, Mental Health, Inclusion, Diversity, Equity and Access (IDEA) Task Force, Office of Rural Health and Office of Health Equity. On December 9, the Committee will receive briefings and updates on Office of Diversity & Inclusion, Senior Advisor for Pacific Strategies and ex officio updates. The Committee will then hold a leadership exit briefing with Veterans Benefits Administration, Veterans Health Administration and National Cemetery Administration. The Committee will receive public comments from 1:00 p.m. to 1:15 p.m. The Committee will conduct an after-action review.

Individuals who wish to provide public comment are invited to submit a 1–2-page summary of their comments no later than November 29, 2021 for inclusion in the official meeting record. Members of the public may also submit written statements for the Committee's review to Ms. Juanita Mullen, at *Juanita.Mullen@va.gov.* Any member of the public seeking additional information should contact Ms. Juanita Mullen or Mr. Dwayne Campbell at (202) 461–6191.

Dated: November 9, 2021.

Jelessa M. Burney,

Federal Advisory Committee Management Officer.

DEPARTMENT OF VETERANS AFFAIRS

Advisory Committee on Women Veterans, Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act, 5 U.S.C. app 2, that the Advisory Committee on Women Veterans will conduct a virtual meeting on December 14–16, 2021. The meeting will begin at 10:00 a.m. Eastern Standard Time (EST) and end 1:00 p.m. EST each day.

Date	Time	Location
December 14, 2021	10:00 a.m.–1:00 p.m. EST	See WebEx link and call-in information below.
December 15, 2021	10:00 a.m.–1:00 p.m. EST	See WebEx link and call-in information below.
December 16, 2021	10:00 a.m.–1:00 p.m. EST	See WebEx link and call-in information below.

The meeting sessions are open to the public.

The purpose of the Committee is to advise the Secretary of Veterans Affairs regarding the needs of women Veterans with respect to health care,

rehabilitation, compensation, outreach, and other programs and activities administered by VA designed to meet such needs. The Committee makes recommendations to the Secretary regarding such programs and activities.

The agenda will include updates from VA's Administrations and Staff Offices, updates on report recommendations, as well as briefings on other issues impacting women Veterans.

No time will be allocated at this meeting for receiving oral presentations from the public. Interested parties should provide written comments for review by the Committee to Ms. Shannon L. Middleton at *00W@mail.va.gov* no later than December 6, 2021. Any member of the public who wishes to participate in the virtual meeting may use the following WebEx link: *https://veteransaffairs.webex.com/veteransaffairs/j.php?MTID=m8545cf5df8c7b3b576baa1032fe90035.* To join by phone: 1–833–558–0712 (toll free); mobile device: 1–404–397–1596, meeting number/access code: 2763 047 1516.

Dated: November 10, 2021.

BILLING CODE P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–NEW]

Agency Information Collection Activity: Suicide Prevention 2.0 Program—Community Opinion Survey

AGENCY: Veterans Health Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: Veterans Health Administration (VHA), Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of a currently approved collection, and allow 60 days for public comment in response to the notice.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before January 18, 2022.

ADDRESSES: Submit written comments on the collection of information through Federal Docket Management System (FDMS) at *www.Regulations.gov* or to Janel Keyes, Office of Regulations, Appeals, and Policy (10BRAP), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420 or email to *Janel.Keyes@va.gov.* Please refer to ''OMB Control No. 2900–NEW'' in any correspondence. During the comment period, comments may be viewed online through FDMS.

FOR FURTHER INFORMATION CONTACT: Maribel Aponte, Office of Enterprise and Integration, Data Governance Analytics (008), 1717 H Street NW, Washington, DC 20006, (202) 266–4688 or email *maribel.aponte@va.gov.* Please refer to ''OMB Control No. 2900–NEW'' in any correspondence.

SUPPLEMENTARY INFORMATION:

Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VHA invites comments on: (1) Whether the proposed collection of information is necessary for the proper performance of VHA's functions, including whether the information will have practical utility; (2) the accuracy of VHA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Authority: Public Law 104–13; 44 U.S.C. 3501–3521.

Title: Suicide Prevention 2.0 Program—Community Opinion Survey.

OMB Control Number: 2900–NEW.

Type of Review: New collection.

Abstract: Legal authority for this data collection is found under 38 U.S.C., Part I, Chapter 5, Section 527, which authorizes the collection of data that will allow measurement and evaluation of VA Programs, the goal of which is improved health care for veterans. The information will be used to accomplish three aims: (1) Collect baseline data on the knowledge and attitudes of adult US citizens living in specified communities about veterans, veteran suicide, and resources available to veterans to reduce suicide, prior to the implementation of suicide prevention programs; (2) collect follow-up data in the same communities to assess whether those knowledge and attitudes have changed over time; and (3) determine whether the programs and policies implemented by a community resulted in positive change in knowledge and attitudes.

The data will be utilized by the Office of Mental Health and Suicide Prevention in VA Central Office to measure the return on investment of significant resources that have been invested to support communities in their efforts to reduce veteran suicide. Specifically, the Community-Based Interventions (CBI) arm of VA's ''Suicide Prevention 2.0'' (SP2.0) program has launched two different initiatives whose goals are to increase the successful implementation of best practices to prevent veteran suicide in local communities. The data will allow VA to measure a baseline level of expected outcomes, follow-up levels, and explore the role of new programs in any changes, as well as inform program planning and evaluation.

In addition, the data collected will be used by State teams that are engaged in the Governor's Challenge (GC) initiative. GC is one of the initiatives supported by SP2.0 and is structured so that State teams are provided training and technical assistance by VA to expand their efforts to implement suicide prevention programs in their State. This data collection will assist the State teams to assess the effects of their new programming or policies.

Affected Public: Individuals or households.

Estimated Annual Burden: 2,500 hours.

Estimated Average Burden per Respondent: 15 minutes.

Frequency of Response: Once annually.

Estimated Number of Respondents: 10,000.

By direction of the Secretary.

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration/Data Governance Analytics, Department of Veterans Affairs.

Medicare Program: Hospital Outpatient Prospective Payment and Ambulatory Surgical Center Payment Systems and Quality Reporting Programs; Price Transparency of Hospital Standard Charges; Radiation Oncology Model

AGENCY: Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services (HHS).

ACTION: Final rule with comment period.

SUMMARY: This final rule with comment period revises the Medicare hospital outpatient prospective payment system (OPPS) and the Medicare ambulatory surgical center (ASC) payment system for Calendar Year (CY) 2022 based on our continuing experience with these systems. In this final rule with comment period, we describe the changes to the amounts and factors used to determine the payment rates for Medicare services paid under the OPPS and those paid under the ASC payment system. Also, this final rule with comment period updates and refines the requirements for the Hospital Outpatient Quality Reporting (OQR) Program and the ASC Quality Reporting (ASCQR) Program, updates Hospital Price Transparency requirements, and updates and refines the design of the Radiation Oncology Model.

DATES:

Effective date: The provisions of the final rule with comment are effective January 1, 2022.

Comment period: To be assured consideration, comments on the payment classifications assigned to the interim APC assignments and/or status indicators of new or replacement Level II HCPCS codes in this final rule with comment period (CMS–1753–FC) must be received at one of the addresses provided in the **ADDRESSES** section no later than 5 p.m. EST on December 2, 2021.

ADDRESSES: In commenting, please refer to file code CMS–1753–FC.

Comments, including mass comment submissions, must be submitted in one of the following three ways (please choose only one of the ways listed):

1. Electronically. You may submit electronic comments on this regulation to *http://www.regulations.gov.* Follow the ''Submit a comment'' instructions.

2. By regular mail. You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1753–FC, P.O. Box 8010, Baltimore, MD 21244–1810.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. By express or overnight mail. You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1753–FC, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following website as soon as possible after they have been received: *http://www.regulations.gov.* Follow the search instructions on that website to view public comments. CMS will not post on *Regulations.gov* public comments that make threats to individuals or institutions or suggest that the individual will take actions to harm the individual. CMS continues to encourage individuals not to submit duplicative comments. We will post acceptable comments from multiple unique commenters even if the content is identical or nearly identical to other comments.

Addenda Available Only Through the Internet on the CMS Website

In the past, a majority of the Addenda referred to in our OPPS/ASC proposed and final rules were published in the **Federal Register** as part of the annual rulemakings. However, beginning with the CY 2012 OPPS/ASC proposed rule, all of the Addenda no longer appear in the **Federal Register** as part of the annual OPPS/ASC proposed and final rules to decrease administrative burden and reduce costs associated with publishing lengthy tables. Instead, these Addenda are published and available only on the CMS website. The Addenda relating to the OPPS are available at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices.*

The Addenda relating to the ASC payment system are available at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/ASCPayment/ASC-Regulations-and-Notices.*

I. Summary and Background

A. Executive Summary of This Document

1. Purpose

In this final rule with comment period, we are updating the payment policies and payment rates for services furnished to Medicare beneficiaries in hospital outpatient departments (HOPDs) and ambulatory surgical centers (ASCs), beginning January 1, 2022. Section 1833(t) of the Social Security Act (the Act) requires us to annually review and update the payment rates for services payable under the Hospital Outpatient Prospective Payment System (OPPS). Specifically, section 1833(t)(9)(A) of the Act requires the Secretary to review certain components of the OPPS not less often than annually, and to revise the groups, the relative payment weights, and the wage and other adjustments that take into account changes in medical practices, changes in technology, and the addition of new services, new cost data, and other relevant information and factors. In addition, under section 1833(i)(D)(v) of the Act, we annually review and update the ASC payment rates. This final rule with comment period also includes additional policy changes made in accordance with our experience with the OPPS and the ASC payment system and recent changes in our statutory authority. We describe these and various other statutory authorities in the relevant sections of this final rule with comment period. In addition, this final rule with comment period updates and refines the requirements for the Hospital Outpatient Quality Reporting (OQR) Program, the ASC Quality Reporting (ASCQR) Program, Hospital Price Transparency requirements, and the design of the Radiation Oncology Model.

2. Summary of the Major Provisions

• *OPPS Update:* For 2022, we are increasing the payment rates under the OPPS by an Outpatient Department (OPD) fee schedule increase factor of 2.0 percent. This increase factor is based on the proposed hospital inpatient market basket percentage increase of 2.7 percent for inpatient services paid under the hospital inpatient prospective payment system (IPPS) reduced by a proposed productivity adjustment of 0.7 percentage point. Based on this update, we estimate that total payments to OPPS providers (including beneficiary cost-sharing and estimated changes in enrollment, utilization, and case-mix) for calendar year (CY) 2022 would be approximately $82.078 billion, an increase of approximately $5.913 billion compared to estimated CY 2022 OPPS payments.

We are continuing to implement the statutory 2.0 percentage point reduction in payments for hospitals that fail to meet the hospital outpatient quality reporting requirements by applying a reporting factor of 0.9804 to the OPPS payments and copayments for all applicable services.

• *Data used in CY 2022 OPPS/ASC Ratesetting:* To set CY 2022 OPPS and ASC payment rates, we would normally use the most updated claims and cost report data available. However, because the CY 2020 claims data include services furnished during the COVID–19 PHE, which significantly affected outpatient service utilization, we have determined that CY 2019 data would better approximate expected CY 2022 outpatient service utilization than CY 2020 data. As a result, we are utilizing CY 2019 data to set CY 2022 OPPS and ASC payment rates.

• *Partial Hospitalization Update:* For CY 2022, we are using the CMHC and hospital-based PHP (HB PHP) geometric mean per diem costs, consistent with existing methodology, but with a cost floor that will maintain the per diem costs finalized in CY 2021. We are also using the CY 2019 claims and cost report data for each provider type, consistent with the use of claims and cost report data prior to the PHE within the broader CY 2022 OPPS ratesetting.

• *Changes to the Inpatient Only (IPO) List:* For 2022, we are finalizing our proposal with modification to pause the elimination of the IPO list and add back to the IPO list the services removed in 2021, except for CPT code 22630 (Arthrodesis, posterior interbody technique, including laminectomy and/or discectomy to prepare interspace (other than for decompression), single interspace; lumbar); CPT code 23472 (Arthroplasty, glenohumeral joint; total shoulder (glenoid and proximal humeral replacement (for example, total shoulder))); CPT code 27702 (Arthroplasty, ankle; with implant (total ankle)) and their corresponding anesthesia codes: CPT code 00630 (Anesthesia for procedures in lumbar region; not otherwise specified), CPT code 00670 (Anesthesia for extensive spine and spinal cord procedures (*e.g.,* spinal instrumentation or vascular procedures)); CPT code 01638 (Anesthesia for open or surgical arthroscopic procedures on humeral

head and neck, sternoclavicular joint, acromioclavicular joint, and shoulder joint; total shoulder replacement); and CPT 01486 (Anesthesia for open procedures on bones of lower leg, ankle, and foot; total ankle replacement). We are also classifying CPT code 0643T (Transcatheter left ventricular restoration device implantation including right and left heart catheterization and left ventriculography when performed, arterial approach) as an inpatient only procedure. We are finalizing our proposal to amend the regulation at § 419.22(n) to remove the reference to the elimination of the list of services and procedures designated as requiring inpatient care through a 3-year transition and to codify our five longstanding criteria for determining whether a service or procedure should be removed from the IPO list in the regulation in a new § 419.23.

• *Medical Review of Certain Inpatient Hospital Admissions under Medicare Part A for CY 2021 and Subsequent Years (2-Midnight Rule):* For CY 2022, we are finalizing a policy to exempt procedures that are removed from the inpatient only (IPO) list under the OPPS beginning on or after January 1, 2022, from site-of-service claim denials, Beneficiary and Family-Centered Care Quality Improvement Organization (BFCC–QIO) referrals to Recovery Audit Contractor (RAC) for persistent noncompliance with the 2-midnight rule, and RAC reviews for ''patient status'' (that is, site-of-service) for a time period of 2 years.

• 340B-*Acquired Drugs:* For CY 2022, we are continuing our current policy of paying an adjusted amount of ASP minus 22.5 percent for drugs and biologicals acquired under the 340B program. We are continuing to exempt Rural SCHs, PPS-exempt cancer hospitals and children's hospitals from our 340B payment policy.

• *Device Pass-Through Payment Applications:* For CY 2022, we received eight applications for device pass-through payments. One of these applications received preliminary approval for pass-through payment status through our quarterly review process. We solicited public comment on all eight of these applications and are making final determinations on these applications in this CY 2022 OPPS/ASC final rule with comment period.

• *Equitable Adjustment for Device Category, Drugs, and Biologicals with Expiring Pass-through Status:* As a result of our proposal to use CY 2019 claims data, rather than CY 2020 claims data, to inform CY 2022 ratesetting, we are using our equitable adjustment authority under 1833(t)(2)(E) to provide up to four quarters of separate payment for 27 drugs and biologicals and one device category whose pass-through payment status will expire between December 31, 2021 and September 30, 2022.

• *Cancer Hospital Payment Adjustment:* For CY 2022, we are continuing to provide additional payments to cancer hospitals so that a cancer hospital's payment-to-cost ratio (PCR) after the additional payments is equal to the weighted average PCR for the other OPPS hospitals using the most recently submitted or settled cost report data. However, section 16002(b) of the 21st Century Cures Act requires that this weighted average PCR be reduced by 1.0 percentage point. Based on the data and the required 1.0 percentage point reduction, we are using a target PCR of 0.89 to determine the CY 2022 cancer hospital payment adjustment to be paid at cost report settlement. That is, the payment adjustments will be the additional payments needed to result in a PCR equal to 0.89 for each cancer hospital.

• *ASC Payment Update:* For CYs 2019 through 2023, we adopted a policy to update the ASC payment system using the hospital market basket update. Using the hospital market basket methodology, for CY 2022, we are increasing payment rates under the ASC payment system by 2.0 percent for ASCs that meet the quality reporting requirements under the ASCQR Program. This increase is based on a hospital market basket percentage increase of 2.7 percent reduced by a productivity adjustment of 0.7 percentage point. Based on this update, we estimate that total payments to ASCs (including beneficiary cost-sharing and estimated changes in enrollment, utilization, and case-mix) for CY 2022 would be approximately 5.41 billion, an increase of approximately 40 million compared to estimated CY 2021 Medicare payments.

• *ASC Payment Policy for Non-Opioid Pain Management Drugs and Biologicals under Section 6082 of the SUPPORT Act (Section 1833(t)(22) of the Social Security Act):* Under section 1833(t)(22)(A) of the Act, the Secretary was required to conduct a review (part of which may include a request for information) of payments for opioids and evidence-based non-opioid alternatives for pain management (including drugs and devices, nerve blocks, surgical injections, and neuromodulation) with a goal of ensuring that there are not financial incentives to use opioids instead of non-opioid alternatives. Section 1833(t)(22)(A)(ii) provides that the Secretary may, as the Secretary determines appropriate, conduct subsequent reviews of such payments.

In accordance with our review and comments from stakeholders, for CY 2022, we are finalizing our proposal to modify the current non-opioid pain management payment policy and regulatory text to require that evidence-based non-opioid alternatives for pain management must be approved under a new drug application under section 505(c) of the Federal Food, Drug, and Cosmetic Act, under an abbreviated new drug application under section 505(j), or, in the case of a biological product, be licensed under section 351 of the Public Health Service Act. We further proposed that the drug or biological must also have an FDA-approved indication for pain management or analgesia and have a per-day cost in excess of the OPPS drug packaging threshold, which is finalized at $130 for CY 2022 and described in section V.B.1.a. of this final rule with comment period, to qualify for separate payment in the ASC setting. We appreciate the comments received on our multiple comment solicitations. We are not finalizing any policy modifications or additional criteria as a result of these comments but will take this information into consideration for future notice and comment rulemaking.

For CY 2022, in accordance with our finalized criteria, CMS review, and stakeholder comments, we will pay separately in the ASC setting for four drugs that are non-opioid pain management drugs that function as surgical supplies.

• *Changes to the List of ASC Covered Surgical Procedures:* For CY 2022, we are reinstating the ASC Covered Procedures List (CPL) criteria that were in effect in CY 2020 and removing several of the procedures that were added to the ASC CPL in CY 2021. We requested comments on whether any of the procedures that we proposed to remove from the ASC CPL in CY 2021 met the CY 2020 criteria that we proposed to reinstate. After reviewing these recommendations, we determined that a total of six procedures should either remain on or be added to the CPL We are also finalizing our proposal to adopt a nomination process, under which stakeholders may nominate procedures they believe meet the requirements to be added to the ASC CPL. CMS will provide subregulatory guidance on the nomination process in early 2022, with procedure nominations due in March 2022, and the formal nomination process beginning in CY 2023.

• *Hospital Outpatient Quality Reporting (OQR) Program:* For the Hospital OQR Program, we proposed changes for the CY 2023, CY 2024, CY 2025, and CY 2026 payment determinations and subsequent years in the CY 2022 OPPS/ASC proposed rule (86 FR 42018). In this final rule, we are finalizing our proposals to: (1) Remove the OP–02: Fibrinolytic Therapy Received Within 30 Minutes of ED Arrival measure beginning with the CY 2025 payment determination; (2) remove the OP–3: Median Time to Transfer to Another Facility for Acute Coronary Intervention measure beginning with the CY 2025 payment determination; (3) adopt OP–38: COVID–19 Vaccination Coverage Among Health Care Personnel (HCP) measure beginning with the CY 2024 payment determination; (4) adopt OP–39: The Breast Screening Recall Rates measure beginning with the CY 2023 payment determination; (5) adopt OP–40: The ST-Segment Elevation Myocardial Infarction (STEMI) electronic clinical quality measure (eCQM) beginning with voluntary reporting for the CY 2023 reporting period and mandatory reporting beginning with the CY 2024 reporting period/CY 2026 payment determination; and (6) restart reporting of the OP–37a–e: Outpatient and Ambulatory Surgery Consumer Assessment of Healthcare Providers and Systems (OAS CAHPS) Survey-based measures beginning with voluntary reporting during the CY 2023 reporting period and mandatory reporting beginning with the CY 2024 reporting period/CY 2026 payment determination. We are finalizing as proposed the data submission requirements for the OAS CAHPS Survey-based measures and the COVID–19 Vaccination Coverage Among HCP measure (OP–38). Similarly, we are finalizing as proposed the data submission and certification requirements for eCQMs and expanding our Extraordinary Circumstances Exemption (ECE) policy to these measures.

Beginning with the CY 2024 payment determination, we are finalizing as proposed three updates to our validation requirements to: (1) Use electronic file submissions for chart-abstracted measure medical record requests; (2) change the chart validation requirements and methods; and (3) update the targeting criteria. In the CY 2022 OPPS/ASC proposed rule (86 FR 42018) we requested comment from stakeholders on: (1) The potential future development and inclusion of a patient-reported outcomes measure following elective total hip and/or total knee arthroplasty (THA/TKA); (2) the possibility of expanding our current disparities methods to include reporting by race and ethnicity; and (3) the possibility of hospital collection of standardized demographic information for quality reporting and measure stratification. We also requested feedback across programs on potential actions and priority areas that would enable the continued transformation of our quality measurement toward greater digital capture of data and use of the FHIR standard.

We are finalizing with modification, our proposal to make mandatory the reporting of the OP–31: Cataracts: Improvement in Patient's Visual Function within 90 Days Following Cataract Surgery measure. We are finalizing to make reporting of this measure mandatory beginning with the CY 2027 payment determination, instead of the CY 2025 payment determination.

• *Ambulatory Surgical Center Quality Reporting (ASCQR) Program:* For the ASCQR Program, we proposed changes for the CY 2024, CY 2025, and CY 2026 payment determinations and subsequent years in the CY 2022 OPPS/ASC proposed rule (86 FR 42018). For the ASCQR Program measure set, we are finalizing our proposals to: (1) Adopt ASC–20: COVID–19 Vaccination Coverage Among HCP measure beginning with the CY 2024 payment determination; and (2) resume data collection for four measures beginning with the CY 2025 payment determination: (a) ASC–1: Patient Burn; (b) ASC–2: Patient Fall; (c) ASC–3: Wrong Site, Wrong Side, Wrong Patient, Wrong Procedure, Wrong Implant; and (d) ASC–4: All-Cause Hospital Transfer/Admission. We are also finalizing as proposed the data submission requirements for the OAS CAHPS Survey-based measures and the COVID–19 Vaccination Coverage Among HCP measure (ASC–20).

We are finalizing, with modification, the proposal to require the ASC–15a–e: OAS CAHPS Survey-based measures with voluntary reporting beginning with the CY 2024 reporting period and mandatory reporting beginning with the CY 2025 reporting period/CY 2027 payment determination.

We are also finalizing with modification the proposal to require the ASC–11: Cataracts: Improvement in Patient's Visual Function within 90 Days Following Cataract Surgery measure. We are finalizing mandatory reporting of this measure beginning with the CY 2027 payment determination, instead of the CY 2025 payment determination.

In the CY 2022 OPPS/ASC proposed rule (86 FR 42018) we requested stakeholder comment on: (1) The potential future development and inclusion of a patient-reported outcomes measure following elective THA/TKA; (2) potential measurement approaches or social risk factors that influence health disparities in the ASC setting; and (3) the future inclusion of a measure to assess pain management surgical procedures performed in ASCs. We also requested feedback across programs on potential actions and priority areas that would enable the continued transformation of our quality measurement toward greater digital capture of data and use of the FHIR standard.

• *Hospital Inpatient Quality Reporting (IQR) Program Update:* In the CY 2022 OPPS/ASC proposed rule (86 FR 25549 through 25628) we requested information from stakeholders on potential measure updates on reporting and submission requirements for the Safe Use of Opioids—Concurrent Prescribing eCQM.

• *Updates to Requirements for Hospitals to Make Public a List of Their Standard Charges:* We are amending several hospital price transparency policies codified at 45 CFR part 180 in order to encourage compliance. We are: (1) Increasing the amount of the penalties for noncompliance through the use of a scaling factor based on hospital bed count; (2) deeming state forensic hospitals that meet certain requirements to be in compliance with the requirements of 45 CFR part 180; and (3) finalizing a requirement that the machine-readable file be accessible to automated searches and direct downloads. In addition, we clarify the expected output of hospital online price estimator tools when hospitals choose to use an online price estimator tool in lieu of posting its standard charges for the required shoppable services in a consumer-friendly format.

• *Radiation Oncology Model (RO Model):* Section 133 of the Consolidated Appropriations Act (CAA), 2021 (Pub. L. 116–260), enacted on December 27, 2020, includes a provision that prohibits the RO Model from beginning before January 1, 2022. This law supersedes the RO Model delayed start date established in the CY 2021 OPPS/ASC final rule with comment period. We are finalizing proposed provisions related to the additional delayed implementation of the RO Model due to the CAA, 2021, as well as modifications to certain RO Model policies not related to the delay.

• *Comment Solicitation on Temporary Policies for the PHE for COVID–19:* In response to the COVID–19 pandemic, CMS undertook emergency rulemaking to implement a number of flexibilities to address the pandemic, such as preventing spread of the infection and supporting diagnosis of COVID–19. While many of these flexibilities will expire at the conclusion of the PHE, we sought comment on whether there are certain policies that should be made permanent. Specifically, we sought comment on services furnished by hospital staff to beneficiaries in their homes through use of communication technology, direct supervision when the supervising practitioner is available through two-way, audio/video communication technology, and a code and payment for COVID–19 specimen collection. We will consider comments received for future rulemaking.

• *Changes to Beneficiary Coinsurance for Colorectal Cancer Screening Test:* Section 122 of the Consolidated Appropriations Act (CAA) of 2021 amends section 1833(a) of the Act to offer a special coinsurance rule for screening flexible sigmoidoscopies and screening colonoscopies regardless of the code that is billed for the establishment of a diagnosis as a result of the test, or for the removal of tissue or other matter or other procedure, that is furnished in connection with, as a result of, and in the same clinical encounter as the colorectal cancer screening test. We are finalizing our proposal that all surgical services furnished on the same date as a planned screening colonoscopy or planned flexible sigmoidoscopy could be viewed as being furnished in connection with, as a result of, and in the same clinical encounter as the screening test for purposes of determining the coinsurance required of Medicare beneficiaries for planned colorectal cancer screening tests that result in additional procedures furnished in the same clinical encounter.

3. Summary of Costs and Benefits

In sections XXIV. and XXV. of this final rule with comment period, we set forth a detailed analysis of the regulatory and federalism impacts that the changes would have on affected entities and beneficiaries. Key estimated impacts are described below.

a. Impacts of All OPPS Changes

Table 84 in section XXIV.C. of this final rule with comment period displays the distributional impact of all the OPPS changes on various groups of hospitals and CMHCs for CY 2022 compared to all estimated OPPS payments in CY 2021. We estimate that the policies in this final rule with comment period will result in a 1.6 percent overall increase in OPPS payments to providers. We estimate that total OPPS payments for CY 2022, including beneficiary cost-sharing, to the approximately 3,659 facilities paid under the OPPS (including general acute care hospitals, children's hospitals, cancer hospitals, and CMHCs) will increase by approximately $1.3 billion compared to CY 2021 payments, excluding our estimated changes in enrollment, utilization, and case-mix.

We estimated the isolated impact of our OPPS policies on CMHCs because CMHCs are only paid for partial hospitalization services under the OPPS. Continuing the provider-specific structure we adopted beginning in CY 2011, and basing payment fully on the type of provider furnishing the service, we estimate a 1.1 percent increase in CY 2022 payments to CMHCs relative to their CY 2021 payments.

b. Impacts of the Updated Wage Indexes

We estimate that our update of the wage indexes based on the FY 2022 IPPS final rule wage indexes will result in no change for urban hospitals under the OPPS and no change for rural hospitals. These wage indexes include the continued implementation of the OMB labor market area delineations based on 2010 Decennial Census data, with updates, as discussed in section II.C. of this final rule with comment period.

c. Impacts of the Rural Adjustment and the Cancer Hospital Payment Adjustment

There are no significant impacts of our CY 2022 payment policies for hospitals that are eligible for the rural adjustment or for the cancer hospital payment adjustment. We are not making any change in policies for determining the rural hospital payment adjustments. While we are implementing the reduction to the cancer hospital payment adjustment for CY 2022 required by section 1833(t)(18)(C) of the Act, as added by section 16002(b) of the 21st Century Cures Act, the target payment-to-cost ratio (PCR) for CY 2021 is 0.89, equivalent to the 0.89 target PCR for CY 2021, and therefore has no budget neutrality adjustment.

d. Impacts of the OPD Fee Schedule Increase Factor

For the CY 2022 OPPS/ASC, we are establishing an OPD fee schedule increase factor of 2.0 percent and applying that increase factor to the conversion factor for CY 2022. As a result of the OPD fee schedule increase factor and other budget neutrality adjustments, we estimate that urban hospitals will experience an increase in payments of approximately 2.1 percent and that rural hospitals will experience an increase in payments of 2.3 percent. Classifying hospitals by teaching status, we estimate nonteaching hospitals will experience an increase in payments of 2.2 percent, minor teaching hospitals will experience an increase in payments of 2.2 percent, and major teaching hospitals will experience an increase in payments of 1.8 percent. We also classified hospitals by the type of ownership. We estimate that hospitals with voluntary ownership will experience an increase of 2.2 percent in payments, while hospitals with government ownership would experience an increase of 1.7 percent in payments. We estimate that hospitals with proprietary ownership will experience an increase of 2.3 percent in payments.

e. Impacts of the ASC Payment Update

For impact purposes, the surgical procedures on the ASC covered surgical procedure list are aggregated into surgical specialty groups using CPT and HCPCS code range definitions. The percentage change in estimated total payments by specialty groups under the CY 2022 payment rates, compared to estimated CY 2021 payment rates, generally ranges between an increase of 2 and 4 percent, depending on the service, with some exceptions. We estimate the impact of applying the hospital market basket update to ASC payment rates will increase payments by $80 million under the ASC payment system in CY 2022.

B. Legislative and Regulatory Authority for the Hospital OPPS

When Title XVIII of the Act was enacted, Medicare payment for hospital outpatient services was based on hospital-specific costs. In an effort to ensure that Medicare and its beneficiaries pay appropriately for services and to encourage more efficient delivery of care, the Congress mandated replacement of the reasonable cost-based payment methodology with a prospective payment system (PPS). The Balanced Budget Act of 1997 (BBA) (Pub. L. 105–33) added section 1833(t) to the Act, authorizing implementation of a PPS for hospital outpatient services. The OPPS was first implemented for services furnished on or after August 1, 2000. Implementing regulations for the OPPS are located at 42 CFR parts 410 and 419.

The Medicare, Medicaid, and SCHIP Balanced Budget Refinement Act of 1999 (BBRA) (Pub. L. 106–113) made major changes in the hospital OPPS. The following Acts made additional changes to the OPPS: The Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (BIPA) (Pub. L. 106–554); the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) (Pub. L. 108–173); the Deficit Reduction Act of 2005 (DRA) (Pub. L. 109–171), enacted on February 8, 2006; the Medicare Improvements and Extension Act under Division B of Title I of the Tax Relief and Health Care Act of 2006 (MIEA–TRHCA) (Pub. L. 109–432), enacted on December 20, 2006; the Medicare, Medicaid, and SCHIP Extension Act of 2007 (MMSEA) (Pub. L. 110–173), enacted on December 29, 2007; the Medicare Improvements for Patients and Providers Act of 2008 (MIPPA) (Pub. L. 110–275), enacted on July 15, 2008; the Patient Protection and Affordable Care Act (Pub. L. 111–148), enacted on March 23, 2010, as amended by the Health Care and Education Reconciliation Act of 2010 (Pub. L. 111–152), enacted on March 30, 2010 (these two public laws are collectively known as the Affordable Care Act); the Medicare and Medicaid Extenders Act of 2010 (MMEA, Pub. L. 111–309); the Temporary Payroll Tax Cut Continuation Act of 2011 (TPTCCA, Pub. L. 112–78), enacted on December 23, 2011; the Middle Class Tax Relief and Job Creation Act of 2012 (MCTRJCA, Pub. L. 112–96), enacted on February 22, 2012; the American Taxpayer Relief Act of 2012 (Pub. L. 112–240), enacted January 2, 2013; the Pathway for SGR Reform Act of 2013 (Pub. L. 113–67) enacted on December 26, 2013; the Protecting Access to Medicare Act of 2014 (PAMA, Pub. L. 113–93), enacted on March 27, 2014; the Medicare Access and CHIP Reauthorization Act (MACRA) of 2015 (Pub. L. 114–10), enacted April 16, 2015; the Bipartisan Budget Act of 2015 (Pub. L. 114–74), enacted November 2, 2015; the Consolidated Appropriations Act, 2016 (Pub. L. 114–113), enacted on December 18, 2015, the 21st Century Cures Act (Pub. L. 114–255), enacted on December 13, 2016; the Consolidated Appropriations Act, 2018 (Pub. L. 115–141), enacted on March 23, 2018; the Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment for Patients and Communities Act (Pub. L. 115–271), enacted on October 24, 2018; the Further Consolidated Appropriations Act, 2020 (Pub. L. 116–94), enacted on December 20, 2019; the Coronavirus Aid, Relief, and Economic Security Act (Pub. L. 116–136), enacted on March 27, 2020; and the Consolidated Appropriations Act, 2021 (Pub. L. 116–260), enacted on December 27, 2020.

Under the OPPS, we generally pay for hospital Part B services on a rate-per-service basis that varies according to the APC group to which the service is assigned. We use the Healthcare Common Procedure Coding System (HCPCS) (which includes certain Current Procedural Terminology (CPT) codes) to identify and group the services within each APC. The OPPS includes payment for most hospital outpatient services, except those identified in section I.C. of this final rule with comment period. Section 1833(t)(1)(B) of the Act provides for payment under the OPPS for hospital outpatient services designated by the Secretary (which includes partial hospitalization services furnished by CMHCs), and certain inpatient hospital services that are paid under Medicare Part B.

The OPPS rate is an unadjusted national payment amount that includes the Medicare payment and the beneficiary copayment. This rate is divided into a labor-related amount and a nonlabor-related amount. The labor-related amount is adjusted for area wage differences using the hospital inpatient wage index value for the locality in which the hospital or CMHC is located.

All services and items within an APC group are comparable clinically and with respect to resource use, as required by section 1833(t)(2)(B) of the Act. In accordance with section 1833(t)(2)(B) of the Act, subject to certain exceptions, items and services within an APC group cannot be considered comparable with respect to the use of resources if the highest median cost (or mean cost, if elected by the Secretary) for an item or service in the APC group is more than 2 times greater than the lowest median cost (or mean cost, if elected by the Secretary) for an item or service within the same APC group (referred to as the ''2 times rule''). In implementing this provision, we generally use the cost of the item or service assigned to an APC group.

For new technology items and services, special payments under the OPPS may be made in one of two ways. Section 1833(t)(6) of the Act provides for temporary additional payments, which we refer to as ''transitional pass-through payments,'' for at least 2 but not more than 3 years for certain drugs, biological agents, brachytherapy devices used for the treatment of cancer, and categories of other medical devices. For new technology services that are not eligible for transitional pass-through payments, and for which we lack sufficient clinical information and cost data to appropriately assign them to a clinical APC group, we have established special APC groups based on costs, which we refer to as New Technology APCs. These New Technology APCs are designated by cost bands which allow us to provide appropriate and consistent payment for designated new procedures that are not yet reflected in our claims data. Similar to pass-through payments, an assignment to a New Technology APC is temporary; that is, we retain a service within a New Technology APC until we acquire sufficient data to assign it to a clinically appropriate APC group.

C. Excluded OPPS Services and Hospitals

Section 1833(t)(1)(B)(i) of the Act authorizes the Secretary to designate the hospital outpatient services that are paid under the OPPS. While most hospital outpatient services are payable under the OPPS, section 1833(t)(1)(B)(iv) of the Act excludes payment for ambulance, physical and occupational therapy, and speech-language pathology services, for which payment is made under a fee schedule. It also excludes screening mammography, diagnostic mammography, and effective January 1, 2011, an annual wellness visit providing personalized prevention plan services. The Secretary exercises the authority granted under the statute to also exclude from the OPPS certain services that are paid under fee schedules or other payment systems. Such excluded services include, for example, the professional services of physicians and nonphysician practitioners paid under the Medicare Physician Fee Schedule (MPFS); certain laboratory services paid under the Clinical Laboratory Fee Schedule (CLFS); services for beneficiaries with end-stage renal disease (ESRD) that are paid under the ESRD prospective payment system; and services and procedures that require an inpatient stay that are paid under the hospital IPPS. In addition, section 1833(t)(1)(B)(v) of the Act does not include applicable items and services (as defined in subparagraph (A) of paragraph (21)) that are furnished on or after January 1, 2017 by an off-campus outpatient department of a provider (as defined in subparagraph (B) of paragraph (21)). We set forth the services that are excluded from payment under the OPPS in regulations at 42 CFR 419.22.

Under § 419.20(b) of the regulations, we specify the types of hospitals that are

excluded from payment under the OPPS. These excluded hospitals are:

- Critical access hospitals (CAHs);
- Hospitals located in Maryland and paid under Maryland's All-Payer or Total Cost of Care Model;
- Hospitals located outside of the 50 States, the District of Columbia, and Puerto Rico; and
- Indian Health Service (IHS) hospitals.

D. Prior Rulemaking

On April 7, 2000, we published in the **Federal Register** a final rule with comment period (65 FR 18434) to implement a prospective payment system for hospital outpatient services. The hospital OPPS was first implemented for services furnished on or after August 1, 2000. Section 1833(t)(9)(A) of the Act requires the Secretary to review certain components of the OPPS, not less often than annually, and to revise the groups, the relative payment weights, and the wage and other adjustments to take into account changes in medical practices, changes in technology, the addition of new services, new cost data, and other relevant information and factors.

Since initially implementing the OPPS, we have published final rules in the **Federal Register** annually to implement statutory requirements and changes arising from our continuing experience with this system. These rules can be viewed on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices.html.*

E. Advisory Panel on Hospital Outpatient Payment (the HOP Panel or the Panel)

1. Authority of the Panel

Section 1833(t)(9)(A) of the Act, as amended by section 201(h) of Public Law 106–113, and redesignated by section 202(a)(2) of Public Law 106–113, requires that we consult with an expert outside advisory panel composed of an appropriate selection of representatives of providers to annually review (and advise the Secretary concerning) the clinical integrity of the payment groups and their weights under the OPPS. In CY 2000, based on section 1833(t)(9)(A) of the Act, the Secretary established the Advisory Panel on Ambulatory Payment Classification Groups (APC Panel) to fulfill this requirement. In CY 2011, based on section 222 of the Public Health Service Act (the PHS Act), which gives discretionary authority to the Secretary to convene advisory councils and committees, the Secretary expanded the panel's scope to include the supervision of hospital outpatient therapeutic services in addition to the APC groups and weights. To reflect this new role of the panel, the Secretary changed the panel's name to the Advisory Panel on Hospital Outpatient Payment (the HOP Panel or the Panel). The HOP Panel is not restricted to using data compiled by CMS, and in conducting its review, it may use data collected or developed by organizations outside the Department.

2. Establishment of the Panel

On November 21, 2000, the Secretary signed the initial charter establishing the Panel, and, at that time, named the APC Panel. This expert panel is composed of appropriate representatives of providers (currently employed full-time, not as consultants, in their respective areas of expertise) who review clinical data and advise CMS about the clinical integrity of the APC groups and their payment weights. Since CY 2012, the Panel also is charged with advising the Secretary on the appropriate level of supervision for individual hospital outpatient therapeutic services. The Panel is technical in nature, and it is governed by the provisions of the Federal Advisory Committee Act (FACA). The current charter specifies, among other requirements, that the Panel—

- May advise on the clinical integrity of Ambulatory Payment Classification (APC) groups and their associated weights;
- May advise on the appropriate supervision level for hospital outpatient services;
- May advise on OPPS APC rates for ASC covered surgical procedures;
- Continues to be technical in nature;
- Is governed by the provisions of the FACA;
- Has a Designated Federal Official (DFO); and
- Is chaired by a Federal Official designated by the Secretary.

The Panel's charter was amended on November 15, 2011, renaming the Panel and expanding the Panel's authority to include supervision of hospital outpatient therapeutic services and to add critical access hospital (CAH) representation to its membership. The Panel's charter was also amended on November 6, 2014 (80 FR 23009), and the number of members was revised from up to 19 to up to 15 members. The Panel's current charter was approved on November 20, 2020, for a 2-year period.

The current Panel membership and other information pertaining to the Panel, including its charter, **Federal Register** notices, membership, meeting dates, agenda topics, and meeting reports, can be viewed on the CMS website at: *https://www.cms.gov/Regulations-and-Guidance/Guidance/FACA/AdvisoryPanelonAmbulatoryPaymentClassificationGroups.html.*

3. Panel Meetings and Organizational Structure

The Panel has held many meetings, with the last meeting taking place on August 31, 2020. Prior to each meeting, we publish a notice in the **Federal Register** to announce the meeting, new members, and any other changes of which the public should be aware. Beginning in CY 2017, we have transitioned to one meeting per year (81 FR 31941). In CY 2018, we published a **Federal Register** notice requesting nominations to fill vacancies on the Panel (83 FR 3715). As published in this notice, CMS is accepting nominations on a continuous basis.

In addition, the Panel has established an administrative structure that, in part, currently includes the use of three subcommittee workgroups to provide preparatory meeting and subject support to the larger panel. The three current subcommittees include the following:

- APC Groups and Status Indicator Assignments Subcommittee, which advises and provides recommendations to the Panel on the appropriate status indicators to be assigned to HCPCS codes, including but not limited to whether a HCPCS code or a category of codes should be packaged or separately paid, as well as the appropriate APC assignment of HCPCS codes regarding services for which separate payment is made;
- Data Subcommittee, which is responsible for studying the data issues confronting the Panel and for recommending options for resolving them; and
- Visits and Observation Subcommittee, which reviews and makes recommendations to the Panel on all technical issues pertaining to observation services and hospital outpatient visits paid under the OPPS.

Each of these workgroup subcommittees was established by a majority vote from the full Panel during a scheduled Panel meeting, and the Panel recommended at the August 23, 2021, meeting that the subcommittees continue. We accepted this recommendation.

For discussions of earlier Panel meetings and recommendations, we refer readers to previously published OPPS/ASC proposed and final rules, the CMS website mentioned earlier in this

section, and the FACA database at *http://facadatabase.gov.*

F. Public Comments Received in Response to the CY 2022 OPPS/ASC Proposed Rule

We received approximately 18,864 timely pieces of correspondence on the CY 2022 OPPS/ASC proposed rule that appeared in the **Federal Register** on August 4, 2021 (86 FR 42018). We note that we received some public comments that were outside the scope of the CY 2022 OPPS/ASC proposed rule. Out-of-scope-public comments are not addressed in this CY 2022 OPPS/ASC final rule with comment period. Summaries of those public comments that are within the scope of the proposed rule and our responses are set forth in the various sections of this final rule with comment period under the appropriate headings.

G. Public Comments Received on the CY 2021 OPPS/ASC Final Rule With Comment Period

We received approximately 32 timely pieces of correspondence on the CY 2021 OPPS/ASC final rule with comment period that appeared in the **Federal Register** on December 2, 2020 (85 FR 85866), most of which were outside of the scope of the final rule. In-scope comments related to the interim APC assignments and/or status indicators of new or replacement Level II HCPCS codes (identified with comment indicator ''NI'' in OPPS Addendum B, ASC Addendum AA, and ASC Addendum BB to that final rule).

II. Updates Affecting OPPS Payments

A. Recalibration of APC Relative Payment Weights

1. Database Construction

a. Use of CY 2019 Data in the CY 2022 OPPS Ratesetting

We primarily use two data sources in OPPS ratesetting: Claims data and cost report data. Our goal is always to use the best available data overall for ratesetting. Ordinarily, the best available full year of claims data would be the data from the year two years prior to the calendar year that is the subject of the rulemaking. As discussed in further detail in Section X.E. of the CY 2022 OPPS/ASC proposed rule (86 FR 42188 through 42190), given our concerns with CY2020 data as a result of the COVID–19 PHE we proposed to generally use CY 2019 claims data and the data components related to it in establishing the CY 2022 OPPS. As discussed in further detail in Section X.E. of this final rule with comment period, we are finalizing our proposal to generally use CY 2019 claims data and the data components related to it in establishing the CY 2022 OPPS.

b. Database Source and Methodology

Section 1833(t)(9)(A) of the Act requires that the Secretary review not less often than annually and revise the relative payment weights for APCs. In the April 7, 2000 OPPS final rule with comment period (65 FR 18482), we explained in detail how we calculated the relative payment weights that were implemented on August 1, 2000 for each APC group.

For the CY 2022 OPPS, we proposed to recalibrate the APC relative payment weights for services furnished on or after January 1, 2022, and before January 1, 2023 (CY 2022), using the same basic methodology that we described in the CY 2021 OPPS/ASC final rule with comment period (85 FR 85873), using CY 2019 claims data. That is, we proposed to recalibrate the relative payment weights for each APC based on claims and cost report data for hospital outpatient department (HOPD) services to construct a database for calculating APC group weights.

For the purpose of recalibrating the proposed APC relative payment weights for CY 2022, we began with approximately 180 million final action claims (claims for which all disputes and adjustments have been resolved and payment has been made) for HOPD services furnished on or after January 1, 2019, and before January 1, 2020, before applying our exclusionary criteria and other methodological adjustments. After the application of those data processing changes, we used approximately 93 million final action claims to develop the proposed CY 2022 OPPS payment weights. For exact numbers of claims used and additional details on the claims accounting process, we refer readers to the claims accounting narrative under supporting documentation for the CY 2022 OPPS/ASC proposed rule on the CMS website at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html.*

Addendum N to the CY 2022 OPPS/ASC proposed rule (which is available via the internet on the CMS website at: *http://www.cms.gov/Medicare/Medicare-Feefor-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices.html*) includes the proposed list of bypass codes for CY 2022. The proposed list of bypass codes contains codes that are reported on claims for services in CY 2019 and, therefore, includes codes that were in effect in CY 2019 and used for billing. We proposed to retain deleted bypass codes on the proposed CY 2022 bypass list because these codes existed in CY 2019 and were covered OPD services in that period, and CY 2019 claims data were used to calculate proposed CY 2022 payment rates. Keeping these deleted bypass codes on the bypass list potentially allows us to create more ''pseudo'' single procedure claims for ratesetting purposes. ''Overlap bypass codes'' that are members of the proposed multiple imaging composite APCs are identified by asterisks (*) in the third column of Addendum N to the proposed rule. HCPCS codes that we proposed to add for CY 2022 are identified by asterisks (*) in the fourth column of Addendum N.

We did not receive any public comments on our general proposal to recalibrate the relative payment weights for each APC based on claims and cost report data for HOPD services or on our proposed bypass code process. We are adopting as final the proposed ''pseudo'' single claims process and the final CY 2022 bypass list of 173 HCPCS codes, as displayed in Addendum N to this final rule with comment period (which is available via the internet on the CMS website). For this final rule with comment period, for the purpose of recalibrating the final APC relative payment weights for CY 2022, we used approximately 93 million final action claims (claims for which all disputes and adjustments have been resolved and payment has been made) for HOPD services furnished on or after January 1, 2019, and before January 1, 2020. For exact numbers of claims used and additional details on the claims accounting process, we refer readers to the claims accounting narrative under supporting documentation for this final rule with comment period on the CMS website at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html.*

c. Calculation and Use of Cost-to-Charge Ratios (CCRs)

For 2022, in the CY 2022 OPPS/ASC proposed rule (86 FR 42046) we proposed to continue to use the hospital-specific overall ancillary and departmental cost-to-charge ratios (CCRs) to convert charges to estimated costs through application of a revenue code-to-cost center crosswalk. To calculate the APC costs on which the CY 2022 APC payment rates are based, we calculated hospital-specific overall ancillary CCRs and hospital-specific departmental CCRs for each hospital for which we had CY 2019 claims data by comparing these claims data to hospital

cost reports available for the CY 2021 OPPS/ASC final rule with comment period ratesetting, which, in most cases, are from CY 2019. For the proposed CY 2022 OPPS payment rates, we used the set of CY 2019 claims processed through June 30, 2020. We applied the hospital-specific CCR to the hospital's charges at the most detailed level possible, based on a revenue code-to-cost center crosswalk that contains a hierarchy of CCRs used to estimate costs from charges for each revenue code. To ensure the completeness of the revenue code-to-cost center crosswalk, we reviewed changes to the list of revenue codes for CY 2019 (the year of claims data we used to calculate the proposed CY 2022 OPPS payment rates) and updates to the National Uniform Billing Committee (NUBC) 2020 Data Specifications Manual. That crosswalk is available for review and continuous comment on the CMS website at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html.*

In accordance with our longstanding policy, we calculate CCRs for the standard and nonstandard cost centers accepted by the electronic cost report database. In general, the most detailed level at which we calculate CCRs is the hospital-specific departmental level. For a discussion of the hospital-specific overall ancillary CCR calculation, we refer readers to the CY 2007 OPPS/ASC final rule with comment period (71 FR 67983 through 67985). The calculation of blood costs is a longstanding exception (since the CY 2005 OPPS) to this general methodology for calculation of CCRs used for converting charges to costs on each claim. This exception is discussed in detail in the CY 2007 OPPS/ASC final rule with comment period and discussed further in section II.A.2.a.(1) of the CY 2022 OPPS/ASC proposed rule.

In the CY 2014 OPPS/ASC final rule with comment period (78 FR 74840 through 74847), we finalized our policy of creating new cost centers and distinct CCRs for implantable devices, magnetic resonance imaging (MRIs), computed tomography (CT) scans, and cardiac catheterization. However, in response to comments we received from our CY 2014 OPPS/ASC proposed rule, we finalized a policy in the CY 2014 OPPS/ASC final rule with comment period (78 FR 74847) to remove claims from providers that use a cost allocation method of ''square feet'' to calculate CCRs used to estimate costs associated with the APCs for CT and MRI. As finalized in the CY 2020 OPPS/ASC final rule with comment period (84 FR 61152), beginning in CY 2021, we use all claims with valid CT and MRI cost center CCRs, including those that use a ''square feet'' cost allocation method, to estimate costs for the CT and MRI APCs.

Comment: One commenter stated that coronary CT angiography (CCTA) requires considerably more resources than the procedures that are currently assigned to the CT cost center. The commenter suggests that this has resulted in over a decade of inadequate reimbursement for CCTA below the actual cost of performing the test. The commenter recommends that CMS provide specific instructions that allow hospitals to submit charges for cardiac CT using revenue codes that provide more accurate cost estimates. The commenter stated that hospitals do not have the ability to directly report costs for cardiac CT services and that CMS regulations mandate that cardiac CT be lumped into generic diagnostic CT revenue codes.

Response: Hospital outpatient facilities make the final determination for reporting the appropriate cost centers and revenue codes. As stated in section 20.5 in Chapter 4 (Part B Hospital) of the Medicare Claims Processing Manual, CMS ''does not instruct hospitals on the assignment of HCPCS codes to revenue codes for services provided under OPPS since hospitals' assignment of cost vary. Where explicit instructions are not provided, providers should report their charges under the revenue code that will result in the charge being assigned to the same cost center to which the cost of those services are assigned in the cost report.'' Therefore, HOPDs must determine the most appropriate cost center and revenue code for the cardiac CT exams.

After consideration of the public comment we received on the general CCR process, we are finalizing for CY 2022 using the hospital-specific overall ancillary and departmental CCRs to convert charges to estimated costs through application of a revenue code-to-cost center crosswalk and the established methodology.

2. Final Data Development and Calculation of Costs Used for Ratesetting

In this section of this final rule with comment period, we discuss the use of claims to calculate the OPPS payment rates for CY 2022. The Hospital OPPS page on the CMS website on which the CY 2022 OPPS/ASC final rule with comment period is posted (*http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html*) provides an accounting of claims used in the development of the proposed payment rates. That accounting provides additional detail regarding the number of claims derived at each stage of the process. In addition, later in this section we discuss the file of claims that comprises the data set that is available upon payment of an administrative fee under a CMS data use agreement. The CMS website, *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html,* includes information about obtaining the ''OPPS Limited Data Set,'' which now includes the additional variables previously available only in the OPPS Identifiable Data Set, including ICD–10–CM diagnosis codes and revenue code payment amounts. This file is derived from the CY 2019 claims that were used to calculate the final payment rates for the CY 2022 OPPS/ASC final rule with comment period.

Previously, the OPPS established the scaled relative weights on which payments are based using APC median costs, a process described in the CY 2012 OPPS/ASC final rule with comment period (76 FR 74188). However, as discussed in more detail in section II.A.2.f. of the CY 2013 OPPS/ASC final rule with comment period (77 FR 68259 through 68271), we finalized the use of geometric mean costs to calculate the relative weights on which the CY 2013 OPPS payment rates were based. While this policy changed the cost metric on which the relative payments are based, the data process in general remained the same under the methodologies that we used to obtain appropriate claims data and accurate cost information in determining estimated service cost.

We did not receive any public comments on our proposed process and are finalizing our proposed methodology to continue to use geometric mean costs to calculate the relative weights on which the final CY 2022 OPPS payment rates are based.

We used the methodology described in sections II.A.2.a. through II.A.2.c. of this final rule with comment period to calculate the costs we used to establish the final relative payment weights used in calculating the OPPS payment rates for CY 2022 shown in Addenda A and B to the CY 2022 OPPS/ASC final rule with comment period (which are available via the internet on the CMS website at: *http://www.cms.gov/Medicare/Medicare-Feefor-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices.html*). We refer readers to section II.A.4. of this final rule with comment period for a discussion of the

conversion of APC costs to scaled payment weights.

We note that under the OPPS, CY 2019 was the first year in which the claims data used for setting payment rates (CY 2017 data) contained lines with the modifier ''PN'', which indicates nonexcepted items and services furnished and billed by off-campus provider-based departments (PBDs) of hospitals. Because nonexcepted services are not paid under the OPPS, in the CY 2019 OPPS/ASC final rule with comment period (83 FR 58832), we finalized a policy to remove those claim lines reported with modifier ''PN'' from the claims data used in ratesetting for the CY 2019 OPPS and subsequent years. For the CY 2022 OPPS, we will continue to remove claim lines with modifier ''PN'' from the ratesetting process.

For details of the claims accounting process used in the CY 2022 OPPS/ASC final rule with comment period, we refer readers to the claims accounting narrative under supporting documentation for the CY 2022 OPPS/ASC final rule with comment period on the CMS website at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html.*

a. Calculation of Single Procedure APC Criteria-Based Costs

(1) Blood and Blood Products

Since the implementation of the OPPS in August 2000, we have made separate payments for blood and blood products through APCs rather than packaging payment for them into payments for the procedures with which they are administered. Hospital payments for the costs of blood and blood products, as well as for the costs of collecting, processing, and storing blood and blood products, are made through the OPPS payments for specific blood product APCs.

We proposed to continue to establish payment rates for blood and blood products using our blood-specific CCR methodology, which utilizes actual or simulated CCRs from the most recently available hospital cost reports to convert hospital charges for blood and blood products to costs. This methodology has been our standard ratesetting methodology for blood and blood products since CY 2005. It was developed in response to data analysis indicating that there was a significant difference in CCRs for those hospitals with and without blood-specific cost centers, and past public comments indicating that the former OPPS policy of defaulting to the overall hospital CCR for hospitals not reporting a blood-specific cost center often resulted in an underestimation of the true hospital costs for blood and blood products. Specifically, to address the differences in CCRs and to better reflect hospitals' costs, we proposed to continue to simulate blood CCRs for each hospital that does not report a blood cost center by calculating the ratio of the blood-specific CCRs to hospitals' overall CCRs for those hospitals that do report costs and charges for blood cost centers. We also proposed to apply this mean ratio to the overall CCRs of hospitals not reporting costs and charges for blood cost centers on their cost reports to simulate blood-specific CCRs for those hospitals. We proposed to calculate the costs upon which the proposed CY 2022 payment rates for blood and blood products are based using the actual blood-specific CCR for hospitals that reported costs and charges for a blood cost center and a hospital-specific, simulated blood-specific CCR for hospitals that did not report costs and charges for a blood cost center.

We continue to believe that the hospital-specific, simulated blood-specific, CCR methodology better responds to the absence of a blood-specific CCR for a hospital than alternative methodologies, such as defaulting to the overall hospital CCR or applying an average blood-specific CCR across hospitals. Because this methodology takes into account the unique charging and cost accounting structure of each hospital, we believe that it yields more accurate estimated costs for these products. We continue to believe that using this methodology in CY 2022 would result in costs for blood and blood products that appropriately reflect the relative estimated costs of these products for hospitals without blood cost centers and, therefore, for these blood products in general.

We note that we defined a comprehensive APC (C–APC) as a classification for the provision of a primary service and all adjunctive services provided to support the delivery of the primary service. Under this policy, we include the costs of blood and blood products when calculating the overall costs of these C–APCs. We proposed to continue to apply the blood-specific CCR methodology described in this section when calculating the costs of the blood and blood products that appear on claims with services assigned to the C–APCs. Because the costs of blood and blood products would be reflected in the overall costs of the C–APCs (and, as a result, in the proposed payment rates of the C–APCs), we proposed not to make separate payments for blood and blood products when they appear on the same claims as services assigned to the C–APCs (we refer readers to the CY 2015 OPPS/ASC final rule with comment period (79 FR 66795 through 66796) for more information about our policy not to make separate payments for blood and blood products when they appear on the same claims as services assigned to a C–APC).

We refer readers to Addendum B to the CY 2022 OPPS/ASC proposed rule (which is available via the internet on the CMS website) for the proposed CY 2022 payment rates for blood and blood products (which are generally identified with status indicator ''R''). For a more detailed discussion of the blood-specific CCR methodology, we refer readers to the CY 2005 OPPS proposed rule (69 FR 50524 through 50525). For a full history of OPPS payment for blood and blood products, we refer readers to the CY 2008 OPPS/ASC final rule with comment period (72 FR 66807 through 66810).

For CY 2022, we proposed to continue to establish payment rates for blood and blood products using our blood-specific CCR methodology. We did not receive any comments on our proposal to establish payment rates for blood and blood products using our blood-specific CCR methodology and we are finalizing this policy as proposed. Please refer to Addendum B to the CY 2022 OPPS/ASC final rule with comment period (which is available via the internet on the CMS website) for the final CY 2022 payment rates for blood and blood products.

(2) Brachytherapy Sources

Section 1833(t)(2)(H) of the Act mandates the creation of additional groups of covered OPD services that classify devices of brachytherapy consisting of a seed or seeds (or radioactive source) (''brachytherapy sources'') separately from other services or groups of services. The statute provides certain criteria for the additional groups. For the history of OPPS payment for brachytherapy sources, we refer readers to prior OPPS final rules, such as the CY 2012 OPPS/ASC final rule with comment period (77 FR 68240 through 68241). As we have stated in prior OPPS updates, we believe that adopting the general OPPS prospective payment methodology for brachytherapy sources is appropriate for a number of reasons (77 FR 68240). The general OPPS methodology uses costs based on claims data to set the relative payment weights for hospital outpatient services. This payment methodology results in more consistent, predictable, and equitable payment amounts per

source across hospitals by averaging the extremely high and low values, in contrast to payment based on hospitals' charges adjusted to costs. We believe that the OPPS methodology, as opposed to payment based on hospitals' charges adjusted to cost, also would provide hospitals with incentives for efficiency in the provision of brachytherapy services to Medicare beneficiaries. Moreover, this approach is consistent with our payment methodology for the vast majority of items and services paid under the OPPS. We refer readers to the CY 2016 OPPS/ASC final rule with comment period (80 FR 70323 through 70325) for further discussion of the history of OPPS payment for brachytherapy sources.

For CY 2022, except where otherwise indicated, we proposed to use the costs derived from CY 2019 claims data to set the proposed CY 2022 payment rates for brachytherapy sources because CY 2019 is the year of data we proposed to use to set the proposed payment rates for most other items and services that would be paid under the CY 2022 OPPS. With the exception of the proposed payment rate for brachytherapy source C2645 (Brachytherapy planar source, palladium-103, per square millimeter) and brachytherapy source C2636 (Brachytherapy linear source, non-stranded, palladium-103, per 1 mm), we proposed to base the payment rates for brachytherapy sources on the geometric mean unit costs for each source, consistent with the methodology that we proposed for other items and services paid under the OPPS, as discussed in section II.A.2. of the CY 2022 OPPS/ASC proposed rule. We also proposed to continue the other payment policies for brachytherapy sources that we finalized and first implemented in the CY 2010 OPPS/ASC final rule with comment period (74 FR 60537). We proposed to pay for the stranded and nonstranded not otherwise specified (NOS) codes, HCPCS codes C2698 (Brachytherapy source, stranded, not otherwise specified, per source) and C2699 (Brachytherapy source, non-stranded, not otherwise specified, per source), at a rate equal to the lowest stranded or nonstranded prospective payment rate for such sources, respectively, on a per-source basis (as opposed to, for example, a per mCi), which is based on the policy we established in the CY 2008 OPPS/ASC final rule with comment period (72 FR 66785). We also proposed to continue the policy we first implemented in the CY 2010 OPPS/ASC final rule with comment period (74 FR 60537) regarding payment for new brachytherapy sources for which we have no claims data, based on the same reasons we discussed in the CY 2008 OPPS/ASC final rule with comment period (72 FR 66786; which was delayed until January 1, 2010 by section 142 of Pub. L. 110–275). Specifically, this policy is intended to enable us to assign new HCPCS codes for new brachytherapy sources to their own APCs, with prospective payment rates set based on our consideration of external data and other relevant information regarding the expected costs of the sources to hospitals. The proposed CY 2022 payment rates for brachytherapy sources are included in Addendum B to the CY 2022 OPPS/ASC proposed rule (which is available via the internet on the CMS website) and identified with status indicator ''U''.

For CY 2018, we assigned status indicator ''U'' (Brachytherapy Sources, Paid under OPPS; separate APC payment) to HCPCS code C2645 (Brachytherapy planar source, palladium-103, per square millimeter) in the absence of claims data and established a payment rate using external data (invoice price) at $4.69 per mm^2. For CY 2019, in the absence of sufficient claims data, we continued to establish a payment rate for C2645 at $4.69 per mm^2. Our CY 2018 claims data available for the CY 2020 OPPS/ASC final rule with comment period included two claims with a geometric mean cost for HCPCS code C2645 of $1.02 per mm^2. In response to comments from stakeholders, we agreed with commenters that given the limited claims data available and a new outpatient indication for C2645, a payment rate for HCPCS code C2645 based on the geometric mean cost of $1.02 per mm^2 may not adequately reflect the cost of HCPCS code C2645. In the CY 2020 OPPS/ASC final rule with comment period, we finalized our policy to use our equitable adjustment authority under section 1833(t)(2)(E) of the Act, which states that the Secretary shall establish, in a budget neutral manner, other adjustments as determined to be necessary to ensure equitable payments, to maintain the CY 2019 payment rate of $4.69 per mm^2 for HCPCS code C2645 for CY 2020. Similarly, in the absence of sufficient claims data to establish an APC payment rate, in the CY 2021 OPPS/ASC final rule with comment period, we finalized our policy to use our equitable adjustment authority under section 1833(t)(2)(E) of the Act to maintain the CY 2019 payment rate of $4.69 per mm^2 for HCPCS code C2645 for CY 2021.

As discussed in Section X.E. of the CY 2022 OPPS/ASC proposed rule, given our concerns with CY 2020 data as a result of the COVID–19 PHE, in general we proposed to use CY 2019 claims data and the data components related to it in establishing the CY 2022 OPPS. Therefore, we proposed to use our equitable adjustment authority under section 1833(t)(2)(E) of the Act to maintain the CY 2019 payment rate of $4.69 per mm^2 for HCPCS code C2645 for CY 2022.

We received no public comments and are finalizing our proposal, without modification, to use our equitable adjustment authority under section 1833(t)(2)(E) of the Act to maintain the CY 2019 payment rate of $4.69 per mm^2 for HCPCS code C2645 for CY 2022.

Additionally, for CY 2022 and subsequent calendar years, as discussed in Section X.C. of the CY 2022 OPPS/ASC proposed rule, we proposed to establish a Low Volume APC policy for New Technology APCs, clinical APCs, and brachytherapy APCs. For these APCs with fewer than 100 single claims that can be used for ratesetting purposes in the existing claims year, we proposed to use up to four years of claims data to establish a payment rate for each item or service as we currently do for low volume services assigned to New Technology APCs. Further, we proposed to calculate the cost for Low Volume APCs based on the greatest of the arithmetic mean cost, median cost, or geometric mean cost. We proposed to designate 5 brachytherapy APCs as Low Volume APCs for CY 2022 as these APCs met our proposed criteria to be designated as a Low Volume APC. In Section X.C. of this final rule with comment period, we are finalizing our proposal to designate 5 brachytherapy APCs as Low Volume APCs for CY 2022. For more information on the brachytherapy APCs we are designating as Low Volume APCs, see Section X.C. of this final rule with comment period.

We continue to invite stakeholders to submit recommendations for new codes to describe new brachytherapy sources. Such recommendations should be directed via email to *outpatientpps@cms.hhs.gov* or by mail to the Division of Outpatient Care, Mail Stop C4–01–26, Centers for Medicare and Medicaid Services, 7500 Security Boulevard, Baltimore, MD 21244. We will continue to add new brachytherapy source codes and descriptors to our systems for payment on a quarterly basis.

b. Comprehensive APCs (C–APCs) for CY 2022

(1) Background

In the CY 2014 OPPS/ASC final rule with comment period (78 FR 74861

through 74910), we finalized a comprehensive payment policy that packages payment for adjunctive and secondary items, services, and procedures into the most costly primary procedure under the OPPS at the claim level. The policy was finalized in CY 2014 but the effective date was delayed until January 1, 2015, to allow additional time for further analysis, opportunity for public comment, and systems preparation. The comprehensive APC (C–APC) policy was implemented effective January 1, 2015, with modifications and clarifications in response to public comments received regarding specific provisions of the C–APC policy (79 FR 66798 through 66810).

A C–APC is defined as a classification for the provision of a primary service and all adjunctive services provided to support the delivery of the primary service. We established C–APCs as a category broadly for OPPS payment and implemented 25 C–APCs beginning in CY 2015 (79 FR 66809 through 66810). In the CY 2016 OPPS/ASC final rule with comment period (80 FR 70332), we finalized 10 additional C–APCs to be paid under the existing C–APC payment policy and added one additional level to both the Orthopedic Surgery and Vascular Procedures clinical families, which increased the total number of C–APCs to 37 for CY 2016. In the CY 2017 OPPS/ASC final rule with comment period (81 FR 79584 through 79585), we finalized another 25 C–APCs for a total of 62 C–APCs. In the CY 2018 OPPS/ASC final rule with comment period, we did not change the total number of C–APCs from 62. In the CY 2019 OPPS/ASC final rule with comment period, we created three new C–APCs, increasing the total number to 65 (83 FR 58844 through 58846). In the CY 2020 OPPS/ASC final rule with comment period, we created two new C–APCs, increasing the total number to 67 C–APCs (84 FR 61158 through 61166). Most recently, in the CY 2021 OPPS/ASC final rule, we created two new C–APCs, increasing the total number to 69 C–APCs (85 FR 85885).

Under our C–APC policy, we designate a service described by a HCPCS code assigned to a C–APC as the primary service when the service is identified by OPPS status indicator ''J1''. When such a primary service is reported on a hospital outpatient claim, taking into consideration the few exceptions that are discussed below, we make payment for all other items and services reported on the hospital outpatient claim as being integral, ancillary, supportive, dependent, and adjunctive to the primary service (hereinafter collectively referred to as ''adjunctive services'') and representing components of a complete comprehensive service (78 FR 74865 and 79 FR 66799). Payments for adjunctive services are packaged into the payments for the primary services. This results in a single prospective payment for each of the primary, comprehensive services based on the costs of all reported services at the claim level.

Services excluded from the C–APC policy under the OPPS include services that are not covered OPD services, services that cannot by statute be paid for under the OPPS, and services that are required by statute to be separately paid. This includes certain mammography and ambulance services that are not covered OPD services in accordance with section 1833(t)(1)(B)(iv) of the Act; brachytherapy seeds, which also are required by statute to receive separate payment under section 1833(t)(2)(H) of the Act; pass-through payment drugs and devices, which also require separate payment under section 1833(t)(6) of the Act; self-administered drugs (SADs) that are not otherwise packaged as supplies because they are not covered under Medicare Part B under section 1861(s)(2)(B) of the Act; and certain preventive services (78 FR 74865 and 79 FR 66800 through 66801). A list of services excluded from the C–APC policy is included in Addendum J to the CY 2022 OPPS/ASC final rule (which is available via the internet on the CMS website at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices*).

In the interim final rule with request for comments (IFC) titled, ''Additional Policy and Regulatory Revisions in Response to the COVID–19 Public Health Emergency'', published on November 6, 2020, we stated that, effective for services furnished on or after the effective date of the IFC and until the end of the PHE for COVID–19, there is an exception to the OPPS C–APC policy to ensure separate payment for new COVID–19 treatments that meet certain criteria (85 FR 71158 through 71160). Under this exception, any new COVID–19 treatment that meets the following two criteria will, for the remainder of the PHE for COVID–19, always be separately paid and will not be packaged into a C–APC when it is provided on the same claim as the primary C–APC service. First, the treatment must be a drug or biological product (which could include a blood product) authorized to treat COVID–19, as indicated in section ''I. Criteria for Issuance of Authorization'' of the FDA letter of authorization for the emergency use of the drug or biological product, or the drug or biological product must be approved by FDA for treating COVID–19. Second, the emergency use authorization (EUA) for the drug or biological product (which could include a blood product) must authorize the use of the product in the outpatient setting or not limit its use to the inpatient setting, or the product must be approved by FDA to treat COVID–19 disease and not limit its use to the inpatient setting. For further information regarding the exception to the C–APC policy for COVID–19 treatments, please refer to the November 6, 2020 IFC (85 FR 71158 through 71160).

The C–APC policy payment methodology set forth in the CY 2014 OPPS/ASC final rule with comment period for the C–APCs and modified and implemented beginning in CY 2015 is summarized as follows (78 FR 74887 and 79 FR 66800):

Basic Methodology. As stated in the CY 2015 OPPS/ASC final rule with comment period, we define the C–APC payment policy as including all covered OPD services on a hospital outpatient claim reporting a primary service that is assigned to status indicator ''J1'', excluding services that are not covered OPD services or that cannot by statute be paid for under the OPPS. Services and procedures described by HCPCS codes assigned to status indicator ''J1'' are assigned to C–APCs based on our usual APC assignment methodology by evaluating the geometric mean costs of the primary service claims to establish resource similarity and the clinical characteristics of each procedure to establish clinical similarity within each APC.

In the CY 2016 OPPS/ASC final rule with comment period, we expanded the C–APC payment methodology to qualifying extended assessment and management encounters through the ''Comprehensive Observation Services'' C–APC (C–APC 8011). Services within this APC are assigned status indicator ''J2''. Specifically, we make a payment through C–APC 8011 for a claim that:

- Does not contain a procedure described by a HCPCS code to which we have assigned status indicator ''T'';
- Contains 8 or more units of services described by HCPCS code G0378 (Hospital observation services, per hour);
- Contains services provided on the same date of service or one day before the date of service for HCPCS code G0378 that are described by one of the following codes: HCPCS code G0379

(Direct admission of patient for hospital observation care) on the same date of service as HCPCS code G0378; CPT code 99281 (Emergency department visit for the evaluation and management of a patient (Level 1)); CPT code 99282 (Emergency department visit for the evaluation and management of a patient (Level 2)); CPT code 99283 (Emergency department visit for the evaluation and management of a patient (Level 3)); CPT code 99284 (Emergency department visit for the evaluation and management of a patient (Level 4)); CPT code 99285 (Emergency department visit for the evaluation and management of a patient (Level 5)) or HCPCS code G0380 (Type B emergency department visit (Level 1)); HCPCS code G0381 (Type B emergency department visit (Level 2)); HCPCS code G0382 (Type B emergency department visit (Level 3)); HCPCS code G0383 (Type B emergency department visit (Level 4)); HCPCS code G0384 (Type B emergency department visit (Level 5)); CPT code 99291 (Critical care, evaluation and management of the critically ill or critically injured patient; first 30–74 minutes); or HCPCS code G0463 (Hospital outpatient clinic visit for assessment and management of a patient); and

- Does not contain services described by a HCPCS code to which we have assigned status indicator ''J1''.

The assignment of status indicator ''J2'' to a specific set of services performed in combination with each other allows for all other OPPS payable services and items reported on the claim (excluding services that are not covered OPD services or that cannot by statute be paid for under the OPPS) to be deemed adjunctive services representing components of a comprehensive service and resulting in a single prospective payment for the comprehensive service based on the costs of all reported services on the claim (80 FR 70333 through 70336).

Services included under the C–APC payment packaging policy, that is, services that are typically adjunctive to the primary service and provided during the delivery of the comprehensive service, include diagnostic procedures, laboratory tests, and other diagnostic tests and treatments that assist in the delivery of the primary procedure; visits and evaluations performed in association with the procedure; uncoded services and supplies used during the service; durable medical equipment as well as prosthetic and orthotic items and supplies when provided as part of the outpatient service; and any other components reported by HCPCS codes that represent services that are provided during the complete comprehensive service (78 FR 74865 and 79 FR 66800).

In addition, payment for hospital outpatient department services that are similar to therapy services and delivered either by therapists or nontherapists is included as part of the payment for the packaged complete comprehensive service. These services that are provided during the perioperative period are adjunctive services and are deemed not to be therapy services as described in section 1834(k) of the Act, regardless of whether the services are delivered by therapists or other nontherapist health care workers. We have previously noted that therapy services are those provided by therapists under a plan of care in accordance with section 1835(a)(2)(C) and section 1835(a)(2)(D) of the Act and are paid for under section 1834(k) of the Act, subject to annual therapy caps as applicable (78 FR 74867 and 79 FR 66800). However, certain other services similar to therapy services are considered and paid for as hospital outpatient department services. Payment for these nontherapy outpatient department services that are reported with therapy codes and provided with a comprehensive service is included in the payment for the packaged complete comprehensive service. We note that these services, even though they are reported with therapy codes, are hospital outpatient department services and not therapy services. We refer readers to the July 2016 OPPS Change Request 9658 (Transmittal 3523) for further instructions on reporting these services in the context of a C–APC service.

Items included in the packaged payment provided in conjunction with the primary service also include all drugs, biologicals, and radiopharmaceuticals, regardless of cost, except those drugs with pass-through payment status and SADs, unless they function as packaged supplies (78 FR 74868 through 74869 and 74909 and 79 FR 66800). We refer readers to Section 50.2M, Chapter 15, of the Medicare Benefit Policy Manual for a description of our policy on SADs treated as hospital outpatient supplies, including lists of SADs that function as supplies and those that do not function as supplies.

We define each hospital outpatient claim reporting a single unit of a single primary service assigned to status indicator ''J1'' as a single ''J1'' unit procedure claim (78 FR 74871 and 79 FR 66801). Line item charges for services included on the C–APC claim are converted to line item costs, which are then summed to develop the estimated APC costs. These claims are then assigned one unit of the service with status indicator ''J1'' and later used to develop the geometric mean costs for the C–APC relative payment weights. (We note that we use the term ''comprehensive'' to describe the geometric mean cost of a claim reporting ''J1'' service(s) or the geometric mean cost of a C–APC, inclusive of all of the items and services included in the C–APC service payment bundle.) Charges for services that would otherwise be separately payable are added to the charges for the primary service. This process differs from our traditional cost accounting methodology only in that all such services on the claim are packaged (except certain services as described above). We apply our standard data trims, which exclude claims with extremely high primary units or extreme costs.

The comprehensive geometric mean costs are used to establish resource similarity and, along with clinical similarity, dictate the assignment of the primary services to the C–APCs. We establish a ranking of each primary service (single unit only) to be assigned to status indicator ''J1'' according to its comprehensive geometric mean costs. For the minority of claims reporting more than one primary service assigned to status indicator ''J1'' or units thereof, we identify one ''J1'' service as the primary service for the claim based on our cost-based ranking of primary services. We then assign these multiple ''J1'' procedure claims to the C–APC to which the service designated as the primary service is assigned. If the reported ''J1'' services on a claim map to different C–APCs, we designate the ''J1'' service assigned to the C–APC with the highest comprehensive geometric mean cost as the primary service for that claim. If the reported multiple ''J1'' services on a claim map to the same C–APC, we designate the most costly service (at the HCPCS code level) as the primary service for that claim. This process results in initial assignments of claims for the primary services assigned to status indicator ''J1'' to the most appropriate C–APCs based on both single and multiple procedure claims reporting these services and clinical and resource homogeneity.

Complexity Adjustments. We use complexity adjustments to provide increased payment for certain comprehensive services. We apply a complexity adjustment by promoting qualifying paired ''J1'' service code combinations or paired code combinations of ''J1'' services and certain add-on codes (as described further below) from the originating C–

APC (the C–APC to which the designated primary service is first assigned) to the next higher paying C–APC in the same clinical family of C–APCs. We apply this type of complexity adjustment when the paired code combination represents a complex, costly form or version of the primary service according to the following criteria:

- Frequency of 25 or more claims reporting the code combination (frequency threshold); and
- Violation of the 2 times rule, as stated in section 1833(t)(2) of the Act and section III.B.2. of this final rule with comment period, in the originating C–APC (cost threshold).

These criteria identify paired code combinations that occur commonly and exhibit materially greater resource requirements than the primary service. The CY 2017 OPPS/ASC final rule with comment period (81 FR 79582) included a revision to the complexity adjustment eligibility criteria. Specifically, we finalized a policy to discontinue the requirement that a code combination (that qualifies for a complexity adjustment by satisfying the frequency and cost criteria thresholds described above) also not create a 2 times rule violation in the higher level or receiving APC.

After designating a single primary service for a claim, we evaluate that service in combination with each of the other procedure codes reported on the claim assigned to status indicator ''J1'' (or certain add-on codes) to determine if there are paired code combinations that meet the complexity adjustment criteria. For a new HCPCS code, we determine initial C–APC assignment and qualification for a complexity adjustment using the best available information, crosswalking the new HCPCS code to a predecessor code(s) when appropriate.

Once we have determined that a particular code combination of ''J1'' services (or combinations of ''J1'' services reported in conjunction with certain add-on codes) represents a complex version of the primary service because it is sufficiently costly, frequent, and a subset of the primary comprehensive service overall according to the criteria described above, we promote the claim including the complex version of the primary service as described by the code combination to the next higher cost C–APC within the clinical family, unless the primary service is already assigned to the highest cost APC within the C–APC clinical family or assigned to the only C–APC in a clinical family. We do not create new APCs with a comprehensive geometric mean cost that is higher than the highest geometric mean cost (or only) C–APC in a clinical family just to accommodate potential complexity adjustments. Therefore, the highest payment for any claim including a code combination for services assigned to a C–APC would be the highest paying C–APC in the clinical family (79 FR 66802).

We package payment for all add-on codes into the payment for the C–APC. However, certain primary service add-on combinations may qualify for a complexity adjustment. As noted in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70331), all add-on codes that can be appropriately reported in combination with a base code that describes a primary ''J1'' service are evaluated for a complexity adjustment.

To determine which combinations of primary service codes reported in conjunction with an add-on code may qualify for a complexity adjustment for CY 2022, we proposed to apply the frequency and cost criteria thresholds discussed above, testing claims reporting one unit of a single primary service assigned to status indicator ''J1'' and any number of units of a single add-on code for the primary ''J1'' service. If the frequency and cost criteria thresholds for a complexity adjustment are met and reassignment to the next higher cost APC in the clinical family is appropriate (based on meeting the criteria outlined above), we make a complexity adjustment for the code combination; that is, we reassign the primary service code reported in conjunction with the add-on code to the next higher cost C–APC within the same clinical family of C–APCs. As previously stated, we package payment for add-on codes into the C–APC payment rate. If any add-on code reported in conjunction with the ''J1'' primary service code does not qualify for a complexity adjustment, payment for the add-on service continues to be packaged into the payment for the primary service and is not reassigned to the next higher cost C–APC. We list the complexity adjustments for ''J1'' and add-on code combinations for CY 2022, along with all of the other final complexity adjustments, in Addendum J to the CY 2022 OPPS/ASC final rule (which is available via the internet on the CMS website at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices*).

Addendum J to the CY 2022 OPPS/ASC final rule includes the cost statistics for each code combination that would qualify for a complexity adjustment (including primary code and add-on code combinations). Addendum J to the CY 2022 OPPS/ASC final rule also contains summary cost statistics for each of the paired code combinations that describe a complex code combination that would qualify for a complexity adjustment and are finalized to be reassigned to the next higher cost C–APC within the clinical family. The combined statistics for all proposed reassigned complex code combinations are represented by an alphanumeric code with the first four digits of the designated primary service followed by a letter. For example, the proposed geometric mean cost listed in Addendum J for the code combination described by complexity adjustment assignment 3320R, which is assigned to C–APC 5224 (Level 4 Pacemaker and Similar Procedures), includes all paired code combinations that are proposed to be reassigned to C–APC 5224 when CPT code 33208 is the primary code. Providing the information contained in Addendum J to the CY 2022 OPPS/ASC proposed rule allows stakeholders the opportunity to better assess the impact associated with the proposed assignment of claims with each of the paired code combinations eligible for a complexity adjustment.

Comment: One commenter expressed support of CMS' proposal to maintain existing complexity adjustment code pairs that were in effect for 2021 and to create new complexity adjustments for certain code pairs for CY 2022.

Response: We thank the commenter for their support.

Comment: Several commenters requested that CMS modify or eliminate the established C–APC complexity adjustment eligibility criteria of 25 or more claims reporting the code combination (frequency) and a violation of the 2 times rule in the originating C–APC (cost) to allow additional code combinations to qualify for complexity adjustments. These commenters expressed concern that CMS' methodology for determining complexity adjustments is unnecessarily restrictive, specifically the 25-claim threshold. One commenter also requested that CMS apply the complexity adjustment to all blue light cystoscopy procedures performed with Cysview ®in the HOPD. The specific C–APC complexity adjustments requested by the commenters are listed in Table 1 below.

Several commenters reiterated their request to allow clusters of procedures, consisting of a ''J1'' code-pair and multiple other associated add-on codes used in combination with that ''J1''

code-pair to qualify for complexity adjustments, stating that this may allow for more accurate reflection of medical practice when multiple procedures are performed together or there are certain complex procedures that include numerous add-on codes. Commenters also requested that CMS continue to monitor and report on the impact of applying complexity criteria on APC assignments for code combinations within C–APCs.

BILLING CODE 4120–01–P

TABLE 1: C-APC Complexity Adjustments Requested by the Commenters

Primary "J1" HCPCS code	Secondary "J1" HCPCS code	Primary C-APC assignment	Requested complexity adjusted C-APC assignment
28297 (Correction, hallux valgus (bunionectomy), with sesamoidectomy, when performed; with first metatarsal and medial cuneiform joint arthrodesis, any method)	**20900** (Bone graft, any donor area; minor or small (e.g., dowel or button))	5114	5115
28740 (Arthrodesis, midtarsal or tarsometatarsal, single joint)	**28270** (Capsulotomy; metatarsophalangeal joint, with or without tenorrhaphy, each joint (separate procedure))	5114	5115
52214 (Cystourethroscopy, with fulguration (including cryosurgery or laser surgery) of trigone, bladder neck, prostatic fossa, urethra, or periurethral glands)	**C9738** (Adjunctive blue light cystoscopy with fluorescent imaging agent (list separately in addition to code for primary procedure))	5374	5375
52224 (Cystourethroscopy, with fulguration (including cryosurgery or laser surgery) or treatment of minor (less than 0.5 cm) lesion(s) with or without biopsy)	**C9738** (Adjunctive blue light cystoscopy with fluorescent imaging agent (list separately in addition to code for primary procedure))	5374	5375

BILLING CODE 4120–01–C

Response: We appreciate these comments. We note that we did not propose that claims with the code combinations suggested by commenters would receive complexity adjustments because they failed to meet either the cost or frequency criteria. We also note that, at this time, we do not believe changes to the C–APC complexity adjustment criteria are necessary or that we should make exceptions to the criteria to allow claims with the code combinations suggested by the commenters to receive complexity adjustments. As we stated in the CY 2017 OPPS/ASC final rule (81 FR 79582), we believe that the complexity adjustment criteria, which require a frequency of 25 or more claims reporting a code combination and a violation of the 2 times rule in the originating C–APC, are appropriate to determine if a combination of procedures represents a complex, costly subset of the primary service that should qualify for the adjustment and be paid at the next higher paying C–APC in the clinical family. If a code combination meets these criteria, the combination receives payment at the next higher cost C–APC. Code combinations that do not meet these

criteria receive the C–APC payment rate associated with the primary ''J1'' service. As we previously stated in the CY 2020 OPPS/ASC final rule with comment period (84 FR 61161), a minimum of 25 claims is already a very low threshold for a national payment system. Lowering the minimum of 25 claims further could lead to unnecessary complexity adjustments for service combinations that are rarely performed.

As stated in the CY 2019 OPPS/ASC final rule with comment period (83 FR 58843), we do not believe that it is necessary to adjust the complexity adjustment criteria to allow claims that include more than two ''J1'' procedures or procedures that are not assigned to C–APCs to qualify for a complexity adjustment. As previously mentioned, we believe the current criteria are adequate to determine if a combination of procedures represents a complex, costly subset of the primary service. We will continue to monitor the application of the complexity adjustment criteria.

After consideration of the public comments we received on the proposed complexity adjustment policy, we are finalizing the C–APC complexity adjustment policy for CY 2022 as proposed. We are also finalizing the complexity adjustments proposed without modification.

(2) Exclusion of Procedures Assigned to New Technology APCs from the C–APC Policy

Services that are assigned to New Technology APCs are typically new procedures that do not have sufficient claims history to establish an accurate payment for the procedures. Beginning in CY 2002, we retain services within New Technology APC groups until we gather sufficient claims data to enable us to assign the service to an appropriate clinical APC. This policy allows us to move a service from a New Technology APC in less than two years if sufficient data are available. It also allows us to retain a service in a New Technology APC for more than two years if sufficient data upon which to base a decision for reassignment have not been collected (82 FR 59277).

The C–APC payment policy packages payment for adjunctive and secondary items, services, and procedures into the most costly primary procedure under the OPPS at the claim level. Prior to CY 2019, when a procedure assigned to a New Technology APC was included on the claim with a primary procedure, identified by OPPS status indicator ''J1'', payment for the new technology service was typically packaged into the payment for the primary procedure. Because the new technology service was not separately paid in this scenario, the overall number of single claims available to determine an appropriate clinical APC for the new service was reduced. This was contrary to the objective of the New Technology APC payment policy, which is to gather sufficient claims data to enable us to assign the service to an appropriate clinical APC.

To address this issue and ensure that there are sufficient claims data for services assigned to New Technology APCs, in the CY 2019 OPPS/ASC final rule with comment period (83 FR 58847), we finalized excluding payment for any procedure that is assigned to a New Technology APC (APCs 1491 through 1599 and APCs 1901 through 1908) from being packaged when included on a claim with a ''J1'' service assigned to a C–APC. In the CY 2020 OPPS/ASC final rule with comment period, we finalized that payment for services assigned to a New Technology APC would be excluded from being packaged into the payment for comprehensive observation services assigned status indicator ''J2'' when they are included on a claim with a ''J2'' service starting in CY 2020 (84 FR 61167). We proposed to continue to exclude payment for any procedure that is assigned to a New Technology APC (APCs 1491 through 1599 and APCs 1901 through 1908) from being packaged when included on a claim with a ''J1'' or ''J2'' service assigned to a C–APC.

We did not receive any comments on this policy. We are finalizing as proposed without modification to continue this exclusion policy.

(3) Additional C–APCs for CY 2022

In the CY 2022 proposed rule, we proposed to continue to apply the C–APC payment policy methodology. We refer readers to the CY 2017 OPPS/ASC final rule with comment period (81 FR 79583) for a discussion of the C–APC payment policy methodology and revisions.

Each year, in accordance with section 1833(t)(9)(A) of the Act, we review and revise the services within each APC group and the APC assignments under the OPPS. As a result of our annual review of the services and the APC assignments under the OPPS, we did not propose to convert any standard APCs to C–APCs in CY 2022, thus we proposed that the number of C–APCs for CY 2022 would be the same as the number for CY 2021, which is 69 C–APCs.

Comment: One commenter requested that CMS designate APC 5372 (Level 2 Urology and Related Services) as a Comprehensive APC, noting that all other Urology and Related Services APCs are C–APCs and multiple procedures within this APC would qualify for complexity adjustments.

Response: We appreciate the commenter's suggestion and will consider it for future rulemaking.

Comment: Several commenters requested that CMS discontinue the C–APC payment policy for all surgical insertion codes required for brachytherapy treatment. The commenters were concerned that the C–APC methodology lacks the charge capture mechanisms to accurately reflect the cost of radiation oncology services, particularly the delivery of brachytherapy for the treatment of cervical cancer. They also stated that they oppose C–APC payment for cancer care given the complexity of coding, use of serial billing, and the potential for different sites of service for the initial surgical device insertion and subsequent treatment delivery or other supportive services. These commenters suggested that CMS assign brachytherapy procedures to traditional APCs, move brachytherapy procedures to higher paying C–APC, or pay separately for preparation and planning services to fully account for the costs associated with these procedures.

Response: We appreciate the comments. The calculations provided by commenters as to the cost of these services do not match how we calculate C–APC costs. We believe that the current C–APC methodology is appropriately applied to these surgical procedures and is accurately capturing costs. We will continue to examine these concerns and will determine if any modifications to this policy are warranted in future rulemaking.

After consideration of the public comments we received, we are finalizing our C–APC policy and the proposed C–APCs as proposed for CY 2022. Table 2 below lists the final C–APCs for CY 2022, all of which were established in past rules. All C–APCs are displayed in Addendum J to this CY 2022 OPPS/ASC final rule with comment period (which is available via the internet at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices*). Addendum J to this final rule with comment period also contains all of the data related to the C–APC payment policy methodology, including the list of complexity adjustments and other information for CY 2022.

c. Calculation of Composite APC Criteria-Based Costs

As discussed in the CY 2008 OPPS/ASC final rule with comment period (72 FR 66613), we believe it is important that the OPPS enhance incentives for hospitals to provide necessary, high quality care as efficiently as possible. For CY 2008, we developed composite APCs to provide a single payment for groups of services that are typically performed together during a single clinical encounter and that result in the provision of a complete service. Combining payment for multiple, independent services into a single OPPS payment in this way enables hospitals to manage their resources with maximum flexibility by monitoring and adjusting the volume and efficiency of services themselves. An additional advantage to the composite APC model is that we can use data from correctly coded multiple procedure claims to calculate payment rates for the specified combinations of services, rather than relying upon single procedure claims which may be low in volume and/or incorrectly coded. Under the OPPS, we currently have composite policies for mental health services and multiple imaging services. (We note that, in the CY 2018 OPPS/ASC final rule with comment period, we finalized a policy to delete the composite APC 8001 (LDR Prostate Brachytherapy Composite) for CY 2018 and subsequent years.) We refer readers to the CY 2008 OPPS/ASC final rule with comment period (72 FR 66611 through 66614 and 66650 through 66652) for a full discussion of the development of the composite APC methodology, and the CY 2012 OPPS/ASC final rule with comment period (76 FR 74163) and the CY 2018 OPPS/ASC final rule with comment period (82 FR 59241 through 59242 and 59246 through 52950) for more recent background.

(1) Mental Health Services Composite APC

We proposed to continue our longstanding policy of limiting the aggregate payment for specified less resource-intensive mental health services furnished on the same date to the payment for a day of partial hospitalization services provided by a hospital, which we consider to be the most resource-intensive of all outpatient mental health services. We refer readers to the April 7, 2000 OPPS final rule with comment period (65 FR 18452 through 18455) for the initial discussion of this longstanding policy and the CY 2012 OPPS/ASC final rule with comment period (76 FR 74168) for more recent background.

In the CY 2017 OPPS/ASC final rule with comment period (81 FR 79588 through 79589), we finalized a policy to combine the existing Level 1 and Level 2 hospital-based PHP APCs into a single hospital-based PHP APC, and thereby discontinue APCs 5861 (Level 1—Partial Hospitalization (3 services) for Hospital-Based PHPs) and 5862 (Level 2—Partial Hospitalization (4 or more services) for Hospital-Based PHPs) and replace them with APC 5863 (Partial Hospitalization (3 or more services per day)).

In the CY 2018 OPPS/ASC proposed rule and final rule with comment period (82 FR 33580 through 33581 and 59246 through 59247, respectively), we proposed and finalized the policy for CY 2018 and subsequent years that, when the aggregate payment for specified mental health services provided by one hospital to a single beneficiary on a single date of service, based on the payment rates associated with the APCs for the individual services, exceeds the maximum per diem payment rate for partial hospitalization services provided by a hospital, those specified mental health services will be paid through composite APC 8010 (Mental Health Services Composite). In addition, we set the payment rate for composite APC 8010 for CY 2018 at the same payment rate that will be paid for APC 5863, which is the maximum partial hospitalization per diem payment rate for a hospital, and finalized a policy that the hospital will continue to be paid the payment rate for composite APC 8010. Under this policy, the I/OCE will continue to determine whether to pay for these specified mental health services individually, or to make a single payment at the same payment rate established for APC 5863 for all of the specified mental health services furnished by the hospital on that single date of service. We continue to believe that the costs associated with administering a partial hospitalization program at a hospital represent the most resource intensive of all outpatient mental health services. Therefore, we do not believe that we should pay more for mental health services under the OPPS than the highest partial hospitalization per diem payment rate for hospitals.

We proposed that when the aggregate payment for specified mental health services provided by one hospital to a single beneficiary on a single date of service, based on the payment rates associated with the APCs for the individual services, exceeds the maximum per diem payment rate for partial hospitalization services provided by a hospital, those specified mental health services would be paid through composite APC 8010 for CY 2022. In addition, we proposed to set the payment rate for composite APC 8010 at the same payment rate that we proposed for APC 5863, which is the maximum partial hospitalization per diem payment rate for a hospital, and that the hospital continue to be paid the proposed payment rate for composite APC 8010.

We did not receive any public comment on these proposals and are finalizing them as proposed. In particular, we are finalizing our proposal, without modification, that when the aggregate payment for specified mental health services provided by one hospital to a single beneficiary on a single date of service, based on the payment rates associated with the APCs for the individual services, exceeds the maximum per diem payment rate for partial hospitalization services provided by a hospital, those specified mental health services would be paid through composite APC 8010 for CY 2022. In addition, we are finalizing our proposal to set the payment rate for composite APC 8010 for CY 2022 at the same payment rate that we set for APC 5863, which is the maximum partial hospitalization per diem payment rate for a hospital.

(2) Multiple Imaging Composite APCs (APCs 8004, 8005, 8006, 8007, and 8008)

Effective January 1, 2009, we provide a single payment each time a hospital submits a claim for more than one imaging procedure within an imaging family on the same date of service, to reflect and promote the efficiencies hospitals can achieve when performing multiple imaging procedures during a single session (73 FR 41448 through 41450). We utilize three imaging families based on imaging modality for purposes of this methodology: (1) Ultrasound; (2) computed tomography (CT) and computed tomographic angiography (CTA); and (3) magnetic resonance imaging (MRI) and magnetic resonance angiography (MRA). The HCPCS codes subject to the multiple imaging composite policy and their respective families are listed in Table 3 below.

While there are three imaging families, there are five multiple imaging composite APCs due to the statutory requirement under section 1833(t)(2)(G) of the Act that we differentiate payment for OPPS imaging services provided with and without contrast. While the ultrasound procedures included under the policy do not involve contrast, both CT/CTA and MRI/MRA scans can be

provided either with or without contrast. The five multiple imaging composite APCs established in CY 2009 are:

- APC 8004 (Ultrasound Composite);
- APC 8005 (CT and CTA without Contrast Composite);
- APC 8006 (CT and CTA with Contrast Composite);
- APC 8007 (MRI and MRA without Contrast Composite); and
- APC 8008 (MRI and MRA with Contrast Composite).

We define the single imaging session for the ''with contrast'' composite APCs as having at least one or more imaging procedures from the same family performed with contrast on the same date of service. For example, if the hospital performs an MRI without contrast during the same session as at least one other MRI with contrast, the hospital will receive payment based on the payment rate for APC 8008, the ''with contrast'' composite APC.

We make a single payment for those imaging procedures that qualify for payment based on the composite APC payment rate, which includes any packaged services furnished on the same date of service. The standard (noncomposite) APC assignments continue to apply for single imaging procedures and multiple imaging procedures performed across families. For a full discussion of the development of the multiple imaging composite APC methodology, we refer readers to the CY 2009 OPPS/ASC final rule with comment period (73 FR 68559 through 68569).

For CY 2022, we proposed to continue to pay for all multiple imaging procedures within an imaging family performed on the same date of service using the multiple imaging composite APC payment methodology. We continue to believe that this policy would reflect and promote the efficiencies hospitals can achieve when performing multiple imaging procedures during a single session.

For CY 2022, except where otherwise indicated, we proposed to use the costs derived from CY 2019 claims data to set the proposed CY 2022 payment rates. Therefore, for CY 2022, the payment rates for the five multiple imaging composite APCs (APCs 8004, 8005, 8006, 8007, and 8008) are based on proposed geometric mean costs calculated from CY 2019 claims available for the CY 2022 OPPS/ASC proposed rule that qualified for composite payment under the current policy (that is, those claims reporting more than one procedure within the same family on a single date of service). To calculate the proposed geometric mean costs, we used the same methodology that we have used to calculate the geometric mean costs for these composite APCs since CY 2014, as described in the CY 2014 OPPS/ASC final rule with comment period (78 FR 74918). The imaging HCPCS codes referred to as ''overlap bypass codes'' that we removed from the bypass list for purposes of calculating the proposed multiple imaging composite APC geometric mean costs, in accordance with our established methodology as stated in the CY 2014 OPPS/ASC final rule with comment period (78 FR 74918), are identified by asterisks in Addendum N to the CY 2022 OPPS/ASC proposed rule (which is available via the internet on the CMS website[1]) and are discussed in more detail in section II.A.1.b. of the CY 2022 OPPS/ASC proposed rule (86 FR 42034 through 42040).

For the CY 2022 OPPS/ASC proposed rule, we were able to identify approximately 1.04 million ''single session'' claims out of an estimated 2.2 million potential claims for payment through composite APCs from our ratesetting claims data, which represents approximately 47 percent of all eligible claims, to calculate the proposed CY 2022 geometric mean costs for the multiple imaging composite APCs. Table 2 of the CY 2022 OPPS/ASC proposed rule lists the proposed HCPCS codes that would be subject to the multiple imaging composite APC policy and their respective families and approximate composite APC proposed geometric mean costs for CY 2022 (86 FR 42037 through 42040).

We did not receive any public comments on these proposals. We are finalizing our proposal to continue the use of multiple imaging composite APCs to pay for services providing more than one imaging procedure from the same family on the same date, without modification. Table 3 below lists the HCPCS codes that will be subject to the multiple imaging composite APC policy and their respective families and approximate composite APC final geometric mean costs for CY 2022.

BILLING CODE 4120–01–C

3. Changes to Packaged Items and Services

a. Background and Rationale for Packaging in the OPPS

Like other prospective payment systems, the OPPS relies on the concept of averaging to establish a payment rate for services. The payment may be more or less than the estimated cost of providing a specific service or a bundle of specific services for a particular beneficiary. The OPPS packages payments for multiple interrelated items and services into a single payment to create incentives for hospitals to furnish services most efficiently and to manage their resources with maximum flexibility. Our packaging policies support our strategic goal of using larger payment bundles in the OPPS to maximize hospitals' incentives to provide care in the most efficient manner. For example, where there are a variety of devices, drugs, items, and supplies that could be used to furnish a service, some of which are more costly than others, packaging encourages hospitals to use the most cost-efficient item that meets the patient's needs, rather than to routinely use a more expensive item, which may occur if separate payment is provided for the item.

Packaging also encourages hospitals to effectively negotiate with manufacturers and suppliers to reduce the purchase price of items and services or to explore alternative group purchasing arrangements, thereby encouraging the most economical health care delivery. Similarly, packaging encourages hospitals to establish protocols that ensure that necessary services are furnished, while scrutinizing the services ordered by practitioners to maximize the efficient use of hospital resources. Packaging payments into larger payment bundles promotes the predictability and accuracy of payment for services over time. Finally, packaging may reduce the importance of refining service-specific payment because packaged payments include costs associated with higher cost cases requiring many ancillary items and services and lower cost cases requiring fewer ancillary items and services. Because packaging encourages efficiency and is an essential component of a prospective payment system, packaging payments for items and services that are typically integral, ancillary, supportive, dependent, or adjunctive to a primary service has been a fundamental part of the OPPS since its implementation in August 2000. For an extensive discussion of the history and background of the OPPS packaging policy, we refer readers to the CY 2000 OPPS final rule with comment period (65 FR 18434), the CY 2008 OPPS/ASC final rule with comment period (72 FR 66580), the CY 2014 OPPS/ASC final rule with comment period (78 FR 74925), the CY 2015 OPPS/ASC final rule with comment period (79 FR 66817), the CY 2016 OPPS/ASC final rule with comment period (80 FR 70343), the CY 2017 OPPS/ASC final rule with comment period (81 FR 79592), the CY 2018 OPPS/ASC final rule with comment period (82 FR 59250), the CY 2019 OPPS/ASC final rule with comment period (83 FR 58854), the CY 2020 OPPS/ASC final rule with comment period (84 FR 61173), and the CY 2021 OPPS/ASC final rule with comment period (85 FR 85894). As we continue to develop larger payment groups that more broadly reflect services provided in an encounter or episode of care, we have expanded the OPPS packaging policies. Most, but not necessarily all, categories of items and services currently packaged in the OPPS are listed in 42 CFR 419.2(b). Our overarching goal is to make payments for all services under the OPPS more consistent with those of a prospective payment system and less like those of a per-service fee schedule, which pays separately for each coded item. As a part of this effort, we have continued to examine the payment for items and services provided under the OPPS to determine which OPPS services can be packaged to further achieve the objective of advancing the OPPS toward a more prospective payment system.

For CY 2022, we examined the items and services currently provided under the OPPS, reviewing categories of integral, ancillary, supportive, dependent, or adjunctive items and services for which we believe payment would be appropriately packaged into payment for the primary service that they support. Specifically, we examined the HCPCS code definitions (including CPT code descriptors) and hospital outpatient department billing patterns to determine whether there were categories of codes for which packaging would be appropriate according to existing OPPS packaging policies or a logical expansion of those existing OPPS packaging policies.

For CY 2022, we proposed no changes to the overall packaging policy previously discussed. We proposed to continue to conditionally package the costs of selected newly identified ancillary services into payment for a primary service where we believe that the packaged item or service is integral, ancillary, supportive, dependent, or adjunctive to the provision of care that was reported by the primary service HCPCS code. Below we discuss a proposed change to an ASC payment system packaging policy for CY 2022 and solicit comment on potential additional changes to that policy and application of that policy to the OPPS.

We did not receive any public comments on the overall OPPS packaging policy and are finalizing our packaging policy as proposed. Specific packaging concerns are discussed in detail in their respective sections throughout this final rule with comment period.

b. ASC Payment System Policy for Non-Opioid Pain Management Drugs and Biologicals That Function as Surgical Supplies

(1) Background on OPPS/ASC Non-Opioid Pain Management Packaging Policies

In the CY 2018 OPPS/ASC proposed rule (82 FR 33588), within the framework of existing packaging categories, such as drugs that function as supplies in a surgical procedure or diagnostic test or procedure, we requested stakeholder feedback on common clinical scenarios involving currently packaged items and services described by HCPCS codes that stakeholders believe should not be packaged under the OPPS. We also expressed interest in stakeholder feedback on common clinical scenarios

involving separately payable HCPCS codes for which payment would be most appropriately packaged under the OPPS. Commenters who responded to the CY 2018 OPPS/ASC proposed rule expressed a variety of views on packaging under the OPPS. While several commenters supported maintaining packaging policies, most of the public comments ranged from requests to unpackage most items and services that are unconditionally packaged under the OPPS, including drugs and devices, to specific requests for separate payment for a particular drug or device.

In the CY 2018 OPPS/ASC final rule with comment period (82 FR 52485), we reiterated our position with regard to payment for Exparel®, a non-opioid analgesic that functions as a surgical supply, stating that we believed that payment for this drug is appropriately packaged with the primary surgical procedure. We also stated in the CY 2018 OPPS/ASC final rule with comment period that we would continue to explore and evaluate packaging policies under the OPPS and consider these policies in future rulemaking.

In the CY 2019 OPPS/ASC final rule with comment period (83 FR 58855), we explained that, in addition to stakeholder feedback regarding OPPS packaging policies, the President's Commission on Combating Drug Addiction and the Opioid Crisis (the Commission) [2] had recently recommended that CMS examine payment policies for certain drugs that function as a supply, specifically non-opioid pain management treatments. The Commission was established in 2017 to study the scope and effectiveness of the Federal response to drug addiction and the opioid crisis and to make recommendations to the President for improving the Federal response to the crisis. The Commission's report included a recommendation for CMS to '' . . . review and modify ratesetting policies that discourage the use of non-opioid treatments for pain, such as certain bundled payments that make alternative treatment options cost prohibitive for hospitals and doctors, particularly those options for treating immediate postsurgical pain. . . .'' We explained that, as discussed in the CY 2019 OPPS/ASC proposed rule (83 FR 37068 through 37071), in response to stakeholder comments on the CY 2018 OPPS/ASC proposed rule and in light of the recommendations regarding payment policies for certain drugs, we had recently evaluated the impact of our packaging policy for drugs that function as a supply when used in a surgical procedure on the utilization of these drugs in both the hospital outpatient department and the ASC setting. We stated that, although we found increases in utilization of Exparel when it was paid under the OPPS, we noticed decreased utilization of Exparel under the ASC payment system. Accordingly, in the CY 2019 OPPS/ASC final rule with comment period (83 FR 58855 through 58860), we finalized a policy to unpackage and pay separately at ASP+6 percent for non-opioid pain management drugs that function as surgical supplies when they are furnished in the ASC setting for CY 2019, due to decreased utilization in the ASC setting. Historically, we stated that we consider all items related to the surgical outcome and provided during the hospital stay in which the surgery is performed, including postsurgical pain management drugs, to be part of the surgery for purposes of our drug and biological surgical supply packaging policy (79 FR 66875).

