FEDERAL REGISTER

Vol. 87 Wednesday

No. 225 November 23, 2022

Pages 71503–72358

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 87 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Title 3—

The President

Proclamation 10498 of November 18, 2022

National Family Week, 2022

By the President of the United States of America

A Proclamation

During National Family Week, we celebrate the power of family, whose love and dreams for the future have made this Nation strong for generations.

For me and the First Lady, family is everything. That is why, from day one, my Administration's top priority has been to build an economy that works for working families. Our American Rescue Plan provided families with thousands of dollars each in stimulus checks and tax credits, slashing child poverty by nearly half and cutting food insecurity by a quarter. It helped to reopen schools, easing the burden on overstretched parents, and it gave every American access to free COVID–19 vaccines so families separated by the pandemic could finally be together. Last summer, I signed the Bipartisan Infrastructure Law to rebuild roads, bridges, ports, and public transit—reviving communities and creating good-paying jobs to raise a family on. This law is replacing lead pipes in homes and schools so every child in America has clean drinking water. It is expanding broadband internet so no child has to sit in a fast-food parking lot to get Wi-Fi for their homework. It is building resilient infrastructure in flood- and fire-prone areas, protecting family homes from the threat of climate change.

I also signed the historic Inflation Reduction Act, capping annual prescription drug costs for seniors on Medicare at $2,000. We are lowering the cost of hearing aids and making them available over the counter, saving millions of Americans with hearing loss up to $3,000 per pair. We are working to ban ''junk fees''—those unfair, hidden charges that companies stick you with, like surprise overdraft charges or extreme credit-card late fees that take real money from the pockets of American families. We have also taken historic action to ease the burden of crippling student debt as working families continue to recover from the strains associated with the COVID–19 pandemic. This summer, we passed the first major gun safety bill in nearly 30 years, taking on the epidemic of gun violence that has ripped too many families apart. And we are working across the Government to finally get military and veteran families the benefits and support they deserve.

The past few years have been tough, but there are so many bright spots to give us hope and optimism. Economic growth and real incomes are up. Inflation and gas prices are down. We have created a record number of jobs with historically low unemployment. We have seen a record number of new businesses, and manufacturing is booming. American families' net worth is greater now than before the pandemic. Fewer families are behind on mortgages or credit card bills and more have health insurance. We have much more to do—providing affordable childcare, paid family leave, and home care for seniors, for instance—but American families are already seeing the benefits of an economy built from the bottom up and middle out.

My dad had an expression: Family is the beginning, middle, and end. May the power of family continue to be a blessing and a great strength of our Nation.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution

and the laws of the United States, do hereby proclaim November 20 through November 26, 2022, as National Family Week. I invite States, communities, and individuals to join together in observing this week with appropriate ceremonies and activities to honor our Nation's families.

IN WITNESS WHEREOF, I have hereunto set my hand this eighteenth day of November, in the year of our Lord two thousand twenty-two, and of the Independence of the United States of America the two hundred and forty-seventh.

By the President of the United States of America

A Proclamation

Every child deserves to be safe and loved—anchored by a supportive family, a welcoming community, and a Nation devoted to their education, health, safety, and well-being. On National Child's Day, we renew our commitment to making America the best place in the world to grow up.

America's youngest generation is set to become the best-educated, most accomplished, and most tolerant in our history. Across the country, children are studying hard, modeling kindness and compassion, and making their voices heard on today's biggest issues—from climate change to human rights, health care to gun violence, and racial justice to immigration. America's youth make me more optimistic than ever about this Nation's future, and I know that, by investing in their success today, we can shape a more prosperous, secure, and just world tomorrow.

That is why I signed the American Rescue Plan at the start of my Presidency, providing $130 billion to public K–12 schools to help them pay teacher salaries, fund renovations, and launch new afterschool and summer tutoring programs. During my first year in office, preschools, elementary schools, and high schools hired a record 279,000 new educators, and almost every single school that closed at the height of the pandemic is now up and running. To continue this progress and ensure that no child's future is limited by the neighborhood where they are raised, I am calling on the Congress to more than double funding for historically neglected Title I schools, which serve children from low-income families.

At the same time, our American Rescue Plan expanded health insurance to over a million children and cut child poverty by nearly 50 percent. I have taken on the youth mental health crisis by making it easier for children across America to receive support through their pediatricians' offices and helping schools hire more counselors and social workers. I secured funding through our Bipartisan Infrastructure Law to replace lead pipes across the Nation and ensure that no parent has to second-guess the quality of the water coming out of a school's drinking fountains.

As part of the White House Conference on Hunger, Nutrition, and Health that I convened this fall—the first in 50 years—we released a national strategy to end hunger and reduce diet-related diseases, starting by expanding free school meals to 9 million more kids by 2032. And during Pride Month this year, I signed an Executive Order to provide support to LGBTQI+ children and families, who deserve the same dignity and respect as all Americans. This order addresses discriminatory legislative attacks on LGBTQI+ people and youth, safeguards access to health care, prevents harmful so-called ''conversion therapy,'' and addresses the LGBTQI+ youth mental health crisis. I will also ensure that the United States continues to defend and fully implement the Indian Child Welfare Act of 1978, a law I was proud to support that protects Native children and families in the welfare system and involves Tribes in child welfare cases.

Additionally, to improve children's safety at home, in classrooms, and in child care settings, my Administration rolled out COVID–19 vaccines for kids 6 months and older. I also took action on gun violence, signing a

historic law to keep firearms out of the hands of people who are a danger to themselves and to others—the first major bipartisan gun safety legislation in nearly 30 years. I will continue pushing the Congress to ban assault weapons and high-capacity magazines and support universal background checks, because no student in this country should fear for their life and no parent should worry about whether their child will come home safe from school.

America became a world leader because we invested in the well-being of our children and their families. We pioneered new medicines, improved nutrition, expanded educational opportunity for all children, and drastically reduced infant mortality. Today, we have another chance to shape a future our Nation can be proud of. By ensuring every child in America has a safe and supportive upbringing, we can give our kids the chance to be healthier, happier, and more successful than ever before. For the good of the country and the world, this work cannot wait.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim November 20, 2022, as National Child's Day. I call upon all government officials, educators, volunteers, and all the people of the United States of America to observe this day with appropriate programs, ceremonies, and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this eighteenth day of November, in the year of our Lord two thousand twenty-two, and of the Independence of the United States of America the two hundred and forty-seventh.

BUREAU OF CONSUMER FINANCIAL PROTECTION

12 CFR Chapter X

Consumer Financial Protection Circular 2022–07: Reasonable Investigation of Consumer Reporting Disputes

AGENCY: Bureau of Consumer Financial Protection.

ACTION: Consumer financial protection circular.

SUMMARY: The Consumer Financial Protection Bureau (Bureau or CFPB) has issued Consumer Financial Protection Circular 2022–07, titled, ''Reasonable Investigation of Consumer Reporting Disputes.'' In this circular, the Bureau responds to the questions, ''1. Are consumer reporting agencies and the entities that furnish information to them (furnishers) permitted under the Fair Credit Reporting Act (FCRA) to impose obstacles that deter submission of disputes?'' and ''2. Do consumer reporting agencies need to forward to furnishers consumer-provided documents attached to a dispute?''

DATES: The Bureau released this circular on its website on November 10, 2022.

ADDRESSES: Enforcers, and the broader public, can provide feedback and comments to *Circulars@cfpb.gov.*

FOR FURTHER INFORMATION CONTACT: David Wake, Senior Counsel, at (202) 435–9613. If you require this document in an alternative electronic format, please contact *CFPB_Accessibility@cfpb.gov.*

SUPPLEMENTARY INFORMATION:

Questions Presented

1. Are consumer reporting agencies and the entities that furnish information to them (furnishers) permitted under the Fair Credit Reporting Act (FCRA) to impose obstacles that deter submission of disputes?

2. Do consumer reporting agencies need to forward to furnishers consumer-provided documents attached to a dispute?

Responses

1. No. Consumer reporting agencies and furnishers are liable under the FCRA if they fail to investigate any dispute that meets the statutory and regulatory requirements, as described in more detail below. Enforcers may bring claims if consumer reporting agencies and furnishers limit consumers' dispute rights by requiring any specific format or requiring any specific attachment such as a copy of a police report or consumer report beyond what the statute and regulations permit.

2. It depends. Enforcers may bring a claim if a consumer reporting agency fails to promptly provide to the furnisher ''all relevant information'' regarding the dispute that the consumer reporting agency receives from the consumer. While there is not an affirmative requirement to specifically provide original copies of documentation submitted by consumers, it would be difficult for a consumer reporting agency to prove they provided all relevant information if they fail to forward even an electronic image of documents that constitute a primary source of evidence.[1]

Background

Information contained in consumer reports has critical effects on Americans' daily lives. Consumer reports are used to evaluate consumers' eligibility for loans and the interest rates they pay, their eligibility for insurance and the premiums they pay, their eligibility for rental housing, and their eligibility for checking accounts. Prospective employers commonly use consumer reports in their hiring decisions.[2] Given the importance of this information, Congress enacted the FCRA to ''prevent consumers from being unjustly damaged because of inaccurate or arbitrary information in a credit report.'' [3]

A central component of the protections against inaccurate information is the requirement to conduct a reasonable investigation of consumer disputes. Since its enactment, the FCRA has required consumer reporting agencies to investigate consumer disputes.[4] To further ensure that consumer reports are accurate, in 1996 Congress amended the FCRA to also impose ''duties on the sources that provide credit information to CRAs [consumer reporting agencies], called 'furnishers' in the statute.'' [5] Thus, when consumer reporting agencies and furnishers are properly notified of a dispute about information furnished in a consumer report, both consumer reporting agencies and furnishers must conduct a reasonable investigation of the dispute.[6]

These responsibilities are part of the FCRA's overall framework for ensuring accuracy in consumer reports. Consumers are in a good position to identify inaccurate information in their consumer reports, and timely and responsive investigations of these identified inaccuracies is crucial to the FCRA's purpose of ensuring fair and accurate consumer reporting.

Despite Congress's repeated efforts to promote accuracy by requiring reasonable investigation of disputes, consumers continue to report problems with accuracy and dispute investigations. Between January and September 2021, the CFPB received more than 500,000 complaints about credit or consumer reporting; the most common issue they identified was incorrect information on a credit report.[7] In each of the past three

[1] Examples of primary sources of evidence include but are not limited to documents submitted by a consumer in support of a dispute such as copies of letters from creditors, bank statements, checks, or periodic billing statements.

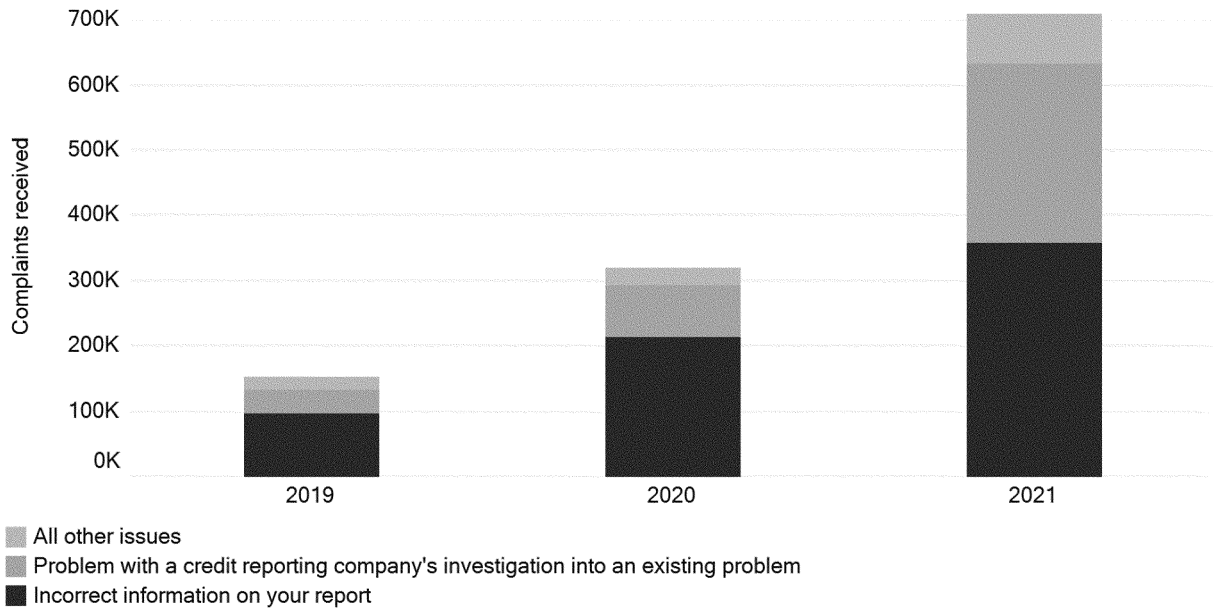
calendar years, the top two most frequently identified issues in complaints submitted to the CFPB were ''Incorrect information on your report'' and ''Problem with a credit reporting company's investigation into an existing problem.''

Figure 1: Credit or Consumer Reporting Complaints to the CFPB 2019–2021



The CFPB is responsible for issuing rules and enforcing compliance with these provisions of the FCRA.[8] The FCRA can also be enforced by other Federal government agencies and States,[9] and through private actions brought by consumers.[10] The CFPB is issuing this *Circular* to emphasize that certain practices involving the failure to conduct a reasonable investigation of disputes can violate the FCRA.

Analysis

Consumer reporting agencies and furnishers cannot avoid the obligation to conduct a reasonable investigation of disputes by making consumers satisfy demands other than those specified by statute or regulation.

The CFPB is aware that consumer reporting agencies and furnishers have sought to evade the obligation to investigate disputes by requiring consumers to submit particular items of information or documentation with a dispute before the entity will conduct its investigation of the dispute. Examples of this conduct include:

- Consumer reporting agencies that require a consumer to provide a recent copy of the consumer's report or file disclosure before investigating disputes despite the consumer providing sufficient information to investigate the disputed information; [11]
- Furnishers that require a consumer to provide additional specific documents even though the consumer has already provided the supporting documentation or other information reasonably required to substantiate the basis of a direct dispute; [12] and
- Consumer reporting agencies or furnishers that require a consumer to attach a completed proprietary form before investigating the consumer's dispute.[13]

Enforcers may consider bringing an action under the FCRA when furnishers and consumer reporting agencies require consumers to provide documentation or proof documents, other than as described in the statute or regulation, as a precondition to investigation. For disputes received directly from a consumer, a consumer reporting agency or furnisher must reasonably investigate the dispute unless they have reasonably determined that the dispute is frivolous or irrelevant.[14] If such a determination is made, the consumer reporting agency or furnisher must notify the consumer of such determination within five business days of the determination and identify the additional information needed from the consumer to investigate the dispute.[15] Further, furnishers are not permitted to deem disputes as frivolous or irrelevant if the dispute has been provided to the furnisher from a

[13] With respect to furnisher direct disputes, *see* 74 FR 31,484, 31,500 (July 1, 2009) (''Some industry commenters also suggested that the Agencies issue a model direct dispute complaint form, with some advocating that consumers be required to use the model complaint form. The Agencies decline to adopt these suggestions because such requirements would cause otherwise valid disputes to be rejected as frivolous or irrelevant due solely to the consumer's failure to meet a technical requirement that probably would be unknown to the consumer.'').

[14] 15 U.S.C. 1681i(a)(3)(A) (identifying which disputes the consumer reporting agency can determine to be frivolous or irrelevant); 12 CFR 1022.43(f)(1) (identifying which disputes the furnisher can determine to be frivolous or irrelevant).

[15] 15 U.S.C. 1681i(a)(3) (Consumer reporting agency frivolous or irrelevant determination); 12 CFR 1022.43(f) (furnisher direct dispute frivolous or irrelevant determination).

consumer reporting agency pursuant to FCRA section 623(b).[16]

Accordingly, consumer reporting agencies and furnishers must reasonably investigate disputes received directly from consumers that are not frivolous or irrelevant—and furnishers must reasonably investigate all indirect disputes received from consumer reporting agencies—even if such disputes do not include the entity's preferred format, preferred intake forms, or preferred documentation or forms.

Consumer reporting agencies must provide to the furnisher all relevant information regarding the dispute that it received from the consumer.

Enforcers may bring a claim if a consumer reporting agency fails to promptly provide to the furnisher ''all relevant information'' regarding the dispute that the consumer reporting agency receives from the consumer.[17] Through its supervision, the CFPB has found that consumer reporting agencies tend to ingest dispute information from consumers using automated protocols, and they also share dispute information with furnishers electronically.[18] The use of these technologies has reduced the cost and time to transmit relevant information.

When transmitting information about a dispute, a consumer reporting agency may be able to demonstrate that it has transmitted ''all relevant information'' even if it does not provide original documents in paper form. However, given that primary sources of evidence provided by consumers can be dispositive in determining whether there has been a furnishing error, and given that the character of a primary source of evidence is probative and thus relevant to the investigation,[19] it will be difficult for a consumer reporting agency to prove that it complied with the FCRA if it does not provide electronic images of primary evidence for evaluation by the furnisher.[20]

The consumer reporting agency's failure to provide the furnisher with all relevant information limits the *furnisher's* ability to reasonably investigate the dispute. A furnisher must ''review all relevant information'' provided by the consumer reporting agency.[21] Accordingly, consumer reporting agency compliance with the obligation to provide all relevant information is crucial to the consumer's right to have their dispute reasonably investigated.

About Consumer Financial Protection Circulars

Consumer Financial Protection Circulars are issued to all parties with authority to enforce Federal consumer financial law. The CFPB is the principal Federal regulator responsible for administering Federal consumer financial law, *see* 12 U.S.C. 5511, including the Consumer Financial Protection Act's prohibition on unfair, deceptive, and abusive acts or practices, 12 U.S.C. 5536(a)(1)(B), and 18 other ''enumerated consumer laws,'' 12 U.S.C. 5481(12). However, these laws are also enforced by State attorneys general and State regulators, 12 U.S.C. 5552, and prudential regulators including the Federal Deposit Insurance Corporation, the Office of the Comptroller of the Currency, the Board of Governors of the Federal Reserve System, and the National Credit Union Administration. *See, e.g.,* 12 U.S.C. 5516(d), 5581(c)(2) (exclusive enforcement authority for banks and credit unions with $10 billion or less in assets). Some Federal consumer financial laws are also enforceable by other Federal agencies, including the Department of Justice and the Federal Trade Commission, the Farm Credit Administration, the Department of Transportation, and the Department of Agriculture. In addition, some of these laws provide for private enforcement.

Consumer Financial Protection Circulars are intended to promote consistency in approach across the various enforcement agencies and parties, pursuant to the CFPB's statutory objective to ensure Federal consumer financial law is enforced consistently. 12 U.S.C. 5511(b)(4).

Consumer Financial Protection Circulars are also intended to provide transparency to partner agencies regarding the CFPB's intended approach when cooperating in enforcement actions. *See, e.g.,* 12 U.S.C. 5552(b) (consultation with CFPB by State attorneys general and regulators); 12 U.S.C. 5562(a) (joint investigatory work between CFPB and other agencies).

Consumer Financial Protection Circulars are general statements of policy under the Administrative Procedure Act. 5 U.S.C. 553(b). They provide background information about applicable law, articulate considerations relevant to the Bureau's exercise of its authorities, and, in the interest of maintaining consistency, advise other parties with authority to enforce Federal consumer financial law. They do not restrict the Bureau's exercise of its authorities, impose any legal requirements on external parties, or create or confer any rights on external parties that could be enforceable in any administrative or civil proceeding. The CFPB Director is instructing CFPB staff as described herein, and the CFPB will then make final decisions on individual matters based on an assessment of the factual record, applicable law, and factors relevant to prosecutorial discretion.

Rohit Chopra,

Director, Consumer Financial Protection Bureau.

FEDERAL TRADE COMMISSION

16 CFR Part 314

RIN 3084–AB35

Standards for Safeguarding Customer Information

AGENCY: Federal Trade Commission.

ACTION: Final rule; delay of effectiveness.

SUMMARY: The Federal Trade Commission is delaying the effective date of portions of the amended Safeguards Rule as published on December 9, 2021.

DATES:

Effective date: This final rule is effective November 23, 2022.

Applicability date: The applicability of the provisions set forth in § 314.5 is delayed from December 9, 2022 until June 9, 2023.

FOR FURTHER INFORMATION CONTACT: David Lincicum (202–326–2773), Division of Privacy and Identity Protection, Bureau of Consumer Protection, Federal Trade Commission, 600 Pennsylvania Avenue NW, Washington, DC 20580.

SUPPLEMENTARY INFORMATION:

I. Final Rule and Delay of Effectiveness

On December 9, 2021, the Federal Trade Commission (Commission) amended the Safeguards Rule, 16 CFR part 314. While portions of the amended rule became effective on January 10, 2022, certain provisions were originally to become effective December 9, 2022. 16 CFR 314.5.

The Commission is aware there is a reported shortage of qualified personnel to implement information security programs and supply chain issues may lead to delays in obtaining necessary equipment for upgrading security systems.[1] In addition, these difficulties were exacerbated by the COVID–19 pandemic that has been active as financial institutions have attempted to come into compliance with the amended Safeguards Rule. These issues may make it difficult for financial institutions, especially small ones, to come into compliance with the amended Safeguards Rule by December 9, 2022. Accordingly, the Commission is delaying the effective date of those portions of the Safeguards Rule that were to go into effect on December 9, 2022, until June 9, 2023.[2]

II. Administrative Procedure Act

The Commission is issuing the final rule without prior notice and the opportunity for public comment and, as explained below, without the delayed effective date ordinarily prescribed by the Administrative Procedure Act (APA).[3] Pursuant to section 553(b)(3)(B) of the APA, general notice and the opportunity for public comment are not required with respect to a rulemaking when an ''agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest.'' [4]

The Commission believes the public interest is best served by revising 16 CFR 314.5 to delay the effective date of certain portions of the Safeguards Rule and by making such revision effective immediately upon publication in the **Federal Register**. As noted above, the COVID–19 pandemic has disrupted economic activity in the United States. This has exacerbated a reported shortage of qualified information security personnel and supply chain issues that can lead to delays involving equipment necessary to upgrade information security systems. Delaying the effective date of these portions of the amended Safeguards Rule will allow financial institutions additional time to effectively and efficiently bring their information security programs into compliance with the Rule.[5] For these reasons, the Commission finds that there is good cause consistent with the public interest to issue the rule without advance notice and comment.[6]

The APA also requires a 30-day delayed effective date, except for ''(1) substantive rules which grant or recognize an exemption or relieve a restriction; (2) interpretative rules and statements of policy; or (3) as otherwise provided by the agency for good cause.'' [7] As noted above, the Commission finds there is good cause to revise the effective date of the portions of the Safeguards Rule that were previously designated to go into effect on December 9, 2022, immediately.[8] The Commission recognizes that, while this rule revision goes into effect immediately, the result of the revision is to give regulated parties additional time to come into compliance, so they would not be prejudiced if the change goes into effect immediately. Furthermore, the delay of an effective date of a substantive rule requirement is a ''substantive rule[]'' that ''relieve[s] a restriction'' for a period of time, which makes it eligible to take effect without the ordinary wait of 30 days.[9]

III. Paperwork Reduction Act

In accordance with the requirements of the Paperwork Reduction Act (PRA), an agency may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. The Commission has reviewed this final rule pursuant to authority delegated by the OMB and has determined it does not contain any collections of information pursuant to the PRA.

IV. Regulatory Flexibility Act and Congressional Review Act

The Regulatory Flexibility Act (RFA) [10] requires an agency to consider whether the rules it proposes will have a significant economic impact on a substantial number of small entities. The RFA applies only to rules for which an agency publishes a general notice of proposed rulemaking pursuant to 5 U.S.C. 553(b). As discussed previously, consistent with section 553(b)(3)(B) of the APA, the Commission has determined for good cause that general notice and opportunity for public comment is unnecessary, and therefore the Commission is not issuing a notice of proposed rulemaking. Accordingly, the Commission has concluded the RFA's requirements relating to initial and final regulatory flexibility analyses do not apply. In any event, the extension of the effective date will reduce the burden of complying with the Rule for all covered financial institutions, including small businesses.

Pursuant to the Congressional Review Act (5 U.S.C. 801 through 808), the Office of Information and Regulatory Affairs designated this rule as not a ''major rule,'' as defined by 5 U.S.C. 804(2).

List of Subjects in 16 CFR Part 314

Consumer protection, Credit, Data protection, Privacy, Trade practices.

For the reasons stated above, the Federal Trade Commission amends 16 CFR part 314 as follows:

PART 314—STANDARDS FOR SAFEGUARDING CUSTOMER INFORMATION

■ 1. The authority citation for part 314 continues to read as follows:

Authority: 15 U.S.C. 6801(b), 6805(b)(2).

■ 2. Revise § 314.5 to read as follows:

[1] *See, e.g.,* James Legg, ''Confronting the shortage of security professionals,'' *Forbes.com* (Oct. 21, 2021), *https://www.forbes.com/sites/forbesbusinesscouncil/2021/10/21/confronting-the-shortage-of-cybersecurity-professionals/*; Cyber Seek, Cybersecurity Supply/Demand, *https://www.cyberseek.org/heatmap.html;* Robert Triggs, ''The global computer chip shortage explained,'' *Androidauthority.com* (June 5, 2022), *https://www.androidauthority.com/computer-chip-shortage-1212941/.*

[2] The Safeguards Rule's ongoing rulemaking was included in the Commission's Spring 2022 Regulatory Agenda, but that Agenda did not contemplate this final rule extending the effective date of parts of the final rule issued on December 9, 2021. *See* Fed. Trade Comm'n, Standards for Safeguarding Consumer Information, *https://www.reginfo.gov/public/do/eAgendaViewRule?pubId=202204&RIN=3084-AB35.* Pursuant to Section 22(d)(4) of the FTC Act, 15 U.S.C. 57–b3(d)(4), this Rule was not included in the Commission's Spring 2022 Regulatory Agenda because the Commission first considered this final rule and the reasons supporting it after its approval of the Agenda.

[3] 5 U.S.C. 553.

[4] *Id.* at 553(b)(3)(B).

[5] The revised deadline should also go into effect as soon as possible because the original deadline in December 2022 is imminent.

[6] *See* 5 U.S.C. 553(b)(3)(B).

[7] *Id.* at 553(d).

[10] 5 U.S.C. 601–612.

§ 314.5 Effective date.

Sections 314.4(a), (b)(1), (c)(1) through (8), (d)(2), (e), (f)(3), (h), and (i) are effective as of June 9, 2023.

By direction of the Commission.

April J. Tabor,

Secretary.

Note: the following statement will not appear in the Code of Federal Regulations.

Concurring Statement of Commissioner Christine S. Wilson

The Safeguards Rule requires financial institutions to develop, implement, and maintain a comprehensive information security program to protect customer information.[1] In 2021, the Commission updated the Safeguards Rule to add several prescriptive requirements that necessitate significant investment to effectively implement.[2] I voted against the revisions to the rule, in part, because I feared the new obligations would inhibit flexibility and impose substantial costs, especially on small businesses.[3] Despite assurances that financial institutions were already implementing many of the requirements of the amended rule or had sophisticated compliance programs that could easily adopt and pivot to address new obligations, I was concerned that the Commission did not understand fully the economic impact of the proposed changes. It has become clear that the Commission may have underestimated the burdens imposed by the rule revisions.

While I continue to note my concerns about the revisions to the recently amended Safeguards Rule, I support extending the effective date. Labor shortages of qualified personnel have hampered efforts by companies to implement information security programs. Some estimates place the shortage of cybersecurity professionals in the 500,000 range.[4] Supply chain issues also have led to delays in obtaining necessary equipment for upgrading systems. These factors are outside the control of financial institutions and have complicated efforts by companies to meet the requirements of the amended rule by year end.

The revisions finalized in December 2021 did not merely codify basic security practices of most financial institutions. Rather, the modifications imposed new onerous, misguided, and complex obligations. Safeguarding customer information is important. But it is still unclear whether these mandates will translate into a significant reduction in data security risks or offer other substantial consumer benefits. Regardless of the rule's effects, companies should be given the time necessary to correctly implement the final rule's burdensome requirements. For these reasons, I support extending the effective date until June 2023.

[FR Doc. 2022–25201 Filed 11–22–22; 8:45 am]

BILLING CODE 6750–01–P

[1] 16 CFR part 314.

[2] The amended Rule was published in the **Federal Register** on December 9, 2021. 86 FR 70272 (Dec. 9, 2021). As I noted at the time of the final rule's publication, I appreciated Staff's diligent work on the Safeguards Rule and commitment to consider input from all relevant parties. Staff's continued commitment to address the serious concerns of parties impacted by the Safeguards Rule is laudable.

Federal Energy Regulatory Commission

18 CFR Parts 154, 260, and 284

[Docket No. RM21–18–000; Order No. 884]

Revised Filing and Reporting Requirements for Interstate Natural Gas Company Rate Schedules and Tariffs

AGENCY: Federal Energy Regulatory Commission, Department of Energy.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission issues this final rule to require natural gas pipelines to submit all supporting statements, schedules and workpapers in native format (*e.g.,* Microsoft Excel) with all links and formulas included when filing a Natural Gas Act section 4 rate case.

DATES: This rule is effective December 23, 2022.

FOR FURTHER INFORMATION CONTACT:

Tehseen Rana (Technical Information), Office of Energy Market Regulation, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, (202) 502–8639, *Tehseen.Rana@ferc.gov*

Caitlin Tweed (Legal Information), Office of the General Counsel, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, (202) 502–8073, *Caitlin.Tweed@ferc.gov*

SUPPLEMENTARY INFORMATION:

1. In this final rule, the Federal Energy Regulatory Commission (Commission) revises the filing and reporting requirements for natural gas pipelines filing a Natural Gas Act (NGA) section 4 rate case.[1] As discussed below, we adopt the Commission's proposal pursuant to the Notice of Proposed Rulemaking (NOPR) issued on May 19, 2022,[2] to establish a rule to require natural gas pipelines to submit all supporting statements, schedules and workpapers in native format (*e.g.,* Microsoft Excel) with all links and formulas included when filing an NGA section 4 rate case.

I. Background

2. When a natural gas pipeline files under NGA section 4 to change its rates, the Commission requires the pipeline to provide detailed support for all the components of its cost of service.[3]

3. Commission regulations require that natural gas pipelines filing general NGA section 4 rate cases provide certain statements (Statements A through P) and associated schedules.[4] In 1995, the Commission issued its *Filing and Reporting Requirements for Interstate Natural Gas Company Rate Schedules and Tariffs* (Order No. 582), stating that Statements I, J and a portion of H (containing state tax formulations) must be received in spreadsheet format with formulas included, as the data provided in these statements and schedules are essential to understanding a natural gas pipeline's position with regard to cost allocation and rate design.[5] The Commission explained that although these spreadsheets could be obtained through discovery, that process is burdensome and inhibits better-

[1] 15 U.S.C. 717c.

[2] *Revised Filing & Reporting Requirements for Interstate Nat. Gas Co. Rate Schedules & Tariffs,* 87 FR 31783 (May 25, 2022), 179 FERC ¶ 61,114) (2022) (NOPR).

[3] 18 CFR 154.312 and 154.313 (2021).

[4] 18 CFR 154.312.

[5] *Filing & Reporting Requirements for Interstate Nat. Gas Co. Rate Schedules & Tariffs,* Order No. 582, 60 FR 52,960, 52,994 (Oct. 11, 1995), FERC Stats. & Regs. ¶ 31,025 (1995) (cross-referenced at 72 FERC ¶ 61,300), *order on clarification,* 76 FERC ¶ 61,077 (1996).

informed comments.[6] Subsequently, the *FERC Implementation Guide for Electronic Filing of Parts 35, 154, 284, 300 and 341 Tariff Filings* (FERC Implementation Guide) stated that the ''submission of spreadsheets in native file format is preferred for Statements A through M, including related schedules. Statements O and P may use any electronic format that renders text, graphics, spreadsheets or data bases that the Commission accepts (the list of FERC Acceptable File Formats is available on *http://www.ferc.gov*).'' [7] Furthermore, for Statements I, J and a portion of H, the FERC Implementation Guide stated that if spreadsheets in native format are not available, the natural gas pipeline may submit those statements using any of the aforementioned acceptable electronic formats that the Commission accepts.[8]

4. In the NOPR, the Commission proposed to require natural gas pipelines to submit all statements, schedules and workpapers in native format with formulas and links intact [9] when filing a general NGA section 4 rate case. As the Commission explained in the NOPR, requiring all statements, schedules and workpapers to be filed in native format will reconcile any ambiguity in the current requirements.[10] Moreover, the Commission explained that this requirement would address the information gap that currently exists because, when a pipeline submits a section 4 rate case filing the Commission often cannot verify whether there were underlying links used to develop a spreadsheet or whether a pipeline severed those links before filing its rate case.[11] Furthermore, the Commission stated that requiring spreadsheets with links and formulas intact will enable rate case participants to manipulate the cost-of-service components (including billing determinants) to evaluate different rate outcomes without the need to create their own rate models, which will expedite settlement negotiations and allow all rate case participants to evaluate the filing on an equal footing.[12]

5. The Commission also stated that submitting all statements, schedules and workpapers in native format will provide for a timely and comprehensive analysis of a rate case filing.[13] All interested rate case participants will be able to evaluate the statements and schedules once they are filed, rather than needing to wait to obtain the information through discovery or to create their own rate models.

6. Finally, the Commission stated that the current policy on this issue is outdated because information technology has significantly improved since the issuance of Order No. 582 in 1995, and pipelines now routinely develop rate cases using Microsoft Excel and submit them electronically.[14]

7. The NOPR was published in the **Federal Register** on May 25, 2022 [15] and established a comment date of June 24, 2022. The Commission received eight comments and two reply comments from a variety of stakeholders.[16] XES, National Grid and Exelon, generally support the Commission's proposal, while Energy Transfer, BHE GT&S, INGAA, Joint Commenters and Public Citizen, also generally support the proposal and request further clarifications.

II. Discussion

8. We adopt the proposal set forth in the NOPR to require natural gas pipelines to submit all supporting statements, schedules and workpapers in native format with all links and formulas included when filing an NGA section 4 rate case. We acknowledge the requests from certain commenters that the Commission undertake various additional initiatives, but we find that those requested initiatives go beyond the scope of this rulemaking, as explained below.

A. The Final Rule Imposes a Reasonable Burden on Pipelines

1. Comments

9. Energy Transfer argues that ''the proposed rule takes the additional, unjust and unreasonable step of requiring a pipeline to create links and formulas in successive documents even if the pipeline did not need or use such links and formulas when it prepared and filed its rate case.'' [17] Energy Transfer states that ''requiring a pipeline to specially create and file links or formulas it did not need or use to prepare and file its rate case is arbitrary and capricious and does not constitute reasoned decision-making because it would unreasonably shift litigation costs and burdens to interstate natural gas pipelines.'' [18] Energy Transfer further states that ''such costs should be borne by the limited number of participants involved in rate case litigation that seek to analyze rates in specific detail to litigate their individual rate issues.'' [19]

10. Joint Commenters disagree with Energy Transfer, arguing that the burden on pipelines would be limited because Order No. 582 already requires pipelines to provide data for certain statements with formulas included, and subsequent orders reiterate these requirements.[20] Second, Joint Commenters argue that pipelines bear the burden of supporting a rate filing. Moreover, Joint Commenters point out that to the extent that pipelines incur additional costs related to complying with any new rule that the Commission issues, pipelines can seek to recover the costs in a rate proceeding, and therefore, the costs are not being shifted impermissibly to the pipelines.[21]

11. BHE GT&S requests that the Commission clarify that a natural gas pipeline is not required to create links across statements and schedules where they did not already exist.[22] BHE GT&S argues that it is not reasonable to require

[6] In Order No. 703, the Commission confirmed the requirement that pipelines submit spreadsheets in native format for Statements I, J and a portion of H, including intact formulas. *Filing Via the Internet,* Order No. 703, 72 FR 65659 (Nov. 23, 2007), 121 FERC ¶ 61,171, at P 26 (2007).

[7] *FERC Implementation Guide for Electronic Filing of Parts 35, 154, 284, 300 & 341 Tariff Filings* (2016).

[8] *Id.*

[9] ''Formulas and links intact'' include formulas and links within individual spreadsheets and between spreadsheets. For example, the Commission explained that the proposal would require that formulas and links within Schedule I–2 be intact within Schedule I–2, and intact for any progressive calculations that flow data from Schedule I–2.

[22] BHE GT&S Comments at 4.

rate case participants to create links where none exist in the first instance.

a. Commission Determination

12. We disagree with Energy Transfer's argument that the NOPR proposal which we adopt in this final rule is unjust and unreasonable. First, we find that this final rule does not unreasonably shift litigation costs from intervenors to the pipeline. The pipeline has the burden under NGA section 4 to support its proposed rates in its case in chief.[23] This final rule merely requires pipelines to provide intact links and formulas in the workpapers and schedules that must be included in the case in chief.[24] This final rule does not require pipelines to fund the litigation costs of other participants. Moreover, while pipelines may incur increased costs to comply with this final rule, we find that any additional burden would be limited, and pipelines are allowed to recover those costs through their rates.

13. Finally, we deny BHE GT&S's request for clarification that a natural gas pipeline is not required to create links across statements and schedules where they did not already exist. Rather, this final rule *does require* natural gas pipelines to create links and formulas to show the pipeline's progressive calculations in the supporting statements, schedules and workpapers.

2. The Final Rule Properly Addresses the Information Gap Occurring When Formulas and Links Are Not Provided

a. Comments

14. Energy Transfer, citing the NOPR, notes that the Commission ''seek[s] to address this *information gap* and require natural gas pipelines to file statements and schedules linking progressive *calculations regardless of how the statements and schedules were created*.'' [25] Energy Transfer contends that the ''Commission's proposal is based on a false premise because no so-called 'information gap' exists, and all the information and data are included in the pipeline's rate case filing.'' [26] Energy Transfer further argues that a pipeline may create an Excel file without certain links or formulas because such links or formulas are not necessary or helpful to prepare and file the rate case.[27] Energy Transfer contends that a search of the Commission's orders did not reveal any published orders where the Commission rejected a pipeline's NGA section 4 rate filing due to the pipeline severing underlying links prior to filing.[28]

b. Commission Determination

15. Based on the record developed in this proceeding, we disagree with Energy Transfer's contention that an information gap does not exist. A rate model without formulas and links intact is much less useful to rate case participants who are trying to evaluate a natural gas pipeline's rate design, cost allocations, or rate calculations. When a pipeline files a rate model without formulas and links, rate case participants must recreate the natural gas pipeline's model, which is inefficient and duplicative. Requiring spreadsheets and workpapers to be filed with links and formulas included will allow rate case participants to manipulate the cost-of-service components and billing determinants without creating their own rate models. This will expedite settlement negotiations and will allow all rate case participants to evaluate the filing on an equal footing with the pipeline.

16. Moreover, under this final rule, rate case participants can begin evaluating a natural gas pipeline's rate design, cost allocations, and rate calculations immediately in the comment period after a pipeline files a section 4 rate case and thus file better-informed comments. Furthermore, requiring pipelines to file all statements and schedules with formulas and links intact will enable all rate case participants to evaluate the filing and any settlement offers from the same baseline, as opposed to all rate case participants creating their own rate models. Thus, the final rule will streamline the rate case process, including settlement discussions, and avoid rate case participants exchanging multiple rounds of discovery and testimony just to understand the rate model's underlying calculations, which are fundamental to the rate case.

17. Energy Transfer argues that there is no evidence that natural gas pipelines are severing existing links.[29] We find this point irrelevant. The development of a rate model, with formulas and links intact, is imperative to the proper functioning of the model. If there are severed links within the rate model then a change in input in one statement will not update to its corresponding change on another statement. Without this flow through of information, rate case participants can not properly ascertain the intended rate design, cost allocations, and rate calculations.

18. Whether or not pipelines are severing links or the links never existed, there is an information gap between the pipeline and rate case participants involved in a rate case if the rate model fails to include links and formulas essential to understanding the rate calculations. This final rule seeks to close that gap.

3. The Final Rule Provides Adequate Notice of Changes in Policy

a. Comments

19. Energy Transfer states the Commission's proposal fails to include proposed regulations describing what must be provided in a rate case filing. Therefore, pipelines would not have any notice in the regulations as to what is being required by the rulemaking unless it separately was aware of this proceeding.[30] Additionally, Energy Transfer claims a ''lack of proper notice and lack of specific language in the regulations does not comply with the requirements of the Administrative Procedure Act.'' [31]

b. Commission Determination

20. We are not persuaded by Energy Transfer's argument that the NOPR failed to provide adequate notice to pipelines of what is being required by this rulemaking. Although the NOPR did not include proposed regulations, the NOPR fully described the proposed filing requirements. Furthermore, the Commission's regulations do not discuss filing formats, and we see no need in this proceeding to add that level of granularity to meet the requirements of the Administrative Procedures Act.[32] While the NGA section 4 requirements in the regulations remain the same, technology and procedures evolve. We continue to believe it is appropriate for natural gas pipelines to rely on the FERC Implementation Guide for detailed guidance on filing requirements that goes beyond the regulations.[33] Therefore, we find Energy Transfer's notice arguments unavailing.

4. Formulas and Links in Statements and Schedules Filed Publicly Are Presumed To Be Public

a. Comments

21. Joint Commenters request that the final rule address the presumption that native format files, with formulas intact, of publicly filed material should be publicly available. Joint Commenters note that ratepayers have recently experienced a situation where a pipeline claimed that links in its Excel spreadsheets for statements and related schedules should receive confidential treatment, even though the statements and schedules themselves (without links) had been filed publicly.[34] Joint Commenters argue that such treatment is unnecessary, and the pipeline's claim of confidentiality created an additional burden for shippers that hindered the administrative process. Therefore, Joint Commenters ask that the final rule clarify that native format files, with links and formulas intact, of publicly filed material are presumed to be publicly available.

22. INGAA opposes Joint Commenters' request that the final rule implement a blanket denial of any request under § 388.112 for privileged treatment of any portion of the rate model spreadsheets that the Commission is requiring natural gas pipelines to file as part of the proposed rule.[35] According to INGAA, the statements, schedules and workpapers with formulas and links intact are commercial information that certain pipelines treat as private and are provided by those pipelines to the Commission with the expectation that the information will not be generally available on the public docket for use outside of the rate case.[36] INGAA states that the Commission acknowledged in Order No. 703 that a pipeline is entitled to submit spreadsheets as privileged and only provide the flat files or a PDF as the public version of the protected information.[37] INGAA further states that privileged treatment of the rate model statements, schedules and workpapers with formula and links intact is also consistent with the treatment of information as confidential under the Chief Administrative Law Judge's Model Protective Order, and therefore there are already procedures in place to address Joint Commenters' concerns about access to privileged information.[38]

23. INGAA argues that there are many reasons to seek protection of the rate model spreadsheets based on concerns that disclosure may result in competitive disadvantage or other business injury. Specifically, INGAA states that it is concerned that third parties with no legitimate interest in the ratemaking process may misuse, modify, or misrepresent the cost allocation or rate design results contained within the spreadsheets in ways that would be difficult or impossible to clarify. INGAA argues that such misuse could be the basis for unsupported claims that the pipeline is earning more than a reasonable return or unfairly allocating costs, which could affect the pipeline's value to potential investors, lenders, shippers, or other market participants. INGAA states that any administrative convenience is outweighed by the risk of competitive harm or other business injury resulting from publicly filing proprietary information, and that the Commission and the participants in a rate case already have the unobstructed right to this information.[39]

b. Commission Determination

24. We decline to adopt Joint Commenters' requested clarification. A filer may request confidential treatment, and the Commission will evaluate such requests on a case-by-case basis. In such cases, the data sets and spreadsheets should be submitted in both privileged, unredacted form and in public, redacted form, pursuant to 18 CFR 388.112.[40] As Joint Commenters note, however, the information in a rate model is generally already public information and pipelines seeking confidential treatment will have the burden of proof that confidential treatment is warranted.

5. Formulas and Links Must Be Maintained Only Between Schedules and Workpapers Filed in the Same Rate Case

a. Comments

25. INGAA requests that the Commission clarify that ''formulas and links intact'' means formulas and links within and between statements, schedules and workpapers *filed in the same rate case,* not formulas contained in or links to spreadsheets not required as part of the initial filing.[41] INGAA states that the Commission recognized this distinction in Order No. 582 between formulas in workpapers and statements submitted in the rate case and formulas located in or links to separate spreadsheets not submitted as part of the pipeline's filing, and asserts that the Commission rejected a suggestion that pipelines must produce the ''underlying spreadsheets, models, and databases relied upon to prepare the filing in an electronic format'' upon request.[42]

26. In addition, INGAA states that the Commission should continue to permit pipelines to file Statements O and P in any manner consistent with the current FERC Implementation Guide, specifically in ''any electronic format that renders text, graphics, spreadsheets or data bases that the Commission accepts.'' [43] INGAA argues that these statements do not contain links within the statement or to other statements, and the submission of Statements O and P in native format will not enable participants in the rate proceeding to more easily manipulate information or to analyze the statements in a more timely or comprehensive manner.[44] Furthermore, INGAA requests that the Commission clarify that the proposed rule does not *expand* the information that pipelines must submit when initiating an NGA section 4 rate case, but modifies the format of the statements, schedules, and workpapers currently required by the Commission's regulations.[45]

b. Commission Determination

27. We affirm that the final rule's requirement that rate models be filed with ''formulas and links intact'' applies to statements, schedules, and workpapers filed in the same rate case and not to formulas contained in or links to spreadsheets not required as part of the initial filing. However, we clarify that to the extent a natural gas pipeline creates a workpaper to create a statement or schedule required by § 154.312 of the Commission's regulations (*e.g.,* an allocation workpaper that informs the I Schedules), the pipeline must file that workpaper with formulas and links intact, as that workpaper is essential to

[44] *Id.*

[45] *Id.* at 5.

understanding the rate model's inputs and calculations. This includes links within the workpaper, and between the workpaper and the statement or schedule that relies on that workpaper.

28. We grant the request to clarify that Statements O and P do not contain links within the statement or to other statements or schedules, and therefore may continue to be filed in any manner consistent with the FERC Implementation Guide for these statements. We also affirm that this final rule does not expand the information that pipelines must submit when initiating an NGA section 4 general rate case but clarifies the format requirements with which such information must comply.

6. Application of the Final Rule to Other Rate Case Participants and Scenarios Is Beyond the Scope of This Proceeding

a. Comments

29. BHE GT&S requests that the Commission clarify that the requirement for natural gas pipelines to provide supporting statements, schedules and workpapers in native format should ''also apply equally to all parties, including Commission staff and intervenors, when submitting rate case materials.'' [46] Specifically, BHE GT&S states that the Commission should clarify that the changes proposed in the NOPR should apply equally to parties submitting a complaint requesting the initiation of a proceeding under NGA section 5, as well as to information submitted by Commission staff or other stakeholders in rebuttal to an NGA section 4 rate case.

b. Commission Determination

30. The NOPR did not propose to require rate case participants to provide supporting statements, schedules and workpapers in native format during NGA section 5 proceedings as suggested by BHE GT&S. We decline to apply the final rule to NGA section 5 complaint cases, as they are outside the scope of this proceeding. The final rule applies solely to natural gas pipelines filing general NGA section 4 rate cases. Moreover, we decline to require all rate case participants to a general NGA section 4 rate case to comply with the final rule. In an NGA section 4 rate case, the pipeline has the burden of proof to justify its change in rates. If a rate case is fully litigated at hearing, natural gas pipelines may seek rate models with links and formulas included from other participants through discovery.

7. Additional Changes to Reporting Requirements Are Beyond the Scope of This Proceeding

a. Comments

31. Public Citizen argues that additional disclosure improvements are required to ensure the public has access to accurate information about the shippers that secure shipping capacity on natural gas pipelines. Public Citizen states that currently the Commission's regulations at 18 CFR 284.13(b) delegate such reporting to the pipelines, allowing natural gas pipelines to post shipper information on their website, rather than having the Commission publish such information in a centralized format on the Commission's website. Public Citizen further argues that natural gas pipelines' compliance with 18 CFR 284.13(b) is haphazard, with natural gas pipelines prioritizing their own website content and making it difficult to find the Commission-required disclosures. Public Citizen contends that the Commission's rule requiring pipelines to archive such information for only 90 days impedes the public interest, because most pipelines charge a fee to access material older than 90 days. In addition, Public Citizen argues that it is difficult to locate shipper information on many pipeline websites. Therefore, Public Citizen requests that the Commission expand the final rule to include natural gas pipeline reporting requirements. Public Citizen suggest that the Commission post shipper data and other information on the Commission's website and provide the public with free archival access.

b. Commission Determination

32. We decline to expand the final rule as Public Citizen requests. The NOPR did not propose reforms related to these issues raised by Public Citizen. The final rule is intended to improve the efficiency of general NGA section 4 rate cases, not to revise separate and unrelated reporting requirements already set forth in the Commission's regulations. Therefore, Public Citizen's concerns are outside the scope of this proceeding and we decline to address them at this time.

III. Information Collection Statement

33. The information collection requirements contained in this final rule are subject to review by the Office of Management and Budget (OMB) under section 3507(d) of the Paperwork Reduction Act of 1995.[47] OMB's regulations require approval of certain information collection requirements imposed by agency rules.[48] Upon approval of a collection of information, OMB will assign an OMB control number and expiration date. Respondents subject to the filing requirements of this rule will not be penalized for failing to respond to these collections of information unless the collections of information display a valid OMB control number.

34. This final rule modifies the currently approved information collection associated with FERC–545, Gas Pipeline Rates: Rate Change (Non-Formal) (OMB Control No. 1902–0154) (FERC–545) by updating the requirements for submitting a rate case under section 4 of the NGA.

35. Interested persons may obtain information on the reporting requirements by contacting Ellen Brown, Office of the Executive Director, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426 via email (*DataClearance@ferc.gov*) or telephone (202) 502–8663).

36. In the NOPR, the Commission solicited comments on the Commission's need for this information, whether the information will have practical utility, the accuracy of the burden estimates, ways to enhance the quality, utility, and clarity of the information to be collected or retained, and any suggested methods for minimizing respondents' burden, including the use of automated information techniques.

37. *Title:* Gas Pipeline Rates: Rate Change (Non-Formal).

38. *Action:* Modification of collection of information in accordance with RM21–18–000.

39. *OMB Control No.:* 1902–0154.

40. *Respondents for this Rulemaking:* Gas pipelines filing an NGA section 4 rate case.

41. *Frequency of Information Collection:* As needed for section 4 rate cases.

42. *Necessity of Information:* This final rule requires all statements, schedules and workpapers submitted during a section 4 rate case to be submitted in native format with all links and formulas intact. The modification to this collection is intended to reduce the overall burden for all rate case participants involved in a section 4 rate case.

43. *Internal Review:* The Commission has reviewed the changes and has determined that such changes are necessary. These requirements conform to the Commission's need for efficient information collection, communication, and management within the energy

[46] BHE GT&S Comments at 2.

[47] 44 U.S.C. 3507(d).

[48] 5 CFR 1320.11 (2021).

industry. The Commission has specific, objective support for the burden estimates associated with the information collection requirements.

44. The Commission estimates that the final rule will affect the burden [49] and cost [50] as follows:

MODIFICATIONS TO FERC 545 FROM FINAL RULE IN DOCKET NO. RM21–18–000

A.	B.	C.	D.	E.	F.
Area of modification	Number of respondents	Annual estimated number of responses per respondent	Annual estimated number of responses (Column B × Column C)	Average burden hours & cost per response	Total estimated burden hours & total estimated cost (Column D × Column E)
Section 4 Rate Case					
FERC 545: Annual Section 4 Rate Cases.	8	1	8	100 hours; $10,300	800 hours; $82,400

45. For the purposes of estimating burden in this final rule, in the table above, we conservatively estimate the annual total of general section 4 rate cases to be eight. This number is higher than the Commission's average number of section 4 rate cases, but we created our estimate to allow for potential additional rate case submissions.

46. FERC–545 is required to implement rates pursuant to sections 4, 5, and 16 of NGA, (15 U.S.C. 717c& 717o, Pub. L. 75 688, 52 Stat. 822 and 830). NGA sections 4, 5, and 16 authorize the Commission to inquire into rate structures and methodologies and to set rates at a just and reasonable level. Specifically, a natural gas pipeline must obtain Commission authorization for all rates and charges made, demanded, or received in connection with the transportation or sale of natural gas in interstate commerce. The modification as described in this final rule in Docket No. RM21–18–000 only impacts filings under section 4 of the NGA. The collections associated with sections 5 and 16 remain unchanged.

IV. Environmental Analysis

47. The Commission is required to prepare an Environmental Assessment or an Environmental Impact Statement for any action that may have a significant adverse effect on the human environment.[51] The actions proposed to be taken here fall within categorical exclusions in the Commission's regulations for rules regarding information gathering, analysis, and dissemination, and for rules regarding sales, exchange, and transportation of natural gas that require no construction of facilities.[52] Therefore, an environmental review is unnecessary and has not been prepared in this rulemaking.

V. Regulatory Flexibility Act

48. The Regulatory Flexibility Act of 1980 (RFA) [53] generally requires a description and analysis of final rules that will have significant economic impact on a substantial number of small entities. The Commission intends to pose the least possible burden on all entities both large and small.

49. The final rule only applies to natural gas pipelines who file a section 4 rate case. There are a total of 145 entities that may file a rate change and may be impacted by the final rule. The Small Business Administration (SBA) defines a small entity in the category of, ''Pipeline Transportation of Natural Gas'' [54] by entities with fewer than $30 million of annual receipts. Out of the total number of entities, only five are small entities as defined by the SBA (~3% of the total population). We estimate the annual additional costs of filing a section 4 rate case to be $10,300. We further estimate an average of eight responses per year and conservatively estimate that one may be a small entity. Therefore, the proposed rule does not pose a significant change to small entities.

VI. Document Availability

50. In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*).

51. From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

52. User assistance is available for eLibrary and the FERC's website during normal business hours from FERC Online Support at 202–502–6652 (toll free at 1–866–208–3676) or email at *ferconlinesupport@ferc.gov,* or the Public Reference Room at (202) 502–8371, TTY (202) 502–8659. Email the Public Reference Room at *public.referenceroom@ferc.gov.*

VII. Effective Date and Congressional Notification

53. This final rule is effective December 23, 2022. The Commission has determined, with the concurrence of the Administrator of the Office of

[49] ''Burden'' is the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a federal agency. For further explanation of what is included in the information collection burden, refer to 5 CFR 1320.3.

[50] The estimated hourly cost (salary plus benefits) provided in this section is based on the salary figures for May 2021 posted by the Bureau of Labor Statistics for the Utilities sector (available at *https://www.bls.gov/oes/current/naics3_221000.htm*) and scaled to reflect benefits using the relative importance of employer costs for employee compensation from March 2022 (available at *https://www.bls.gov/news.release/ecec.nr0.htm*). The hourly estimates for salary plus benefits are: Computer and Information Systems Manager (Occupation Code: 11–3021), $111.63; Computer and Information Analysts (Occupation Code: 15–1210), $76.35; Electrical Engineer (Occupation Code: 17–2071), $77.02; Legal (Occupation Code: 23–0000), $145.35. The average hourly cost (salary plus benefits) weighting all of the above skill sets evenly, is $102.59. We round it to $103/hour.

By the Commission. Commissioner Danly is concurring with a separate statement attached.

Issued: November 17, 2022.

Debbie-Anne A. Reese,

Deputy Secretary.

UNITED STATES OF AMERICA

FEDERAL ENERGY REGULATORY COMMISSION

Docket No. RM21–18–000

Revised Filing and Reporting Requirements for Interstate Natural Gas Company Rate Schedules and Tariffs

(Issued November 17, 2022)

DANLY, Commissioner, *concurring:*

I concur with today's final rule as I believe it complies with the Natural Gas Act and the Administrative Procedure Act.[1] I write separately to express my apprehension that the Commission does not fully appreciate the burden that will be incurred, or how long it will take, for jurisdictional entities to come into compliance.[2] It is my understanding that some pipeline companies currently create each statement and its supporting schedules using different software that do not, by themselves, link. Requiring links may require a pipeline company to upgrade existing, or implement entirely new, software systems—tasks which oftentimes are neither simple nor inexpensive. And while ''pipelines are allowed to recover those costs through their rates,'' [3] I would have preferred to have solicited additional comment on the cost and timing of the software upgrades that this rule might require in order to better inform our decision on whether and when to impose these changes.

For these reasons, I respectfully concur.

James P. Danly,

Commissioner.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2022–0226]

RIN 1625–AA09

Drawbridge Operation Regulation; Milford Haven, Hudgins, VA

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is temporarily modifying the operating schedule that governs the SR223 (Gwynn's Island) Bridge, across Milford Haven, mile 0.1, at Hudgins, Virginia. The temporary modification will allow the drawbridge to be maintained in the closed-to-navigation position and is necessary to accommodate bridge maintenance.

DATES: This temporary final rule is effective from December 23, 2022, through 11 p.m. on April 15, 2023.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *https://www.regulations.gov.* Type the docket number USCG–2022–0226 in the ''SEARCH'' box and click ''SEARCH.'' In the Document Type column, select ''Supporting & Related Material.''

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary final rule, call or email Ms. Crystal Tucker, Bridge Administration Branch Fifth District, Coast Guard telephone 757–398–6422, email *Crystal.k.tucker@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

On June 14, 2022, the Coast Guard published a notice of proposed rulemaking, with a request for comments, entitled Drawbridge Operation Regulation; Milford Haven, Hudgins, VA in the **Federal Register** 87 FR 35939. There, we stated why we issued the NPRM, and invited comments on our proposed regulatory action related to the bridge maintenance. During the comment period that ended July 1, 2022, we received no comments.

III. Legal Authority and Need for Rule

The SR223 (Gwynn's Island) Bridge, across Milford Haven, mile 0.1, at Hudgins, Virginia has a vertical clearance of 12 feet above mean high water in the closed position and unlimited vertical clearance above mean high water in the open position. The current operating schedule for the drawbridge is published in 33 CFR 117.5.

This temporary rule is necessary to facilitate safe and effective maintenance of the drawbridge. Under this temporary rule, the drawbridge will be maintained in the closed-to-navigation position twenty-four hours a day, seven days a week. The bridge will not be able to open for emergencies and there is no immediate alternative route for vessels unable to pass through the bridge in the closed position. Vessels that can safely transit through the bridge in the closed position with the reduced clearance must provide at least a thirty-minute notice to allow for navigation safety. The SR223 (Gwynn's Island) Bridge is the only land-based method for access on and off Gwynn's Island, therefore, placing the bridge in the open position to perform extensive bridge maintenance would adversely affect residents on the island.

The Coast Guard is issuing this rule under authority in 33 U.S.C. 499.

IV. Discussion of Comments, Changes and the Temporary Final Rule

The Coast Guard provided a comment period of 16 days and no comments were received. No changes were made to the regulatory text of this temporary final rule.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive Orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive Orders.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This rule has not been designated a ''significant regulatory action,'' under Executive Order 12866. Accordingly, it has not been reviewed by the Office of Management and Budget (OMB).

This regulatory action determination is a result of pre rulemaking coordination with maritime stakeholders including federal agencies. This proposed rule effectively balances

the competing interests of land and maritime transportation.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601–612, as amended, requires federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard received no comments from the Small Business Administration on this rule. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the bridge may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Government

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning Policy COMDTINST 5090.1 (series) which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f). The Coast Guard has determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule promulgates the operating regulations or procedures for drawbridges and is categorically excluded from further review, under paragraph L49, of Chapter 3, Table 3–1 of the U.S. Coast Guard Environmental Planning Implementation Procedures.

Neither a Record of Environmental Consideration nor a Memorandum for the Record are required for this rule.

List of Subjects in 33 CFR Part 117

Bridges.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 117 as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

■ 1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 33 CFR 1.05–1; Department of Homeland Security Delegation No. 0170.1.

■ 2. Effective December 23, 2022, through April 15, 2023, add § 117.1017T to read as follows:

§ 117. 1017T Milford Haven.

The draw of the SR223 (Gwynn's Island) Bridge, mile 0.1, in Hudgins, need not be open for vessels.

Dated: November 10, 2022.

S.N. Gilreath,

Rear Admiral, U.S. Coast Guard, Commander, Fifth Coast Guard District.

[FR Doc. 2022–25528 Filed 11–22–22; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG–2022–0948]

RIN 1625–AA87

Security Zones; Corpus Christi Ship Channel, Corpus Christi, TX

AGENCY: Coast Guard, Department of Homeland Security (DHS).

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary, 500-yard radius, moving security zone for a certain vessel carrying Certain Dangerous Cargoes (CDC) within the Corpus Christi Ship Channel and La Quinta Channel. The temporary security zone is needed to protect the vessels, the CDC cargo, and the surrounding waterway from terrorist acts, sabotage, or other subversive acts, accidents, or other events of a similar nature. Entry of vessels or persons into this zone is prohibited unless specifically authorized by the Captain of the Port Sector Corpus Christi or a designated representative.

DATES: This rule is effective without actual notice from November 23, 2022, until November 28, 2022. For the purposes of enforcement, actual notice will be used from November 22, 2022, until November 23, 2022.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email Lieutenant Commander Anthony Garofalo, Sector Corpus Christi

Waterways Management Division, U.S. Coast Guard; telephone 361–939–5130, email *Anthony.M.Garofalo@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
COTP Captain of the Port Sector Corpus Christi
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

The Coast Guard is issuing this temporary rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because it is impracticable. We must establish this security zones by November 22, 2022, to ensure security of this vessel and lack sufficient time to provide a reasonable comment period and then consider those comments before issuing the rule.

Under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Delaying the effective date of this rule would be contrary to the public interest because immediate action is needed to provide for the security of the vessel.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority in 46 U.S.C. 70034 (previously 33 U.S.C. 1231). The Captain of the Port Sector Corpus Christi (COTP) has determined that potential hazards associated with the transit of the Motor Vessel (M/V) FLEX AURORA when loaded will be a security concern within a 500-yard radius of the vessel. This rule is needed to provide for the safety and security of the vessels, their cargo, and surrounding waterway from terrorist acts, sabotage or other subversive acts, accidents, or other events of a similar nature while they are transiting within Corpus Christi, TX, from November 22, 2022, until November 28, 2022.

IV. Discussion of the Rule

The Coast Guard is establishing four 500-yard radius temporary moving security zones around M/V FLEX AURORA. The zone for the vessel will be enforced from November 22, 2022, until November 28, 2022. The duration of the zone is intended to protect the vessel and cargo and surrounding waterway from terrorist acts, sabotage or other subversive acts, accidents, or other events of a similar nature. No vessel or person will be permitted to enter the security zone without obtaining permission from the COTP or a designated representative.

Entry into the security zone is prohibited unless authorized by the COTP or a designated representative. A designated representative is a commissioned, warrant, or petty officer of the U.S. Coast Guard (USCG) assigned to units under the operational control of USCG Sector Corpus Christi. Persons or vessels desiring to enter or pass through each zone must request permission from the COTP or a designated representative on VHF–FM channel 16 or by telephone at 361–939–0450. If permission is granted, all persons and vessels shall comply with the instructions of the COTP or designated representative. The COTP or a designated representative will inform the public through Broadcast Notices to Mariners (BNMs), Local Notices to Mariners (LNMs), and/or Marine Safety Information Bulletins (MSIBs) as appropriate for the enforcement times and dates for each security zone.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This rule has not been designated a ''significant regulatory action,'' under Executive Order 12866. Accordingly, this rule has not been reviewed by the Office of Management and Budget (OMB).

This regulatory action determination is based on the size, duration, and location of the security zone. This rule will impact a small designated area of 500-yards around the moving vessel in the Corpus Christi Ship Channel and La Quinta Channel as the vessel transit the channel over a five day period. Moreover, the rule allows vessels to seek permission to enter the zones.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the temporary security zone may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01 and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves a moving security zone lasting for the duration of time that the M/V FLEX AURORA is within the Corpus Christi Ship Channel and La Quinta Channel while loaded with cargo. It will prohibit entry within a 500 yard radius of M/V FLEX AURORA while the vessel is transiting loaded within Corpus Christi Ship Channel and La Quinta Channel. It is categorically excluded from further review under L60 in Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A record of Environmental Consideration supporting this determination is available in the docket. For instructions on locating the docket, see the **ADDRESSES** section of this preamble.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C 70034, 70051; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 00170.1, Revision No. 01.2.

■ 2. Add § 165.T08–0948 to read as follows:

§ 165.T08–0948 Security Zone; Corpus Christi Ship Channel. Corpus Christi, TX.

(a) *Location.* The following area is a security zone: All navigable waters encompassing a 500-yard radius around the M/V FLEX AURORA while the vessel is in the Corpus Christi Ship Channel and La Quinta Channel.

(b) *Enforcement period.* This section will be enforced from November 22, 2022, until November 28, 2022.