On October 24, 2018, the Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment for Patients and Communities Act (SUPPORT) Act (Pub. L. 115–271) was enacted. Section 1833(t)(22)(A)(i) of the Act, as added by section 6082(a) of the SUPPORT Act, states that the Secretary must review payments under the OPPS for opioids and evidence-based non-opioid alternatives for pain management (including drugs and devices, nerve blocks, surgical injections, and neuromodulation) with a goal of ensuring that there are not financial incentives to use opioids instead of non-opioid alternatives. As part of this review, under section 1833(t)(22)(A)(iii) of the Act, the Secretary must consider the extent to which revisions to such payments (such as the creation of additional groups of covered outpatient department (OPD) services to separately classify those procedures that utilize opioids and non-opioid alternatives for pain management) would reduce the payment incentives for using opioids instead of non-opioid alternatives for pain management. In conducting this review and considering any revisions, the Secretary must focus on covered OPD services (or groups of services) assigned to C–APCs, APCs that include surgical services, or services determined by the Secretary that generally involve treatment for pain management. If the Secretary identifies revisions to payments pursuant to section 1833(t)(22)(A)(iii) of the Act, section 1833(t)(22)(C) of the Act requires the Secretary to, as determined appropriate, begin making revisions for services furnished on or after January 1, 2020. Revisions under this paragraph are required to be treated as adjustments for purposes of paragraph (9)(B) of the Act, which requires any adjustments to be made in a budget neutral manner. Section 1833(i)(8) of the Act, as added by section 6082(b) of the SUPPORT Act, requires the Secretary to conduct a similar type of review as required for the OPPS and to make revisions to the ASC payment system in an appropriate manner, as determined by the Secretary.

For the CY 2020 OPPS/ASC proposed rule (84 FR 39423 through 39427), as required by section 1833(t)(22)(A)(i) of the Act, we reviewed payments under the OPPS for opioids and evidence-based non-opioid alternatives for pain management (including drugs and devices, nerve blocks, surgical injections, and neuromodulation) with a goal of ensuring that there are not financial incentives to use opioids instead of non-opioid alternatives. We used currently available data to analyze the payment and utilization patterns associated with specific non-opioid alternatives, including drugs that function as a supply, nerve blocks, and neuromodulation products, to determine whether our packaging policies may have reduced the use of non-opioid alternatives. For the CY 2020 OPPS/ASC proposed rule (84 FR 39423 through 39427), we proposed to continue our policy to pay separately at ASP+6 percent for non-opioid pain management drugs that function as surgical supplies in the performance of surgical procedures when they are furnished in the ASC setting and to continue to package payment for non-opioid pain management drugs that function as surgical supplies in the performance of surgical procedures in the hospital outpatient department setting for CY 2020. In the CY 2020 OPPS/ASC final rule with comment period (84 FR 61173 through 61180), after reviewing data from stakeholders and Medicare claims data, we did not find compelling evidence to suggest that revisions to our OPPS payment policies for non-opioid pain management alternatives were necessary for CY 2020. We finalized our proposal to continue to unpackage and pay separately at ASP+6 percent for non-opioid pain management drugs that function as surgical supplies when furnished in the ASC setting for CY 2020. Under this

[2] *https://www.federalregister.gov/documents/2017/04/03/2017-06716/establishing-the-presidents-commission-on-combating-drug-addiction-and-the-opioid-crisis.*

policy, for CY 2020, the only drug that qualified for separate payment in the ASC setting as a non-opioid pain management drug that functions as a surgical supply was Exparel.

In the CY 2021 OPPS/ASC final rule with comment period (85 FR 85896 to 85899), we continued the policy to pay separately at ASP+6 percent for non-opioid pain management drugs that function as surgical supplies in the performance of surgical procedures when they are furnished in the ASC setting and to continue to package payment for non-opioid pain management drugs that function as surgical supplies in the performance of surgical procedures in the hospital outpatient department setting for CY 2021. For CY 2021, only two drug products met the criteria as non-opioid pain management drugs that function as surgical supplies in the ASC setting, and thus receive separate payment under the ASC payment system. These drugs are Exparel and Omidria.

(2) CY 2022 Evaluation of Payments for Opioids and Non-Opioid Alternatives for Pain Management and Comment Solicitation on Extending the Policy to the OPPS

As noted in the background above, over the past several years we have reviewed non-opioid alternatives and evaluated the impact of our packaging policies on access to these products. In our previous evaluations, we used currently available data to analyze the payment and utilization patterns associated with specific non-opioid alternatives, including drugs that function as a supply, nerve blocks, and neuromodulation products, to determine whether our packaging policies may have reduced the use of non-opioid alternatives. In the CY 2021 OPPS/ASC final rule with comment period (85 FR 85896 through 85899), we stated that we would continue to analyze the issue of access to non-opioid pain management alternatives in the HOPD and the ASC settings as part of any reviews we conduct under section 1833(t)(22)(A)(ii) of the Act, with a specific focus on whether there is evidence that our current payment policies are creating access barriers for other non-opioid pain management alternatives for which there is evidence-based support that these products help to deter or avoid prescription opioid use and opioid use disorder.

For CY 2022, we conducted a subsequent review of payments for opioids and non-opioid alternatives as authorized by section 1833(t)(22)(A)(ii) of the Act. We analyzed utilization patterns in both the HOPD and ASC settings for multiple non-opioid pain management drugs, including the two drugs that are receiving separate payment when furnished in the ASC setting under our current policy for CY 2021: Exparel and Omidria. The results of our CY 2022 review were similar to the results of our reviews in previous years. Generally, utilization of non-opioid pain management drugs continued to increase year after year in the HOPD setting, where payment for these non-opioid alternatives is packaged with the payment for the associated surgical procedure. In the ASC setting, where Exparel and Omidria are separately paid, we also saw utilization increases for these two drugs. However, in the ASC setting, the rate of increase in utilization is much more substantial than in the HOPD setting. In particular, in the HOPD setting where payment for Exparel is packaged, utilization of Exparel increased from 19.7 million units in 2019 to 21.8 million units in 2020, whereas utilization of Exparel increased from 1.5 million units in 2019 to 3.3 million units in 2020 in the ASC setting, where Exparel is separately paid. We note that a number of reasons could explain this discrepancy other than our policy to pay separately for Exparel under the ASC payment system, including evolving clinical practice in the ASC setting, which could increase the number of surgeries performed in ASCs for which Exparel is an appropriate pain management drug.

We have consistently explained, including as recently as in the CY 2021 OPPS/ASC final rule with comment period (85 FR 85894), that our packaging policies support our strategic goal of using larger payment bundles in the OPPS to maximize hospitals' incentives to provide care in the most efficient manner. For example, where there are a variety of devices, drugs, items, and supplies that could be used to furnish a service, some of which are more costly than others, packaging encourages hospitals to use the most cost-efficient item that meets the patient's needs, rather than to routinely use a more expensive item, which may occur if separate payment is provided for the item. We have not found conclusive evidence to support the notion that the OPPS packaging policy, under which non-opioid drugs and biologicals are packaged when they function as a supply in a surgical procedure, has created financial incentives to use opioids instead of evidence-based non-opioid alternatives for pain management. For example, we have not observed decreased utilization of non-opioid alternatives for pain management in the HOPD setting. Therefore, for CY 2022, we proposed to continue to package payment for non-opioid pain management drugs that function as surgical supplies in the performance of surgical procedures in the hospital outpatient department setting.

As explained earlier in this section, while packaging encourages efficiency and is a fundamental component of a prospective payment system, where there is an overriding policy objective to reduce disincentives for use of non-opioid products to the extent possible, we believe it may be appropriate to establish payment that reduces disincentives for use of non-opioid drugs and biologicals for pain management when there is evidence that use of those products reduces unnecessary opioid use. For these reasons, we solicited comment as to whether we should expand our current policy that only applies in the ASC setting—to pay separately at ASP+6 percent for non-opioid pain management drugs that function as surgical supplies in the performance of surgical procedures when they are furnished in the ASC setting—to the HOPD setting.

In the CY 2022 OPPS/ASC proposed rule, we stated we were interested in learning from stakeholders whether similar disincentives for the use of non-opioid pain management drugs and biologicals identified in the ASC setting exist in the HOPD setting. Previously, in the CY 2019 OPPS/ASC final rule with comment period (83 FR 59067), we identified several disincentives that were unique to the ASC setting compared to the HOPD setting, including the fact that ASCs tend to provide specialized care and a more limited range of services in comparison to hospital outpatient departments. Also, ASCs are paid, in aggregate, approximately 55 percent of the OPPS rate. Therefore, fluctuations in payment rates for specific services may affect these providers more acutely than hospital outpatient departments; and ASCs may be less likely to choose to furnish non-opioid postsurgical pain management treatments, which are typically more expensive than opioids, as a result. Additionally, we sought comment on what evidence supports the expansion of this policy to the HOPD setting, including the clinical benefit that Medicare beneficiaries may receive from the availability of separate or modified payment for these products in the HOPD setting.

Finally, in the proposed rule we sought comment on if we should treat

products the same depending on the setting, ASC or HOPD. For example, we sought comment on whether products should have the same eligibility requirements to qualify for revised payment in the ASC and the HOPD settings. We also sought comment on how the additional comment solicitations described below, which refer to the ASC setting, could also be applied to the HOPD setting.

Comment: MedPAC commented that while it appreciated CMS's interest in addressing the issue of opioid overuse it continued to support a policy that maintains the packaging of drugs that function as supplies in surgical procedures. MedPAC stated that this policy is contrary to CMS's efforts to increase the size of payment bundles in the OPPS to increase incentives for efficient delivery of care.

Response: We appreciate this feedback. We agree that packaging policies are a fundamental component of the OPPS and ASC payment systems. We strive to balance the importance of our packaging policies with the importance of addressing the opioid epidemic. In this specific scenario, we believe separate payment in the ASC setting for non-opioid pain management drugs and biologicals that function as surgical supplies is appropriate given the financial disincentives we have observed for these products in the ASC setting. As previously discussed, we identified several disincentives that were unique to the ASC setting compared to the HOPD setting, including the fact that ASCs tend to provide specialized care and a more limited range of services in comparison to hospital outpatient departments.

Comment: Most commenters were in favor of expanding the policy to provide separate payment under the ASC payment system for certain non-opioid pain management drugs that function as surgical supplies to the HOPD setting. Many providers commented that non-opioid pain management therapies are often superior to opioid-based ones in reducing pain, and indicated that they generally would prefer to use non-opioid therapies. However, many stated that payment dictated whether they could use a specific therapy. As such, commenters stated that the pain management therapies available in the ASC setting are not used to the same degree as in the HOPD setting. Commenters stated that although there has not been a drastic decrease in HOPD utilization of non-opioid pain management drugs, the utilization of opioid alternatives could be much higher if separate payment for these products was provided. Similarly, several commenters acknowledged that the disincentives to provide non-opioid pain management drugs in the HOPD setting were not as substantial as the ASC setting; however, according to these stakeholders, there are still financial disincentives to use opioids instead of opioid alternatives in the HOPD setting. A drug manufacturer discussed its view on the disparities in utilization and access to non-opioid pain management therapies in the HOPD setting compared to the ASC setting. Based on this commenter's geo-sociodemographic analysis, they believe that ASC access to their drug outpaced access in the HOPD setting due to CMS payment policies. A few drug manufacturers provided specific data on utilization of their individual products. Omeros, the manufacturer of the drug Omidria, cited that the drug's utilization had, in their view, decreased in the HOPD setting as a result of CMS packaging polices. Many commenters suggested that opioids were more cost effective for their HOPD facilities to use compared to non-opioid pain management drugs due to CMS payment policies. Some commenters suggested that a greater number of surgeries, particularly those with higher acuity and complexity that require pain management drugs, occur in the HOPD setting, compared to the ASC setting. The commenters contended that separate payment for non-opioid pain management drugs in this setting could potentially increase access to these treatments. Therefore, the commenters encouraged CMS to expand this policy to the HOPD setting.

The commenters generally encouraged payment parity across the ASC and HOPD settings in order to enhance site neutrality and prevent a diversion of patients to the ASC setting based solely on the availability of separate payment for non-opioid pain management drugs. MedPAC had concerns that our proposed policy would further distort payment differences between two care settings that are the sites of many of the same services, creating financial incentives for providers to direct patients to one setting of care. Many commenters and providers pointed to the clinical benefit of non-opioid treatments, and encouraged CMS to pay separately, incentivize, or otherwise recognize the value of these drugs in the HOPD setting, regardless of utilization patterns. Commenters provided literature supporting the benefits of non-opioid pain management approaches, including how certain non-opioid pain management products were effective for pain and reduced opioid consumption.

Response: We appreciate the many detailed comments we received from a wide variety of stakeholders in response to our comment solicitation on expanding our non-opioid pain management payment policy to the HOPD setting as well as those regarding the clinical benefit of non-opioid pain management treatments used in their clinical practice.

As discussed in the CY 2022 OPPS/ASC proposed rule, we did not make a proposal to expand this policy to the HOPD setting based on many factors, including our continued claims analysis that demonstrates increasing utilization year after year of these products in the HOPD setting. In the proposed rule, we described our claims analysis for Exparel, a drug for which we have more than five years of reliable claims data. As stated in the proposed rule, even while Exparel was packaged in the HOPD setting, claims data shows that utilization continued to steadily increase year over year. For other drugs described by stakeholders, we found similar increases over years of claims data. We will continue to track the utilization in the HOPD and ASC settings for all of these drugs. However, as Exparel is the only drug that has been not recently been on pass-through and has been packaged in the HOPD setting over the last three years, we believe that Exparel's utilization is a good indicator of whether our payment policies are causing disincentives for non-opioids in the HOPD setting. We have explained in several prior rulemakings, including in the CY 2021 OPPS/ASC final rule with comment period (85 FR 85894), that our packaging policies support our strategic goal of using larger payment bundles in the OPPS to maximize hospitals' incentives to provide care in the most efficient manner. As previously discussed, we strive to balance the importance of our packaging policies with the importance of addressing the opioid epidemic. In this specific scenario, we believe separate payment in the ASC setting for non-opioid pain management drugs and biologicals that function as surgical supplies is appropriate, given the financial disincentives we have observed for these products in the ASC setting. We identified several disincentives that were unique to the ASC setting compared to the HOPD setting, including the fact that ASCs tend to provide specialized care and a more limited range of services in comparison to hospital outpatient departments. Also, ASCs are paid, in aggregate, approximately 55 percent of the OPPS

rate. Therefore, fluctuations in payment rates for specific services may affect these providers more acutely than hospital outpatient departments; and ASCs may be less likely to choose to furnish non-opioid postsurgical pain management treatments, which are typically more expensive than opioids, as a result. We have not observed the same financial disincentives in the HOPD setting. We have also not observed conclusive trends that our packaging policies for non-opioid pain management are shifting patients from the HOPD setting to the ASC setting.

After reviewing the public comments received, as described previously, we have not found conclusive evidence to support the notion that the OPPS packaging policy, under which non-opioid drugs and biologicals are packaged when they function as a supply in a surgical procedure, has created financial incentives to use opioids instead of evidence-based non-opioid alternatives for pain management. Our goal is to eliminate the disincentive to use non-opioid pain management drugs, rather than to incentivize products in the HOPD setting as some commenters have suggested. At this time, we have not observed any clear and conclusive financial disincentive to use non-opioid pain management drugs over opioids in the HOPD setting. However, based on the comments we received, we will continue to carefully analyze utilization data and engage with stakeholders.

Therefore, for CY 2022, we are finalizing as proposed our proposal to continue to package payment under the OPPS for non-opioid pain management drugs that function as surgical supplies in the performance of surgical procedures in the HOPD setting.

(3) Criteria for Eligibility for Separate Payment Under the ASC Payment System for Non-Opioid Pain Management Drugs and Biologicals That Function as Surgical Supplies

As described in section 1833(t)(22)(A)(i) of the Act, the Secretary shall conduct a review of payments for opioids and evidence-based non-opioid alternatives for pain management with a goal of ensuring that there are not financial incentives to use opioids instead of non-opioid alternatives. In any future reviews the Secretary may determine appropriate to conduct under section 1833(t)(22)(A)(ii) of the Act, we believe it is important to establish the evidence base for non-opioid alternatives for pain management when evaluating whether current payment policies result in an incentive for providers to use opioids instead of such evidence-based non-opioid alternatives for pain management.

Accordingly, for CY 2022 and subsequent years, we proposed two criteria that non-opioid pain management drugs and biologicals would be required to meet to be eligible for a payment revision under the ASC payment system in accordance with section 1833(t)(22)(C). The proposed criteria were intended to identify non-opioid pain management drugs and biologicals that function as supplies in surgical procedures for which revised payment under the ASC payment system would be appropriate.

Comment: Most commenters supported continuing our policy of separate payment for non-opioid pain management drugs that function as surgical supplies in the ASC setting. Commenters believe continuing separate payment in the ASC setting is essential given the continued overall low utilization of these drugs in the ASC setting and the positive clinical benefit the drugs provide.

Response: We thank commenters for their support for our proposal. In the following sections we discuss in greater detail the specific aspects of the policy that commenters addressed.

Comment: MedPAC expressed reservations regarding our policy to pay ASCs separately for non-opioid pain management drugs that function as supplies. It stated this policy is contrary to CMS's policy efforts to increase the size of payment bundles in order to increase incentives for efficient delivery of care. Additionally, it stated paying separately in the ASC would distort payment differences between the ASC and HOPD settings. Generally, MedPAC supported a policy that maintains the packaging of drugs that function as supplies in surgical procedures, especially in the absence of evidence in peer-reviewed publications indicating that the drug in question reduces the use of opioids.

Response: We appreciate this comment and agree with the importance of maintaining our overarching packaging policies in the OPPS and ASC payment systems. However, given the seriousness of the opioid epidemic, we continue to believe this policy plays an important role in maintaining beneficiary access and enhancing patient care in the ASC setting by eliminating the financial disincentive to use non-opioid pain management drugs that function as surgical supplies over opioids.

Based on public comments received, for CY 2022, we are finalizing our proposal as proposed to continue our current policy to pay separately for non-opioid pain management drugs that function as surgical supplies in the performance of surgical procedures in the ASC setting. We are also finalizing the new additional eligibility criteria we proposed for this policy, as discussed in the following section.

Specifically, for CY 2022, we proposed the following criteria that non-opioid pain management drugs and biologicals that function as surgical supplies would be required to meet to be eligible for separate payment under the ASC payment system in accordance with section 1833(t)(22)(C) of the Act.

Criterion One: FDA Approval and FDA-Approved Indication for Pain Management or Analgesia

We proposed that the drug or biological product must be safe and effective, as determined by FDA. We proposed that the drug must be approved under a new drug application under section 505(c) of the Federal Food, Drug, and Cosmetic Act (FDCA), under an abbreviated new drug application under section 505(j), or, in the case of a biological product, be licensed under section 351 of the Public Health Service Act (the PHS Act). We further proposed that the drug or biological must also have an FDA-approved indication for pain management or analgesia. We believe FDA approval is an appropriate requirement for a drug or biological to be eligible for this policy because FDA reviews new drugs and biologicals for safety and effectiveness, which would allow us to identify safe and effective non-opioid products to which this separate payment policy would apply. Given that FDA has an existing and detailed review process already in place, we believe it would be appropriate and administratively efficient to utilize FDA approval as a requirement to ensure that the new drugs and biologicals approved under this policy are safe and effective for their intended use. We believe the vast majority of drugs and biologicals on the market have undergone FDA review and approval, and we do not anticipate this criterion would prevent otherwise eligible drugs or biologicals from qualifying. In addition, section 1833(t)(22)(A) of the Act, our current policy, and our proposed policy all focus on pain management products. Specifically, section 1833(t)(22)(A) of the Act refers to reviews of opioid and evidence-based non-opioid products for pain management. Therefore, we proposed to require an FDA-approved indication for pain management or analgesia for a drug or biological to qualify as a pain management product.

The FDA approval process would also allow us to confirm that a drug or biological is, in fact, a non-opioid. Drugs and biologicals that are characterized as opioids or opioid agonists in the labeling for the FDA-approved product would not be eligible for separate payment under this policy.

Comment: Many commenters recommended CMS finalize its proposal to require an FDA-approved indication for pain management or analgesia for a drug or biological to qualify as a pain management product. Numerous commenters believe that this criterion is objective and would provide a transparent requirement for this policy moving forward. Commenters stated that FDA has a thorough and comprehensive process for evaluating drugs for approval and for specific FDA-approved indications. Other commenters did not express outright support for this criterion, but rather said they were not opposed to it. Generally, commenters were in favor of establishing an FDA approval requirement.

Response: We thank commenters for their support. As described in our proposal, we agree with the importance of utilizing FDA approval and an indication for pain management as a criterion for separate payment for eligible non-opioids.

Comment: Some commenters did not support requiring a specific FDA-approved indication for pain management or analgesia because the commenters believed this requirement may limit the number of products to which the policy would apply. One commenter asked us to clarify whether an FDA-approved indication for the treatment of pain would be considered appropriate and satisfy this criterion. One drug manufacturer more generally asked for flexibility in the exact FDA-approved indication. This commenter stated CMS should allow flexibility for a variety of indication statements that demonstrate that a drug mitigates or otherwise alleviates pain. Additionally, this commenter asked CMS to clarify if providing a drug during the pre-operative, post-operative, or intraoperative period could potentially qualify under the proposed policy. Some commenters asked CMS to expand this FDA-approved indication criterion to include anesthesia drugs, drugs used to treat inflammation, or more generally, any drugs that may have pain management properties. An additional commenter suggested limiting eligibility to drugs or biologicals with more restrictive FDA-approved indications, such as those drugs with opioid-sparing pain management indications.

Response: Regarding comments on a specific FDA-approved indication, we believe an FDA-approved indication for pain management or analgesia is appropriate for this policy. Section 1833(t)(22) of the Act required us to assess incentives to use opioids rather than non-opioid products used for pain management. We believe using the FDA-approved indications as a method to determine which drug products are safe and effective for pain management is appropriate. Therefore, we do not believe drugs or biologicals that do not have an FDA—approved indication for pain management or as an analgesic, such as certain anesthesia drugs mentioned by stakeholders, would be appropriate under this policy. We do believe ''treatment of pain'' as described by one commenter, would be an appropriate indication to satisfy this criterion. In response to the recommendation that we include drugs used to treat inflammation, or more generally, any drugs that may have pain management properties, we are not modifying our proposal to include these types of drugs in the definition of an FDA-approved indication for pain management or analgesia.

Additionally, we remind commenters that we consider all items related to the surgical outcome and provided during the hospital stay in which the surgery is performed, including postsurgical pain management drugs, to be part of the surgery for purposes of our drug and biological surgical supply packaging policy (83 FR 58855). Additionally, a drug product must meet all other requirements for payment and coverage under Medicare Part B in order to be paid and covered under this policy. We believe including those drugs with FDA-approved indications for pain management or analgesia will capture the appropriate drug products intended for this policy without being so broad as to include drugs that may not be used for pain management or so restrictive as to exclude potentially useful non-opioid pain management products.

Based on our review of public comments, we are finalizing criterion one as proposed, under which the drug or biological product must be safe and effective, as determined by FDA, and that the drug must be approved under a new drug application under section 505(c) of FDCA, under an abbreviated new drug application under section 505(j), or, in the case of a biological product, be licensed under section 351 of the PHS Act. We are also finalizing for CY 2022 as part of criterion one the requirement that the drug or biological also have an FDA-approved indication for pain management or analgesia.

Criterion Two: Cost of the Product

Currently under the OPPS, drugs that are not policy-packaged are subject to the drug packaging threshold. In accordance with section 1833(t)(16)(B) of the Act, the threshold for establishing separate APCs for payment of drugs and biologicals was set at $50 per administration during CYs 2005 and 2006. We set the packaging threshold for establishing separate APCs for drugs and biologicals through annual notice and comment rulemaking. The proposed per-day drug packaging threshold for CY 2022 was $130, and the finalized per-day drug packaging threshold for CY 2022 is $130, as described in V.B.1.a of this final rule with comment period.

As our second criterion, we proposed that a drug or biological would only be eligible for a payment revision under the ASC payment system in accordance with section 1833(t)(22)(C) of the Act if its per-day cost exceeds the drug packaging threshold described in section V.B.1.a. of this final rule with comment period. We believe this is an appropriate requirement because we believe that not all non-opioid alternative treatments are equally disincentivized by our packaging policies. In particular, when the cost of non-opioid drugs and biologicals falls below the packaging threshold of $130 per-day, we believe the drug does not generally have a significant impact on the overall procedure costs; therefore, we believe use of these drugs and biologicals is less likely to be disincentivized by CMS packaging policies. However, when the per-day cost of the drug is above the drug packaging threshold, we believe the cost of these drugs or biologicals is more likely to have a significant impact on the overall procedure costs. Section 1833(t)(22)(A)(i) of the Act discusses financial incentives to use opioids instead of non-opioid alternative treatments. As such, we do not believe non-opioid pain management drugs that are lower in cost are generally disincentivized by our packaging policies, as their cost is more easily absorbed into the payment for the primary procedure in which they are used when compared to drugs and biologicals with costs above the threshold. We proposed to use the existing OPPS drug packaging threshold as it is familiar to stakeholders and its application to drugs and biologicals under this policy creates uniformity across the OPPS and ASC payment systems. Therefore, CMS proposed that drugs and biologicals would be required to have a per-day cost that exceeds the drug packaging threshold that CMS sets

annually through notice and comment rulemaking.

We also believe the use of this threshold as an eligibility criterion for drugs under consideration for separate payment under this policy is appropriate, as it conforms with the broader goals of the OPPS and ASC payment systems. Like other prospective payment systems, the OPPS relies on the concept of averaging to establish a payment rate for services. The payment may be more or less than the estimated cost of providing a specific service or a bundle of specific services for a particular beneficiary. The OPPS packages payments for multiple interrelated items and services into a single payment to create incentives for hospitals to furnish services most efficiently and to manage their resources with maximum flexibility. Our packaging policies, including the drug packaging threshold, support our strategic goal of using larger payment bundles to maximize hospitals' incentives to provide care in the most efficient manner. Packaging payments into larger payment bundles promotes the predictability and accuracy of payment for services over time. For the reasons mentioned above, we believe it is appropriate to continue to package drugs that would otherwise qualify for separate payment under this policy where their per-day cost is below the OPPS drug packaging threshold.

Comment: Most commenters supported this criterion. Some commenters stated that they agreed with CMS's rationale that use of drugs and biologicals with per-day costs below the packaging threshold is not generally disincentivized by CMS packaging policies. Commenters generally thought this was a clear, transparent, and objective criterion. Other commenters did not express outright support for this criterion but stated that they were not opposed to it.

Response: We thank commenters for their support of this proposed criterion.

Comment: A few commenters stated that non-opioid pain management drugs that fall below the drug packaging threshold are still expensive relative to opioids, and therefore, the commenters believed CMS should not finalize a cost threshold for this policy. Specifically, the manufacturer of Anjeso (HCPCS code J1738; *Injection, meloxicam, 1 mg*), Baudax Bio, supported CMS adopting policies that encourage use of non-opioid pain alternatives. However, they recognized that the per-day cost of their product fell below the drug packaging threshold and disagreed with CMS's proposed criterion two regarding per-day cost, because they indicated that the relative cost of opioids is still less than most non-opioid pain management products. Other commenters recommended that CMS pay for drugs and biologicals with per-day costs that fall below the drug packaging threshold, such as intravenous (IV) acetaminophen.

Response: We thank the commenters for their feedback on this proposed criterion. At this time, we continue to believe that drugs and biologicals with per-day costs below the OPPS drug packaging threshold are not generally disincentivized by CMS packaging policies, as the drug cost is less likely to represent a substantial portion of the payment rate of the primary procedure in which the product is used. This criterion aligns with our policy objective of eliminating financial disincentives to use of non-opioid pain management products.

Based on our rationale described above and feedback from stakeholders, we believe it is appropriate to finalize the second criterion as proposed. For CY 2022, we are finalizing our proposal that a non-opioid pain management drug or biological that functions as a supply in a surgical procedure would only be eligible for separate payment under the ASC payment system if its per-day cost exceeds the drug packaging threshold described in section V.B.1.a. of this final rule with comment period.

In addition, we proposed that non-opioid drugs and biologicals currently receiving transitional drug pass-through status in the OPPS would not be candidates for this policy as they are already paid separately under the OPPS and ASC payment system. We proposed that once transitional drug pass-through status expires, the non-opioid drug or biological may qualify for separate payment under the ASC payment system if it meets the proposed eligibility requirements.

Comment: Commenters requested that CMS determine the payment status of non-opioid drugs and biologicals after pass-through status expires as soon as possible through rulemaking.

Response: We thank commenters for their feedback. We will make payment determinations for applicable drugs in the appropriate calendar year rule. For example, those drugs that may be eligible for separate payment under this policy for the first time in CY 2023 will be discussed during the CY 2023 rulemaking cycle and evaluated against the appropriate eligibility criteria for that year.

Based on stakeholder feedback, we are finalizing as proposed that non-opioid pain management drugs and biologicals that function as supplies in surgical procedures that are already paid separately, or have transitional drug pass-through status under the OPPS, would not be candidates for this policy as they are already paid separately under the OPPS and ASC payment system. We also note that if a product has not received transitional pass-through status in the OPPS and ASC settings, separate payment in the ASC setting through this policy for non-opioid pain management drugs that function as surgical supplies does not preclude the manufacturer from applying for and receiving transitional pass-through status for their drug or biological if the drug or biological meets the criteria for transitional drug pass-through status. Please see section V.A., OPPS Transitional Pass-Through Payment for Additional Costs of Drugs, Biologicals, and Radiopharmaceuticals, of this CY 2022 OPPS/ASC final rule for additional details on transitional pass-through payments.

(4) Regulation Text Changes

We proposed to codify our proposed criteria for separate payment for qualifying non-opioid pain management drugs and biologicals that function as surgical supplies in the regulation text for the ASC payment system in a new § 416.174. In particular, we proposed to provide in a new § 416.174(a)(1) that non-opioid pain management drugs or biologicals that function as a supply in a surgical procedure are eligible for separate payment if they are approved under a new drug application under section 505(c) of FDCA, under an abbreviated new drug application under section 505(j) of FDCA, or, in the case of a biological product, are licensed under section 351 of the PHS Act. Section 416.174(a)(1) would also provide that the drug or biological must have an FDA-approved indication for pain management or analgesia. New § 416.174(a)(2) would require that the per-day cost of the drug or biological must exceed the OPPS drug packaging threshold set annually through notice and comment rulemaking.

We also proposed to amend § 416.164(b)(6) to provide that non-opioid pain management drugs and biologicals that function as a supply when used in a surgical procedure as determined by CMS under § 416.174 are ancillary items that are integral to a covered surgical procedure and for which separate payment is allowed. We also proposed to amend § 416.171(b)(1) to provide that the payment rate for non-opioid pain management drugs and biologicals that function as a supply when used in a surgical procedure as determined by CMS under § 416.174 are

not paid an amount derived from the payment rate for the equivalent item or service under the OPPS.

We received no comments on the specific regulation text changes. As we are finalizing the two criteria as proposed, we are also finalizing the corresponding regulation text changes as proposed.

(5) Eligibility for Separate Payment in CY 2022 for Exparel, Omidria, and Other Non-Opioid Drugs or Biologicals for Pain Management

As discussed in the CY 2021 OPPS/ASC final rule with comment period, there are two products receiving separate payment in the ASC setting in CY 2021 under our current policy to pay separately for non-opioid pain management treatments that function as surgical supplies when furnished in the ASC setting (85 FR 86171). These two products are Exparel (*HCPCS Code C9290, Injection, bupivacaine liposome, 1 mg*) and Omidria (HCPCS Code J1097, *phenylephrine 10.16 mg/ml and ketorolac 2.88 mg/ml ophthalmic irrigation solution, 1 ml*). Based on the current information available to us, as we explain below, we proposed that both products would be eligible for separate payment in CY 2022 under our proposed policy. We sought comment on whether there are any other non-opioid drug or biological products that would meet the proposed criteria if finalized. We have included our evaluations of these products based on stakeholder comments in the follow sections.

(a) Eligibility for Separate Payment in CY 2022 for Exparel

We proposed that Exparel (*C9290; Injection, bupivacaine liposome, 1 mg*) would continue to receive separate payment in the ASC setting as a non-opioid pain management drug that functions as a surgical supply for CY 2022. As we stated in the CY 2022 OPPS/ASC proposed rule, based on CMS's internal review, we believed Exparel met criterion one. Exparel was approved by FDA with a New Drug Application (NDA #022496) on 10/28/2011.[3] Exparel's FDA-approved indication is ''in patients 6 years of age and older for single-dose infiltration to produce postsurgical local analgesia (1). In adults as an interscalene brachial plexus nerve block to produce postsurgical regional analgesia''.[4] No component of Exparel is opioid-based. Accordingly, we proposed that Exparel meets criterion one.

As discussed in section (3) above, for criterion two we proposed that a drug or biological would only be eligible for separate payment under this policy if its per-day cost exceeds the drug packaging threshold described in section V.B.1.a. of this final rule with comment period. The finalized per-day cost threshold for CY 2022 is $130. Using the methodology described at V.B.1.a. of this final rule with comment period, the per-day cost of Exparel exceeds the $130 per-day cost threshold. Therefore, we proposed that Exparel meets criterion two.

Based on the above discussion, we proposed that Exparel meets criteria 1 and 2, and should receive separate payment under the ASC payment system for CY 2022.

Comment: The manufacturer of Exparel, Pacira BioSciences, supported finalizing both criteria as proposed and urged CMS to finalize the proposal to pay separately for Exparel in the ASC setting. The manufacturer also noted that numerous peer-reviewed studies demonstrate that Exparel can reduce or even replace use of postsurgical opioid pain medication and lead to improved patient outcomes. Several commenters, including a hospital association and surgery associations, also supported CMS's proposal to continue to unpackage and pay separately for Exparel in the ASC setting.

Response: We appreciate the commenters' input. After reviewing the information provided during the public comment period, and as described in our proposal above, we have determined that Exparel meets criterion one for FDA approval and an FDA-approved pain management indication and that the per-day cost of Exparel exceeds the finalized $130 per-day cost threshold, meeting criterion two. Additionally, no component of Exparel is opioid-based.

After consideration of the public comments we received and consistent with the eligibility criteria we are adopting, we are finalizing our proposal that Exparel will continue to receive separate payment under the ASC payment system in CY 2022 as a non-opioid pain management drug that functions as a surgical supply.

(b) Eligibility for Separate Payment for Omidria in CY 2022

We proposed that Omidria (J1097; *Phenylephrine 10.16 mg/ml and ketorolac 2.88 mg/ml ophthalmic irrigation solution, 1 ml*) would continue to receive separate payment in the ASC setting as a non-opioid pain management drug that functions as a surgical supply for CY 2022. Based on our internal review during the proposed rule, we stated that we believed Omidria would meet criterion one. Omidria was approved by FDA with a New Drug Application (NDA #205388) on May 30, 2014.[5] Additionally, Omidria's FDA-approved indication is as ''an alpha 1-adrenergic receptor agonist and nonselective cyclooxygenase inhibitor indicated for: Maintaining pupil size by preventing intraoperative miosis; Reducing postoperative pain''.[6] No component of Omidria is opioid-based. Therefore, we proposed that Omidria would meet proposed criterion one.

Using the methodology described at V.B.1.a. of this final rule with comment period, the per-day cost of Omidria exceeds the $130 per-day cost threshold. Therefore, we proposed that Omidria meets criterion two.

Because we proposed that Omidria meets criteria one and two, we proposed that it should receive separate payment under the ASC payment system for CY 2022.

Comment: The manufacturer of Omidria, Omeros, agreed with CMS's proposal that Omidria would satisfy the proposed criteria for CY 2022 and noted their support for Omidria continuing to receive separate payment in ASC setting. The manufacturer noted that Omidria decreases the need for the opioid fentanyl during surgery and reduces opioids prescribed post operatively, but did not submit literature to support these assertions. One commenter, a hospital association, also supported CMS's proposal to continue to unpackage Omidria in the ASC setting. However, another individual commenter stated their opposition to this proposal, noting that Omidria should be treated as an incidental part of an ophthalmic surgery and not paid for separately, as, in this commenter's view, Omidria does not meaningfully ameliorate the opioid crisis, is not indicated or useful for the treatment of an opioid use disorder, and that separate payment does not provide a clinical benefit for Medicare beneficiaries. Additionally, this commenter noted that ophthalmic surgeons rarely prescribe opioids.

Response: We appreciate the public comments on our proposal. We note that we have not proposed or adopted a requirement that a product must meaningfully ameliorate the opioid crisis or have a clinically significant

[3] Exparel. FDA Letter. 28 October 2011. *https://www.accessdata.fda.gov/drugsatfda_docs/appletter/2011/022496s000ltr.pdf.*

[4] Exparel. FDA Package Insert. 22 March 2021. *https://www.accessdata.fda.gov/drugsatfda_docs/label/2021/022496s035lbl.pdf.*

[5] Omidria. FDA Letter. 30 May 2014. *https://www.accessdata.fda.gov/drugsatfda_docs/appletter/2014/205388Orig1s000ltr.pdf.*

[6] Omidria. FDA Package Insert. 08 December 2017. *https://www.accessdata.fda.gov/drugsatfda_docs/label/2017/205388s006lbl.pdf.*

impact on opioid usage. As such, after reviewing the information provided during the public comment period, and as described in our proposal above, we have determined that Omidria meets finalized criterion one because it is FDA approved and has an FDA-approved pain management indication and meets finalized criterion two because it has a per-day cost that exceeds the $130 per-day cost threshold.

After consideration of the public comments we received and our review of the criteria, we are finalizing the proposal for Omidria to continue to receive separate payment under the ASC payment system as a non-opioid pain management drug that functions as a surgical supply for CY 2022.

(c) Eligibility for Separate Payment in CY 2022 for Other Non-Opioid for Pain Management Drugs and Biologicals

We received comments on the CY 2022 OPPS/ASC proposed rule on additional non-opioid pain management drugs and biologicals that commenters believe would be eligible for separate payment in CY 2022 under our proposed policy. We have included a summary of these comments below as well as our analysis of whether these products meet the final eligibility criteria.

Comment: The manufacturer of Dextenza (J1096; *Dexamethasone, lacrimal ophthalmic insert, 0.1 mg*), Ocular Therapeutix, commented that separate payment for Dextenza is necessary in the ASC setting for beneficiary access, as it is frequently used in that setting. The manufacturer requested continued separate payment after Dextenza's pass-through status expires.

Response: Based on CMS's internal review, we believe Dextenza meets criterion one. Dextenza was approved by FDA with a New Drug Application (NDA #208742) on November 30, 2018.[7] Dextenza's FDA-approved indication is as ''a corticosteroid indicated for the treatment of ocular pain following ophthalmic surgery''.[8] No component of Dextenza is opioid-based. Accordingly, we believe that Dextenza meets criterion one.

As discussed in section (3) above, for criterion two we proposed that a drug or biological would only be eligible for separate payment under this policy if its per-day cost exceeds the drug packaging threshold described in section V.B.1.a. of this final rule with comment period. Using that methodology, the per-day cost of Dextenza exceeds the $130 per-day cost threshold. Therefore, we believe that Dextenza meets criterion two.

We agree that Dextenza meets criteria one and two, and would be eligible to receive separate payment under the ASC payment system as a non-opioid pain management drug that functions as a surgical supply for CY 2022 if it was not already receiving separate payment-in CY 2022 as a pass-through drug. Please see section V.A. ''OPPS Transitional Pass-Through Payment for Additional Costs of Drugs, Biologicals, and Radiopharmaceuticals'' of this final rule with comment period for additional details on transitional pass-through payments for drugs and biologicals, as well as section X. F. of this final rule with comment period, ''Separate Payment in CY 2022 for the Device Category, Drugs, and Biologicals with Transitional Pass-Through Payment Status Expiring between December 31, 2021, and September 30, 2022.''

Comment: The manufacturer of Dexycu (J1095; *Injection, dexamethasone 9 percent, intraocular, 1 microgram*), EyePoint Pharmaceuticals, commented that Dexycu should be eligible for separate payment in the ASC setting as a non-opioid pain management drug that functions as a surgical supply. An individual commenter, an ophthalmologist, noted that Dexycu is indicated for the treatment of inflammation following ocular surgery and provided summaries of several studies that discussed Dexycu's utility in controlling pain. Other commenters more broadly suggested that CMS provide separate payment for products that prevent inflammation.

Response: Based on CMS's internal review, we do not believe Dexycu meets criterion one. Dexycu was approved by FDA with a New Drug Application (NDA #208912) on February 9, 2018.[9] Dexycu's FDA-approved indication is as ''a corticosteroid indicated for the treatment of postoperative inflammation''.[10] No component of Dexycu is opioid-based. However, Dexycu does not have an FDA-approved indication for pain management or analgesia. Accordingly, we do not believe Dexycu meets criterion one.

As discussed in section II.A.3. of this final rule with comment period, for criterion two we proposed that a drug or biological would only be eligible for separate payment under this policy if its per-day cost exceeds the drug packaging threshold described in section V.B.1.a. of this final rule with comment period. Using that methodology, the per-day cost of Dexycu does exceed the $130 per-day cost threshold. Therefore, we believe Dexycu meets criterion two.

After consideration of the public comments we received and our review of the criteria, we have determined that Dexycu does not meet criteria one and, therefore, would not eligible to receive separate payment under the ASC payment system as a non-opioid pain management drug that functions as a surgical supply for CY 2022. Additionally, we note that Dexycu is already receiving separate payment through CY 2022. Please see section V.A. ''OPPS Transitional Pass-Through Payment for Additional Costs of Drugs, Biologicals, and Radiopharmaceuticals'' of this final rule with comment period for additional details on transitional pass-through payments for drugs and biologicals as well as section X. F. ''Separate Payment in CY 2022 for the Device Category, Drugs, and Biologicals with Transitional Pass-Through Payment Status Expiring between December 31, 2021, and September 30, 2022.''

Comment: The manufacturer of Xaracoll, Innocoll Pharmaceuticals, commented that Xaracoll meets the two proposed CMS criteria and qualifies for separate payment as a non-opioid pain management drug that functions as a surgical supply in the ASC setting. The manufacturer also provided additional details regarding the clinical benefit of their product, including discussion of studies in which Xaracoll demonstrated significant pain relief and opioid reduction in open inguinal hernia repair.

Response: We appreciate the commenter's input. Based on CMS's internal review, we believe Xaracoll meets criterion one. Xaracoll was approved by FDA with a New Drug Application (NDA #209511) on August 28, 2020.[11] Regarding the specific FDA-approved indication requirement, Xaracoll is ''indicated in adults for placement into the surgical site to produce postsurgical analgesia for up to 24 hours following open inguinal hernia repair''.[12] No component of Xaracoll is

[7] Dextenza. FDA Letter. 30 November 2018. *https://www.accessdata.fda.gov/drugsatfda_docs/nda/2018/208742Orig1s000Approv.pdf.*

[10] Dexycu. FDA Labeling. 09 February 2018. *https://www.accessdata.fda.gov/drugsatfda_docs/nda/2018/208912Orig1s000Lbl.pdf.*

[11] Xaracoll. FDA Letter. 30 November 2018. *https://www.accessdata.fda.gov/drugsatfda_docs/appletter/2020/209511Orig1s000ltr.pdf.*

[12] Xaracoll. FDA Labeling. 30 November 2018. *https://www.accessdata.fda.gov/drugsatfda_docs/label/2020/209511s000lbl.pdf.*

opioid-based. Accordingly, we believe that Xaracoll meets criterion one.

As discussed in section II.A.3. of this final rule with comment period, for criterion two we proposed that a drug or biological would only be eligible for separate payment under this policy if its per-day cost exceeds the drug packaging threshold described in section V.B.1.a. of this final rule with comment period. Using that methodology, the per-day cost of Xaracoll exceeds the $130 per-day cost threshold. Therefore, we believe that Xaracoll meets criterion two.

After consideration of the public comments we received and our review of the finalized criteria, we have determined that Xaracoll meets criteria one and two, and are approving Xaracoll (C9089; *Bupivacaine, collagen-matrix implant, 1 mg*) to receive separate payment under the ASC payment system as a non-opioid pain management drug that functions as a surgical supply for CY 2022.

Comment: The manufacturer of Zynrelef, Heron Therapeutics, stated how Zynrelef meets CMS's proposed criteria for separate payment in the ASC setting and should be receive separate payment in that setting. The manufacturer also provided additional details regarding the clinical benefit of their product, including studies where Zynrelef demonstrated reduced opioid use.

Response: We appreciate the commenter's input. Based on CMS's internal review, we believe Zynrelef meets criterion one. Zynrelef was approved by FDA with a New Drug Application (NDA #211988) on May 12, 2021.[13] Regarding the specific FDA-approved indication requirement, Zynrelef is ''indicated in adults for soft tissue or periarticular instillation to produce postsurgical analgesia for up to 72 hours after bunionectomy, open inguinal herniorrhaphy and total knee arthroplasty''.[14] No component of Zynrelef is opioid-based. Accordingly, we believe that Zynrelef meets criterion one.

As discussed in section (3) above, for criterion two we proposed that a drug or biological would only be eligible for separate payment under this policy if its per-day cost exceeds the drug packaging threshold described in section V.B.1.a. of this final rule with comment period. Using that methodology, the per-day cost of Zynrelef exceeds the $130 per-day cost threshold. Therefore, we believe that Zynrelef meets criterion two.

After consideration of the public comments we received and our review of the finalized criteria, we have determined that Zynrelef meets criteria one and two, and are approving Zynrelef (C9088; *Instillation, bupivacaine and meloxicam, 1 mg/0.03 mg*) to receive separate payment under the ASC payment system as a non-opioid pain management drug that functions as a surgical supply for CY 2022.

Comment: The manufacturer of Anjeso (HCPCS code J1738; *Injection, meloxicam, 1 mg*), Baudax Bio, expressed support for policies that encourage the use of non-opioid pain alternatives. In their comment, Baudax Bio discussed the clinical benefits of their product.

Response: We appreciate the commenter's input. Based on CMS's internal review, we believe Anjeso meets criterion one. Anjeso was approved by FDA with a New Drug Application (NDA #210583) on February 20, 2020.[15] Anjeso's FDA-approved indication is ''indicated for use in adults for the management of moderate-to-severe pain, alone or in combination with non-NSAID analgesics''.[16] No component of Anjeso is opioid-based. Accordingly, we believe that Anjeso meets criterion one.

As discussed in section II.A.3. of this final rule with comment period, for criterion two we proposed that a drug or biological would only be eligible for separate payment under this policy if its per-day cost exceeds the drug packaging threshold described in section V.B.1.a. of this final rule with comment period. Using that methodology, the per-day cost of Anjeso does not exceed the $130 per-day cost threshold. Therefore, we do not believe that Anjeso meets criterion two.

After consideration of the public comments we received and our review of the finalized criteria, we have determined that Anjeso meets criteria one but not criterion two, and would not be eligible to receive separate payment under the ASC payment system as a non-opioid pain management drug that functions as a surgical supply for CY 2022. However, Anjeso remains on transitional pass-through status throughout CY 2022 and accordingly, is already receiving separate payment in the HOPD and ASC settings for CY 2022. Please see section V.A., OPPS Transitional Pass-Through Payment for Additional Costs of Drugs, Biologicals, and Radiopharmaceuticals, of this final rule with comment period for additional details on transitional pass-through payments for drugs and biologicals.

Comment: Several commenters, including hospital and professional associations, recommended separate payment for Ofirmev, IV acetaminophen, stating they believed it decreased use of post-operative opioids.

Response: We appreciate the commenters' input. Based on CMS's internal review, we believe Ofirmev meets criterion one. Ofirmev was approved by FDA with a New Drug Application (NDA #022450) on October 2, 2010.[17] Ofirmev's FDA-approved indication is ''management of mild to moderate pain, management of moderate to severe pain with adjunctive opioid analgesics, and reduction of fever''.[18] No component of Ofirmev is opioid-based. Accordingly, we believe that Ofirmev meets criterion one.

As discussed in section (3) above, under criterion two a drug or biological is only eligible for separate payment if its per-day cost exceeds the drug packaging threshold described in section V.B.1.a. of this final rule with comment period. Using the methodology described at V.B.1.a. of this final rule with comment period, the per-day cost of Ofirmev does not exceed the $130 per-day cost threshold. Therefore, we do not believe Ofirmev meets criterion two.

After consideration of the public comments we received and our review of the criteria, we have determined that Ofirmev meets criteria one but not criterion two and is not eligible to receive separate payment under the ASC payment system as a non-opioid pain management drug that functions as a surgical supply for CY 2022.

Comment: Several commenters, including professional and hospital associations, commented that classes of drugs, such as NSAIDS, including IV ibuprofen and IV ketorolac, may reduce opioid usage if CMS paid separately for them. However, they did not request that CMS consider a specific non-opioid product for separate payment in the ASC setting.

Response: We thank commenters for their comments. For both of these

[13] Zynrelef. FDA Letter. 05 May 2021. *https://www.accessdata.fda.gov/drugsatfda_docs/appletter/2021/211988Orig1s000ltr.pdf.*

products, we did not receive recommendations for a specific product, for a specific FDA approval, or from a specific manufacturer. We note that based on our review of these products, we do believe IV ibuprofen and IV ketorolac products, which have FDA approval and an FDA-approved indication for pain management or as an analgesic, would satisfy criterion one. However, based on our review of these products, using the methodology described at V.B.1.a. of this final rule with comment period, the per-day costs of HCPCS code 1741 (*Injection, ibuprofen, 100 mg)* and HCPCS code J1885 (*Injection, ketorolac tromethamine, per 15 mg)* do not exceed the packaging threshold for criterion two.

Comment: Commenters requested CMS consider the clinical value of Prialt (HCPCS Code J2278; *Injection, ziconotide, 1 microgram*) and Dsuvia, a sufentanil sublingual tablet, for separate payment in the ASC setting

Response: Prialt is not eligible for separate payment under our final policy because it is not a drug that functions as a supply in a surgical procedure and is already receiving separate payment. Dsuvia is not eligible for separate payment under our final policy because it contains an opioid and therefore is not a non-opioid drug. We are not revising our policy to provide separate payment for opioid pain management products for CY 2022.

As previously explained above, we are not modifying the eligibility criteria for our policy to include such products. However, we appreciate these comments and suggestions from stakeholders and will take them into consideration for future rulemaking.

(6) Comment Solicitation on Policy Modifications and Potential Additional Criteria for Revised Payment for Non-Opioid Pain Management Treatments

In addition to the proposed eligibility criteria above, we also sought comment on potential policy modifications and additional criteria that may help further align this policy with the intent of section 1833(t)(22) of the Act. Below we discuss potential additional criteria. We noted in the CY 2022 OPPS/ASC proposed rule that, depending on the public comments we received and our continued consideration of these potential criteria, we may adopt these criteria as part of our final policy and include them in the final regulation text; accordingly, we provided substantial details, explanations, and considerations about these potential criteria. We welcomed input from stakeholders on these and any additional policy modifications or criteria they believe would enhance our proposed policy. We also sought comment on other barriers to access to non-opioid pain management products that may exist, and to what extent our policies under the OPPS or ASC payment system could be modified to address these barriers.

Comment: A few comments from providers and drug manufacturers discussed additional barriers they faced in providing non-opioid pain management products. One commenter recommended CMS provide education to providers on non-opioid pain medications and to encourage patients to ask their providers about which medications they are being prescribed. One commenter noted that not allowing separate payment for non-opioid products in the HOPD setting limits the expansion of patient access to non-opioid therapies in new geographic areas. Another commenter noted that rural and underserved areas have been disproportionately harmed by opioid addiction and that geography, lack of provider education and training, and payment and coverage for these services may be barriers to treatment in these communities.

Response: We are committed to implementing measures to combat the opioid epidemic. We appreciate stakeholders' comments in response to this solicitation. We will take these comments into consideration for future rulemaking.

Comment: Many commenters appreciated CMS soliciting comment on potential additional criteria in the proposed rule. A few commenters recommended that CMS not finalize additional criteria based on responses to the comment solicitations. Rather, they suggested CMS finalize the two proposed criteria and assess the policy in the future to assess whether additional criteria are warranted.

Response: We thank commenters for their input. We are not finalizing additional criteria or policy modifications based on the comments were received in response to the comment solicitations in the CY 2022 OPPS/ASC proposed rule. Please see the following sections for a summary of the comments received.

(a) Utilization of the Product

We have historically used utilization as a metric to determine whether a change in our payment policy was necessary to determine whether our policies create a disincentive to use non-opioid alternatives. For example, as previously discussed, Exparel's decreasing utilization in the ASC setting caused us to propose to pay separately for non-opioid pain management drugs that function as surgical supplies in the ASC setting. We have used currently available claims data in prior years to analyze the payment and utilization patterns associated with specific non-opioid alternatives to determine whether our packaging policies may have reduced the use of non-opioid alternatives. We believe that higher utilization may be a potential indicator that the packaged payment is not causing an access to care issue and that the payment rate for the primary procedure adequately reflects the cost of the drug or biological. We also believe decreased utilization could potentially indicate that our packaging policy is discouraging use of a drug or biological and that providers are choosing less expensive treatments. We note that it is difficult to attribute product-specific changes in utilization to our packaging policies alone. Nonetheless, while we acknowledge certain limitations of utilization data, we believe analyzing utilization either on a product-specific basis or on a broader basis could be an important criterion in determining whether separate payment is warranted for a non-opioid pain management alternative.

Therefore, we solicited comment on whether specific evidence of reduced utilization should be part of our evaluation and determination as to whether a non-opioid pain management product should qualify for modified payment. This data may help to demonstrate that our packaging policies are causing an access issue for these products. Additionally, we realize that new products to the market may not have utilization data available, or reliable utilization data may be difficult to obtain for some products; therefore, we also requested comment on whether utilization data requirements should vary based on the newness of a product or its FDA marketing approval date.

Comment: Generally, commenters did not support adding a utilization requirement criterion. Several commenters stated that utilization data was useful in the original analysis to establish the original policy in the ASC setting, but they believe would be inappropriate to require new products to prove they are disincentivized by CMS packaging policies. These commenters noted it would take significant time for this data to be available after a new drug was introduced to the market. Additionally, several comments stated that utilization data is imperfect, as CMS described in the CY 2022 OPPS/ASC proposed rule.

Response: We thank commenters for their feedback on a potential utilization requirement. However, we are not finalizing any policy modifications, including adopting a utilization requirement, for CY 2022. We will take these comments into consideration for future rulemaking.

(b) FDA-Approved Indication for Pain Management or Analgesia for the Drug or Biological Product

As previously discussed, section 1833(t)(22)(A) of the Act specifically refers to reviews of opioid and evidence-based non-opioid products for pain management. We believe the majority of drugs and biologicals that would meet the requirements of our proposed policy would already have FDA approval as a pain management drug or as an analgesic. However, we acknowledge there may be other non-opioid products that would benefit from inclusion under this policy, but do not have a specific FDA-approved indication for pain management or analgesia, and would not satisfy criterion one. Therefore, we solicited comment on whether we should allow certain FDA-approved drugs and biologicals to be eligible for separate payment under this policy without a specific FDA-approved indication for pain management or as an analgesic drug. In lieu of an FDA-approved indication for pain management or analgesia, we sought comment on whether it would be appropriate to approve a product for inclusion under this policy if the pain-management or analgesia attributes of the drug or biological are recognized by a medical compendium. Similarly, we sought comment as to whether we should consider specialty society or national organization (such as a national surgery organization) recommendations of non-opioid pain management products that function as surgical supplies and reduce opioid use in the ASC setting, as evidence that a product meets criterion one, when a drug or biological does not have an FDA-approved indication for pain management or analgesia.

Comment: Some commenters were supportive of CMS taking into consideration other factors, such as specialty society endorsements, medical compendia, or inclusion in clinical practice guidelines, as part of the qualifying criteria if an FDA-approved indication for pain management or analgesia was not present. Commenters stated a specific FDA-approved indication may be too restrictive as some products may be used off-label for pain management. A few commenters suggested CMS take an individualized and holistic approach to each drug it evaluates, and therefore, consider association recommendations outside of FDA-approved indications. Commenters thought this would support increased access to drugs for off-label uses.

Response: We appreciate the comments received as a part of this specific comment solicitation; however, for CY 2022, we are not making any policy modifications based on the public comments we received in response to this comment solicitation.

(c) Peer-Reviewed Literature Requirement Comment Solicitation

We note that section 1833(t)(22)(B) of the Act requires the Secretary to focus on covered OPD services (or groups of services) assigned to a comprehensive ambulatory payment classification, ambulatory payment classifications that primarily include surgical services, and other services determined by the Secretary that generally involve treatment for pain management. Therefore, we solicited comment as to whether we should only adopt a payment revision for drugs and biologicals that function as surgical supplies in the ASC setting when those products have evidence in peer-reviewed literature supporting that the product actually decreases opioid usage associated with the surgical procedure. We believe this may be appropriate to ensure Medicare payment policies would not financially incentivize use of opioids rather than evidence-based non-opioid alternative treatments, as required by section 1833(t)(22)(A)(iii) of the Act. Specifically, we sought comment as to whether the drug or biological's use in a surgical procedure as a non-opioid pain management product should be supported by peer-reviewed literature demonstrating a clinically significant decrease in opioid usage compared to the standard of care, and we sought comment on whether such decreases in opioid usage should be sustained decreases that continue into the post-operative period.

Additionally, we sought input from commenters as to what they believe the requirements for peer-reviewed literature should be. For example, we solicited stakeholder feedback as to whether peer-reviewed literature should demonstrate that use of the drug or biological results in at least one, or several, of the following: decreased post-operative opioid use following surgery, decreased opioid misuse following surgery, or decreased opioid use disorder and dependency following surgery.

Additionally, we asked stakeholders if specific thresholds are necessary to determine whether these decreases are statistically and clinically significant and whether the decreases should simply be measured against placebo or the standard of care. We also requested information on how stakeholders would define the standard of care in these circumstances. In the proposed rule we stated, when evaluating literature, we would expect to examine the study methods, sample size, limitations, possible conflicts of interest, patient populations studied, and how the evidence supports the conclusion that the product can serve as a non-opioid pain management product and provide a clinically significant reduction in opioid use that continues into the post-operative period. However, we welcomed input from stakeholders about additional aspects of these studies that they believe CMS should focus on for this potential criterion. Additionally, we stated we would expect to use our discretion to assess whether the submitted studies meet these criteria, as well as for clinical applicability, literature integrity, and potential biases in consultation with our clinical advisors.

In order to provide stakeholders with some examples of what supporting evidence CMS may consider for this potential criterion, we stated in the proposed rule that we believed it would be helpful for CMS to receive literature demonstrating that use of a non-opioid drug or biological results in a statistically and clinically significant decreased day supply of outpatient opioids prescribed after surgery discharge compared to the generally accepted standard of care, or a statistically and clinically significant decreased morphine milligram equivalents (MME) per opioid dose prescribed after surgery discharge compared to the generally accepted standard of care. We would consider the generally accepted standard of care to include pain management therapy a patient would receive in the absence of the non-opioid alternative, such as the use of localized analgesia and/or an opioid. As previously discussed, we would then expect the use of a non-opioid pain management drug or biological to result in a decline in opioids used compared to the pain management therapy a patient would receive in the absence of the non-opioid alternative. We would expect this decline in opioids to include a decreased number of opioids received by a patient intraoperatively, post-operatively, and most significantly at discharge. We solicited comment on additional examples or measures that

would be beneficial for CMS to take into consideration. Additionally, we sought comment on whether we should require a specific objective measure for this criterion. We also sought input on how to assess whether changes are statistically and clinically significant. We requested comment on whether stakeholders believe evidence of statistical significance should be sufficient, or whether stakeholders believe the literature should also demonstrate clinically significant differences between treatment groups as well.

Comment: Many commenters did not support CMS finalizing any additional criteria, including a peer-reviewed literature requirement. A few commenters disagreed that a peer-reviewed literature requirement was necessary as they believed an FDA-approved indication for pain management or analgesia would be sufficient. Several commenters suggested CMS collect, review, and consider peer-reviewed literature, but not explicitly require it.

Response: We appreciate the comments received as a part of this specific comment solicitation; however, for CY 2022, we are not making any policy modifications based on the public comments we received in response to this comment solicitation. We will take these comments into consideration for future rulemaking.

Comment: A few commenters supported CMS requiring peer-reviewed literature that demonstrates that the drug in question reduces opioid use in the post-operative period. One commenter specified which type of literature endpoints would be important to incorporate into our review process. Specifically, one drug manufacturer recommended that CMS require that use of a drug demonstrate a significant reduction in the need for opioids and increase the number of patients who are opioid free in a randomized, well-controlled, head-to-head clinical trial versus an active comparator. A number of commenters requested that CMS provide separate payment for evidence-based, non-opioid pain management drugs. Specifically, in regards to peer-reviewed literature, MedPAC asserted that separately payable status should only be granted when evidence in peer-reviewed publications indicates that the drug in question reduces the use of opioids. Other commenters supported a criterion that requires a product to demonstrate the ability to replace, reduce, or avoid opioid use or the quantity of opioids prescribed.

Response: We thank commenters for their detailed comments. We agree it is important that a non-opioid pain management product serve as an alternative to an opioid, and therefore replace, reduce, or avoid opioid use.

We once again thank commenters for their detailed insights on this comment solicitation; however, for CY 2022, we are not making any policy modifications based on the public comments we received in response to this comment solicitation. We will take these comments into consideration for future rulemaking.

(d) Alternative Payment Mechanisms for Non-Opioid Drugs and Biologicals

As previously discussed, for CY 2022, we proposed to pay separately at ASP+6 percent for non-opioid pain management drugs and biologicals that function as surgical supplies in the performance of surgical procedures when they are furnished in the ASC setting and meet our other proposed criteria. Section 1833(t)(22)(A)(iii) of the Act requires the Secretary to consider the extent to which revisions to payments (such as the creation of additional groups of covered OPD services to classify separately those procedures that utilize opioids and non-opioid alternatives for pain management) would reduce payment incentives to use opioids instead of non-opioid alternatives for pain management. Accordingly, separate payment is not the only possible revision that may be appropriate. We sought comment on additional payment mechanisms that may be appropriate aside from separate payment. For instance, we requested feedback from stakeholders as to whether a single, flat add-on payment, or separate APC assignment, for products or procedures that use a product that meets eligibility criteria would be preferable to separate payment. We note that any revisions the Secretary determines appropriate under section 1833(t)(22)(C) of the Act must be applied in a budget neutral manner under section 1833(t)(9)(B) of the Act. We also sought input from stakeholders on any other innovative payment mechanisms for eligible non-opioid drugs and biologicals for pain management.

Comment: Most commenters opposed any other payment methodologies aside from paying separately for non-opioid pain management drugs or biologicals at ASP+6 percent. Several commenters contended that an add-on payment would not be appropriate because this would create differentials in payment across care settings, such as physician offices, and emphasized that stakeholders are more familiar with the ASP payment methodology. Some commenters also emphasized that drugs and biologicals are generally paid at ASP+6 percent when furnished in the physician office setting and encouraged CMS to pay ASP+6 percent under this policy to ensure payment parity across the different treatment settings.

One commenter asked that CMS apply its final payment policy for 340B-acquired drugs, to pay for non-opioid drug products at ASP minus 22.5 percent instead of ASP+ 6 percent. Additionally, one commenter asked that CMS create new CPT codes in order to account for the work associated with opioid-sparing therapies furnished by surgeons.

Response: We appreciate the comments received as a part of this specific comment solicitation; however, for CY 2022, we are not making any policy modifications based on the public comments we received in response to this comment solicitation. We will take these comments into consideration for future rulemaking.

(e) Non-Drug Products

In the CY 2022 OPPS/ASC proposed rule, we stated we were also interested in information on any non-opioid non-drug products that function as surgical supplies that commenters believe should be eligible for separate payment under this policy. Although we have not currently identified any non-opioid pain management non-drug products that are disincentivized by CMS packaging policies based on utilization data, we believe it is reasonable to assume that if disincentives exist for the use of non-opioid pain management drugs and biological products under the ASC payment system, they may also exist for non-opioid, non-drug products under the ASC payment system. If this is the case, we would like to address these disincentives given the severity and importance of combatting the opioid epidemic, regardless of whether the non-opioid product is a drug, biological, or non-drug product. We remain interested in whether there are any non-opioid non-drug products that may meet the proposed eligibility criteria and should qualify for separate or modified payment as discussed in section (d) above, in the ASC setting. Similarly, we also sought comment on whether there are unique qualities of non-drug products that would make revised payment in the HOPD setting appropriate instead of, or in addition to, the ASC setting.

We sought comment on whether it is appropriate to require non-drug products to meet the same criteria being proposed for drugs and biologicals. Additionally, we sought comment from

stakeholders on whether they believe it would be appropriate to create a broad category for non-drug products, or if a more limited category, such as for devices, would be appropriate. Specifically, we sought comment on whether there is information in the FDA approval for devices that would be an appropriate criterion to determine eligibility for separate payment, similar to how we proposed to require FDA approval with an FDA-approved indication for pain management or analgesia for drugs and biologicals. We sought comment on whether, if the non-drug product is a ''device'' as defined in section 201(h) of FDCA, the device should have received FDA premarket approval (PMA), grant of a *de novo* request, 510(k) clearance or meet an exemption from premarket review. Finally, we solicited comment on all aspects of an extension of our current policy to include appropriate products that are not drugs or biologicals.

We also sought comment on how peer-reviewed literature and utilization claims data could be used as potential criteria for a policy that would apply to non-drug products. Additionally, should a payment revision be determined necessary, we solicited comment on appropriate payment mechanisms for non-opioid, non-drug products, including assigning the non-drug product to its own APC to ensure that the product is paid separately or establishing an add-on adjustment for the cost of the non-drug product in addition to the payment for the APC to which the non-drug product is assigned. Additionally, we sought comment on whether it would be appropriate to subject non-drug products to a cost threshold similar to the one we proposed to apply to drugs and biologicals.

Comment: A few commenters supported CMS exploring a payment adjustment for non-opioid, non-drug items, including items such as devices. Some commenters discussed the benefit of spinal cord stimulators, and one commenter recommended an add-on payment for a narrowly constructed payment category, such as spinal cord stimulators. Commenters also cited the CMS prior authorization policy on spinal cord stimulators as inappropriately creating barriers to access to these devices, as beneficiaries could be prescribed opioids for longer periods of time while waiting for prior authorization to be approved. Commenters recommended CMS provide separate payment for nerve blocks, pain blocks (represented by CPT codes 64415, 64416, 64417, 64445, 64446, 64447, 64448, 64450), joint injections, and neuromodulation.

Some commenters stated that barriers for non-drug items are often more severe in the ASC setting. Commenters also suggested CMS consider payment methodologies for various other non-drug items, including for multi-modal pain management ERAS protocols, physical therapy, acupuncture, massage therapy, ON–Q pain relief system, devices that use ice water, dry needling, THC oil applied topically, and polar ice devices.

Commenters pointed to the opioid-sparing abilities of some of these products. For example, commenters noted that spinal cord stimulators are useful in reducing opioid usage for chronic pain patients. Commenters urged CMS to change payment polices to make spinal cord stimulators a front-line option in combating chronic pain.

Response: We appreciate the responses from commenters on this topic. As discussed in prior rulemaking (85 FR 85899), we have not found compelling evidence for non-drug, non-opioid pain management alternatives that commenters described to warrant separate payment under the OPPS or ASC payment system. For CY 2022, we are not finalizing any policy modifications in response to the comments we received on this comment solicitation. We will take these comments into consideration for future rulemaking.

Comment: Some commenters recommended that criteria similar to those proposed for drug items also apply to non-drug items, including a potential requirement for peer-reviewed literature demonstrating that the product significantly limits or eliminates prescription opioids.

Response: We thank commenters for their feedback regarding potential criteria for non-drug items and how we may incorporate non-drug products into our non-opioid pain management packaging policy in the future. We will take these comments into consideration for future rulemaking.

(f) Coinsurance Waiver Request

Comment: Multiple commenters, including providers and the manufacturer of Prialt, an intrathecal drug, requested CMS waive the 20 percent coinsurance requirement for non-opioid pain management drugs. Specifically, these commenters discussed that waiving coinsurance for non-opioid drugs that are indicated for severe chronic pain in patients requiring intrathecal therapy could bolster patient access

Response: The services described here, including intrathecal therapy, do not meet the statutory requirements process for ''additional preventive services'' in section 1861(ddd)(1) of the Act that would be subject to coinsurance waiver under 1833(a)(1)(W). Providers may waive coinsurance amounts only if they comply with applicable law, including the Federal Anti-Kickback Statute and the civil monetary penalty provision prohibiting inducements to beneficiaries. We note that the drugs these commenters describe are already paid separately. Additionally, the intrathecal drug, Prialt, frequently described by commenters, does not function as a supply to a surgical procedure. As such, it would not qualify under our current policy to pay separately in the ASC setting for non-opioid pain management drugs and biologicals that function as surgical supplies. However, we appreciate the commenters' input about the potential value of these drugs.

Summary of Finalized Policy

As discussed in the preceding sections, after consideration of the public comments we received, we are finalizing the proposed policy for CY 2022 to unpackage and pay separately at ASP plus 6 percent for non-opioid pain management drugs that function as surgical supplies when they are furnished in the ASC setting, are FDA-approved, have an FDA-approved indication for pain management or as an analgesic, and have a per-day cost above the OPPS/ASC drug packaging threshold for CY 2022. As noted above, we are finalizing the proposed regulation text changes at § 416.164(a)(4) and (b)(6), § 416.171(b)(1), and § 416.174 as proposed. We determined that four products are eligible for separate payment in the ASC setting under our final policy for CY 2022. Future products, or products not discussed in this rulemaking that may be eligible for separate payment under this policy will be evaluated in future notice and comment rulemaking. We will continue to analyze the issue of access to non-opioid pain management alternatives in the OPPS and the ASC settings as part of any subsequent reviews we conduct under section 1833(t)(22)(A)(ii) of the Act, which would be discussed in future notice and comment rulemaking. We will also continue to evaluate whether there are other non-opioid pain management alternatives for which our payment policy should be revised to allow separate payment in future rulemaking. Table 4 below lists the four

drugs that meet our finalized criteria and will receive separate payment under the ASC payment system when furnished in the ASC setting for CY 2022.

BILLING CODE 4120–01–P

TABLE: SUMMARY OF PRODUCTS MEETING CMS'S CRITERIA FOR SEPARATE PAYMENT IN THE ASC SETTING UNDER THE NON-OPIOID PAIN MANAGEMENT DRUGS THAT FUNCTION AS A SURGICAL SUPPLY PACKAGING POLICY

HCPCS Code	Long Descriptor	Final CY 2022 OPPS Status Indicator (SI)*	Final CY 2022 ASC Payment Indicator (PI)*
C9290	Injection, bupivacaine liposome, 1 mg	N	K2
J1097	Phenylephrine 10.16 mg/ml and ketorolac 2.88 mg/ml ophthalmic irrigation solution, 1 ml	N	K2
C9088	Instillation, bupivacaine and meloxicam, 1 mg/0.03 mg	N	K2
C9089	Bupivacaine, collagen-matrix implant, 1 mg	N	K2

*Please see ASC addenda BB for applicable payment rates, OPPS addenda D1 for SI definitions, and ASC addenda DD1 for PI definitions. All are available via the internet on the CMS website.

BILLING CODE 4120–01–C

4. Calculation of OPPS Scaled Payment Weights

We established a policy in the CY 2013 OPPS/ASC final rule with comment period (77 FR 68283) of using geometric mean-based APC costs to calculate relative payment weights under the OPPS. In the CY 2021 OPPS/ASC final rule with comment period (85 FR 85902 through 85903), we applied this policy and calculated the relative payment weights for each APC for CY 2021 that were shown in Addenda A and B of the CY 2021 OPPS/ASC final rule with comment period (which were made available via the internet on the CMS website) using the APC costs discussed in sections II.A.1. and II.A.2. of the CY 2021 OPPS/ASC final rule with comment period. For CY 2022, as we did for CY 2021, we proposed to continue to apply the policy established in CY 2013 and calculate relative payment weights for each APC for CY 2022 using geometric mean-based APC costs.

For CY 2012 and CY 2013, outpatient clinic visits were assigned to one of five levels of clinic visit APCs, with APC 0606 representing a mid-level clinic visit. In the CY 2014 OPPS/ASC final rule with comment period (78 FR 75036 through 75043), we finalized a policy that created alphanumeric HCPCS code G0463 (Hospital outpatient clinic visit for assessment and management of a patient), representing any and all clinic visits under the OPPS. HCPCS code G0463 was assigned to APC 0634 (Hospital Clinic Visits). We also finalized a policy to use CY 2012 claims data to develop the CY 2014 OPPS payment rates for HCPCS code G0463 based on the total geometric mean cost of the levels one through five CPT E/M codes for clinic visits previously recognized under the OPPS (CPT codes 99201 through 99205 and 99211 through 99215). In addition, we finalized a policy to no longer recognize a distinction between new and established patient clinic visits.

For CY 2016, we deleted APC 0634 and reassigned the outpatient clinic visit HCPCS code G0463 to APC 5012 (Level 2 Examinations and Related Services) (80 FR 70372). For CY 2022, as we did for CY 2021, we proposed to continue to standardize all of the relative payment weights to APC 5012. We believe that standardizing relative payment weights to the geometric mean of the APC to which HCPCS code G0463 is assigned maintains consistency in calculating unscaled weights that represent the cost of some of the most frequently provided OPPS services. For CY 2022, as we did for CY 2021, we proposed to assign APC 5012 a relative payment weight of 1.00 and to divide the geometric mean cost of each APC by the geometric mean cost for APC 5012 to derive the unscaled relative payment weight for each APC. The choice of the APC on which to standardize the relative payment weights does not affect payments made under the OPPS because we scale the weights for budget neutrality.

We note that in the CY 2019 OPPS/ASC final rule with comment period (83 FR 59004 through 59015) and the CY 2020 OPPS/ASC final rule with comment period (84 FR 61365 through 61369), we discuss our policy, implemented on January 1, 2019, to control for unnecessary increases in the volume of covered outpatient department services by paying for clinic visits furnished at excepted off-campus provider-based department (PBD) at a reduced rate. While the volume associated with these visits is included in the impact model, and thus used in calculating the weight scalar, the policy has a negligible effect on the scalar. Specifically, under this policy, there is no change to the relativity of the OPPS

payment weights because the adjustment is made at the payment level rather than in the cost modeling. Further, under this policy, the savings that result from the change in payments for these clinic visits are not budget neutral. Therefore, the impact of this policy will generally not be reflected in the budget neutrality adjustments, whether the adjustment is to the OPPS relative weights or to the OPPS conversion factor. For a full discussion of this policy, we refer readers to the CY 2020 OPPS/ASC final rule with comment period (84 FR 61142).

Section 1833(t)(9)(B) of the Act requires that APC reclassification and recalibration changes, wage index changes, and other adjustments be made in a budget neutral manner. Budget neutrality ensures that the estimated aggregate weight under the OPPS for CY 2022 is neither greater than nor less than the estimated aggregate weight that would have been calculated without the changes. To comply with this requirement concerning the APC changes, we proposed to compare the estimated aggregate weight using the CY 2021 scaled relative payment weights to the estimated aggregate weight using the proposed CY 2022 unscaled relative payment weights.

For CY 2021, we multiplied the CY 2021 scaled APC relative payment weight applicable to a service paid under the OPPS by the volume of that service from CY 2019 claims to calculate the total relative payment weight for each service. We then added together the total relative payment weight for each of these services in order to calculate an estimated aggregate weight for the year. For CY 2022, we proposed to apply the same process using the estimated CY 2022 unscaled relative payment weights rather than scaled relative payment weights. We proposed to calculate the weight scalar by dividing the CY 2021 estimated aggregate weight by the unscaled CY 2022 estimated aggregate weight.

For a detailed discussion of the weight scalar calculation, we refer readers to the OPPS claims accounting document available on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html*. Click on the link labeled ''CY 2022 OPPS/ASC Notice of Proposed Rulemaking'', which can be found under the heading ''Hospital Outpatient Prospective Payment System Rulemaking'' and open the claims accounting document link at the bottom of the page, which is labeled ''2022 NPRM OPPS Claims Accounting (PDF)''.

We proposed to compare the estimated unscaled relative payment weights in CY 2022 to the estimated total relative payment weights in CY 2021 using CY 2019 claims data, holding all other components of the payment system constant to isolate changes in total weight. Based on this comparison, we proposed to adjust the calculated CY 2022 unscaled relative payment weights for purposes of budget neutrality. We proposed to adjust the estimated CY 2022 unscaled relative payment weights by multiplying them by a proposed weight scalar of 1.4436 to ensure that the proposed CY 2022 relative payment weights are scaled to be budget neutral. The proposed CY 2022 relative payment weights listed in Addenda A and B to the CY 2022 OPPS/ASC proposed rule (which are available via the internet on the CMS website) are scaled and incorporate the recalibration adjustments discussed in sections II.A.1 and II.A.2 of the CY 2022 OPPS/ASC proposed rule (86 FR 42026).

Section 1833(t)(14) of the Act provides the payment rates for certain specified covered outpatient drugs (SCODs). Section 1833(t)(14)(H) of the Act provides that additional expenditures resulting from this paragraph shall not be taken into account in establishing the conversion factor, weighting, and other adjustment factors for 2004 and 2005 under paragraph (9), but shall be taken into account for subsequent years. Therefore, the cost of those SCODs (as discussed in section V.B.2 of the CY 2022 OPPS/ASC proposed rule (86 FR 42131 through 42133) is included in the budget neutrality calculations for the CY 2022 OPPS.

We did not receive any public comments on the proposed weight scalar calculation. Therefore, we are finalizing our proposal to use the calculation process described in the proposed rule, without modification, for CY 2022. Using updated final rule claims data, we are updating the estimated CY 2022 unscaled relative payment weights by multiplying them by a weight scalar of 1.4416 to ensure that the final CY 2022 relative payment weights are scaled to be budget neutral. The final CY 2022 relative payments weights listed in Addenda A and B of this final rule with comment period (which are available via the internet on the CMS website) were scaled and incorporate the recalibration adjustments discussed in sections II.A.1 and II.A.2 of this final rule with comment period.

B. Conversion Factor Update

Section 1833(t)(3)(C)(ii) of the Act requires the Secretary to update the conversion factor used to determine the payment rates under the OPPS on an annual basis by applying the OPD fee schedule increase factor. For purposes of section 1833(t)(3)(C)(iv) of the Act, subject to sections 1833(t)(17) and 1833(t)(3)(F) of the Act, the OPD fee schedule increase factor is equal to the hospital inpatient market basket percentage increase applicable to hospital discharges under section 1886(b)(3)(B)(iii) of the Act. In the FY 2022 IPPS/LTCH PPS proposed rule (86 FR 25435), consistent with current law, based on IHS Global, Inc.'s fourth quarter 2020 forecast of the FY 2022 market basket increase, the proposed FY 2022 IPPS market basket update was 2.5 percent.

Specifically, section 1833(t)(3)(F)(i) of the Act requires that, for 2012 and subsequent years, the OPD fee schedule increase factor under subparagraph (C)(iv) be reduced by the productivity adjustment described in section 1886(b)(3)(B)(xi)(II) of the Act. Section 1886(b)(3)(B)(xi)(II) of the Act defines the productivity adjustment as equal to the 10-year moving average of changes in annual economy-wide, private nonfarm business multifactor productivity (MFP) (as projected by the Secretary for the 10-year period ending with the applicable fiscal year, year, cost reporting period, or other annual period) (the ''MFP adjustment''). In the FY 2012 IPPS/LTCH PPS final rule (76 FR 51689 through 51692), we finalized our methodology for calculating and applying the MFP adjustment, and then revised this methodology, as discussed in the FY 2016 IPPS/LTCH PPS final rule (80 FR 49509). In the FY 2022 IPPS/LTCH PPS proposed rule (86 FR 25435), the proposed MFP adjustment for FY 2022 was 0.2 percentage point.

Therefore, we proposed that the MFP adjustment for the CY 2022 OPPS is 0.2 percentage point. We also proposed that if more recent data become subsequently available after the publication of the CY 2022 OPPS/ASC proposed rule (for example, a more recent estimate of the market basket increase and/or the MFP adjustment), we will use such updated data, if appropriate, to determine the CY 2022 market basket update and the MFP adjustment, which are components in calculating the OPD fee schedule increase factor under sections 1833(t)(3)(C)(iv) and 1833(t)(3)(F) of the Act, in the CY 2022 OPPS/ASC final rule.

We note that section 1833(t)(3)(F) of the Act provides that application of this subparagraph may result in the OPD fee schedule increase factor under section 1833(t)(3)(C)(iv) of the Act being less than 0.0 percent for a year, and may result in OPPS payment rates being less than rates for the preceding year. As described in further detail below, we proposed for CY 2022 an OPD fee schedule increase factor of 2.3 percent for the CY 2022 OPPS (which is the proposed estimate of the hospital inpatient market basket percentage increase of 2.5 percent, less the proposed 0.2 percentage point MFP adjustment).

We proposed that hospitals that fail to meet the Hospital OQR Program reporting requirements would be subject to an additional reduction of 2.0 percentage points from the OPD fee schedule increase factor adjustment to the conversion factor that would be used to calculate the OPPS payment rates for their services, as required by section 1833(t)(17) of the Act. For further discussion of the Hospital OQR Program, we refer readers to section XIV. of the proposed rule.

To set the OPPS conversion factor for 2022, we proposed to increase the CY 2021 conversion factor of $82.797 by 2.3 percent. In accordance with section 1833(t)(9)(B) of the Act, we proposed further to adjust the conversion factor for CY 2022 to ensure that any revisions made to the wage index and rural adjustment are made on a budget neutral basis. We proposed to calculate an overall budget neutrality factor of 1.0012 for wage index changes by comparing proposed total estimated payments from our simulation model using the proposed FY 2022 IPPS wage indexes to those payments using the FY 2021 IPPS wage indexes, as adopted on a calendar year basis for the OPPS.

For the CY 2022 OPPS, we proposed to maintain the current rural adjustment policy, as discussed in section II.E. of the CY 2022 OPPS/ASC proposed rule. Therefore, the proposed budget neutrality factor for the rural adjustment is 1.0000.

We proposed to continue previously established policies for implementing the cancer hospital payment adjustment described in section 1833(t)(18) of the Act, as discussed in section II.F. of the CY 2022 OPPS/ASC proposed rule. We proposed to calculate a CY 2022 budget neutrality adjustment factor for the cancer hospital payment adjustment by comparing estimated total CY 2022 payments under section 1833(t) of the Act, including the proposed CY 2022 cancer hospital payment adjustment, to estimated CY 2022 total payments using the CY 2021 final cancer hospital payment adjustment, as required under section 1833(t)(18)(B) of the Act. The proposed CY 2022 estimated payments applying the proposed CY 2022 cancer hospital payment adjustment were the same as estimated payments applying the CY 2021 final cancer hospital payment adjustment. Therefore, we proposed to apply a budget neutrality adjustment factor of 1.0000 to the conversion factor for the cancer hospital payment adjustment. In accordance with section 1833(t)(18)(C), as added by section 16002(b) of the 21st Century Cures Act (Pub. L. 114–255), we are applying a budget neutrality factor calculated as if the proposed cancer hospital adjustment target payment-to-cost ratio was 0.90, not the 0.89 target payment-to-cost ratio we applied as stated in section II.F. of the proposed rule.

For the CY 2022 OPPS/ASC proposed rule, we estimated that proposed pass-through spending for drugs, biologicals, and devices for CY 2022 would equal approximately $1.03 billion, which represented 1.24 percent of total projected CY 2022 OPPS spending. Therefore, the proposed conversion factor would be adjusted by the difference between the 0.92 percent estimate of pass-through spending for CY 2021 and the 1.24 percent estimate of proposed pass-through spending for CY 2022, resulting in a proposed decrease to the conversion factor for CY 2022 of 0.32 percent.

Proposed estimated payments for outliers would remain at 1.0 percent of total OPPS payments for CY 2022. We estimated for the proposed rule that outlier payments would be 1.06 percent of total OPPS payments in CY 2021; the 1.00 percent for proposed outlier payments in CY 2022 would constitute a 0.06 percent decrease in payment in CY 2022 relative to CY 2021.

For the CY 2022 OPPS/ASC proposed rule, we also proposed that hospitals that fail to meet the reporting requirements of the Hospital OQR Program would continue to be subject to a further reduction of 2.0 percentage points to the OPD fee schedule increase factor. For hospitals that fail to meet the requirements of the Hospital OQR Program, we proposed to make all other adjustments discussed above, but use a reduced OPD fee schedule update factor of 0.3 percent (that is, the proposed OPD fee schedule increase factor of 2.3 percent further reduced by 2.0 percentage points). This would result in a proposed reduced conversion factor for CY 2022 of $82.810 for hospitals that fail to meet the Hospital OQR Program requirements (a difference of −1.647 in the conversion factor relative to hospitals that met the requirements).

In summary, for 2022, we proposed to use a reduced conversion factor of $82.810 in the calculation of payments for hospitals that fail to meet the Hospital OQR Program requirements (a difference of −1.647 in the conversion factor relative to hospitals that met the requirements).

For 2022, we proposed to use a conversion factor of $84.457 in the calculation of the national unadjusted payment rates for those items and services for which payment rates are calculated using geometric mean costs; that is, the proposed OPD fee schedule increase factor of 2.3 percent for CY 2022, the required proposed wage index budget neutrality adjustment of approximately 1.0012, the proposed cancer hospital payment adjustment of 1.0000, and the proposed adjustment of 0.32 percentage point of projected OPPS spending for the difference in pass-through spending that resulted in a proposed conversion factor for CY 2022 of $84.457.

Comment: Two commenters request that the OPD fee schedule update factor be larger than the proposed 2.3 percent increase. One commenter cited a MedPAC study [19] that reported for 2019 that the aggregate Medicare margin for inpatient hospital providers was −8.7 percent among all inpatient hospital providers, and that the median Medicare margin was −1 percent for relatively efficient providers. This commenter appeared to request the OPD fee schedule update factor be increased sufficiently to substantially reduce the aggregate margin for hospital providers. The commenter also mentioned that the annual Consumer Price Index was 5.4 percent which was over 3 percentage points higher than the proposed 2.3 percent OPD fee schedule increase. The second commenter, a state hospital association, claimed that unspecified recent payment cuts for outpatient hospital services have hurt the financial position of hospitals in their state. The commenter asks us to identify additional ways to increase hospital payment more than the proposed 2.3 percent OPD fee schedule increase.

Response: The OPD fee schedule update factor is designed to maintain a consistent level of payment for outpatient hospital services in Medicare year over year after taking into account changes in medical inflation and business productivity. In addition, the

[19] Medicare Payment Advisory Commission, *Report to the Congress: Medicare Payment Policy,* v, 499 (Mar. 2021), *http://medpac.gov/docs/default-source/reports/mar21_medpac_report_to_the_congress_sec.pdf.*

OPPS conversion factor is not designed to redress payment reductions made in a non-budget neutral manner. The MedPAC study cited by one of the commenters reported, in addition to the aggregate Medicare margin for inpatient hospital providers, that the median margin for Medicare spending for relatively efficient hospitals was around −1 percent for 2019. The same MedPAC study also recommended a 2.0 percent increase in outpatient hospital spending for 2022, which is actually lower than our proposed conversion factor update of 2.3 percent.

The same commenter also suggested that the Consumer Price Index may be a better measure of medical inflation than the hospital market basket index used by CMS. The percentage change in the hospital market basket reflects the average change in the price of goods and services purchased by hospitals in order to provide medical care. A general measure of health care inflation (such as the Consumer Price Index for Medical Care Services) would not be appropriate as it is not specific to hospital medical services and is not reflective of the input price changes experienced by hospitals but rather the inflation experienced by the consumer for their medical expenses.

Comment: Two commenters supported our proposed CY 2022 OPD fee schedule increase factor percentage increase of 2.3 percent.

Response: We appreciate the support of the commenters.

After reviewing the public comments that we received, we are finalizing these proposals with modification. For CY 2022, we proposed to continue previously established policies for implementing the cancer hospital payment adjustment described in section 1833(t)(18) of the Act (discussed in section II.F. of this final rule with comment period). Based on the final rule updated data used in calculating the cancer hospital payment adjustment in section II.F. of this final rule with comment period, the target payment-to-cost ratio for the cancer hospital payment adjustment, which was 0.90 for CY 2021, is also 0.90 for CY 2022. As a result, we are applying a budget neutrality adjustment factor of 1.0000 to the conversion factor for the cancer hospital payment adjustment.

For this CY 2022 OPPS/ASC final rule with comment period, as published in the FY 2022 IPPS/LTCH PPS final rule (86 FR 45214), based on IGI's 2021 second quarter forecast with historical data through the first quarter of 2021, the hospital market basket update for CY 2022 is 2.7 percent and the estimate of the 10-year moving average growth of MFP for FY 2022 is 0.7 percent.

We note that as a result of the modifications in final policy for the CY 2022 wage index we are also including a change to the wage index budget neutrality adjustment so that the final overall budget neutrality factor of 1.0000 would apply for wage index changes. This adjustment is comprised of a 1.0001 budget neutrality adjustment, using our standard calculation of comparing proposed total estimated payments from our simulation model using the final FY 2022 IPPS wage indexes to those payments using the FY 2022 IPPS wage indexes, as adopted on a calendar year basis for the OPPS as well as a 0.9999 budget neutrality adjustment for the final CY 2022 5 percent cap on wage index decreases, requiring application of the 5 percent cap on CY 2021 wages, to ensure that this transition wage index is implemented in a budget neutral manner, consistent with the proposed FY 2022 IPPS wage index policy (86 FR 45552).

As a result of these finalized policies, the OPD fee schedule increase factor for the CY 2022 OPPS is 2.0 percent (which reflects the 2.7 percent final estimate of the hospital inpatient market basket percentage increase with a 0.7 percentage point MFP adjustment). For CY 2022, we are using a conversion factor of $84.177 in the calculation of the national unadjusted payment rates for those items and services for which payment rates are calculated using geometric mean costs; that is, the OPD fee schedule increase factor of 2.0 percent for CY 2022, the required wage index budget neutrality adjustment of 1.0000, and the adjustment of −0.32 percentage point of projected OPPS spending for the difference in pass-through spending that results in a conversion factor for CY 2022 of $84.177.

C. Wage Index Changes

Section 1833(t)(2)(D) of the Act requires the Secretary to determine a wage adjustment factor to adjust the portion of payment and coinsurance attributable to labor-related costs for relative differences in labor and labor-related costs across geographic regions in a budget neutral manner (codified at 42 CFR 419.43(a)). This portion of the OPPS payment rate is called the OPPS labor-related share. Budget neutrality is discussed in section II.B. of the CY 2022 OPPS/ASC proposed rule (86 FR 42048 through 42049).

The OPPS labor-related share is 60 percent of the national OPPS payment. This labor-related share is based on a regression analysis that determined that, for all hospitals, approximately 60 percent of the costs of services paid under the OPPS were attributable to wage costs. We confirmed that this labor-related share for outpatient services is appropriate during our regression analysis for the payment adjustment for rural hospitals in the CY 2006 OPPS final rule with comment period (70 FR 68553). We proposed to continue this policy for the CY 2022 OPPS. We referred readers to section II.H. of the CY 2022 OPPS/ASC proposed rule (86 FR 42056 through 42058) for a description and an example of how the wage index for a particular hospital is used to determine payment for the hospital. We did not receive any public comments on this proposal. Accordingly, for the reasons discussed above and in the CY 2022 OPPS/ASC proposed rule, we are finalizing our proposal, without modification, to continue this policy for the CY 2022 OPPS.

As discussed in the claims accounting narrative included with the supporting documentation for this final rule with comment period (which is available via the internet on the CMS website), for estimating APC costs, we are standardizing 60 percent of estimated claims costs for geographic area wage variation using the same FY 2022 pre-reclassified wage index that we use under the IPPS to standardize costs. This standardization process removes the effects of differences in area wage levels from the determination of a national unadjusted OPPS payment rate and copayment amount.

Under 42 CFR 419.41(c)(1) and 419.43(c) (published in the OPPS April 7, 2000 final rule with comment period (65 FR 18495 and 18545)), the OPPS adopted the final fiscal year IPPS post-reclassified wage index as the calendar year wage index for adjusting the OPPS standard payment amounts for labor market differences. Therefore, the wage index that applies to a particular acute care, short-stay hospital under the IPPS also applies to that hospital under the OPPS. As initially explained in the September 8, 1998 OPPS proposed rule (63 FR 47576), we believe that using the IPPS wage index as the source of an adjustment factor for the OPPS is reasonable and logical, given the inseparable, subordinate status of the HOPD within the hospital overall. In accordance with section 1886(d)(3)(E) of the Act, the IPPS wage index is updated annually.

The Affordable Care Act contained several provisions affecting the wage index. These provisions were discussed in the CY 2012 OPPS/ASC final rule

with comment period (76 FR 74191). Section 10324 of the Affordable Care Act added section 1886(d)(3)(E)(iii)(II) to the Act, which defines a frontier State and amended section 1833(t) of the Act to add paragraph (19), which requires a frontier State wage index floor of 1.00 in certain cases, and states that the frontier State floor shall not be applied in a budget neutral manner. We codified these requirements at § 419.43(c)(2) and (3) of our regulations. For 2022, we proposed to implement this provision in the same manner as we have since CY 2011. Under this policy, the frontier State hospitals would receive a wage index of 1.00 if the otherwise applicable wage index (including reclassification, the rural floor, and rural floor budget neutrality) is less than 1.00. Because the HOPD receives a wage index based on the geographic location of the specific inpatient hospital with which it is associated, the frontier State wage index adjustment applicable for the inpatient hospital also would apply for any associated HOPD. We referred readers to the FY 2011 through FY 2021 IPPS/LTCH PPS final rules for discussions regarding this provision, including our methodology for identifying which areas meet the definition of ''frontier States'' as provided for in section 1886(d)(3)(E)(iii)(II) of the Act: for FY 2011, 75 FR 50160 through 50161; for FY 2012, 76 FR 51793, 51795, and 51825; for FY 2013, 77 FR 53369 through 53370; for FY 2014, 78 FR 50590 through 50591; for FY 2015, 79 FR 49971; for FY 2016, 80 FR 49498; for FY 2017, 81 FR 56922; for FY 2018, 82 FR 38142; for FY 2019, 83 FR 41380; for FY 2020, 84 FR 42312; and for FY 2021, 85 FR 58765. We did not receive any public comments on this proposal. Accordingly, for the reasons discussed above and in the CY 2022 OPPS/ASC proposed rule, we are finalizing our proposal, without modification, to continue to implement the frontier State floor under the OPPS in the same manner as we have since CY 2011.

In addition to the changes required by the Affordable Care Act, we noted in the CY 2022 OPPS/ASC proposed rule (86 FR 42050) that the proposed FY 2022 IPPS wage indexes continue to reflect a number of adjustments implemented in past years, including, but not limited to, reclassification of hospitals to different geographic areas, the rural floor provisions, an adjustment for occupational mix, an adjustment to the wage index based on commuting patterns of employees (the out-migration adjustment), and an adjustment to the wage index for certain low wage index hospitals to help address wage index disparities between low and high wage index hospitals. In addition, we noted that in the FY 2022 IPPS/LTCH PPS proposed rule (86 FR 25405 through 25407), we proposed to implement section 9831 of the American Rescue Plan Act of 2021 (Pub. L. 117–2) which reinstates the imputed floor wage index adjustment under the IPPS for hospitals in all-urban states effective for discharges on or after October 1, 2021 (FY 2022) using the methodology described in § 412.64(h)(4)(vi) as in effect for FY 2018. Specifically, section 1886(d)(3)(E)(iv)(I) and (II) of the Act, as added by section 9831 of the American Rescue Plan Act, provides that for discharges occurring on or after October 1, 2021, the area wage index applicable under the IPPS to any hospital in an all-urban State may not be less than the minimum area wage index for the fiscal year for hospitals in that State established using the methodology described in § 412.64(h)(4)(vi) as in effect for FY 2018. We further noted in the FY 2022 IPPS/LTCH PPS proposed rule that, given the recent enactment of section 9831 of Public Law 117–2 on March 11, 2021, there was not sufficient time available to incorporate the changes required by this statutory provision (the reinstatement of the imputed floor wage index) into the calculation of the IPPS provider wage index for the FY 2022 IPPS/LTCH PPS proposed rule, and we stated that we would include the imputed floor wage index adjustment in the calculation of the IPPS provider wage index in the FY 2022 IPPS/LTCH PPS final rule. We noted that CMS posted, concurrent with the issuance of the FY 2022 IPPS/LTCH proposed rule, estimated imputed floor values by state in a separate data file on the FY 2022 IPPS Proposed Rule web page on the CMS website at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index*. In addition, we stated in the FY 2022 IPPS/LTCH PPS proposed rule that, based on data available for the FY 2022 IPPS/LTCH PPS proposed rule, the following States would be all-urban States as defined in section 1886(d)(3)(E)(iv)(IV) of the Act, and thus hospitals in such States would be eligible to receive an increase in their wage index due to application of the imputed floor for FY 2022: New Jersey, Rhode Island, Delaware, Connecticut, and Washington, DC. We referred readers to the FY 2022 IPPS/LTCH PPS proposed rule (86 FR 25396 through 25417) for a detailed discussion of all proposed changes to the FY 2022 IPPS wage indexes.

A summary of the comments we received regarding the rural floor and the imputed floor for all-urban states and our responses to those comments appear below:

Comment: Some commenters expressed their support for the application of the rural floor policy which included support for the continued exclusion of the wage data of hospitals that have reclassified as rural under § 412.103 when calculating the wage index for the rural floor.

Response: We appreciate the commenters' support for the application of the rural floor policy.

Comment: Some commenters opposed the continued application of a nationwide rural floor budget neutrality adjustment, noting that the policy does nothing more than benefit a few hospitals and exacerbate a downward spiral of the wage index for low wage index hospitals.

Response: We appreciate the commenters' concerns about application of the nationwide rural floor budget neutrality policy. However, as stated in the FY 2017 IPPS/LTCH PPS final rule (81 FR 56920), for discharges occurring on or after October 1, 2010, for purposes of applying the rural floor, section 3141 of the Affordable Care Act replaced the statewide budget neutrality adjustment policy with the national budget neutrality adjustment policy that was in place during FY 2008. That is, section 3141 required that budget neutrality for the rural floor be applied ''through a uniform, national adjustment to the area wage index'' instead of within each State beginning in FY 2011 (75 FR 50160).

We continue to believe it is reasonable and appropriate to continue the current policy of applying budget neutrality for the rural floor under the OPPS on a national basis, consistent with the IPPS. We believe that hospital inpatient and outpatient departments are subject to the same labor cost environment, and therefore, the wage index and any applicable wage index adjustments (including the rural floor and rural floor budget neutrality) should be applied in the same manner under the IPPS and OPPS. Furthermore, we believe that applying the rural floor and rural floor budget neutrality in the same manner under the IPPS and OPPS is reasonable and logical, given the inseparable, subordinate status of the HOPD within the hospital overall. In addition, we believe the application of different wage indexes and wage index adjustments under the IPPS and OPPS would add a level of administrative complexity that is overly burdensome and unnecessary. Therefore, we are

continuing the current policy of applying budget neutrality for the rural floor under the OPPS on a national basis, consistent with the IPPS.

Comment: Some commenters supported the proposed implementation of the imputed floor wage index policy. However, one commenter opposed the reinstatement of the imputed floor, stating that it exacerbates wage index disparities, but acknowledged that the proposal was in accordance with legislation enacted by Congress. This commenter requested CMS include details by state of the effects of the imputed floor. Commenters both in support and in opposition of the imputed floor policy applauded its implementation without the application of budget neutrality, per section 9831 of the American Rescue Plan Act of 2021. A commenter specifically concurred with CMS' interpretation that the definition of an all-urban state according to section 9831 of the American Rescue Plan Act of 2021 is one in which no hospital receives the rural area wage index.

Response: We appreciate the commenters' support of the proposed implementation of the imputed floor policy, which we note has been finalized in the FY 2022 IPPS/LTCH PPS final rule (86 FR 45176 through 45178). Responding to the commenter opposed to this policy, we underscore that, as the commenter itself pointed out, the imputed floor has been reinstated by statute in section 9831 of the American Rescue Plan Act of 2021. We believe that it is appropriate to apply the imputed floor policy in the OPPS in the same manner as under the IPPS, given the inseparable, subordinate status of the HOPD within the hospital overall.

In response to the commenter's request for details by state of the effects of the imputed floor, we direct the commenter to the data file that CMS posted concurrent with the FY 2022 IPPS/LTCH PPS proposed rule with estimated imputed floor value by state at *https://www.cms.gov/files/zip/fy2022-ipps-nprm-imputed-state-floors.zip*. Finally, we note that section 9831 of the American Rescue Plan Act of 2021 excluded the imputed floor from the budget neutrality requirement under the IPPS (section 1886(d)(3)(E)(i) of the Act) but did not specify that the same budget neutral treatment also would apply under the OPPS. As a result, the changes related to the reinstatement of the imputed floor would be budget neutralized through the standard OPPS wage index budget neutrality adjustment, as discussed in section II.B. of this final rule with comment period.

For more information about the imputed floor required by section 1886(d)(3)(E)(iv) of the Act, we refer readers to the regulations at § 412.64(e)(1) and (4) and (h)(4) and (5), and the discussion in the FY 2022 IPPS/LTCH PPS final rule (86 FR 45176 through 45178).

In the CY 2022 OPPS/ASC proposed rule (86 FR 42050), we noted that as discussed in the FY 2015 IPPS/LTCH PPS final rule (79 FR 49951 through 49963) and in each subsequent IPPS/LTCH PPS final rule, including the FY 2021 IPPS/LTCH PPS final rule (85 FR 58743 through 58755), the Office of Management and Budget (OMB) issued revisions to the labor market area delineations on February 28, 2013 (based on 2010 Decennial Census data) that included a number of significant changes, such as new Core Based Statistical Areas (CBSAs), urban counties that became rural, rural counties that became urban, and existing CBSAs that were split apart (OMB Bulletin 13–01). This bulletin can be found at: *https://obamawhitehouse.archives.gov/sites/default/files/omb/bulletins/2013/b13-01.pdf*. In the FY 2015 IPPS/LTCH PPS final rule (79 FR 49950 through 49985), for purposes of the IPPS, we adopted the use of the OMB statistical area delineations contained in OMB Bulletin No. 13–01, effective October 1, 2014. For purposes of the OPPS, in the CY 2015 OPPS/ASC final rule with comment period (79 FR 66826 through 66828), we adopted the use of the OMB statistical area delineations contained in OMB Bulletin No. 13–01, effective January 1, 2015, beginning with the CY 2015 OPPS wage indexes. In the FY 2017 IPPS/LTCH PPS final rule (81 FR 56913), we adopted revisions to statistical areas contained in OMB Bulletin No. 15–01, issued on July 15, 2015, which provided updates to and superseded OMB Bulletin No. 13–01 that was issued on February 28, 2013. For purposes of the OPPS, in the CY 2017 OPPS/ASC final rule with comment period (81 FR 79598), we adopted the revisions to the OMB statistical area delineations contained in OMB Bulletin No. 15–01, effective January 1, 2017, beginning with the CY 2017 OPPS wage indexes.

On August 15, 2017, OMB issued OMB Bulletin No. 17–01, which provided updates to and superseded OMB Bulletin No. 15–01 that was issued on July 15, 2015. The attachments to OMB Bulletin No. 17–01 provided detailed information on the update to the statistical areas since July 15, 2015, and were based on the application of the 2010 Standards for Delineating Metropolitan and Micropolitan Statistical Areas to Census Bureau population estimates for July 1, 2014 and July 1, 2015. For purposes of the OPPS, in the CY 2019 OPPS/ASC final rule with comment period (83 FR 58863 through 58865), we adopted the updates set forth in OMB Bulletin No. 17–01, effective January 1, 2019, beginning with the CY 2019 wage index.

On April 10, 2018, OMB issued OMB Bulletin No. 18–03 which superseded the August 15, 2017 OMB Bulletin No. 17–01. On September 14, 2018, OMB issued OMB Bulletin No. 18–04 which superseded the April 10, 2018 OMB Bulletin No. 18–03. Typically, interim OMB bulletins (those issued between decennial censuses) have only contained minor modifications to labor market delineations. However, the April 10, 2018 OMB Bulletin No. 18–03 and the September 14, 2018 OMB Bulletin No. 18–04 included more modifications to the labor market areas than are typical for OMB bulletins issued between decennial censuses, including some new CBSAs, urban counties that became rural, rural counties that became urban, and some existing CBSAs that were split apart. In addition, some of these modifications had a number of downstream effects, such as reclassification changes. These bulletins established revised delineations for Metropolitan Statistical Areas, Micropolitan Statistical Areas, and Combined Statistical Areas, and provided guidance on the use of the delineations of these statistical areas. For purposes of the OPPS, in the CY 2021 OPPS/ASC final rule with comment period (85 FR 85907 through 85908), we adopted the updates set forth in OMB Bulletin No. 18–04 effective January 1, 2021, beginning with the CY 2021 wage index. For a complete discussion of the adoption of the updates set forth in OMB Bulletin No. 18–04, we refer readers to the CY 2021 OPPS/ASC final rule with comment period.

On March 6, 2020, OMB issued Bulletin No. 20–01, which provided updates to and superseded OMB Bulletin No. 18–04 that was issued on September 14, 2018. The attachments to OMB Bulletin No. 20–01 provided detailed information on the updates to statistical areas since September 14, 2018, and were based on the application of the 2010 Standards for Delineating Metropolitan and Micropolitan Statistical Areas to Census Bureau population estimates for July 1, 2017 and July 1, 2018. (For a copy of this bulletin, we refer readers to the following website: *https://www.whitehouse.gov/wp-content/uploads/2020/03/Bulletin-20-01.pdf*.) In

OMB Bulletin No. 20–01, OMB announced one new Micropolitan Statistical Area, one new component of an existing Combined Statistical Area and changes to New England City and Town Area (NECTA) delineations. As we stated in the FY 2022 IPPS/LTCH PPS proposed rule (86 FR 25397), after reviewing OMB Bulletin No. 20–01, we determined that the changes in Bulletin 20–01 encompassed delineation changes that would not affect the Medicare IPPS wage index for FY 2022. Specifically, the updates consisted of changes to NECTA delineations and the creation of a new Micropolitan Statistical Area, which was then added as a new component to an existing Micropolitan Statistical Area. The Medicare wage index does not utilize NECTA definitions, and, as most recently discussed in FY 2021 IPPS/LTCH PPS final rule (85 FR 58746), we include hospitals located in Micropolitan Statistical areas in each State's rural wage index. Therefore, consistent with our discussion in the FY 2022 IPPS/LTCH PPS final rule (86 FR 45164), while we are adopting the updates set forth in OMB Bulletin No. 20–01 consistent with our general policy of adopting OMB delineation updates, we note that specific OPPS wage index updates would not be necessary for CY 2022 as a result of adopting these OMB updates. In other words, these OMB updates would not affect any hospital's geographic area for purposes of the OPPS wage index calculation for CY 2022.

For CY 2022, we are continuing to use the OMB delineations that were adopted beginning with FY 2015 (based on the revised delineations issued in OMB Bulletin No. 13–01) to calculate the area wage indexes, with updates as reflected in OMB Bulletin Nos. 15–01, 17–01, 18–04, and 20–01, although as noted above the latter Bulletin did not require any wage area updates.

We noted in the CY 2022 OPPS/ASC proposed rule (86 FR 42051) that, in connection with our adoption in FY 2021 of the updates in OMB Bulletin 18–04, we adopted a policy to place a 5 percent cap, for FY 2021, on any decrease in a hospital's wage index from the hospital's final wage index in FY 2020 so that a hospital's final wage index for FY 2021 would not be less than 95 percent of its final wage index for FY 2020. We referred the reader to the FY 2021 IPPS/LTCH PPS final rule (85 FR 58753 through 58755) for a complete discussion of this transition. As finalized in the FY 2021 IPPS/LTCH PPS final rule, this transition was set to expire at the end of FY 2021. However, as discussed in the FY 2022 IPPS/LTCH PPS proposed rule (86 FR 25397), given the unprecedented nature of the ongoing COVID–19 PHE, we sought comment in the FY 2022 IPPS/LTCH PPS proposed rule on whether it would be appropriate to continue to apply a transition for the FY 2022 IPPS wage index for hospitals negatively impacted by our adoption of the updates in OMB Bulletin 18–04. For example, we stated that such an extended transition could potentially take the form of holding the FY 2022 IPPS wage index for those hospitals harmless from any reduction relative to their FY 2021 wage index. We further stated that if we were to apply a transition to the FY 2022 IPPS wage index for hospitals negatively impacted by our adoption of the updates in OMB Bulletin 18–04, we also sought comment on making this transition budget neutral under the IPPS, as is our usual practice, in the same manner that the FY 2021 IPPS wage index transition was made budget neutral as discussed in the FY 2021 IPPS/LTCH PPS final rule (85 FR 58755).

A summary of the comments we received regarding a wage index transition policy for 2022 as described above, and our responses to those comments, appear below:

Comment: We received multiple comments strongly recommending CMS extend a transition policy similar to that implemented in FY 2020 and FY 2021 in the IPPS. Multiple commenters, citing the severity and continuing impact of changes related to the OMB updates, the low wage index policy, and the lingering financial burden caused by the COVID–19 PHE, urged CMS to add an additional year of transition for both inpatient hospital and outpatient hospital providers, applied in a budget neutral manner. These commenters stated that given the wide-ranging factors impacting wage index values, it would not be equitable to limit the transition adjustment only to the effects of the revised labor market delineations. The commenters requested the transition be implemented more broadly to all hospitals experiencing large declines in wage index values. Many of these commenters recommended CMS consider making a permanent 5 percent maximum reduction policy to protect hospitals from large year-to-year variations in wage index values as a means to reduce overall volatility.

Multiple commenters requested that CMS extend a hold harmless policy for all hospitals negatively affected by CMS' adoption of revised delineations until OMB releases further revisions predicated on the results of the 2020 decennial census. A commenter recommended a hold-harmless transition be applied specifically to hospitals in CBSAs that were negatively affected by the FY 2021 adoption of revised CBSAs, citing specific CBSAs they believed warranted an additional transition adjustment.

Multiple commenters, while supporting some form of transition adjustment for negatively affected hospitals, requested any such adjustment be made in a non-budget neutral manner. These commenters expressed their preference that any such adjustment should not come at the expense of the providers themselves. Some commenters stated that such a budget neutrality adjustment would disadvantage providers who have increased their wage index values due to a variety of factors.

Response: We refer readers to the FY 2022 IPPS/LTCH PPS final rule (86 FR 45164 through 45165) for a detailed discussion of the wage index transition policy finalized for the FY 2022 IPPS wage index and for responses to these and other comments relating to the wage index transition policy.

As we noted, in the FY 2022 IPPS/LTCH PPS final rule (86 FR 45164 through 45165), we finalized a wage index transition policy for the FY 2022 IPPS wage index. Specifically, for hospitals that received the transition in FY 2021, we are continuing a wage index transition for FY 2022 under which we will apply a 5 percent cap on any decrease in the hospital's wage index compared to its wage index for FY 2021 to mitigate significant negative impacts of, and provide additional time for hospitals to adapt to, the CMS decision to adopt the revised OMB delineations (86 FR 45164). We stated that, as discussed in the FY 2021 IPPS/LTCH final rule, we believe applying a 5-percent cap on any decrease in a hospital's wage index from the hospital's final wage index from the prior fiscal year is an appropriate transition as it provides predictability in payment levels from FY 2021 to the upcoming FY 2022 as well as effectively mitigating any significant decreases in the wage index for FY 2022 (86 FR 45164). We considered and responded to comments requesting that we apply the transition adjustment in FY 2022 to all hospitals with significant reductions in wage index values (not just those that received the transition adjustment in FY 2021), as well as comments recommending a 5-percent cap become a permanent policy for future fiscal years (86 FR 45164 through 45165). In addition, we considered and responded to comments recommending we not apply the transition in a budget neutral manner (86 FR 45165). We stated that

for FY 2022, similar to FY 2021, we are applying a budget neutrality adjustment to the standardized amount so that our transition, as previously described, is implemented in a budget neutral manner under our authority in section 1886(d)(5)(I) of the Act (86 FR 45165).

In the CY 2022 OPPS/ASC proposed rule (86 FR 42051 through 42052), we proposed to use the FY 2022 IPPS post-reclassified wage index for urban and rural areas as the wage index for the OPPS to determine the wage adjustments for both the OPPS payment rate and the copayment rate for CY 2022. Therefore, as we stated in the CY 2022 OPPS/ASC proposed rule (86 FR 42052), any adjustments for the FY 2022 IPPS post-reclassified wage index, including without limitation any wage index transition policy that may be applied, would be reflected in the final CY 2022 OPPS wage index beginning on January 1, 2022. We continue to believe that using the IPPS post-reclassified wage index as the source of an adjustment factor for the OPPS is reasonable and logical, given the inseparable, subordinate status of the HOPD within the hospital overall. For this reason, as discussed later in this section, we are finalizing our proposal to use the FY 2022 IPPS post-reclassified wage index for urban and rural areas as the wage index for the OPPS to determine the wage adjustments for both the OPPS payment rate and the copayment rate for CY 2022, which will include the wage index transition policy discussed previously.

CBSAs are made up of one or more constituent counties. Each CBSA and constituent county has its own unique identifying codes. The FY 2018 IPPS/LTCH PPS final rule (82 FR 38130) discussed the two different lists of codes to identify counties: Social Security Administration (SSA) codes and Federal Information Processing Standard (FIPS) codes. Historically, CMS listed and used SSA and FIPS county codes to identify and crosswalk counties to CBSA codes for purposes of the IPPS and OPPS wage indexes. However, the SSA county codes are no longer being maintained and updated, although the FIPS codes continue to be maintained by the U.S. Census Bureau. The Census Bureau's most current statistical area information is derived from ongoing census data received since 2010; the most recent data are from 2015. The Census Bureau maintains a complete list of changes to counties or county equivalent entities on the website at: *https://www.census.gov/geo/reference/county-changes.html* (which, as of May 6, 2019, migrated to: *https://www.census.gov/programs-surveys/geography.html*). In the FY 2018 IPPS/LTCH PPS final rule (82 FR 38130), for purposes of crosswalking counties to CBSAs for the IPPS wage index, we finalized our proposal to discontinue the use of the SSA county codes and begin using only the FIPS county codes. Similarly, for the purposes of crosswalking counties to CBSAs for the OPPS wage index, in the CY 2018 OPPS/ASC final rule with comment period (82 FR 59260), we finalized our proposal to discontinue the use of SSA county codes and begin using only the FIPS county codes. For CY 2022, under the OPPS, we are continuing to use only the FIPS county codes for purposes of crosswalking counties to CBSAs.

We proposed to use the FY 2022 IPPS post-reclassified wage index for urban and rural areas as the wage index for the OPPS to determine the wage adjustments for both the OPPS payment rate and the copayment rate for CY 2022. Therefore, we stated that any adjustments for the FY 2022 IPPS post-reclassified wage index, including, but not limited to, the imputed floor adjustment and any transition that may be applied (as discussed previously), would be reflected in the final CY 2022 OPPS wage index beginning on January 1, 2022. (We referred readers to the FY 2022 IPPS/LTCH PPS proposed rule (86 FR 25396 through 25417) and the proposed FY 2022 hospital wage index files posted on the CMS website.) With regard to budget neutrality for the CY 2022 OPPS wage index, we referred readers to section II.B. of the CY 2022 OPPS/ASC proposed rule (86 FR 42048 through 42049). We stated that we continue to believe that using the IPPS post-reclassified wage index as the source of an adjustment factor for the OPPS is reasonable and logical, given the inseparable, subordinate status of the HOPD within the hospital overall.

We refer readers to the discussion of comments on the wage index transition policy for 2022, and our responses to those comments, earlier in this section. We did not receive any additional comments on this proposal and are finalizing it without modification.

Hospitals that are paid under the OPPS, but not under the IPPS, do not have an assigned hospital wage index under the IPPS. Therefore, for non-IPPS hospitals paid under the OPPS, it is our longstanding policy to assign the wage index that would be applicable if the hospital was paid under the IPPS, based on its geographic location and any applicable wage index adjustments. In the CY 2022 OPPS/ASC proposed rule, we proposed to continue this policy for CY 2022, and included a brief summary of the major proposed FY 2022 IPPS wage index policies and adjustments that we proposed to apply to these hospitals under the OPPS for CY 2022. which we have summarized below. We referred readers to the FY 2022 IPPS/LTCH PPS proposed rule (86 FR 25396 through 25417) for a detailed discussion of the proposed changes to the FY 2022 IPPS wage indexes.

It has been our longstanding policy to allow non-IPPS hospitals paid under the OPPS to qualify for the out-migration adjustment if they are located in a section 505 out-migration county (section 505 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA)). Applying this adjustment is consistent with our policy of adopting IPPS wage index policies for hospitals paid under the OPPS. We note that, because non-IPPS hospitals cannot reclassify, they are eligible for the out-migration wage index adjustment if they are located in a section 505 out-migration county. This is the same out-migration adjustment policy that would apply if the hospital were paid under the IPPS. For CY 2022, we proposed to continue our policy of allowing non-IPPS hospitals paid under the OPPS to qualify for the outmigration adjustment if they are located in a section 505 out-migration county (section 505 of the MMA). Furthermore, we proposed that the wage index that would apply for CY 2022 to non-IPPS hospitals paid under the OPPS would continue to include the rural floor adjustment and any adjustments applied to the IPPS wage index to address wage index disparities. In addition, the wage index that would apply to non-IPPS hospitals paid under the OPPS would include any transition we may finalize for the FY 2022 IPPS wage index as discussed previously.

We did not receive any comments on these proposals and are finalizing them without modification.

For CMHCs, for CY 2022, we proposed to continue to calculate the wage index by using the post-reclassification IPPS wage index based on the CBSA where the CMHC is located. Furthermore, we proposed that the wage index that would apply to CMHCs for CY 2022 would continue to include the rural floor adjustment and any adjustments applied to the IPPS wage index to address wage index disparities. In addition, the wage index that would apply to CMHCs would include any transition we may finalize for the FY 2022 IPPS wage index as discussed above. Also, we proposed that the wage index that would apply to CMHCs would not include the outmigration adjustment because that

adjustment only applies to hospitals. We did not receive any comments on these proposals and are finalizing them without modification.

Table 4A associated with the FY 2022 IPPS/LTCH PPS final rule (available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index*) identifies counties eligible for the out-migration adjustment. Table 2 associated with the FY 2022 IPPS/LTCH PPS final rule (available for download via the website above) identifies IPPS hospitals that receive the out-migration adjustment for FY 2022. We are including the outmigration adjustment information from Table 2 associated with the FY 2022 IPPS/LTCH PPS final rule as Addendum L to the CY 2022 OPPS/ASC final rule with the addition of non-IPPS hospitals that will receive the section 505 outmigration adjustment under the CY 2022 OPPS/ASC final rule. Addendum L is available via the internet on the CMS website. We refer readers to the CMS website for the OPPS at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index*. At this link, readers will find a link to the final FY 2022 IPPS wage index tables and Addendum L.

D. Statewide Average Default Cost-to-Charge Ratios (CCRs)

In addition to using CCRs to estimate costs from charges on claims for ratesetting, we use overall hospital-specific CCRs calculated from the hospital's most recent cost report to determine outlier payments, payments for pass-through devices, and monthly interim transitional corridor payments under the OPPS during the PPS year. For certain hospitals, under the regulations at 42 CFR 419.43(d)(5)(iii), we use the statewide average default CCRs to determine the payments mentioned earlier if it is not possible to determine an accurate CCR for a hospital in certain circumstances. This includes hospitals that are new, hospitals that have not accepted assignment of an existing hospital's provider agreement, and hospitals that have not yet submitted a cost report. We also use the statewide average default CCRs to determine payments for hospitals whose CCR falls outside the predetermined ceiling threshold for a valid CCR or for hospitals in which the most recent cost report reflects an all-inclusive rate status (Medicare Claims Processing Manual (Pub. 100–04), Chapter 4, Section 10.11).

We discussed our policy for using default CCRs, including setting the ceiling threshold for a valid CCR, in the CY 2009 OPPS/ASC final rule with comment period (73 FR 68594 through 68599) in the context of our adoption of an outlier reconciliation policy for cost reports beginning on or after January 1, 2009. For details on our process for calculating the statewide average CCRs, we refer readers to the CY 2022 OPPS final rule Claims Accounting Narrative that is posted on our website. We proposed to calculate the default ratios for CY 2022 using cost report data from the same set of cost reports we originally used in the CY 2021 OPPS ratesetting, consistent with the broader proposal regarding 2022 OPPS ratesetting discussed in section X.E. of the CY 2022 OPPS/ASC proposed rule (86 FR 42188 through 42190).

We did not receive any public comments on our proposal and are finalizing our proposal, without modification, to calculate the default ratios for CY 2022 using cost report data from the same set of cost reports we originally used in the CY 2021 OPPS ratesetting.

We no longer publish a table in the **Federal Register** containing the statewide average CCRs in the annual OPPS proposed rule and final rule with comment period. These CCRs with the upper limit will be available for download with each OPPS CY proposed rule and final rule on the CMS website. We refer readers to our website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices.html*; click on the link on the left of the page titled ''Hospital Outpatient Regulations and Notices'' and then select the relevant regulation to download the statewide CCRs and upper limit in the Downloads section of the web page.

E. Adjustment for Rural Sole Community Hospitals (SCHs) and Essential Access Community Hospitals (EACHs) Under Section 1833(t)(13)(B) of the Act for CY 2022

In the CY 2006 OPPS final rule with comment period (70 FR 68556), we finalized a payment increase for rural sole community hospitals (SCHs) of 7.1 percent for all services and procedures paid under the OPPS, excluding drugs, biologicals, brachytherapy sources, and devices paid under the pass-through payment policy, in accordance with section 1833(t)(13)(B) of the Act, as added by section 411 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) (Pub. L. 108–173). Section 1833(t)(13) of the Act provided the Secretary the authority to make an adjustment to OPPS payments for rural hospitals, effective January 1, 2006, if justified by a study of the difference in costs by APC between hospitals in rural areas and hospitals in urban areas. Our analysis showed a difference in costs for rural SCHs. Therefore, for the CY 2006 OPPS, we finalized a payment adjustment for rural SCHs of 7.1 percent for all services and procedures paid under the OPPS, excluding separately payable drugs and biologicals, brachytherapy sources, items paid at charges reduced to costs, and devices paid under the pass-through payment policy, in accordance with section 1833(t)(13)(B) of the Act.

In the CY 2007 OPPS/ASC final rule with comment period (71 FR 68010 and 68227), for purposes of receiving this rural adjustment, we revised our regulations at § 419.43(g) to clarify that essential access community hospitals (EACHs) are also eligible to receive the rural SCH adjustment, assuming these entities otherwise meet the rural adjustment criteria. Currently, two hospitals are classified as EACHs, and as of CY 1998, under section 4201(c) of Public Law 105–33, a hospital can no longer become newly classified as an EACH.

This adjustment for rural SCHs is budget neutral and applied before calculating outlier payments and copayments. We stated in the CY 2006 OPPS final rule with comment period (70 FR 68560) that we would not reestablish the adjustment amount on an annual basis, but we may review the adjustment in the future and, if appropriate, would revise the adjustment. We provided the same 7.1 percent adjustment to rural SCHs, including EACHs, again in CYs 2008 through 2021. Further, in the CY 2009 OPPS/ASC final rule with comment period (73 FR 68590), we updated the regulations at § 419.43(g)(4) to specify, in general terms, that items paid at charges adjusted to costs by application of a hospital-specific CCR are excluded from the 7.1 percent payment adjustment.

For CY 2022, we proposed to continue the current policy of a 7.1 percent payment adjustment that is done in a budget neutral manner for rural SCHs, including EACHs, for all services and procedures paid under the OPPS, excluding separately payable drugs and biologicals, brachytherapy sources, items paid at charges reduced to costs, and devices paid under the pass-through payment policy.

Comment: One commenter requested that CMS make the 7.1 percent rural adjustment permanent. The commenter appreciated the policy that CMS

adopted in CY 2019 and reaffirmed in CY 2020 where we stated that the 7.1 percent rural adjustment would continue to be in place until our data support establishing a different rural adjustment percentage. However, the commenter believes that this policy still does not provide enough certainty for rural SCHs and EACHs to know whether they should take into account the rural SCH adjustment when attempting to calculate expected revenues for their hospital budgets.

Response: We thank the commenter for their input. We believe that our current policy, which states that the 7.1 percent payment adjustment for rural SCHs and EACHs will remain in effect until our data show that a different percentage for the rural payment adjustment is necessary, provides sufficient budget predictability for rural SCHs and EACHs. Providers would receive notice in a proposed rule and have the opportunity to provide comments before any changes to the rural adjustment percentage would be implemented.

After consideration of the public comment we received, we are finalizing our proposal, without modification, to continue the current policy of a 7.1 percent payment adjustment that is done in a budget neutral manner for rural SCHs, including EACHs, for all services and procedures paid under the OPPS, excluding separately payable drugs and biologicals, devices paid under the passthrough payment policy, and items paid at charges reduced to costs.

F. Payment Adjustment for Certain Cancer Hospitals for CY 2022

1. Background

Since the inception of the OPPS, which was authorized by the Balanced Budget Act of 1997 (BBA) (Pub. L. 105–33), Medicare has paid the 11 hospitals that meet the criteria for cancer hospitals identified in section 1886(d)(1)(B)(v) of the Act under the OPPS for covered outpatient hospital services. These cancer hospitals are exempted from payment under the IPPS. With the Medicare, Medicaid and SCHIP Balanced Budget Refinement Act of 1999 (Pub. L. 106–113), the Congress added section 1833(t)(7), ''Transitional Adjustment to Limit Decline in Payment,'' to the Act, which requires the Secretary to determine OPPS payments to cancer and children's hospitals based on their pre-BBA payment amount (these hospitals are often referred to under this policy as ''held harmless'' and their payments are often referred to as ''hold harmless'' payments).

As required under section 1833(t)(7)(D)(ii) of the Act, a cancer hospital receives the full amount of the difference between payments for covered outpatient services under the OPPS and a ''pre-BBA amount.'' That is, cancer hospitals are permanently held harmless to their ''pre-BBA amount,'' and they receive transitional outpatient payments (TOPs) or hold harmless payments to ensure that they do not receive a payment that is lower in amount under the OPPS than the payment amount they would have received before implementation of the OPPS, as set forth in section 1833(t)(7)(F) of the Act. The ''pre-BBA amount'' is the product of the hospital's reasonable costs for covered outpatient services occurring in the current year and the base payment-to-cost ratio (PCR) for the hospital defined in section 1833(t)(7)(F)(ii) of the Act. The ''pre-BBA amount'' and the determination of the base PCR are defined at § 419.70(f). TOPs are calculated on Worksheet E, Part B, of the Hospital Cost Report or the Hospital Health Care Complex Cost Report (Form CMS–2552–96 or Form CMS–2552–10, respectively), as applicable each year. Section 1833(t)(7)(I) of the Act exempts TOPs from budget neutrality calculations.

Section 3138 of the Affordable Care Act amended section 1833(t) of the Act by adding a new paragraph (18), which instructs the Secretary to conduct a study to determine if, under the OPPS, outpatient costs incurred by cancer hospitals described in section 1886(d)(1)(B)(v) of the Act with respect to APC groups exceed outpatient costs incurred by other hospitals furnishing services under section 1833(t) of the Act, as determined appropriate by the Secretary. Section 1833(t)(18)(A) of the Act requires the Secretary to take into consideration the cost of drugs and biologicals incurred by cancer hospitals and other hospitals. Section 1833(t)(18)(B) of the Act provides that, if the Secretary determines that cancer hospitals' costs are higher than those of other hospitals, the Secretary shall provide an appropriate adjustment under section 1833(t)(2)(E) of the Act to reflect these higher costs. In 2011, after conducting the study required by section 1833(t)(18)(A) of the Act, we determined that outpatient costs incurred by the 11 specified cancer hospitals were greater than the costs incurred by other OPPS hospitals. For a complete discussion regarding the cancer hospital cost study, we refer readers to the CY 2012 OPPS/ASC final rule with comment period (76 FR 74200 through 74201).

Based on these findings, we finalized a policy to provide a payment adjustment to the 11 specified cancer hospitals that reflects their higher outpatient costs, as discussed in the CY 2012 OPPS/ASC final rule with comment period (76 FR 74202 through 74206). Specifically, we adopted a policy to provide additional payments to the cancer hospitals so that each cancer hospital's final PCR for services provided in a given calendar year is equal to the weighted average PCR (which we refer to as the ''target PCR'') for other hospitals paid under the OPPS. The target PCR is set in advance of the calendar year and is calculated using the most recently submitted or settled cost report data that are available at the time of final rulemaking for the calendar year. The amount of the payment adjustment is made on an aggregate basis at cost report settlement. We note that the changes made by section 1833(t)(18) of the Act do not affect the existing statutory provisions that provide for TOPs for cancer hospitals. The TOPs are assessed, as usual, after all payments, including the cancer hospital payment adjustment, have been made for a cost reporting period. Table 5 displays the target PCR for purposes of the cancer hospital adjustment for CY 2012 through CY 2021.

TABLE 5: CANCER HOSPITAL ADJUSTMENT TARGET PAYMENT PAYMENT-TO-COST RATIOS (PCRs), CY 2012 THROUGH CY 2021

Calendar Year	Target PCR
2012	0.91
2013	0.91
2014	0.90
2015	0.90
2016	0.92
2017	0.91
2018	0.88
2019	0.88
2020	0.89
2021	0.89

2. Policy for CY 2022

Section 16002(b) of the 21st Century Cures Act (Pub. L. 114–255) amended section 1833(t)(18) of the Act by adding subparagraph (C), which requires that in applying § 419.43(i) (that is, the payment adjustment for certain cancer hospitals) for services furnished on or after January 1, 2018, the target PCR adjustment be reduced by 1.0 percentage point less than what would otherwise apply. Section 16002(b) also provides that, in addition to the percentage reduction, the Secretary may consider making an additional percentage point reduction to the target PCR that takes into account payment rates for applicable items and services described under section 1833(t)(21)(C) of the Act for hospitals that are not cancer hospitals described under section 1886(d)(1)(B)(v) of the Act. Further, in making any budget neutrality adjustment under section 1833(t) of the Act, the Secretary shall not take into account the reduced expenditures that result from application of section 1833(t)(18)(C) of the Act.

We proposed to provide additional payments to the 11 specified cancer hospitals so that each cancer hospital's final PCR is equal to the weighted average PCR (or ''target PCR'') for the other OPPS hospitals, using the most recent submitted or settled cost report data that were available at the time of the development of the proposed rule, reduced by 1.0 percentage point, to comply with section 16002(b) of the 21st Century Cures Act. We did not propose an additional reduction beyond the 1.0 percentage point reduction required by section 16002(b) of the 21st Century Cures Act for CY 2022.

Under our established policy, to calculate the proposed CY 2022 target PCR, we would use the same extract of cost report data from HCRIS used to estimate costs for the CY 2022 OPPS which would be the most recently available hospital cost reports which, in most cases, would be from CY 2020. However, as discussed in section II.A.1.a of the CY 2022 OPPS/ASC proposed rule, given our concerns with CY 2020 claims data as a result of the PHE, we believe a target PCR based on CY 2020 claims and the most recently available cost reports may provide a less accurate estimation of cancer hospital PCRs and non-cancer hospital PCRs than the data used for the CY 2021 rulemaking cycle. Therefore, for CY 2022, we proposed to continue to use the CY 2021 target PCR of 0.89. This proposed CY 2022 target PCR of 0.89 includes the 1.0-percentage point reduction required by section 16002(b) of the 21st Century Cures Act for CY 2022. For a description of the CY 2021 target PCR calculation, we refer readers to the CY 2021 OPPS/ASC final rule with comment period (84 FR 85912 through 85914).

We did not receive any public comments on our proposal and we are finalizing our proposal to continue to use the CY 2021 target PCR of 0.89 for the 11 specified cancer hospitals for CY 2022 without modification.

Table 6 shows the estimated percentage increase in OPPS payments to each cancer hospital for CY 2022, due to the cancer hospital payment adjustment policy. The actual amount of the CY 2022 cancer hospital payment adjustment for each cancer hospital will be determined at cost report settlement and will depend on each hospital's CY 2022 payments and costs. We note that the requirements contained in section 1833(t)(18) of the Act do not affect the existing statutory provisions that provide for TOPs for cancer hospitals. The TOPs will be assessed, as usual, after all payments, including the cancer hospital payment adjustment, have been made for a cost reporting period.

BILLING CODE 4120–01–P

TABLE 6: Estimated CY 2022 Hospital-Specific Payment Adjustment For Cancer Hospitals To Be Provided At Cost Report Settlement

Provider Number	Hospital Name	Estimated Percentage Increase in OPPS Payments for CY 2022 due to Payment Adjustment
050146	City of Hope Comprehensive Cancer Center	39.6%
050660	USC Norris Cancer Hospital	31.7%
100079	Sylvester Comprehensive Cancer Center	16.5%
100271	H. Lee Moffitt Cancer Center & Research Institute	20.8%
220162	Dana-Farber Cancer Institute	34.7%
330154	Memorial Sloan-Kettering Cancer Center	38.1%
330354	Roswell Park Cancer Institute	14.0%
360242	James Cancer Hospital & Solove Research Institute	16.4%
390196	Fox Chase Cancer Center	11.2%

G. Hospital Outpatient Outlier Payments

1. Background

The OPPS provides outlier payments to hospitals to help mitigate the financial risk associated with high-cost and complex procedures, where a very costly service could present a hospital with significant financial loss. As explained in the CY 2015 OPPS/ASC final rule with comment period (79 FR 66832 through 66834), we set our projected target for aggregate outlier payments at 1.0 percent of the estimated aggregate total payments under the OPPS for the prospective year. Outlier payments are provided on a service-by-service basis when the cost of a service exceeds the APC payment amount multiplier threshold (the APC payment amount multiplied by a certain amount) as well as the APC payment amount plus a fixed-dollar amount threshold (the APC payment plus a certain amount of dollars). In CY 2021, the outlier threshold was met when the hospital's cost of furnishing a service exceeded 1.75 times (the multiplier threshold) the APC payment amount and exceeded the APC payment amount plus $5,300 (the fixed-dollar amount threshold) (85 FR 85914 through 85916). If the cost of a service exceeds both the multiplier threshold and the fixed-dollar threshold, the outlier payment is calculated as 50 percent of the amount by which the cost of furnishing the service exceeds 1.75 times the APC payment amount. Beginning with CY 2009 payments, outlier payments are subject to a reconciliation process similar to the IPPS outlier reconciliation process for cost reports, as discussed in the CY 2009 OPPS/ASC final rule with comment period (73 FR 68594 through 68599).

It has been our policy to report the actual amount of outlier payments as a percent of total spending in the claims being used to model the OPPS. Using CY 2019 claims available for this final rule with comment period, we estimate that we paid approximately 0.89 percent of the total aggregated OPPS payments in outliers for CY 2019. Therefore, for CY 2019, we estimate that we paid 0.11 percentage points below the CY 2019 outlier target of 1.0 percent of total aggregated OPPS payments.

For this final rule with comment period, using CY 2019 claims data and CY 2021 payment rates, we estimate that the aggregate outlier payments for CY 2021 would be approximately 1.07 percent of the total CY 2021 OPPS payments. We provide estimated CY 2021 outlier payments for hospitals and CMHCs with claims included in the claims data that we used to model impacts in the Hospital–Specific Impacts—Provider-Specific Data file on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html*.

2. Outlier Calculation for CY 2022

For CY 2022, we proposed to continue our policy of estimating outlier payments to be 1.0 percent of the estimated aggregate total payments under the OPPS. We proposed that a portion of that 1.0 percent, an amount equal to less than 0.01 percent of outlier payments (or 0.0001 percent of total OPPS payments), would be allocated to CMHCs for PHP outlier payments. This is the amount of estimated outlier payments that would result from the proposed CMHC outlier threshold as a proportion of total estimated OPPS outlier payments. We proposed to continue our longstanding policy that if a CMHC's cost for partial hospitalization services, paid under APC 5853 (Partial Hospitalization for CMHCs), exceeds 3.40 times the payment rate for

proposed APC 5853, the outlier payment would be calculated as 50 percent of the amount by which the cost exceeds 3.40 times the proposed APC 5853 payment rate.

For further discussion of CMHC outlier payments, we refer readers to section VIII.C. of the CY 2022 OPPS/ASC proposed rule.

To ensure that the estimated CY 2022 aggregate outlier payments would equal 1.0 percent of estimated aggregate total payments under the OPPS, we proposed that the hospital outlier threshold be set so that outlier payments would be triggered when a hospital's cost of furnishing a service exceeds 1.75 times the APC payment amount and exceeds the APC payment amount plus $6,100.

We calculated the proposed fixed-dollar threshold of $6,100 using the standard methodology most recently used for CY 2021 (85 FR 85914 through 85916). For purposes of estimating outlier payments for the CY 2022 OPPS/ASC proposed rule, we used the hospital-specific overall ancillary CCRs available in the April 2020 update to the Outpatient Provider-Specific File (OPSF). The OPSF contains provider-specific data, such as the most current CCRs, which are maintained by the MACs and used by the OPPS Pricer to pay claims. The claims that we generally use to model each OPPS update lag by 2 years. However, as discussed in section X.E. of the CY 2022 OPPS/ASC proposed rule, we proposed to use CY 2019 claims in establishing the CY 2022 OPPS.

In order to estimate the CY 2022 hospital outlier payments for the proposed rule, we inflated the charges on the CY 2019 claims using the same inflation factor of 1.20469 that we used to estimate the IPPS fixed-loss cost threshold for the FY 2022 IPPS/LTCH PPS proposed rule (86 FR 25718). We used an inflation factor of 1.13218 to estimate CY 2021 charges from the CY 2019 charges reported on CY 2019 claims, applying the charge inflation factor for two years, to estimate CY 2021 hospital outlier payments. The methodology for determining this charge inflation factor is discussed in the FY 2021 IPPS/LTCH PPS final rule (85 FR 59037 through 59040). As we stated in the CY 2005 OPPS final rule with comment period (69 FR 65844 through 65846), we believe that the use of these charge inflation factors is appropriate for the OPPS because, with the exception of the inpatient routine service cost centers, hospitals use the same ancillary and cost centers to capture costs and charges for inpatient and outpatient services.

As noted in the CY 2007 OPPS/ASC final rule with comment period (71 FR 68011), we are concerned that we could systematically overestimate the OPPS hospital outlier threshold if we did not apply a CCR inflation adjustment factor. Therefore, we proposed to apply the same CCR inflation adjustment factor that we proposed to apply for the FY 2022 IPPS outlier calculation to the CCRs used to simulate the proposed CY 2022 OPPS outlier payments to determine the fixed-dollar threshold. Specifically, for CY 2022, we proposed to apply an adjustment factor of 0.94964 (or 0.974495 * 0.974495) to the CCRs that were in the April 2020 OPSF to trend them forward from CY 2020 to CY 2022. We note that we proposed to use the April 2020 OPSF to address concerns regarding the impact of the PHE on data used in OPPS ratesetting, as discussed in section X.E. of the CY 2022 OPPS/ASC proposed rule. The methodology for calculating the proposed adjustment is discussed in the FY 2022 IPPS/LTCH PPS proposed rule (86 FR 25717 through 25719).

To model hospital outlier payments for the CY 2022 OPPS/ASC proposed rule, we applied the overall CCRs from the April 2020 OPSF after adjustment (using the proposed CCR inflation adjustment factor of 0.94964 to approximate CY 2022 CCRs) to charges on CY 2019 claims that were adjusted (using the proposed charge inflation factor of 1.20469 to approximate CY 2022 charges). We note that the additional year in the charge inflation factor and CCR inflation factors is a result of the use of claims and OPSF data from a year earlier than the year that we would typically use in a standard ratesetting cycle. We simulated aggregated CY 2021 hospital outlier payments using these costs for several different fixed-dollar thresholds, holding the 1.75 multiplier threshold constant and assuming that outlier payments would continue to be made at 50 percent of the amount by which the cost of furnishing the service would exceed 1.75 times the APC payment amount, until the total outlier payments equaled 1.0 percent of aggregated estimated total CY 2021 OPPS payments. We estimated that a proposed fixed-dollar threshold of $6,100, combined with the proposed multiplier threshold of 1.75 times the APC payment rate, would allocate 1.0 percent of aggregated total OPPS payments to outlier payments. For CMHCs, we proposed that, if a CMHC's cost for partial hospitalization services, paid under APC 5853, exceeds 3.40 times the payment rate for APC 5853, the outlier payment would be calculated as 50 percent of the amount by which the cost exceeds 3.40 times the APC 5853 payment rate.

Section 1833(t)(17)(A) of the Act, which applies to hospitals, as defined under section 1886(d)(1)(B) of the Act, requires that hospitals that fail to report data required for the quality measures selected by the Secretary, in the form and manner required by the Secretary under section 1833(t)(17)(B) of the Act, incur a 2.0 percentage point reduction to their OPD fee schedule increase factor; that is, the annual payment update factor. The application of a reduced OPD fee schedule increase factor results in reduced national unadjusted payment rates that will apply to certain outpatient items and services furnished by hospitals that are required to report outpatient quality data and that fail to meet the Hospital OQR Program requirements. For hospitals that fail to meet the Hospital OQR Program requirements, we proposed to continue the policy that we implemented in CY 2010 that the hospitals' costs will be compared to the reduced payments for purposes of outlier eligibility and payment calculation. For more information on the Hospital OQR Program, we refer readers to section XIV. of the CY 2022 OPPS/ASC proposed rule.

Comment: One commenter recommended that, in light of the PHE, CMS should not update the OPPS outlier fixed-dollar threshold at a time when hospitals are struggling financially.

Response: We maintain the target outlier percentage of 1.0 percent of estimated aggregate total payments under the OPPS and have a fixed-dollar threshold so that OPPS outlier payments are made only when the hospital would experience a significant loss for furnishing a particular service. We continue to believe that the 1.0 percent OPPS outlier spending target appropriately mitigates the financial risk associated with exceptionally costly or complex cases. In addition, in a budget neutral system any spending for OPPS outliers would require a corresponding reduction to all other OPPS payments, which would have a universal impact on hospitals because every OPPS payment would be reduced. The fixed-dollar outlier threshold is specifically developed in order to best estimate aggregate outlier payments of 1.0 percent of the OPPS and ensure that outlier payments are directed towards the high cost and complex procedures associated with potential financial risk. Failing to update this outlier threshold would systemically underestimate the

amount of OPPS outlier payments and result in OPPS outlier payments in excess of 1.0 percent of aggregate OPPS payments.

After consideration of the public comment we received, we are finalizing our proposal, without modification, to continue our policy of estimating outlier payments to be 1.0 percent of the estimated aggregate total payments under the OPPS and to use our established methodology to set the OPPS outlier fixed-dollar loss threshold for CY 2022.

3. Final Outlier Calculation

Historically, we have used updated data for the outlier fixed-dollar threshold calculation for the final rule. However, as discussed in section X.E. of the CY 2022 OPPS/ASC proposed rule (86 FR 42188 through 42190) claims and other data that we would typically have used as part of our ratesetting process would have been affected by the PHE. As a result, we proposed to use CY 2019 OPPS claims as part of the CY 2022 OPPS ratesetting process. For purposes of estimating the outlier threshold, we are finalizing our proposal to apply the same CCR inflation adjustment factor that we finalized to apply for the FY 2022 IPPS outlier calculation to the CCRs used to simulate the final CY 2022 OPPS outlier payments to determine the fixed-dollar threshold. As discussed in the FY 2022 IPPS/LTCH PPS final rule with comment period (86 FR 45537 through 45543), there are some changes to the typical charge and CCR inflation factors we would use for outlier estimating purposes as a result of the proposed and final policy to use data prior to the PHE. Ordinarily, we would use updated CCRs of the OPSF and apply an adjustment factor to adjust the CCRs from the most recent update of OPSF. However, as discussed previously, we believe the most recent CCRs in the OPSF may be significantly impacted by the PHE. As a result, and similar to the proposed use of CY 2019 claims in CY 2022 OPPS ratesetting more broadly, we proposed to use OPSF CCRs from the April 2020 OPSF for CY 2022 outlier estimation purposes. The claims and OPSF data are not the most updated data available and therefore to properly update them for the prospective year—CY 2022—we needed to apply an additional year of CCRs and charge inflation. For CY 2022, we are applying the overall CCRs from the April 2020 OPSF file (using the CCR inflation adjustment factor of 0.94964 to approximate CY 2021 CCRs) to charges on CY 2019 claims that were adjusted using a charge inflation factor of 1.20469 to approximate CY 2022 charges. These are the same CCR adjustment and charge inflation factors that were used to set the IPPS fixed-loss cost threshold for the FY 2022 IPPS/LTCH PPS final rule (86 FR 45537 through 45543). We simulate aggregate CY 2022 hospital outlier payments using these costs for several different fixed-dollar thresholds, holding the 1.75 multiple-threshold constant and assuming that outlier payments will continue to be made at 50 percent of the amount by which the cost of furnishing the service would exceed 1.75 times the APC payment amount, until total outlier payments equal 1.0 percent of aggregated estimated total CY 2022 OPPS payments. We estimate that a fixed-dollar amount threshold of $6,175 combined with the multiplier threshold of 1.75 times the APC payment rate, will allocate the 1.0 percent of aggregated total OPPS payments to outlier payments. For CY 2022, we are finalizing a multiplier threshold of 1.75 times the APC payment rate and a fixed-dollar amount threshold of $6,175.

For CMHCs, if a CMHC's cost for partial hospitalization services, paid under APC 5853, exceeds 3.40 times the payment rate the outlier payment will be calculated as 50 percent of the amount by which the cost exceeds 3.40 times APC 5853.

H. Calculation of an Adjusted Medicare Payment From the National Unadjusted Medicare Payment

The basic methodology for determining prospective payment rates for HOPD services under the OPPS is set forth in existing regulations at 42 CFR part 419, subparts C and D. For this final rule with comment period, the payment rate for most services and procedures for which payment is made under the OPPS is the product of the conversion factor calculated in accordance with section II.B. of this final rule with comment period and the relative payment weight determined under section II.A. of this final rule with comment period. Therefore, the national unadjusted payment rate for most APCs contained in Addendum A to this final rule with comment period (which is available via the internet on the CMS website) and for most HCPCS codes to which separate payment under the OPPS has been assigned in Addendum B to this final rule with comment period (which is available via the internet on the CMS website) was calculated by multiplying the final CY 2022 scaled weight for the APC by the CY 2022 conversion factor.

We note that section 1833(t)(17) of the Act, which applies to hospitals, as defined under section 1886(d)(1)(B) of the Act, requires that hospitals that fail to submit data required to be submitted on quality measures selected by the Secretary, in the form and manner and at a time specified by the Secretary, incur a reduction of 2.0 percentage points to their OPD fee schedule increase factor, that is, the annual payment update factor. The application of a reduced OPD fee schedule increase factor results in reduced national unadjusted payment rates that apply to certain outpatient items and services provided by hospitals that are required to report outpatient quality data and that fail to meet the Hospital OQR Program (formerly referred to as the Hospital Outpatient Quality Data Reporting Program (HOP QDRP)) requirements. For further discussion of the payment reduction for hospitals that fail to meet the requirements of the Hospital OQR Program, we refer readers to section XIV. of this final rule with comment period.

We demonstrate the steps used to determine the APC payments that will be made in a CY under the OPPS to a hospital that fulfills the Hospital OQR Program requirements and to a hospital that fails to meet the Hospital OQR Program requirements for a service that has any of the following status indicator assignments: ''J1'', ''J2'', ''P'', ''Q1'', ''Q2'', ''Q3'', ''Q4'', ''R'', ''S'', ''T'', ''U'', or ''V'' (as defined in Addendum D1 to the proposed rule, which is available via the internet on the CMS website), in a circumstance in which the multiple procedure discount does not apply, the procedure is not bilateral, and conditionally packaged services (status indicator of ''Q1'' and ''Q2'') qualify for separate payment. We note that, although blood and blood products with status indicator ''R'' and brachytherapy sources with status indicator ''U'' are not subject to wage adjustment, they are subject to reduced payments when a hospital fails to meet the Hospital OQR Program requirements.

Individual providers interested in calculating the payment amount that they will receive for a specific service from the national unadjusted payment rates presented in Addenda A and B to the proposed rule (which are available via the internet on the CMS website) should follow the formulas presented in the following steps. For purposes of the payment calculations below, we refer to the national unadjusted payment rate for hospitals that meet the requirements of the Hospital OQR Program as the ''full'' national unadjusted payment rate. We refer to the national unadjusted payment rate for hospitals that fail to meet the requirements of the Hospital OQR Program as the ''reduced'' national unadjusted payment rate. The reduced

national unadjusted payment rate is calculated by multiplying the reporting ratio of 0.9804 times the ''full'' national unadjusted payment rate. The national unadjusted payment rate used in the calculations below is either the full national unadjusted payment rate or the reduced national unadjusted payment rate, depending on whether the hospital met its Hospital OQR Program requirements to receive the full CY 2022 OPPS fee schedule increase factor.

Step 1. Calculate 60 percent (the labor-related portion) of the national unadjusted payment rate. Since the initial implementation of the OPPS, we have used 60 percent to represent our estimate of that portion of costs attributable, on average, to labor. We refer readers to the April 7, 2000 OPPS final rule with comment period (65 FR 18496 through 18497) for a detailed discussion of how we derived this percentage. During our regression analysis for the payment adjustment for rural hospitals in the CY 2006 OPPS final rule with comment period (70 FR 68553), we confirmed that this labor-related share for hospital outpatient services is appropriate.

The formula below is a mathematical representation of Step 1 and identifies the labor-related portion of a specific payment rate for a specific service.

X is the labor-related portion of the national unadjusted payment rate.

X = .60 * (national unadjusted payment rate).

Step 2. Determine the wage index area in which the hospital is located and identify the wage index level that applies to the specific hospital. The wage index values assigned to each area would reflect the geographic statistical areas (which are based upon OMB standards) to which hospitals are assigned for FY 2022 under the IPPS, reclassifications through the Medicare Geographic Classification Review Board (MGCRB), section 1886(d)(8)(B) ''Lugar'' hospitals, and reclassifications under section 1886(d)(8)(E) of the Act, as implemented in § 412.103 of the regulations. We are continuing to apply for the CY 2022 OPPS wage index any adjustments for the FY 2022 IPPS post-reclassified wage index, including, but not limited to, the rural floor adjustment, a wage index floor of 1.00 in frontier states, in accordance with section 10324 of the Affordable Care Act of 2010, and an adjustment to the wage index for certain low wage index hospitals. For further discussion of the wage index we are applying for the CY 2022 OPPS, we refer readers to section II.C. of this final rule with comment period.

Step 3. Adjust the wage index of hospitals located in certain qualifying counties that have a relatively high percentage of hospital employees who reside in the county, but who work in a different county with a higher wage index, in accordance with section 505 of Pub. L. 108–173. Addendum L to this final rule with comment period (which is available via the internet on the CMS website) contains the qualifying counties and the associated wage index increase developed for the final FY 2022 IPPS wage index, which are listed in Table 2 associated with the FY 2022 IPPS/LTCH PPS final rule and available via the internet on the CMS website at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html.* (Click on the link on the left side of the screen titled ''FY 2022 IPPS Final Rule Home Page'' and select ''FY 2022 Final Rule Tables.'') This step is to be followed only if the hospital is not reclassified or redesignated under section 1886(d)(8) or section 1886(d)(10) of the Act.

Step 4. Multiply the applicable wage index determined under Steps 2 and 3 by the amount determined under Step 1 that represents the labor-related portion of the national unadjusted payment rate.

The formula below is a mathematical representation of Step 4 and adjusts the labor-related portion of the national unadjusted payment rate for the specific service by the wage index.

X_a is the labor-related portion of the national unadjusted payment rate (wage adjusted).

X_a = .60 * (national unadjusted payment rate) * applicable wage index.

Step 5. Calculate 40 percent (the nonlabor-related portion) of the national unadjusted payment rate and add that amount to the resulting product of Step 4. The result is the wage index adjusted payment rate for the relevant wage index area.

The formula below is a mathematical representation of Step 5 and calculates the remaining portion of the national payment rate, the amount not attributable to labor, and the adjusted payment for the specific service.

Y is the nonlabor-related portion of the national unadjusted payment rate.

Y = .40 * (national unadjusted payment rate).

Adjusted Medicare Payment = $Y + X_a$.

Step 6. If a provider is an SCH, as set forth in the regulations at § 412.92, or an EACH, which is considered to be an SCH under section 1886(d)(5)(D)(iii)(III) of the Act, and located in a rural area, as defined in § 412.64(b), or is treated as being located in a rural area under § 412.103, multiply the wage index adjusted payment rate by 1.071 to calculate the total payment.

The formula below is a mathematical representation of Step 6 and applies the rural adjustment for rural SCHs.

Adjusted Medicare Payment (SCH or EACH) = Adjusted Medicare Payment * 1.071.

We are providing examples below of the calculation of both the full and reduced national unadjusted payment rates that will apply to certain outpatient items and services performed by hospitals that meet and that fail to meet the Hospital OQR Program requirements, using the steps outlined previously. For purposes of this example, we are using a provider that is located in Brooklyn, New York that is assigned to CBSA 35614. This provider bills one service that is assigned to APC 5071 (Level 1 Excision/Biopsy/Incision and Drainage). The CY 2022 full national unadjusted payment rate for APC 5071 is $635.54. The proposed reduced national unadjusted payment rate for APC 5071 for a hospital that fails to meet the Hospital OQR Program requirements is $623.08. This proposed reduced rate is calculated by multiplying the reporting ratio of 0.9804 by the full unadjusted payment rate for APC 5071.

The FY 2022 wage index for a provider located in CBSA 35614 in New York, which includes the proposed adoption of IPPS 2022 wage index policies, is 1.3427. The labor-related portion of the proposed full national unadjusted payment is approximately $512.00 (.60 * $635.54 * 1.3427). The labor-related portion of the proposed reduced national unadjusted payment is approximately $501.97 (.60 * $623.08 * 1.3427). The nonlabor-related portion of the proposed full national unadjusted payment is approximately $254.22 (.40 * $635.54). The nonlabor-related portion of the proposed reduced national unadjusted payment is approximately $249.23 (.40 * $623.08). The sum of the labor-related and nonlabor-related portions of the proposed full national adjusted payment is approximately $766.22 ($512.00 + $254.22). The sum of the portions of the proposed reduced national adjusted payment is approximately $751.20 ($501.97 + $249.23).

We did not receive any public comments on these steps under the methodology that we included in the proposed rule to determine the APC payments for CY 2022. Therefore, we are using the steps in the methodology specified above, as we proposed, to demonstrate the calculation of the final

CY 2021 OPPS payments using the same parameters.

I. Beneficiary Copayments

1. Background

Section 1833(t)(3)(B) of the Act requires the Secretary to set rules for determining the unadjusted copayment amounts to be paid by beneficiaries for covered OPD services. Section 1833(t)(8)(C)(ii) of the Act specifies that the Secretary must reduce the national unadjusted copayment amount for a covered OPD service (or group of such services) furnished in a year in a manner so that the effective copayment rate (determined on a national unadjusted basis) for that service in the year does not exceed a specified percentage. As specified in section 1833(t)(8)(C)(ii)(V) of the Act, the effective copayment rate for a covered OPD service paid under the OPPS in CY 2006, and in CYs thereafter, shall not exceed 40 percent of the APC payment rate.

Section 1833(t)(3)(B)(ii) of the Act provides that, for a covered OPD service (or group of such services) furnished in a year, the national unadjusted copayment amount cannot be less than 20 percent of the OPD fee schedule amount. However, section 1833(t)(8)(C)(i) of the Act limits the amount of beneficiary copayment that may be collected for a procedure (including items such as drugs and biologicals) performed in a year to the amount of the inpatient hospital deductible for that year.

Section 4104 of the Affordable Care Act eliminated the Medicare Part B coinsurance for preventive services furnished on and after January 1, 2011, that meet certain requirements, including flexible sigmoidoscopies and screening colonoscopies, and waived the Part B deductible for screening colonoscopies that become diagnostic during the procedure. For a discussion of the changes made by the Affordable Care Act with regard to copayments for preventive services furnished on and after January 1, 2011 we refer readers to section XII.B. of the CY 2011 OPPS/ASC final rule with comment period (75 FR 72013).

2. OPPS Copayment Policy

For CY 2022, we proposed to determine copayment amounts for new and revised APCs using the same methodology that we implemented beginning in CY 2004. (We refer readers to the November 7, 2003 OPPS final rule with comment period (68 FR 63458).) In addition, we proposed to use the same standard rounding principles that we have historically used in instances where the application of our standard copayment methodology would result in a copayment amount that is less than 20 percent and cannot be rounded, under standard rounding principles, to 20 percent. (We refer readers to the CY 2008 OPPS/ASC final rule with comment period (72 FR 66687) in which we discuss our rationale for applying these rounding principles.) The proposed national unadjusted copayment amounts for services payable under the OPPS that would be effective January 1, 2022 are included in Addenda A and B to the proposed rule (which are available via the internet on the CMS website).

As discussed in section XIV.E. of the CY 2022 OPPS/ASC proposed rule and this final rule with comment period, for CY 2022, the Medicare beneficiary's minimum unadjusted copayment and national unadjusted copayment for a service to which a reduced national unadjusted payment rate applies will equal the product of the reporting ratio and the national unadjusted copayment, or the product of the reporting ratio and the minimum unadjusted copayment, respectively, for the service.

We note that OPPS copayments may increase or decrease each year based on changes in the calculated APC payment rates, due to updated cost report and claims data, and any changes to the OPPS cost modeling process. However, as described in the CY 2004 OPPS final rule with comment period, the development of the copayment methodology generally moves beneficiary copayments closer to 20 percent of OPPS APC payments (68 FR 63458 through 63459).

In the CY 2004 OPPS final rule with comment period (68 FR 63459), we adopted a new methodology to calculate unadjusted copayment amounts in situations including reorganizing APCs, and we finalized the following rules to determine copayment amounts in CY 2004 and subsequent years.

- When an APC group consists solely of HCPCS codes that were not paid under the OPPS the prior year because they were packaged or excluded or are new codes, the unadjusted copayment amount would be 20 percent of the APC payment rate.
- If a new APC that did not exist during the prior year is created and consists of HCPCS codes previously assigned to other APCs, the copayment amount is calculated as the product of the APC payment rate and the lowest coinsurance percentage of the codes comprising the new APC.
- If no codes are added to or removed from an APC and, after recalibration of its relative payment weight, the new payment rate is equal to or *greater than* the prior year's rate, the copayment amount remains constant (unless the resulting coinsurance percentage is less than 20 percent).
- If no codes are added to or removed from an APC and, after recalibration of its relative payment weight, the new payment rate is *less than* the prior year's rate, the copayment amount is calculated as the product of the new payment rate and the prior year's coinsurance percentage.
- If HCPCS codes are added to or deleted from an APC and, after recalibrating its relative payment weight, holding its unadjusted copayment amount constant results in a decrease in the coinsurance percentage for the reconfigured APC, the copayment amount would not change (unless retaining the copayment amount would result in a coinsurance rate less than 20 percent).
- If HCPCS codes are added to an APC and, after recalibrating its relative payment weight, holding its unadjusted copayment amount constant results in an increase in the coinsurance percentage for the reconfigured APC, the copayment amount would be calculated as the product of the payment rate of the reconfigured APC and the lowest coinsurance percentage of the codes being added to the reconfigured APC.

We noted in the CY 2004 OPPS final rule with comment period that we would seek to lower the copayment percentage for a service in an APC from the prior year if the copayment percentage was greater than 20 percent. We noted that this principle was consistent with section 1833(t)(8)(C)(ii) of the Act, which accelerates the reduction in the national unadjusted coinsurance rate so that beneficiary liability will eventually equal 20 percent of the OPPS payment rate for all OPPS services to which a copayment applies, and with section 1833(t)(3)(B) of the Act, which achieves a 20-percent copayment percentage when fully phased in and gives the Secretary the authority to set rules for determining copayment amounts for new services. We further noted that the use of this methodology would, in general, reduce the beneficiary coinsurance rate and copayment amount for APCs for which the payment rate changes as the result of the reconfiguration of APCs and/or recalibration of relative payment weights (68 FR 63459).

Section 122 of the Consolidated Appropriations Act (CAA) of 2021 (Pub. L. 116–260), Waiving Medicare Coinsurance for Certain Colorectal Cancer Screening Tests, amends section

1833(a) of the Act to offer a special coinsurance rule for screening flexible sigmoidoscopies and screening colonoscopies, regardless of the code that is billed for the establishment of a diagnosis as a result of the test, or for the removal of tissue or other matter or other procedure, that is furnished in connection with, as a result of, and in the same clinical encounter as the colorectal cancer screening test. We refer readers to section X.B., ''Changes to Beneficiary Coinsurance for Certain Colorectal Cancer Screening Tests'' of this final rule with comment period for the full discussion of this policy.

Comment: One commenter requested that CMS waive the patient coinsurance and deductible for Biomechanical Computed Tomography (BCT) analysis, CPT 0554T to 0558T under the Medicare preventive services benefit 42 CFR 410.152(l)(6). The commenter stated that these codes are considered preventive services for diagnostic screening of osteoporosis and that Change Request (CR) 11392 directed contractors to apply the same rules applied to CPT code 77078 (Computed tomography, bone mineral density study, 1 or more sites, axial skeleton (for example, hips, pelvis, spine)) to these BCT codes.

Response: We disagree with the commenter that the BCT codes are not subject to coinsurance and the Part B deductible at this time. The service described by CPT code 77078 meets the National Coverage Determination (NCD) process for preventive services coverage and subject to its coinsurance and deductible waiver. However, the USPSTF has not changed its current recommendation for bone measurement testing (available here: *https://www.uspreventiveservicestaskforce.org/uspstf/recommendation/osteoporosis-screening#fullrecommendationstart*) since 2018. These new BCT codes became effective July 1, 2019, and the services described by these codes are not specifically included in the USPSTF grade B recommendation. Therefore, they do not meet requirements to have beneficiary coinsurance and deductible waived. We note that CMS may add preventive services coverage through the National Coverage Determination (NCD) process if the service meets all of the following criteria: Reasonable and necessary for prevention or early detection of illness or disability, USPSTF recommended with grade A or B, and appropriate for individuals entitled to benefits under Part A or enrolled under Medicare Part B. In the event that the USPSTF updates its recommendation for bone measurement testing to specifically include these services described by the new BCT codes, CMS would reevaluate whether to apply the coinsurance and deductible waiver.

3. Calculation of an Adjusted Copayment Amount for an APC Group

Individuals interested in calculating the national copayment liability for a Medicare beneficiary for a given service provided by a hospital that met or failed to meet its Hospital OQR Program requirements should follow the formulas presented in the following steps.

Step 1. Calculate the beneficiary payment percentage for the APC by dividing the APC's national unadjusted copayment by its payment rate. For example, using APC 5071, $127.11 is approximately 20 percent of the full national unadjusted payment rate of $635.54. For APCs with only a minimum unadjusted copayment in Addenda A and B to the CY 2022 OPPS/ASC proposed rule (which are available via the internet on the CMS website), the beneficiary payment percentage is 20 percent.

The formula below is a mathematical representation of Step 1 and calculates the national copayment as a percentage of national payment for a given service.

B is the beneficiary payment percentage.

B = National unadjusted copayment for APC/national unadjusted payment rate for APC.

Step 2. Calculate the appropriate wage-adjusted payment rate for the APC for the provider in question, as indicated in Steps 2 through 4 under section II.H. of the CY 2022 OPPS/ASC proposed rule. Calculate the rural adjustment for eligible providers, as indicated in Step 6 under section II.H. of the CY 2022 OPPS/ASC proposed rule.

Step 3. Multiply the percentage calculated in Step 1 by the payment rate calculated in Step 2. The result is the wage-adjusted copayment amount for the APC.

The formula below is a mathematical representation of Step 3 and applies the beneficiary payment percentage to the adjusted payment rate for a service calculated under section II.H. of this final rule with comment period, with and without the rural adjustment, to calculate the adjusted beneficiary copayment for a given service.

Wage-adjusted copayment amount for the APC = Adjusted Medicare Payment * *B.*

Wage-adjusted copayment amount for the APC (SCH or EACH) = (Adjusted Medicare Payment * 1.071) * *B.*

Step 4. For a hospital that failed to meet its Hospital OQR Program requirements, multiply the copayment calculated in Step 3 by the reporting ratio of 0.9804.

The unadjusted copayments for services payable under the OPPS that will be effective January 1, 2022 are shown in Addenda A and B to this final rule with comment period (which are available via the internet on the CMS website). We note that the national unadjusted payment rates and copayment rates shown in Addenda A and B to this final rule with comment period reflect the CY 2022 OPD fee schedule increase factor discussed in section II.B. of this final rule with comment period.

In addition, as noted earlier, section 1833(t)(8)(C)(i) of the Act limits the amount of beneficiary copayment that may be collected for a procedure performed in a year to the amount of the inpatient hospital deductible for that year.

III. OPPS Ambulatory Payment Classification (APC) Group Policies

A. OPPS Treatment of New and Revised HCPCS Codes

Payments for OPPS procedures, services, and items are generally based on medical billing codes, specifically, HCPCS codes, that are reported on HOPD claims. The HCPCS is divided into two principal subsystems, referred to as Level I and Level II of the HCPCS. Level I is comprised of CPT (Current Procedural Terminology) codes, a numeric and alphanumeric coding system maintained by the American Medical Association (AMA), and consists of Category I, II, and III CPT codes. Level II, which is maintained by CMS, is a standardized coding system that is used primarily to identify products, supplies, and services not included in the CPT codes. HCPCS codes are used to report surgical procedures, medical services, items, and supplies under the hospital OPPS. Specifically, CMS recognizes the following codes on OPPS claims:

- Category I CPT codes, which describe surgical procedures, diagnostic and therapeutic services, and vaccine codes;
- Category III CPT codes, which describe new and emerging technologies, services, and procedures; and
- Level II HCPCS codes (also known as alphanumeric codes), which are used primarily to identify drugs, devices, ambulance services, durable medical equipment, orthotics, prosthetics, supplies, temporary surgical

procedures, and medical services not described by CPT codes.

CPT codes are established by the AMA and the Level II HCPCS codes are established by the CMS HCPCS Workgroup. These codes are updated and changed throughout the year. CPT and Level II HCPCS code changes that affect the OPPS are published through the annual rulemaking cycle and through the OPPS quarterly update Change Requests (CRs). Generally, these code changes are effective January 1, April 1, July 1, or October 1. CPT code changes are released by the AMA (via their website) while Level II HCPCS code changes are released to the public via the CMS HCPCS website. CMS recognizes the release of new CPT and Level II HCPCS codes and makes the codes effective (that is, the codes can be reported on Medicare claims) outside of the formal rulemaking process via OPPS quarterly update CRs. Based on our review, we assign the new codes to interim status indicators (SIs) and APCs. These interim assignments are finalized in the OPPS/ASC final rules. This quarterly process offers hospitals access to codes that more accurately describe the items or services furnished and provides payment for these items or services in a timelier manner than if we waited for the annual rulemaking process. We solicit public comments on the new CPT and Level II HCPCS codes, status indicators, and APC assignments through our annual rulemaking process.

We note that, under the OPPS, the APC assignment determines the payment rate for an item, procedure, or service. Those items, procedures, or services not exclusively paid separately under the hospital OPPS are assigned to appropriate status indicators. Certain payment status indicators provide separate payment while other payment status indicators do not. In section XI. ''CY 2022 OPPS Payment Status and Comment Indicators'' of this final rule with comment period, we discuss the various status indicators used under the OPPS. We also provide a complete list of status indicators and their definitions in Addendum D1 to this final rule with comment period.

1. HCPCS Codes That Were Effective April 1, 2021 for Which We Solicited Public Comments in the CY 2022 OPPS/ASC Proposed Rule

For the April 2021 update, 26 new HCPCS codes were established and made effective on April 1, 2021. These codes and their long descriptors were included in Table 5 of the proposed rule and are now listed in Table 7 of this final rule with comment period. Through the April 2021 OPPS quarterly update CR (Transmittal 10666, Change Request 12175, dated March 8, 2021), we recognized several new HCPCS codes for separate payment under the OPPS. In the CY 2022 OPPS/ASC proposed rule, we solicited public comments on the proposed APC and status indicator assignments for the codes which were listed in Table 5 of this CY 2022 OPPS/ASC proposed rule with comment period.

We did not receive any public comments on the proposed OPPS APC and SI assignments for the new Level II HCPCS codes implemented in April 2021. Therefore, we are finalizing the proposed APC and SI assignments for these codes, as indicated in Table 7.

The status indicator, APC assignment, and payment rate for each HCPCS code can be found in Addendum B to this final rule with comment period. In addition, the complete list of status indicators and corresponding definitions used under the OPPS can be found in Addendum D1 to this final rule with comment period. These new codes that were effective April 1, 2021 were assigned to comment indicator ''NP'' in Addendum B to the CY 2022 OPPS/ASC proposed rule to indicate that the codes were assigned to an interim APC assignment and that comments would be accepted on their interim APC assignments. Also, the complete list of comment indicators and definitions used under the OPPS can be found in Addendum D2 to this final rule with comment period. We note that OPPS Addendum B, Addendum D1, and Addendum D2 are available via the internet on the CMS website.

BILLING CODE 4120–01–P

TABLE 7: NEW HCPCS CODES EFFECTIVE APRIL 1, 2021

CY 2021 HCPCS Code	CY 2022 HCPCS Code	CY 2022 Long Descriptor	Final CY 2022 SI	Final CY 2022 APC
A9592	A9592	Copper cu-64, dotatate, diagnostic, 1 millicurie	G	9383
C9074	J0224	Injection, lumasiran, 0.5 mg	G	9407
C9776	C9776	Intraoperative near-infrared fluorescence imaging of major extra-hepatic bile duct(s) (e.g., cystic duct, common bile duct and common hepatic duct) with intravenous administration of indocyanine green (icg) (list separately in addition to code for primary procedure)	N	N/A
C9777	C9777*	Esophageal mucosal integrity testing by electrical impedance, transoral, includes esophagoscopy or esophagogastroduodenoscopy	J1	5303
G2020	G2020	Services for high intensity clinical services associated with the initial engagement and outreach of beneficiaries assigned to the sip component of the pcf model (do not bill with chronic care management codes)	A	N/A
G2172	G2172	All inclusive payment for services related to highly coordinated and integrated opioid use disorder (oud) treatment services furnished for the demonstration project	A	N/A
J1427	J1427	Injection, viltolarsen, 10 mg	G	9386
J1554	J1554	Injection, immune globulin (asceniv), 500 mg	G	9392
J7402	J7402	Mometasone furoate sinus implant, (sinuva), 10 micrograms	G	9346
J9037	J9037	Injection, belantamab mafodontin-blmf, 0.5 mg	G	9384
J9349	J9349	Injection, tafasitamab-cxix, 2 mg	G	9385
K1013	K1013	Enema tube, any type, replacement only, each	Y	N/A
K1014	K1014	Addition, endoskeletal knee-shin system, 4 bar linkage or multiaxial, fluid swing and stance phase control	Y	N/A
K1015	K1015	Foot, adductus positioning device, adjustable	Y	N/A
K1016	K1016	Transcutaneous electrical nerve stimulator for electrical stimulation of the trigeminal nerve	Y	N/A
K1017	K1017	Monthly supplies for use of device coded at K1016	Y	N/A

CY 2021 HCPCS Code	CY 2022 HCPCS Code	CY 2022 Long Descriptor	Final CY 2022 SI	Final CY 2022 APC
K1018	K1018	External upper limb tremor stimulator of the peripheral nerves of the wrist	Y	N/A
K1019	K1019	Monthly supplies for use of device coded at K1018	Y	N/A
K1020	K1020	Non-invasive vagus nerve stimulator	Y	N/A
Q2053	Q2053	Brexucabtagene autoleucel, up to 200 million autologous anti-cd19 car positive viable t cells, including leukapheresis and dose preparation procedures, per therapeutic dose	G	9391
0242U	0242U	Targeted genomic sequence analysis panel, solid organ neoplasm, cell-free circulating DNA analysis of 55-74 genes, interrogation for sequence variants, gene copy number amplifications, and gene rearrangements	A	N/A
0243U	0243U	Obstetrics (preeclampsia), biochemical assay of placental-growth factor, time-resolved fluorescence immunoassay, maternal serum, predictive algorithm reported as a risk score for preeclampsia	Q4	N/A
0244U	0244U	Oncology (solid organ), DNA, comprehensive genomic profiling, 257 genes, interrogation for single-nucleotide variants, insertions/deletions, copy number alterations, gene rearrangements, tumor-mutational burden and microsatellite instability, utilizing formalin-fixed paraffin embedded tumor tissue	A	N/A
0245U	0245U	Oncology (thyroid), mutation analysis of 10 genes and 37 RNA fusions and expression of 4 mRNA markers using next-generation sequencing, fine needle aspirate, report includes associated risk of malignancy expressed as a percentage	A	N/A
0246U	0246U	Red blood cell antigen typing, DNA, genotyping of at least 16 blood groups with phenotype prediction of at least 51 red blood cell antigens	A	N/A
0247U	0247U	Obstetrics (preterm birth), insulin-like growth factor–binding protein 4 (IBP4), sex hormone–binding globulin (SHBG), quantitative measurement by LC-MS/MS, utilizing maternal	Q4	N/A

CY 2021 HCPCS Code	CY 2022 HCPCS Code	CY 2022 Long Descriptor	Final CY 2022 SI	Final CY 2022 APC
		serum, combined with clinical data, reported as predictive-risk stratification for spontaneous		

*Effective January 1, 2022, the descriptor for HCPCS code C9777 has been revised to "Esophageal mucosal integrity testing by electrical impedance, transoral, includes esophagoscopy or esophagogastroduodenoscopy" to describe the service associated with performing both a MiVu test and an esophagoscopy or esophagogastroduodenoscopy test. When performed together, HOPDs should report only HCPCS code C9777 and not report a separate HCPCS code for the esophagoscopy or esophagogastroduodenoscopy.

2. HCPCS Codes That Were Effective July 1, 2021 for Which We Solicited Public Comments in the CY 2022 OPPS/ASC Proposed Rule

For the July 2021 update, 55 new codes were established and made effective July 1, 2021. The codes and long descriptors were listed in Table 6 of the proposed rule and are now also listed in Table 8 of this final rule with comment period. Through the July 2021 OPPS quarterly update CR (Transmittal 10825, Change Request 12316, dated June 11, 2021), we recognized several new codes for separate payment and assigned them to appropriate interim OPPS status indicators and APCs. In the CY 2022 OPPS/ASC proposed rule, we solicited public comments on the proposed APC and status indicator assignments for the codes implemented on July 1, 2021, all of which are listed in Table 8.

We did not receive any public comments on the proposed OPPS APC and SI assignments for the new Level II HCPCS codes implemented in July 2021 and we are finalizing the proposed APC and SI assignments for these codes, as indicated in Table 8. We note that several of the HCPCS C-codes have been replaced with HCPCS J-codes, effective October 1, 2021. Their replacement codes are listed in Table 8. The final payment rates for these codes can be found in Addendum B to this final rule with comment period.

The status indicator, APC assignment, and payment rate for each HCPCS code can be found in Addendum B to this final rule with comment period. The complete list of status indicators and corresponding definitions used under the OPPS can be found in Addendum D1 to this final rule with comment period. These new codes that were effective July 1, 2021 were assigned to comment indicator ''NP'' in Addendum B to the CY 2022 OPPS/ASC proposed rule to indicate that the codes were assigned to an interim APC assignment and that comments would be accepted on their interim APC assignments. Also, the complete list of comment indicators and definitions used under the OPPS can be found in Addendum D2 to this final rule with comment period. We note that OPPS Addendum B, Addendum D1, and Addendum D2 are available via the internet on the CMS website.

TABLE 8: NEW HCPCS CODES EFFECTIVE JULY 1, 2021

CY 2021 HCPCS Code	CY 2022 HCPCS Code	CY 2022 Long Descriptor	Final CY 2022 SI	Final CY 2022 APC
A9593	A9593	Gallium ga-68 psma-11, diagnostic, (ucsf), 1 millicurie	G	9409
A9594	A9594	Gallium ga-68 psma-11, diagnostic, (ucla), 1 millicurie	G	9410
C1761	C1761	Catheter, transluminal intravascular lithotripsy, coronary	H	2033
C9075	J1426	Injection, casimersen, 10 mg	G	9412
C9076	Q2054	Lisocabtagene maraleucel, up to 110 million autologous anti-cd19 car-positive viable t cells, including leukapheresis and dose preparation procedures, per therapeutic dose	G	9413
C9077	J0741	Injection, cabotegravir and rilpivirine, 2mg/3mg	G	9414
C9078	J1448	Injection, trilaciclib, 1 mg	G	9415
C9079	J1305	Injection, evinacumab-dgnb, 5 mg	G	9416
C9080	J9247	Injection, melphalan flufenamide, 1mg	G	9417
C9778	C9778	Colpopexy, vaginal; minimally invasive extra-peritoneal approach (sacrospinous)	J1	5414
G0327	G0327	Colorectal cancer screening; blood-based biomarker	A	N/A
J0224	J0224	Injection, lumasiran, 0.5 mg	G	9407
J1951	J1951	Injection, leuprolide acetate for depot suspension (fensolvi), 0.25 mg	K	9419
J7168	J7168	Prothrombin complex concentrate (human), kcentra, per i.u. of factor ix activity	K	9132
J9348	J9348	Injection, naxitamab-gqgk, 1 mg	G	9408

CY 2021 HCPCS Code	CY 2022 HCPCS Code	CY 2022 Long Descriptor	Final CY 2022 SI	Final CY 2022 APC
J9353	J9353	Injection, margetuximab-cmkb, 5 mg	G	9418
Q5123	Q5123	Injection, rituximab-arrx, biosimilar, (riabni), 10 mg	G	9411
0640T	0640T	Noncontact near-infrared spectroscopy studies of flap or wound (eg, for measurement of deoxyhemoglobin, oxyhemoglobin, and ratio of tissue oxygenation [StO2]); image acquisition, interpretation and report, each flap or wound	M	N/A
0641T	0641T	Noncontact near-infrared spectroscopy studies of flap or wound (eg, for measurement of deoxyhemoglobin, oxyhemoglobin, and ratio of tissue oxygenation [StO2]); image acquisition only, each flap or wound	T	5732
0642T	0642T	Noncontact near-infrared spectroscopy studies of flap or wound (eg, for measurement of deoxyhemoglobin, oxyhemoglobin, and ratio of tissue oxygenation [StO2]); interpretation and report only, each flap or wound	M	N/A
0643T	0643T	Transcatheter left ventricular restoration device implantation including right and left heart catheterization and left ventriculography when performed, arterial approach	C	N/A
0644T	0644T	Transcatheter removal or debulking of intracardiac mass (eg, vegetations, thrombus) via suction (eg, vacuum, aspiration) device, percutaneous approach, with intraoperative reinfusion of aspirated blood, including imaging guidance, when performed	J1	5192
0645T	0645T	Transcatheter implantation of coronary sinus reduction device including vascular access and closure, right heart catheterization, venous angiography, coronary sinus angiography, imaging guidance, and supervision and interpretation, when performed	E1	N/A
0646T	0646T	Transcatheter tricuspid valve implantation/replacement (TTVI) with prosthetic valve, percutaneous approach, including right heart catheterization, temporary pacemaker insertion, and selective right ventricular or right atrial angiography, when performed	E1	N/A
0647T	0647T	Insertion of gastrostomy tube, percutaneous, with magnetic gastropexy, under ultrasound guidance, image documentation and report	J1	5302
0648T	0648T	Quantitative magnetic resonance for analysis of tissue composition (eg, fat, iron, water content),	S	5523

CY 2021 HCPCS Code	CY 2022 HCPCS Code	CY 2022 Long Descriptor	Final CY 2022 SI	Final CY 2022 APC
		including multiparametric data acquisition, data preparation and transmission, interpretation and report, obtained without diagnostic MRI examination of the same anatomy (eg, organ, gland, tissue, target structure) during the same session		
0649T	0649T	Quantitative magnetic resonance for analysis of tissue composition (eg, fat, iron, water content), including multiparametric data acquisition, data preparation and transmission, interpretation and report, obtained with diagnostic MRI examination of the same anatomy (eg, organ, gland, tissue, target structure) (List separately in addition to code for primary procedure)	N	N/A
0650T	0650T	Programming device evaluation (remote) of subcutaneous cardiac rhythm monitor system, with iterative adjustment of the implantable device to test the function of the device and select optimal permanently programmed values with analysis, review and report by a physician or other qualified health care professional	Q1	5741
0651T	0651T	Magnetically controlled capsule endoscopy, esophagus through stomach, including intraprocedural positioning of capsule, with interpretation and report	T	5301
0652T	0652T	Esophagogastroduodenoscopy, flexible, transnasal; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)	T	5301
0653T	0653T	Esophagogastroduodenoscopy, flexible, transnasal; with biopsy, single or multiple	T	5301
0654T	0654T	Esophagogastroduodenoscopy, flexible, transnasal; with insertion of intraluminal tube or catheter	J1	5302
0655T	0655T	Transperineal focal laser ablation of malignant prostate tissue, including transrectal imaging guidance, with MR-fused images or other enhanced ultrasound imaging	J1	5374
0656T	0656T	Vertebral body tethering, anterior; up to 7 vertebral segments	C	N/A
0657T	0657T	Vertebral body tethering, anterior; 8 or more vertebral segments	C	N/A
0658T	0658T	Electrical impedance spectroscopy of 1 or more skin lesions for automated melanoma risk score	S	5733
0659T	0659T	Transcatheter intracoronary infusion of supersaturated oxygen in conjunction with	C	N/A

		includes laser capture microdissection, with algorithmic analysis and interpretative report		
0250U	0250U	Oncology (solid organ neoplasm), targeted genomic sequence DNA analysis of 505 genes, interrogation for somatic alterations (SNVs [single nucleotide variant], small insertions and deletions, one amplification, and four translocations), microsatellite instability and tumor-mutation burden	A	N/A
0251U	0251U	Hepcidin-25, enzyme-linked immunosorbent assay (ELISA), serum or plasma	Q4	N/A
0252U	0252U	Fetal aneuploidy short tandem–repeat comparative analysis, fetal DNA from products of conception, reported as normal (euploidy), monosomy, trisomy, or partial deletion/duplications, mosaicism, and segmental aneuploidy	A	N/A
0253U	0253U	Reproductive medicine (endometrial receptivity analysis), RNA gene expression profile, 238 genes by next-generation sequencing, endometrial tissue, predictive algorithm reported as endometrial window of implantation (eg, pre-receptive, receptive, post-receptive)	A	N/A
0254U	0254U	Reproductive medicine (preimplantation genetic assessment), analysis of 24 chromosomes using embryonic DNA genomic sequence analysis for aneuploidy, and a mitochondrial DNA score in euploid embryos, results reported as normal (euploidy), monosomy, trisomy, or partial deletion/duplications, mosaicism, and segmental aneuploidy, per embryo tested	A	N/A

BILLING CODE 4120–01–C

3. October 2021 HCPCS Codes for Which We Are Soliciting Public Comments in the CY 2022 OPPS/ASC Final Rule With Comment Period

As has been our practice in the past, we incorporate those new HCPCS codes that are effective October 1 in the final rule with comment period, thereby updating the OPPS for the following calendar year, as displayed in Table 7 of the CY 2022 OPPS/ASC proposed rule with comment period and reprinted as Table 9 of this final rule with comment period. These codes are released to the public through the October OPPS quarterly update CRs and via the CMS HCPCS website (for Level II HCPCS codes). For CY 2022, these codes are flagged with comment indicator ''NI'' in Addendum B to this OPPS/ASC final rule with comment period to indicate that we are assigning them an interim payment status which is subject to public comment. Specifically, the interim SI and APC assignments for codes flagged with comment indicator ''NI'' are open to public comment in this final rule with comment period, and we will respond to these public comments in the OPPS/ASC final rule with comment period for the next year's OPPS/ASC update.

In the CY 2022 OPPS/ASC proposed rule (86 FR 42068), we proposed to continue this process for CY 2022. Specifically, for CY 2022, we proposed to include in Addendum B to the CY 2022 OPPS/ASC final rule with comment period the new HCPCS codes effective October 1, 2021 that would be incorporated in the October 2021 OPPS quarterly update CR. Also, as stated above, the October 1, 2021 codes are flagged with comment indicator ''NI'' in Addendum B to this CY 2022 OPPS/

ASC final rule with comment period to indicate that we have assigned the codes an interim OPPS payment status for CY 2022. We are inviting public comments on the interim SI and APC assignments for these codes, if applicable, that will be finalized in the CY 2023 OPPS/ASC final rule with comment period.

4. January 2022 HCPCS Codes

a. New Level II HCPCS Codes for Which We Are Soliciting Public Comments in This CY 2022 OPPS/ASC Final Rule With Comment Period

Consistent with past practice, we are soliciting comments on the new Level II HCPCS codes that will be effective January 1, 2022 of this final rule with comment period, thereby allowing us to finalize the status indicators and APC assignments for the codes in the CY 2023 OPPS/ASC final rule with comment period. Unlike the CPT codes that are effective January 1 and are included in the OPPS/ASC proposed rules, and except for the G-codes listed in Addendum O of the CY 2022 OPPS/ASC proposed rule, most Level II HCPCS codes are not released until sometime around November to be effective January 1. Because these codes are not available until November, we are unable to include them in the OPPS/ASC proposed rules. Consequently, for CY 2022, we proposed to include in Addendum B to this final rule with comment period the new Level II HCPCS codes effective January 1, 2022 that would be incorporated in the January 2022 OPPS quarterly update CR. These codes will be released to the public through the January OPPS quarterly update CRs and via the CMS HCPCS website (for Level II HCPCS codes).

For CY 2022, the Level II HCPCS codes effective January 1, 2022 are flagged with comment indicator ''NI'' in Addendum B to this final rule with comment period to indicate that we have assigned the codes an interim OPPS payment status for CY 2022. We are inviting public comments on the interim SI and APC assignments for these codes, if applicable, that will be finalized in the CY 2023 OPPS/ASC final rule with comment period.

b. CPT Codes for Which We Solicited Public Comments in the CY 2022 OPPS/ASC Proposed Rule

In the CY 2015 OPPS/ASC final rule with comment period (79 FR 66841 through 66844), we finalized a revised process of assigning APC and status indicators for new and revised Category I and III CPT codes that would be effective January 1. Specifically, for the new/revised CPT codes that we receive in a timely manner from the AMA's CPT Editorial Panel, we finalized our proposal to include the codes that would be effective January 1 in the OPPS/ASC proposed rules, along with proposed APC and status indicator assignments for them, and to finalize the APC and status indicator assignments in the OPPS/ASC final rules beginning with the CY 2016 OPPS update. For those new/revised CPT codes that were received too late for inclusion in the OPPS/ASC proposed rule, we finalized our proposal to establish and use HCPCS G-codes that mirror the predecessor CPT codes and retain the current APC and status indicator assignments for a year until we can propose APC and status indicator assignments in the following year's rulemaking cycle. We note that even if we find that we need to create HCPCS G-codes in place of certain CPT codes for the PFS proposed rule, we do not anticipate that these HCPCS G-codes will always be necessary for OPPS purposes. We will make every effort to include proposed APC and status indicator assignments for all new and revised CPT codes that the AMA makes publicly available in time for us to include them in the proposed rule, and to avoid resorting to use of HCPCS G-codes and the resulting delay in utilization of the most current CPT codes. Also, we finalized our proposal to make interim APC and status indicator assignments for CPT codes that are not available in time for the proposed rule and that describe wholly new services (such as new technologies or new surgical procedures), to solicit public comments in the final rule, and to finalize the specific APC and status indicator assignments for those codes in the following year's final rule.

For the CY 2022 OPPS update, we received the CPT codes that will be effective January 1, 2022 from the AMA in time to be included in the CY 2022 OPPS/ASC proposed rule. The new, revised, and deleted CPT codes can be found in Addendum B to the CY 2022 OPPS/ASC proposed rule (which is available via the internet on the CMS website). We note that the new and revised CPT codes are assigned to comment indicator ''NP'' in Addendum B of the CY 2022 OPPS/ASC proposed rule to indicate that the code is new for the next calendar year or the code is an existing code with substantial revision to its code descriptor in the next calendar year as compared to the current calendar year with a proposed APC assignment, and that comments will be accepted on the proposed APC assignment and status indicator.

Further, we note that the CPT code descriptors that appear in Addendum B are short descriptors and do not accurately describe the complete procedure, service, or item described by the CPT code. Therefore, we included the 5-digit placeholder codes and the long descriptors for the new and revised CY 2022 CPT codes in Addendum O to the CY 2022 OPPS/ASC proposed rule (which is available via the internet on the CMS website) so that the public can adequately comment on our proposed APCs and status indicator assignments. The 5-digit placeholder codes can be found in Addendum O, specifically under the column labeled ''CY 2022 OPPS/ASC Proposed Rule 5-Digit AMA Placeholder Code''. The final CPT code numbers would be included in this final rule with comment period. We also noted that not every code listed in Addendum O is subject to public comment. For the new and revised CPT codes, we requested public comments on only those codes that are assigned comment indicator ''NP''.

In summary, in the CY 2022 OPPS/ASC proposed rule, we solicited public comments on the proposed CY 2022 status indicators and APC assignments for the new and revised CPT codes that will be effective January 1, 2022. Because the CPT codes listed in Addendum B appear with short descriptors only, we listed them again in Addendum O to the CY 2022 OPPS/ASC proposed rule with long descriptors. In addition, we proposed to finalize the status indicator and APC assignments for these codes (with their final CPT code numbers) in this final rule with comment period. The proposed status indicator and APC assignment for these codes can be found in Addendum B to the CY 2022 OPPS/ASC proposed rule (which is available via the internet on the CMS website).

Commenters addressed several of the new CPT codes that were assigned to comment indicator ''NP'' in Addendum B of the 2022 OPPS/ASC Proposed Rule. We have responded to those public comments in sections III.D. ''OPPS APC-Specific Policies'' of this final rule with comment period.

Finally, in Table 9, which is a reprint of Table 7 from the CY 2022 OPPS/ASC proposed rule, we summarize our current process for updating codes through our OPPS quarterly update CRs, seeking public comments, and finalizing the treatment of these codes under the OPPS.

BILLING CODE 4120–01–P

TABLE 9: COMMENT TIMEFRAME FOR NEW AND REVISED HCPCS CODES

OPPS Quarterly Update CR	Type of Code	Effective Date	Comments Sought	When Finalized
April 2021	HCPCS (CPT and Level II codes)	April 1, 2021	CY 2022 OPPS/ASC proposed rule	CY 2022 OPPS/ASC final rule with comment period
July 2021	HCPCS (CPT and Level II codes)	July 1, 2021	CY 2022 OPPS/ASC proposed rule	CY 2022 OPPS/ASC final rule with comment period

BILLING CODE 4120–01–C

B. OPPS Changes—Variations Within APCs

1. Background

Section 1833(t)(2)(A) of the Act requires the Secretary to develop a classification system for covered hospital outpatient department services. Section 1833(t)(2)(B) of the Act provides that the Secretary may establish groups of covered OPD services within this classification system, so that services classified within each group are comparable clinically and with respect to the use of resources. In accordance with these provisions, we developed a grouping classification system, referred to as Ambulatory Payment Classifications (APCs), as set forth in regulations at 42 CFR 419.31. We use Level I (also known as CPT codes) and Level II HCPCS codes (also known as alphanumeric codes) to identify and group the services within each APC. The APCs are organized such that each group is homogeneous both clinically and in terms of resource use. Using this classification system, we have established distinct groups of similar services. We also have developed separate APC groups for certain medical devices, drugs, biologicals, therapeutic radiopharmaceuticals, and brachytherapy devices that are not packaged into the payment for the procedure.

We have packaged into the payment for each procedure or service within an APC group the costs associated with those items and services that are typically ancillary and supportive to a primary diagnostic or therapeutic modality and, in those cases, are an integral part of the primary service they support. Therefore, we do not make separate payment for these packaged items or services. In general, packaged items and services include, but are not limited to, the items and services listed in regulations at 42 CFR 419.2(b). A further discussion of packaged services is included in section II.A.3. of this final rule with comment period.

Under the OPPS, we generally pay for covered hospital outpatient services on a rate-per-service basis, where the service may be reported with one or more HCPCS codes. Payment varies according to the APC group to which the independent service or combination of services is assigned. For CY 2022, we proposed that each APC relative payment weight represents the hospital cost of the services included in that APC, relative to the hospital cost of the services included in APC 5012 (Clinic Visits and Related Services). The APC relative payment weights are scaled to APC 5012 because it is the hospital clinic visit APC and clinic visits are among the most frequently furnished services in the hospital outpatient setting.

2. Application of the 2 Times Rule

Section 1833(t)(9)(A) of the Act requires the Secretary to review, not less often than annually, and revise the APC groups, the relative payment weights, and the wage and other adjustments described in paragraph (2) to take into account changes in medical practice, changes in technology, the addition of new services, new cost data, and other relevant information and factors. Section 1833(t)(9)(A) of the Act also requires the Secretary to consult with an expert outside advisory panel composed of an appropriate selection of representatives of providers to review (and advise the Secretary concerning)

the clinical integrity of the APC groups and the relative payment weights. We note that the HOP Panel recommendations for specific services for the CY 2022 OPPS update will be discussed in the relevant specific sections throughout this final rule with comment period.

In addition, section 1833(t)(2) of the Act provides that, subject to certain exceptions, the items and services within an APC group cannot be considered comparable with respect to the use of resources if the highest cost for an item or service in the group is more than 2 times greater than the lowest cost for an item or service within the same group (referred to as the ''2 times rule''). The statute authorizes the Secretary to make exceptions to the 2 times rule in unusual cases, such as for low-volume items and services (but the Secretary may not make such an exception in the case of a drug or biological that has been designated as an orphan drug under section 526 of the Federal Food, Drug, and Cosmetic Act (FDCA)). In determining the APCs with a 2 times rule violation, we consider only those HCPCS codes that are significant based on the number of claims. We note that, for purposes of identifying significant procedure codes for examination under the 2 times rule, we consider procedure codes that have more than 1,000 single major claims or procedure codes that both have more than 99 single major claims and contribute at least 2 percent of the single major claims used to establish the APC cost to be significant (75 FR 71832). This longstanding definition of when a procedure code is significant for purposes of the 2 times rule was selected because we believe that a subset of 1,000 or fewer claims is negligible within the set of approximately 100 million single procedure or single session claims we use for establishing costs. Similarly, a procedure code for which there are fewer than 99 single claims and that comprises less than 2 percent of the single major claims within an APC will have a negligible impact on the APC cost (75 FR 71832). In this section of the CY 2022 OPPS/ASC proposed rule, for CY 2022, we proposed to make exceptions to this limit on the variation of costs within each APC group in unusual cases, such as for certain low-volume items and services.

For the CY 2022 OPPS update, in the CY 2022 OPPS/ASC proposed rule, we identified the APCs with violations of the 2 times rule. Therefore, we proposed changes to the procedure codes assigned to these APCs in Addendum B to the CY 2022 OPPS/ASC proposed rule. We noted that Addendum B does not appear in the printed version of the **Federal Register** as part of the CY 2022 OPPS/ASC proposed rule. Rather, it is published and made available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html*. To eliminate a violation of the 2 times rule and improve clinical and resource homogeneity, we proposed to reassign these procedure codes to new APCs that contain services that are similar with regard to both their clinical and resource characteristics. In many cases, the proposed procedure code reassignments and associated APC reconfigurations for CY 2022 included in the CY 2022 OPPS/ASC proposed rule are related to changes in costs of services that were observed in the CY 2019 claims data available for CY 2022 ratesetting. Addendum B to the CY 2021 OPPS/ASC proposed rule identified with a comment indicator ''CH'' those procedure codes for which we proposed a change to the APC assignment or status indicator, or both, that were initially assigned in the July 1, 2021 OPPS Addendum B Update (available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Addendum-A-and-Addendum-B-Updates.html*).

3. APC Exceptions to the 2 Times Rule

Taking into account the APC changes that we proposed to make for CY 2022, we reviewed all of the APCs to determine which APCs would not meet the requirements of the 2 times rule. We used the following criteria to evaluate whether to propose exceptions to the 2 times rule for affected APCs:

- Resource homogeneity;
- Clinical homogeneity;
- Hospital outpatient setting utilization;
- Frequency of service (volume); and
- Opportunity for upcoding and code fragments.

Based on the CY 2019 claims data available for the CY 2022 proposed rule, we found 23 APCs with violations of the 2 times rule. We applied the criteria as described above to identify the APCs for which we proposed to make exceptions under the 2 times rule for CY 2022, and found that all of the 23 APCs we identified meet the criteria for an exception to the 2 times rule based on the CY 2019 claims data available for the CY 2022 OPPS/ASC proposed rule. We did not include in that determination those APCs where a 2 times rule violation was not a relevant concept, such as APC 5401 (Dialysis), which only has two HCPCS codes assigned to it that have similar geometric mean costs and do not create a 2 times rule violation. Therefore, we only identified those APCs, including those with criteria-based costs, such as device-dependent CPT/HCPCS codes, with violations of the 2 times rule.

We note that, for cases in which a recommendation by the HOP Panel appears to result in or allow a violation of the 2 times rule, we may accept the HOP Panel's recommendation because those recommendations are based on explicit consideration (that is, a review of the latest OPPS claims data and group discussion of the issue) of resource use, clinical homogeneity, site of service, and the quality of the claims data used to determine the APC payment rates.

Table 8 of the CY 2022 OPPS/ASC proposed rule listed the 23 APCs for which we proposed to make an exception under the 2 times rule for CY 2021 based on the criteria cited above and claims data submitted between January 1, 2019 and December 31, 2019, and processed on or before June 30, 2020, and updated CCRs, if available. The proposed geometric mean costs for covered hospital outpatient services for these and all other APCs that were used in the development of the CY 2022 OPPS/ASC proposed rule can be found on the CMS website at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices.html*.

Based on the updated final rule CY 2019 claims data used for this final rule with comment period, we identified the same 23 APCs that appeared in Table 8 of the CY 2022 OPPS/ASC proposed rule.

Comment: We received two comments that agreed with the proposed exceptions identified in Table 8 of the CY 2021 OPPS proposed rule.

Response: We appreciate the commenters' support.

Comment: One commenter requested that CMS adjust the definition of a significant procedure code for cost significance purposes in evaluating the 2 times rule to only require 500 single claims rather than the current requirement of 1,000 single claims.

Response: As stated earlier, in determining whether a 2 times rule violation exists in an APC, we consider only those HCPCS codes that are significant based on the number of claims for the codes. For purposes of identifying significant HCPCS codes to examine for 2 times rule violations, we consider codes that have more than 1,000 single major claims or codes that have both greater than 99 single major

claims and contribute at least 2 percent of the single major claims used to establish the APC cost to be significant (75 FR 71832). This longstanding definition of when a HCPCS code is significant for purposes of the 2 times rule was selected because we believe that a subset of 1,000 claims is negligible within the set of approximately 100 million single procedure or single session claims we use for establishing costs. Similarly, a HCPCS code for which there are fewer than 99 single claims and which comprises less than 2 percent of the single major claims within an APC will have a negligible impact on the APC cost. We continue to believe that these definitions remain appropriate and are therefore making no changes in this final rule with comment period.

Comment: One commenter opposed the allowance of a 2 times rule exception for APC 5161 (Level 1 ENT Procedures) in Table 8 of the CY 2021 OPPS proposed rule, based on the current construct of codes included in the APC.

Response: We have reviewed the CY 2019 claims data available for CY 2022 OPPS ratesetting for APC 5161 and believe that this APC remains appropriate as currently structured because it optimizes clinical and resource cost homogeneity. In addition, we note that the 2 times rule violation is based on the cost range of approximately $155.55 for CPT code 31500 (Insert emergency airway) and $315.60 for CPT code 69100 (Biopsy of external ear) between the geometric mean costs for the lowest and highest cost significant codes in the APC. The difference between the geometric mean costs for CPT codes 31500 and 69100 violates the 2 times rule by a minimal amount and does not suggest there is a broader issue with the APC. However, we will continue to monitor the claims data for APC 5161 as they become available.

After considering the public comments we received on proposed APC assignments and our analysis of the CY 2019 costs from hospital claims and cost report data available for this final rule with comment period, we are finalizing our proposals, with some modifications. Specifically, we are finalizing our proposal to except the 23 proposed APCs from the 2 times rule for CY 2022.

Table 10 below lists the 23 APCs that we are excepting from the 2 times rule for CY 2022 based on the criteria described earlier and a review of claims data for dates of service between January 1, 2019, and December 31, 2019, that were processed on or before June 30, 2020. We note that, for cases in which a recommendation by the HOP Panel appears to result in or allow a violation of the 2 times rule, we generally accept the HOP Panel's recommendation because those recommendations are based on explicit consideration of resource use, clinical homogeneity, site of service, and the quality of the claims data used to determine the APC payment rates. The geometric mean costs for hospital outpatient services for these and all other APCs that were used in the development of this final rule with comment period can be found on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices*.

BILLING CODE 4120–01–C

C. New Technology APCs

1. Background

In the CY 2002 OPPS final rule (66 FR 59903), we finalized changes to the time period in which a service can be eligible for payment under a New Technology APC. Beginning in CY 2002, we retain services within New Technology APC groups until we gather sufficient claims data to enable us to assign the service to an appropriate clinical APC. This policy allows us to move a service from a New Technology APC in less than 2 years if sufficient data are available. It also allows us to retain a service in a New Technology APC for more than 2 years if sufficient data upon which to base a decision for reassignment have not been collected.

In the CY 2004 OPPS final rule with comment period (68 FR 63416), we restructured the New Technology APCs to make the cost intervals more consistent across payment levels and refined the cost bands for these APCs to retain two parallel sets of New Technology APCs, one set with a status indicator of ''S'' (Significant Procedures, Not Discounted when Multiple. Paid under OPPS; separate APC payment) and the other set with a status indicator of ''T'' (Significant Procedure, Multiple Reduction Applies. Paid under OPPS; separate APC payment). These current New Technology APC configurations allow us to price new technology services more appropriately and consistently.

For CY 2021, there were 52 New Technology APC levels, ranging from the lowest cost band assigned to APC 1491 (New Technology—Level 1A ($0–$10)) to the highest cost band assigned to APC 1908 (New Technology—Level 52 ($145,001–$160,000)). We note that the cost bands for the New Technology APCs, specifically, APCs 1491 through 1599 and 1901 through 1908, vary with increments ranging from $10 to $14,999. These cost bands identify the APCs to which new technology procedures and services with estimated service costs that fall within those cost bands are assigned under the OPPS. Payment for each APC is made at the mid-point of the APC's assigned cost band. For example, payment for New Technology APC 1507 (New Technology—Level 7 ($501–$600)) is made at $550.50.

Under the OPPS, one of our goals is to make payments that are appropriate for the services that are necessary for the treatment of Medicare beneficiaries. The OPPS, like other Medicare payment systems, is budget neutral and increases are limited to the annual hospital market basket increase reduced by the productivity adjustment. We believe that our payment rates reflect the costs that are associated with providing care to Medicare beneficiaries and are adequate to ensure access to services (80 FR 70374).

For many emerging technologies, there is a transitional period during which utilization may be low, often because providers are first learning about the technologies and their clinical utility. Quite often, parties request that Medicare make higher payments under the New Technology APCs for new procedures in that transitional phase.

These requests, and their accompanying estimates for expected total patient utilization, often reflect very low rates of patient use of expensive equipment, resulting in high per-use costs for which requesters believe Medicare should make full payment. Medicare does not, and we believe should not, assume responsibility for more than its share of the costs of procedures based on projected utilization for Medicare beneficiaries and does not set its payment rates based on initial projections of low utilization for services that require expensive capital equipment. For the OPPS, we rely on hospitals to make informed business decisions regarding the acquisition of high-cost capital equipment, taking into consideration their knowledge about their entire patient base (Medicare beneficiaries included) and an understanding of Medicare's and other payers' payment policies. We refer readers to the CY 2013 OPPS/ASC final rule with comment period (77 FR 68314) for further discussion regarding this payment policy.

We note that, in a budget-neutral system, payments may not fully cover hospitals' costs in a particular circumstance, including those for the purchase and maintenance of capital equipment. We rely on hospitals to make their decisions regarding the acquisition of high-cost equipment with the understanding that the Medicare program must be careful to establish its initial payment rates, including those made through New Technology APCs, for new services that lack hospital claims data based on realistic utilization projections for all such services delivered in cost-efficient hospital outpatient settings. As the OPPS acquires claims data regarding hospital costs associated with new procedures, we regularly examine the claims data and any available new information regarding the clinical aspects of new procedures to confirm that our OPPS payments remain appropriate for procedures as they transition into mainstream medical practice (77 FR 68314). For CY 2022, we included the proposed payment rates for New Technology APCs 1491 to 1599 and 1901 through 1908 in Addendum A to the CY 2022 OPPS/ASC proposed rule (which is available via the internet on the CMS website).

2. Establishing Payment Rates for Low-Volume New Technology Services

Services that are assigned to New Technology APCs are typically new services that do not have sufficient claims history to establish an accurate payment for the services. One of the objectives of establishing New Technology APCs is to generate sufficient claims data for a new service so that it can be assigned to an appropriate clinical APC. Some services that are assigned to New Technology APCs have very low annual volume, which we consider to be fewer than 100 claims. We consider services with fewer than 100 claims annually to be low-volume services because there is a higher probability that the payment data for a service may not have a normal statistical distribution, which could affect the quality of our standard cost methodology that is used to assign services to an APC. In addition, services with fewer than 100 claims per year are not generally considered to be a significant contributor to the APC ratesetting calculations and, therefore, are not included in the assessment of the 2 times rule. As we explained in the CY 2019 OPPS/ASC final rule with comment period (83 FR 58890), we were concerned that the methodology we use to estimate the cost of a service under the OPPS by calculating the geometric mean for all separately paid claims for a HCPCS service code from the most recent available year of claims data may not generate an accurate estimate of the actual cost of the service for these low-volume services.

In accordance with section 1833(t)(2)(B) of the Act, services classified within each APC must be comparable clinically and with respect to the use of resources. As described earlier, assigning a service to a New Technology APC allows us to gather claims data to price the service and assign it to the APC with services that use similar resources and are clinically comparable. However, where utilization of services assigned to a New Technology APC is low, it can lead to wide variation in payment rates from year to year, resulting in even lower utilization and potential barriers to access to new technologies, which ultimately limits our ability to assign the service to the appropriate clinical APC. To mitigate these issues, we determined in the CY 2019 OPPS/ASC final rule with comment period that it was appropriate to utilize our equitable adjustment authority at section 1833(t)(2)(E) of the Act to adjust how we determined the costs for low-volume services assigned to New Technology APCs (83 FR 58892 through 58893). We have utilized our equitable adjustment authority at section 1833(t)(2)(E) of the Act, which states that the Secretary shall establish, in a budget neutral manner, other adjustments as determined to be necessary to ensure equitable payments, to estimate an appropriate payment amount for low-volume new technology services in the past (82 FR 59281). Although we have used this adjustment authority on a case-by-case basis in the past, we stated in the CY 2019 OPPS/ASC final rule with comment period that we believed it was appropriate to adopt an adjustment for low-volume services assigned to New Technology APCs in order to mitigate the wide payment fluctuations that have occurred for new technology services with fewer than 100 claims and to provide more predictable payment for these services.

For purposes of this adjustment, we stated that we believed that it was appropriate to use up to 4 years of claims data in calculating the applicable payment rate for the prospective year, rather than using solely the most recent available year of claims data, when a service assigned to a New Technology APC has a low annual volume of claims, which, for purposes of this adjustment, we defined as fewer than 100 claims annually. We adopted a policy to consider services with fewer than 100 claims annually as low-volume services because there is a higher probability that the payment data for a service may not have a normal statistical distribution, which could affect the quality of our standard cost methodology that is used to assign services to an APC. We explained that we were concerned that the methodology we use to estimate the cost of a service under the OPPS by calculating the geometric mean for all separately paid claims for a HCPCS procedure code from the most recent available year of claims data may not generate an accurate estimate of the actual cost of the low-volume service. Using multiple years of claims data will potentially allow for more than 100 claims to be used to set the payment rate, which would, in turn, create a more statistically reliable payment rate.

In addition, to better approximate the cost of a low-volume service within a New Technology APC, we stated that we believed using the median or arithmetic mean rather than the geometric mean (which ''trims'' the costs of certain claims out) could be more appropriate in some circumstances, given the extremely low volume of claims. Low claim volumes increase the impact of ''outlier'' claims; that is, claims with either a very low or very high payment rate as compared to the average claim, which would have a substantial impact on any statistical methodology used to estimate the most appropriate payment rate for a service. We also explained that we believed having the flexibility to utilize an alternative statistical

methodology to calculate the payment rate in the case of low-volume new technology services would help to create a more stable payment rate. Therefore, in the CY 2019 OPPS/ASC final rule with comment period (83 FR 58893), we established that, in each of our annual rulemakings, we would seek public comments on which statistical methodology should be used for each low-volume service assigned to a New Technology APC. In the preamble of each annual rulemaking, we stated that we would present the result of each statistical methodology and solicit public comment on which methodology should be used to establish the payment rate for a low-volume new technology service. In addition, we explained that we would use our assessment of the resources used to perform a service and guidance from the developer or manufacturer of the service, as well as other stakeholders, to determine the most appropriate payment rate. Once we identified the most appropriate payment rate for a service, we would assign the service to the New Technology APC with the cost band that includes its payment rate.

For CY 2022, we proposed to continue to utilize our equitable adjustment authority under section 1833(t)(2)(E) of the Act to calculate the geometric mean, arithmetic mean, and median using up to 4 years of claims data to select the appropriate payment rate for purposes of assigning services with fewer than 100 claims per year to a New Technology APC. However, we proposed to utilize our equitable adjustment authority through our proposed universal low volume APC policy described in section X.C. of the CY 2022 OPPS/ASC proposed rule. Our proposed universal low volume APC policy is similar to our current New Technology APC low volume policy with the difference between the two policies being that the universal low volume APC policy would apply to clinical APCs and brachytherapy APCs, in addition to procedures assigned to New Technology APCs, and would use the highest of the geometric mean, arithmetic mean, or median based on up to 4 years of claims data to set the payment rate for the APC. For New Technology APCs with fewer than 100 single claims at the procedure level that can be used for ratesetting, we would apply our proposed methodology for determining a low volume APC's cost, choosing the ''greatest of'' the median, arithmetic mean, or geometric mean at the procedure level, to apply to the individual services assigned to New Technology APCs and provide the final New Technology APC assignment for each procedure. We proposed to end our separate New Technology APC low volume policy if we adopt the proposed universal low volume APC policy, as it also applies to New Technology APCs as well as clinical and brachytherapy APCs.

We did not receive any comments on our proposal to end our separate New Technology APC low volume policy if we adopt the proposed universal low volume APC policy and we have decided to implement our universal low volume APC policy as described in section X.C. of this final rule with comment period. Therefore, we are implementing our proposal without modification and applying our universal low volume APC policy to procedures assigned to New Technology APCs as well as clinical and brachytherapy APCs.

3. Procedures Assigned to New Technology APC Groups for CY 2022

As we described in the CY 2002 OPPS final rule (66 FR 59902), we generally retain a procedure in the New Technology APC to which it is initially assigned until we have obtained sufficient claims data to justify reassignment of the procedure to a clinically appropriate APC. In addition, in cases where we find that our initial New Technology APC assignment was based on inaccurate or inadequate information (although it was the best information available at the time), where we obtain new information that was not available at the time of our initial New Technology APC assignment, or where the New Technology APCs are restructured, we may, based on more recent resource utilization information (including claims data) or the availability of refined New Technology APC cost bands, reassign the procedure or service to a different New Technology APC that more appropriately reflects its cost (66 FR 59903).