(c) *Regulations.* (1) The general regulations in § 165.33 apply. Entry into the zone in paragraph (a) of this section is prohibited unless authorized by the Captain of the Port Sector Corpus Christi (COTP) or a designated representative. A designated representative is a commissioned, warrant, or petty officer of the U.S. Coast Guard (USCG) assigned to units under the operational control of USCG Sector Corpus Christi.

(2) Persons or vessels desiring to enter or pass through the zones must request permission from the COTP Sector Corpus Christi on VHF–FM channel 16 or by telephone at 361–939–0450.

(3) If permission is granted, all persons and vessels shall comply with the instructions of the COTP or designated representative.

(d) *Information broadcasts.* The COTP or a designated representative will inform the public through Broadcast Notices to Mariners (BNMs), Local Notices to Mariners (LNMs), and/or Marine Safety Information Bulletins (MSIBs) as appropriate of the enforcement times and dates for the security zone.

Dated: November 18, 2022.

J.B. Gunning,

Captain, U.S. Coast Guard, Captain of the Port Sector Corpus Christi.

FOR FURTHER INFORMATION CONTACT: Dale Kennedy at 202–268–6592 or Kathy Frigo at 202–268–4178.

SUPPLEMENTARY INFORMATION: New prices are posted under Docket Number CP2023–42 on the Postal Regulatory Commission's website at *http://www.prc.gov.*

For Priority Mail International items destined to Canada, the Postal Service is collapsing price groups 1.1 through 1.8 (which are based on origin ZIP Code) into a single country group. In addition, the Postal Service is eliminating the related fee for the International Service Center (ISC) Official Zone Chart for Priority Mail International pieces destined to Canada.

Also, to conform to requested country nomenclature, the Postal Service is changing the official name of Turkey to the Republic of Turkiye, with Turkiye as the short name, in related sections of the IMM.

This final rule describes the international price and classification

changes and the corresponding mailing standards changes for the following Competitive Services:

- Global Express Guaranteed®.
- Priority Mail Express International®.
- Priority Mail International® (PMI).
- First-Class Package International Service.
- International Priority Airmail®.
- International Surface Air Lift®.
- Direct Sacks of Printed Matter to One Addressee (Airmail M-bag®).
- The following competitive international extra services and fees:
- International Insurance.
- Certificate of Mailing.
- International Registered Mail.
- International Return Receipt.
- Customs Clearance and Delivery Fee.

For pricing, see the Postal Explorer website at *https://pe.usps.com.*

Global Express Guaranteed

Global Express Guaranteed (GXG) service provides fast international shipping, with international transportation and delivery provided through an alliance with FedEx Express®. The price increase for GXG service averages 4.9 percent.

The Postal Service provides Commercial Base® pricing to online customers who prepare and pay for GXG shipments via USPS-approved payment methods (other than Click-N-Ship® service), with a discount below the published retail prices for GXG service. Customers who prepare GXG shipments via Click-N-Ship service will continue to pay retail prices. Commercial Plus® prices are set to match the Commercial Base prices.

Priority Mail Express International

Priority Mail Express International (PMEI) service provides fast service to approximately 180 countries in 3–5 business days for many major markets, although the actual number of days may vary based upon origin, destination, and customs delays. PMEI with Money-Back Guarantee service is available for certain destinations. (Due to COVID–19 service impacts, PMEI with Money-Back Guarantee service has been suspended for several destinations until further notice. For more information, see the USPS Service Updates page on *www.usps.com.*) The price increase for PMEI service averages 6.0 percent. The Commercial Base price provides a discount below the published retail prices for customers who prepare and pay for PMEI shipments via permit imprint, online at USPS.com®, or as registered end-users using an authorized PC Postage vendor (with the exception of Click-N-Ship service). Customers who prepare PMEI shipments via Click-N-Ship service pay retail prices. Commercial Plus will be equivalent to Commercial Base; however, deeper discounting may still be available to customers through negotiated service agreements.

The Postal Service will continue to include PMEI service in customized contracts offered to customers who meet certain revenue thresholds and are willing to commit a larger amount of revenue to the USPS® for PMEI service and PMI service.

PMEI flat rate pricing continues to be available for Flat Rate Envelopes.

Priority Mail International

Priority Mail International (PMI) is an economical way to send merchandise and documents to approximately 180 countries in 6–10 business days for many major markets, although the actual number of days may vary based upon origin, destination, and customs delays. The price increase for PMI service averages 6.0 percent. The Commercial Base price provides a discount below the published retail prices for customers who prepare and pay for PMI items via permit imprint, online at USPS.com, or as registered end-users using an authorized PC Postage vendor (with the exception of Click-N-Ship). Customers who prepare PMI shipments via Click-N-Ship pay retail prices. Commercial Plus prices will be equivalent to Commercial Base; however, deeper discounting may still be made available to customers through negotiated service agreements.

The Postal Service will continue to include PMI service in customized contracts offered to customers who meet certain revenue thresholds and are willing to commit to a larger amount of revenue to the USPS for PMEI and PMI.

PMI flat rate pricing continues to be available for Flat Rate Envelopes, Small Flat Rate Boxes, and Medium and Large Flat Rate Boxes.

First-Class Package International Service

First-Class Package International Service (FCPIS) is an economical international service for small packages not exceeding 4 pounds in weight and $400 in value. The price increase for FCPIS averages 6.5 percent. The Commercial Base price provides a discount below the published retail prices for customers who prepare and pay for FCPIS items via permit imprint or by USPS-approved online payment methods. Customers who prepare FCPIS shipments via Click-N-Ship service pay retail prices. Commercial Plus prices will be equivalent to Commercial Base; however, deeper discounting will be made available to customer through negotiated service agreements.

Electronic USPS Delivery Confirmation International service (E-USPS DELCON INTL®) is a tracking service available at no charge for FCPIS items to select destination countries.

International Priority Airmail and International Surface Air Lift

International Priority Airmail (IPA) service, including IPA M-bags, is a commercial service designed for volume mailings of all First-Class Mail International postcards, letters, and large envelopes (flats), and for volume mailings of FCPIS packages (small packets) weighing up to a maximum of 4.4 pounds. IPA shipments are typically flown to foreign destinations (exceptions apply to Canada) and are then entered into that country's air or surface priority mail system for delivery. The price increase for IPA is 3.5 percent. International Surface Airlift (ISAL) is like IPA except that once flown to the foreign destination, ISAL is entered into that country's air or surface nonpriority mail system for delivery. The price increase for ISAL is 12.0 percent.

Direct Sacks of Printed Matter to One Addressee (Airmail M-bags)

An Airmail M-bag is a direct sack of printed matter sent to a single foreign addressee at a single address. Prices are based on the weight of the sack. The price increase for Airmail M-bag service averages 6.4 percent.

International Extra Services and Fees

Depending on country destination and mail type, customers may add a variety of extra services to their outbound shipments and pay a variety of fees. The Postal Service proposes to increase fees for certain competitive international extra services as follows:

- *GXG insurance:* There is no charge for GXG insurance for coverage up to $100. The fee for GXG insurance will increase to $2.45 for each additional $100 or fraction over $100, up to a maximum indemnity of $2,499 per shipment (the maximum indemnity varies by country).

GXG insurance	Fee
$100	$0.00
Each additional $100 or fraction over $100	2.45

Maximum insurance $2,499 (varies by country)

- *PMEI and PMI merchandise insurance:* There is no charge for PMEI and PMI merchandise insurance

coverage up to $200. The fee for PMEI and PMI merchandise insurance will increase and will increase to $3.40 for each additional $100 or fraction over $200 as set forth in the table below, up to a maximum indemnity of $5,000 (the maximum indemnity varies by country).

Indemnity limit not over	Fee
Up to $200	$0.00
$200.01–$300.00	12.75
$300.01–$400.00	16.15
$400.01–$500.00	19.55
$500.01–$600.00	22.95
$600.01–$700.00	26.35
$700.01–$800.00	29.75
$800.01–$900.00	33.15

$33.15 plus $3.40 per $100 or fraction thereof over $900 in declared value. Maximum insurance $5,000 (varies by country)

• *Certificate of mailing service:* Prices for competitive international certificate of mailing service will be as follows:

CERTIFICATE OF MAILING

Individual pieces	Fee
Individual article (PS Form 3817)	$1.85
Duplicate copy of PS Form 3817 or PS Form 3665 (per page)	1.85
Firm mailing sheet (PS Form 3665), per piece (minimum 3) All other qualifying classes of mail	0.57
Bulk quantities	
For first 1,000 pieces (or fraction thereof)	$10.40
Each additional 1,000 pieces (or fraction thereof)	1.35
Duplicate copy of PS Form 3606	1.85

• *International Registered Mail service:* The fee for competitive international registered mail will increase to $19.05.

• *International return receipt service:* The fee for competitive international return receipt service will increase to $5.30.

• *Customs clearance and delivery fee:* The competitive customs clearance and delivery fee per dutiable item will increase to $7.85.

• *Pickup on Demand:* The fee for pickup on demand will increase to $26.50.

We will publish an appropriate amendment to 39 CFR part 20 to reflect these changes.

The Postal Service hereby adopts the following changes to *Mailing Standards of the United States Postal Service,* International Mail Manual (IMM), which is incorporated by reference in the *Code of Federal Regulations.* See 39 CFR 20.1.

List of Subjects in 39 CFR Part 20

Foreign relations, International postal services.

Accordingly, 39 CFR part 20 is amended as follows:

PART 20—[AMENDED]

■ 1. The authority citation for 39 CFR part 20 continues to read as follows:

Authority: 5 U.S.C. 552(a); 13 U.S.C. 301–307; 18 U.S.C. 1692–1737; 39 U.S.C. 101, 401, 403, 404, 407, 414, 416, 3001–3011, 3201–3219, 3403–3406, 3621, 3622, 3626, 3632, 3633, and 5001.

BILLING CODE P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2019–0601; FRL–10400–01–OCSPP]

2,6-Pyridinedicarboxylic Acid; Exemption From the Requirement of a Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes exemptions from the requirement of a tolerance for residues of 2,6-pyridinedicarboxylic acid, also known as DPA (CAS Reg. No. 499–83–2), when used as an inert ingredient in antimicrobial pesticide formulations for use on food contact surfaces in public eating places, dairy processing equipment, and food processing equipment and utensils and when used in pesticide formulations applied pre- and post-harvest to crops with an end-use concentration not to exceed 2 parts per million (ppm). EcoLab Inc. submitted a petition to EPA under the Federal Food, Drug, and Cosmetic Act (FFDCA), requesting the establishment of such exemptions from the requirement of a tolerance. This regulation eliminates the need to establish a maximum permissible level for residues of DPA.

DATES: This regulation is effective November 23, 2022. Objections and requests for hearings must be received on or before January 23, 2023 and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2019–0601, is available at *https://www.regulations.gov* or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW, Washington, DC 20460–0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room and the OPP Docket is (202) 566–1744. For the latest status information on EPA/DC services, docket access, visit *https://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Daniel Rosenblatt, Registration Division (7505T), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; main telephone number: (202) 566–1030; email address: *RDFRNotices@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. How can I get electronic access to other related information?

You may access a frequently updated electronic version of 40 CFR part 180 through the Office of the Federal

Register's e-CFR site at *http://www.ecfr.gov/current/title-40.*

C. How can I file an objection or hearing request?

Under FFDCA section 408(g), 21 U.S.C. 346a(g), any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA–HQ–OPP–2019–0601 in the subject line on the first page of your submission. All objections and requests for a hearing must be in writing and must be received by the Hearing Clerk on or before January 23, 2023. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA–HQ–OPP–2019–0601, by one of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.
- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *https://www.epa.gov//send-comments-epa-dockets.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *https://www.epa.gov/dockets/epa-dockets.*

II. Petition for Exemption

In the **Federal Register** of February 11, 2020 (85 FR 7708) (FRL–10005–02), EPA issued a document pursuant to FFDCA section 408, 21 U.S.C. 346a, announcing the filing of a pesticide petition (PP IN–11307) by EcoLab Inc., 1 Ecolab Place, St. Paul, MN 55102. The petition requested to amend an exemption from the requirement of a tolerance for residues of 2,6-pyridinedicarboxylic acid, also known as DPA, (CAS Reg. No. 499–83–2) by consolidating and expanding the current exemptions to 40 CFR 180.940(a) and increasing the limit to 2 parts per million (ppm) when used as a pesticide inert ingredient in pesticide formulations applied to hard, non-porous food-contact surfaces in public eating places, dairy processing equipment, and food-processing equipment and utensils. The petition also requested EPA establish an exemption from the requirement of a tolerance at 40 CFR 180.910, limited to 2 ppm when used in pesticide formulations applied to growing crops. That document referenced a summary of the petition prepared by EcoLab Inc, which is available in the docket, *https://www.regulations.gov.* There were no comments received in response to the notice of filing.

III. Inert Ingredient Definition

Inert ingredients are all ingredients that are not active ingredients as defined in 40 CFR 153.125 and include, but are not limited to, the following types of ingredients (except when they have a pesticidal efficacy of their own): Solvents such as alcohols and hydrocarbons; surfactants such as polyoxyethylene polymers and fatty acids; carriers such as clay and diatomaceous earth; thickeners such as carrageenan and modified cellulose; wetting, spreading, and dispersing agents; propellants in aerosol dispensers; microencapsulating agents; and emulsifiers. The term ''inert'' is not intended to imply nontoxicity; the ingredient may or may not be chemically active. Generally, EPA has exempted inert ingredients from the requirement of a tolerance based on the low toxicity of the individual inert ingredients.

IV. Aggregate Risk Assessment and Determination of Safety

Section 408(c)(2)(A)(i) of FFDCA allows EPA to establish an exemption from the requirement for a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is ''safe.'' Section 408(b)(2)(A)(ii) of FFDCA defines ''safe'' to mean that ''there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information.'' This includes exposure through drinking water and in residential settings but does not include occupational exposure. Section 408(b)(2)(C) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to ''ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue . . . .''

EPA establishes exemptions from the requirement of a tolerance only in those cases where it can be clearly demonstrated that the risks from aggregate exposure to pesticide chemical residues under reasonably foreseeable circumstances will pose no harm to human health. In order to determine the risks from aggregate exposure to pesticide inert ingredients, the Agency considers the toxicity of the inert in conjunction with possible exposure to residues of the inert ingredient through food, drinking water, and through other exposures that occur as a result of pesticide use in residential settings. If EPA is able to determine that a finite tolerance is not necessary to ensure that there is a reasonable certainty that no harm will result from aggregate exposure to the inert ingredient, an exemption from the requirement of a tolerance may be established.

Consistent with FFDCA section 408(c)(2)(A), and the factors specified in FFDCA section 408(c)(2)(B), EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of and to make a determination on aggregate exposure for DPA including exposure resulting from the exemption established by this action. EPA's assessment of exposures and risks associated with DPA follows.

A. Toxicological Profile

EPA has evaluated the available toxicity data and considered their validity, completeness, and reliability as well as the relationship of the results of the studies to human risk. EPA has also considered available information concerning the variability of the sensitivities of major identifiable subgroups of consumers, including infants and children. Specific information on the studies received and the nature of the adverse effects caused by DPA as well as the no-observed-adverse-effect-level (NOAEL) and the lowest-observed-adverse-effect-level (LOAEL) from the toxicity studies are discussed in this unit.

The Agency assessed DPA via the Threshold of Toxicological Concern

(TTC) approach as outlined by the European Food Safety Authority (EFSA) in their 2019 guidance document on the use of TTC in food safety assessment. This approach relies on the most recent evaluation of the literature on TTC as reviewed by EFSA and the World Health Organization (WHO) in 2016. Information regarding the database of studies and chemicals used to derive TTCs are reviewed therein. The TTC approach has been used by the Joint Expert Committee on Food Additives of the U.N.'s Food and Agriculture Organization and the World Health Organization, the former Scientific Committee on Food of the European Commission, the European Medicines Agency, and EFSA.

TTC are derived from a conservative and rigorous approach developed by Munro and Kroes to establish generic threshold values for human exposure at which a very low probability of adverse effects is likely. There are three Cramer Classes that are organized by structural classes using the Cramer (1978) decision scheme. By comparing a range of compounds by Cramer Class (classes I, II, and III) and no-observed-effect-level (NOEL), fifth percentile NOELs were established for each Cramer Class as ''Human Exposure Thresholds'' assuming a 60 kg human. These values were 3, 0.91 and 0.15 mg/kg/day for classes I, II and III, respectively.

B. Toxicological Points of Departure/ Levels of Concern

Once a pesticide's toxicological profile is determined, EPA identifies toxicological points of departure (POD) and levels of concern to use in evaluating the risk posed by human exposure to the pesticide. For hazards that have a threshold below which there is no appreciable risk, the toxicological POD is used as the basis for derivation of reference values for risk assessment. Uncertainty/safety factors are used in conjunction with the POD to calculate a safe exposure level—generally referred to as a population-adjusted dose (PAD) or a reference dose (RfD)—and a safe margin of exposure (MOE). For non-threshold risks, the Agency assumes that any amount of exposure will lead to some degree of risk. Thus, the Agency estimates risk in terms of the probability of an occurrence of the adverse effect expected in a lifetime. For more information on the general principles EPA uses in risk characterization and a complete description of the risk assessment process, see *https://www.epa.gov/pesticide-science-and-assessing-pesticide-risks/overview-risk-assessment-pesticide-program.*

The human exposure threshold value for threshold (*i.e.,* non-cancer) risks for DPA is based upon Cramer structural class. DPA is categorized as Cramer class III based on the OECD QSAR toolbox analysis of the Cramer decision scheme; therefore, this assessment uses the NOEL of 0.15 mg/kg/day as the point of departure for all exposure scenarios assessed (chronic dietary, incidental oral, dermal and inhalation exposures).

C. Exposure Assessment

1. *Dietary exposure.* In evaluating dietary exposure to DPA, EPA considered exposure under the proposed tolerance exemptions at a concentration not to exceed 2 ppm of DPA in an end-use pesticide formulation, as well as any other sources of dietary exposure. For the purpose of the screening level dietary risk assessment to support this request for an exemption from the requirement of a tolerance for DPA, a conservative drinking water concentration value of 100 ppb based on screening level modeling was used to assess the contribution to drinking water for the chronic dietary risk assessments for parent compound.

Dietary exposure (food and drinking water) may occur from the existing and proposed uses of DPA (*e.g.,* eating foods treated with pesticide formulations containing DPA, and drinking water exposures). An acute dietary assessment was not performed due to the lack of adverse effects attributed to a single dietary exposure.

2. *Residential exposure.* The term ''residential exposure'' is used in this document to refer to non-occupational, non-dietary exposure (*e.g.,* from hard surface disinfection on walls, floors, and tables).

DPA may be used as an inert ingredient in products that are registered for specific uses that may result in short-term and intermediate-term residential exposure, such as pesticides used in and around the home. The Agency conducted a conservative assessment of potential residential exposure by assessing DPA in pesticides in outdoor and indoor scenarios. The Agency's assessment of adult residential exposure combines high-end dermal and inhalation handler exposure from outdoor and indoor uses. The Agency's assessment of children's residential exposure includes total post-application exposures associated with total exposures to contact with both treated outdoor or indoor scenarios.

3. *Cumulative effects from substances with a common mechanism of toxicity.* Section 408(b)(2)(D)(v) of FFDCA requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider ''available information'' concerning the cumulative effects of a particular pesticide's residues and ''other substances that have a common mechanism of toxicity.''

EPA has not made a common mechanism of toxicity finding as to DPA and any other substances, and DPA does not appear to produce toxic metabolites produced by other substances. For the purposes of this tolerance action, therefore, EPA has not assumed that DPA has a common mechanism of toxicity with other substances. For information regarding EPA's efforts to determine which chemicals have a common mechanism of toxicity and to evaluate the cumulative effects of such chemicals, see EPA's website at *https://www.epa.gov/pesticide-science-and-assessing-pesticide-risks/cumulative-assessment-risk-pesticides.*

D. Safety Factor for Infants and Children

FFDCA Section 408(b)(2)(C) provides that EPA shall retain an additional tenfold (10X) margin of safety for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the completeness of the database on toxicity and exposure unless EPA determines based on reliable data that a different margin of safety will be safe for infants and children. This additional margin of safety is commonly referred to as the Food Quality Protection Act (FQPA) Safety Factor (SF). In applying this provision, EPA either retains the default value of 10X, or uses a different additional safety factor when reliable data available to EPA support the choice of a different factor. The FQPA SF has been reduced to 1X for DPA because clear NOELs and LOELs were established in the studies analyzed by Munro *et al* 1996 (which included developmental and reproductive toxicity studies), maternal and developmental-specific 5th percentile NOELs calculated by van Ravenzwaay *et al* 2011 indicate low potential for offspring susceptibility, there is no known precedent for developmental or reproductive toxicity potential for DPA using the QSAR Toolbox DART Scheme, and the conservative assumptions made in the exposure assessment are unlikely underestimate to risk.

E. Aggregate Risks and Determination of Safety

EPA determines whether acute and chronic dietary pesticide exposures are safe by comparing aggregate exposure

estimates to the acute PAD (aPAD) and chronic PAD (cPAD). For linear cancer risks, EPA calculates the lifetime probability of acquiring cancer given the estimated aggregate exposure. Short-, intermediate-, and chronic-term risks are evaluated by comparing the estimated aggregate food, water, and residential exposure to the appropriate PODs to ensure that an adequate MOE exists.

1. *Acute aggregate risk.* An acute aggregate risk assessment takes into account acute exposure estimates from dietary consumption of food and drinking water. No adverse effects resulting from a single oral exposure were identified and no acute dietary endpoint were selected for DPA. Therefore, DPA is not expected to pose an acute risk.

2. *Short-term aggregate risk.* Short-term aggregate exposure takes into account short-term residential exposure plus chronic exposure to food and water (considered to be a background exposure level).

DPA is currently used as an inert ingredient in pesticide products that are registered for uses that could result in short-term residential exposure, and the Agency has determined that it is appropriate to aggregate chronic exposure through food and water with short-term residential exposures.

Using the exposure assumptions described in this unit for short-term exposures, EPA has concluded the combined short-term food, water, and residential exposures result in aggregate MOEs of 1400 for both adult males and females. EPA has concluded the combined short-term aggregated food, water, and residential pesticide exposures result in an aggregate MOE of 530 for children. Because EPA's level of concern for DPA is a MOE of 100 or below, these MOEs are not of concern.

3. *Intermediate-term aggregate risk.* Intermediate-term aggregate exposure takes into account intermediate-term residential exposure plus chronic exposure to food and water (considered to be a background exposure level). An intermediate-term adverse effect was identified; however, DPA exposure values for intermediate term risks are all lower than the short-term risk. Intermediate-term risk is assessed based on intermediate-term residential exposure plus chronic dietary exposure. Because there is no intermediate-term residential exposure and chronic dietary exposure has already been assessed under the appropriately protective cPAD (which is at least as protective as the POD used to assess intermediate-term risk), no further assessment of intermediate-term risk is necessary, and EPA relies on the chronic dietary risk assessment for evaluating intermediate-term risk for DPA.

4. *Chronic aggregate risk.* A chronic aggregate risk assessment takes into account exposure estimates from chronic dietary consumption of food and drinking water. Using the exposure assumptions described in unit IV for chronic exposure, EPA has concluded that chronic exposure to DPA from food and water will utilize 18.1% of the cPAD for children 1 to 2 years old, the highest exposed subgroup. Therefore, chronic dietary risks are below the Agency's level of concern of 100% of the cPAD. The chronic aggregate risk is equal to the chronic dietary risk and is not of concern for DPA.

5. *Cancer aggregate risk.* No structural alerts for cancer were identified for DPA. Therefore, there is low concern for genotoxicity/carcinogenicity in humans and the assessment under the TTC value for non-cancer risks is protective for all risks, including carcinogenicity.

6. *Determination of safety.* Based on these risk assessments, EPA concludes that there is a reasonable certainty that no harm will result to the general population, or to infants and children from aggregate exposure to residues of DPA.

V. Other Considerations

Analytical Enforcement Methodology

An analytical method is not required for enforcement purposes since the Agency is not establishing a numerical tolerance for DPA in or on any food commodities. EPA is establishing a limitation on the amount of DPA that may be used in pesticide formulations. This limitation will be enforced through the pesticide registration process under the Federal Insecticide, Fungicide, and Rodenticide Act (''FIFRA''), *7 U.S.C. 136 et seq.* EPA will not register any pesticide formulation for food use that exceeds 2 ppm of 2,6-pyridinedicarboxylic acid in the final pesticide formulation.

VI. Conclusions

Therefore, an exemption from the requirement of a tolerance is established under 40 CFR 180.940(a) for 2,6-pyridinedicarboxylic acid, also known as DPA, (CAS Reg. No. 499–83–2) when used as an inert ingredient in antimicrobial pesticide formulations applied to food contact surfaces in public eating places, dairy processing equipment, and food processing equipment and utensils at an end-use concentration not to exceed 2 ppm, and under 40 CFR 180.910 when used as an inert ingredient (stabilizer) in pesticide formulations applied to growing crops or to raw agricultural commodities after harvest at a concentration not to exceed 2 ppm.

VII. Statutory and Executive Order Reviews

This action establishes a tolerance under FFDCA section 408(d) in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled ''Regulatory Planning and Review'' (58 FR 51735, October 4, 1993). Because this action has been exempted from review under Executive Order 12866, this action is not subject to Executive Order 13211, entitled ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001) or Executive Order 13045, entitled ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997). This action does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), nor does it require any special considerations under Executive Order 12898, entitled ''Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations'' (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established on the basis of a petition under FFDCA section 408(d), such as the tolerance in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), do not apply.

This action directly regulates growers, food processors, food handlers, and food retailers, not States or Tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). As such, the Agency has determined that this action will not have a substantial direct effect on States or Tribal Governments, on the relationship between the National Government and the States or Tribal Governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian Tribes. Thus, the Agency has determined that Executive Order 13132, entitled ''Federalism'' (64 FR 43255, August 10, 1999) and Executive Order 13175, entitled ''Consultation and Coordination with Indian Tribal

Governments'' (65 FR 67249, November 9, 2000) do not apply to this action. In addition, this action does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act (UMRA) (2 U.S.C. 1501 *et seq.*).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note).

VIII. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: November 17, 2022.

Daniel Rosenblatt,

Acting Director, Registration Division, Office of Pesticide Programs.

Therefore, for the reasons stated in the preamble, EPA is amending 40 CFR part 180 as follows:

PART 180—TOLERANCES AND EXEMPTIONS FOR PESTICIDE CHEMICAL RESIDUES IN FOOD

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. In § 180.910, amend Table 1 to 180.910, by adding in alphabetical order, an entry for ''2,6-pyridinedicarboxylic acid (CAS Reg. No. 449–83–2)'' to the table to read as follows:

§ 180.910 Inert ingredients used pre- and post-harvest; exemptions from the requirement of a tolerance.

* * * * *

TABLE 1 TO 180.910

Inert ingredients	Limits	Uses
* * * * * * *		
2,6-pyridinedicarboxylic acid (CAS Reg. No. 449–83–2)	Not to exceed 2 ppm	Stabilizer.
* * * * * * *		

■ 3. Amend § 180.940, by:

■ a. Adding in alphabetical order an entry for the pesticide chemical ''2,6-Pyridinedicarboxylic acid'' in table 1 to paragraph (a);

■ b. Removing the entry for ''2,6-Pyridinedicarboxylic acid'' from the table in paragraph (b); and

■ c. Removing the entry for ''2,6-Pyridinedicarboxylic acid'' from the table in paragraph (c).

The addition reads as follows:

§ 180.940 Tolerance exemptions for active and inert ingredients for use in antimicrobial formulations (Food-contact surface sanitizing solutions).

* * * * *

(a) * * *

TABLE 1 TO PARAGRAPH (a)

Pesticide chemical	CAS Reg. No.	Limits
* * * * * * *		
2,6-Pyridinedicarboxylic acid	499–83–2	When ready for use, the end-use concentration is not to exceed 2 ppm.
* * * * * * *		

* * * * *

BILLING CODE 6560–50–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 221116–0244]

RIN 0648–BI18

Fisheries of the Northeastern United States; Amendment 20 to the Atlantic Surfclam and Ocean Quahog Fishery Management Plan

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: This final rule announces approval of, and implements management measures contained in, Amendment 20 to the Atlantic Surfclam and Ocean Quahog Fishery Management Plan. The Mid-Atlantic Fishery Management Council developed these measures to limit the amount of surfclam or ocean quahog individual transferable quota share or annual allocation in the form of cage tags that an individual or their family members are permitted to hold. These changes are intended to ensure the management plan is consistent with requirements of the Magnuson-Stevens Fishery

Conservation and Management Act, and to improve the management of these fisheries.

DATES: This rule is effective December 23, 2022.

ADDRESSES: Copies of Amendment 20, including the Environmental Assessment (EA), with its associated Finding of No Significant Impact (FONSI) are available on request from the Mid-Atlantic Fishery Management Council, 800 North State Street, Suite 201, Dover, DE 19901. These documents are also accessible via the internet at *https://www.mafmc.org.*

Written comments regarding the burden-hour estimates or other aspects of the collection-of-information requirements contained in this final rule may be submitted to (enter office name) and to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Douglas Potts, Fishery Policy Analyst, 978–281–9341.

SUPPLEMENTARY INFORMATION:

Background

This final rule concurrently notifies the public of the approval of Amendment 20, also known as the Excessive Shares Amendment, to the Atlantic Surfclam and Ocean Quahog Fishery Management Plan (FMP) on behalf of the Secretary of Commerce, and implements the management measures contained in the Amendment. The Mid-Atlantic Fishery Management Council developed this amendment to establish limits to the amount of individual transferable quota (ITQ) share or cage tags such that any particular individual, corporation, or other entity cannot acquire an excessive share of such privileges, as required by the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), and to make administrative changes to improve the efficiency of the FMP. We published a notice of availability on August 10, 2022 (87 FR 48617), announcing a 60-day period for the public to review and provide written comments on whether we, acting on behalf of the Secretary of Commerce, should approve Amendment 20. This comment period ended on October 11, 2022. On August 24, 2022, we published a proposed rule (87 FR 51955) to implement the amendment and solicit written comments on the proposed rule for a 30-day period, which ended on September 23, 2022.

We reviewed all comments received during these comment periods, whether directed at our approval decision or the proposed regulations. See Comments and Responses section for more information. Now, on behalf of the Secretary of Commerce, we are announcing the approval of Amendment 20, and issuing this final rule implementing Amendment 20, consistent with the review and approval process outlined in section 304(a) of the Magnuson-Stevens Act. The full development history of this action was provided in the proposed rule and is not repeated here.

Excessive Share Caps

This action establishes separate caps for quota share and for annual cage tags for both the surfclam and ocean quahog ITQ programs. The amount of quota share that an individual or entity is permitted to have ownership in will be capped at 35 percent of the surfclam quota and 40 percent of the ocean quahog quota. Higher caps are established for cage tags in recognition that additional temporary consolidation through leasing or other transactions may be warranted within a fishing year to meet market demand because of the limited number of processors available. There is a limited market for fresh surfclams or ocean quahogs. The fisheries largely rely on a small number of processing plants to convert these species into final products or ingredients for other food companies. These plants operate by leasing cage tags from multiple quota shareholders and then providing those tags to harvesting vessels that deliver clams, as needed by the plants. The amount of annual cage tags that an individual or entity is permitted to have in a given year will be capped at 65 percent for surfclam and 70 percent for ocean quahog.

No person or entity currently exceeds the quota share cap implemented in this final rule, nor has any entity exceeded the cap on annual cage tags in recent years. The Council selected these cap limits to ensure that potential future consolidation does not reach the level of an excessive share of this fishery, and were not intended to restrict current quota share holdings. The proposed rule included a detailed description of how these caps would be monitored and enforced, including examples, and that information is not repeated here.

As part of this amendment, the Council must conduct a review of these ITQ ownership cap measures at least every 10 years, or sooner as needed. This review should include an evaluation of the effects and effectiveness of the caps in the fishery and whether the cap levels remain appropriate or should be adjusted.

Multi-Year Specifications

This action sets the maximum duration of multi-year specifications to the number of years needed to align with the stock assessment schedule approved by the Northeast Region Coordinating Council (NRCC). The NRCC is composed of representatives from the Mid-Atlantic Fishery Management Council, the New England Fishery Management Council, the Atlantic States Marine Fisheries Commission, the NMFS Greater Atlantic Regional Fisheries Office, and the Northeast Fishery Science Center. One of its roles is to develop a schedule for fishery stock assessments that balances the needs of the numerous fisheries in the region with the available resources. The current schedule calls for an updated stock assessment every 4 years for surfclam and every 6 years for ocean quahog. These assessment intervals are the result of recent improvements to the methods used to survey these wild populations. Allowing specifications to be set for the full duration between assessments will allow the Council, Council staff, and NMFS staff to avoid spending time developing new specifications packages when no new information on the health of the stocks is available. The Council and its Scientific and Statistical Committee will continue the current practice of reviewing the specifications each year, and making mid-cycle adjustments if conditions and available information warrant changes.

Comments and Responses

A total of three comments were received on the proposed rule and notice of availability. All three comments were submitted by representatives of the surfclam fishing industry and supported all of the new measures as proposed.

Changes From the Proposed Rule

There are no changes to the measures from the proposed rule.

Classification

Pursuant to section 304(b)(3) of the Magnuson-Stevens Act, the Assistant Administrator for Fisheries, NOAA, has determined that this final rule is consistent with Amendment 20, other provisions of the Magnuson-Stevens Act, and other applicable law.

This final rule has been determined to be not significant for purposes of Executive Order 12866.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration during the proposed rule stage that this action will not have a significant economic impact on a substantial number of small entities. The factual basis for the certification was published in the proposed rule and is not repeated here. No comments were received regarding this certification. As a result, a final regulatory flexibility analysis was not required and none was prepared.

This final rule contains a collection-of-information requirement subject to review and approval by OMB under the Paperwork Reduction Act (PRA). This rule revises the existing requirements for the collection of information 0648–0240 by removing the section of the ITQ Ownership form that requires identification of corporate officers and removing some of the ''additional transaction details'' questions from the ITQ transfer form. This information will not be used to define or monitor the excessive share caps and collecting the information is no longer be necessary. Removing these questions is not anticipated to change the number of respondents or responses and will not have a measurable reduction in burden hours or costs. An extension of the collection is also requested through this action. Public reporting burden for the ITQ ownership form is estimated to be 1 hour to complete for new entrants and 5 minutes to review a pre-filled form for renewing entities. The ITQ transfer form is estimated to take 5 minutes to complete. These estimates include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

We invite the general public and other Federal agencies to comment on proposed and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Written comments and recommendations for this information collection should be submitted on the following website: *www.reginfo.gov/public/do/PRAMain.* You can find this particular information collection by using the search function and entering either the title of the collection or the OMB Control Number 0648–0240.

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless that collection of information displays a currently valid OMB Control Number.

List of Subjects in 50 CFR Part 648

Fisheries, Fishing, Reporting and recordkeeping requirements.

Dated: November 16, 2022.

Samuel D. Rauch, III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, NMFS amends 50 CFR part 648 as follows:

PART 648—FISHERIES OF THE NORTHEASTERN UNITED STATES

■ 1. The authority citation for part 648 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

■ 2. In § 648.14, add paragraph (j)(3)(viii) to read as follows:

§ 648.14 Prohibitions.

* * * * *

(j) * * *

(3) * * *

(viii) Take action to circumvent an ITQ quota share cap or cage tag cap specified in 648.74(a)(2) or fail to take corrective action if such cap is exceeded inadvertently.

* * * * *

■ 3. In § 648.72 paragraphs (a) introductory text, paragraph (a)(1) introductory text, and paragraph (b) to read as follows:

§ 648.72 Surfclam and ocean quahog specifications.

(a) *Establishing catch quotas.* The amount of surfclams or ocean quahogs that may be caught annually by fishing vessels subject to these regulations will be specified by the Regional Administrator for a period up to the maximum number of years needed to align with the Northeast Region Coordinating Council-approved stock assessment schedule. Specifications of the annual quotas will be accomplished in the final year of the quota period, unless the quotas are modified in the interim pursuant to paragraph (b) of this section.

(1) *Quota reports.* On an annual basis, MAFMC staff will produce and provide to the MAFMC an Atlantic surfclam and ocean quahog annual quota recommendation paper based on the ABC recommendation of the SSC, the latest available stock assessment report prepared by NMFS, data reported by harvesters and processors, and other relevant data, as well as the information contained in paragraphs (a)(1)(i) through (vi) of this section. Based on that report, and at least once prior to August 15 of the year in which a multi-year annual quota specification expires, the MAFMC, following an opportunity for public comment, will recommend to the Regional Administrator annual quotas and estimates of DAH and DAP for a period up to the maximum number of years needed to align with the Northeast Region Coordinating Council-approved stock assessment schedule. In selecting the annual quotas, the MAFMC shall consider the current stock assessments, catch reports, and other relevant information concerning:

* * * * *

(b) *Interim quota modifications.* Based upon information presented in the quota reports described in paragraph (a)(1) of this section, the MAFMC may recommend to the Regional Administrator a modification to the annual quotas that have been specified for a multi-year period and any estimate of DAH or DAP made in conjunction with such specifications within the ranges specified in paragraph (a)(1) of this section. Based upon the MAFMC's recommendation, the Regional Administrator may propose surfclam and or ocean quahog quotas that differ from the annual quotas specified for the current multi-year period. Such modification shall be in effect for a period up to the maximum number of years needed to align with the Northeast Region Coordinating Council-approved stock assessment schedule, unless further modified. Any interim modification shall follow the same procedures for establishing the annual quotas that are specified for a multi-year period.

* * * * *

■ 4. In § 648.74, add paragraph (a)(2) and revise paragraph (b)(3) to read as follows:

§ 648.74 Individual Transferable Quota (ITQ) Program.

(a) * * *

(2) *ITQ ownership caps.* (i) *Quota share.* A business or individual is not eligible to be issued an ITQ permit and is not eligible to acquire additional quota share, if, as a result of the issuance of the permit or quota share transfer, the business or individual, or any other person who is a shareholder or partner, or their immediate family member, would individually or collectively have an ownership interest in more than 35 percent of the total surfclam quota or 40 percent of the total ocean quahog quota.

(ii) *Cage tags.* A business or individual is not eligible to be issued an ITQ permit and is not eligible to acquire

additional cage tags, if, as a result of the issuance of the permit or cage tag transfer, the business or individual, or any other person who is a shareholder or partner, or their immediate family member, would individually or collectively have an ownership interest in more than 65 percent of the total surfclam cage tags issued that year or 70 percent of the total ocean quahog cage tags issued that year.

(iii) *Enforcement.* The following conditions apply for the purposes of monitoring and enforcing these caps.

(A) Any partial or shared ownership is counted as full ownership by each party for the purpose of monitoring these caps. For example, if two people share ownership of a business with quota share, the full amount of quota share held by the business counts toward the cap for both owners.

(B) Having an ownership interest includes, but is not limited to, persons who are shareholders in a corporation that holds an ITQ permit, who are partners (general or limited) to an ITQ permit holder, who are immediate family members of an ITQ permit holder, or who, in any way, partly own an entity that holds an ITQ permit.

(C) Immediate family members include individuals connected by the following relationships:

(*1*) Spouse, and parents thereof;

(*2*) Children, and spouses thereof;

(*3*) Parents, and spouses thereof;

(*4*) Siblings, and spouses thereof; and

(*5*) Grandparents and grandchildren, and spouses thereof.

(D) The quota share and cage tag caps do not apply to a bank or other lender that holds ITQ quota share as collateral on a loan as described in paragraph (a)(1)(i)(C) of this section. The quota share held as collateral and the associated cage tags will be treated as if it is held by the borrower.

(E) Compliance with these ownership caps is based on the total amount of quota share or cage tags controlled throughout a fishing year. In this instance, control means the cumulative total amount of quota share or cage tags, including the amount held by the ITQ permit at the start of the fishing year plus any quota share or cage tags acquired by the ITQ permit throughout the fishing year. This measure of control during the fishing year is increased by acquiring quota share or cage tags from other ITQ permits, but is not reduced by any quota share or cage tags that are transferred to another ITQ permit.

(iv) *Review.* The MAFMC shall review these ITQ ownership cap measures at least every 10 years, or sooner as needed. Such a review should include an evaluation of the effects and effectiveness of the caps in the fishery and whether the cap levels remain appropriate or should be adjusted.

(b) * * *

(3) *Denial of ITQ transfer application.* The Regional Administrator may reject an application to transfer surfclam or ocean quahog ITQ quota share or cage tags for the following reasons: The application is incomplete; the transferor or transferee does not possess a valid surfclam or ocean quahog ITQ permit for the appropriate species; the transfer is not allowed under paragraph (a)(1)(ii)(C)(*3*) of this section; the transferor's or transferee's surfclam or ocean quahog ITQ permit has been sanctioned pursuant to an enforcement proceeding under 15 CFR part 904; the transfer would result in exceeding an ownership cap under paragraph (a)(2) of this section; or any other failure to meet the requirements of this subpart. Upon denial of an application to transfer ITQ allocation, the Regional Administrator shall send a letter to the applicant describing the reason(s) for the denial. The decision by the Regional Administrator is the final decision of the Department of Commerce; there is no opportunity for an administrative appeal.

* * * * *

BILLING CODE 3510–22–P

Proposed Rules

Federal Register
Vol. 87, No. 225
Wednesday, November 23, 2022

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

[Docket No. PRM–50–124; NRC–2022–0178]

Licensing Safety Analysis for Loss-of-Coolant Accidents

AGENCY: Nuclear Regulatory Commission.

ACTION: Petition for rulemaking; notice of docketing and request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has received a petition for rulemaking from Ralph O. Meyer dated August 1, 2022, requesting that the NRC revise its regulations regarding the licensing safety analysis for loss-of-coolant accidents. The petition was docketed by the NRC on October 11, 2022, and has been assigned Docket No. PRM–50–124. The NRC is examining the issues raised in PRM–50–124 to determine whether they should be considered in rulemaking. The NRC is requesting public comment on this petition at this time.

DATES: Submit comments by February 6, 2023. Comments received after this date will be considered if it is practical to do so, but the NRC is able to assure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website:

- *Federal rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2022–0178. Address questions about NRC Dockets to Dawn Forder; telephone: 301–415–3407; email: *Dawn.Forder@nrc.gov.* For technical questions contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Email comments to: Rulemaking.Comments@nrc.gov.* If you do not receive an automatic email reply confirming receipt, then contact us at 301–415–1677.
- *Mail comments to:* Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Rulemakings and Adjudications Staff.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Blake Purnell, U.S. Nuclear Regulatory Commission, Washington DC 20555–0001; telephone: 301–415–1380, email: *Blake.Purnell@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2022–0178 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2022–0178.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to *PDR.Resource@nrc.gov.*
- NRC's PDR: You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8:00 a.m. and 4:00 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (*https://www.regulations.gov*). Please include Docket ID NRC–2022–0178 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *https://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. The Petitioner and Petition

The petition for rulemaking (PRM) was filed by Ralph O. Meyer. The PRM requests that the NRC revise its regulations at part 50 of title 10 of the *Code of Federal Regulations* (10 CFR), ''Domestic Licensing of Production and Utilization Facilities,'' regarding the licensing safety analysis for loss-of-coolant accidents (LOCAs). The PRM requests that the NRC amend its regulations at 10 CFR 50.46, ''Acceptance criteria for emergency core cooling systems for light-water nuclear power reactors,'' which limits peak cladding temperature and maximum cladding oxidation to satisfy General Design Criterion No. 35 of appendix A to part 50, ''Emergency core cooling.'' The petition may be found in ADAMS at Accession No. ML22284A087.

III. Discussion of the Petition

The letter from the petitioner states that the NRC's current rule ''limits peak cladding temperature and maximum cladding oxidation'' and ''no longer ensures coolable geometry at higher fuel burnups'' and includes an analysis and discussion of a proposed alternative. The petitioner requests the NRC to conduct rulemaking to implement criteria in 10 CFR 50.46 that would limit the number of fuel rod ruptures to 10 percent for large break LOCAs and to 1 percent for small break LOCAs, in lieu

of existing acceptance criteria in 10 CFR 50.46(b). The petitioner argues that current licensing safety analyses for LOCAs are no longer valid for fuel at moderate and higher burnups. According to the petitioner, the German regulatory agency uses these criteria.

IV. Conclusion

The NRC has determined that the petition meets the sufficiency requirements for docketing a PRM under 10 CFR 2.803, ''Petition for rulemaking-NRC action.'' The NRC will examine the issues raised in PRM–50–124 and any comments received in response to this comment request to determine whether these issues should be considered in rulemaking. The public can monitor further action on the rulemaking that will address this petition by searching Docket ID NRC–2022–0178 on the Federal rulemaking website, *https://www.regulations.gov.* The site allows members of the public to receive alerts when changes or additions occur in a docket folder. To subscribe: (1) navigate to the docket folder (NRC–2022–0178); (2) click the ''Subscribe'' link; and (3) enter an email address and click on the ''Subscribe'' link. The NRC also tracks the status of all NRC rules and PRMs on its website at *https://www.nrc.gov/about-nrc/regulatory/rulemaking/rules-petitions.html.*

Dated November 17, 2022.

For the Nuclear Regulatory Commission.

Brooke P. Clark,

Secretary of the Commission.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 261

[EPA–R06–RCRA–2022–0653; FRL–10104–01–R6]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste Proposed Rule

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to grant an exclusion from the list of hazardous wastes to WRB Refining LP (Petitioner) located in Borger, Texas. This action responds to a petition to exclude (or ''delist'') up to 7,000 cubic yards per year of solids removed from four stormwater tanks from the list of federal hazardous wastes when disposed of in a Subtitle D Landfill. Resource Conservation Recovery Act (RCRA). The EPA is proposing to grant the petition based on an evaluation of waste-specific information provided by Petitioner.

DATES: Comments on this proposed exclusion must be received by December 23, 2022.

ADDRESSES: Submit your comments by one of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the on-line instructions for submitting comments.
- *Email: shah.harry@epa.gov.*

Instructions: The EPA must receive your comments by December 23, 2022. Direct your comments to Docket ID Number EPA–R06–RCRA–2022–0653. The EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *https://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *https://www.regulations.gov,* or email. The Federal *regulations.gov* website is an ''anonymous access'' system, which means the EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to the EPA without going through *regulations.gov,* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. If you submit an electronic comment, the EPA recommends that you include your name and other contact information in the body of your comment with any CBI you submit. If the EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, the EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption and be free of any defects or viruses.

Docket: The index to the docket for this action is available electronically at *www.regulations.gov.* Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy.

You can view and copy the delisting petition and associated publicly available docket materials either through *www.regulations.gov* or at: EPA, Region 6, 1201 Elm Street, Suite 500, Dallas, Texas 75270. The EPA facility is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays and facility closures due to COVID–19. We recommend that you telephone Harry Shah, at (214) 665–6457, before visiting the Region 6 office. Interested persons wanting to examine these documents should make an appointment with the office.

FOR FURTHER INFORMATION CONTACT: Harry Shah, (214) 665–6457, *shah.harry@epa.gov.* Out of an abundance of caution for members of the public and our staff, the EPA Region 6 office may be closed to the public to reduce the risk of transmitting COVID–19. We encourage the public to submit comments via *https://www.regulations.gov,* as there will be a delay in processing mail and no courier or hand deliveries will be accepted. Please call or email the contact listed above if you need alternative access to material indexed but not provided in the docket.

VII. Statutory and Executive Order Reviews

I. Overview Information

The EPA is proposing to grant a May 2020 petition (''Delisting Petition for Stormwater Solids'') request submitted by WRB Refining LP in Borger, Texas to exclude (or ''delist'') up to 7,000 cubic yards per year of F037 stormwater solids from the list of federal hazardous waste set forth in 40 CFR 261.3 (hereinafter, all sectional references are to 40 CFR unless otherwise indicated). The Petitioner claims that the petitioned wastes do not meet the criteria for which the EPA listed it, and that there are no additional constituents or factors which could cause the waste to be hazardous. Based on our review described in Section III, we propose to approve the petition request, and allow the delisted waste to be disposed in a Subtitle D landfill. A copy of the May 2020 petition is located in the docket to this proposal action.

II. Background

A. What is the history of the delisting program?

The EPA published an amended list of hazardous wastes from non-specific and specific sources on January 16, 1981, as part of its final and interim final regulations implementing section 3001 of RCRA. The EPA has amended this list several times and codifies the list in §§ 261.31 and 261.32.

The EPA lists the Petitioner's wastes as hazardous because: (1) the wastes typically and frequently exhibit one or more of the characteristics of hazardous wastes identified in Subpart C of part 261 (that is, ignitability, corrosivity, reactivity, and toxicity), (2) the wastes meet the criteria for listing contained in § 261.11(a)(2) or (a)(3), or (3) the wastes are mixed with or derived from the treatment, storage or disposal of such characteristic and listed wastes and which therefore become hazardous under § 261.3(a)(2)(iv) or (c)(2)(i), known as the ''mixture'' or ''derived-from'' rules, respectively.

Individual waste streams may vary, however, depending on raw materials, industrial processes, and other factors. Thus, while a waste described in these part 261 regulations or resulting from the operation of the mixture or derived-from rules generally is hazardous, a specific waste from an individual facility may not be hazardous.

For this reason, 40 CFR 260.20 and 260.22 provide an exclusion procedure, called delisting, which allows persons to prove that the EPA should not regulate a specific waste from a particular generating facility as a hazardous waste.

B. What is a delisting petition, and what does it require of a petitioner?

A delisting petition is a request from a facility to the EPA or an authorized state to exclude wastes from the list of hazardous wastes. The facility petitions the EPA because it does not consider the waste as hazardous under RCRA regulations.

In a delisting petition, the petitioner must show that wastes generated at a particular facility do not meet any of the criteria for which the waste was listed. The criteria for which the EPA lists a waste are in 40 CFR part 261 and further explained in the background documents for the listed waste in the June 30, 1992 publication of the ''Final Best Demonstrated Available Technology (BDAT) Background Document for Newly Listed Refinery Wastes F037 and F038'' (*https://nepis.epa.gov/Exe/ZyNET.exe/P100VUGS.TXT?ZyActionD=ZyDocument&Client=EPA&Index=1991+Thru+1994&Docs=&Query=&Time=&EndTime=&SearchMethod=1&TocRestrict=n&Toc=&TocEntry=&QField=&QFieldYear=&QFieldMonth=&QFieldDay=&IntQFieldOp=0&ExtQFieldOp=0&XmlQuery=&File=D%3A%5Czyfiles%5CIndex%20Data%5C91thru94%5CTxt%5C00000035%5CP100VUGS.txt&User=ANONYMOUS&Password=anonymous&SortMethod=h%7C-&MaximumDocuments=1&FuzzyDegree=0&ImageQuality=r75g8/r75g8/x150y150g16/i425&Display=hpfr&DefSeekPage=x&SearchBack=ZyActionL&Back=ZyActionS&BackDesc=Results%20page&MaximumPages=1&ZyEntry=1&SeekPage=x&ZyPURL*).

In addition, under 40 CFR 260.22, a petitioner must prove that the waste does not exhibit any of the hazardous waste characteristics (that is, ignitability, reactivity, corrosivity, and toxicity) and must present sufficient information for EPA to decide whether factors other than those for which the waste was listed warrant retaining it as a hazardous waste.

Generators remain obligated under RCRA to confirm whether their waste remains non-hazardous based on the hazardous waste characteristics even if EPA has ''delisted'' the waste.

C. What factors must the EPA consider in deciding whether to grant a delisting petition?

Besides considering the criteria in 40 CFR 260.22(a) and § 3001(f) of RCRA, 42 U.S.C. 6921(f), and in the background documents for the listed wastes, EPA must consider any factors (including additional constituents) aside from those for which EPA listed the waste, if a reasonable basis exists that these additional factors could cause the waste to be hazardous.

The EPA must also consider hazardous waste mixtures containing listed hazardous wastes and wastes derived from treating, storing, or disposing of listed hazardous waste. See § 261.3(a)(2)(iii and iv) and (c)(2)(i), called the ''mixture'' and ''derived-from'' rules, respectively. These wastes are also eligible for exclusion and remain hazardous wastes until excluded. See 66 FR 27266 (May 16, 2001).

D. Environmental Justice Evaluation

To better meet EPA's ''responsibilities related to the protection of public health and the environment, EPA has developed a new environmental justice (EJ) mapping and screening tool called EJ Screen'' that reports values as a percentile when compared to a state or the nation. ''It is based on nationally consistent data and an approach that combines environmental and demographic indicators in maps and reports,'' (*https://www.epa.gov/ejscreen*). EPA is providing analysis of environmental justice associated with this action. We are doing so for the purpose of providing information to the public, not as a basis of our final action.

EPA utilized EJ Screen to evaluate potential environmental justice concerns in communities at one-,& three-, and five-mile radiuses around the Borger facility. EPA considers the potential for EJ concerns in a community when one or more of the 12 EJ indices is at or above the 80th percentile when compared to the rest of the USA. At all three radial measurements, none of the 12 EJ indices exceeded the 80th percentile. However, six different individual block groups clustered south/southwest of the facility within the one-, three-, and five-mile radiuses exceeded the 80th percentile for one or more indices. This information is provided in Table 1. More information on EJ Screen, including an explanation of the 12 EJ indices can be found at *www.epa.gov/ejscreen/what-ejscreen.*

TABLE 1—BLOCK GROUPS WITH EJ INDICES AT OR ABOVE THE 80TH PERCENTILE FOR THE USA [1]

	EJ index for lead paint (USA percentile)	EJ index for RMP facility proximity (USA percentile)	EJ index for underground storage tanks (USA percentile)	EJ index for wastewater discharge (USA percentile)
Block Group 482339506001	80	83	–	–
Block Group 482339507001	85	87	–	–
Block Group 482339507002	82	90	–	–
Block Group 482339508001	81	87	–	–
Block Group 482339509001	–	84	–	–
Block Group 482339509004	86	94	82	80

[1] A dash indicates the EJ index is below the 80th percentile.

III. The EPA's Evaluation of the Waste Information and Data

A. What waste did the Petitioner petition the EPA to delist?

In May 2020, WRB Refining LP petitioned the EPA to exclude from the list of hazardous wastes contained in § 261.31, stormwater tank solids (F037) generated from its facility located in Borger, Texas. The waste falls under the classification of listed waste pursuant to §§ 261.31. Specifically, in its petition, WRB Refining requested that the EPA grant a standard exclusion for 7,000 cubic yards per year of the stormwater tank solids.

B. How did the Petitioner generate the waste?

The principal products manufactured at the Refinery are gasoline, diesel, aviation fuel, natural gas liquids (NGL), petroleum coke, and solvents. The stormwater tanks are active and have been in operation for approximately 25 years. To restore capacity in the stormwater tanks, the Borger Refinery will be removing accumulated solids. The solids removal process will typically occur within a calendar year and will be an ongoing operational item for the refinery in the future.

The solids are removed from the four stormwater tanks. These tanks are listed as the North Stormwater Tank, West Stormwater Tank, North Dropout Basin, and West Grit Trap (hereafter collectively referred to as ''the stormwater tanks''). The four stormwater tanks are identified as solid waste management unit (SWMU) No. 50 on the facility's notice of registration (NOR) with the Texas Commission on Environmental Quality (TCEQ).

The stormwater tanks solids originated from both historical and current operation of the wastewater treatment system at the refinery. To the extent possible, hydrocarbons present in refinery wastewaters have been recovered. However, historically more hydrocarbons passed through the ''oil recovery system'' and flowed into the stormwater tanks. Hydrocarbons in the wastewater can result from various sources (*e.g.,* crude oil). Over time, more of the oily streams were routed to storage tanks from collection system piping and/or smaller tanks for interception and recovery instead of into the stormwater tanks. Recovered oil from the oil recovery system is stored in tanks prior to being reintroduced into the refining process. Historically, these oily flows occurred in conjunction with facility operations, were relatively routine in nature, and not directly associated with precipitation. As such, they were classified by the EPA as ''dry weather'' flows. By contrast, wastewater directly associated with precipitation (*i.e.,* stormwater) is referred to as ''wet weather'' flows. The EPA listing criteria for F037 generally encompasses primary solids associated with dry-weather, oily flows.

Since the stormwater tanks receive what could be classified as dry-weather, oily flows as specified in the November 2, 1990, **Federal Register** rule publication (55 FR 46354, Nov. 2, 1990), the solids within the four tanks are believed to be classified as F037 when generated. WRB Refining assumes that solids removed from the stormwater tanks bear the F037 (primary oil/water/solids separation sludge) listing when generated.

C. How did the Petitioner sample and analyze the petitioned waste?

A total of eight acceptable sample results were provided by Petitioner to support the petition. The EPA considered all 8 samples of the stormwater tank solids and the disposal scenario of the landfill was modeled using the Delisting Risk Assessment Software. The worst-case scenario of the constituents' concentrations for the F037 solids were used as input in the model to determine if it would meet the hazardous waste criteria for which it was listed. The maximum total and leachate concentrations for the inorganic and organic constituents which were found in the analytical data provided by Petitioner are presented in Table 2.

TABLE 2—MAXIMUM TOTAL AND TCLP CONCENTRATIONS

Chemical name	Maximum total concentration (mg/kg)	Maximum TCLP concentration (mg/l)
Acenaphthene	0.04	<0.00030
Anthracene	0.18	<0.00030
Antimony	6.93	0.0293

Xylenes, Total	0.087	<0.010
Zinc	930	2.76

D. What factors did the EPA consider in deciding whether to grant the delisting petition?

In reviewing this petition, we considered the original listing criteria and the additional factors required by the Hazardous and Solid Waste Amendments of 1984 (HSWA). See § 222 of HSWA, 42 U.S.C. 6921(f), and 40 CFR 260.22(d)(2) through (4). We evaluated the petitioned wastes against the listing criteria and factors cited in § 261.11(a)(2) and (3).

In addition to the criteria in 40 CFR 260.22(a), 261.11(a)(2) and (3), 42 U.S.C. 6921(f), and in the background documents for the listed wastes, the EPA also considered factors (including additional constituents) other than those for which EPA listed the waste if these additional factors could cause the waste to be hazardous (*See* the background documents).

Our proposed decision to grant the May 2020 petition to delist the waste from Petitioner's facility in Borger, Texas is based on our evaluation of the wastes for factors or criteria which could cause the waste to be hazardous. These factors included: (1) Whether the waste is considered acutely toxic; (2) the toxicity of the constituents; (3) the concentration of the constituents in the waste; (4) the tendency of the constituents to migrate and to bioaccumulate; (5) the persistence in the environment of any constituents once released from the waste; (6) plausible and specific types of management of the petitioned waste; (7) the quantity of waste produced; and (8) waste variability.

The EPA must also consider as hazardous wastes mixtures containing listed hazardous wastes and wastes derived from treating, storing, or disposing of listed hazardous waste. See 40 CFR 261.3(a)(2)(iv) and (c)(2)(i), called the ''mixture'' and ''derived-from'' rules, respectively. Mixture and derived-from wastes are also eligible for exclusion but remain hazardous until excluded.

E. How did the EPA evaluate the risk of delisting this waste?

For this proposed delisting determination, we evaluated the risk that the waste would be disposed of as a non-hazardous waste in a landfill. We considered transport of waste constituents through groundwater, surface water and air. We evaluated Petitioner's analysis of the petitioned waste using the Delisting Risk Assessment Software (DRAS) to predict the concentration of hazardous constituents that might be released from the petitioned waste and to determine if the waste would pose a threat to human health and the environment. The DRAS software and associated documentation can be found at *www.epa.gov/hw/hazardous-waste-delisting-risk-assessment-software-dras.*

To predict the potential for release to groundwater from landfilled wastes and subsequent routes of exposure to a receptor, the DRAS uses dilution attenuation factors derived from the EPA's Composite Model for leachate migration with transformation products. From a release to groundwater, the DRAS considers routes of exposure to a human receptor through ingestion of contaminated groundwater, inhalation from groundwater while showering and dermal contact from groundwater while bathing.

From a release to surface water by erosion of waste from an open landfill into storm water run-off, DRAS evaluates the exposure to a human receptor by fish ingestion and ingestion of drinking water. From a release of waste particles and volatile emissions to air from the surface of an open landfill, DRAS considers routes of exposure of inhalation of volatile constituents, inhalation of particles, and air deposition of particles on residential soil and subsequent ingestion of the contaminated soil by a child. The technical support document and the user's guide to DRAS are available at *https://www.epa.gov/hw/hazardous-waste-delisting-risk-assessment-software-dras.*

F. What did the EPA conclude?

Petitioner stated in its petition that the petitioned waste meets the criteria of F037 for which the EPA listed it. Petitioner also stated that no additional constituents or factors could cause the waste to be hazardous. Petitioner also stated that disposal in a landfill will not adversely impact human health or the environment. The EPA's review of this petition included consideration of the original listing criteria, and the additional factors required by the Hazardous and Solid Waste Amendments of 1984 (HSWA). See section 3001(f) of RCRA, 42 U.S.C. 6921(f), and CFR 260.22 (d)(1)–(4). In making the initial delisting determination, the EPA evaluated the petitioned waste against the listing criteria and factors cited in § 261.11(a)(2) and (a)(3). Based on this review, the EPA agrees with the Petitioner that the petitioned waste is nonhazardous with respect to the original listing criteria. (If the EPA had found, based on this review, that the waste remained hazardous based on the factors for which the waste was originally listed, the EPA would propose to deny the petition.) The EPA evaluated the waste with respect to other factors or criteria to assess whether there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous. The EPA considered whether the waste is acutely toxic, the concentration of the constituents in the waste, their tendency to migrate and to bioaccumulate, their persistence in the environment once released from the waste, plausible and specific types of management of the petitioned waste, the quantities of waste generated, and waste variability. The EPA believes that the petitioned waste does not meet the listing criteria and thus, should not be a listed waste. The EPA's proposed decision to delist the waste from Petitioner's facility is based on the information submitted in support of this rule, including descriptions of the wastes and analytical data from the Borger, Texas facility, and that is contained in the Petition and attachments, all of which are included in the docket to this action.

IV. Conditions for Exclusion

A. How will the Petitioner manage the waste if it is delisted?

If the petitioned wastes are delisted as proposed, the Petitioner must dispose of them in a Subtitle D landfill which is permitted, licensed, or registered by a state to manage industrial waste or in the on-site landfill.

B. What are the maximum allowable concentrations of hazardous constituents in the waste?

The EPA notes that in some instances the maximum allowable total constituent concentrations provided by the DRAS model exceed 100% of the waste—these DRAS results are an artifact of the risk calculations that do not have physical meaning. In instances where DRAS predicts a maximum constituent greater than 100 percent of the waste (that is, greater than 1,000,000 mg/kg or mg/L, respectively, for total and TCLP concentrations), the EPA is not proposing to require the Petitioner to perform sampling and analysis for that constituent and sampling type (total or TCLP).

C. How frequently must the Petitioner test the waste?

The testing approach for this waste stream will be conducted as generated. Prior to disposal of any future tank cleanouts, Petitioner must conduct sampling and analysis as described in the delisting sampling and analysis plan and ensure that the wastes do not exceed the delisting parameters. If compliance with the delisting parameters is demonstrated with analytical testing (TCLP analysis), the Petitioner may dispose of the tank cleanouts. The annual amount of solids generated from the tank clean outs may not exceed 7,000 cubic yards. The annual sampling report shall include the volume of solids disposed of in the landfill, as well as annual testing event data. The petitioner should monitor and report increasing trends of constituents which will affect the overall compliance with the stormwater discharge permit.

D. What data must the Petitioner submit?

The Petitioner must submit the data obtained through verification testing to U.S. EPA Region 6, Office of Land, Chemicals and Redevelopment Division, 1201 Elm Street, Suite 500, M/C 6LCR–RP, Dallas, Texas 75270–2102, within 30 days after receiving the final results from the laboratory. These results may be submitted electronically to Harry Shah, *shah.harry@epa.gov.* The Petitioner must make those records available for inspection. All data must be accompanied by a signed copy of the certification statement in 40 CFR 260.22(i)(12).

E. What happens if the Petitioner fails to meet the conditions of the exclusion?

If this Petitioner violates the terms and conditions established in the exclusion, the Agency may start procedures to withdraw the exclusion. Additionally, the terms of the exclusion provide that ''[a]ny waste volume for which representative composite sampling does not reflect full compliance with the exclusion criteria must continue to be managed as hazardous.''

If the testing of the waste does not demonstrate compliance with the delisting concentrations described in section IV.C above, or other data (including but not limited to leachate data or groundwater monitoring data from the final land disposal facility) relevant to the delisted waste indicates that any constituent is at a concentration in waste above specified delisting verification concentrations in Table 1, the Petitioner must notify the Agency within 10 days, or such later date as the EPA may agree to in writing, after receiving the final verification testing results from the laboratory or of first possessing or being made aware of other relevant data. The EPA may require the Petitioner to conduct additional verification sampling to better define the particular volume of wastes within the affected unit that does not fully satisfy delisting criteria. For any volume of wastes for which the corresponding representative sample(s) do not reflect full compliance with delisting exclusion levels, the exclusion by its terms does not apply, and the waste must be managed as hazardous.

The EPA has the authority under RCRA and the Administrative Procedures Act, 5 U.S.C. 551 (1978*) et seq.* to reopen a delisting decision if we receive new information indicating that the conditions of this exclusion have been violated or, are otherwise not being met.

F. What must the Petitioner do if the process changes?

Any process changes or additions implemented at Petitioner's facility which would significantly impact the constituent concentrations of the waste must be reported to the EPA in accordance with Condition VI. of the exclusion language.

V. When would the EPA finalize the proposed delisting exclusion?

HSWA specifically requires the EPA to provide notice and an opportunity for public comment before granting or denying a final exclusion. Thus, the EPA will not make a final decision or grant an exclusion until it has addressed all timely public comments, including any at public hearings. Upon receipt and consideration of all comments, the EPA will publish its final determination as a final rule. Since this rule would reduce the existing requirements for

persons generating hazardous wastes, the regulated community does not need a six-month period to come into compliance in accordance with § 3010 of RCRA, as amended by HSWA.

VI. How would this action affect States?

Because the EPA is proposing to issue this exclusion under the federal RCRA delisting regulations, only states subject to federal RCRA delisting provisions will be affected. This exclusion may not be effective in states which have received authorization from the EPA to make their own delisting decisions.

RCRA allows states to impose more stringent regulatory requirements than RCRA's under § 3009 of RCRA. These more stringent requirements may include a provision that prohibits a federally-issued exclusion from taking effect in the state. We urge Petitioners to contact the state regulatory authority to establish the status of its wastes under the state law.

The EPA has also authorized some states to administer a delisting program in place of the federal program, that is, to make state delisting decisions. Therefore, this exclusion does not apply in those states. If the Petitioner manages the wastes in any state with delisting authorization, the Petitioner must obtain delisting authorization or other determination from the receiving state before it can manage the waste as nonhazardous in that state.

VII. Statutory and Executive Order Reviews

Additional information about these statutes and Executive Orders can be found at *https://www2.epa.gov/laws-regulations/laws-and-executive-orders.*

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This proposed action is exempt from review by the Office of Management and Budget because it is a rule of particular applicability, not general applicability. The proposed action approves a delisting petition under RCRA for the petitioned waste at a particular facility.

B. Executive Order 13771: Reducing Regulations and Controlling Regulatory Costs

This proposed action is not an Executive Order 13771 regulatory action because actions such as approval of delisting petitions under RCRA are exempted under Executive Order 13771

C. Paperwork Reduction Act

This proposed action does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) because it only applies to a particular facility.

D. Regulatory Flexibility Act

Because this rule is of particular applicability relating to a particular facility, it is not subject to the regulatory flexibility provision of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

E. Unfunded Mandates Reform Act

This proposed action does not contain any unfunded mandate as described in the Unfunded Mandates Reform Act (2 U.S.C. 1531–1538) and does not significantly or uniquely affect small governments. The action imposes no new enforceable duty on any state, local, or tribal governments or the private sector.

F. Executive Order 13132: Federalism

This proposed action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

G. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This proposed action does not have tribal implications as specified in Executive Order 13175. This proposed action applies only to a particular facility on non-tribal land. Thus, Executive Order 13175 does not apply to this action.

H. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

This proposed action is not subject to Executive Order 13045 because it is not economically significant as defined in Executive Order 13045 and because the EPA does not believe the environmental health or safety risks addressed by this action present a disproportionate risk to children. This proposed action's health and risk assessments using the Agency's Delisting Risk Assessment Software (DRAS), which considers health and safety risks to children, are described in section III.E above. The technical support document and the user's guide for DRAS are included in the docket.

I. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution or Use

This proposed action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 13211.

J. National Technology Transfer and Advancement Act

This proposed action does not involve technical standards as described by the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note).

K. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

Executive Order 12898 (59 FR 7629, Feb. 16, 1994) directs federal agencies to identify and address ''disproportionately high and adverse human health or environmental effects'' of their actions on minority populations and low-income populations to the greatest extent practicable and permitted by law. The EPA defines environmental justice (EJ) as ''the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.'' The EPA further defines the term fair treatment to mean that ''no group of people should bear a disproportionate burden of environmental harms and risks, including those resulting from the negative environmental consequences of industrial, governmental, and commercial operations or programs and policies,'' (*https://www.epa.gov/environmentaljustice/learn-about-environmental-justice*).

The EPA believes that this proposed action does not have disproportionately high and adverse human health or environmental effects on minority populations, low-income populations, and/or indigenous peoples. The EPA has determined that this proposed action will not have disproportionately high and adverse human health or environmental effects on minority or low-income populations because it does not affect the level of protection provided to human health or the environment. The Agency's risk assessment, as described in section III.E above, did not identify risks from management of this material in an authorized, solid waste landfill (*e.g.,* RCRA Subtitle D landfill, commercial/industrial solid waste landfill, etc.) or the on-site landfill. Therefore, the EPA believes that any populations in proximity of the landfills used by the Borger facility should not be adversely affected by common waste management practices for this delisted waste.

L. Congressional Review Act

This proposed action is exempt from the Congressional Review Act (5 U.S.C. 801 *et seq.*) because it is a rule of particular applicability.

List of Subjects in 40 CFR part 261

Environmental protection, Hazardous waste, Recycling, and Reporting and recordkeeping requirements.

Dated: November 14, 2022.

Ronald Crossland,

Director, Land, Chemicals and Redevelopment Division.

For the reasons set out in the preamble, the EPA proposes to amend 40 CFR part 261 as follows:

PART 261 IDENTIFICATION AND LISTING OF HAZARDOUS WASTE

■ 1. The authority citation for part 261 continues to read as follows:

Authority: 42 U.S.C. 6905, 6912(a), 6921, 6922, 6924(y) and 6938.

■ 2. Amend table 1 of Appendix IX to part 261, by adding an entry for ''WRB Refining LP'' at the end of the table to read as follows:

Appendix IX to Part 261 Wastes Excluded Under §§ 260.20 and 260.22.

* * * * *

Facility	Address	Waste description
WRB Refining LP	Borger, Texas	Stormwater Solids (the EPA Hazardous Waste No. F037) generated at a maximum generation of 7,000 cubic yards per calendar year after (date rule finalized) and disposed in a landfill. WRB Refining must implement a verification program that meets the following Paragraphs: (1) Delisting Levels: All leachable constituent concentrations must not exceed the following levels. The petitioner must use the method specified in 40 CFR 261.24 to measure constituents in the waste leachate (mg/L). Stormwater Solids Leachate: Acenaphthene-10.6; Anthracene-25.9; Antimony-0.109; Arsenic-0.01; Barium-36.0; Benz(a) anthracene-0.07; Benzo(a)pyrene-26.3; Benzo(b)fluoranthene-224; Benzene-0.077; 2-Butanone-200; Cadmium—0.0911; Carbon disulfide-56.4; Chromium-2.27; Chrysene-7.01; Cobalt—587; Di-n-butyl-phthalate-24.6; Ethylbenzene-10.8; Fluoranthrene-2.46; Fluorene-4.91; Indeno(1,2,3-cd)pyrene-129; Lead-5.0; Mercury-0.068; Naphthalene-0.0327; Nickel-13.5; Pyrene-4.45; Selenium-1.0; Silver-5.0; Toluene-15.1; Vanadium-3.77; Xylenes, Total-9.56; Zinc-197. (2) Waste Holding and Handling: (A) All stormwater solids from tank clean outs must be tested to assure they have met the concentrations described in Paragraph (1). Solids that do not meet the concentrations must be disposed of as hazardous waste. (B) Levels of constituents measured in the samples of the solids that do not exceed the levels set forth in Paragraph (1) are non-hazardous. WRB Refining can manage and dispose the non-hazardous stormwater solids according to all applicable solid waste regulations. (C) WRB Refining must maintain a record of the actual volume of the stormwater solids to be disposed in the Subtitle D or on-site landfill according to the requirements in Paragraph (4). (3) Changes in Operating Conditions: If WRB Refining significantly changes the process described in its petition or starts any processes that may or could affect the composition or type of waste generated as established under Paragraph (1) (by illustration, but not limitation, changes in equipment or operating conditions of the treatment process), they must notify the EPA in writing; they may no longer handle the wastes generated from the new process as nonhazardous until the test results of the wastes meet the delisting levels set in Paragraph (1) and they have received written approval to do so from the EPA. (4) Data Submittals: WRB Refining must submit the information described below. If WRB Refining fails to submit the required data within the specified time or maintain the required records on-site for the specified time, the EPA, at its discretion, will consider this sufficient basis to reopen the exclusion as described in Paragraph 5. WRB Refining must: (A) Submit the data obtained through Paragraph 3 to the Chief, RCRA Permits & Solid Waste Section, Mail Code, (6LCR–RP) US EPA Region 6, 1201 Elm Street, Suite 500, Dallas, TX 75270 within the time specified. Data may be submitted via email to the technical contact for the delisting program. (B) Compile records of operating conditions and analytical data from Paragraph (3), summarized, and maintained on-site for a minimum of five years. (C) Furnish these records and data when the EPA or the State of Texas request them for inspection. (D) Send along with all data, a signed copy of the following certification statement, to attest to the truth and accuracy of the data submitted: ''Under civil and criminal penalty of law for the making or submission of false or fraudulent statements or representations (pursuant to the applicable provisions of the Federal Code, which include, but may not be limited to, 18 U.S.C. 1001 and 42 U.S.C. 6928), I certify that the information contained in or accompanying this document is true, accurate and complete. As to the (those) identified section(s) of this document for which I cannot personally verify its (their) truth and accuracy, I certify as the company official having supervisory responsibility for the persons who, acting under my direct instructions, made the verification that this information is true, accurate and complete. If any of this information is determined by the EPA in its sole discretion to be false, inaccurate or incomplete, and upon conveyance of this fact to the company, I recognize and agree that this exclusion of waste will be void as if it never had effect or to the extent directed by the EPA and that the company will be liable for any actions taken in contravention of the company's RCRA and CERCLA obligations premised upon the company's reliance on the void exclusion.'' (5) Reopener:

Facility	Address	Waste description
		(A) If, any time after disposal of the delisted waste, WRB Refining possesses or is otherwise made aware of any environmental data (including but not limited to leachate data or ground water monitoring data) or any other data relevant to the delisted waste indicating that any constituent identified for the delisting verification testing is at level higher than the delisting level allowed by the Division Director in granting the petition, then the facility must report the data, in writing, to the Division Director within 10 days of first possessing or being made aware of that data. (B) If the verification testing of the waste does not meet the delisting requirements in Paragraph 1, WRB Refining must report the data, in writing, to the Division Director within 10 days of first possessing or being made aware of that data. (C) If WRB Refining fails to submit the information described in paragraphs (4), (5)(A) or (5)(B) or if any other information is received from any source, the Division Director will make a preliminary determination as to whether the reported information requires Agency action to protect human health or the environment. Further action may include suspending, or revoking the exclusion, or other appropriate response necessary to protect human health and the environment. (D) If the Division Director determines that the reported information does require Agency action, the Division Director will notify the facility, in writing, of the actions the Division Director believes are necessary to protect human health and the environment. The notice shall include a statement of the proposed action and a statement providing the facility with an opportunity to present information as to why the proposed Agency action is not necessary. The facility shall have 10 days from the date of the Division Director's notice to present such information. (E) Following the receipt of information from the facility described in paragraph (5)(D) or (if no information is presented under paragraph (5)(D)) the initial receipt of information described in paragraphs (4), (5)(A) or (5)(B), the Division Director will issue a final written determination describing the Agency actions that are necessary to protect human health or the environment. Any required action described in the Division Director's determination shall become effective immediately, unless the Division Director provides otherwise. (6) Notification Requirements: WRB Refining must do the following before transporting the delisted waste: Failure to provide this notification will result in a violation of the delisting petition and a possible revocation of the decision. (A) Provide a written notification to any State Regulatory Agency to which, or through which they will transport the delisted waste described above for disposal, 60 days before beginning such activities. If WRB Refining transports the excluded waste to or manages the waste in any state with delisting authorization, WRB Refining must obtain delisting authorization from that state before it can manage the waste as nonhazardous in the state. (B) Update the one-time written notification if they ship the delisted waste to a different disposal facility. (C) Failure to provide the notification will result in a violation of the delisting variance and a possible revocation of the exclusion.

[FR Doc. 2022–25213 Filed 11–22–22; 8:45 am]
BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 10 and 11

[PS Docket Nos. 15–94, 15–91, 22–329; FCC 22–82; FR ID 113410]

Emergency Alert System; Wireless Emergency Alerts; Protecting the Nation's Communications Systems From Cybersecurity Threats

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: In this document, the Commission proposes requirements for Emergency Alert System (EAS) Participants to report compromises of their EAS equipment, communications systems, and services to the Commission. Additionally, this document proposes requirements for EAS Participants and Commercial Mobile Service (CMS) providers that participate in Wireless Emergency Alerts (WEA) to annually certify to having a cybersecurity risk management plan in place and to employ sufficient security measures to ensure the confidentiality, integrity, and availability of their respective alerting systems. This document also proposes requirements for participating CMS providers to take steps to ensure that only valid alerts are displayed on consumer devices. These requirements would further protect the nation's communications systems from cybersecurity threats. With this Notice of Proposed Rulemaking, the Commission seeks comment on the proposed rules and any suitable alternatives.

DATES: Comments are due on or before December 23, 2022 and reply comments are due on or before January 23, 2023.

ADDRESSES: You may submit comments, identified by PS Docket Nos. 15–94, 15–91, and 22–329, by any of the following methods:

- *Electronic Filers:* Comments may be filed electronically using the internet by accessing the ECFS: *http://apps.fcc.gov/ecfs/*.
- *Paper Filers:* Parties who choose to file by paper must file an original and one copy of each filing.

Filings can be sent by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.

- Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9050 Junction Drive, Annapolis Junction, MD 20701.
- U.S. Postal Service first-class, Express, and Priority mail must be addressed to 45 L Street NE, Washington, DC 20554.

• Effective March 19, 2020, and until further notice, the Commission no longer accepts any hand or messenger delivered filings. This is a temporary measure taken to help protect the health and safety of individuals, and to mitigate the transmission of COVID–19. *See FCC Announces Closure of FCC Headquarters Open Window and Change in Hand-Delivery Policy,* Public Notice, DA 20–304 (March 19, 2020). *https://www.fcc.gov/document/fcc-closes-headquarters-open-window-and-changes-hand-delivery-policy.*

People with Disabilities. To request materials in accessible formats for people with disabilities (braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov* or call the Consumer & Governmental Affairs Bureau at 202–418–0530 (voice), 202–418–0432 (tty).

FOR FURTHER INFORMATION CONTACT: For further information regarding Notice of Proposed Rulemaking, please contact James Wiley, Cybersecurity and Communications Reliability Division, Public Safety and Homeland Security Bureau, (202) 418–1678, or by email to *James.Wiley@fcc.gov,* or Steven Carpenter, Cybersecurity and Communications Reliability Division, Public Safety and Homeland Security Bureau, (202) 418–2313, or by email to *Steven.Carpenter@fcc.gov.* For additional information concerning the Paperwork Reduction Act information collection requirements contained in this document, send an email to *PRA@fcc.gov* or contact Nicole Ongele, Office of Managing Director, Performance Evaluation and Records Management, 202–418–2991, or by email to *PRA@fcc.gov.*

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rulemaking (*NPRM*), in PS Docket Nos. 15–94, 15–91, 22–329; FCC 22–82, adopted and released on October 27, 2022. The full text of this document is available by downloading the text from the Commission's website at: *https://docs.fcc.gov/public/attachments/FCC-22-82A1.pdf.*

Paperwork Reduction Act

This Notice of Proposed Rulemaking (*NPRM*) seeks comment on potential new or revised proposed information collection requirements. If the Commission adopts any new or revised final information collection requirements when the final rules are adopted, the Commission will publish a notice in the **Federal Register** inviting further comments from the public on the final information collection requirements, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3501–3520). The Commission, as part of its continuing effort to reduce paperwork burdens, invites the general public and OMB to comment on the information collection requirements contained in this document, as required by the PRA. Public and agency comments on the PRA proposed information collection requirements are due January 23, 2023.

Comments should address: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and (e) way to further reduce the information collection burden on small business concerns with fewer than 25 employees. In addition, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), we seek specific comment on how we might further reduce the information collection burden for small business concerns with fewer than 25 employees.

I. Initial Regulatory Flexibility Analysis

1. As required by the Regulatory Flexibility Act of 1980, as amended (RFA), the Commission has prepared this Initial Regulatory Flexibility Analysis (IRFA) of the possible significant economic impact on a substantial number of small entities by the policies and rules proposed in the *NPRM.* Written public comments are requested on this IRFA. Comments must be identified as responses to the IRFA and must be filed by the deadlines for comments on the *NPRM.* The Commission will send a copy of the *NPRM,* including this IRFA, to the Chief Counsel for Advocacy of the Small Business Administration (SBA). In addition, the *NPRM* and IRFA (or summaries thereof) will be published in the **Federal Register**.

A. Need for, and Objectives of, the Proposed Rules

2. The *NPRM* raises awareness concerning security of the nation's alert and warning systems is essential to helping safeguard the lives and property of all Americans. To ensure that the EAS and WEA remain strong, the Commission must act proactively in its oversight of stakeholders associated with these systems. The Commission has previously encouraged stakeholders to ensure that their systems are secure and provided guidance on specific steps that communications providers could take to secure their equipment. According to data collected by the Public Safety and Homeland Security Bureau (Bureau) during the nationwide EAS test in August 2021 however, more than 5,000 EAS Participants were using outdated software or using equipment that no longer supported regular software updates. Moreover, in the area of equipment operational readiness, the test also revealed that an appreciable number of EAS Participants were unable to participate in testing due to equipment failure. This was despite receiving advanced notice that the test was going to be conducted. The Commission therefore believes the information revealed in the nationwide EAS test signals that we should take action to ensure and enhance the security of the EAS and WEA. In the *NPRM,* the Commission acts to improve the security and reliability of the EAS and WEA by proposing and seeking comment on rules promoting the operational readiness of EAS equipment, improving awareness of unauthorized access to EAS equipment, communications systems, or services, protecting the nation's alerting systems through the development, implementation, and certification of a cybersecurity risk management plan and displaying only valid WEA messages on mobile devices.

3. The *NPRM* includes specific proposals upon which the Commission seeks comment include: requiring EAS Participants and Participating CMS Providers to annually certify to having a cybersecurity risk management plan in place and employing sufficient security controls to ensure the confidentiality, integrity, and availability of their respective alerting systems (including certain baseline security controls); requiring EAS Participants to report any incident of unauthorized access of their EAS equipment, communications systems, or services (*i.e.,* regardless of whether that compromise has resulted in the transmission of a false alert) to the Commission via NORS within 72 hours of when it knew or should have known that an incident has occurred, and provide details concerning the incident and requiring that mobile devices only present WEA alerts from valid base stations. In addition, the Commission seeks comment on whether and how to promote the operational readiness of EAS. The Commission also

seeks comment to refresh the record on previously proposed changes to the WEA infrastructure functionality rules, and on how our proposals in the *NPRM* may promote or inhibit advances in diversity, equity, inclusion, and accessibility, as well as on the scope of the Commission's relevant legal authority.

B. Legal Basis

4. The proposed action is authorized pursuant to sections 1, 2, 4(i), 4(n), 301, 303(b), 303(g), 303(r), 303(v), 307, 309, 335, 403, 624(g), and 706 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 152, 154(i), 154(n), 301, 303(b), 303(g), 303(r), 303(v), 307, 309, 335, 403, 544(g), and 606; The Warning, Alert and Response Network (WARN) Act, WARN Act sections 602(a), (b), (c), (f), 603, 604, and 606, 47 U.S.C. 1202(a),(b),(c), (f), 1203, 1204 and 1206; the Wireless Communications and Public Safety Act of 1999, Pub. L. 106–81, 47 U.S.C. 615, 615a, 615b; Section 202 of the Twenty-First Century Communications and Video Accessibility Act of 2010, as amended, 47 U.S.C. 613.

C. Description and Estimate of the Number of Small Entities to Which the Proposed Rules Will Apply

5. The RFA directs agencies to provide a description of and, where feasible, an estimate of, the number of small entities that may be affected by the proposed rules, if adopted. The RFA generally defines the term ''small entity'' as having the same meaning as the terms ''small business,'' ''small organization,'' and ''small governmental jurisdiction.'' In addition, the term ''small business'' has the same meaning as the term ''small business concern'' under the Small Business Act. A ''small business concern'' is one which: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the Small Business Administration (SBA).

6. *Small Businesses, Small Organizations, Small Governmental Jurisdictions.* Our actions, over time, may affect small entities that are not easily categorized at present. We therefore describe here, at the outset, three broad groups of small entities that could be directly affected herein. First, while there are industry specific size standards for small businesses that are used in the regulatory flexibility analysis, according to data from the SBA's Office of Advocacy, in general a small business is an independent business having fewer than 500 employees. These types of small businesses represent 99.9% of all businesses in the United States, which translates to 32.5 million businesses.

7. Next, the type of small entity described as a ''small organization'' is generally ''any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.'' The Internal Revenue Service (IRS) uses a revenue benchmark of $50,000 or less to delineate its annual electronic filing requirements for small exempt organizations. Nationwide, for tax year 2020, there were approximately 447,689 small exempt organizations in the U.S. reporting revenues of $50,000 or less according to the registration and tax data for exempt organizations available from the IRS.

8. Finally, the small entity described as a ''small governmental jurisdiction'' is defined generally as ''governments of cities, counties, towns, townships, villages, school districts, or special districts, with a population of less than fifty thousand.'' U.S. Census Bureau data from the 2017 Census of Governments indicate that there were 90,075 local governmental jurisdictions consisting of general purpose governments and special purpose governments in the United States. Of this number there were 36,931 general purpose governments (county, municipal and town or township) with populations of less than 50,000 and 12,040 special purpose governments—independent school districts with enrollment populations of less than 50,000. Accordingly, based on the 2017 U.S. Census of Governments data, we estimate that at least 48,971 entities fall into the category of ''small governmental jurisdictions.''

9. *Wireless Telecommunications Carriers (except Satellite).* This industry comprises establishments engaged in operating and maintaining switching and transmission facilities to provide communications via the airwaves. Establishments in this industry have spectrum licenses and provide services using that spectrum, such as cellular services, paging services, wireless internet access, and wireless video services. The SBA size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms in this industry that operated for the entire year. Of that number, 2,837 firms employed fewer than 250 employees. Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31, 2020, there were 797 providers that reported they were engaged in the provision of wireless services. Of these providers, the Commission estimates that 715 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

10. *Broadband Personal Communications Service.* The broadband personal communications services (PCS) spectrum encompasses services in the 1850–1910 and 1930–1990 MHz bands. The closest industry with a SBA small business size standard applicable to these services is Wireless Telecommunications Carriers (*except* Satellite). The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

11. Based on Commission data as of November 2021, there were approximately 5,060 active licenses in the Broadband PCS service. The Commission's small business size standards with respect to Broadband PCS involve eligibility for bidding credits and installment payments in the auction of licenses for these services. In auctions for these licenses, the Commission defined ''small business'' as an entity that, together with its affiliates and controlling interests, has average gross revenues not exceeding $40 million for the preceding three years, and a ''very small business'' as an entity that, together with its affiliates and controlling interests, has had average annual gross revenues not exceeding $15 million for the preceding three years. Winning bidders claiming small business credits won Broadband PCS licenses in C, D, E, and F Blocks.

12. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small

under the SBA's small business size standard.

13. *Narrowband Personal Communications Services.* Narrowband Personal Communications Services (*Narrowband PCS*) are PCS services operating in the 901–902 MHz, 930–931 MHz, and 940–941 MHz bands. PCS services are radio communications that encompass mobile and ancillary fixed communication that provide services to individuals and businesses and can be integrated with a variety of competing networks. Wireless Telecommunications Carriers (*except* Satellite) is the closest industry with a SBA small business size standard applicable to these services. The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

14. According to Commission data as of December 2021, there were approximately 4,211 active *Narrowband PCS* licenses. The Commission's small business size standards with respect to *Narrowband PCS* involve eligibility for bidding credits and installment payments in the auction of licenses for these services. For the auction of these licenses, the Commission defined a ''small business'' as an entity that, together with affiliates and controlling interests, has average gross revenues for the three preceding years of not more than $40 million. A ''very small business'' is defined as an entity that, together with affiliates and controlling interests, has average gross revenues for the three preceding years of not more than $15 million. Pursuant to these definitions, 7 winning bidders claiming small and very small bidding credits won approximately 359 licenses. One of the winning bidders claiming a small business status classification in these *Narrowband PCS* license auctions had an active license as of December 2021.

15. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

16. *Wireless Communications Services.* Wireless Communications Services (WCS) can be used for a variety of fixed, mobile, radiolocation, and digital audio broadcasting satellite services. Wireless spectrum is made available and licensed for the provision of wireless communications services in several frequency bands subject to Part 27 of the Commission's rules. Wireless Telecommunications Carriers (*except* Satellite) is the closest industry with a SBA small business size standard applicable to these services. The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

17. The Commission's small business size standards with respect to WCS involve eligibility for bidding credits and installment payments in the auction of licenses for the various frequency bands included in WCS. When bidding credits are adopted for the auction of licenses in WCS frequency bands, such credits may be available to several types of small businesses based average gross revenues (small, very small and entrepreneur) pursuant to the competitive bidding rules adopted in conjunction with the requirements for the auction and/or as identified in the designated entities section in Part 27 of the Commission's rules for the specific WCS frequency bands.

18. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

19. *700 MHz Guard Band Licensees.* The 700 MHz Guard Band encompasses spectrum in 746–747/776–777 MHz and 762–764/792–794 MHz frequency bands. Wireless Telecommunications Carriers (*except* Satellite) is the closest industry with a SBA small business size standard applicable to licenses providing services in these bands. The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

20. According to Commission data as of December 2021, there were approximately 224 active 700 MHz Guard Band licenses. The Commission's small business size standards with respect to 700 MHz Guard Band licensees involve eligibility for bidding credits and installment payments in the auction of licenses. For the auction of these licenses, the Commission defined a ''small business'' as an entity that, together with its affiliates and controlling principals, has average gross revenues not exceeding $40 million for the preceding three years, and a ''very small business'' an entity that, together with its affiliates and controlling principals, has average gross revenues that are not more than $15 million for the preceding three years. Pursuant to these definitions, five winning bidders claiming one of the small business status classifications won 26 licenses, and one winning bidder claiming small business won two licenses. None of the winning bidders claiming a small business status classification in these 700 MHz Guard Band license auctions had an active license as of December 2021.

21. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as

small under the SBA's small business size standard.

22. *Lower 700 MHz Band Licenses.* The lower 700 MHz band encompasses spectrum in the 698–746 MHz frequency bands. Permissible operations in these bands include flexible fixed, mobile, and broadcast uses, including mobile and other digital new broadcast operation; fixed and mobile wireless commercial services (including FDD- and TDD-based services); as well as fixed and mobile wireless uses for private, internal radio needs, two-way interactive, cellular, and mobile television broadcasting services. Wireless Telecommunications Carriers (*except* Satellite) is the closest industry with a SBA small business size standard applicable to licenses providing services in these bands. The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

23. According to Commission data as of December 2021, there were approximately 2,824 active Lower 700 MHz Band licenses. The Commission's small business size standards with respect to Lower 700 MHz Band licensees involve eligibility for bidding credits and installment payments in the auction of licenses. For auctions of Lower 700 MHz Band licenses the Commission adopted criteria for three groups of small businesses. A very small business was defined as an entity that, together with its affiliates and controlling interests, has average annual gross revenues not exceeding $15 million for the preceding three years, a small business was defined as an entity that, together with its affiliates and controlling interests, has average gross revenues not exceeding $40 million for the preceding three years, and an entrepreneur was defined as an entity that, together with its affiliates and controlling interests, has average gross revenues not exceeding $3 million for the preceding three years. In auctions for Lower 700 MHz Band licenses seventy-two winning bidders claiming a small business classification won 329 licenses, twenty-six winning bidders claiming a small business classification won 214 licenses, and three winning bidders claiming a small business classification won all five auctioned licenses.

24. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

25. *Upper 700 MHz Band Licenses.* The upper 700 MHz band encompasses spectrum in the 746–806 MHz bands. Upper 700 MHz D Block licenses are nationwide licenses associated with the 758–763 MHz and 788–793 MHz bands. Permissible operations in these bands include flexible fixed, mobile, and broadcast uses, including mobile and other digital new broadcast operation; fixed and mobile wireless commercial services (including FDD- and TDD-based services); as well as fixed and mobile wireless uses for private, internal radio needs, two-way interactive, cellular, and mobile television broadcasting services. Wireless Telecommunications Carriers (*except* Satellite) is the closest industry with a SBA small business size standard applicable to licenses providing services in these bands. The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of that number, 2,837 firms employed fewer than 250 employees. Thus, under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

26. According to Commission data as of December 2021, there were approximately 152 active Upper 700 MHz Band licenses. The Commission's small business size standards with respect to Upper 700 MHz Band licensees involve eligibility for bidding credits and installment payments in the auction of licenses. For the auction of these licenses, the Commission defined a ''small business'' as an entity that, together with its affiliates and controlling principals, has average gross revenues not exceeding $40 million for the preceding three years, and a ''very small business'' an entity that, together with its affiliates and controlling principals, has average gross revenues that are not more than $15 million for the preceding three years. Pursuant to these definitions, three winning bidders claiming very small business status won five of the twelve available licenses.

27. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

28. *Advanced Wireless Services (AWS)—(1710–1755 MHz and 2110–2155 MHz bands (AWS–1); 1915–1920 MHz, 1995–2000 MHz, 2020–2025 MHz and 2175–2180 MHz bands (AWS–2); 2155–2175 MHz band (AWS–3); 2000–2020 MHz and 2180–2200 MHz (AWS–4).* Spectrum is made available and licensed in these bands for the provision of various wireless communications services. Wireless Telecommunications Carriers (*except* Satellite) is the closest industry with a SBA small business size standard applicable to these services. The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus, under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

29. According to Commission data as December 2021, there were approximately 4,472 active AWS licenses. The Commission's small business size standards with respect to AWS involve eligibility for bidding credits and installment payments in the auction of licenses for these services. For the auction of AWS licenses, the Commission defined a ''small business'' as an entity with average annual gross revenues for the preceding three years not exceeding $40 million, and a ''very small business'' as an entity with average annual gross revenues for the preceding three years not exceeding $15 million. Pursuant to these definitions,

57 winning bidders claiming status as small or very small businesses won 215 of 1,087 licenses. In the most recent auction of AWS licenses 15 of 37 bidders qualifying for status as small or very small businesses won licenses.

30. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

31. *Broadband Radio Service and Educational Broadband Service.* Broadband Radio Service systems, previously referred to as Multipoint Distribution Service (MDS) and Multichannel Multipoint Distribution Service (MMDS) systems, and ''wireless cable,'' transmit video programming to subscribers and provide two-way high speed data operations using the microwave frequencies of the Broadband Radio Service (BRS) and Educational Broadband Service (EBS) (previously referred to as the Instructional Television Fixed Service (ITFS)). Wireless cable operators that use spectrum in the BRS often supplemented with leased channels from the EBS, provide a competitive alternative to wired cable and other multichannel video programming distributors. Wireless cable programming to subscribers resembles cable television, but instead of coaxial cable, wireless cable uses microwave channels.

32. In light of the use of wireless frequencies by BRS and EBS services, the closest industry with a SBA small business size standard applicable to these services is Wireless Telecommunications Carriers (*except* Satellite). The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

33. According to Commission data as December 2021, there were approximately 5,869 active BRS and EBS licenses. The Commission's small business size standards with respect to BRS involves eligibility for bidding credits and installment payments in the auction of licenses for these services. For the auction of BRS licenses, the Commission adopted criteria for three groups of small businesses. A very small business is an entity that, together with its affiliates and controlling interests, has average annual gross revenues exceed $3 million and did not exceed $15 million for the preceding three years, a small business is an entity that, together with its affiliates and controlling interests, has average gross revenues exceed $15 million and did not exceed $40 million for the preceding three years, and an entrepreneur is an entity that, together with its affiliates and controlling interests, has average gross revenues not exceeding $3 million for the preceding three years. Of the ten winning bidders for BRS licenses, two bidders claiming the small business status won 4 licenses, one bidder claiming the very small business status won three licenses and two bidders claiming entrepreneur status won six licenses. One of the winning bidders claiming a small business status classification in the BRS license auction has an active licenses as of December 2021.

34. The Commission's small business size standards for EBS define a small business as an entity that, together with its affiliates, its controlling interests and the affiliates of its controlling interests, has average gross revenues that are not more than $55 million for the preceding five (5) years, and a very small business is an entity that, together with its affiliates, its controlling interests and the affiliates of its controlling interests, has average gross revenues that are not more than $20 million for the preceding five (5) years. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

35. *The Educational Broadcasting Services.* Cable-based educational broadcasting services fall under the broad category of the Wired Telecommunications Carriers industry. The Wired Telecommunications Carriers industry comprises establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired telecommunications networks. Transmission facilities may be based on a single technology or a combination of technologies. Establishments in this industry use the wired telecommunications network facilities that they operate to provide a variety of services, such as wired telephony services, including VoIP services; wired (cable) audio and video programming distribution; and wired broadband internet services.

36. The SBA small business size standard for this industry classifies businesses having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms in this industry that operated for the entire year. Of this total, 2,964 firms operated with fewer than 250 employees. Thus, under this size standard, the majority of firms in this industry can be considered small. Additionally, according to Commission data as of December 2021, there were 4,477 active EBS licenses. The Commission estimates that the majority of these licenses are held by non-profit educational institutions and school districts and are likely small entities.

37. *Radio and Television Broadcasting and Wireless Communications Equipment Manufacturing.* This industry comprises establishments primarily engaged in manufacturing radio and television broadcast and wireless communications equipment. Examples of products made by these establishments are: transmitting and receiving antennas, cable television equipment, GPS equipment, pagers, cellular phones, mobile communications equipment, and radio and television studio and broadcasting equipment. The SBA small business size standard for this industry classifies businesses having 1,250 employees or less as small. U.S. Census Bureau data for 2017 show that there were 656 firms in this industry that operated for the entire year. Of this number, 624 firms had fewer than 250 employees. Thus, under the SBA size

standard, the majority of firms in this industry can be considered small.

38. *Software Publishers.* This industry comprises establishments primarily engaged in computer software publishing or publishing and reproduction. Establishments in this industry carry out operations necessary for producing and distributing computer software, such as designing, providing documentation, assisting in installation, and providing support services to software purchasers. These establishments may design, develop, and publish, or publish only. The SBA small business size standard for this industry classifies businesses having annual receipts of $41.5 million or less as small. U.S. Census Bureau data for 2017 indicate that 7,842 firms in this industry operated for the entire year. Of this number 7,226 firms had revenue of less than $25 million. Based on this data, we conclude that a majority of firms in this industry are small.

39. *Noncommercial Educational (NCE) and Public Broadcast Stations.* Noncommercial educational broadcast stations and public broadcast stations are television or radio broadcast stations which under the Commission's rules are eligible to be licensed by the Commission as a noncommercial educational radio or television broadcast station and are owned and operated by a public agency or nonprofit private foundation, corporation, or association; or are owned and operated by a municipality which transmits only noncommercial programs for education purposes.

40. The SBA small business size standards and U.S. Census Bureau data classify radio stations and television broadcasting separately and both categories may include both noncommercial and commercial stations. The SBA small business size standard for both radio stations and television broadcasting classify firms having $41.5 million or less in annual receipts as small. For Radio Stations, U.S. Census Bureau data for 2017 show that 1,879 of the 2,963 firms that operated during that year had revenue of less than $25 million per year. For Television Broadcasting, U.S. Census Bureau data for 2017 show that 657 of the 744 firms that operated for the entire year had revenue of less than $25,000,000. While the U.S. Census Bureau data does not indicate the number of non-commercial stations, we estimate that under the applicable SBA size standard the majority of noncommercial educational broadcast stations and public broadcast stations are small entities.

41. According to Commission data as of March 31, 2022, there were 4,503 licensed noncommercial educational radio and television stations. In addition, the Commission estimates as of March 31, 2022, there were 384 licensed noncommercial educational (NCE) television stations, 383 Class A TV stations, 1,840 LPTV stations and 3,231 TV translator stations. The Commission does not compile and otherwise does not have access to financial information for these stations that permit it to determine how many stations qualify as small entities under the SBA small business size standards. However, given the nature of these services, we will presume that all noncommercial educational and public broadcast stations qualify as small entities under the above SBA small business size standards.

42. *Radio Stations.* This industry is comprised of ''establishments primarily engaged in broadcasting aural programs by radio to the public.'' Programming may originate in their own studio, from an affiliated network, or from external sources. The SBA small business size standard for this industry classifies firms having $41.5 million or less in annual receipts as small. U.S. Census Bureau data for 2017 show that 2,963 firms operated in this industry during that year. Of this number, 1,879 firms operated with revenue of less than $25 million per year. Based on this data and the SBA's small business size standard, we estimate a majority of such entities are small entities.

43. The Commission estimates that as of March 31, 2022, there were 4,508 licensed commercial AM radio stations and 6,763 licensed commercial FM radio stations, for a combined total of 11,271 commercial radio stations. Of this total, 11,269 stations (or 99.98%) had revenues of $41.5 million or less in 2021, according to Commission staff review of the BIA Kelsey Inc. Media Access Pro Database (BIA) on June 1, 2022, and therefore these licensees qualify as small entities under the SBA definition. In addition, the Commission estimates that as of March 31, 2022, there were 4,119 licensed noncommercial (NCE) FM radio stations, 2,049 low power FM (LPFM) stations, and 8,919 FM translators and boosters. The Commission however does not compile, and otherwise does not have access to financial information for these radio stations that would permit it to determine how many of these stations qualify as small entities under the SBA small business size standard. Nevertheless, given the SBA's large annual receipts threshold for this industry and the nature of these radio station licensees, we presume that all of these entities qualify as small entities under the above SBA small business size standard.

44. We note, however, that in assessing whether a business concern qualifies as ''small'' under the above definition, business (control) affiliations must be included. Our estimate, therefore, likely overstates the number of small entities that might be affected by our action, because the revenue figure on which it is based does not include or aggregate revenues from affiliated companies. In addition, another element of the definition of ''small business'' requires that an entity not be dominant in its field of operation. We are unable at this time to define or quantify the criteria that would establish whether a specific radio or television broadcast station is dominant in its field of operation. Accordingly, the estimate of small businesses to which the rules may apply does not exclude any radio or television station from the definition of a small business on this basis and is therefore possibly over-inclusive. An additional element of the definition of ''small business'' is that the entity must be independently owned and operated. Because it is difficult to assess these criteria in the context of media entities, the estimate of small businesses to which the rules may apply does not exclude any radio or television station from the definition of a small business on this basis and similarly may be over-inclusive.

45. *FM Translator Stations and Low-Power FM Stations.* FM translators and Low Power FM Stations are classified in the industry for Radio Stations. The Radio Stations industry comprises establishments primarily engaged in broadcasting aural programs by radio to the public. Programming may originate in their own studio, from an affiliated network, or from external sources. The SBA small business size standard for this industry classifies firms having $41.5 million or less in annual receipts as small. U.S. Census Bureau data for 2017 show that 2,963 firms operated during that year. Of that number, 1,879 firms operated with revenue of less than $25 million per year. Therefore, based on the SBA's size standard we conclude that the majority of FM Translator stations and Low Power FM Stations are small. Additionally, according to Commission data, as of March 31, 2022, there were 8,919 FM Translator Stations and 2,049 Low Power FM licensed broadcast stations. The Commission however does not compile and otherwise does not have access to information on the revenue of these stations that would permit it to

determine how many of the stations would qualify as small entities. For purposes of this regulatory flexibility analysis, we presume the majority of these stations are small entities.

46. *Television Broadcasting.* This industry is comprised of ''establishments primarily engaged in broadcasting images together with sound.'' These establishments operate television broadcast studios and facilities for the programming and transmission of programs to the public. These establishments also produce or transmit visual programming to affiliated broadcast television stations, which in turn broadcast the programs to the public on a predetermined schedule. Programming may originate in their own studio, from an affiliated network, or from external sources. The SBA small business size standard for this industry classifies businesses having $41.5 million or less in annual receipts as small. 2017 U.S. Census Bureau data indicate that 744 firms in this industry operated for the entire year. Of that number, 657 firms had revenue of less than $25,000,000. Based on this data we estimate that the majority of television broadcasters are small entities under the SBA small business size standard.

47. The Commission estimates that as of March 31, 2022, there were 1,373 licensed commercial television stations. Of this total, 1,280 stations (or 93.2%) had revenues of $41.5 million or less in 2021, according to Commission staff review of the BIA Kelsey Inc. Media Access Pro Television Database (BIA) on June 1, 2022, and therefore these licensees qualify as small entities under the SBA definition. In addition, the Commission estimates as of March 31, 2022, there were 384 licensed noncommercial educational (NCE) television stations, 383 Class A TV stations, 1,840 LPTV stations and 3,231 TV translator stations. The Commission however does not compile, and otherwise does not have access to financial information for these television broadcast stations that would permit it to determine how many of these stations qualify as small entities under the SBA small business size standard. Nevertheless, given the SBA's large annual receipts threshold for this industry and the nature of these television station licensees, we presume that all of these entities qualify as small entities under the above SBA small business size standard.

48. *Cable and Other Subscription Programming.* The U.S. Census Bureau defines this industry as establishments primarily engaged in operating studios and facilities for the broadcasting of programs on a subscription or fee basis. The broadcast programming is typically narrowcast in nature (*e.g.,* limited format, such as news, sports, education, or youth-oriented). These establishments produce programming in their own facilities or acquire programming from external sources. The programming material is usually delivered to a third party, such as cable systems or direct-to-home satellite systems, for transmission to viewers. The SBA small business size standard for this industry classifies firms with annual receipts less than $41.5 million as small. Based on U.S. Census Bureau data for 2017, 378 firms operated in this industry during that year. Of that number, 149 firms operated with revenue of less than $25 million a year and 44 firms operated with revenue of $25 million or more. Based on this data, the Commission estimates that the majority of firms operating in this industry are small.

49. *Cable System Operators (Rate Regulation Standard).* The Commission has developed its own small business size standard for the purpose of cable rate regulation. Under the Commission's rules, a ''small cable company'' is one serving 400,000 or fewer subscribers nationwide. Based on industry data, there are about 420 cable companies in the U.S. Of these, only seven have more than 400,000 subscribers. In addition, under the Commission's rules, a ''small system'' is a cable system serving 15,000 or fewer subscribers. Based on industry data, there are about 4,139 cable systems (headends) in the U.S. Of these, about 639 have more than 15,000 subscribers. Accordingly, the Commission estimates that the majority of cable companies and cable systems are small.

50. *Cable System Operators (Telecom Act Standard).* The Communications Act of 1934, as amended, contains a size standard for a ''small cable operator,'' which is ''a cable operator that, directly or through an affiliate, serves in the aggregate fewer than one percent of all subscribers in the United States and is not affiliated with any entity or entities whose gross annual revenues in the aggregate exceed $250,000,000.'' For purposes of the Telecom Act Standard, the Commission determined that a cable system operator that serves fewer than 677,000 subscribers, either directly or through affiliates, will meet the definition of a small cable operator based on the cable subscriber count established in a 2001 Public Notice. Based on industry data, only six cable system operators have more than 677,000 subscribers. Accordingly, the Commission estimates that the majority of cable system operators are small under this size standard. We note however, that the Commission neither requests nor collects information on whether cable system operators are affiliated with entities whose gross annual revenues exceed $250 million. Therefore, we are unable at this time to estimate with greater precision the number of cable system operators that would qualify as small cable operators under the definition in the Communications Act.

51. *Satellite Telecommunications.* This industry comprises firms ''primarily engaged in providing telecommunications services to other establishments in the telecommunications and broadcasting industries by forwarding and receiving communications signals via a system of satellites or reselling satellite telecommunications.'' Satellite telecommunications service providers include satellite and earth station operators. The SBA small business size standard for this industry classifies a business with $35 million or less in annual receipts as small. U.S. Census Bureau data for 2017 show that 275 firms in this industry operated for the entire year. Of this number, 242 firms had revenue of less than $25 million. Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31, 2020, there were 71 providers that reported they were engaged in the provision of satellite telecommunications services. Of these providers, the Commission estimates that approximately 48 providers have 1,500 or fewer employees. Consequently using the SBA's small business size standard, a little more than of these providers can be considered small entities.

52. *All Other Telecommunications.* This industry is comprised of establishments primarily engaged in providing specialized telecommunications services, such as satellite tracking, communications telemetry, and radar station operation. This industry also includes establishments primarily engaged in providing satellite terminal stations and associated facilities connected with one or more terrestrial systems and capable of transmitting telecommunications to, and receiving telecommunications from, satellite systems. Providers of internet services (*e.g.* dial-up ISPs) or voice over internet protocol (VoIP) services, via client-supplied telecommunications connections are also included in this industry. The SBA small business size standard for this industry classifies firms with annual receipts of $35 million or less as small. U.S. Census Bureau data for 2017 show that there

were 1,079 firms in this industry that operated for the entire year. Of those firms, 1,039 had revenue of less than $25 million. Based on this data, the Commission estimates that the majority of ''All Other Telecommunications'' firms can be considered small.

53. *Direct Broadcast Satellite (''DBS'') Service.* DBS service is a nationally distributed subscription service that delivers video and audio programming via satellite to a small parabolic ''dish'' antenna at the subscriber's location. DBS is included in the Wired Telecommunications Carriers industry which comprises establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired telecommunications networks. Transmission facilities may be based on a single technology or combination of technologies. Establishments in this industry use the wired telecommunications network facilities that they operate to provide a variety of services, such as wired telephony services, including VoIP services, wired (cable) audio and video programming distribution; and wired broadband internet services. By exception, establishments providing satellite television distribution services using facilities and infrastructure that they operate are included in this industry.

54. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that 3,054 firms operated in this industry for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Based on this data, the majority of firms in this industry can be considered small under the SBA small business size standard. According to Commission data however, only two entities provide DBS service—DIRECTV (owned by AT&T) and DISH Network, which require a great deal of capital for operation. DIRECTV and DISH Network both exceed the SBA size standard for classification as a small business. Therefore, we must conclude based on internally developed Commission data, in general DBS service is provided only by large firms.

D. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements for Small Entities

55. We expect the actions proposed in the *NPRM,* if adopted, will impose additional reporting, recordkeeping and/or other compliance obligations on small as well as other entities who are EAS Participants and Participating CMS Providers. More specifically, if adopted, EAS Participants and Participating CMS Providers would be required to annually certify to creating, updating, and implementing a cybersecurity risk management plan to ensure the confidentiality, integrity, and availability of their respective alerting systems. The cybersecurity risk management plan must contain among other things, a description of how organizational resources are employed to ensure the confidentiality, integrity, and availability of the alerting system. Further, any incident involving the unauthorized access to EAS equipment, communications systems, or services, regardless of whether the event resulted in the transmission of a false alert would require EAS Participants to report the unauthorized access to the Commission within 72 hours of when the EAS Participant knew or should have known that an incident has occurred. The Commission also seeks comment on whether and how to strengthen the operational readiness of the EAS.

56. In assessing the cost of compliance with our proposed rule to create a cybersecurity risk management plan, we estimate the cost for each small EAS Participant and each Participating CMS Providers to be approximately $820. These costs are based on 10 hours of labor at $82 an hour and apply to all EAS Participants and Participating CMS Providers not just small entities. We anticipate however, that many small EAS Participants and Participating CMS Providers will not require 10 hours to develop or update a cybersecurity risk management plan tailored to the size of their organization. The cost for reporting an unauthorized access incident we believe would be similar to the cost of reporting a false alert, which the Commission has estimated to have a total cost of $11,600 per year across 290 EAS Participants. This total cost when apportioned to each EAS Participant comes out to approximately $40 per EAS Participant.

57. We estimate a $9.2 million one-time cost for all Participating CMS Providers, not just small providers, to update the WEA standards and software necessary to comply with our proposed rule that Participating CMS Providers transmit sufficient authentication information to allow mobile devices to present WEA alerts only if they come from valid base stations. This figure consists of approximately a $500,000 cost to update applicable WEA standards and approximately an $8.7 million cost to update applicable software. We quantify the cost of modifying standards as the annual compensation for 30 network engineers compensated at the national average for their field ($85,816/year; $41.26/hour), plus annual benefits ($26,775/year; 12.87/hour) working for the amount of time that it takes to develop a standard (one hour every other week for one year, 26 hours) for 12 distinct standards. We quantify the cost of modifying software as the annual compensation for a software engineer compensated at the national average for their field ($86,998/year), plus annual benefits ($27,143/year) working for the amount of time that it takes to develop software (one year) at each of the 76 CMS Providers that participate in WEA.

58. At this time the Commission cannot quantify the cost of compliance for small entities to comply with the other proposals or approaches on which it seeks comment in the *NPRM.* We believe that the modifications to improve and enhance the security of the EAS that we discuss in the *NPRM* are the most efficient and least burdensome approach and do not believe small entities will have to hire professionals to meet the requirements discussed in the *NPRM,* if adopted. To help the Commission more fully evaluate the cost of compliance for small entities should our proposals be adopted, in the *NPRM,* we request comments on the cost implications of our proposals and ask whether there are more efficient and less burdensome alternatives (including cost estimates) for the Commission to consider. We expect the information we receive in comments including cost and benefit analyses, will help the Commission identify and evaluate relevant matters for small entities, including compliance costs and other burdens that may result from the proposals and inquiries we make in the *NPRM.*

E. Steps Taken To Minimize the Significant Economic Impact on Small Entities, and Significant Alternatives Considered

59. The RFA requires an agency to describe any significant, specifically small business alternatives that it has considered in reaching its proposed approach, which may include (among others) the following four alternatives: (1) the establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for such small entities; (3) the use of performance, rather than design, standards; and (4) and exemption from

coverage of the rule, or any part thereof, for such small entities.

60. The Commission has taken steps to minimize the impact of the proposals in the *NPRM* as a general matter, and specifically targeting small entities, has sought comment on the extent to which we can limit the overall economic impact of these proposed requirements if we provide increased flexibility for businesses classified as small under the SBA small business size standard. Below we discuss actions taken and alternatives considered by the Commission for the rules proposed promoting the operational readiness of EAS equipment, improving awareness of unauthorized access to EAS equipment, communications systems, and services, and requiring the development, implementation, and certification of a cybersecurity risk management plan.

61. To further the Commission's objectives to promote EAS equipment operational readiness, in the *NPRM* we seek comment on whether to require EAS Participants to repair EAS equipment with prompt and reasonable diligence, on whether the EAS Participants should notify the Commission of the status of their repairs, and, if so, on the timing, content, and means of that notification.

62. We seek comment on whether a compliance timeframe of 30 days from publication in the **Federal Register** of notice that the Office of Management and Budget (OMB) has completed its review of the modified information collection to improve the Commission's visibility into the repair or replacement of non-operational EAS equipment would not impose a burden on small entities. Small and other EAS Participants currently make entries in their broadcast station logs and cable system records showing the date and time equipment was removed and restored to service, and therefore already have processes and procedures in place to record information about the operational status of their EAS equipment in station logs that could be utilized for the proposed notification requirement. In the event that the Commission were to alternatively require this notification to be provided through NORS, the requirement would become effective within 30 days from publication in the **Federal Register** of notice that the OMB has approved the modified information collection or upon publication in the **Federal Register** of a Public Notice announcing that NORS is technically capable of receiving such notifications, whichever is later. Similarly, this requirement should not impose a burden on small entities for the reason stated above and since EAS Participants are already likely to be using NORS.

63. Our approach to improving awareness of unauthorized access to EAS equipment, communications systems, and services relies on our belief that significant public safety benefits will accrue if EAS Participants were required to provide the Commission with notification that their EAS equipment, communications systems, and services have been accessed without authorization, even in the absence of a subsequent transmission of a false alert. The reporting requirement we proposed in the *NPRM* requiring EAS Participants to provide notification to the Commission via NORS within 72 hours of when an EAS Participant knew or should have known that an incident has occurred should result in low marginal costs for small and other EAS participants since our requirement parallels the reporting obligations EAS Participants may have to other government agencies that require critical infrastructure sector entities to report cyber incidents. This would allow the requirement to be satisfied by reporting substantially similar information to another federal agency in a similar timeframe. We believe the cost to report unauthorized access is comparable to the cost of reporting false alerts which further supports our belief that these costs will be relatively low for small and other EAS Participants. In the *NPRM* we have requested comments and cost and benefit analyses on our proposal and beliefs. In addition, we have requested alternative proposals (accompanied by cost analyses) for unauthorized access reporting requirements that would be less costly for small and other EAS Participants while producing similar or greater benefits.

64. The requirement for EAS Participants to report any incident of unauthorized access of its EAS equipment, communications systems, or services would be effective 60 days from publication in the **Federal Register** of notice that the OMB has approved the modified information collection. Since we consider the requirement to report unauthorized access similar to the Commission's false alert reporting requirement, there are likely to be compliance synergies for small and other EAS Participants, and less of a burden than there would be in the absence of the similarity. We therefore seek comment in the *NPRM* on whether an EAS Participant's process for ascertaining whether an incident of unauthorized access of its EAS equipment, communications systems, or services has occurred and reporting it to the Commission entails a level of effort comparable to compliance with the Commission's false alert reporting requirement.

65. To further explore the impact of the cybersecurity risk management plan requirement proposed in the *NPRM* which requires small and other EAS Participants and Participating CMS Providers to create, implement, and annually update a cybersecurity risk management plan and submit an annual certification attesting to compliance with requirement, Commission seeks comment on steps that it could take to limit various burdens. In particular, the Commission requests comment on whether the steps that it describes for EAS Participants and Participating CMS Providers to submit their risk management plans are the most efficient way to implement a certification requirement. In the *NPRM,* we propose to afford each EAS Participant and Participating CMS Provider the flexibility to include content in its plan that is tailored to its organization, provided that the plan demonstrates how the EAS Participant or Participating CMS Provider identifies the cyber risks that they face, the controls they use to mitigate those risks, and how they ensure that these controls are applied effectively to their operations.

66. The Commission also proposes to require that each plan include security controls sufficient to ensure the confidentiality, integrity, and availability (CIA) of the EAS. While we believe there are numerous methods to satisfy this aspect of the requirement, we have proposed to allow the requirement to be satisfied by providing evidence of the successful implementation of an established set of cybersecurity best practices, such as applicable Center for internet Security (CIS) Critical Security Controls or the Cybersecurity & Infrastructure Security Agency (CISA) Cybersecurity Baseline. We believe adopting this flexible approach will allow EAS Participants and Participating CMS Providers to develop a plan that is appropriate for their organization's size and available resources, while still ensuring that the plan results in ongoing and material improvements in EAS and WEA security. The Commission anticipates that this flexibility will reduce the costs imposed on small business EAS Participants and Participating CMS Providers, which will have different cybersecurity needs than larger EAS Participants and Participating CMS Providers, respectively. We do note, however, that to ensure that every EAS

Participant implements a baseline of security controls, the Commission proposes to require that each plan include certain security measures: changing default passwords prior to operation, installing security updates in a timely manner, securing equipment behind properly configured firewalls or using other segmentation practices, requiring multifactor authentication where applicable, addressing the replacement of end-of-life equipment, and wiping, clearing, or encrypting user information before disposing of old devices.

67. The Commission proposes to require compliance with the requirement to implement a cybersecurity risk management plan and certification within twelve months of the publication in the **Federal Register** of notice that the OMB has approved the modified information collection. We recognize that larger EAS Participants are likely to already have cybersecurity risk management plans in place. We ask whether we should allow small entities a two-year timeframe to implement this requirement. The two-year timeframe should provide sufficient time for small EAS Participants and small Participating CMS Providers that do not already have a risk management plan in place to create one. The timeframe would also be sufficient to prepare their organizations to manage security and privacy risks, categorize their systems and the information being processed, stored, and transmitted, and select controls to protect their systems. Further, a two-year timeframe would provide time for these entities to implement the security controls that the plan describes, assess whether the controls are in place, operating as intended, and producing the desired results, appoint a senior official to authorize the system, and develop mechanisms to continuously monitor control implementation and risks to the system.

68. In the *NPRM,* the Commission identifies alternative approaches on several matters that might minimize the economic impact for small entities. For example, the Commission requests alternatives to providing a second notification to the Commission once repairs of EAS equipment have been completed, and the EAS Participant's EAS systems have been tested and determined to once again be fully functional. The Commission seeks comment on potential alternatives to, and additional aspects of, the discussed approach, as well as their accompanying costs and benefits. The Commission recommends that EAS Participants file the required notifications regarding EAS equipment failures and repairs in the NORS database, but requests comment on other means EAS Participants could use to submit the notifications such as via email to a designated email address.

69. The Commission expects to more fully consider the economic impact and alternatives for small entities following the review of comments filed in response to the *NPRM,* including costs and benefits analyses. Having data on the costs and economic impacts of proposals and approaches will allow the Commission to better evaluate options and alternatives for minimization of any significant economic impact on small entities as a result of the proposals and approaches raised in the *NPRM.* The Commission's evaluation of this information will shape the final alternatives it considers to minimize any significant economic impact that may occur on small entities, the final conclusions it reaches, and any final rules it promulgates in this proceeding.

F. Federal Rules That May Duplicate, Overlap, or Conflict With the Proposed Rules

70. None.

II. Notice of Proposed Rulemaking

A. Promoting the Operational Readiness of EAS Equipment

71. We observe that, according to the Bureau's last nationwide EAS test report, an appreciable number of EAS Participants were unable to participate in testing due to equipment failure—despite advance notice that such test was to take place—suggesting that equipment failures are not addressed by EAS Participants as swiftly as reasonably possible and that more needs to be done to improve EAS operational readiness. Today, EAS Participants may continue operations for a period of 60 days despite having defective equipment that preclude their participation in EAS. We seek comment on whether this approach is effective at ensuring the operational readiness of EAS. How frequently does EAS equipment encounter defects that prevent it from receiving or retransmitting alerts? What are the most common types of defects that are experienced? What steps are necessary to repair these defects, and how often do they typically take to repair? Do EAS Participants take prompt steps to repair their EAS equipment, or do they typically take several days or weeks before seeking repairs? Do other EAS stakeholders, such as alert originators, have concerns about equipment failures preventing the transmission of emergency alerts to the public? We encourage commenters to highlight any specific incidences in which an EAS equipment defect prevented members of the public from being alerted to an emergency.

72. We seek comment on how to better promote the operational readiness of EAS equipment. For example, instead of requiring repairs within 60 days, would it serve the public interest to require EAS Participants to conduct repairs promptly and with reasonable diligence? Are all EAS Participants already doing so? If so, what are the reasons why some EAS Participants are not able to conduct repairs promptly and diligently? What factors should we consider when determining whether repairs are made promptly and with reasonable diligence? What barriers prevent equipment from being repaired promptly and what steps can we take to remove those barriers?

73. Would it improve EAS operational readiness and public safety in general to increase the situational awareness of the Commission, alert originators, and others about the occurrence of equipment defects that might prevent alerts from reaching the public? For example, would such an approach allow us to better enforce our operational readiness rules and identify persistent technical problems, and make contingency plans for alert delivery? If so, should we adopt an EAS equipment defect notification requirement? For example, should we require EAS Participants to report EAS equipment defects and submit a follow-up notification when the equipment is repaired? Within what timeframe should they perform that notification to ensure that stakeholders are aware of possible impacts on EAS (*e.g.* 24 hours)? What content should the notification contain? For example, should notifications include the same information that is already included in requests for additional repair time that are required sent to the Regional Director of the FCC field office for the area that the EAS Participant serves? We seek comment on how, if at all, the Commission should share information to promote situational awareness among relevant stakeholders, such as alert originators State Emergency Communications Committees. We also seek comment on whether to treat this information as confidential and, if so, how to protect it. Are there other steps that we should take to better ensure that EAS is ready and available when it is needed?

74. We seek comment on any measures that the Commission could take to reduce burdens on EAS Participants if it were to take further

steps to promote the operational readiness of EAS equipment. Should we remove the requirement under § 11.35(b) that EAS Participants make entries in their own broadcast station log and cable system records showing the date and time the equipment was removed and restored to service? Would the elimination of the ''60 day'' rule in favor of a prompt repair rule reduce certain burdens on EAS Participants? We seek comments on the costs of any approaches to improving EAS operational readiness that commenters propose that we consider. In doing so, commenters should offer specific cost estimates where possible. For example, we seek comment on whether it would be reasonable to estimate that EAS Participants would transmit a maximum of 2,000 EAS equipment defect notifications annually under the approach discussed above, as 565 EAS Participants reported their equipment was defective during the 2021 Nationwide EAS Test? Would it be reasonable to estimate that 2,000 annual notifications would require one hour of labor each from a General and Operations Manager who is compensated at $82 per hour, resulting in an overall cost of $164,000? We seek similarly detailed analysis on potential alternatives to improve EAS operational readiness.

B. Improving Awareness of Unauthorized Access to EAS Equipment

75. Section 11.45(b) of the Commission's rules requires that an EAS Participant notify the Commission by email within 24 hours of its discovery that it has transmitted or otherwise sent a false alert to the public, including details concerning the event. We believe that it would be in the public interest to strengthen this rule in view of the increasing threats that cyber attacks pose to EAS networks and equipment. Accordingly, we propose to revise this rule to further require that an EAS Participant report any incident of unauthorized access of its EAS equipment (*i.e.,* regardless of whether that compromise has resulted in the transmission of a false alert), to the Commission via NORS within 72 hours of when it knew or should have known that an incident has occurred and provide details concerning the incident. We seek comment on this proposal.

76. We observe that protecting EAS equipment alone is unlikely to be sufficient to protect the EAS from a cyber attack. Even without directly accessing an EAS Participant's EAS equipment, a bad actor could send a false alert or prevent a legitimate alert with lifesaving information from reaching the public by gaining unauthorized access to EAS Participants' communications systems and services. For this reason, we also propose to require that an EAS Participant report any incident of unauthorized access to any aspects of an EAS Participant's communications systems and services that potentially could affect their provision of EAS. This would include infrastructure that serves to prevent unauthorized access to EAS equipment, including firewalls and Virtual Private Networks. We seek comment on this proposal and on any suitable alternatives.

77. We believe the proposed rule is justified in light of the instances of false EAS alerts in recent years, caused by compromised EAS equipment being used to transmit a false message. As recounted above, we are aware of several situations in the past decade in which bad actors were either capable of obtaining, or actually obtained unauthorized access to EAS equipment. We seek comment on these views. Are there any other past or present security incidents involving EAS about which the Commission should be aware? Does unauthorized access to EAS equipment provide bad actors with the ability to disrupt EAS Participants' regularly scheduled programming, which has the potential to inflict financial harm in relation to their advertisers and reputational harm with their audiences? Are there any other kinds of harms resulting from unauthorized access to EAS equipment that the Commission should consider?

78. We believe significant public safety benefits would accrue if EAS Participants were required to provide the Commission with notification that their EAS equipment, communications systems, or services have been accessed without authorization, even in the absence of a subsequent transmission of a false alert. This view is based on our observation that, after a system is compromised, many attackers will position themselves to attack connected systems in several different ways. For example, we have observed that it is characteristic of some cyber attacks that an attacker will start by compromising one device and then, prior to launching a specific attack, spend time and effort to identify and compromise other devices in the network, potentially using the initially comprised device as an access point to other devices. The Commission could use the proposed notifications to work with providers and other government agencies to resolve an equipment compromise before the compromise is actually exploited to cause false EAS transmissions in at least some instances. We further believe that the Commission could leverage information on the frequency and nature of equipment compromise to better understand the prevalence and trends associated such attacks across the nation. The Commission and its government partners would thus be better apprised of the risks posed to EAS and in a position to use this information to inform further measures that might be necessary to secure EAS.

79. We seek comment on these views, including detailed information as to the associated costs and benefits of the proposed approach. For example, what would be a reasonable estimate of the financial harm that such a cyber attack would inflict upon an EAS Participant, and how should such estimates be calculated? We believe the cost of reporting an unauthorized access incident would tend to be similar to the cost of reporting a false alert, which the Commission has estimated to have a total cost of $11,600 per year across all EAS Participants. We seek comment on that estimate. Are EAS Participants already conducting investigations and gathering information about suspected incidents of unauthorized access to EAS equipment, communications systems, and services? Are there less costly alternatives to an unauthorized access reporting requirement that would achieve similar or greater benefits? We believe that the marginal costs of an unauthorized access reporting requirement are likely to be low, as the requirement parallels the requirements of an upcoming CISA rulemaking. Specifically, CISA is required by the Cyber Incident Reporting for Critical Infrastructure Act of 2022 (CIRCIA) to adopt rules requiring critical infrastructure sector entities to report cyber incidents, but allows the requirement to be satisfied by reporting substantially similar information to another federal agency in a similar timeframe. We seek comment on that belief.