Consistent with our current policy, for CY 2022, we proposed to retain services within New Technology APC groups until we obtain sufficient claims data to justify reassignment of the service to an appropriate clinical APC. The flexibility associated with this policy allows us to reassign a service from a New Technology APC in less than 2 years if we have not obtained sufficient claims data. It also allows us to retain a service in a New Technology APC for more than 2 years if we have not obtained sufficient claims data upon which to base a reassignment decision (66 FR 59902).

a. Retinal Prosthesis Implant Procedure (APC 1908)

CPT code 0100T (Placement of a subconjunctival retinal prosthesis receiver and pulse generator, and implantation of intra-ocular retinal electrode array, with vitrectomy) describes the implantation of a retinal prosthesis, specifically, a procedure involving the use of the Argus® II Retinal Prosthesis System. This first retinal prosthesis was approved by FDA in 2013 for adult patients diagnosed with severe to profound retinitis pigmentosa. For information on the utilization and payment history of the Argus® II procedure and the Argus® II device prior to CY 2020, please refer to the CY 2021 OPPS final rule (85 FR 85937 through 85938).

For CY 2020, we identified 35 claims reporting the procedure described by CPT code 0100T for the 4-year period of CY 2015 through CY 2018. We found the geometric mean cost for the procedure described by CPT code 0100T to be approximately $146,059, the arithmetic mean cost to be approximately $152,123, and the median cost to be approximately $151,267. All of the resulting estimates from using the three statistical methodologies fell within the same New Technology APC cost band ($145,001–$160,000), where the Argus® II procedure was assigned for CY 2019. Consistent with our policy stated in section III.C.2 of this final rule with comment period, we presented the result of each statistical methodology in the CY 2022 OPPS/ASC proposed rule, and we sought public comments on which method should be used to assign procedures described by CPT code 0100T to a New Technology APC. All three potential statistical methodologies used to estimate the cost of the Argus® II procedure fell within the cost band for New Technology APC 1908, with the estimated cost being between $145,001 and $160,000. Accordingly, we assigned CPT code 0100T in APC 1908 (New Technology—Level 52 ($145,001–$160,000)), with a payment rate of $152,500.50 for CY 2020.

For CY 2021, the number of reported claims for the Argus® II procedure continued to be very low with a substantial fluctuation in cost from year to year. The high annual variability of the cost of the Argus® II procedure continued to make it difficult to establish a consistent and stable payment rate for the procedure. As previously mentioned, in accordance with section 1833(t)(2)(B) of the Act, we are required to establish that services classified within each APC are

comparable clinically and with respect to the use of resources. We identified 35 claims reporting the procedure described by CPT code 0100T for the 4-year period of CY 2016 through CY 2019. We found the geometric mean cost for the procedure described by CPT code 0100T to be approximately $148,148, the arithmetic mean cost to be approximately $153,682, and the median cost to be approximately $151,974. All three potential statistical methodologies used to estimate the cost of the Argus® II procedure fell within the cost band for New Technology APC 1908, with the estimated cost being between $145,001 and $160,000, and accordingly, we assigned the Argus II procedure to New Technology APC 1908 for CY 2021.

For 2022, we proposed to utilize our equitable adjustment authority under section 1833(t)(2)(E) of the Act to establish the universal low volume APC policy described in section X.C. of the CY 2022 OPPS/ASC proposed rule. Consistent with this proposed policy, we calculated the geometric mean, arithmetic mean, and median costs using multiple years of claims data to select the appropriate payment rate for purposes of assigning the Argus® II procedure (CPT code 0100T) to a New Technology APC. We proposed to use claims data from CY 2016 through CY 2019, which are the last 4 years of available OPPS claims data that we believe are appropriate for ratesetting, to determine the proposed payment rate for the Argus® II procedure for CY 2022. The claims data are the same 35 claims that were used to determine the payment rate for CPT code 0100T in CY 2021, and the estimates of the geometric mean ($148,148), the arithmetic mean ($153,682), and the median ($151,974) are the same as the estimates for CY 2021. All three potential statistical methodologies used to estimate the cost of the Argus® II procedure are within the cost band for New Technology APC 1908, with the proposed payment rate being between $145,001 and $160,000. Accordingly, we proposed to continue to assign the Argus® II procedure to New Technology APC 1908 for CY 2022.

For our analysis for this final rule with comment period, we identified 35 claims reporting the procedure described by CPT code 0100T for the 4-year period of CY 2016 through CY 2019, which were the same claims analyzed for the CY 2022 OPPS/ASC proposed rule. We found the geometric mean cost for the procedure described by CPT code 0100T to be approximately $148,148, the arithmetic mean cost to be approximately $153,682, and the median cost to be approximately $151,974, which are the same results that we calculated for the proposed rule. All three potential statistical methodologies used to estimate the cost of the Argus® II procedure fall within the cost band for New Technology APC 1908, with the estimated cost being between $145,001 and $160,000.

We received no public comments on our proposal. Therefore, we are finalizing our proposal without modification. We will maintain the assignment of the procedure described by CPT code 0100T in APC 1908 (New Technology—Level 52 ($145,001–$160,000)), with a payment rate of $152,500.50 for CY 2021. We note that the final payment rate includes both the surgical procedure (CPT code 0100T) and the use of the Argus® II device (HCPCS code C1841). Please see Table 11 below for the final OPPS APC and status indicator for the Argus® II procedure (CPT code 0100T) for CY 2022.

TABLE 11: CY 2022 OPPS APC AND STATUS INDICATOR FOR THE ARGUS® II PROCEDURE (CPT CODE 0100T) ASSIGNED TO NEW TECHNOLOGY APC

CPT Code	Long Descriptor	Final CY 2022 OPPS SI	Final CY 2022 OPPS APC	Final CY 2022 OPPS Payment Rate
0100T	Placement of a subconjunctival retinal prosthesis receiver and pulse generator, and implantation of intraocular retinal electrode array, with vitrectomy	T	1908	$152,500.50

b. Administration of Subretinal Therapies Requiring Vitrectomy (APC 1561)

Effective January 1, 2021, CMS established HCPCS code C9770 (Vitrectomy, mechanical, pars plana approach, with subretinal injection of pharmacologic/biologic agent) and assigned it to a New Technology APC based on the geometric mean cost of HCPCS code 67036. For CY 2021, HCPCS code C9770 was assigned to APC 1561 (New Technology—Level 24 ($3001–$3500)). This procedure may be used to describe the administration of CPT code J3398 (Injection, voretigene neparvovec-rzyl, 1 billion vector genomes). This procedure was previously discussed in the CY 2021 OPPS/ASC final rule with comment period (85 FR 85939 through 85940).

CPT code J3398 (Injection, voretigene neparvovec-rzyl, 1 billion vector genomes) is a gene therapy for a rare mutation-associated retinal dystrophy. Voretigene neparvovec-rzyl (Luxturna®), was approved by FDA in December of 2017, and is indicated as an adeno-associated virus vector-based gene therapy indicated for the treatment of patients with confirmed biallelic RPE65 mutation-associated retinal dystrophy.[20] This therapy is administered through a subretinal injection, which stakeholders describe as an extremely delicate and sensitive surgical procedure. The FDA package insert describes one of the steps for administering Luxturna as, ''after completing a vitrectomy, identify the intended site of administration. The subretinal injection can be introduced via pars plana.''

Stakeholders, including the manufacturer of Luxturna®, recommended HCPCS code 67036 (Vitrectomy, mechanical, pars plana approach) for the administration of the gene therapy.[21] However, the manufacturer previously contended the administration was not accurately described by any existing codes as HCPCS code 67036 (Vitrectomy, mechanical, pars plana approach) does not account for the administration itself.

CMS recognized the need to accurately describe the unique administration procedure that is required to administer the therapy described by HCPCS code J3398. Therefore, in the CY 2021 OPPS/ASC proposed rule (85 FR 48832), we proposed to establish a new HCPCS code, C97X1 (Vitrectomy, mechanical, pars plana approach, with subretinal injection of pharmacologic/biologic agent) to describe this process. We stated that we believed that this new HCPCS code accurately described the unique service associated with intraocular administration of HCPCS code J3398. We recognized that HCPCS code 67036 represents a clinically similar procedure and process that approximates similar resource utilization that is associated with C97X1. However, we also recognized that it is not prudent for the code that describes the administration of this unique gene therapy, C97X1, to be assigned to the same C–APC to which HCPCS code 67036 is assigned, as this would package the primary therapy, HCPCS code J3398, into the code that represents the process to administer the gene therapy.

Therefore, for CY 2021, we proposed to assign the services described by C97X1 to a New Technology APC with a cost band that contains the geometric mean cost for HCPCS code 67036. The placeholder code C97X1 was replaced by C9770 in this final rule with comment period. For CY 2021, we finalized our proposal to create C9770 (Vitrectomy, mechanical, pars plana approach, with subretinal injection of pharmacologic/biologic agent), and we assigned this code to APC 1561 (New Technology—Level 24 ($3,001–$3,500)) using the geometric mean cost of HCPCS code 67036. See Table 12 for the final descriptor and APC assignment of HCPCS code C9770 for CY 2021.

For CY 2022, we proposed to continue our policy from CY 2021 to assign the services described by HCPCS code C9770 to a New Technology APC with a cost band that contains the geometric mean cost for HCPCS code 67036. We proposed to continue to assign the services described by C9770 to a New Technology APC with a payment band based on the geometric mean cost for HCPCS code 67036 based on its geometric mean cost using CY 2019 claims data for CY 2022. Based on this data, the geometric mean cost of HCPCS code 67036 is $3,434.91. Therefore, we proposed to assign C9770 to the corresponding New Technology APC payment band, APC 1561 New Technology—Level 24 ($3,001–$3,500), with a payment rate of $3,250.50. Refer to Table 12 below for the proposed OPPS APC and status indicator for HCPCS code C9770 for CY 2022.

TABLE 12: CY 2021 FINAL AND CY 2022 PROPOSED OPPS APC AND STATUS INDICATOR FOR HCPCS CODE C9770 ASSIGNED TO NEW TECHNOLOGY APC

HCPCS Code	Long Descriptor	CY 2021 OPPS SI	CY 2021 OPPS APC	Proposed CY 2022 OPPS SI	Proposed CY 2022 OPPS APC
C9770	Vitrectomy, mechanical, pars plana approach, with subretinal injection of pharmacologic/biologic agent	T	1561	T	1561

[21] LUXTURNA REIMBURSEMENT GUIDE FOR TREATMENT CENTERS. *https://myspark generation.com/pdf/Reimbursement_Guide_for_Treatment_Centers_Interactive_010418_FINAL.pdf.*

We received no comment on this proposal. Therefore, we are finalizing our proposal as proposed to continue our policy from CY 2021 to assign the services described by HCPCS code C9770 to a New Technology APC with a cost band that contains the geometric mean cost for HCPCS code 67036. As we proposed to continue to assign the services described by C9770 to a New Technology APC with a payment band based on the geometric mean cost for HCPCS code 67036 based on its geometric mean cost using CY 2019 claims data for CY 2022, we are finalizing this proposal. Based on CY 2019 claims data, the geometric mean cost of HCPCS code 67036 is $3,435.25 Therefore, we will assign C9770 to the corresponding New Technology APC payment band, APC 1561 New Technology—Level 24 ($3,001–$3,500), with a payment rate of $3,250.50. Please see Table 13 below for the final and proposed OPPS APC and status indicator for HCPCS code C9770 for CY 2022.

TABLE 13: CY 2022 FINAL AND CY 2022 PROPOSED OPPS APC AND STATUS INDICATOR FOR HCPCS CODE C9770 ASSIGNED TO NEW TECHNOLOGY APC

HCPCS Code	Long Descriptor	Proposed CY 2022 OPPS SI	Proposed CY 2022 OPPS APC	Final CY 2022 OPPS SI	Final CY 2022 OPPS APC
C9770	Vitrectomy, mechanical, pars plana approach, with subretinal injection of pharmacologic/biologic agent	T	1561	T	1561

c. Bronchoscopy With Transbronchial Ablation of Lesion(s) by Microwave Energy (APC 1562)

Effective January 1, 2019, CMS established HCPCS code C9751 (Bronchoscopy, rigid or flexible, transbronchial ablation of lesion(s) by microwave energy, including fluoroscopic guidance, when performed, with computed tomography acquisition(s) and 3–D rendering, computer-assisted, image-guided navigation, and endobronchial ultrasound (EBUS) guided transtracheal and/or transbronchial sampling (for example, aspiration[s]/biopsy[ies]) and all mediastinal and/or hilar lymph node stations or structures and therapeutic intervention(s)). This microwave ablation procedure utilizes a flexible catheter to access the lung tumor via a working channel and may be used as an alternative procedure to a percutaneous microwave approach. Based on our review of the New Technology APC application for this service and the service's clinical similarity to existing services paid under the OPPS, we estimated the likely cost of the procedure would be between $8,001 and $8,500.

In claims data available for CY 2019 for the CY 2021 OPPS/ASC final rule with comment period, there were four claims reported for bronchoscopy with transbronchial ablation of lesions by microwave energy. Given the low volume of claims for the service, we proposed for CY 2021 to apply the policy we adopted in CY 2019, under which we utilize our equitable adjustment authority under section 1833(t)(2)(E) of the Act to calculate the geometric mean, arithmetic mean, and median costs to calculate an appropriate payment rate for purposes of assigning bronchoscopy with transbronchial ablation of lesions by microwave energy to a New Technology APC. We found the geometric mean cost for the service to be approximately $2,693, the arithmetic mean cost to be approximately $3,086, and the median cost to be approximately $3,708. The median was the statistical methodology that estimated the highest cost for the service and provided a reasonable estimate of the midpoint cost of the three claims that have been paid for this service. The payment rate calculated using this methodology fell within the cost band for New Technology APC 1562 (New Technology—Level 25 ($3,501–$4,000)). Therefore, we assigned HCPCS code C9751 to APC 1562 for CY 2021.

For CY 2022, the only available claims for HCPCS code C9751 are from CY 2019. Therefore, we proposed given the low number of claims for this procedure to utilize our equitable adjustment authority under section 1833(t)(2)(E) of the Act to calculate the geometric mean, arithmetic mean, and median costs to calculate an appropriate payment rate for purposes of assigning bronchoscopy with transbronchial ablation of lesions by microwave energy to a New Technology APC, consistent with our proposed universal low volume APC policy. Because we proposed to use the same claims as we did for CY 2021, we found the same values for the geometric mean cost, arithmetic mean cost, and the median cost for CY 2022. Once again, the median was the statistical methodology that estimated the highest cost for the service and provided a reasonable estimate of the midpoint cost of the three claims that have been paid for this service. The payment rate calculated using this methodology falls again within the cost band for New Technology APC 1562 (New Technology—Level 25 ($3,501–$4,000)). Therefore, we proposed to continue to assign HCPCS code C9751 to APC 1562 (New Technology—Level 25 ($3,501–$4,000)), with a proposed payment rate of $3,750.50 for CY 2022.

For our analysis for this final rule with comment period, we again used CY 2019 data, and we identified the same four claims reported for bronchoscopy with transbronchial ablation of lesions by microwave energy that were analyzed for the proposed rule and in CY 2021. Since the same claims were analyzed we received the same values for the geometric mean cost ($2,693), arithmetic mean cost ($3,086), and the median cost ($3,708) as we did for the proposed rule. As before, the median was the statistical methodology that estimated the highest cost for the service and provides a reasonable estimate of the midpoint cost of the three claims that have been paid for this service. The payment rate calculated using this methodology falls again within the cost band for New Technology APC 1562 (New Technology—Level 25 ($3,501–$4,000)).

We did not receive any public comments regarding our proposal. We

are finalizing our proposal without modification to continue to assign HCPCS code C9751 to APC 1562 (New Technology—Level 25 ($3,501–$4,000)), with a final payment rate of $3,750.50 for CY 2022. Details regarding HCPCS code C9751 are included in Table 14.

TABLE 14: CY 2022 OPPS APC AND STATUS INDICATOR FOR HCPCS CODE C9751 ASSIGNED TO NEW TECHNOLOGY APC

HCPCS Code	Long Descriptor	Final CY 2022 OPPS SI	Final CY 2022 OPPS APC	Final CY 2022 OPPS Payment Rate
C9751	Bronchoscopy, rigid or flexible, transbronchial ablation of lesion(s) by microwave energy, including fluoroscopic guidance, when performed, with computed tomography acquisition(s) and 3-D rendering, computer-assisted, image-guided navigation, and endobronchial ultrasound (EBUS) guided transtracheal and/or transbronchial sampling (eg, aspiration[s]/biopsy[ies]	T	1562	$3,750.50

d. Fractional Flow Reserve Derived From Computed Tomography (FFRCT) (APC 1511)

Fractional Flow Reserve Derived from Computed Tomography (FFRCT), also known by the trade name HeartFlow, is a noninvasive diagnostic service that allows physicians to measure coronary artery disease in a patient through the use of coronary CT scans. The HeartFlow procedure is intended for clinically stable symptomatic patients with coronary artery disease, and, in many cases, may avoid the need for an invasive coronary angiogram procedure. HeartFlow uses a proprietary data analysis process performed at a central facility to develop a three-dimensional image of a patient's coronary arteries, which allows physicians to identify the fractional flow reserve to assess whether or not patients should undergo further invasive testing (that is, a coronary angiogram).

For many services paid under the OPPS, payment for analytics that are performed after the main diagnostic/image procedure are packaged into the payment for the primary service. However, in CY 2018, we determined that HeartFlow should receive a separate payment because the service is performed by a separate entity (that is, a HeartFlow technician who conducts computer analysis offsite) rather than the provider performing the CT scan. We assigned CPT code 0503T, which describes the analytics performed, to New Technology APC 1516 (New Technology—Level 16 ($1,401–$1,500)), with a payment rate of $1,450.50 based on pricing information provided by the developer of the procedure that indicated the price of the procedure was approximately $1,500. We did not have Medicare claims data in CY 2019 for CPT code 0503T, and we continued to assign the service to New Technology APC 1516 (New Technology—Level 16 ($1,401–$1,500)), with a payment rate of $1,450.50.

CY 2020 was the first year for which we had Medicare claims data to calculate the cost of HCPCS code 0503T. For the CY 2020 OPPS/ASC final rule with comment period, there were 957 claims with CPT code 0503T of which 101 of the claims were single frequency claims that were used to calculate the geometric mean of the procedure. We planned to use the geometric mean to report the cost of HeartFlow. However, the number of single claims for CPT code 0503T was below the low-volume payment policy threshold for the proposed rule, and this number of single claims was only two claims above the threshold for the New Technology APC low-volume policy for the final rule. Therefore, we decided to use our equitable adjustment authority under section 1833(t)(2)(E) of the Act to calculate the geometric mean, arithmetic mean, and median using the CY 2018 claims data to determine an appropriate payment rate for HeartFlow using our New Technology APC low-volume payment policy. While the number of single frequency claims was just above our threshold to use the low-volume payment policy, we still had concerns about the normal cost distribution of the claims used to calculate the payment rate for HeartFlow, and we decided the low-volume payment policy would be the best approach to address those concerns.

Our analysis found that the geometric mean cost for CPT code 0503T was $768.26, the arithmetic mean cost for CPT code 0503T was $960.12, and the median cost for CPT code 0503T was $900.28. Of the three cost methods, the highest amount was for the arithmetic mean. The arithmetic mean fell within the cost band for New Technology APC 1511 (New Technology—Level 11 ($901–$1,000)) with a payment rate of $950.50. The arithmetic mean helped to account for some of the higher costs of CPT code 0503T identified by the developer and other stakeholders that may not have been reflected by either the median or the geometric mean.

For CY 2021, we observed a significant increase in the number of claims billed with CPT code 0503T. Specifically, using CY 2019 data, we identified 3,188 claims billed with CPT code 0503T including 465 single frequency claims. These totals are well above the threshold of 100 claims for a procedure to be evaluated using the New Technology APC low-volume policy. Therefore, we used our standard methodology rather than the low-volume methodology we previously

used to determine the cost of CPT code 0503T. Our analysis found that the geometric mean for CPT code 0503T was $804.35, and the geometric mean cost for the service fell within the cost band for New Technology APC 1510 (New Technology—Level 10 ($801–$900)). However, providers and other stakeholders have noted that the FFRCT service costs $1,100 and that there are additional staff costs related to the submission of coronary CT image data for processing by HeartFlow.

We noted that HeartFlow is one of the first procedures utilizing artificial intelligence to be separately payable in the OPPS, and providers are still learning how to accurately report their charges to Medicare when billing for artificial intelligence services (85 FR 85943). This is especially the case for allocating the cost of staff resources between the HeartFlow procedure and the coronary CT imaging services. Therefore, we decided it would be appropriate to use our equitable adjustment authority under section 1833(t)(2)(E) of the Act to assign CPT code 0503T to the same New Technology APC in CY 2021 as in CY 2020 in order to provide payment stability and equitable payment for providers as they continue to become more familiar with the proper cost reporting for HeartFlow and other artificial intelligence services. Accordingly, we assigned CPT code 0503T to New Technology APC 1511 (New Technology—Level 11 ($901–$1,000)) with a payment rate of $950.50 for CY 2020, and we continued to assign CPT code 0503T to New Technology APC 1511 for CY 2021.

For CY 2022, we proposed to use claims data from CY 2019 to estimate the cost of the HeartFlow service. Because we are using the same claims data as in CY 2021, these data continue to reflect that providers were learning how to accurately report their charges to Medicare when billing for artificial intelligence services. Therefore, we proposed to continue to use our equitable adjustment authority under section 1833(t)(2)(E) of the Act to assign CPT code 0503T to the same New Technology APC in CY 2022 as in CY 2020 and CY 2021: New Technology APC 1511 (New Technology—Level 11 ($901–$1000)), with a payment rate of $950.50 for CY 2022, which is the same payment rate for the service as in CY 2020 and CY 2021.

Comment: The developer of HeartFlow and multiple other commenters stated that CPT code 0503T should not be assigned to New Technology APC 1510. Instead, they suggested that the HeartFlow procedure be assigned to APC 5593 (Level 3 Nuclear Medicine and Related Services) with a payment rate of around $1,270. The developer asserted that even though the payment for APC 5593 is substantially higher than the estimated cost of CPT code 0503T, the cost of the service fits reasonably well with the cost of other procedures assigned to APC 5593. The developer and other commenters also assert that the HeartFlow procedure has enough clinical similarity to other procedures currently assigned to the Nuclear Medicine and Related Services APCs. According to the developer and the other commenters, HeartFlow is comparable to other nuclear medicine procedures that are image analysis tests characterizing organ-specific function. The developer and the other commenters also note that cardiac CT procedures, which are used to identify coronary artery disease, are assigned to the nuclear medicine APC family. Finally, the developer cited two examples of procedures in the OPPS that are assigned to APCs where the procedure in question does not have clinical similarity to the other procedures in the APC.

Response: We disagree with the suggestion that CPT code 0503T should be assigned to APC 5593. As we stated in the CY 2021 OPPS/ASC final rule with comment period (85 FR 85942), the Nuclear Medicine and Related Procedures APCs describe diagnostic and therapeutic procedures, many of them involving imaging, where radiopharmaceuticals and other nuclear materials are critical supplies for the performance of the procedure. In comparison, HeartFlow is a computer algorithm that does not directly take images nor is it used on its own to generate a diagnosis for a patient. Instead, HeartFlow analyzes diagnostic images obtained through other medical procedures and assists with the interpretation of those diagnostic images to determine if a patient has coronary artery disease. We appreciate that there may be a limited number of examples where a procedure may have only a little clinical similarity to other procedures in the same APC, but we attempt to make those situations an exception rather than our regular practice. There is little clinical similarity between the HeartFlow procedure and the procedures currently assigned to the Nuclear Medicine and Related Procedures APCs and we are therefore not assigning CPT code 0503T to APC 5593.

Comment: One commenter, the developer, suggested that, if we decided not to assign CPT code 0503T to a Nuclear Medicine and Related Services APC, that we assign the service to APC 5724 (Level 4—Level 4 Diagnostic Tests and Related Services) with a payment rate of $896.09. The commenter states Heartflow generates critical diagnostic information for the treating physician and an anatomical mapping of FFR values that assists the physician in determining whether an invasive procedure is needed for a patient. Because HeartFlow generates diagnostic information, the commenter believes it can be described as a diagnostic service or a service related to a diagnostic service and can be assigned to APC 5724. The commenter gives examples of software-based services that are already assigned to APC 5724 and notes that the geometric mean cost of CPT code 0503T places the service in the midrange of cost for separately paid services assigned to APC 5724.

Response: We appreciate the commenter's suggestion. However, one of the key reasons we assigned CPT code 0503T to a New Technology APC for CY 2021 and proposed assigning the service again to a New Technology APC for CY 2022, is that we are continuing to seek more cost data for the service before assigning it to a clinical APC. As mentioned earlier, we want to get a better understanding of the cost of HeartFlow as providers become more familiar with reporting and billing for artificial intelligence services. More broadly, we believe we need at least one more year of cost data before assigning HeartFlow to a clinical APC. Our concerns that the CY 2020 claims data and may not represent the outpatient hospital experience in CY 2022 make it challenging to refine or update our payment quality for HeartFlow given the need for additional claims data.

Comment: Several commenters asserted the proposed payment rate for CPT code 0503T is too low and does not reflect their individual hospital's cost to use HeartFlow. Commenters mentioned cost issues, including the $1,100 list price for each individual HeartFlow service and the staff resources involved to transmit data to the HeartFlow analysis facility and review the results of the analyses performed by HeartFlow. Commenters suggested a range of potential payments for a HeartFlow procedure from $1,151 up to $2,100, and they encouraged CMS to use our equitable adjustment authority at section 1833(t)(2)(E) of the Act to establish an OPPS payment rate that would more closely reflect the costs the commenters believe they are incurring to perform the HeartFlow procedure.

Response: For this final rule with comment period, we identified 3,188

claims billed with CPT code 0503T including 465 single frequency claims for CPT code 0503T using claims from CY 2019. Our analysis has found that the geometric mean for CPT code 0503T is $807.58, and the geometric mean cost is lower than the cost band for New Technology APC 1511 New Technology—Level 11 ($901–$1000) where CPT code 0503T is assigned. This result is similar to our results for the proposed rule and the CY 2021 OPPS/ASC final rule, which all used CY 2019 claims data. However, multiple commenters have noted that the FFRCT service costs $1,100 and that there are additional staff costs related to the submission of coronary CT image data for processing by HeartFlow. HeartFlow is one of the first procedures utilizing artificial intelligence to be separately payable in the OPPS, and providers are still learning how to accurately report their charges to Medicare when billing for artificial intelligence services. This is especially the case for allocating the cost of staff resources between the HeartFlow procedure and the coronary CT imaging services. Also, the COVID–19 PHE potentially has affected the quality of the claims and cost data from CY 2020, and we have decided not to use that data to determine the payment rate for CPT code 0503T. That means it is difficult to determine whether the additional costs for HeartFlow that commenters state that their practices are incurring are reflected in the cost data for the service.

Therefore, we believe it is appropriate to continue to use our equitable adjustment authority under section 1833(t)(2)(E) of the Act to assign CPT code 0503T to the same New Technology APC in CY 2022 as in CY 2020 and CY 2021 in order to provide payment stability and equitable payment for providers as they continue to become more familiar with the proper cost reporting for HeartFlow and other artificial intelligence services until we can review more recent reliable claims data. As mentioned earlier in this section, CPT code 0503T was assigned to New Technology APC 1511 (New Technology—Level 11 ($901–$1000)) with a payment rate of $950.50 for CY 2020, and we will continue to assign CPT code 0503T to New Technology APC 1511 for CY 2022.

After reviewing all of the public comments, we are finalizing our proposal without modification to use our equitable adjustment authority under section 1833(t)(2)(E) of the Act to continue to assign CPT code 0503T to New Technology APC 1511 (New Technology—Level 11 ($901–$1000)) for CY 2022. Refer to Table 15 below for the final OPPS APC and status indicator for CPT code 0503T for CY 2022.

TABLE 15: CY 2022 OPPS APC AND STATUS INDICATOR FOR CPT CODE 0503T ASSIGNED TO NEW TECHNOLOGY APC

CPT Code	Long Descriptor	Final CY 2022 OPPS SI	Final CY 2022 OPPS APC	Final CY 2022 OPPS Payment Rate
0503T	Noninvasive estimated coronary fractional flow reserve (ffr) derived from coronary computed tomography angiography data using computation fluid dynamics physiologic simulation software analysis of functional data to assess the severity of coronary artery disease; analysis of fluid dynamics and simulated maximal coronary hyperemia, and generation of estimated ffr model	S	1511	$950.50

e. Cardiac Positron Emission Tomography (PET)/Computed Tomography (CT) Studies (APCs 1522 and 1523)

Effective January 1, 2020, we assigned three CPT codes (78431, 78432, and 78433) that describe the services associated with cardiac PET/CT studies to New Technology APCs. Table 16 lists the code descriptors, status indicators, and APC assignments for these CPT codes. CPT code 78431 was assigned to APC 1522 (New Technology—Level 22 ($2001–$2500)) with a payment rate of $2,250.50. CPT codes 78432 and 78433 were assigned to APC 1523 (New Technology—Level 23 ($2501–$3000)) with a payment rate of $2,750.50. We did not receive any claims data for these services for CY 2021. Therefore, we continued to assign CPT code 78431 to APC 1522 (New Technology—Level 22 ($2001–$2500)) with a payment rate of $2,250.50. Likewise, CPT codes 78432 and 78433 continued to be assigned to APC 1523 (New Technology—Level 23 ($2501–$3000)) with a payment rate of $2,750.50.

For CY 2022, we proposed to use CY 2019 claims data to determine the payment rates for CPT codes 78431, 78432, and 78433. Because these codes did not become active until CY 2020, there are no claims for these three services. Accordingly, we proposed to continue to assign CPT code 78431 to APC 1522 (New Technology—Level 22 ($2001–$2500)) with a payment rate of $2,250.50. Likewise, we proposed that CPT codes 78432 and 78433 would continue to be assigned to APC 1523 (New Technology—Level 23 ($2501–$3000)) with a payment rate of $2,750.50.

Comment: Multiple commenters supported our proposal to assign CPT code 78431 to APC 1522 (New Technology—Level 22 ($2001–$2500)) with a payment rate of $2,250.50, and to assign CPT codes 78432 and 78433 to APC 1523 (New Technology—Level 23

($2501–$3000)) with a payment rate of $2,750.50. Commenters noted that there were no available claims data for these services as we are using CY 2019 claims data for CY 2022 ratesetting, and these codes did not become active until January 2020.

Response: We appreciate the support of the commenters for our policy. After our review of the public comments, we have decided to implement our proposal without modification. Table 16 lists code descriptors, status indicators, and APC assignments for these CPT codes.

BILLING CODE 4120–01–P

TABLE 16: CY 2022 OPPS APC AND STATUS INDICATOR FOR CPT CODES 78431, 78432, AND 78433 ASSIGNED TO NEW TECHNOLOGY APCS

CPT Code	Long Descriptor	CY 2021 OPPS SI	CY 2021 OPPS APC	Final CY 2022 OPPS SI	Final OPPS CY 2022 APC
78431	Myocardial imaging, positron emission tomography (PET), perfusion study (including ventricular wall motion[s] and/or ejection fraction[s], when performed); multiple studies at rest and stress (exercise or pharmacologic), with concurrently acquired computed tomography transmission scan	S	1522	S	1522
78432	Myocardial imaging, positron emission tomography (PET), combined perfusion with metabolic evaluation study (including ventricular wall motion[s] and/or ejection fraction[s], when performed), dual radiotracer (e.g., myocardial viability);	S	1523	S	1523
78433	Myocardial imaging, positron emission tomography (PET), combined perfusion with metabolic evaluation study (including ventricular wall motion[s] and/or ejection fraction[s], when performed), dual radiotracer (e.g., myocardial viability); with concurrently acquired computed tomography transmission scan	S	1523	S	1523

BILLING CODE 4120–01–C

f. V-Wave Medical Interatrial Shunt Procedure (APC 1590)

A randomized, double-blinded, controlled IDE study is currently in progress for the V-Wave interatrial shunt. The V-Wave interatrial shunt is for patients with severe symptomatic heart failure and is designed to regulate left atrial pressure in the heart. All participants who passed initial screening for the study receive a right heart catheterization procedure described by CPT code 93451 (Right heart catheterization including measurement(s) of oxygen saturation and cardiac output, when performed). Participants assigned to the experimental group also receive the V-Wave interatrial shunt procedure while participants assigned to the control group only receive right heart catheterization. The developer of V-Wave was concerned that the current coding of these services by Medicare would reveal to the study participants whether they have received the interatrial shunt because an additional procedure code, CPT code 93799 (Unlisted cardiovascular service or procedure), would be included on the claims for participants receiving the interatrial shunt. Therefore, for CY 2020, we created a temporary HCPCS code to describe the V-wave interatrial shunt procedure for both the experimental group and the control group in the study. Specifically, we established HCPCS code C9758 (Blinded procedure for NYHA class III/IV heart failure; transcatheter implantation of interatrial shunt or placebo control, including right heart catheterization, trans-esophageal echocardiography (TEE)/intracardiac echocardiography

(ICE), and all imaging with or without guidance (for example, ultrasound, fluoroscopy), performed in an approved investigational device exemption (IDE) study) to describe the service, and we assigned the service to New Technology APC 1589 (New Technology—Level 38 ($10,001–$15,000)).

We stated in the CY 2021 OPPS/ASC final rule with comment period that we believe that similar resources and device costs are involved with the V-Wave interatrial shunt procedure and the Corvia Medical interatrial shunt procedure (85 FR 85946). Therefore, the difference in the payment for HCPCS codes C9758 and C9760 is based on how often the interatrial shunt is implanted when each code is billed. An interatrial shunt is implanted one-half of the time HCPCS code C9758 is billed. Accordingly, for CY 2021, we reassigned HCPCS code C9758 to New Technology APC 1590, which reflects the cost of having surgery every time and receiving the interatrial shunt one-half of the time when the procedure is performed.

For CY 2022, we are using the same claims data that we did for CY 2021. Because there are no claims reporting HCPCS code C9758, we proposed to continue to assign HCPCS code C9758 to New Technology APC 1590 with a payment rate of $17,500.50 for CY 2022.

Comment: Multiple commenters including the manufacturer supported our proposal to continue to assign HCPCS code C9758 to New Technology APC 1590 with a payment rate of $17,500.50 for CY 2022.

Response: We appreciate the support of the commenters for our proposal. After reviewing the public comments, we are finalizing our proposal without modification. Details about the HCPCS code and its APC assignment are shown in Table 17. The final CY 2022 payment rate for C9758 can be found in Addendum B to this final rule with comment period.

TABLE 17: CY 2022 OPPS APC AND STATUS INDICATOR FOR BLINDED INTRATRIAL SHUNT PROCEDURE ASSIGNED TO A NEW TECHNOLOGY APC

HCPCS Code	Long Descriptor	Final 2022 OPPS SI	Final 2022 OPPS APC
C9758	Blinded procedure for NYHA class III/IV heart failure; transcatheter implantation of interatrial shunt or placebo control, including right heart catheterization, trans-esophageal echocardiography (TEE)/intracardiac echocardiography (ICE), and all imaging with or without guidance (for example, ultrasound, fluoroscopy), performed in an approved investigational device exemption (IDE) study	T	1590

g. Corvia Medical Interatrial Shunt Procedure (APC 1592)

Corvia Medical is currently conducting its pivotal trial for their interatrial shunt procedure. The trial started in Quarter 1 of CY 2017 and is scheduled to continue through CY 2021.[22] On July 1, 2020, we established HCPCS code C9760 (Non-randomized, non-blinded procedure for nyha class ii, iii, iv heart failure; transcatheter implantation of interatrial shunt or placebo control, including right and left heart catheterization, transeptal puncture, trans-esophageal echocardiography (tee)/intracardiac echocardiography (ice), and all imaging with or without guidance (for example, ultrasound, fluoroscopy), performed in an approved investigational device exemption (ide) study) to facilitate the implantation of the Corvia Medical interatrial shunt.

As we stated in the CY 2021 OPPS final rule with comment period, we believe that similar resources and device costs are involved with the Corvia Medical interatrial shunt procedure and the V-Wave interatrial shunt procedure (85 FR 85947). Therefore, the difference in the payment for HCPCS codes C9760 and C9758 is based on how often the interatrial shunt is implanted when each code is billed. The Corvia Medical interatrial shunt is implanted every time HCPCS code C9760 is billed. Therefore, for CY 2021, we assigned HCPCS code C9760 to New Technology APC 1592 (New Technology—Level 41 ($25,001–$30,000)) with a payment rate of $27,500.50. We also modified the code descriptor for HCPCS code C9760 to remove the phrase ''or placebo control,'' from the descriptor. For CY 2022, we proposed to use the same claims data as in CY 2021 to establish payment rates for services. Therefore, there are no claims for HCPCS code C9760, and we proposed to continue to assign HCPCS code C9760 to New Technology APC 1592.

Comment: Multiple commenters, including the manufacturer, supported our proposal to continue to assign HCPCS code C9760 to New Technology APC 1592.

Response: We appreciate the support of the commenters of our proposal.

Comment: One commenter, the manufacturer, requested that CPT code 0613T (Percutaneous transcatheter implantation of interatrial septal shunt device, including right and left heart catheterization, intracardiac echocardiography, and imaging guidance by the proceduralist, when performed) be assigned to comprehensive APC 5194 (Level 4

[22] *https://clinicaltrials.gov/ct2/show/NCT03088033?term=NCT03088033&rank=1.*

Endovascular Procedures) for CY 2022 and assigned a status indicator of ''J1''. CPT code 0613T is the CPT code that will be used to report the Corvia Medical interatrial shunt procedure once the Corvia Medical interatrial shunt device associated with the procedure receives approval from the FDA, which the manufacturer believes will occur in CY 2022. Currently, CPT code 0613T is a non-payable service code and is assigned a status indicator of ''E1''.

Response: We will assign CPT code 0613T to a payable status indicator and assign the service to a clinically-appropriate APC when the Corvia Medical interatrial shunt device associated with the procedure has received approval from the FDA. OPPS payment policies are updated quarterly through a sub-regulatory process. If the Corvia Medical interatrial shunt device receives FDA approval, we will work to ensure a timely transition for the overall procedure to be reported with CPT code 0613T and end reporting of the service with HCPCS code C9760. We will also work to assign CPT code 0613T to an APC that reflects clinical and resource similarity to CPT code 0613T.

Details about the HCPCS code and its APC assignment are shown in Table 18. The final CY 2022 payment rate for C9760 can be found in Addendum B to this final rule with comment period.

TABLE 18: CY 2022 OPPS APC AND STATUS INDICATOR FOR NON-RANDOMIZED, NON-BLINDED INTRATRIAL SHUNT PROCEDURE ASSIGNED TO A NEW TECHNOLOGY APC

HCPCS Code	Long Descriptor	Final 2022 OPPS SI	Final 2022 OPPS APC
C9760	Non-randomized, non-blinded procedure for nyha class ii, iii, iv heart failure; transcatheter implantation of interatrial shunt including right and left heart catheterization, transeptal puncture, trans-esophageal echocardiography (tee)/intracardiac echocardiography (ice), and all imaging with or without guidance (eg, ultrasound, fluoroscopy), performed in an approved investigational device exemption (ide) study	T	1592

h. Supervised Visits for Esketamine Self-Administration (APCs 1508 and 1511)

On March 5, 2019, FDA approved Spravato™ (esketamine) nasal spray, used in conjunction with an oral antidepressant, for treatment of depression in adults who have tried other antidepressant medicines but have not benefited from them (treatment-resistant depression (TRD)). Because of the risk of serious adverse outcomes resulting from sedation and dissociation caused by Spravato administration, and the potential for abuse and misuse of the product, it is only available through a restricted distribution system under a Risk Evaluation and Mitigation Strategy (REMS). A REMS is a drug safety program that FDA can require for certain medications with serious safety concerns to help ensure the benefits of the medication outweigh its risks.

A treatment session of esketamine consists of instructed nasal self-administration by the patient, followed by a period of post-administration observation of the patient under direct supervision of a health care professional. Esketamine is a noncompetitive N-methyl D-aspartate (NMDA) receptor antagonist. It is a nasal spray supplied as an aqueous solution of esketamine hydrochloride in a vial with a nasal spray device. This is the first FDA approval of esketamine for any use. Each device delivers two sprays containing a total of 28 mg of esketamine. Patients would require either two (2) devices (for a 56 mg dose) or three (3) devices (for an 84 mg dose) per treatment.

Because of the risk of serious adverse outcomes resulting from sedation and dissociation caused by Spravato administration, and the potential for abuse and misuse of the product, Spravato is only available through a restricted distribution system under a REMS; patients must be monitored by a health care provider for at least 2 hours after receiving their Spravato dose; the prescriber and patient must both sign a Patient Enrollment Form; and the product will only be administered in a certified medical office where the health care provider can monitor the patient. Please refer to the CY 2020 PFS final rule and interim final rule for more information about supervised visits for esketamine self-administration (84 FR 63102 through 63105).

To facilitate prompt beneficiary access to the new, potentially life-saving treatment for TRD using esketamine, we created two new HCPCS G codes, G2082 and G2083, effective January 1, 2020. HCPCS code G2082 is for an outpatient visit for the evaluation and management of an established patient that requires the supervision of a physician or other qualified health care professional and provision of up to 56 mg of esketamine through nasal self-administration and includes 2 hours post-administration observation. HCPCS code G2082 was assigned to New Technology APC 1508 (New Technology—Level 8 ($601—$700)) with a payment rate of $650.50. HCPCS code G2083 describes a similar

service to HCPCS code G2082, but involves the administration of more than 56 mg of esketamine. HCPCS code G2083 was assigned to New Technology APC 1511 (New Technology—Level 11 ($901–$1000)) with a payment rate of $950.50.

For CY 2022, we are using CY 2019 claims data to determine the payment rates for HCPCS codes G2082 and G2083. Since these codes did not become active until CY 2020, there are no claims for these two services. Therefore, for CY 2022, we proposed to continue to assign HCPCS code G2082 to New Technology APC 1508 (New Technology—Level 8 ($601–$700)) and to assign HCPCS code G2083 to New Technology APC 1511 (New Technology—Level 11 ($901–$1000)).

Comment: One commenter, the manufacturer, while understanding the rationale for our proposal to use CY 2019 claims data for CY 2022 ratesetting, asked us to take into consideration CY 2020 claims data to finalize payment rates for HCPCS codes G2082 and G2083. The commenter noted that HCPCS codes G2082 and G2083 were not payable in CY 2019, and therefore there is no cost information in the CY 2019 claims data for these two procedures. The commenter also believes that CY 2020 data may show that the cost of G2082 and G2083 is substantially higher than the current New Technology APC assignments for the two services.

Response: We reviewed the available CY 2020 OPPS claims data in response to the request by the commenter for HCPCS codes G2082 and G2083, but we decided that there were not enough data available to determine whether to change the APC assignments for HCPCS codes G2082 and G2083. We would like to review another year of claims data for HCPCS codes G2082 and G2083 to assess the reliability of the cost information for CY 2020 and CY 2021 before using claims data to base our APC assignments for these services. Therefore, we will continue to use the same APC assignments for HCPCS codes G2082 and G2083 for CY 2022 as for CY 2021.

After reviewing the public comments for this proposal, we have decided to implement our proposal without modification to assign HCPCS code G2082 to New Technology APC 1508 and to assign HCPCS code G2083 to New Technology APC 1511. Details about the HCPCS codes and their APC assignments are shown in Table 19. The final CY 2022 payment rate for esketamine self-administration can be found in Addendum B to this final rule with comment period.

TABLE 19: CY 2021 OPPS APC AND STATUS INDICATOR FOR ESKETAMINE SELF-ADMINISTRATION HCPCS CODES ASSIGNED TO NEW TECHNOLOGY APCS

HCPCS Code	Long Descriptor	CY 2021 OPPS SI	CY 2021 OPPS APC	Final CY 2022 OPPS SI	Final CY 2021 OPPS APC
G2082	Office or other outpatient visit for the evaluation and management of an established patient that requires the supervision of a physician or other qualified health care professional and provision of up to 56 mg of esketamine nasal self-administration, includes 2 hours post-administration observation	S	1508	S	1508
G2083	Office or other outpatient visit for the evaluation and management of an established patient that requires the supervision of a physician or other qualified health care professional and provision of greater than 56 mg esketamine nasal self-administration, includes 2 hours post-administration observation	S	1511	S	1511

i. DARI Motion Procedure (APC 1505)

CPT code 0693T (Comprehensive full body computer-based markerless 3D kinematic and kinetic motion analysis and report) will be effective January 1, 2022. The technology consists of eight cameras that surround a patient. The cameras send live video to a computer workstation that analyzes the video to create a 3D reconstruction of the patient without the need for special clothing, markers or devices attached to the patient's clothing or skin. The technology is intended to guide health care providers on pre and post-operative surgical intervention and on the best course of physical therapy and rehabilitation for patients.

As displayed in Addendum B to the CY 2022 OPPS/ASC proposed rule, we

proposed to assign CPT code 0693T to APC 5721 (Level 1 Diagnostics and Related Services) with a proposed payment rate of $143.21. We note that CPT code 0693T was listed as placeholder code 0X60T in OPPS Addendum B of the CY 2021 OPPS/ASC proposed rule.

Comment: One commenter, the manufacturer of the DARI Motion procedure, requested that CMS assign CPT code 0693T to APC 5723 (Level 3 Diagnostics and Related Services) with a payment rate of $498.53. The commenter believed that the payment rate for APC 5721 is inadequate and will create a barrier to patient access.

Response: We appreciate the concerns of the commenter and, for the reasons set forth below, agree that the proposed payment rate for CPT code 0693T may be too low and the procedure should be reassigned to a different APC.

The AMA releases Category III codes in January, for implementation beginning the following July, and in July, for implementation beginning the following January. DARI Motion received a Category III code scheduled for implementation January 1, 2022. Some Category III CPT codes describe services that we have determined are not compatible with an existing clinical APC, yet are appropriately provided in the hospital outpatient setting. In these cases, we may assign the Category III CPT code to what we estimate is an appropriately priced New Technology APC (71 FR 68015). In addition, it should be noted that, with all new codes, CMS's policy has been to assign the service to an APC based on input from a variety of sources, including but not limited to review of the clinical similarity of the service to existing procedures, input from CMS medical advisors, information from interested specialty societies, review of all other information available to us, including information provided to us by the public, whether through meetings with stakeholders or additional information that is mailed or otherwise communicated to us. Based on information from the manufacturer, resources involved for the procedure described by CPT code 0693T appear to be higher than the payment rate for APC 5721 (Level 1 Diagnostics and Related Services). CPT code 0693T is new for CY 2022 and, therefore, we had no claims data available for OPPS ratesetting. Further, based on input from our medical advisors and our understanding of the service, we believe that it is more appropriate to assign the DARI Motion procedure to APC 1505 (New Technology—Level 5 ($301–$400)), for CY 2022. We believe that assigning CPT code 0693T to New Technology APC 1505 will allow CMS to collect claims data before assigning CPT code 0693T to a clinical APC.

Comment: A commenter argued the assignment of CPT code 0693T to APC 5721 would create a 2 times rule violation within the APC based on geometric mean costs. The commenter calculated the 2-times threshold by multiplying the lowest cost significant procedure by 2 and arrived at a 2-times threshold. According to the commenter, the 2-times threshold they calculated for APC 5721 is a lower payment rate than the technology described by CPT code 0693T. The commenter asserted that assigning CPT code 0693T to APC 5721 is a violation of the 2 times rule.

Response: We thank the commenter for their feedback. To clarify, we determine APC 2 times rule violations by considering only those HCPCS codes that are significant based on the number of claims. We note that, for purposes of identifying significant procedure codes for examination under the 2 times rule, we consider procedure codes that have more than 1,000 single major claims or procedure codes that both have more than 99 single major claims and contribute at least 2 percent of the single major claims used to establish the APC cost to be significant (75 FR 71832). CPT code 0693T is new for CY 2022 and, therefore, we had no claims data available for purposes of determining whether a 2 times rule violation occurs based on the code.

In summary, after consideration of the public comments, we are finalizing our proposal with modification, and assigning CPT code 0693T to New Technology APC 1505 (New Technology—Level 5 ($301–$400)), for CY 2022. The final APC assignment and status indicator for CPT code 0693T are found in Table 20. We refer readers to Addendum B of this final rule with comment period or the final payment rates for all codes reportable under the OPPS. Addendum B is available via the internet on the CMS website.

As we do for all codes, we will reevaluate the APC assignments for CPT code 0693T once we have claims data. We remind hospitals that we review, on an annual basis, the APC assignments for all services and items paid under the OPPS based on the latest claims data.

TABLE 20: FINAL CY 2022 STATUS INDICATOR AND APC ASSIGNMENT FOR THE DARI MOTION PROCEDURE

CPT Code	Long Descriptor	Proposed CY 2022 OPPS SI	Proposed CY 2022 OPPS APC	Proposed CY 2022 OPPS Payment Rate	Final CY 2022 OPPS SI	Final CY 2022 OPPS APC	Final CY 2022 OPPS Payment Rate
0693T	Comprehensive full body computer-based markerless 3D kinematic and kinetic motion analysis and report	S	5721	$143.21	S	1505	Refer to OPPS Addendum B

j. Histotripsy Service (APC 1575)

Histotripsy is a non-invasive, non-thermal, mechanical process that uses a focused beam of sonic energy to destroy targeted cancerous liver tumors. The AMA's CPT Editorial Panel established a new code to describe the service associated with histotripsy, specifically, Category III CPT code, 0686T (Histotripsy (that is, non-thermal ablation via acoustic energy delivery) of malignant hepatocellular tissue, including image guidance), effective July 1, 2021.

As displayed in Addendum B of the CY 2022 OPPS/ASC proposed rule with comment period, for CY 2022, we proposed to assign the new code to APC 5311 (Level 1 Lower GI Procedures) with a payment rate of $814.44 effective January 1, 2022.

Comment: One commenter, the manufacturer of histotripsy, stated that histotripsy is a new technology that delivers short pulses of ultrasound energy, resulting in acoustic cavitation that mechanically destroys the targeted cancerous liver tumors while avoiding damage to intervening or surrounding healthy tissues. The commenter stated that the proposed assignment of CPT code 0686T to APC 5311 (Level 1 Lower GI Procedures) was not clinically or resource cohesive to histotripsy. The commenter reported a list of HCPCS codes currently assigned to APC 5311 and argued that the codes are not clinically or resource similar to histotripsy. The commenter referenced histotripsy's IDE clinical study (G200253–NCT04573881) and provided a description of the histotripsy procedure and a breakdown of the associated resource components. The commenter also provided a cost estimate of each resource, such as the device cost, the associated imaging cost, and total room time. The commenter stated that the total cost for the procedure is $22,782.51 and requested assignment to a New Technology APC 1577 for the histotripsy service.

Response: We appreciate the commenter's input on this new technology. As stated in the CY 2002 OPPS final rule, CMS staff will obtain information on cost from other appropriate sources before making a final determination on the cost of the procedure or service to hospital outpatient facilities (66 FR 59900). We note that for Category A IDE studies, Medicare may not furnish payment for costs associated with the histotripsy device since Category A devices are statutorily excluded from Medicare coverage. Based on our evaluation, for CY 2022, we estimated the cost of histotripsy, after removing the device cost, is within the cost band between $10,001 and $15,000. Accordingly, we believe reassigning CPT code 0686T to APC 1575 (New Technology—Level 38 ($10,001–$15,000)), with a payment rate of $12,500.50, more appropriately reflects the costs for which Medicare may provide payment. We note that we retain services within New Technology APC groups until we obtain sufficient claims data to justify reassignment of the service to a clinically appropriate APC.

In summary, after consideration of the public comments, we are finalizing our proposal with modifications. Specifically, we are assigning CPT code 0686T to APC 1575 for CY 2022. The final CY 2022 OPPS payment rates for this code can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 of this final rule with comment period for the SI meanings for all codes reported under the OPPS. Both Addenda B and D1 are available via the internet on the CMS website.

k. Liver Multiscan Service (APC 1511)

Liver MultiScan is a Software as a medical Service (SaaS) that is intended to aid the diagnosis and management of chronic liver disease, the most prevalent of which is Non-Alcoholic Fatty Liver Disease (NAFLD). It provides standardized, quantitative imaging biomarkers for the characterization and assessment of inflammation, hepatocyte ballooning, and fibrosis, as well as steatosis, and iron accumulation. The SaaS receives MR images acquired from patients' providers and analyzes the images using their proprietary Artificial Intelligence (AI) algorithms. The SaaS then send the providers a quantitative metric report of the patient's liver fibrosis and inflammation. The AMA CPT Editorial Panel established two new codes, specifically, Category III CPT codes 0648T and 0649T for LiverMultiScan effective July 1, 2021, and CMS assigned the Category III CPT code 0648T to APC 5523 (Level 3 Imaging without Contrast) with a status indicator of ''S'' effective July 1, 2021. We note that CPT code 0649T is packaged per our packaging policy for add-on code procedures. For the complete code descriptors for both codes, refer to Table 21.

For CY 2022, we proposed to assign CPT code 0648T to APC 5523 (Level 3 Imaging without Contrast) with a payment rate of $236.14 effective January 1, 2022, and assign the add-on code, CPT code 0649T, to OPPS status indicator ''N'' (packaged) to indicate that payment for the add-on service is included in the primary service.

TABLE 21: PROPOSED OPPS SI FOR CPT CODES 0648T AND 0649T

CPT Code	Long Description	Proposed OPPS SI
0648T	Quantitative magnetic resonance for analysis of tissue composition (eg, fat, iron, water content), including multiparametric data acquisition, data preparation and transmission, interpretation and report, obtained without diagnostic MRI examination of the same anatomy (eg, organ, gland, tissue, target structure) during the same session	S
0649T	Quantitative magnetic resonance for analysis of tissue composition (eg, fat, iron, water content), including multiparametric data acquisition, data preparation and transmission, interpretation and report, obtained with diagnostic MRI examination of the same anatomy (eg, organ, gland, tissue, target structure) (List separately in addition to code for primary procedure)	N

Comment: Several commenters stated that LiverMultiScan is a new technology that represents a breakthrough for the diagnosis and monitoring of chronic parenchymal liver disease that will reduce the number of invasive procedures. The commenters stated that LiverMultiScan is an MRI measure of hepatic steatosis with performance equivalent to liver biopsy and superior to liver fat measures using ultrasound. Some commenters cited that biopsy is the gold standard for diagnosis, but it is not commonly used because of cost, patient discomfort, risk of complications, and possible sampling error. Another commenter stated that LiverMultiScan has excellent diagnostic accuracy for at-risk Nonalcoholic steotohepatitis (NASH), detects changes in response to investigational treatments within a very short timeframe, and predicts clinical outcomes in patients with liver disease as well as liver biopsy. The commenters believe LiverMultiScan improves the management of NAFLD by helping patients connect with their liver health, which encourages these patients to their recommended course of treatment. The commenters stated the assignment of CPT code 0648T to APC 5523 (Level 3 Imaging without Contrast) does not adequately cover the cost of delivering this service and discourages adoption of advanced liver care. The commenters stated that their hospital outpatient cost for the service is between $1,300 to $1,500 (versus approximately $7,000 for a liver biopsy), and they requested assignment of LiverMultiScan to a New Technology APC. One commenter referenced CMS's decision on Heartflow, which was initially packaged and then later recognized as a distinct service. The commenter requested CMS recognize LiverMultiScan as a distinct service.

Response: We appreciate the commenters' feedback on this new technology. We note that before we assign a new service to a New Technology APC, we first perform our own cost analysis and cost estimate. As we stated in the CY 2002 OPPS final rule (66 FR 59900), we do not limit our determination of the cost of the procedure to information suggested by the commenters (or information submitted by the applicant for New Technology applications). To appropriately assign a service to a New Technology APC, our staff will obtain information on cost from other appropriate sources, including acquiring input from our medical advisors on the appropriateness of the service in the hospital outpatient setting, before making a final determination on the cost of the procedure or service. Based on the information provided, we recognize that LiverMultiScan is a new technology that will aid in the management of beneficiaries with NAFLD, which may avoid liver biopsies. We note that liver biopsy remains the current gold standard for diagnosing NASH, determining grade disease severity, and accurately staging fibrosis. Based on our evaluation of the service, we agree with the commenter's suggested reference to Heartflow. That is, we believe that LiverMultiScan and Heartflow share similar characteristics based on the nature of how the service is provided in the hospital outpatient setting. Both LiverMultiScan and Heartflow require the acquisition of radiological images as well as analysis of the images using proprietary AI algorithms to assist clinicians in appropriately diagnosing a patient's medical condition. In addition, our analysis of the estimated cost associated for this service is between $901 and $1,000. Therefore, after further evaluation of the service and the resources required to perform the LiverMultiScan analysis, we believe it is appropriate to assign this service to a New Technology APC, specifically, APC 1511 (New Technology—Level 11 ($901–$1000)), which is the same APC assignment for Heartflow. Accordingly, we are assigning CPT code 0648T to New Technology APC 1511). We note that we retain services within New Technology APC groups until we obtain sufficient claims data to justify reassignment of the service to a clinically appropriate APC. For CPT code 0649T, an add-on code, we believe that our assignment of the status indicator of ''N'' is appropriate under 42 CFR 419.2(b). We note that CMS does not create the Category III CPT codes or their descriptors, but we follow an established set of payment policies consistent with our OPPS packaging policy. As stated in section III.A. ''OPPS Treatment of New and Revised HCPCS Codes'' of this final rule with comment period, CPT codes are established and maintained by the American Medical Association (AMA), and changes to CPT codes should be referred to the AMA.

In summary, after consideration of the public comment, we are finalizing our proposal with modification, to assign CPT code 0648T to New Technology APC 1511 ((New Technology—Level 11 ($901–$1000), for CY 2022. Also, we are finalizing our proposal, without

modification, for CPT code 0649T and assigning the code to OPPS status indicator ''N'' for CY 2022. The final APC assignment and status indicators for CPT codes 0648T and 0649T can be found in OPPS Addendum B. We refer readers to Addendum B of the final rule for the final payment rates for all codes reportable under the OPPS. In addition, we refer readers to Addendum D1 of this final rule with comment period for the SI meanings for all codes reported under the OPPS. Both Addendum B and Addendum D1 are available via the internet on the CMS website.

l. Minimally Invasive Glaucoma Surgery (MIGS) (APCs 5491 and 5492)

Prior to CY 2022, extracapsular cataract removal with insertion of intraocular lens was reported using CPT codes describing cataract removal alongside a CPT code for device insertion. Specifically, the procedure was described using CPT codes 66982 (Extracapsular cataract removal with insertion of intraocular lens prosthesis (1-stage procedure), manual or mechanical technique (for example, irrigation and aspiration or phacoemulsification), complex, requiring devices or techniques not generally used in routine cataract surgery (for example, iris expansion device, suture support for intraocular lens, or primary posterior capsulorrhexis) or performed on patients in the amblyogenic developmental stage; without endoscopic cyclophotocoagulation) or 66984 (Extracapsular cataract removal with insertion of intraocular lens prosthesis (1-stage procedure), manual or mechanical technique (for example, irrigation and aspiration or phacoemulsification); without endoscopic cyclophotocoagulation) and 0191T (Insertion of anterior segment aqueous drainage device, without extraocular reservoir, internal approach, into the trabecular meshwork; initial insertion). For CY 2022, the AMA's CPT Editorial Panel created two new Category I CPT codes describing extracapsular cataract removal with insertion of intraocular lens prosthesis, specifically, CPT codes 66989 and 6691, deleted a Category III CPT code, specifically, CPT code 0191T, describing insertion of anterior segment aqueous drainage device, and created a new Category III CPT code, specifically, CPT code 0671T, describing interior segment aqueous drainage device without concomitant cataract removal. We proposed the following APC assignment:

- CPT code 66989 (Extracapsular cataract removal with insertion of intraocular lens prosthesis (1-stage procedure), manual or mechanical technique (*e.g.,* irrigation and aspiration or phacoemulsification), complex, requiring devices or techniques not generally used in routine cataract surgery (*e.g.,* iris expansion device, suture support for intraocular lens, or primary posterior capsulorrhexis) or performed on patients in the amblyogenic developmental stage; with insertion of intraocular (*e.g.,* trabecular meshwork, supraciliary, suprachoroidal) anterior segment aqueous drainage device, without extraocular reservoir, internal approach, one or more) to APC 5492 (Level 2 Intraocular Procedures) with a proposed status indicator (SI) of ''J1'' and proposed payment rate of $4,018.82. We note this code was listed as placeholder code 669X1 in the OPPS Addendum B of the CY 2022 OPPS/ASC proposed rule.
- CPT code 66991 (Extracapsular cataract removal with insertion of intraocular lens prosthesis (1 stage procedure), manual or mechanical technique (for example, irrigation and aspiration or phacoemulsification); with insertion of intraocular (for example, trabecular meshwork, supraciliary, suprachoroidal) anterior segment aqueous drainage device, without extraocular reservoir, internal approach, one or more) to APC 5492. We note this code was listed as placeholder code 669X2 in the OPPS Addendum B of the CY 2022 OPPS/ASC proposed rule.
- CPT code 0671T (Insertion of anterior segment aqueous drainage device into the trabecular meshwork, without external reservoir, and without concomitant cataract removal, one or more) to APC 5491 (Level 1 Intraocular Procedures) with a proposed SI of ''J1'' and a proposed payment rate of $2,131.25. We note this code was listed as placeholder code 0X12T in the OPPS Addendum B of the CY 2022 OPPS/ASC proposed rule.

At the August 23, 2021 HOP Panel Meeting, a presenter requested that we reassign CPT codes 66989 and 66991 to APC 5493 (Level 3 Intraocular Procedures) with a proposed payment rate of $7,529.00, and reassign 0671T to APC 5492, citing concerns over a decrease in payment for MIGS between how it is currently coded and how it will be coded beginning January 1, 2022. Based on the discussion during the meeting, the HOP Panel recommended that CMS reassign CPT codes 66989 and 66991 to APC 5493 and reassign 0671T to APC 5492.

Comment: Most commenters opposed the proposed APC assignment for these services and recommended that CMS implement the APC assignments recommended by the HOP Panel. They stated that the proposed APC assignments do not accurately account for the costs associated with MIGS and would result in an overall decrease in payment for MIGS from the current payment rates and that this decrease would negatively impact access to this service. Commenters stated placement in APC 5493 and APC 5492 would better account for the resources associated with performing CPT codes 66989 and 66991, and CPT code 0671T, respectively. Commenters also suggested that CMS could consider assignment of these services to a New Technology APC or create an incremental intraocular APC between APC 5492 and 5493.

Response: We do not believe that the costs associated with performing MIGS are accurately reflected by APC 5493. We note that while APC 5491 (Level 1 Intraocular Procedures) and APC 5492 have 40 or greater separately payable services assigned to them, only one service is assigned to the APCs 5493, 5494, and 5495 (Level 3–5 Intraocular Procedures, respectively). In instances where a single procedure is assigned to an APC, the geometric mean cost and the resulting payment rate is largely based on the geometric mean of the individual service assigned to the APC. However, we note that while only one service is assigned to APC 5493, there are certain complexity adjustments that move certain services assigned to the APC 5492 to APC 5493 when billed concurrently. These changes are also reflected in the claims data we use to develop geometric mean costs and the resulting payment rates. We note that the proposed payment rate for APC 5493 is almost double the payment rate for APC 5492. We also believe that the change in coding for MIGS is significant in that it changes longstanding billing for the service from reporting two separate CPT codes to reporting a single bundled code. Without claims data, and given the magnitude of the coding change, we do not believe we have the necessary information on the costs associated with CPT codes 66989 and 66991 to assign them to a clinical APC at this time. We agree with commenters that reassignment to a New Technology APC will maintain payment accuracy for these services while we collect cost data to support reassignment to the relevant clinical APC. We believe that APC 1526 (New Technology—Level 26 ($4001–$4500)), with a payment rate of $4,250.50, most accurately accounts for the resources associated with furnishing MIGS.

We regard to CPT code 0671T, we note that this code describes insertion of

intraocular lens without concurrent cataract removal and would not be billed alongside CPT codes 66989 or 66991. Based on our review of the clinical characteristics of the procedure and input from our medical advisors, we continue to believe that this service is more similar to the other services in APC 5491.

In summary, after consideration of the public comments, we are finalizing the reassignment of CPT codes 66989 and 66991 to APC 1526 and assignment of CPT code 0671T to APC 5491. The final CY 2022 OPPS payment rates for this code can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 to this final rule with comment period for the status indicator (SI) meanings for all codes reported under the OPPS. Both Addendum B and D1 are available via the internet on the CMS website.

m. Scalp Cooling (APC 1520)

For July 1, 2021, the CPT Editorial Panel created CPT code 0662T to describe initial measurement and calibration of a scalp cooling device for use during chemotherapy administration to prevent hair loss. For CY 2022, we proposed to assign CPT code 0662T (Scalp cooling, mechanical; initial measurement and calibration of cap) to APC 5732 (Level 2 Minor Procedures) with a proposed payment rate of $34.72.

At the August 23, 2021 HOP Panel Meeting, a presenter requested that we reassign CPT code 0662T to one of the following APCs:

- APC 5054 (Level 4 Skin Procedures) with a proposed payment rate of $1,759.21,
- APC 5055 (Level 5 Skin Procedures) with a proposed payment rate of $3,613.14,
- APC 1519 (New Technology—Level 19 ($1,701–$1,800)) with a proposed payment rate of $1,750.50, or
- APC 1520 (New Technology—Level 20 ($1,801–$1,900)) with a proposed payment rate of $1,850.50

Based on the information presented, the HOP Panel recommended that CMS assign CPT code 0662T to a New Technology APC.

Comment: Commenters encouraged CMS to accept the HOP Panel's recommendation and assign CPT code 0662T to APC 1519 or 1520 or reassign CPT code 0662T to either APC 5054 or 5055. Commenters stated that the cost of the scalp cooling cap itself was around $600 and that the rest of the costs associated with performing the measurement and calibration were around $2,500–$3,000.

Response: Based on the information presented at the HOP Panel meeting, as well as input from our clinical advisors, and analysis of the information provided by the commenters, we believe that the procedure described by CPT code 0662T should be assigned to a New Technology APC. We note that according to Medicare's National Coverage Determination (NCD) policy, specifically, NCD 110.6 (Scalp Hypothermia During Chemotherapy to Prevent Hair Loss), the scalp cooling cap itself is classified as an incident to supply to a physician service, and would not be paid under the OPPS; however, stakeholders have indicated that there are substantial resource costs associated with calibration and fitting of the cap. Based on the estimate of costs provided by the commenter, without taking into account the costs of the cap, the overall cost associated with CPT code 0662T is between $1,900–$2,400, supporting reassignment to New Technology APC 1520. CPT guidance states that CPT code 0662T should be billed once per chemotherapy session, which we interpret to mean once per course of chemotherapy. Therefore, if a course of chemotherapy involves 6 or 18 sessions, HOPDs should report CPT 0662T only once for that 6 or 18 therapy sessions. We note that we review, on an annual basis, the APC assignments for all items and services paid under the OPPS.

In summary, after consideration of the public comments, we are finalizing our proposal with modification. Specifically, we are finalizing assignment of CPT code 0662T to APC New Technology 1520. The final CY 2022 OPPS payment rate for this code can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 of this final rule with comment period for the status indicator (SI) meanings for all codes reported under the OPPS. Both Addendum B and D1 are available via the internet on the CMS website.

D. OPPS APC-Specific Policies

1. AccuCinch Ventricular Restoration Procedure

For the July 2021 update, the AMA's CPT Editorial Panel established CPT code 0643T (Transcatheter left ventricular restoration device implantation including right and left heart catheterization and left ventriculography when performed, arterial approach) to describe the AccuCinch device implantation procedure. For CY 2022, we proposed to assign the code to OPPS status indicator ''E1'' (Items, codes, and services not covered by any Medicare outpatient benefit category; statutorily excluded; not reasonable and necessary) to indicate that the service is not covered by Medicare.

Comment: A commenter requested the reassignment in the status indicator to OPPS status indicator ''C'' (inpatient-only) since this is the more appropriate assignment for the ventricular restoration therapy based on the complex patient population enrolled in the US clinical trial. The commenter explained that the investigational device, the AccuCinch® Ventricular Restoration System, is currently under evaluation in the CORCINCH–HF pivotal trial (NCT04331769).

Response: Based on our review of the clinical study, input from our medical advisors, as well review of Medicare's coverage policy for this clinical trial, we agree with the commenter. Review of the clinical study indicates that the CORCINCH–HF study (*https://clinicaltrials.gov/ct2/show/NCT04331769*) is a prospective, randomized, control multicenter clinical study that evaluates the safety and efficacy of the AccuCinch Ventricular Restoration System in patients with heart failure and reduced ejection fraction (HFrEF). Based on the interventional structural heart (SH) technique involved in the procedure, use of an experimental device, and close monitoring of the patient that is required during the intra- and post-op period consistent with the resources available in the hospital inpatient setting, we believe the AccuCinch procedure should be designated as an inpatient-only procedure. We note that the CORCINCH–HF pivotal trial (NCT04331769) was approved by Medicare and meet's CMS' standards for coverage as an Investigation Device Exemption (IDE) study effective November 11, 2020.

In summary, after consideration of the public comment, we are modifying our proposal and revising the status indicator for CPT code 0643T from ''E1'' to ''C'' (inpatient-only) for CY 2022. We refer readers to Addendum D1 of this final rule with comment period for the SI meanings for all codes reported under the OPPS. Addendum D1 is available via the internet on the CMS website.

2. Administration of Lacrimal Ophthalmic Insert Into Lacrimal Canaliculus (APC 5694)

HCPCS code J1096 (Dexamethasone, lacrimal ophthalmic insert, 0.1 mg) is a drug indicated ''for the treatment of ocular inflammation and pain following

ophthalmic surgery.'' [23] Stakeholders assert that this drug is administered through CPT code 0356T (Insertion of drug-eluting implant (including punctal dilation and implant removal when performed) into lacrimal canaliculus, each). Stakeholders also state the drug is inserted in a natural opening in the eyelid (called the punctum) and that the drug is designed to deliver a tapered dose of dexamethasone to the ocular surface for up to 30 days. HCPCS code J1096 is currently on pass-through status and assigned to APC 9308 (Dexametha opth insert 0.1 mg) with status indicator ''G''. Please see section V.A.5. of this final rule with comment period for further information regarding the pass-through status of J1096. CPT code 0356T is currently assigned to status indicator ''Q1'', indicating conditionally packaged payment under the OPPS. Packaged payment applies if a code assigned status indicator ''Q1'' is billed on the same claim as a HCPCS code assigned status indicator ''S'', ''T'', or ''V''. Accordingly, based on the OPPS assigned status indicator, CPT code 0356T is assigned to payment indicator ''N1'' in the ASC setting, meaning a packaged service/item. We refer readers to Addendum D1 of this final rule with comment period for a list of OPPS status indicators and their definitions, available via the internet on the CMS website. We also refer readers to Addendum AA for ASC payment indicator assignments and to Addendum DD1 for payment indicator definitions, available via the internet on the CMS website. For CY 2021, CPT code 0356T is assigned to APC 5692 (Level 2 Drug Administration). Effective January 1, 2022, CPT code 0356T will be deleted. CPT code 68841, represented by placeholder code 68XXX in the proposed rule, will become effective on January 1, 2022.

Due to the similarity between CPT code 0356T and CPT code 68841, we proposed to assign CPT code 68841 to the same APC, status indicator, and payment indicator assignments as CPT code 0356T.

Additionally, we note that the manufacturer of the product that is usually administered through 0356T and placeholder code 68XXX, brought the issue of payment of this code to the Advisory Panel on Hospital Outpatient Payment (also known as HOP Panel) in 2021 for CY 2022 rulemaking and requested a new APC placement. The HOP Panel did not make a recommendation to reassign placeholder code 68XXX to a different APC, OPPS status indicator, or ASC payment indicator as suggested by the presenters.

Comment: Commenters asserted that the proposed placeholder code 68XXX is used to describe the administration of Dextenza and the drug insertion procedure is typically performed after the completion of an ophthalmic procedure, such as a cataract, glaucoma, or retina procedure. Commenters state this procedure is typically done in the ASC setting 80 percent of the time, and is performed in the HOPD setting 20 percent of the time.

Several commenters had concerns with continuing the same APC placement of APC 5692 for CPT code 68XXX for CY 2022. Commenters generally advocated for increased payment for this CPT code in the HOPD and ASC settings. Some commenters did not make a specific suggestion as to what the final APC assignment should be, rather they argued the proposed payment was inadequate. However, some commenters made specific recommendations to change the APC assignment to APC 5503 (Level 3 Extraocular, Repair and Plastic Eye Procedures). Commenters felt this would be a more appropriate and fair APC placement due to its resource similarity to procedures in this APC. Commenters frequently cited CPT 66030 (Injection, anterior chamber of eye (separate procedure); medication) and CPT 0X78T (Injection, posterior chamber of eye; medication), which were proposed to be assigned to APC 5491 (Level 1 Intraocular Procedures), as similar procedures to which 68XXX should be compared. However, commenters did recognize that 68XXX represents an extraocular procedure; therefore, they felt APC 5503 (Level 3 Extraocular, Repair, and Plastic Eye Procedures) would be an appropriate alternative APC assignment.

A minority of commenters discussed the proposed status indicator assignment and payment indicator assignment for 68XXX. Some said a ''Q1'' status indicator was inappropriate, but did not provide an alternative suggestion. One commenter provided an alternate crosswalk for 68XXX and stated that, in their view, 68XXX was clinically similar to CPT Code 68761 (Closure of the lacrimal punctum; by plug, each), which is assigned to APC 5501 (Level 1 Extraocular, Repair and Plastic Eye Procedures), and is assigned to status indicator ''T''.

Additionally, a commenter mentioned using available 2020 claims data for 0356T, instead of the zero claims data available using 2019 claims as proposed, which would suggest a higher APC placement.

Several stakeholders commented that the clinical importance of providing HCPCS code J1096 to patients is that it reduces ocular pain, inflammation, and reduces the burden of topical eyedrop application. Additionally, providers stated that they usually perform the procedure to administer Dextenza after the conclusion of ophthalmic surgeries. Commenters believe the procedure is a distinct surgical procedure that requires additional operating room time and resources. Commenters were concerned that the lack of increased or separate payment may reduce access to Dextenza, particularly in the ASC setting.

Response: We thank commenters for their feedback. We note that placeholder code 68XXX will be replaced by CPT code 68841, and we will refer to this code from here on. Based on input from stakeholders, we believe an APC reassignment is appropriate for CY 2022. After careful consideration of the statements from commenters, we analyzed available claims data and similar procedures that approximate the clinical resources associated with CPT code 68841. We agree with a commenter that CPT code 68761 (Closure of the lacrimal punctum; by plug, each) may more appropriately approximate the resources associated with CPT code 68841. We also believe that CPT code 68801 (Dilation of lacrimal punctum, with or without irrigation) represents a clinically similar procedure and would also be an appropriate procedure with which to compare CPT code 68841. Additionally, based on our review of comments, we do not find it appropriate to use the three single frequency claims that are associated with the CY 2020 claims data for CPT code 0356T as a basis for CPT code 68841, as they seem anomalous compared to the 1,543 total frequency claims available in the CY 2020 claims data dataset. Additionally, we do not find it appropriate to use CY 2019 claims data for 0356T as there are zero single frequency claims, 53 total frequency claims, and a zero-dollar geometric mean. Rather, we believe estimating the clinical resources needed for CPT code 68841 through comparison to clinically similar codes is more appropriate for CY 2022.

Based on the CY 2019 claims data available for CY 2022 OPPS ratesetting, the geometric mean cost associated with CPT code 68761 is $211.17 and the geometric mean cost associated with CPT code 68801 is $300.27. Based on these geometric mean costs, we believe assignment of CPT code 68841 to APC 5694 (Level 4 Drug Administration) is

[23] Dextenza FDA Package Insert: *https://www.accessdata.fda.gov/drugsatfda_docs/label/2019/208742s001lbl.pdf.*

appropriate. Additionally, we continue to believe that assignment of CPT code 68841 to an OPPS status indicator ''Q1'' and an associated ASC payment indicator of ''N1'', is appropriate. Commenters have stated that CPT code 68841 is performed during ophthalmic surgeries, such as cataract surgeries. A status indicator ''Q1'', conditionally packaged procedure, describes a HCPCS code where the payment is packaged when it is provided with a significant procedure but is separately paid when the service appears on the claim without a significant procedure. Because ASC services always include a surgical procedure, HCPCS codes that are conditionally packaged under the OPPS are generally packaged (payment indictor ''N1'') under the ASC payment system. Although stakeholders state this is an independent surgical procedure and should not be packaged into the primary ophthalmic procedure in which the drug and drug administration are associated, based on stakeholder comment regarding clinical patterns as to how the drug is used, we do not agree. We find it appropriate to conditionally package CPT code 68841 based on its clinical use patterns as described by commenters. This is consistent with 42 CFR 419.2(b). The conditional packaging of this code supports our overarching goal to make payments for all services paid under the OPPS and ASC payment system more consistent with those of a prospective payment system and less like those of a per-service fee schedule. We believe that packaging encourages efficiency and is an essential component of a prospective payment system, and that packaging payments for items and services that are typically integral, ancillary, supportive, dependent, or adjunctive to a primary service is a fundamental part of the OPPS. We therefore believe packaging of CPT code 68841 is appropriate.

After consideration of the public comments, we are finalizing our proposal to assign CPT code 68841 to APC 5694 (Level 4 Drug Administration) with OPPS status indicator ''Q1'' for CY 2022. In addition, based on the OPPS assignments, we are finalizing an ASC payment indicator of ''N1'' for CPT code 68841 for CY 2022. Please see Table 22 for the code descriptor, APC assignment, status indicator assignment, and payment indicator assignment for CPT code 68841 for CY 2022.

TABLE 22: PROPOSED AND FINAL APC, SI, AND PI FOR CPT CODE 68841 FOR CY 2022

CPT Code	Long Descriptor	Proposed OPPS APC	Proposed OPPS SI	Proposed ASC PI	Final OPPS APC	Final OPPS SI	Final ASC PI
68841*	Insertion of drug-eluting implant, including punctal dilation when performed, into lacrimal canaliculus, each	5692	Q1	N1	5694	Q1	N1

*CPT code 68841 was listed as placeholder code 68XXX in OPPS Addendum B of the CY 2022 OPPS/ASC proposed rule with comment period.

3. Allergy Testing (APC 5724)

For CY 2022, we proposed to continue to assign CPT code 95004 (Percutaneous tests (scratch, puncture, prick) with allergenic extracts, immediate type reaction, including test interpretation and report, specify number of tests) and CPT code 95044 to APC 5724 (Level 4 Diagnostic Tests and Related Services) with a proposed payment rate of $943.96.

Comment: One commenter expressed concerns with the overall reimbursement for allergy testing, stating that reimbursement has increased dramatically over time for what the commenter asserted was a relatively routine procedure. The commenter recommended that CMS review the payment rates for these services to ensure that they are being accurately reimbursed.

Response: We thank the commenter for their insight and will consider it for future rulemaking.

In summary, after consideration of the public comment, we are finalizing our proposal without modification. Specifically, we are finalizing assignment of CPT codes 95004 and 95044 to APC 5724. The final CY 2022 OPPS payment rates for these codes can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 of this final rule with comment period for the status indicator (SI) meanings for all codes reported under the OPPS. Both Addendum B and D1 are available via the internet on the CMS website.

4. Blood Not Otherwise Classified (NOC) (APC 9537)

Providers and stakeholders in the blood products field have reported that product development for new blood products has accelerated. There may be several additional new blood products entering the market by the end of by CY 2022, compared to only one or two new products entering the market over the previous 15 to 20 years. To encourage providers to use these new products, providers and stakeholders requested that we establish a new HCPCS code to allow for payment for unclassified blood products prior to these products receiving their own HCPCS code. Under the OPPS, unclassified procedures are generally assigned to the lowest APC payment level of an APC family. However, since blood products are each assigned to their own unique APC, the concept of a lowest APC payment level does not apply in this context.

Starting January 1, 2020, we established a new HCPCS code, P9099 (Blood component or product not otherwise classified) which allows providers to report unclassified blood products. We assigned HCPCS code P9099 to status indicator ''E2'' (Not payable by Medicare when submitted on an outpatient claim) for CY 2020. We took this action because HCPCS code P9099 potentially could be reported for multiple products with different costs during the same period of time. Therefore, we could not identify an individual blood product HCPCS code that would have a similar cost to HCPCS code P9099, and were not able to crosswalk a payment rate from an

established blood product HCPCS code to HCPCS code P9099. Some stakeholders expressed concerns that assigning HCPCS code P9099 to a non-payable status in the OPPS meant that hospitals would receive no payment when they used unclassified blood products. Also, claim lines billed with P9099 are rejected by Medicare, which prevents providers from tracking the utilization of unclassified blood products.

Because of the challenges of determining an appropriate payment rate for unclassified blood products, we stated in the CY 2021 OPPS/ASC proposed rule that we were considering packaging the cost of unclassified blood products into their affiliated primary medical procedure. Although we typically do not package blood products under the OPPS, for unclassified blood products, we stated that we do not believe it is possible to accurately determine an appropriate rate that would apply for all of the products (potentially several, with varying costs) that may be reported using HCPCS code P9099. Packaging the cost of unclassified blood products into the payment for the primary medical service by assigning HCPCS code P9099 a status indicator of ''N'' would allow providers to report the cost of unclassified blood products to Medicare. Over time, the costs of unspecified blood products would be reflected in the payment rate for the primary medical service if the blood product remains unclassified. However, we stated that we expect that most blood products would seek and be granted more specific coding such that the unclassified HCPCS code P9099 would no longer be applicable. We also explained that we believe that packaging the costs of unclassified blood products would be an improvement over the current non-payable status for HCPCS code P9099 as it would allow for tracking of the costs and utilization of unclassified blood products. We had concerns about this approach because providers would not receive separate payment for the blood products reported with HCPCS code P9099, and providers would have had to wait at least two years for the primary service billed with HCPCS code P9099 to potentially reflect some of the cost of the unclassified product. After considering the other payment options for HCPCS code P9099 and comments from providers and stakeholders, we decided against packaging HCPCS code P9099 for CY 2021.

The CMS HOP Panel and multiple stakeholders suggested another payment alternative to have unclassified blood products paid separately by using a weighted average of the payment rates of all separately payable blood products in the OPPS. The average payment rate would be weighted by the number of units billed for each service in the OPPS. Stakeholders believed a weighted average would be consistent with OPPS policy to provide separate payment for all blood products and would encourage the use of HCPCS code P9099 to track the utilization of unclassified blood products until the new products could receive individual HCPCS codes. Other stakeholders suggested that unclassified blood products be paid either at charges reduced to cost or at reasonable cost to appropriately compensate providers billing unclassified blood products.

We decided against paying for HCPCS code P9099 through either a weighted average payment, charges reduced to cost, or reasonable cost for CY 2021. We had concerns that these payment methods could provide incentives to discourage manufacturers of new blood products from seeking individual HCPCS codes for their products. A weighted average payment would encourage manufacturers of relatively inexpensive unclassified blood products not to seek a HCPCS code for their products because the payment using HCPCS code P9099 for the products would be substantially higher than payment the products would receive once an individual code is established for the blood products. In addition, the level of payment from a weighted average payment may reduce the urgency of manufacturers to seek an individual HCPCS code even for higher-cost products, which would delay our ability to track payment for individual blood products.

After considering our options, we decided for CY 2021 to pay for HCPCS code P9099 by making the blood not otherwise classified code separately payable, assigning it a status indicator of ''R'', and paying the code at a rate equal to the lowest paid separately payable blood product in the OPPS, which is P9043 (Infusion, plasma protein fraction (human), 5 percent, 50 ml) with a payment rate of $7.79 per unit. This policy aligns with our overall OPPS policy to pay NOC codes at the lowest available APC rate for a service category, while providing a payment for unclassified blood products when a service is reported on the claim. Our policy also provides incentives for manufacturers to seek individual HCPCS codes for new blood products, which helps us to track the utilization of these new blood products and establish a payment rate for these new products that better reflects their cost. For CY 2022, we proposed to continue our policy that was established in CY 2021 without modification.

Comment: The HOP Panel and multiple commenters have requested that unclassified blood products assigned to HCPCS code P9099 be paid based on reasonable cost and that HCPCS code P9099 be assigned a status indicator of ''F'' (paid at reasonable cost). Unclassified blood products paid on the basis of reasonable cost would receive payment based on individual invoices submitted by the provider that detail the actual cost of the unclassified blood products for the provider. The commenters believe our current policy severely underpays for most unclassified blood products, which limits the ability of providers to use these new products, and discourages innovation in the blood products field. Commenters assert that the universe of blood products is very heterogeneous with each product having its own APC and payment rate, and our policy that assigns unclassified clinical services HCPCS codes to the lowest-paying APC in a clinical series is not appropriate for the payment of blood products.

Commenters also believe the administrative burdens of submitting claims to receive payment through reasonable cost would encourage blood product manufacturers to classify their unclassified products. Relatedly, two other commenters urged us to reduce administrative burden for providers if we decide to implement reasonable cost payment for HCPCS code P9099.

Response: We have concerns about paying unclassified blood products using reasonable cost and assigning HCPCS code P9099 a status indicator of ''F''. Although reasonable cost would likely provide a more granular reflection of the cost of unclassified blood products to providers, there would be no incentive for providers to manage their costs when using unclassified blood products, and no incentives for the manufacturers to seek individual HCPCS codes for the unclassified blood products. We agree with the commenters that the administrative burdens of seeking payment through reasonable cost methodology may provide some incentive to classify currently unclassified blood products. However, we believe that providers will prefer to receive full cost reimbursement for an unclassified blood product rather than risk receiving a prospective payment that could be less than full cost of the blood product if the blood product is classified and assigned a HCPCS code. Finally, we do not support reasonable cost payment for HCPCS code P9099 because the OPPS is a prospective payment system, and we

want to limit rather than expand the types of services within the OPPS that do not receive prospective payment.

After reviewing the public comments we received, we have decided to implement our proposal without modification to keep HCPCS code P9099 separately payable with a status indicator of ''R'', and pay the code at a rate equal to the lowest paid separately payable blood product in the OPPS, which is P9043 (Infusion, plasma protein fraction (human), 5 percent, 50 ml) with a payment rate of $7.79 per unit. Therefore, we are finalizing our proposal to continue to assign HCPCS code P9099 to APC 9537 (Blood component/product noc) for CY 2022. We appreciate that establishing a fair and equitable payment methodology for HCPCS code P9099 continues to be a challenge, and we plan to explore other possible ideas for the payment of HCPCS code P9099 in future rulemaking.

5. Bone Substitute Material Injection (APC 5113)

For January 1, 2022, the AMA's CPT Editorial Panel established new CPT code 0707T (Injection(s), bone substitute material (for example, calcium phosphate) into subchondral bone defect (that is, bone marrow lesion, bone bruise, stress injury, microtrabecular fracture), including imaging guidance and arthroscopic assistance for joint visualization). We note that CPT code 0707T was listed as placeholder code 0X79T in OPPS Addendum B of the CY 2022 OPPS/ASC proposed rule. For CY 2022, we proposed to assign CPT code 0707T to APC 5111 (Level 1 Musculoskeletal Procedures) with a proposed payment rate of $211.47.

Comment: Commenters did not agree with our proposed APC assignment. Instead, commenters stated that CPT code 0707T should be assigned to APC 5114 (Level 4 Musculoskeletal Procedure) with a proposed payment rate of $6,428.51 based on its clinical and resource homogeneity to the procedures and services in the APC. Commenters stated that 0707T is most clinically similar to Zimmer Biomet's AccuFill BSM procedure, which is the service described by CPT code 29855 (Arthroscopically aided treatment of tibial fracture, proximal (plateau); unicondylar, includes internal fixation, when performed (includes arthroscopy)), and assigned to APC 5114. Commenters stated that the injection of a bone substitute material into a subchondral bone defect is mainly accounted for by two products, Zimmer Biomet's AccuFill BSM and Anika, which range in price from $2,600–$2,800.

Response: We do not agree that CPT code 0707T is comparable to CPT code 29855; however, based on our review of the clinical characteristics of the procedure and input from our medical advisors, we believe CPT code 0707T is more similar to the procedures assigned to APC 5113 (Level 3 Musculoskeletal Procedures) with a proposed payment rate of $2,906.75, and this payment rate better accounts for the cost of the procedure as well as the bone substitute material.

In summary, after consideration of the public comments, we are assigning CPT code 0707T to APC 5113 for CY 2022 based on its resource and clinical similarity to the procedures in APC 5113. The final CY 2022 OPPS payment rates for this code can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 to this final rule with comment period for the SI meanings for all codes reported under the OPPS. Both Addendum B and D1 are available via the internet on the CMS website.

As we do every year, we will reevaluate the APC assignment for CPT code 0707T for the next rulemaking cycle. We note that we review, on an annual basis, the APC assignments for all services and items paid under the OPPS.

6. Calculus Aspiration With Lithotripsy Procedure (APC 5376)

For CY 2022, we proposed to assign HCPCS code C9761 (Cystourethroscopy, with ureteroscopy and/or pyeloscopy, with lithotripsy (ureteral catheterization is included) and vacuum aspiration of the kidney, collecting system and urethra if applicable) to APC 5375 (Level 5 Urology and Related Services) with a proposed payment of $4,527.23. HCPCS code C9761 describes the procedure that uses a sterile, single-use aspiration-irrigation catheter that is designed to assist in the removal of stone fragments during standard ureteroscopy. Based on our analysis of the latest CY 2020 claims data for this CY 2022 OPPS/ASC final rule with comment period, our data reveals two single claims for HCPCS code C9761 with a geometric mean cost of $9,342.

Comment: Several commenters expressed concerns that a significant difference between cost and payment prevented hospitals from providing this procedure to their patients. The commenters urged CMS to change the APC assignment of HCPCS code C9761 to APC 5376 (Level 6 Urology and Related Services). The commenters asked that CMS assign HCPCS code C9761 to APC 5376 for two reasons: (1) The current and proposed reimbursement rates for services in APC 5375 are inadequate to pay hospitals appropriately for the costs of furnishing the Steerable Ureteroscopic Renal Evacuation (SURE) procedure; and (2) the clinical characteristics and resources associated with HCPCS code C9761 are similar to codes in APC 5376 than services in APC 5375.

Response: We thank the commenters for their feedback. Based on information from the manufacturer, resources involved for the procedure described by HCPCS code C9761 appear to be higher than for those procedures assigned to APC 5375. At this time, only two CY 2020 claims are available to assist in identifying costs associated with the procedure. The geometric mean cost of $9,342 for the two claims indicate that the cost of HCPCS code C9761 is substantially higher than the proposed payment rate of $4,527.23. However, two claims is not a significant data set; and we have concerns that the costs reported from the two claims for the procedure described by HCPCS code C9761 may not accurately reflect the geometric mean costs of the procedure. We also note that, in the manufacturer's 2020 New Technology APC application, they indicated that an appropriate payment for the procedure described by HCPCS code C9761 would be approximately $5,627.39 and that assignment to New Technology APC 1566 (New Technology—Level 29 ($5,501–$6,000)) would be appropriate. Based on the claims data along with the reported costs associated with the procedure presented to us by the manufacturer, we believe that it is appropriate to assign the procedure described by HCPCS code C9761 to APC 5376 (Level 6 Urology and Related Services), for CY 2022. As we do every year we will reevaluate the APC assignment for CPT code 9761 in the next rulemaking cycle. We remind hospitals that we review, on an annual basis, the APC assignments for all services and items paid under the OPPS based on the latest claims data available to us.

In summary, after consideration of the public comments we received, we are modifying our proposal for the APC assignment of HCPCS code C9761. Instead of assigning this code to APC 5375 (Level 5 Urology and Related Services), for CY 2022, we are reassigning HCPCS code C9761 to APC 5376 (Level 6 Urology and Related Services). Table 23 below lists the final CY 2022 status indicator and APC assignments for the calculus aspiration

with lithotripsy procedure. We refer readers to Addendum B to this final rule with comment period for the final payment rates for all codes reportable under the OPPS. Addendum B is available via the internet on the CMS website.

TABLE 23: FINAL SI AND APC ASSIGNMENT FOR HCPCS CODE C9761

HCPCS Code	Long Descriptor	Final OPPS SI	Final OPPS APC
C9761	Cystourethroscopy, with ureteroscopy and/or pyeloscopy, with lithotripsy (ureteral catheterization is included) and vacuum aspiration of the kidney, collecting system and urethra if applicable	J1	5376

7. Cardiac Computed Tomography (CT) (APC 5571)

For CY 2022, we proposed to continue to assign the following cardiac CT exam codes to APC 5571 (Level 1 Imaging with Contrast) with a proposed payment rate of $183.30:

- 75572 (Computed tomography, heart, with contrast material, for evaluation of cardiac structure and morphology (including 3d image postprocessing, assessment of cardiac function, and evaluation of venous structures, if performed));
- 75573 (Computed tomography, heart, with contrast material, for evaluation of cardiac structure and morphology in the setting of congenital heart disease (including 3d image postprocessing, assessment of lv cardiac function, rv structure and function and evaluation of venous structures, if performed)); and
- 75574 (Computed tomographic angiography, heart, coronary arteries and bypass grafts (when present), with contrast material, including 3d image postprocessing (including evaluation of cardiac structure and morphology, assessment of cardiac function, and evaluation of venous structures, if performed)).

Comment: Many commenters opposed the assignment of CPT codes 75572, 75573, and 75574 to APC 5571. They stated that the proposed CY 2022 OPPS payment rate for APC 5571 is inadequate to cover the total cost of providing the service.

Commenters stated that they also believe that the resource costs required to perform cardiac CT scans are similar to the tests that are assigned to APC 5573 rather than APC 5571. They noted that the low payment for the test limits patient access, and requested that CMS take action to increase reimbursement to levels in line with the actual testing costs. The commenters requested an APC reassignment for all three codes. Specifically, the commenters suggested reassigning CPT codes 75572 and 75573 to APC 5572 (Level 2 Imaging with Contrast) and CPT code 75574 to APC 5573 (Level 3 Imaging with Contrast). Most of the commenters reported that cardiac CT scans are more resource intensive than other CT and x-ray scans in APC 5571 and expressed concerns that APC-misallocation would suppress utilization for these services.

Response: As we stated in the CY 2021 OPPS final rule with comment period (85 FR 85956), payments under the OPPS are based on our analysis of the latest available claims and cost report data submitted to Medicare. We have many years of claims data for CPT codes 75572, 75573, and 75574. Based on the geometric mean costs for these codes, we do not believe that CPT codes 75572, 75573, and 75574 utilize similar resources as the exams assigned to APC 5572 or APC 5573. We refer readers to the CY 2021 OPPS final rule with comment period for a more detailed discussion of the pricing methodology for CPT codes 75572, 75573, and 75574 (85 FR 85956 through 85959).

In summary, after consideration of the public comments, we are finalizing our proposal, without modification, to assign the cardiac CT exam codes, specifically, CPT codes 75572, 75573, and 75574 to APC 5571. The final CY 2022 OPPS payment rates for these codes can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 of this final rule with comment period for the SI meanings for all codes reported under the OPPS. Both Addendum B and D1 are available via the internet on the CMS website.

8. Cardiac Magnetic Resonance (CMR) Imaging (APC 5523, 5524, 5572, and 5573)

For CY 2022, we proposed to continue to assign the following cardiac magnetic resonance imaging (MRI) CPT codes to APC 5523, 5524, 5572, and 5573, respectively:

- CPT code 75557 (Cardiac magnetic resonance imaging for morphology and function without contrast material) to APC 5523 (Level 3 Imaging without Contrast) with a proposed payment of $236.14;
- CPT code 75559 (Cardiac magnetic resonance imaging for morphology and function without contrast material; with stress imaging) to APC 5524 (Level 3 Imaging without Contrast) with a proposed payment of $495.76;
- CPT code 75561 (Cardiac magnetic resonance imaging for morphology and function without contrast material(s), followed by contrast material(s) and further sequences) to APC 5572 (Level 2 Imaging with Contrast) with a proposed payment of $377.80; and
- CPT code 75563 (Cardiac magnetic resonance imaging for morphology and function without contrast material(s), followed by contrast material(s) and further sequences; with stress imaging) to APC 5573 (Level 3 Imaging with Contrast) with a proposed payment of $733.76.

Comment: A few commenters expressed concern with the lack of payment stability for cardiac MRI services, specifically, those described by CPT codes 75557, 75559, 75561, and 75563. They indicated that the payments for these codes have decreased in the last several years, and prior to CY 2017, the codes were placed in appropriate APCs. Of significant concern are the payment rates for CPT codes 75561 and 75563, which, according to the commenters, are grouped with services that are not

clinically similar. The commenters stated that CPT code 75561 is unlike CT of the abdomen or pelvis or MRI of the neck and spine in APC 5572, and instead, the code should be placed in APC 5573 with comparable services. The commenters further added that CPT code 75563 is labor-intensive and should be assigned to APC 5593 (Level 3 Nuclear Medicine and Related Services).

Response: As stated in the CY 2021 OPPS final rule with comment period, payments under the OPPS are based on our analysis of the latest available claims and cost report data submitted to Medicare. We have many years of claims data for CPT codes 75561 and 75563. Based on the geometric mean costs for these codes, we do not believe that CPT codes 75561 and 75563 utilize similar resources as the exams assigned to APC 5573 or APC 5593. We refer readers to the CY 2021 OPPS final rule with comment period for a more detailed discussion of the pricing methodology for CPT codes 75561 and 75563 (85 FR 85959 through 85960).

In summary, after consideration of the public comments, we are finalizing our proposal, without modification, to assign the cardiac MRI codes, specifically, CPT codes 75561 and 75563 to APCs 5572 and 5573. The final CY 2022 OPPS payment rates for these codes can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 of this final rule with comment period for the SI meanings for all codes reported under the OPPS. Both Addendum B and D1 are available via the internet on the CMS website.

9. Chimeric Antigen Receptor Therapy (CAR–T) (APCs 5694, 9035, 9194, 9391, 9413, and 9422)

Chimeric Antigen Receptor T-Cell (CAR T-cell) therapy is a cell-based gene therapy in which T-cells are collected and genetically engineered to express a chimeric antigen receptor that will bind to a certain protein on a patient's cancerous cells. The CAR T-cells are then administered to the patient to attack certain cancerous cells and the individual is observed for potential serious side effects that would require medical intervention. We refer readers to previous discussions in the OPPS/ASC final rules with comment period for background regarding the specific CAR T-cell products, in both the CY 2020 OPPS/ASC final rule with comment period (84 FR 61231 through 61234) and the CY 2019 OPPS/ASC final rule with comment period (83 FR 58904 through 58908). In addition, for discussion about CY 2022 OPPS payment policies for separately paid drugs with pass-through status expiring or continuing in CY 2022, please see sections V.A.4. and V.A.5. of this final rule with comment period. The AMA created four Category III CPT codes that are related to CAR T-cell therapy, effective January 1, 2019. As discussed in the CY 2019 OPPS/ASC final rule with comment period (83 FR 58904 through 58908), the CY 2020 OPPS/ASC final rule with comment period (84 FR 61231 through 61234), and the CY 2021 OPPS/ASC final rule with comment period (85 FR 85949 through 85951) we finalized our proposal to assign procedures described by CPT codes 0537T, 0538T, and 0539T to status indicator ''B'' (Codes that are not recognized by OPPS when submitted on an outpatient hospital Part B bill type (12x and 13x)) to indicate that the services are not paid under the OPPS. The procedures described by CPT codes 0537T, 0538T, and 0539T describe the various steps required to collect and prepare the genetically modified T-cells, and Medicare does not generally pay separately for each step used to manufacture a drug or biological. We also finalized that the procedures described by CPT code 0540T would be assigned status indicator ''S'' (Procedure or Service, Not Discounted when Multiple) and APC 5694 (Level 4 Drug Administration) for CY 2019, CY 2020, and CY 2021 and made no proposal to change the assignment for CY 2022. Additionally, the National Uniform Billing Committee (NUBC) established CAR T-cell-related revenue codes and a value code to be reportable on Hospital Outpatient Department (HOPD) claims effective for claims received on or after April 1, 2019. We made no specific proposal related to the CAR T-cell preparation codes, as described by CPT codes 0537T, 0538T, 0539T. As listed in Addendum B of the CY 2022 OPPS/ASC proposed rule, we proposed to continue to assign procedures described by these CPT codes, 0537T, 0538T, and 0539T, to status indicator ''B'' (Codes that are not recognized by OPPS when submitted on an outpatient hospital Part B bill type (12x and 13x)) to indicate that the services are not paid under the OPPS. We proposed to continue to assign CPT code 0540T to status indicator ''S'' (Procedure or Service, Not Discounted when Multiple) and APC 5694 (Level IV Drug Administration).

Comment: Two commenters opposed our proposal to continue to assign status indicator ''B'' to CPT codes 0537T, 0538T, and 0539T for CY 2022. One commenter did not have a specific recommendation, but rather suggested CMS take into consideration the complex process and separately recognize the efforts associated with leukapheresis, cell handling, and processing. This commenter additionally mentioned the administrative burden associated with CAR T-cell therapy administration, among other resources that are specific to the process in which CAR–T is processed, manufactured, and then administered.

The other commenter discussed a wide variety of topics related to CAR T-cell therapy and stated that a change in status indicator would be appropriate, with a preference for assigning CPT codes 0537T, 0538T, and 0539T to status indicator ''Q1''. This commenter believed that the procedures these CPT codes describe did not represent the steps required to manufacture the CAR T-cell product, as CMS has stated. Generally, this commenter advocated for a change in status indicator as they believed this change is necessary to allow services furnished to the patient to be eligible for payment and for hospitals to be paid appropriately for the services they provide during each step of the CAR T-cell process. This commenter pointed out that a number of patients may receive the preparation procedures, but then fail to receive the final CAR–T product. Accordingly, this commenter asked CMS to release new cost centers and to revise the instructions in MLN Matters Article SE19009 in order to no longer allow hospitals to put outpatient cell collection and process charges occurring more than three days prior to an inpatient stay on inpatient claims or to report cell collection and cell processing charges as part of the product charge.

Response: We thank the commenters for their feedback. CMS does not believe that separate or packaged payment under the OPPS is necessary for the procedures described by CPT codes 0537T, 0538T, and 0539T for CY 2022. The procedures described by CPT codes 0537T, 0538T, and 0539T describe the various steps required to collect and prepare the genetically modified T-cells; and Medicare does not generally pay separately for each step used to manufacture a drug or biological product. Additionally, we note that CAR T-cell therapy is a unique therapy approved as a biologic, with unique preparation procedures, that cannot be directly compared to other therapies or existing CPT codes. We note that the current HCPCS coding for the currently approved CAR T-cell therapies include leukapheresis and dose preparation procedures, as these services are included in the manufacturing of these

biologicals. Therefore, payment for these services is incorporated into the drug codes. Please see Table 24 for HCPCS coding for CAR T-cell therapies.

TABLE 24: CAR T-CELL THERAPIES FINAL SI AND APC ASSIGNMENTS FOR HCPCS CODES Q2041, Q2042, Q2053, Q2054, AND Q2055 FOR CY 2022

HCPCS Code	Long Descriptor	Final CY 2022 APC
Q2041	Axicabtagene ciloleucel, up to 200 million autologous anti-cd19 car positive viable t cells, including leukapheresis and dose preparation procedures, per therapeutic dose	9035
Q2042	Tisagenlecleucel, up to 600 million car-positive viable t cells, including leukapheresis and dose preparation procedures, per therapeutic dose	9194
Q2053	Brexucabtagene autoleucel, up to 200 million autologous anti-cd19 car positive viable t cells, including leukapheresis and dose preparation procedures, per therapeutic dose	9391
Q2054	Lisocabtagene maraleucel, up to 110 million autologous anti-cd19 car-positive viable t cells, including leukapheresis and dose preparation procedures, per therapeutic dose	9413
Q2055	Idecabtagene vicleucel, up to 460 million autologous b-cell maturation antigen (bcma) directed car-positive t cells, including leukapheresis and dose preparation procedures, per therapeutic dose	9422

We note that although there is no payment associated with CPT codes 0537T, 0538T, and 0539T for reasons stated previously, these codes can still be reported to CMS for tracking purposes. We thank commenters for their feedback related to our guidance contained in MLN Matters Article SE19009. We are not revising this document at this time as we believe these instructions are consistent with our longstanding policies, but we appreciate the feedback from stakeholders. We believe that the comments in reference to payment for services in settings not payable under the OPPS are outside the scope of the CY 2022 OPPS/ASC proposed rule. Accordingly, we are not revising the existing codes for CAR T-cell therapies to remove leukapheresis and dose preparation procedures, and we are not accepting the recommendations at this time to revise the status indicators for procedures described by CPT codes 0537T, 0538T, and 0539T. We will continue to evaluate and monitor payment for CAR T-cell therapies.

In summary, after consideration of the public comments we received, we are finalizing our proposal to assign status indicator ''B'' to CPT codes 0537T, 0538T, and 0539T for CY 2022. Additionally, we are continuing our policy from CY 2019 to assign status indicator ''S'' to CPT code 0540T for CY 2022. Table 25 below shows the final SI and APC assignments for HCPCS codes 0537T, 0538T, 0539T, and 0540T for CY 2022. For more information on CY 2022 OPPS final status indicators, APC assignments, and payment rates for HCPCS codes, including the CAR T-cell drug codes, we refer readers to Addendum B to this final rule with comment period. In addition, the status indicator definitions can be found in Addendum D1 (OPPS Payment Status Indicators for CY 2022) to this final rule with comment period. Both Addendum B and D1 are available via the internet on the CMS website.