80. We propose to define ''unauthorized access'' to EAS equipment, communications systems, and services for the purposes of today's proposal to refer to any incident involving either remote or local access to EAS equipment, communications systems, or services by an individual or other entity that either does not have permission to access the equipment or exceeds their authorized access. We seek comment on this definition. For example, does this proposed definition mirror the methods that have been, and are likely to be, used by cyber-attackers to infiltrate EAS? We seek comment on whether it is appropriate to require that

EAS Participants provide notification to the Commission within 72 hours of when they knew or should have known that an incident has occurred. Is this time frame appropriate or would it, for example, put undue pressure on EAS Participants at a critical time when they may be attempting to fully diagnose and resolve the compromise to their systems? On the other hand, is this time frame too slow to provide the Commission and government partners with timely notice of an incident? For example, consistent with the NORS reporting deadlines for interconnected VoIP outages, should the Commission be notified within 24 hours of a reasonable belief that an incident has occurred? In the alternative, should we require EAS Participants to provide notification to the Commission within 72 hours of ''its reasonable belief that an incident has occurred,'' consistent with the approach to cyber incident reporting outlined by CIRCIA? Or, would this approach create disincentives for a provider to monitor the security of its own network? Would any alternative approach be more effective? Similar to what is contemplated by CIRCIA, should EAS Participants be required to submit updates to the Commission if substantial new or different information becomes available, until the date that the Commission is notified that the incident has concluded and been fully mitigated and resolved? Is the overall approach we propose today consistent with the incident reporting requirements of other federal and state government agencies, and if not, how should our proposal be harmonized to be more consistent with those requirements?

81. We seek comment on the kinds of information that should be included in reports of unauthorized access. We propose that reports include, to the extent it is applicable and available at the time of reporting, the date range of the incident, a description of the unauthorized access, the impact to the EAS Participant's EAS operational readiness, a description of the vulnerabilities exploited and the techniques used to access the device, identifying information for each actor responsible for the incident, and contact information for the EAS Participant. We believe this information is necessary to understand the unauthorized access incident, resolve it before the compromise is actually exploited to send a false alert, and harmonize our requirements with those of other federal agencies. We seek comment on the proposed content of these reports and whether it should be modified. We propose that the contents of these reports be treated as presumptively confidential and only shared on a confidential basis with other Federal agencies and state government agencies that agree to protect them to the same extent and in the same manner as the Commission would and, to the extent that the policies or regulations of those agencies are stricter, to the same extent and in the same manner as they would if they had collected the information themselves. We also propose to allow disclosure by the Commission, or by parties with whom the Commission has shared the notifications, of anonymized information about breaches that might be useful for industry, security researchers, policymakers, and the general public. We seek comment on this approach to cyber incident information sharing.

82. We seek comment on how these reports should be submitted to the Commission. Should they be submitted to the FCC Operation Center by email, in similar fashion to the false alert reports that EAS Participants are already required to file with the Commission? Should these reports be submitted in NORS to better capture the required contents in clearly defined fields and more easily facilitate sharing with federal partners? Or should we develop a new electronic database to collect the content of the reports? Are there other approaches we should consider? What are the costs and benefits associated with each approach? We seek comment on whether Participating CMS Providers should also be required to report incidents of unauthorized access to their WEA systems, or services. Similar to EAS, we believe that such a requirement would allow the Commission and its government partners to better identify and evaluate risks posed to EAS and inform further measures that might be necessary to secure WEA. Should reports be required in the same timeframe and with the same content as proposed for EAS? Are there any differences between EAS and WEA that would warrant differing unauthorized access reporting requirements for WEA? If so, what are those differences and how should the requirements be modified to reflect them?

C. Protecting the Nation's Alerting Systems Through the Development, Implementation, and Certification of a Cybersecurity Risk Management Plan

1. EAS Security

83. As discussed above, the EAS has faced cybersecurity risks for more than a decade, with PSHSB regularly advising EAS Participants to follow cybersecurity best practices and take other steps to improve their cybersecurity posture. Despite these admonitions, however, we have not observed meaningful security improvements. For example, PSHSB has frequently advised EAS Participants to update their EAS software to ensure that they have installed the most recent security patches, including one such round of outreach in 2020 after the discovery that certain EAS equipment was potentially vulnerable to IP-based attacks. However, in filings related to the Nationwide EAS Test in August 2021, the Bureau observed that more than 5,000 EAS Participants were using outdated software or using equipment that no longer supported regular software updates. In light of these failures, we believe the Commission should take action to ensure the security of EAS.

84. We propose to require EAS Participants to submit an annual certification attesting that they have created, updated, and implemented a cybersecurity risk management plan. The cybersecurity risk management plan would describe how the EAS Participant employs their organizational resources and processes to ensure the confidentiality, integrity, and availability of the EAS. The plan must discuss how the EAS Participant identifies the cyber risks that they face, the controls they use to mitigate those risks, and how they ensure that these controls are applied effectively to their operations. We believe that this certification requirement would improve the overall security of EAS by ensuring that EAS Participants are regularly taking steps to address security threats as part of their organization's day-to-day strategic and operational planning. We also believe the creation and implementation of cybersecurity risk management plans would help to ensure EAS operational readiness and eliminate false alerts, which divert public safety and other government resources from other important activities, impose costs on EAS Participants that have to deal with many of the consequences and, ultimately, desensitize the public to legitimate alerts. We seek comment on this proposal. Do stakeholders agree this proposal would improve the security of the EAS? Are there other benefits that may accrue from the creation and implementation of cybersecurity risk management plans by EAS Participants? Is an annual certification the right frequency with which to file certifications, or are there circumstances

where more (or less) frequent filings might be necessary?

85. We propose to afford each EAS Participant flexibility to structure its plan in a manner that is tailored to its organization, provided that the plan demonstrate that the EAS Participant is taking affirmative steps to analyze security risks and improve its security posture. While we believe there are many ways for EAS Participants to satisfy this requirement, we propose that EAS Participants can successfully demonstrate that they have satisfied this requirement by structuring their plans to follow an established risk management framework, such as the National Institute of Standards and Technology (NIST) Risk Management Framework or the NIST Cybersecurity Framework. We believe this flexible approach would allow EAS Participants to develop a plan that is appropriate for their organization's size and available resources, while still ensuring that the plan results in ongoing and material improvements in EAS security. We also anticipate that this requirement would reduce the costs imposed on smaller EAS Participants, which may have different cybersecurity needs than larger EAS Participants. We seek comment on this proposal. Alternatively, should we require EAS Participants to structure their plans to follow the NIST Risk Management Framework or the NIST Cybersecurity Framework? If so, should we require EAS Participants to follow the current version of each framework (*i.e.,* Risk Management Framework for Information Systems and Organizations, NIST Special Publication 800–37, Revision 2; NIST Cybersecurity Framework V1.1)? If we take this approach, we anticipate that NIST may one day release updated versions of these frameworks, and we would then expect to seek notice and comment on whether we should require EAS Participants to follow the updated versions. We seek comment on this approach.

86. We propose that each cybersecurity risk management framework include security controls sufficient to ensure the confidentiality, integrity, and availability (CIA) of the EAS. We expect that reasonable security measures will include measures that are commonly the subject of best practices. While we believe there are potentially many ways for EAS Participants to satisfy this aspect of the requirement, we propose that EAS Participants will have satisfied it if they demonstrate they have successfully implemented an established set of cybersecurity best practices, such as applicable CIS Critical Security Controls or the CISA Cybersecurity Baseline. To ensure that every EAS Participant implements a baseline of security controls, however, we propose to require that each plan include security measures that address changing default passwords prior to operation, installing security updates in a timely manner, securing equipment behind properly configured firewalls or using other segmentation practices, requiring multifactor authentication where applicable, addressing the replacement of end-of-life equipment, and wiping, clearing, or encrypting user information before disposing of old devices. We expect that compliant cybersecurity risk management plans will not be limited to only these specific measures, as plans will vary based on individual providers' needs and circumstances and will need regular updates to keep up with an evolving threat environment. We seek comment on these proposed rules. Are there other specific security measures that we should require EAS Participants to implement? For example, should we require EAS Participants to conduct network security audits or vulnerability assessments to identify potential security vulnerabilities? If so, how often should they be conducted? Should we require EAS Participants to report to the Commission when their network audits, network vulnerability assessments, or penetration testing reports reveal critical vulnerabilities? If so, how should we define a ''critical vulnerability'' for this purpose? Should we require EAS Participants to implement Incident Response Plans that describe how the procedures that EAS Participants would follow when respond to an ongoing cybersecurity incident? Should we require EAS Participants to conduct cybersecurity training for their employees or contractors and if so, what should the contents of that training be? What kinds of security measures have EAS Participants already implemented to protect the EAS, and how effective are they at mitigating cybersecurity risks? Should we require EAS Participants to keep records that demonstrate how they have implemented each of the baseline security controls? If so, what specific types of information should the records include and for how long should they be kept? Have EAS Participants identified unsuccessful attempts to access their systems, and if so, what specific security measures best thwarted those attempts?

87. Does this approach strike the appropriate balance between improving EAS security, complementing EAS Participants' existing cybersecurity activities, and reducing burdens on small EAS Participants? If not, how should this requirement be modified to achieve that balance? We seek comment on whether this approach grants too much flexibility and will not result in improvements to EAS security. We also seek comment on alternative approaches that would be effective at improving EAS security. For example, should we require EAS Participants to address a specified list of cybersecurity subject matters in their risk management plans? Instead of requiring the use of a risk management plan, should we require EAS Participants to take specific steps to secure their EAS equipment? If so, could such a requirement be drafted in a way to encourage EAS Participants to continually examine and improve their cybersecurity posture, rather than merely check items off a list? Is our proposed certification requirement too burdensome on small EAS Participants? If so, what would be a more cost-effective way to promote EAS security for small EAS Participants?

88. We observe that protecting EAS equipment alone is unlikely to be sufficient to protect the EAS from a cyber attack. In addition to the risk of a bad actor sending a false alert, a bad actor could attack other elements of an EAS Participant's systems or service as a way to prevent a legitimate alert with lifesaving information from reaching the public. For this reason, we propose to require that the cybersecurity risk management plan address not only the security of EAS equipment, but also the security of all aspects of an EAS Participant's communications systems and services that potentially could affect their provision of EAS. We seek comment on this requirement. Are there alternative requirements that we should consider to ensure that bad actors cannot prevent the transmission of legitimate alerts (or engage in the transmission of false ones)?

89. We seek comment on whether there are industry groups, cybersecurity organizations, or other organizations that may be positioned to help EAS Participants create, implement, and maintain their cybersecurity risk management plan. What kinds of resources do these organizations offer, and how can EAS Participants make use of them? For example, are there organizations that offer, or that would be able to begin offering, authoritative sources of cybersecurity information and expertise? Are there organizations that can support EAS Participants by offering cybersecurity training, risk management plan templates, or otherwise promote the cybersecurity? If so, to what extent can these

organizations help reduce the burdens related to the proposed certification requirement and make EAS more secure?

90. We propose that EAS Participants certify to creating, annually updating, and implementing a cybersecurity risk management plan by checking a box as part of its annual filing of EAS Test Reporting System Form One. We seek comment on whether this is the most efficient way to implement a certification requirement for EAS Participants. If not, how should the certification be implemented? While the Commission does not intend to review each individual plan for sufficiency, we propose that the cybersecurity risk management plan be made available to the Commission upon request so that the Commission may review a specific plan as needed or proactively review a sample of EAS Participants' plans to ensure that they are sufficient to ensure the confidentiality, integrity, and availability of the EAS. In such circumstances, cybersecurity risk management plans would be treated as presumptively confidential. We propose to delegate to the Bureau the authority to request review of such cybersecurity risk management plans and to evaluate them for sufficiency. We seek comment on this approach to evaluating plans. For how long we should require EAS Participants to retain prior versions of their cybersecurity risk management plans to enable the Bureau's review?

91. We propose that the filing of, and subsequent compliance with, a cybersecurity risk management plan would not serve as a safe harbor or excuse or any other diminishment of responsibility for negligent security practices. We believe that allowing the filing of and compliance with a plan to have such an effect could create a perverse incentive. EAS Participants must remain constantly vigilant in preventing intrusions and can only satisfy that responsibility by acting reasonably in all circumstances. Any negligence in protecting the confidentially, integrity, and availability of EAS that results in transmission of false alerts or non-transmission of valid EAS messages would establish a violation of that duty, regardless of the content of the plan. Furthermore, we propose that an EAS Participant's failure to sufficiently develop or implement their plan, would be treated as a violation of the proposed rules. We seek comment on the criteria or indicia that we should consider when determining whether a plan is insufficient to mitigate cyber risk. We also seek comment on any measures that the Commission should take to verify whether EAS Participants have implemented of their plans.

92. We believe that the benefits of this proposal outweigh the costs. While we believe that it is impossible to quantify the precise dollar value of improvements to the public's safety, life, and health, as a general matter, we nonetheless believe that very substantial public safety benefits will result from the rules we propose today: EAS will be better able to ensure that real alerts with lifesaving information are successfully delivered to the public and false alerts are prevented in order to preserve public trust and better ensure that the public takes appropriate action during real emergencies. As a consequence, we anticipate that the rule changes we adopt today will yield substantial life-saving benefits. Independent of that analysis, the Commission has previously found that ''a foreign adversary's access to American communications networks could result in hostile actions to disrupt and surveil our communications networks, impacting our nation's economy generally and online commerce specifically, and result in the breach of confidential data.'' Consistent with the Commission's past analysis, our national gross domestic product was nearly $23 trillion last year, adjusting for inflation. Accordingly, if creating and implementing a cybersecurity risk management plan prevents even a 0.005% disruption to our economy, we believe our proposed requirement would generate $1.15 billion in benefits. Likewise, the digital economy accounted for $3.31 trillion of our economy in 2020, and so we believe preventing a disruption of even 0.05% would produce benefits of $1.66 billion. As a check on our analysis, consider the impact of existing malicious cyber activity on the U.S. economy: $57 billion to $109 billion in 2016. Given the incentives and documented actions of hostile nation-state actors, reducing this activity (or preventing an expansion of such damage) by even 1% would produce benefits of $0.57 billion to $1.09 billion. Given this analysis, we believe the benefits of our rule to the American economy, commerce, and consumers are likely to significantly and substantially outweigh the costs of the proposed certification requirement. We seek comment on this analysis. Is there a more appropriate way to quantify these benefits? Are there any additional ways in which the proposed rules would benefit the public that the Commission should consider?

93. We estimate that the overall cost of our proposed cybersecurity risk management plan requirement will be approximately $21 million. We believe that EAS Participants will, on average, require 10 hours annually to initially draft a plan and then update the plan and submit their certification annually. When developing this average we anticipate that many large EAS Participants already have cybersecurity risk management plans and will incur only *de minimis* costs to comply with this requirement. We also anticipate that many small EAS Participants will require less than 10 hours to develop or update a plan that is appropriate to the size of their organization. Based on this estimate, we believe that the overall cost for 25,644 EAS Participants to comply with the proposed certification requirement with 10 hours of labor from a General and Operations Manager who is compensated at $82 per hour will be $21,028,080. We seek comment on our analysis.

2. WEA Security

94. We propose to require Participating CMS Providers to certify that they are creating, annually updating, and implementing a cybersecurity risk management plan. As discussed above, WEA also faces security risks related to the transmission of false alerts and compromise of a Participating CMS Providers' systems could disrupt the transmission of a legitimate WEA message. Are there additional cybersecurity risks to WEA about which we should be aware? To what extent do Participating CMS Providers already have cybersecurity risk management plans? We believe that the approach we propose above in the context of EAS—wherein we would afford flexibility for providers to assess what content should be in their cybersecurity risk management plans while proposing that it demonstrate how the provider identifies the cyber risks that they face, the controls they use to mitigate those risks, and how they ensure that these controls are applied effectively to their operations—lends itself to WEA as well. We seek comment on this tentative conclusion. Are there any fundamental differences in the transmission of WEA alerts or the threats that WEA faces that would require a different approach to ensuring WEA's security? We seek comment on the least burdensome means by which Participating CMS Providers could submit their certification to the Commission, including via the Commission's Electronic Comment Filing System, a designated Commission email address, or a WEA-specific database designed for this purpose.

95. As with the EAS, we propose that a cybersecurity risk management plan

should include security controls sufficient to ensure the confidentiality, integrity, and availability of WEA. We propose sufficient security measures could be demonstrated by implementing controls like the CISA Cybersecurity Baseline or appropriate CIS Implementation Group. As with EAS Participants as described above we propose to require that each plan include a baseline of security measures that address changing default passwords prior to operation, installing security updates in a timely manner, securing equipment behind properly configured firewalls or using other segmentation practices, requiring multifactor authentication where applicable, addressing the replacement of end-of-life equipment, and wiping, clearing, or encrypting user information before disposing of old devices. We expect that compliant cybersecurity risk management plans will not be limited to only these specific measures, as plans will need regular updates to keep up with an evolving threat environment. We seek comment on these proposed rules. Are there specific security measures that we should require Participating CMS Providers to implement? For example, as above, we seek comment on whether we should require Participating CMS Providers to conduct network security audits or vulnerability assessments to identify potential security vulnerabilities, implement Incident Response Plans that describe the procedures that Participating CMS Providers would follow when responding to an ongoing cybersecurity incident, or require Participating CMS Providers to conduct cybersecurity training for their employees or contractors.

96. We believe that the benefits of this proposal for WEA outweighs the costs. As discussed above for EAS, we believe that the rules we propose today would better ensure that real WEA alerts with lifesaving information are successfully delivered to the public and false alerts are prevented in order to preserve public trust and better ensure that the public takes appropriate action during real emergencies. We estimate that the overall cost of our proposed cybersecurity risk management plan requirement will be approximately $62,320. We anticipate that many large Participating CMS Providers already have cybersecurity risk management plans and will incur only *de minimis* costs to comply with this requirement. We also anticipate that many small Participating CMS Providers will require less than 10 hours to develop or update a plan that is appropriate to the size of their organization. Based on this estimate, we believe that the overall cost for 76 Participating CMS Providers to comply with the proposed certification requirement with 10 hours of labor from a General and Operations Manager who is compensated at $82 per hour will be $62,320. We seek comment on this analysis. To what extent do Participating CMS Providers already implement a cybersecurity risk management framework? Are there alternatives that would be as effective but less burdensome, particularly to smaller providers? As with EAS above, we seek comment on whether there are industry groups, cybersecurity organizations, or other organizations that may be positioned to help Participating CMS providers create, implement, and maintain their cybersecurity risk management plans. What kinds of resources do these organizations offer, and how can Participating CMS providers make use of them?

97. We seek comment on whether there are other categories of communications service providers (*e.g.,* services that support 911 calling) to which a cybersecurity risk management plan certification requirement should apply. Like emergency alerting, 911 is part of the nation's emergency services critical infrastructure. Similarly, like the nation's alert and warning capability, 911 service has faced instances of compromise by cyberattacks, and is regularly under threat. In light of those threats, should services that support 911 calling also be required to annually certify to creating, updating, and implementing cybersecurity risk management plans? If so, are there differences between emergency alerting and 911 that would warrant changes to the risk management plan requirements we propose today, if applied to services that support 911 calling? Are the benefits and costs of such a requirement commensurate with the benefits and costs of certification as described above?

D. Displaying Only Valid WEA Messages on Mobile Devices

98. False alerts, such as the false ballistic missile alert that the Hawaii Emergency Management Agency accidentally sent during a training exercise in 2018, can cause panic, confusion, and damage the credibility of WEA. While that false alert was sent accidentally, bad actors could potentially exploit known WEA vulnerabilities to intentionally send false alerts to the public. The Commission's rules require Participating CMS Providers' network infrastructure to authenticate interactions with mobile devices and require mobile devices to authenticate interactions with CMS Provider infrastructure. In practice, however, the security handshake between Participating CMS Providers and mobile devices does not include a process for mobile devices to ensure that the base station to which it attaches is valid. As a result, mobile devices that are not actively engaged with a valid base station are vulnerable to receiving and presenting false alerts. This threat exists when a mobile device attempts authentication with the provider, switches base stations, or returns to active from idle mode.

99. Accordingly, we propose to require Participating CMS Providers transmit sufficient authentication information to allow mobile devices to present WEA alerts only if they come from valid base stations. Ongoing work in international standards bodies suggests that Participating CMS Providers could achieve this outcome by transmitting sufficient authentication information to allow mobile devices to authenticate either the alert or the base station itself. For example, Participating CMS Providers could provide for authentication of the base station using a unique identifier or an encryption key. To what extent do Participating CMS Providers already uniquely identify legitimate base stations with a selection of base station characteristics to defend against denial-of-service attacks and fraud (*i.e.,* through base station fingerprinting)? Could Participating CMS Providers leverage base station fingerprinting to protect the public from false WEA alerts through updates to WEA standards and mobile device firmware? Alternatively, or in addition, could WEA-capable mobile devices receive an appropriate encryption key from the network and then use that key to confirm either that an alert is authentic or that the base station transmitting it is authentic before presenting the alert? Should our rules prohibit CMS Providers and equipment manufacturers from marketing devices as WEA-capable unless they have these technical capabilities?

100. We seek comment on the trade-offs attendant to available technological approaches to protecting the public from false alerts. Could implementation of these approaches affect the ability of non-service initialized WEA-capable mobile devices, SIM-less WEA-capable mobile devices, or mobile devices that are no longer contractually associated with a CMS Provider to receive WEA alerts depending on the handset technology or generation of wireless network used? If so, how could the

Commission mitigate these potential drawbacks by refining its proposed rules? To the extent that technological solutions have been implemented, is it still possible for a false alert of this type to be displayed on mobile devices, and if so, under what conditions? What steps could be taken to further minimize or eliminate these kinds of false alerts?

101. We estimate that Participating CMS Providers would incur a $14.5 million one-time cost to update the WEA standards and software necessary to comply with this requirement. This figure consists of approximately a $814,000 cost to update applicable WEA standards and approximately a $13.7 million cost to update applicable software. We quantify the cost of modifying standards as the annual compensation for 30 network engineers compensated at the national average for their field ($120,650/year; $58/hour), plus annual benefits ($60,325/year; 29/hour) working for the amount of time that it takes to develop a standard (one hour every other week for one year, 26 hours) for 12 distinct standards. We quantify the cost of modifying software as the annual compensation for a software developer compensated at the national average for their field ($120,990/year), plus annual benefits ($60,495/year) working for the amount of time that it takes to develop software (one year) at each of the 76 CMS Providers that participate in WEA. We seek comment on these cost estimates and the underlying cost methodology we are using. We also seek comment on any other costs and benefits that would result from this proposal. Incidents of false WEA alerts can cause significant confusion and diminish the public's trust in emergency alerts. For example, what harms could arise if an invalid base station sends a false alert to attendees to a public event, such as a parade or sporting event? For each technological approach considered, we urge commenters to address its effectiveness and cost of implementation, any additional latency that the measure could introduce into the delivery of WEA alerts, and the potential for the security measure to result in the suppression of legitimate alert content.

E. WEA Infrastructure Functionality

102. Pursuant to the WARN Act, CMS Providers' participation in WEA is voluntary, but CMS Providers that elect to participate in WEA must comply with all the WEA rules. The WEA rules provide that WEA functionality, both in Participating CMS Providers' networks and in mobile devices, ''are dependent upon the capabilities of the delivery technologies implemented by a Participating CMS Provider'' and certain WEA protocols ''are defined and controlled by each Participating CMS Provider.'' The inclusion of these statements may create the mistaken impression that Participating CMS Providers' compliance with the rules that follow, including the base station authentication rules we propose today, would be conditioned on the Participating CMS Providers' delivery technology. Emergency management agencies expect WEA to work as intended and when needed, and this language unintentionally could create uncertainties about the quality of WEA service that Participating CMS Providers offer. For these reasons, the Commission proposed to remove this language from the WEA rules in 2016. T-Mobile, ATIS, and CTIA, the only three commenters addressing this proposal, urged the Commission not to adopt it because ''the rules should maximize the technological flexibility of CMS Providers participating in WEA.'' In the ten years since WEA's deployment, however, Participating CMS Providers have coalesced around cell broadcast as the wireless technology used to transmit WEA alerts to capable mobile devices, and ATIS has standardized system performance.

103. Accordingly, we seek to refresh the record on our proposal to remove these statements from the WEA rules. We believe these provisions introduce confusion and are unnecessary, particularly as we do not expect that any Participating CMS Provider would need to make changes to their WEA service as a result of this proposed amendment. We seek comment on this proposal, particularly from any CMS Provider that would need to make changes to their WEA offerings in the event that the rules were so amended.

F. Promoting Digital Equity

104. The Commission, as part of its continuing effort to advance digital equity for all, including people of color, persons with disabilities, persons who live in rural or Tribal areas, and others who are or have been historically underserved, marginalized, or adversely affected by persistent poverty or inequality, invites comment on any equity-related considerations and benefits (if any) that may be associated with the proposals and issues discussed herein. Specifically, we seek comment on how our proposals may promote or inhibit advances in diversity, equity, inclusion, and accessibility, as well the scope of the Commission's relevant legal authority.

G. Compliance Timeframes

105. *Promoting the Operational Readiness of EAS Equipment.* To the extent that we adopt requirements to improve the operational readiness of EAS, we seek comment on when those rules should go into effect. For example, if we were to adopt rules to hasten or improve the Commission's visibility into the repair or replacement of non-operational EAS equipment, should those rules go into effect 30 days from publication in the **Federal Register** of notice that the Office of Management and Budget has completed its review of the modified information collection? What factors should we consider when determining when alternative operational readiness requirements should go into effect?

106. *Improving Awareness of Unauthorized Access to EAS Equipment.* We propose that the revision of § 11.45 to require EAS Participants to report any incident of unauthorized access of their EAS equipment would be effective 60 days from publication in the **Federal Register** of notice that the Office of Management and Budget has completed its review of the modified information collection. We seek comment on this proposed timeframe. In the NDAA21 R&O, the Commission required EAS Participants to report false alerts to the Commission and, in a subsequent Public Notice, announced a compliance deadline approximately 60 days from publication in the **Federal Register** of notice that the Office of Management and Budget has approved the modified information collection. We seek comment on whether an EAS Participant's process for ascertaining whether an incident of unauthorized access of its EAS equipment has occurred and reporting it to the Commission entails a level of effort comparable to compliance with the Commission's false alert reporting requirement. Would EAS Participants' compliance with the Commission's false alert reporting requirement reduce the incremental burden of compliance with this proposal?

107. *Certifying to the Implementation of Cybersecurity Risk Management Plans.* We propose that EAS Participants and Participating CMS Providers must certify to the implementation of a cybersecurity risk management plan that includes measures sufficient to ensure the confidentiality, integrity, and reliability of their respective alerting systems within 12 months of the publication in the **Federal Register** of notice that the Office of Management and Budget has completed its review of the modified information collection. A

12-month timeframe would be intended to provide time for EAS Participants that do not already have a risk management plan in place to create one, including by preparing the organization to manage security and privacy risks, categorizing the systems and the information that it processes, stores, and transmits, and selecting controls to protect the system. A 12-month timeframe could also provide time to implement the security controls that the plan describes, assess whether the controls are in place, operating as intended, and producing the desired results, appoint a senior official to authorize the system, and develop mechanisms to continuously monitor control implementation and risks to the system. We seek comment on these proposals. Should we offer EAS Participants and Participating CMS Providers who are small businesses an additional 12 months to comply with this requirement, with compliance required within 24 months of publication in the **Federal Register** of notice that the Office of Management and Budget has completed its review of the modified information collection? Is there any reason why EAS and Participating CMS Providers should have different implementation timeframes?

108. *Displaying Only Valid WEA Messages on Mobile Devices.* We propose that CMS Providers transmit sufficient authentication information to allow mobile devices to present WEA alerts only if they come from valid base stations 30 months from the publication of these rules in the **Federal Register**. The record in our WEA proceedings supports the premise that Participating CMS Providers require 12 months to work through appropriate industry bodies to publish relevant standards, another 12 months for Participating CMS Providers and mobile device manufacturers to develop, test, and integrate software upgrades consistent with those standards, and then 6 more months to deploy this new technology to the field during normal technology refresh cycles. We seek comment on the applicability of this approach and timeframe, with which Participating CMS Providers have experience, to this proposal. We seek comment, in the alternative, on whether the urgent public safety need to protect the public from false alerts necessitates an expedited compliance timeframe and, if so, what that compliance timeframe should be.

109. *WEA Infrastructure Functionality.* We propose to remove language from our WEA infrastructure and mobile device rules effective 30 days after the rules' publication in the **Federal Register**. We do not believe that Participating CMS Providers will need to make any changes to comply with these rules as revised because they offer a WEA service that is consistent with the rules as otherwise written. We seek comment on this compliance timeframe and on this view.

III. Ordering Clauses

110. Accordingly, *it is ordered* that pursuant to sections 1, 2, 4(i), 4(n), 301, 303(b), 303(g), 303(r), 303(v), 307, 309, 335, 403, 624(g), and 706 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 152, 154(i), 154(n), 301, 303(b), 303(g), 303(r), 303(v), 307, 309, 335, 403, 544(g), and 606; The Warning, Alert and Response Network (WARN) Act, WARN Act sections 602(a), (b), (c), (f), 603, 604, and 606, 47 U.S.C. 1202(a), (b), (c), (f), 1203, 1204 and 1206; the Wireless Communications and Public Safety Act of 1999, Public Law 106–81, 47 U.S.C. 615, 615a, 615b; Section 202 of the Twenty-First Century Communications and Video Accessibility Act of 2010, as amended, 47 U.S.C. 613, this Notice of Proposed Rulemaking *is* hereby *ADOPTED*.

Proposed Rules

For the reasons discussed in this preamble, the Federal Communications Commission proposes to amend 47 CFR parts 10 and 11 as follows:

PART 10—WIRELESS EMERGENCY ALERTS

■ 1. The authority citation for part 10 continues to read as follows:

Authority: 47 U.S.C. 151, 154(i) and (o), 201, 303(r), 403, and 606, 1202(a), (b), (c), (f), 1203, 1204, and 1206.

■ 2. Revise § 10.330 to read as follows:

§ 10.330 Provider infrastructure requirements.

This section specifies the general functions that a Participating CMS Provider is required to perform within its infrastructure.

(a) Distribution of Alert Messages to mobile devices.

(b) Authentication of interactions with mobile devices, including the transmission of sufficient authentication information to allow mobile devices to only present WEA alerts from valid base stations.

(c) Reference Points D & E. Reference Point D is the interface between a CMS Provider gateway and its infrastructure. Reference Point E is the interface between a provider's infrastructure and mobile devices including air interfaces.

■ 3. Add § 10.360 to subpart C to read as follows:

§ 10.360 Cybersecurity Risk Management Plan Certification.

(a) Each participating CMS Provider shall submit a certification to the Commission that it has created, annually updated, and implemented a cybersecurity risk management plan. The cybersecurity risk management plan shall describe how the Participating CMS Provider employs its organizational resources and processes to ensure the confidentiality, integrity, and availability of WEA. The plan shall discuss how the Participating CMS Provider identifies the cyber risks that it faces, the controls it uses to mitigate those risks, and how it ensures that these controls are applied effectively to its operations. The plan shall address the security of all aspects of the Participating CMS Provider's communications systems and services that potentially could affect its provision of WEA messages. The plan shall be made available to the Commission upon request.

(b) Participating CMS Providers shall employ sufficient security controls to ensure the confidentially, integrity, and availability of the EAS. In furtherance of this requirement, the cybersecurity risk management plan shall address, but not be limited to, the following security controls:

(1) Changing default passwords prior to operation;

(2) Installing security updates in a timely manner;

(3) Securing equipment behind properly configured firewalls or using other segmentation practices;

(4) Requiring multifactor authentication where applicable;

(5) Addressing the replacement of end-of-life equipment; and

(6) Wiping, clearing, or encrypting user information before disposing of old devices.

(c) Participating CMS Providers shall take reasonable measures to protect the confidentiality, integrity, and availability of EAS to avoid the transmission of false alerts or non-transmission of valid Alert Messages;

failure to do so shall be, in addition to a violation of any specific provisions of this section, § 11.45(a) of this chapter, or § 10.520(d), an independent breach of this duty.

■ 4. Revise § 10.500 introductory text as follows:

§ 10.500 General requirements.

Mobile devices are required to perform the following functions:

* * * * *

PART 11—EMERGENCY ALERT SYSTEM (EAS)

■ 5. The authority citation for part 11 continues to read as follows:

Authority: 47 U.S.C. 151, 154 (i) and (o), 303(r), 544(g), 606, 1201, 1206.

■ 6. Amend § 11.35 by adding paragraph (d) to read as follows:

§ 11.35 Equipment operational readiness.

* * * * *

(d) Annual EAS Security Certification.

(1) The identifying information required by the ETRS as specified in § 11.61(a)(3)(iv) shall include a Certification to the Commission that the EAS Participant has created, annually updated, and implemented a cybersecurity risk management plan. The cybersecurity risk management plan shall describe how the EAS Participant employs its organizational resources and processes to ensure the confidentiality, integrity, and availability of the EAS. The plan shall discuss how the EAS Participant identifies the cyber risks that its faces, the controls it uses to mitigate those risks, and how it ensures that these controls are applied effectively to their operations. The plan shall address the security of all aspects of an EAS Participant's communications systems and services that potentially could affect its provision of EAS messages. The plan shall be made available to the Commission upon request.

(2) EAS Participants shall employ sufficient security controls to ensure the confidentially, integrity, and availability of the EAS. In furtherance of this requirement, the cybersecurity risk management plan shall address, but not be limited to, the following security controls:

(i) Changing default passwords prior to operation;

(ii) Installing security updates in a timely manner;

(iii) Securing equipment behind properly configured firewalls or using other segmentation practices;

(iv) Requiring multifactor authentication where applicable;

(v) Addressing the replacement of end-of-life equipment; and

(vi) Wiping, clearing, or encrypting user information before disposing of old devices.

(3) EAS Participants shall take reasonable measures to protect the confidentiality, integrity, and availability of EAS to avoid the transmission of false alerts or non-transmission of valid EAS messages; failure to do so shall be, in addition to a violation of any specific provisions of this section, § 11.45(a), or § 10.520(d) of this chapter, an independent breach of this duty.

■ 7. Amend § 11.45 by redesignating paragraph (c) as paragraph (d) and adding a new paragraph (c) to read as follows:

§ 11.45 Prohibition of false or deceptive EAS transmissions.

* * * * *

(c) No later than seventy-two (72) hours after an EAS Participant knows or should have known that its EAS equipment, or communications systems, or services that potentially could affect their provision of EAS, have been accessed in an unauthorized manner, the EAS Participant shall provide notification to the Commission identifying, if applicable, the date range of the incident, a description of the unauthorized access, the impact to the EAS Participant's EAS operational readiness, a description of the vulnerabilities exploited and the techniques used to access the device, identifying information for each actor responsible for the incident, and contact information for the EAS Participant. When one event or set of events gives rise to obligations under both paragraphs (b) and (c) of this section, an EAS Participant remains subject to each requirement individually. The Participant may elect to send a single notification to the Commission within 24 hours providing all the information described in both paragraphs or separate notification to the Commission within 24 hours and 72 hours.

BILLING CODE 6712–01–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

[Docket No. FWS–R6–ES–2012–0107; FF09E21000 FXES11110900000 234]

Endangered and Threatened Wildlife and Plants; Request for New Information for the North American Wolverine Species Status Assessment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Request for new information.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), notify the public that we are requesting new information to update the Species Status Assessment (SSA) for the North American Wolverine (*Gulo gulo luscus*) occurring in the contiguous United States to make a final determination whether to list this species under the Endangered Species Act of 1973, as amended (Act). As a result of court action, the wolverine is now proposed for listing as a threatened species under the Act. The Service is updating the 2018 SSA and will reevaluate whether the North American wolverine occurring in the contiguous United States is a distinct population segment and, if so, whether the distinct population segment meets the definition of an endangered or threatened species under the Act. We now request new information regarding the North American wolverine to inform our SSA update and reevaluation under the Act. As directed by the court, the Service is to make a final listing determination by the end of November 2023.

DATES: In order to fully consider and incorporate new information, the Service requests submittal of new information by close of business December 23, 2022. Information submitted electronically using the Federal eRulemaking Portal (see **ADDRESSES**, below) must be received by 11:59 p.m. eastern time on the closing date.

ADDRESSES:

Document availability: You may obtain copies of the 2013 proposed rule, the 2018 SSA report, and other supporting documents on the internet at *https://ecos.fws.gov/ecp/species/5123* or at *https://www.regulations.gov* at Docket No. FWS–R6–ES–2012–0107 or by mail or email from the Region 1 Ecological Services Regional Office (see **FOR FURTHER INFORMATION CONTACT**).

Submission of information: You may submit written information by one of the following methods:

(1) *Electronically:* Go to the Federal eRulemaking Portal: *https://www.regulations.gov* and search for Docket No. FWS–R6–ES–2012–0107.

(2) *By hard copy:* Submit by U.S. mail to: Public Comments Processing, Attn: FWS–R6–ES–2012–0107, U.S. Fish and Wildlife Service, MS: PRB/3W, 5275 Leesburg Pike, Falls Church, VA 22041–3803.

We request that you send new information only by the methods described above. We will post all new information received on *https://www.regulations.gov.* This generally means that we will post any personal information you provide us (see the Information Requested section below for more information).

FOR FURTHER INFORMATION CONTACT: Jodi Bush, Deputy Assistant Regional Director, Ecological Services, Region 1, U.S. Fish and Wildlife Service, 911 Northeast 11th Avenue, Portland, Oregon 97232; telephone: 503–231–2256; email: *jodi_bush@fws.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION:

Background

Species Information

On February 4, 2013, we published a proposed rule to list the distinct population segment (DPS) of wolverine occurring in the contiguous United States as a threatened species under the Act, with a proposed rule under section 4(d) of the Act that outlined the prohibitions considered necessary and advisable for the conservation of the wolverine (78 FR 7864; hereafter referred to as the ''2013 proposed rule''). Please refer to the 2013 proposed rule and the 2018 Species Status Assessment (SSA) for the North American Wolverine (*Gulo gulo luscus*) for information about the wolverine's taxonomy; life history; requirements for habitat, space, and food; densities; status in Canada and Alaska; geographic range delineation complexities; distribution; and habitat relationships and distribution. The SSA report can be found at *https://www.regulations.gov* at Docket No. FWS–R6–ES–2016–0106 or *https://ecos.fws.gov/ecp/species/5123.*

Previous Federal Actions

Please refer to the 2013 proposed rule for a detailed description of Federal actions concerning the wolverine prior to 2013. On October 31, 2013 (78 FR 65248), we reopened the comment period on the 2013 proposed rule. On February 5, 2014 (79 FR 6874), we extended our final determination date and reopened the comment period on the 2013 proposed rule. On August 13, 2014 (79 FR 47522), we withdrew the 2013 proposed rule based on our conclusion that the factors affecting the DPS were not as significant as believed at the time of publication of the proposed rule. That 2014 withdrawal decision was challenged and ultimately vacated by court order in 2016 (*Defenders of Wildlife* v. *Jewell,* No. 9:14–cv–00246–DLC, Doc108 (D. Mont. April 4, 2016)). Following the court's decision, on October 18, 2016 (81 FR 71670), we reopened a comment period on the 2013 proposed rule.

On October 13, 2020 (85 FR 64618), the Service again withdrew the 2013 proposed rule to list the DPS of the North American wolverine occurring in the contiguous United States as a threatened species under the Act. The 2020 withdrawal decision was based on our conclusion that the factors affecting the species as identified in the 2013 proposed rule were not as significant as believed at the time of publication of the proposed rule. We also found that the North American wolverines occurring in the contiguous United States did not qualify as a DPS.

The Center for Biological Diversity and WildEarth Guardians filed lawsuits in the District Court for the District of Montana challenging the Service's 2020 decision to withdraw the proposal to list the North American wolverine DPS. The cases were consolidated, and the State of Idaho's motion to intervene was granted. On February 4, 2022, the Service filed a motion asking the court to voluntarily return (remand) the 2020 withdrawal decision to the Service to allow the Service to reevaluate it; the Service also requested that the withdrawal decision remain in effect pending that reevaluation. On May 26, 2022, the court granted the Service's request for a voluntary remand of the 2020 withdrawal decision, but the court decided to vacate the withdrawal decision. *Ctr. for Biological Diversity* v. *Haaland,* No. CV 20–181–M–DWM (D. Mont. May 26, 2022).

Current Situation

The court's action returns the listing process relative to the wolverine to the proposed rule stage. Therefore, the Service notifies the public that the February 4, 2013, proposed rule to list the DPS of wolverine occurring in the contiguous United States as threatened under the Act (78 FR 7864) has been reinstated. For purposes of consultation under section 7 of the Act, the wolverine, as of May 26, 2022, is again a species proposed for listing and subject to conferencing requirements.

Next Steps

We will be updating the SSA for the North American wolverine to include any new information not available as of the report published on March 1, 2018. We will use the updated SSA as the scientific foundation to aid in our reevaluation of whether the DPS is valid pursuant to our 1996 DPS policy (61 FR 4722), and if so, whether the DPS meets the definition of an endangered or threatened species under the Act, or whether the species is not warranted for listing. Per the court order, the Service is to make a final listing determination within 18 months of the court's judgment, *i.e.,* on or before November 27, 2023. Any listing determination we make must be made based on the best available information. We invite the public to provide new information that has become available since the March 1, 2018, publication of the SSA to inform our final determination regarding the North American wolverine.

Information Requested

We are seeking information that has become available since March 1, 2018, regarding the wolverine. We will consider information from all interested parties. We are particularly interested in specific information concerning:

(1) Biological, commercial trade, or other relevant data concerning any threats (or lack thereof) to wolverine, and regulations that may be addressing those threats.

(2) the historical and current status, range, distribution, and population size of this species, including the locations of additional populations of wolverine.

(3) the biological or ecological requirements for wolverine, as well as ongoing conservation measures or efforts for the species and its habitat.

(4) Current or planned activities in the areas occupied by wolverine and possible impacts of these activities on this species.

(5) the amount and distribution of wolverine habitat, including den sites.

(6) the impacts of small population size and genetic diversity on the wolverine.

(7) the projected and reasonably likely impacts of climate change on the wolverine and its habitat, including the

loss of snowpack and impacts to wolverine denning habitat.

(8) population connectivity between Canada and the lower 48 contiguous States of the United States and information on differences in regulations governing wolverine management, or wolverine conservation status, in Canada and the lower 48 contiguous States.

Please note that we are not requesting any additional public comments on the proposed listing rule published in 2013 (78 FR 7864). Instead, we are seeking only new information to update the SSA for the North American wolverine that was published on March 1, 2018. If you submitted comments or information on the proposed rule (78 FR 7864) during the initial comment periods from February 4, 2013, to May 6, 2013, from October 31, 2013, to December 2, 2013, from February 5, 2014, to May 6, 2014, or from October 18, 2016, to November 17, 2016, please do not resubmit them. Any such comments have been incorporated as part of the public record of the proposed rule, and we will fully consider them in the preparation of our final determination. Our final determination will take into consideration all written comments and any additional information we received during all comment periods or in response to this document. Our final determination may again be a withdrawal of the 2013 proposed rule; it may be a determination to finalize the 2013 proposed rule; or our final listing determination may differ from the proposed rule. If, after considering all new information, we reaffirm that the wolverine DPS is a listable entity and that it meets the definition of a threatened or endangered species under section 4 of the Act, we may decide it is appropriate to repropose the species for listing. At that time, we would provide an opportunity for public comment on an updated proposed rule.

You may submit new information concerning the update to the status assessment by one of the methods listed in **ADDRESSES**. We request that you send information only by the methods described in **ADDRESSES**.

If you submit information via *https://www.regulations.gov,* your entire submission—including any personal identifying information—will be posted on the website. We will post all hardcopy submissions on *http://www.regulations.gov* as well. If you submit a hardcopy of new information that includes personal identifying information, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so.

Information and materials we receive will be available for public inspection on *http://www.regulations.gov* at Docket No. FWS–R6–ES–2012–0107. You may obtain copies of the proposed rule and the SSA for the North American Wolverine (*Gulo gulo luscus*) on the internet at *https://www.regulations.gov* at Docket No. FWS–R6–ES–2012–0107 and *https://ecos.fws.gov/ecp/species/5123* or by mail or email from the Region 1 Ecological Services Regional Office (see **FOR FURTHER INFORMATION CONTACT**). Please note that the 2012 docket has documents and other information related to the proposed rule, as well as the comments received and the proposed rule itself, and is also the correct docket for submission of information in response to this document.

Authors

The primary authors of this document are staff members of the Species Assessment Team, U.S. Fish and Wildlife Service.

Authority

The authority for this action is the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Stephen Guertin,

Acting Director, U.S. Fish and Wildlife Service.

[Docket No. 221115–0241]

RIN 0648–BL54

Fisheries of the Exclusive Economic Zone Off Alaska; Amendment 124 to the BSAI FMP for Groundfish and Amendment 112 to the GOA FMP for Groundfish To Revise IFQ Program Regulations

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS issues a proposed rule to implement Amendment 124 to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (BSAI FMP) and Amendment 112 to the Fishery Management Plan for Groundfish of the Gulf of Alaska (GOA FMP). First, this proposed rule would amend regulations for the Individual Fishing Quota (IFQ) and Community Development Quota (CDQ) Programs for pot gear configurations, pot gear tending and retrieval requirements, pot limits, and associated recordkeeping and reporting requirements. These changes would increase operational efficiency and flexibility for IFQ holders and CDQ groups. Second, this proposed rule would authorize jig gear as a legal gear type for harvesting sablefish IFQ and CDQ, increasing opportunities for entry-level participants. Third, this proposed rule would temporarily remove the Adak community quota entity (CQE) residency requirement for a period of five years. These actions are intended to promote the goals and objectives of the Northern Pacific Halibut Act of 1982, the Magnuson-Stevens Fishery Conservation and Management Act, the BSAI FMP, GOA FMP, and other applicable laws.

DATES: Submit comments on or before December 23, 2022.

ADDRESSES: You may submit comments on this document, identified by NOAA–NMFS–2022–0092, by any of the following methods:

- *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *https://www.regulations.gov* and enter NOAA–NMFS–2022–0092 in the Search box. Click on the ''Comment'' icon, complete the required fields, and enter or attach your comments.
- *Mail:* Submit written comments to the Assistant Regional Administrator, Sustainable Fisheries Division, Alaska Region NMFS. Mail comments to P.O. Box 21668, Juneau, AK 99802–1668.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on *www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

Electronic copies of the Environmental Assessment and the Regulatory Impact Review (herein

referred to as the ''Analysis'') prepared for this proposed rule are available from *www.regulations.gov* or from the NMFS Alaska Region website at *https://www.fisheries.noaa.gov/region/alaska.*

Written comments regarding the burden-hour estimates or other aspects of the collection-of-information requirements contained in this proposed rule may be submitted to NMFS at the above address and to *www.reginfo.gov/public/do/PRAMain.* Find the particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Abby Jahn, 907–586–7228.

SUPPLEMENTARY INFORMATION:

Authority for Action

NMFS manages the groundfish fisheries of the BSAI under the BSAI FMP and of the GOA under the GOA FMP. The North Pacific Fishery Management Council (Council) prepared, and the Secretary of Commerce (Secretary) approved, the BSAI FMP and GOA FMP under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), 16 U.S.C. 1801 *et seq.* Regulations governing U.S. fisheries and implementing the BSAI FMP appear at 50 CFR parts 600 and 679. Sablefish (*Anoplopoma fimbria*) is managed as a groundfish species under the BSAI FMP and GOA FMP. The Council is authorized to prepare FMP amendments for conservation and management of a fishery managed under the BSAI FMP and GOA FMP. NMFS conducts rulemaking to implement FMP and regulatory amendments.

The International Pacific Halibut Commission (IPHC) and NMFS manage fishing for Pacific halibut (*Hippoglossus stenolepis*) through regulations at 50 CFR part 300, subpart E, established under the authority of the Northern Pacific Halibut Act of 1982 (Halibut Act), 16 U.S.C. 773c(a) and (b). The Halibut Act provides the Secretary of Commerce with general responsibility to carry out the Convention for the Halibut Fishery of the Northern Pacific Ocean and Bering Sea (amended by Preservation of Halibut Fishery Protocol) and the Halibut Act, including the authority to adopt regulations necessary to carry out the purposes and objectives of the Convention. The Halibut Act, 16 U.S.C. 773c(c), also provides the Council with authority to develop regulations, including limited access regulations, that are in addition to, and not in conflict with, approved IPHC regulations. The IPHC adopts annual management measures governing fishing for halibut under the Convention. The IPHC regulations are subject to acceptance by the Secretary of State with concurrence from the Secretary of Commerce. Halibut is not a groundfish species under the BSAI FMP or GOA FMP, and instead is managed under the Convention and the Halibut Act as outlined above.

Under the authority of the BSAI FMP, GOA FMP, and the Halibut Act, the Council recommended and NMFS established regulations that implemented the IFQ Program. The IFQ Program allocates sablefish and halibut harvesting privileges among U.S. fishermen. NMFS manages the IFQ Program pursuant to regulations at 50 CFR part 679 and 50 CFR part 300 under the authority of section 773c of the Halibut Act and section 303(b) of the Magnuson-Stevens Act. This proposed rule would implement Amendment 124 to the BSAI FMP and Amendment 112 to the GOA FMP. The Council recommended Amendment 124 and Amendment 112 to amend provisions of the BSAI FMP and GOA FMP applicable to the sablefish IFQ fisheries. FMP amendments and regulations developed by the Council may be implemented by NMFS only after approval by the Secretary of Commerce. Similarly, halibut fishery regulations developed by the Council may only be implemented by NMFS after approval of the Secretary of Commerce.

Background

The following sections of this preamble describe (1) background information on the IFQ Program, CDQ Program, CQE Program, the Medical Transfer Provision, specific provisions of Amendment 101 to the GOA FMP, and halibut retention; (2) the need for this proposed rule; and (3) the specific provisions that would be implemented by this proposed rule.

Individual Fishing Quota Program

Commercial halibut and sablefish fisheries in the GOA and BSAI are managed primarily under the IFQ Program. The IFQ Program was implemented in 1995 (58 FR 59375, November 9, 1993). The intent of the IFQ Program was to resolve conservation and management problems that arose from an open access fishery. The trawl sablefish fishery is not managed under the IFQ Program. This proposed rule does not modify regulations applicable to the trawl sablefish fishery.

Under the IFQ Program, access to non-trawl sablefish and halibut fisheries is limited to those persons holding quota share (QS). As an exclusive, revocable privilege, QS allows the holder to harvest a specific percentage of either the total allowable catch (TAC) in the sablefish fishery or the annual commercial catch limit in the halibut fishery. Issuance of QS was originally based on participation in the fisheries during historical qualifying periods, and QS is designated for geographic harvest areas, vessel operation type (*i.e.,* catcher vessel (CV) or catcher/processor (CP)), and for a range of vessel categories based on size and operation type that may be used to harvest sablefish or halibut.

Allocation of QS is distributed on an annual basis through the issuance of an IFQ permit. An annual IFQ permit authorizes the permit holder to harvest a specified amount of the IFQ species in a regulatory area from a specific operation type and vessel category. IFQ is expressed in pounds and is based on the amount of quota share held in relation to the total quota share pool for each regulatory area with an assigned catch limit.

Community Development Quota Program

The Western Alaska Community Development Program (CDQ Program) was implemented in 1992 (57 FR 54936, November 23, 1992). Subsequently, the Magnuson-Stevens Act was amended to include provisions specific to the CDQ Program. The purposes of the CDQ Program are (1) to provide eligible western Alaska villages with the opportunity to participate and invest in fisheries in the BSAI management area; (2) to support economic development in western Alaska; (3) to alleviate poverty and provide economic and social benefits for residents of western Alaska; and (4) to achieve sustainable and diversified local economies in western Alaska (16 U.S.C. 1855(i)(1)(A)).

The CDQ Program consists of six different non-profit managing organizations (CDQ groups) representing different geographical regions in Alaska. The CDQ Program receives annual allocations of TAC for a variety of commercially valuable species in the BSAI groundfish, crab, and halibut fisheries, which are in turn allocated among the CDQ groups. CDQ groups use their allocations of halibut to provide opportunities for small vessel fishing by residents of their member communities. Section 4.3.1 of the Analysis (available as indicated in the **ADDRESSES** section above) provides additional detail on the history of the CDQ Program.

Community Quota Entity Program

The CQE Program was implemented in 2004 (69 FR 23681, April 30, 2004). The purpose of the CQE Program was to improve the ability for rural coastal communities to maintain long-term opportunities to access the halibut and sablefish resources for the GOA. The CQE Program was later amended under Amendment 102 to the BSAI FMP to include eligible communities in Area 4B and the Aleutian Islands after the Council received a proposal from the Adak Community Development Corporation (ACDC) to develop a CQE Program specific to the Aleutian Islands for opportunities to access halibut and sablefish resources (79 FR 8870, February 14, 2014). The final rule implementing Amendment 102 allowed an Aleutian Islands CQE to purchase halibut CV QS assigned to Area 4B and sablefish QS assigned to the Aleutian Islands. Limitations on leasing IFQ derived from QS were established for either eligible community residents of Adak or non-residents for a period of five years. The Council recommended limiting the authority for an Aleutian Islands CQE to lease IFQ to non-CQE residents after five years to provide adequate time to accrue benefits to the community of Adak through deliveries, provide crew opportunities for residents, and earn revenue that could assist the purchase of additional QS. The intent of the time limitation was to explicitly tie the potential long-term benefits of QS held by an Aleutian Islands CQE to the residents of Adak. The limitation ended March 17, 2019 and the Adak CQE was required to lease the annual IFQ derived from QS only to eligible community residents of Adak.

In February 2021, the Council requested an emergency rule to suspend the residency requirements applicable to the Adak CQE Program for the 2021 fishing year. The Secretary of Commerce denied the request for emergency action because it did not meet the emergency criteria described at section 305(c) of the Magnuson-Stevens Act. In the denial letter, it was noted that a longer-term management solution would be the best approach to address the ongoing challenges and impacts on the community of Adak. As a result, the Council recommended this proposed rule to remove the residency requirement for an additional period of five years with the intent of creating more opportunities for the Adak CQE to fully harvest its allocation. Sections 4.3.3 and 4.3.4 of the Analysis provide additional detail on the history of the CQE Program.

IFQ Regulatory Areas

The IFQ and CDQ fisheries are prosecuted in accordance with catch limits and managed in separate geographic areas of harvest. This proposed rule would implement provisions that affect IFQ halibut and sablefish in the GOA and IFQ and CDQ halibut and sablefish in the BSAI. Sablefish IFQ regulatory areas are defined and shown in Figure 14 to 50 CFR part 679 and section 1.3 of the Analysis. The sablefish IFQ areas in the GOA are the Southeast Outside District of the GOA (SEO), West Yakutat District of the GOA (WY), Central GOA (CGOA), and Western GOA (WGOA).

The halibut IFQ areas are consistent with IPHC regulatory areas and are shown in Figure 15 to part 679 in the Code of Federal Regulations and section 1.3 of the Analysis. These areas encompass different geographic ranges than the sablefish IFQ regulatory areas, and their boundary lines do not coincide except at the border between the United States and Canada. For the halibut IFQ areas, Area 2 is composed of Area 2A (Washington, Oregon, and California); Area 2B (British Columbia); and Area 2C (Southeast Alaska). Area 3 is composed of Area 3A (Central Gulf of Alaska) and Area 3B (Western Gulf of Alaska). Area 4 (BSAI) is composed of Areas 4A, 4B, 4C, 4D and 4E. The IPHC combines Areas 4C, 4D, and 4E into Area 4CDE for purposes of establishing a commercial fishery catch limit. Area 4CDE, Area 4B, and portions of Area 4A roughly correspond to the Bering Sea and Aleutian Islands Area defined in the BSAI FMP. A portion of Area 4A also includes part of the Western Regulatory Area of the GOA, as defined in the GOA FMP.

Medical Transfer Provision

Since 1998, the temporary transfer, or leasing, of CV IFQ has generally been prohibited with a few narrow exceptions, including a medical transfer provision. The medical transfer provision was initially implemented in 2007 (72 FR 44795, August 9, 2007) and allows a QS holder, not otherwise qualified to hire a master (50 CFR 679.42(i)(1)), to temporarily transfer their annual IFQ to another individual if the QS holder or an immediate family member have a temporary medical condition that prevents them from fishing. An applicant for a temporary medical transfer must have the medical declaration block of the application signed by a healthcare provider describing the medical condition and health risks affecting the applicant, or the applicant's immediate family member, and their inability to participate in the IFQ fishery for which they hold QS. Original issues of QS are a ''grandfathered'' exception to the transfer prohibition, thus receive no benefit from the medical transfer provision.

The medical transfer provision was not included in the original design of the IFQ Program because the Council prioritized the policy objective of maintaining a fishing fleet primarily consisting of owner-operators by narrowly restricting transfer provisions. The medical transfer provision is intended to provide a mechanism for QS holders who are experiencing a medical condition that would temporarily prevent them from fishing during a season to transfer their annual IFQ to another individual. The provision was not intended to create an avenue for those chronically unable to participate in the fishery to maintain the benefits of IFQ harvests or otherwise facilitate non-medical transfers of IFQ. To reduce the long-term usage of the medical provision, the Council and NMFS limited the number of instances that QS holders may use the provision for any medical condition. Since March 16, 2020, NMFS cannot approve a medical transfer if the QS holder was granted a medical transfer in any three of the previous seven years for a medical condition.

For more information about the IFQ Program, refer to section 4.3.1 of the Analysis.

Provisions of Amendment 101

This section provides relevant background information on provisions implemented under Amendment 101 to the GOA FMP that are proposed to be changed or updated by this action. Amendment 101 to the GOA FMP (81 FR 95435, December 28, 2016) authorized the use of longline pot gear in the GOA sablefish IFQ fishery, established precautionary management measures to accompany authorization, and required vessel operators to comply with current retention requirements under the IFQ Program. The Council's intent in authorizing longline pot gear was to minimize whale depredation of hooked sablefish. The Council recommended a precautionary approach to minimize gear conflicts and grounds preemption specific to each GOA area. The Council limited the use of pot gear to the longline pot configuration and only authorized this new gear type for use in the sablefish IFQ fishery. Overall, the approach was influenced by public testimony, the physical nature of the sablefish fishing grounds in the GOA, and the composition of the sablefish IFQ

fleet in each area. In terms of effort, the GOA areas have constrained fishing grounds due to a smaller overall area and a larger number of participating vessels than the BSAI. Retention requirements are described later in this preamble.

The final rule implementing Amendment 101 established a 120 pot limit in the SEO and WY, and a 300 pot limit in the CG and WG regulatory areas. The purpose of establishing pot limits was to control vessel fishing effort and limit the total amount of fishing grounds that a vessel can use at a given time. The Council considered the physical nature of the fishing grounds and how many pots vessel operators could feasibly deploy. It was determined that smaller pot limits were appropriate in the SEO and WY districts because these areas have spatially concentrated fishing grounds.

The final rule implementing Amendment 101 assigned gear retrieval and tending requirements specific to each GOA area. Regulations at 679.42(l)(5)(iii) describe gear retrieval requirements as ''retrieve and remove'' and gear tending requirements as ''redeploy or remove.'' This proposed rule uses the terms retrieval and tending throughout this preamble. The final rule implementing Amendment 101 established a gear retrieval requirement for CVs in the SEO district where vessel operators are required to retrieve gear when the vessel makes an IFQ landing. Other requirements established included a five-day tending requirement for CPs in the SEO district, a five-day tending requirement in the WY district and CG regulatory area, and a seven-day tending requirement in the WG regulatory area. The preamble to the proposed rule for Amendment 101 stated that SEO and WY districts are constrained to a narrow area on the edge of the continental shelf and there are more permit holders than other areas. These factors concentrate fishing effort and gear to a smaller area than the CG and WG. Notably, the Council recommended a longer time period for gear tending in the WG regulatory area because it is the largest area and there are fewer sablefish IFQ holders relative to other areas.

As described above, currently the regulations at 679.42(l)(5)(iii) include gear retrieval and tending requirements, which are grouped together as ''gear retrieval'' requirements despite the difference in operation for either requirement. In its April 6, 2022 motion, the Council recommended that the gear retrieval requirements be modified to seven days for the CG and five days for the SEO. This recommendation would not otherwise change the CG's current gear tending requirement. In the Council motion, there is no mention of changing the SEO District gear retrieval requirement to a gear tending requirement. However, the Council members' remarks on the record at the April 2022 meeting show that the Council clearly intended to recommend just that. During these remarks, the Council explained that changing to a gear tending requirement would allow CVs to leave gear in the water when making an IFQ landing in the SEO and expressed that this change was needed to increase flexibility for the IFQ sablefish pot gear fleet. Additionally, the Council's motion rejected an option that would have removed the gear tending and gear retrieval requirements altogether. The Council instead recommended the more modest modifications to provide participants with some additional flexibility while still limiting the potential for preemption of the fishing grounds.

Gear marking requirements for vessel operators using longline pot gear in the GOA were also included in the final rule implementing Amendment 101. The final rule required a vessel operator to use four or more buoys, a flag mounted on a pole, and a radar reflector to mark each end of a longline pot set. The purpose of these requirements was to enhance visibility of longline pot gear and improve vessel safety by preventing gear conflicts between vessels using hook-and-line gear and those using longline pot gear. Since implementation of Amendment 101, many vessels have switched from using hook-and-line gear to longline pot gear in the GOA. As described in sections 4.5.2 and 4.5.7 of the Analysis, these gear marking requirements are unnecessary to prevent gear conflicts and burdensome to the operation strategy for longline pot gear users.

In recommending Amendment 101, the Council indicated its intent to monitor interactions between longline pot and hook-and-line gear in the GOA sablefish IFQ fishery and to determine whether changes to regulatory provisions were needed. In 2021, The Council reviewed the GOA Sablefish Pots Review, which analyzed four years of fishery data and the efficacy of a suite of fishery management measures for the IFQ sablefish fishery. The review and public testimony highlighted that some gear provisions such as pot limits, gear retrieval, and tending requirements implemented under Amendment 101 were either too restrictive or not serving their intended purpose. As a result, the Council initiated analysis of an IFQ Omnibus action. Refer to sections 1.2 and 2.4 of the Analysis for a further discussion on the history and fishery impacts of Amendment 101.

Halibut Retention

Sablefish IFQ fishermen who also hold halibut IFQ are required to retain halibut that are 32 inches or greater in length (legal size) harvested in the BSAI and GOA sablefish IFQ fishery, provided they have unused halibut IFQ. This regulation was implemented with the IFQ Program in 1995 and is intended to promote full utilization of halibut by reducing discards of halibut caught incidentally in the sablefish IFQ fishery. Many IFQ fishermen hold both sablefish and halibut IFQ, and the two species can overlap in some fishing areas (58 FR 59375, November 9, 1993). In 2016, the IPHC recommended annual management measures that authorized longline pot gear as a legal gear type to retain halibut, provided NMFS implemented regulations to authorize longline pot gear in the sablefish IFQ fishery (81 FR 14000, March 16, 2016). In addition to authorizing longline pot gear in the sablefish IFQ fishery and the other provisions described in the preceding section, Amendment 101 also included halibut retention requirements that aligned Federal regulations with the provisions in the 2016 IPHC annual management measures. The purpose of requiring retention of incidentally caught halibut was to avoid discard, and therein discard mortality, of halibut.

As required by Federal regulations, each groundfish pot must include tunnel openings no wider than nine-inches to prevent certain non-target species, such as halibut, from entering the pot. Amendment 118 to the BSAI FMP (85 FR 840, January 8, 2020) implemented regulations requiring vessel operators to retain IFQ or CDQ halibut when using pot gear when an IFQ or CDQ permit holder on board the vessel has unused halibut IFQ or CDQ for the IFQ regulatory area fished in the IFQ vessel category. Amendment 118 also added an exception to the requirement for a tunnel opening of no wider than nine inches. The exception created by Amendment 118 applies to groundfish pots when there is halibut IFQ or CDQ on board, and when fishing for halibut or sablefish IFQ or CDQ in the BSAI. If the tunnel opening requirement remained in effect, the ability to harvest halibut IFQ or CDQ using pots would have been limited because the opening would be too small for legal halibut.

In developing this proposed rule, the Council and NMFS carefully considered existing regulations and retention requirements across the BSAI and GOA.

This proposed rule would add an exception applicable to the GOA so that the requirement for a nine-inch maximum width tunnel opening does not apply to groundfish pots when a vessel begins a trip with unfished halibut IFQ on board and when those vessels are fishing for IFQ halibut and IFQ sablefish.

Authorized Gear

Pots used to fish for groundfish must have biodegradable panels to avoid ghost fishing. Collapsible slinky pots are an emerging pot type in pot fisheries, particularly for longline pot fisheries, which meet the existing definition for pot gear as specified in paragraph 15 of the definition for ''Authorized fishing gear'' at § 679.2. Currently, each pot, including collapsible slinky pots, must have a biodegradable panel as described in paragraph (15)(i) of the definition for ''Authorized fishing gear.'' However, collapsible slinky pots are prone to premature failure under this configuration (see Analysis section 4.5). This proposed rule would provide additional options for the permissible placement of the biodegradable panel on collapsible slinky pots so vessel operators in the IFQ and CDQ fisheries could choose the configuration that works best for their operation.