TABLE 25: CAR T-CELL THERAPY PREPARATION AND ADMINISTRATION FINAL SI AND APC ASSIGNMENT FOR CPT CODES 0537T, 0538T, 0539T, AND 0540T FOR CY 2022

CPT Code	Long Descriptors	Proposed CY 2022 SI	Final CY 2022 SI	Final CY 2022 APC
0537T	Chimeric antigen receptor t-cell (car-t) therapy; harvesting of blood-derived t lymphocytes for development of genetically modified autologous car-t cells, per day	B	B	N/A
0538T	Chimeric antigen receptor t-cell (car-t) therapy; preparation of blood-derived t lymphocytes for transportation (eg, cryopreservation, storage)	B	B	N/A
0539T	Chimeric antigen receptor t-cell (car-t) therapy; receipt and preparation of car-t cells for administration	B	B	N/A
0540T	Chimeric antigen receptor t-cell (car-t) therapy; car-t cell administration, autologous	S	S	5694

10. ClariFix Procedure (APC 5164)

For CY 2022, we proposed to continue to assign HCPCS code C9771 (Nasal/sinus endoscopy, cryoablation nasal tissue(s) and/or nerve(s), unilateral or bilateral)) to APC 5164 Level 4 ENT Procedures. We created HCPCS code C9771 to describe the technology associated with nasal endoscopy with cryoablation of nasal tissues and/or nerves, based on our review of a New Technology APC application submitted by the manufacturer of the technology. HCPCS code C9771 was effective on January 1, 2021.

Comment: We received one comment from the manufacturer requesting that HCPCS code C9771 be reassigned to APC 5165 Level 5 ENT Procedures, which had a proposed CY 2022 OPPS payment rate of $5,218.17. The commenter believed that assigning HCPCS code C9771 to APC 5165 would be more appropriate due to the resource and clinical similarity to the procedures in that APC.

Response: We thank the commenter for their recommendation. After reviewing the comment, and after further evaluation of the procedure, as well as input from our medical advisors, we continue to believe that the current APC assignment for HCPCS code C9771 is appropriate, based on its resource and clinical similarity to the procedures in APC 5164. Therefore, we are not accepting the commenter's recommendation. We remind hospitals that every year we review the APC assignments for all services and items paid under the OPPS. We will reassess the APC assignment for the procedure described by HCPCS C9771 once we have claims data for the code. We note that the first year that claims data will be available for HCPCS code C9771 will be during the CY 2023 rulemaking cycle.

In summary, after consideration of the public comment, we are finalizing our proposal without modification. The final CY 2022 OPPS payment rate for this code can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 of this final rule with comment period for the status indicator (SI) meanings for all codes reported under the OPPS. Both Addendum B and D1 are available via the internet on the CMS website.

11. Dilapan-S Cervical Dilation Procedure (APC 5412)

For CY 2022, we proposed to continue to assign CPT code 59200 (Insertion of cervical dilator (for example, laminaria, prostaglandin) (separate procedure)) to APC 5412 (Level 2 Gynecologic Procedures) with a proposed payment rate of $289.30.

Comment: A few commenters requested that CMS reassign CPT code 59200 to APC 5413 (Level 3 Gynecologic Procedures) with a proposed payment rate of $650.81. These commenters state that the cost of Dilapan-S, a cervical softening and dilation device, is not reflected in the payment rate for APC 5412.

Response: For CY 2022, OPPS payments are based on claims submitted between January 1, 2019, through December 31, 2019, that were processed on or before June 30, 2020. Based on our evaluation of the claims data for this final rule with comment period, the geometric mean cost for CPT code 59200 is $456.73, which, while it does fall outside the range of geometric mean costs for APC 5412 ($206.24–$402.55) it does not fall within the range of geometric mean costs for APC 5413 ($516.27–$874.50.) Given that the Dilapan-S device and CPT code 59200 have both existed for a significant period of time, the fact that payment for CPT code 59200 does not reflect the costs of Dilapan-S suggests that this device is not routinely used to furnish CPT code 59200. Furthermore, based on our review of the clinical characteristics of the procedure and input from our medical advisors, we continue to believe that CPT code 59200 is more clinically similar to the other services in APC 5412.

In summary, after consideration of the public comments, we are finalizing our proposal to continue to assign CPT code 59200 to APC 5412. The final CY 2022 OPPS payment rates for these codes can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 of this final rule with comment period for the SI meanings for all codes reported under the OPPS. Both Addendum B and D1 are available via the internet on the CMS website.

12. Ellipsys System Hemodialysis Arteriovenous Fistula (AVF) Procedure (APC 5194)

For CY 2022, we proposed to continue to assign HCPCS code G2170 to APC 5194 (Level 4 Endovascular Procedures) with a proposed payment rate of $16,484.41.

Comment: Commenters supported this proposal.

Response: We appreciate commenters' support.

In summary, after consideration of the public comments, we are finalizing our proposal without modification. Specifically, we are finalizing our APC proposal to continue to assign HCPCS code G2170 to APC 5194.

The final CY 2022 OPPS payment rate for this code can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 of this final rule with comment period for the status indicator (SI) meanings for all codes reported under the OPPS. Both Addendum B and D1 are available via the internet on the CMS website.

13. Esophagogastroduodenoscopy (APC 5331)

For CY 2022, we proposed to continue to assign CPT code 43240 (Esophagogastroduodenoscopy, flexible, transoral; with transmural drainage of pseudocyst (includes placement of transmural drainage catheter[s]/stent[s], when performed, and endoscopic ultrasound, when performed)) to APC 5303 (Level 3 Upper GI Procedures) with a proposed payment rate of $3,160.76.

Comment: One commenter requested the reassignment of CPT code 43240 to APC 5331 (Complex GI Procedures) with a proposed payment rate of $5,159.81. The commenter stated that the geometric mean cost of CPT code 43240 ($5827.94) exceeds the 2 times threshold for APC 5303 and is within the range of the geometric mean costs for APC 5331 ($4,706.48–$6,277.12). Furthermore, the commenter stated that CPT code 43240 is more clinically similar to the services in APC 5331, which includes all other gastroenterology stent placement codes.

Response: Based on our review of the cost data and input from our clinical advisors, we agree that CPT code 43240 would be more appropriately placed in APC 5331 based on its clinical and resource homogeneity to the procedures in the APC. Therefore, we are reassigning CPT code 43240 to APC 5331.

In summary, after consideration of the public comments, we are finalizing the reassignment of CPT code 43240 to APC 5331. The final CY 2022 OPPS payment rate for this code can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 of this final rule with comment period for the SI meanings for all codes reported under the OPPS. Both Addendum B and D1 are available via the internet on the CMS website.

14. External Electrocardiogram (ECG) (APCs 5733 and 5734)

For CY 2022, we proposed to continue to assign CPT code 93242 (External ECG recording for more than 48 hours up to 7 days by continuous rhythm recording) to APC 5732 (Level 2 Minor Procedures) with a proposed payment rate of $34.72 and CPT code 93243 (External ECG recording for more than 48 hours up to 7 days scanning analysis with report) to APC 5733 (Level 3 Minor Procedures) with a proposed payment rate of $57.12.

Comment: A few commenters suggested that, based on clinical similarity to CPT codes 93225 (External electrocardiographic recording up to 48 hours by continuous rhythm recording and storage; recording (includes connection, recording, and disconnection)) and 93226 (External electrocardiographic recording up to 48 hours by continuous rhythm recording and storage; scanning analysis with report), which include payment for a holter monitor, CMS should reassign CPT codes 93242 and 93243 to APC 5734 (Level 4 Minor Procedures) with a proposed payment rate of $115.71. Commenters further stated that placement in APC 5734 would be consistent with the placement of the predecessor codes, CPT codes 0296T (External electrocardiographic recording for more than 48 hours up to 21 days by continuous rhythm recording and storage; recording (includes connection and initial recording)) and 0296T (External electrocardiographic recording for more than 48 hours up to 21 days by continuous rhythm recording and storage; scanning analysis with report).

Response: Based on our review of the clinical characteristics of the procedure and input from our medical advisors, we agree with commenters that resources associated with furnishing CPT codes 93242 and 93243 may not be accurately reflected in their current APC assignment. We do not agree with commenters that both codes should be reassigned to APC 5734. We note that the predecessor codes, CPT codes 0296T and 0297T, described 21 days of continuous monitoring, while the current codes, CPT codes 93242 and 93243, describe 7 days of monitoring. We believe that CPT code 93242 shares greater clinical and cost similarities to the services in APC 5733 (Level 3 Minor Procedures), which has a proposed payment rate of $57.12. We agree with commenters, however, the CPT code 93243 does share clinical and cost similarities with the other services in APC 5734.

In summary, after consideration of the public comments, we are finalizing our proposal with modification. Specifically, we are assigning CPT code 93242 to APC 5733 and CPT code 93243 to APC 5734. The final CY 2022 OPPS payment rates for these codes can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 of this final rule with comment period for the SI meanings for all codes reported under the OPPS. Both Addendum B and D1 are available via the internet on the CMS website.

15. Eye-Movement Analysis Without Spatial Calibration (CPT Code 0615T)

The CPT Editorial Panel established a new CPT code 0615T, effective July 1, 2020, to describe eye-movement analysis without spatial calibration that involves the use of the EyeBOX system as an aid in the diagnosis of concussion, also known as mild traumatic brain injury (mTBI). The EyeBOX is intended to measure and analyze eye movements as an aid in the diagnosis of concussion within one week of head injury in patients 5 through 67 years of age in conjunction with a standard neurological assessment of concussion. A negative EyeBOX classification may correspond to eye movement that is consistent with a lack of concussion. A positive EyeBOX classification corresponds to eye movement that may be present in both patients with or without a concussion.

We included this new code in the July quarterly OPPS update CR (Transmittal 10224, Change Request 11814, dated July 15, 2020). Effective July 1, 2020, we assigned CPT code 0615T to APC 5734 (Level 4 Minor Procedures) with status indicator ''Q1'' (conditionally packaged).

As displayed in the Addendum B to the CY 2022 ASC/OPPS proposed rule, we proposed to continue to assign 0615T to APC 5734 with status indicator ''Q1'' and a proposed OPPS payment rate of $115.71 for CY 2022.

Comment: The manufacturer of the EyeBOX resubmitted their comment again this year because they are still concerned that the lack of adequate, separate reimbursement will strongly discourage hospitals from providing this important technology to their patients.

The commenter urged CMS to: (1) Change the APC assignment of CPT code 0615T to APC 5722 (Level 2 Diagnostic Tests and Related Services); and (2) change the status indicator for the service to ''S'' to allow for separate payment under the OPPS. The commenter continues to claim that the proposed reimbursement rate for services in APC 5734 is inadequate to pay hospitals appropriately for the costs of furnishing the EyeBOX test. They assert the EyeBOX test costs hospitals at least $200.00 to provide and the clinical characteristics and resources associated with 0615T are more similar to codes in APC 5722 than services in APC 5734.

Response: We note that OPPS payment rates for the CY 2022 final rule are based on claims submitted between January 1, 2019, through December 31, 2019, that were processed on or before June 30, 2020. Because HCPCS code 0615T was established on July 1, 2020, we did not have claims data available for CY 2022 OPPS ratesetting.

As far as the resource similarity of CPT code 0615T to other eye-related diagnostic tests that are assigned to APC 5722, such as CPT code 92240 (Indocyanine-green angiography (includes multiframe imaging) with interpretation and report, unilateral or bilateral) and CPT code 92242 (Fluorescein angiography and indocyanine-green angiography (includes multiframe imaging) performed at the same patient encounter with interpretation and report, unilateral or bilateral), the EyeBOX test does not involve an injection. Therefore, we continue to believe that the resource costs for CPT code 0615T are not comparable to other eye-related diagnostic tests in APC 5722. Updated CY 2019 claims data for this final rule with comment period indicate that the geometric mean cost of APC 5722 is 257.89, while the geometric mean cost of APC 5734 is $109.88. Based on the lack of claims data, we believe that maintaining assignment of APC 5734 for CPT code 0615T for CY 2022 continues to be appropriate.

Depending on the procedures submitted on the claim, and whether the procedure described by CPT code 0615T is performed with any other services on the same day, the procedure described by CPT code 0615T may be paid separately through an APC (in this case APC 5734) or receive packaged payment when accompanying a more significant procedure that is reported on the claim. Based on the nature of this procedure, which may be performed by itself or with other procedures on the same claim, we believe that the continued assignment of status indicator ''Q1'' is appropriate for the procedure described by CPT code 0615T.

As we do every year, we will reevaluate the APC assignment for CPT code 0615T for the next rulemaking cycle. We note that we review, on an annual basis, the APC assignments for all services and items paid under the OPPS.

We are finalizing our proposal, without modification, to continue to assign CPT code 0615T to status indicator ''Q1'' and APC 5734 for CY 2022. The final CY 2022 payment rate for the CPT code can be found in Addendum B to this final rule with comment period (which is available via the internet on the CMS website).

16. FemSelect Enplace Procedure (APC 5415)

For CY 2022, we proposed to continue to assign HCPCS code C9778 (Colpopexy, vaginal; minimally invasive extra-peritoneal approach (sacrospinous)) to APC 5414 Level 4 Gynecologic Procedures. We created HCPCS code C9778 to describe the technology associated with vaginal colpopexy by sacrospinous ligament fixation, based on our review of a New Technology APC application submitted by the manufacturer of the technology. HCPCS code C9778 was effective on July 1, 2021.

Comment: We received many comments from providers and the manufacturer requesting that HCPCS code C9778 be reassigned to APC 5415 Level 5 Gynecologic Procedures, which had a proposed CY 2022 OPPS payment rate of $4,525.49. Commenters stated that the resource cost exceeded the payment provided by APC 5414, and that APC 5415 would be a more appropriate APC assignment.

Response: We thank the commenters for their recommendations. Based on input from our medical advisors, further evaluation of the resources to perform the surgery, and its similarity to existing procedures, we believe that HCPCS code C9778 should be reassigned to APC 5415. Based on our assessment, we believe that the service described by HCPCS code C9778 shares similar resource and clinical characteristics to the procedures included in APC 5415.

In summary, after consideration of the public comments, we are reassigning HCPCS code C9778 to APC 5415 Level 5 Gynecologic Procedures for CY 2022, as shown in Table 26 below. The final CY 2022 OPPS payment rates for this code can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 of this final rule with comment period for the SI meanings for all codes reported under the OPPS. Both Addendum B and D1 are available via the internet on the CMS website.

As we do every year, we will reevaluate the APC assignment for HCPCS code C9778 for the next rulemaking cycle. We note that we review, on an annual basis, the APC assignments for all services and items paid under the OPPS. The first year that claims data will be available for HCPCS code C9778 will be during the CY 2023 rulemaking cycle.

TABLE 26: PROPOSED AND FINAL APC ASSIGNMENT FOR HCPCS CODE C9778

HCPCS Code	Long Descriptor	Proposed CY 2022 APC	Final CY 2022 APC
C9778	Colpopexy, vaginal; minimally invasive extra-peritoneal approach (sacrospinous)	5414	5415

17. Hypoglossal Nerve Neurostimulator (HGNS) Procedure (APC 5465)

Effective January 1, 2022, the AMA's CPT Editorial Panel created a new code to describe open implantation of hypoglossal nerve neurostimulator array. For CY 2022, we proposed to assign CPT code 64582 to APC 5465 (Level 5 Neurostimulator and Related Procedures) with a proposed payment rate of $30,208.51. We note that CPT code 64582 was listed as placeholder code 645X1 in OPPS Addendum B of the CY 2022 OPPS/ASC proposed rule.

Comment: One commenter expressed support for the proposed APC assignment.

Response: We thank the commenter for their support.

In summary, after consideration of the public comments, we are finalizing our proposal without modification. Specifically, we are finalizing our APC proposal to assign CPT code 64582 to APC 5465. The final CY 2022 OPPS payment rate for this code can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 of this final rule with comment period for the SI meanings for all codes reported under the OPPS. Both Addendum B and D1 are available via the internet on the CMS website.

18. IDx-DR: Artificial Intelligence System To Detect Diabetic Retinopathy (APC 5733)

For CY 2022, we proposed to continue to assign CPT code 92229 (Imaging of retina for detection or monitoring of disease; with point-of care automated analysis with diagnostic report; unilateral or bilateral) to APC 5733 (Level 3 Minor Procedures) with a proposed payment rate of $57.12.

Comment: Some commenters disagreed with the proposed payment amount and requested a revision in the assignment from APC 5733 to APC 5734 (Level 4 Minor Procedures) with a proposed payment rate of $115.71. The commenters reported that the service described by CPT code 92229 is similar to the technical components described by existing CPT code 92250 (Fundus photography with interpretation and report), which was proposed for assignment to APC 5734. They stated that providers previously billed for this service on an interim basis under CPT code 92250. The commenters indicated that APC 5734, which is the APC assigned to the predecessor CPT code 92250, is the more appropriate assignment for CPT code 92229 until sufficient Medicare claims data can be collected by CMS to either retain that assignment or reassign to another APC.

One commenter expressed support for our proposal to continue APC assignment of CPT code 92229 to APC 5733.

Response: As discussed in the CY 2021 OPPS final rule with comment period (85 FR 85962), we do not believe that CPT code 92250, which the commenters reported to be the predecessor code, is similar to the IDx–DR test; otherwise, the placement of the new IDx–DR code would have been close to CPT code 92250. As the commenter did not provide any additional clinical information or cost data, we continue to believe that CPT code 92229 should be assigned to APC 5733.

In summary, after consideration of the public comments, we are finalizing our proposal without modification. Specifically, we are continuing to assign CPT code 92229 to APC 5733. The final CY 2022 payment rate for this code can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 of this final rule with comment period for the status indicator (SI) meanings for all codes reported under the OPPS. Both Addendum B and D1 are available via the internet on the CMS website.

19. Intravascular Lithotripsy (IVL) Procedure (APCs 5193 and 5194)

As explained in the CY 2021 OPPS/ASC final rule with comment period, we finalized our proposal to assign HCPCS codes C9764 (Revascularization, endovascular, open or percutaneous, lower extremity artery(ies), except tibial/peroneal; with intravascular lithotripsy, includes angioplasty within the same vessel(s), when performed) and C9765 (Revascularization, endovascular, open or percutaneous, lower extremity artery(ies), except tibial/peroneal; with intravascular lithotripsy, and transluminal stent placement(s), includes angioplasty within the same vessel(s), when performed) to APC 5192 and C9766 (Revascularization, endovascular, open or percutaneous, lower extremity artery(ies), except tibial/peroneal; with intravascular lithotripsy and atherectomy, includes angioplasty within the same vessel(s), when performed) to APC 5193 (85 FR 85975 through 85976). For a detailed discussion on the APC assignments for HCPCS code(s) describing the IVL procedures, we refer readers to the CY 2021 OPPS/ASC final rule with comment period (85 FR 85975 through 85976).

At the August 23, 2021 meeting, the HOP Panel recommended that CMS reassign HCPCS code C9764 to APC 5193 and HCPCS codes C9765 and C9766 to APC 5194, as long as the cost of the IVL device is within 10 percent of other devices currently available.

Comment: Several commenters, including the manufacturer, disagreed with CMS's proposed CY 2022 APC assignments for the IVL service described by HCPCS codes C9764, C9765, and C9766. They argued that, for new procedures that did not have claims in the CY 2019 claims data, current claims data should be used when reviewing for APC placement. The commenter also noted the CY 2020 claims data provided evidence to support their argument that the service described by HCPCS code C9764 is not adequately reimbursed under APC 5192, and recommended reassignment to APC 5193 (Level 3 Endovascular Procedures). Similarly, the commenters indicated that assignment of HCPCS codes C9765 and C9766 to APC 5193 does not provide adequate payment for the service based on 2020 claims data and that those codes should instead be placed in APC 5194 (Level 4 Endovascular Procedures).

Response: In the CY 2022 OPPS/ASC proposed rule, we proposed to use 2019 claims data in the OPPS due to the effects of the PHE on the CY 2020 claims data. As the commenter noted, claims data are not available for HCPCS codes C9764 through C9766 in the CY 2019 claims data, only in CY 2020. As discussed in more detail in section X.E. of this final rule with comment period, we are not using CY 2020 claims data for ratesetting because of data integrity concerns with respect to the broader OPPS; however, based on stakeholder request, we are reviewing the CY 2020 claims data for determining potential APC assignments in cases where CY 2019 claims data did not include any information on new procedures.

Under what would otherwise be the standard ratesetting process, we would typically use CY 2020 claims data submitted for services furnished in CY 2020, that were processed on or before June 30, 2021. Our analysis of that CY 2020 claims data supports reassigning CPT code C9764 to APC 5193 and CPT codes C9765 and C9766 to APC 5194, based on their estimated geometric mean costs. Specifically, our claims data show a geometric mean cost of approximately $11,442.47 for HCPCS code C9764 based on 253 single claims, which is comparable to the geometric mean cost of about $10,258.49 for APC 5193, rather than the geometric mean cost of approximately $5,061.89 for APC 5192. The geometric mean cost of approximately $17,372.02 for HCPCS code C9765 and the geometric mean

cost of approximately $19,285.11 for HCPCS code C9766 is also consistent with the costs for significant services in APC 5194, which range between about $10,670.16 (for HCPCS code C9754) to $24,311.10 (for HCPCS code C9767). Based on our analysis of the latest available CY 2020 claims data, we believe that HCPCS codes C9765 and C9766 are more appropriately assigned to APC 5194.

In summary, after consideration of the public comments, we are assigning HCPCS code C9764 to APC 5193 and HCPCS codes C9765 and C9766 to APC 5194. Table 27 below lists the three HCPCS codes for the IVL procedure and their APC and SI assignments for CY 2022. The final CY 2022 OPPS payment rates for the codes can be found in Addendum B of this final rule with comment period. Addendum B is available via the internet on the CMS website.

TABLE 27: FINAL SI AND APC ASSIGNMENT FOR HCPCS CODES C9764 THROUGH C9766

HCPCS Code	Long Descriptor	Final OPPS SI	Final OPPS APC
C9764	Revascularization, endovascular, open or percutaneous, lower extremity artery(ies), except tibial/peroneal; with intravascular lithotripsy, includes angioplasty within the same vessel(s), when performed	J1	5193
C9765	Revascularization, endovascular, open or percutaneous, lower extremity artery(ies), except tibial/peroneal; with intravascular lithotripsy, and transluminal stent placement(s), includes angioplasty within the same vessel(s), when performed	J1	5194
C9766	Revascularization, endovascular, open or percutaneous, lower extremity artery(ies), except tibial/peroneal; with intravascular lithotripsy and atherectomy, includes angioplasty within the same vessel(s), when performed	J1	5194

20. Lixelle Apheresis

Lixelle β2-microglobulin Apheresis Column is indicated for use in the treatment of dialysis-related amyloidosis (DRA), a disease that affects people with end-stage renal disease (ESRD). DRA is a metabolic disorder from the failure of the kidney to filter and remove β2-microglobulin, typically from chronic hemodialysis (typically 5 years or longer). The Lixelle device is used in an apheresis procedure that selectively removes β2-microglobulin from circulating blood and used pursuant to a physician prescription in conjunction with hemodialysis. It is intended to be used at each hemodialysis session (that is, frequency of treatment is expected to be 3 times per week). In March 2015, FDA approved LIXELLE® as a Class III Humanitarian Use Device (HUD) with an approved Humanitarian Device Exemption (HDE). There are currently no specific HCPCS or CPT code that represent the Lixelle service.

Comment: Two commenters, including the manufacturer of Lixelle apheresis column, requested payment for the procedure under the OPPS. One commenter stated that Lixelle is the only device available for the treatment DRA and that all DRA patients are Medicare beneficiaries. The commenter stated that they have been unable to complete the FDA-required post-approval study as a condition of the HDE, due to difficulty in securing patient enrollment because of lack of CMS payment for the Lixelle apheresis procedure. The commenter stated that CMS should rely upon the HUD program requirements and post-approval clinical studies mandated and approved by FDA for coverage and payment of Lixelle apheresis in the OPPS. The commenter acknowledged that Medicare payment under the ESRD PPS is not possible at this time but stated that payment under the OPPS may be more clinically appropriate. The commenter requested that CMS provide payment under the OPPS because the Lixelle apheresis is not eligible for Medicare payment when furnished in the dialysis facility at this time, and therefore, these treatments (even though technically not ''scheduled'' or ''non-routine'') should be eligible for payment when furnished in the hospital outpatient department under the OPPS. Specifically, the commenter requested that CMS provide payment under the OPPS using the following pathways: (1) By paying for the apheresis procedure used with the Lixelle device through CPT code 36516 (Therapeutic apheresis with extracorporeal immunoadsorption, selective adsorption or selective filtration and plasma reinfusion), proposed to be assigned to APC 5243 (Level 3 Blood Product Exchange and Related Services) for CY 2022, and requiring the use of a modifier or add-on code when the Lixelle apheresis procedure is billed to reduce the payment for the procedure to the payment rate for APC 5242 (Level 2 Blood Product Exchange and Related Services); (2) by allowing payment for

the dialysis performed as part of Lixelle apheresis procedure through HCPCS code G0257 (Unscheduled or emergency dialysis treatment for an ESRD patient in a hospital outpatient department that is not certified as an ESRD facility), which is assigned to APC 5401 (Dialysis) for CY 2022, and requiring the use of a modifier or add-on code to provide additional payment beyond that provided for APC 5401; or (3) by creating a HCPCS C code or G code for the Lixelle apheresis procedure and assigning the code to APC 5242 (Level 2 Blood Product Exchange and Related Services).

Response: We appreciate the commenters' input on the Lixelle device and will consider their recommendations for future rulemaking.

21. Low Dose Computed Tomography (LDCT) (APC 5522)

For CY 2022, we proposed to continue to assign CPT code 71271 (Computed tomography, thorax, low dose for lung cancer screening, without contrast material(s)) to APC 5521 (Level 1 Imaging without Contrast) with a proposed payment rate of $83.01.

Comment: Several commenters stated that CPT code 71271 should be reassigned to APC 5523 (Level 3 Imaging without Contrast) with a proposed payment rate of $236.14. These commenters stated that CPT code 71271 should not be in a lower APC than CPT code 71270 (Computed tomography, thorax; without contrast material, followed by contrast material(s) and further sections) given that CPT code 71271 has additional resource costs, such as greater clinical staff time. The commenter noted that we proposed to assign CPT code 71270 to APC 5571 (Level 1 Imaging With Contrast) with a payment rate of $183.30.

Response: The predecessor code to CPT code 71271 was HCPCS code G0297 (Low dose ct (ldct) scan for lung cancer screening) which was assigned to APC 5521. However, in the CY 2021 Physician Fee Schedule final rule, we stated that it was a longstanding CMS policy that the payment for HCPCS code G0297 match the payment rate for CPT code 71250, which we proposed to assign to APC 5522 (Level 2 Imaging without Contrast) with a payment rate of $111.73, as the services are almost identical in terms of clinical similarity and resource costs (85 FR 84621 through 84622). In the interests of preserving the relationship between the predecessor code and CPT code 71250, and based on our review of the clinical characteristics of the procedure and input from our medical advisors, we believe that CPT code 71271 should be reassigned to APC 5522 (Level 2 Imaging without Contrast). We believe that assignment to APC 5522 for both CPT codes 71250 and 71271 accurately reflects the resources associated with performing this service.

In summary, after consideration of the public comments, we are finalizing our proposal, with modification. Specifically, we are reassigning CPT code 71271 to APC 5522. The final CY 2022 payment rate for this code can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 to this final rule with comment period for the SI meanings for all codes reported under the OPPS. Both Addendum B and D1 are available via the internet on the CMS website.

22. Magnetic Resonance-Guided Focused Ultrasound Surgery (MRgFUS) (APC 5463)

CPT code 0398T (Magnetic resonance image guided high intensity focused ultrasound (mrgfus), stereotactic ablation lesion, intracranial for movement disorder including stereotactic navigation and frame placement when performed) describes MRgFUS procedures for the treatment of essential tremor. We have identified 175 paid claims for CY 2019 with a geometric mean of $12,334.67. CPT code 0398T had been assigned to a New Technology APC for several years. Then, in CY 2021, we reorganized the Neurostimulator and Related Procedures APCs to add a new Level 3 category (APC 5463) that had a geometric mean of approximately $10,950. While the payment rate for APC 5463 was somewhat lower than the geometric mean of CPT code 0398T, it was a reasonable estimate of the cost of MRgFUS for the treatment of essential tremor in a prospective payment system where some services receive more payment than their geometric mean cost, while other services receive less payment than their geometric mean cost. For CY 2022, we proposed continuing to assign CPT code 0398T to APC 5463 with a payment rate of approximately $10,956.33.

Comment: One commenter, the manufacturer, requests a higher paying APC for CPT code 0398T because the current payment rate for APC 5463 (Level 3 Neurostimulator and Related Procedures) of approximately $10,956.33 is substantially lower than the geometric mean cost of the service. According to the commenter, the geometric mean of CPT code 0398T has steadily increased from $10,136 in CY 2018 to $13,907 in CY 2020.

Response: We appreciate the commenter's concerns about the level of payment for CPT code 0398T. However, the OPPS is a prospective payment system and it is expected that any individual service may be paid more or less than the geometric mean cost of the service. The current payment difference between the geometric mean cost of CPT code 0398T and the payment rate for APC 5463 is $1,153.66 ($12,109.99 minus $10,956.33) with the payment rate of APC 5463 equal to $10,956.33. That means there is no violation of the two-times rule to assign CPT code 0398T to APC 5463, and the service is assigned to an APC that covers around 90 percent of the geometric mean cost of the service. Also, CPT code 0398T is grouped with other neurostimulator and related procedures that have clinical and resource similarity to the MRgFUS.

After our review of the public comments, we have decided to implement our proposal without modification to continue to assign CPT code 0398T to APC 5463 (Level 3 Neurostimulator and Related Procedures). The final CY 2022 payment rate for CPT code 0398T can be found in Addendum B to this final rule with comment period, which is available via the internet on the CMS website.

23. Medical Physics Dose (APC 5612)

For CY 2022, we proposed to continue to assign CPT code 76145 (Medical physics dose evaluation for radiation exposure that exceeds institutional review threshold, including report (medical physicist/dosimetrist)) in APC 5611 (Level 1 Therapeutic Radiation Treatment Preparation) with a proposed payment rate of $130.19.

Comment: Several commenters disagreed with the assignment to APC 5611 and requested a reassignment to APC 5724 (Level 4 Diagnostic Tests and Related Services) with a proposed payment rate of $943.96. The commenters stated that the services assigned to APC 5724 require similar resource use as CPT code 76145. Commenters also stated that APC 5724 contains a range of services that are clinically similar to CPT 76145.

Response: Given that we have no claims data for this service, and that APC 5724 does not contain any radiation oncology services, we do not believe that APC 5724 is an appropriate assignment on the basis of clinical similarity or similar costs. However, based on our review of the service associated with CPT code 76145 and input from our medical advisors, we believe that APC code 5612, with a proposed payment rate of $347.44, may be a more appropriate assignment for

the code. APC 5612 contains CPT code 77307 (Teletherapy isodose plan; complex (multiple treatment areas, tangential ports, the use of wedges, blocking, rotational beam, or special beam considerations), includes basic dosimetry calculation(s)), which is clinically similar to CPT code 76145 in that CPT code 77307 describes the work of a medical physicist and dosimetrist. Once we have claims data, we will review the APC assignment and determine whether a change is necessary. We note that we review, on an annual basis, the APC assignments for all items and services paid under the OPPS.

In summary, after consideration of the public comments, we are reassigning CPT code 76145 to APC 5612. The final CY 2022 payment rate for this code can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 to this final rule with comment period for the SI meanings for all codes reported under the OPPS. Both Addendum B and D1 are available via the internet on the CMS website.

24. MiVu Mucosal Integrity Testing System (APC 5303)

For CY 2022, we proposed to continue to assign HCPCS code C9777 (Esophageal mucosal integrity testing by electrical impedance, transoral (list separately in addition to code for primary procedure)) to OPPS status indicator ''N,'' to indicate that the payment for HCPCS code C9777 is packaged into the payment for the primary procedure. We created HCPCS code C9777 to describe mucosal integrity testing by electrical impedance, based on our review of a New Technology APC application submitted by the manufacturer of the technology. HCPCS code C9777 was effective on April 1, 2021. Based on the application submitted to CMS and our initial review of the procedure, we believed the MiVu test to be performed with another primary procedure on the same day. Because the MiVu test is always performed as an add-on test to either an esophagoscopy or esophagogastroduodenoscopy, we established a C-code to appropriately describe the add-on component. Under the regulation at 42 CFR 419.2, payment for add-on codes is packaged or conditionally packaged into the payment for the related procedures or services under the OPPS.

Comment: We received several comments from providers and the manufacturer requesting that HCPCS code C9777 be separately reimbursed and reassigned to APC 5303 Level 3 Upper GI Procedures, which had a proposed CY 2022 OPPS payment rate of $3,160.76. Commenters argued that MiVu™ should be considered the primary procedure, not the esophagoscopy or esophagogastroduodenoscopy and that based on the cost of the device and procedure, the appropriate APC assignment is APC 5303.

Response: We thank the commenters for their recommendations. After further evaluation of procedures performed in conjunction with the MiVu test on the same day, review of the comments, and input from our medical advisors, we believe that modifying the descriptor for the C-code is appropriate. We believe that revising the long descriptor to describe the service of performing both the MiVu test with either an esophagoscopy or esophagogastroduodenoscopy on the same day would ensure accurate tracking and reporting of the service and minimize inappropriate reporting of the services. Consequently, effective January 1, 2022, we are revising the descriptor for HCPCS code C9777 to read ''Esophageal mucosal integrity testing by electrical impedance, transoral, includes esophagoscopy or esophagogastroduodenoscopy,'' to accurately reflect how the procedure is currently performed in the hospital outpatient setting. With the change in the descriptor for HCPCS code C9777, we are assigning HCPCS code C9777 to APC 5303 based on its resource and clinical homogeneity to the other procedures in the APC. We remind hospitals that because HCPCS code C9777 describes both the MiVu test performed with either an esophagoscopy or esophagogastroduodenoscopy on the same day, HOPDs should not report separate HCPCS codes for the esophagoscopy or esophagogastroduodenoscopy.

In summary, after consideration of the public comments, we are modifying the long descriptor for HCPCS code C9777, as shown in Table 28 below, and reassigning HCPCS code C9777 to APC 5303 (Level 3 Upper GI Procedures) for CY 2022. The final CY 2022 OPPS payment rates for this code can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 of this final rule with comment period for the SI meanings for all codes reported under the OPPS. Both Addendum B and D1 are available via the internet on the CMS website.

As we do every year, we will reevaluate the APC assignment for HCPCS code C9777 for the next rulemaking cycle. We note that we review, on an annual basis, the APC assignments for all services and items paid under the OPPS.

TABLE 28: PROPOSED AND FINAL CY 2022 SI AND APC ASSIGNMENT FOR HCPCS CODE C9777

HCPCS Code	Long Descriptor	Proposed CY 2022 SI	Final CY 2022 SI	Final CY 2022 APC
C9777	Esophageal mucosal integrity testing by electrical impedance, transoral, includes esophagoscopy or esophagogastroduodenoscopy	N	J1	5303

25. Musculoskeletal Procedures (APCs 5111 Through 5116)

Prior to the CY 2016 OPPS, payment for musculoskeletal procedures was primarily divided according to anatomy and the type of musculoskeletal procedure. As part of the CY 2016 reorganization to better structure the OPPS payments to utilize prospective payment packages, we consolidated these individual APCs so that they became a general Musculoskeletal APC series (80 FR 70397 through 70398).

In the CY 2018 OPPS/ASC final rule with comment period (82 FR 59300), we continued to apply a six-level structure for the Musculoskeletal APCs because doing so provided an appropriate distinction for resource costs at each level and provided clinical homogeneity. However, we indicated that we would continue to review the structure of these APCs to determine whether additional granularity would be necessary.

In the CY 2019 OPPS proposed rule (83 FR 37096), we recognized that commenters had previously expressed concerns regarding the granularity of the current APC levels and, therefore, requested comment on the establishment of additional levels. Specifically, we solicited comments on the creation of a new APC level between the current Level 5 and Level 6 within the Musculoskeletal APC series. While some commenters suggested APC reconfigurations and requests for change to APC assignments, many commenters requested that we maintain the current six-level structure and continue to monitor the claims data as they become available. Therefore, in the CY 2019 OPPS/ASC final rule with comment period, we maintained the six-level APC structure for the Musculoskeletal Procedures APCs (83 FR 58920 through 58921).

Based on the claims data available for the CY 2022 OPPS/ASC proposed rule, we continued to believe that the six-level APC structure for the Musculoskeletal Procedures APC series is appropriate and we proposed to maintain the it for the CY 2022 OPPS update.

Comment: One commenter requested that we assign CPT code 28297 (Correction, hallux valgus (bunionectomy), with sesamoidectomy, when performed; with first metatarsal and medial cuneiform joint arthrodesis, any method) and CPT code 28740 (Arthrodesis, midtarsal or tarsometatarsal, single joint) from APC 5114 to APC 5115. They noted that if these codes were considered cost significant for purposes of the 2 times rule, then these codes would cause 2 times rule violations in APC 5114.

Response: We appreciate the commenter's recommendation regarding the APC assignment of CPT 28297 and 28740. CPT codes 28297 and 28740 are currently assigned to APC 5114 (Level 4 Musculoskeletal Procedures). We note that APC 5114 does not currently have a 2 times rule violation, under the requirements for cost significance as described in section III.B.2. of this final rule with comment period. In addition, we have reviewed the codes' geometric mean cost in both the CY 2019 and CY 2020 claims data available as well as their clinical similarity to other codes within APC 5114 and believe that their current APC assignment continues to be appropriate.

Comment: One commenter supported the proposed assignment of HCPCS code 0627T (Percutaneous injection of allogeneic cellular and/or tissue-based product, intervertebral disc, unilateral or bilateral injection, with fluoroscopic guidance, lumbar; first level) and HCPCS code 0629T (Percutaneous injection of allogeneic cellular and/or tissue-based product, intervertebral disc, unilateral or bilateral injection, with ct guidance, lumbar; first level) to APC 5115. Another commenter supported the proposed assignment of HCPCS code 0627T (Percutaneous injection of allogeneic cellular and/or tissue-based product, intervertebral disc, unilateral or bilateral injection, with fluoroscopic guidance, lumbar; first level) and 0630T (Percutaneous injection of allogeneic cellular and/or tissue-based product, intervertebral disc, unilateral or bilateral injection, with ct guidance, lumbar; each additional level (list separately in addition to code for primary procedure)) to APC 5115.

Response: We appreciate the commenters' support. We note that that the availability of these codes does not mean that the product(s) are legally marketed under the Federal Food, Drug and Cosmetic Act and/or the Public Health Service Act.

Comment: A commenter requested that we allow an exception from the broader proposed OPPS ratesetting process to use the CY 2020 claims data for ratesetting for the musculoskeletal APC series (5111 through 5116). Two commenters also requested that we allow an exception for the use of CY 2020 claims data for CPT code 27130 (Arthroplasty, acetabular and proximal femoral prosthetic replacement (total hip arthroplasty), with or without autograft or allograft), which was removed from the IPO list beginning in CY 2020.

Response: We appreciate the commenters' concerns regarding available data and its use in OPPS ratesetting. However, we note that widespread use of claims data from two different years to set rates for a items and services in a single year could distort the OPPS relative payment weights, which we believe would be inappropriate and unnecessary when claims data from a single year—in this case, 2019—are largely available for ratesetting and using these data generally to set CY 2022 rates allows us to avoid this sort of distortion. As a result, we are establishing a final policy of using CY 2019 claims for establishing the OPPS relative weights but allowing limited use of CY 2020 claims for informational purposes where CY 2019 claims are not otherwise available. For additional detail regarding the use of CY 2019 claims in CY 2022 OPPS ratesetting, please see section X.E. of this final rule with comment period.

After consideration of the comments, we are finalizing the proposed assignment of CPT codes 28297 and 28740 to APC 5114, and the proposed assignment of CPT codes 0627T, 0629T and 0630T to APC 5115 for the CY 2022 OPPS.

26. Non-Highly Enriched Uranium (Non-HEU) Sources (APC 1442)

Radioisotopes are widely used in modern medical imaging, particularly for cardiac imaging and predominantly for the Medicare population. Some of the Technetium-99 (Tc-99m), the radioisotope used in the majority of such diagnostic imaging services, is produced in legacy reactors outside of the United States using highly enriched uranium (HEU).

The United States would like to eliminate domestic reliance on these reactors, and is promoting the conversion of all medical radioisotope production to non-HEU sources. Alternative methods for producing Tc99m without HEU are technologically and economically viable, and conversion to such production has begun. We expect that this change in the supply source for the radioisotope used for modern medical imaging will introduce new costs into the payment system that are not accounted for in the historical claims data.

Therefore, beginning in CY 2013, we finalized a policy to provide an additional payment of $10 for the marginal cost for radioisotopes produced by non-HEU sources (77 FR 68323). Under this policy, hospitals report HCPCS code Q9969 (Tc-99m from non-highly enriched uranium source, full cost recovery add-on per study

dose) once per dose along with any diagnostic scan or scans furnished using Tc-99m as long as the Tc-99m doses used can be certified by the hospital to be at least 95 percent derived from non-HEU sources (77 FR 68321).

Comment: Multiple commenters requested that we increase the payment rate for HCPCS add-on code Q9969 from $10 and to make the add-on code permanent. The commenters noted that we have not increased the payment rate for Q9969 since the code was established in CY 2013, and one of the commenters believes that we have made only token efforts to promote the use of non-HEU produced Mo-99, the parent nuclide to Tc-99m.

One of the commenters supported a rate increase to Q9969 to fully reflect the additional cost to providers to obtain non-HEU medical isotopes. The same commenter suggested that if such a cost-analysis could not be done for CY 2022, we should increase the payment for Q9969 by the annual market basket increase for CY 2022 along with a one-time increase to reflect prior increases to the market basket between CY 2013 and CY 2021. Alternatively, the commenter suggested the payment rate could be increased by the change in the drug cost threshold packaging amount between CY 2013 and CY 2022.

Response: We appreciate the information we received from the commenters supporting an increase to the payment rate of $10 for HCPCS code Q9969, especially since the conversion to non-HEU sources for medical isotopes has not been completed by all producers. As discussed in the CY 2013 OPPS/ASC final rule with comment period, we did not finalize a policy to use the usual OPPS methodologies to update the non-HEU add-on payment (77 FR 68317). The purpose of the additional payment is limited to mitigating any adverse impact of transitioning to non-HEU sources, and we believe the add-on is appropriate at this time.

Comment: Multiple commenters supported the current payment amount for HCPCS code Q9969, and they requested that we finalize our proposed payment rate for the add-on.

Response: We appreciate the support of the commenters for the proposed payment rate for HCPCS code Q9969.

After consideration of the public comments we received, we are finalizing our proposal, without modification, to continue the policy of providing an additional $10 payment for radioisotopes produced by non-HEU sources for CY 2022 as represented by HCPCS code Q9969.

27. Nuclear Medicine Services: Single-Photon Emission Computed Tomography (SPECT) Studies (APC 5593)

For CY 2022, we proposed to continue to assign CPT code 78803 (Radiopharmaceutical localization of tumor, inflammatory process or distribution of radiopharmaceutical agent(s) (includes vascular flow and blood pool imaging, when performed); tomographic (spect), single area (eg, head, neck, chest, pelvis), single day imaging)) to APC 5593 (Level 3 Nuclear Medicine and Related Services) with a proposed payment rate of $1,340.84.

Comment: One commenter expressed support for the proposed APC assignment.

Response: We thank the commenter for their support. We note that, based on our analysis of the claims data for this CY 2022 OPPS/ASC final rule with comment period, our data reveals a geometric mean cost of about $529.69 based on 4157 single claims (out of 9451 total claims), which is in line with the geometric mean cost of $1,273.36 for APC 5593.

In summary, after consideration of the public comments, we are finalizing our proposal without modification to assign CPT code 78803 to APC 5593. The final CY 2022 OPPS payment rate for this code can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 of this final rule with comment period for the SI meanings for all codes reported under the OPPS. Both Addendum B and D1 are available via the internet on the CMS website.

28. Pathogen Test(s) for Platelets (APC 5733)

For the July 2017 update, the HCPCS Workgroup established HCPCS code Q9987 (Pathogen(s) test for platelets) effective July 1, 2017. This new code and the OPPS APC assignment was announced in the July 2017 OPPS quarterly update CR (Transmittal 3783, Change Request 10122, dated May 26, 2017). Subsequently, HCPCS code Q9987 was deleted on December 31, 2017, and replaced with permanent HCPCS code P9100 (Pathogen(s) test for platelets) effective January 1, 2018. Each of the HCPCS codes were assigned to New Technology APCs for the period of July 2017 through December 2020 with payment rates for the service ranging between $25.50 and $35.50. Starting in January 2021, we decided to assign P9100 to APC 5732 (Level 2 Minor Procedures) with a payment rate of approximately $33.

From July 2017 until 2021, only one type of pathogen test for platelets, rapid bacterial testing, was described by HCPCS code P9100. The estimated cost for a rapid bacterial test was around $30, which has been confirmed through claims data. Starting in 2021, a new type of pathogen test for platelets, culture-based bacterial testing, using large volume delayed sampling (LVDS), was introduced. This culture-based method is used to test for bacterial contamination of leukocyte-reduced apheresis platelets and leukocyte-reduced whole blood platelet concentrates. We do not have claims data describing the cost of the LVDS test. For CY 2022, we proposed to assign HCPCS code P9100 to APC 5732 (Level 2 Minor Procedures with a payment rate of approximately $33, which is the same APC assignment for HCPCS code P9100 as in CY 2021.

Comment: Two commenters requested we increase the payment rate for HCPCS code P9100 by moving the service from APC 5732 (Level 2 Minor Procedures) with payment rate of $32.98 to APC 5733 (Level 3 Minor Procedures) with a payment rate of $54.24. The commenters claim that the cost of the LVDS test is either $75 or $83, depending on which manufacturer's test is used, which is substantially higher than the approximately $30 cost of the rapid bacterial test for platelets. The commenters believe that the proposed payment rate of $32.98 for APC 5732 is too low to adequately compensate hospitals for the share of pathogen tests for platelets using the more expensive culture-based test, using LVDS. Commenters believed assigning HCPCS code P9100 to APC 5733 with a payment rate of $54.24 would better reflect the mixture of costs between culture-based platelet tests using LVDS and rapid bacterial tests.

Response: We agree with the commenters that the payment rate for HCPCS code P9100 should better reflect the resource cost of the anticipated mixture of rapid bacterial platelet tests and culture-based platelet tests, using LVDS, that will be used in CY 2022 to test for bacterial contamination in platelets. Therefore, we support the suggestion of the commenters to reassign HCPCS code P9100 to APC 5733 (Level 3 Minor Procedures) with a payment rate of $54.24.

After reviewing the public comments, we have decided to modify our proposal and reassign HCPCS code P9100 from APC 5732 (Level 2 Minor Procedures) to APC 5733 (Level 3 Minor Procedures) for CY 2022. The final CY 2022 payment rate for HCPCS code P9100 can be found in Addendum B to this CY 2022 OPPS/ASC final rule with comment period

which is available via the internet on the CMS website.

29. Pulmonary Rehabilitation (APC 5733)

For CY 2022, the AMA's CPT Editorial Panel created two new codes describing pulmonary rehabilitation services and requested that CMS delete HCPCS code G0424 (Pulmonary rehabilitation, including exercise (includes monitoring), one hour, per session, up to two sessions per day). We proposed to assign CPT code 94625 (Physician or other qualified health care professional services for outpatient pulmonary rehabilitation; without continuous oximetry monitoring (per session)) and CPT code 94626 (Physician or other qualified health care professional services for outpatient pulmonary rehabilitation; with continuous oximetry monitoring (per session)) to APC 5733 (Level 3 Minor Procedures) with a proposed payment rate of $57.12. We note that CPT codes 94625 and 94626 were listed as placeholder codes 946X1 and 946X2, respectively, in OPPS Addendum B of the CY 2022 OPPS/ASC proposed rule.

Comment: Several commenters disagreed with the proposed APC assignment and requested that CMS reassign CPT codes 94625 and 94626 to either APC 5721 (Level 1 Diagnostic Tests and Related Services) with a proposed payment rate of $143.21 or to APC 5771 (Cardiac Rehabilitation) with a proposed payment rate of $119.09. These commenters stated that these APCs better reflected the clinical similarity and costs associated with furnishing these services.

Response: CPT codes 94625 and 94626 do not describe diagnostic tests and so are not clinically similar to the other services in APC 5721. While clinically similar to cardiac rehabilitation services, predecessor HCPCS code G0424 has a geometric mean cost of $45.63 based on 198,132 single claims (out of 199,356 total claims), which is significantly lower than the geometric mean cost of $113.12 for the services in APC 5771. Based on our analysis, we believe that assignment of CPT codes 94625 and 94626 to APC 5733 is appropriate because their costs are consistent with the cost data of the predecessor code. We note that we review, on an annual basis, the APC assignments for all items and services paid under the OPPS. We will consider whether the current APC structure adequately reflects the clinical similarities and costs associated with pulmonary rehabilitation services in future rulemaking.

In summary, after consideration of the public comments, we are finalizing our proposal without modification to assign CPT codes 94625 and 94626 to APC 5733. The final CY 2022 OPPS payment rates for the codes can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 of this final rule with comment period for the SI meanings for all codes reported under the OPPS. Both Addendum B and D1 are available via the internet on the CMS website.

30. Sclerotherapy (APC 5054)

For CY 2022, we proposed to continue assignment of both CPT codes 36465 (Injection of non-compounded foam sclerosant with ultrasound compression maneuvers to guide dispersion of the injectate, inclusive of all imaging guidance and monitoring; single incompetent extremity truncal vein (for example, great saphenous vein, accessory saphenous vein)) and CPT code 36466 (Injection of non-compounded foam sclerosant with ultrasound compression maneuvers to guide dispersion of the injectate, inclusive of all imaging guidance and monitoring; multiple incompetent truncal veins (for example, great saphenous vein, accessory saphenous vein), same leg) to APC 5054 (Level 4 Skin Procedures) with a proposed payment rate of $1,759.21.

Comment: One commenter disagreed with the proposed assignment of the procedures described by CPT codes 36465 and 36466 to APC 5054 and requested a reassignment to APC 5183 (Level 3 Vascular Procedures), which had a proposed payment rate of $2,937.76. The commenter stated that the per-procedure cost for the Varithena foam sclerosant used in the procedure is $1,054. The commenter stated that APC 5183 is more clinically appropriate and reflects the resources required to perform the procedure. Specifically, the commenter indicated that the procedures described by CPT codes 36465 and 36466 share similar clinical and resource characteristics to the following surgical procedures that are assigned to APC 5183:

- CPT code 36473 (Endovenous ablation therapy of incompetent vein, extremity, inclusive of all imaging guidance and monitoring, percutaneous, mechanochemical; first vein treated);
- CPT code 36475 (Endovenous ablation therapy of incompetent vein, extremity, inclusive of all imaging guidance and monitoring, percutaneous, radiofrequency; first vein treated); and
- CPT code 36478 (Endovenous ablation therapy of incompetent vein, extremity, inclusive of all imaging guidance and monitoring, percutaneous, laser; first vein treated).

The commenter also stated that the proposed geometric mean cost of $1,567.45 for 36465 would not be the lowest cost procedure if placed in APC 5183 and that the geometric mean costs of CPT code 36466 would be better aligned with APC 5183.

Response: Based on input from our clinical advisors, we believe that the procedures described by CPT codes 36465 and 36466 are clinically similar to the procedures assigned to APC 5054. We do not believe that the resources used for the procedures described by CPT codes 36465 and 36466 are comparable to the procedures described by CPT codes 36473, 36475, and 36478, which are assigned to APC 5183. We also note that the proposed geometric mean cost of $2,314.25 for CPT code 36466 is greater than the other codes with significant volume in APC 5183 and above the highest geometric mean cost of codes with significant volume in the next lower APC 5182 (Level 2 Vascular Procedures). Consequently, we believe that APC 5054 appropriately reflects the resources and clinical characteristics associated with the procedures described by CPT codes 36465 and 36466. We note that the geometric mean cost for APC 5054 is approximately $1,668.97, which exceeds the cost of the Varithena foam sclerosant ($1,054, as reported by the commenter) used in the procedure. We also note that the geometric mean costs for CPT codes 36465 and 36466 are well within the range of significant costs associated with APC 5054 ($1,402.75–$2,752.68).

Therefore, after consideration of the public comment received, we are finalizing our proposal without modification for assignment of the procedures described by CPT codes 36465 and 36466 to APC 5054. The final CY 2022 OPPS payment rates for the codes can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 of this final rule with comment period for the SI meanings for all codes reported under the OPPS. Both Addendum B and D1 are available via the internet on the CMS website.

31. Stromal Vascular Fraction (SVF) Therapy

For CY 2022, we proposed to continue assignment of CPT codes 0565T (Autologous cellular implant derived from adipose tissue for the treatment of osteoarthritis of the knees; tissue harvesting and cellular implant creation) and 0566T (Autologous

cellular implant derived from adipose tissue for the treatment of osteoarthritis of the knees; injection of cellular implant into knee joint including ultrasound guidance, unilateral) to status indicator ''E1'', indicating that these services are not paid by Medicare when submitted on outpatient claims.

Comment: One commenter supported this proposal and indicated that adipose-derived stromal vascular fraction (SVF) therapy for osteoarthritis is an unproven treatment. The commenter stated that FDA has issued several warnings about unproven cellular therapies and regenerative medicines since they offer no proven clinical benefits and may harm patients. The commenter further reported there is no indication for which SVF has been proven to be safe and effective in well-controlled clinical trials. To eliminate abuse by businesses seeking to profit from unproven treatments, the commenter suggested not paying for SVF therapy since unproven therapies create economic burdens on health systems and patients.

Response: We thank the commenter for their support.

In summary, after consideration of the public comment, we are finalizing our proposal without modification to continue assignment of CPT codes 0565T and 0566T to status indicator ''E1''. We refer readers to Addendum D1 of this final rule with comment period for the SI meanings for all codes reported under the OPPS. Addendum D1 is available via the internet on the CMS website.

32. Synthetic Resorbable Skin Substitute

The CY 2014 OPPS/ASC final rule with comment period describes skin substitute products as ''. . . a category of products that are most commonly used in outpatient settings for the treatment of diabetic foot ulcers and venous leg ulcers . . . [T]hese products do not actually function like human skin that is grafted onto a wound; they are not a substitute for a skin graft. Instead, these products are applied to wounds to aid wound healing and through various mechanisms of action that stimulate the host to regenerate lost tissue.'' (78 FR 74930 through 74931). The CY 2014 OPPS/ASC final rule with comment period also described skin substitutes as ''. . . a class of products that we treat as biologicals . . .'' and mentioned that prior to CY 2014, skin substitutes were separately paid in the OPPS as if they were biologicals according to the ASP methodology (78 FR 74930 through 74931).

The CY 2014 OPPS final rule with comment period did not specifically mention whether synthetic products could be considered to be skin substitute products in the same manner as biological products, because there were no synthetic products at that time that were identified as skin substitute products. Then in 2018, a manufacturer made a request that an entirely synthetic product that it claimed is used in the same manner as biological skin substitutes, receive a HCPCS code that would allow the product to be billed with graft skin substitute procedure codes, including CPT codes 15271 through 15278 and C5271 through C5278, starting in 2019. Initially, the synthetic product was not described as a graft skin substitute product. However, we now believe that both biological and synthetic products could be considered to be skin substitutes for Medicare payment purposes.

This view is supported by a paper referenced in a report we cited in the CY 2014 OPPS/ASC final rule with comment period titled ''Skin Substitutes for Treating Chronic Wounds Technology Assessment Report at ES–2'', which is available on the AHRQ website at: *https://www.ahrq.gov/sites/default/files/wysiwyg/research/findings/ta/skinsubs/HCPR0610_skinsubst-final.pdf.*

That paper, titled ''Regenerative medicine in dermatology: biomaterials, tissue engineering, stem cells, gene transfer and beyond'' by Dieckmann et al., states that skin substitutes should be divided into two broad categories: Biomaterial and cellular. The paper explains that ''. . . biomaterial skin substitutes do not contain cells (acellular) and are derived from natural or synthetic sources . . .'' The paper continues by describing biomaterial skin substitutes further: ''Synthetic sources include various degradable polymers such as polylactide and polyglycolide. Whether natural or synthetic, the biomaterial provides an extracellular matrix that allows for infiltration of surrounding cells.'' The paper by Dieckmann et al. indicates that skin substitute products may be synthetic products as well as biological products.

For CY 2021, we established a policy to include synthetic products in addition to biological products in our description of skin substitutes. Our new description defines skin substitutes as a category of biological and synthetic products that are most commonly used in outpatient settings for the treatment of diabetic foot ulcers and venous leg ulcers. We also retained the additional description of skin substitute products from the CY 2014 OPPS final rule which states ''. . . that skin substitute products do not actually function like human skin that is grafted onto a wound; they are not a substitute for a skin graft. Instead, these products are applied to wounds to aid wound healing and through various mechanisms of action they stimulate the host to regenerate lost tissue . . .'' (78 FR 74930 through 74931). Finally, our definition of skin substitutes does not include bandages or standard dressings and these items cannot be assigned to either the high cost or low cost skin substitute groups or be reported with either CPT codes 15271 through 15278 or HCPCS codes C5271 through C5278. For CY 2022, we proposed to continue to report synthetic graft skin substitute products using HCPCS code C1849 in the same manner as in CY 2021.

Comment: As previously requested for CY 2021, several commenters requested that we establish product-specific HCPCS codes for synthetic graft skin substitute products and requested that we delete HCPCS code C1849 because the code is not product-specific. The primary reason commenters want product-specific codes for synthetic graft skin substitute is they feel that synthetic products should be assigned to either the high cost or low cost skin substitute group based on the cost of each individual product in a similar manner to biological skin substitute products. Commenters feel that because multiple synthetic graft skin substitute products can be assigned to HCPCS code C1849, there may be some synthetic products that should be in the low cost skin substitute group that will receive payment in the high cost skin substitute group if HCPCS code C1849 is assigned to the high cost group. Commenters also expressed concern about the opposite situation, in which high cost synthetic products would potentially be underpaid if HCPCS code C1849 is assigned to the low cost skin substitute group. Commenters believed the only resolution to these issues with HCPCS code C1849 is to delete the code and replace it with product-specific HCPCS codes for each graft synthetic product so there are not cases of synthetic products being either overpaid or underpaid.

Response: HCPCS code C1849 was established in response to the need to pay for graft skin substitute application services performed with synthetic graft skin substitute products in the OPPS in a manner comparable to how we pay for graft skin substitute application services performed with biological graft skin substitute products. As mentioned earlier in this section, when we established our policy in the CY 2014 OPPS/ASC final rule with comment period to package graft skin substitute

products into their associated application procedures (78 FR 74930 through 74931), we did not specifically mention whether synthetic products could be considered skin substitute products in the same manner as biological products. The reason for this was that there were no synthetic products at that time that were identified as skin substitute products.

We note that unless a graft skin substitute product has pass-through status, graft skin substitute products are not paid separately under unique HCPCS or CPT codes in OPPS. However, in CY 2018, a manufacturer requested that CMS develop methodologies to allow synthetic graft skin substitute products to receive payment in the outpatient hospital setting and in the physician office setting. After extensive review, we made the determination to assign the synthetic product in CY 2019 to HCPCS codes A6460 and A6461, which were newly created HCPCS codes to report synthetic, resorbable wound dressings. HCPCS codes A6460 and A6461 are packaged under the OPPS and cannot be assigned to either the high cost or low cost skin substitute group. This meant that graft skin substitute products could not be billed with CPT codes 15271 through 15278 or HCPCS codes C5271 through C5278, even though synthetic graft skin substitute products and biological graft skin substitute products perform the same function and have similar efficacy. We quickly realized that using HCPCS codes A6460 and A6461 would not work to appropriately describe the application of synthetic graft products when used in similar manner to biological graft skin substitute products. Therefore, we needed to consider other approaches to this issue.

Because all skin substitutes, except those with pass-through status, are packaged under the OPPS, we explored solutions that would permit synthetic skin substitute products to be billed with either CPT codes 15271 through 15278 or HCPCS codes C5271 though C5278. We decided to create HCPCS code C1849 to describe any synthetic graft skin substitute product, and we revised the payment logic for the graft skin substitute application procedure codes to allow HCPCS code C1849 to be billed with those procedures. Multiple synthetic graft skin substitute products have now been identified as being described by HCPCS code C1849. We will average the pricing data from the various products to determine an amount for the products described by HCPCS code C1849 to compare against the MUC threshold. This comparison will determine if HCPCS code C1849 should be assigned to the high cost or low cost skin substitute category.

We appreciate the concerns expressed by commenters that one service code for synthetic products could lead to low cost synthetic graft products receiving excess payment if HCPCS code C1849 is assigned to the high cost group, or lead to high cost synthetic graft products being underpaid if HCPCS code C1849 is assigned to the low cost group. We will take these concerns into consideration in future rulemaking.

Comment: One commenter suggested that, if we do not establish product-specific HCPCS codes for each synthetic graft skin substitute product, we delete C1849 and establish two new HCPCS codes in its place. Specifically, the commenter recommended that one HCPCS code would be for high cost synthetic graft skin substitute products and the other HCPCS code would be for low cost synthetic graft skin substitute products. These two payment codes would ensure that all synthetic graft skin substitute products are assigned to the cost group that reflects whether the mean unit cost of any given synthetic graft skin substitute product is above or below the mean unit cost threshold for determining assignment to the high cost or low cost skin substitute group.

Response: We appreciate the suggestion from the commenter. We note that our policy is to allow all synthetic skin substitutes described by C1849 to bill the skin graft application CPT codes for high cost skin substitute products (CPT codes 15271 through 15278). We appreciate the commenters suggestion, which we will consider for future rulemaking.

Comment: One commenter provided suggestions on how we could revise our definition of synthetic graft skin substitute products to reduce the possibility that synthetic dressings or non-resorbable polymeric sheets could be considered synthetic skin substitute products and be reported using HCPCS code C1849.

Response: We thank the commenter for their suggestions. Currently, we do not believe that there is an issue with the definition of synthetic skin substitute products that we established for the CY 2021 OPPS/ASC final rule (85 FR 86064 through 86067). If during future rulemaking we find that synthetic graft products that do not function as skin substitutes are being reported using HCPCS code C1849, we may refer to the commenter's suggestions to help us revise our definition of synthetic graft skin substitute products.

33. Therapeutic Ultrafiltration (APC 5241)

As displayed in Addendum B to the CY 2022 OPPS/ASC proposed rule, we proposed to assign placeholder CPT code 0692T (Therapeutic Ultrafiltration) to SI ''E1'' to indicate that the code is not payable by Medicare when submitted on outpatient claims (any outpatient bill type) because the service associated with the code is either not covered by any Medicare outpatient benefit category, is statutorily excluded from Medicare payment, or is not reasonable and necessary. We note that CPT code 0692T was listed as placeholder code 057XT in OPPS Addendum B of the CY 2022 OPPS/ASC proposed rule.

Comment: Some commenters reported that the device associated with the CPT code 0692T describing therapeutic ultrafiltration received FDA approval by the U.S. Food and Drug Administration (FDA) in 2020 and requested separate payment for the code. They specifically requested assignment to APC 5242 (Level 2 Blood Product Exchange and Related Services) and SI ''S'' (Paid under OPPS; separate APC payment). They stated that CPT codes 36511 (Therapeutic apheresis; for white blood cells), and 36514 (Therapeutic apheresis; for plasma pheresis), which are assigned to APC 5242 and SI ''S,'' can be considered similar to therapeutic ultrafiltration in clinical and resource coherence.

Response: For CY 2022, OPPS payments are based on claims submitted between January 1, 2019, through December 31, 2019, and processed through June 30, 2020. Because CPT code 0692T is a new code that will be effective January 1, 2022, we have no claims data available for ratesetting. However, after further review of the service, we believe that CPT code 0692T shares similar clinical characteristics and resource costs as CPT code 36513 (Therapeutic apheresis; for platelets), which is currently assigned to APC 5241 (Level 1 Blood Product Exchange and Related Services). Therefore, we are assigning CPT code 0692T to APC 5241 and SI ''S'' for CY 2022. The final payment rate for the code can be found in Addendum B to this final rule with comment period. In addition, the SI definitions can be found in Addendum D1 to this final rule with comment period. Both Addendum B and Addendum D1 are available via the internet on the CMS website.

We note that we review, on an annual basis, the APC assignments for all services and items paid under the OPPS. As a result, we will reevaluate the APC

placement for CPT code 0692T for the next rulemaking cycle.

34. Transcatheter Implantation of Coronary Sinus Reduction Device

The Neovasc Reducer System is a novel device implanted into the coronary sinus vein using minimally invasive techniques. The Reducer is implanted by transvenous percutaneous approach from the right or left jugular vein into the coronary sinus. After positioning the balloon catheter at the implantation site, the Reducer is deployed by inflating the balloon catheter until apposition of the vessel wall is achieved. The balloon catheter is then deflated and removed from the coronary sinus, leaving the Reducer permanently inflated. After 6 to 8 weeks the hourglass shaped wire mesh is covered with endothelium and narrowing becomes effective by redistributing blood flow to ischemic areas of the heart.

In 2021, Neovasc received FDA approval for the Investigational Device Exemption (IDE) regarding the COSIRA–II Clinical Trial. COSIRA–II is a randomized, sham-controlled trial investigating the safety and effectiveness of the Reducer for patients suffering from refractory angina. Neovasc has been classified as a Category B device by FDA.

In addition, the AMA's Editorial Panel established a new code, specifically, CPT code 0645T (Transcatheter implantation of coronary sinus reduction device including vascular access and closure, right heart catheterization, venous angiography, coronary sinus angiography, imaging guidance, and supervision and interpretation, when performed), to describe the implantation of a coronary sinus reduction device that is associated with the Neovasc Reducer System. This code was effective July 1, 2021.

For CY 2022, we proposed to assign CPT code 0645T to SI ''E1'' to indicate that the code is not paid by Medicare when submitted on outpatient claims (any outpatient bill type).

Comment: One commenter, specifically, the manufacturer of the Neovasc Reducer System, requested assignment to either New Technology APC 1576 (New Technology—Level 39 ($15,001–$20,000) with the payment rate of $17,500.50, or New Technology APC 1577 (New Technology—Level 40 ($20,001–$25,000) with the payment rate of $22,500.50, in anticipation of its approval by Medicare for its Category B IDE study. The company stated there are no other surgical procedures that are similar in terms of resource costs and clinical homogeneity that would allow for the Neovasc Reducer System to be assigned to an appropriate clinical APC.

Response: Based on the information presented by the commenter, and our review of the IDE study, we do not believe that it is appropriate to assign a payable status indicator under the OPPS to CPT code 0645T prior to the approval of the Category B IDE study. In addition, the clinical study has not yet met CMS' standards for coverage, nor does it appear on the CMS Approved IDE List, which can be found at this CMS website: *https://www.cms.gov/Medicare/Coverage/IDE/Approved-IDE-Studies.html*. Because the Neovasc Reducer System has not been approved for Medicare coverage as a Category B IDE, we believe that we should continue to assign CPT code 0645T to status indicator ''E1''. If this technology later meets CMS's standards for coverage, we will assess the APC assignment for the code in a future quarterly update and/or rulemaking cycle.

Therefore, after consideration of the public comment, we are finalizing our proposal, without modification, to assign CPT code 0645T to SI ''E1''. We refer readers to Addendum D1 to this final rule with comment period for the complete list of the OPPS payment status indicators and their definitions for CY 2022. Addendum D1 is available via the internet on the CMS website.

35. Tympanostomy Using an Automated Tube Delivery System (APC 5163)

For CY 2022, we proposed to continue to assign CPT code 0583T to APC 5163 (Level 3 ENT Procedures) with a proposed payment rate of $1,387.72.

Comment: A few commenters disagreed with our proposed APC assignment. These commenters stated that CPT code 0583T should be reassigned to APC 5164 (Level 4 ENT Procedures) or APC 1523 (New Technology—Level 23 ($2,501–$3,000)) with proposed payment rates of $2,806.94 and $2,750.50, respectively. Commenters stated that CPT code 0583T is clinically similar to CPT code 69421 (Myringotomy including aspiration and/or eustachian tube inflation requiring general anesthesia), which is assigned to APC 5164. Commenters further stated that APC 5164 also includes many other middle ear procedures that involve an incision, revision, repair, and removal of tubes.

Response: We disagree with commenters on the clinical similarity between CPT code 0583T and the other services in APC 5164. For the reasons discussed in the CY 2021 OPPS final rule with comment period (85 FR 85983), based on our review of the procedure and input from our medical advisors, we continue to believe that the surgical procedure described by CPT code 0583T is most similar, in terms of clinical homogeneity and resource cost, to CPT code 69436 (Tympanostomy (requiring insertion of ventilating tube), local or topical anesthesia), which is assigned to APC 5163. Both procedures (as described by CPT codes 0583T and 69436) require ventilating tubes that require anesthesia.

In summary, after consideration of the public comments, we are finalizing our proposal without modification to continue assignment of CPT code 0583T to APC 5163. The final CY 2022 OPPS payment rates for these codes can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 of this final rule with comment period for the SI meanings for all codes reported under the OPPS. Both Addendum B and D1 are available via the internet on the CMS website.

36. Urology and Related Services (APCs 5371 Through 5378)

For CY 2016, we established the APC reorganization and developed a urology specific series of APCs 5371–5377. Since that time, we have maintained that structure and added an additional level 8, APC 5378 (Level 8 Urology and Related Services). Based on our analysis of the CY 2019 claims available for ratesetting, we proposed to continue the 8 level structure of Urology APCs in the CY 2022 OPPS. We received comments on the CY 2022 OPPS/ASC proposed rule suggesting we revise the APC assignments for the services assigned to the Urology & Related Services APCs. A commenter specifically noted that a reorganization for APCs 5375 through 5376 would be appropriate, but added that there were other adjustments across services within the Urology APCs that could improve the structure of these APCs.

We received several comments on APC reassignments. Below are the comments and our responses.

a. High-Intensity Focused Ultrasound of the Prostate (HIFU) Procedure (APC 5375)

In 2017, CMS received a new technology application for the prostate HIFU procedure and established a new code, specifically, HCPCS code C9747 (Ablation of prostate, transrectal, high intensity focused ultrasound (hifu), including imaging guidance). Based on the estimated cost provided in the new technology application, we assigned the new code to APC 5376 (Level 6 Urology and Related Services) with a payment rate of $7,452.66 effective July 1, 2017.

We announced the SI and APC assignment in the July 2017 OPPS quarterly update CR (Transmittal 3783, Change Request 10122, dated May 26, 2017).

For the CY 2018 update, we maintained the assignment of HCPCS code C9747 to APC 5376 with a payment rate of $7,596.26. We note that the payment rates for the CY 2018 OPPS update were based on claims submitted between January 1, 2016 through December 30, 2016, that were processed on or before June 30, 2017. Since HCPCS code C9747 was established on July 1, 2017, we had no claims data for the procedure for use in ratesetting for CY 2018.

However, for the CY 2019 update, based on the latest claims data for the final rule, we revised the APC assignment for HCPCS code C9747 from APC 5376 to APC 5375 with a payment rate of $4,020.54. We note that the payment rates for CY 2019 were based on claims submitted between January 1, 2017 through December 30, 2017, that were processed on or before June 30, 2018. Our claims data showed a geometric mean cost of approximately $5,000 for HCPCS code C9747 based on 64 single claims (out of 64 total claims), which was significantly lower than the geometric mean cost of about $7,717 for APC 5376. We believed that the geometric mean cost for HCPCS code C9747 was more comparable to the geometric mean cost of approximately $4,055 for APC 5375. Consequently, we reassigned the code from APC 5376 to APC 5375 (Level 5 Urology and Related Services) for CY 2019 and C9747 remained in APC 5375 for CY 2020.

For the CY 2021 update, we replaced HCPCS code C9747 with CPT code 55880 (Ablation of malignant prostate tissue, transrectal, with high intensity-focused ultrasound (hifu), including ultrasound guidance) on January 1, 2019. We maintained the assignment of HCPCS code C9747 to APC 5375 with a payment rate of $4,413.90. We note that the payment rates for the CY 2021 OPPS update were based on claims submitted between January 1, 2019 through December 30, 2019, that were processed on or before June 30, 2020. Our claims data showed a geometric mean cost of approximately $5,744,43 for HCPCS code C9747 (CPT code 55880) based on 279 single claims (out of 284 total claims), which was assigned to APC 5375 with a geometric mean cost of about $4,299.81.

For CY 2022, we proposed to continue to assign HCPCS code C9747 to APC 5375 with a proposed payment rate $4,527.23.

Comment: Several commenters requested CPT code 55880 be reassigned to APC 5376 from APC 5375. The commenters argued that the average cost of the HIFU procedure is closer to the APC 5376 proposed payment rate of $8,468.32. Several commenters recommended we assign this procedure to APC 5376 because they believe the service is clinically similar and comparable in terms of resources to cryoablation of the prostate, which is described by CPT code 55873 (Cryosurgical ablation of the prostate (includes ultrasonic guidance and monitoring) and assigned to APC 5376 (Level 6 Urology and Related Services), with a proposed payment rate of $8,468.32. They also stated that the new CPT code 55880 descriptor treats malignant prostate tissue, which requires additional resources relative to its predecessor code descriptor that treated BPH. Some commenters stated that the CY 2019 OPPS reassignment of HCPCS code C9747 to APC 5375 from APC 5376 was due to inaccurate and incomplete claims that did not include the substantial cost of the disposable device required for the procedure and stated that HIFU is a device-intensive procedure. They alleged the underpayment for HIFU discourages hospitals from providing this procedure for Medicare patients because the APC 5375 payment rate does not cover the hospital facility cost for this procedure. They alleged that maintaining the assignment in APC 5375 will deter HOPD facilities from offering the HIFU treatment to Medicare beneficiaries because the payment is insufficient to cover the cost of the procedure. Several commenters argued that the current HIFU payment is a health equity issue because Americans in a lower socio-economic class will have less access to high-quality healthcare. Furthermore, the commenters stated that prostate cancer affects more men of color whose rate of death is almost twice that of non-Hispanic white men.

Response: We review, on an annual basis, the APC assignments for all services and items (including devices) paid under the OPPS based on our analysis of the latest claims data. For CY 2021, based on predecessor HCPCS code C9747, our claims data supported maintaining CPT code 55880 in APC 5375. For CY 2022, based on our analysis of the claims for this CY 2022 OPPS/ASC final rule with comment period, our data shows a geometric mean cost of approximately $5,708 for HCPCS code C9747 based on 279 single claims, which is more comparable to the geometric mean cost of about $4,299 for APC 5375, rather than the geometric mean cost of approximately $8,042 for APC 5376. Although we are not applying the CY 2020 claims data for the CY 2022 ratesetting due to the PHE, we noted that the geometric mean cost associated with HCPCS code C9747 is about $6,654, which is between the geometric means of APC 5375 and APC 5376. Our clinical advisors also acknowledge the clinical and resource similarity between CPT code 55880 and CPT code 55873, both of which are treatment options for prostate cancer. We performed several APC modeling studies on the impact of reassigning a set of codes to better balance the procedures within APC 5375 and 5376, and we found that the reassignment of these codes would impact the payment level of both APC 5375 and 5376.

In summary, after careful consideration of the public comments, and after our analysis of the claims data for this final rule with comment period, we are maintaining the APC assignment for CPT code 55880 in APC 5375, but will consider its reassignment in future rulemaking. The final CY 2022 payment rate for CPT code 55880 can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 to this final rule with comment period for the SI meanings for all codes reported under the OPPS. Both Addendum B and D1 are available via the internet on the CMS website.

b. Rezūm Procedure—Water Vapor Thermotherapy (APC 5373)

In 2018, CMS established a new code, specifically, HCPCS code C9748 (Transurethral destruction of prostate tissue; by radiofrequency water vapor (steam) thermal therapy). Based on its estimated cost, we assigned the new code to APC 5373 (Level 3 Urology and Related Services) with a payment rate of $1,695.68 effective January 1, 2018. We announced the SI and APC assignment in the January 2018 OPPS quarterly update CR (Transmittal 3941, Change Request 10417, dated December 22, 2017).

For the CY 2019 update, we replaced HCPCS code C9748 with CPT 53854 (Transurethral destruction of prostate tissue; by radiofrequency generated water vapor thermotherapy) on January 1, 2019. We maintained the assignment of CPT 53854 (HCPCS code C9748) to APC 5373 with a payment rate of $1,695.57. We note that the payment rates for the CY 2018 OPPS update were based on claims submitted between January 1, 2017 through December 30, 2017, that were processed on or before June 30, 2018. Since HCPCS code C9748

was established on January 1, 2018, we had no claims data for the procedure for use in ratesetting for CY 2019.

For the CY 2020 update, we maintained the assignment of HCPCS code 53854 to APC 5373 with a payment rate of $1,771.35. We note that the payment rates for the CY 2020 OPPS update were based on claims submitted between January 1, 2018 through December 30, 2018, that were processed on or before June 30, 2019. Our claims data showed a geometric mean cost of approximately $1,899.18 for HCPCS code C9748 based on 191 single claims (out of 192 total claims), which was assigned to APC 5373 with a geometric mean of about $1,733.35.

For the CY 2021 update, we maintained the assignment of HCPCS code 53854 to APC 5373 with a payment rate of $1,792.99. We note that the payment rates for the CY 2020 OPPS update were based on claims submitted between January 1, 2019, through December 30, 2019, that were processed on or before June 30, 2020. Our claims data showed a geometric mean cost of approximately $2,414.69 for HCPCS code 53854 based on 751 single claims (out of 752 total claims), which was assigned to APC 5373 with a geometric mean cost of about $1,746.64.

For CY 2022, we proposed to continue to assign HCPCS code 53854 to APC 5373 with a proposed payment rate $1,839.83.

Comment: A commenter requested the reassignment of CPT code 53854 to APC 5374 (Level 4 Urology and Related Services) from APC 5373 (Level 3 Urology and Related Services). The commenter stated the geometric mean costs associated with CPT Code 53854 are significantly higher than either all significant or almost all significant other procedures in APC 5373. The commenter further stated that based on the CY 2019 claims data, CPT code 53854 yields a geometric mean cost of about $2,410 with 751 single frequency claims and suggested the geometric mean cost of CPT code 53854 is much closer to the geometric mean cost of APC 5374, which is approximately $2,996. The commenter cited the year over year increase in geometric cost of 18 percent or $423 from 2019 to 2020. In addition, the commenter stated CPT 53854 is a transurethral procedure for the treatment of benign prostatic hyperplasia (BPH) and is more clinically similar to the two transurethral BPH procedure codes CPT 53850 (Transurethral destruction of prostate tissue; by microwave thermotherapy) and CPT 53852 (Transurethral destruction of prostate tissue; by radiofrequency thermotherapy) assigned to APC 5374.

Response: We appreciate the commenter's input on this subject. Based on our evaluation of the latest claims data for this final rule with comment period, we noted the geometric mean cost associated with CPT code 53854 (HCPCS C9748) increased from $1,899.18 (from the CY 2018 claims data) to $2,412.55 (from the CY 2019 claims data), which represented an approximately 27 percent increase year-over-year. Based on our review, our medical advisors agreed with the commenter that CPT code 53854 is similar to CPT code 53850 and CPT code 53852 in terms of clinical characteristics and resource. We noted that CPT codes 53850 and 53852 represent treatment options for BPH which are assigned to APC 5374 (Level 4 Urology and Related Services) while there are no BPH treatment procedures assigned to APC 5373 with the exception of CPT code 53854.

In summary, after consideration of the public comments, we are finalizing our proposal with modification and reassigning CPT code 53854 to APC 5374 from APC 5373 for CY 2022. The final CY 2022 OPPS payment rate for this code can be found in Addendum B to this final rule with comment period. In addition, we refer readers to Addendum D1 to this final rule with comment period for the SI meanings for all codes reported under the OPPS. Both Addendum B and D1 are available via the internet on the CMS website.

37. VisONE Synchronized Diaphragmatic Stimulation (SDS) System

For CY 2022, the CPT Editorial Panel created CPT codes 0674T through 0685T, which are listed in Table 29, to describe the VisONE® Synchronized Diaphragmatic Stimulation™ (SDS®) System. For CY 2022, we proposed to assign these codes to OPPS SI ''E1'', indicating that these services are not paid by Medicare when submitted on outpatient claims. We note these codes were listed as placeholder codes 050XT through 055XT in OPPS Addendum B of the CY 2022 OPPS/ASC proposed rule.

BILLING CODE 4120–01–P

TABLE 29: VISONE® SDS SYSTEM CPT CODES

CPT Codes	Placeholder Codes	Long Descriptor
0674T	050XT	Laparoscopic insertion of new or replacement of permanent implantable synchronized diaphragmatic stimulation system for augmentation of cardiac function, including an implantable pulse generator and diaphragmatic lead(s)
0675T	051XT	Laparoscopic insertion of new or replacement of diaphragmatic lead(s), permanent implantable synchronized diaphragmatic stimulation system for augmentation of cardiac function, including connection to an existing pulse generator; first lead
0676T	060XT	Laparoscopic insertion of new or replacement of diaphragmatic lead(s), permanent implantable synchronized diaphragmatic stimulation system for augmentation of cardiac function, including connection to an existing pulse generator; each additional lead (List separately in addition to code for primary procedure)
0677T	061XT	Laparoscopic repositioning of diaphragmatic lead(s), permanent implantable synchronized diaphragmatic stimulation system for augmentation of cardiac function, including connection to an existing pulse generator; first repositioned lead
0678T	062XT	Laparoscopic repositioning of diaphragmatic lead(s), permanent implantable synchronized diaphragmatic stimulation system for augmentation of cardiac function, including connection to an existing pulse generator; each additional repositioned lead (List separately in addition to code for primary procedure)
0679T	063XT	Laparoscopic removal of diaphragmatic lead(s), permanent implantable synchronized diaphragmatic stimulation system for augmentation of cardiac function
0680T	052XT	Insertion or replacement of pulse generator only, permanent implantable synchronized diaphragmatic stimulation system for augmentation of cardiac function, with connection to existing lead(s)
0681T	064XT	Relocation of pulse generator only, permanent implantable synchronized diaphragmatic stimulation system for augmentation of cardiac function, with connection to existing dual leads
0682T	065XT	Removal of pulse generator only, permanent implantable synchronized diaphragmatic stimulation system for augmentation of cardiac function
0683T	053XT	Programming device evaluation (in-person) with iterative adjustment of the implantable device to test the function of the device and select optimal permanent programmed values with analysis, review and report by a physician or other qualified health care professional, permanent implantable synchronized diaphragmatic stimulation system for augmentation of cardiac function

CPT Codes	Placeholder Codes	Long Descriptor
0684T	054XT	Peri-procedural device evaluation (in-person) and programming of device system parameters before or after a surgery, procedure, or test with analysis, review, and report by a physician or other qualified health care professional, permanent implantable synchronized diaphragmatic stimulation system for augmentation of cardiac function
0685T	055XT	Interrogation device evaluation (in-person) with analysis, review and report by a physician or other qualified health care professional, including connection, recording and disconnection per patient encounter, permanent implantable synchronized diaphragmatic stimulation system for augmentation of cardiac function

Comment: A commenter reported that the device associated with these codes has been approved for Breakthrough Device Designation by the FDA. The commenter added that they are currently in the process of applying for Medicare national coverage for the clinical trial as a Category B IDE study. The commenter requested that we crosswalk the new codes to the SIs and APC assignments of comparable procedures involving other stimulation technologies so that appropriate hospital outpatient payment may be made in the event the Category B IDE study is approved for Medicare coverage. The commenter listed the comparable codes with the SI and APCs assignments. See Table 30 for SI and APC assignments requested by commenter.

Table 30: VISONE® SDS SYSTEM SI and APC Assignment Requested by Commenter

HCPCS code	Requested SI	Requested APC
0674T	J1	5465
0675T	J1	5463
0676T	N	N/A
0677T	J1	5462
0678T	N	N/A
0679T	J1	5462
0680T	J1	5464
0681T	J1	5461
0682T	J1	5461
0683T	S	5742
0684T	N	N/A
0685T	S	5741

BILLING CODE 4120–01–C

Response: The clinical trial associated with CPT codes 0674T through 0685T does not appear on the CMS Approved IDE List, which can be found at this CMS website: *https://www.cms.gov/Medicare/Coverage/IDE/Approved-IDE-Studies.html*. While we recognize the commenter's assertion that is was accepted for FDA's Breakthrough Device Designation and that it intends to apply for Medicare coverage as a Category B IDE clinical trial, since the clinical trial associated with these codes has not been approved for Medicare coverage, we believe we should continue to assign CPT codes 0674T through 0685T to SI ''E1'' for CY 2022. If Medicare approves the clinical trial as a Category B IDE study, we will reassess the SI and APC assignments for the codes.

In summary, after consideration of the public comments, we are finalizing our proposal without modification. Specifically, we are finalizing our continued assignment of CPT code=0674T through 0685T to OPPS SI ''E1.''

IV. OPPS Payment for Devices

A. Pass-Through Payment for Devices

1. Beginning Eligibility Date for Device Pass-Through Status and Quarterly Expiration of Device Pass-Through Payments

a. Background

The intent of transitional device pass-through payment, as implemented at § 419.66, is to facilitate access for beneficiaries to the advantages of new and truly innovative devices by allowing for adequate payment for these new devices while the necessary cost data is collected to incorporate the costs for these devices into the procedure APC rate (66 FR 55861). Under section 1833(t)(6)(B)(iii) of the Act, the period for which a device category eligible for transitional pass-through payments under the OPPS can be in effect is at least 2 years but not more than 3 years. Prior to CY 2017, our regulation at § 419.66(g) provided that this pass-through payment eligibility period began on the date CMS established a particular transitional pass-through category of devices, and we based the pass-through status expiration date for a device category on the date on which pass-through payment was effective for the category. In the CY 2017 OPPS/ASC final rule with comment period (81 FR 79654), in accordance with section 1833(t)(6)(B)(iii)(II) of the Act, we amended § 419.66(g) to provide that the pass-through eligibility period for a device category begins on the first date on which pass-through payment is made under the OPPS for any medical device described by such category.

In addition, prior to CY 2017, our policy was to propose and finalize the

dates for expiration of pass-through status for device categories as part of the OPPS annual update. This means that device pass-through status would expire at the end of a calendar year when at least 2 years of pass-through payments had been made, regardless of the quarter in which the device was approved. In the CY 2017 OPPS/ASC final rule with comment period (81 FR 79655), we changed our policy to allow for quarterly expiration of pass-through payment status for devices, beginning with pass-through devices approved in CY 2017 and subsequent calendar years, to afford a pass-through payment period that is as close to a full 3 years as possible for all pass-through payment devices. We also have an established policy to package the costs of the devices that are no longer eligible for pass-through payments into the costs of the procedures with which the devices are reported in the claims data used to set the payment rates (67 FR 66763).

We refer readers to the CY 2017 OPPS/ASC final rule with comment period (81 FR 79648 through 79661) for a full discussion of the current device pass-through payment policy.

b. Expiration of Transitional Pass-Through Payments for Certain Devices

As stated earlier, section 1833(t)(6)(B)(iii) of the Act requires that, under the OPPS, a category of devices be eligible for transitional pass-through payments for at least 2 years, but not more than 3 years. Currently, there are 11 device categories eligible for pass-through payment. These devices are listed in Table 31. Below, we detail the expiration dates of pass-through payment status for each of the 11 devices currently receiving device pass-through payment.

The pass-through payment status of the device category for HCPCS code C1823 is scheduled to expire on December 31, 2021. Typically, we would propose to package the costs of the device described by C1823 into the costs related to the procedure with which the device is reported in the hospital claims data for CY 2022. The data for the CY 2022 OPPS proposed rule ratesetting for the procedure reported with C1823 would have been set using CY 2020 outpatient claims data processed through December 31, 2020, however, as described in section X.E. of the CY 2022 OPPS/ASC proposed rule (86 FR 42188), due to the effects of the COVID–19 PHE, we proposed to use CY 2019 claims data instead of CY 2020 claims data in establishing the CY 2022 OPPS rates and to use cost report data from the same set of cost reports originally used in final rule 2021 OPPS ratesetting. Therefore, we proposed to use our equitable adjustment authority under section 1833(t)(2)(E) of the Act to provide separate payment for C1823 for four quarters of CY 2022 to end on December 31, 2022. This would allow for CY 2021 claims data to inform CY 2023 rate setting for the procedure reported with C1823. This is the only device whose costs would typically be packaged into the related procedure in CY 2022 using CY 2020 claims data for ratesetting and is the only device to which this proposed policy would apply. A full discussion of this finalized policy is included in section X.F. of this CY 2022 OPPS/ASC final rule.

The pass-through payment status of the device category for HCPCS code C1823 will end on December 31, 2021. The pass-through payment status of the device categories for HCPCS codes C1824, C1982, C1839, C1734, and C2596 is set to expire on December 31, 2022. The pass-through payment status of the device category for HCPCS code C1748 is set to expire on June 30, 2023. The pass-through payment status of the device category for HCPCS codes C1052, C1062, and C1825 is set to expire on December 31, 2023 and the pass-through payment status of the device category for HCPCS code C1761 is set to expire on June 30, 2024. Table 31 shows the expiration dates of transitional pass-through payments for these devices.

BILLING CODE 4120–01–P

TABLE 31: EXPIRATION OF TRANSITIONAL PASS-THROUGH PAYMENTS FOR CERTAIN DEVICES

HCPCS Code	Long Descriptor	Effective Date	Pass-Through Expiration Date
C1823	Generator, neurostimulator (implantable), nonrechargeable, with transvenous sensing and stimulation leads	1/1/2019	12/31/2021
C1824	Generator, cardiac contractility modulation (implantable)	1/1/2020	12/31/2022
C1982	Catheter, pressure-generating, one-way valve, intermittently occlusive	1/1/2020	12/31/2022
C1839	Iris prosthesis	1/1/2020	12/31/2022
C1734	Orthopedic/device/drug matrix for opposing bone-to-bone or soft tissue-to bone (implantable)	1/1/2020	12/31/2022
C2596	Probe, image-guided, robotic, waterjet ablation	1/1/2020	12/31/2022
C1748	Endoscope, single-use (that is, disposable), Upper GI, imaging/illumination device (insertable)	7/1/2020	6/30/2023
C1052	Hemostatic agent, gastrointestinal, topical	1/1/2021	12/31/2023
C1062	Intravertebral body fracture augmentation with implant (e.g., metal, polymer)	1/1/2021	12/31/2023
C1825	Generator, neurostimulator (implantable), nonrechargeable with carotid sinus baroreceptor stimulation lead(s)	1/1/2021	12/31/2023
C1761	Catheter, transluminal intravascular lithotripsy, coronary	7/1/2021	6/30/2024

BILLING CODE 4120–01–C

2. New Device Pass-Through Applications for CY 2022

a. Background

Section 1833(t)(6) of the Act provides for pass-through payments for devices, and section 1833(t)(6)(B) of the Act requires CMS to use categories in determining the eligibility of devices for pass-through payments. As part of implementing the statute through regulations, we have continued to believe that it is important for hospitals to receive pass-through payments for devices that offer substantial clinical improvement in the treatment of Medicare beneficiaries to facilitate access by beneficiaries to the advantages of the new technology. Conversely, we have noted that the need for additional payments for devices that offer little or no clinical improvement over previously existing devices is less apparent. In such cases, these devices can still be used by hospitals, and hospitals will be paid for them through appropriate APC payment. Moreover, a goal is to target pass-through payments for those devices where cost considerations are most likely to interfere with patient access (66 FR 55852; 67 FR 66782; and 70 FR 68629). We note that, as discussed in section IV.A.2. of the CY 2022 OPPS/ASC proposed rule (86 FR 42085), we created an alternative pathway in the CY 2020 OPPS/ASC final rule that granted fast-track device pass-through payment under the OPPS for devices approved under the FDA Breakthrough Device Program for OPPS device pass-through payment applications received on or after January 1, 2020. We refer readers to section IV.A.4. of the CY 2022 OPPS/ASC proposed rule for a complete discussion of this pathway.

As specified in regulations at § 419.66(b)(1) through (3), to be eligible for transitional pass-through payment under the OPPS, a device must meet the following criteria:

- If required by FDA, the device must have received FDA marketing authorization (except for a device that has received an FDA investigational device exemption (IDE) and has been classified as a Category B device by FDA), or meet another appropriate FDA exemption; and the pass-through payment application must be submitted within 3 years from the date of the initial FDA marketing authorization, if required, unless there is a documented, verifiable delay in U.S. market availability after FDA marketing

authorization is granted, in which case CMS will consider the pass-through payment application if it is submitted within 3 years from the date of market availability;

•The device is determined to be reasonable and necessary for the diagnosis or treatment of an illness or injury or to improve the functioning of a malformed body part, as required by section 1862(a)(1)(A) of the Act; and

• The device is an integral part of the service furnished, is used for one patient only, comes in contact with human tissue, and is surgically implanted or inserted (either permanently or temporarily), or applied in or on a wound or other skin lesion.

In addition, according to § 419.66(b)(4), a device is not eligible to be considered for device pass-through payment if it is any of the following: (1) Equipment, an instrument, apparatus, implement, or item of this type for which depreciation and financing expenses are recovered as depreciation assets as defined in Chapter 1 of the Medicare Provider Reimbursement Manual (CMS Pub. 15–1); or (2) a material or supply furnished incident to a service (for example, a suture, customized surgical kit, or clip, other than a radiological site marker).

Separately, we use the following criteria, as set forth under § 419.66(c), to determine whether a new category of pass-through payment devices should be established. The device to be included in the new category must—

• Not be appropriately described by an existing category or by any category previously in effect established for transitional pass-through payments, and was not being paid for as an outpatient service as of December 31, 1996;

• Have an average cost that is not ''insignificant'' relative to the payment amount for the procedure or service with which the device is associated as determined under § 419.66(d) by demonstrating: (1) The estimated average reasonable cost of devices in the category exceeds 25 percent of the applicable APC payment amount for the service related to the category of devices; (2) the estimated average reasonable cost of the devices in the category exceeds the cost of the device-related portion of the APC payment amount for the related service by at least 25 percent; and (3) the difference between the estimated average reasonable cost of the devices in the category and the portion of the APC payment amount for the device exceeds 10 percent of the APC payment amount for the related service (with the exception of brachytherapy and temperature-monitored cryoablation, which are exempt from the cost requirements as specified at § 419.66(c)(3) and (e)); and

• Demonstrate a substantial clinical improvement, that is, substantially improve the diagnosis or treatment of an illness or injury or improve the functioning of a malformed body part compared to the benefits of a device or devices in a previously established category or other available treatment.

Beginning in CY 2016, we changed our device pass-through evaluation and determination process. Device pass-through applications are still submitted to CMS through the quarterly subregulatory process, but the applications will be subject to notice and- comment- rulemaking in the next applicable OPPS annual rulemaking cycle. Under this process, all applications that are preliminarily approved upon quarterly review will automatically be included in the next applicable OPPS annual rulemaking cycle, while submitters of applications that are not approved upon quarterly review will have the option of being included in the next applicable OPPS annual rulemaking cycle or withdrawing their application from consideration. Under this notice-and-comment process, applicants may submit new evidence, such as clinical trial results published in a peer-reviewed journal or other materials for consideration during the public comment process for the proposed rule. This process allows those applications that we are able to determine meet all of the criteria for device pass-through payment under the quarterly review process to receive timely pass-through payment status, while still allowing for a transparent, public review process for all applications (80 FR 70417 through 70418).

In the CY 2020 annual rulemaking process, we finalized an alternative pathway for devices that are granted a Breakthrough Device designation (84 FR 61295) and receive FDA marketing authorization. Under this alternative pathway, devices that are granted an FDA Breakthrough Device designation are not evaluated in terms of the current substantial clinical improvement criterion at § 419.66(c)(2) for the purposes of determining device pass-through payment status, but do need to meet the other requirements for pass-through payment status in our regulation at § 419.66. Devices that are part of the Breakthrough Devices Program, have received FDA marketing authorization, and meet the other criteria in the regulation can be approved through the quarterly process and announced through that process (81 FR 79655). Proposals regarding these devices and whether pass-through payment status should continue to apply are included in the next applicable OPPS rulemaking cycle. This process promotes timely pass-through payment status for innovative devices, while also recognizing that such devices may not have a sufficient evidence base to demonstrate substantial clinical improvement at the time of FDA marketing authorization.

More details on the requirements for device pass-through payment applications are included on the CMS website in the application form itself at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/passthrough_payment.html,* in the ''Downloads'' section. In addition, CMS is amenable to meeting with applicants or potential applicants to discuss research trial design in advance of any device pass-through application or to discuss application criteria, including the substantial clinical improvement criterion.

Comment: One commenter recommended that, for devices with FDA Breakthrough Device designation, CMS remove the requirement that the device prove they are not described by an existing transitional pass-through category. The commenter asserted that FDA Breakthrough Device designation implies that a device is a first of kind in addressing the condition for which it is indicated.

Response: We appreciate the commenter's input but note that we did not propose to eliminate the device category requirement in the CY 2022 OPPS/ASC proposed rule. Moreover, section 1833(t)(6)(B)(ii) requires the Secretary to establish categories of medical devices in a manner such that no medical device is described by more than one category and to promptly establish a new category of medical devices for any new medical devices for which none of the categories in effect or previously in effect is appropriate.

Comment: One commenter asked that CMS provide additional guidance to medical technology innovators to help clarify requirements for demonstrating ''substantial clinical improvement'' for purposes of transitional pass-through payment eligibility. The commenter stated that greater clarity should be provided in particular with regard to the evidence types and study designs that may be considered in evaluating substantial clinical improvement, including methods beyond randomized clinical trials (RCTs) that would produce evidence sufficient to demonstrate substantial clinical

improvement in a shorter period of time and at reduced cost.

Response: We appreciate the commenter's input, but note that this comment is outside the scope of this rulemaking. We refer the commenter to the Device Pass-through application located on the CMS website (*https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Downloads/catapp.pdf*) for further information regarding what evidence is considered in evaluating substantial clinical improvement of devices.

Comment: One commenter offered their general support for our proposal to approve all eight applications for device pass-through status included in the CY 2022 OPPS/ASC proposed rule. The commenter added that CMS needs to ensure that pass-through payment amounts adequately cover the cost of the device to ensure that Medicare beneficiaries have access to innovative services and reduce facilities' economic burdens. The commenter also believed CMS should refrain from factoring a procedure off-set amount into the calculation of payment for these transitional pass though approved services.

Response: We appreciate the general support for our proposals to approve the applications discussed in the CY 2022 OPPS/ASC proposed rule and the recommendations provided by the commenter. Our determinations on each application are described in detail in the next section. As we have in prior years, CMS continues to evaluate the application of the device offset amount on a case by case basis to ensure the appropriate payment is made for a device on pass-through status. In cases where a device on pass-through status replaces previously existing technologies, we continue to believe it is appropriate to apply the device offset amount.

b. Applications Received for Device Pass-Through Payment for CY 2022

We received eight complete applications by the March 1, 2021 quarterly deadline, which was the last quarterly deadline for applications to be received in time to be included in the CY 2022 OPPS/ASC proposed rule. We received three of the applications in the third quarter of 2020, two of the applications in the fourth quarter of 2020, and three of the applications in the first quarter of 2021. One of the applications was approved for device pass-through payment during the quarterly review process: the Shockwave C^2 Coronary Intravascular Lithotripsy (IVL) catheter, which received fast-track approval under the alternative pathway effective July 1, 2021. As previously stated, all applications that are preliminarily approved upon quarterly review will automatically be included in the next applicable OPPS annual rulemaking cycle. Therefore, the Shockwave C^2 Coronary Intravascular Lithotripsy (IVL) catheter is discussed in section IV.2.b.1. of this final rule with comment period.

Applications received for the later deadlines for the remaining 2021 quarters (June 1, September 1, and December 1), if any, will be discussed in the CY 2023 OPPS/ASC proposed rule. We note that the quarterly application process and requirements have not changed in light of the addition of rulemaking review. Detailed instructions on submission of a quarterly device pass-through payment application are included on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Downloads/catapp.pdf.*

Discussions of the applications we received by the March 1, 2021 deadline are included below.

1. Alternative Pathway Device Pass-through Applications

We received two device pass-through applications by the March 2021 quarterly application deadline for devices that have received Breakthrough Device designation from FDA and FDA marketing authorization, and therefore are eligible to apply under the alternative pathway. As stated above in section IV.2.a of the CY2022 OPPS/ASC proposed rule, under this alternative pathway, devices that are granted an FDA Breakthrough Device designation are not evaluated in terms of the substantial clinical improvement criterion at § 419.66(c)(2)(i) for purposes of determining device pass-through payment status, but need to meet the other requirements for pass-through payment status in our regulation at § 419.66.

(1) RECELL® System

AVITA Medical submitted an application for a new device category for transitional pass-through payment status for the RECELL® System (RECELL®) for CY 2022. According to the applicant, RECELL® is used to process autologous donor tissue into a cell suspension autograft that is then immediately applied to the surgically prepared acute thermal burn wound.

The applicant stated RECELL® is a stand-alone, single-use, battery-powered device used to process and apply an autologous skin cell suspension. According to the applicant, RECELL® is a Class III medical device indicated for the treatment of acute partial-thickness and full-thickness/mixed depth thermal burn wounds and is not categorized as a skin substitute.

According to the applicant, the autograft procedure utilizing the RECELL® system involves harvesting a small graft from the patient's healthy skin and placing it into the RECELL® System for immediate processing into an autologous skin cell suspension. The applicant asserts that a significantly smaller autograft harvest is needed for procedures involving RECELL® when compared to procedures involving a split-thickness skin graft (STSG) without RECELL®; where typical STSG expansion ranges from 2:1 to 6:1, RECELL® may expand skin by up to 80:1. The applicant adds the entire procedure takes place in the operating room, including surgically preparing the acute burn wound, harvesting the autograft, processing the skin cell suspension through a disaggregation process, and applying the cell suspension autograft to the wound with no culturing in a laboratory.

The applicant described the RECELL® procedure in 27 steps: (1) The autograft site is identified; (2) the patient is anesthetized and prepared; (3) the nurse opens and transfers the sterile RECELL® System to the operative field; (4) a self-test is performed; (5) the nurse prepares and dispenses the enzyme into the incubation well; (6) the buffer solution is drawn and dispensed into the buffering and rinsing well; (7) the RECELL® processing unit is activated to heat the enzyme; (8) a thin epidermal autograft is harvested; (9) the harvested skin graft is placed in the enzyme; (10) the donor graft incubates for 15–20 minutes; (11) the sample is placed dermal side down in the mechanical scraping tray; (12) a scalpel is used to scrape the edges of the skin sample; (13) once ready, the donor skin is rinsed in the buffer solution; (14) the skin is returned to the mechanical scraping tray; (15) buffer is applied to the skin sample; (16) the skin sample is held in place with forceps; (17) the surgeon scrapes the epidermal cells; (18) the buffer syringe is used to rinse the disaggregated skin cells; (19) the surgeon draws up the autologous skin cell suspension from the tray into a syringe; (20) the suspension is then dispensed through the cell strainer to filter the suspension; (21) the filtered autologous skin cell suspension is drawn into a new 10 ml syringe; (22) the cell suspension autograft is prepared; (23) the burn wound is debrided; (24) the primary dressing (non-adherent,

non-absorbent, small pore) is fixed or held only at the lower aspect of the burn wound; (25) the cell suspension autograft is applied by either spraying or dripping over the prepared wound bed; (26) after application, the primary dressing is immediately secured over the wound bed; and (27) absorbent and protective dressings are then applied as needed.

The applicant states the autologous skin cell suspension prepared using the RECELL® System contains keratinocytes, fibroblasts and melanocytes. According to the applicant, keratinocytes are the primary cells of the epidermis that are responsible for healing; fibroblasts enable the creation of new extracellular matrix proteins; and melanocytes produce melanin to allow restoration of normal pigmentation. The applicant asserts the unique delivery system allows for broad and even distribution of the cell suspension autograft directly onto a prepared wound surface or in combination with a meshed skin graft.

According to the applicant, there is one commercially available product (Epicel) that is also used to create an autograft from the patient's skin that is then applied to treat acute thermal burns. The applicant's claims regarding the differences between the two products are summarized in the following Table 32:

BILLING CODE 4120–01–P

TABLE 32: DIFFERENCES BETWEEN RECELL® AND EPICEL ACCORDING TO APPLICANT

RECELL®	Epicel
Indicated for the treatment of acute thermal burn wounds in patients 18 years of age and older or application in combination with meshed autografting for acute full-thickness thermal burn wounds in pediatric and adult patients	Indicated for use in adult and pediatric patients who have deep dermal or full thickness burns
Used to treat acute thermal burns up to 50% total body surface area (TBSA)	Used to treat acute thermal burns with TBSA greater than or equal to 30%
Class III device approved under PMA process. Includes electromagnetic warnings to include that it should not be used in presence of flammable anesthetic.[24] Contraindicated for treatment of infected or necrotic tissue, in those hypersensitive to trypsin or sodium lactate solution.[25]	Approved under a Humanitarian Device Exception (HDE). HDE devices are exempt from the effectiveness requirements for PMAs.[26] Includes a black box warning noting a serious risk of squamous cell carcinoma.[27] Contraindicated in those with history of hypersensitivity following exposure to vancomycin, amikacin, or amphotericin or those with sensitivities to bovine or murine materials.[28]
Requires a single operative session to treat the patient.	Surgical procedures separated by a period of two or more weeks are required for harvesting and placement of cultured tissue sheets. Multiple operative sessions may also be required for cultured tissue sheet placements.
Cell suspension autograft prepared in the operating room and immediately applied	Harvested autograft cultured in an off-site laboratory, taking approximately 17 days to

RECELL®	Epicel
	culture for application at a later date[29]
No blood samples needed	Blood samples must be taken and archived on the date of the procedure per FDA protocol

BILLING CODE 4120–01–C

With respect to the newness criterion at § 419.66(b)(1), RECELL® is part of the FDA Breakthrough Devices Program. The applicant stated that RECELL® received PMA on September 20, 2018. The applicant added that RECELL® is a Class III medical device indicated for the treatment of acute thermal burn wounds in patients 18 years of age and older. We received the application for a new device category for transitional pass-through payment status for RECELL® on August 7, 2020, which is within 3 years of the date of the initial FDA marketing authorization. We invited public comment on whether the RECELL® meets the newness criterion.

Comment: The applicant reiterated that RECELL® received FDA PMA on September 20, 2018.

Response: We appreciate the commenter's input. Because we received the RECELL® pass-through application on August 7, 2020, which is within 3 years of September 20, 2018, the date of FDA premarketing approval, we agree that the RECELL® meets the newness criterion. With respect to the eligibility criterion at § 419.66(b)(3), according to the applicant, RECELL® is integral to the service provided, is used for one patient only, comes in contact with human tissue, and is surgically implanted or inserted (either permanently or temporarily) or applied in or on a wound or other skin lesion. The applicant also claimed that RECELL® meets the device eligibility requirements of § 419.66(b)(4) because it is not equipment, an instrument, apparatus, implement, or item for which depreciation and financing expenses are recovered, and it is not a supply or material furnished incident to a service. However, given the applicant's description of RECELL® as a device that processes tissue into an autograft, we stated that it appears that the RECELL® system may not be surgically implanted or inserted (either permanently or temporarily) or applied in or on a wound or other skin lesion. We noted that we believed the product of the RECELL® system, the suspension, may be applied on a wound, but we were not certain that this suspension qualifies as a device. We invited public comments on whether RECELL® meets the eligibility criteria at § 419.66(b).

Comment: In response to our concern regarding whether the suspension, that is applied in or on a wound or other skin lesion is the device for purposes of the requirement in § 419.66(b) one commenter stated that FDA approved all components of the RECELL® as a device, and that in order to treat a patient, all components of the RECELL® device are required to treat the patient. Multiple commenters stated the process of harvesting, creating and applying the suspension as one continuous process would not be possible without the device hardware; the hardware and suspension are tightly integrated and there is no treatment without the suspension. Another commenter added that the buffer solution is a component of the RECELL® device, which allows the expansion of the donor skin and provides a suspension mechanism for the skin cells to be applied directly on the patient's burn wound.

Response: We thank the commenters for their input. We have taken this information into consideration in our final determination of whether the device meets the criteria in § 419.66(b)(3) and § 419.66(b)(4), discussed below.

Comment: The applicant asserted that RECELL® is an integral part of the service, which cannot be performed without all device components including the suspension, is used for a single patient only, comes in contact with human tissue and is applied on a wound, and therefore, the applicant believes the RECELL® device meets the criteria in § 419.66(b)(3).

In response to our concern that the device is not applied in or on a wound or other skin lesion, the applicant stated that the RECELL® device is intended to harvest the cells from the patient's own donor skin to create a skin cell suspension which is then applied directly on the debrided and excised burn wound using a syringe fitted with a spray nozzle. According to the applicant, the RES Regenerative Epidermal Suspension (''Suspension'') contains autologous skin cells and buffer solution, a RECELL® device component, which is directly applied in or on a wound. The applicant added that the buffer is a pH neutral solution (sodium lactate) in liquid form that is used to carry, expand, and deliver the harvested skin cells in the RES Suspension for direct application to the burn wound. According to the applicant, RECELL® could not accomplish its intended use as described in its FDA label without the buffer, which is a necessary component of the device. The applicant and another commenter also contended that the Suspension qualifies as a device under FDA's definition, and cited provisions of the Federal Food, Drug, and Cosmetic Act and FDA guidance that they believed supported this position,

Response: We appreciate the additional information from the applicant and commenters. The applicant and commenters indicated that the RECELL® device consists of several components, one of which is the buffer, which is combined with harvested skin cells to create the suspension that is then applied to a wound. Because the buffer, a component of the device, is part of the

suspension that is applied in or on a wound, RECELL® meets the eligibility criterion specified at § 419.66(b)(3)). We did not receive any comments in regard to § 419.66(b)(4), whether the device is equipment, an instrument, apparatus, implement, or item for which depreciation and financing expenses are recovered, and whether the device is a supply or material furnished incident to a service. Because the applicant asserted that the RECELL® device met the eligibility requirements at § 419.66(b)(4) and we agree, we conclude that the RECELL® device meets this eligibility criterion.

The criteria for establishing new device categories are specified at § 419.66(c). The first criterion, at § 419.66(c)(1), provides that CMS determines that a device to be included in the category is not appropriately described by any of the existing categories or by any category previously in effect, and was not being paid for as an outpatient service as of December 31, 1996. We stated in the CY 2022 OPPS/ASC proposed rule that we have not yet identified an existing pass-through payment category that describes RECELL®. We invited public comment on whether RECELL® meets the device category criterion.

Comment: The applicant asserted the RECELL® meets the first criterion for establishing a new device category at § 419.66(c)(1) because there are no existing categories established for device TPT that describe the RECELL® device.

Response: We agree there is no existing pass-through payment category that appropriately describes the RECELL® because no current category appropriately describes a device that creates a suspension from an autograft of the patient's skin that is then applied to treat acute thermal burns. Based on this information, we have determined that the RECELL® meets the first eligibility criterion at § 419.66(c)(1).

The second criterion for establishing a device category, at § 419.66(c)(2), provides that CMS determines either of the following: (i) That a device to be included in the category has demonstrated that it will substantially improve the diagnosis or treatment of an illness or injury or improve the functioning of a malformed body part compared to the benefits of a device or devices in a previously established category or other available treatment; or (ii) for devices for which pass-through status will begin on or after January 1, 2020, as an alternative to the substantial clinical improvement criterion, the device is part of FDA's Breakthrough Devices Program and has received FDA marketing authorization. As previously discussed in section IV.2.a above, we finalized the alternative pathway for devices that are granted a Breakthrough Device designation and receive FDA marketing authorization in the CY 2020 OPPS/ASC final rule (84 FR 61295). The RECELL® System has a Breakthrough Device designation and marketing authorization from FDA, and therefore, is not evaluated for substantial clinical improvement. We note that the applicant applied for new technology add-on payment under the alternative pathway for Breakthrough devices, as discussed in the FY 2022 IPPS/LTCH PPS final rule (86 FR 45150 through 45151). While we have determined that the RECELL® device meets the newness criterion for OPPS device pass-through eligibility, in the FY 2022 IPPS/LTCH PPS final rule, we found that the RECELL® device was not within the newness period for FY 2022 for eligibility for new technology add-on payments and was therefore ineligible to receive these payments (86 FR 45151).

The third criterion for establishing a device category, at § 419.66(c)(3), requires us to determine that the cost of the device is not insignificant, as described in § 419.66(d). Section 419.66(d) includes three cost significance criteria that must each be met. The applicant provided the following information in support of the cost significance requirements. The applicant stated that RECELL® would be reported with the HCPCS codes listed in the following Table 33:

TABLE 33: HCPCS CODES REPORTED WITH RECELL®

HCPCS Code	Short Descriptor	SI	APC
Epidermal Autograft Procedures			
15110	Epidrm autogrft trnk/arm/leg	T	5054
15111	Epidrm autogrft t/a/l add-on	N	
15115	Epidrm a-grft face/nck/hf/g	T	5054
15116	Epidrm a-grft f/n/hf/g addl	N	
Split-Thickness Skin Graft Procedures			
15100	Skin splt grft trnk/arm/leg	T	5054
15101	Skin splt grft t/a/l add-on	N	
15120	Skn splt a-grft fac/nck/hf/g	T	5055
15121	Skn splt a-grft f/n/hf/g add	N	
Surgical Preparation Procedures			
15002	Wound prep trk/arm/leg	T	5054
15003	Wound prep addl 100 cm	N	
15004	Wound prep f/n/hf/g	T	5053
15005	Wnd prep f/n/hf/g addl cm	N	

To meet the cost criterion for device pass-through payment status, a device must pass all three tests of the cost criterion for at least one APC. In the CY 2022 OPPS/ASC proposed rule, we stated that for our calculations, we used APC 5054—Level 4 Skin Procedures, which had a CY 2020 payment rate of $1,622.74 at the time the application was received. Beginning in CY 2017, we calculate the device offset amount at the HCPCS/CPT code level instead of the APC level (81 FR 79657). HCPCS code 15110 had a device offset amount of $13.47 at the time the application was received. According to the applicant, the cost of the RECELL® is $7,500.

Section 419.66(d)(1), the first cost significance requirement, provides that the estimated average reasonable cost of devices in the category must exceed 25 percent of the applicable APC payment amount for the service related to the category of devices. The estimated average reasonable cost of $7,500 for RECELL® is 462 percent of the applicable APC payment amount for the service related to the category of devices of $1,622.74 ((7,500/1,622.74) × 100 = 462.2 percent). Therefore, we stated in the CY 2022 OPPS/ASC proposed rule that we believe RECELL® meets the first cost significance requirement.

The second cost significance requirement, at § 419.66(d)(2), provides that the estimated average reasonable cost of the devices in the category must exceed the cost of the device-related portion of the APC payment amount for the related service by at least 25 percent, which means that the device cost needs to be at least 125 percent of the offset amount (the device-related portion of the APC found on the offset list). The estimated average reasonable cost of $7,500 for RECELL® is 55,679 percent of the cost of the device-related portion of the APC payment amount for the related service of $13.47 (($7,500/$13.47) × 100 = 55,679.3 percent). Therefore, we stated in the CY 2022 OPPS/ASC proposed rule that we believe RECELL® meets the second cost significance requirement.

The third cost significance requirement, at § 419.66(d)(3), provides that the difference between the estimated average reasonable cost of the devices in the category and the portion of the APC payment amount for the device must exceed 10 percent of the APC payment amount for the related service. The difference between the estimated average reasonable cost of $7,500 for RECELL® and the portion of the APC payment amount for the device of $13.47 is 461 percent of the APC payment amount for the related service of $1,622.74 ((($7,500 − $13.47)/$1,622.74) × 100 = 461.4 percent). Therefore, we stated in the CY 2022 OPPS/ASC proposed rule that we believe RECELL® meets the third cost significance requirement.

We invited public comment on whether the RECELL® meets the device pass-through payment criteria discussed in this section, including the cost criterion for device pass-through payment status.

Comment: One commenter asserted that RECELL® expands the donor skin by up to 80x compared to 2–4x for most autografts, the current standard of care. The commenter stated this is an important treatment option in light of the ongoing COVID–19 pandemic and its drain on the availability of inpatient bed space. The commenter respectfully requested that CMS approve the RECELL® pass-through payment application to make RECELL® available in the outpatient setting. A second commenter offered their general support for approval of RECELL® based on what they believe to be substantial improvements compared to current burn treatments. A third commenter urged CMS to finalize pass-through status for RECELL® so that they could offer the treatment to patients on an outpatient basis.

Response: We thank the commenters for their support and we note that, as explained further below, we are approving RECELL® for device pass-through status beginning in CY 2022.

Comment: The applicant stated that the cost of RECELL® is not insignificant and exceeds 25 percent of the applicable APC amount for the relevant procedures that would be reported with RECELL®. The applicant further stated that the cost of the RECELL® device also exceeds the device-related portion of the applicable APC amount by more than 25 percent for the relevant procedures that would be reported with RECELL®.

Response: After consideration of the public comments we received and our review of the device pass-through application, we have determined that RECELL® meets the requirements for device pass-through payment status described at § 419.66. As stated previously, devices that are granted an FDA Breakthrough Device designation are not evaluated in terms of the current substantial clinical improvement criterion at § 419.66(c)(2)(i) for purposes of determining device pass-through payment status, but must meet the other criteria for device pass-through status, and we believe RECELL® meets those other criteria.

Therefore, effective beginning January 1, 2022, we are finalizing approval for device pass-through payment status for RECELL® under the alternative pathway for devices that have an FDA Breakthrough Device designation and have received FDA marketing authorization.

(2) Shockwave C² Coronary Intravascular Lithotripsy (IVL) Catheter

Shockwave Medical submitted an application for a new device category for transitional pass-through payment status for the Shockwave C² Coronary Intravascular Lithotripsy (IVL) catheter (Coronary IVL Catheter) for CY 2022. The applicant asserts the Coronary IVL Catheter is a proprietary lithotripsy device delivered through the coronary arterial system of the heart to the site of an otherwise difficult to treat calcified stenosis, including calcified stenosis that is anticipated to exhibit resistance to full balloon dilation or subsequent uniform coronary stent expansion. According to the applicant, energizing the lithotripsy device generates intermittent sound waves within the target treatment site, disrupting calcium within the lesion and allowing subsequent dilation of a coronary artery stenosis using low balloon pressure. According to the applicant, the Coronary IVL System is comprised of the following components:

(1) IVL Generator—a portable, rechargeable power source that is capital equipment and reusable.

(2) IVL Connect Cable—a reusable cable used to connect the IVL Generator to the IVL Catheter.

(3) Coronary IVL Catheter—a sterile, single-use catheter that delivers intravascular lithotripsy within the target coronary lesion.

According to the applicant, during a percutaneous coronary intervention (PCI) procedure, the physician determines that a lesion has severe calcification. The applicant states the Coronary IVL Catheter is introduced into the lesion where lithotripsy is delivered to crack the calcification to facilitate the optimal dilatation of the vessel and placement of a coronary stent. The applicant adds that the Coronary IVL Catheter is removed, and the physician then implants a coronary stent to treat the lesion.

The applicant asserts that the Coronary IVL Catheter is different from other devices used during PCI procedures as it delivers localized lithotripsy to crack the calcified lesion prior to the placement of a coronary stent. According to the applicant there are other devices that may be utilized to remove calcium within the vessel (that is, atherectomy), however, these devices utilize some form of cutting or laser to remove or ablate the calcium and can

only address the calcium nearest to the vessel lumen. According to the applicant, the Coronary IVL Catheter addresses the calcium within the lumen as well as within the vessel walls.

According to the applicant, the Coronary IVL Catheter is used to treat a subset of patients identified for a PCI procedure to treat their coronary artery disease where approximately 15 percent of lesions in patients being eligible for a PCI procedure have severe calcification. The applicant adds the Coronary IVL Catheter is utilized during PCI procedures and does not replace any devices currently utilized to complete the procedure (for example, guidewires, angioplasty balloons, stent(s), vascular closure, etc.) that are packaged into the APC payment rate. According to the applicant, based on the FDA labeling for the Coronary IVL catheter, it is utilized prior to the placement of a coronary stent.

With respect to the newness criterion at § 419.66(b)(1), the Coronary IVL Catheter received FDA PMA for the Shockwave Intravascular Lithotripsy (IVL) System with Shockwave C2 Coronary Intravascular Lithotripsy (IVL) Catheter on February 12, 2021 and is indicated for lithotripsy-enabled, low-pressure balloon dilatation of severely calcified, stenotic de novo coronary arteries prior to stenting. The Coronary IVL Catheter received FDA Breakthrough Device designation on August 19, 2019, and is indicated for lithotripsy-enabled, low-pressure dilatation of calcified, stenotic de novo coronary arteries prior to stenting. We received the application for a new device category for transitional pass-through payment status for the Coronary IVL Catheter on February 26, 2021, which is within 3 years of the date of the initial FDA marketing authorization. We invited public comment on whether the Coronary IVL Catheter meets the newness criterion.

Comment: One commenter stated that the Coronary IVL Catheter meets the newness criteria.

Response: We thank the commenter for the information.

Comment: In their comment the applicant concurred with CMS' conclusion that Coronary IVL Catheter meets the transitional pass-through criteria and supported CMS finalizing the transitional-pass through status for three years.

Response: Because we received the Coronary IVL Catheter pass-through application on February 26, 2021, which is within 3 years of February 12, 2021, the date of FDA premarketing approval for the device, we agree that the Coronary IVL Catheter meets the newness criterion.

With respect to the eligibility criterion at § 419.66(b)(3), according to the applicant, the Coronary IVL Catheter is integral to the service provided, is used for one patient only, comes in contact with human tissue, and is surgically inserted in a patient until the procedure is completed. The applicant also claimed that the Coronary IVL Catheter meets the device eligibility requirements of § 419.66(b)(4) because it is not equipment, an instrument, apparatus, implement, or item for which depreciation and financing expenses are recovered, and it is not a supply or material furnished incident to a service. In the CY 2022 OPPS/ASC proposed rule, we invited public comments on whether the Coronary IVL Catheter meets the eligibility criteria at § 419.66(b).

Comment: One commenter stated that the regulation at § 419.66(b)(3) is clear that pass-through is not appropriate for ''equipment, an instrument, apparatus, implement, or item for which depreciation and financing expenses are recovered as depreciable assets as defined in Chapter 1 of the Medicare Provider Reimbursement Manual (CMS Pub. 15–1).'' [30] The commenter stated we acknowledged in the CY 2022 OPPS/ASC proposed rule that the Shockwave System Generator, which is the ''power source'' for the Shockwave System, is ''capital equipment'' [31] with the list price referenced for the Coronary IVL System and not just the Coronary IVL Catheter.[32] Next the commenter stated that the proposed rule does not consider if the Generator, an excluded piece of capital equipment, is the key component of the Coronary IVL System, and contended that CMS did not consider whether the Generator, an excluded piece of capital equipment is a ''key therapeutic component'' of the Shockwave System, and as such, that the Shockwave System as a whole should not be eligible for device pass-through status.

Response: As we stated in the CY 2022 OPPS/ASC proposed rule (86 FR 42089), Shockwave Medical submitted an application for a new device category for transitional pass-through payment status for the Coronary IVL Catheter, and not for the remainder of the Coronary IVL System, which includes the IVL Cable and Generator. Given that the IVL Cable and Generator are not single-use devices, they are not eligible for device pass-through status. The only part of this device that is eligible for device pass-through status is the Coronary IVL Catheter—a sterile, single-use catheter.

In terms of the commenter's contention that we have not evaluated which portion of the device is the key therapeutic component, we emphasize that the Coronary IVL Catheter is the device for which the applicant submitted an application for device pass-through status. We also note that we consider which portion of a combination product is the key therapeutic or diagnostic component solely for purposes of determining whether implantable biological products should be evaluated as drugs or devices for pass-through payment purposes (74 FR 60476). We do not determine which portion of a combination product is the key therapeutic or diagnostic component for purposes of analyzing a device's eligibility for pass-through status. Nonetheless, if we were to consider the Shockwave Coronary IVL System as a whole, we would conclude that the Coronary IVL Catheter is the key therapeutic component as it is the component in the Shockwave System that is introduced into the lesion where lithotripsy is delivered to crack the calcification to facilitate the optimal dilatation of the vessel and placement of a coronary stent.

Comment: The applicant concurred with CMS' conclusion that the Coronary IVL Catheter meets the transitional pass-through criteria, including the criteria at § 419.66(b), and supported CMS finalizing the transitional-pass through status for the Coronary IVL Catheter for 3 years.

Response: Based on the information we have received and our review of the application, we agree with the applicant that the Coronary IVL Catheter is used for one patient only, comes in contact with human tissue, and is surgically implanted or inserted, and therefore meets the requirements in § 419.66(b)(3). We also agree with the commenter that the Coronary IVL Catheter meets the device eligibility requirements of § 419.66(b)(4) because it is not equipment, an instrument, apparatus, implement, or item for which depreciation and financing expenses are recovered, and it is not a supply or material furnished incident to a service. Based on this assessment we have determined that the Coronary IVL Catheter meets the eligibility criteria at § 419.66(b)(3) and (4).

The criteria for establishing new device categories are specified at § 419.66(c). The first criterion, at § 419.66(c)(1), provides that CMS

[30] 42 CFR 419.66(b)(4); Medicare Provider Reimbursement Manual, Ch. 1, section 104.1.

[31] 86 FR 42089.

[32] 86 FR 45153.

determines that a device to be included in the category is not appropriately described by any of the existing categories or by any category previously in effect, and was not being paid for as an outpatient service as of December 31, 1996. The applicant identified five established categories which they believe are not appropriate representatives of the Coronary IVL Catheter: (1) C1714 and C1724, which include devices that use mechanical cutting tools; (2) C1725, which includes balloon angioplasty; (3) C1885, which uses laser, beams of light to break up vessel obstructions; and (4) C2623, which includes a drug coated balloon. We stated in the CY 2022 OPPS/ASC proposed rule that we had not identified an existing pass-through device category that describes Coronary IVL Catheter and we invited public comment on this issue.

Comment: In its comment, the applicant concurred with CMS' conclusion that Coronary IVL Catheter meets the transitional pass-through device category eligibility criteria at § 419.66(c)(1) and supported CMS finalizing transitional pass-through status for three years.

Response: We agree there is no existing pass-through device category that appropriately describes the Coronary IVL Catheter because no current category describes a balloon catheter that generates sonic pressure waves using lithotripsy that can break up calcification in arterial walls. Based on this information, we have determined that the Coronary IVL Catheter meets the eligibility criterion at § 419.66(c)(1).

The second criterion for establishing a device category, at § 419.66(c)(2), provides that CMS determines either of the following: (i) That a device to be included in the category has demonstrated that it will substantially improve the diagnosis or treatment of an illness or injury or improve the functioning of a malformed body part compared to the benefits of a device or devices in a previously established category or other available treatment; or (ii) for devices for which pass-through status will begin on or after January 1, 2020, as an alternative to the substantial clinical improvement criterion, the device is part of FDA's Breakthrough Devices Program and has received FDA marketing authorization. As previously discussed in section IV.2.a above, we finalized the alternative pathway for devices that are granted a Breakthrough Device designation and receive FDA marketing authorization in the CY 2020 OPPS/ASC final rule (84 FR 61295). The Coronary IVL Catheter has a Breakthrough Device designation and marketing authorization from FDA, and therefore, is not evaluated for substantial clinical improvement. We note that the applicant applied for the new technology add-on payment under the alternative pathway for Breakthrough devices as discussed in the FY 2022 IPPS/LTCH PPS final rule (86 FR 45151 through 45153). In the FY 2022 IPPS/LTCH PPS final rule (86 FR 45153), CMS approved the Coronary IVL Catheter for new technology add-on payments.

The third criterion for establishing a device category, at § 419.66(c)(3), requires us to determine that the cost of the device is not insignificant, as described in § 419.66(d). Section 419.66(d) includes three cost significance criteria that must each be met. The applicant provided the following information in support of the Coronary IVL Catheter meeting the cost significance requirements. The applicant stated that the Coronary IVL Catheter would be reported with the HCPCS codes listed in the following Table 34:

BILLING CODE 4120–01–P

TABLE 34: HCPCS CODES REPORTED WITH CORONARY IVL CATHETER

HCPCS Code	Short Descriptor	SI	APC
92928	Prq card stent w/angio 1 vsl	J1	5193
92929	Prq card stent w/angio addl	N	
92933	Prq card stent/ath/angio	J1	5194

C9608	Perc d-e cor revasc chro add	N	

BILLING CODE 4120–01–C

To meet the cost criterion for establishing a device category, a device must pass all three cost criteria for at least one APC. For our calculations for the CY 2022 OPPS/ASC proposed rule, we used APC 5193—Level 3 Endovascular Procedures, which had a CY 2021 payment rate of $10,042.94 at the time the application was received.

Section 419.66(d)(1), the first cost significance requirement, provides that the estimated average reasonable cost of devices in the category must exceed 25 percent of the applicable APC payment amount for the service related to the category of devices. The estimated average reasonable cost for the Coronary IVL Catheter of $5,640 is 56 percent of the applicable APC payment amount for the service related to the category of devices of $10,042.94 (($5,640/10,042.94) × 100 = 56 percent). Therefore, we stated in the CY 2022 OPPS/ASC proposed rule that we believe the Coronary IVL Catheter meets the first cost significance requirement.

The second cost significance requirement, at § 419.66(d)(2), provides that the estimated average reasonable cost of the devices in the category must exceed the cost of the device-related portion of the APC payment amount for the related service by at least 25 percent, which means that the device cost needs to be at least 125 percent of the offset amount (the device-related portion of the APC found on the offset list). Beginning in CY 2017, we calculate the device offset amount at the HCPCS/CPT code level instead of the APC level (81 FR 79657). HCPCS code 92928 had a device offset amount of $3,607.42 at the time the application was received. The estimated average reasonable cost for the Coronary IVL Catheter of $5,640 is 156 percent of the cost of the device-related portion of the APC payment amount for the related service of $3,607.42 (($5,640/$3,607.42) × 100 = 156 percent). Therefore, we stated in the CY 2022 OPPS/ASC proposed rule that we believe that the Coronary IVL Catheter meets the second cost significance requirement.

The third cost significance requirement, at § 419.66(d)(3), provides that the difference between the estimated average reasonable cost of the devices in the category and the portion of the APC payment amount for the device must exceed 10 percent of the APC payment amount for the related service. The difference between the estimated average reasonable cost of $5,640 for the Coronary IVL Catheter and the portion of the APC payment amount for the device of $3,607.42 is 20 percent of the APC payment amount for the related service of $10,042.94 (($5,640 − $3,607.42)/$10,042.94) × 100= 20 percent). Therefore, we stated in the CY 2022 OPPS/ASC proposed rule that we believe that the Coronary IVL Catheter meets the third cost significance requirement.

We invited public comment on whether the Coronary IVL Catheter meets the device pass-through payment criteria discussed in this section,

including the cost criterion for device pass-through payment status.

Comment: One commenter asserted that CMS' review of the Shockwave System (Coronary IVL) was based on an incorrect CPT/APC pairing and an assessment of charges, not actual costs.

The commenter stated that CMS' analysis is contrary to its own regulation because it did not reference ''the applicable APC.'' [33] According to the commenter, if APC 5194 (Level 4 Endovascular Procedures) is used to assess the Shockwave System, and not APC 5193 (Level 3 Endovascular Procedures), it is clear that the Shockwave System would not meet any of the three cost criteria. The commenter makes a number of arguments about why it believes APC 5194 is ''the applicable APC,'' including that that the applicant referenced 92933 (Percutaneous transluminal coronary atherectomy, with intracoronary stent, with coronary angioplasty when performed; single major coronary artery or branch) which the commenter explains maps to APC 5194, not APC 5193.[34] According to the commenter, the applicant is clearly targeting this APC, as the applicant references a targeted population of patients with calcified lesions of approximately 15 percent of patients; [35] this population maps to I25.84 (Coronary atherosclerosis due to calcified coronary lesion) for which a matching percentage of patients links to 92933 (and APC 5194), not 92928 (Percutaneous transcatheter placement of intracoronary stent(s), with coronary angioplasty when performed; single major coronary artery or branch) (and APC 5193).[36] The commenter further asserted that in its development of the Shockwave System, the applicant references coronary orbital atherectomy (OA), which, in fact, breaks up and removes calcium, as occurs in atherectomy.[37] According to the commenter, the applicant's public comments clearly present the Shockwave System as a replacement to atherectomy.[38] The commenter stated that the proposed rule states that the pass-through criteria can be satisfied if ''any'' APC meets the criteria but refers to the regulation, which states the pass-through cost criteria can be met if ''the applicable'' APC is used. The commenter contended that it is clear the applicable APC for the Shockwave System is 5194 and not 5193. The commenter added that some stakeholders are under a misconception that, if the Shockwave System is granted pass-through status based on an analysis of the cost criterion using a pairing of 92928 and APC 5153, additional pass-through payments will nevertheless be available when the Shockwave System is billed under APC 5194. The commenter asked CMS to ensure, if the agency confirms its quarterly pass-through determination for the Shockwave System, that appropriate safeguards are in place so that inappropriate payments are not made in connection with APC 5194.

The commenter next asserted that the Shockwave System cost significance test is based on list prices and not costs, is inadequately supported, and is inconsistent with available cost data. According to the commenter, the device cost used in assessing the cost criteria requirement reflects a list price and is contrary to publicly available information on Shockwave System pricing. The commenter stated that there are substantially more C9600 (Percutaneous transcatheter placement of drug eluting intracoronary stent(s), with coronary angioplasty when performed; single major coronary artery or branch) claims (*i.e.,* 90,889) with drug-eluting stents than 92928 (*i.e.,* 6,357) with bare metal stents, where the device-related portion is higher. The commenter asserted that CMS did not provide any information in the CY 2022 OPPS/ASC proposed rule about why 92928 was used instead of C9600. The commenter explained that it is not clear to them why CMS chose 92928 instead of C9600 to perform the cost significance calculations for the cost criterion.

The commenter then asserted that CMS, without providing factual support, stated that the average reasonable cost for Coronary IVL is $5,640. According to the commenter, in the IPPS/LTCH final rule (86 FR 44774, 45153) CMS used a value of $5,640 for the Shockwave System, but did not reference the IPPS/LTCH final rule in the CY 2022 OPPS/ASC proposed rule. The commenter went on to explain that CMS based this figure on a cost for the Shockwave System of $4,700 per device × 1.2 devices required per case, and stated that CMS finalized this cost for the System ''as a whole'' without supporting this calculation except using preliminary information from the applicant. The commenter asserted that, under the Administrative Procedures Act, 5 U.S.C. 553(b), an agency is required, in order to provide stakeholders with reasonable notice and opportunity to comment, to provide the factual basis that supports its proposal; the commenter added that CMS' failure to provide any support for its proposal is precisely the kind of defect in process that courts have repeatedly cautioned against.

According to the commenter, in a published article, citing a Shockwave earnings call, the Shockwave national list price was stated to be $4,700.[39] The commenter asserted that a list price is a charge and not a reflection of actual cost and does not address any discounts, rebates, free goods contingent on a purchase, or other price concessions. The commenter noted that blinded market research revealed prices to some purchasers as low as $4,200 and possibly lower.

Additionally, the commenter noted that in the proposed rule the applicant used a multiplier of 1.2 devices required per case to calculate the $5,640 used in assessing whether the device meets the cost criterion. According to the commenter, such a multiplier is not cited in the proposed rule and was not, therefore, framed appropriately for comment as part of this rulemaking. The commenter added three concerns related to the multiplier: (1) Use of a multiplier magnifies the invalid impact of incorrectly included ''equipment'' (the Generator) and a reusable item (the Cable) because the Generator and Cable would not be used in more than one case; (2) neither the CY 2022 OPPS proposed rule nor the FY 2022 IPPS/LTCH final rule included data or support for the assertion that 1.2 devices are required per case; and (3) use of a multiplier is not appropriate where, as here, the pass-through regulation requires a ''reasonable'' estimate of costs and more than one device would be used in less than twenty percent of all cases. The commenter contended that CMS should use medians, rather than

[39] Shelley Wood, tctMD, ''FDA Approves Shockwave Intravascular Lithotripsy for Calcified Coronaries'', available at *https://www.tctmd.com/news/fda-approves-shockwave-intravascular-lithotripsy-calcified-coronaries* (February 16, 2021).

averages, because of what the commenter believed was the inaccurate nature of averages in circumstances like these.[40]

Response: We appreciate the additional information provided by the commenter. We disagree with the commenter's assertion that the proposed rule references the incorrect HCPCS/APC pairing. Question D.7. of the device pass-through application states: Using Healthcare Common Procedure Coding System (HCPCS) Level I and/or Level II code(s), list all of the specific procedure(s) and/or services with which the nominated device is used. The applicant for the Coronary IVL Catheter provided a complete list of HCPCS codes with which their device can be billed. CMS evaluated the complete list of HCPCS codes to ensure each code represented a procedure with which the Coronary IVL Catheter could be used. Consistent with our evaluation of every other device pass-through application, we identify the applicable APC with which to evaluate the cost of the device against the cost significance tests at § 419.66(d). There are numerous APCs to which procedures with which the Coronary IVL Catheter can be performed are assigned. As we explained in the CY 2005 OPPS final rule (69 FR 65775), we generally use the lowest APC payment rate applicable for use with the nominated device when we assess whether a device meets the cost significance criterion, thus increasing the probability the device will pass the cost significance test. Furthermore, we disagree with the commenter's assertion that CMS should limit pass-through payments to one APC (5193) versus another (5194). The applicant identified HCPCS codes which CMS agrees align appropriately to both APC 5193 and 5194. Consistent with CMS' policy, we are not limited in applying pass-through payments to only the HCPCS/APC combination that was used in the cost significance test, but rather the entire list of procedures which appropriately represent the technology.

We disagree with the commenter's assertions that the CY 2022 OPPS/ASC proposed rule uses an assessment of charges, as opposed to cost, and failed to give commenters an opportunity to comment. As we stated in the proposed rule, according to the applicant the Coronary IVL System is comprised of the following components: (1) IVL Generator—a portable, rechargeable power source that is capital equipment and reusable; (2) IVL Connect Cable—a reusable cable used to connect the IVL Generator to the IVL Catheter; (3) Coronary IVL Catheter—a sterile, single-use catheter that delivers intravascular lithotripsy within the target coronary lesion. Given that parts one and two are not single-use devices, they are not under consideration for device pass-through status. The only part of this device which is under consideration for device pass-through payments is the Coronary IVL Catheter—a sterile, single-use catheter. According to the applicant, the expected average sales price of each Shockwave C2 Coronary IVL single-use catheter is $4,700. We acknowledge that in the CY 2022 OPPS/ASC proposed rule, we did not state that, per the applicant, the average number of catheters required per case is 1.2 based on the applicant's clinical trial experience; the applicant therefore calculated an expected cost to hospitals on a per-case basis for the Coronary IVL Catheter of $5,640. Based on our analysis, which includes a review by CMS clinical professionals, we agree with the applicant that the average number of catheters required per case is 1.2 and therefore, that a multiplier of 1.2 is appropriate in this situation. We appreciate the commenter identifying this information. We note that regardless of the value used, $4,700 (for one Coronary IVL Catheter per case) or $5,640 (for 1.2 Coronary IVL Catheters per case), the Coronary IVL Catheter meets the cost significance tests at § 419.66(d). Finally, we are clarifying that although the FY 2022 IPPS/LTCH PPS final rule referred to the Shockwave C2 Intravascular Lithotripsy (IVL) System when discussing whether the device met the cost criterion for new technology add-on payments, we considered the cost only of the Coronary IVL Catheter in that determination.

Comment: This same commenter asserts that the proposed rule failed to provide stakeholders with a reasonable opportunity to comment on issues central to the pass-through determination. The commenter asserted that the quarterly, sub-regulatory determination made for pass-through status for the Coronary IVL Catheter is invalid following the Supreme Court's decision in *Azar* v. *Allina Health Services,* 139 S. Ct. 1804 (2019). Based on these assertions, the commenter stated that the Coronary IVL Catheter should not be approved for pass-through status and the quarterly determination should be rescinded. The commenter stated that our process of approving applications for device pass-through status on a quarterly basis predates the Supreme Court's decision in *Allina* and should ''appropriately conform to the rulemaking obligations set forth in *Allina*''.[41] The commenter concludes that the Shockwave System pass-through determination was invalid and in excess of CMS' authority and it should, therefore, be rescinded.

Response: We disagree with the commenter's assertion that the quarterly determination process is invalid, and that the quarterly, sub-regulatory determination to grant pass-through status for the Coronary IVL Catheter is invalid following *Allina.* We note that in the CY 2016 OPPS/ASC final rule (80 FR 70417–70418) CMS finalized through notice and comment rulemaking its proposal to revise the application process for device pass-through payments. Specifically, CMS stated that starting in CY 2016 all device pass-through payment applications submitted through the quarterly process would be subject to notice-and-comment rulemaking in the next applicable OPPS annual rulemaking cycle. Furthermore, under the finalized policy, CMS stated that all applications that are approved upon quarterly review will automatically be included in the next applicable OPPS annual rulemaking cycle, and any information provided by the applicant would be available for consideration during the public comment process for the proposed rule. CMS stated that this process would allow those applications that meet all criteria to receive timely pass-through payment status, while also allowing for a transparent public review process for all applications as part of the next available rulemaking. Finally, we note that the quarterly approval process does not establish or change a substantive legal standard governing the scope of benefits or the payment for services, but only applies substantive legal standards adopted through notice and comment rulemaking to determine whether a particular device should qualify for pass-through status.

Comment: In their public comment, the applicant stated that there are two issues associated with CMS' evaluation and implementation of transitional device pass-through payment status for the Coronary IVL Catheter that they wanted to bring to CMS' attention. In CMS Transmittal 10825, dated June 11, 2021, CMS limited HCPCS code C1761 to being reported with two procedures that describe placement of a coronary stent (HCPCS codes 92928 and C9600). The applicant noted that CMS most recently published Transmittal 10997, dated September 16, 2021, which added four additional HCPCS codes—92933,

[40] 42 CFR 419.66(d).

[41] CMS Memorandum, Impact of Allina on Medicare Payment Rules, at 1 (Oct. 31, 2019). See also section 1871(a)(2) of the Act.

92943, C9602, and C9607—that can also be billed in conjunction with HCPCS code C1761 and be eligible for transitional pass-through effective July 1, 2021. The applicant noted that CMS included the device offset associated with these codes when calculating the incremental transitional pass-through payment when HCPCS code C1761 is billed. The applicant believes CMS applied the device offset for HCPCS codes 92933, 92943, C9602, and C9607 as an oversight, and requested that CMS remove the device offset for these codes when calculating the incremental transitional pass-through payment when billed in conjunction with C1761 because, similar to the determination for HCPCS codes 92928 and C9600, no device offset should be implemented as IVL costs are completely additive to the procedure and the devices represented by the device offset in each procedure are still required.

Response: We disagree with the applicant's request to remove the device offset for HCPCS codes 92933, 92943, C9602 and C9607 when calculating the incremental transitional pass-through payment when billed in conjunction with HCPCS code C1761. In the above-identified procedures, the Coronary IVL Catheter is used in lieu of atherectomy to achieve a therapeutic outcome. Therefore, we believe a device offset as identified in Transmittal 10997 dated September 16, 2021 is warranted when HCPCS code C1761 is used in conjunction with these particular procedures.

Comment: The applicant stated that while they agree that Coronary IVL Catheter meets all three cost criteria based on CMS' methodology, they are concerned that the methodology CMS utilizes is not the most appropriate for procedures that require the use of multiple devices. The applicant contends that CMS utilizes the entire device-related portion (DRP) as reported for the applicable procedure instead of evaluating the cost of the new technology relative to the specific devices that it is replacing. The applicant asserted that CMS has removed the device offset for other technologies that have received transitional pass-through payment where new technologies are completely additive to the procedure. The applicant stated that CMS does not utilize a similar methodology when evaluating the three cost criteria. The applicant asserted that this may create an artificially high bar that would make new technology that would otherwise qualify for pass-through status ineligible, which the applicant believes is the case for the Eluvia™ system. The applicant requested that CMS update its methodology for current and future transitional pass-through applications where multiple devices are utilized.

Response: We thank the applicant for their input in regard to the calculation of the cost significance criterion, which we will take into consideration for future rulemaking. For a more detailed discussion of this issue as it relates to the Eluvia™ system, please see section IV(a)(2)(b)(3) of this final rule with comment period.

After consideration of the public comments we received and our review of the device pass-through application, we have determined that Coronary IVL Catheter meets the requirements for device pass-through payment status described at § 419.66. As stated previously, devices that are granted an FDA Breakthrough Device designation are not evaluated in terms of the substantial clinical improvement criterion at § 419.66(c)(2)(i) for purposes of determining device pass-through payment status, but must meet the other criteria for device pass-through status, which we believe the Coronary IVL Catheter does.

As specified above, the Coronary IVL Catheter pass-through application was preliminarily approved for transitional pass-through payment under the alternative pathway effective July 1, 2021. We note that in the CY 2022 OPPS/ASC proposed rule we invited public comments on whether the Coronary IVL Catheter should continue to receive transitional pass-through payment under the alternative pathway for devices that are FDA market authorized and that have an FDA Breakthrough Device designation.

We are finalizing our proposal to continue in 2022 device pass-through payment status for the Coronary IVL Catheter under the alternative pathway for devices that have an FDA Breakthrough Device designation and have FDA marketing authorization.

2. Traditional Device Pass-Through Applications

(1) AngelMed Guardian® System

Angel Medical Systems submitted an application for a new device category for transitional pass-through payment status for the AngelMed Guardian® System (the Guardian®) for CY 2022. The applicant asserted that the Guardian® is a proactive diagnostic technology that monitors a patient's heart's electrical activity for changes that may indicate an Acute Coronary Syndrome (ACS) event (that is, STEMI, NSTEMI, or unstable angina) related to blockage of a coronary artery which prevents the heart muscle from receiving sufficient oxygen. The Guardian® is a device implanted in the upper left chest and connects to an active fixation intracardiac lead attached to the apex of the right ventricle. The applicant asserts the Guardian® consists of an implantable medical device (IMD) which is composed of the header with an antenna for communication and the can with circuitry, radio, vibratory motor, and battery. According to the applicant, the Guardian® system also includes an external device that communicates with the IMD and provides redundant patient notification using auditory and visual alarms. Lastly, the applicant states the Guardian® system includes a physician programmer, a capital device, used to program the IMD and download cardiac data captured by the IMD.

According to the applicant, the Guardian® system relies upon the gold standard of changes to the ST-segment of a patient's heartbeat to diagnose a heart attack. According to the applicant, the Guardian® system uses an intracardiac lead to sense cardiac data and proprietary machine learning algorithms to assess acute changes to the ST-segment on a continuous, real-time basis. The applicant asserts these changes are compared to a patient's normal baseline reference that is computed over the prior twenty-four hours of monitored heart activity. According to the applicant, if the Guardian® detects a statistically abnormal acute change relative to this baseline, it notifies the patient to the potential ACS event by providing an alarm: The implanted device will vibrate, and the external device will flash and beep. According to the applicant, patients are instructed to seek urgent medical assistance when the system activates, even in the absence of ACS symptoms.

According to the applicant, the Guardian® system implantation will typically be an outpatient procedure and, following 10–14 days, is programmed in the physician office. The applicant asserts the patient undergoes training on the Guardian® and has follow-up visits every six months to review the device data. The applicant states that the emergency alarm is intended to be used as an adjunct to symptoms; in the absence of an emergency alarm patients are instructed not to ignore symptoms of an ACS event. The applicant asserts that while current technologies detect and provide therapy for cardiac medical conditions related to abnormal heart rate and rhythm, the AngelMed Guardian® system is the only FDA-

approved technology for providing detection and patient notification of ACS events so that patients more reliably and urgently seek medical care.

With respect to the newness criterion at § 419.66(b)(1), the AngelMed Guardian® system first received FDA 510(k) clearance on April 9, 2018 under PMA number P150009. The manufacturers received a Category B Investigational Device Exemption (IDE) as of January 27, 2020 for the use of the device in their continued access study, AngelMed for Early Recognition and Treatment of STEMI (ALERTS). According to the applicant, the device is anticipated for US market availability in quarter three of 2021. We received the application for a new device category for transitional pass-through payment status for the Guardian® system on February 28, 2021, which is within 3 years of the date of the initial FDA marketing authorization. We solicited public comment in the CY 2022 OPPS/ASC proposed rule on whether the Guardian® system meets the newness criterion.

Comment: The applicant reasserted that the Guardian® meets the newness criterion at § 419.66(b)(1) as the application was submitted within 3 years of FDA approval.

Response: We appreciate the commenter's input and agree that because we received the application for the Guardian® on February 28, 2021, which was within 3 years of the FDA premarketing approval on April 9, 2018, the Guardian® meets the newness criterion.

With respect to the eligibility criterion at § 419.66(b)(3), according to the applicant, the Guardian® is integral to the service provided, is used for one patient only, comes in contact with human tissue, and is surgically inserted temporarily. The applicant also claimed that the Guardian® meets the device eligibility requirements of § 419.66(b)(4) because it is not an instrument, apparatus, implement, or item for which depreciation and financing expenses are recovered, and it is not a supply or material furnished incident to a service. We invited public comments in the CY 2022 OPPS/ASC proposed rule on whether the Guardian® meets the eligibility criteria at § 419.66(b).

Comment: The applicant stated the Guardian® meets the eligibility criteria at § 419.66(b)(3) and 419.66(b)(4) as the Guardian® is used for one patient only, comes in contact with human tissue, and is surgically inserted.

Response: Based on the information we have received and our review of the application, we agree with the applicant that the device is used for one patient only, comes in contact with human tissue, and is surgically implanted or inserted. We also agree with the commenter that the Guardian® meets the device eligibility requirements of § 419.66(b)(4) because it is not equipment, an instrument, apparatus, implement, or item for which depreciation and financing expenses are recovered, and it is not a supply or material furnished incident to a service. Based on this assessment we have determined that the Guardian® meets the eligibility criterion at § 419.66(b)(3) and (4).

The criteria for establishing new device categories are specified at § 419.66(c). The first criterion, at § 419.66(c)(1), provides that CMS determines that a device to be included in the category is not appropriately described by any of the existing categories or by any category previously in effect, and was not being paid for as an outpatient service as of December 31, 1996. We stated in the CY 2022 OPPS/ASC proposed rule that we have not yet identified an existing pass-through payment category that describes the Guardian®. We invited public comment on whether the Guardian® meets the device category criterion.

Comment: The applicant asserted the Guardian® meets the first criterion for establishing a new device category, at § 419.66(c)(1), as no existing categories or categories previously in effect appropriately describe the technology.

Response: We agree there is no existing pass-through payment category that appropriately describes the Guardian® because no current or previously in effect category describes a device that provides detection of ACS events and notification to a patient. Based on this information, we have determined that the Guardian® meets the eligibility criterion at § 419.66(c)(1).

The second criterion for establishing a device category, at § 419.66(c)(2), provides that CMS determines either of the following: (i) That a device to be included in the category has demonstrated that it will substantially improve the diagnosis or treatment of an illness or injury or improve the functioning of a malformed body part compared to the benefits of a device or devices in a previously established category or other available treatment; or (ii) for devices for which pass-through status will begin on or after January 1, 2020, as an alternative to the substantial clinical improvement criterion, the device is part of FDA's Breakthrough Devices Program and has received FDA marketing authorization.

The applicant stated that the Guardian® represents a substantial clinical improvement over existing technologies. With respect to this criterion, the applicant asserted that the Guardian® offers the ability to diagnose a medical condition in a patient population where that medical condition is currently undetectable or offers the ability to diagnose a medical condition earlier in a patient population than is currently possible and this earlier diagnosis results in better outcomes.[42] In support of this claim the applicant submitted two published articles, the first by Gibson et al. and the second by Holmes et al.[43] [44]

The first study is a randomized control trial with 907 subjects who were implanted with the Guardian® system and randomized 1:1 to either active or deactivated alarms.[45] According to the authors, all subjects received education regarding the importance of minimizing symptom-to-door time in the presence of chest pain or ischemic equivalents, regardless of alarm status. The authors state that patients were not blinded to their randomization status. After randomization patients returned for follow-up visits at 1, 3, 6, and every six months thereafter. In all patients, the Guardian® system captured electrogram data up to 24 hours before and 8 hours after a triggered alarm for later review. According to the authors, the primary safety endpoint was the absence of system-related complications that required a system revision or invasive intervention to resolve in at least 90 percent of subjects through six months. The primary efficacy endpoint was a composite of: (1) Cardiac or unexplained death; (2) new Q-wave MI; and (3) detection-to-presentation time >2 h for a documented coronary occlusion event. Electrocardiogram (ECG) tracings were obtained prior to implantation, at randomization, at 1, 3, and 6 months, and at every emergency presentation to evaluate for a Q-wave MI not present at baseline. An exploratory

[45] Gibson, C.M., Holmes, D., Mikdadi, G., Presser, D., Wohns, D., Yee, M.K., Kaplan, A., Ciuffo, A., Eberly, A.L., 3rd, Iteld, B., & Krucoff, M.W. (2019). Implantable Cardiac Alert System for Early Recognition of ST-Segment Elevation Myocardial Infarction. Journal of the American College of Cardiology, 73(15), 1919–1927.

dual baseline ECG analysis was performed, according to the authors, because Q-waves may be transient between implantation and randomization. The dual baseline ECG analysis evaluates for the presence of new Q waves across subsequent ECGs. At the start of the trial, 456 patients were identified as controls and 451 as treated; at 6 months, 446 controls remained and 437 treated remained. The authors stated that subject enrollment ceased after 900 subjects were randomized and therefore an alpha penalty of 0.25 was taken for the interim look at event rates after 600 subjects.

According to the authors, the control and treatment groups were well matched at baseline.[46] The primary safety endpoint was met with 96.7 percent freedom (posterior probability >0.999) with a total of 31 system-related complications in 30 (3.3 percent) subjects with infections being the predominant cause of complications. The authors stated that ACS events occurrence was low. At 7, 30, 50, 70, and 90 days there were no statistical differences between the control and treated groups on the primary composite efficacy endpoint. At each time interval, the treated group had lower rates of the primary endpoint than the control group. Statistical differences were observed between treated and control groups in the dual baseline ECG exploratory analysis particularly at 50, 70, and 90 days after a confirmed occlusive event favoring the treated group. At the pre-specified 7-day look back window, the median time from the Guardian® notification to arrival at a medical facility was 51 minutes for the treated subjects as compared to 30.6 hours for control subjects (Pr [pt < pc] >0.999). Subject arrival within 2 hours of a detected and confirmed coronary occlusion occurred in 85 percent (29 of 34) of the treatment group compared with only 5 percent of the control group, with the majority of patients in the control arm presenting after 7 days. However, the authors asserted that despite a numerical reduction in new Q-wave MI using single and dual baseline ECGs at any of the pre-specified look-back windows, the posterior probability of superiority did not reach statistical significance. The applicant added that 22 percent (42/193) of the confirmed ACS events were detected due to Emergency Department (ED) visits prompted by alarms in the absence of symptoms; that silent MIs typically account for approximately 30 percent of all MIs and are historically associated with increased rates of morbidity and mortality.[47]

The second article expanded on the previously discussed study with a post hoc analysis of two coprimary efficacy endpoints: Superiority of positive predictive value (PPV) and noninferiority of false positive rate for ED visits prompted by alarms compared to symptoms-only.[48] According to the authors, these primary endpoints were assessed by comparing ED visits for an Alarms OFF group (control subjects during the randomized 6-month period) to those of an Alarms ON group (including both the treatment subjects during the first 6 months and all implanted patients beyond 6 months with alarms activated). The authors stated the expanded analysis adjudicated ED visits into either true or false-positive ACS events based on independent review of cardiac test data. The authors stated that the annual rate for Clinical Events Committee (CEC)-adjudicated ACS events was 0.151 (33 of 218.15) in the Alarms OFF group and 0.124 (193 of 1,557.64) in the Alarms ON group. In the Alarms OFF group, of the 181 ED visits, the CEC adjudicated 33 (18 percent) as ACS events (MI = 22 [67 percent]; unstable angina (UA) ¼ 11 [33 percent]), with the remaining visits adjudicated as due to either stable CAD or indeterminate etiology. The median symptom-to-door time for Alarms OFF ACS events was 8.0 h (95 percent confidence interval [CI]: 3.2 to 47.5 h). In Alarms ON subjects, of the 970 ED visits, the CEC adjudicated 193 (20 percent) as ACS events, with the remainder classified as stable CAD, indeterminate events, and/or a false-positive alarm. Of the 193 ACS events, 89 events (46 percent) were prompted by alarms (with or without symptoms; MI ¼ 40 [45 percent]; UA ¼ 49 [55 percent]). The remaining 104 visits (54 percent) were prompted by symptoms only (MI ¼ 60 [58 percent]; UA ¼ 44 [42 percent]). An overall median arrival time of 1.7 h was found for the Alarms ON group composite including all 3 prompt types for ED arrival (alarms only, alarms þ symptoms, or symptoms only), which was significantly shorter than the 8.0 h delay of the Alarms OFF group ($p < 0.0001$). The applicant asserts that the Guardian® system allows patients with asymptomatic ACS events to respond to the ED faster with a median pre-hospital delay of 1.4 hours.

The applicant further asserts that the Guardian® system offers more rapid beneficial resolution of the disease process treated because of the use of the device. According to the applicant, the Guardian® system increases the likelihood that a patient will correctly seek medical care for an ACS event in a timely manner that reduces pre-hospital delay and associated risk of heart damage (for example, larger infarct size, ejection fraction decrement)[49] [50] [51] and associated downstream sequelae. More specifically, the applicant asserts that based on the results of the second discussed study, the Guardian® system Alarms ON group showed reduced pre-hospital delays, with 55 percent (95 percent confidence interval [CI]: 46 percent to 63 percent) of Emergency department visits for ACS events <2 hours compared with 10 percent (95 percent CI: 2 percent to 27 percent) in the Alarms OFF group ($p < 0.0001$).[52] The applicant adds that results were similar when restricted to myocardial infarction (MI) events.[53] The applicant states the median pre-hospital delay for MI was 12.7 hours for Alarms OFF compared to 1.6 hours in Alarms ON subjects ($p < 0.0089$) as reported in

[53] Holmes, D.R., Jr, Krucoff, M.W., Mullin, C., Mikdadi, G., Presser, D., Wohns, D., Kaplan, A., Ciuffo, A., Eberly, A.L., 3rd, Iteld, B., Fischell, D.R., Fischell, T., Keenan, D., John, M.S., & Gibson, C.M. (2019). Implanted Monitor Alerting to Reduce Treatment Delay in Patients With Acute Coronary Syndrome Events. Journal of the American College of Cardiology, 74(16), 2047–2055.

Holmes et al. (2019).[54] The applicant asserts that it is clinically recognized, due to numerous lines of evidence, that shorter total ischemia time is associated with better outcomes for ACS events.[55] [56] [57] [58] The applicant asserts that prompt responsiveness to symptoms and decreased pre-hospital delay is a universally understood benefit which improves the health outcomes of ACS events. According to the applicant, the American Heart Association (Mission Lifeline), American College of Cardiology (Door to Balloon (D2B) Alliance), Society for Angiographic Intervention (Seconds Count™ program) and the National Heart, Lung, and Blood Institute have organized task forces and launched national programs with the goal of improving patient awareness and response to symptoms which are indicative of potential ACS events and reducing total ischemia time (that is, prehospital delay and in-hospital delay) to improve outcomes.

The applicant next asserts the device offers more rapid beneficial resolution of the disease process because the use of the Guardian® system, as compared to the standard of care relying on symptoms alone, being in the Alarm ON group was associated with a reduction in the rate of new onset of left ventricular dysfunction.[59]

Lastly the applicant asserts the use of the Guardian® system will decrease the number of future hospitalizations or physician visits. According to the applicant, the Guardian® system reduces the annual false positive rate (FPR) of Emergency Department visits (that is, spurious ED visits where no ACS is found) by 26 percent.[60] The applicant states that the FPR for all alarms on emergency visits was 0.499 per patient-year compared to 0.678 for alarms off ($p < 0.001$).[61]

Based on the evidence submitted with the application, we have the following observations. Much of the claims for substantial clinical improvement are derived from two primary studies identified by the applicant and discussed above.[62] [63] We note that the first study (Gibson et al. 2019) did not demonstrate statistically significant superiority of the intervention during the pre-determined study window. The authors noted a lower than expected frequency of events and the study was terminated early, two factors which may have affected these results. The results from the second study are based entirely on a post hoc analysis of data from the first article. We note that the findings presented are valuable but we sought comment on whether a post hoc analysis provides sufficient evidence to support the claim of substantial clinical improvement. Furthermore, we note that the primary efficacy endpoint was a composite of three outcomes. We are not certain that this endpoint is an appropriate measure with which to evaluate substantial clinical improvement among patients experiencing ACS events. We invited public comments on whether the Guardian® system meets the substantial clinical improvement criterion.

Comment: Many commenters offered support for the approval of the Guardian®. Numerous commenters noted that according to published studies a reduction in ischemic time is associated with less cardiac damage and better outcomes for ACS events; these commenters asserted that the Guardian® brought patients to the emergency room earlier and more reliably, which resulted in better outcomes. Some commenters stated that the two studies submitted by the applicant and described in the CY 2022 OPPS/ASC proposed rule[64] [65] support the finding of a substantial clinical improvement. Some commenters noted that detection of silent MI enables the diagnosis of a medical condition that is currently undetectable, which the commenters believe is a substantial clinical improvement. Many commenters stated that the use of the Guardian® will reduce unnecessary medical utilization, will be beneficial particularly for those who experience silent myocardial infarction, and will prevent cardiac deaths. Many commenters offered patient stories that in their opinion showed that the Guardian® offers an improvement over existing treatment options. Multiple commenters noted that the Guardian® offers patients positive mental health outcomes given a reduction in experience anxiety in high-risk ACS patients. Additionally, multiple commenters stated that the total false positive rate for the ALERTS ON group was statistically less than that of the ALERTS OFF group.

One commenter stated they have been using the Guardian® for more than ten years, that the device is a valuable addition to diagnostic capabilities, and that in many cases it reduces health care utilization. A second commenter stated this technology represents a significant improvement to detecting myocardial infarction promptly. One commenter who described their experience seeing the exam prevent multiple cardiac catheterizations noted the exam is invaluable to modern medicine and that a reduction in reimbursement would threaten its realization in the appropriate context. Another commenter noted that almost all patients requested replacement of the Guardian® when it reached end of battery life, which is indicative of its safety and effectiveness.

Response: We thank the commenters for additional information to support their belief that the Guardian® device is a substantial clinical improvement over

devices in existing categories or other available treatments.

Comment: The applicant asserted the Guardian® meets the second criterion for establishing a new device category, at § 419.66(c)(2), by providing a substantial clinical improvement over existing therapies because the Guardian® ''has demonstrated that it will substantially improve the diagnosis or treatment of an illness or injury compared to the benefits of a device or devices in a previously established category or other available treatment''.

The applicant pointed out that in the CY 2022 OPPS/ASC proposed rule we stated that the positive predictive value (PPV), false positive rate (FPR), and Silent myocardial infarction (MI) endpoints were reported in the ''second study'' (that is, Holmes et al.). The applicant clarified that Gibson et al. reported on both the original study analysis and the Expanded analysis, including the PPV, FPR, and Silent MI endpoints; Holmes et al. reported on pre-hospital delays and their distribution as a function of both prompt (alarm only, alarm + symptom, symptom only) and group (Alarms On vs Alarms OFF).

In response to our concerns about the primary endpoints lacking statistical significance the applicant stated both AngelMed and FDA have expressed the position that the results of the ALERTS study are best assessed using the lens that statistical significance of primary endpoints should be assessed with respect to the totality of the data. The applicant stated the endpoint analyses requested by FDA for primary endpoints during its evaluation of the study data (for example, event based or crossover analysis) reached statistical significance. The applicant added as an example that an event-based analyses of the composite primary endpoints of the original study reached statistical significance when multiple events within patients were counted, rather than relying upon a patient-based analysis in which each patient could only be counted once. According to the applicant, since multiple events may occur in a single patient, they believe that the primary endpoint data is also valid and more accurately and realistically reflects Medicare patient experiences. The applicant added that the non-primary endpoint of sustained left ventricular ejection fraction (LVEF), which was independent of the primary endpoint measures, was statistically superior (Gibson et al. 2019, p. 1924).[66] The applicant added that the Expanded analysis was explicitly designed to address the event rate seen in the original study design by leveraging the post-randomization data to derive a dataset covering an approximately three times larger study interval, which according to the applicant, greatly increased the number of events and statistical power. The applicant concluded that while not all endpoints reached statistical significance, AngelMed believes that the totality of the data supports substantial clinical improvement.

In response to our concerns about post-hoc validity, the applicant believes the Expanded analysis supports substantial clinical improvement for a number of reasons. The applicant acknowledged as noted by Gibson et al.,[67] some post-hoc analyses were done in the original analysis but that the Expanded analysis was not post-hoc. The applicant asserted the Expanded analysis was a pre-specified analysis proposed by FDA, and agreed upon by AngelMed, that was completed using data both from the original randomized period and a large amount of data from the post-randomization period. While the post-randomization data was captured with the same rigor and predefined procedures as the randomization period, the Expanded analysis increased the pool of data from less than 450 years to 1,500 years. The applicant explained that this approach was adopted by FDA and AngelMed specifically with the aim of greatly increasing the number of endpoint events and maximizing the statistical power of the Expanded analysis for the new endpoints, new definition of acute coronary syndrome (ACS), etc. The applicant added that the Expanded analysis used a new analysis protocol which resulted in data which were analyzed to obtain new, distinct, and meaningful endpoints that used clearer measurements than the ALERTS design.

Lastly, the applicant responded to our concerns regarding appropriate measure[s] with which to evaluate substantial clinical improvement. The applicant reasserted that the original analysis used a composite primary efficacy endpoint of three outcomes that provided an initial assessment of the technology. The applicant asserted that the individual components of the primary efficacy endpoint for arrival times and new Q-waves were consistently in favor of the Guardian® with arrival times reaching significance. The applicant stated, as CMS noted, in the original ALERTS analysis ''at the pre-specified 7-day look back window, the median time from the Guardian® notification to arrival at a medical facility was 51 minutes for the treated subjects as compared to 30.6 hours for control subjects (Pr [pt < pc] >0.999)'' (86 FR 42092). The applicant added these results should be combined with the Expanded analysis endpoints, which used new measures that reflected a better understanding by FDA and AngelMed for how best to evaluate the real-world impact of the Guardian System, when assessing substantial clinical improvement. The applicant asserted that more specifically, the co-primary endpoints (*i.e.,* PPV and FPR) reflected real-world performance measures that were suggested by FDA and that more accurately demonstrate, and provide a complementary view of, the clinical benefit than the composite endpoints of the original ALERTS design.

The applicant asserted that the main topics of interest for the Expanded analysis were the alarms in terms of frequency and accuracy, and how the subjects responded (*e.g.,* distribution of patient pre-hospital delay for each of the different prompts: Alarm + symptom; alarms only; or, symptom only). According to the applicant the Expanded analysis not only assessed device performance but also the behavior of the individual subjects in the Alarms ON group prompted by the alarms, symptoms or both. The applicant contended that the combination of the original study endpoints and Expanded analysis endpoints are the correct measures since these are able to show substantial clinical improvement according to multiple device pass-through criteria the ability to diagnose a medical condition that is currently undetectable, diagnose a medical condition earlier in a patient population then is currently available, decrease future hospitalizations, and improve patient outcomes.

The applicant asserted that all the ALERTS data consistently showed compelling and statistically significant reduction in pre-hospital delays in the Alarms ON group compared to the Alarms OFF group. According to the applicant, reduced total ischemic time is a correct measure for assessing substantial clinical improvement since

[66] Gibson, C.M., Holmes, D., Mikdadi, G., Presser, D., Wohns, D., Yee, M.K., Kaplan, A., Ciuffo, A., Eberly, A.L., 3rd, Iteld, B., & Krucoff, M.W. (2019). Implantable Cardiac Alert System for Early Recognition of ST-Segment Elevation Myocardial Infarction. Journal of the American College of Cardiology, 73(15), 1919–1927.

[67] Gibson, C.M., Holmes, D., Mikdadi, G., Presser, D., Wohns, D., Yee, M.K., Kaplan, A., Ciuffo, A., Eberly, A.L., 3rd, Iteld, B., & Krucoff, M.W. (2019). Implantable Cardiac Alert System for Early Recognition of ST-Segment Elevation Myocardial Infarction. Journal of the American College of Cardiology, 73(15), 1919–1927.

it is a universal axiom that decreased delay decreases the associated risk of heart damage (*e.g.,* larger infarct size, ejection fraction decrement);[68] [69] [70] the applicant asserted that shorter total ischemic time is associated with better outcomes for ACS events.[71] [72] [73] [74] That is why, according to the applicant, multiple national agencies, including ACC, SCAI, AMA and NHLBI, have created programs specifically focused on reducing time to treatment for ACS events and have used time-based metrics as their sole assessment of provider quality for ACS care.[75] For these reasons the applicant believes that the combination of original and Expanded analysis results provides clear evidence of substantial clinical improvement for high-risk ACS patients experiencing ACS events.

Response: We appreciate the additional information provided by the commenters. In the proposed rule, we articulated tour concern about the sufficiency of a post-hoc analysis. In their public comment the applicant asserted that while some post-hoc analyses were performed, the expanded analysis was a pre-specified analysis proposed by FDA. We further appreciate the clarification from the applicant that the expanded analysis increased the number of endpoint events. Given the additional endpoints evaluated in the expanded analysis that specifically show faster visits for real events while not increasing unnecessary emergency department visits, we agree that the Guardian® system meets the substantial clinical improvement criterion at § 419.66(c)(2).

The third criterion for establishing a device category, at § 419.66(c)(3), requires us to determine that the cost of the device is not insignificant, as described in § 419.66(d). Section 419.66(d) includes three cost significance criteria that must each be met. The applicant provided the following information in support of the cost significance requirements. The applicant stated that the Guardian® would be reported with the HCPCS codes listed in the following Table 35:

TABLE 35: HCPCS CODES REPORTED WITH THE GUARDIAN®

HCPCS Code	Short Descriptor	SI	APC
0525T	Insj/rplcmt compl iims	J1	5223
0526T	Insj/rplcmt iims eltrd only	J1	5222
0527T	Insj/rplcmt iims implt mntr	J1	5222
0528T	Prgrmg dev eval iims ip	Q1	5741
0529T	Interrog dev eval iims ip	Q1	5741
0530T	Removal complete iims-	Q1	5222
0531T	Removal iims electrode only	Q1	5221
0532T	Removal iims implt mntr only	Q1	5221

To meet the cost criterion for device pass-through payment status, a device must pass all three tests of the cost criterion for at least one APC. For our calculations for the CY 2022 OPPS/ASC proposed rule, we used APC 5222—Level 2 Pacemaker and Similar Procedures, which had a CY 2021 payment rate of $8,152.58 at the time the application was received. Beginning in CY 2017, we calculate the device offset amount at the HCPCS/CPT code level instead of the APC level (81 FR 79657). HCPCS code 0527T was assigned to APC 5222 and had a device

offset amount of $1,598.72 at the time the application was received.

Section 419.66(d)(1), the first cost significance requirement, provides that the estimated average reasonable cost of devices in the category must exceed 25 percent of the applicable APC payment amount for the service related to the category of devices. The estimated average reasonable cost for the Guardian® is 126 percent of the applicable APC payment amount for the service related to the category of devices of $8,152.58 ((10,250/8,153) * 100 = 125.7 percent). Therefore, we stated in the CY 2022 OPPS/ASC proposed rule that we believe the Guardian® meets the first cost significance requirement.

The second cost significance requirement, at § 419.66(d)(2), provides that the estimated average reasonable cost of the devices in the category must exceed the cost of the device-related portion of the APC payment amount for the related service by at least 25 percent, which means that the device cost needs to be at least 125 percent of the offset amount (the device-related portion of the APC found on the offset list). We stated in the CY 2022 OPPS/ASC proposed rule that the estimated average reasonable cost for the Guardian® is 641 percent of the cost of the device-related portion of the APC payment amount for the related service of $1,598.72 ((10,250/1,599) * 100 = 641.0 percent). Therefore, we stated that we believe that the Guardian® meets the second cost significance requirement.

The third cost significance requirement, at § 419.66(d)(3), provides that the difference between the estimated average reasonable cost of the devices in the category and the portion of the APC payment amount for the device must exceed 10 percent of the APC payment amount for the related service. We stated in the CY 2022 OPPS/ASC proposed rule that the difference between the estimated average reasonable cost for the Guardian® and the portion of the APC payment amount for the device of $1,598.72 is 106 percent of the APC payment amount for the related service of $8,152.58 (((10,250 − 1,599)/8,153) * 100 = 106.1 percent). Therefore, we explained that we believe that the Guardian® meets the third cost significance requirement. In the CY 2022 OPPS/ASC proposed rule we invited public comment on whether the Guardian® meets the device pass-through payment criteria, including the cost criterion for device pass-through payment status.

Comment: The applicant stated the Guardian® meets the three cost criteria at § 419.66(d), consistent with CMS' analysis.

Response: We appreciate the applicant's input and agree that the Guardian® meets the cost criterion for device pass-through payment status.

After considering the public comments we received and our review of the device pass-through application, we have determined that the Guardian® system meets the criteria for device pass-through. Therefore, we are finalizing approval for device pass-through payment status for the Guardian® system effective beginning January 1, 2022.

(2) BONEBRIDGE Bone Conduction Implant System

MED–EL Corporation submitted an application for a new device category for transitional pass-through payment status for the BONEBRIDGE Bone Conduction Implant System (hereinafter referred to as the BONEBRIDGE) by the March 2021 quarterly deadline for CY 2022. The BONEBRIDGE is a transcutaneous, active auditory osseointegrated device that replaces the function of the damaged outer or middle ear and can help people for whom hearing aids are ineffective or not recommended. According to the applicant, the device consists of a bone conduction implant and electronics components, and an externally worn audio processor. The bone conduction implant is called the BONEBRIDGE Bone Conduction Implant (BCI 602) and the externally worn audio processor is called the SAMBA 2 Audio Processor. The BCI 602 consists of two main sections, the coil section and the transducer section. The BCI 602 consists of a magnet surrounded by the receiver coil, the transition, the Bone Conduction Floating Mass Transducer (BC–FMT), and the electronics package in a hermetic housing. The SAMBA 2 Audio Processor is 30.4 mm x 36.4 mm x 10.2 mm and weighs 9.3g, including the battery and magnet (strength 1). It has an 18-band digital equalizer, 18 independent compression channels, and an audio frequency range of 250 Hz to 8kHz. The audio processor is powered by a non-rechargeable 675 zinc-air button cell with a nominal 1.4-volt supply and 600mA-Hrs of capacity offering the user up to 133 hours (8 to 10 days) on a single battery.

The applicant stated that the bone conduction implant is surgically attached to the skull, is subcutaneous, and is connected to the external audio processor by transcutaneous magnetic attraction. The external audio processor picks up sound from the environment and converts those sounds to a radiofrequency (RF) signal that can be transmitted across the skin to the implant. The implant converts the signal to controlled vibrations which are conducted via the skull and perceived as sound. More specifically, the applicant stated that the BCI 602 is activated by placing the external audio processor over the magnet of the BCI 602. The signal and the energy to drive the BC–FMT are transferred via an inductive link to the internal coil, and then relayed to the BC–FMT. The BC–FMT transduces the signal into mechanical vibrations, which are conducted to the skull via the cortical titanium screws. These vibrations stimulate the auditory system through the bone conduction pathway to allow the patient to hear.

With respect to the newness criterion at § 419.66(b)(1), FDA granted a *de novo* request classifying the BONEBRIDGE as a Class II device under section 513(f)(2) of the Federal Food, Drug, and Cosmetic Act on July 20, 2018. The BONEBRIDGE is indicated for use in the following patients: (1) Patients 12 years of age or older; and (2) patients who have a conductive or mixed hearing loss and still can benefit from sound amplification. The pure tone average (PTA) bone conduction (BC) threshold (measured at 0.5, 1, 2, and 3 kHz) should be better than or equal to 45 dB HL; (3) Bilateral fitting of the BONEBRIDGE is intended for patients having a symmetrically conductive or mixed hearing loss. The difference between the left and right sides' BC thresholds should be less than 10 dB on average measured at 0.5, 1, 2, and 3 kHz, or less than 15 dB at individual frequencies; (4) Patients who have profound sensorineural hearing loss in one ear and normal hearing in the opposite ear (that is, single-sided deafness or ''SSD''). The pure tone average air conduction hearing thresholds of the hearing ear should be better than or equal to 20 dB HL (measured at 0.5, 1, 2, and 3 kHz); (5) The BONEBRIDGE for SSD is also indicated for any patient who is indicated for an air conduction contralateral routing of signals (AC CROS) hearing aid, but who for some reason cannot or will not use an AC CROS. Prior to receiving the device, it is recommended that an individual have experience with appropriately fit air conduction or bone conduction hearing aids. We received the application for a new device category for transitional pass-through payment status for the BONEBRIDGE on December 10, 2020, which is within 3 years of the date of the initial FDA marketing authorization. In the CY 2022 OPPS/ASC proposed rule, we invited public comments on

whether the BONEBRIDGE meets the newness criterion.

We did not receive any comments in regard to whether the BONEBRIDGE meets the newness criterion at § 419.66(b)(1). Because we received the BONEBRIDGE application on December 10, 2020, which is within 3 years of the FDA premarketing approval date of July 20, 2018, which is within 3 years, we have concluded that the BONEBRIDGE meets the newness criterion.

With respect to the eligibility criterion at § 419.66(b)(3), according to the applicant, the BONEBRIDGE is integral to the service provided, is used for one patient only, comes in contact with human skin and is surgically implanted or inserted. The applicant also claimed that the BONEBRIDGE meets the device eligibility requirements of § 419.66(b)(4) because it is not equipment, an instrument, apparatus, implement, or item for which depreciation and financing expenses are recovered, and it is not a supply or material furnished incident to a service.

Additionally, the BONEBRIDGE is not subject to the hearing aid exclusion at § 411.15(d)(1). The BONEBRIDGE Bone Conduction Implant (BCI 602) component is an osseointegrated implant, surgically attached to the skull that converts a radiofrequency signal from an external audio processor to controlled vibrations which are conducted via the skull to the cochlea. Therefore, we explained in the CY 2022 OPPS/ASC proposed rule that we believe the BONEBRIDGE meets the criterion at § 411.15(d)(2)(i) and is not subject to the hearing aid exclusion. In accordance with the Medicare Benefit Policy Manual, Chapter 16 ''General Exclusions from Coverage,'' section 100, certain devices that produce perception of sound by replacing the function of the middle ear, cochlea or auditory nerve are payable by Medicare as prosthetic devices. These include osseointegrated implants, that is, devices implanted in the skull that replace the function of the middle ear and provide mechanical energy to the cochlea via a mechanical transducer. We believe the BONEBRIDGE device meets the criteria for this benefit category. We invited public comments on whether the BONEBRIDGE meets the eligibility criteria at § 419.66(b) as well as the criterion at § 411.15(d)(2)(i).

Comment: One commenter agreed with CMS that BONEBRIDGE is not subject to the hearing aid exclusion at § 411.15(d)(1).

Response: We did not receive any comments on whether the BONEBRIDGE meets the eligibility criteria at § 419.66(b)(3) or § 419.66(b)(4). We agree with the applicant that the BONEBRIDGE device meets the criteria of § 419.66(b). We believe discussion concerning § 411.15(d)(2)(i) is beyond the scope of the discussion here.

The criteria for establishing new device categories are specified at § 419.66(c). The first criterion, at § 419.66(c)(1), provides that CMS determines that a device to be included in the category is not appropriately described by any of the existing categories or by any category previously in effect, and was not being paid for as an outpatient service as of December 31, 1996.

The applicant stated that the previous device category, L8690 (Auditory osseointegrated device, includes all internal and external components), which was in effect from January 1, 2007 through December 31, 2008 does not appropriately describe the BONEBRIDGE. The applicant stated that at the time the category was established, BONEBRIDGE did not exist and the devices described by the category included auditory osseointegrated implant (AOI) devices or bone-anchored hearing aids (BAHAs). The applicant claimed that AOI devices and BAHAs are distinct from the BONEBRIDGE because they are implant systems composed of an external sound processor connected via a percutaneous abutment to a titanium implant that is implanted in the skull. In these devices, the titanium implant protrudes through the skin creating a titanium post, which directly attaches to an external sound processor. The system replaces the function of the middle ear by transmitting mechanical energy from the external transducer/sound processor directly to the titanium implant to the cochlea thereby resulting in better hearing. The applicant stated that the titanium abutment used by percutaneous systems permanently pierce the skin to allow the sound processor to transmit sound and create vibrations within the skull that stimulate the nerve fibers of the inner ear. The applicant also stated that in the percutaneous systems, the external component (sound processor) receives and processes the sound and generates the vibrations.

The applicant claimed that the BONEBRIDGE is a new technology compared to the AOI devices and BAHAs and unlike these devices, it does not use a percutaneous abutment. The applicant described BONEBRIDGE as an active, transcutaneous device that consists of a completely implanted transducer and electronics components, and an externally worn audio processor. The active implant is surgically attached to the skull, is subcutaneous, and is connected to the external audio processor by transcutaneous magnetic attraction. The external audio processor picks up sound from the environment and converts those sounds to a radiofrequency (RF) signal that can be transmitted across the skin to the implant. The implant converts the signal to controlled vibrations, which are conducted via the skull and perceived as sound. The applicant proposed the device pass-through category descriptor ''Auditory osseointegrated device, transcutaneous, with implanted transducer and radiofrequency link to external sound processor'' and suggested that L8690 be revised to read, ''Auditory osseointegrated device, percutaneous, includes all internal and external components''. The applicant stated that the Cochlear Osia®2 System, which also submitted a device pass-through application for CY 2022, would also be described by the proposed additional category.

Web stated in the CY 2022 OPPS/ASC proposed rule that we believe that the BONEBRIDGE is described by L8690 —Auditory osseointegrated device, includes all internal and external components. The applicant has noted differences between the BONEBRIDGE and the devices that were described by L8690, specifically percutaneous, auditory osseointegrated devices, regarding the connection between the implanted transducer and the external audio processor (percutaneous abutment vs. transcutaneous magnetic attraction). However, we believe that there is a similar mechanism of action for all these devices specifically, vibratory stimulation of the skull to stimulate the receptors in the cochlea (inner ear). Further, we believe that the broad descriptor for L8690 of ''Auditory osseointegrated device, includes all internal and external components'' includes the applicant's device.

In the CY 2022 OPPS/ASC proposed rule, we invited public comment on whether the BONEBRIDGE meets the device category criterion.

Comment: One commenter stated they do not support CMS' position that the BONEBRIDGE and Osia® 2 system should not be granted a new category, because these devices take much longer to implant surgically than percutaneous bone conduction implants, they are active sound processors, and they work differently than percutaneous devices like the BAHA or Oticon implants.

Another commenter who also disagreed with CMS that the BONEBRIDGE and Osia® 2 system are

adequately described by L8690 stated that the BONEBRIDGE and Osia® 2 system are transcutaneous hearing implants, and that CMS should create a new HCPCS code that describes both the procedure and the implant for these devices. The commenter expressed their disappointment in what they described as CMS' continual resistance to conduct rulemaking specifically on Middle Ear Implants (MEIs) because they believe CMS should hear the opinions of clinical experts, physicians, and Medicare beneficiaries regarding the appropriateness of classifying MEIs as prosthetic implants.

A different commenter supported CMS' conclusion in the proposed rule that BONEBRIDGE and Cochlear Osia® are appropriately described by a pass-through category previously in effect

Two commenters stated that CMS must support the inclusion of middle ear implants in the prosthetic category. The commenters asserted that not including these devices denies beneficiaries access to all FDA-approved hearing prosthetics and discourages in new technology for the hearing impaired.

Response: We appreciate the input provided by these commenters. We have taken this information into consideration in our determination of the eligibility criterion at § 419.66(c)(1), discussed below. We note some of the comments, those addressing hearing prosthetics, are outside of the scope of this rule.

Comment: The applicant stated that BONEBRIDGE is not appropriately described by the previous device category L8690, ''Auditory osseointegrated device, includes all internal and external components''. The applicant asserted that even though the mechanism of action is the same (that is, replacing the function of the middle ear by transmitting mechanical energy from the external transducer/audio processor to the cochlea), there are significant differences between BONEBRIDGE and the devices described by the previous category of L8690, ''Auditory osseointegrated device, includes all internal and external components'' that enable BONEBRIDGE to furnish a substantial clinical improvement over existing technology. According to the applicant, L8690 was established in 2007 at a time when the technology to fully implant a transducer did not exist; the devices for which L8960 was established were percutaneous passive devices.

According to the applicant, FDA created a new device classification for active implantable bone conduction hearing systems in response to BONEBRIDGE's application in 2018 (21 CFR 874.3340) which is specifically for active systems as opposed to passive systems (21 CFR 874.3300). According to the applicant, FDA's description of active implantable bone conduction is that the transducer is implanted and the description of the technical method refers to the transcutaneous nature of the technology. The applicant stated that while they recognize that FDA and CMS classify devices differently for different purposes, they believe that the way FDA classifies bone conduction implants reinforces why CMS should distinguish active implantable bone conduction devices from passive, percutaneous systems for purposes of transitional pass-through payment status.

The applicant asserted that CMS has modified broadly worded device categories to recognize technological advances within a device class and to grant transitional pass-through payment status to the newer technologies. According to the applicant, in the neurostimulator category, the original descriptor of HCPCS code C1767 was ''Generator, neurostimulator (implantable).'' The applicant asserted that CMS modified this descriptor to ''Generator, neurostimulator (implantable), non-rechargeable'' to create a new device category and grant transitional pass-through payment status for rechargeable neurostimulators described by HCPCS codes C1820 (Generator, neurostimulator (implantable), with rechargeable battery and charging system) and C1822 (Generator, neurostimulator (implantable), high frequency, with rechargeable battery and charging system). The applicant added that CMS previously recognized differences in transluminal angioplasty catheters to support transitional pass-through payment status (for example, C2623, C1885, and C1725). The applicant asserted the new pass-through device category code should specifically describe active devices, which are those that have a fully implanted transducer attached transcutaneously to the external audio processor. The applicant suggested: CXXXX (Active auditory osseointegrated device, transcutaneous, requires implanted transducer and radiofrequency link to external sound processor). The applicant further suggested that CMS could refine L8960 to (*Passive* auditory osseointegrated device, *percutaneous or transcutaneous,* includes all internal and external components (new language underlined)). The applicant concluded that effective on January 1, 2022 there will be new and revised CPT codes that differentiate the surgical procedures for osseointegrated implants by the type of attachment (for example, 69X50 (Implantation, osseointegrated implant, skull; with magnetic transcutaneous attachment to external speech processor), 69X51 (Revision/replacement (including removal of existing device), osseointegrated implant, skull; with magnetic transcutaneous attachment to external speech processor)), 69717 (Revision/replacement (including removal of existing device), osseointegrated implant, skull; with percutaneous attachment to external speech processor), and 69X51 (Revision/replacement (including removal of existing device), osseointegrated implant, skull; with magnetic transcutaneous attachment to external speech processor).

Response: After consideration of the public comments we received, we agree there is no existing pass-through payment category that appropriately describes the BONEBRIDGE. The BONEBRIDGE device consists of an external processor that receives sound pressure energy and converts this to a radiofrequency signal which communicates with a surgically implanted subcutaneous transducer/actuator which is osseointegrated into the skull with screws. The transducer/actuator converts this signal to mechanical vibrations that are transmitted to the skull and inner ear. As stated by the applicant, when the existing pass-through category, Auditory osseointegrated device (L8690), was issued in 2007, the technology to implant the transducer/actuator did not exist. Based on this information, we have determined that the BONEBRIDGE meets the eligibility criterion at § 419.66(c)(1). Due to the similarity between the devices, we refer the reader to section IV(A)(2)(b)(4) of this rule for a similar discussion of the Osia®2 system.

The second criterion for establishing a device category, at § 419.66(c)(2), provides that CMS determines either of the following: (i) That a device to be included in the category has demonstrated that it will substantially improve the diagnosis or treatment of an illness or injury or improve the functioning of a malformed body part compared to the benefits of a device or devices in a previously established category or other available treatment; or (ii) for devices for which pass-through status will begin on or after January 1, 2020, as an alternative to the substantial clinical improvement criterion, the device is part of FDA's Breakthrough

Devices Program and has received FDA marketing authorization. With respect to the substantial clinical improvement criterion, the applicant stated that the BONEBRIDGE represents a substantial clinical improvement because it provides a reduced rate of device-related complications and a more rapid beneficial resolution of the disease process treated because of the use of the device compared to currently available treatments. The applicant submitted six studies to support these claims. The applicant also submitted references for four retrospective case studies of complications with percutaneous devices, specifically BAHAs, including infections, pain, soft tissue hypertrophy, loss of osseointegration, and need for further surgery. These studies did not involve the applicant's device.

In support of the claim that the BONEBRIDGE reduced the rate of device-related complications compared to currently available treatments, the applicant submitted a white paper that reviewed the literature reporting on safety outcomes in bone conduction implants authored by the manufacturer of the BONEBRIDGE, MED–EL.[76] The review included five products used to treat conductive hearing loss, mixed hearing loss or single side deafness, which were either percutaneous systems that had an abutment that permanently pierced through the skin or transcutaneous systems without permanent skin penetration. The authors further defined the products as either active or passive, depending on the placement of the vibrating (or active) device component. According to the authors, active bone conduction systems, the active device component, is located within the implantable part of the system. According to the authors, passive bone conduction systems, the vibrating device component, is located outside of the skull.[77]

The literature review compared the safety outcomes of the BAHA Connect and the Ponto, (passive, percutaneous systems,) the BONEBRIDGE, (an active, transcutaneous systems), and the Sophono Alpha and the BAHA Attract, (passive, transcutaneous systems). In total, 156 studies were included in the literature review. There were seven studies with 234 patients reported on the Ponto, thirteen studies with 175 patients reported on the BONEBRIDGE, twelve publications with 143 patients reported on the Sophono Alpha, seven studies reported on the BAHA Attract system with 114 patients, and 117 studies reported on the BAHA Connect system with a total of 6,965 patients. Of all reported adverse events, 38 percent were major and 62 percent were minor. Major adverse events reported in the review included revision surgery, explantation, removal at patient request, implant loss, implant device failure, skin revision surgery or skin infection. Minor adverse events included skin infections, soft tissue reactions, and healing difficulties. The results showed that 9.8 percent of patients using the BONEBRIDGE system experienced an adverse event (major or minor), compared to 68.4 percent of BAHA Attract patients, 46.9 percent of Sophono Alpha patients, 44.0 percent of Ponto system patients and 51.7 percent of BAHA Connect patients. When comparing the percentage of patients who experienced a major adverse event, 2.9 percent of BONEBRIDGE patients had a major adverse event compared to 1.8 percent of BAHA Attract patients, 4.2 percent of Sophono Alpha patients, 5.1 percent of Ponto system patients, and 21.1 percent of BAHA Connect patients.

To support the claim that the BONEBRIDGE reduced the rate of device-related complications compared to currently available treatments, the applicant also submitted a systematic review of the current literature on safety, efficacy and subjective benefit after implantation with the BONEBRIDGE device.[78] The systematic review assessed 39 publications and included randomized controlled trials, clinical controlled trials and cohort studies, case series and case reports investigating subjective and objective outcomes. In the 39 publications included in the review, 487 participants were evaluated; 303 participants had conductive hearing loss, 67 participants had mixed hearing loss, and 53 participants had single-sided deafness. The mean age of the patients in the included studies was 35.6±16.9 years. Using the guidelines available from the Cochrane Collaboration, a search strategy and review protocol was developed using PubMed (MEDLINE) and Cochrane databases to identify all publications on the BONEBRIDGE from 2012 to October 31, 2018. The researchers excluded studies that assessed a device or treatment other than the BONEBRIDGE, did not include human participants, focused on a type of hearing loss other than the losses that BONEBRIDGE is indicated for (that is, conductive hearing loss, mixed hearing loss or single-sided deafness), did not report on safety or performance/quality of life data, were not related to hearing loss or treatment thereof, lacked sufficient information for evaluation, and included overlapping samples.

The outcomes extracted from the studies were assessed via meta-analysis. The safety of the device was assessed by collecting information on complications during surgery and adverse events in the postoperative period. Of the 39 identified studies, there were 25 studies that reported on safety during a mean period of 11.7 months (range 3–36 months). The reported complications were categorized into minor and major complications, with a major complication described as requiring surgical attention leading to revision surgery or explantation. Minor complications included skin edema or erythema, skin infections, and hematomas. Out of 286 ears implanted with the device, there were no complications in 259 ears (90.6 percent). Minor complications occurred in 22 ears (7.7 percent) over a cumulative period of reported mean follow-up of 12.7 years (mean: 11.7 months ± 4.5). Major complications occurred in three studies comprising five ears (1.7 percent).[79]

The applicant submitted an additional study by Schmerber, et al. to support the claim that the BONEBRIDGE reduced the rate of device-related complications compared to currently available treatments.[80] The study of 28 participants was a multicenter, prospective study with intra-subject measurements with the purpose of the study to validate the safety and efficacy of the BONEBRIDGE 12 months after implementation. The study included nine university hospitals, seven in France and two in Belgium. Sixteen participants with conductive or mixed hearing loss with bone-conduction hearing thresholds under the upper limit of 45 dB HL for each frequency from 500 to 4000 Hz, and 12 participants with SSD (contralateral hearing within normal range) were enrolled in the study. Three of the 28 participants (with mixed or conductive hearing loss) did not complete the study; one requested that the device be removed (due to ''severe psychological problems'') and two were lost to follow

[80] Schmerber, S., Deguine, O., Marx, M. *et al.* (2017). Safety and effectiveness of the Bonebridge transcutaneous direct-drive bone-conduction hearing implant at 1-year device use. *Eur Arch Otorhinolaryngol* 274: 1835–1851 doi 10.1007/s00405–016–4228–6.

up. The skin safety of the participants was evaluated by the surgeon who implanted the device up to 12 months post-operatively using an ordinal scale (''very good'', ''good'', ''acceptable'', ''bad skin condition'') and a visual analogue scale (between 1 and 10 from ''very bad'' to ''excellent'') to rate cutaneous tolerance. In the study, no complications or device failures occurred, no revision surgery was necessary and no skin injury was reported. The scoring was judged as 'excellent' or 'good' for all subjects (n = 25), corresponding to scores 8 to 10 on the scale. No complication (0 percent) was observed [95 percent confidence interval = (0 percent–14.9 percent)]. The authors stated that there was a lower rate of complications for the BONEBRIDGE device compared to percutaneous systems, like the BAHA, whose complication rate was up to 24 percent in a large series of 602 ears and a revision surgery rate of 12 percent.[81] [82]

The applicant also submitted a study by Siegel et al. as evidence to support the claim that the BONEBRIDGE reduced the rate of device-related complications compared to currently available treatments.[83] The study was a retrospective review that included 37 adult patients with conductive/mixed hearing loss who met the indications for use and were implanted with BONEBRIDGE over a 5-year period from April 2013 to May 2018. Patient charts were reviewed for surgical outcomes and complications over the 6-year period. The mean time of follow-up was 32 months (range: 9–71 months). There were no events of surgical complications in the patients included in the study, specifically no instances of dural injury, cerebrospinal fluid (CSF) leak, or intracranial bleeding. There were also no skin complications and no postoperative symptoms of tinnitus/vertigo or dizziness.[84]

In support of the assertion that the use of BONEBRIDGE resulted in a more rapid beneficial resolution of the disease process compared to currently available treatments, the applicant also referenced the Magele et al., and Siegel et al. studies as well as a study conducted by Yang et al.[85] [86] [87]

As previously noted, the Magele et al. study assessed 39 publications that included 487 participants; 303 participants had conductive hearing loss, 67 participants had mixed hearing loss, and 53 participants had single-sided deafness.[88] Functional gain was available for analysis from 14 articles and was measured as the difference between unaided and aided (with the BONEBRIDGE) warble tone thresholds. On average, functional gain of 32.7 dB ±16dB was observed. Overall, the results showed a 30.89 dB (95 percent CI 27.53 dB–34.24 dB) improvement at speech presentation level; for the 30 conductive hearing loss patients, the improvement was 39.48 dB (95 percent CI 35.25 dB − 43.71 dB); for the mixed hearing loss group, the improvement was 29.08 dB (95 percent CI 26.32 dB—31.83 dB) and the improvement was 28.94 dB (95 percent CI 16.92 dB—40.96 dB) for the 10 subjects with single-sided deafness.

The applicant also noted the study by Siegel et al. to support the claim that the use of BONEBRIDGE resulted in a more rapid beneficial resolution of the disease process compared to currently available treatments.[89] As previously stated, in this study, 37 adult patients with conductive/mixed hearing loss who met the indications for use were implanted with BONEBRIDGE over a 6-year period. The patients' charts were reviewed for surgical outcomes and complications over the 6-year period. Preoperative air conduction (AC), preoperative bone conduction (BC), and 3-month postoperative aided thresholds were recorded. Speech perception was assessed using two different tests, consonant-nucleus-consonant (CNC) words and AzBio sentences. Pure-tone averages (PTAs; measured at 0.5, 1.0, 2.0 and 3.0 kHz), air-bone gap (ABG), and functional gain (FG) were calculated. The preoperative air-bone gap was calculated as the difference between AC thresholds and BC thresholds of the implanted ear. The postoperative ABG was calculated as the difference between the preoperative BC and postoperative BONEBRIDGE aided thresholds measured at 3 months postoperatively. Functional gain was calculated as the difference between preoperative AC thresholds and BONEBRIDGE aided thresholds measured 3 months postoperatively.

The results of this study showed audiological improvement in the 37 patients with a functional gain (averaged over 4 frequencies, 500 kHz to 3000 kHz) of 40.3 dB (±19.0 dB) for air conduction 3 months postoperatively. The difference between the average air to bone conduction gap fell from 44.9 dB preoperative to 4.6 dB three months after surgery. The postoperative air conduction thresholds for the 21 patients with mixed hearing loss ranged between 30–40 dB and the air conduction thresholds for the 16 patients with conductive hearing loss ranged between 20–30 dB. For patients with mixed hearing loss, nearly a full ABG closure was achieved at all frequencies by 3 months postoperatively.

In the same study, speech perception testing was available for 21 patients (57 percent). At activation, mean speech perception results for CNC words (13 patients) and AzBio sentences (14 patients) were 79 and 93 percent, respectively. At six months postoperatively, CNC words (17 patients) and AzBio sentences (21 patients) were 81 and 93 percent, respectively. The authors stated that the results of the study were comparable with what has been accomplished using traditional percutaneous conduction devices and passive transcutaneous bone conduction devices.

Lastly, to support the claim that the use of the BONEBRIDGE resulted in a more rapid beneficial resolution of the disease process, the applicant submitted a study that compared the use of the BONEBRIDGE with a non-implantable bone conduction hearing aid (BCHA).[90] This single center, prospective study involved 100 patients in Beijing, China with bilateral congenital microtia-atresia (CMA). The patients had a mean age of 11.9 ± 6.0 years old at the time the BONEBRIDGE was implanted. All patients had worn the passive bone anchored hearing aid for at least a year prior to the implantation of the BONEBRIDGE and patients were tested

an average of 25 weeks after surgery. Measured outcomes in the study included sound field thresholds (SFT), functional gain (FG) [aided threshold minus the unaided threshold], word recognition, speech reception thresholds (SRT), preoperative and postoperative bone and air conduction and patient subjective satisfaction. Bone conduction of pure tones at any frequency did not change significantly from preoperative to postoperative testing. The mean bone-conduction pure-tone threshold (PTA) before implantation was 8.7 ± 6.1 dB HL and after surgery was 8.9 ± 5.6 dB HL ($p > .745$, paired t-test). Furthermore, bone conduction did not significantly change at any frequency after surgery ($p > .05$, t-test). The mean SFT of the BONEBRIDGE (61.6 ± 7.1 dB HL) was significantly higher than the BCHA (31.3 ± 6.1 dB HL) (paired t-test, $p < .001$) and the SFT was significantly better with BONEBRIDGE at 500, 1000, 2000, and 4000 Hz sound frequencies (paired t-test, $p < .002$). Further, the FG of the BONEBRIDGE (31.2 ± 9.5 dB HL) was significantly better than the FG of the BCHA (26.5 ± 10.3 dB HL) (paired t-test, $p < .001$). The FG measured at 250 Hz in the two aided conditions had less improvement compared to other frequencies ($p < .001$). A comparison of BCHA and BONEBRIDGE resulted in a significant difference in word recognition (68.0 percent for monosyllabic words and 79.0 percent for disyllabic words with the BCHA vs. 78.0 percent for monosyllabic and 84.0 percent for disyllabic words with the BONEBRIDGE) in favor of the BONEBRIDGE ($p < .001$).

Regarding the applicant's evidence of substantial clinical improvement, we noted in the CY 2022 OPPS/ASC proposed rule that the studies submitted did not involve a direct comparison to other currently available treatments, namely percutaneous or passive, transcutaneous auditory osseointegrated devices. Therefore, we explained that it was difficult to determine whether the BONEBRIDGE provided a substantial clinical improvement over existing devices. We also indicated that the studies submitted included a small number of participants which may affect the generalizability of the data provided in support of the device.

In the white paper by MED–EL, the authors compared the complication rates associated with various studies that differed by design, population characteristics and follow-up time. We explained in the CY 2022 OPPS/ASC proposed rule we are not confident that differences seen or elucidated by the applicant are due to the differences in treatments or instead due to differences in study characteristics. Additionally, although the overall, both major and minor, adverse event ratio was significantly lower for the BONEBRIDGE device (9.8 percent) versus other bone conduction hearing devices in the study, we noted that when comparing the percent of patients who experienced a major adverse event, BONEBRIDGE patients had a major adverse event (2.9 percent) that was more comparable to other devices included in the paper. With regard to the Yang et al. study, given the young age of the patients and the congenital nature of the hearing loss being treated, we stated in the proposed rule that we are concerned that these results may not be generalizable to the Medicare population, which tends to be significantly older in age and potentially less likely to have hearing loss related to congenital causes. We invited public comments on whether BONEBRIDGE meets the substantial clinical improvement criterion.

Comment: The applicant submitted a comment in response to CMS' concerns regarding the lack of direct comparison to existing technology; differences in adverse events; and small number of study participants in the studies submitted to illustrate that BONEBRIDGE meets the substantial clinical improvement criterion. In response to CMS' concern about a direct comparison to existing technology, the applicant stated that direct head-to-head trials are not necessary or appropriate in this situation. According to the applicant, differences in the devices make a blinded randomized controlled trial impossible. The applicant asserted that while a non-blinded randomized trial would be possible, it is unclear what additional data would be gained from that approach because the applicant believed the pass-through application already contained extensive, robust, and definitive data to support that BONEBRIDGE is a substantial clinical improvement over existing technologies. The applicant asserted that enrolling patients in a head-to-head trial in which the primary difference is expected to be adverse events associated with one treatment arm is extremely challenging.

The applicant stated that the studies on BONEBRIDGE that were submitted with the pass-through application are primarily controlled case series and case reports. The applicant asserted that because the submitted studies used measures of device performance and adverse events that are consistent with studies of other devices, they allowed for direct comparison between different devices which demonstrate that BONEBRIDGE represents a substantial improvement over other bone conduction technology by achieving comparable performance in hearing improvement with fewer adverse events.

In regard to CMS' concerns about differences in adverse events, the applicant agreed with CMS that the occurrence of both overall and minor adverse event ratio was significantly lower for BONEBRIDGE than other devices but disagreed with CMS' characterization of the major adverse event rate. The applicant stated that major adverse events are far less common across all devices, including BONEBRIDGE, than minor events.

Next the applicant responded to CMS' concern that the small number of study participants could affect the generalizability of the data provided and that, because of the young age of the patients and the congenital nature of the hearing loss being treated, the study results may not be generalizable to the Medicare population. The applicant stated that BONEBRIDGE is indicated for patient who are 12 years or older, with conductive or mixed hearing loss and still can benefit from sound amplification, and who have profound sensorineural hearing loss in one ear and normal hearing in the opposite ear (*i.e.,* single-sided deafness or ''SSD''). The applicant stated that the study sample sizes (and overall number of patients in those studies) are consistent with the anticipated number of implantations. The applicant stated that while the typical BONEBRIDGE patient is expected to be under age 65, several studies included patients of Medicare age and the experience of those patients was consistent with overall experience. The applicant concluded that the studies are generalizable to the Medicare population and reflective of expected results in the indicated population generally. Lastly, the applicant asserted the otologic community has accepted and adopted active transcutaneous devices as the standard of care for implanted bone conduction devices.

Response: We appreciate the additional information from commenters' about the BONEBRIDGE device but note that none of the commenters provided new empirical evidence that demonstrates that BONEBRIDGE is a substantial clinical improvement over existing treatment options. Based on our review of the study evidence, the only purported differences between BONEBRIDGE and predicate technologies relate to the major and minor adverse events from the respective technologies. Based on the information we have, it appears that

while there is a difference amongst the rates of minor adverse event incidence favoring BONEBRIDGE, patients had a major adverse event occurrence (2.9 percent) that was comparable to other devices included in the provided evidence. While the incidence of minor adverse events (*e.g.,* skin infections, soft tissue reactions, and healing difficulties) may benefit BONEBRIDGE, we believe these are less impactful on patient outcomes as compared to the incidence of major adverse events (*e.g.,* revision surgery, explantation, removal at patient request, implant loss, implant device failure, skin revision surgery or skin infection) which is comparable to previous technologies. We maintain our concerns listed in the proposed rule, that the studies submitted included a small number of participants which may affect the generalizability of the data provided in support of the device, and the applicant's comparison of outcome data across multiple studies as opposed to direct comparisons controlling for confounding variables. Because of these reasons, we do not believe that BONEBRIDGE represents a substantial clinical improvement relative to existing therapies currently available. After consideration of the public comments we received and our review of the device pass-through application, we are not approving BONEBRIDGE for transitional pass-through payment status in CY 2022 because the product does not meet the substantial clinical improvement criterion. Because we have determined that BONEBRIDGE does not meet the substantial clinical improvement criterion, we are not evaluating whether the device meets the cost criterion.

(3) Eluvia™ Drug-Eluting Vascular Stent System

Boston Scientific Corporation submitted an application for device pass-through status for the Eluvia™ Drug-Eluting Vascular Stent System (the Eluvia™ system) for CY 2022. According to the applicant, the Eluvia™ system is a combination product composed of an implantable endoprosthesis, a non-bonded freely dispersed drug layer (a formulation of paclitaxel contained in a polymer matrix), and a stent delivery system indicated for the treatment of symptomatic de novo or restenotic lesions in the native superficial femoral artery (SFA) and/or proximal popliteal artery (PPA).

According to the applicant, the Eluvia™ system stent is a laser-cut self-expanding stent composed of nickel titanium alloy with radiopaque markers made of tantalum on the proximal and distal ends. The applicant states that the 6-French delivery system is a triaxial design with an outer shaft to stabilize the stent delivery system, a middle shaft to protect and constrain the stent, and an inner shaft to provide a guidewire lumen. The delivery system is compatible with 0.035 inch (0.89mm) guidewires and is offered in two working lengths (75 and 130 cm).

According to the applicant, peripheral artery disease (PAD) occurs when fatty or calcified material (plaque) builds up in the walls of the arteries and makes them narrower, thus restricting blood flow. The applicant asserts that when this occurs, the muscles in the legs cannot get enough blood and oxygen, especially during exertion such as exercise or walking. According to the applicant, the main symptoms of PAD are pain, burning sensation, or general discomfort in the muscles of the feet, calves, or thighs. As the disease progresses, plaque accumulation may significantly reduce blood flow through the arteries, resulting in claudication and increasing disability, with severe cases often leading to amputation of the affected limb. The applicant states that according to the Centers for Disease Control and Prevention approximately 8.5 million people age 40 and older in the United States have PAD, including 6–26 percent of individuals older than age 60.[91] According to the applicant, PAD disproportionately affects African American and American Indian populations [92] and nonrevascularized lower extremity PAD is among the most common causes of lower extremity amputation.

According to the applicant, the Eluvia™ system is designed to restore blood flow in the peripheral arteries above the knee, specifically the superficial femoral artery and proximal popliteal artery. The applicant states that the stent features a unique drug-polymer combination intended to facilitate sustained elution of the drug paclitaxel that can prevent narrowing (restenosis) of the vessel. The applicant adds that restenosis is often the cause of pain and disability for patients diagnosed with PAD.

The applicant asserts that no other endovascular technologies that are approved for the treatment of PAD provide sustained elution of a drug over at least 12 months to prevent restenosis. According to the applicant, two of the most common endovascular treatments for PAD are angioplasty and stenting. The applicant states that following an intervention within the SFA or PPA, these arteries elicit a healing response that leads to restenosis starting with inflammation, followed by smooth muscle cell proliferation and matrix formation.[93] According to the applicant, because of the unique mechanical forces in the SFA and PPA, the restenotic process can continue well beyond 12 months from the initial intervention. The applicant asserts the Eluvia™ system is designed to elute anti-restenotic drug paclitaxel beyond 12 months, which is longer than the two-month duration of drug applied from drug-coated balloons and the drug-coated stent Zilver PTX.

With respect to the newness criterion at § 419.66(b)(1), the Eluvia™ system received FDA PMA on September 18, 2018. The application for a new device category for transitional pass-through payment status for the Eluvia™ system was received on February 26, 2021, which is within 3 years of the date of the initial FDA approval or clearance. In the CY 2022 OPPS/ASC proposed rule we invited public comments on whether the Eluvia™ system meets the newness criterion.

Comment: The applicant stated that the Eluvia™ system application was submitted within three years of regulatory approval and therefore meets the newness criterion for transitional device pass-through eligibility.

Response: We appreciate the commenter's input. and agree that the Eluvia™ system meets the newness criterion because we received its device pass-through application on February 26, 2021, which is within 3 years of the September 18, 2018, the date of FDA PMA.

With respect to the eligibility criterion at § 419.66(b)(3), according to the applicant, the Eluvia™ system is integral to the service provided, is used for one patient only, comes in contact with human tissue, and is surgically impacted or inserted. The applicant also claimed that the Eluvia™ system meets the device eligibility requirements of § 419.66(b)(4) because it is not equipment, an instrument, apparatus, implement, or items for which depreciation and financing expenses are recovered, and it is not a supply or material furnished incident to a service. In the CY 2020 OPPS/ASC final rule with comment period, we stated that we determined that the Eluvia™ system

device meets the eligibility criteria at § 419.66(b)(3) and (4) in response to a pass-through application that the applicant submitted on November 15, 2018 (84 FR 61286). Because the applicant submitted a new application for device pass-through status for the Eluvia™ system, we again invited public comments on whether the Eluvia™ system continues to meet the eligibility criteria at § 419.66(b(3) and (4).

Comment: The applicant stated that the Eluvia™ system continues to meet the transitional pass-through eligibility criteria at § 419.66(b)(3) and (4) as CMS initially concluded in the CY 2020 OPPS/ASC final rule with comment period.

Response: We agree with the applicant and continue to believe that the Eluvia™ system meets the eligibility criteria at § 419.66(b)(3) and (4).

The criteria for establishing new device categories are specified at § 419.66(c). The first criterion, at § 419.66(c)(1), provides that CMS determines that a device to be included in the category is not appropriately described by any of the existing categories or by any category previously in effect, and was not being paid for as an outpatient service as of December 31, 1996. We stated that we have not identified an existing pass-through payment category that describes the Eluvia™ system. The applicant proposed a category descriptor for the Eluvia™ system of ''Stent, non-coronary, polymer matrix, minimum 12-month sustained drug release, with delivery system.'' Previously, we invited public comment and subsequently determined that the Eluvia™ system device meets the device category eligibility criterion. For a complete discussion of comments received, please see the CY 2020 OPPS/ASC final rule with comment period (84 FR 61286 through 61287). We invited public comments on whether the Eluvia™ system continues to meet this criterion.