The final rule implementing the IFQ Program excluded jig gear from allowable gear types for the sablefish fixed gear fishery. The intent of the IFQ Program was not to change the sablefish TAC allocation scheme or require additional FMP amendments for allocation among gear types. As a result, the final rule defined the allocation categories as ''hook-and-line and pot gear'' and ''trawl gear,'' excluding jig gear from allowable fixed gear types for sablefish IFQ and CDQ fisheries.

For this proposed rule, the Council recommended regulatory revisions to authorize jig gear as an authorized fishing gear type in the GOA sablefish IFQ fisheries and the BSAI sablefish IFQ and CDQ fisheries. These proposed revisions would not change the allocation scheme but would change the naming conventions for TAC allocation categories. For alignment and clarity with Federal regulations, NMFS is updating the FMP language as well. The Council's intent is to increase entry-level opportunities and increase flexibility for QS holders. This is because jig gear is a smaller investment than other gear types and does not require significant vessel retrofits as with other gear. Additionally, jig gear is already an authorized gear type for the harvest of halibut IFQ and CDQ and this action would further align the authorized gear types in the halibut and sablefish IFQ fisheries.

Need for Amendment 112, Amendment 124, and This Proposed Rule

Amendment 112, Amendment 124, and this proposed rule are intended to increase operational efficiency and reduce administrative burden for IFQ Program and CDQ Program participants. First, this proposed rule would expand available options for placement of a biodegradable panel specific to collapsible slinky pots used to fish for halibut IFQ or CDQ, or sablefish IFQ or CDQ. Second, this proposed rule would create an exemption from the requirement to comply with a nine-inch tunnel opening when a vessel begins a trip with unfished halibut IFQ on board and when those vessels are fishing for IFQ halibut and IFQ sablefish in the GOA. Third, this proposed rule would revise regulatory specifications for gear marking, pot limits, gear tending, and gear retrieval to implement the intended purposes of Amendment 101. Fourth, this proposed rule would authorize jig gear for the harvest of sablefish IFQ and CDQ in the BSAI and sablefish IFQ in the GOA in order to provide additional opportunity for entry-level participants. Fifth, this proposed rule would remove the Adak residency requirement for a period of five years in order to provide opportunity for the Adak CQE to fully harvest its IFQ. Lastly, this proposed rule would update regulations for clarity by revising recordkeeping and reporting requirements for groundfish logbooks (including IFQ species), and would improve operational efficiency by modifying the IFQ Program medical transfer provision and allowing electronic submission for IFQ and CQE Program application forms.

The Proposed Rule

This proposed rule would revise regulations at 50 CFR part 679. This section describes the proposed changes to current regulations to implement Amendment 124 to the BSAI FMP and Amendment 112 to the GOA FMP, as well as additional regulations recommended by the Council and NMFS.

Collapsible Slinky Pot Exception

This proposed rule would amend regulations at § 679.2 to allow for the biodegradable panel to be placed anywhere on the mesh of a collapsible slinky pot. The panel must be at least 18 inches (45.72 cm) in length and use untreated cotton thread of no larger size than No. 30 (*i.e.,* biodegradable twine). Per the Council's intent, the proposed rule would also allow the door of the collapsible slinky pot to be wrapped with biodegradable twine. Under this option, the biodegradable twine would not have to be 18 inches in length but the door must be a minimum of 18 inches in diameter. This proposed rule would also add the descriptors ''rigid or collapsible'' to the definition of ''Pot gear'' in paragraph (15)(i) of the definition of ''Authorized fishing gear'' so that both types of pots are expressly included in this definition.

These changes are limited to slinky pots in the IFQ and CDQ fisheries. The proposed rule would not affect pot gear used in non-IFQ or non-CDQ groundfish fisheries, which remain subject to the existing biodegradable panel placement requirements in the definition for ''Authorized fishing gear'' in paragraph (15)(i). Likewise, rigid pot gear used in the IFQ and CDQ fisheries remain subject to the requirements in the definition for ''Authorized fishing gear'' in paragraph (15)(i).

Tunnel Opening Exception for the GOA

Pots used in the sablefish IFQ fishery are required to have tunnel openings no wider than nine inches, which are intended to exclude halibut. An exception to this requirement already applies in the BSAI when fishery participants use pots and also have unused halibut IFQ onboard. The current exception in the BSAI can be used even if no sablefish IFQ is onboard. This proposed rule would add an exception in the GOA to the nine-inch tunnel opening requirement only where there is an IFQ or CDQ permit holder onboard who has both unused halibut IFQ and unused sablefish IFQ onboard. Specifically, this proposed rule would apply the exemption at § 679.2 under the definition of ''Authorized fishing gear'' at paragraph (15)(iii) when there is IFQ halibut onboard a vessel and the harvester is fishing for IFQ sablefish with longline pot gear in the GOA in accordance with § 679.42(l). No change would be made to the exception for the BSAI nor to the BSAI halibut and sablefish pot gear requirements described at § 679.42(m).

Gear Specifications in the GOA

This proposed rule would revise regulations at § 679.24(a)(3) to modify the requirements for marking of longline pot gear deployed to harvest IFQ sablefish in the GOA. This change was recommended because elements of the existing marking requirements are unnecessary and burdensome for vessel operations. This proposed rule would remove the requirement that each end of a set of longline pot gear have a cluster of four or more marker buoys, a flag

mounted on a pole, and a radar reflector. However, the requirement that each end of a gear set have an attached hard buoy ball marked with the capital letters, ''LP,'' indicating longline pot gear, would remain so that gear visibility is maintained. Likewise, no changes would be made to § 679.24(a)(1) or (2), which require all hook-and-line, longline pot, and pot-and-line marker buoys to be marked with the vessel's Federal Fisheries Permit (FFP) number or Alaska Department of Fish & Game (ADF&G) vessel registration number.

This proposed rule would modify § 679.42(l)(5)(ii) for longline pot gear limits in the WY District GOA. Namely, the maximum number of pots that a vessel operator may deploy would be increased from 120 to 200 when harvesting IFQ sablefish in the WY District of the GOA. This proposed rule would not modify the maximum number of pots permitted in the SEO District or CGOA and WGOA regulatory areas.

Additionally, this proposed rule would modify IFQ fisheries prohibitions at § 679.7(f) and gear tending and retrieval requirements at § 679.42(l)(5)(iii) for longline pot gear in the GOA. First, this proposed rule would add cross references to § 679.42(l)(5)(iii) in the prohibitions at § 679.7, including paragraph (f)(21) for CVs in the SEO District, paragraph (f)(22) for CPs in the SEO District, paragraph (f)(23) for CVs or CPs in the WY District and the CG regulatory area, and paragraph (f)(24) for CVs or CPs in the WG regulatory area. These changes are proposed for consistency and ease of navigation between regulations for longline pot gear in the GOA and prohibitions for IFQ fisheries.

Second, this proposed rule would modify regulations at § 679.42(l)(5)(iii)(A) for CV operators in the SEO District, by replacing retrieval requirements (*i.e.,* retrieve and remove) with gear tending requirements (*i.e.,* redeploy or remove), removing any reference to IFQ landings, and modifying the timeline so that a vessel operator either tends or retrieves gear from the fishing grounds within five days of deploying the gear. Corresponding changes are also proposed at § 679.7(f)(21) to update the relevant prohibition. For the Central GOA regulatory area, this proposed rule would modify the timeline so that a vessel operator either redeploys or removes gear from the fishing grounds within seven days of deploying the gear, adding paragraph § 679.42(l)(5)(iii)(E) to specify the revised gear tending requirements in a separate paragraph from the WY District. This proposed rule would also revise the corresponding prohibition at § 679.7(f)(23) for the CG regulatory area and the WY District. This proposed rule would not modify the gear tending requirements for CPs in the SEO District, vessel operators in the WY District, or vessel operators in the WG regulatory area.

Authorize Jig Gear

This proposed rule would revise regulations at §§ 679.2, 679.20, and 679.24 to authorize jig gear in the IFQ and CDQ sablefish fisheries in the BSAI and the IFQ sablefish fishery in the GOA consistent with Amendments 124 and 112. Jig gear is defined at § 679.2 in paragraph (8) of the definition for ''Authorized fishing gear.'' Authorization of jig gear for the aforementioned fisheries would not require the definition of jig gear to be changed. Instead, this proposed rule would add ''jig gear'' to the definition of ''Fixed gear,'' in paragraph (4)(ii) under ''Authorized fishing gear'' at § 679.2, to specify that jig gear may be used to harvest sablefish IFQ and CDQ from any BSAI reporting area. No GOA-specific changes are required. The definition of ''Fixed gear,'' defined at § 679.2 in paragraph (4)(i) under the definition ''Authorized fishing gear,'' currently includes all ''longline gear,'' used to harvest sablefish in the GOA. ''Longline gear'' is already defined to include ''jig gear.''

This proposed rule would also revise regulations at § 679.20(a)(4)(iii)(A) for the Bering Sea subarea, § 679.20(a)(4)(iv)(A) for the Aleutian Islands subarea, and § 679.20(b)(1)(i) for the nonspecified reserve. This change would replace the phrase ''hook-and-line and pot gear'' with ''fixed gear'' for consistency with the definition of ''Fixed gear'' defined at § 679.2 in paragraph (4)(ii) of the definition ''Authorized fishing gear.'' This proposed rule would not change the percent of the TAC allocated to the sablefish IFQ fishery in the BSAI. NMFS would continue to allocate 50 percent of the sablefish TAC in the Bering Sea subarea and 75 percent of the sablefish TAC in the Aleutian Islands subarea to the sablefish IFQ fishery.

This proposed rule would add ''jig gear'' to § 679.24 where gear restrictions for sablefish are found. Specifically, this proposed rule would add ''jig gear'' to § 679.24(c)(2)(i)(A) and (B) so that jig gear is an authorized gear type for the Eastern GOA regulatory area and permitted when directed fishing for IFQ sablefish. This proposed rule would also add ''jig gear'' to § 679.24(c)(3) and (4) so that sablefish is not considered a prohibited species for vessel operators using jig gear in the Central GOA, Western GOA, or BSAI. This proposed rule would also make two grammatical corrections to the list of permissible gear types in the Eastern GOA regulatory area at § 679.24(c)(2)(i)(A) and (B) and § 679.24(c)(4), changing ''and'' to ''or'' to clarify that at least one of the listed gear types must be used, but all gear types need not be used simultaneously.

Adak Residency Requirement

This proposed rule would revise regulations at § 679.42 for sablefish and halibut QS use specific to eligible community residents of Adak, Alaska. This proposed rule would revise the date specified at § 679.42(e)(8)(ii) and (f)(7)(ii) from March 17, 2019, to five years after the effective date of this final rule. The regulatory changes at § 679.42(e)(8)(ii) would apply only to a CQE in the Aleutian Islands subarea for sablefish QS. The regulatory changes at § 679.42(f)(7)(ii) would only apply to a CQE in IFQ regulatory Area 4B for halibut QS.

Other Regulatory Provisions

This proposed rule would modify § 679.21(a)(5), which currently references sablefish as a prohibited species via a cross-reference to § 679.24(c)(2)(ii). Because § 679.24(c)(2)(ii) only pertains to the Eastern GOA regulatory area, the proposed rule would change the cross reference to § 679.24(c)(2) to clarify that sablefish is a prohibited species for the western GOA, central GOA, and the BSAI, as well as the Eastern GOA, per § 679.24(c)(2) through (4). This fix would not modify prohibited species bycatch management or gear restrictions for sablefish but rather correct the cross reference to include all four areas.

This proposed rule would also revise regulations at § 679.42 to exclude medical transfers approved in 2020, 2021, or 2022 from the use restriction detailed at § 679.42(d)(2)(iv)(C). Specifically, this proposed rule would add paragraph (d)(2)(iv)(C)(*l*), stating, ''A medical transfer approved in 2020, 2021, or 2022 does not count toward the restriction detailed in paragraph (d)(2)(iv)(C) of this section.'' Furthermore, this proposed rule would add, ''Except as provided for in paragraph (d)(2)(iv)(C)(*1*) of this section,'' to the beginning of paragraph (d)(2)(iv)(C) to link the exception to new paragraph (d)(2)(iv)(C)(*1*).

Additionally, this proposed rule would revise regulations at § 679.5 specific to the longline and pot gear catcher vessel daily fishing logbook (DFL) and the catcher processor daily

cumulative production logbook (DCPL). A sentence would be added at § 679.5(c)(1)(ii), (c)(3)((i)(A)*(1),* (c)(3)((i)(B)*(1),* and (c)(3)(iv)(A)*(2)* to clarify that the same logbook may be used for different gear types, provided different gear types are recorded on separate pages. The purpose of these regulatory changes is to provide clear direction to vessel operators as to how these logbooks may be used. The changes are specific to groundfish fisheries for CVs greater than 60 ft length overall (LOA) using longline or pot gear, and IFQ or CDQ halibut or IFQ or CDQ sablefish fisheries for CVs less than 60 ft LOA using longline pot gear or pot gear.

The proposed rule would revise regulations relevant to the CQE Program at §§ 679.4, 679.41, and 679.5. Those regulations require CQEs to submit certain information to the Regional Administrator and imply that information must be submitted by mail because only a mailing address is listed. This proposed rule would revise §§ 679.4(k)(10)(vi)(A) and (D), 679.41(l)(3), and 679.5(t)(2) to remove the address for the Regional Administrator and change the word ''sent'' to ''submitted'' in § 679.4(k)(10)(vi)(D) to allow for additional submission methods. As a result, no submission method would be included in regulations and, instead, NMFS would provide this information on forms and on the NMFS Alaska Region website at *https://www.fisheries.noaa.gov/region/alaska.* The purpose of these changes is to provide additional methods for the public to submit information as the agency moves toward electronic submission.

Classification

NMFS is issuing this proposed rule pursuant to 304(b)(1)(A) and 305(d) of the Magnuson-Stevens Act. Section 304(b)(1)(A) authorizes NMFS to implement FMPs and regulatory amendments. Pursuant to Magnuson-Stevens Act section 305(d), this action is necessary to carry out the amendments to the BSAI FMP and the GOA FMP. The NMFS Assistant Administrator has determined this proposed rule is consistent with the Council's recommendations and NMFS regulatory amendments, the BSAI FMP, the GOA FMP, other provisions of the Magnuson-Stevens Act, and other applicable law, subject to further consideration after public comment.

Regulations governing the U.S. fisheries for Pacific halibut are developed by the IPHC, the Council, and the Secretary of Commerce. Section 5 of the Halibut Act (16 U.S.C. 773c) allow the Regional Council having authority for a particular geographical area to develop regulations governing the allocation and catch of halibut in U.S. Convention waters as long as those regulations do not conflict with IPHC regulations. The proposed action is consistent with the Council's authority under the Halibut Act to implement management measures for the halibut IFQ fishery and does not conflict with IPHC regulations.

This proposed rule has been determined to be not significant for purposes of Executive Order 12866.

Regulatory Impact Review

NMFS prepared an analysis (''Analysis'') to assess the cost and benefits of available regulatory alternatives and considers all quantitative and qualitative measures. A copy of the Analysis is available from NMFS as indicated in the **ADDRESSES** section above.

Certification Under the Regulatory Flexibility Act

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities. NMFS requests comments on this certification for this proposed rule. The factual basis for this determination is as follows:

This proposed rule would modify IFQ Program regulations for IFQ and CDQ pot gear fisheries, including expanded flexibilities for the configuration of the biodegradable panel and tunnel opening exceptions for pots used to harvest IFQ and CDQ. This proposed rule would reduce the number of marker buoys and eliminate flagpole and radar reflector requirements for pot gear, modify gear tending and gear retrieval requirements, and increase pot limits. This proposed rule would authorize jig gear as a legal gear type for harvesting sablefish IFQ and CDQ, expanding fishing opportunities for entry-level participants. Lastly, the proposed action would temporarily remove the Adak CQE residency requirement for an additional five years and modify recordkeeping and reporting requirements to improve operational efficiency. A discussion of the potential impacts of the proposed action is further discussed in sections 4.7 and 4.8 of the Analysis.

Entities that would be directly regulated by this proposed rule include all vessel operators that harvest halibut and sablefish, including IFQ, CDQ, or CQE Program participants. In 2020, the most recent year with vessel revenue data available, 773 vessel operators participated in the BSAI IFQ or CDQ and GOA IFQ fixed gear halibut and sablefish fisheries. Of these vessel operators, 752 are considered small entities and 21 are considered large entities. Vessel operators are an estimate based on the number of unique vessels. Vessel operators are used as the unit for directly regulated small entities because there is no way to estimate revenue using individual QS holders. Direct impacts would be expected to be positive and beneficial for vessel operators who participate in the IFQ, CDQ, or CQE Programs because the intent of this action is to reduce regulatory burden and increase flexibility to allow for innovation in pot gear configurations and individual operations on the fishing grounds. Direct impacts are expected to be positive and beneficial for vessel operators who participate in the CQE Program because the intent of removing the residency requirement for an additional period of five years is to provide more opportunity for the Adak CQE to fully harvest its allocation.

This action does not place any new regulatory burden on vessel operators; instead, this action increases flexibility and operational efficiency. For these reasons, this action is not expected to have an adverse economic impact on a substantial number of small entities, an initial regulatory flexibility analysis is not required, and none has been prepared.

Information Collection Requirements

This proposed rule contains collection of information requirements subject to review and approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act (PRA). This proposed rule would revise existing collection-of-information requirements for OMB Control Number 0648–0665 (Alaska CQE Program) and revise and extend for 3-years existing collection-of-information requirements for 0648–0353 (Alaska Region Gear Identification Requirements). The existing collection-of-information requirements would continue to apply under 0648–0213 (Alaska Region Logbook and Activity Family of Forms); 0648–0272 (Alaska Pacific Halibut & Sablefish Fisheries: IFQ); and 0648–0515 (Alaska Interagency Electronic Reporting System). The proposed changes to the collections are described below. The public reporting burdens for the information collection requirements provided below includes the time for

reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

OMB Control Number 0648–0353

NMFS proposes to revise and extend by three years the existing requirements for OMB Control Number 0648–0353. This collection contains gear identification requirements for the groundfish fisheries in the Exclusive Economic Zone off Alaska. This collection would be revised to reduce the number of marker buoys required for longline pot gear deployed to fish IFQ sablefish in the GOA because this proposed rule would remove requirements for the vessel owner to use four or more marker buoys, a flag mounted on a pole, and a radar reflector to mark each end of a longline set. Removing these requirements would decrease the burden for harvesters and increase operational efficiency. The number of respondents would not change. Public reporting burden is estimated to average 15 minutes or less per individual response to collect the information and paint it on a buoy. Subject to public comment, no changes are made to the estimated burden as the estimate allows for differences in the time needed to mark buoys. The estimated total number of respondents for this collection is 895; the estimated total annual burden hours are 1,460 hours; and the estimated total annual cost to the public for recordkeeping and reporting costs is $13,425.

OMB Control Number 0648–0665

This information collection is revised to modify the text on the Application for CQE to Transfer IFQ to an Eligible Community Resident or Non-Resident because this proposed rule would remove the residency requirement for the Adak CQE for five years.

This proposed rule also would revise regulations for the CQE annual report, the CQE LLP authorization letter, the Application for Nonprofit Corporation to be Designated as a CQE, and the Application for a CQE to Receive a Non-trawl Groundfish LLP License to provide additional methods for the public to submit the information as the agency moves toward electronic submission.

These revisions do not affect the number of respondents, anticipated responses, or burden hours or costs. The public reporting burden per individual response is estimated to average 2 hours for the Application for CQE to Transfer IFQ to an Eligible Community Resident or Non-Resident, 200 hours for the Application for Nonprofit Corporation to be Designated as a CQE, 40 hours for the CQE Annual Report, 20 hours for the Application for a CQE to Receive a Non-trawl Groundfish LLP License, and 1 hour for the CQE License Limitation Program Authorization letter.

Public Comment

Public comment is sought regarding: whether these proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the burden estimate; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collection of information, including through the use of automated collection techniques or other forms of information technology. Submit comments on these or any other aspects of the collection of information to NMFS Alaska Region at the **ADDRESSES** above and at *www.reginfo.gov/public/do/PRAMain.*

Notwithstanding any other provisions of the law, no person is required to respond to and no person shall be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless that collection of information displays a currently valid OMB control number.

List of Subjects in 50 CFR Part 679

Alaska, Fisheries, Reporting and recordkeeping requirements.

Dated: November 16, 2022.

Samuel D. Rauch, III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, NMFS proposes to amend 50 CFR part 679 as follows:

PART 679—FISHERIES OF THE EXCLUSIVE ECONOMIC ZONE OFF ALASKA

■ 1. The authority citation for part 679 continues to read as follows:

Authority: 16 U.S.C. 773 *et seq.;* 1801 *et seq.;* 3631 *et seq.;* Pub. L. 108–447; Pub. L. 111–281.

■ 2. In § 679.2 amend the definition for ''Authorized fishing gear'' by revising paragraph (4)(ii) and the introductory text of paragraph (15), adding paragraph (15)(i)(A), adding and reserving paragraph (15)(i)(B), and revising paragraph (15)(iii) to read as follows:

§ 679.2 Definitions.

* * * * *

Authorized fishing gear * * *

(4) * * *

(ii) For sablefish harvested from any BSAI reporting area, all hook-and-line gear, jig gear, and all pot gear.

* * * * *

(15) *Pot gear* means a portable structure, rigid or collapsible, that is designed and constructed to capture and retain fish alive in the water. This gear type includes longline pot and pot-and-line gear. Each groundfish pot must comply with the following:

(i) * * *

(A) *Collapsible pot exception.* A collapsible pot (*e.g.,* slinky pot) used to fish for halibut IFQ or CDQ, or sablefish IFQ or CDQ, in accordance with paragraph (4) of this definition, is exempt from the biodegradable panel placement requirements described in paragraph (15)(i) of this definition. Instead, a collapsible pot must have either a biodegradable panel placed anywhere on the mesh of the collapsible pot, which is at least 18 inches (45.72 cm) in length and is made from untreated cotton thread of no larger size than No. 30, or one door on the pot must measure at least 18 inches (45.72 cm) in diameter and be wrapped with untreated cotton thread of no larger size than No. 30.

(B) [Reserved]

* * * * *

(iii) *Halibut retention exception.* If halibut retention is required when harvesting halibut from any IFQ regulatory area in the BSAI or GOA, the requirements to comply with a tunnel opening for pots when fishing for IFQ or CDQ halibut or IFQ or CDQ sablefish in the BSAI in accordance with § 679.42(m)*, or for IFQ sablefish in the GOA in accordance with* § 679.42(l)*,* do not apply.

* * * * *

§ 679.4 [Amended]

■ 3. Amend § 679.4 as follows:

■ a. In paragraph (k)(10)(vi)(A), remove the address text, '', NMFS, P.O. Box 21668, Juneau, AK 99802''; and

■ b. In paragraph (k)(10)(vi)(D), remove the address text, ''sent to the Regional Administrator, NMFS, P.O. Box 21668, Juneau, AK 99802'' and add in its place, ''submitted to the Regional Administrator''.

* * * * *

■ 4. Amend § 679.5 as follows:

■ a. Revise paragraphs (c)(1)(ii), (c)(3)(i)(A)(*1*), (c)(3)(i)(B)(*1*), and (c)(3)(iv)(A)(*2*); and

■ b. In paragraph (t)(2), remove the address text, ''National Marine Fisheries Service, P.O. Box 21668, Juneau, AK 99802,''.

The revisions read as follows:

§ 679.5 Recordkeeping and reporting (R&R).

* * * * *

(c) * * *

(1) * * *

(ii) *Use of two or more vessel logbooks of different gear types.* If two or more different gear types are used onboard a vessel in a fishing year, the operator(s) of this vessel may use the same vessel logbooks for different gear types, provided different gear types are recorded on separate pages.

* * * * *

(3) * * *

(i) * * *

(A) * * *

(*1*) Except as described in paragraph (f)(1)(i) of this section, the operator of a catcher vessel 60 ft (18.3 m) or greater LOA, that is required to have an FFP under § 679.4(b) and that is using longline or pot gear to harvest groundfish must maintain a longline and pot gear DFL and may use the same logbook for longline and pot gear, provided different gear types are recorded on separate pages.

* * * * *

(B) * * *

(*1*) The operator of a catcher vessel less than 60 ft (18.3 m) LOA, using longline pot gear to harvest IFQ sablefish or IFQ halibut in the GOA, or using pot gear to harvest IFQ or CDQ halibut or IFQ or CDQ sablefish in the BSAI, must maintain a longline and pot gear DFL according to paragraph (c)(3)(iv)(A)(*2*) of this section and may use the same logbook for longline and pot gear, provided different gear types are recorded on separate pages.

* * * * *

(iv) * * *

(A) * * *

(*2*) If a catcher vessel identified in paragraph (c)(3)(i)(A)(*1*) or (c)(3)(i)(B)(*1*) through (*3*) of this section is active, the operator must record in the longline and pot gear DFL, for one or more days on each logsheet, the information listed in paragraphs (c)(3)(v), (vi), (viii), and (x) of this section and may use the same logbook for longline and pot gear, provided different gear types are recorded on separate pages.

* * * * *

■ 5. In § 679.7, revise paragraphs (f)(21) through (24) to read as follows:

§ 679.7 Prohibitions.

* * * * *

(f) * * *

(21) Fail to redeploy or remove from the fishing grounds all deployed longline pot gear that is assigned to, and used by, a catcher vessel within five days of deploying the gear to fish IFQ sablefish in the Southeast Outside District of the GOA in accordance with § 679.42(l)(5)(iii)(A).

(22) Fail to redeploy or remove from the fishing grounds all deployed longline pot gear that is assigned to, and used by, a catcher/processor within five days of deploying the gear to fish IFQ sablefish in the Southeast Outside District of the GOA in accordance with § 679.42(l)(5)(iii)(B).

(23) Fail to redeploy or remove from the fishing grounds all deployed longline pot gear that is assigned to, and used by, a catcher vessel or a catcher/processor within five days of deploying the gear to fish IFQ sablefish in the West Yakutat District of the GOA, and within seven days of deploying the gear to fish IFQ sablefish in the Central GOA regulatory area, in accordance with § 679.42(l)(5)(iii)(C) and (E).

(24) Fail to redeploy or remove from the fishing grounds all deployed longline pot gear that is assigned to, and used by, a catcher vessel or a catcher/processor within seven days of deploying the gear to fish IFQ sablefish in the Western GOA regulatory area in accordance with § 679.42(l)(5)(iii)(D).

* * * * *

■ 6. In § 679.20, revise paragraphs (a)(4)(iii)(A), (a)(4)(iv)(A), and (b)(1)(i) to read as follows:

§ 679.20 General limitations.

* * * * *

(a) * * *

(4) * * *

(iii) * * *

(A) *Fixed gear.* Vessels in the Bering Sea subarea using fixed gear will be allocated 50 percent of each TAC for sablefish.

* * * * *

(iv) * * *

(A) *Fixed gear.* Vessels in the Aleutian Islands subarea using fixed gear will be allocated 75 percent of each TAC for sablefish.

* * * * *

(b) * * *

(1) * * *

(i) *Nonspecified reserve.* Fifteen percent of the BSAI TAC for each target species, except pollock, the fixed gear allocation for sablefish, and the Amendment 80 species, which includes Pacific cod, is automatically placed in the nonspecified reserve before allocation to any sector. The remaining 85 percent of each TAC is apportioned to the initial TAC for each target species that contributed to the nonspecified reserve. The nonspecified reserve is not designated by species or species group. Any amount of the nonspecified reserve may be apportioned to target species that contributed to the nonspecified reserve, provided that such apportionments are consistent with paragraph (a)(3) of this section and do not result in overfishing of a target species.

* * * * *

■ 7. In § 679.21 revise paragraph (a)(5) to read as follows:

§ 679.21 Prohibited species bycatch management.

(a) * * *

(5) *Sablefish as a prohibited species.* (See § 679.24(c) for gear restrictions for sablefish.)

* * * * *

■ 8. In § 679.24, revise paragraphs (a)(3), (c)(2)(i)(A) and (B), and (c)(3) and (4) to read as follows:

§ 679.24 Gear limitations.

* * * * *

(a) * * *

(3) Each end of a set of longline pot gear deployed to fish IFQ sablefish in the GOA must have one hard buoy ball attached and marked with the capital letters ''LP'' in accordance with paragraph (a)(2) of this section.

* * * * *

(c) * * *

(2) * * *

(i) * * *

(A) No person may use any gear other than hook-and-line, longline pot, jig, or trawl gear when fishing for sablefish in the Eastern GOA regulatory area.

(B) No person may use any gear other than hook-and-line gear, longline pot gear, or jig gear to engage in directed fishing for IFQ sablefish.

* * * * *

(3) *Central and Western GOA regulatory areas; sablefish as prohibited species.* Operators of vessels using gear types other than hook-and-line, longline pot, jig, or trawl gear in the Central and Western GOA regulatory areas must treat any catch of sablefish in these areas as a prohibited species as provided by § 679.21(a).

(4) *BSAI.* Operators of vessels using gear types other than hook-and-line, longline pot, pot-and-line, jig, or trawl gear in the BSAI must treat sablefish as a prohibited species as provided by § 679.21(a).

* * * * *

§ 679.41 [Amended]

■ 9. In § 679.41, in paragraph (l)(3), remove the two references to the address text '', NMFS, P.O. Box 21668, Juneau, AK 99802''.

■ 10. In § 679.42, revise paragraphs (d)(2)(iv)(C), (e)(8)(ii), (f)(7)(ii), (l)(5)(ii)(B), (l)(5)(iii)(A) and (C), and add paragraph (l)(5)(iii)(E) to read as follows:

§ 679.42 Limitations on use of QS and IFQ.

* * * * *

(d) * * *

(2) * * *

(iv) * * *

(C) Except as provided for in paragraph (d)(2)(iv)(C)(*1*) of this section, NMFS will not approve a medical transfer if the applicant has received a medical transfer in any 3 of the previous 7 calendar years for any medical reason.

(*1*) Medical transfers approved in 2020, 2021, or 2022 do not count toward the restriction detailed in paragraph (d)(2)(iv)(C) of this section.

(*2*) [Reserved]

* * * * *

(e) * * *

(8) * * *

(ii) In the Aleutian Islands subarea may lease the IFQ resulting from that QS to any person who has received an approved Application for Eligibility as described in § 679.41(d) prior to [*date five years after the effective date of the final rule*], but only to an eligible community resident of Adak, AK, after [*date five years after the effective date of the final rule*].

* * * * *

(f) * * *

(7) * * *

(ii) In IFQ regulatory Area 4B may lease the IFQ resulting from that QS to any person who has received an approved Application for Eligibility as described in § 679.41(d) prior to [*date five years after the effective date of the final rule*] but only to an eligible community resident of Adak, AK, after [*date five years after the effective date of the final rule*].

* * * * *

(l) * * *

(5) * * *

(ii) * * *

(B) In the West Yakutat District of the GOA, a vessel operator is limited to deploying a maximum of 200 pots.

* * * * *

(iii) * * *

(A) In the Southeast Outside District of the GOA, a catcher vessel operator must redeploy or remove from the fishing grounds all longline pot gear that is assigned to the vessel and deployed to fish IFQ sablefish within five days of deploying the gear.

* * * * *

(C) In the West Yakutat District of the GOA, a vessel operator must redeploy or remove from the fishing grounds all longline pot gear that is assigned to the vessel and deployed to fish IFQ sablefish within five days of deploying the gear.

* * * * *

(E) In the Central GOA regulatory area, a vessel operator must redeploy or remove from the fishing grounds all longline pot gear that is assigned to the vessel and deployed to fish IFQ sablefish within seven days of deploying the gear.

* * * * *

BILLING CODE 3510–22–P

Notices

Federal Register
Vol. 87, No. 225
Wednesday, November 23, 2022

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding: whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques and other forms of information technology.

Comments regarding this information collection received by December 23, 2022 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Forest Service

Title: Commercial Use of Woodsy Owl Symbol—36 CFR part 272.

OMB Control Number: 0596–0087.

Summary of Collection: The Woodsy Owl-Smoky Bear Act of 1974 established the Woodsy Owl symbol and slogan, authorizes the Secretary of Agriculture to manage the use of the slogan and symbol, authorizes the licensing of the symbol for commercial use, and provides for continued protection of the symbol. Part 272 of Title 36 of the Code of Federal Regulations authorizes the Chief of the Forest Service to approve commercial use of the Woodsy Owl symbol and to collect royalty fees. Commercial use includes replicating Woodsy Owl symbol or logo on items, such as tee shirts, mugs, pins, figurines, ornaments, stickers, and toys and using the image and or slogan of the icon in motion pictures, documentaries, TV, magazine stories, and books, magazines, and other for-profit paper products.

Woodsy Owl is America's symbol for the conservation of the environment. The public service campaign slogans associated with Woodsy Owl are ''Give a Hoot, Don't Pollute'' and ''Lend a Hand, Care for the Land.'' The mission statement of the Woodsy Owl's conservation campaign is to help young children discover the natural world and join in life-long actions to care for that world.

Need and Use of the Information: The USDA Forest Service Conservation Education Program Director will use the collected information to determine if the applicant will receive a license or renewal of an existing license and the associated royalty fees. Information collected includes, but is not limited to, tenure of business or non-profit organization, current or planned products, physical location, projected sales volume, and marketing plans.

Description of Respondents: Business or other for-profit; Not-for-profit institutions.

Number of Respondents: 35.

Frequency of Responses: Recordkeeping; Reporting: Quarterly.

Total Burden Hours: 52.

Forest Service

Title: Land Exchanges.

OMB Control Number: 0596–0105.

Summary of Collection: Land exchanges are discretionary, voluntary real estate transactions between the Secretary of Agriculture (acting by and through the Forest Service) and a non-Federal exchange party (or parties). Land exchanges can be initiated by a non-Federal party (or parties), an agent of a landowner, a broker, a third party, or a non-Federal public agency.

Each land exchange requires preparation of an Agreement to Initiate as required by title 36 Code of Federal Regulations (CFR), part 254, subpart A—section 254.4—Agreement to Initiate. The Agreement to Initiate document specifies the preliminary and non-binding intentions of the non-Federal land exchange party and the Forest Service in pursuing a land exchange. The Agreement to Initiate can contain such information as the description of properties being considered in the land exchange, an implementation schedule of action items, identification of the party responsible for each action item, as well as target dates for completion of each action item.

As the exchange proposal develops, the Forest Service and the non-Federal land exchange party may enter into a binding Exchange Agreement, pursuant to Title 36 CFR part 254, subpart A, section 254.14—Exchange Agreement. The Exchange Agreement documents the conditions that must be met to complete the exchange. The Exchange Agreement can contain information such as identification of parties, description of lands and interests to be exchanged, identification of all reserved and outstanding interest, and all other terms and conditions necessary to complete the exchange.

Need and Use of the Information: The Forest Service collects the information from the non-Federal party (or parties) necessary to complete the Agreement to Initiate and the Exchange Agreement. The information is collected by Forest Service personnel from parties involved in the exchange via telephone, email or in person. Data from this information collection is unique to each land exchange and is not available from other sources. No standardized forms are associated with this information collection.

Description of Respondents: Business or other for-profit; Farms; Not-for-profit institutions.

Number of Respondents: 3.

Frequency of Responses: Reporting: Once.

Total Burden Hours: 20.

Forest Service

Title: Wilderness and Wild and Scenic Rivers Program Administration.

OMB Control Number: 0596–0106.

Summary of Collection: The Federal Lands Recreation and Enhancement Act (16 U.S.C. 6801–6814) authorizes the Forest Service (FS) to collect recreation fees for use of government facilities and services. The Organic Administration Act (16 U.S.C. 473), the Wilderness Act (16 U.S.C. 1131), and Wild and Scenic Rivers Act (16 U.S.C. 1271) authorize FS to collect information from National Forest System visitors who are asked to describe the location of their visit and estimated duration of stay. Every year millions of people visit National Forest System recreations sites. At some of these sites, the public is required to pay a fee to use the site. Fees are charged to help cover the costs of operating and maintaining fee sites, areas, and facilities such as campgrounds. FS will collect information from the forms to document when visitors pay a required recreation fee and to schedule requests for use and occupancy of government owned facilities.

Need and Use of the Information: Forms used to collection information and fees from visitors: (1) Visitor Permit (FS–2300–30); (2) Visitor Registration Card (FS–2300–32). The information collected by them assists Forest Service personnel in improving facilities and services, managing recreation areas and activities, preventing resource damage, preserving high quality outdoor experiences, and providing visitor safety. These forms have and will continue to help the Agency meet resource objectives and visitor needs.

Description of Respondents: Individuals or households.

Number of Respondents: 552,000.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 27,600.

Forest Service

Title: Health Screening Questionnaire.

OMB Control Number: 0596–0164.

Summary of Collection: The Protection Act of 1922 (16 U.S.C. 594) authorizes the Forest Service (FS) to fight fires on National Forest System lands. Title 5 CFR, part 339, authorizes the FS to establish medical qualification standards and require pre-appointment medical examinations, regular recurring periodic examinations after appointment, and whenever there is a direct question about a firefighter's continued ability to meet the medical qualification standards. The information collected pertains to an individual's health status and health history. The collection of this information and use thereof are consistent with the provisions of 5 U.S.C. 552a (Privacy Act of 1974).

Need and Use of the Information: The information is used by the Forest Service Fire and Aviation Management Medical Officers to determine the stability of an employee's medical condition as to whether they are medical qualified to participate in the Work Capacity Test and for arduous duty positions, medically qualified to perform their job in order to try to prevent catastrophic outcomes from medical incidents. This is an ongoing process throughout the year for fire personnel across the nation.

Description of Respondents: Individuals or households.

Number of Respondents: 61,000.

Frequency of Responses: Reporting: Annually.

Total Burden Hours: 20,587.

Forest Service

Title: Forest Service Ride-Along Program Application.

OMB Control Number: 0596–0170.

Summary of Collection: The Forest Service (FS) Law Enforcement and Investigations (LE&I) Ride-Along Program allows the general public or other interested persons to accompany Agency law enforcement personnel as they conduct their normal field duties, including access to and discussions about Agency law enforcement vehicles, procedures, and facilities. This program provides an opportunity for officers to enhance the public's understanding and support of the Forest Service's law enforcement program while the officers learn about public and community issues and concerns.

The program offers the additional benefit of aiding the Agency's recruitment program by allowing interested persons to observe and participate in innovative intern-type programs. This access also provides the Agency with an opportunity to showcase the quality of the law enforcement program and services.

Need and Use of the Information: Information will be collected from any person who voluntarily approaches the FS and wishes to participate in the program. The FS 5300–33 program application form will be used to conduct a minimal background check and the FS 5300–34 is a liability waiver form that requires the applicant's signature and their written assurance that they have read and understood the form. The information collected from the forms will be used by FS and, in appropriate part, by any person or entity needed and authorized by the FS to provide the needed background information (primarily applicable local law enforcement agencies, state criminal justice agencies maintaining state justice records, and by the FBI). If the information is not collected, the program could not operate.

Description of Respondents: Individuals or households.

Number of Respondents: 182.

Frequency of Responses: Reporting: Annually.

Total Burden Hours: 91.

Forest Service

Title: Post-Decisional Administrative Review Process.

OMB Control Number: 0596–0231.

Summary of Collection: The Forest Service has had some form of appeals process for almost 100 years. The Department adopted an administrative appeal rule at 36 CFR part 251, subpart C (251 Appeal Rule) on January 23, 1989. In this case for the 251 Appeal Rule, the Agency, at its own discretion, provides a process by which holders, operators, and solicited applicants may appeal certain written decisions issued by a Responsible Official involving a written instrument authorizing the occupancy or use of National Forest System (NFS) lands and resources.

On June 5, 2013, the Department issued a final rule to update, rename, and relocate the administrative appeal regulations governing occupancy or use of NFS lands and resources to a new part 214 entitled ''Post-decisional Administrative Review Process for Occupancy or Use of National Forest System Lands and Resources'' (78 FR 33705). The new part 214 shortens the appeal process, the appeal period, and reduces the cost to the appellant and government of processing the appeal.

Need and Use of the Information: Information is collected and submitted from individuals who are holders or operators of a valid written authorization to occupy or use NFS lands and resources. The appellant must provide name, mailing address, daytime telephone number, email address, signature, and statements of how appellant is adversely affected by decision being appealed; relevant facts underlying the decision; discussion of issues raised by the decision; attempts to resolve issues under appeal with the Responsible Official and a statement of the relief sought. The information is used to review an agency decision on a written authorization against the issues raised by the appellant and determine

whether to affirm or reverse the decision.

Description of Respondents: Individuals or households.

Number of Respondents: 25.

Frequency of Responses: Reporting: Once.

Total Burden Hours: 200.

BILLING CODE 3411–15–P

DEPARTMENT OF AGRICULTURE

Rural Business-Cooperative Service

[DOCKET #: RBS–22—BUSINESS–0021]

Notice of Solicitation of Applications for the Rural Business Development Grant Programs for Fiscal Year 2023

AGENCY: Rural Business-Cooperative Service, USDA.

ACTION: Notice.

SUMMARY: This notice is given to invite applications for grants under the Rural Business Development Grant (RBDG) Program for fiscal year (FY) 2023, subject to the availability of funding. This notice is being issued prior to passage of a FY 2023 Appropriations Act in order to allow applicants sufficient time to leverage financing, prepare and submit their applications, and give the Agency time to process applications within FY 2023. Based on FY 2022 appropriated funding, the Agency estimates that approximately $46,000,000 will be available for FY 2023. Successful applications will be selected by the Agency for funding and subsequently awarded to the extent that funding may ultimately be made available through appropriations. An announcement on the website at *https://www.rd.usda.gov/newsroom/federal-funding-opportunities* will identify the amount available in FY 2023 for RBDG applications. All applicants are responsible for any expenses incurred in developing their applications.

DATES: Complete applications may be submitted in paper or electronic format and must be received by 4:30 p.m. local time on February 28, 2023, in the USDA Rural Development (RD) State Office for the State where the project is located. A list of the USDA RD State Offices can be found at: *https://www.rd.usda.gov/about-rd/state-offices.*

ADDRESSES: This funding announcement will also be announced on *www.Grants.gov.* Applications must be submitted to the USDA RD State Office for the State where the project is located. For projects involving multiple states, the application must be filed in the RD State Office where the Applicant is located. Applicants are encouraged to contact their respective RD State Office for an email contact to submit an electronic application prior to the submission deadline date. A list of the USDA RD State Office contacts can be found at: *https://www.rd.usda.gov/about-rd/state-offices.*

FOR FURTHER INFORMATION CONTACT: Lisa Sharp at *lisa.sharp@usda.gov,* or Cindy Mason at *cindy.mason@usda.gov,* Program Management Division, Rural Business-Cooperative Service, U.S. Department of Agriculture, 1400 Independence Avenue SW, MS 3226, Room 5160-South, Washington, DC 20250–3226, or call (202) 720–1400. For further information on submitting program applications under this notice, please contact the USDA RD State Office in the State where the applicant's headquarters is located. A list of RD State Office contacts is provided at the following link: *https://www.rd.usda.gov/about-rd/state-offices.*

SUPPLEMENTARY INFORMATION:

Overview

Federal Agency Name: Rural Business-Cooperative Service.

Funding Opportunity Title: Rural Business Development Grant Program.

Announcement Type: Initial Solicitation Announcement.

Funding Opportunity Number: RDBCP–RBDG–2023.

Assistance Listing: 10.351.

Dates: Complete applications may be submitted in paper or electronic format and must be received by 4:30 p.m. local time on February 28, 2023, in the USDA RD State Office for the State where the project is located. A list of the USDA RD State Offices can be found at: *https://www.rd.usda.gov/about-rd/state-offices.*

Rural Development Key Priorities: The Agency encourages applicants to consider projects that will advance the following key priorities (more details available at *https://www.rd.usda.gov/priority-points*):

- Assisting rural communities to recover economically through more and better market opportunities and through improved infrastructure.
- Ensuring all rural residents have equitable access to RD programs and benefits from RD funded projects.
- Reducing climate pollution and increasing resilience to the impacts of climate change through economic support to rural communities.

A. Program Description

1. *Purpose of the Program.* The purpose of the program is to promote economic development and job creation projects through the awarding of grant funds to eligible entities. Applications will compete in two separate categories, business opportunity grants and business enterprise grants, for use in funding various business and community projects that serve rural areas.

Business opportunity projects must be in compliance with eligible uses as stated in 7 CFR 4280.417(a)(1) (eCFR:: 7 CFR 4280.417—Project eligibility) that include the establishment of business support centers or providing funds for job training and leadership development in rural areas. Business opportunity projects must be consistent with any local and area-wide strategic plans for community and economic development, coordinated with other economic development activities in the project area, and consistent with any RD State Strategic Plan.

Business enterprise projects must be in compliance with eligible uses as stated in 7 CFR 4280.417(a)(2) (eCFR: 7 CFR 4280.417—Project eligibility.) and are to be used to finance or develop small and emerging businesses in rural areas. Enterprise grant purposes include projects for the acquisition and development of land, access streets and roads, the conversion or modernization of buildings, capitalization of revolving loan funds and the purchase of machinery and equipment for businesses located in a rural area.

2. *Statutory and Regulatory Authority.*

(a) RBDG Program: The RBDG Program is authorized under 7 U.S.C. 1932(c) (*https://www.govinfo.gov/link/uscode/7/1932*) and implemented by 7 CFR part 4280, subpart E (*https://www.ecfr.gov/current/title-7/part-4280/subpart-E*). Assistance provided under the RBDG Program will be made to eligible entities and will be used for funding various business opportunity projects and business enterprise projects, as applicable, that serve Rural Areas.

(b) Set-Aside Funding: The Consolidated Appropriations Act, 2022 (Pub. L. 117–103), designated funding for Federally-Recognized Native American Tribes, Rural Empowerment Zone/Enterprise Communities/Rural Economic Area Partnerships, projects in Persistent Poverty Counties (as discussed below), Native American Persistent Poverty areas and for Strategic Economic and Community Development (SECD) projects in FY 2022.

Set-aside funding may or may not be made available through appropriations in FY 2023 where continued emphasis is given to financial assistance for projects located in these areas. Eligible applicants for the Native American and Rural Empowerment Zone/Enterprise Communities/Rural Economic Area Partnership set-aside funds, if available, must demonstrate that at least 75 percent of the benefits of an approved grant will assist beneficiaries in the designated areas. Eligible applicants for the Persistent Poverty Counties, Native American Persistent Poverty areas, and the SECD set-aside funds, if available, must demonstrate that 100 percent of the benefits of an approved grant will assist beneficiaries in the designated areas. The completed application deadline for these set-aside funds, if available, is consistent with the RBDG application deadline date of February 28, 2023. Applicants for set-aside funds must indicate that they are applying for set-aside funds and may not submit a duplicate application for regular RBDG funds. If funding for an anticipated set-aside program is not appropriated in FY 2023, or if any eligible applications for set-aside funding are not funded due to insufficient funds, such applications will be allowed to compete for available FY 2023 regular RBDG funds in the State where the project is located.

(c) *Persistent Poverty Funding:* The Consolidated Appropriations Act, 2022 (Pub. L. 117–103) provides designated funding for projects in Persistent Poverty Counties. ''Persistent Poverty Counties'' as defined in section 736 is ''any county that has had 20 percent or more of its population living in poverty over the past 30 years, as measured by the 1990 and 2000 decennial censuses, and 2007–2011 American Community Survey 5-year average, or any territory or possession of the United States''. Another provision in section 736 expands the eligible population in Persistent Poverty Counties to include any county seat of such a Persistent Poverty County that has a population that does not exceed the authorized population limit by more than 10 percent. This provision expands the current 50,000 population limit to 55,000 for only county seats located in Persistent Poverty Counties. Therefore, beneficiaries of technical assistance services located in county seats of Persistent Poverty Counties with populations up to 55,000 (per the 2010 Census) have been deemed eligible. Comparable statutory provisions may or may not be included in the appropriations act for FY 2023.

3. *Definitions.* The definitions applicable to this notice are published at 7 CFR 4280.403 (eCFR :: 7 CFR 4280.403—Definitions.).

4. *Application of Awards.* Awards under the RBDG Program will be made on a competitive basis using specific selection criteria contained in 7 CFR part 4280, subpart E (*https://www.ecfr.gov/current/title-7/part-4280/subpart-E*). The Agency will review, evaluate, and score applications received in response to this notice based on the provisions found in 7 CFR part 4280, subpart E (*https://www.ecfr.gov/current/title-7/part-4280/subpart-E*), and as indicated in this notice. The Agency advises all interested parties that the applicant bears the full burden in preparing and submitting an application in response to this notice whether or not funding is appropriated for this program in FY 2023.

B. Federal Award Information

Type of Awards: Grants.

Fiscal Year Funds: FY 2023.

Available Funds: Dependent upon FY 2023 appropriations. Funding is anticipated to be approximately $46 million based on FY 2022 amounts. RBCS may at its discretion, increase the total level of funding available in this funding round [or in any category in this funding round] from any available source provided the awards meet the requirements of the statute which made the funding available to the Agency.

Award Amounts: No Minimum or Maximum.

Anticipated Award Dates: Set-Aside awards, if applicable: May 31, 2023. Regular awards: August 31, 2023.

Performance Period: June 1, 2023, through September 30, 2025.

Renewal or Supplemental Awards: None.

Type of Assistance Instrument: Grant Agreement.

C. Eligibility Information

1. *Eligible Applicants.*

Grants may be made to a Public Body/Government Entity, an Indian Tribe, or a Nonprofit entity primarily serving rural areas. In accordance with 7 CFR 4280.416(d) (*https://www.ecfr.gov/current/title-7/section-4280.416#p-4280.416(d)*), applicants that are not delinquent on any Federal debt or not otherwise disqualified from participation in these Programs are eligible to apply. The Agency will check the System for Award Management (SAM) to determine if the applicant has been debarred or suspended at the time of application and prior to the awarding of grant funds.

2. *Cost Sharing or Matching.* There are no cost sharing or matching requirements associated with this grant.

3. *Other.* Grant funds may be used for projects identified in 7 CFR 4280.417(a) (eCFR:: 7 CFR 4280.417—Project eligibility.) as either a business opportunity type grant or a business enterprise type grant.

D. Application and Submission Information

1. *Address to Request Application Package.*

Entities wishing to apply for assistance should contact the USDA RD State Office provided in the **ADDRESSES** section of this notice to obtain copies of the application package. If you require alternative means of communication for program information (*e.g.,* Braille, large print, audiotape, etc.) please contact USDA's TARGET Center at (202) 720–2600 (voice and TDD).

2. *Content and Form of Application Submission.*

(a) The applicant documentation and forms needed for a complete application are located in 7 CFR part 4280, subpart E (*https://www.ecfr.gov/current/title-7/part-4280/subpart-E*), a copy of which will be provided to any interested applicant making a request to a USDA RD State Office for the State where the project is located. A list of the USDA RD State Offices can be found at: *https://www.rd.usda.gov/about-rd/state-offices.*

(b) The Agency requires information to make an eligibility determination through applications that must include the items identified in 7 CFR 4280.427 (*https://www.ecfr.gov/current/title-7/section-4280.427*). The written narrative outlined in 7 CFR 4280.427(d) should include the following for Other Information:

(1) Please note that no assistance or funding can be provided to hemp producers or processors unless they have a valid license issued from an approved State, Tribal or Federal plan as per section 10113 of the Agriculture Improvement Act of 2018, Public Law 115–334 (*https://www.govinfo.gov/link/plaw/115/public/334*). Verification of valid hemp licenses will occur at the time of award; and

(2) Other information the Agency may request to assist in making a grant award determination.

Each selection priority criterion outlined in 7 CFR 4280.427 (*https://www.ecfr.gov/current/title-7/section-4280.427*) must be addressed in the application. Failure to address any of the criterion will result in a zero-point score for that criterion and will impact the overall evaluation of the application.

(c) The application must be submitted in one package. The single package should be well organized and include a table of contents, if appropriate. There

are no specific limitations on number of pages, font size and type face, margins, paper size, and the sequence or assembly requirements other than those described in 7 CFR part 4280, subpart E (*https://www.ecfr.gov/current/title-7/part-4280/subpart-E*).

(d) An original copy of the application must be filed with the RD State Office for the State where the project is located. For projects involving multiple states, the application must be filed in the RD State Office where the Applicant is located.

(e) The component pieces of this application require original signatures on the original application. Any form that requires an original signature but is signed electronically in the application submission must be signed in ink by the authorized person prior to the disbursement of funds.

(f) RBDG grants must conform with the environmental policies and procedures of 7 CFR part 1970 (eCFR :: 7 CFR part 1970—Environmental Policies and Procedures).

3. *System for Award Management and Unique Entity Identifier.*

(a) At the time of application, each applicant must have an active registration in SAM before submitting its application in accordance with 2 CFR 25 (*https://www.ecfr.gov/current/title-2/subtitle-A/chapter-I/part-25*). In order to register in SAM, entities will be required to create a Unique Entity Identifier (UEI). Instructions for obtaining the UEI are available at *https://sam.gov/content/entity-registration.*

(b) Applicants must maintain an active SAM registration, with current, accurate and complete information, at all times during which it has an active Federal award or an application under consideration by a Federal awarding agency.

(c) Applicants must ensure they complete the Financial Assistance General Certifications and Representations in SAM.

(d) Applicants must provide a valid UEI in its application, unless determined exempt under 2 CFR 25.110 (*https://www.ecfr.gov/current/title-2/subtitle-A/chapter-I/part-25/subpart-A/section-25.110*).

(e) The Agency will not make an award until the applicant has complied with all SAM requirements including providing the UEI. If an applicant has not fully complied with the requirements by the time the Agency is ready to make an award, the Agency may determine that the applicant is not qualified to receive a Federal award and use that determination as a basis for making a Federal award to another applicant.

4. *Submission Dates and Times.*

(a) *Application Technical Assistance Deadline Date:* Prior to official submission of grant applications, applicants may request technical assistance or other application guidance from the Agency, as long as such requests are made prior to February 10, 2023. Technical assistance is not meant to be an analysis or assessment of the quality of the materials submitted, a substitute for agency review of completed applications, nor a determination of eligibility.

(b) *Application Deadline Date:* Applications (paper or electronic format) must be submitted to the appropriate RD State Office no later than 4:30 p.m. (local time) on February 28, 2023. If completed applications are not received by the deadline date, the application will neither be reviewed nor considered for funding under any circumstances. The Agency will not solicit or consider scoring or eligibility information that is submitted after the application deadline. The Agency reserves the right to contact applicants to seek clarification information on materials contained in the submitted application.

5. *Intergovernmental Review.*

Intergovernmental Review under Executive Order 12372 is not required in this program.

6. *Funding Restrictions.*

(a) Indirect costs will be permitted in accordance with applicable law and in accordance with 2 CFR part 200 (*https://www.ecfr.gov/current/title-2/part-200*). Pre-Federal award costs will only be permitted with prior written approval by the Agency.

(b) In accordance with 7 CFR 4280.421 (eCFR :: 7 CFR 4280.421—Term requirement.), a project must reasonably be expected to be completed within one (1) full year after it has begun.

7. *Other Submission Requirements.*

Applicants may submit applications in hard copy or electronic format as previously indicated in the Application and Submission Information section of this notice. If the applicant wishes to hand deliver its application, the addresses for these deliveries are located in the **ADDRESSES** section of this notice.

E. Application Review Information

1. *Criteria.*

(a) The Agency will review each application for assistance in accordance with the priorities established in 7 CFR 4280.435 (eCFR :: 7 CFR 4280.435—Scoring criteria.). The Agency will assign each application a priority rating and will select applications for funding based on the priority ratings and the total funds available to the program. Failure to address any one of the criteria by the application deadline will result in the application being determined ineligible, and the application will not be considered for funding.

(b) The Agency will use the criteria in 7 CFR 4280.435 (eCFR :: 7 CFR 4280.435—Scoring criteria.) to score applications for purposes identified under 7 CFR 4280.417(a)(1) and (2).eCFR :: 7 CFR 4280.417—Project eligibility.

(1) *Leveraging.* If the grant will fund a critical element of a larger program of economic development, without which the overall program either could not proceed or would be far less effective, or if the program to be assisted by the grant will also be partially funded from other sources, points will be awarded as follows. If RD's portion of project funding is: (i) less than 20 percent—30 points; (ii) 20 percent but less than 50 percent—20 points; (iii) 50 percent but less than 75 percent—10 points or 75 percent or more—0 points. If points are awarded for leveraging, funds must be spent proportionally, and if leveraged funds are not utilized proportionately with the grant, the Agency reserves the right to take any legal action, including terminating the grant. The application must contain a firm commitment in writing of other funding for the project or points will not be awarded to the application for leveraging.

(2) Points will be awarded for each of the following criteria met by the community or communities that will receive the benefit of the grant. However, regardless of the mathematical total of points indicated by paragraphs (2)(a) through (d) of this section, total points awarded under this paragraph (2) must not exceed 40.

(a) *Trauma.* Experiencing trauma due to a major natural disaster that occurred not more than 3 years prior to the filing of the application for assistance—15 points;

(b) *Economic distress.* The Community has suffered a loss of 20 percent or more in their total jobs caused by the closure of a military facility or other employers within the last 3 years—15 points;

(c) *Long-term poverty.* Has experienced long-term poverty as demonstrated by being a former rural empowerment zone, rural economic area partnership zone, rural enterprise champion community, or a persistent poverty county as determined by USDA's Economic Research Service—10 points;

(d) *Population decline*—10 points as demonstrated by the latest three decennial censuses.

(3) *Population.* Proposed project(s) will be located in a community of: (a) Under 5,000 population—15 points; (b) Between 5,000 and less than 15,000 population—10 points; or (c) Between 15,000 and 25,000 population—5 points.

(4) *Unemployment.* Proposed project(s) will be located in areas where the unemployment rate: (a) exceeds the State rate by 25 percent or more—20 points (b) exceeds the State rate by less than 25 percent—10 points or (c) is equal to or less than the State rate—0 points.

(5) *Median household income.* Proposed project(s) will be located in areas where Median Household Income (MHI) is: (a) Less than the poverty line for a family of four, as defined by section 673(2) of the Community Services Block Grant Act—25 points; (b) More than the poverty line for a family of four but less than 65 percent of State MHI—15 points; (c) Between 65 and 85 percent of State MHI—10 points; or (d) Greater than 85 percent State MHI—0 points.

(6) *Experience.* Applicant has evidence of successful experience in the type of activity. Evidence of successful experience may be a description of experience supplied and certified by the applicant based upon its current employees' resumes: (a) 10 or more years—30 points; (b) At least 5 but less than 10 years—20 points; (c) At least 3 years but less than 5 years—10 points; or (d) At least 1 but less than 3 years—5 points.

(7) *Small business start-up or expansion.* Applicant has evidence that small business development will be supported by startup or expansion as a result of the activities to be carried out under the grant. Written evidence of commitment by a small or a small and emerging business must be provided to the Agency and should include the number of jobs that will be supported and created. 5 points for each letter up to 25 points.

(8) *Jobs created or supported.* The anticipated development, expansion, or furtherance of business enterprises as a result of the proposed project will create and/or support existing jobs associated with the affected businesses. The number of jobs must be evidenced by a written commitment from the business to be assisted: (a) One job for less than $5,000—25 points; (b) One job for $5,000 but less than $10,000—20 points; (c) One job for $10,000 but less than $15,000—15 points; (d) One job for $15,000 but less than $20,000—10 points; or (e) One job for $20,000 but less than $25,000—5 points.

(9) *Size of grant request.* Grant projects utilizing funds available under this subpart of: (a) Less than $100,000—25 points; (b) $100,000 to $200,000—15 points; or (c) More than $200,000 but not more than $500,000—10 points.

(10) *Indirect cost.* Applicant is not requesting grant funds to cover their administrative or indirect costs—5 points.

(11) *Discretionary points.* Either the State Director or Administrator may assign up to 50 discretionary points to an application. Assignment of discretionary points must include a written justification. Permissible justifications are geographic distribution of funds, special Secretary of Agriculture initiatives such as Priority Communities, or a state's strategic goals. Discretionary points may only be assigned to initial grants. However, in the case where two projects have the same score, the State Director may add one point to the project that best fits the State's strategic plan regardless of whether the project is an initial or subsequent grant.

(c) The following are examples of special Secretary of Agriculture initiatives that can support obtaining discretionary points.

(1) Assisting rural communities recover economically through more and better market opportunities and through improved infrastructure. Applicant would receive priority points if the project is located in or serving one of the top 10 percent of counties or county equivalents based upon county risk score in the United States. The website, Rural Development: Key Priorities | Rural Development (usda.gov) *https://www.rd.usda.gov/priority-points,* has the data to confirm if your project location qualifies for these discretionary points.

(2) Ensuring all rural residents have equitable access to RD programs and benefits from RD funded projects. Applicant may receive priority points if the project is located in or serving a community with a score of 0.75 or above on the Center for Disease Control's Social Vulnerability Index. The website, Rural Development: Key Priorities | Rural Development (*usda.gov*), has the data to confirm if your project location qualifies or not.

(3) Reduce climate pollution and increasing resilience to the impacts of climate change through economic support to rural communities. Applicants may receive points if the project is located in or serving coal, oil and gas, and power plant communities whose economic well-being ranks in the most distressed tier of the Distressed Communities Index. The website, Rural Development: Key Priorities | Rural Development (*usda.gov*), has the data to confirm if your project location qualifies or not. Applicants may also receive points by demonstrating how proposed climate-impact projects improve the livelihoods of community residents and meet pollution mitigation or clean energy goals.

The Agency will assign each application a priority rating based on the total score and will select applications for funding based on the priority ratings and the total funds available to the program for opportunity-type projects and enterprise-type projects.

2. *Review and Selection Process.*

The RD State Offices will review applications to determine if they are eligible for assistance based on requirements contained in 7 CFR 4280.416 (*https://www.ecfr.gov/current/title-7/section-4280.416*) and 7 CFR 4280.417 (*https://www.ecfr.gov/current/title-7/section-4280.417*). Funding of projects is subject to the availability of funds and Applicant's satisfactory submission of the items required by 7 CFR part 4280, subpart E (*https://www.ecfr.gov/current/title-7/part-4280/subpart-E*) and this notice, in addition to any conditions specifically outlined in any issued USDA RD Letter of Conditions if available funds are to be awarded. The agency reserves the right to offer the applicant less than the grant funding requested.

The Agency will score each application based on the information contained in the application and its supporting information. All applications submitted for funding must be in one package and contain sufficient information to permit the Agency to complete a thorough priority rating. Agency employees may not consider any information that is not provided by the applicant in writing for scoring purposes. Applications will not be considered for funding if they do not provide sufficient information to determine eligibility or are missing required elements.

Applications for set-aside funds, if available, will compete at the National Office in their respective categories. Applications for regular RBDG projects will compete at the state level in their respective category, business opportunity grants or business enterprise grants, for funding made available through RD State allocated funds. Applications will be reviewed, prioritized by score, and funded by ranking each project in highest to lowest score order until available funds are

exhausted. If funds are exhausted at the state level, each State's highest scoring unfunded business enterprise project will have the opportunity to compete for funding through a final national competition.

The Agency will notify eligible applicants in writing if RBDG funds are not available. The applicant is permitted to respond in writing that they wish their application to be reconsidered in the next fiscal year. The applicant may provide additional updated information to the Agency prior to the next fiscal year's application deadline for their project.

The Agency will notify eligible applicants in writing if set-aside funds are not available. Applications that are eligible for set-aside funds but are unfunded due to the availability of funds will be allowed to compete for available FY 2023 regular RBDG funds in the State where the project is located. For projects involving multiple states, the application will be returned to the RD State Office where the Applicant is located and will compete for funds in that State. The Agency will notify eligible applicants in writing if their application will not be funded in FY 2023 due to insufficient funds in the set-aside and regular RBDG programs.

F. Federal Award Administration Information

1. *Federal Award Notices.*

Successful applicants will receive notification for funding from the USDA RD State Office. Applicants must comply with all applicable statutes and regulations before the grant award can be approved and funded. If an application is withdrawn by the applicant, it can be resubmitted later and will be evaluated as a new application in the period submitted.

2. *Administrative and National Policy Requirements.*

Additional requirements that apply to grantees selected for this Program can be found in 7 CFR part 4280, subpart E (*https://www.ecfr.gov/current/title-7/part-4280/subpart-E*). Awards are subject to USDA grant regulations at 2 CFR part 400 (*https://www.ecfr.gov/current/title-2/part-400*) which incorporates the Office of Management and Budget (OMB) regulations at 2 CFR part 200 (*https://www.ecfr.gov/current/title-2/part-200*).