Comment: One commenter, a manufacturer of a competing product stated that CMS has reviewed drug-eluting vascular stents in the past and determined they fell into an already existing pass-through payment category. The commenter stated that in August of 2002, CMS concluded that coronary drug-eluting stents were described by existing pass-through device categories C1874 (Stent, coated/covered, with delivery system) and C1875 (Stent, coated/covered, without delivery system).[94] The commenter stated that at the time drug eluting stents were coated with paclitaxel and the same polymer currently used on the Eluvia™ system. The commenter stated that in 2012, Zilver PTX DES was denied pass-through payment status and quotes a letter received from CMS which stated, ''. . . the outpatient clinical review team believes that the Zilver PTX Stent is appropriately described by previously active device pass-through category C1874, Stent, coated/covered, with delivery system. This category describes drug-eluting stents.'' [95] According to the commenter, FDA has grouped the Eluvia™ system and Zilver PTX DES into the same product code:

> ''NIU: Stent, Superficial Femoral Artery, Drug-Eluting—a metal scaffold with a drug coating placed via a delivery catheter into the SFA to maintain the lumen. The drug coating is intended to inhibit restenosis. Class III; Cardiovascular Review Panel.''

The commenter asserted that both devices are self-expanding nitinol stents coated with the drug paclitaxel.[96] [97] The commenter further asserted that the Eluvia™ system's underlying stent platform and delivery system is the same as Boston Scientific's Innova self-expanding stent (an uncoated stent for treating the superficial femoral artery); [98] the drug paclitaxel is the same drug used on the Zilver PTX DES and earlier generation coronary drug-eluting stents; and the polymers used in the Eluvia™ system coating are the same polymers as those used in the Xience V and Promus Element coronary stents.[99] The commenter stated that this history precludes the establishment of a new device category for the Eluvia™ system.

Response: We appreciate the information provided by the commenter and have taken this into consideration in making our determination of § 419.66(c)(1), discussed below.

Comment: The applicant stated that in the CY 2020 OPPS/ASC proposed rule CMS stated that no existing device category describes the Eluvia™ system and that since that time no new categories that would describe the system have been established.

Response: We appreciate the information submitted by the commenters. Given the additional information provided by commenters CMS is concerned that the applicant's proposed long descriptor of 'Stent, non-coronary, polymer matrix, minimum 12-month sustained drug release, with delivery system'' may not suitably differentiate the Eluvia™ system from Zilver PTX. Specifically, given that CMS has previously determined that coronary drug-eluting stents were described by existing pass-through device categories C1874 (Stent, coated/covered, with delivery system) and C1875 (Stent, coated/covered, without delivery system), that FDA has classified the Eluvia™ system and Zilver PTX into the same product code, and finally that CMS previously denied pass-through status to Zilver PTX, stating that it is appropriately described by previously active device pass-through category C1874 (Stent, coated/covered, with delivery system), we believe the same pass-through category code C1874 appropriately describes the Eluvia™ system. We note that HCPCS code C1874 is agnostic to the length of time a drug is released and therefore encapsulates the Eluvia™ system's proposed long descriptor. Further, we do not believe it is appropriate for a discussion of substantial clinical improvement, *i.e.,* the length of time a drug release is maintained, to be the primary motivating determinant in a determination of whether a device meets the device category criterion in § 419.66(c)(1).

After consideration of the public comments we received, we conclude there is an existing pass-through payment category or pass-through category previously in effect that appropriately describes the Eluvia™ system. Based on this information, we have determined that the Eluvia™ system does not meets the eligibility criterion at § 419.66(c)(1).

The second criterion for establishing a device category, at § 419.66(c)(2), provides that CMS determines that a device to be included in the category has demonstrated that it will substantially improve the diagnosis or treatment of an illness or injury or improve the functioning of a malformed body part compared to the benefits of a device or devices in a previously established category or other available treatment. With respect to this criterion, the applicant claims the Eluvia™ system provides a substantial clinical improvement over existing technologies for the following reasons: (1) The Eluvia™ system achieves superior primary patency; (2) the Eluvia™

system achieves reduced lesion revascularization, leading to a reduced rate of subsequent therapeutic interventions at one year and a statistically significant reduction of target lesion revascularization (TLR) at 2 years; (3) the Eluvia™ system decreases the number of future hospitalizations or physician visits; (4) the Eluvia™ system reduces hospital readmission rates; (5) the Eluvia™ system reduces the rate of device-related complications; and (6) the Eluvia™ system achieves similar functional outcomes and quality of life index values while associated with half the rate of TLRs.

Many of the assertions made by the applicant are derived from the IMPERIAL trial which is reported in three citations supplied by the applicant.[100] [101] [102] We discuss results from the MAJESTIC study and then these publications from the IMPERIAL study to provide context for the assertions made by the applicant.

The first article, by Müller-Hülsbeck et al., discusses the three-year results of the MAJESTIC study, the first-in-human prospective, single-arm, multicenter, clinical trial involving 57 patients with symptomatic lower limb ischemia and lesions in the superficial femoral artery or proximal popliteal artery.[103] Patients who were treated with the Eluvia™ system were followed for a 3-year time period during which they took acetylsalicylic acid as an antiplatelet therapy. At 24 months, patients received a duplex ultrasound, ankle-brachial index, and Rutherford classification at a clinical visit. At 36 months patients completed a telephone or clinical visit which included adverse event and antiplatelet medication assessments. The authors report that long-term results from the MAJESTIC study of the Eluvia™ system continue to demonstrate good technical and clinical outcomes (assessed through 2 years) and a low reintervention rate (through 3 years).

The second article, by Gray et al., discusses the IMPERIAL trial, a prospective randomized (2:1) (the Eluvia™ system vs. Zilver PTX), single-blind, non-inferiority study in 465 patients with symptomatic lower-limb ischemia manifesting as claudication with atherosclerotic lesions in the native superficial femoral artery or proximal popliteal artery across 65 centers and multiple countries.[104] Of the 465 patients enrolled, 309 were assigned to the Eluvia™ system and 156 were assigned to Zilver PTX. The authors state the overall sample size in the randomized trial was selected to preserve adequate statistical power for non-inferiority testing of the primary efficacy and safety endpoints at a prespecified, one-sided significance level of 5 percent for each, without adjustment for multiplicity.

The authors state baseline demographic, clinical, and angiographic characteristics were similar between the two study groups, indicative of successful randomization. The primary efficacy endpoint of the trial was primary vessel patency at 12 months which was a binary endpoint based on a duplex ultrasound peak systolic velocity ratio of 2.4 or lower in the absence of clinically driven target lesion revascularization or bypass of the target lesion. Secondary endpoints at 12 months were technical success, procedural success, adverse events, stent integrity, major adverse events, and clinical outcomes. The authors note that the funder of the study was involved in study design, data collection, data analysis, data interpretation, and writing of the report. To identify statistically meaningful results for the non-inferiority test, the authors used a test such as the Farrington-Manning method, to estimate the lower bound for the 95 percent CI of the difference between treatment groups.[105] According to the authors, if this lower bound was greater than the non-inferiority margin of –10 percent, the Eluvia™ system would be considered non-inferior to Zilver PTX in terms of device efficacy. For all other statistical comparisons, the authors used a p value of less than 0.05 as indicative of a significant difference.

According to the authors, the primary non-inferiority analyses were done when 409 patients (276 in the Eluvia group and 133 in the Zilver PTX group) had completed 12 months of follow-up or had a primary efficacy or safety endpoint event.[106] Primary patency was observed for 231 (87 percent) of 266 patients in the Eluvia™ system group and for 106 (82 percent) of 130 patients in the Zilver PTX stent group (difference 5.3 percent [one-sided lower bound of 95 percent CI –0.66]; $p < 0.0001$). 259 (95 percent) of 273 patients in the Eluvia group and 121 (91 percent) of 133 patients in the Zilver PTX group had not had a major adverse event at 12 months (difference 3.9 percent [one-sided lower bound of 95 percent CI –0.46]; $p < .0.0001$). According to the authors, superiority of the Eluvia™ system over Zilver PTX (primary patency in 86.8 percent vs. 77.5 percent, respectively, $p = 0.0144$) was met in the post-hoc analysis of 12 month primary patency data in the full-analysis cohort. The authors summarize by stating the proportions of patients with stent thrombosis or clinically driven target lesion revascularisation in the Eluvia stent group were about half those in the Zilver PTX group while both groups showed improvements in clinical symptoms and walking function and the occurrence of stent fracture was low.[107]

The third article, by Golzar et al, discusses the one-year follow up of the single-arm long lesion substudy portion of the IMPERIAL trial.[108] Fifty patients were enrolled in the study where 20 patients had diabetes, 16 were current smokers, 35 had moderately or severely calcified lesions, and 16 lesions were total occlusions. To be eligible, patients needed a lesion ranging from 140 mm to 190 mm which required two overlapping Eluvia stents. At 12 months, no deaths, stent thrombosis, or target limb amputation had occurred. The primary patency rate was 87.0

[107] Gray WA et al. A polymer-coated, paclitaxel-eluting stent (Eluvia) versus a polymer-free, paclitaxel-coated stent (Zilver PTX) for endovascular femoropopliteal intervention (IMPERIAL): A randomised, non-inferiority trial. Lancet. 2018;392:1541–51.

[108] Golzar J et al. Effectiveness and Safety of a Paclitaxel-Eluting Stent for Superficial Femoral Artery Lesions up to 190 mm: One-Year Outcomes of the Single-Arm IMPERIAL Long Lesion Substudy of the Eluvia Drug-Eluting Stent. Journal of Endovascular Therapy. 2020;27(2):296–303.

percent at 12 months which exceeded the 60 percent performance goal. Forty-three patients (91 percent) had Rutherford category improvement without the need for TLR. The authors concluded that one year patency with the Eluvia™ system was independent of lesion length.

The fourth article, by Müller-Hülsbeck et al., discusses the two-year follow up to the IMPERIAL trial.[109] The authors found that through 24 months, the patency rates and Rutherford category improvements were largely sustained, with a significantly lower clinically driven TLR rate for Eluvia versus Zilver PTX at 2 years. At 2 years the TLR rate for patients treated with Eluvia was 12.7 percent as compared to patients treated with Zilver PTX at 20.1 percent (P = 0.0495). As with the previous citation, both study arms show sustained clinical improvement (that is improvement in Rutherford classification by one or more categories as compared with baseline and without TLR) of 84.4 percent for patients treated with Eluvia and 78.2 percent for patients treated with Zilver PTX (p = 0.140). For all-cause mortality, Eluvia (7.1 percent) and Zilver PTX (8.3 percent) did not statistically differ (p = 0.6649). The authors conclude that the IMPERIAL trial provides support for the benefit of drug-eluting treatment in this population.

According to the applicant, the Eluvia™ system achieves superior primary patency compared to Zilver PTX. The applicant states that, based on the IMPERIAL trial, the Eluvia™ system demonstrated superior primary patency over Zilver PTX, 86.8 percent vs. 77.5 percent, respectively (p=0.0144), based on pre-specific post-hoc analysis. The applicant further states that at 12 months, the Eluvia™ system had greater primary patency than Zilver PTX at 88.5 percent vs. 79.5 percent, respectively (p=0.0119). According to the applicant, these results are consistent with the 96.4 percent primary patency rate at 12 months in the MAJESTIC study, the single-arm first-in-human study of the Eluvia™ system.[110] Furthermore, in regard to this point, the applicant asserts among patients 65 and older, the primary patency rate in the Eluvia™ system was 92.6 percent compared to 75.0 percent in Zilver PTX (p=0.0386). Lastly, the application states that among 50 patients with an average lesion length of 162.8 mm (long lesions), each treated with two Eluvia stents, there was a 12 month primary patency of 87 percent and a TLR of 6.5 percent.[111]

According to the applicant, the Eluvia™ system reduced subsequent therapeutic interventions at one year and reduced target lesion revascularization at two years. Based on the IMPERIAL trial, the applicant asserts the Eluvia™ system achieved a substantial reduction in re-intervention with a target lesion revascularization (TLR) of 4.5 percent compared to 9.0 percent (p=0.0672) in the Zilver PTX group.[112] The applicant states that at two years the Eluvia™ system had a statistically significantly lower rate of TLRs than Zilver PTX of 12.7 percent vs. 20.1 percent, respectively (p=0.0495).[113] The applicant notes that the published analysis presented in this application has a slightly different clinically-driven TLR rate at 2 years than internal analysis provided in the Eluvia CY 2020 device pass-through application (12.7 percent and 20.1 percent (p=0.0495) vs. 12.9 percent and 20.5 percent (p=0.0472), respectively). We note that the applicant provides a table which compares TLR rates between the Eluvia™ system and Zilver PTX by all patients 65 and older, U.S. patients 65 and older, and patients with diabetes.

The applicant asserts that patients treated with the Eluvia™ system required fewer days of hospital care than in the Zilver PTX group. According to the applicant, patients treated with the Eluvia™ system had fewer days in the hospital as compared to Zilver PTX for all adverse events (13.9 vs. 17.7 respectively), TLR (2.8 vs. 7.1 respectively), and procedure and device-related adverse events (2.7 vs. 4.5 respectively). We note that statistical significance was not assessed.

The applicant asserts that patients treated with the Eluvia™ system had reduced hospital readmission rates compared to those treated with Zilver PTX at 12 months at 3.9 percent and 7.1 percent respectively (p=0.1369).[114]

The applicant asserts that while rates of adverse events were similar in total between treatment arms in the IMPERIAL trial, device-related adverse-events were reported in 8 percent of patients treated with the Eluvia™ system as compared to 14 percent of patients treated with Zilver PTX.[115]

Lastly, the applicant asserts that the Eluvia™ system is able to achieve similar functional outcomes to Zilver PTX while associated with half the rate of TLRs. The applicant states while functional outcomes appear similar between the Eluvia Stent System and Zilver PTX groups at 12 months, these improvements for the Zilver PTX group are associated with twice as many TLRs to achieve similar EQ–5D index values.[116] The applicant provides multiple tables which show similar improvements in walking, distance, speed, stair climbing, and health-related quality of life (EQ–5D) between the Eluvia™ system and Zilver PTX.

For a complete discussion of the applicant's previous submission regarding substantial clinical improvement please see the CY 2020 OPPS/ASC final rule with comment period (84 FR 61287 through 61292). We note that we did not approve the Eluvia™ system for CY 2020 transitional device pass-through payment due to the potential increased long-term mortality signal that FDA was evaluating at the time. We further note that in the FY 2021 IPPS/LTCH PPS final rule (85 FR 58657), we discussed the FDA August 7, 2019 update, which concluded that the benefits of paclitaxel-coated devices (for example, reduced reinterventions) should be considered in individual patients along with potential risks (for example, late mortality) as well as for individual patients judged to be at particularly high

risk for restenosis and repeat femoropopliteal interventions, clinicians may determine that the benefits of using a paclitaxel-coated device outweigh the risk of late mortality. The applicant asserted that the Eluvia™ system has demonstrated substantial clinical improvement over Zilver PTX in the IMPERIAL trial to include no increase in all-cause mortality. In response to this new information, we no longer have concerns regarding the increased long-term mortality signal we described in the CY 2020 OPPS/ASC final rule with comment period.

In the CY 2020 OPPS/ASC final rule with comment period (84 FR 61289) we noted that the IMPERIAL study, which showed significant differences in primary patency at 12 months, was designed for noninferiority and not superiority. Therefore, we were concerned that results showing primary patency at 12 months may not be valid given the study design. In response, the applicant stated that a non-inferiority study is consistent with accepted research methodology and is typical of many head-to-head trials of medical devices. For the complete discussion of this issue, please see the CY 2020 OPPS/ASC final rule with comment period (84 FR 61290).

In the CY 2022 OPPS/ASC proposed rule, we invited public comments on whether the Eluvia™ Drug-Eluting Vascular Stent System meets the substantial clinical improvement criterion.

Comment: One commenter, a manufacturer of a competitor device, asserted that Eluvia™ does not meet the substantial clinical improvement criterion. The commenter asserted that the MAJESTIC study is inadequate to demonstrate substantial clinical improvement as use of a single arm study to support this criterion is problematic due to the small (n=57) and highly selective patient population (*e.g.,* lesion length limited to a maximum of 11 cm).[117] Further, the commenter stated that despite a very high primary patency rate of 96.4 percent at 12 months the rate drops substantially to 77.9 percent at just 25 months,[118] which suggests the potential of late catch-up phenomenon as previously observed with other polymer-coated peripheral DES.[119] [120] The commenter added that the target lesion revascularization (TLR) rate appears to double each year (*i.e.,* quadruple from year 1 to year 3), increasing from 3.6 percent at 1 year to 7.2 percent at 2 years to 14.7 percent at 3 years.[121]

The commenter next asserted that errors in the data analysis have been reported in scientific meetings[122] and require a correction of the 1-year publication and results;[123] the commenter also asserted that other publications also require a correction.[124] The commenter stated that patency results are inconsistently presented and also contended that the primary endpoint of the 12-month patency study (n=409) indicate primary patency of 86.8 percent (231/266) for Eluvia vs. 81.5 percent (106/130) for Zilver PTX with the subsequent post-hoc analysis showing a larger difference of 86.8 percent (243/280) for Eluvia™ vs. 77.5 percent (110/142) for Zilver PTX. The commenter asserted that the post-hoc analysis represents an additional 14 Eluvia™ and 12 Zilver PTX patients; the commenter notes that the results for the final 12 Zilver PTX patients added to the post-hoc analysis appear to be outliers who had significantly worse outcomes than the primary patient cohort (patency 77.5 percent [110/142] in primary cohort vs. 33.3 percent [4/12] in post-hoc cohort, p=0.002) and raises doubt about the poolability of the data between these two cohorts.

The commenter also asserted that in the most recently presented 2-year results (with data correction),[125] there is no significant difference in patency between Eluvia and Zilver PTX at 2 years (83.0 percent vs. 77.1 percent, p=0.10, not significant). The commenter contended that based on these results a claim of superior primary patency cannot be maintained. The commenter was concerned by the claim of ''highest reported'' two-year primary patency, stating: (1) The modified definition of primary patency is inconsistent across multiple studies, (example, the Zilver PTX randomized trial and the IMPERIAL trial) which limits appropriate comparability; (2) the second Zilver PTX randomized trial, which had a higher 2-year primary patency rate of 83.4 percent compared with 83.0 percent for the Eluvia™ system, was excluded from the comparison; [126] and (3) the claim of superiority requires head-to-head comparative studies or at a minimum an attempt to account for differences between compared studies.

The commenter next asserted that the long-term safety of the Eluvia™ system has not been demonstrated due to: (1) A lack of long-term safety data; (2) multiple reports noting the presence of aneurysmal degeneration, peri-stent inflammation, or negative late lumen loss associated with the Eluvia™ system,; (3) the total dose and not just the density must be considered; (4) paclitaxel is released directly to the target lesion by the Zilver PTX DES and not by the Eluvia™ system; (5) avoiding use of a polymer, if possible, is a preferred stent design; and (6) long-term paclitaxel release may not be necessary or desired.

Another commenter stated that the Eluvia™ system meets the substantial clinical improvement criterion because CMS already concluded the same in the FY 2022 IPPS/LTCH final rule for new technology add-on payment.

Response: We appreciate the information provided by the commenters and have taken this into consideration when making our determination of the substantial clinical improvement criterion, discussed below.

Comment: The applicant submitted a comment in support of the substantial clinical improvement criterion. The applicant stated that in the CY 2022 OPPS/ASC proposed rule CMS referenced the FY 2021 IPPS/LTCH final

[126] Dake MD, et al. Durable Clinical Effectiveness With Paclitaxel-Eluting Stents in the Femoropopliteal Artery 5-Year Results of the Zilver PTX Randomized Trial. Circulation. 2016;133(15):1472–1483.

rule (85 FR 58657) and stated that CMS no longer has concerns about the long-term mortality signal. The applicant further stated that in the FY 2021 IPPS/LTCH final rule, CMS determined that the Eluvia™ system represents a substantial clinical improvement over existing technologies. The applicant added that despite the assessment in the FY 2021 IPPS/LTCH final rule, in the CY 2022 OPPS/ASC proposed rule, CMS asked for input regarding whether the Eluvia™ system meets the substantial clinical improvement criterion, even raising concerns that CMS agreed were not an issue in the discussion of its NTAP decision. The applicant asserted that the regulations governing the substantial clinical improvement criterion for NTAP and for transitional device pass-through status are nearly identical. The applicant asserted that in its discussion of substantial clinical improvement for the Eluvia™ system under the IPPS NTAP application, CMS found that the Eluvia™ system met the criterion based on the following endpoints: Superior primary patency; reduced rate of subsequent therapeutic interventions; decreased future hospitalizations and physician visits; reduced hospital readmission rates; reduced rate of device-related complications; and similar functional outcomes and EQ–5D index values with half the rate of target lesion revascularizations (TLRs). The applicant added that these endpoints are clinically meaningful for all patients with PAD and not just for those in the inpatient setting. The applicant asserted that there is no evidence-based rationale that would lead CMS to a reach a different conclusion regarding substantial clinical improvement for the Eluvia™ system for transitional device pass-through status versus NTAP. The applicant added that there is no difference in the indicated patient population for the Eluvia™ system based on site of service, which is determined by physicians based on the totality of a patient's condition.

Response: We appreciate the additional information provided by the commenters. We note in the FY 2021 IPPS/LTCH final rule (85 FR 58657) CMS determined that the Eluvia™ system met the substantial clinical improvement criterion after consideration of the comments received and for the reasons discussed, including the improved outcomes shown in the IMPERIAL and MAJESTIC trials as well as the updated August 7, 2019 FDA guidance in regard to paclitaxel-coated devices. As we stated in the FY 2021 IPPS/LTCH final rule, the applicant provided the following two-year results from the IMPERIAL global randomized controlled clinical trial, comparing the Eluvia™ system to Zilver® PTX®:

- The Eluvia™ system maintains higher primary patency than Zilver® PTX® at 2 years, 83.0 percent compared to 77.1 percent. The applicant contended that guidelines recognize the importance of primary patency in assessing the efficacy of peripheral endovascular therapies.[127]
- The Eluvia™ system's 2-year primary patency is the highest reported in a superficial femoral artery US pivotal trial for a drug-eluting stent or drug coated balloon.[128] Per the applicant, the 2-year primary patency results are consistent with the 2-year TLR results released earlier in 2019.[129] According to the applicant, the Eluvia™ system sustained a statistically significant reduction in TLR at 2 years compared to Zilver PTX, 12.9 percent vs. 20.5 percent (p = 0.0472).[130]
- In a subgroup analysis of patients 65 years and older (Medicare population), the primary patency rate in the Eluvia™ system stent group is 92.6 percent, compared to 75.0 percent for the Zilver® PTX® stent group (p=0.0386).

One commenter identified potential issues with the data used to evaluate the Eluvia™ system for substantial clinical improvement. In spite of the information presented by the commenter, we concur with the assessment discussed in the FY 2021 IPPS/LTCH final rule and the applicant's additional clarification concerning the specific endpoints for which they believe the Eluvia™ system meets the substantial clinical improvement criterion. We note one commenter takes issue with two of the above points that CMS relied upon in the FY 2021 IPPS/LTCH final rule in its determination of substantial clinical improvement, (*e.g.* the higher primary patency, the 2-year primary patency being the ''highest reported'', and the target lesion revascularization rate). However, based upon the data and comments received we note that the Eluvia™ system group maintained a higher primary patency rate than the Zilver® PTX® stent group (92.6 percent vs. 75.0 percent, $p < 0.05$) in the subgroup analysis of patients 65 years and older. Given this information and the information provided by the applicant and commenters in their comments, we agree that the Eluvia™ system meets the substantial clinical improvement criterion at § 419.66(c)(2).

The third criterion for establishing a device category, at § 419.66(c)(3), requires us to determine that the cost of the device is not insignificant, as described in § 419.66(d). Section 419.66(d) includes three cost significance criteria that must each be met. The applicant provided the following information in support of the cost significance requirements. The applicant stated that Eluvia™ system would be reported with the HCPCS codes in the following Table 36:

TABLE 36: HCPCS CODES REPORTED WITH THE ELUVIA ™ SYSTEM

HCPCS Code	Short Descriptor	SI	APC
37226	Fem/popl revasc w/ stent	J1	5193
37227	Fem/popl revasc stnt & ather	J1	5194

[128] Highest 2-year primary patency based on 24-month Kaplan-Meier estimates reported for IMPERIAL, IN.PACT SFA, ILLUMENATE, LEVANT II and Primary Randomization for Zilver PTX RCT.

[129] BSC Data on File. As-treated ELUVIA and PTxControl data from IMPERIAL RCT.FDA PTA reference based on FDA Executive Summary (median of PTA arms).Abbreviations: DES, drug eluting stent; TLR, target lesion revascularization; PTx, paclitaxel.

[130] Boston Scientific Presentation to the Circulatory System Devices Panel of the Medical Devices Advisory Committee Meeting, June 19, 2019.

To meet the cost criterion for device pass-through payment status, a device must pass all three tests of the cost criterion for at least one APC. For our calculations, we used APC 5193—Level 3 Endovascular Procedures, which had a CY 2021 payment rate of $10,042.94 at the time the application was received. Beginning in CY 2017, we calculate the device offset amount at the HCPCS/CPT code level instead of the APC level (81 FR 79657). HCPCS code 37226 had a device offset amount of $4,843.71 at the time the application was received.

Section 419.66(d)(1), the first cost significance requirement, provides that the estimated average reasonable cost of devices in the category must exceed 25 percent of the applicable APC payment amount for the service related to the category of devices. The estimated average reasonable cost of the Eluvia™ system is 56 percent of the applicable APC payment amount for the service related to the category of devices of $10,042.94 ((5,645/10,042.94) × 100 = 56.2 percent). Therefore, we stated in the CY 2022 OPPS/ASC proposed rule that we believe the Eluvia™ system meets the first cost significance requirement.

The second cost significance requirement, at § 419.66(d)(2), provides that the estimated average reasonable cost of the devices in the category must exceed the cost of the device-related portion of the APC payment amount for the related service by at least 25 percent, which means that the device cost needs to be at least 125 percent of the offset amount (the device-related portion of the APC found on the offset list). The estimated average reasonable cost for the Eluvia™ system is 117 percent of the cost of the device-related portion of the APC payment amount for the related service of $4,843.71 ((5,645/4,843.71) × 100 = 116.5 percent). Therefore, we stated in the CY 2022 OPPS/ASC proposed rule that we do not believe that the Eluvia™ system meets the second cost significance requirement.

The third cost significance requirement, at § 419.66(d)(3), provides that the difference between the estimated average reasonable cost of the devices in the category and the portion of the APC payment amount for the device must exceed 10 percent of the APC payment amount for the related service. The difference between the estimated average reasonable cost for the Eluvia™ system and the portion of the APC payment amount for the device of $4,843.71 is 8 percent of the APC payment amount for the related service of $10,042.94 (((5,645 − 4,843.71)/10,042.94) × 100 = 7.98 percent). Therefore, we stated in the CY 2022 OPPS/ASC proposed rule that we do not believe that the Eluvia™ system meets the third cost significance requirement.

We invited public comments on whether the Eluvia™ system meets the device pass-through payment criteria discussed in this section, including the cost criterion for device pass-through payment status.

Comment: A manufacturer of a competitor device and a second commenter agreed that based on calculations included in the CY 2022 OPPS/ASC proposed rule for the second and third cost significance tests, the Eluvia™ system does not meet the cost significance requirements for device pass-through payment.

A third commenter stated that in response to the CY 2021 OPPS/ASC proposed rule they noted that a device that meets the newness and substantial clinical improvement criteria for transitional pass-through payment may only replace some of the devices included in the device-related portion (DRP).

Multiple commenters asserted that the Eluvia™ system meets the cost criteria for transitional device pass-through status. The commenters stated that the current methodology of the cost significance criterion uses a single number, which includes all devices utilized in a particular procedure. The commenters explained that since the DRP contains all devices for respective claims, the DRP is artificially high as a benchmark for the Eluvia™ system since it only replaces one stent in the procedure. The commenters concluded that as a result of this issue, the Eluvia™ system does not meet the cost criteria because the average sales price of the device is not sufficient to account for all the other devices included in the DRP, and not just the stent it is replacing.

Response: We appreciate the information provided by the commenters and have taken this into consideration in making our final determination of the cost significance criterion discussed below.

Comment: The applicant agreed that the Eluvia™ system meets the first cost test. Regarding the second and third cost significance tests, the applicant stated that CMS overestimated the DRP used in the cost significance tests. According to the applicant, when calculating the OPPS payment for a procedure that uses a pass-through device, CMS has an established policy of only subtracting (as the DRP) the cost of those devices that are replaced by the transitional pass-through device. The applicant asserted that the payment policy methodology for calculating the DRP should also be applied to the calculating cost significance for the cost criteria.

The applicant asserted of the cost significance tests that the first question addresses the cost of the transitional pass-through device relative to total payment, whereas the second two questions address cases where the transitional pass-through device would replace device costs currently reflected in the associated procedure payment amount. The applicant offered three scenarios concerning candidate devices and the DRP: (1) A candidate device may replace all or nearly all of the devices that are accounted for in the DRP of the related procedures (*e.g.,* neurostimulators); (2) a candidate device may replace only some of the devices included in the DRP (*e.g.,* the Eluvia™ system); and (3) a candidate device may not replace any of the devices included in the DRP (*e.g.,* a single-use endoscope). According to the applicant, CMS' calculation of the DRP to include all the devices used in the related procedure overestimates the DRP in the latter two scenarios. The applicant asserted that because of this novel technologies that otherwise meet the transitional pass-through criteria would fail the cost significance tests since they will be compared to the cost of all devices used in a procedure and manufacturers may establish higher device prices to exceed an inflated DRP.

The applicant asserted that CMS' current approach to calculating the DRP is contrary to the intent of the TPT program, which is to recognize the costs associated with novel, clinically beneficial technologies that are not yet incorporated into the procedural cost calculation with temporary, separate device-related payment until the new device cost is reflected in rate setting data. The applicant added, the intent of the DRP in the cost significance test is to compare the cost of the pass-through candidate device to the costs of the device(s) that the pass-through candidate device would replace and not to compare the costs of the candidate device to the total costs of all devices used in a procedure to include those that are unrelated and not replaced by the candidate device.

Next the applicant stated that in its discussion of the pass-through device offset policy for OPPS payment in the CY 2004 Outpatient Prospective Payment System (OPPS) Final Rule, CMS stated, ''Beginning with the implementation of the 2002 OPPS update (April 1, 2002), we deduct from the pass-through payments for the identified devices an amount that offsets the portion of the APC payment amount that we determine is associated with the

device, as required by section 1833(t)(6)(D)(ii) of the Act.''[131] The applicant continued, ''We will apply an offset to a new device category only when we are able to determine that an APC contains costs associated with the new device. We will also continue our existing methodology for determining any offset amount if we find that device costs associated with a new device category are packaged into the APCs. We will include information about any applicable offset in the transmittal we issue to announce information regarding the new category''.[132]

The applicant stated that on at least two occasions, CMS has referenced the above-stated policy in decisions not to apply a device offset when calculating payment for pass-through devices. The applicant cited two instances where they believe CMS has chosen to not apply a device offset, first with C2623 (Drug coated angioplasty balloon)[133] and C1748 (Single use [disposable] endoscope).[134] According to the applicant, with these two decisions, CMS has acknowledged that it does not consider the cost of devices that are not replaced by the pass-through device when calculating the pass-through payment amount. The applicant asserted that given these decisions and the associated payment policy, CMS has not only shown that it has the authority to define the DRP calculation methodology, but it has also established a precedent for defining the DRP as only those devices that are replaced by the pass-through device. The applicant stated that it is therefore inconsistent for CMS to apply a different DRP methodology in the cost test for devices seeking transitional pass-through payment.

According to the applicant the prior precedents and this inconsistency are central to the application of the TPT cost significance test for the Eluvia™ system. The applicant stated that as requested in their 2018 transitional pass-through application submission, they again ask CMS to consider only the cost of those devices replaced by the Eluvia™ system when calculating the DRP for CPT Code 37226 (Revascularization, endovascular, open or percutaneous, femoral, popliteal artery(s), unilateral; with transluminal stent placement(s), includes angioplasty within the same vessel, when performed). According to the applicant the average femoral, popliteal stent placement procedure (CPT 37226) includes ancillary (non-stent) device costs of $2,311.26 and average stent device costs of $3,406.93. The applicant asserts then that a more appropriate comparison is of the Eluvia™ system to the $3,406.93 in average stent device costs. The applicant contends that the non-stent devices should not be considered in the DRP utilized in the 3-part cost significance test because the Eluvia™ system is not replacing these costs associated with the non-stent devices. The applicant concluded that should the $3,406.93 be used as the DRP, then the Eluvia™ system passes the second and third cost significance tests at approximately 166 percent and 22 percent, respectively.

Response: As we stated above in section IV.2.a. of this final rule with comment period, to be eligible for device pass-through payments a device must have an average cost that is not ''insignificant'' relative to the payment amount for the procedure or service with which the device is associated as determined under § 419.66(d). Since the CY 2017 OPPS/ASC final rule (81 FR 79648 through 79649), CMS has described the manner in which it evaluates device pass-through applicants against the cost significance criterion at § 419.66(d). Per the applicant, CMS has stated in prior rules that we will deduct from the pass-through payments for a device an amount that offsets the portion of the APC payment amount that we determine is associated with the device. Once a device is approved for pass-through payments CMS appropriately applies this rationale to determine the payment rate for devices with pass-through status. However, except in rare circumstances, CMS has consistently applied the full device offset amount associated with the applicable APC used to evaluate the cost significance tests at § 419.66(d). In this manner we believe we are identifying devices whose average cost is not ''insignificant''.

In reference to the prior precedents identified by the applicant (C2623 and C1748) where CMS determined to not apply an offset we disagree with the applicant's conclusion that these situations apply to the Eluvia™ system and the request for a partial device offset. In some cases, CMS determines that none of the costs of a new device are included in the applicable APC. For example, in the CY 2021 OPPS/ASC final rule (85 FR 85994), CMS determined for the EXALT™ Model D Single-Use Duodenoscope that the costs associated with the device were not already reflected in the device portions of APCs 5303 (Level 3 Upper GI Procedures) or 5331 (Complex GI Procedures) because there were no single-use duodenoscopes on the market previously so no operating cost data associated with such devices could be included in the historical OPPS claims data. Additionally, *none* of the costs associated with the device were reflected in the device portions of the applicable APCs. This is similarly reflected in the CMS transmittal 10541 dated December 31, 2020 where CMS stated, ''we have determined that the costs associated with C1748 are not already reflected in APCs 5303 or 5331''.[135]

In its comment to CMS, the applicant asserts that the Eluvia™ system replaces a portion of the previous related devices and not all of previous related devices. This is further evidenced by the applicant's request for a partial device-related portion (that is, device offset) of $3,406.93. CMS has historically used a full device offset related to the applicable APC in the majority of cases when assessing the cost criterion; to our knowledge CMS has never utilized a partial device offset in this manner. If CMS desired to change the cost criterion evaluation it must do so through notice and comment rulemaking to provide ample notice and an opportunity for public comment. Therefore, we do not believe the use of a partial device offset, as the applicant has requested, would be consistent with CMS' application of the cost significance criterion specified at § 419.66(d). Because the applicant did not meet the second and third cost significance tests, we do not believe the Eluvia™ system meets the cost significance criterion specified at § 419.66(d).

After consideration of the public comments we received and our review of the device pass-through application, we are not approving the Eluvia™ system for transitional pass-through payment status in CY 2022 because the product does not meet the cost significance criterion.

(4) Cochlear™ Osia® 2 System

Cochlear Americas submitted an application for a new device category

for transitional pass-through payment status for the Cochlear™ Osia® 2 System (hereinafter referred to as the Osia® 2 System) by the December 2020 quarterly deadline for CY 2022. The Osia® 2 System is a transcutaneous, active auditory osseointegrated device that replaces the function of the middle ear by providing mechanical energy to the cochlea. According to the applicant, the device consists of four components including: (1) An external sound processor, the Osia 2 Sound Processor; (2) the Osia OSI200 Implant Piezo Power™ transducer; (3) the BI300 osseointegrated implant for anchoring and single point transmission; and (4) a fixation screw for attaching the OSI200 implant to the BI300 implant which is implanted in the skull.

The external sound processor captures environmental sounds and converts the sound signal into a digital signal transmitted as a radiofrequency. The external sound processor also contains a magnet and a battery (rechargeable 675 zinc air button 1.4Volt; 600 mA-hrs capacity). The magnets couple the external and internal components across the skin. The transducer (Piezo Power™) detects the radiofrequency signals after they pass through the intact skin and transforms the signal to vibrations, which are then transmitted to the bone-implanted fixation screw. The screw vibrates the skull bone (temporal portion) which stimulates the cochlea (inner ear) to transmit the information to the brain so that the vibrations are perceived as sounds. The implanted portion is 7.2 cm x 3 cm x 0.49 cm. The system has a fitting range of 55 dB sensory neural hearing loss. The applicant stated that unlike hearing aids, which make sounds louder, an auditory osseointegrated device, such as the Osia® 2 System can improve clarity of hearing and improve hearing at higher frequencies.

With respect to the newness criterion at § 419.66(b)(1), the Osia® 2 System received FDA 510(k) clearance on November 15, 2019, based on a determination of substantial equivalence to a legally marketed predicate device. The Osia® 2 System is intended for the following patients and indications: (1) Patients 12 years of age or older; (2) patients who have a conductive or mixed hearing loss and still can benefit from sound amplification. The pure tone average (PTA) bone conduction (BC) threshold (measured at 0.5, 1, 2, and 3 kHz) should be better than or equal to 55 dBHL; (3) Bilateral fitting of the Osia® 2 System is intended for patients having a symmetrically conductive or mixed hearing loss. The difference between the left and right sides' BC thresholds should be less than 10 dB on average measured at 0.5, 1, 2, and 3 kHz, or less than 15 dB at individual frequencies; (4) patients who have profound sensorineural hearing loss in one ear and normal hearing in the opposite ear (that is, single-sided deafness or ''SSD''). The pure tone average air conduction hearing thresholds of the hearing ear should be better than or equal to 20 dB HL (measured at 0.5, 1, 2, and 3 kHz). The Osia® 2 System for SSD is also indicated for any patient who is indicated for an air-conduction contralateral routing of signals (AC CROS) hearing aid, but who for some reason cannot or will not use an AC CROS. Prior to receiving the device, it is recommended that an individual have experience with appropriately fitted air conduction or bone conduction hearing aids.

We received the application for a new device category for transitional pass-through payment status for the Osia® 2 System on December 1, 2020, which is within 3 years of the date of the initial FDA marketing authorization. We invited public comments on whether the Osia® 2 System meets the newness criterion.

Comment: The applicant asserted that the Osia® 2 system is new because it received FDA clearance on November 15, 2019 and its predicate device received FDA clearance on July 3, 2019, both of which are within 3 years of December 1, 2020, the date on which we received the device pass-through application for the Osia® 2 System. The applicant asserted that the predicate to these devices, the BONEBRIDGE System, received FDA authorization on July 20, 2018 which is also within the newness period for transitional pass-through status.

Response: We appreciate the applicant's input and agree that the Osia® 2 system meets the newness criterion.

With respect to the eligibility criterion at § 419.66(b)(3), according to the applicant, the Osia® 2 System is integral to the service provided, is used for one patient only, comes in contact with human skin, and is surgically implanted or inserted. The applicant also claimed that the Osia® 2 System meets the device eligibility requirements of § 419.66(b)(4) because it is not equipment, an instrument, apparatus, implement, or item for which depreciation and financing expenses are recovered, and it is not a supply or material furnished incident to a service. We invited public comments on whether the Osia® 2 System meets the eligibility criteria at § 419.66(b).

We did not receive public comments in regard to whether the Osia® 2 system meets the eligibility criteria at § 419.66(b)(3) or § 419.66(b)(4), therefore we agree with the applicant that the Osia® 2 system meets the criteria of § 419.66(b).

The criteria for establishing new device categories are specified at § 419.66(c). The first criterion, at § 419.66(c)(1), provides that CMS determines that a device to be included in the category is not appropriately described by any of the existing categories or by any category previously in effect, and was not being paid for as an outpatient service as of December 31, 1996.

The applicant stated that the Osia® 2 System differs significantly from the devices that were included in the previous category for auditory osseointegrated devices (L8690—Auditory osseointegrated device, includes all internal and external components) which was effective from effective from January 1, 2007 through December 31, 2008. The applicant claimed that the devices that were described by this category include a transducer/actuator and sound processor that is worn externally with the transducer/actuator connected to the skull by a percutaneous post or abutment that penetrates the skin. In these devices, the sound processor converts sound into a digital signal which the transducer/actuator converts to vibrations that are transmitted to the skull through the abutment. The vibrations are transmitted directly to the inner ear and are reproduced as sound.

The applicant stated that the Osia® 2 System is distinct from devices with a percutaneous connection between the transducer and the sound processor because the transducer/actuator for the Osia® 2 system is surgically implanted and has a magnetic transcutaneous attachment to the external sound processor. The applicant also claimed that the percutaneously coupled osseointegrated devices included in the previous device pass-through category convert sound to mechanical vibrations in the external sound processor/actuator, then transmit the vibrations to the internal components. The applicant claimed that the Osia® 2 system instead converts the sound to mechanical vibrations after it has reached the internal components. The applicant claimed that the technology to fully implant the transducer/actuator did not exist when the previous device pass-through category was established. The applicant proposed the device pass-

through category descriptor ''Auditory osseointegrated device, including implanted transducer/actuator with radiofrequency link to external sound processor''. The applicant stated that the BONEBRIDGE Bone Conduction Implant System, which also submitted a device pass-through application for CY 2022 and is described in this section under number (2) above, would also be described by the proposed additional category.

We stated in the CY 2022 OPPS/ASC proposed rule that we believe that the Osia® 2 system is described by L8690—Auditory osseointegrated device, includes all internal and external components. The applicant has noted differences between the Osia® 2 system and the devices that were described by L8690, specifically percutaneous, auditory osseointegrated devices, regarding the connection between the implanted transducer and the external audio processor (percutaneous abutment vs. transcutaneous magnetic attraction) however, we believe that there is a similar mechanism of action for all these devices specifically, vibratory stimulation of the skull to stimulate the receptors in the cochlea (inner ear). Further, we believe that the broad descriptor for L8690 of ''Auditory osseointegrated device, includes all internal and external components'' includes the applicant's device. In the CY 2022 OPPS/ASC proposed rule, we invited public comment on whether the Osia® 2 system meets the device category criterion.

Comment: We received multiple comments addressing § 419.66(c)(1) for both BONEBRIDGE and the Osia® 2 system. One commenter stated they do not support CMS' position that the BONEBRIDGE and Osia® 2 system should not be granted a new category, because these devices take much longer to implant surgically than percutaneous bone conduction implants, they are active sound processors, and they work differently than percutaneous devices like the BAHA or Oticon implants.

Another commenter who also disagreed with CMS that the BONEBRIDGE and Osia® 2 system are adequately described by L8690 stated that the BONEBRIDGE and Osia® 2 system are transcutaneous hearing implants, and that CMS should create a new HCPCS code that describes both the procedure and the implant because both are new. The commenter expressed their disappointment in what they described as CMS' continual resistance to conduct rulemaking specifically on Middle Ear Implants (MEIs) because they believe CMS should hear the opinions of clinical experts, physicians, and Medicare beneficiaries regarding the appropriateness of classifying MEIs as prosthetic implants.

A different commenter stated their support for CMS' conclusion in the proposed rule that BONEBRIDGE and Cochlear Osia® are appropriately described by a pass-through category previously in effect.

Two commenters stated that CMS must support the inclusion of middle ear implants in the prosthetic category. The commenters asserted that not including these devices denies beneficiaries access to all FDA-approved hearing prosthetics and discourages in new technology for the hearing impaired.

Response: We appreciate the input provided by these commenters. We have taken this information into consideration in our determination of the eligibility criterion at § 419.66(c)(1), discussed below. We note some of the comments, those addressing hearing prosthetics, are outside of the scope of this rule. Please refer to the above section (2) BONEBRIDGE where we summarize these comments in full.

Comment: One commenter stated that the pass-through category identified by CMS, L8690, does not provide an accurate description of the Osia® 2 system as it does not account for several material differences that exist between Osia (and other active auditory osseointegrated implant (AOI) systems) and the devices intended to be described by L8690. The commenter asserted that the mechanism by which the vibrations are generated and reach the skull are entirely different, which is reflected by the FDA device classification. The commenter asserted that L8690, developed in 2007, could not account for active devices.

Response: We appreciate the information provided by the commenter and have taken this into account in our determination of the § 419.66(c)(1) eligibility criterion, discussed below.

Comment: The applicant stated that L8690 does not describe active, transcutaneous systems like Osia® 2 and BONEBRIDGE. First, the applicant stated that L8690 did not extend to active, transcutaneous active osseointegrated implants (AOIs) when it was created in 2007 because the only osseointegrated implant at that time was passive and percutaneous. Second, the applicant, responding to CMS' statement, ''that there is a similar mechanism of action for all these devices . . .'' [136], stated that the mechanism by which the vibrations are generated and reach the skull are entirely different and can affect safety, clinical outcomes, and patient quality of life. The applicant asserted that the active nature of the Osia® 2 system, which diminishes skin-related complications associated with percutaneous devices and at the same time improves audiological outcomes, differs from passive systems which involve the transmission of mechanical vibrations from the external components to the internal components. As opposed to previous technologies, the applicant asserted that active systems incorporate a new mechanism of action that sends digital signals from the external sound processor to the internal components, which then convert a digital signal to a vibration directly at the point of bone contact, eliminating the need for percutaneous attachment. The applicant stated that although both active and passive systems ultimately generate a vibration to stimulate the cochlea, the way they do so and where the vibration is generated are entirely different. The applicant added that FDA created a new device classification for active implantable bone conducting hearing systems in response to BONEBRIDGE's application in 2018 (21 CFR 874.3340), which is specifically for active systems as opposed to that for passive systems (21 CFR 874.3300). The applicant stated that while they recognize that FDA and CMS classify devices differently for different purposes, they believe that the way FDA classifies bone conduction implants reinforces why CMS should distinguish active implantable bone conduction devices from passive, percutaneous systems for purposes of transitional device pass-through payment status.

The applicant next stated that in other situations, CMS has modified broadly worded device categories to recognize technological advances within a device class. The applicant noted that the descriptor for HCPCS code C1767—''Generator, neurostimulator (implantable)''—was modified to ''Generator, neurostimulator (implantable), non-rechargeable'' to create a new device pass-through category for HCPCS codes C1820 (Generator, neurostimulator (implantable), with rechargeable battery and charging system) and C1822 (Generator, neurostimulator (implantable), high frequency, with rechargeable battery and charging system).

Response: After consideration of the public comments we received, we agree there is no existing pass-through payment category that appropriately describes the Osia® 2 system. The Osia® 2 system device consists of an external

[136] 86 FR at 42104.

processor that receives sound pressure energy and converts this to a radiofrequency signal which communicates with a surgically implanted subcutaneous transducer/actuator via a stud. The transducer/actuator converts this signal to mechanical vibrations that are transmitted to the skull and inner ear. As stated by the applicant, when the existing pass-through category, Auditory osseointegrated device (L8690), was issued in 2007, the technology to implant the transducer/actuator did not exist. Based on this information, we have determined that the Osia® 2 system meets the eligibility criterion at § 419.66(c)(1). Due to the similarity between the devices, we refer the reader to section IV(A)(2)(b)(2) of this rule for a similar discussion of the BONEBRIDGE.

The second criterion for establishing a device category, at § 419.66(c)(2), provides that CMS determines either of the following: (i) That a device to be included in the category has demonstrated that it will substantially improve the diagnosis or treatment of an illness or injury or improve the functioning of a malformed body part compared to the benefits of a device or devices in a previously established category or other available treatment; or (ii) for devices for which pass-through status will begin on or after January 1, 2020, as an alternative to the substantial clinical improvement criterion, the device is part of FDA's Breakthrough Devices Program and has received FDA marketing authorization. With respect to the substantial clinical improvement criterion, the applicant stated that the Osia® 2 system represents a substantial clinical improvement because it provides a reduced rate of device-related complications compared to currently available treatments. The applicant submitted five references to retrospective case series that studied the long-term complications associated with percutaneous osseointegrated bone conduction hearing devices, specifically bone-anchored hearing aids.[137] [138] [139] [140] [141] The applicant stated that complications associated with bone-anchored hearing aids include irritation and/or infection of the skin surrounding the abutment, skin flap necrosis, wound dehiscence, bleeding or hematoma formation, soft tissue overgrowth and persistent pain.[142] [143] [144] [145] [146] Additionally, the applicant also submitted five references to clinical studies and case series involving the use of transcutaneous osseointegrated bone conduction hearing devices. Of these five references, three of these studies involved the use of the BONEBRIDGE device and have been previously discussed in this section, one study that involved the use of the BAHA Attract device, and one study that involved the use of the Osia® system, an earlier version of the Osia® 2 system.

In support of their claim that the Osia® 2 system reduced the rate of device-related complications compared to currently available treatments, the applicant submitted a multicenter prospective within-subject study conducted at five centers in Europe, Australia, and USA. This study investigated clinical performance, safety, and benefit of the Osia® system and included 51 adult subjects with mixed and conductive hearing loss (MHL/CHL, n=37) and single-sided sensorineural deafness (SSD, n=14). In regard to safety outcomes, patients experienced the following minor adverse events including pain (n=7), numbness (n=1), vertigo (n=3), swelling (n=3), tension implant site (n=1), warmth at the SP site (n=3), headache (n=3), hematoma/bleeding (n=2).[147] One participant developed an implant-site infection three days after implantation, which subsequently developed into skin necrosis and dehiscence. The implant had to be removed 55 days after implantation.

In the CY 2022 OPPS/ASC proposed rule, we expressed concern that the applicant did not submit studies that involved the use of the Osia® 2 system to demonstrate substantial clinical improvement of the device. The applicant submitted one study that investigated the Osia® system that utilizes an earlier model of the device. We explained in the proposed rule that we were concerned that the evidence of substantial clinical improvement submitted by the applicant did not directly compare the Osia® 2 system to other currently available treatments, namely percutaneous or passive, transcutaneous auditory osseointegrated devices. Therefore, in the CY 2022 OPPS/ASC proposed rule we explained that we were concerned that we are unable to determine a substantial clinical improvement of the Osia 2 system as compared to existing devices. We stated that we would be interested in any additional studies that involve the use of the Osia® 2 system and compare the device to other currently available auditory osseointegrated devices. We invited public comments in the CY 2022 OPPS/ASC proposed rule on whether the Osia® 2 system meets the substantial clinical improvement criterion.

Comment: In response to our concerns about whether the Osia® 2 system meets the substantial clinical improvement criterion, one commenter stated that head-to-head comparisons are not a requirement for transitional pass-through status. The commenter added that because the Osia® 2 System and its predecessor system are substantially similar as determined by FDA, the clinical evidence for the predecessor system applies equally to the Osia® 2 System. The commenter asserted that the clinical evidence submitted by the applicant, as described by CMS in the CY 2022 OPPS/ASC proposed rule, supports that the Osia® 2 System is a substantial clinical improvement compared to percutaneous systems.

Response: We thank the commenter for the information and have taken it into consideration in our determination of whether the Osia® 2 System meets the substantial clinical improvement, discussed below.

Comment: The applicant submitted a comment in support of its position that the Osia® 2 System meets the substantial clinical improvement criterion. The applicant contended, based on the discussion in the CY 2022 OPPS/ASC proposed rule, that CMS does not appear to be concerned that there is insufficient evidence to conclude that active/transcutaneous systems are a substantial clinical improvement over passive/percutaneous systems. Rather, the applicant believes our concerns relate to the fact that

evidence was submitted for Osia® 1 and not Osia® 2.[148]

In response to CMS' concerns, the applicant stated that first, head-to-head trials are not a requirement for demonstrating substantial clinical improvement for purposes of qualifying for transitional pass-through device—status and would not be appropriate in this situation. First, the applicant stated that enrolling patients in a head-to-head trial in which the primary difference is expected to be adverse events associated with one treatment arm is extremely challenging, and it is unclear what additional data would be gained, particularly since the nature and frequency of device-related complications between passive percutaneous and transcutaneous devices is established and commonly reported in the literature. Second, the applicant stated that clinical studies involving the first Osia® device are applicable to the Osia® 2 System because the devices are substantially equivalent and only minor differences exist between the two versions of the device. The applicant notes that the FDA 510(k) clearance for the Osia® 2 system expressly noted clinical performance data did not reveal significant differences in hearing performance between either system and did not raise new issues of safety or effectiveness.

Next the applicant discussed two studies that involve the Osia® 2 system. The first study reported the surgical and audiological experience with the Osia 2 System based on a U.S. nationwide controlled market release (CMR) conducted between December 9, 2019 and February 14, 2020 involving 23 surgeons who performed 44 operations on 43 recipients.[149] The applicant noted that no device-related complications were reported and five complications not associated with the Osia® 2 system were reported that were all successfully resolved. According to the applicant, the authors concluded that the Osia® 2 system, ''. . . represents an important advance in hearing implant technology. Utilizing innovative digital piezoelectric stimulation, this active auditory osseointegrated implant (OSI) delivers high-power output and improved high frequency gain for optimizing speech perception while maintaining safety and engendering high patient satisfaction.'' [150]

The second study is a systematic review that, according to the applicant, provides evidence of substantial clinical improvement for both the Osia® and Osia® 2 systems.[151] According to the applicant, the authors reported their findings from reviewing adverse event reports associated with active transcutaneous bone conduction implants (atBCls) in the Manufacturer and User Facility Device Experience (MAUDE) database of FDA. According to the applicant, after removing irrelevant reports and duplicates, 83 MDRs describing 91 adverse events (patient injuries and device malfunctions) were analyzed, all of which occurred postoperatively. The applicant asserted that the five most comment types of events, device malfunctions leading to a lack of conduction or hearing (n=26, 29 percent), infections (n=14, 15 percent), device malfunctions of intermittent or reduced hearing (n=12, 13 percent), and pain and wound formation (n=9 or 10 percent), accounted for 77 percent of all events reported. The applicant asserted that device malfunctions were predominantly associated with BONEBRIDGE (93 percent of all device malfunctions reported), while patient injuries such as infections were more commonly reported for Osia® (67 percent of all reported injuries). According to the applicant, the authors concluded that complications observed with active transcutaneous BCI use are similar to those with passive transcutaneous BCIs.[152]

In regard to evidence submitted with their application, the applicant stated commonly reported adverse events which include ear inflammations, dizziness, and headache, are clearly not related to the implantation. Based on reported events in a comparison between the Osia® system [153] and the Baha Connect System [154] the applicant asserted that it is clear that the Osia® System has significantly lower rates of implantation-related adverse events than the passive/percutaneous system.

Response: We thank the applicant for their submission and the additional information provided. Because of the overlap between comments for the Osia® 2 system and BONEBRIDGE, we direct readers to section (IV)(2)(b)(2)(2) of this final rule with comment period.

We appreciate the commenters' responses on the Osia®2 system application. We disagree with the applicant's comment that commonly reported adverse events which include ear inflammations, dizziness, and headache, are clearly not related to the implantation. We note, the term ''dizziness'' can be used to explain a variety of symptoms that can include weakness, lightheadedness, unsteadiness and vertigo, and an argument against causality may be reasonable. ''Headache'', however, is pain affecting the head or face. To dismiss a possible connection between the skull implantation procedure and a complaint of post-procedure headache does not seem reasonable.

While new evidence was submitted by the applicant which attempts to address substantial clinical improvement for the Osia® 2 system, we are unable to conclude that the device meets the substantial clinical improvement criterion. Specifically, we note that the results of a meta-analysis are informative, however without controlling for the differences across studies (for example, study design, sampling technique, etc.) we are unable to determine if the treatment effects seen are due to the Osia® 2 system or due to differences in study design. In regard to commenter's suggestion that a head-to-head analysis not being required for an assessment of substantial clinical improvement, we agree in part. While it may be the case that a direct head-to-head comparison may not always be feasible or appropriate, we acknowledge that this is the ideal manner in which to address comparisons between one technology and another. For example, CMS utilized meta-analyses and historical controls as evidence of substantial clinical improvement when robust critical efforts have been made to account for variations in study design (*i.e.,* confounding) in the former and comprehensive reviews to establish the validity of the latter. In regard to the second study [155] discussed in the applicant's comment, we note that the small sample size of 43 recipients and 44 procedures may not be generalizable to a larger Medicare beneficiary population. Therefore, we are unable to determine a substantial clinical

[148] 86 FR at 42,105.

improvement of the Osia® 2 system as compared to existing devices.

After consideration of the public comments and additional information we have received, we are not approving the Osia® 2 system for transitional pass-through payment status in CY 2022 because the product does not meet the substantial clinical improvement criterion. Because we have determined that the Osia® 2 system does not meet the substantial clinical improvement criterion, we have not evaluated the cost criterion.

(5) Pure-Vu® System

Motus GI submitted an application for a new device category for transitional pass-through payment status for the Pure-Vu® System (Pure-Vu®) for CY 2022. The applicant asserted that the Pure-Vu® System helps to avoid aborted and delayed colonoscopy procedures due to poor visualization of the colon mucosa by creating a unique High Intensity, Pulsed Vortex Irrigation Jet that consists of a mixture of air and water to break-up fecal matter, blood clots, and other debris, and scrub the walls of the colon while simultaneously removing the debris through two suction channels. The applicant stated that the suction channels have a sensor to detect the formation of a clog in the channels, triggering the system to automatically purge and then revert to suction mode once the channel is clear. According to the applicant, this combination of the agitation of the fluid in the colon via the pulsed vortex irrigation and simultaneous removal of the debris allows the physician to visualize the colon and achieve a successful colonoscopy or other advanced procedure through the colonoscope even if the patient is not properly prepped and has debris either blocking the ability to navigate the colon or covering the colon wall obscuring the mucosa and any pathology that may be present. The applicant asserted that the constant volume suction pumps do not cause the colon to collapse, which allows the physician to continue to navigate the colon while cleansing and avoids the need to constantly insufflate the colon, which may be required with other colonoscopy irrigation systems.

The applicant stated that the Pure-Vu® System is comprised of a workstation that controls the function of the system, a disposable oversleeve that is mounted on a colonoscope and inserted into the patient, and a disposable connector with tubing (umbilical tubing with main connector) that provides the interface between the workstation, the oversleeve, and off the shelf waste containers.

The applicant explained that the workstation has two main functions: Cleansing via irrigation and evacuation, and acting as the user interface of the system. The applicant explained that the irrigation into the colon is achieved by an electrical pump that supplies pressurized gas (air) and a peristaltic pump that supplies the liquid (water or saline). According to the applicant, the pressurized gas and liquid flow through the ''main connector'' and are mixed upon entry into the umbilical tubing that connects to the oversleeve. The applicant explained that the gas pressure and flow are controlled via regulators and the flow is adjusted up or down depending on the cleansing mode selected. The applicant stated that a foot pedal connected to the user interface activates the main functions of the system so that the user's hands are free to perform the colonoscope procedure in a standard fashion.

The applicant stated that the evacuation mode (also referred to as suction) removes fecal matter and fluids out of the colon. The applicant noted that the evacuation function is active during cleansing so that fluid is inserted and removed from the colon simultaneously. The applicant explained that the evacuation pumps are designed in a manner that prevents the colon from collapsing when suctioning, which facilitates the ability to simultaneously irrigate and evacuate the colon. According to the applicant, during evacuation, the system continuously monitors the pressure in the evacuation channels of the oversleeve and if the pressure drops below pre-set limits the pumps will automatically reverse the flow. The applicant explained that the clog sensor triggers the system to automatically purge the material out of the channel and back into the colon where it can be further emulsified by the Pulsed Vortex Irrigation Jet, and then automatically reverts back into evacuation mode once the channel is cleared. The applicant stated that the evacuation (suction) that drains fecal matter and fluids out of the colon is generated by peristaltic pumps that can rotate in both directions, either to evacuate fluids and fecal matter from the colon through the evacuation tubes and into a waste container, or while in the reverse direction, to purge the evacuation tubes. The applicant claimed the suction created by this type of pump creates a constant volume draw of material from the colon and therefore prevents the colon from collapsing rapidly. According to the applicant, purging of evacuation tubes may be activated in two ways: The purging cycle is automatically activated when low pressure is noted by the evacuation-line sensor (it is also activated for the first 0.5 seconds when evacuation is activated to make sure the line is clear from the start); or a manual purge may be activated by the user by pushing the ''manual purge'' button on the foot pedal. The applicant claimed the pressure-sensing channel is kept patent by using an air perfusion mechanism where an electrical pump is used to perfuse air through the main connector and into the oversleeve, while the sensor located in the workstation calculates the pressure via sensing of the channel.

The applicant explained the Pure-Vu® System is loaded over a colonoscope and that the colonoscope with the Pure-Vu® Oversleeve is advanced through the colon in the same manner as a standard colonoscopy. The applicant stated that the body of the oversleeve consists of inner and outer sleeves with tubes intended for providing fluid path for the cleansing irrigation (2X), the evacuation of fluids (2X), the evacuation sensor (1X) and that the flexible head is at the distal end of the oversleeve and is designed to align with the colonoscope's distal end in a consistent orientation. The applicant explained that the distal cleansing and evacuation head contains the irrigation ports, evacuation openings, and a sensing port. According to the applicant, the system gives the physician the control to cleanse the colon as needed based on visual feedback from the colonoscope to make sure they have an unobstructed view of the colon mucosa to detect and treat any pathology. The applicant noted that since the Pure-Vu® System does not interfere with the working channel of the colonoscope, the physician is able to perform all diagnostic or therapeutic interventions in a standard fashion with an unobstructed field of view.

With respect to the newness criterion at § 419.66(b)(1), the Pure-Vu® System first received FDA 510(k) clearance on September 22, 2016 under 510(k) number K60015. Per the applicant, this initial device was very cumbersome to set up and required direct support from the company and therefore was not viable for a small company with limited resources to market the device. The applicant noted that the initial device could have been sold starting on January 27, 2017 when the first device came off the manufacturing line. Per the applicant, the device was allocated for clinical evaluations but 10 institutions throughout the country did purchase the device outside of any true clinical study, mostly based on the fact that

physicians wanted to try the product prior to committing to a clinical trial. The applicant further noted that minor modifications were made to the Pure-Vu® System in additional 510(k) clearances dated December 12, 2017 and June 21, 2018. The current marketed Pure-Vu® System was then granted 510(k) clearance on June 6, 2019 under 510(k) number K191220. Per the applicant, this clearance changed the entire set-up of the device, redesigned the user interface, and reduced the size, among other changes. According to the applicant, this updated version was commercially available as of September 19, 2019.

Comment: In response to CMS' summary, the applicant stated that the Pure-Vu® System Generation 1 (Gen 1) received FDA 510(k) clearance in September 2016. The applicant added that the Gen 1 version of the system was used to gather clinical data using disposables sold at a discounted rate to one institution and five institutions in 2017 and 2018, respectively. According to the applicant, after receiving feedback from providers concerning the Gen 1 system, the company decided not to make the Gen 1 product available to the market. According to the applicant, the Generation 2 (Gen 2) version of the Pure-Vu® System obtained FDA 510(k) clearance in June 2019. The applicant clarified that no application for the Gen 1 device was submitted for pass-through payment in the outpatient setting and asserted that since only a few institutions purchased the device, the cost burden of the Gen 1 system is not factored into the current marketplace. The applicant stated that the Gen 2 version is the product for which the applicant is seeking transitional device pass-through status.

Response: We appreciate the commenter's input and agree that the Pure-Vu® System meets the newness criterion because we received its device pass-through application on September 1, 2020, which is within 3 years of the June 21, 2018, the date of FDA PMA.

With respect to the eligibility criterion at § 419.66(b)(3), according to the applicant, Pure-Vu® is integral to the service provided, is used for one patient only, comes in contact with human tissue, and is surgically inserted temporarily. The applicant also claimed that Pure-Vu® meets the device eligibility requirements of § 419.66(b)(4) because it is not an instrument, apparatus, implement, or item for which depreciation and financing expenses are recovered, and it is not a supply or material furnished incident to a service. We invited public comments on whether Pure-Vu® meets the eligibility criteria at § 419.66(b).

We did not receive any comments on whether Pure-Vu® meets the eligibility criteria at § 419.66(b)(3) or § 419.66(b)(4). We agree with the applicant that Pure-Vu® device meets the criteria of § 419.66(b).

The criteria for establishing new device categories are specified at § 419.66(c). The first criterion, at § 419.66(c)(1), provides that CMS determines that a device to be included in the category is not appropriately described by any of the existing categories or by any category previously in effect, and was not being paid for as an outpatient service as of December 31, 1996. We stated in the CY 2022 OPPS/ASC proposed rule that we have not identified an existing pass-through payment category that describes Pure-Vu®. We invited public comment on whether Pure-Vu® meets the device category criterion.

We did not receive any comments on whether Pure-Vu® meets the eligibility criteria at § 419.66(c)(1). We continue to believe that Pure-Vu® device meets the criteria of § 419.66(c)(1) because we have not identified an existing pass-through payment category that describes Pure-Vu®.

The second criterion for establishing a device category, at § 419.66(c)(2), provides that CMS determines either of the following: (i) That a device to be included in the category has demonstrated that it will substantially improve the diagnosis or treatment of an illness or injury or improve the functioning of a malformed body part compared to the benefits of a device or devices in a previously established category or other available treatment; or (ii) for devices for which pass-through status will begin on or after January 1, 2020, as an alternative to the substantial clinical improvement criterion, the device is part of the FDA's Breakthrough Devices Program and has received FDA marketing authorization. The applicant stated that Pure-Vu® represents a substantial clinical improvement over existing technologies. With respect to this criterion, the applicant submitted studies that examined the impact of Pure-Vu® on endoscopic hemostasis outcomes, rebleeding occurrence, and mortality. We note that the applicant has applied for and was denied the New Technology Add-on Payment in the FY 2022 IPPS/LTCH proposed rule (86 FR 25299 through 25304).

According to the applicant, the Pure-Vu® System offers the ability to achieve rapid beneficial resolution of the disease process treatment by achieving rapid and full visualization of the colon, which will improve diagnostic yield and the effectiveness of treatment of diseases of the bowel. The applicant claimed that Pure-Vu® is indicated for use in emergent issues such as acute lower gastrointestinal (GI) bleeding, unknown abdominal pain, foreign body removal, chronic disease management, and preventive medicine such as screening and surveillance. The applicant states these procedures are typically performed using a colonoscope to visualize the colon and provide a conduit to deliver therapeutic treatments. According to the applicant, the current standard of care requires the colon to be cleansed to ensure the success of any procedure. The applicant asserts that in the case where pre-procedural preparations are not adequate to achieve proper visualization, current technology provides limited ability to remove debris from the colon during the procedure to facilitate the process. The applicant states that regardless of indication, the bowel preparation remains the constant across patients who may have a wide range of comorbidities which may limit patient tolerability. According to the applicant the consumption of a purgative and the dietary restriction to be on clear liquids for approximately 24 hours can be problematic for the diabetic and elderly populations.[156]

In support of its application, the applicant submitted three outpatient clinical studies to demonstrate the Pure-Vu® System's capability to convert patients to adequate preparation where preparation was previously inadequate and the visualization was poor based on the Boston Bowel Preparation Scale (BBPS). In the first study, Perez J., et al. conducted an outpatient prospective pilot study using the Pure-Vu® System.[157] The study observed 50 patients with poorly prepared colons undergoing colonoscopy at two outpatient clinical sites in Spain and Israel, respectively. The applicant claimed study patients underwent a reduced bowel preparation consisting of the following: No dried fruits, seeds, or nuts starting 2 days before the colonoscopy, a clear liquid diet starting 18 to 24 hours before colonoscopy, and a split dose of 20mg oral bisacodyl. The study found the number of patients with

[156] Parra-Blanco A, Ruiz A, Alvarez-Lobos M, Amoros A, Gana JC, Ibanez P, et al. Achieving the best bowel preparation for colonoscopy. World J Gastroenterol. 2014;20(47):17709- 26.

[157] Perez Jimenez J, Diego Bermudez L, Gralnek IM, Martin Herrera L, Libes M. An Intraprocedural Endoscopic Cleansing Device for Achieving Adequate Colon Preparation in Poorly Prepped Patients. J Clin Gastroenterol. 2019;53(7):530–4.

an adequate cleansing level (BBPS≥2 in each colon segment) increased significantly from 31 percent (15/49) prior to use of the Pure-Vu System (baseline) to 98 percent (48/49) after use of the Pure-Vu® System ($P < 0.001$), with no serious adverse events reported.

In the second study provided by the applicant, van Keulen, et al. also conducted a single-arm, prospective study on 47 patients with a median age of 61 years in the outpatient setting in the Netherlands using the Pure-Vu® System.[158] Within the study, cecal intubation was achieved in 46/47 patients. This multicenter feasibility study found that the Pure-Vu® System significantly improved the proportion of patients with adequate bowel cleansing from 19.1 percent prior to the use of the Pure-Vu® System to 97.9 percent after its use ($P < 0.001$) and median BBPS score (from 3.0 [IQR 0.0–5.0] to 9.0 [IQR 8.0–9.0]).

In the third study provided by the applicant that directly evaluated the Pure-Vu® System in a clinical setting, Bertiger G., *et al.* performed a United States-based single center, prospective, outpatient study investigating regimes of reduced outpatient bowel preparations, which included low doses of over-the-counter laxatives, and eliminating the typical 24 hour clear liquid diet restriction, which was replaced by a low residue diet the day before the procedure.[159] In this study, 46 of a possible 49 patients received a colonoscopy, 8 of which took the over-the-counter laxative (''MiraLAX arm''), 21 patients ingested two doses of 7.5oz Magnesium Citrate (MgC) each taken with 19.5oz of clear liquid (''Mag Citrate 15oz arm''), and 18 patients ingested 2 doses of 5oz MgC taken with 16oz of clear liquid (''Mag Citrate 10oz arm''). Of the 46 subjects, 59 percent were males and there was a mean age of 61±9.48 years. The study found that each of the 3 study arms revealed significant differences in BBPS score between the baseline preparation and post-cleansing via Pure-Vu®. All the preparation regimens resulted in inadequately prepped colons. Comparing the mean BBPS rating for both pre- and post- Pure-Vu® use, the MiraLAX arm was inferior ($P < 0.05$) to both Mag Citrate arms. For the MiraLAX arm, the mean BBPS Score improved from 1.50 to 8.63. For the Mag Citrate 15oz arm, the mean BBPS score improved from 3.62 to 8.95. For the Mag Citrate 10oz arm, the mean BBPS Score improved from 4.76 to 9.0.

The applicant also provided a self-sponsored, U.S.-based, multicenter, prospective, single arm study in the inpatient setting, analyzing 94 patients, 65 of which (68 percent) had a GI bleed.[160] Of the 94 patients (41 percent females/59 percent males), the mean age was 62 years. According to the applicant, the study's primary endpoint was the rate of improved bowel cleansing level from baseline to after use of the Pure-Vu® System per colon segment using the BBPS. The BBPS score was recorded for each colorectal segment (left colon, transverse colon, and right colon segments) both prior to (baseline) and after colon cleansing with the Pure-Vu® System. An adequate cleansing level was *a priori* defined as a BBPS ≥2 in all evaluated colon segments. The study found that in 79 of the 94 patients (84 percent), the physician was able to successfully diagnose or rule out a GI bleed in the colon per the patients' colonoscopy indication using only the Pure-Vu® System. The analysis showed statistically significant visualization improvement in each colon segment after Pure-Vu® use with a mean BBPS score in the descending colon, sigmoid, and rectum of 1.74 pre-Pure-Vu® use and 2.89 post-Pure-Vu® use ($P < 0.001$); in the transverse colon of 1.74 pre-Pure-Vu® use and 2.91 post Pure-Vu® use ($P < 0.001$); and the ascending colon and cecum of 1.50 pre-Pure-Vu® use and 2.86 post Pure-Vu® use ($P < 0.001$). The study found only 2 percent of cases where the diagnosis could not be achieved due to inadequate preparation. Overall, the 84 (89.4 percent) patients that received the Pure-Vu® System within the study improved BBPS scores from 38 percent (95 percent CI 28, 49) to 96 percent (95 percent CI 90, 99) in segments evaluated. The study noted one procedure related perforation which required surgical repair, and the patient was discharged 48 hours post operatively and recovered fully.

In addition to the previously discussed studies, the applicant also submitted two case studies to highlight the various clinical presentations of lower gastrointestinal bleed (LGIB) with the use of the Pure-Vu® System. In the first case, the applicant described a patient with a history of scleroderma and chronic constipation who was referred for a surveillance colonoscopy after a prior endoscopic mucosal resection due to a large polyp. The applicant states this was the patient's third colonoscopy in twelve months due to a history of poor preparation in the prior exams. Despite an aggressive prep regime, the applicant states the patient still had solid stool and debris throughout the colon. The applicant states the Pure-Vu® system was used extensively and the physician was able to fully cleanse the colon during which the physician was able to uncover a poorly defined over 1 cm sessile serrated polyp that could not be appreciated before cleansing with Pure-Vu®. The applicant states a successful polypectomy was performed.

In the second case, the applicant described a patient presenting with hemorrhagic shock and acute kidney injury six days after a colonoscopy where nine polyps were removed, including two polyps greater than 2 cm. The applicant states angiographic control of the bleeding was not considered because of the patient's acute kidney injury with a rising creatinine. According to the applicant, the physician elected to use Pure-Vu® to immediately exam the patient without any preparation doing a bedside colonoscopy in the ICU. The applicant states, the physician was able to cleanse the colon, locate the source of the bleed and create hemostasis by placing two clips on the bleed. According to the applicant, the entire colon was visualized to confirm there were no other sources of bleeding, the physician was able to downgrade the patient out of the ICU that same day, and the patient was discharged from the hospital the following day.

The applicant concludes that based on the provided evidence, Pure-Vu® has the ability to improve adenoma detection rates which can reduce the rate of colorectal cancer (CRC) and diagnose and treat emergent patients in a more expeditious fashion by removing the need to have successful pre-procedural preparation that can take time and be very burdensome to the most needy and fragile patients. According to the applicant, Pure-Vu® can minimize the number of aborted and early repeat colonoscopies that carry inherent risks and add unnecessary costs to the healthcare system.

Based on the evidence submitted with the application, we explained in the CY 2022 OPPS/ASC proposed rule that we have the following observations. While

[158] Van Keulen KE, Neumann H, Schattenberg JM, Van Esch AAJ, Kievit W, Spaander MCW, Siersema PD. A novel device for intracolonoscopy cleansing of inadequately prepared colonoscopy patients: A feasibility study. Endoscopy. 2019 Jan;51(1):85–92. doi: 10.1055/a–0632–1927. Epub 2018 Jul 11.

[159] Bertiger, Gerald MD Optimizing the Preparation Regimen Prior to Colonoscopy Procedure With the Pure-Vu® System, American Journal of Gastroenterology: October 2018—Volume 113—Issue—p S119–S120.

[160] Helmut Neumann ML, Tim Zimmermann, Gabriel Lang, Jason B. Samarasena, Seth A. Gross, Bhaumik Brahmbhatt, Haleh Pazwash, Vladimir Kushnir. Evaluation of bowel cleansing efficacy in hospitalized patient population using the pure-vu system. Gastrointestinal Endoscopy. 2019;89(6).

the studies provided in support of the Pure-Vu® System measure improvement of bowel preparation using the BBPS, the applicant did not provide data indicating that the improved BBPS directly leads to improved clinical outcomes (for example, reduction of blood loss in LGIB or reduction of missed polyps) based on use of the Pure-Vu® System. Additionally, we noted that the applicant has not provided any studies comparing the efficacy of the Pure-Vu® System to other existing methods or products for irrigation in support of its claims that the product is superior at removing debris from the colon while simultaneously preventing the colon from collapsing, allowing use of the working channel, or improving outcomes. Furthermore, we noted that many of the provided studies were based on small sample sizes, which may affect the quality and reliability of the data provided in support of the technology.

In addition, we noted in the CY 2022 OPPS/ASC proposed rule that it is unclear whether this device would have less utility in the outpatient setting as compared to the inpatient setting, given that patients will typically have time to adequately prepare for scheduled outpatient procedures. We further noted that this device may not be broadly applicable in the outpatient setting and are solicited comment on situations in which this device would have a substantial clinical benefit for patients or subpopulations of patients. For instance, in the outpatient setting, we explained that we are not certain that it would be appropriate to use this device in the case of a patient with a poorly prepared bowel as opposed to simply rescheduling the appointment.

Lastly, we noted that the Helmut *et al.* study noted one procedure-related perforation which required surgical repair and we invited public comments regarding the concern of procedure-related perforation.[161] Based upon the evidence presented, we invited public comments on whether the Pure-Vu® meets the substantial clinical improvement criterion.

Comment: One commenter stated that Pure-Vu® is a unique device with the ability to potentially change a patient's course of care due to its ability to create high-quality colonoscopies in patients that are unable to fully prep for an exam. The commenter stated that they want to make sure that patients who suffer from functional GI and motility disorders which affect the lower GI tract can get the surveillance and care that they need and Pure-Vu® can directly impact this. The commenter asserted there is a direct correlation between being able to provide a high-quality colonoscopy where the more the colon mucosa can be observed and the ability to better diagnose patients.

Response: We appreciate the information provided by the commenter and have taken this into consideration in making our final determination, discussed below.

Comment: In support of the substantial clinical improvement criterion, the applicant submitted a comment. The applicant responded to CMS' concerns in the proposed rule related to the Boston Bowel Preparation Score (BBPS) and stated that this is a measure of the amount of the colon mucosa that can be visualized and is independent of a particular technology or method used to clear fecal matter or debris. The applicant asserted that if significant areas of the colon tissue cannot be visualized due to retained debris, the endoscopist will miss any pathology covered. The applicant stated that this is especially critical as sessile serrated adenomas are pre-cancerous flat lesions that do not protrude from the colon wall making them impossible to detect in the presence of debris. According to the applicant, multiple publications validating the BBPS as a reliable measurement to predict adenoma and/or polyps have been published, for example: The polyp detection percentage in inadequate (BBPS 0, 1) and adequate (BBPS 2, 3) colon prep were 6 percent and 27 percent ($p < 0.0001$), respectively and,[162] the polyp detection rate was 40 percent for patients with a BBPS score >5 compared to 24 percent for patients with a BBPS score of <5 ($p < 0.02$) with an increased percentage of recommendation for repeat procedures in the later group.[163] The applicant further described the Aronchick scale and the Ottawa score which are other validated methods available to assess colon visualization.[164] According to the applicant, these cited studies were based on current standard of care for performing colonoscopy. The applicant stated that despite use of the current standard of irrigation and suction through the working channel of a colonoscope, these patients continued to have inadequate bowel preparation over 7 percent. The applicant asserted that to the extent there is a reduction in the number of patients that have an inadequate/poor preparation, as noted by a low BBPS score, the endoscopist will improve the overall adenoma detection rate.

According to the applicant, there is a clear relationship between adenoma detection rates to the risk of receiving a diagnosis of an interval cancer as evidenced in an evaluation of 314,872 patients.[165] Citing the article, the applicant states that, ''The risk of interval cancer decreased approximately linearly with increasing adenoma detection rates, without evidence of a threshold effect within the observed range of rates. With adenoma detection rate modeled as a continuous variable, each 1.0 percent increase in the rate predicted a 3.0 percent decrease in the risk of interval cancer (hazard ration, 0.97;95 percent CI, 0.96 to 0.98).'' [166] According to the applicant, this study shows the clinical benefit to the patient population with low adenoma detection rates due to inadequate preparation, especially in high risk colorectal cancer patients who present with GI bleeding or a positive screening test, may be significant.

The applicant next responded to CMS' concerns about the sample sizes from the studies used in support of Pure-Vu®. In response, the applicant performed a meta-analysis of the four studies which were performed at different centers with different investigators to minimize the bias of any physician or institution. According to the applicant, for outpatient studies, the overall rate of adequate colonoscopy preparation was 99.4 percent compared to 25.3 percent for baseline; and the overall difference was 74.1 percent (95 percent CI = 60.3 percent, 87.8 percent; $p < 0.0001$); the inpatient study had a lower overall success rate in the Pure-Vu® System (86.2 percent) but the impact of the Pure-Vu® was still dramatic with the overall rate of adequate colonoscopy preparation of 95.0 percent compared to 28.2 percent

[166] Ibid.

for baseline; and the overall difference was 66.8 percent (95 percent CI = 55.5 percent, 78.0 percent; $p < 0.0001$).

Next the applicant responded to CMS' concern that the benefit of Pure-Vu® in the outpatient setting may be limited because patients have more time to prepare for the colonoscopy. According to the applicant, there are many patients that the physician may pre-procedurally deem ready for the examination but upon insertion of the colonoscope the patient is found to be inadequately prepared to receive a quality examination. The applicant stated that, rather than terminate the procedure at this point, an endoscopist can remove the colonoscope and load the Pure-Vu® and complete the examination. The applicant added that in the studies used in the meta-analysis, Pure-Vu® was able to convert inadequate preparation to adequate even in patients with a BBPS of 0 in one or more segments of the colon while the patient was on the table and under sedation, thereby avoiding another procedure. The applicant asserted that in addition to the risks associated with a repeat procedure, approximately 54 percent of patients do not come back for the repeat examination which places these patients at a higher risk for CRC.[167] The applicant added that since history of inadequate preparation is one of the main indicators of poor preparation along with advanced age, those with motility issues, patients allergic to the PEG (key ingredient in the purgatives) and those with comorbidities there is no guarantee the follow-up colonoscopy will be successful.

Next the applicant addressed CMS' concern that there was no data to support that Pure-Vu® minimizes the colon collapsing during suctioning of debris while allowing use of the working channel of the scope. The applicant asserted that the provision of a pulsed mixture of air and fluid to break up and facilitate removal of adherent films of fecal matter from the mucosal lining of the colon, at a much higher energy level than irrigation through a scope, allows the endoscopist to simultaneously suction the debris, which is not possible through a scope with only one working channel. The applicant stated, the simultaneous action of pumping water and air into the colon while suctioning out debris inherently reduces the likelihood that the colon will collapse.

Lastly, in response to CMS' concern related to one procedure-related perforation, the applicant stated that this study focused on the inpatient population which is known to be at higher risk for perforation than the outpatient population.[168] The applicant stated that this patient was discharged 48 hours post operatively and fully recovered with no additional clinical sequelae. The applicant asserted that inpatient cases undergoing colonoscopy are a high risk for perforation with a rate of approximately 1 in 500, which is more than two times higher than the outpatient population.[169] The applicant stated that since the Helmut paper they have developed the Gen 2 Pure-Vu® and have received no adverse reports in the last 18 months even with increased utilization across multiple institutions.

Response: We appreciate the comment in support of the clinical benefits of the Pure-Vu® system. As we stated in the FY 2022 IPPS/LTCH final rule (86 FR 45056), we continue to have concerns regarding the substantial clinical improvement criterion. In response to commenters' assertion that there is a direct correlation to being able to provide high-quality colonoscopy where the more the colon mucosa can be observed and the ability to better diagnose patients, we agree but are aware that correlation is not causation. While these data are correlated, without data testing this relationship (for example, the Pure-Vu® system and patient outcomes such as adenoma detection rates), we cannot be certain this relationship is true and not spurious or mediated by other factors. We note the further input provided by the applicant concerning the validity of the BBPS and agree that this is likely a well validated scoring tool. However, we remain concerned that the studies provided in support of the Pure-Vu® System measure improvement of bowel preparation using the BBPS but do not provide data indicating that the improved BBPS directly leads to improved clinical outcomes. In addition, the studies did not demonstrate outcomes in the emergent situations the Pure-Vu® System is intended to address. While an additional study provided by the applicant in their comment indicated a general link between improved BBPS and advanced adenoma detection rates, we note that the study occurred in patients undergoing screening colonoscopy, and did not include the use of the Pure-Vu® system. We also remain concerned about the lack of studies comparing the Pure-Vu® System to other existing methods or products for irrigation in support of its claims that the product is superior at removing debris from the colon while simultaneously preventing the colon from collapsing, allowing use of the working channel, or improving outcomes.

After consideration of the public comments we received and our review of the device pass-through application, we are not approving the Pure-Vu® system for transitional pass-through payment status in CY 2022 because the product does not meet the substantial clinical improvement criterion. Because we have determined that the Pure-Vu® system does not meet the substantial clinical improvement criterion, we are not evaluating whether the device meets the cost criterion.

(6) Xenoscope™

Xenocor Inc. submitted an application for a new device category for transitional pass-through payment status for the Articulating Xenoscope Laparoscope (hereinafter referred to as the Xenoscope™) by the March 2021 quarterly deadline for CY 2022. The applicant described the Xenoscope™ as a disposable laparoscope which consists of a high-definition camera chip on the tip of a composite shaft, paired with led lights with a handle comprised of a clamshell design and made with molded plastic. The applicant stated that the Xenoscope™ provides visualization in the abdominal and thoracic cavities through small, minimally invasive incisions for diagnostic and therapeutic laparoscopic procedures in a similar fashion to established, reusable versions of laparoscopes. It is paired with an image processing unit, the Xenobox, that can plug into any HD monitor to display anatomy in the abdomen, pelvis or chest. The Xenobox uses pre-installed firmware that is upgradable.

The applicant claimed that the Xenoscope™ is the first disposable laparoscope. The applicant also claimed that the use of the Xenoscope™ reduces the number of cords in the operating room, eliminates intraoperative fogging and associated image compromise and eliminates up-front capital expenditures associated with reusable laparoscopes.

With respect to the newness criterion, the Xenoscope™ received FDA 510(k) clearance on January 27, 2020, based on

[167] Murphy CJ, Jewel Samadder N, Cox K, *et al.* Outcomes of Next-Day Versus Non-next-Day Colonoscopy After an Initial Inadequate Bowel Preparation. Dig Dis Sci. 2016 Jan;61(1):46–52.

[169] Gatto NM, Frucht H, Sundararajan V, *et al.* Risk of perforation after colonoscopy and sigmoidoscopy: a population-based study. J Natl Cancer Inst. 2003 Feb 5;95(3):230–6.

a determination of substantial equivalence to a legally marketed predicate device. The Xenoscope™ is indicated for use in diagnostic and therapeutic procedures for endoscopy and endoscopic surgery within the thoracic and peritoneal cavities including the female reproductive organs. We received the application for a new device category for transitional pass-through payment status for the Xenoscope™ on August 6, 2020, which is within 3 years of the date of the initial FDA marketing authorization. We invited public comments in the CY 2022 OPPS/ASC proposed rule on whether the Xenoscope™ meets the newness criterion.

We did not receive any comments with respect to the newness criterion.

We agree with the applicant that the Xenoscope™ meets the newness criterion because we received its device pass-through application on August 6, 2020, which is within 3 years of January 27, 2020, the date of FDA 510(k) clearance.

With respect to the eligibility criterion at § 419.66(b)(3), according to the applicant, the use of the Xenoscope™ is integral to the service, is used for one patient only, comes in contact with human skin, and is surgically implanted or inserted into the patient. Specifically, the applicant explained that the Xenoscope™ is plugged into the Xenobox image processing unit (which is connected to an HD monitor and an A/C power source). A surgeon then makes a small incision and a trocar (tube-like device with a seal to maintain abdominal pressure) is inserted to gain access to the body cavity. The Xenoscope™ is then inserted through the trocar in order to provide a full view of the anatomy for diagnostic and therapeutic procedures.

The applicant also claimed the Xenoscope™ meets the device eligibility requirements of § 419.66(b)(4) because it is not an instrument, apparatus, implement, or item for which depreciation and financing expenses are recovered, and it is not a supply or material furnished incident to a service. We invited public comments on whether the Xenoscope™ meets the eligibility criteria at § 419.66(b).

We did not receive any comments in regard to the eligibility criteria at § 419.66(b). We agree with the applicant and believe that the Xenoscope™ meets the eligibility criterion at § 419.66(b)(3) and (4).

The criteria for establishing new device categories are specified at § 419.66(c). The first criterion, at § 419.66(c)(1), provides that CMS determines that a device to be included in the category is not appropriately described by any of the existing categories or by any category previously in effect, and was not being paid for as an outpatient service as of December 31, 1996. The applicant described the Xenoscope™ as disposable laparoscope. The applicant reported that it does not believe that the Xenoscope™ is described by an existing category and requested category descriptor ''Single-use laparoscopes.'' The applicant also stated that the currently existing category, C1748—Endoscope, single-use (that is, disposable), upper gi, imaging/illumination device (insertable), did not describe this device because it is limited to single-use duodenoscopes inserted orally, to reach the small intestine versus minimally invasive abdominal surgery (laparoscopy). We stated in the CY 2022 OPPS/ASC proposed rule that we have not identified an existing pass-through payment category that is applicable to the Xenoscope™. We invited public comment on whether the Xenoscope™ meets the device category criterion.

We did not receive any comments in regard to the eligibility criteria at § 419.66(c). We continue to believe that the Xenoscope™ meets the eligibility criterion at § 419.66(c)(1) because we have not identified an existing pass-through payment category that is applicable to the Xenoscope™.

The second criterion for establishing a device category, at § 419.66(c)(2), provides that CMS determines either of the following: (i) That a device to be included in the category has demonstrated that it will substantially improve the diagnosis or treatment of an illness or injury or improve the functioning of a malformed body part compared to the benefits of a device or devices in a previously established category or other available treatment; or (ii) for devices for which pass-through status will begin on or after January 1, 2020, as an alternative to the substantial clinical improvement criterion, the device is part of the FDA's Breakthrough Devices Program and has received FDA marketing authorization.

With respect to the substantial clinical improvement criterion, the applicant stated that the Xenoscope™ provides a substantial clinical improvement over reusable laparoscopes because of its single-use nature. Specifically, the applicant claimed that because the Xenoscope™ is a disposable, single-use device, the Xenoscope™ provides for less risk of scope-related cross-contamination and infection from improperly handled or reprocessed scopes compared to traditional laparoscopy.

The applicant also claimed that the Xenoscope™ includes a fog-free scope and provides a substantial clinical improvement over currently available laparoscopes which, according to the applicant, fog often, and can put patients at risk for surgical errors and more time under anesthesia. Additionally, the applicant claimed that the Xenoscope™ reaches 104 degrees Fahrenheit at the tip, eliminating risk of patient burns and drape fires associated with hotter Xenon bulbs used in currently available laparoscopes.

Lastly, that applicant stated that there can be significant economic benefits through the use of the Xenoscope™ due to the processing costs and up-front capital expenditures required for reusable laparoscopes.

In support of the assertion that the Xenoscope™ reduces the risk of cross-contamination from improperly cleaned reusable laparoscopic instruments, the applicant referenced two articles. The first article was published in 2002 and describes the problem of surgical site infection (SSI), the Centers for Disease Control (CDC) guidelines for SSI, and some cases of SSI related to improper cleaning of reusable laparoscopic instruments. The article also discusses practices to avoid these infections.[170] The applicant also submitted a draft of a manuscript titled ''Novel Laparoscopic System for Quality Improvement and Increased Efficiency'' that summarizes some of the evidence that laparoscopy, in general, is superior to open surgical approaches in terms of pain management and infection risk.[171]

In support of the claim that the Xenoscope™ eliminates the risk of patient burns and drape fires associated with Xenon bulbs used by currently available laparoscopes, the applicant submitted two articles. The first was an article published in 2011 that discusses the problem of laparoscopic related burn injuries and a potential solution using Active Electrode Monitoring (AEM).[172] AEM instruments reportedly use a ''shielded and monitored'' design to prevent the risk of stray energy burn injury from insulation failure and capacitive coupling. According to the article, the AEM technology is currently

[170] Hewitt, A. (2002, November 1). *Laparoscopic Instruments: Handle with Care.* Infection Control Today. *https://www.infectioncontroltoday.com/view/laparoscopic-instruments-handle-care.*

[171] Elliott, K.W. & Heilbraun, E. (2020). *Novel Laparoscopic System for Quality Improvement and Increased Efficiency.* Manuscript submitted for publication.

[172] Encision Inc. (2011, April 1*). Method of Reducing Stray Energy Burns in Laparoscopic Surgery.* Medical Design Briefs. *https://www.medicaldesignbriefs.com/component/content/article/mdb/tech-briefs/9500.*

licensed by Intuitive Surgical's da Vinci® Surgical Systems. The applicant does not compare the Xenoscope™ to AEM technology in terms of burn injury reduction. The second article examined the variation and extent of thermal injuries that could be induced by laparoscopic light sources to porcine tissue. In the study, the maximum temperature at the tip of the optical cable varied between 119.5 degrees C and 268.6 degrees C. When surgical drapes were exposed to the tip of the light source, the time to char was 3–6 seconds. The degree and volume of injury increased with longer exposure times, and significant injury was recorded with the optical cable 3 mm from the skin.[173]

In support of the claim that there could be significant economic benefits realized through the use the Xenoscope™ compared to reusable laparoscopes, the applicant also referenced the manuscript entitled ''Novel Laparoscopic System for Quality Improvement and Increased Efficiency''.[174] In this study, a three-page survey was created to collect data regarding laparoscope-related practices and costs. The survey was completed by three different institutions, including an ambulatory surgery center (ASC), a rural hospital and a suburban hospital. The sites provided the capital equipment cost required at the time of purchase at their facility which ranged from $837,184 to $2,786,348. The average cost per use for one surgical procedure involving a reusable laparoscope was $1,019.24 across the three institutions.

We stated in the CY 2022 OPPS/ASC proposed rule that we are concerned that the application and the articles submitted as evidence of substantial clinical improvement discuss potential adverse effects from laparoscopic procedures, but do not appear to directly show any clinical improvement that result from the use of the Xenoscope™. The applicant has provided evidence which seems to rely on indirect inferences from other sources of data. The articles provided did not involve the clinical use of the Xenoscope™ and did not compare the device to an appropriate comparator, such as a reusable laparoscope. Therefore, we stated that it is difficult to determine whether the Xenoscope™ offers substantial clinical improvement over standard, reusable laparoscopes based on the information provided. In order to demonstrate substantial clinical improvement over currently available treatments, we consider supporting evidence, preferably published peer-reviewed clinical trials, that shows improved clinical outcomes, such as reduction in mortality, complications, subsequent interventions, future hospitalizations, recovery time, pain, or a more rapid beneficial resolution of the disease process compared to the standard of care.

We invited public comment on whether the Xenoscope™ meets the substantial clinical improvement criterion.

Comment: One commenter stated their opposition to the use of HCPCS code 58570 (Tlh uterus 250 g or less) in conjunction with the Xenoscope™. The commenter stated that multiple searches in PubMed did not produce evidence of use or clinical improvement for gynecologic laparoscopic procedures, including HCPCS code 58570 (Tlh uterus 250 g or less). The commenter asserted that Obstetrician-gynecologists and gynecologic oncologists are the primary billers of 58570 and employ laparoscopy for many other surgeries such as tubal ligation and hysterectomy, positioning them as potential high-utilizers of new devices such as the Xenoscope™. The commenter stated their concern for the unintended consequences of promoting the payment of a device for which a substantial clinical improvement in gynecologic surgery is undetermined.[175]

Response: We appreciate the input from the commenter and we have noted the lack of data demonstrating evidence of use or clinical improvement for gynecologic laparoscopic procedures. We refer the commenter to our final response and determination regarding the substantial clinical improvement criterion below for a discussion of this concern. However, we note that the indication for use as stated by the FDA in the 510(k) clearance letter is, ''The Articulating Xenoscope™ is intended to be used in diagnostic and therapeutic procedures for endoscopy and endoscopic surgery within the thoracic and peritoneal cavities including the female reproductive organs.'' Given the role of the FDA in defining device indications, we believe the device is appropriately described by HCPCS 58570.

Comment: A commenter representing Xenocor, Inc. stated that the safety profile for patients could be improved in the following ways: (1) Cross-contamination for the Xenoscope™ is not possible; (2) the Xenoscope™ has a top temperature of 129 degrees Fahrenheit where one of the most frequent causes of operating room fires and burns are traditional, reusable laparoscopes which often exceed 350 degrees Fahrenheit; (3) the Xenoscope™'s composite shaft is non-conductive which avoids risks with traditional laparoscopes which can arc stray current when using monopolar electrocautery where the scope acts as an antenna and burns adjacent structures; and (4) the Xenoscope™ eliminates fog and sees better through smoke and steam than any currently marketed resuables.

We also received multiple comments stating general support for the Xenoscope™. Two of the commenters stated that the Xenoscope™ reaches a temperature of 129 °F, as opposed to the 350 °F reached by light cords which can cause burns or patient injury, is fully shielded and will not cause stray energy burns or arcing issues that exist with other like products, its single-use nature ensures complete sterility and consistent image quality due to the new out of the box feature with each use, and the fog-free picture helps to ensure a consistent clear visualization of critical anatomy.

One commenter stated the benefits of the Xenoscope™ are critical to both patient safety and cost control. Another commenter stated that having a disposable scope would enable surgery to be done more easily in a wider variety of places while also eliminating many problems associated with traditional scopes. Another commenter added that the ability to use Xenoscope™ with any USB enabled video device obviates the need for expensive auxiliary light sources, video drivers, etc.

Response: We thank the commenters for their input. We agree that improved patient safety and a reduction in complications are clinical outcomes that may represent a substantial clinical improvement. However, we remain concerned that we did not receive any data to demonstrate improved outcomes using the Xenoscope™. Further, we remain concerned that the applicant did not provide any comparison to existing technologies such as reusable scopes to demonstrate an improvement in clinical outcomes. Lastly, we note that the cost effectiveness of a technology does not substantially improve the diagnosis or treatment of a disease and therefore is not relevant to the discussion of substantial clinical improvement.

[175] Choosing the route of hysterectomy for benign disease. Committee Opinion No. 701. American College of Obstetricians and Gynecologists. Obstet Gynecol 2017:129:e155–9.

After consideration of the public comments we received and our review of the device pass-through application, we are not approving the Xenoscope™ for transitional pass-through payment status in CY 2022 because the product does not meet the substantial clinical improvement criterion. Because we have determined that the Xenoscope™ does not meet the substantial clinical improvement criterion, we are not evaluating whether the device meets the cost criterion.

B. Device-Intensive Procedures

1. Background

Under the OPPS, prior to CY 2017, device-intensive status for procedures was determined at the APC level for APCs with a device offset percentage greater than 40 percent (79 FR 66795). Beginning in CY 2017, CMS began determining device-intensive status at the HCPCS code level. In assigning device-intensive status to an APC prior to CY 2017, the device costs of all the procedures within the APC were calculated and the geometric mean device offset of all of the procedures had to exceed 40 percent. Almost all of the procedures assigned to device-intensive APCs utilized devices, and the device costs for the associated HCPCS codes exceeded the 40-percent threshold. The no cost/full credit and partial credit device policy (79 FR 66872 through 66873) applies to device-intensive APCs and is discussed in detail in section IV.B. of the CY 2022 OPPS/ASC proposed rule (86 FR 42112 through 42114). A related device policy was the requirement that certain procedures assigned to device-intensive APCs require the reporting of a device code on the claim (80 FR 70422) and is discussed in detail in section IV.B.3 of the CY 2022 OPPS/ASC proposed rule (86 FR 42114). For further background information on the device-intensive APC policy, we refer readers to the CY 2016 OPPS/ASC final rule with comment period (80 FR 70421 through 70426).

a. HCPCS Code-Level Device-Intensive Determination

As stated earlier, prior to CY 2017, under the device-intensive methodology we assigned device-intensive status to all procedures requiring the implantation of a device that were assigned to an APC with a device offset greater than 40 percent and, beginning in CY 2015, that met the three criteria listed below. Historically, the device-intensive designation was at the APC level and applied to the applicable procedures within that APC. In the CY 2017 OPPS/ASC final rule with comment period (81 FR 79658), we changed our methodology to assign device-intensive status at the individual HCPCS code level rather than at the APC level. Under this policy, a procedure could be assigned device-intensive status regardless of its APC assignment, and device-intensive APC designations were no longer applied under the OPPS or the ASC payment system.

We believe that a HCPCS code-level device offset is, in most cases, a better representation of a procedure's device cost than an APC-wide average device offset based on the average device offset of all of the procedures assigned to an APC. Unlike a device offset calculated at the APC level, which is a weighted average offset for all devices used in all of the procedures assigned to an APC, a HCPCS code-level device offset is calculated using only claims for a single HCPCS code. We believe that this methodological change results in a more accurate representation of the cost attributable to implantation of a high-cost device, which ensures consistent device-intensive designation of procedures with a significant device cost. Further, we believe a HCPCS code-level device offset removes inappropriate device-intensive status for procedures without a significant device cost that are granted such status because of their APC assignment.

Under our existing policy, procedures that meet the criteria listed in section IV.B.1.b. of the CY 2022 OPPS/ASC proposed rule (86 FR 42112 through 42114) are identified as device-intensive procedures and are subject to all the policies applicable to procedures assigned device-intensive status under our established methodology, including our policies on device edits and no cost/full credit and partial credit devices discussed in sections IV.B.3. and IV.B.4. of the CY 2022 OPPS/ASC proposed rule, respectively (86 FR 42114 thorough 42115).

b. Use of the Three Criteria To Designate Device-Intensive Procedures

We clarified our established policy in the CY 2018 OPPS/ASC final rule with comment period (82 FR 52474), where we explained that device-intensive procedures require the implantation of a device and additionally are subject to the following criteria:

- All procedures must involve implantable devices that would be reported if device insertion procedures were performed;
- The required devices must be surgically inserted or implanted devices that remain in the patient's body after the conclusion of the procedure (at least temporarily); and
- The device offset amount must be significant, which is defined as exceeding 40 percent of the procedure's mean cost.

We changed our policy to apply these three criteria to determine whether procedures qualify as device-intensive in the CY 2015 OPPS/ASC final rule with comment period (79 FR 66926), where we stated that we would apply the no cost/full credit and partial credit device policy—which includes the three criteria listed previously—to all device-intensive procedures beginning in CY 2015. We reiterated this position in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70424), where we explained that we were finalizing our proposal to continue using the three criteria established in the CY 2007 OPPS/ASC final rule with comment period for determining the APCs to which the CY 2016 device intensive policy will apply. Under the policies we adopted in CYs 2015, 2016, and 2017, all procedures that require the implantation of a device and meet the previously described criteria are assigned device-intensive status, regardless of their APC placement.

2. Device-Intensive Procedure Policy for CY 2019 and Subsequent Years

As part of our effort to better capture costs for procedures with significant device costs, in the CY 2019 OPPS/ASC final rule with comment period (83 FR 58944 through 58948), for CY 2019, we modified our criteria for device-intensive procedures. We had heard from stakeholders that the criteria excluded some procedures that stakeholders believed should qualify as device-intensive procedures. Specifically, we were persuaded by stakeholder arguments that procedures requiring expensive surgically inserted or implanted devices that are not capital equipment should qualify as device-intensive procedures, regardless of whether the device remains in the patient's body after the conclusion of the procedure. We agreed that a broader definition of -device-intensive procedures was warranted, and made two modifications to the criteria for CY 2019 (83 FR 58948). First, we allowed procedures that involve surgically inserted or implanted single-use devices that meet the device offset percentage threshold to qualify as device-intensive procedures, regardless of whether the device remains in the patient's body after the conclusion of the procedure. We established this policy because we no longer believe that whether a device remains in the patient's body should

affect a procedure's designation as a device-intensive procedure, as such devices could, nonetheless, comprise a large portion of the cost of the applicable procedure. Second, we modified our criteria to lower the device offset percentage threshold from 40 percent to 30 percent, to allow a greater number of procedures to qualify as device-intensive. We stated that we believe allowing these additional procedures to qualify for -device-intensive status will help ensure these procedures receive more appropriate payment in the ASC setting, which will help encourage the provision of these services in the ASC setting. In addition, we stated that this change would help to ensure that more procedures containing relatively high-cost devices are subject to the device edits, which leads to more correctly coded claims and greater accuracy in our claims data. Specifically, for CY 2019 and subsequent years, we finalized that—device-intensive procedures will be subject to the following criteria:

- All procedures must involve implantable devices assigned a CPT or HCPCS code;
- The required devices (including single-use devices) must be surgically inserted or implanted; and
- The device offset amount must be significant, which is defined as exceeding 30 percent of the procedure's mean cost (83 FR 58945).

In addition, to further align the device-intensive policy with the criteria used for device pass-through payment status, we finalized, for CY 2019 and subsequent years, that for purposes of satisfying the device-intensive criteria, a device-intensive procedure must involve a device that:

- Has received FDA marketing authorization, has received an FDA investigational device exemption (IDE), and has been classified as a Category B device by FDA in accordance with §§ 405.203 through 405.207 and 405.211 through 405.215, or meets another appropriate FDA exemption from premarket review;
- Is an integral part of the service furnished;
- Is used for one patient only;
- Comes in contact with human tissue;
- Is surgically implanted or inserted (either permanently or temporarily); and
- Is not either of the following:

(a) Equipment, an instrument, apparatus, implement, or item of the type for which depreciation and financing expenses are recovered as depreciable assets as defined in Chapter 1 of the Medicare Provider Reimbursement Manual (CMS Pub. 15–1); or

(b) A material or supply furnished incident to a service (for example, a suture, customized surgical kit, scalpel, or clip, other than a radiological site marker) (83 FR 58945).

In addition, for new HCPCS codes describing procedures requiring the implantation of devices that do not yet have associated claims data, in the CY 2017 OPPS/ASC final rule with comment period (81 FR 79658), we finalized a policy for CY 2017 to apply device-intensive status with a default device offset set at 41 percent for new HCPCS codes describing procedures requiring the implantation or insertion of a device that did not yet have associated claims data until claims data are available to establish the HCPCS code-level device offset for the procedures. This default device offset amount of 41 percent was not calculated from claims data; instead, it was applied as a default until claims data were available upon which to calculate an actual device offset for the new code. The purpose of applying the 41-percent default device offset to new codes that describe procedures that implant or insert devices was to ensure ASC access for new procedures until claims data become available.

As discussed in the CY 2019 OPPS/ASC proposed rule and final rule with comment period (83 FR 37108 through 37109 and 58945 through 58946, respectively), in accordance with our policy stated previously to lower the device offset percentage threshold for procedures to qualify as device-intensive from greater than 40 percent to greater than 30 percent, for CY 2019 and subsequent years, we modified this policy to apply a 31-percent default device offset to new HCPCS codes describing procedures requiring the implantation of a device that do not yet have associated claims data until claims data are available to establish the HCPCS code-level device offset for the procedures. In conjunction with the policy to lower the default device offset from 41 percent to 31 percent, we continued our current policy of, in certain rare instances (for example, in the case of a very expensive implantable device), temporarily assigning a higher offset percentage if warranted by additional information such as pricing data from a device manufacturer (81 FR 79658). Once claims data are available for a new procedure requiring the implantation or insertion of a device, device-intensive status is applied to the code if the HCPCS code-level device offset is greater than 30 percent, according to our policy of determining—device-intensive status by calculating the HCPCS code-level device offset.