All successful applicants will be notified by letter which will include a Letter of Conditions and a Letter of Intent to Meet Conditions. This letter is not an authorization to begin performance, but it is a notification that grant funds may be awarded subject to conditions. The grant will be considered officially awarded when all conditions in the Letter of Conditions have been met and the Agency obligates the funding for the project. If the applicant wishes to consider beginning their project performance prior to the grant being officially closed, all pre-award costs must be approved in writing and in advance by the Agency.

Additional requirements that apply to grantees selected for these programs can be found in 7 CFR part 4280, subpart E (*https://www.ecfr.gov/current/title-7/part-4280/subpart-E*), the Grants and Agreements regulations of the U.S. Department of Agriculture codified in 2 CFR 400.1 (*https://www.ecfr.gov/current/title-2/section-400.1*) to 400.2 (*https://www.ecfr.gov/current/title-2/section-400.2*) and 2 CFR parts 415 (*https://www.ecfr.gov/current/title-2/part-415*) to 422 (*https://www.ecfr.gov/current/title-2/part-422*), and successor regulations to these parts.

In addition, all recipients of Federal financial assistance are required to report information about first-tier sub-awards and executive compensation (see 2 CFR part 170 (*https://www.ecfr.gov/current/title-2/part-170*)). The applicant will be required to have the necessary processes and systems in place to comply with the Federal Funding Accountability and Transparency Act of 2006 (Pub. L. 109–282—Federal Funding Accountability and Transparency Act of 2006—Content Details—(*govinfo.gov*)) reporting requirements (see 2 CFR 170.200(b) (*https://www.ecfr.gov/current/title-2/section-170.200#p-170.200(b)*), unless the recipient is exempt under 2 CFR 170.110(b) (*https://www.ecfr.gov/current/title-2/section-170.110#p-170.110(b)*).

The following additional requirements apply to grantees selected for these programs:

(a) Form RD 4280–2 ''Rural Business-Cooperative Service Financial Assistance Agreement.''

(b) Letter of Conditions.

(c) Form RD 1940–1, ''Request for Obligation of Funds.''

(d) Form RD 1942–46, ''Letter of Intent to Meet Conditions.''

(e) SF LLL, ''Disclosure of Lobbying Activities,'' if applicable.

(f) Grantees will use Form SF 270, ''Request for Advance or Reimbursement'' when requesting grant funds from the Agency.

3. *Reporting.*

(a) A Financial Status Report and a Project Performance Activity Report will be required of all grantees on a quarterly basis until initial funds are expended and yearly thereafter, if applicable, based on the Federal fiscal year. Grantees must continuously monitor performance to ensure that time schedules are being met, projected work by time periods is being accomplished, and other performance objectives are being achieved. Grantees must submit an original of each report to the Agency no later than 30 days after the end of the quarter. The grantee will complete the project within the total time available to it in accordance with the Scope of Work and any necessary modifications thereof prepared by the grantee and approved by the Agency. A final Project Performance Report will be required with the final Financial Status Report. The final report may serve as the last quarterly report. The final report must provide complete information regarding the jobs created and supported as a result of the RBDG grant if applicable. The Project Performance Reports must include, but not be limited to, the following:

(1) A comparison of actual accomplishments to the objectives established for that period.

(2) Problems, delays, or adverse conditions, if any, which have affected or will affect attainment of overall project objectives, prevent meeting time schedules or objectives, or preclude the attainment of particular project work elements during established time periods. This disclosure shall be accompanied by a statement of the action taken or planned to resolve the situation.

(3) Objectives and timetable established for the next reporting period.

(4) Any special reporting requirements, such as jobs supported and created, businesses assisted, or economic development which results in improvements in median household incomes, and any other specific requirements, will be placed in the reporting section of the Letter of Conditions.

(5) Within 90 days after the conclusion of the project, the grantee will provide a final Project Evaluation Report. The last quarterly payment will be withheld until the final report is received and approved by the Agency. Even though the grantee may request reimbursement on a monthly basis, the last 3 months of reimbursements will be withheld until the final Project Evaluation, Project Performance, and Financial Status Reports are received and approved by the Agency.

(b) In addition to any reports required by 2 CFR part 200 (*https://www.ecfr.gov/current/title-2/part-200*) and 2 CFR 400.1 (*https://www.ecfr.gov/current/title-2/section-400.1*) to 400.2 (*https://www.ecfr.gov/current/title-2/*

section-400.2), and 2 CFR parts 415 to 422 (*https://www.ecfr.gov/current/title-2/section-415*), the grantee must provide reports as required by 7 CFR part 4280, subpart E (*https://www.ecfr.gov/current/title-7/part-4280/subpart-E*).

G. Federal Awarding Agency Contact(s)

For general questions about this announcement, please contact your USDA RD State Office provided in the **ADDRESSES** section of this notice.

H. Buy America

Awards under this announcement for Infrastructure projects to Non-Federal entities, defined pursuant to 2 CFR 200.1 as any State, local government, Indian tribe, Institution of Higher Education, or nonprofit organization, shall be governed by the requirements of section 70914 of the Build America, Buy America Act (BABA) within the IIJA, and its implementing regulations. The Act requires the following Buy America preference:

(1) All iron and steel used in the project are produced in the United States. This means all manufacturing processes, from the initial melting stage through the application of coatings, occurred in the United States.

(2) All manufactured products used in the project are produced in the United States. This means the manufactured product was manufactured in the United States, and the cost of the components of the manufactured product that are mined, produced, or manufactured in the United States is greater than 55 percent of the total cost of all components of the manufactured product, unless another standard for determining the minimum amount of domestic content of the manufactured product has been established under applicable law or regulation.

(3) All construction materials are manufactured in the United States. This means that all manufacturing processes for the construction material occurred in the United States.

I. Other Information

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1995, the information collection requirement contained in this notice is approved by OMB under OMB Control Number 0570–0070.

Federal Funding Accountability and Transparency Act

All applicants, in accordance with 2 CFR part 25 (*https://www.ecfr.gov/current/title-2/part-25*), must be registered in SAM and have a UEI number as stated in section D.3. of this notice. All recipients of Federal financial assistance are required to report information about first-tier sub-awards and executive total compensation in accordance with 2 CFR part 170 (*https://www.ecfr.gov/current/title-2/part-170*).

Civil Rights Act

All grants made under this notice are subject to title VI of the Civil Rights Act of 1964 as required by the USDA (7 CFR part 15, subpart A (eCFR :: 7 CFR part 15 subpart A—Nondiscrimination in Federally-Assisted Programs of the Department of Agriculture—Effectuation of Title VI of the Civil Rights Act of 1964) and section 504 of the Rehabilitation Act of 1973, title VIII of the Civil Rights Act of 1968, title IX, Executive Order 13166 (Limited English Proficiency), Executive Order 11246, and the Equal Credit Opportunity Act of 1974.

Nondiscrimination Statement

In accordance with Federal civil rights laws and USDA civil rights regulations and policies, the USDA, its Mission Areas, agencies, staff offices, employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Program information may be made available in languages other than English. Persons with disabilities who require alternative means of communication to obtain program information (*e.g.,* Braille, large print, audiotape, American Sign Language) should contact the responsible Mission Area, agency, or staff office; the USDA TARGET Center at (202) 720–2600 (voice and TTY); or the 711 Relay Service.

To file a program discrimination complaint, a complainant should complete a Form AD–3027, USDA Program Discrimination Complaint Form, which can be obtained online at: *https://www.usda.gov/sites/default/files/documents/usda-program-discrimination-complaint-form.pdf,* from any USDA office, by calling (866) 632–9992, or by writing a letter addressed to USDA. The letter must contain the complainant's name, address, telephone number, and a written description of the alleged discriminatory action in sufficient detail to inform the Assistant Secretary for Civil Rights about the nature and date of an alleged civil rights violation. The completed AD–3027 form or letter must be submitted to USDA by:

(1) *Mail:* U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250–9410; or

(2) *Fax:* (833) 256–1665 or (202) 690–7442; or

(3) *Email: program.intake@usda.gov.*

USDA is an equal opportunity provider, employer, and lender.

Karama Neal,

Administrator, Rural Business-Cooperative Service, USDA Rural Development.

BILLING CODE 3410–XY–P

DEPARTMENT OF AGRICULTURE

Rural Utilities Service

[Docket No. Rus–22–Telecom–0052]

Publication of Depreciation Rates for Telecommunications Plant

AGENCY: Rural Utilities Service, USDA.

ACTION: Notice.

SUMMARY: The United States Department of Agriculture (USDA) Rural Utilities Service (RUS) administers rural utilities programs, including the Telecommunications Program. RUS announces the depreciation rates for telecommunications plant for the period ending December 31, 2021.

DATES: These rates are applicable immediately and will remain in effect until rates are available for the period ending December 31, 2022.

FOR FURTHER INFORMATION CONTACT: Laurel Leverrier, Assistant Administrator, Telecommunications Program, Rural Utilities Service, STOP 1590—Room 4121, 1400 Independence Avenue SW, Washington, DC 20250–1590. Telephone: (202) 720–9556, Email: *laurel.leverrier@usda.gov.*

SUPPLEMENTARY INFORMATION: In 7 CFR part 1737, Pre-Loan Policies and Procedures Common to Insured and Guaranteed Telecommunications Loans, § 1737.70(e) explains the depreciation rates that are used by RUS in its feasibility studies.

RUS is publishing its annual median depreciation rates for all borrowers, in accordance with § 1737.70(e)(2). RUS also notes that the rates have changed only minimally from the previous year.

The following chart provides those rates, compiled by RUS, for the reporting period ending December 31, 2021:

MEDIAN DEPRECIATION RATES OF RURAL UTILITIES SERVICE BORROWERS BY EQUIPMENT CATEGORY FOR PERIOD ENDING DECEMBER 31, 2021

Telecommunications plant category	Depreciation rate
1. Land and Support Assets:	
a. Motor vehicles	17.00
b. Aircraft	11.25
c. Special purpose vehicles	12.00
d. Garage and other work equipment	10.00
e. Buildings	3.30
f. Furniture and office equipment	10.00
g. General purpose computers	20.00
2. Central Office Switching:	
a. Digital	9.62
b. Analog & Electro-mechanical	10.00
c. Operator Systems	9.33
3. Central Office Transmission:	
a. Radio Systems	9.35
b. Circuit equipment	10.00
4. Information origination/termination:	
a. Station apparatus	12.00
b. Customer premises wiring	10.20
c. Large private branch exchanges	11.78
d. Public telephone terminal equipment	12.50
e. Other terminal equipment	11.20
5. Cable and wire facilities:	
a. Aerial cable—poles	6.30
b. Aerial cable—metal	6.00
c. Aerial cable—fiber	5.10
d. Underground cable—metal	5.00
e. Underground cable—fiber	5.00
f. Buried cable—metal	5.15
g. Buried cable—fiber	5.00
h. Conduit systems	4.00
i. Other	5.00

Andrew Berke,

Administrator, Rural Utilities Service.

BILLING CODE 3410–15–P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B–54–2022]

Foreign-Trade Zone (FTZ) 15—Kansas City, Missouri; Notification of Proposed Production Activity; Moly-Cop USA, LLC (Forged Steel Grinding Balls), Kansas City, Missouri

Moly-Cop USA, LLC submitted a notification of proposed production activity to the FTZ Board (the Board) for its facility in Kansas City, Missouri within FTZ 15. The notification conforming to the requirements of the Board's regulations (15 CFR 400.22) was received on November 17, 2022.

Pursuant to 15 CFR 400.14(b), FTZ production activity would be limited to the specific foreign-status material(s)/component(s) and specific finished product(s) described in the submitted notification (summarized below) and subsequently authorized by the Board. The benefits that may stem from conducting production activity under FTZ procedures are explained in the background section of the Board's website—accessible via *www.trade.gov/ftz.*

The proposed finished product is forged steel grinding balls (duty rate is duty-free).

The proposed foreign-status material and component is hot-rolled alloy steel round bar (duty rate is duty-free). The request indicates that hot-rolled alloy steel round bar is subject to duties under section 232 of the Trade Expansion Act of 1962 (section 232) or Section 301 of the Trade Act of 1974 (section 301), depending on the country of origin. The applicable section 232 and section 301 decisions require subject merchandise to be admitted to FTZs in privileged foreign status (19 CFR 146.41).

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary and sent to: *ftz@trade.gov.* The closing period for their receipt is January 3, 2023.

A copy of the notification will be available for public inspection in the ''Online FTZ Information System'' section of the Board's website.

For further information, contact Juanita Chen at *juanita.chen@trade.gov.*

Dated: November 17, 2022.

Andrew McGilvray,

Executive Secretary.

International Trade Administration

[A–570–122]

Certain Corrosion Inhibitors From the People's Republic of China: Notice of Initiation and Preliminary Results of Antidumping Duty Changed Circumstances Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: In response to a request for a changed circumstances review (CCR), the U.S. Department of Commerce (Commerce) is initiating a CCR of the antidumping duty (AD) order on certain corrosion resistant inhibitors (corrosion inhibitors) from the People's Republic of China (China). Additionally, Commerce preliminarily determines that Kanghua Chemical Co., Ltd. (Chuzhou Kanghua) is the successor-in-interest to Nantong Kanghua Chemical Co., Ltd. (Nantong Kanghua). Interested parties are invited to comment on these preliminary results.

DATES: Applicable November 23, 2022.

FOR FURTHER INFORMATION CONTACT: Hermes Pinilla, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3477.

SUPPLEMENTARY INFORMATION:

Background

On March 19, 2019, Commerce published the AD order on corrosion inhibitors from China in the **Federal Register**.[1] On August 30, 2022, Chuzhou Kanghua requested that Commerce initiate a changed circumstances review of the *Order* to determine that it is the successor-in-interest to Nantong Kanghua.[2] We did not receive comments from interested parties concerning this request. On September 8, 2022, Commerce requested additional information from Chuzhou Kanghua to determine whether to initiate the requested CCR.[3]

On October 7, 2022, we extended the deadline to initiate the CCR.[4]

[1] *See Certain Corrosion Inhibitors from the People's Republic of China, and Antidumping Duty Orders,* 86 FR 14869 (March 19, 2021) (*Order*).

[2] *See* Chuzhou Kanghua's Letter, ''Certain Corrosion Inhibitors from the People's Republic of China, A–570–122; Changed Circumstances Review (Kanghua),'' dated August 30, 2022 (CCR Request). We note that the actual request contained a typographical error referencing a different proceeding and case number. We clarified with counsel that the correct case name is ''Certain Corrosion Inhibitors from the People's Republic of China, A–570–122.'' *See* Memorandum, ''Antidumping Administrative Review of Certain Corrosion Inhibitors from the People's Republic of China: Communication with Counsel Concerning its Request for a Changed Circumstance Review,'' dated September 29, 2022.

[3] *See* Chuzhou Kanghua's Letter ''Certain Corrosion Inhibitors from the People's Republic of China, A–570–122; Changed Circumstances Review (Kanghua); Response to Supplemental Questionnaire,'' dated September 15, 2022. We note that the response to the supplemental questionnaire contains typographical errors that reference another proceeding and case number. However, counsel clarified that the correct case is ''Certain Corrosion Inhibitors from the People's Republic of China, A–570–122.'' *See* Memorandum, ''Antidumping Administrative Review of Certain Corrosion Inhibitors from the People's Republic of China: Communication with Counsel Concerning its Request for a Changed Circumstance Review,'' dated September 29, 2022.

[4] *See* Commerce's Letter, ''Request for a Changed Circumstances Review of the Antidumping Duty Order on Certain Corrosion Inhibitors from the

Continued

Additionally, on October 7, 2022, we sent Chuzhou Kanghua a supplemental questionnaire.[5] On October 11, 2022, Chuzhou Kanghua submitted its response to our supplemental questionnaire.[6] Commerce received no comments from interested parties on Chuzhou Kanghua's CCR Request or its supplemental questionnaire responses.

Scope of the Order

The merchandise covered by the *Order* is corrosion inhibitors from China. For a full description of the merchandise covered by the scope of *Order, see* the Preliminary Decision Memorandum.[7]

Initiation of Changed Circumstances Reviews

Pursuant to section 751(b)(1) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.216, Commerce will conduct a CCR of an order upon receipt of information or a review request from an interested party for a review of an order which shows changed circumstances sufficient to warrant a review of the order.[8]

Under 19 CFR 351.216(c), Commerce will not review a final determination of an investigation less than 24 months after the date of publication of notice of the final determination unless it finds that good cause exists. However, 19 CFR 351.216(d) provides that if Commerce determines that good cause exists and the changed circumstances are sufficient to warrant a review, it will conduct a CCR, in accordance with 19 CFR 351.221.

Based on the record information, Commerce has determined that, pursuant to 19 CFR 351.216(c), good cause exists to conduct a CCR. Chuzhou Kanghua requested a CCR because of a change in name of the company and address not contemplated during the original investigation.[9] In addition, Chuzhou Kanghua explained and provided information to support its claim that there are no significant changes made to the production facility, management, customer/supplier relationship or any other aspect of operation.[10] Chuzhou Kanghua further explains that absent such a review, it would have difficulties in making entry of goods into the United States under the rate properly assigned to it.[11]

The information submitted by Chuzhou Kanghua demonstrates that its request is based solely on a change in the Chinese name of the company from ''Nantong Kanghua Chemical Co., Ltd'' to ''Kanghua Chemical Co., Ltd,'' which was approved on February 17, 2022.[12]

As such, based of the reasons outlined above, and the information provided on the record by Chuzhou Kanghua, we find good cause exists for initiating a CCR to determine whether Chuzhou Kanghua is the successor-in-interest to Nantong Kanghua, in accordance with 19 CFR 351.216(c) and (d). Therefore, in accordance with section 751(b)(1) of the Act and 19 CFR 351.216, we are initiating a CCR to determine whether Chuzhou Kanghua is the successor-in-interest to Nantong Kanghua for purposes of the *Order.*

Preliminary Results

Commerce is permitted by 19 CFR 351.221(c)(3)(ii) to combine the notice of initiation of a CCR and the preliminary results if Commerce concludes that expedited action is warranted. In this instance, because the record contains information necessary to make a preliminary finding, we find that expedited action is warranted and have combined the notice of initiation and the preliminary results.

Accordingly, pursuant to section 751(b) of the Act, we have conducted a successor-in-interest analysis in response to Chuzhou Kanghua's request. For a complete discussion of the information that Chuzhou Kanghua provided, and the complete successor-in-interest analysis, *see* the Preliminary Decision Memorandum.[13] A list of topics discussed in the Preliminary Decision Memorandum is included as the appendix to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Should our final results remain unchanged from these preliminary results, we will instruct U.S. Customs and Border Protection to assign entries of subject merchandise exported by Chuzhou Kanghua the AD cash deposit rate applicable to Nantong Kanghua. Commerce will issue its final results of the review in accordance with the time limits set forth in 19 CFR 351.216(e).

Public Comment

In accordance with 19 CFR 351.309(c)(1)(ii), interested parties may submit case briefs not later than 30 days after the date of publication of this notice. Rebuttal briefs, limited to issues raised in the case briefs, may be filed no later than seven days after the case briefs, in accordance with 19 CFR 351.309(d). Parties who submit case or rebuttal briefs are encouraged to submit with each argument: (1) a statement of the issue; (2) a brief summary of the arguments; and (3) a table of authorities.[14] All comments must be filed electronically using ACCESS. An electronically filed document must be received successfully in its entirety by ACCESS by 5:00 p.m. Eastern Time on the established deadline.[15] Note that Commerce has temporarily modified certain of its requirements for service documents containing business proprietary information, until further notice.[16]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request via ACCESS within 30 days of publication of this notice. Hearing requests should contain the following information: (1) the party's name, address, and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed. Oral presentations at the hearing will be limited to issues raised in the briefs. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm the date and the time of the hearing two days before the scheduled date.

Consistent with 19 CFR 351.216(e), we will issue the final results of this CCR no later than 270 days after the date on which this review was initiated, or within 45 days if all parties agree to our preliminary finding.

International Trade Administration

Advisory Committee on Supply Chain Competitiveness Solicitation of Nominations for Membership

AGENCY: International Trade Administration, U.S. Department of Commerce.

ACTION: Notice of an opportunity to apply for membership on the Advisory Committee on Supply Chain Competitiveness.

SUMMARY: The Department of Commerce, International Trade Administration (ITA), seeks nominations for immediate consideration to fill positions on the Advisory Committee on Supply Chain Competitiveness (''The Committee''). The Committee advises the Secretary on the necessary elements of a comprehensive policy approach to supply chain competitiveness. The Department intends for the Committee to continue to play a key role in formulating recommendations to address current global supply chain challenges, including identifying key bottlenecks in supply chains and actionable solutions to address them, advising on the latest advances in supply chain management technology and how to apply them to the current challenges in the economy, and developing long term recommendations to make supply chains for resilient. The Department seeks members who, by virtue of their current roles and past experience, bring a track record of effective senior executive leadership on issues impacting the U.S. and global supply chains.

DATES: ITA will accept nominations received by 5 p.m. on December 8, 2022, for membership on the Committee until the current two-year charter term ends November 9, 2023.

ADDRESSES: Richard Boll, Office of Supply Chain, Professional & Business Services, Room 11004, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; email: *richard.boll@trade.gov.*

FOR FURTHER INFORMATION CONTACT: Richard Boll, Office of Supply Chain, Professional & Business Services, Room 11004, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; email: *richard.boll@trade.gov.* Please visit the Advisory Committee on Supply Chain Competitiveness website at: *https://www.trade.gov/acscc.*

SUPPLEMENTARY INFORMATION:

I. Background

The Committee advises the Secretary on the necessary elements of a comprehensive policy approach to supply chain competitiveness designed to support national economic competitiveness and U.S. export growth, encouraging innovation, facilitate the movement of goods, and improve competitiveness of U.S. supply chains for goods and services in the domestic and global economy; and on regulatory policies and programs and investment priorities that affect the competitiveness of supply chains. The Committee provides detailed policy and technical advice, information, and recommendations to the Secretary regarding:

(1) national, state, or local factors in trade programs and policies that affect the efficient domestic and international operation and competitiveness of U.S. global supply chains from point of origin to destination;

(2) elements of national policies affecting the movement of goods, infrastructure, investment, and regulatory factors that affect supply chain competitiveness and sustainability; and

(3) information and data systems to generate metrics that can be used to quantify and improve supply chain performance.

The Department intends for the Committee to focus on the current challenges facing the supply chain during this charter term.

II. Membership

Members will be selected based on their demonstrated professional or personal qualifications and experience relevant to the functions and tasks of the Committee. Members shall be selected in a manner that ensures that the Committee remains balanced with respect to the diversity of the supply chain sector, including with regard to geographic location and company size. The diverse membership of the Committee ensures perspectives and expertise reflecting the full breadth of the Committee's responsibilities and, where possible, the Department of Commerce will also consider the ethnic, racial and gender diversity of the United States.

Members of the Committee shall represent companies, organizations, and stakeholders involved in the U.S. supply chain, with at least one individual representing each of the following: supply chain firms or their associations; users of supply chains (*e.g.,* retailers, distributors, manufacturers or other sectors); freight transportation providers; ports; and academia. Based on the balance of viewpoints currently represented on the Committee, representatives from the rail, express delivery/air freight, and high-tech manufacturing sectors are encouraged to apply.

Other than the experts from academia, all members shall serve in a representative capacity, expressing the views and interests of a U.S. company or U.S. organization with which they are affiliated (*e.g.,* as an employee or director), as well as its particular sector. Members serving in such a representative capacity are not Special Government Employees. The members from academia serve as experts and therefore are Special Government Employees (SGEs) and shall be subject to the ethical standards applicable to SGEs. Members who serve as SGEs must certify that they are not Federally-registered lobbyists.

Each member of the Committee must be a U.S. citizen and not registered as a foreign agent under the Foreign Agents Registration Act. All appointments are made without regard to political affiliation. Self-nominations will be accepted.

Members of the Committee will not be compensated for their services or reimbursed for their travel expenses. The Committee shall meet approximately quarterly, or as determined by the DFO. Members shall serve at the pleasure of the Secretary.

III. Request for Nominations

Requirements for all nominations. All nominations for membership on the Committee should provide the following information:

(1) Name, title, and relevant contact information (including phone and email address) of the individual requesting consideration; and

(2) An affirmative statement that the applicant is not required to register as a foreign agent under the Foreign Agents Registration Act of 1938.

Additional requirements for representative nominations. In addition to the above requirements for all nominations, nominations for representatives of companies, organizations, and stakeholders involved in the U.S. supply chain, including supply chain firms or their associations; users of supply chains (*e.g.,* retailers, distributors, manufacturers, or other sectors); freight transportation providers; and ports, should also provide the following information:

(1) A sponsor letter on the letterhead of the sponsoring U.S. company or U.S. organization to be represented, containing a brief description why the nominee should be considered for membership; the nominee maybe and employee, director, or other representative of a company or organization; consideration will be given to the nominee's current affiliation with the company or organization to be represented, as well as prior experience with other companies of organizations that demonstrate the ability to contribute to the work of the Committee:

(2) Short biography of nominee including credentials;

(3) Brief description of the U.S. company or U.S. organization to be represented and its activities and size (number of employees or members and annual sales, if applicable); and

(4) An affirmative statement that the applicant meets all Committee eligibility requirements for representative members, including that the applicant represents a U.S. company or U.S. organization.

a. For purposes of Committee eligibility, a U.S. company is at least 51 percent owned by U.S. persons.

b. For purposes of Committee eligibility, a U.S. organization is controlled by U.S. persons, as determined based on its board of directors (or comparable governing body), membership, and funding sources, as applicable.

Please do not send company or organizational brochures.

Additional requirements for academic nominations. In addition to the above requirements for all nominations, nominations for experts from academia should also provide the following information:

(1) A description of the nominee's area(s) of expertise;

(2) A concise Curriculum Vitae (CV) or resume that covers education, experience, and relevant publications and summarizes how this expertise addresses supply chain competitiveness;

(3) An affirmative statement that the applicant meets all Committee eligibility requirements.

Nominations may be emailed to *acscc@trade.gov.* Nominees selected for appointment to the Committee will be notified.

Dated: November 17, 2022.

Heather Sykes,

Acting Executive Director for Services.

Large Diameter Welded Pipe From Canada: Final Results of Antidumping Duty Administrative Review; 2020–2021

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) determines that the producer and/or exporter subject to this administrative review made sales of large diameter welded pipe from Canada in the United States at prices below normal value (NV) during the period of review (POR), May 1, 2020, through April 30, 2021.

DATES: Applicable November 23, 2022.

FOR FURTHER INFORMATION CONTACT: Irene Gorelik, AD/CVD Operations, Office VIII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–6905

SUPPLEMENTARY INFORMATION:

Background

On June 6, 2022, Commerce published the preliminary results of this administrative review.[1] The review covers one producer or exporter: Evraz Inc. NA (Evraz).[2] We invited interested parties to comment on the *Preliminary Results.* A summary of the events that occurred since Commerce published the *Preliminary Results,* as well as a full discussion of the issues raised by parties for these final results, are discussed in the Issues and Decision Memorandum.[3] Commerce conducted this review in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act).

Scope of the Order

The product covered by this *Order* is large diameter welded pipe from Canada. For a complete description of the scope of the *Order, see* the Issues and Decision Memorandum.

Analysis of Comments Received

All issues raised in the parties' case and rebuttal briefs are addressed in the Issues and Decision Memorandum and are listed in the appendix to this notice. The Issues and Decision Memorandum is a public document and is on-file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at *http://access.trade.gov/public/FRNoticesListLayout.aspx.*

Changes Since the Preliminary Results

Based on comments received from interested parties regarding our *Preliminary Results* and our review of the record to address those comments, we made changes to the preliminary weighted-average dumping margin calculations for Evraz, as detailed in the Issues and Decision Memorandum.[4]

Final Results of Review

As a result of this review, we determine the following weighted-

[1] *See Large Diameter Welded Pipe from Canada: Preliminary Results of Antidumping Duty Administrative Review and Partial Rescission of Administrative Review; 2020–2021,* 87 FR 34249 (June 6, 2022) (*Preliminary Results*), and accompanying Preliminary Decision Memorandum.

[2] In the underlying investigation, Commerce treated Evraz Inc. NA, Evraz Inc. NA Canada, and the Canadian National Steel Corporation (collectively, Evraz) as a single entity. *See Large Diameter Welded Pipe from Canada: Antidumping Duty Order,* 84 FR 18775, 18776 (May 2, 2019) (*Order*). There is no information on this record of this review that requires reconsideration of this single entity determination.

[3] *See* Memorandum, ''Issues and Decision Memorandum for the Final Results of Antidumping Duty Administrative Review: Large Diameter Welded Pipe from Canada; 2020–2021,'' dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

[4] *See* Issues and Decision Memorandum at 3 and Comments 2, 3, 5, and 6.

average dumping margin exists for the POR:

Exporter or producer	Weighted-average dumping margin (percent)
Evraz Inc. NA [5]	36.02

Disclosure

Commerce intends to disclose the calculations performed for these final results within five days of the date of publication of this notice in the **Federal Register**, in accordance with 19 CFR 351.224(b).

Assessment Rates

Commerce has determined, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries of subject merchandise in accordance with these final results of review.[6] Pursuant to 19 CFR 351.212(b)(1), Evraz reported the entered value of its U.S. sales such that we calculated importer-specific *ad valorem* duty assessment rates based on the ratio of the total amount of dumping calculated for the examined sales to the total entered value of the sales for which entered value was reported. Where the respondent's weighted-average dumping margin is zero or *de minimis* within the meaning of 19 CFR 351.106(c)(1), or an importer-specific assessment rate is zero or *de minimis,* we will instruct CBP to liquidate the appropriate entries without regard to antidumping duties.

Commerce's ''automatic assessment'' practice will apply to entries of subject merchandise during the POR produced by Evraz for which the company did not know that the merchandise it sold to the intermediary (*e.g.,* a reseller, trading company, or exporter) was destined for the United States. In such instances, we will instruct CBP to liquidate unreviewed entries at the all-others rate if there is no rate for the intermediate company(ies) involved in the transaction.[7] Commerce intends to issue assessment instructions to CBP no earlier than 41 days after the date of publication of the final results of this review in the **Federal Register**, in accordance with 19 CFR 356.8(a).

[5] As noted above, the Evraz single entity includes: Evraz Inc. NA; Evraz Inc. NA Canada; and the Canadian National Steel Corporation.

[6] *See* 19 CFR 351.212(b).

[7] For a full discussion of this practice, *see Antidumping and Countervailing Duty Proceedings: Assessment of Antidumping Duties,* 68 FR 23954 (May 6, 2003).

Cash Deposit Requirements

The following deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(2)(C) of the Act: (1) the cash deposit rate for Evraz Inc. NA will be equal to the weighted-average dumping margin that is established in the final results of this review; (2) for previously investigated or reviewed companies not subject to this review, the cash deposit rate will continue to be the company-specific rate published for the most recently completed segment of this proceeding in which the company participated; (3) if the exporter is not a firm covered in this review, a prior review, or the original less-than-fair-value (LTFV) investigation, but the producer is, the cash deposit rate will be the rate established for the most recently completed segment of the proceeding for the producer of the merchandise; and (4) the cash deposit rate for all other producers and exporters will continue to be 12.32 percent *ad valorem,* the all-others rate established in the LTFV investigation.[8] These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers Regarding the Reimbursement of Duties

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during the POR. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Administrative Protective Order

This notice also serves as a reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

[8] *See Order.*

Notification to Interested Parties

We are issuing and publishing this notice in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.221(b)(5).

Dated: November 17, 2022.

Lisa W. Wang,

Assistant Secretary for Enforcement and Compliance.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

Renewable Energy and Energy Efficiency Advisory Committee

AGENCY: International Trade Administration, U.S. Department of Commerce.

ACTION: Notice of an open meeting.

SUMMARY: The Renewable Energy and Energy Efficiency Advisory Committee (REEEAC or the Committee) will hold a hybrid meeting, accessible in-person and online, on Wednesday December 7, 2022, at the U.S. Department of Commerce in Washington, DC. The meeting is open to the public with registration instructions provided below. The meeting has a limited number of spaces for members of the public to attend in-person. Requests to attend in-person will be considered on a first-come first-served basis.

DATES: December 7, 2022, from approximately 9:30 a.m. to 3:30 p.m. Eastern Daylight Time EDT. Members of the public wishing to participate must register in advance with Cora Dickson at

the contact information below by 5:00 p.m. EDT on Friday, December 2, 2022, including any requests to make comments during the meeting or for accommodations or auxiliary aids.

ADDRESSES: To register, please contact Cora Dickson, Designated Federal Officer, Office of Energy and Environmental Industries (OEEI), Industry and Analysis, International Trade Administration, U.S. Department of Commerce at (202) 482–6083; email: *Cora.Dickson@trade.gov.* Registered participants will be emailed the login information for the meeting, which will be conducted via WebEx. Members of the public wishing to attend in-person must request in-person attendance in their registration by the firm deadline above.

FOR FURTHER INFORMATION CONTACT: Cora Dickson, Designated Federal Officer, Office of Energy and Environmental Industries (OEEI), Industry and Analysis, International Trade Administration, U.S. Department of Commerce at (202) 482–6083; email: *Cora.Dickson@trade.gov.* Registered participants joining virtually will be emailed the login information for the meeting, which will be accessible via WebEx. Registered participants joining in-person will be emailed instructions on accessing the designated meeting space.

SUPPLEMENTARY INFORMATION:

Background: The Secretary of Commerce established the REEEAC pursuant to discretionary authority and in accordance with the Federal Advisory Committee Act, as amended (5 U.S.C. App.), on July 14, 2010. The REEEAC was re-chartered most recently on May 27, 2022. The REEEAC provides the Secretary of Commerce with advice from the private sector on the development and administration of programs and policies to expand the export competitiveness of U.S. renewable energy and energy efficiency products and services. More information about the REEEAC, including the list of appointed members for this charter, is published online at *http://trade.gov/reeeac.*

On December 7, 2022, the REEEAC will hold the first meeting of its current charter term. The Committee, with officials from the Department of Commerce and other agencies, will discuss major issues affecting the competitiveness of the U.S. renewable energy and energy efficiency industries, determine sub-committee structure, and provide consultation on REEEAC leadership. An agenda will be made available by December 2, 2022 upon request to Cora Dickson.

The meeting will be open to the public and will be accessible to people with disabilities. All guests are required to register in advance by the deadline identified under the **DATE** caption. Requests for auxiliary aids must be submitted by the registration deadline. Last minute requests will be accepted but may not be possible to fill.

A limited amount of time before the close of the meeting will be available for oral comments from members of the public attending the meeting. To accommodate as many speakers as possible, the time for public comments will be limited to two to five minutes per person (depending on number of public participants). Individuals wishing to reserve speaking time during the meeting must contact Cora Dickson using the contact information above and submit a brief statement of the general nature of the comments, as well as the name and address of the proposed participant, by 5:00 p.m. EDT on Friday, December 2, 2022. If the number of registrants requesting to make statements is greater than can be reasonably accommodated during the meeting, the International Trade Administration may conduct a lottery to determine the speakers. Speakers are requested to submit a copy of their oral comments by email to Cora Dickson for distribution to the participants in advance of the meeting.

Any member of the public may submit written comments concerning the REEEAC's affairs at any time before or after the meeting. Comments may be submitted via email to the Renewable Energy and Energy Efficiency Advisory Committee, c/o: Cora Dickson, Designated Federal Officer, Office of Energy and Environmental Industries, U.S. Department of Commerce; *Cora.Dickson@trade.gov.* To be considered during the meeting, public comments must be transmitted to the REEEAC prior to the meeting. As such, written comments must be received no later than 5:00 p.m. EDT on Friday, December 2, 2022. Comments received after that date will be distributed to the members but may not be considered at the meeting.

Copies of REEEAC meeting minutes will be available within 30 days following the meeting.

Man K. Cho,

Deputy Director, Office of Energy and Environmental Industries.

Certain Cased Pencils From the People's Republic of China: Final Results of the Expedited Fifth Sunset Review of the Antidumping Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: As a result of this sunset review, the U.S. Department of Commerce (Commerce) finds that revocation of the antidumping duty (AD) order on certain cased pencils (pencils) from the People's Republic of China (China) would be likely to lead to the continuation or recurrence of dumping at the level indicated in the ''Final Results of Review'' section of this notice.

DATES: Applicable November 23, 2022.

FOR FURTHER INFORMATION CONTACT: Katherine Johnson, AD/CVD Operations, Office VIII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4929.

SUPPLEMENTARY INFORMATION:

Background

On August 1, 2022, Commerce published the notice of initiation of the fifth sunset review of the *Order*[1] on pencils from China pursuant to section 751(c)(2) of the Tariff Act of 1930, as amended (the Act).[2] On August 8, 15, and 16, 2022, respectively, Commerce received notices of intent to participate from the Dixon Ticonderoga Company (Dixon), Musgrave Pencil Company (Musgrave), and LaRose Industries LLC dba Cra-Z-Art (LaRose) (collectively, the domestic interested parties) within the deadline specified in 19 CFR 351.218(d)(1)(i).[3] These companies claimed interested party status under section 771(9)(C) of the Act as domestic producers of pencils in the United States.

Commerce received complete substantive responses from Dixon and Musgrave/LaRose on August 26 and 31, 2022, respectively, within the 30-day

[1] *See Antidumping Duty Order: Certain Cased Pencils from the People's Republic of China,* 59 FR 66909 (December 28, 1994) (*Order*).

[2] *See Initiation of Five-Year (Sunset) Reviews,* 87 FR 46943 (August 1, 2022).

[3] *See* Dixon's Letter, ''Dixon Notice of Intent to Participate (Fifth Review),'' dated August 8, 2022; Musgrave's Letter, ''Notice of Intent to Participate,'' dated August 15, 2022; and LaRose's Letter, ''Notice of Intent to Participate,'' dated August 16, 2022.

deadline specified in 19 CFR 351.218(d)(3)(i).[4] No respondent interested party submitted a substantive response within the 50-day deadline. On September 20, 2022, Commerce notified the U.S. International Trade Commission that it did not receive an adequate substantive response from respondent interested parties in this sunset review.[5] As a result, pursuant to section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C)(2), Commerce is conducting an expedited (120-day) sunset review of the *Order.*

Scope of the Order

The merchandise covered by the *Order* is certain cased pencils of any shape or dimension which are writing and/or drawing instruments that feature cores of graphite or other materials, encased in wood and/or man-made materials, whether or not decorated and whether or not tipped (*e.g.,* with erasers, *etc.*) in any fashion, and either sharpened or unsharpened.

The subject merchandise is currently provided for in item 9609.10.10 of the Harmonized Tariff Schedule of the United States (HTSUS). While the HTSUS subheading is provided for convenience and customs purposes, the written description of the scope of this order is dispositive.[6]

Analysis of Comments Received

All issues raised in this sunset review are addressed in the accompanying Issues and Decision Memorandum.[7] A list of topics discussed in the Issues and Decision Memorandum is included as an appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* A complete version of the Issues and Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Final Results of Review

Pursuant to sections 751(c)(1) and 752(c)(1) and (3) of the Act, Commerce determines that revocation of the *Order* would be likely to lead to the continuation or recurrence of dumping, and that the magnitude of the margin likely to prevail is up to 53.65 percent.

Administrative Protective Order

This notice also serves as the only reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

We are issuing and publishing these final results and notice in accordance with sections 751(c), 752(c), and 777(i)(1) of the Act, and 19 CFR 351.218(e)(1)(ii)(C)(2) and 19 CFR 351.221(c)(5)(ii).

Dated: November 17, 2022.

Lisa W. Wang,

Assistant Secretary for Enforcement and Compliance.

Appendix

List of Topics Discussed in the Issues and Decision Memorandum

I. Summary
II. Background
III. Scope of the *Order*
IV. History of the *Order*
V. Legal Framework
VI. Discussion of the Issues
  1. Likelihood of Continuation or Recurrence of Dumping
  2. Magnitude of the Dumping Margin Likely to Prevail
VII. Final Results of Expedited Fifth Sunset Review
VIII. Recommendation

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Public Meeting of the Ocean Exploration Advisory Board

AGENCY: Office of Oceanic and Atmospheric Research (OAR), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Notice of public meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda for a meeting of the Ocean Exploration Advisory Board (OEAB). OEAB members will discuss and provide advice on the Federal ocean exploration program, with a particular emphasis on the topics identified in the section on Matters to Be Considered.

DATES: The announced meeting is scheduled for Tuesday, November 29, 2022 from 12 p.m.–3 p.m. (EST).

ADDRESSES: This will be a virtual meeting. Information about how to participate will be posted to the OEAB website at *https://oeab.noaa.gov/.*

FOR FURTHER INFORMATION CONTACT: Mr. David Turner, Designated Federal Officer, Ocean Exploration Advisory Board, National Oceanic and Atmospheric Administration, *david.turner@noaa.gov* or (859) 327–9661.

SUPPLEMENTARY INFORMATION: NOAA established the OEAB under the Federal Advisory Committee Act (FACA) and legislation that gives the agency statutory authority to operate an ocean exploration program and to coordinate a national program of ocean exploration. The OEAB advises NOAA leadership on strategic planning, exploration priorities, competitive ocean exploration grant programs, and other matters as the NOAA Administrator requests.

OEAB members represent government agencies, the private sector, academic institutions, and not-for-profit institutions involved in all facets of ocean exploration—from advanced technology to citizen exploration.

In addition to advising NOAA leadership, NOAA expects the OEAB to help to define and develop a national program of ocean exploration—a network of stakeholders and partnerships advancing national priorities for ocean exploration.

Matters To Be Considered: The OEAB will receive an overview of Ocean Exploration operations and information about NOAA's Ocean Exploration Cooperative Institute; receive an update on the status of a dedicated ocean exploration vessel; and learn about collateral duties. The board will discuss and deliberate on the topics. The agenda and other meeting materials will be made available on the OEAB website at *https://oeab.noaa.gov/.*

Status: The meeting will be open to the public via remote access. Please

check the agenda on the OEAB website to confirm the public comment period schedule.

The OEAB expects that public statements at its meetings will not be repetitive of previously submitted verbal or written statements. In general, each individual or group making a verbal presentation will be limited to three minutes. The Designated Federal Officer must receive written comments by November 27, 2022, to provide sufficient time for OEAB review. Written comments received after November 27, 2022, will be distributed to the OEAB but may not be reviewed prior to the meeting date. Comments should be submitted to Designated Federal Officer *david.turner@noaa.gov.*

Special Accomodations: Requests for sign language interpretation or other auxiliary aids should be directed to the Designated Federal Officer by November 22, 2022.

David Holst,

Chief Financial and Administrative Officer, Office of Oceanic and Atmospheric Research, National Oceanic and Atmospheric Administration.

DEPARTMENT OF COMMERCE

Patent and Trademark Office

LIBRARY OF CONGRESS

United States Copyright Office

[Docket No.: PTO–C–2022–0035]

Study on Non-Fungible Tokens and Related Intellectual Property Law Issues

AGENCY: United States Patent and Trademark Office, Department of Commerce; United States Copyright Office, Library of Congress.

ACTION: Notice of inquiry; notice of public roundtables.

SUMMARY: The United States Patent and Trademark Office (USPTO) and the United States Copyright Office (USCO) (collectively, the Offices) are conducting a joint study regarding issues of intellectual property (IP) law and policy associated with non-fungible tokens (NFTs). The Offices seek public comments on these matters to assist in their work on IP policy related to NFTs and in conducting the study. In addition, the Offices are announcing a series of three public roundtables to allow them to gather further input.

DATES:

Written comments: Public comments must be received no later than 11:59 p.m. Eastern Time on January 9, 2023.

Public roundtables: Roundtable 1: Patents and NFTs. Roundtable 1 will be held on Tuesday, January 10, 2023. Requests to participate as a panelist must be received by 11:59 p.m. Eastern Time on December 21, 2022.

Roundtable 2: Trademarks and NFTs. Roundtable 2 will be held on Thursday, January 12, 2023. Requests to participate as a panelist must be received by 11:59 p.m. Eastern Time on December 21, 2022.

Roundtable 3: Copyright and NFTs. Roundtable 3 will be held on Wednesday, January 18, 2023. Requests to participate as a panelist must be received by 11:59 p.m. Eastern Time on December 21, 2022.

ADDRESSES:

Submission of written comments: For reasons of Government efficiency, comments must be submitted through the Federal eRulemaking Portal at *www.regulations.gov.* To submit comments via the portal, enter docket number PTO–C–2022–0035 on the homepage and click ''Search.'' The site will provide a search results page listing all documents associated with this docket. Find a reference to this request for information and click on the ''Comment Now!'' icon, complete the required fields, and enter or attach your comments. Attachments to electronic comments will be accepted in ADOBE® portable document format (PDF) or MICROSOFT WORD® format. Because comments will be made available for public inspection, information that the submitter does not desire to make public, such as an address or phone number, should not be included. Visit the Federal eRulemaking Portal for additional instructions on providing comments via the portal. If electronic submission of comments is not feasible due to a lack of access to a computer and/or the internet, please contact the Offices using the contact information below for special instructions on how to submit comments by other means.

Submission of business confidential information: Any submissions containing business confidential information must be marked ''confidential treatment requested'' and submitted through the Federal eRulemaking Portal. Submitters should provide an index listing the document(s) or information they would like the Offices to withhold. The index should identify the confidential document(s) by document number(s) and document title(s) and should identify the confidential information by description(s) and relevant page number(s) and/or section number(s) within a document. Submitters should provide a statement explaining their grounds for requesting non-disclosure of the information to the public as well. The Offices also request that submitters of business confidential information include a non-confidential version (either redacted or summarized) that will be posted on *www.regulations.gov* and available for public viewing. In the event that the submitter cannot provide a non-confidential version of their submission, the Offices request that the submitter post a notice in the docket stating that they have provided the Offices with business confidential information. Should a submitter fail either to docket a non-confidential version of their submission or to post a notice that they have provided business confidential information, the Offices will note the receipt of the submission on the docket with the submitter's organization or name (to the degree permitted by law) and the date of submission.

Anonymous submissions: The Offices will accept anonymous submissions. Enter ''N/A'' in the required fields if you wish to remain anonymous.

Public roundtables: The roundtables will be conducted virtually. Roundtable 1 (patents) and Roundtable 2 (trademarks) will be conducted using the Webex videoconferencing platform. Roundtable 3 (copyright) will be conducted using the Zoom videoconferencing platform. Requests to participate as a panelist at one or more of these roundtables must be submitted via email to *NFTStudySpeakingRequests@uspto.gov* and must be received by the dates listed above (at **DATES**). Requests to participate as a panelist at a roundtable made in any other form, including as part of comments submitted via the Federal eRulemaking Portal, will not be considered. If email submission of requests to participate as a panelist is not feasible, please contact the Offices using the contact information below for special instructions. The submission of written comments in response to this notice is not a prerequisite to participation as a panelist in a roundtable. Please note that the Offices will review all requests to participate and will endeavor to invite participants representing diverse viewpoints on the subject matter discussed at each roundtable. The Offices may not be able to accommodate all requests.

FOR FURTHER INFORMATION CONTACT: Kevin R. Amer, Senior Level Attorney, USPTO, *kevin.amer@uspto.gov,* 571–

272–9300; Branden Ritchie, Senior Level Attorney, USPTO, *branden.ritchie@uspto.gov,* 571–272–9300; Andrew Foglia, Senior Counsel, USCO, *afoglia@copyright.gov,* 202–707–8350; or Jenée Iyer, Counsel, USCO, *jiyer@copyright.gov,* 202–707–8350.

SUPPLEMENTARY INFORMATION: The USPTO and the USCO have been consulting with stakeholders and working on both U.S. and international policy relating to emerging technologies, such as NFTs. These efforts have been collaborative, and each office also engages in its own activities impacting its respective responsibilities. For example, USPTO's work in this area is being done as part of the USPTO's AI and Emerging Technology Partnership, see *https://www.uspto.gov/initiatives/artificial-intelligence/ai-and-emerging-technology-partnership-engagement-and-events,* and as part of separate consultations and collaborations. The USCO continues to examine copyright issues arising from emerging technologies such as NFTs, software-enabled devices, and artificial intelligence. On June 9, 2022, Senators Patrick Leahy and Thom Tillis sent a letter to the USPTO and the USCO requesting that the Offices conduct a joint study addressing various IP law and policy issues associated with NFTs. The letter urged the Offices to ''consult with the private sector, drawing from the technological, creative, and academic sectors.'' USPTO and USCO responded on July 8, 2022, stating that ''we will indeed conduct the study.'' The Senators' letter, and the agencies' response, is at *https://www.copyright.gov/laws/hearings/response-to-june-9-2022-letter.pdf.*

In furtherance of the study and consultations, the Offices request public comments on the questions provided below. Commenters need not respond to every question and may provide comments that are relevant to the subject matter of this study but that are not encompassed by the questions. Following the close of the public comment period, the Offices will hold a series of three public roundtables to allow members of the public to provide further input.

I. Topics for Public Comment

Note Regarding the Use of the Term ''NFT'': Merriam-Webster defines ''non-fungible token'' and ''NFT'' as ''a unique digital identifier that cannot be copied, substituted, or subdivided, that is recorded in a blockchain, and that is used to certify authenticity and ownership (as of a specific digital asset and specific rights relating to it).'' [1] The terms ''NFT'' and ''NFTs'' in the questions below should be read consistently with this general definition. Accordingly, for purposes of the questions below, the terms ''NFT'' and ''NFTs'' do not refer to the underlying asset,[2] but rather to the unique identifier.

To the extent that your responses contemplate a definition different from the Merriam-Webster definition, please provide your definition before answering the questions, and explain how it is relevant to your answers.

Questions for Public Comment: The Offices welcome comments from members of the public on any issues relevant to the subject matter of this study, and are particularly interested in answers to the following questions. To the extent practicable, in your written response, please identify which questions you are answering.

1. Please describe:

a. The current uses of NFTs in your field or industry, including the types of assets associated with NFTs (*e.g.,* digital assets, physical goods, services); and

b. Potential future applications of NFTs in your field or industry, including the types of assets that could be associated with NFTs (*e.g.,* digital assets, physical goods, services).

2. Please describe any IP-related challenges or opportunities associated with NFTs or NFT markets.

3. Please describe how NFT markets affect the production of materials subject to IP protection.

4. Please describe whether, how, and to what extent NFTs are used by or could be used by IP rights holders (including those who hold trademarks, patents, and/or copyrights) to:

a. Document the authenticity of an asset;

b. Document the seller's ownership of or authority to sell an asset;

c. Document the seller's authority to transfer any relevant or necessary IP rights associated with an asset; and

d. Document any limitations related to IP rights surrounding the sale, or the purchaser's use, of an asset.

5. Please describe whether, how, and to what extent NFTs present challenges for IP rights holders, or those who sell assets using NFTs, with respect to the activities described in Question 4 above.

6. Please describe whether, how, and to what extent NFTs are used by, could be used by, or present challenges or opportunities for IP rights holders (including those who hold trademarks, patents, and/or copyrights) to:

a. Obtain their IP rights;

b. Transfer or license their IP rights;

c. Exercise overall control and management of their IP rights (*e.g.,* digital rights management tools, mechanisms to facilitate the payment of royalties, etc.); and

d. Enforce their IP rights, including any mechanisms that could mitigate infringement or help ensure compliance with contractual terms associated with the sale of an asset.

7. Please describe how and to what extent copyrights, trademarks, and patents are relied on, or anticipated to be relied on, in your field or industry to:

a. Protect assets that are associated with NFTs;

b. Combat infringement associated with NFT-related assets offered by third parties; and

c. Ensure the availability of appropriate reuse of NFT-related assets.

8. Are current IP laws adequate to address the protection and enforcement of IP in the context of NFTs? If not, please explain why, including any gaps in current IP laws, and describe any legislation you believe should be considered to address these issues.

9. Please describe any IP-related impacts those in your field or industry have experienced in connection with actual or intended uses of NFTs. When relevant, please describe any legal disputes that have arisen in the following contexts, and the outcome of such disputes, including citations to any relevant judicial proceedings:

a. The relationship between the transfer of an NFT and the ownership of IP rights in the associated asset;

b. The licensing of IP rights in the asset associated with an NFT;

c. Infringement claims when either (i) an NFT is associated with an asset in which another party holds IP rights, or (ii) IP rights in the asset associated with an NFT are owned by the NFT creator;

d. The type and/or scope of IP protection afforded to the NFT creator, including when that party is not the creator of the associated asset; and

e. The application of one or more of the exclusive rights under 17 U.S.C. 106 to transactions involving NFTs.

10. Please describe any instances you have observed in which a party has sent or received:

a. A notification of claimed copyright infringement, counternotice or material misrepresentation, pursuant to 17 U.S.C. 512, in connection with an NFT; and

b. Other IP-related legal claims seeking the removal or reinstatement of NFT-associated materials.

[1] Merriam-Webster. (n.d.). NFT. Merriam-Webster.com dictionary, available at *www.merriam-webster.com/dictionary/NFT.*

[2] The Offices here use the word ''asset'' broadly and take no position on its meaning in the context of NFTs in other bodies of law.

For each such instance, please describe the nature and outcome of this claim or process, including whether the material was ultimately removed, and if so, whether the material subsequently reappeared. If an infringement or 17 U.S.C. 512(f) action was filed, please provide citations to the court docket and any relevant judicial decisions.

11. Please describe the extent to which adjustments are being made to IP portfolio planning and management in light of the emergence of NFTs.

12. Please describe any experiences in seeking IP protection for, or use of, assets associated with NFTs in foreign jurisdictions.

13. Please identify any additional IP issues associated with NFTs that you believe the Offices should consider in conducting this study.

II. Public Roundtables

The Offices will hold three public roundtables focused, respectively, on copyrights, patents, and trademarks. The roundtables are not expected to address broad topics in cryptocurrency or decentralized systems generally, but rather only IP considerations as they relate to NFTs.

Members of the public interested in participating as a panelist in one or more roundtables must submit such a request to *NFTStudySpeakingRequests@uspto.gov* and provide their name, professional affiliation, and contact information, and designate the roundtable(s) at which they wish to speak. Such requests must be submitted by the dates listed above (at **DATES**). Please note that written comments should not be submitted to this address; any such comments will not be considered.

The Offices will make every effort to ensure a broad range of stakeholder views are represented on the panels but may not be able to accommodate every request to participate. The Offices may also invite participation from individuals and entities who have not requested to participate. The submission of written comments in response to this notice is not a prerequisite to participation as a panelist in a roundtable.

The Offices will contact individuals selected to participate as panelists at the roundtables for additional information to aid in preparing for the roundtables. A tentative agenda for each roundtable will be posted at *https://www.uspto.gov/ip-policy/joint-study-intellectual-property-rights-and-non-fungible-tokens* and *https://copyright.gov/policy/nft-study* approximately one week before it takes place.

The roundtables will be livestreamed, and the Offices will post a link and instructions for members of the public to register to view them live. The USPTO will host Roundtable 1 (patents) and Roundtable 2 (trademarks). Additional information regarding these roundtables and instructions for registering to view them will be posted at *https://www.uspto.gov/ip-policy/joint-study-intellectual-property-rights-and-non-fungible-tokens.* The USCO will host Roundtable 3 (copyrights). Additional information regarding this roundtable and instructions for registering to view it will be posted at *https://copyright.gov/policy/nft-study.* The roundtables will also be video-recorded and transcribed, and copies of the recordings and transcripts will be available on the above USPTO and USCO websites.

Katherine K. Vidal,

Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office.

Dated: November 9, 2022.

Shira Perlmutter,

Register of Copyrights and Director, United States Copyright Office.

BILLING CODE 3510–16–P; 1410–30–P

BUREAU OF CONSUMER FINANCIAL PROTECTION

[Docket No. CFPB–2022–0078]

Agency Information Collection Activities: Comment Request

AGENCY: Bureau of Consumer Financial Protection.

ACTION: Notice and request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (PRA), the Consumer Financial Protection Bureau (Bureau or CFPB) is requesting the Office of Management and Budget's (OMB's) approval of a new information collection titled ''Generic Information Collection Plan for Foundational Research about Consumer Credit Markets and Household Financial Decision-Making.''

DATES: Written comments are encouraged and must be received on or before January 23, 2023 to be assured of consideration.

ADDRESSES: You may submit comments, identified by the title of the information collection, OMB Control Number (see below), and docket number (see above), by any of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments.
- *Email: PRA_Comments@cfpb.gov.* Include Docket No. CFPB–2022–0078 in the subject line of the email.
- *Mail/Hand Delivery/Courier:* Comment Intake, Consumer Financial Protection Bureau (Attention: PRA Office), 1700 G Street NW, Washington, DC 20552. Because paper mail in the Washington, DC area and at the Bureau is subject to delay, commenters are encouraged to submit comments electronically.

Please note that comments submitted after the comment period will not be accepted. In general, all comments received will become public records, including any personal information provided. Sensitive personal information, such as account numbers or Social Security numbers, should not be included.

FOR FURTHER INFORMATION CONTACT: Documentation prepared in support of this information collection request is available at *www.regulations.gov.* Requests for additional information should be directed to Anthony May, PRA Officer, at (202) 435–7278, or email: *CFPB_PRA@cfpb.gov.* If you require this document in an alternative electronic format, please contact *CFPB_Accessibility@cfpb.gov.* Please do not submit comments to these email boxes.

SUPPLEMENTARY INFORMATION:

Title of Collection: Generic Information Collection Plan for Foundational Research about Consumer Credit Markets and Household Financial Decision-Making.

OMB Control Number: 3170–00XX.

Type of Review: New collection.

Affected Public: Individuals or households; private sector: businesses or other for-profits; not-for-profits institutions.

Estimated Number of Respondents: 48,000.

Estimated Total Annual Burden Hours: 24,000.

Abstract: Under the Dodd-Frank Wall Street Reform and Consumer Protection Act, the Bureau is tasked with researching, analyzing, and reporting on topics relating to the Bureau's mission, including developments in markets for consumer financial products and services, consumer awareness, and consumer behavior. Under this generic information collection plan, the Bureau collects data through qualitative and quantitative methods, including focus groups, interviews, and controlled trials in field and laboratory settings. The primary purpose of research carried out under this generic clearance is for foundational research of an exploratory nature. This foundational research will be used for developmental and

informative purposes to increase the Bureau's understanding of consumer credit markets and household financial decision-making. In addition, research may be related to the Bureau's mission regarding financial education, including evaluating the effectiveness of financial education programs and understanding financial planning behaviors, including savings, spending, and investing behavior. The Bureau envisions that the research covered under this clearance will be basic foundational research about consumer credit markets and household finance.

Request for Comments: Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the Bureau, including whether the information will have practical utility; (b) The accuracy of the Bureau's estimate of the burden of the collection of information, including the validity of the methods and the assumptions used; (c) Ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Comments submitted in response to this notice will be summarized and/or included in the request for OMB's approval. All comments will become a matter of public record.

Anthony May,

Paperwork Reduction Act Officer, Consumer Financial Protection Bureau.

[FR Doc. 2022–25547 Filed 11–22–22; 8:45 am]

BILLING CODE 4810–AM–P

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; AmeriCorps Program Life Cycle Evaluation—Climate Change Bundled Evaluation

AGENCY: Corporation for National and Community Service.

ACTION: Notice of information collection; request for comment.

SUMMARY: The Corporation for National and Community Service, operating as AmeriCorps, has submitted a public information collection request (ICR) entitled AmeriCorps Program Life Cycle Evaluation—Climate Change Bundled Evaluation for review and approval in accordance with the Paperwork Reduction Act.

DATES: Written comments must be submitted to the individual and office listed in the **ADDRESSES** section by December 23, 2022.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Copies of this ICR, with applicable supporting documentation, may be obtained by calling Jehyra Asencio Yace at AmeriCorps at 202–956–9736 or by email to *JAsencioYace@cns.gov.*

SUPPLEMENTARY INFORMATION: The OMB is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of CNCS, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions;
- Propose ways to enhance the quality, utility, and clarity of the information to be collected; and
- Propose ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments

A 60-day notice requesting public comment was published in the **Federal Register** on August 17, 2022 at 87 FR 50613–50614. This comment period ended October 17, 2022. Six public comments were received for this notice. Most of the comments included concerns and suggestions related to the broad research questions included in the 60-day notice that are addressed in the more detailed full evaluation plan and instruments. For example, one commenter suggested including environmental justice, vulnerable communities' involvement, and barriers, which are included in the surveys and interview and focus group protocols. In response to comments suggesting directly confronting recruitment, living allowances, and match, those questions have been added to the instruments. A full summary of comments and responses is available in the *www.regulations.gov* docket.

Title of Collection: AmeriCorps Program Life Cycle Evaluation—Climate Change Bundled Evaluation.

OMB Control Number: 3045–NEW.

Type of Review: New.

Respondents/Affected Public: Grantee organization project director and staff, national service members, partner organization staff.

Total Estimated Number of Annual Responses: 611.

Total Estimated Number of Annual Burden Hours: 235.

Abstract: The purpose of this evaluation is to provide insight on the implementation of the climate change bundle programs and explore variation in activities for education and training, disaster response, conservation, wildfire mitigation, and energy efficiency. It will explore the ways in which the programs influence community resilience. It will also examine changes in attitudes and behaviors toward civic engagement among national service members and the development of job skills, including skills for green jobs. Finally, it will examine how the programs are serving vulnerable communities and at-risk populations. The research questions for this evaluation are:

1. How do programs/members connect their work to climate change?
2. To what extent does the program include opportunities to increase equity?
3. To what extent is the program operating as intended?
4. What are some promising practices and challenges in implementing the climate change grant programs?
5. What were the barriers and facilitators to meet the intended outcomes of the program?
6. What are the lessons learned that can inform the field or be useful for practitioners that work in this space?
7. What is the likelihood that the program will be sustained beyond the grant?
8. How were the communities and community members impacted by climate change prior to the program?
9. What types of communities are being helped by the climate change grant programs?
10. To what extent are programs focused on vulnerable populations and communities?
11. What are the demographic characteristics of national service members (*e.g.,* gender, age, race, ethnicity, education)?
12. What partner organizations are involved (*i.e.,* community organizations,

local agencies)? What are their roles in the program?

13. What is the breadth (number and type of partnership), quality, and quantity of the partnership(s) (number and frequency of joint activities and the strength)?

14. How were partnerships built and maintained?

15. How do grantee and sponsor organizations work with partners to build community resilience?

16. To what extent do the climate change grant programs: (a.) improve energy efficiency and increase the use of renewable energy sources? (b.) help communities prepare, respond, and recover from natural disasters and other climate change effects? (c.) preserve public lands and waterways and protect or restore biodiversity? (d.) increase community members' knowledge, attitudes, and behaviors around climate change? (e.) build capacity of the community to be resilient?

17. How do the climate change grant programs lead to increased civic engagement?

18. In what ways does participation in the climate change grant programs influence national service members' job skills development toward green jobs?

19. To what extent does participation in the climate change grant programs: (a.) increase national service members' functional and technical job skills? (b.) increase national service members' interest/willingness to pursue a career in a green job? (c.) lead to a job after their service? (d.) lead to a career in a green job after their service?

This bundled evaluation of grantees is being conducted by ICF through a contract with AmeriCorps; it will have an explicit emphasis on activities related to addressing climate change. By bundling, this evaluation combines a group of state commissions with similar program approaches into a single evaluation. Spanning 32 months, the evaluation includes up to 30 grantees to examine program design, implementation, and outcomes using surveys, interviews, and focus groups with a wide range of stakeholders including grantee staff, partner organizations, national service members, and community members. This is a new information collection.

Mary Hyde,

Director, Office of Research and Evaluation.

DEPARTMENT OF DEFENSE

Defense Acquisition Regulations System

[Docket Number DARS–2022–0021]

Information Collection Requirement; Defense Federal Acquisition Regulation Supplement; Rights in Technical Data and Computer Software (OMB Control Number 0704–0369)

AGENCY: Defense Acquisition Regulations System; Department of Defense (DoD).

ACTION: Notice.

SUMMARY: The Defense Acquisition Regulations System has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act.

DATES: Consideration will be given to all comments received by December 23, 2022.

SUPPLEMENTARY INFORMATION:

Title and OMB Number: Defense Federal Acquisition Regulation Supplement (DFARS) Subpart 227.71, Rights in Technical Data, and Subpart 227.72, Rights in Computer Software and Computer Software Documentation, and related provisions and clauses of the Defense Federal Acquisition Regulation Supplement (DFARS); OMB Control Number 0704–0369.

Affected Public: Businesses or other for-profit and not-for-profit institutions.

Respondent's Obligation: Required to obtain or retain benefits.

Reporting Frequency: On occasion.

Type of Request: Extension of a currently approved collection.

Number of Respondents: 75,250.

Responses Per Respondent: 13, approximately.

Annual Responses: 959,602.

Average Burden per Response: 1 hour, approximately.

Annual Response Burden Hours: 904,574.

Annual Recordkeeping Burden Hours: 90,600.

Total Annual Burden Hours: 995,174.

Needs and Uses: DFARS subparts 227.71 and 227.72 prescribe the use of solicitation provisions and contract clauses containing information collection requirements that are associated with rights in technical data and computer software. DoD needs this information to implement 10 U.S.C. 2320, Rights in technical data, and 10 U.S.C. 2321, Validation of proprietary data restrictions. DoD uses the information to recognize and protect contractor rights in technical data and computer software that are associated with privately funded developments; and to ensure that technical data delivered under a contract are complete and accurate and satisfy contract requirements.

DoD uses the following DFARS provisions and clauses in solicitations and contracts to require offerors and contractors to identify and mark data or software requiring protection from unauthorized use, release, or disclosure in accordance with 10 U.S.C. 2320:

252.227–7013, Rights in Technical Data—Noncommercial Items.

252.227–7014, Rights in Noncommercial Computer Software and Noncommercial Computer Software Documentation.

252.227–7017, Identification and Assertion of Use, Release, or Disclosure Restrictions.

252.227–7018, Rights in Noncommercial Technical Data and Computer Software—Small Business Innovation Research (SBIR) Program.

In accordance with 10 U.S.C. 2320(a)(2)(D), DoD may disclose limited rights data to persons outside the Government, or allow those persons to use data with use, release, or disclosure restrictions, if the recipient agrees not to further release, disclose, or use the data. Therefore, the clause at DFARS 252.227–7013, Rights in Technical Data—Noncommercial Items, requires the contractor to identify and mark data or software that it provides with limited rights.

In accordance with 10 U.S.C. 2321(b), contractors and subcontractors at any tier must be prepared to furnish written justification for any asserted restriction on the Government's rights to use or release data. The following DFARS clauses require contractors and subcontractors to maintain adequate records and procedures to justify any asserted restrictions:

252.227–7019, Validation of Asserted Restrictions—Computer Software.

252.227–7037, Validation of Restrictive Markings on Technical Data.

In accordance with 10 U.S.C. 2320, DoD must protect the rights of contractors that have developed items, components, or processes exclusively at private expense. Therefore, the clause at DFARS 252.227–7025, Limitations on the Use or Disclosure of Government-Furnished Information Marked with Restrictive Legends, requires a contractor or subcontractor to submit a use and non-disclosure agreement when it obtains data from the Government to which the Government has less than unlimited rights. In addition, DFARS 227.7103–7, Use and non-disclosure agreement, requires intended recipients

of technical data or computer software delivered to the Government with restrictions on use, modification, reproduction, release, performance, display, or disclosure, to sign the use and non-disclosure agreement at 227.7103–7(c) prior to release or disclosure of the data, unless the recipient is a Government contractor that requires access to a third parties data or software for the performance of a Government contract that contains the clause at 252.227–7025, Limitations on Use or Disclosure of Government-Furnished Information Marked with Restrictive Legends. According to 10 U.S.C. 2320(a)(2)(D), DoD may disclose limited rights data to persons outside the Government, or allow those persons to use limited rights data, if the recipient agrees not to further use, release, or disclose the data.

The provision at DFARS 252.227–7028, Technical Data or Computer Software Previously Delivered to the Government, requires an offeror to identify any technical data or computer software that it previously delivered, or will deliver, under any Government contract. DoD needs this information to avoid paying for rights in technical data or computer software that the Government already owns.

Comments and recommendations on the proposed information collection should be sent to Ms. Susan Minson, DoD Desk Officer, at *Oira_submission@omb.eop.gov.* Please identify the proposed information collection by DoD Desk Officer and the Docket ID number and title of the information collection.

You may also submit comments, identified by docket number and title, by the following method: Federal eRulemaking Portal: *https://www.regulations.gov.* Follow the instructions for submitting comments.

DoD Clearance Officer: Ms. Angela Duncan. Requests for copies of the information collection proposal should be sent to Ms. Duncan at *whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil.*

Jennifer D. Johnson,

Editor/Publisher, Defense Acquisition Regulations System.

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID DoD–2022–OS–0113]

Submission for OMB Review; Comment Request

AGENCY: Office of the Under Secretary of Defense for Personnel and Readiness (OUSD(P&R)), Department of Defense (DoD).

ACTION: 30-Day information collection notice.

SUMMARY: The DoD has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act.

DATES: Consideration will be given to all comments received by December 23, 2022.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Angela Duncan, 571–372–7574, *whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil.*

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: DoD-wide Generic Clearance for the Data Collection and Analysis for Qualitative and Quantitative Data Collection on Independent Review Commission Recommendation Evaluation; OMB Control Number 0704–HIRC.

Type of Request: New.

Number of Respondents: 45,000.

Responses per Respondent: 2.

Annual Responses: 90,000.

Average Burden per Response: 30 minutes.

Annual Burden Hours: 45,000.

Needs and Uses: This information collection activity provides a means to garner DoD-wide quantitative and qualitative data in support of the implementation and evaluation of the Secretary of Defense approved Independent Review Commission's (IRC) 82 recommendations. These information collections will be conducted by the OUSD (P&R), Office of General Counsel, Military Departments, Military Services, and/or National Guard Bureau (hereafter referred to as DoD). DoD will collect quantitative and qualitative data through data calls, surveys, interviews, site visits and other validated methods. Information collection efforts will align to the four IRC Lines of Effort (LOE): LOE 1—Accountability; LOE 2—Prevention; LOE 3: Climate and Culture; and, LOE 4: Victim Care and Support. Affected Public: Individuals or households.

Affected Public: Individuals or households.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Ms. Jasmeet Seehra.

You may also submit comments and recommendations, identified by Docket ID number and title, by the following method:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

Instructions: All submissions received must include the agency name, Docket ID number, and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

DoD Clearance Officer: Ms. Angela Duncan.

Requests for copies of the information collection proposal should be sent to Ms. Duncan at *whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil.*

Dated: November 18, 2022.

Office of the Secretary

Defense Advisory Committee on Military Personnel Testing (DACMPT); Notice of Federal Advisory Committee Meeting

AGENCY: Under Secretary of Defense for Personnel and Readiness, Department of Defense (DoD).

ACTION: Notice of Federal Advisory Committee meeting.

SUMMARY: The DoD is publishing this notice to announce that the following Federal Advisory Committee meeting of the DACMPT will take place.

DATES:

Day 1—Open to the public Thursday, December 15, 2022 from 8:30 a.m. to 5:15 p.m., Pacific Time.

Day 2—Open to the public Friday, December 16, 2022 from 8:30 a.m. to 1:30 p.m., Pacific Time.

ADDRESSES: Venue to-be-determined (TBD). Meeting details will be posted on: *https://dacmpt.com.*

FOR FURTHER INFORMATION CONTACT: Designated Federal Officer (DFO), Dr. Sofiya Velgach, (703) 697–9271 (Voice), 703 614–9272 (Facsimile), *osd.pentagon.ousd-p-r.mbx.dacmpt@mail.mil* (Email). Mailing address is Designated Federal Officer, Accession Policy, Office of the Under Secretary of Defense for Personnel and Readiness, Room 3D1066, The Pentagon, Washington, DC 20301–4000.

SUPPLEMENTARY INFORMATION: This meeting is being held under the provisions of the Federal Advisory Committee Act (FACA) of 1972 (5 U.S.C. Appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and 41 Code of Federal Regulations (CFR) 102–3.140 and 102–3.150.

Purpose of the Meeting: The purpose of the meetings is to provide an overview of the accession testing program to the new DACMPT members, review progress on the test development efforts, and gather advice on current testing capabilities. Additional information can be found at *https://dacmpt.com.*

Agenda

Day 1, Thursday, December 15, 2022

8:30 a.m.–8:45 a.m. Welcome and Opening Remarks, Dr. Sofiya Velgach, OASD(M&RA)/AP
8:45 a.m.–9:15 a.m. Accession Policy Introduction, TBD, OASD(M&RA)/AP
9:15 a.m.–10:00 a.m. New Member Briefing, Dr. Mary Pommerich, OPA/DTAC
10:00 a.m.–10:15 a.m. *Break*
10:15 a.m.–11:00 a.m. Milestones Briefing, Dr. Mary Pommerich, OPA/DTAC*
11:00 a.m.–12:00 p.m. ASVAB Form development, Dr. Matt Trippe, HumRRO
12:00 p.m.–1:30 p.m. *Lunch*
1:30 p.m.–3:30 p.m. Next Generation ASVAB/Testing, Dr. Mary Pommerich (OPA/DTAC)
  a. ASVAB Evaluation Plan, Dr. Mary Pommerich (OPA/DTAC)
  b. ASVAB/AFQT Validity Framework, Dr. Deirdre Knapp (HumRRO)
  c. Training Relevance Survey, Dr. Scott Oppler (HumRRO)
  d. Focus Groups, Dr. Kimberly Adams (HumRRO)
3:30 p.m.–3:45 p.m. *Break*
3:45 p.m.–4:15 p.m. Norming Requirements/Plans, Dr. Pamela Baumer, HumRRO
4:15 p.m.–5:00 p.m. Device expansion plans, Dr. Tia Fechter, OPA/DTAC
5:00 p.m.–5:15 p.m. *Public Comments*

Day 2, Friday, December 16, 2022

8:30 a.m.–9:30 a.m. ASVAB Adverse Impact, Dr. Greg Manley, OPA/DTAC
9:30 a.m.–10:30 a.m. AFQT Differential Prediction, Dr. Dan Putka, HumRRO
10:30 a.m.–10:45 a.m. *Break*
10:45 a.m.–11:15 a.m. Complex Reasoning, Dr. Mike Ingerick, HumRRO
11:15 a.m.–11:45 a.m. Computational Thinking, Dr. Kimberly Adams, HumRRO
11:45 a.m.–12:00 p.m. *Break*
12:00 p.m.–12:45 p.m. ASVAB CEP Update, TBD
12:45 p.m.–1:00 p.m. Future topics—Mary Pommerich, DTAC
1:00 p.m.–1:15 p.m. *Public Comments*
1:15 p.m.–1:30 p.m. Closing Comments, Dr. Nancy Tippins, Chair

Abbreviations Key

ASVAB—Armed Services Vocational Aptitude Battery
ASVAB CEP—ASVAB Career Exploration Program, student testing program provided free to high schools nation-wide to help students develop career exploration skills and used by recruiters to identify potential applicants for enlistment
AFQT—Armed Forces Qualification Test
CAT—Computer Adaptive Testing
HumRRO—Human Resources Research Organization
OASD(M&RA)/AP—Office of the Assistant Secretary of Defense (Manpower & Reserve Affairs)/Accession Policy
OPA/DTAC—Office of People Analytics/Defense Testing and Assessment Center

Meeting Accessibility: Public's Accessibility to the Meeting: Pursuant to 5 U.S.C. 552b and 41 CFR 102–3.140 through 102–3.165, and the availability of space, this meeting is open to the public. Seating availability is based on first-come, first-served basis. All members of the public, who wish to attend the public meeting, must contact the DFO no later than 12:00 p.m. on Monday, December 5, 2022, as listed in the **FOR FURTHER INFORMATION CONTACT** section.

Written Statements: Pursuant to 41 CFR 102–3.105(j) and 102–3.140 and section 10(a)(3) of the FACA, interested persons may submit written statements to the DACMPT at any time about its approved agenda or at any time on the DACMPT's mission. Written statements should be submitted to the DACMPT's DFO at the address or facsimile number listed in the **FOR FURTHER INFORMATION CONTACT** section. If statements pertain to a specific topic being discussed at the planned meeting, then these statements must be submitted no later than five (5) business days prior to the meeting in question. Written statements received after this date may not be provided to, or considered by the DACMPT until its next meeting. The DFO will review all timely submitted written statements and provide copies to all the DACMPT members before the meeting that is the subject of this notice. Please note that since the DACMPT operates under the provisions of the FACA, all submitted comments and public presentations will be treated as public documents and will be made available for public inspection. Opportunity for public comments will be provided at the end of each day. Public comments will be limited to 5 minutes per person, as time allows.

Dated: November 17, 2022.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

alex.esd.mbx.dd-dod-information-collections@mail.mil.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Qualitative Data Collection on Access to Food on and Near Military Installations; OMB Control Number 0704–AFMI.

Type of Request: New.

Number of Respondents: 360.

Responses per Respondent: 1.

Annual Responses: 360.

Average Burden per Response: 40 minutes.

Annual Burden Hours: 240.

Needs and Uses: The Military Community & Family Policy (MC&FP) within the DoD's Office of the Deputy Assistant Secretary of Defense is requesting Office of Management and Budget clearance for Qualitative Data Collection on Enlisted Service Member Access to Food on or Near Military Installations. MCFP will collect qualitative data through interviews and/or focus groups with Enlisted Active Duty Service members and spouses of Enlisted Active Duty Service members to understand the eating and spending patterns of the Enlisted military. Survey data has shown that 24% of the Active Duty Force report some level of food insecurity; the prevalence is higher in the Enlisted population and higher for those who live on-base than off-base. Similar data patterns were seen in the Active Duty Spouse Survey. At this time, little is known about the underlying causes of higher rates of food insecurity in the military, especially as it pertains to those who experience food insecurity while living on a base with dining facilities. Qualitative data collection will allow the DoD to collect data that will inform targeted initiatives to reduce food insecurity. Data collection will address the access to nutritious food and financial management of Service members and spouses' financial management practices.

Affected Public: Individuals or households.

Frequency: Once.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Ms. Jasmeet Seehra.

You may also submit comments and recommendations, identified by Docket ID number and title, by the following method:

DEPARTMENT OF DEFENSE

Department of the Navy

[Docket ID USN–2022–HQ–0020]

Submission for OMB Review; Comment Request

AGENCY: Department of the Navy, Department of Defense (DoD).

ACTION: 30-Day information collection notice.

SUMMARY: The DoD has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act.

DATES: Consideration will be given to all comments received by December 23, 2022.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Angela Duncan, 571–372–7574, *whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil.*

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Navy Casualty Assistance Forms; OPNAV Forms 1770/1, 1770/2, and 1770/3; OMB Control Number 0703–0076.

Type of Request: Extension without change.

Number of Respondents: 800.

Responses per Respondent: 2.5.

Annual Responses: 2,000.

Average Burden per Response: 39 minutes.

Annual Burden Hours: 1,300.

Needs and Uses: Navy Personnel Command is the Secretary of the Navy's office for the certification and administration of benefits in the event a Sailor is declared Duty Status, Whereabouts Unknown (DUSTWUN), Missing, or deceased—or incurs injuries or illness classified as Serious or Very Serious. Information must be collected from Sailors' Next of Kin in order to appropriately provide benefits and entitlements, as well as process travel requests and release their contact information to members of Congress. Respondents for each of the forms are family members and other individuals pertaining to a Sailor who dies or becomes seriously ill or injured. Responses are collected using OPNAV Form 1770/1, ''Consent to Release Information;'' OPNAV Form 1770/2, ''Next of Kin Travel Request;'' and OPNAV Form 1770/3, ''Next of Kin Information.'' The forms are completed in the presence of a Casualty Assistance Calls Officer (CACO), and the completed forms are retained by the CACO for submission to Navy Personnel Command. OPNAV 1770/1 is completed by a spouse, parent, or child of majority of a deceased Sailor to provide written permission to release their contact information to a member of Congress for condolence purposes. OPNAV 1770/2 is completed by a qualifying family member if they desire to travel to a funeral or command memorial of a deceased Sailor or travel to the bedside of a seriously ill or injured Sailor. OPNAV 1770/3 is completed for each Next of Kin and beneficiary in a deceased case. The form is used to collect pertinent data in order to process claims for benefits and entitlements. Each form that requires completion is done so through an interactive session between the CACO and the family member. If the family member does not desire to complete a form at a certain meeting, the event is rescheduled. The CACO will not leave the form with the family to fill out—the Navy takes pride in direct assistance to family members, and the form is talked through and completed at a time convenient for the family member. Completed forms are forwarded to case managers at Navy Casualty, and stored electronically in the Defense Casualty Information Processing System.

Affected Public: Individuals or households.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Ms. Jasmeet Seehra.

You may also submit comments and recommendations, identified by Docket ID number and title, by the following method:

• *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

Instructions: All submissions received must include the agency name, Docket ID number, and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

DoD Clearance Officer: Ms. Angela Duncan.

Requests for copies of the information collection proposal should be sent to Ms. Duncan at *whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil.*

Dated: November 18, 2022.

BILLING CODE 5001–06–P

DEPARTMENT OF EDUCATION

Federal Perkins Loan, Federal Work-Study, and Federal Supplemental Educational Opportunity Grant Programs; 2022–23 Award Year Deadline Dates; Correction

AGENCY: Federal Student Aid, Department of Education.

ACTION: Notice; correction.

SUMMARY: On January 31, 2022, the Department of Education (Department) published in the **Federal Register** a notice announcing the 2022–23 Award Year deadline dates (the ''Deadline Dates notice'') for the submission of requests and documents from postsecondary institutions for the Federal Perkins Loan (Perkins Loan) Program, Federal Work-Study (FWS), and Federal Supplemental Educational Opportunity Grant (FSEOG) programs (collectively, the ''Campus-Based programs''). We are correcting the Deadline Dates notice by providing updated mailing addresses for submission of documents. All other information in the Deadline Dates notice remains the same.

DATES: This correction is applicable on November 23, 2022.

FOR FURTHER INFORMATION CONTACT: Shannon Mahan, Division Chief, Grants & Campus-Based Partner Division, U.S. Department of Education, Federal Student Aid, 830 First Street NE, Union Center Plaza, Room 64C4, Washington, DC 20202–5453. Telephone: (202) 377–3019. Email: *shannon.mahan@ed.gov.*

If you are deaf, hard of hearing, or have a speech disability and wish to access telecommunications relay services, please dial 7–1–1.

SUPPLEMENTARY INFORMATION: On January 31, 2022, the Department published the Deadline Dates notice (87 FR 4871). On February 11, 2022, the Department published a correction to the Deadline Dates notice (87 FR 8007). The Department is further correcting the Deadline Dates notice by changing the mailing addresses for submission of documents, to reflect the updated mailing address information for the Common Origination and Disbursement (COD) School Relations Center provided in the Department's Electronic Announcement (GEN–22–48), published on July 25, 2022. All other information in the Deadline Dates notice remains the same.

Corrections

In FR Doc 2022–01897 on pages 4871–4873 of the **Federal Register** of January 31, 2022, we make the following corrections:

1. On page 4872, in item 2 of the table, under the heading ''How is it submitted?'':

A. Remove the mailing address following the words ''mailed to:'' and add, in its place, the following mailing address: ''FISAP Administrator, U.S. Department of Education, P.O. Box 1130, Fairfax, VA 22038''.

B. Remove the mailing address following the words ''mail to:'' and add, in its place, the following mailing address: ''FISAP Administrator, 4050 Legato Road #1100, Fairfax, VA 22033''.

2. On page 4872, in item 3 of the table, under the heading ''How is it submitted?'':

A. Remove the mailing address following the words ''mailed to:'' and add, in its place, the following mailing address: ''FISAP Administrator, U.S. Department of Education, P.O. Box 1130, Fairfax, VA 22038''.

B. Remove the mailing address following the words ''mail to:'' and add, in its place, the following mailing address: ''FISAP Administrator, 4050 Legato Road #1100, Fairfax, VA 22033''.

3. On page 4872, in item 4 of the table, under the heading ''How is it submitted?'':

A. Remove the mailing address following the words ''mailed to:'' and add, in its place, the following mailing address: ''FISAP Administrator, U.S. Department of Education, P.O. Box 1130, Fairfax, VA 22038''.

B. Remove the mailing address following the words ''mail to:'' and add, in its place, the following mailing address: ''FISAP Administrator, 4050 Legato Road #1100, Fairfax, VA 22033''.

4. On page 4872, in item 5 of the table, revise the text under the heading ''How is it submitted?'' to read as follows:

The application and agreement must be submitted electronically through the Common Origination and Disbursement website at *https://cod.ed.gov.* The signature page must be signed by the institution's chief executive officer with an original signature and sent with all application documents to the U.S. Department of Education using one of the following addresses:

FISAP Administrator, U.S. Department of Education, P.O. Box 1130, Fairfax, VA 22038

Or for overnight delivery, FISAP Administrator, 4050 Legato Road #1100, Fairfax, VA 22033.

5. On page 4872, in item 9 of the table, under the heading ''How is it submitted?'':

A. Remove the mailing address following the words ''mailed to:'' and add, in its place, the following mailing address: ''FISAP Administrator, U.S. Department of Education, P.O. Box 1130, Fairfax, VA 22038''.

B. Remove the mailing address following the words ''mail to:'' and add, in its place, the following mailing address: ''FISAP Administrator, 4050 Legato Road #1100, Fairfax, VA 22033''.

Program Authority: 20 U.S.C. 1070b *et seq* and 1087aa *et seq.;* 42 U.S.C. 2751 *et seq.*

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document and the Deadline Dates notice in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

[Docket No. ED–2022–SCC–0114]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Federal Perkins Loan Program Regulations and General Provisions Regulations

AGENCY: Federal Student Aid (FSA), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing an extension without change of a currently approved information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before December 23, 2022.

ADDRESSES: Written comments and recommendations for proposed information collection requests should be submitted within 30 days of publication of this notice. Click on this link *www.reginfo.gov/public/do/PRAMain* to access the site. Find this information collection request (ICR) by selecting ''Department of Education'' under ''Currently Under Review,'' then check the ''Only Show ICR for Public Comment'' checkbox. *Reginfo.gov* provides two links to view documents related to this information collection request. Information collection forms and instructions may be found by clicking on the ''View Information Collection (IC) List'' link. Supporting statements and other supporting documentation may be found by clicking on the ''View Supporting Statement and Other Documents'' link.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Beth Grebeldinger, (202) 377–4018.

SUPPLEMENTARY INFORMATION: The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Federal Perkins Loan Program Regulations and General Provisions Regulations.

OMB Control Number: 1845–0019.

Type of Review: Extension without change of a currently approved ICR.

Respondents/Affected Public: Private Sector; Individuals or Households; State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 11,616,710.

Total Estimated Number of Annual Burden Hours: 6,247,152.

Abstract: This is a request by the Department of Education (Department) for continued approval of the reporting, disclosure and records maintenance requirements that are contained in the Student Assistance General Provisions regulations, the Federal Perkins Loan program, the Federal Work-Study program, and the Federal Supplemental Educational Opportunity Grant program. The Department is seeking an extension of the currently approved information collection 1845–0019. There has been no change to the regulatory or statutory requirements.

Dated: November 18, 2022.

Juliana Pearson,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

[Docket No. ED–2022–SCC–0146]

Agency Information Collection Activities; Comment Request; ARP HCY SEA and LEA National Study Survey

AGENCY: Office of Elementary and Secondary Education (OESE), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing a new information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before January 23, 2023.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2022–SCC–0146. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. If the regulations.gov site is not available to the public for any reason, the Department will temporarily accept comments at *ICDocketMgr@ed.gov.* Please include the docket ID number and the title of the information collection request when requesting documents or submitting comments. Please note that comments submitted after the comment period will not be accepted. Written requests for information or comments submitted by postal mail or delivery should be addressed to the Manager of the Strategic Collections and Clearance Governance and Strategy Division, U.S. Department of Education, 400 Maryland Ave. SW, LBJ, Room 6W203, Washington, DC 20202–8240.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact John McLaughlin, (202) 401–0962.

SUPPLEMENTARY INFORMATION: The Department, in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. The Department is soliciting comments on the proposed information collection request (ICR) that is described below. The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be

processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: ARP HCY SEA and LEA National Study Survey.

OMB Control Number: 1810–NEW.

Type of Review: New ICR.

Respondents/Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 3,936.

Total Estimated Number of Annual Burden Hours: 2,290.

Abstract: The American Rescue Plan Act of 2021 (ARP) included an unprecedented $800 million to support the specific needs of homeless children and youth via the American Rescue Plan Elementary and Secondary School Emergency Relief—Homeless Children and Youth (ARP–HCY) Fund. State educational agencies (SEAs) and local educational agencies (LEAs) must use ARP–HCY funds within the three-year funding period, to identify and serve children and youth experiencing homelessness with wrap-around services addressing challenges related to COVID–19, to enable them to attend school and fully participate in school activities. As a one-time grant program with three years of funding administered as part of the American Rescue Plan, this new data collection for the U.S. Department of Education (the Department) seeks to understand how funds under this grant program are being used.

Specifically, the Department is seeking to learn about the distribution of ARP–HCY funds by SEAs, the characteristics of LEAs receiving funds, and the characteristics of LEAs who chose not to participate in the distribution of funds in each state. Additionally, the Department would like to gather information on how SEAs are using the funds that were set aside at the State level of the program and how LEAs are using funds received from this program.

This is a request for a new collection, the ARP–HCY National Study, which will utilize a survey of all SEAs (ARP–HCY SEA Survey) and a representative sample of state and national LEAs (ARP–HCY LEA Survey) to answer evaluation research questions.

Dated: November 17, 2022.

Kun Mullan,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

BILLING CODE 4000–01–P

ELECTION ASSISTANCE COMMISSION

Technical Guidelines Development Committee (TGDC) Notice of Vacancy

AGENCY: U.S. Election Assistance Commission (EAC).

ACTION: Notice of vacancy.

SUMMARY: Pursuant to 52 U.S.C. 20961 and the Charter of the EAC Technical Guidelines Development Committee (TGDC), the EAC is posting this notice of vacancy. Any vacancy in the TGDC shall be filled in the manner in which the original appointment was made. The vacancy shall be filled jointly by the EAC and the Director of the National Institute of Standards and Technology (NIST).

ADDRESSES: Pursuant to the TGDC Charter, the EAC will post the notice on the EAC website: *https://www.eac.gov.*

SUPPLEMENTARY INFORMATION:

TGDC Appointment Process

The Technical Guidelines Development Committee (TGDC) is a non-discretionary Federal Advisory Committee established by the Help America Vote Act of 2002 (HAVA), Public Law 107–252, 116 Stat. 1666 (2002). The TGDC assists the EAC in developing the Voluntary Voting System Guidelines (VVSG). The chairperson of the TGDC is the director of the National Institute of Standards and Technology (NIST). The TGDC is composed of 14 other members appointed jointly by EAC and the director of NIST.

HAVA mandates that the 14 other members appointed jointly by the EAC and NIST must include an equal number of members of the EAC Standards Board, members of the EAC Board of Advisors, and members of the Architectural and Transportation Barrier Compliance Board. The TGDC Charter requires that notice of vacancies on the Committee for those individuals jointly appointed by EAC and NIST will be published in the **Federal Register** as well as on the Commission's website. Pursuant to HAVA and the TGDC charter, the EAC is publishing this notice of vacancy on the TGDC for a representative of the EAC Standards Board. This vacancy shall be filled through a joint appointment of a current member of the EAC Standards Board by the EAC and NIST.

Camden Kelliher,

Associate Counsel, U.S. Election Assistance Commission.

BILLING CODE P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RM01–5–000]

Electronic Tariff Filings; Notice of Revision to Validation Error Codes Duplicative Version Numbers

Take notice that on December 17, 2022, the Commission will be deploying a new version of eTariff that will reject filings containing tariff records that duplicate a previously used Version number. The eTariff Implementation Guide requires a unique version number for a tariff record,[1] and this validation rule will ensure that filer has not duplicated a previously used version number. The eTariff error code for duplicating version numbers will be 177 with the error notice ''Record Version Number cannot be duplicated.''

This error code will be added to the Validation Error Codes posted on the Commission's eTariff website (*https://www.ferc.gov/ferc-online/etariff*), at *https://www.ferc.gov/sites/default/files/2020-05/Validation%20Error%20Codes.csv*. Filings containing duplicative version numbers will receive the following rejection error in the Notice of Rejection email.

—Error List

Failed Code 177: Record Version Number cannot be duplicated.

For more information, contact the eTariff Advisory Staff at *etariffresponse@ferc.gov.*

Dated: November 17, 2022.

Debbie-Anne A. Reese,

Deputy Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP23–13–000]

Columbia Gas Transmission, LLC; Notice of Request Under Blanket Authorization and Establishing Intervention and Protest Deadline

Take notice that on November 7, 2022, Columbia Gas Transmission, LLC (Columbia), 700 Louisiana Street, Suite 1300, Houston, Texas 77002, filed in the above referenced docket, a prior notice pursuant to Section 157.205, 157.208 and 157.216 of the Federal Energy Regulatory Commission's regulations under the Natural Gas Act and the blanket certificate issued by the Commission in Docket No. CP83–76–000,[1] seeking authorization to replace approximately 1.2 miles of 18-inch steel pipeline and related facilities on its existing Line R300 lateral pipeline and to reduce the maximum allowable operating pressure (MAOP) from 200 pounds per square inch gauge (psig) to 125 psig in Lawrence County, Ohio (Project).

Columbia asserts that Replacing Line R300 with new pipeline will ensure compliance with the Pipeline and Hazardous Materials Safety Administration and enable Columbia to continue to provide reliable, safe, and efficient service. The proposed construction is estimated to cost approximately $3,700,000 all as more fully set forth in the request which is on file with the Commission and open to public inspection.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact the Federal Energy Regulatory Commission at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

Any questions concerning this application should be directed to David A. Alonzo, Manager, Project Authorizations, Columbia Gas Transmission, LLC, 700 Louisiana Street, Suite 1300, Houston, Texas, 77002, by telephone (832) 320–5477, or by email *david_alonzo@tcenergy.com.*

Public Participation

There are three ways to become involved in the Commission's review of this project: you can file a protest to the project, you can file a motion to intervene in the proceeding, and you can file comments on the project. There is no fee or cost for filing protests, motions to intervene, or comments. The deadline for filing protests, motions to intervene, and comments is 5:00 p.m. Eastern Time on January 16, 2023. How to file protests, motions to intervene, and comments is explained below.

Protests

Pursuant to section 157.205 of the Commission's regulations under the NGA,[2] any person [3] or the Commission's staff may file a protest to the request. If no protest is filed within the time allowed or if a protest is filed and then withdrawn within 30 days after the allowed time for filing a protest, the proposed activity shall be deemed to be authorized effective the day after the time allowed for protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request for authorization will be considered by the Commission.

Protests must comply with the requirements specified in section 157.205(e) of the Commission's regulations,[4] and must be submitted by the protest deadline, which is January 16, 2023. A protest may also serve as a motion to intervene so long as the protestor states it also seeks to be an intervenor.

Interventions

Any person has the option to file a motion to intervene in this proceeding. Only intervenors have the right to request rehearing of Commission orders issued in this proceeding and to subsequently challenge the Commission's orders in the U.S. Circuit Courts of Appeal.

To intervene, you must submit a motion to intervene to the Commission in accordance with Rule 214 of the Commission's Rules of Practice and Procedure [5] and the regulations under the NGA [6] by the intervention deadline for the project, which is January 16, 2023. As described further in Rule 214, your motion to intervene must state, to the extent known, your position regarding the proceeding, as well as your interest in the proceeding. For an individual, this could include your status as a landowner, ratepayer, resident of an impacted community, or recreationist. You do not need to have property directly impacted by the project in order to intervene. For more information about motions to intervene, refer to the FERC website at *https://www.ferc.gov/resources/guides/how-to/intervene.asp.*

All timely, unopposed motions to intervene are automatically granted by operation of Rule 214(c)(1). Motions to intervene that are filed after the intervention deadline are untimely and may be denied. Any late-filed motion to intervene must show good cause for being late and must explain why the time limitation should be waived and provide justification by reference to factors set forth in Rule 214(d) of the Commission's Rules and Regulations. A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies (paper or electronic) of all documents filed by the applicant and by all other parties.

Comments

Any person wishing to comment on the project may do so. The Commission considers all comments received about the project in determining the appropriate action to be taken. To ensure that your comments are timely and properly recorded, please submit your comments on or before January 16, 2023. The filing of a comment alone will not serve to make the filer a party to the proceeding. To become a party, you must intervene in the proceeding.

How To File Protests, Interventions, and Comments

There are two ways to submit protests, motions to intervene, and comments. In both instances, please reference the Project docket number CP23–13–000 in your submission.

(1) You may file your protest, motion to intervene, and comments by using the Commission's eFiling feature, which is located on the Commission's website (*www.ferc.gov*) under the link to Documents and Filings. New eFiling

[1] *Columbia Gas Transmission Corporation* (predecessor to Columbia Gas Transmission, LLC), 22 FERC ¶ 62,029 (1983).

[2] 18 CFR 157.205.

[3] Persons include individuals, organizations, businesses, municipalities, and other entities. 18 CFR 385.102(d).

[4] 18 CFR 157.205(e).

[5] 18 CFR 385.214.

[6] 18 CFR 157.10.

users must first create an account by clicking on ''eRegister.'' You will be asked to select the type of filing you are making; first select General'' and then select ''Protest'', ''Intervention'', or ''Comment on a Filing.'' The Commission's eFiling staff are available to assist you at (202) 502–8258 or *FercOnlineSupport@ferc.gov.*

(2) You can file a paper copy of your submission. Your submission must reference the Project docket number CP23–13–000.

To mail via USPS, use the following address: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426

To mail via any other courier, use the following address: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852

Protests and motions to intervene must be served on the applicant either by mail or email (with a link to the document) at: David A. Alonzo, Manager, Project Authorizations, Columbia Gas Transmission, LLC, 700 Louisiana Street, Suite 1300, Houston, Texas 77002, by telephone (832) 320–5477, or by email *david_alonzo@tcenergy.com.* Any subsequent submissions by an intervenor must be served on the applicant and all other parties to the proceeding. Contact information for parties can be downloaded from the service list at the eService link on FERC Online.

Tracking the Proceeding

Throughout the proceeding, additional information about the project will be available from the Commission's Office of External Affairs, at (866) 208–FERC, or on the FERC website at *www.ferc.gov* using the ''eLibrary'' link as described above. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. For more information and to register, go to *www.ferc.gov/docs-filing/esubscription.asp.*

Dated: November 17, 2022.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EF23–2–000]

Western Area Power Administration; Notice of Filing

Take notice that on November 10, 2022, Western Area Power Administration submits tariff filing per 300.10: UGP_PSMBP–ED_WAPA203–20220621 to be effective 1/1/2023.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. On or before the comment date, it is not necessary to serve motions to intervene or protests on persons other than the Applicant.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact the Federal Energy Regulatory Commission at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

Comment Date: 5:00 p.m. Eastern Time on December 12, 2022.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP22–495–000]

Transcontinental Gas Pipe Line Company, LLC; Notice of Intent To Prepare an Environmental Impact Statement for the Proposed Texas to Louisiana Energy Pathway Project, Request for Comments on Environmental Issues, Notice of Public Scoping Session, and Schedule for Environmental Review

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental impact statement (EIS) that will discuss the environmental impacts of the Texas to Louisiana Energy Pathway Project (Project) involving construction and operation of facilities by Transcontinental Gas Pipe Line Company, LLC (Transco) in Fort Bend and Hardin Counties, Texas. The Commission will use this EIS in its decision-making process to determine whether the Project is in the public convenience and necessity. The schedule for preparation of the EIS is discussed in the Schedule for Environmental Review section of this notice.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies regarding the project. As part of the National Environmental Policy Act (NEPA) review process, the Commission takes into account concerns the public may have about proposals and the environmental impacts that could result from its action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. This gathering of public input is referred to as ''scoping.'' The main goal of the scoping process is to focus the analysis in the environmental document on the

important environmental issues. Additional information about the Commission's NEPA process is described below in the NEPA Process and the EIS section of this notice.

By this notice, the Commission requests public comments on the scope of issues to address in the environmental document, including comments on potential alternatives and impacts, and any relevant information, studies, or analyses of any kind concerning impacts affecting the quality of the human environment. To ensure that your comments are timely and properly recorded, please submit your comments so that the Commission receives them in Washington, DC on or before 5:00 p.m. Eastern Time on December 16, 2022. Comments may be submitted in written or oral form. Further details on how to submit comments are provided in the Public Participation section of this notice.

If you are a landowner receiving this notice, a pipeline company representative may contact you about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The company would seek to negotiate a mutually acceptable easement agreement. You are not required to enter into an agreement. However, if the Commission approves the Project, the Natural Gas Act conveys the right of eminent domain to the company. Therefore, if you and the company do not reach an easement agreement, the pipeline company could initiate condemnation proceedings in court. In such instances, compensation would be determined by a judge in accordance with state law. The Commission does not grant, exercise, or oversee the exercise of eminent domain authority. The courts have exclusive authority to handle eminent domain cases; the Commission has no jurisdiction over these matters.

Transco provided landowners with a fact sheet prepared by the FERC entitled ''An Interstate Natural Gas Facility On My Land? What Do I Need To Know?'' which addresses typically asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. This fact sheet along with other landowner topics of interest are available for viewing on the FERC website (*www.ferc.gov*) at the Landowner Topics link.

Public Participation

There are four methods you can use to submit your comments to the Commission. The Commission encourages electronic filing of comments and has staff available to assist you at (866) 208–3676 or *FercOnlineSupport@ferc.gov.* Please carefully follow these instructions so that your comments are properly recorded.

(1) You can file your comments electronically using the eComment feature, which is located on the Commission's website (*www.ferc.gov*) under the link to FERC Online. Using eComment is an easy method for submitting brief, text-only comments on a project;

(2) You can file your comments electronically by using the eFiling feature, which is also on the Commission's website (*www.ferc.gov*) under the link to FERC Online. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on ''eRegister.'' You will be asked to select the type of filing you are making; a comment on a particular project is considered a ''Comment on a Filing'';

(3) You can file a paper copy of your comments by mailing them to the Commission. Be sure to reference the project docket number (CP22–495–000) on your letter. Submissions sent via the U.S. Postal Service must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852; and

(4) In lieu of sending written comments, the Commission invites you to attend the public scoping session its staff will conduct in the project area, scheduled as follows:

Date and time	Location
Thursday, December 15, 2022, 5:00 p.m.–8:00 p.m.	George Memorial Library, 1001 Golfview Drive, Richmond, Texas, (281) 341–2605.

The primary goal of these scoping sessions is to have you identify the specific environmental issues and concerns that should be considered in the environmental document. Individual oral comments will be taken on a one-on-one basis with a court reporter. This format is designed to receive the maximum amount of oral comments in a convenient way during the timeframe allotted.

The scoping session is scheduled from 5:00 p.m. to 8:00 p.m. Central Time Zone. You may arrive at any time after 5:00 p.m. There will not be a formal presentation by Commission staff when the session opens. If you wish to speak, the Commission staff will hand out numbers in the order of your arrival. Comments will be taken until 8:00 p.m. However, if no additional numbers have been handed out and all individuals who wish to provide comments have had an opportunity to do so, staff may conclude the session at 7:30 p.m. Please see appendix 2 for additional information on the session format and conduct.[1]

Your scoping comments will be recorded by a court reporter (with FERC staff or representative present) and become part of the public record for this proceeding. Transcripts will be publicly available on FERC's eLibrary system (see the last page of this notice for instructions on using eLibrary). If a significant number of people are interested in providing oral comments in the one-on-one settings, a time limit of 5 minutes may be implemented for each commentor. Although there will not be a formal presentation, Commission staff will be available throughout the scoping session to answer your questions about the environmental review process.

It is important to note that the Commission provides equal consideration to all comments received, whether filed in written form or provided orally at a scoping session.

Additionally, the Commission offers a free service called eSubscription. This service provides automatic notification of filings made to subscribed dockets, document summaries, and direct links to the documents. Go to *https://www.ferc.gov/ferc-online/overview* to register for eSubscription.

Summary of the Proposed Project, the Project Purpose and Need, and Expected Impacts

Transco proposes to construct and operate one new compressor station and modify one existing compressor station. The Project would increase the firm capacity of the system from 171,400 dekatherms per day (Dth/day) to 364,400 Dth/day. According to Transco,

[1] The appendices referenced in this notice will not appear in the **Federal Register**. Copies of the appendices were sent to all those receiving this notice in the mail and are available at *www.ferc.gov* using the link called ''eLibrary''. For instructions on connecting to eLibrary, refer to the last page of this notice. At this time, the Commission has suspended access to the Commission's Public Reference Room due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll free, (886) 208–3676 or TTY (202) 502–8659.

its Project would provide year-round firm transportation capacity on Transco's mainline from the Valley Crossing Interconnection to the Station 65 Pooling Point.

The Project would consist of the following facilities:

- construction of a new 15,900-horsepower compressor station in Fort Bend County, Texas, consisting of a natural gas-fired turbine-driven compression unit with cooling (Compressor Station 33);
- modification of six existing compressors at Compressor Station 40 in Hardin County, Texas, to accommodate new flow conditions resulting from the Project; and
- programming updates (not involving the installation of any facilities or any ground disturbance) at existing Compressor Station 23 in Victoria County, Texas, to allow for enhanced system operation in the northbound direction.

The general location of the Project facilities is shown in appendix 1.[2]

Based on the environmental information provided by Transco, construction of the proposed facilities would disturb about 72 acres of land for the aboveground facilities. Following construction, Transco would maintain about 17 acres for operation of the proposed new Project facilities; the remaining acreage would be restored and revert to former uses. During construction of the aboveground facility, the temporary workspace would be utilized for contractor staging areas. No off-site contractor yards or staging areas would be required for construction of the Project. Existing public roads would be used to access the proposed compressor station site, and no new temporary or permanent access roads are proposed.

Based on an initial review of Transco's proposal, Commission staff have identified several expected impacts that deserve attention in the EIS. The Project would result in impacts on air quality resulting from construction and operational emissions of greenhouse gases, and potentially from downstream emissions resulting from the increased firm capacity of the system. Additionally, the Project is within one environmental justice community and is within 0.5 mile of another environmental justice community. Only agricultural land would be impacted by the Project. It is not anticipated that the Project would impact waterbodies, wetlands, or archeological sites.

The NEPA Process and the EIS

The EIS issued by the Commission will discuss impacts that could occur as a result of the construction and operation of the proposed Project under the relevant general resource areas:

- geology and soils;
- water resources and wetlands;
- vegetation and wildlife;
- threatened and endangered species;
- cultural resources;
- socioeconomics and environmental justice;
- land use;
- air quality and noise; and
- reliability and safety.

Commission staff will also make recommendations on how to lessen or avoid impacts on the various resource areas. Your comments will help Commission staff focus its analysis on the issues that may have a significant effect on the human environment.

The EIS will present Commission staff's independent analysis of the issues. As of the date of this notice, there are no cooperating agencies in the preparation of the EIS.[3] Staff will prepare a draft EIS which will be issued for public comment. Commission staff will consider all timely comments received during the comment period on the draft EIS and revise the document, as necessary, before issuing a final EIS. Any draft and final EIS will be available in electronic format in the public record through eLibrary[4] and the Commission's natural gas environmental documents web page (*https://www.ferc.gov/industries-data/natural-gas/environment/environmental-documents*). If eSubscribed, you will receive instant email notification when the environmental document is issued.

Alternatives Under Consideration

The EIS will evaluate reasonable alternatives that are technically and economically feasible and meet the purpose and need for the proposed action.[5] Alternatives currently under consideration include:

- the no-action alternative, meaning the Project is not implemented;
- system alternatives, including alternative system configurations, pipeline loops, and alternative compression configurations; and
- site location alternatives for the new compressor station.

With this notice, the Commission requests specific comments regarding any additional potential alternatives to the proposed action or segments of the proposed action. Please focus your comments on reasonable alternatives (including alternative facility sites and pipeline routes) that meet the Project objectives, are technically and economically feasible, and avoid or lessen environmental impact.

Consultation Under Section 106 of the National Historic Preservation Act

In accordance with the Advisory Council on Historic Preservation's implementing regulations for section 106 of the National Historic Preservation Act, the Commission is using this notice to initiate consultation with the applicable State Historic Preservation Office(s), and other government agencies, interested Indian tribes, and the public to solicit their views and concerns regarding the Project's potential effects on historic properties.[6] The Project EIS will document findings on the impacts on historic properties and summarize the status of consultations under section 106.

Schedule for Environmental Review

On August 23, 2022, the Commission issued its Notice of Application for the Project. Among other things, that notice alerted other agencies issuing federal authorizations of the requirement to complete all necessary reviews and to reach a final decision on the request for a federal authorization within 90 days of the date of issuance of the Commission staff's final EIS for the Project. This notice identifies the Commission staff's planned schedule for completion of the final EIS for the Project, which is based on an issuance of the draft EIS in June 2023.

Issuance of Notice of Availability of the final EIS November 30, 2023

[2] The appendices referenced in this notice will not appear in the **Federal Register**. Copies of the appendices were sent to all those receiving this notice in the mail and are available at *www.ferc.gov* using the link called ''eLibrary''. For instructions on connecting to eLibrary, refer to the last page of this notice. At this time, the Commission has suspended access to the Commission's Public Reference Room due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll free, (886) 208–3676 or TTY (202) 502–8659.

[3] The Council on Environmental Quality regulations addressing cooperating agency responsibilities are at title 40 Code of Federal Regulations (CFR), section 1501.8. (2021).

[4] For instructions on connecting to eLibrary, refer to the last page of this notice.

[5] 40 CFR 1508.1(z).

[6] The Advisory Council on Historic Preservation's regulations are at title 36, Code of Federal Regulations, part 800. Those regulations define historic properties as any prehistoric or historic district, site, building, structure, or object included in or eligible for inclusion in the National Register of Historic Places.

90-day Federal Authorization Decision Deadline[7] February 28, 2024

If a schedule change becomes necessary for the final EIS, an additional notice will be provided so that the relevant agencies are kept informed of the Project's progress.

Permits and Authorizations

The table below lists the anticipated permits and authorizations for the Project required under federal law. This list may not be all-inclusive and does not preclude any permit or authorization if it is not listed here. Agencies with jurisdiction by law and/or special expertise may formally cooperate in the preparation of the Commission's EIS and may adopt the EIS to satisfy its NEPA responsibilities related to this Project. Agencies that would like to request cooperating agency status should follow the instructions for filing comments provided under the Public Participation section of this notice.

Agency	Permit/consultation
FERC	Certificate of Public Convenience and Necessity.
U.S. Fish and Wildlife Service	Section 7 of the Endangered Species Act; Migratory Bird Treaty Act; and Bald and Golden Eagle Protection Act.
Texas Historical Commission	National Historic Preservation Act (NHPA) Section 106 Cultural Resources Review.
U.S. Army Corps of Engineers (delegated to Texas Commission on Environmental Quality).	Clean Water Act, water quality certification.

Environmental Mailing List

This notice is being sent to the Commission's current environmental mailing list for the Project which includes federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American Tribes; other interested parties; and local libraries and newspapers. This list also includes all affected landowners (as defined in the Commission's regulations) who are potential right-of-way grantors, whose property may be used temporarily for Project purposes, or who own homes within certain distances of aboveground facilities, and anyone who submits comments on the Project and includes a mailing address with their comments. Commission staff will update the environmental mailing list as the analysis proceeds to ensure that Commission notices related to this environmental review are sent to all individuals, organizations, and government entities interested in and/or potentially affected by the proposed Project. State and local government representatives should notify their constituents of this proposed Project and encourage them to comment on their areas of concern.

If you need to make changes to your name/address, or if you would like to remove your name from the mailing list, please complete one of the following steps:

(1) Send an email to *GasProjectAddressChange@ferc.gov* stating your request. You must include the docket number CP22–495–000 in your request. If you are requesting a change to your address, please be sure to include your name and the correct address. If you are requesting to delete your address from the mailing list, please include your name and address as it appeared on this notice. This email address is unable to accept comments.

OR

(2) Return the attached ''Mailing List Update Form'' (appendix 2).

Additional Information

Additional information about the Project is available from the Commission's Office of External Affairs, at (866) 208–FERC, or on the FERC website at *www.ferc.gov* using the eLibrary link. Click on the eLibrary link, click on ''General Search'' and enter the docket number in the ''Docket Number'' field (*i.e.,* CP22–495). Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at *FercOnlineSupport@ferc.gov* or (866) 208–3676, or for TTY, contact (202) 502–8659. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

Public sessions or site visits will be posted on the Commission's calendar located at *https://www.ferc.gov/news-events/events* along with other related information.

Dated: November 16, 2022.

Kimberly D. Bose,

Secretary.

Session Format

FERC is conducting the session to solicit your scoping comments. There will *not* be a formal presentation by Commission staff; however, FERC staff is available to answer questions about the environmental review process. The session format is as follows:

- Tickets are handed out on a ''first come, first serve'' basis starting at the time listed in the Notice.
- Individuals are called in ticket number order to provide oral comments to be transcribed by a court reporter for the public record.
- Time limits on oral comments may be enforced to ensure that all those wishing to comment have the opportunity to do so within the designated session time.
- Written comments may be submitted in addition to, or in lieu of, oral comments.
- Additional materials about FERC and the environmental review process are available at information stations at the session.

Session Conduct

Proper conduct will help the sessions maintain a respectful atmosphere for attendees to learn about the FERC Environmental Review Process and to be able to provide comments effectively.

- Loudspeakers, lighting, oversized visual aids, or other visual or audible disturbances are not permitted.
- Disruptive video and photographic equipment may not be used.
- Conversations should be kept to a reasonable volume. Attendees should be respectful of those providing oral comments to the court reporters.
- Recorded interviews are not permitted within the session space.

FERC reserves the right to end the session if disruptions interfere with the opportunity for individuals to provide oral comments or if there is a safety or security risk.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 77–314]

Pacific Gas and Electric Company; Notice of Proceeding To Consider Reopening License and Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric proceeding has been initiated by the Commission:

a. *Proceeding Type:* Proceeding to Consider Reopening License to Incorporate National Marine Fisheries Service's Proposed Interim Measures.

b. *Project No:* P–77–314.

c. *Date Initiated:* November 16, 2022.

d. *Licensee:* Pacific Gas and Electric Company.

e. *Name of Project:* Potter Valley Hydroelectric Project No. 77.

f. *Location:* The Potter Valley Project is located on the Eel River and the East Branch Russian River in Mendocino and Lake Counties, California.

g. *Filed Pursuant to:* Standard Article 15.

h. *Applicant Contact:* Kimberly Ognisty, PG&E, Mail Code N11D, P.O. Box 770000, San Francisco, CA 94177, *kimberly.ognisty@pge.com* (510) 227–7060; or Jan Nimick, (415) 973–0629, *Jan.Nimick@pge.com.*

i. *FERC Contact:* Diana Shannon, (202) 502–6136, *diana.shannon@ferc.gov.*

j. Deadline for filing comments, motions to intervene and protests: December 16, 2022.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. The first page of any filing should include docket numbers P–77–314. Comments emailed to Commission staff are not considered part of the Commission record.

k. *Description of Project:* Project's features include Lake Pillsbury, a 2,300-acre storage reservoir impounded by Scott Dam; Van Arsdale Reservoir, a 106-acre reservoir impounded by the Cape Horn Diversion Dam; and a tunnel and penstock across a natural watershed divide from the project's powerhouse located in the headwaters of the Eel River Basin to the Russian River Basin. Pacific Gas and Electric (PG&E) has operated the Potter Valley Project for approximately 120 years.[1] On October 4, 1983, the Commission issued a new license for its continued operation and maintenance,[2] with a license term expiring on April 14, 2022.[3] On January 25, 2019, PG&E notified the Commission that it did not intend to relicense the project. Section 15(a)(1) of the Federal Power Act requires the Commission, at the expiration of a license term, to issue from year-to-year an annual license to the licensee under the terms and conditions of the prior license until a new license is issued, or the project is otherwise disposed of.[4] Accordingly, the Commission granted PG&E an annual license as required by statute on April 21, 2022.[5] On July 8, 2022, PG&E filed a plan and schedule for the surrender of the project that sets January 2025 as the filing date for the surrender application.

l. *Description of Proceeding:* Standard license Article 15 requires the licensee, in part, for the conservation and development of fish and wildlife resources to comply with such reasonable modifications of project structures and operation, as may be ordered by the Commission upon its own motion or upon the recommendation of the Secretary of the Interior or the fish and wildlife agency or agencies of any State in which the project is located. In letters filed March 17, 2022 and October 17, 2022, the National Marine Fisheries Service (NMFS) requested the Commission

[1] The project was constructed in 1907. It was originally licensed by the Federal Power Commission for 50 years on April 15, 1922. From 1972 to 1983, the project operated on annual licenses until the Commission issued a new license for the project in 1983. *See Pac. Gas & Elec. Co.,* 25 FERC ¶ 61,010, at 61,059 n.14 (1983).

[2] *Pacific Gas & Elec. Co.,* 25 FERC ¶ 61,010 (1983) (Order Issuing License).

[3] *Pac. Gas & Elec. Co.,* 106 FERC ¶ 61,065, at P 2 n.1 (2004) (Order Amending License).

[4] 16 U.S.C. 808(a)(1).

[5] *Notice of Authorization for Continued Project Operation,* 87 FR 25011 (2022).

exercise its reserved authority to require interim protective measures, that NMFS deemed necessary on the annual license to protect listed salmonid species at the project. In a July 12, 2022 letter, PG&E declined to volunteer to file an amendment application to adopt NMFS' proposed interim measures.

In this proceeding, after notice and opportunity for hearing, the Commission may find cause to reopen the annual license terms to require changes in the project works or operations that may be necessary to protect federally listed species.

m. *Location of the Proceeding:* This filing may be viewed on the Commission's website at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVD–19), issued by the President on March 13, 2020. For assistance, call 1–866–208–3676 or email *FERCOnlineSupport@ferc.gov,* for TTY, call (202) 502–8659. Agencies may obtain copies of the application directly from the applicant.

n. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

o. *Comments, Protests, or Motions to Intervene:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214, respectively. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

p. *Filing and Service of Documents:* Any filing must (1) bear in all capital letters the title ''COMMENTS,'' ''PROTEST,'' or ''MOTION TO INTERVENE'' as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person commenting, protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001–385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis. Any filing made by an intervenor must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 385.2010.

Dated: November 16, 2022.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. [RD22–5–000]

North American Electric Reliability Corporation; Order Approving Reliability Standards FAC–001–4 and FAC–002–4

Before Commissioners: Richard Glick, Chairman; James P. Danly, Allison Clements, Mark C. Christie, and Willie L. Phillips;

1. On June 14, 2022, the North American Electric Reliability Corporation (NERC), the Commission-certified Electric Reliability Organization (ERO), submitted a petition seeking approval of proposed Reliability Standards FAC–001–4 (Facility Interconnection Requirements) and FAC–002–4 (Facility Interconnection Studies) (collectively, the FAC Reliability Standards).[1] As discussed in this order, pursuant to section 215(d)(2) of the Federal Power Act (FPA), we approve the FAC Reliability Standards, their associated violation risk factors and violation severity levels, the proposed implementation plan, and the retirement of the currently effective versions of the FAC Reliability Standards immediately prior to the effective date of the revised FAC Reliability Standards.[2] As discussed in this order, we determine that the FAC Reliability Standards improve upon the currently effective Reliability Standards FAC–001–3 and FAC–002–3 by ensuring that changes to existing interconnected Facilities that have reliability impacts are properly addressed in interconnection requirements and studies.

I. Background

A. Section 215 and Mandatory Reliability Standards

2. Section 215 of the FPA provides that the Commission may certify an ERO, the purpose of which is to develop mandatory and enforceable Reliability Standards, subject to Commission review and approval.[3] Pursuant to section 215 of the FPA, the Commission established a process to select and certify an ERO,[4] and subsequently certified NERC.[5]

B. NERC Petition and Proposed FAC Reliability Standards

3. On June 14, 2022, NERC submitted a petition seeking approval of the FAC Reliability Standards. NERC also requested that the Commission approve the associated violation risk factors and violation severity levels, the proposed implementation plan, and the retirement of the currently effective versions of the FAC Reliability Standards immediately prior to the effective date of the revised FAC Reliability Standards.

4. NERC explains that the proposed modifications to the FAC Reliability Standards stem from recommendations in the NERC Inverter-Based Resource Performance Task Force's[6] (IRPTF) March 2020 white paper.[7] Consistent with the IRPTF's recommendations, NERC proposes to modify the FAC Reliability Standards in two ways. First, NERC proposes to replace the term ''materially modifying,'' which is used in Commission's interconnection

[1] The proposed Reliability Standards are not attached to this order. The proposed Reliability Standards are available on the Commission's eLibrary document retrieval system in Docket No. RD22–5–000 and on the NERC website, *www.nerc.com.*

[2] 16 U.S.C. 824o(d)(2).

[3] 16 U.S.C. 824o.

[4] *Rules Concerning Certification of the Elec. Reliability Org.; & Procedures for the Establishment, Approval, & Enforcement of Elec. Reliability Standards,* Order No. 672, 114 FERC ¶ 61,104, *order on reh'g,* Order No. 672–A, 114 FERC ¶ 61,328 (2006).

[5] *N. Am. Elec. Reliability Corp.,* 116 FERC ¶ 61,062, *order on reh'g and compliance,* 117 FERC ¶ 61,126 (2006), *order on compliance,* 118 FERC ¶ 61,030, *order on clarification and reh'g,* 119 FERC ¶ 61,046 (2007), *aff'd sub nom. Alcoa Inc.* v. *FERC,* 564 F.3d 1342 (D.C. Cir. 2009).

[6] NERC states that the IRPTF was created after several grid disturbances involving inverter-based resources. As part of its work, the IRPTF completed a comprehensive review of NERC's Reliability Standards to determine areas where the current standards were not sufficient to address the increase in inverter-based resources on the Bulk-Power System. *See* NERC Petition at 9–10.

[7] NERC IRPTF, *IRPTF Review of NERC Reliability Standards* (Mar. 2020), (IRPTF White Paper), *https://www.nerc.com/comm/PC/InverterBased%20Resource%20Performance%20Task%20Force%20IRPT/Review_of_NERC_Reliability_Standards_White_Paper.pdf.*

process,[8] and replace it with the term ''qualified change.'' According to NERC, the IRPTF noted in its white paper that confusion between the Commission-defined term ''Material Modification'' in the *pro forma* interconnection procedures and agreements and the undefined term ''materially modify'' in the standards ''could result in Facility changes that are potentially significant for reliability not being studied under the FAC standards because the changes would not have a 'material impact' on other generators in the interconnection queue.'' [9] This is because, as used in the Commission's *pro forma* interconnection procedures and agreements, Material Modifications only refer to changes that have a ''material impact'' on other generators in the interconnection queue, whereas in the FAC Reliability Standards, the undefined term ''materially modify'' was used to refer to any change that could have reliability impacts on the system. Thus, NERC states that the term ''qualified change'' would refer to ''changes to existing interconnected Facilities that can have reliability impacts'' and would ensure that they are ''properly addressed in interconnection requirements and studies.'' [10]

5. Second, NERC explains that the proposed FAC Reliability Standards identify the planning coordinator as the entity responsible for developing a uniform definition of ''qualified change'' that describes the changes to interconnected Facilities that must be addressed in interconnection requirements and studies under the FAC Reliability Standards. NERC states that planning coordinators ''are encouraged to coordinate with other entities in developing their definitions.'' [11] Once the planning coordinator defines what is a qualified change within its footprint, it must ''maintain a publicly available definition of qualified change for the purposes of facility interconnection.'' [12] Finally, the proposed FAC Reliability Standards require applicable entities within that planning coordinator's area to include procedures for coordinating impacts of qualified changes in their interconnection requirements and require entities seeking to make qualified changes to adhere to the definition in their interconnection procedures and studies.[13]

6. NERC proposes an implementation plan for the proposed FAC Reliability Standards. The proposed implementation plan provides that the proposed FAC Reliability Standards would become effective on the first day of the first calendar quarter that is 12 months after applicable regulatory approval and that the currently effective versions of the standards would be retired immediately prior to the effective date of the revised FAC Reliability Standards.[14] Further, the proposed implementation plan provides that, where the planning coordinator's definition of ''qualified change'' differs from what an applicable entity may have considered a ''materially modifying'' change in Facility interconnection requirements or studies under the current standards, those entities will have an additional 12 months from the effective date to come into compliance with the revised standards. NERC explains that this implementation timeline reflects consideration that planning coordinators will need a reasonable period of time to develop a definition of ''qualified change'' for their respective areas under proposed Reliability Standard FAC–002–4 Requirement R6 and to make that definition publicly available.[15] NERC asserts that the proposed implementation plan provides a reasonable period of time for entities to comply, considering the process required for the new requirements, and thus strikes an appropriate balance with the urgency to implement the proposed FAC Reliability Standards.[16]

7. Finally, NERC proposes modifications to the associated violation risk factors and violation severity levels for these FAC Reliability Standards. The changes are mostly clarifications in the violation severity levels to match changes in Requirement language. One new violation risk factor and violation severity level assignment was added for new Requirement R6 in FAC–002–4.[17]

II. Notice of Filing and Responsive Pleadings

8. Notice of NERC's June 14, 2022, petition was published in the **Federal Register**, 87 FR 62401 (Oct. 14, 2022), with interventions and protests due on or before October 28, 2022. None was filed.

III. Determination

9. Pursuant to section 215(d)(2) of the FPA, we approve the FAC Reliability Standards as just, reasonable, not unduly discriminatory or preferential and in the public interest. We conclude that the proposed FAC Reliability Standards are an improvement over the currently effective Reliability Standards FAC–001–3 and FAC–002–3 and will improve Bulk-Power System reliability by helping to ensure that changes to existing interconnected facilities that have reliability impacts are properly addressed in interconnection requirements and studies. We find that proposed Reliability Standard FAC–002–4 Requirement R6 will avoid potential disputes over changes to facilities that require additional study by authorizing the planning coordinator to define the term ''qualified change'' and requiring public posting of the definition. Replacing ''materially modify'' with ''qualified change'' also removes the possibility of confusion with the Commission's defined term ''Material Modification'' in its *pro forma* interconnection procedures and agreements.

10. We also approve the proposed implementation plan. The implementation plan provides that the proposed FAC Reliability Standards would become effective on the first day of the first calendar quarter that is 12 months after applicable regulatory approval and an additional 12 months under certain circumstances. We find that the proposed implementation plan provides a reasonable period of time for entities to comply with the new requirements and strikes an appropriate balance with the urgency to implement the proposed FAC Reliability Standards.

11. Finally, we approve NERC's proposed clarifying revisions to the existing violation risk factor and violation severity level assignments for these FAC Reliability Standards, as well as the new violation risk factor and violation severity level assignment to Requirement R6 in FAC–002–4.

IV. Information Collection Statement

12. In compliance with the requirements of the Paperwork Reduction Act of 1995, 44 U.S.C. 3506(c)(2)(A), the Commission is soliciting public comment on FAC Reliability Standards; and the new collection FERC–725D(1),[18] which will be submitted to the Office of Management and Budget (OMB) for a

[8] IRPTF White Paper at 1 (referring to the term ''Material Modification,'' which is defined in the Commission's *pro forma* generator interconnection procedures and agreements as those modifications that have a material impact on the cost or timing of any interconnection request with a later queue priority date. *See, e.g., pro forma* Large Generator Interconnection Agreement, Art. 1, Definitions).

[11] *Id.* at 16.

[12] *Id.* at 12.

[13] *Id.*

[14] *Id.,* Ex. B at 2–3.

[15] *Id.* at 19.

[16] *Id.* at 20.

[17] *Id.* at Ex. E.

[18] FERC–725D(1) is a temporary placeholder number to avoid conflicting with the pending request already submitted to OMB regarding FERC–725D.

review of the information collection requirements. Comments on the collection of information are due to OMB within 60 days of the date this order is published in the **Federal Register**. Respondents subject to the filing requirements of this order will not be penalized for failing to respond to these collections of information unless the collections of information display a valid OMB control number.

13. The information collection requirements are subject to review by the OMB under the Paperwork Reduction Act at 44 U.S.C. 3507(d). OMB's regulations at CFR 1320.11 require approval of certain information collection requirements imposed by agency rules.[19] The Commission solicits comments on the Commission's need for this information, whether the information will have practical utility, the accuracy of the burden estimates, ways to enhance the quality, utility, and clarity of the information to be collected or retained, and any suggested methods for minimizing respondents' burden, including the use of automated information techniques. Specifically, the Commission asks that any revised burden or cost estimates submitted by commenters be supported by sufficient detail to understand how the estimates are generated.

14. Please send comments concerning the collection of information and the associated burden estimates to OMB through *www.reginfo.gov/public/do/PRAMain,* Attention: Federal Energy Regulatory Commission Desk Officer. Please identify the OMB Control Number 1902–NEW in the subject line.

15. Please submit copies of your comments (identified by Docket No. RD22–5–000) to the Commission as noted below. Electronic filing through *http://www.ferc.gov* is preferred.

Electronic Filing: Documents must be filed in acceptable native applications and print-to-PDF, but not in scanned or picture format.

For those unable to file electronically, comments may be filed by USPS mail or by hand (including courier) delivery.

a. *Mail via U.S. Postal Service Only:* Addressed to: Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE, Washington, DC 20426.

b. *Hand (Including Courier) Delivery:* Deliver to: Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

16. *Instructions:* OMB submissions must be formatted and filed in accordance with submission guidelines at: *www.reginfo.gov/public/do/PRAMain;* using the search function under the ''Currently Under Review field,'' select Federal Energy Regulatory Commission, click ''submit,'' and select ''comment'' to the right of the subject collection.

17. *Title:* FERC–725D1, RD22–5–000, Mandatory Reliability Standards FAC–001–4 and FAC–002–4.

18. *OMB Control No.:* 1902–NEW.

19. *Respondents:* Transmission owners, generator owners, and planning coordinators.[20]

20. *Frequency of Information Collection:* Once during years 1 and 2. On occasion during year 3 and beyond.

21. *Abstract:* The Facility Design, Connections, and Maintenance Reliability Standards address topics such as facility interconnection requirements, facility ratings, system operating limits, and transfer capabilities. At present, Reliability Standard FAC–001–003 requires Transmission Owners and applicable Generator Owners to complete coordinated studies for new or ''materially modified'' existing interconnections. Reliability Standard FAC–001–4 revises that requirement by applying it to ''qualified changes'' instead of ''materially modified'' interconnections. This revision is intended to prevent confusion with the Commission-defined term ''Material Modification'' in the *pro forma* interconnection procedures and agreements. In this order, the Commission determines that in some cases, a consequence of this confusion may be that reliability inappropriately is not being studied under the FAC standards. The term ''qualified change'' would refer to changes to existing interconnected facilities that can have reliability impacts and would help ensure that they are properly addressed in interconnection requirements and studies. The order also would revise Requirement R6 of existing Reliability Standard FAC–002–3 by authorizing the planning coordinator to define the term ''qualified change'' and requiring public posting of the definition. The implementation of Reliability Standards FAC–001–4 and FAC–002–4 will ensure that there is appropriate coordination and communication regarding the interconnection of facilities.

22. *Necessity of Information:* Mandatory.

23. *Internal Review:* The Commission has reviewed the changes and has determined that the described information collection activities are necessary. These requirements conform to the Commission's need for efficient information collection, communication, and management within the energy industry. The Commission has specific, objective support for the burden estimates associated with the information collection requirements.

24. Respondents have already provided information under 725D. The proposed new collection FERC–725D1 would result in a minor additional burden to planning coordinators, due to the requirement that they develop the definition of ''qualified change'' for new and existing interconnections of generation, transmission or electricity end user facilities. This burden would be expected to be greater in years one and two than in year three and beyond for FAC–002–4. No change in burden is estimated for applicable entities for FAC–001–4 as their responsibilities will remain the same.

25. The number of respondents below is based on an estimate of the NERC compliance registry for planning coordinators (63). The Commission based its paperwork burden estimates on the NERC compliance registry as of September 16, 2022.

Public Reporting Burden: The burden and cost estimates below are based on the increase in the reporting and recordkeeping burden imposed by the proposed Reliability Standards. Our estimates are based on the NERC Compliance Registry as of September 16, 2022, which indicates the affected entities for FAC–001–2/FAC–002–2 expected to have a change in burden, *i.e.,* planning coordinators (63).

[19] 5 CFR 1320 (2021).

[20] The NERC Glossary, at *https://www.nerc.com/pa/Stand/Glossary%20of%20Terms/Glossary_of_Terms.pdf,* defines these terms. A Transmission Owner is the entity that owns and maintains transmission facilities. A Generator Owner is the entity that owns and maintains generating units. A Planning Coordinator (formerly known as a Planning Authority) is the responsible entity that coordinates and integrates transmission facilities, service plans, resource plans, and protection systems.

PROPOSED INFORMATION COLLECTION ACTIVITIES DUE TO DOCKET NO. RD22–5

Reliability standard FAC–002–4	Type [21] and number of entity	Number of annual responses per entity	Total number of responses	Average number of burden hours per response	Total burden hours
	(1)	(2)	(1) * (2) = (3)	(4) [22]	(3) * (4) = (5)
One Time Estimate Years 1 and 2					
FAC–002–4	PA/PC (63)	1	63	120 hrs.; $7,200	7,560 hrs.; $453,600.
Ongoing Estimate Year 3 ongoing					
FAC–002–4	PA/PC (63)	1	63	40 hrs.; $2,520	2,520 hrs.; $158,760.

V. Document Availability

26. In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*) and in the Commission's Public Reference Room during normal business hours (8:30 a.m. to 5:00 p.m. Eastern time) at 888 First Street NE, Room 2A, Washington, DC 20426.

27. From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

28. User assistance is available for eLibrary and the Commission's website during normal business hours from the Commission's Online Support at (202) 502–6652 (toll free at 1–866–208–3676) or email at *ferconlinesupport@ferc.gov,* or the Public Reference Room at (202) 502–8371, TTY (202) 502–8659. Email the Public Reference Room at *public.referenceroom@ferc.gov.*

The Commission orders:

The Commission hereby approves Reliability Standards FAC–001–4 and FAC–002–4, their associated violation risk factors and violation severity levels, implementation plan, and the retirement of the currently effective Reliability Standards FAC–001–3 and FAC–002–3 immediately prior to the effective date of the revised Reliability Standards, as discussed in the body of this order.

By the Commission.

Issued: November 17, 2022.

Debbie-Anne A. Reese,

Deputy Secretary.

[FR Doc. 2022–25588 Filed 11–22–22; 8:45 am]

BILLING CODE 6717–01–P

[21] PA/PC=Planning Coordinator. Note that Planning Coordinator (PC) is the new name for Planning Authority—a term still used in NERC's Compliance Registry.

[22] For purpose of estimate the majority of the work on the ''qualified change'' definition for the PA/PC will be done by

—Electrical engineer (OC 17–2071) $77.02

—Information/Record clerks (OC 43–4199) $42.35

The average hourly burden for this collection is $59.69 [($77.02 + $42.35)/2 = $59.69] and is rounded to $60.00 an hour.

Combined Notice of Filings #1

Take notice that the Commission received the following electric corporate filings:

Docket Numbers: EC22–71–000.

Applicants: Canal Generating LLC, Canal 3 Generating LLC, Bucksport Generation LLC, Stonepeak Kestrel Energy Marketing LLC.

Description: Response to November 4, 2022 Deficiency Letter of Canal Generating LLC, et al.

Filed Date: 11/14/22.

Accession Number: 20221114–5413.

Comment Date: 5 p.m. ET 12/5/22.

Take notice that the Commission received the following electric rate filings:

Docket Numbers: ER11–4339–002.

Applicants: ENBALA Power Networks (USA), Inc.

Description: Notice of Non-Material Change in Status of ENBALA Power Networks (USA), Inc.

Filed Date: 11/14/22.

Accession Number: 20221114–5416.

Comment Date: 5 p.m. ET 12/5/22.

Docket Numbers: ER21–21–001.

Applicants: Harts Mill Solar, LLC.

Description: Refund Report: Refund Report Filing in Docket ER21–21 to be effective N/A.

Filed Date: 11/15/22.

Accession Number: 20221115–5004.

Comment Date: 5 p.m. ET 12/6/22.

Docket Numbers: ER21–2460–003.

Applicants: New York Independent System Operator, Inc.

Description: Compliance filing: NYISO Compliance Filing re: June 2022 Order on NYISO's Order No. 2222 Compliance to be effective 12/31/9998.

Filed Date: 11/14/22.

Accession Number: 20221114–5357.

Comment Date: 5 p.m. ET 12/5/22.

Docket Numbers: ER23–158–001.

Applicants: Public Service Company of Colorado.

Description: Tariff Amendment: Errata SCC_Attachment B and C to be effective 12/31/9998.

Filed Date: 11/10/22.

Accession Number: 20221110–5140.

Comment Date: 5 p.m. ET 11/17/22.

Docket Numbers: ER23–159–001.

Applicants: Public Service Company of Colorado.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. OR23–1–000]

Rough Rider Operating LLC; Notice of Request for Temporary Waiver

Take notice that on November 14, 2022, Rough Rider Operating LLC filed a petition seeking a temporary waiver of the tariff filing and reporting requirements of sections 6 and 20 of the Interstate Commerce Act and parts 341 and 357 of the Federal Energy Regulatory Commission's regulations (Commission), all as more fully explained in the petition.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene, or protest must serve a copy of that document on the Petitioner.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

Comment Date: 5:00 p.m. Eastern time on December 14, 2022.

Dated: November 15, 2022.

Debbie-Anne A. Reese,

Deputy Secretary.

[FR Doc. 2022–25561 Filed 11–22–22; 8:45 am]

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 4881–031]

Ada County Idaho; Fulcrum LLC; Notice of Scoping Meetings and Environmental Site Review and Soliciting Scoping Comments

Take notice that the following hydroelectric application has been filed with Commission and is available for public inspection:

a. *Type of Application:* New Major License.

b. *Project No.:* 4881–031.

c. *Date filed:* November 30, 2021.

d. *Applicant:* Ada County Idaho, Fulcrum LLC.

e. *Name of Project:* Barber Dam Hydroelectric Project.

f. Location: On the Boise River, near the city of Boise, Ada County, Idaho. The project does not occupy federal land.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Nicholas Josten, 2742 St. Charles Ave., Idaho Falls, Idaho 83404; 208–520–5135.

i. *FERC Contact:* Matt Cutlip, *matt.cutlip@ferc.gov,* (503) 552–2762.

j. *Deadline for filing scoping comments:* December 31, 2022.

The Commission strongly encourages electronic filing. Please file scoping comments using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* You must include your name and contact information at the end of your comments. In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852. The first page of any filing should include docket number P–4881–031. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY).

The Commission's Rules of Practice and Procedure require all interveners filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervener files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. This application is not ready for environmental analysis at this time.

l. *The Barber Dam Project consists of the following existing facilities*: (1) a 1,100-foot-long earthen embankment dam; (2) a 400-foot-long, 25-foot-high concrete capped timber crib spillway section; (3) a powerhouse containing two 1,850-kilowatt generating units; (4) a trash sluiceway; (5) a 75-acre impoundment; (6) a 100-foot-long concrete tailrace; (7) 120 feet of transmission line; and (8) appurtenant facilities. The project is operated in a run-of-river mode and generates an average of 11,900 megawatt-hours per year. The licensees propose to modify the existing spillway to incorporate a variable elevation weir, and to modify the plant operating system to control the variable weir so that water is automatically bypassed to the Boise River when the powerhouse trips offline

m. A copy of the application can be viewed on the Commission's website at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document.

You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

n. *Scoping Process:* In accordance with the National Environmental Policy Act (NEPA), Commission staff will prepare either an Environmental Assessment or an Environmental Impact Statement for the project. The NEPA document will consider both site-specific and cumulative environmental impacts and reasonable alternatives to the proposed action.

Scoping Meetings

Commission staff will conduct one agency scoping meeting and one public meeting. The agency scoping meeting will focus on resource agency and non-governmental organization (NGO) concerns, while the public scoping meeting is primarily for public input. All interested individuals, organizations, and agencies are invited to attend one or both of the meetings, and to assist the staff in identifying the scope of the environmental issues that should be analyzed in the NEPA document. The times and locations of these meetings are as follows:

Public Scoping Meeting

Date: Tuesday, November 29.
Time: 7:00 p.m.
Place: Ada County Courthouse.
Address: 200 W Front St., Boise, Idaho 83702.

Agency Scoping Meeting

Date: Wednesday, November 30.
Time: 9:00 a.m.
Place: Ada County Courthouse.
Address: 200 W Front St., Boise, Idaho 83702.

Copies of the Scoping Document (SD1) outlining the subject areas to be addressed in the NEPA document were distributed to the parties on the Commission's mailing list. Copies of the SD1 will be available at the scoping meeting or may be viewed on the web at *http://www.ferc.gov* using the ''eLibrary'' link (see item m above).

Environmental Site Review

The licensees and Commission staff will conduct a project Environmental Site Review beginning at 1:00 p.m. on November 29, 2022. All interested individuals, organizations, and agencies are invited to attend. All participants should meet at the Barber Dam Project at 5201 E Sawmill Way, Boise, ID 83716. Anyone with questions about the environmental site review should contact Kevin Webb at (978) 935–6039 or *kwebb@centralriverspower.com.* Those individuals planning to participate in the site review should notify Mr. Webb of their intent.

Objectives

At the scoping meetings, the staff will: (1) summarize the environmental issues tentatively identified for analysis in the NEPA document; (2) solicit from the meeting participants all available information, especially quantifiable data, on the resources at issue; (3) encourage statements from experts and the public on issues that should be analyzed in the NEPA document, including viewpoints in opposition to, or in support of, Commission staff's preliminary views; (4) determine the resource issues to be addressed in the NEPA document; and (5) identify those issues that require a detailed analysis, as well as those issues that do not require a detailed analysis.

Procedures

The meetings are recorded by a stenographer and become part of the formal record of the Commission proceeding on the project.

Individuals, organizations, and agencies with environmental expertise and concerns are encouraged to attend the meeting and to assist Commission staff in defining and clarifying the issues to be addressed in the NEPA document.

Dated: November 16, 2022.

Kimberly D. Bose,

Secretary.

Federal Energy Regulatory Commission

[Project No. 14867–003]

Scott's Mill Hydro, LLC; Notice of Technical Conference

On Thursday, December 1, 2022, Commission staff will hold a technical conference to provide clarification to Scott's Mill Hydro, LLC regarding deficiencies in the final license application and additional information needs identified by Commission staff for the proposed Scott's Mill Hydroelectric Project No. 14867.[1]

The technical conference will begin at 9:30 a.m. Eastern Standard Time. The conference will be held at the Federal Energy Regulatory Commission headquarters building located at 888 1st Street NE, Washington, DC, and will include teleconference capabilities. Discussion topics for the technical conference are included in Appendix A.

All local, state, and federal agencies, Indian tribes, and other interested parties are invited to participate. There will be no transcript of the conference, but a summary of the meeting will be prepared for the project record. If you are interested in participating in the meeting you must contact Jody Callihan at (202) 502–8278 or *jody.callihan@ferc.gov* by November 28, 2022 to receive specific instructions on how to participate.

Dated: November 15, 2022.

Debbie-Anne A. Reese,

Deputy Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. IC22–34–000]

Commission Information Collection Activities; (FERC–550); Comment Request; Extension

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of information collection and request for comments.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995, the Federal Energy Regulatory Commission (Commission or FERC) is soliciting public comment on the currently approved information collection, FERC–550 (Oil Pipeline Rates—Tariff Filings and Depreciation Studies), which will be submitted to the Office of Management and Budget (OMB) for review. The Commission received no comments on the 60 Day Notice.

DATES: Comments on the collection of information are due December 23, 2022.

ADDRESSES: Send written comments on FERC–550 to the Office of Management and Budget (OMB) through *www.reginfo.gov/public/do/PRAMain,* Attention: Federal Energy Regulatory Commission Desk Officer. Please identify the OMB Control Number 1902–0089 (Oil Pipeline Rates—Tariff Filings and Depreciation Studies) in the subject line. Your comments should be sent within 30 days of publication of this notice in the **Federal Register**.

Please submit copies of your comments (identified by Docket No. IC22–34–000 and FERC–550) to the Commission as noted below. Electronic filing through *https://www.ferc.gov* is preferred.

- *Electronic Filing:* Documents must be filed in acceptable native applications and print-to-PDF, but not in scanned or picture format.
- For those unable to file electronically, comments may be filed by USPS mail or by hand (including courier) delivery:
  - Mail via U.S. Postal Service only, addressed to: Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE, Washington, DC 20426.
  - Hand (including courier) delivery to: Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

Please reference the specific collection number(s) (FERC–550) and/or title(s) (Oil Pipeline Rates—Tariff Filings and Depreciation Studies) in your comments.

Instructions: OMB submissions must be formatted and filed in accordance with submission guidelines at: *www.reginfo.gov/public/do/PRAMain.* Using the search function under the ''Currently Under Review field,'' select ''Federal Energy Regulatory Commission,'' click ''submit,'' and select ''comment'' to the right of the subject collection. FERC submissions must be formatted and filed in accordance with submission guidelines at: *https://www.ferc.gov.* For user assistance, contact FERC Online Support by email at *ferconlinesupport@ferc.gov,* or by phone at (866) 208–3676 (toll-free).

Docket: Users interested in receiving automatic notification of activity in this docket or in viewing/downloading comments and issuances in this docket may do so at *https://www.ferc.gov.*

FOR FURTHER INFORMATION: Ellen Brown may be reached by email at *DataClearance@FERC.gov* and telephone at (202) 502–8663.

SUPPLEMENTARY INFORMATION:

Title: FERC–550, Oil Pipeline Rates—Tariff Filings and Depreciation Studies.

OMB Control No.: 1902–0089.

Type of Request: Three-year extension of the FERC–550 information collection requirements with no revisions to the collection, but with adjustments in the burden estimates.

Abstract: FERC–550 is required to assist the Commission in implementing the duties and powers that were vested on October 1, 1977, in the Interstate Commerce Commission (49 U.S.C. 60502). The Commission's regulatory jurisdiction over oil pipelines includes:

- Regulation of rates and practices of oil pipeline companies engaged in interstate transportation;
- Establishment of equal service conditions to provide shippers with equal access to pipeline transportation; and
- Establishment of reasonable rates for transporting petroleum and petroleum products by pipeline.

Oil Pipeline Tariffs and Rates

The filing requirements for oil pipeline tariffs and rates [1] put in place by the FERC–550 data collection provide the Commission with the information it needs to analyze proposed tariffs, rates, fares, and charges of oil pipelines and other carriers in connection with the transportation of crude oil and petroleum products. Specifically, these filings typically include indexing, market-based rates, or initial rate filings. The Commission uses this information to determine whether the proposed tariffs and rates are just and reasonable.

The Commission's regulations at 18 CFR parts 341 through 348 provide that letters of transmittal must describe the filings and explain any changes to the carrier's rates, rules, terms or conditions of service; state if a waiver is being requested, and specify the statute, section, regulation, policy, or order requested to be waived; and identify the tariffs supplemental numbers, or tariff sections and the proposed effective date of the tariff publication. The letter of transmittal must certify that the filing has been sent to each subscriber of the tariff publication. A carrier may file to amend or modify a tariff contained in a tariff filing at any time during the pendency of the filing. Carriers must cancel tariffs when the service or transportation movement is terminated. If the service in connection with the tariff is no longer in interstate commerce, the tariff publication must state so. Whenever the tariff of a carrier on file with the Commission is to be adopted by another carrier as a result of an acquisition, merger, or name change, the succeeding company must file with the Commission, and post within 30 days after such succession, the tariff, or portion thereof, that has been adopted in the electronic format required by § 341.1 bearing the name of the successor company.

Oil Pipeline Depreciation Studies

The Commission's regulation at 18 CFR 347.1 provides that oil pipelines must file material to support requests for newly established or changed property account depreciation studies. It requires an applicant to file electronically, and the transmittal letter must give a general description of the change in depreciation rates, certify that the transmittal also has been sent to each shipper and to each subscriber, and state if there are no subscribers. The proposed depreciation rates being established must be used until they are either accepted or modified by the Commission. Rates in effect at the time of the proposed revision must continue to be used until the proposed revised rates are approved or modified by the Commission. The oil pipeline must provide information in sufficient detail to fully explain and justify the proposed rates. Modifications, additions, and deletions to data elements should be made to reflect the individual circumstances of the carrier's properties and operations.

Type of Respondent: Oil Pipelines.

Estimate of Annual Burden: [2] The burden related to this collection now includes a new line item, Depreciation Studies, which is currently approved by OMB under the FERC collection FERC–550 (1902–0089), but historically was combined with other requirements outlined in 18 CFR parts 341 through 348. Depreciation studies are required if an oil pipeline seeks to modify the depreciation rates they have in their existing tariffs. Since these filings are submitted only for pipelines seeking modification and are not as common (<10% of filings) than other reporting requirements such as indexing. Staff is correcting the estimates by adding a new line item specific to depreciation studies. Based on recent experience with this collection, staff estimates that approximately 22 respondents will file a depreciation study each year. By separating depreciation studies from tariff filings, this adjustment will allocate 880 total burden hours to the depreciation studies line item now being added.

In another adjustment, the number of hours for Oil Rates and Tariff Filings will decrease from 7.8 hours to 7 hours per respondent due to the hour allocation going to the second line (Depreciation Studies) in the table below. Additionally, since the previous renewal, the number of respondents to Oil Rates and Tariff filings also increased from 219 to 258 based on the number of filings received by the Commission. The overall revised burden estimates result to an increase of 61 respondents from 219 to 280, 86 responses from 710 to 796, and 760 hours from 5,538 to 6,298.

The Commission estimates the annual public reporting burden and cost [3] for the FERC–550 information collection as follows:

[1] 18 CFR parts 341 through 348.

[2] ''Burden'' is the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, refer to 5 CFR 1320.3.

[3] The Commission staff thinks that the hourly cost (for wages and benefits) for industry staff completing the FERC–550 is similar to the cost of FERC employees. FERC staff estimates that industry costs for salary plus benefits are similar to Commission costs. The cost figure is the FY2022 FERC average annual salary plus benefits ($188,992/year or $91/hour).

FERC–550—OIL PIPELINE RATES—TARIFF FILINGS AND DEPRECIATION STUDIES

	Number of respondents	Annual number of responses per respondent	Total number of responses [4]	Average burden hrs. & cost ($) per response	Total annual burden hours & total annual cost ($)	Cost per respondent ($)
	(1)	(2)	(1)* (2) = (3)	(4)	(3) * (4) = (5)	(5) ÷ (1)
Oil Rates and Tariff Filings.	258	3	774	7 hrs.; $637	5,418 hrs.; $493,038	$1,911
Depreciation [5] Studies.	22	1	22	40 hrs.; $3,640	880 hrs.; $80,080	3,640
Total	280		796		6,298 hrs.; $573,118	

Comments: Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: November 16, 2022.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 5867–054]

Alice Falls Hydro, LLC; Notice Soliciting Scoping Comments

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* New Major License.

b. *Project No.:* 5867–054.

c. *Date filed:* September 29, 2021.

d. *Applicant:* Alice Falls Hydro, LLC (Alice Falls Hydro).

e. *Name of Project:* Alice Falls Hydroelectric Project (Alice Falls Project or project).

f. *Location:* The existing project is located on the Ausable River in the Town of Chesterfield, Clinton and Essex Counties, New York. The project does not occupy federal land.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791 (a)–825(r).

h. *Applicant Contact:* Jody Smet, Vice President, Regulatory Affairs, Eagle Creek Renewable Energy, LLC, 7315 Wisconsin Avenue, Suite 1100W, Bethesda, Maryland 20814; (804) 739–0654 or *jody.smet@eaglecreekre.com.*

i. *FERC Contact:* Chris Millard at (202) 502–8256, or email at *christopher.millard@ferc.gov.*

j. *Deadline for filing scoping comments:* December 17, 2022.[1]

The Commission strongly encourages electronic filing. Please file scoping comments using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, please send a paper copy via U. S. Postal Service to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. All filings must clearly identify the project name and docket number on the first page: Alice Falls Hydroelectric Project (P–5867–054).

The Commission's Rules of Practice require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. This application is not ready for environmental analysis at this time.

l. *The project consists of:* (1) a stone masonry dam, 88 feet long and 63 feet high; (2) a 110-foot-long section of rock ledge adjacent to the dam with 2.5-foot-high pipe-supported flashboards; (3) a reservoir with a surface area of 4.8 acres at the normal water surface elevation of 350 feet; [2] (4) a 110-foot-wide, 150-foot-long intake structure with a 41-foot-wide by 14-foot-high trash rack opening and fitted with a trash rack with 1-inch clear bar spacing; (5) a divided, 45-foot-long, reinforced concrete penstock, where the Unit 1 penstock is 18 feet wide by 12 feet high and the Unit 2 penstock is 10 feet wide by 12 feet high; (6) a powerhouse, approximately 34 feet wide and 26 feet long, containing two turbine-generator units of 1.5 megawatts (Unit 1) and 0.6 megawatt (Unit 2); (7) a substation, 51 feet wide and 88 feet long; (8) a 745-foot-long, 5-kilovolt (kV) buried generator lead and a 700-foot-long, 46-kV buried transmission line; and (9) appurtenant facilities.

The project is operated in a run-of-river mode, whereby outflow from the project approximates inflow. Project operation occurs remotely in an automatic control mode using a

[4] This figure is rounded.

[5] Depreciation Studies previously was included under Oil Rates and Tariff Filings in the OMB inventory under OMB Control No. 1902–0089. However, for a more accurate estimate of burden a new row was added for Depreciation Studies (18 CFR 347.1). This new row will properly account for the differences in burden hours and type of filing with the Oil Rates and Tariff filings (18 CFR Parts 341 through 348).

[1] The Commission's Rules of Practice and Procedure provide that if a deadline falls on a Saturday, Sunday, holiday, or other day when the Commission is closed for business, the deadline does not end until the close of business on the next business day. 18 CFR 385.2007(a)(2). Because the 30-day deadline falls on a Saturday (*i.e.,* December 17, 2022), the deadline is extended until the close of business on Monday, December 19, 2022.

[2] Elevation data are presented using the National Geodetic Vertical Datum of 1929.

headpond level sensor and two sensors behind the project trash racks to maintain the reservoir elevation at about 350 feet. Normal operation occurs up to 358.5 feet, at which point project operation ceases and all inflow is spilled.[3] The minimum and maximum hydraulic capacities of the project are 400 cfs and 840 cfs, respectively.

A continuous minimum flow of 25 cfs or inflow, whichever is less, is released over the spillway flashboards to Alice Falls year-round. An additional 125-cfs aesthetic flow (for a total flow of 150 cfs over Alice Falls), or inflow, whichever is less, is released daily from 8:00 a.m. to 3:00 p.m., Monday through Friday, from May 20 to September 8 when public recreation access is provided. A seasonal conveyance flow of 20 cfs or inflow, whichever is less, is continuously passed through the fish bypass facility from April 1 through November 30. When inflow to the reservoir is less than the scheduled combined minimum flow, Alice Falls Hydro releases 20 cfs from the fish bypass facility and any remaining flow is released over the spillway to Alice Falls.

m. In addition to publishing the full text of this notice in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this notice, as well as other documents in the proceeding (*e.g.,* scoping document) via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number, excluding the last three digits, in the docket number field to access the document (P–5867). For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll-free, (866) 208–3676 or TYY, (202) 502–8659.

n. You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

o. *Scoping Process:*

Commission staff will prepare either an environmental assessment (EA) or an environmental impact statement (EIS) that describes and evaluates the probable effects, if any, of the licensee's proposed action and alternatives. The EA or EIS will consider environmental impacts and reasonable alternatives to the proposed action. The Commission's scoping process will help determine the required level of analysis and satisfy the National Environmental Policy Act (NEPA) scoping requirements, irrespective of whether the Commission prepares an EA or an EIS. At this time, we do not anticipate holding on-site scoping meetings. Instead, we are soliciting written comments and suggestions on the preliminary list of issues and alternatives to be addressed in the NEPA document, as described in scoping document 1 (SD1), issued November 17, 2022.

Copies of SD1 outlining the subject areas to be addressed in the NEPA document were distributed to the parties on the Commission's mailing list and the applicant's distribution list. Copies of SD1 may be viewed on the web at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, call 1–866–208–3676 or for TTY, (202) 502–8659.

Dated: November 17, 2022.

Debbie-Anne A. Reese,

Deputy Secretary.

[FR Doc. 2022–25590 Filed 11–22–22; 8:45 am]

BILLING CODE 6717–01–P

[3] Reservoir elevations greater than 358.5 feet present a risk of damage to project structures due to an inability to safely remove debris, thus requiring project shutdown.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2853–073]

Montana Department of Natural Resources and Conservation; Notice of Scoping Meetings and Environmental Site Review and Soliciting Scoping Comments

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* New Major License.

b. *Project No.:* 2853–073.

c. *Date Filed:* June 30, 2022.

d. *Applicant:* Montana Department of Natural Resources and Conservation (Montana DNRC).

e. *Name of Project:* Broadwater Hydroelectric Project (Broadwater Project or project).

f. *Location:* On the Missouri River near the town of Toston in Broadwater County, Montana. The project occupies approximately two acres of federal lands administered by the Bureau of Land Management.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* David Lofftus, Hydro Power Program Manager, Montana Department of Natural Resources and Conservation, 1424 9th Avenue, P.O. Box 201601, Helena, Montana 59620; Phone at (406) 444–6659; or email at *dlofftus@mt.gov.*

i. *FERC Contact:* Ingrid Brofman at (202) 502–8347, or *ingrid.brofman@ferc.gov.*

j. *Deadline for filing scoping comments:* January 13, 2023.

The Commission strongly encourages electronic filing. Please file scoping comments using the Commission's eFiling system at *https://ferconline.ferc.gov/FERCOnline.aspx.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *https://ferconline.ferc.gov/QuickComment.aspx.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852. All filings must clearly identify the project name and docket number on the first page: Broadwater Hydroelectric Project (P–2853–073).

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervener files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. This application is not ready for environmental analysis at this time.

l. *Project Description:* The existing Broadwater Hydroelectric Project consists of: (1) a 630-foot-long, 24-foot-high concrete gravity dam with a 360-foot-long spillway containing seven inflatable rubber gates capable of raising the dam's crest elevation by 11 feet; (2) a 275-acre, 9-mile-long reservoir; (3) a 160-foot long rock jetty that extends upstream into the reservoir that serves to separate inflow to the powerhouse from the headworks of the non-project irrigation canal adjacent to the dam; (4) an intake integral with the powerhouse

and covered by two inclined trashracks, each 20 feet wide and 40 feet high, with a clear bar spacing of 3 inches; (5) a 160-foot-long, 46-foot-wide, 64-foot high powerhouse containing a single Kaplan turbine with a rated capacity of 9.66 megawatts; (6) a 100-kilovolt, 2.8-mile-long transmission line; and (6) appurtenant facilities.

Montana DNRC operates the project in a run-of-river mode (minus flows diverted for non-project irrigation purposes at the dam) and generates an estimated average of 40,669 megawatt-hours per year.

Montana DNRC proposes the following modifications to existing project facilities: (1) remove the jetty that separates the hydropower intake and the non-project irrigation canal intake; (2) install a new angled screen with 6-inch spacing between the bars and install two parallel 100-foot-long, 10-foot-wide by 10-foot-high box culverts within the irrigation intake canal and a bulkhead near the current non-project irrigation headworks, and include the new angled screen and box culverts as licensed project facilities; (3) modernize the project trash rake (*i.e.,* replace and recalibrate sensors on the rake) to minimize debris buildup on the dam intake and; (4) upgrade the Supervisory Control and Data Acquisition (SCADA) monitoring system (*i.e.,* improving connectivity to the substation, protective relaying, and automation upgrades).

Montana DNRC proposes to continue to operate in an automated run-of-river mode throughout the year where outflow from the project approximates inflow (minus flows diverted for irrigation) as it does under the current license but proposes to modify its procedures for responding to an unplanned unit trip by maintaining higher flows downstream and more slowly returning reservoir levels to normal elevation to reduce the potential for fish stranding downstream of the dam.

m. A copy of the application can be viewed on the Commission's website at *https://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support.

You may also register at *https://ferconline.ferc.gov/FERCOnline.aspx* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov.*

n. *Scoping Process:* Pursuant to the National Environmental Policy Act (NEPA), Commission staff intends to prepare either an environmental assessment (EA) or an environmental impact statement (EIS) (collectively referred to as the ''NEPA document'') that describes and evaluates the probable effects, including an assessment of the site-specific and cumulative effects, if any, of the proposed action and alternatives. The Commission's scoping process will help determine the required level of analysis and satisfy the NEPA scoping requirements, irrespective of whether the Commission issues an EA or an EIS.

Scoping Meetings

Commission staff will hold two public scoping meetings to receive input on the scope of the environmental issues that should be analyzed in the NEPA document. The daytime meeting will focus on the concerns of resource agencies, non-governmental organizations (NGOs), and Native American tribes. The evening meeting will focus on receiving input from the public. All interested individuals, resource agencies, Native American tribes, and NGOs are invited to attend one or both of the meetings. The times and locations of these meetings are as follows:

Evening Scoping Meeting

Date: Tuesday, December 13, 2022
Time: 6:30 p.m. (MST)
Place: Broadwater County Fairgrounds, 4–H Building
Address: 189 U.S. Highway 12, Townsend, Montana 59644

Once at the County Fairgrounds, the 4-H Building is the largest building of three, on-site.

Daytime Scoping Meeting

Date: Wednesday, December 14, 2022
Time: 1:30 p.m. (MST)
Place: Montana DNRC Water Resources Building, Fred Buck Conference Room
Address: 1424 9th Ave., Helena, Montana 59620

Copies of the Scoping Document (SD1) outlining the subject areas to be addressed in the NEPA document were distributed to the parties on the Commission's mailing list. Copies of the SD1 will be available at the scoping meeting or may be viewed on the web at *http://www.ferc.gov* using the ''eLibrary'' link (see item m above).

Environmental Site Review

Montana DNRC and Commission staff will conduct an environmental site review of the project beginning at 1:30 p.m. on December 13, 2022. All interested individuals, agencies, tribes, and NGOs are invited to attend. All participants should meet at the project, which is located at 511 Toston Dam Road, Toston, Montana 59643. All participants are responsible for their own transportation to the site and during the site visit. Anyone with questions about the environmental site review should contact David Lofftus at (406) 444–6659 or *DLofftus@mt.gov.* Those individuals planning to participate in the site review should notify Mr. Lofftus of their intent, no later than December 7, 2022.

Objectives

At the scoping meetings, Commission staff will: (1) summarize the environmental issues tentatively identified for analysis in the NEPA document; (2) solicit from the meeting participants all available information, especially quantifiable data, on the resources at issue; (3) encourage statements from experts and the public on issues that should be analyzed in the NEPA document, including viewpoints in opposition to, or in support of, the staff's preliminary views; (4) determine the resource issues to be addressed in the NEPA document; and (5) identify those issues that require a detailed analysis, as well as those issues that do not require a detailed analysis.

Procedures

The meetings are recorded by a stenographer and become part of the formal record of the Commission proceeding on the project. Individuals, NGOs, Native American tribes, and agencies with environmental expertise and concerns are encouraged to attend the meetings and to assist the staff in defining and clarifying the issues to be addressed in the NEPA document.

Dated: November 15, 2022.

Debbie-Anne A. Reese,

Deputy Secretary.

[FR Doc. 2022–25560 Filed 11–22–22; 8:45 am]

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RD22–4–000]

Before Commissioners: Richard Glick, Chairman; James P. Danly, Allison Clements, Mark C. Christie, and Willie L. Phillips; Registration of Inverter-Based Resources; Registration of Inverter-Based Resources

1. In order to address concerns regarding the reliability impacts of

inverter-based resources (IBR) [1] on the Bulk-Power System,[2] the Commission directs the North American Electric Reliability Corporation (NERC) to submit a work plan within 90 days of the issuance of this order describing, in detail, how it plans to identify and register owners and operators of IBRs that are connected to the Bulk-Power System, but are not currently required to register with NERC under the bulk electric system (BES) definition [3] (referred to as ''unregistered IBRs'' throughout this order) that have an aggregate,[4] material impact on the reliable operation of the Bulk-Power System. The work plan should explain how NERC will modify its processes to address unregistered IBRs (whether by working with stakeholders to change the BES definition, a change to its registration program, or some other solution) within 12 months of approval of the work plan. The work plan should also include implementation milestones ensuring that owners and operators meeting the new registration criteria are identified within 24 months of the approval date of the work plan, and that they are registered and required to comply with applicable Reliability Standards within 36 months of the approval date of the work plan. The work plan will be noticed for public comment. Once the Commission approves the proposed work plan, we direct NERC to file progress updates every 90 days thereafter detailing NERC's progress towards identifying and registering owners and operators of unregistered IBRs.

2. The Bulk-Power System generation resource mix is undergoing a rapid change, including the projected addition over the next decade of an ''unprecedented proportion of nonsynchronous resources,'' [5] *i.e.,* IBRs. According to NERC, the rapid integration of IBRs is ''the most significant driver of grid transformation'' on the Bulk-Power System.[6] However, despite the potential for IBRs to have a significant aggregate impact on the Bulk-Power System, many of the owners and operators of these individual resources are not required to register with NERC or comply with NERC's mandatory Reliability Standards.

3. To identify which Bulk-Power System users, owners, and operators must register with NERC and comply with mandatory Reliability Standards, NERC applies its Commission-approved definition of BES. This definition identifies elements [7] and groups of elements, including generation elements, that are necessary for the reliable planning and operation of the Bulk-Power System. The BES definition includes a ''bright line'' for identifying all transmission elements operated at 100 kV or higher and real and reactive power resources connected at 100 kV or higher. After applying the bright line, the BES definition also lists a series of exceptions to the bright line that NERC may apply to either include within the BES elements that fall below the bright line (inclusions), or to exclude elements from the BES that meet the bright line (exclusions). The BES definition does not include facilities used in the local distribution of electric energy. Entities that use, own, or operate elements of NERC's approved definition of BES are users, owners, and operators of the Bulk-Power System and candidates for registration.[8]

4. Unregistered IBRs connecting to the Bulk-Power System do not meet the current BES definition, are not registered with NERC, and are not required to comply with Reliability Standards.[9] While NERC has the capability to individually register unregistered IBRs connected to the Bulk-Power System through its materiality test, a non-exclusive series of factors used to assess whether an element has a material impact on reliability,[10] NERC's materiality test is typically used to assess an individual entity's material impact and not the aggregate impact of a class of facilities. NERC has not, to date, applied the materiality test to unregistered IBRs to determine whether they have an aggregate material impact on the reliable operation of the Bulk-Power System.

5. In a series of reports detailing grid disturbances over the past six years, NERC has determined that the operational characteristics of IBRs, regardless of size, coupled with their equipment settings, may cause IBRs to reduce power output, whether by tripping offline [11] or ceasing operation without tripping offline (known as ''momentary cessation''),[12] both individually and in the aggregate, in response to a single fault on a transmission or sub-transmission system.[13] For example, in the San

[1] This order uses the term IBRs to include all generating facilities that connect to the electric power system using power electronic devices that change direct current (DC) power produced by a resource to alternating current (AC) power compatible with distribution and transmission systems. This order does not address IBRs connected to the distribution system.

[2] The Bulk-Power System is defined in the Federal Power Act (FPA) as facilities and control systems necessary for operating an interconnected electric energy transmission network (or any portion thereof), and electric energy from generating facilities needed to maintain transmission system reliability. The term does not include facilities used in the local distribution of electric energy. 16 U.S.C. 824o(a)(1).

[3] NERC's Commission-approved BES definition is a subset of the Bulk-Power System and defines the scope of the Reliability Standards and the entities subject to NERC compliance. *Revisions to Elec. Reliability Org. Definition of Bulk Elec. Sys. & Rules of Proc.,* Order No. 773, 78 FR 804 (Jan. 4, 2013), 141 FERC ¶ 61,236 (2012), *order on reh'g,* Order No. 773–A, 78 FR 29209 (May 17, 2013), 143 FERC ¶ 61,053 (2013) *rev'd sub nom. People of the State of N.Y.* v. *FERC,* 783 F.3d 946 (2d Cir. 2015) (rejecting New York's challenge to the presumptive threshold for local distribution lines at 100 kV, adopted for implementing Reliability Standards for the Bulk-Power System); NERC, *Glossary of Terms Used in NERC Reliability Standards,* 5–7 (Mar. 29, 2022), *https://www.nerc.com/pa/Stand/Glossary%20of%20Terms/Glossary_of_Terms.pdf* (NERC Glossary).

[4] This order focuses on unregistered IBRs that may have smaller individual capacities but which, when considered together or in the aggregate, have a material impact on the reliability of the Bulk-Power System. Pursuant to its registration program, NERC may already register resources that have an individual material impact.

[7] ''Element'' is defined in the NERC Glossary as: ''Any electrical device with terminals that may be connected to other electrical devices such as a generator, transformer, circuit breaker, bus section, or transmission line. An element may be comprised of one or more components.'' NERC Glossary at 11.

[8] NERC Rules of Procedure, App. 5B (Statement of Compliance Registry) at 4.

[9] NERC, *Improvements to Interconnection Requirements for BPS-Connected Inverter-Based Resources,* at 1, (Sept. 2019) (IBR Interconnection Requirements Guideline) (reporting that the majority of newly interconnecting IBRs are either connecting at voltages less than 100 kV or with capacity less than 75 MVA and therefore do not meet the size criteria in the BES definition). All NERC Guidelines referenced in this order are available on NERC's website at *https://www.nerc.com/comm/Pages/Reliability-and-Security-Guidelines.aspx.*

[10] *See* NERC Rules of Procedure, App. 5B at 7–8 (listing a non-exclusive set of factors (materiality test) for consideration in registration decisions).

[11] Tripping offline is a mode of operation during which part of or the entire IBR disconnects from the Bulk-Power System and therefore cannot supply real and reactive power.

[12] Momentary cessation is a mode of operation during which the inverter remains electrically connected to the Bulk-Power System, but the inverter does not inject current during low or high voltage conditions outside the continuous operating range. As a result, there is no current injection from the inverter and therefore no active or reactive current (and no active or reactive power). NERC, *Reliability Guideline BPS-Connected Inverter-Based Resource Performance,* 11 (Sept. 2018) (IBR Performance Guideline).

[13] NERC's IBR disturbance event reports indicate that unregistered Bulk-Power System connected solar and wind IBRs (unregistered IBRs) experience identical power reduction and power loss issues.

Continued

Fernando Disturbance Report, NERC found that many of the facilities that unexpectedly and adversely responded to the fault events were ''non-BES solar PV [IBRs] that had a noticeable effect on [Bulk-Power System] performance in aggregate.'' [14] This aggregate impact may occur when individual IBRs' controls and equipment protection settings are not configured or programmed to ride through [15] system disturbances.[16] These reports demonstrate that the potential for IBRs to have a material impact on the Bulk-Power System is not limited to larger IBRs that are typically required to register with NERC or to the IBRs within an individual balancing authority area. Additionally, simulations indicate that aggregate IBRs experiencing momentary cessation can lead to instability, uncontrolled separation, and voltage collapse.[17] In areas of high IBR saturation, simulations indicate that this type of response may have an impact much greater than the most severe single contingency (*i.e.,* the traditional worst-case N–1 contingency) [18] of a balancing authority area, potentially impacting a widespread area.[19]

6. Therefore, we find that it is necessary to ensure that unregistered IBRs that may have an aggregate material impact on the reliable operation of the Bulk-Power System are required to: (1) register with NERC, and (2) comply with NERC Reliability Standards. Hence, we direct NERC, pursuant to our authority under FPA section 215,[20] to submit for Commission approval within 90 days a work plan describing in detail how NERC plans to identify and register unregistered IBRs that, in the aggregate, have a material impact on the reliable operation of the Bulk-Power System. The work plan should explain how NERC will modify its processes to encompass unregistered IBRs (whether by working with stakeholders to change the BES definition, a change to its registration program, or some other solution) within 12 months of approval of the work plan. The work plan should also include implementation milestones ensuring that unregistered IBR owners and operators meeting the new registration criteria are identified within 24 months of the approval date of the work plan, and that they are registered and required to comply with applicable Reliability Standards within 36 months of the approval date of the work plan. The work plan will be noticed for public comment. Once the Commission approves the work plan, NERC must file updates every 90 days thereafter detailing its progress towards identifying and registering owners and operators of IBRs (*e.g.,* the number or percentage of entities identified and/or registered and anticipated completion date if changed, with an explanation of any such change).

7. In view of the rapid growth of IBRs and their potential to materially impact the reliability of the Bulk-Power System (including the potential for unregistered IBRs to materially impact the reliability of the Bulk-Power System in the aggregate), we are issuing this order concurrently with a notice of proposed rulemaking that preliminary finds that the Reliability Standards do not fully address the impacts of IBRs on the reliable operation of the Bulk-Power System and that proposes to direct NERC to create new or modified Reliability Standards that address reliability concerns pertaining to IBRs.[21] Together, these actions are necessary to ensure that the ongoing integration of IBRs does not adversely impact the reliable operation of the Bulk-Power System.

I. Background

A. Section 215 of the FPA

8. Section 215 of the FPA provides that the Commission may certify an Electric Reliability Organization (ERO), the purpose of which is to establish and enforce Reliability Standards, subject to Commission review and approval.[22] Once approved, the Reliability Standards may be enforced by the ERO, subject to Commission oversight, or by the Commission independently.[23] Pursuant to section 215 of the FPA, the Commission established a process to select and certify an ERO,[24] and subsequently certified NERC.[25]

B. NERC Registration

9. The Commission's regulations require each user, owner, and operator of the Bulk-Power System to be registered with the ERO and to comply with applicable Reliability Standards.[26] NERC registers users, owners, and operators of the Bulk-Power System through either application of its BES definition or its materiality test.[27] As explained by NERC's Rules of Procedure, ''any entity reasonably deemed material to the reliability of the [Bulk-Power System] will be registered, irrespective of other considerations.'' [28] NERC determines whether an entity is ''deemed material'' through either application of its BES definition or its materiality test to an entity's facilities and elements. Once an entity is identified as a candidate for registration, the functions it normally performs are compared to a list of function type definitions.[29] NERC registers these Bulk-Power System users, owners, and operators by the reliability functions they perform (*e.g.,* generator owner or

generator operator),[30] and to which specific requirements of the mandatory Reliability Standards are applicable.[31]

10. NERC's registration criteria also allow NERC to limit the compliance obligations of a given entity registered for a particular function or of a similarly-situated class of entities, as warranted based on the particular facts and circumstances, to a subset of Reliability Standards or requirements.[32] For example, an entity that owns underfrequency load shedding (UFLS) protection equipment needed to implement a required UFLS program designed for the protection of the BES, but that does not meet any of the other registration criteria for a distribution provider, would be registered as a ''UFLS-only distribution provider'' and only be required to comply with a subset of the Reliability Standards normally required for registered distribution providers.[33]

C. Bulk Electric System Definition

11. On March 16, 2007, in Order No. 693, pursuant to section 215(d) of the FPA, the Commission approved 83 of 107 proposed Reliability Standards and the Glossary of Terms Used in NERC Reliability Standards (NERC Glossary), which included an early version of NERC's BES definition.[34] The Commission observed that the NERC BES definition omitted ''significant portions of the transmission system component[s] of the Bulk-Power System'' [35] but declined to direct NERC at that time to revise its BES definition. The Commission stated that it would, for at least an initial period, rely on the NERC BES definition to determine the applicability of the Reliability Standards; however, the Commission noted that it ''remains concerned about the need to address the potential for gaps in coverage of facilities.'' [36]

12. On November 18, 2010, in Order No. 743, the Commission directed NERC to revise its definition of the term BES to ensure that the definition encompasses all facilities necessary for operating an interconnected transmission network.[37] The Commission concluded that the best way to accomplish this was to eliminate the Regional Entity discretion to define the BES without NERC or Commission review, maintain a bright-line threshold that includes all facilities operated at or above 100 kV except radial facilities,[38] and adopt an exemption process and criteria for removing from the BES facilities that are not necessary for operating the interconnected transmission network. In Order No. 743, the Commission allowed NERC to ''propose a different solution that is as effective as, or superior to, the Commission's proposed approach in addressing the Commission's technical and other concerns so as to ensure that all necessary facilities are included within the scope of the definition.'' [39]

13. On January 25, 2012, NERC submitted two petitions to revise its BES definition and Rules of Procedure pursuant to the directives in Order No. 743, including: (1) NERC's proposed revision to the definition of BES with a ''core'' definition (*i.e.,* the 100 kV bright line) and provisions that include and exclude specific categories of facilities within the BES irrespective of the bright line; [40] and (2) revisions to NERC's Rules of Procedure to add an exception process to classify or de-classify an element as part of the BES on a case-by-case basis.[41] On December 20, 2012, in Order No. 773, the Commission approved the revisions to the BES definition and the NERC Rules of Procedure exception process.[42]

14. NERC uses the BES definition to identify which users, owners, and operators of the Bulk-Power System should be registered by first using the BES definition bright-line (*i.e.,* all elements connected at 100 kV or higher). After the bright line, additional elements may be identified as BES elements by applying one or more of the five ''Inclusions'' that make up the BES definition.[43]

15. On December 13, 2013, NERC filed proposed revisions to the BES definition to, among other things, address Commission directives in Order Nos. 773 and 773–A to improve the BES definition inclusions and exclusions.[44] On March 20, 2014, the Commission approved modifications to the BES definition inclusions and exclusions to ensure that generator interconnection facilities at or above 100 kV connected to BES generators identified in inclusion I2 (generating resources connected at a voltage of 100 kV or above with either a gross individual nameplate rating above 20 MVA or a gross plant/facility nameplate rating greater than 75 MVA) are not excluded from the BES.[45] The Commission also approved revisions to inclusion I4 to include collector systems from the point where the generation aggregates to greater than 75 MVA to a common point of connection at a voltage of 100 kV or above.[46]

16. The inclusions relevant for IBRs are inclusions I2 (generating resources) and I4 (dispersed power producing resources),[47] which are defined as follows:

I2—Generating resource(s) including the generator terminals through the high-side of the step-up transformer(s) connected at a voltage of 100 kV or above with: (a) Gross individual nameplate rating greater than 20 MVA. Or, (b) Gross plant/facility aggregate nameplate rating greater than 75 MVA.

I4—Dispersed power producing resources that aggregate to a total capacity greater than 75 MVA (gross nameplate rating), and that are connected through a system designed primarily for delivering such capacity to a common point of connection at a voltage of 100 kV or above. Thus, the facilities designated as BES are: (a) The individual resources, and (b) The system designed primarily for delivering capacity from the point where those resources aggregate to greater than 75 MVA to a common point of connection at a voltage of 100 kV or above.

17. Further, in approving revisions to NERC's BES definition in Order No.

[30] *See* NERC, *Active Entities List* (updated Oct. 3, 2022), *https://www.nerc.com/pa/comp/Registration%20and%20Certification%20DL/NERC_Compliance_Registry_Matrix_Excel.xlsx.*

[31] Each Reliability Standard includes an applicability section that identifies the specific functional entity or subset of functional entities responsible for compliance with that standard.

[42] Order No. 773, 141 FERC ¶ 61,236.

[43] The five inclusions are: (1) I1—Transformers; (2) I2—Generating Resources; (3) I3—Blackstart Resources; (4) I4—Dispersed Power Producing Resources; and (5) Static or Dynamic Devices. The NERC Glossary includes additional detail on what specific configurations are covered by these inclusions. NERC Glossary at 5–7.

[44] *N. Am. Elec. Reliability Corp.,* Docket No. RD14–2–000, at 2 (filed Dec. 13, 2013).

[45] *N. Am. Elec. Reliability Corp.,* 146 FERC ¶ 61,199, at P 8 (2014).

[46] *Id.* P 19.

[47] The Commission approved NERC's clarification that inclusion I4's dispersed power producing resources includes variable generation resources in light of ''the increasing presence of wind, solar, and other non-traditional forms of generation.'' The Commission recognized that these individual variable generation units should be included within the scope of the BES ''where necessary to support reliability.'' *Id.* P 47.

773, the Commission recognized its authority under section 215 of the FPA to designate an element as part of the BES.[48] The Commission went on to explain that ''where an event analysis of a system disturbance indicates the operational importance of sub-100 kV elements . . . to reliability, the Commission may find it necessary for the reliable operation of the interconnected transmission network to designate facilities to be included in the bulk electric system.'' [49] The Commission also explained that it would expect in the normal course that registered entities, Regional Entities, and NERC would proactively identify and include those sub-100 kV elements (including generation elements) in the BES.[50] But in the case that another entity does not initiate the registration of such facilities, the Commission stated it would exercise its authority to do so.[51]

D. NERC Determination of Material Impact

18. An entity that does not have elements that fall within the BES definition may nevertheless be registered if it can be demonstrated that the entity has a material impact on Bulk-Power System reliability. To determine whether users, owners, and operators of facilities and elements that fall outside the BES definition are material to Bulk-Power System reliability and must be registered, NERC uses a non-exclusive set of factors (materiality test).[52] NERC recognizes that only a subset of the materiality test factors may be applicable to particular functional registration categories when determining whether a facility should be registered or deregistered.[53] All such registration decisions regarding materiality must be made by a NERC-led registration review panel.[54]

19. Relevant to IBRs, the factors for determining material impact include the following:

Will intentional or inadvertent removal of an Element owned or operated by the entity, or a common mode failure of two Elements as identified in the Reliability Standards (for example, loss of two Elements as a result of a breaker failure), lead to a reliability issue on another entity's system (such as a neighboring entity's Element exceeding an applicable rating, or loss of non-consequential load due to a single contingency)? Conversely, will such contingencies on a neighboring entity's system result in issues for Reliability Standards compliance on the system of the entity in question?

. . . .

Can the normal operation, misoperation, or malicious use of the entity's Protection Systems (including UFLS [under frequency load shedding], UVLS [under voltage load shedding], Special Protection System, Remedial Action Schemes and other Protection Systems protecting BES Facilities) cause an adverse impact on the operational reliability of any associated Balancing Authority, Generator Operator or Transmission Operator, or the automatic load shedding programs of a PC [planning coordinator] or TP [transmission planner] (UFLS, UVLS)? [55]

II. Discussion

20. We are issuing this order to ensure that timely action is taken to address the reliability challenges presented by IBRs because their individual and aggregate impacts can exacerbate disturbances on the Bulk-Power System. Such impacts are well documented in studies of Bulk-Power System disturbances over the past six years, as discussed below. The rapid growth of IBRs will make these impacts more acute over time unless they are adequately addressed. Accordingly, we direct NERC within 90 days of the date of issuance of this order to develop and submit for Commission approval a work plan describing, in detail, how NERC will identify and register owners and operators of unregistered IBRs that in the aggregate materially impact the reliable operation of the Bulk-Power System.

21. NERC should explain in its work plan how NERC will modify its processes to encompass unregistered IBRs (whether by working with stakeholders to change the BES definition, a change to its registration program, or some other solution) within 12 months of approval of the work plan. The work plan should also include implementation milestones ensuring that unregistered IBR owners and operators meeting the new registration criteria are identified within 24 months of the approval date of the work plan, and they are registered and required to comply with applicable Reliability Standards within 36 months of the approval date of the work plan. The work plan will be noticed for public comment. Once the Commission approves the proposed work plan, we direct NERC to file progress updates every 90 days thereafter detailing NERC's progress towards modifying its processes and, once the modification is complete, every 90 days thereafter detailing its progress towards identifying and registering owners and operators of unregistered IBRs.

22. IBRs are rapidly becoming a principal source of electric power,[56] and in certain areas of the Bulk-Power System the IBR saturation is significant enough that their operations can materially impact Bulk-Power System reliability. As their contribution to the resource mix continues to increase, IBRs present new considerations for transmission planning and operation of the Bulk-Power System, which was designed primarily for synchronous generation.[57] Like synchronous generators, IBRs such as solar PV, wind, fuel cells, and battery storage produce real and reactive power; however, they do not react to disturbances on the transmission system in the same manner as synchronous generators do. As discussed below, the operational characteristics and equipment settings of IBRs have in some instances exacerbated system disturbances both individually and in the aggregate, and the status quo presents a risk to Bulk-Power System reliability.

23. Unregistered IBRs often have small individual generation capacities, are connected to the Bulk-Power System at less than 100 kV transmission or sub-transmission voltages, and do not meet one of the inclusions in the BES definition. NERC's materiality test [58] includes an assessment of material

[55] NERC Rules of Procedure, App. 5B at 7–8.

[56] *See* NERC, *2021 Long Term Reliability Assessment Report,* 29 (Dec. 2021). *https://www.nerc.com/pa/RAPA/ra/Reliability%20Assessments%20DL/NERC_LTRA_2021.pdf.* In the report, NERC projects IBR nameplate capacity additions of approximately 504 GW of solar and 360 GW of wind (*i.e.,* a total nameplate capacity of 864 GW) and cumulative retirements of approximately 60 GW of nuclear, coal, natural gas, and biomass to the Bulk-Power System over the next decade.

[57] *See e.g.,* NERC, *2012 Special Assessment Interconnection Requirements for Variable Generation,* 1 (Sept. 2012), *https://www.nerc.com/files/2012_IVGTF_Task_1-3.pdf* (finding that ''many of NERC's existing interconnection standards and procedures have been based on technical characteristics and physical capabilities of traditional power generation resources that employ synchronous generators'').

[58] NERC Rules of Procedure, App. 5B at 7–8.

impact for individual entities; however, it has not been used to determine whether unregistered IBRs can, in the aggregate, have a material impact on the Bulk-Power System such that their owners or operators should be registered with NERC. As discussed below, the aggregate impact of unregistered IBRs is not directly addressed by the BES definition or the materiality test, meaning that the users, owners, and operators of those unregistered IBRs are not required to register with NERC and therefore are not required to comply with Reliability Standards.

A. Unregistered IBRs Continue To Exacerbate Disturbance Events on the Bulk-Power System

24. The first documented large-scale reliability issues related to IBRs occurred in August of 2016 during the Blue Cut Fire event in California. Until this event, the likelihood of IBRs tripping or momentarily ceasing during faults on the Bulk-Power System was unclear. Since the Blue Cut Fire, at least 11 additional NERC-documented events [59] have demonstrated common mode failures of IBRs acting unexpectedly and adversely in response to normally cleared transmission line faults on the Bulk-Power System.[60] Most of the early NERC reports, however, do not provide IBR nameplate capacity of the facilities involved. Without a breakdown of unregistered IBR and IBR nameplate capacities we are unable to determine what percentage of the elements involved were unregistered IBRs. Later studies of IBR-related disturbance events indicate that a loss of real power generation from unregistered IBRs contributed to the total resource loss during these disturbances.[61]

25. On July 7, 2020, two consecutive faults in northern Los Angeles county, California resulted in the wide-spread interruption of solar PV IBRs across the Southern California region, referred to as the ''San Fernando Disturbance.'' [62] Those faults included an approximately 205 MW power reduction followed by a 1,000 MW power reduction, both observed at Bulk-Power System-connected solar PV IBRs.[63] In the San Fernando Disturbance Report, NERC found that many of the facilities that unexpectedly and adversely responded to the fault events were ''non-BES solar PV [IBR] that had a noticeable effect on [Bulk-Power System] performance in aggregate.'' [64] NERC explained that the performance of these types of IBRs ''mirror the responses of the larger solar PV [IBR] facilities; [and] this is to be expected since the inverter manufacturer, make, and model are likely similar.'' [65] The San Fernando Disturbance Report showed that the active power output response from two small solar PV IBRs during the disturbance responded to the normally cleared faults with their inverters entering momentary cessation and returning to service after several minutes.[66] During the event, about 1,000 MW of IBRs tripped or momentarily ceased operation; 112 MW or about 11% of those IBRs were unregistered IBRs.[67]

26. During the summer of 2021, California experienced four solar PV IBR disturbance events. Similar to prior disturbances, these four events involved normally cleared transmission line faults and the loss of Bulk-Power System-connected solar PV IBRs.[68] NERC and WECC found that 13 non-BES connected solar PV IBRs contributed between almost 10% (in Lytle Creek, 58 MW of 600 MW) and almost 30% (in Tumbleweed, 162 MW of 566 MW) of the total losses. The report stated that the total number of non-BES connected solar PV IBRs may have been underestimated because the count only included solar PV IBRs with active power reduction of more than 10 MW.[69] As owners and operators of unregistered facilities are not required to respond to NERC Alerts (and therefore do not provide data to NERC), NERC was unable to perform a complete root cause analysis that included these facilities.[70]

27. In its 2021 Solar PV Disturbances Report, NERC recognized the risk posed by non-BES connected IBRs, finding that ''[t]he ongoing widespread [power] reduction of solar PV [IBR] resources continues to be a notable reliability risk to the [Bulk-Power System], particularly when combined with the additional loss of other generating resources on the [Bulk-Power System] and in aggregate on the distribution system.'' [71] Further, NERC has stated that ''lack of data visibility and poor data quality continue to be a concern for comprehensive event analysis after large [Bulk-Power System] disturbances.'' [72]

28. Since the discernment of reliability issues related to IBRs in 2016, NERC has taken the following actions to assess and mitigate the impact of both registered and unregistered IBRs: (1) published seven reports documenting 12 events; [73] (2) issued two NERC Alerts; [74] (3) issued three reliability guidelines regarding IBR data collection and performance; [75] (4) formed an IBR

[59] These 12 events report an average of approximately 1,000 MW of IBRs entering into momentary cessation or tripping in the aggregate. *See* Blue Cut Fire Event Report (covering the Blue Cut Fire (August 16, 2016)); Canyon 2 Fire Event Report (covering the Canyon 2 Fire (October 9, 2017)); NERC and WECC, *April and May 2018 Fault Induced Solar Photovoltaic Resource Interruption Disturbances Report* (Jan. 2019) (Angeles Forest and Palmdale Roost Events Report) (covering the Angeles Forest (April 20, 2018) and Palmdale Roost (May 11, 2018) events); San Fernando Disturbance Report (covering the San Fernando Event (July 7, 2020)); NERC and Texas RE, *Odessa Disturbance* (Sept. 2021) (Odessa Disturbance Report) (covering events in Odessa, Texas on May 9, 2021 and June 26, 2021); NERC and WECC, *Multiple Solar PV Disturbances in CAISO* (April 2022) (2021 Solar PV Disturbances Report) (covering four events: Victorville (June 24, 2021); Tumbleweed (July 4, 2021); Windhub (July 28, 2021); and Lytle Creek (August 26, 2021)); and NERC and Texas RE, *Panhandle Wind Disturbance, Texas Event: March 22, 2022,* (Aug. 2022) (Panhandle Wind Disturbance Report).

[60] Smaller scale events have occurred as well. However, there is less documentation of smaller scale events in part because NERC only tracks ''Category 1'' events, which are unexpected outages of three or more BES facilities, including interruptions of IBRs aggregated to a 500 MW threshold (Category 1aii and Category 1i). *See, e.g.,* NERC, *ERO Event Analysis Process—Version 4.0*, at 2 (Dec. 2019), *https://www.nerc.com/pa/rrm/ea/ERO_EAP_Documents%20DL/ERO_EAP_v4.0_final.pdf.*

[61] As unregistered IBRs do not have to comply with Reliability Standards or respond to NERC Alerts, it is difficult for NERC to perform root cause analyses of IBR-disturbance events that fully reflect unregistered IBR contributions to Bulk-Power System disturbances. *See e.g.,* 2021 Solar PV Disturbances Report at 13 (''non-BES facilities chose not to respond to the [requests for information] nor participate in any follow-up discussions to perform root cause analysis.'').

NERC guidelines

Continued

performance task force (IRPTF) [76] and system planning impacts from distributed energy resources working group; (5) issued multiple technical reports; [77] and (6) issued an IBR strategy document.[78] Nevertheless, NERC acknowledges that its actions to date have not successfully addressed the most common reliability issues posed by IBRs, like momentary cessation, nor have they resolved any modeling or other IBR-related performance issues from unregistered IBRs.[79]

29. The NERC IRPTF May 2020 technical report explained that the ''[i]nformation from only about one-half of the installed capacity of [Bulk-Power System]-connected solar PV resources (in the Western Interconnection) was collected as part of the NERC Alert process based on the size of resources and their designation as [BES] or non-BES resources. The extent of model accuracy for those resources that did not respond to the NERC Alert is unknown.'' [80] Further, the report found that ''[w]hile entities owning non-BES resources were requested to provide data, only BES resources are required to respond to the data requests in the NERC Alert.'' [81] As a consequence of not having the requested unregistered IBR data, the NERC IRPTF made modeling assumptions that only included roughly half (*i.e.,* approximately 7 GW) of the existing solar PV IBRs in the WECC base case when performing system reliability studies to identify potential IBR reliability issues.[82] In 2020, NERC and WECC conducted a review of the Western Interconnection base case transmission planning model and found numerous modeling errors and omissions regarding IBRs.[83]

30. In summary, events and disturbances have shown that IBRs, regardless of size and transmission or sub-transmission voltage, have a material impact on Bulk-Power System reliability. Further, while NERC recognizes that action is necessary to address the most common reliability issues posed by IBRs, these issues have not been resolved. Finally, even when NERC does address IBR-specific gaps through its Reliability Standards, until unregistered IBRs are registered, they will not be required to comply with the Reliability Standards.

B. Generator Owners and Operators of Unregistered IBRs That Materially Impact the Reliable Operation of the Bulk-Power System Must Be Registered by NERC and Subject to Mandatory Reliability Standards

31. As IBR saturation continues to increase on the Bulk-Power System, we are concerned that, absent Commission action, larger numbers of unregistered IBRs may pose increasing risk to reliable operation, as demonstrated by the disturbance events described above. Therefore, we find it necessary to ensure that NERC register the owners and operators of those unregistered IBRs that, in the aggregate, have a material impact on Bulk-Power System reliability, to ensure those entities are subject to a relevant set of mandatory and enforceable Reliability Standard requirements.

32. Many IBRs have small individual generation capacities, are connected to the Bulk-Power System at less than 100 kV transmission or sub-transmission voltage, or do not meet one of the inclusions in the NERC BES definition, and therefore are not registered. Similarly, while NERC's materiality test can be used to assess whether an individual entity that does not meet the NERC BES definition has a material impact on the reliable operation of the Bulk-Power System, and thus should be registered with NERC and subject to its mandatory Reliability Standards, NERC has not, to date, applied the materiality test to unregistered IBRs to determine whether they, in the aggregate, have a material impact on the reliable operation of the Bulk-Power System. Therefore, NERC has not addressed through either its BES definition or the materiality test the impact of unregistered IBRs that, in the aggregate, materially impact the reliable operation