In addition, in the CY 2019 OPPS/ASC final rule with comment period, we clarified that since the adoption of our policy in effect as of CY 2018, the associated claims data used for purposes of determining whether or not to apply the default device offset are the associated claims data for either the new HCPCS code or any predecessor code, as described by CPT coding guidance, for the new HCPCS code. Additionally, for CY 2019 and subsequent years, in limited instances where a new HCPCS code does not have a predecessor code as defined by CPT, but describes a procedure that was previously described by an existing code, we use clinical discretion to identify HCPCS codes that are clinically related or similar to the new HCPCS code but are not officially recognized as a predecessor code by CPT, and to use the claims data of the clinically related or similar code(s) for purposes of determining whether or not to apply the default device offset to the new HCPCS code (83 FR 58946). Clinically related and similar procedures for purposes of this policy are procedures that have little or no clinical differences and use the same devices as the new HCPCS code. In addition, clinically related and similar codes for purposes of this policy are codes that either currently or previously describe the procedure described by the new HCPCS code. Under this policy, claims data from clinically related and similar codes are included as associated claims data for a new code, and where an existing HCPCS code is found to be clinically related or similar to a new HCPCS code, we apply the device offset percentage derived from the existing clinically related or similar HCPCS code's claims data to the new HCPCS code for determining the device offset percentage. We stated that we believe that claims data for HCPCS codes describing procedures that have minor differences from the procedures described by new HCPCS codes will provide an accurate depiction of the cost relationship between the procedure and the device(s) that are used, and will be appropriate to use to set a new code's device offset percentage, in the same way that predecessor codes are used. If a new HCPCS code has multiple predecessor codes, the claims data for the predecessor code that has the highest individual HCPCS-level device offset percentage is used to determine whether the new HCPCS code qualifies for device-intensive status. Similarly, in the event that a new HCPCS code does

not have a predecessor code but has multiple clinically related or similar codes, the claims data for the clinically related or similar code that has the highest individual HCPCS level device offset percentage is used to determine whether the new HCPCS code qualifies for device-intensive status.

As we indicated in the CY 2019 OPPS/ASC proposed rule and final rule with comment period, additional information for our consideration of an offset percentage higher than the default of 31 percent for new HCPCS codes describing procedures requiring the implantation (or, in some cases, the insertion) of a device that do not yet have associated claims data, such as pricing data or invoices from a device manufacturer, should be directed to the Division of Outpatient Care, Mail Stop C4–01–26, Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, MD 21244–1850, or electronically at *outpatientpps@cms.hhs.gov*. Additional information can be submitted prior to issuance of an OPPS/ASC proposed rule or as a public comment in response to an issued OPPS/ASC proposed rule. Device offset percentages will be set in each year's final rule.

As discussed in section X.E of the CY 2022 OPPS/ASC proposed rule (86 FR 42188 through 42190), given our concerns regarding CY 2020 data as a result of the COVID–PHE, we proposed to use CY 2019 claims data to establish CY 2022 prospective rates. While we continue to believe CY 2019 represents the best full year of claims data for ratesetting, we believe our policy of temporarily assigning a higher offset percentage if warranted by additional information would provide a more accurate device offset percentage for certain procedures. Specifically, for procedures that were assigned device-intensive status, but were assigned a default device offset percentage of 31 percent or a device offset percentage based on claims from a clinically-similar code in the absence of CY 2019 claims data, we proposed to assign a device offset percentage for such procedures based on CY 2020 data if CY 2020 claims information is available. While we believe that CY 2019 claims data is a better basis for CY 2022 OPPS rates overall, because we have specifically noted that we would consider using more recent data than the data available for ratesetting in a given year to determine device offset percentages for services that do not have any claims data in the year used for ratesetting, we believe it would be consistent with this policy for us to use CY 2020 claims data to determine the device offset percentage for services that meet the above criteria.

For CY 2022, our proposal would assign device offset percentages using CY 2020 claims data to the following 11 procedures:

- 0266T (Implantation or replacement of carotid sinus baroreflex activation device; total system (includes generator placement, unilateral or bilateral lead placement, intra-operative interrogation, programming, and repositioning, when performed));
- 0414T (Removal and replacement of permanent cardiac contractility modulation system pulse generator only);
- 0511T (Removal and reinsertion of sinus tarsi implant);
- 0587T (Percutaneous implantation or replacement of integrated single device neurostimulation system including electrode array and receiver or pulse generator, including analysis, programming, and imaging guidance when performed, posterior tibial nerve);
- 0600T (Ablation, irreversible electroporation; 1 or more tumors per organ, including imaging guidance, when performed, percutaneous);
- 0614T (Removal and replacement of substernal implantable defibrillator pulse generator);
- 66987 (Extracapsular cataract removal with insertion of intraocular lens prosthesis (1-stage procedure), manual or mechanical technique (for example, irrigation and aspiration or phacoemulsification), complex, requiring devices or techniques not generally used in routine cataract surgery (for example, iris ansion device, suture support for intraocular lens, or primary posterior capsulorrhexis) or performed on patients in the amblyogenic developmental stage; with endoscopic cyclophotocoagulation);
- 66988 (Extracapsular cataract removal with insertion of intraocular lens prosthesis (1 stage procedure), manual or mechanical technique (for example, irrigation and aspiration or phacoemulsification); with endoscopic cyclophotocoagulation);
- C9757 (Laminotomy (hemilaminectomy), with decompression of nerve root(s), including partial facetectomy, foraminotomy and excision of herniated intervertebral disc, and repair of annular defect with implantation of bone anchored annular closure device, including annular defect measurement, alignment and sizing assessment, and image guidance; 1 interspace, lumbar);
- C9765 (Revascularization, endovascular, open or percutaneous, lower extremity artery(ies), except tibial/peroneal; with intravascular lithotripsy, and transluminal stent placement(s), includes angioplasty within the same vessel(s), when performed); and
- C9767 (Revascularization, endovascular, open or percutaneous, lower extremity artery(ies), except tibial/peroneal; with intravascular lithotripsy and transluminal stent placement(s), and atherectomy, includes angioplasty within the same vessel(s), when performed).

Comment: Many commenters supported our proposal to establish the CY 2022 device offset percentage using CY 2020 claims data for device-intensive procedures with no claims in the CY 2019 claims data. One commenter requested that we use CY 2020 claims where CY 2020 claims volume is greater than CY 2019 claims volume. Another commenter requested that we apply the greater of the device offset percentage when comparing CY 2019 claims with CY 2020 claims.

Response: We thank the commenters for their support. We are not accepting the recommendation to apply data from CY 2020 claims where CY 2020 claims volume is greater than CY 2019 claims volume or to apply the greater of the device offset percentage when comparing CY 2019 claims with CY 2020 claims. Specifically, as discussed in section X.E of this final rule with comment period, we continue to believe CY 2019 represents the best full year of claims data for ratesetting. Therefore, we believe our proposal provides a more accurate device offset percentage only for certain device-intensive procedures that had no claims data in CY 2019 and for which the device offset percentage would otherwise be based on the default percentage or a similar procedure code's device offset percentage. *Comment:* Many commenters requested that we set the device offset percentage for several new procedures using the predecessor code's device offset percentage based on CY 2019 claims data. These procedures include:

- The predecessor CPT code 0191T in assigning the device offset percentage for CPT code 66989 (Extracapsular cataract removal with insertion of intraocular lens prosthesis (1-stage procedure), manual or mechanical technique (for example, irrigation and aspiration or phacoemulsification), complex, requiring devices or techniques not generally used in routine cataract surgery (for example, iris expansion device, suture support for intraocular lens, or primary posterior capsulorrhexis) or performed on patients in the amblyogenic developmental stage; with insertion of intraocular (for example, trabecular

meshwork, supraciliary, suprachoroidal) anterior segment aqueous drainage device, without extraocular reservoir, internal approach, one or more);

- The predecessor CPT code 0191T in assigning the device offset percentage for CPT code 66991 (Extracapsular cataract removal with insertion of intraocular lens prosthesis (1 stage procedure), manual or mechanical technique (for example, irrigation and aspiration or phacoemulsification); with insertion of intraocular (for example, trabecular meshwork, supraciliary, suprachoroidal) anterior segment aqueous drainage device, without extraocular reservoir, internal approach, one or more);
- The predecessor CPT code 0191T in assigning the device offset percentage for CPT code 0671T (Insertion of anterior segment aqueous drainage device into the trabecular meshwork, without external reservoir, and without concomitant cataract removal, one or more);
- The predecessor CPT code 0548T in assigning the device offset percentage for CPT code 53451 (Periurethral transperineal adjustable balloon continence device; bilateral insertion, including cystourethroscopy and imaging guidance);
- The predecessor CPT code 0549T in assigning the device offset percentage for CPT code 53452 (Periurethral transperineal adjustable balloon continence device; unilateral insertion, including cystourethroscopy and imaging guidance); and
- The predecessor HCPCS code C9752 in assigning the device offset percentage for CPT code 64628 (Thermal destruction of intraosseous basivertebral nerve, including all imaging guidance; first 2 vertebral bodies, lumbar or sacral).

Additionally, at the August 23, 2021 HOP Panel Meeting, a presenter requested that we use the predecessor CPT code 64568 in assigning the device offset percentage for CPT code 64582 (Open implantation of hypoglossal nerve neurostimulator array, pulse generator, and distal respiratory sensor electrode or electrode array). Based on the information presented at the meeting, the HOP Panel recommended we use CPT code 64568 to assign the device offset percentage for CPT code 64582.

Response: We agree with the commenters and the HOP Panel's recommendation. We note that we inadvertently did not apply the device offset percentage to several new HCPCS codes where claims data for a predecessor code was available. Therefore, we are revising the device offset percentage for these procedures for this final rule with comment period using CY 2019 claims data from these procedures' predecessor codes.

Comment: A number of commenters recommended we assign device-intensive status to CPT codes 0627T (Percutaneous injection of allogeneic cellular and/or tissue-based product, intervertebral disc, unilateral or bilateral injection, with fluoroscopic guidance, lumbar; first level) and 0630T (Percutaneous injection of allogeneic cellular and/or tissue-based product, intervertebral disc, unilateral or bilateral injection, with ct guidance, lumbar; each additional level (list separately in addition to code for primary procedure)).

Response: We appreciate the commenters' recommendation. As we stated in the CY 2022 OPPS/ASC proposed rule (86 FR 42113), we finalized, for CY 2019 and subsequent years, that for purposes of satisfying the device-intensive criteria, a device-intensive procedure must involve a device that ''has received FDA marketing authorization, has received an FDA investigational device exemption (IDE), and has been classified as a Category B device by FDA in accordance with §§ 405.203 through 405.207 and 405.211 through 405.215, or meets another appropriate FDA exemption from premarket review.'' The products involved when reporting CPT code 0627T and 0630T that the commenter believed should necessitate a device intensive designation do not meet this requirement. Therefore, we are not accepting the commenters' recommendations and are not granting device-intensive status to these codes.

Comment: One commenter requested that we assign HCPCS code C9778 (Colpopexy, vaginal; minimally invasive extra-peritoneal approach (sacrospinous)) device-intensive status as this procedure meets our device-intensive criteria.

Response: After further review, we agree with the commenter that HCPCS code C9778 meets our criteria for device-intensive status. We are accepting the commenter's recommendation and assigning a default device offset percentage of 31 percent to HCPCS code C9778 for CY 2022.

Comment: One commenter recommended assigning CPT code 66179 (Aqueous shunt to extraocular equatorial plate reservoir, external approach; without graft) as device-intensive as the procedure's device offset percentage is 32.78 percent in Addendum P to the CY 2022 OPPS/ASC proposed rule, which exceeds our 30-percent threshold for device-intensive status.

Response: We have reviewed this procedure code with our medical officers and have determined that this procedure satisfies all of our device-intensive criteria. In particular, we agree with the commenter that this procedure involves an implantable single-use device and that the device meets the requirements for the procedure to receive device-intensive assignment.

Comment: Commenters requested that we assign device-intensive status to:

- CPT code 0499T (Cystourethroscopy, with mechanical dilation and urethral therapeutic drug delivery for urethral stricture or stenosis, including fluoroscopy, when performed);
- CPT code 58674 (Laparoscopy, surgical, ablation of uterine fibroid(s) including intraoperative ultrasound guidance and monitoring, radiofrequency);
- CPT code 50590 (Lithotripsy, extracorporeal shock wave);
- CPT code 59200 (Insertion of cervical dilator (*e.g.,* laminaria, prostaglandin) (separate procedure));
- CPT code 66174 (Transluminal dilation of aqueous outflow canal; without retention of device or stent);
- CPT code 66175 (Transluminal dilation of aqueous outflow canal; with retention of device or stent);
- CPT code 93571 (Intravascular doppler velocity and/or pressure derived coronary flow reserve measurement (coronary vessel or graft) during coronary angiography including pharmacologically induced stress; initial vessel (list separately in addition to code for primary procedure); and
- HCPCS code C9757 (Laminotomy (hemilaminectomy), with decompression of nerve root(s), including partial facetectomy, foraminotomy and excision of herniated intervertebral disc, and repair of annular defect with implantation of bone anchored annular closure device, including annular defect measurement, alignment and sizing assessment, and image guidance; 1 interspace, lumbar).

Response: Based on CY 2019 claims data available for this final rule with comment period, the procedures requested by commenters do not have device offset percentages that exceed the 30-percent threshold required for device-intensive status and, therefore, are not eligible to be assigned device-intensive status under the OPPS.

Comment: Some commenters submitted invoices and requested a greater device offset amount and greater device offset percentage to reflect the invoice price of a particular device.

Other commenters also recommended utilizing invoice prices to establish device offset percentages for procedures with low or no claims volume or to correct situations commenters contend reflect underreported device costs attributable to hospital confusion when reporting HCPCS code C1889 (Implantable/insertable device, not otherwise classified).

Response: While we appreciate the recommendations and additional information submitted by commenters, we are not applying the invoice prices submitted by commenters to establish the device offset amount and device offset percentage for these procedures. None of the invoice prices that were submitted suggest that we should apply our policy of temporarily applying a higher device offset percentage if warranted by additional information. As we have stated in previous rulemaking (85 FR 86015), this policy of temporarily assigning a higher device offset percentage should be applied in rare instances, such as using CY 2020 claims data in light of the COVID–19 PHE or where a device has an extremely abnormal cost and, in the absence of claims data, may be significantly underpaid under our policy to apply a default device offset percentage for the procedure that involves such device.

Additionally, it would be inappropriate to apply a higher device offset percentage or increase the payment rate in the ASC setting simply because a device's invoice price is greater than the procedure's device offset amount. Our packaging policies are intended to promote the efficient use of resources both in the HOPD as well as ASC setting and these policies include the packaging of medical devices. While we provide separate transitional pass-through payments for devices for the cost of devices approved for transitional pass-through status, as we stated previously, the intent of transitional pass-through status for devices is to facilitate access for beneficiaries to the advantages of truly innovative devices by allowing for adequate payment for these new devices while the necessary cost data is collected. We believe it would be inappropriate to provide a similar method of calculating payment solely based on a device's cost or invoice price for devices that are not approved for transitional pass-through status.

Lastly, we have heard concerns from stakeholders regarding hospitals' coding decisions for particular devices. Specifically, stakeholders have contended that hospitals do not report HCPCS code C1889 for a particular insertable device as the NUBC billing guidelines recommend that such HCPCS code crosswalk to revenue code 0278—Other Implants—and this revenue code would be inappropriate for the costs attributable to devices that are insertable and not implantable. While we understand stakeholder concerns regarding accurate device cost reporting, we expect hospitals to adhere to the guidelines of correct coding and append the correct device code to the claim when applicable. However, while we do not believe additional guidance from CMS or adjustment to the device offset calculation to exclude certain claims is warranted at this time, we will continue to monitor this issue going forward.

After reviewing the public comments we received, we are finalizing our proposal to assign a device offset percentage based on CY 2020 data if CY 2020 claims information is available, for procedures that were assigned device-intensive status, but, because CY 2019 claims data is not available, would otherwise be assigned a default device offset percentage of 31 percent or a device offset percentage based on claims from a clinically-similar code. Based on updated data for this CY 2022 OPPS/ASC final rule with comment period, we are applying device offset percentages from 2020 claims data to 14 procedures. *These include the 11 procedures described previously plus three additional procedures that were assigned default device offset percentages for CY 2021 and have available device offset percentages from CY 2020 claims data:*

- *CPT code 0519T (Removal and replacement of wireless cardiac stimulator for left ventricular pacing; pulse generator component(s) (battery and/or transmitter));*
- *CPT code 0618T (Insertion of iris prosthesis, including suture fixation and repair or removal of iris, when performed; with secondary intraocular lens placement or intraocular lens exchange); and*
- *HCPCS code C9761 (Cystourethroscopy, with ureteroscopy and/or pyeloscopy, with lithotripsy (ureteral catheterization is included) and vacuum aspiration of the kidney, collecting system and urethra if applicable).*

Additionally, in this final rule with comment period, we are correcting the device offset percentages for several new device-intensive procedures to reflect available claims data from predecessor codes.

The full listing of the final CY 2022 device-intensive procedures can be found in Addendum P to the CY 2022 OPPS/ASC final rule with comment period (which is available via the internet on the CMS website). Further, our claims accounting narrative contains a description of our device offset percentage calculation. Our claims accounting narrative for this final rule with comment period can be found under supporting documentation for the CY 2022 OPPS/ASC final rule on our website at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html*.

3. Device Edit Policy

In the CY 2015 OPPS/ASC final rule with comment period (79 FR 66795), we finalized a policy and implemented claims processing edits that require any of the device codes used in the previous device-to-procedure edits to be present on the claim whenever a procedure code assigned to any of the APCs listed in Table 5 of the CY 2015 OPPS/ASC final rule with comment period (the CY 2015 device-dependent APCs) is reported on the claim. In addition, in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70422), we modified our previously existing policy and applied the device coding requirements exclusively to procedures that require the implantation of a device that are assigned to a device-intensive APC. In the CY 2016 OPPS/ASC final rule with comment period, we also finalized our policy that the claims processing edits are such that any device code, when reported on a claim with a procedure assigned to a device-intensive APC (listed in Table 42 of the CY 2016 OPPS/ASC final rule with comment period (80 FR 70422)) will satisfy the edit.

In the CY 2017 OPPS/ASC final rule with comment period (81 FR 79658 through 79659), we changed our policy for CY 2017 and subsequent years to apply the CY 2016 device coding requirements to the newly defined device-intensive procedures. For CY 2017 and subsequent years, we also specified that any device code, when reported on a claim with a—device-intensive procedure, will satisfy the edit. In addition, we created HCPCS code C1889 to recognize devices furnished during a device-intensive procedure that are not described by a specific Level II HCPCS Category C-code. Reporting HCPCS code C1889 with a device-intensive procedure will satisfy the edit requiring a device code to be reported on a claim with a device-intensive procedure. In the CY 2019 OPPS/ASC final rule with comment period, we revised the description of HCPCS code C1889 to remove the specific applicability to device-intensive procedures (83 FR 58950). For CY 2019 and subsequent years, the description of

HCPCS code C1889 is ''Implantable/insertable device, not otherwise classified''.

We did not propose any changes to this policy for CY 2022.

Comment: Some commenters recommended that we reinstate specific device-to-procedure edits. One commenter recommended we reinstate specific device-to-procedure edits for arthroplasty procedures and another commenter recommended we reinstate specific device edits for C-code device-intensive procedures. One commenter contended that the removal of specific device-to-procedure edits has contributed to erosion in accuracy in the data highlighted by certain procedures having device offset percentages that are nearly 100 percent of the procedures' costs.

Response: As we stated in the CY 2015 OPPS/ASC final rule with comment period (79 FR 66794), we continue to believe that the elimination of device-to-procedure edits and procedure-to-device edits is appropriate due to the experience hospitals now have in coding and reporting these claims fully. More specifically, for the most costly devices, we believe the C–APCs reliably reflect the cost of the device if charges for the device are included anywhere on the claim. We note that, under our current policy, hospitals are still expected to adhere to the guidelines of correct coding and append the correct device code to the claim when applicable. We also note that, as with all other items and services recognized under the OPPS, we expect hospitals to code and report their costs appropriately, regardless of whether there are claims processing edits in place.

Additionally, we have not observed any increase in frequency of procedures with device offset percentages that are nearly 100 percent; and we do not believe the absence of device-to-procedure edits has precipitated an erosion in accuracy of our device cost statistics. Procedures with extremely significant device offset percentages of greater than 90 percent can be attributed to procedures with little claims volume as well as extremely significant device costs and not the absence of device-to-procedure edits. Therefore, we are not accepting the commenters' recommendations to reinstate device-to-procedure edits.

4. Adjustment to OPPS Payment for No Cost/Full Credit and Partial Credit Devices

a. Background

To ensure equitable OPPS payment when a hospital receives a device without cost or with full credit, in CY 2007, we implemented a policy to reduce the payment for specified device-dependent APCs by the estimated portion of the APC payment attributable to device costs (that is, the device offset) when the hospital receives a specified device at no cost or with full credit (71 FR 68071 through 68077). Hospitals were instructed to report no cost/full credit device cases on the claim using the ''FB'' modifier on the line with the procedure code in which the no cost/full credit device is used. In cases in which the device is furnished without cost or with full credit, hospitals were instructed to report a token device charge of less than $1.01. In cases in which the device being inserted is an upgrade (either of the same type of device or to a different type of device) with a full credit for the device being replaced, hospitals were instructed to report as the device charge the difference between the hospital's usual charge for the device being implanted and the hospital's usual charge for the device for which it received full credit. In CY 2008, we expanded this payment adjustment policy to include cases in which hospitals receive partial credit of 50 percent or more of the cost of a specified device. Hospitals were instructed to append the ''FC'' modifier to the procedure code that reports the service provided to furnish the device when they receive a partial credit of 50 percent or more of the cost of the new device. We refer readers to the CY 2008 OPPS/ASC final rule with comment period for more background information on the ''FB'' and ''FC'' modifiers payment adjustment policies (72 FR 66743 through 66749).

In the CY 2014 OPPS/ASC final rule with comment period (78 FR 75005 through 75007), beginning in CY 2014, we modified our policy of reducing OPPS payment for specified APCs when a hospital furnishes a specified device without cost or with a full or partial credit. For CY 2013 and prior years, our policy had been to reduce OPPS payment by 100 percent of the device offset amount when a hospital furnishes a specified device without cost or with a full credit and by 50 percent of the device offset amount when the hospital receives partial credit in the amount of 50 percent or more of the cost for the specified device. For CY 2014, we reduced OPPS payment, for the applicable APCs, by the full or partial credit a hospital receives for a replaced device. Specifically, under this modified policy, hospitals are required to report on the claim the amount of the credit in the amount portion for value code ''FD'' (Credit Received from the Manufacturer for a Replaced Device) when the hospital receives a credit for a replaced device that is 50 percent or greater than the cost of the device. For CY 2014, we also limited the OPPS payment deduction for the applicable APCs to the total amount of the device offset when the ''FD'' value code appears on a claim. For CY 2015, we continued our policy of reducing OPPS payment for specified APCs when a hospital furnishes a specified device without cost or with a full or partial credit and to use the three criteria established in the CY 2007 OPPS/ASC final rule with comment period (71 FR 68072 through 68077) for determining the APCs to which our CY 2015 policy will apply (79 FR 66872 through 66873). In the CY 2016 OPPS/ASC final rule with comment period (80 FR 70424), we finalized our policy to no longer specify a list of devices to which the OPPS payment adjustment for no cost/full credit and partial credit devices would apply and instead apply this APC payment adjustment to all replaced devices furnished in conjunction with a procedure assigned to a device-intensive APC when the hospital receives a credit for a replaced specified device that is 50 percent or greater than the cost of the device.

b. Policy for No Cost/Full Credit and Partial Credit Devices

In the CY 2017 OPPS/ASC final rule with comment period (81 FR 79659 through 79660), for CY 2017 and subsequent years, we finalized a policy to reduce OPPS payment for device-intensive procedures, by the full or partial credit a provider receives for a replaced device, when a hospital furnishes a specified device without cost or with a full or partial credit. Under our current policy, hospitals continue to be required to report on the claim the amount of the credit in the amount portion for value code ''FD'' when the hospital receives a credit for a replaced device that is 50 percent or greater than the cost of the device.

In the CY 2014 OPPS/ASC final rule with comment period (78 FR 75005 through 75007), we adopted a policy of reducing OPPS payment for specified APCs when a hospital furnishes a specified device without cost or with a full or partial credit by the lesser of the device offset amount for the APC or the

amount of the credit. We adopted this change in policy in the preamble of the CY 2014 OPPS/ASC final rule with comment period and discussed it in subregulatory guidance, including Chapter 4, Section 61.3.6 of the Medicare Claims Processing Manual. Further, in the CY 2021 OPPS/ASC final rule with comment period (85 FR 86017 through 86018, 86302), we made conforming changes to our regulations at § 419.45(b)(1) and (2) that codified this policy.

We did not propose any changes and we did not receive any public comments related to our policies regarding payment for no cost/full credit and partial credit devices in CY 2022.

5. Payment Policy for Low-Volume Device-Intensive Procedures

In CY 2016, we used our equitable adjustment authority under section 1833(t)(2)(E) of the Act and used the median cost (instead of the geometric mean cost per our standard methodology) to calculate the payment rate for the implantable miniature telescope procedure described by CPT code 0308T (Insertion of ocular telescope prosthesis including removal of crystalline lens or intraocular lens prosthesis), which is the only code assigned to APC 5494 (Level 4 Intraocular Procedures) (80 FR 70388). We noted that, as stated in the CY 2017 OPPS/ASC proposed rule (81 FR 45656), we proposed to reassign the procedure described by CPT code 0308T to APC 5495 (Level 5 Intraocular Procedures) for CY 2017, but it would be the only procedure code assigned to APC 5495. The payment rates for a procedure described by CPT code 0308T (including the predecessor HCPCS code C9732) were $15,551 in CY 2014, $23,084 in CY 2015, and $17,551 in CY 2016. The procedure described by CPT code 0308T is a high-cost device-intensive surgical procedure that has a very low volume of claims (in part because most of the procedures described by CPT code 0308T are performed in ASCs). We believe that the median cost is a more appropriate measure of the central tendency for purposes of calculating the cost and the payment rate for this procedure because the median cost is impacted to a lesser degree than the geometric mean cost by more extreme observations. We stated that, in future rulemaking, we would consider proposing a general policy for the payment rate calculation for very low-volume device-intensive APCs (80 FR 70389).

For CY 2017, we proposed and finalized a payment policy for low-volume device-intensive procedures that is similar to the policy applied to the procedure described by CPT code 0308T in CY 2016. In the CY 2017 OPPS/ASC final rule with comment period (81 FR 79660 through 79661), we established our current policy that the payment rate for any device-intensive procedure that is assigned to a clinical APC with fewer than 100 total claims for all procedures in the APC be calculated using the median cost instead of the geometric mean cost, for the reasons described previously for the policy applied to the procedure described by CPT code 0308T in CY 2016. For CYs 2019 through 2021, we continued our policy of establishing the payment rate for any device-intensive procedure that is assigned to a clinical APC with fewer than 100 total claims for all procedures in the APC by using the median cost instead of the geometric mean (85 FR 86019).

As discussed in further detail in Section X.C of the CY 2022 OPPS/ASC proposed rule (86 FR 42181 through 42185), we proposed to establish a universal low volume APC policy for clinical APCs, brachytherapy APCs, and New Technology APCs with fewer than 100 single claims in the claims data used for ratesetting (for CY 2022 rates, this is proposed to be the CY 2019 claim data). For APCs designated as low volume APCs (those with fewer than 100 single claims in the claims year) under our proposed policy, we proposed to establish a payment rate using the highest of the median cost, arithmetic mean cost, or the geometric mean cost. In conjunction with our new, broader low volume APC proposal for clinical APCs, brachytherapy APCs, and New Technology APCs, we proposed to eliminate our payment policy for low-volume device-intensive procedures for CY 2022 and subsequent calendar years. Currently, CPT code 0308T is the only code subject to our low-volume device-intensive policy. Given that our proposed universal low volume APC policy would utilize a greater number of claims and provide additional cost metric alternatives for ratesetting than our existing low-volume device-intensive policy, we believe that the cost and ratesetting issues previously discussed with respect to CPT code 0308T would be appropriately addressed under our broader universal low volume APC proposal.

We did not receive any public comments on our proposal to eliminate our payment policy for low-volume device-intensive procedures and address low-volume, device-intensive procedures through our broader proposal to designate low volume APCs among eligible clinical APCs, brachytherapy APCs, and New Technology APCs and we are finalizing our proposal without modification. Public comments related to our proposed Low Volume APC policy are discussed in section X.C (Low Volume Policy for Clinical and Brachytherapy APCs) of this final rule with comment period.

V. OPPS Payment Changes for Drugs, Biologicals, and Radiopharmaceuticals

A. OPPS Transitional Pass-Through Payment for Additional Costs of Drugs, Biologicals, and Radiopharmaceuticals

1. Background

Section 1833(t)(6) of the Act provides for temporary additional payments or ''transitional pass-through payments'' for certain drugs and biologicals. Throughout the proposed rule, the term ''biological'' is used because this is the term that appears in section 1861(t) of the Act. A ''biological'' as used in the proposed rule includes (but is not necessarily limited to) a ''biological product'' or a ''biologic'' as defined under section 351 of the PHS Act. As enacted by the Medicare, Medicaid, and SCHIP Balanced Budget Refinement Act of 1999 (BBRA) (Pub. L. 106–113), this pass-through payment provision requires the Secretary to make additional payments to hospitals for: current orphan drugs for rare diseases and conditions, as designated under section 526 of the Federal Food, Drug, and Cosmetic Act; current drugs and biologicals and brachytherapy sources used in cancer therapy; and current radiopharmaceutical drugs and biologicals. ''Current'' refers to those types of drugs or biologicals mentioned above that are hospital outpatient services under Medicare Part B for which transitional pass-through payment was made on the first date the hospital OPPS was implemented.

Transitional pass-through payments also are provided for certain ''new'' drugs and biologicals that were not being paid for as an HOPD service as of December 31, 1996, and whose cost is ''not insignificant'' in relation to the OPPS payments for the procedures or services associated with the new drug or biological. For pass-through payment purposes, radiopharmaceuticals are included as ''drugs.'' As required by statute, transitional pass-through payments for a drug or biological described in section 1833(t)(6)(C)(i)(II) of the Act can be made for a period of at least 2 years, but not more than 3 years, after the payment was first made for the drug as a hospital outpatient service under Medicare Part B. Proposed CY 2022 pass-through drugs and

biologicals and their designated APCs are assigned status indicator ''G'' in Addenda A and B to the proposed rule (which are available via the internet on the CMS website).

Section 1833(t)(6)(D)(i) of the Act specifies that the pass-through payment amount, in the case of a drug or biological, is the amount by which the amount determined under section 1842(o) of the Act for the drug or biological exceeds the portion of the otherwise applicable Medicare OPD fee schedule that the Secretary determines is associated with the drug or biological. The methodology for determining the pass-through payment amount is set forth in regulations at 42 CFR 419.64. These regulations specify that the pass-through payment equals the amount determined under section 1842(o) of the Act minus the portion of the APC payment that CMS determines is associated with the drug or biological.

Section 1847A of the Act establishes the average sales price (ASP) methodology, which is used for payment for drugs and biologicals described in section 1842(o)(1)(C) of the Act furnished on or after January 1, 2005. The ASP methodology, as applied under the OPPS, uses several sources of data as a basis for payment, including the ASP, the wholesale acquisition cost (WAC), and the average wholesale price (AWP). In the proposed rule, the term ''ASP methodology'' and ''ASP-based'' are inclusive of all data sources and methodologies described therein. Additional information on the ASP methodology can be found on our website at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Part-B-Drugs/McrPartBDrugAvgSalesPrice/index.html*.

The pass-through application and review process for drugs and biologicals is described on our website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/passthrough_payment.html*.

2. Transitional Pass-Through Payment Period for Pass-Through Drugs, Biologicals, and Radiopharmaceuticals and Quarterly Expiration of Pass-Through Status

As required by statute, transitional pass-through payments for a drug or biological described in section 1833(t)(6)(C)(i)(II) of the Act can be made for a period of at least 2 years, but not more than 3 years, after the payment was first made for the drug or biological as a hospital outpatient service under Medicare Part B. Our current policy is to accept pass-through applications on a quarterly basis and to begin pass-through payments for newly approved pass-through drugs and biologicals on a quarterly basis through the next available OPPS quarterly update after the approval of a drug's or biological's pass-through status. However, prior to CY 2017, we expired pass-through status for drugs and biologicals on an annual basis through notice-and-comment rulemaking (74 FR 60480). In the CY 2017 OPPS/ASC final rule with comment period (81 FR 79662), we finalized a policy change, beginning with pass-through drugs and biologicals newly approved in CY 2017 and subsequent calendar years, to allow for a quarterly expiration of pass-through payment status for drugs, biologicals, and radiopharmaceuticals to afford a pass-through payment period that is as close to a full 3 years as possible for all pass-through drugs, biologicals, and radiopharmaceuticals.

This change eliminated the variability of the pass-through payment eligibility period, which previously varied based on when a particular application was initially received. We adopted this change for pass-through approvals beginning on or after CY 2017, to allow, on a prospective basis, for the maximum pass-through payment period for each pass-through drug without exceeding the statutory limit of 3 years. Notice of drugs whose pass-through payment status is ending during the calendar year will continue to be included in the quarterly OPPS Change Request transmittals.

Comment: One commenter commended CMS for continuing the policy to provide for quarterly expiration of pass-through payment status, which allows a pass-through period that is as close to a full 3 years as possible.

Response: We thank the commenter for their input and support of this policy, which was adopted in the CY 2017 OPPS/ASC final rule (81 FR 79654 through 79655).

3. Drugs and Biologicals With Expiring Pass-Through Payment Status in CY 2021

There are 25 drugs and biologicals whose pass-through payment status will expire during CY 2021, as listed in Table 37. Most of these drugs and biologicals will have received OPPS pass-through payment for 3 years during the period of April 1, 2018, through December 31, 2021. In accordance with the policy finalized in CY 2017 and described earlier, pass-through payment status for drugs and biologicals newly approved in CY 2017 and subsequent years will expire on a quarterly basis, with a pass-through payment period as close to 3 years as possible. With the exception of those groups of drugs and biologicals that are always packaged when they do not have pass-through payment status (specifically, anesthesia drugs; drugs, biologicals, and radiopharmaceuticals that function as supplies when used in a diagnostic test or procedure (including diagnostic radiopharmaceuticals, contrast agents, and stress agents); and drugs and biologicals that function as supplies when used in a surgical procedure), our standard methodology for providing payment for drugs and biologicals with expiring pass-through payment status in an upcoming calendar year is to determine the product's estimated per day cost and compare it with the OPPS drug packaging threshold for that calendar year (which is proposed to be $130 for CY 2022), as discussed further in section V.B.1. of the CY 2022 OPPS/ASC proposed rule (86 FR 42127 through 42148). We proposed that if the estimated per day cost for the drug or biological is less than or equal to the applicable OPPS drug packaging threshold, we would package payment for the drug or biological into the payment for the associated procedure in the upcoming calendar year. If the estimated per day cost of the drug or biological is greater than the OPPS drug packaging threshold, we proposed to provide separate payment at the applicable ASP-based payment amount (which is proposed at ASP+6 percent for non-340B drugs for CY 2022, as discussed further in section V.B.2. of the CY 2022 OPPS/ASC proposed rule (86 FR 42132).

We did not receive any public comments regarding our proposals. Therefore, we are adopting these proposals as final for CY 2022 without modification. Refer to Table 37 for the list of drugs and biologicals for which pass-through payment status will expire between March 31, 2021 and December 31, 2021. The packaged or separately payable status of each of these drugs or biologicals is listed in Addendum B of the CY 2022 OPPS/ASC final rule (which is available via the internet on the CMS website).

BILLING CODE 4120–01–C

4. Drugs, Biologicals, and Radiopharmaceuticals With Pass-Through Payment Status Expiring in CY 2022

We proposed to end pass-through payment status in CY 2022 for 26 drugs and biologicals. These drugs and biologicals, which were approved for pass-through payment status between April 1, 2019, and January 1, 2020, are listed in Table 28 of the CY 2022 OPPS/ASC proposed rule (86 FR 42121 through 42122). The APCs and HCPCS codes for these drugs and biologicals, which have pass-through payment status that will end by December 31, 2022, are assigned status indicator ''G'' in Addenda A and B to the CY 2022 OPPS/ASC proposed rule (which are available via the internet on the CMS website).

Section 1833(t)(6)(D)(i) of the Act sets the amount of pass-through payment for pass-through drugs and biologicals (the pass-through payment amount) as the difference between the amount authorized under section 1842(o) of the Act and the portion of the otherwise applicable OPD fee schedule that the Secretary determines is associated with the drug or biological. For 2022, we proposed to continue to pay for pass-through drugs and biologicals at ASP+6 percent, equivalent to the payment rate these drugs and biologicals would receive in the physician's office setting in CY 2022. We proposed that a $0 pass-through payment amount would be paid for pass-through drugs and biologicals that are not policy-packaged as described in section V.B.1.c. (86 FR 42120) under the CY 2022 OPPS because the difference between the amount authorized under section 1842(o) of the Act, which is proposed at ASP+6 percent, and the portion of the otherwise applicable OPD fee schedule that the Secretary determines is appropriate, which is proposed at ASP+6 percent, is $0.

In the case of policy-packaged drugs (which include the following: Anesthesia drugs; drugs, biologicals, and radiopharmaceuticals that function as supplies when used in a diagnostic test or procedure (including contrast agents, diagnostic radiopharmaceuticals, and stress agents); and drugs and biologicals that function as supplies when used in a surgical procedure), we proposed that their pass-through payment amount would be equal to ASP+6 percent for CY 2022 minus a payment offset for the portion of the otherwise applicable OPD fee schedule that the Secretary determines is associated with the drug or biological as described in section V.A.6. of the CY 2022 OPPS/ASC proposed rule (86 FR 42126). We proposed this policy because, if not for the pass-through payment status of these policy-packaged products, payment for these products would be packaged into the associated procedure.

We proposed to continue to update pass-through payment rates on a quarterly basis on the CMS website during CY 2022 if later quarter ASP submissions (or more recent WAC or AWP information, as applicable) indicate that adjustments to the payment rates for these pass-through payment drugs or biologicals are necessary. For a full description of this policy, we refer readers to the CY 2006 OPPS/ASC final rule with comment period (70 FR 68632 through 68635).

For CY 2022, consistent with our CY 2021 policy for diagnostic and therapeutic radiopharmaceuticals, we proposed to provide payment for both diagnostic and therapeutic radiopharmaceuticals that are granted pass-through payment status based on the ASP methodology. As stated earlier, for purposes of pass-through payment, we consider radiopharmaceuticals to be drugs under the OPPS. Therefore, if a diagnostic or therapeutic radiopharmaceutical receives pass-through payment status during CY 2022, we proposed to follow the standard ASP methodology to determine the pass-through payment rate that drugs receive under section 1842(o) of the Act, which is proposed at ASP+6 percent. If ASP data are not available for a radiopharmaceutical, we proposed to provide pass-through payment at WAC+3 percent (consistent with our proposed policy in section V.B.2.b. of the CY 2022 OPPS/ASC proposed rule (86 FR 42132)), the equivalent payment provided to pass-through drugs and biologicals without ASP information. Additional detail on the WAC+3 percent payment policy can be found in section V.B.2.b. of the CY 2022 OPPS/ASC proposed rule. If WAC information also is not available, we proposed to provide payment for the pass-through radiopharmaceutical at 95 percent of its most recent AWP. Refer to Table 38 below for the list of drugs and biologicals with pass-through payment status expiring during CY 2022.

BILLING CODE 4120–01–P

BILLING CODE 4120–01–C

5. Drugs, Biologicals, and Radiopharmaceuticals With Pass-Through Payment Status Continuing in CY 2022

We proposed to continue pass-through payment status in CY 2022 for 46 drugs and biologicals. These drugs and biologicals, which were approved for pass-through payment status with effective dates beginning between April 1, 2020, and January 1, 2022, are listed in Table 39. The APCs and HCPCS codes for these drugs and biologicals, which have pass-through payment status that will continue after December 31, 2022, are assigned status indicator ''G'' in Addenda A and B to the CY 2022 OPPS/ASC proposed rule (which are available via the internet on the CMS website).

Section 1833(t)(6)(D)(i) of the Act sets the amount of pass-through payment for pass-through drugs and biologicals (the pass-through payment amount) as the difference between the amount authorized under section 1842(o) of the Act and the portion of the otherwise applicable OPD fee schedule that the Secretary determines is associated with the drug or biological. For 2023, we proposed to continue to pay for pass-through drugs and biologicals at ASP+6 percent, equivalent to the payment rate these drugs and biologicals would receive in the physician's office setting in CY 2022. We proposed that a $0 pass-through payment amount would be paid for pass-through drugs and biologicals that are not policy-packaged as described in section V.B.1.c. under the CY 2022 OPPS because the difference between the amount authorized under section 1842(o) of the Act, which is proposed at ASP+6 percent, and the portion of the otherwise applicable OPD fee schedule that the Secretary determines is appropriate, which is proposed at ASP+6 percent, is $0. In the case of policy-packaged drugs (which include the following: Anesthesia drugs; drugs, biologicals, and radiopharmaceuticals that function as supplies when used in a diagnostic test or procedure (including contrast agents, diagnostic radiopharmaceuticals, and stress agents); and drugs and biologicals that function as supplies when used in a surgical procedure), we proposed that their pass-through payment amount would be equal to ASP+6 percent for CY 2022 minus a payment offset for any predecessor drug products contributing to the pass-through payment as described in section V.A.6. of the CY 2022 OPPS/ASC proposed rule (86 FR 42126). We proposed this policy because, if not for the pass-through payment status of these policy-packaged products, payment for these products would be packaged into the associated procedure.

We proposed to continue to update pass-through payment rates on a quarterly basis on our website during CY 2022 if later quarter ASP submissions (or more recent WAC or AWP information, as applicable) indicate that adjustments to the payment rates for these pass-through payment drugs or biologicals are necessary. For a full description of this policy, we refer readers to the CY 2006 OPPS/ASC final rule with comment period (70 FR 68632 through 68635).

For CY 2022, consistent with our CY 2021 policy for diagnostic and therapeutic radiopharmaceuticals, we proposed to provide payment for both diagnostic and therapeutic radiopharmaceuticals that are granted pass-through payment status based on the ASP methodology. As stated earlier, for purposes of pass-through payment, we consider radiopharmaceuticals to be drugs under the OPPS. Therefore, if a diagnostic or therapeutic radiopharmaceutical receives pass-through payment status during CY 2023, we proposed to follow the standard ASP methodology to determine the pass-through payment rate that drugs receive under section 1842(o) of the Act, which is proposed at ASP+6 percent. If ASP data are not available for a radiopharmaceutical, we proposed to provide pass-through payment at WAC+3 percent (consistent with our proposed policy in section V.B.2.b. of the CY 2022 OPPS/ASC proposed rule (86 FR 42132)), the equivalent payment provided to pass-through drugs and biologicals without ASP information. Additional detail on the WAC+3 percent payment policy can be found in section V.B.2.b. of the CY 2022 OPPS/ASC proposed rule. If WAC information also is not available, we proposed to provide payment for the pass-through radiopharmaceutical at 95 percent of its most recent AWP.

The drugs and biologicals that we proposed to have pass-through payment status expire after December 31, 2022, are shown in Table 39.

6. Provisions for Reducing Transitional Pass-Through Payments for Policy-Packaged Drugs, Biologicals, and Radiopharmaceuticals to Offset Costs Packaged Into APC Groups

Under the regulation at 42 CFR 419.2(b), nonpass-through drugs, biologicals, and radiopharmaceuticals that function as supplies when used in a diagnostic test or procedure are packaged in the OPPS. This category includes diagnostic radiopharmaceuticals, contrast agents, stress agents, and other diagnostic drugs. Also, under the regulation at 42 CFR 419.2(b), nonpass-through drugs and biologicals that function as supplies in a surgical procedure are packaged in the OPPS. This category includes skin substitutes and other surgical-supply drugs and biologicals. As described earlier, section 1833(t)(6)(D)(i) of the Act specifies that the transitional pass-through payment amount for pass-through drugs and biologicals is the difference between the amount paid under section 1842(o) of the Act and the otherwise applicable OPD fee schedule amount. Because a payment offset is necessary in order to provide an appropriate transitional pass-through payment, we deduct from the pass-through payment for policy-packaged drugs, biologicals, and radiopharmaceuticals an amount reflecting the portion of the APC payment associated with predecessor products in order to ensure no duplicate payment is made. This amount reflecting the portion of the APC payment associated with predecessor products is called the payment offset.

The payment offset policy applies to all policy-packaged drugs, biologicals, and radiopharmaceuticals. For a full description of the payment offset policy as applied to policy-packaged drugs, which include diagnostic radiopharmaceuticals, contrast agents, stress agents, and skin substitutes, we refer readers to the discussion in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70430 through 70432). For CY 2022, as we did in CY 2021, we proposed to continue to apply the same policy-packaged offset policy to payment for pass-through diagnostic radiopharmaceuticals, pass-through contrast agents, pass-through stress agents, and pass-through skin substitutes. The proposed APCs to which a payment offset may be applicable for pass-through diagnostic radiopharmaceuticals, pass-through contrast agents, pass-through stress agents, and pass-through skin substitutes are identified in Table 40.

BILLING CODE 4120–01–C

We proposed to continue to post annually on our website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Annual-Policy-Files.html* a file that contains the APC offset amounts that will be used for that year for purposes of both evaluating cost significance for candidate pass-through payment device categories and drugs and biologicals and establishing any appropriate APC offset amounts. Specifically, the file will continue to provide the amounts and percentages of APC payment associated with packaged implantable devices, policy-packaged drugs, and threshold packaged drugs and biologicals for every OPPS clinical APC.

Comment: One commenter requested that CMS release a copy of the APC offset file with future OPPS/ASC proposed rules to enable the public to calculate the percentage of APC payment associated with packaged drug costs using APC offset data for the upcoming calendar year.

Response: We thank the commenter for their suggestion, and we will consider addressing this request in future rulemaking.

B. OPPS Payment for Drugs, Biologicals, and Radiopharmaceuticals Without Pass-Through Payment Status

1. Criteria for Packaging Payment for Drugs, Biologicals, and Radiopharmaceuticals

a. Packaging Threshold

In accordance with section 1833(t)(16)(B) of the Act, the threshold for establishing separate APCs for payment of drugs and biologicals was set to $50 per administration during CYs 2005 and 2006. In CY 2007, we used the four quarter moving average Producer Price Index (PPI) levels for Pharmaceutical Preparations (Prescription) to trend the $50 threshold forward from the third quarter of CY 2005 (when the Pub. L. 108–173 mandated threshold became effective) to the third quarter of CY 2007. We then rounded the resulting dollar amount to the nearest $5 increment in order to determine the CY 2007 threshold amount of $55. Using the same methodology as that used in CY 2007 (which is discussed in more detail in the CY 2007 OPPS/ASC final rule with comment period (71 FR 68085 through 68086)), we set the packaging threshold for establishing separate APCs for drugs and biologicals at $130 for CY 2021 (84 FR 61312 through 61313).

Following the CY 2007 methodology, for the CY 2022 OPPS/ASC proposed rule, we used the most recently available four quarter moving average PPI levels to trend the $50 threshold forward from the third quarter of CY 2005 to the third quarter of CY 2022 and rounded the resulting dollar amount ($132.44) to the nearest $5 increment, which yielded a figure of $130. In performing this calculation, we used the most recent forecast of the quarterly index levels for the PPI for Pharmaceuticals for Human Use (Prescription) (Bureau of Labor Statistics series code WPUSI07003) from CMS's Office of the Actuary. For the CY 2022 OPPS/ASC proposed rule, based on these calculations using the CY 2007 OPPS methodology, we proposed a packaging threshold for CY 2022 of $130.

Comment: Two commenters expressed their support for maintaining the drug packaging threshold for CY 2022 at $130. One commenter believes, however, that the drug packaging threshold has been increasing faster than payment increases under the OPPS. This commenter would like us to research if the drug packaging threshold should be lowered in future years.

Response: We appreciate the support of the commenters of the drug packaging threshold level of $130. We also thank the one commenter for their suggestion to consider reducing the drug packaging threshold in future years and will consider it for future rulemaking.

After consideration of the public comments, we repeated our drug packaging threshold calculations for the final rule with the most current data available. Once again, we calculated a drug packaging threshold for CY 2022 of

$130. Therefore, we are finalizing our proposal without modification to have a drug packaging threshold for CY 2022 of $130.

b. Packaging of Payment for HCPCS Codes That Describe Certain Drugs, Certain Biologicals, and Certain Therapeutic Radiopharmaceuticals Under the Cost Threshold (''Threshold-Packaged Drugs'')

To determine the proposed CY 2022 packaging status for all nonpass-through drugs and biologicals that are not policy packaged, we calculated, on a HCPCS code-specific basis, the per day cost of all drugs, biologicals, and therapeutic radiopharmaceuticals that had a HCPCS code in CY 2019 and were paid (via packaged or separate payment) under the OPPS. We used data from CY 2019 claims processed through June 30, 2020, for this calculation. However, we did not perform this calculation for those drugs and biologicals with multiple HCPCS codes that include different dosages, as described in section V.B.1.d. of the CY 2022 OPPS/ASC proposed rule (86 FR 42129), or for the following policy-packaged items that we proposed to continue to package in CY 2022: Anesthesia drugs; drugs, biologicals, and radiopharmaceuticals that function as supplies when used in a diagnostic test or procedure; and drugs and biologicals that function as supplies when used in a surgical procedure.

In order to calculate the per day costs for drugs, biologicals, and therapeutic radiopharmaceuticals to determine their proposed packaging status in CY 2022, we use the methodology that was described in detail in the CY 2006 OPPS proposed rule (70 FR 42723 through 42724) and finalized in the CY 2006 OPPS final rule with comment period (70 FR 68636 through 68638). For each drug and biological HCPCS code, we used an estimated payment rate of ASP+6 percent (which is the payment rate we proposed for separately payable drugs and biologicals (other than 340B drugs)) for CY 2022, as discussed in more detail in section V.B.2.b. of the proposed rule) to calculate the CY 2022 proposed rule per day costs. We used the manufacturer-submitted ASP data from the fourth quarter of CY 2020 (data that were used for payment purposes in the physician's office setting, effective April 1, 2021) to determine the proposed rule per day cost. While the CY 2020 ASP data were collected during the PHE, ASP data are not affected by changes in utilization the way non-drug services are for setting payment rates, and so we believe CY 2020 ASP data continues to be representative of the price of drugs in the market. We have continued to use ASP data from CY 2020 to report quarterly drug rates for CY 2020 and CY 2021.

As is our standard methodology, for 2022, we proposed to use payment rates based on the ASP data from the fourth quarter of CY 2020 for budget neutrality estimates, packaging determinations, impact analyses, and completion of Addenda A and B to the proposed rule (which are available via the internet on the CMS website) because these are the most recent data available for use at the time of development of the proposed rule. These data also were the basis for drug payments in the physician's office setting, effective April 1, 2021. For items that did not have an ASP-based payment rate, such as some therapeutic radiopharmaceuticals, we used their mean unit cost derived from the CY 2019 hospital claims data to determine their per day cost.

We proposed to package items with a per day cost less than or equal to $130, and identify items with a per day cost greater than $130 as separately payable unless they are policy-packaged. Consistent with our past practice, we cross-walked historical OPPS claims data from the CY 2019 HCPCS codes that were reported to the CY 2021 HCPCS codes that we display in Addendum B to the CY 2022 OPPS/ASC proposed rule (which is available via the internet on the CMS website) for proposed payment in CY 2022.

Our policy during previous cycles of the OPPS has been to use updated ASP and claims data to make final determinations of the packaging status of HCPCS codes for drugs, biologicals, and therapeutic radiopharmaceuticals for the OPPS/ASC final rule with comment period. We note that it is also our policy to make an annual packaging determination for a HCPCS code only when we develop the OPPS/ASC final rule with comment period for the update year. Only HCPCS codes that are identified as separately payable in the final rule with comment period are subject to quarterly updates. For our calculation of per day costs of HCPCS codes for drugs and biologicals in the CY 2022 OPPS/ASC proposed rule, we proposed to use ASP data from the fourth quarter of CY 2020, which is the basis for calculating payment rates for drugs and biologicals in the physician's office setting using the ASP methodology, effective April 1, 2021, along with updated hospital claims data from CY 2019. We note that we also proposed to use these data for budget neutrality estimates and impact analyses for the CY 2022 OPPS/ASC proposed rule.

Payment rates for HCPCS codes for separately payable drugs and biologicals included in Addenda A and B of the final rule with comment period will be based on ASP data from the second quarter of CY 2021. These data will be the basis for calculating payment rates for drugs and biologicals in the physician's office setting using the ASP methodology, effective October 1, 2021. These payment rates would then be updated in the January 2022 OPPS update, based on the most recent ASP data to be used for physicians' office and OPPS payment as of January 1, 2022. For items that do not currently have an ASP-based payment rate, we proposed to recalculate their mean unit cost from all of the CY 2019 claims data and update cost report information available for the CY 2022 final rule with comment period to determine their final per day cost.

Consequently, the packaging status of some HCPCS codes for drugs, biologicals, and therapeutic radiopharmaceuticals in the proposed rule may be different from the same drugs' HCPCS codes' packaging status determined based on the data used for the final rule with comment period. Under such circumstances, we proposed to continue to follow the established policies initially adopted for the CY 2005 OPPS (69 FR 65780) in order to more equitably pay for those drugs whose costs fluctuate relative to the proposed CY 2022 OPPS drug packaging threshold and the drug's payment status (packaged or separately payable) in CY 2021. These established policies have not changed for many years and are the same as described in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70434). Specifically, for CY 2022, consistent with our historical practice, we proposed to apply the following policies to these HCPCS codes for drugs, biologicals, and therapeutic radiopharmaceuticals whose relationship to the drug packaging threshold changes based on the updated drug packaging threshold and on the final updated data:

- HCPCS codes for drugs and biologicals that were paid separately in CY 2021 and that are proposed for separate payment in CY 2022, and that then have per day costs equal to or less than the CY 2022 final rule drug packaging threshold, based on the updated ASPs and hospital claims data used for the CY 2022 final rule, would continue to receive separate payment in CY 2022.
- HCPCS codes for drugs and biologicals that were packaged in CY 2021 and that are proposed for separate payment in CY 2022, and that then have

per day costs equal to or less than the CY 2022 final rule drug packaging threshold, based on the updated ASPs and hospital claims data used for the CY 2022 final rule, would remain packaged in CY 2022.

- HCPCS codes for drugs and biologicals for which we proposed packaged payment in CY 2022 but that then have per-day costs greater than the CY 2022 final rule drug packaging threshold, based on the updated ASPs and hospital claims data used for the CY 2022 final rule, would receive separate payment in CY 2022.

We did not receive any public comments on our proposal to recalculate the mean unit cost for items that do not currently have an ASP-based payment rate from all of the CY 2019 claims data and updated cost report information available for this CY 2022 final rule with comment period to determine their final per day cost. We also did not receive any public comments on our proposal to continue to follow the established policies, initially adopted for the CY 2005 OPPS (69 FR 65780), when the packaging status of some HCPCS codes for drugs, biologicals, and therapeutic radiopharmaceuticals in the proposed rule may be different from the same drug HCPCS code's packaging status determined based on the data used for the final rule with comment period. For CY 2022, we are finalizing these two proposals without modification. Please refer to Addendum B to this final rule with comment period, which is available via the internet on the CMS website, for information on the packaging status of drugs, biologicals, and therapeutic radiopharmaceuticals.

c. Policy-Packaged Drugs, Biologicals, and Radiopharmaceuticals

As mentioned earlier in this section, under the OPPS, we package several categories of nonpass-through drugs, biologicals, and radiopharmaceuticals, regardless of the cost of the products. Because the products are packaged according to the policies in 42 CFR 419.2(b), we refer to these packaged drugs, biologicals, and radiopharmaceuticals as ''policy-packaged'' drugs, biologicals, and radiopharmaceuticals. These policies are either longstanding or based on longstanding principles and inherent to the OPPS and are as follows:

- Anesthesia, certain drugs, biologicals, and other pharmaceuticals; medical and surgical supplies and equipment; surgical dressings; and devices used for external reduction of fractures and dislocations (§ 419.2(b)(4));
- Intraoperative items and services (§ 419.2(b)(14));
- Drugs, biologicals, and radiopharmaceuticals that function as supplies when used in a diagnostic test or procedure (including, but not limited to, diagnostic radiopharmaceuticals, contrast agents, and pharmacologic stress agents) (§ 419.2(b)(15)); and
- Drugs and biologicals that function as supplies when used in a surgical procedure (including, but not limited to, skin substitutes and similar products that aid wound healing and implantable biologicals) (§ 419.2(b)(16)).

The policy at § 419.2(b)(16) is broader than that at § 419.2(b)(14). As we stated in the CY 2015 OPPS/ASC final rule with comment period: ''We consider all items related to the surgical outcome and provided during the hospital stay in which the surgery is performed, including postsurgical pain management drugs, to be part of the surgery for purposes of our drug and biological surgical supply packaging policy'' (79 FR 66875). The category described by § 419.2(b)(15) is large and includes diagnostic radiopharmaceuticals, contrast agents, stress agents, and some other products. The category described by § 419.2(b)(16) includes skin substitutes and some other products. We believe it is important to reiterate that cost consideration is not a factor when determining whether an item is a surgical supply (79 FR 66875).

Comment: One commenter requested that we develop a policy to provide separate payment for drugs that are administered at the time of ophthalmic surgery and have an FDA-approved indication to treat or prevent postoperative issues.

Response: A surgical procedure episode consists of both pre-operative and post-operative care in addition to the surgical procedure itself. If a drug used to address a post-operative concern, such as pain management, is billed together with a surgical procedure, we assume that the pain management drug was given as a part of the overall surgical procedure. Since the pain management drug is ancillary to the primary ophthalmic surgery procedure, it is considered a surgical supply. The pain management drug is only administered to the patient because the patient has received ophthalmic surgery, and the drug would not have been administered to the patient if the patient did not have the surgery. In the OPPS, we pay one rate for the entire surgical procedure, and payment for supplies, such as pain management drugs, is packaged into the payment rate for the surgical procedure. We note exceptions to this policy in the ASC setting are discussed in II.A.3.b. (Payment Policy for Non-Opioid Pain Management Drugs and Biologicals that Function as Surgical Supplies under the ASC Payment System) of this final rule with comment period.

Comment: One commenter recommended that CMS continue to apply radiolabeled product edits to the nuclear medicine procedures to ensure that all packaged costs are included on nuclear medicine claims in order to establish appropriate payment rates in the future. The commenter was concerned that many providers performing nuclear medicine procedures are not including the cost of diagnostic radiopharmaceuticals used for the procedures in their claims submissions. The commenter believes this lack of drug cost reporting could be causing the cost of nuclear medicine procedures to be underreported and therefore request that the radiolabeled product edits be reinstated.

Response: We appreciated the commenter's feedback; however, we are not reinstating the radiolabeled product edits to nuclear medicine procedures, which required a diagnostic radiopharmaceutical to be present on the same claim as a nuclear medicine procedure for payment to be made under the OPPS. As previously discussed in the CY 2020 OPPS/ASC final rule with comment period (85 FR 86033 through 86034), the edits were in place between CY 2008 and CY 2014 (78 FR 75033). We believe the period of time in which the edits were in place was sufficient for hospitals to gain experience reporting procedures involving radiolabeled products and to become accustomed to ensuring that they code and report charges so that their claims fully and appropriately reflect the costs of those radiolabeled products. As with all other items and services recognized under the OPPS, we expect hospitals to code and report their costs appropriately, regardless of whether there are claims processing edits in place.

Comment: Several commenters requested that diagnostic radiopharmaceuticals be paid separately in all cases, not just when the drugs have pass-through payment status. One commenter suggested payment based upon ASP, WAC, AWP, or mean unit cost data derived from hospital claims. Some commenters mentioned that pass-through payment status helps the diffusion of new diagnostic radiopharmaceuticals into the market, but is not enough to make up for what the commenters believe is inadequate payment after pass-through status

expires. Commenters opposed incorporating the cost of the drug into the associated APC, and provided evidence showing procedures in which diagnostic radiopharmaceuticals are considered to be a surgical supply, which the commenter believed are often paid at a lower rate than the payment rate for the diagnostic radiopharmaceutical itself when the drug had pass-through payment status. Additionally, commenters proposed alternative payment methodologies such as subjecting diagnostic radiopharmaceuticals to the drug packaging threshold, creating separate APC payments for diagnostic radiopharmaceuticals that cost more than $500, or using ASP, WAC, or AWP to account for packaged radiopharmaceutical costs.

Response: We thank commenters for their suggestions. Commenters have made many of these suggestions in the past and we addressed them in previous rules, including the CY 2020 OPPS/ASC final rule (84 FR 61314 through 61315) and the CY 2021 OPPS/ASC final rule (85 FR 86034). We continue to believe that diagnostic radiopharmaceuticals are an integral component of many nuclear medicine and imaging procedures and charges associated with them should be reported on hospital claims to the extent they are used, and accordingly, the payment for the radiopharmaceuticals is reflected within the payment for the primary procedure.

In response to the comment regarding the proposed cost of the packaged procedure in CY 2022 being substantially lower than the payment rate of the radiopharmaceutical when it was on pass-through payment status plus the payment rate of the procedure associated with the radiopharmaceutical, we note that rates are established in a manner that uses the geometric mean of reported costs to furnish the procedure based on data submitted to CMS from all hospitals paid under the OPPS to set the payment rate for the service. Accordingly, the costs that are calculated by Medicare reflect the average costs of items and services that are packaged into a primary procedure and will not necessarily equal the sum of the cost of the primary procedure and the average sales price of the specific items and services used in the procedure in each case. Furthermore, the costs will be based on the reported costs submitted to Medicare by the hospitals and not the list price established by the manufacturer. Claims data that include the radiopharmaceutical packaged with the associated procedure reflect the combined cost of the procedure and the radiopharmaceutical used in the procedure. Additionally, we do not believe it is appropriate to create a new packaging threshold specifically for diagnostic radiopharmaceuticals as such a threshold would not align with our overall packaging policy and commenters have submitted only limited data to support a specific threshold.

With respect to the request that we create a new APC for each radiopharmaceutical product, we do not believe it is appropriate to create unique APCs for diagnostic radiopharmaceuticals. Diagnostic radiopharmaceuticals function as supplies during a diagnostic test or procedure and following our longstanding packaging policy, these items are packaged under the OPPS. Packaging supports our goal of making OPPS payments consistent with those of a prospective payment system, which packages costs into a single aggregate payment for a service, encounter, or episode of care. Furthermore, diagnostic radiopharmaceuticals function as supplies that enable the provision of an independent service, and are not themselves the primary therapeutic modality, and therefore, we do not believe they warrant separate payment through creation of a unique APC at this time. We welcome ongoing dialogue with stakeholders regarding suggestions for payment changes for consideration in future rulemaking.

Comment: One commenter expressed their approval of the drugs proposed to be included in our policy-packaged drug policy.

Response: We appreciate the support of the commenter.

After consideration of the public comments we received, we are finalizing our proposals without modification to continue our drug packaging policies, which are included in the regulation text 42 CFR 419.2(b).

d. Packaging Determination for HCPCS Codes That Describe the Same Drug or Biological but Different Dosages

In the CY 2010 OPPS/ASC final rule with comment period (74 FR 60490 through 60491), we finalized a policy to make a single packaging determination for a drug, rather than an individual HCPCS code, when a drug has multiple HCPCS codes describing different dosages because we believe that adopting the standard HCPCS code-specific packaging determinations for these codes could lead to inappropriate payment incentives for hospitals to report certain HCPCS codes instead of others. We continue to believe that making packaging determinations on a drug-specific basis eliminates payment incentives for hospitals to report certain HCPCS codes for drugs and allows hospitals flexibility in choosing to report all HCPCS codes for different dosages of the same drug or only the lowest dosage HCPCS code. Therefore, we proposed to continue our policy to make packaging determinations on a drug-specific basis, rather than a HCPCS code-specific basis, for those HCPCS codes that describe the same drug or biological but different dosages in CY 2022.

For CY 2022, in order to propose a packaging determination that is consistent across all HCPCS codes that describe different dosages of the same drug or biological, we aggregated both our CY 2019 claims data and our pricing information at ASP+6 percent across all of the HCPCS codes that describe each distinct drug or biological in order to determine the mean units per day of the drug or biological in terms of the HCPCS code with the lowest dosage descriptor. The following drugs did not have pricing information available for the ASP methodology for the CY 2022 OPPS/ASC proposed rule, and as is our current policy for determining the packaging status of other drugs, we used the mean unit cost available from the CY 2019 claims data to make the proposed packaging determinations for these drugs: HCPCS code C9257 (Injection, bevacizumab, 0.25 mg); HCPCS code J1840 (Injection, kanamycin sulfate, up to 500 mg); HCPCS code J1850 (Injection, kanamycin sulfate, up to 75 mg); HCPCS code J3472 (Injection, hyaluronidase, ovine, preservative free, per 1000 usp units); HCPCS code J7100 (Infusion, dextran 40, 500 ml); and HCPCS code J7110 (Infusion, dextran 75, 500 ml).

For all other drugs and biologicals that have HCPCS codes describing different doses, we then multiplied the proposed weighted average ASP+6 percent per unit payment amount across all dosage levels of a specific drug or biological by the estimated units per day for all HCPCS codes that describe each drug or biological from our claims data to determine the estimated per day cost of each drug or biological at less than or equal to the proposed CY 2022 drug packaging threshold of $130 (so that all HCPCS codes for the same drug or biological would be packaged) or greater than the proposed CY 2022 drug packaging threshold of $130 (so that all HCPCS codes for the same drug or biological would be separately payable). The proposed packaging status of each drug and biological HCPCS code to which this methodology would apply in CY 2022 is displayed in Table 41.

Comment: One commenter supported our proposal to continue our current policy to make packaging determinations on a drug-specific basis rather than a HCPCS code basis when multiple HCPCS codes are used to describe different quantities of a drug or biological.

Response: We appreciate the support of the commenter.

After reviewing the public comments, we are finalizing our proposal, without modification, to continue our policy to make packaging determinations on a drug-specific basis, rather than a HCPCS code-specific basis, for those HCPCS codes that describe the same drug or biological but different dosages. The packaging status of each drug and biological HCPCS code to which this methodology applies in CY 2022 is displayed in Table 41.

BILLING CODE 4120–01–P

TABLE 41: HCPCS CODES TO WHICH THE CY 2022 DRUG-SPECIFIC PACKAGING DETERMINATION METHODOLOGY APPLIES

CY 2022 HCPCS Code	CY 2022 Long Descriptor	CY 2022 Status Indicator (SI)
C9257	Injection, bevacizumab, 0.25 mg	K
J9035	Injection, bevacizumab, 10 mg	K
J1020	Injection, methylprednisolone acetate, 20 mg	N
J1030	Injection, methylprednisolone acetate, 40 mg	N
J1040	Injection, methylprednisolone acetate, 80 mg	N
J1460	Injection, gamma globulin, intramuscular, 1 cc	K
J1560	Injection, gamma globulin, intramuscular over 10 cc	K
J1642	Injection, heparin sodium, (heparin lock flush), per 10 units	N
J1644	Injection, heparin sodium, per 1000 units	N
J2788	Injection, rho d immune globulin, human, minidose, 50 micrograms (250 i.u.)	N
J2790	Injection, rho d immune globulin, human, full dose, 300 micrograms (1500 i.u.)	N
J2920	Injection, methylprednisolone sodium succinate, up to 40 mg	N
J2930	Injection, methylprednisolone sodium succinate, up to 125 mg	N
J3471	Injection, hyaluronidase, ovine, preservative free, per 1 usp unit (up to 999 usp units)	N
J3472	Injection, hyaluronidase, ovine, preservative free, per 1000 usp units	N
J7030	Infusion, normal saline solution, 1000 cc	N
J7040	Infusion, normal saline solution, sterile (500 ml=1 unit)	N
J7050	Infusion, normal saline solution, 250 cc	N
J7100	Infusion, dextran 40, 500 ml	N
J7110	Infusion, dextran 75, 500 ml	N
J7515	Cyclosporine, oral, 25 mg	N
J7502	Cyclosporine, oral, 100 mg	N
J8520	Capecitabine, oral, 150 mg	N
J8521	Capecitabine, oral, 500 mg	N
J9250	Methotrexate sodium, 5 mg	N
J9260	Methotrexate sodium, 50 mg	N

BILLING CODE 4120–01–C

2. Payment for Drugs and Biologicals Without Pass-Through Status That Are Not Packaged

a. Payment for Specified Covered Outpatient Drugs (SCODs) and Other Separately Payable Drugs and Biologicals

Section 1833(t)(14) of the Act defines certain separately payable radiopharmaceuticals, drugs, and biologicals and mandates specific payments for these items. Under section 1833(t)(14)(B)(i) of the Act, a ''specified covered outpatient drug'' (known as a SCOD) is defined as a covered outpatient drug, as defined in section 1927(k)(2) of the Act, for which a separate APC has been established and that either is a radiopharmaceutical agent or is a drug or biological for which payment was made on a pass-through basis on or before December 31, 2002.

Under section 1833(t)(14)(B)(ii) of the Act, certain drugs and biologicals are designated as exceptions and are not included in the definition of SCODs. These exceptions are—

- A drug or biological for which payment is first made on or after January 1, 2003, under the transitional pass-through payment provision in section 1833(t)(6) of the Act.
- A drug or biological for which a temporary HCPCS code has not been assigned.
- During CYs 2004 and 2005, an orphan drug (as designated by the Secretary).

Section 1833(t)(14)(A)(iii) of the Act requires that payment for SCODs in CY 2006 and subsequent years be equal to the average acquisition cost for the drug for that year as determined by the Secretary, subject to any adjustment for overhead costs and taking into account the hospital acquisition cost survey data collected by the Government Accountability Office (GAO) in CYs 2004 and 2005, and later periodic surveys conducted by the Secretary as set forth in the statute. If hospital acquisition cost data are not available, the law requires that payment be equal to payment rates established under the methodology described in section 1842(o), section 1847A, or section 1847B of the Act, as calculated and adjusted by the Secretary as necessary for purposes of paragraph (14). We refer to this alternative methodology as the ''statutory default.'' Most physician Part B drugs are paid at ASP+6 percent in accordance with section 1842(o) and section 1847A of the Act.

Section 1833(t)(14)(E)(ii) of the Act provides for an adjustment in OPPS payment rates for SCODs to take into account overhead and related expenses, such as pharmacy services and handling costs. Section 1833(t)(14)(E)(i) of the Act required MedPAC to study pharmacy overhead and related expenses and to make recommendations to the Secretary regarding whether, and if so how, a payment adjustment should be made to compensate hospitals for overhead and related expenses. Section 1833(t)(14)(E)(ii) of the Act authorizes the Secretary to adjust the weights for ambulatory procedure classifications for SCODs to take into account the findings of the MedPAC study.[176]

It has been our policy since CY 2006 to apply the same treatment to all separately payable drugs and biologicals, which include SCODs, and drugs and biologicals that are not SCODs. Therefore, we apply the payment methodology in section 1833(t)(14)(A)(iii) of the Act to SCODs, as required by statute, but we also apply it to separately payable drugs and biologicals that are not SCODs, which is a policy determination rather than a statutory requirement. In the CY 2022 OPPS/ASC proposed rule, we proposed to apply section 1833(t)(14)(A)(iii)(II) of the Act to all separately payable drugs and biologicals, including SCODs. Although we do not distinguish SCODs in this discussion, we note that we are required to apply section 1833(t)(14)(A)(iii)(II) of the Act to SCODs, but we also are applying this provision to other separately payable drugs and biologicals, consistent with our history of using the same payment methodology for all separately payable drugs and biologicals.

For a detailed discussion of our OPPS drug payment policies from CY 2006 to CY 2012, we refer readers to the CY 2013 OPPS/ASC final rule with comment period (77 FR 68383 through 68385). In the CY 2013 OPPS/ASC final rule with comment period (77 FR 68386 through 68389), we first adopted the statutory default policy to pay for separately payable drugs and biologicals at ASP+6 percent based on section 1833(t)(14)(A)(iii)(II) of the Act. We have continued this policy of paying for separately payable drugs and biologicals at the statutory default for CYs 2014 through 2021.

b. CY 2022 Payment Policy

For 2022, we proposed to continue our payment policy that has been in effect since CY 2013 to pay for separately payable drugs and biologicals, with the exception of 340B-acquired drugs, at ASP+6 percent in accordance with section 1833(t)(14)(A)(iii)(II) of the Act (the statutory default). We proposed to pay for separately payable nonpass-through drugs acquired with a 340B discount at a rate of ASP minus 22.5 percent (as described in section V.B.6). We refer readers to the CY 2018 OPPS/ASC final rule with comment period (82 FR 59353 through 59371), and the CY 2021 OPPS/ASC final rule with comment period (85 FR 86042 through 86055) for more information about our current payment policy for drugs and biologicals acquired with a 340B discount.

In the case of a drug or biological during an initial sales period in which data on the prices for sales of the drug or biological are not sufficiently available from the manufacturer, section 1847A(c)(4) of the Act permits the Secretary to make payments that are based on WAC. Under section 1833(t)(14)(A)(iii)(II) of the Act, the amount of payment for a separately payable drug equals the average price for the drug for the year established under, among other authorities, section 1847A of the Act. As explained in greater detail in the CY 2019 PFS final rule, under section 1847A(c)(4) of the Act, although payments may be based on WAC, unlike section 1847A(b) of the Act (which specifies that payments using ASP or WAC must be made with a 6 percent add-on), section 1847A(c)(4) of the Act does not require that a particular add-on amount be applied to WAC-based pricing for this initial period when ASP data is not available. Consistent with section 1847A(c)(4) of the Act, in the CY 2019 PFS final rule (83 FR 59661 to 59666), we finalized a policy that, effective January 1, 2019, WAC-based payments for Part B drugs made under section 1847A(c)(4) of the Act will utilize a 3-percent add-on in place of the 6-percent add-on that was being used according to our policy in effect as of CY 2018. For the CY 2019 OPPS, we followed the same policy finalized in the CY 2019 PFS final rule (83 FR 59661 to 59666). For CYs 2020 and 2021, we adopted a policy to utilize a 3-percent add-on instead of a 6-percent add-on for drugs that are paid based on WAC under section 1847A(c)(4) of the Act pursuant to our authority under section 1833(t)(14)(A)(iii)(II) (84 FR 61318 and 85 FR 86039). For 2022, we proposed to continue to utilize a 3-percent add-on instead of a 6-percent add-on for drugs that are paid based on WAC pursuant to our authority under section 1833(t)(14)(A)(iii)(II) of the Act, which

[176] Medicare Payment Advisory Committee. June 2005 Report to the Congress. Chapter 6: Payment for pharmacy handling costs in hospital outpatient departments. Available at: *http://www.medpac.gov/docs/default-source/reports/June05_ch6.pdf?sfvrsn=0.*

provides, in part, that the amount of payment for a SCOD is the average price of the drug in the year established under section 1847A of the Act. We also proposed to apply this provision to non-SCOD separately payable drugs. Because we proposed to establish the average price for a drug paid based on WAC under section 1847A of the Act as WAC+3 percent instead of WAC+6 percent, we believe it is appropriate to price separately payable drugs paid based on WAC at the same amount under the OPPS. We proposed that, if finalized, our proposal to pay for drugs or biologicals at WAC+3 percent, rather than WAC+6 percent, would apply whenever WAC-based pricing is used for a drug or biological under 1847A(c)(4). For drugs and biologicals that would otherwise be subject to a payment reduction because they were acquired under the 340B Program, the payment amount for these drugs (proposed as a rate of WAC minus 22.5 percent) would continue to apply. We refer readers to the CY 2019 PFS final rule (83 FR 59661 to 59666) for additional background on this policy.

We proposed that payments for separately payable drugs and biologicals would be included in the budget neutrality adjustments, under the requirements in section 1833(t)(9)(B) of the Act. We also proposed that the budget neutral weight scalar would not be applied in determining payments for these separately payable drugs and biologicals.

We note that separately payable drug and biological payment rates listed in Addenda A and B to the CY 2022 OPPS/ASC proposed rule (available via the internet on the CMS website), which illustrate the proposed CY 2022 payment of ASP+6 percent for separately payable nonpass-through drugs and biologicals and ASP+6 percent for pass-through drugs and biologicals, reflect either ASP information that is the basis for calculating payment rates for drugs and biologicals in the physician's office setting effective April 1, 2021, or WAC, AWP, or mean unit cost from CY 2019 claims data and updated cost report information available for the CY 2022 OPPS/ASC proposed rule. In general, these published payment rates are not the same as the actual January 2022 payment rates. This is because payment rates for drugs and biologicals with ASP information for January 2022 will be determined through the standard quarterly process where ASP data submitted by manufacturers for the third quarter of CY 2021 (July 1, 2021, through September 30, 2021) will be used to set the payment rates that are released for the quarter beginning in January 2022 in December 2021. In addition, payment rates for drugs and biologicals in Addenda A and B to the proposed rule for which there was no ASP information available for April 2021 are based on mean unit cost in the available CY 2019 claims data. If ASP information becomes available for payment for the quarter beginning in January 2022, we will price payment for these drugs and biologicals based on their newly available ASP information. Finally, there may be drugs and biologicals that have ASP information available for the proposed rule (reflecting April 2021 ASP data) that do not have ASP information available for the quarter beginning in January 2022. These drugs and biologicals would then be paid based on mean unit cost data derived from CY 2019 hospital claims. Therefore, the proposed payment rates listed in Addenda A and B to the proposed rule are not for January 2022 payment purposes and are only illustrative of the CY 2022 OPPS payment methodology using the most recently available information at the time of issuance of the proposed rule.

Comment: Multiple commenters expressed their support for paying for separately payable drugs and biologicals at ASP+6 percent. The commenters believe this policy is consistent with statute and Congressional intent, and generates more predictable payment for providers than previous payment methodologies for drugs and biologicals. The commenters believe the ASP+6 percent payment policy ensures equivalent payment for drugs and biologicals between the outpatient hospital setting and the physician office, which encourages Medicare beneficiaries to receive care in the most clinically appropriate setting.

Response: We appreciate the commenters' feedback.

Comment: One commenter requested that an add-on percentage of greater than 6 percent of ASP be paid for separately payable radiopharmaceuticals to reflect higher overhead and handling costs for these products.

Response: The add-on percentage of 6 percent is generally viewed as reflecting the overhead and handling cost of most drugs, radiopharmaceuticals, and biologicals that are separately payable in the OPPS even though the overhead and handling costs for individual products may be higher or lower than 6 percent of the ASP. We believe that the add-on percentage of 6 percent is appropriate for separately payable radiopharmaceuticals.

Comment: Two commenters requested that we exclude both diagnostic and therapeutic radiopharmaceuticals from our proposed policy that during an initial sales period in which data on the prices for sales of the drug or biological are not sufficiently available from the manufacturer, that payments can be made for drugs using WAC pricing plus a 3 percent price add-on. The commenters believe the cost of preparing radiopharmaceuticals is higher than the cost of preparing other drugs and biologicals and a 6 percent price add-on should be required anytime that we use WAC to price a radiopharmaceutical.

Response: The WAC of a drug or biological is defined in section 1847A(c)(6)(B) of the Act as the manufacturer's list price for the drug or biological to wholesalers or direct purchasers in the United States, not including prompt pay or other discounts, rebates or reductions in price, for the most recent month for which the information is available, as reported in wholesale price guides or other publications of drug or biological pricing data. Because the WAC does not include discounts, it typically exceeds ASP, and the use of a WAC-based payment amount for the same drug results in higher dollar payments than the use of an ASP-based payment amount. Also, MedPAC in their June 2017 Report to the Congress (*http://www.medpac.gov/docs/default-source/reports/jun17_reporttocongress_sec.pdf*, pages 42 through 44) suggested that greater parity between ASP-based acquisition costs and WAC-based payments for Part B drugs could be achieved and recommended changing the 6 percent add-on for WAC-based payments to 3 percent. Given this evidence that WAC pricing tends to overestimate drug cost, we believe our current and proposed policy to pay drugs at WAC plus 3 percent for all drugs, biologicals, and radiopharmaceuticals when ASP is not available more accurately reflects the cost of new products recently entering the market than does WAC plus 6 percent.

After considering the public comments we received, we are finalizing our proposals related to payment for SCODs and other separately payable drugs and biologicals without modification.

c. Biosimilar Biological Products

For CY 2016 and CY 2017, we finalized a policy to pay for biosimilar biological products based on the payment allowance of the product as determined under section 1847A of the

Act and to subject nonpass-through biosimilar biological products to our annual threshold-packaged policy (for CY 2016, 80 FR 70445 through 70446; and for CY 2017, 81 FR 79674). In the CY 2018 OPPS/ASC proposed rule (82 FR 33630), for CY 2018, we proposed to continue this same payment policy for biosimilar biological products.

In the CY 2018 OPPS/ASC final rule with comment period (82 FR 59351), we noted that, with respect to comments we received regarding OPPS payment for biosimilar biological products, in the CY 2018 PFS final rule, CMS finalized a policy to implement separate HCPCS codes for biosimilar biological products. Therefore, consistent with our established OPPS drug, biological, and radiopharmaceutical payment policy, HCPCS coding for biosimilar biological products is based on the policy established under the CY 2018 PFS final rule.

In the CY 2018 OPPS/ASC final rule with comment period (82 FR 59351), after consideration of the public comments we received, we finalized our proposed payment policy for biosimilar biological products, with the following technical correction: All biosimilar biological products are eligible for pass-through payment and not just the first biosimilar biological product for a reference product. In the CY 2019 OPPS/ASC proposed rule (83 FR 37123), for CY 2019, we proposed to continue the policy in place from CY 2018 to make all biosimilar biological products eligible for pass-through payment and not just the first biosimilar biological product for a reference product.

In addition, in CY 2018, we adopted a policy that biosimilars without pass-through payment status that were acquired under the 340B Program would be paid the ASP of the biosimilar minus 22.5 percent of the reference product's ASP (82 FR 59367). We adopted this policy in the CY 2018 OPPS/ASC final rule with comment period because we believe that biosimilars without pass-through payment status acquired under the 340B Program should be treated in the same manner as other drugs and biologicals acquired through the 340B Program. As noted earlier, biosimilars with pass-through payment status are paid their own ASP+6 percent of the reference product's ASP. Separately payable biosimilars that do not have pass-through payment status and are not acquired under the 340B Program are also paid their own ASP plus 6 percent of the reference product's ASP. If a biosimilar does not have ASP pricing, but instead has WAC pricing, the WAC pricing add-on of either 3 percent or 6 percent is calculated from the biosimilar's WAC and is not calculated from the WAC price of the reference product.

As noted in the CY 2019 OPPS/ASC proposed rule (83 FR 37123), several stakeholders raised concerns to us that the payment policy for biosimilars acquired under the 340B Program could unfairly lower the OPPS payment for biosimilars not on pass-through payment status because the payment reduction would be based on the reference product's ASP, which would generally be expected to be priced higher than the biosimilar, thus resulting in a more significant reduction in payment than if the 22.5 percent was calculated based on the biosimilar's ASP. We agreed with stakeholders that the current payment policy could unfairly lower the price of biosimilars without pass-through payment status that are acquired under the 340B Program. In addition, we noted that we believed that these changes would better reflect the resources and production costs that biosimilar manufacturers incur. We also stated that we believe this approach is more consistent with the payment methodology for 340B-acquired drugs and biologicals, for which the 22.5 percent reduction is calculated based on the drug or biological's ASP, rather than the ASP of another product. In addition, we explained that we believed that paying for biosimilars acquired under the 340B Program at ASP minus 22.5 percent of the biosimilar's ASP, rather than 22.5 percent of the reference product's ASP, will more closely approximate hospitals' acquisition costs for these products.

Accordingly, in the CY 2019 OPPS/ASC proposed rule (83 FR 37123), we proposed changes to our Medicare Part B drug payment methodology for biosimilars acquired under the 340B Program. Specifically, for CY 2019 and subsequent years, in accordance with section 1833(t)(14)(A)(iii)(II) of the Act, we proposed to pay nonpass-through biosimilars acquired under the 340B Program at ASP minus 22.5 percent of the biosimilar's ASP instead of the biosimilar's ASP minus 22.5 percent of the reference product's ASP. This proposal was finalized without modification in the CY 2019 OPPS/ASC final rule with comment period (83 FR 58977).

For 2022, we proposed to continue our policy to make all biosimilar biological products eligible for pass-through payment and not just the first biosimilar biological product for a reference product. We also proposed to continue our current policy of paying for nonpass-through biosimilars acquired under the 340B program at the biosimilar's ASP minus 22.5 percent of the biosimilar's ASP instead of the biosimilar's ASP minus 22.5 percent of the reference product's ASP, in accordance with section 1833(t)(14)(A)(iii)(II) of the Act.

Comment: One commenter supported our proposal to continue our policy from CY 2018 to make biosimilar biological products eligible for pass-through payment and not just the first biosimilar biological product for a reference product.

Response: We appreciate the commenter's support of this established policy.

Comment: Multiple commenters supported our proposal to pay nonpass-through biosimilars acquired under the 340B Program at ASP minus 22.5 percent of the biosimilar's ASP, rather than the reference product's ASP.

Response: We appreciate the commenters' support. Please see section V.B.6. of this final rule with comment period for a discussion of payment policy for drugs and biologicals acquired under the 340B program.

Comment: One commenter did not support our proposal to continue our CY 2018 policy to make all biosimilar biological products eligible for pass-through payment and not just the first biosimilar biological product for a reference product. The commenter believes that there should be a ''level playing field'' between biosimilars and their reference products in order to increase competition and reduce costs for beneficiaries. The commenter does not believe it is fair for biosimilars of a reference product to be receiving passthrough payment of ASP plus 6 percent of the reference product's ASP. The commenter pointed out that when the reference product is no longer eligible for pass-through payment, if it is acquired under the 340B program, hospitals would be paid for the product at ASP minus 22.5 percent, while the biosimilar that has pass-through status continues to receive payment at ASP plus 6 percent of the reference product's ASP. The commenter believes that this difference in the payment rates for biosimilars and their reference products could potentially lead to increased Medicare spending on biosimilars as providers utilize biosimilars instead of the biosimilars' reference products because of the higher payment rates for biosimilars in these circumstances.

Response: As discussed in the CY 2019 OPPS/ASC final rule with comment period (83 FR 58977), we continue to believe that eligibility for pass-through payment status reflects the unique, complex nature of biosimilars

and is important as biosimilars become established in the market, just as it is for all other new drugs and biologicals. In terms of the potential increased payment for biosimilars under our policy to allow biosimilars to be eligible for pass-through status, overall increased competition due to the presence of more biosimilars on the market as a result of this policy is expected to drive payments down for both Medicare and for beneficiaries over time, even if there may be increased spending on biosimilars in the short term.

After consideration of the public comments we received, we are finalizing our proposed payment policy for biosimilar products, without modification, to continue the policy established in CY 2018 to make all biosimilar biological products eligible for pass-through payment and not just the first biosimilar biological product for a reference product. We are also finalizing our proposal to continue to pay nonpass-through biosimilars acquired under the 340B Program at the biosimilar's ASP minus 22.5 percent of the biosimilar's, rather than the reference product's ASP. Our final policy regarding the payment rate for drugs and biologicals that are acquired under the 340B program is described in section V.B.6 of this final rule with comment period.

3. Payment Policy for Therapeutic Radiopharmaceuticals

For CY 2022, we proposed to continue the payment policy for therapeutic radiopharmaceuticals that began in CY 2010. We pay for separately payable therapeutic radiopharmaceuticals under the ASP methodology adopted for separately payable drugs and biologicals. If ASP information is unavailable for a therapeutic radiopharmaceutical, we base therapeutic radiopharmaceutical payment on mean unit cost data derived from hospital claims. We believe that the rationale outlined in the CY 2010 OPPS/ASC final rule with comment period (74 FR 60524 through 60525) for applying the principles of separately payable drug pricing to therapeutic radiopharmaceuticals continues to be appropriate for nonpass-through, separately payable therapeutic radiopharmaceuticals in CY 2022. Therefore, we proposed for CY 2022 to pay all nonpass-through, separately payable therapeutic radiopharmaceuticals at ASP+6 percent, based on the statutory default described in section 1833(t)(14)(A)(iii)(II) of the Act. For a full discussion of ASP-based payment for therapeutic radiopharmaceuticals, we refer readers to the CY 2010 OPPS/ASC final rule with comment period (74 FR 60520 through 60521). We also proposed to rely on CY 2019 mean unit cost data derived from hospital claims data for payment rates for therapeutic radiopharmaceuticals for which ASP data are unavailable and to update the payment rates for separately payable therapeutic radiopharmaceuticals according to our usual process for updating the payment rates for separately payable drugs and biologicals on a quarterly basis if updated ASP information is unavailable. For a complete history of the OPPS payment policy for therapeutic radiopharmaceuticals, we refer readers to the CY 2005 OPPS final rule with comment period (69 FR 65811), the CY 2006 OPPS final rule with comment period (70 FR 68655), and the CY 2010 OPPS/ASC final rule with comment period (74 FR 60524). The proposed CY 2022 payment rates for nonpass-through, separately payable therapeutic radiopharmaceuticals are included in Addenda A and B to the CY 2022 OPPS/ASC proposed rule (which are available via the internet on the CMS website).

Comment: One commenter supported the continuation of this policy to provide a predicable payment methodology and avoid the payment swings that occurred prior to adoption of the statutory default rate for therapeutic radiopharmaceuticals.

Response: We thank the commenter for their support.

We did not receive any additional public comments on this proposal and are finalizing our proposal, without modification, to continue to pay all nonpass-through, separately payable therapeutic radiopharmaceuticals at ASP+6 percent. We are also finalizing our proposal to continue to rely on CY 2019 mean unit cost data derived from hospital claims data for payment rates for therapeutic radiopharmaceuticals for which ASP data are unavailable. The CY 2022 final payment rates for nonpass-through separately payable therapeutic radiopharmaceuticals are included in Addenda A and B to this final rule with comment period (which are available via the internet on the CMS website).

4. Payment for Blood Clotting Factors

For CY 2021, we provided payment for blood clotting factors under the same methodology as other nonpass-through separately payable drugs and biologicals under the OPPS and continued paying an updated furnishing fee (85 FR 86041). That is, for CY 2021, we provided payment for blood clotting factors under the OPPS at ASP+6 percent, plus an additional payment for the furnishing fee. We note that when blood clotting factors are provided in physicians' offices under Medicare Part B and in other Medicare settings, a furnishing fee is also applied to the payment. The CY 2021 updated furnishing fee was $0.238 per unit.

For 2022, we proposed to pay for blood clotting factors at ASP+6 percent, consistent with our proposed payment policy for other nonpass-through, separately payable drugs and biologicals, and to continue our policy for payment of the furnishing fee using an updated amount. Our policy to pay a furnishing fee for blood clotting factors under the OPPS is consistent with the methodology applied in the physician's office and in the inpatient hospital setting. These methodologies were first articulated in the CY 2006 OPPS final rule with comment period (70 FR 68661) and later discussed in the CY 2008 OPPS/ASC final rule with comment period (72 FR 66765). The proposed furnishing fee update is based on the percentage increase in the Consumer Price Index (CPI) for medical care for the 12-month period ending with June of the previous year. Because the Bureau of Labor Statistics releases the applicable CPI data after the PFS and OPPS/ASC proposed rules are published, we are not able to include the actual updated furnishing fee in the proposed rules. Therefore, in accordance with our policy, as finalized in the CY 2008 OPPS/ASC final rule with comment period (72 FR 66765), we proposed to announce the actual figure for the percent change in the applicable CPI and the updated furnishing fee calculated based on that figure through applicable program instructions and posting on our website at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Part-B-Drugs/McrPartBDrugAvgSalesPrice/index.html*.

We proposed to provide payment for blood clotting factors under the same methodology as other separately payable drugs and biologicals under the OPPS and to continue payment of an updated furnishing fee. We will announce the actual figure of the percent change in the applicable CPI and the updated furnishing fee calculation based on that figure through the applicable program instructions and posting on the CMS website.

Comment: One commenter supports our proposal to continue to pay for blood clotting factors at ASP+6 percent plus a furnishing fee for the clotting factor update annually using the CPI. The commenter also supports our policy to pay the same clotting factor

furnishing fee in both the hospital outpatient and physician office settings.

Response: We appreciate the commenter's support for our policies.

After reviewing the public comment that we received, we are finalizing our proposal, without modification, to provide payment for blood clotting factors under the same methodology as other separately payable drugs and biologicals under the OPPS and to continue payment of an updated furnishing fee. We will announce the actual figure of the percent change in the applicable CPI and the updated furnishing fee calculation based on that figure through the applicable program instructions and posting on the CMS website.

5. Payment for Nonpass-Through Drugs, Biologicals, and Radiopharmaceuticals With HCPCS Codes But Without OPPS Hospital Claims Data

For CY 2022, we proposed to continue to use the same payment policy as in CY 2021 for nonpass-through drugs, biologicals, and radiopharmaceuticals with HCPCS codes but without OPPS hospital claims data, which describes how we determine the payment rate for drugs, biologicals, or radiopharmaceuticals without an ASP. For a detailed discussion of the payment policy and methodology, we refer readers to the CY 2016 OPPS/ASC final rule with comment period (80 FR 70442 through 70443). The proposed CY 2022 payment status of each of the nonpass-through drugs, biologicals, and radiopharmaceuticals with HCPCS codes but without OPPS hospital claims data is listed in Addendum B to the CY 2022 OPPS/ASC proposed rule, which is available via the internet on the CMS website.

We did not receive any comments on our proposal. Therefore, we are finalizing our CY 2022 proposal without modification, including our proposal to assign drug or biological products status indicator ''K'' and pay for them separately for the remainder of CY 2022 if pricing information becomes available. The CY 2022 payment status of each of the nonpass-through drugs, biologicals, and radiopharmaceuticals with HCPCS codes but without OPPS hospital claims data is listed in Addendum B to this final rule with comment period, which is available via the internet on the CMS website.

6. CY 2022 OPPS Payment Methodology for 340B Purchased Drugs

a. Overview

Under the OPPS, payment rates for drugs are generally provided for in section 1833(t)(14)(A). Under that provision, the payment amount is more specifically set forth by cross-reference to section 1847A, which generally sets a default rate of ASP+6 percent for certain drugs; however, the Secretary has statutory authority to adjust that rate under the OPPS. As described below, beginning in CY 2018, the Secretary adjusted the 340B drug payment rate to ASP minus 22.5 percent to approximate a minimum average discount for 340B drugs, which was based on findings of the GAO and MedPAC that hospitals were acquiring drugs at a significant discount under HRSA's 340B Drug Pricing Program. As described in the following sections, in December 2018, the United States District Court for the District of Columbia (the district court) concluded that the Secretary lacks the authority to bring the default rate in line with average acquisition cost unless the Secretary obtains survey data from hospitals on their acquisition costs. On July 10, 2019, the district court entered final judgment. The agency appealed to the United States Court of Appeals for the District of Columbia Circuit (hereinafter referred to as ''the D.C. Circuit''), and on July 31, 2020, the court entered an opinion reversing the district court's judgment in this matter. Following the D.C. Circuit's reversal of the lower court's decision, appellees' petition for panel rehearing and petition for rehearing en banc were denied on October 16, 2020. For CY 2021, CMS continued its policy of paying for drugs and biologicals acquired through the 340B Program at ASP minus 22.5 percent.

On January 10, 2021, the appellees filed a petition for a writ of certiorari in the United States Supreme Court. On July 2, 2021, the Supreme Court granted their petition for a writ of certiorari and directed the parties to argue whether the petitioners' suit challenging HHS's 340B drugs payment adjustment is precluded by section 1833(t)(12).[177]

b. Background

In the CY 2018 OPPS/ASC proposed rule (82 FR 33558 through 33724), we proposed changes to the OPPS payment methodology for drugs and biologicals (hereinafter referred to collectively as ''drugs'') acquired under the 340B Program. We proposed these changes to better, and more accurately, reflect the resources and acquisition costs that these hospitals incur. We stated our belief that such changes would allow Medicare beneficiaries (and the Medicare program) to pay a more appropriate amount when hospitals participating in the 340B Program furnish drugs to Medicare beneficiaries that are purchased under the 340B Program. Subsequently, in the CY 2018 OPPS/ASC final rule with comment period (82 FR 59369 through 59370), we finalized our proposal and adjusted the payment rate for separately payable drugs and biologicals (other than drugs with pass-through payment status and vaccines) acquired under the 340B Program from ASP+6 percent to ASP minus 22.5 percent. We stated that our goal was to make Medicare payment for separately payable drugs more aligned with the resources expended by hospitals to acquire such drugs, while recognizing the intent of the 340B Program to allow covered entities, including eligible hospitals, to stretch scarce resources in ways that enable hospitals to continue providing access to care for Medicare beneficiaries and other patients. Congress created the 340B Drug Pricing Program so that the eligible entities—safety net providers identified in the statute—could stretch scarce Federal resources as far as possible, reaching more eligible patients and providing more comprehensive services. By design, the 340B Program increases the resources available to these safety net providers by providing discounts on covered outpatient drugs that generate savings that can be used to support patient care or other services. When the program was created, there was an understanding that many of the patients seen by these safety net providers were Medicare and Medicaid beneficiaries. This rule aims to fulfill the goals of different Federal programs, each of which helps ensure access to care for vulnerable populations. We note, however, that the 340B program does not contemplate subsidization from Medicare in the form of payments far exceeding hospitals' acquisition costs. We also note that critical access hospitals are not paid under the OPPS, and therefore are not subject to the OPPS payment policy for 340B-acquired drugs. We also excepted rural sole community hospitals, children's hospitals, and PPS-exempt cancer hospitals from the 340B payment adjustment in CY 2018. In addition, as stated in the CY 2018 OPPS/ASC final rule with comment period, this policy change does not apply to drugs with pass-through payment status, which are required to be paid based on the ASP methodology, or vaccines, which are excluded from the 340B Program.

In the CY 2017 OPPS/ASC final rule with comment period (81 FR 79699

[177] *https://www.supremecourt.gov/orders/courtorders/070221zor_4gc5.pdf.* Accessed July 8, 2021.

through 79706), we implemented section 603 of the Bipartisan Budget Act of 2015. As a general matter, applicable items and services furnished in certain off-campus outpatient departments of a provider on or after January 1, 2017, are not considered covered outpatient services for purposes of payment under the OPPS and are paid ''under the applicable payment system,'' which is generally the Physician Fee Schedule (PFS). However, consistent with our policy to pay separately payable, covered outpatient drugs and biologicals acquired under the 340B Program at ASP minus 22.5 percent, rather than ASP+6 percent, when billed by a hospital paid under the OPPS that is not excepted from the payment adjustment, in the CY 2019 OPPS/ASC final rule with comment period (83 FR 59015 through 59022), we finalized a policy to pay ASP minus 22.5 percent for 340B-acquired drugs and biologicals furnished in non-excepted off-campus PBDs paid under the PFS. We adopted this payment policy effective for CY 2019 and subsequent years.

We clarified in the CY 2019 OPPS/ASC proposed rule (83 FR 37125) that the 340B payment adjustment applies to drugs that are priced using either WAC or AWP, and that it has been our policy to subject 340B-acquired drugs that use these pricing methodologies to the 340B payment adjustment since the policy was first adopted. The 340B payment adjustment for WAC-priced drugs is WAC minus 22.5 percent. 340B-acquired drugs that are priced using AWP are paid an adjusted amount of 69.46 percent of AWP. The 69.46 percent of AWP is calculated by first reducing the original 95 percent of AWP price by 6 percent to generate a value that is similar to ASP or WAC with no percentage markup. Then we apply the 22.5 percent reduction to ASP/WAC-similar AWP value to obtain the 69.46 percent of AWP, which is similar to either ASP minus 22.5 percent or WAC minus 22.5 percent.

As discussed in the CY 2018 OPPS/ASC final rule with comment period (82 FR 59369 through 59370), to effectuate the payment adjustment for 340B-acquired drugs, we implemented modifier ''JG'', effective January 1, 2018. Hospitals paid under the OPPS, other than a type of hospital excluded from the OPPS (such as critical access hospitals), or excepted from the 340B drug payment policy for CY 2018, were required to report modifier ''JG'' on the same claim line as the drug HCPCS code to identify a 340B-acquired drug. For CY 2018, rural sole community hospitals, children's hospitals and PPS-exempt cancer hospitals were excepted from the 340B payment adjustment. These hospitals were required to report informational modifier ''TB'' for 340B-acquired drugs, and continue to be paid ASP+6 percent. We refer readers to the CY 2018 OPPS/ASC final rule with comment period (82 FR 59353 through 59370) for a full discussion and rationale for the CY 2018 policies and use of modifiers ''JG'' and ''TB''.

In the CY 2019 OPPS/ASC final rule with comment period (83 FR 58981), we continued the Medicare 340B payment policies that were implemented in CY 2018 and adopted a policy to pay for nonpass-through 340B-acquired biosimilars at ASP minus 22.5 percent of the biosimilar's ASP, rather than of the reference product's ASP. In the CY 2020 OPPS/ASC final rule with comment period (84 FR 61321), we continued the 340B policies that were implemented in CY 2018 and CY 2019.

Our CY 2018 and 2019 OPPS payment policies for 340B-acquired drugs have been the subject of ongoing litigation. On December 27, 2018, in the case of *American Hospital Association, et al.* v. *Azar, et al.,* the district court concluded in the context of reimbursement requests for CY 2018 that the Secretary exceeded his statutory authority by adjusting the Medicare payment rates for drugs acquired under the 340B Program to ASP minus 22.5 percent for that year.[178] In that same decision, the district court recognized the ''havoc that piecemeal review of OPPS payment could bring about' in light of the budget neutrality requirement,'' and ordered supplemental briefing on the appropriate remedy.[179] On May 6, 2019, after briefing on remedy, the district court issued an opinion that reiterated that the 2018 rate reduction exceeded the Secretary's authority, and declared that the rate reduction for 2019 (which had been finalized since the Court's initial order was entered) also exceeded his authority.[180] Rather than ordering HHS to pay plaintiffs their alleged underpayments, however, the district court recognized that crafting a remedy is ''no easy task, given Medicare's complexity,'' [181] and initially remanded the issue to HHS to devise an appropriate remedy while also retaining jurisdiction. The district court acknowledged that ''if the Secretary were to retroactively raise the 2018 and 2019 340B rates, budget neutrality would require him to retroactively lower the 2018 and 2019 rates for other Medicare Part B products and services.'' [182] ''And because HHS has already processed claims under the previous rates, the Secretary would potentially be required to recoup certain payments made to providers; an expensive and time-consuming prospect.'' [183]

We respectfully disagreed with the district court's understanding of the scope of the Secretary's adjustment authority. On July 10, 2019, the district court entered final judgment. The agency appealed to the D.C. Circuit, and on July 31, 2020, the court entered an opinion reversing the district court's judgment in this matter. Following the D.C. Circuit's decision, appellees' petition for panel rehearing and petition for rehearing en banc were denied on October 16, 2020. In January of 2021, appellees petitioned the United States Supreme Court for a writ of certiorari. On July 2, 2021, the Court granted the petition.

Before the D.C. Circuit upheld our authority to pay ASP minus 22.5 percent, we stated in the CY 2020 OPPS/ASC final rule with comment period that we were taking the steps necessary to craft an appropriate remedy in the event of an unfavorable decision on appeal. Notably, after the CY 2020 OPPS/ASC proposed rule was issued, we announced in the **Federal Register** (84 FR 51590) our intent to conduct a 340B hospital survey to collect drug acquisition cost data for certain quarters in CY 2018 and 2019. We stated that such survey data may be used in setting the Medicare payment amount for drugs acquired by 340B hospitals for cost years going forward, and also may be used to devise a remedy for prior years if the district court's ruling was upheld on appeal. The district court itself acknowledged that CMS may base the Medicare payment amount on average acquisition cost when survey data are available.[184] No 340B hospital disputed in the rulemakings for CY 2018 and 2019 that the ASP minus 22.5 percent formula was a conservative adjustment that represented the minimum discount that hospitals receive for drugs acquired through the 340B program, which is significant because 340B hospitals have internal data regarding their own drug acquisition costs. We stated in the CY 2020 OPPS/ASC final rule with comment period that we thus

[178] *American Hosp. Ass'n, et al.* v. *Azar, et al.,* No. 1:18–cv–2084 (D.D.C. Dec. 27, 2018).

[179] *Id.* at 35 (quoting *Amgen, Inc.* v. *Smith,* 357 F.3d 103, 112 (D.C. Cir. 2004) (citations omitted)).

[180] *See* May 6, 2019 Memorandum Opinion, Granting in Part Plaintiffs' Motion for a Permanent Injunction; Remanding the 2018 and 2019 OPPS Rules to HHS at 10–12.

[181] *Id.* at 13.

[182] *Id.* at 19.

[183] *Id.* (citing Declaration of Elizabeth Richter).

[184] *See American Hosp. Assoc.* v. *Azar,* 348 F. Supp. 3d 62, 82 (D.D.C. 2018).

anticipated that survey data collected for CY 2018 and 2019 would confirm that the ASP minus 22.5 percent rate is a conservative amount that overcompensates covered entity hospitals for drugs acquired under the 340B program. We also explained that a remedy that relies on such survey data could avoid the complexities referenced in the district court's opinion. For a complete discussion of the Hospital Acquisition Cost Survey for 340B-Acquired Specified Covered Outpatient Drugs, we refer readers to the CY 2021 OPPS/ASC proposed rule (85 FR 48882 through 48891) and the CY 2021 OPPS/ASC final rule with comment period (85 FR 86042 through 86055).
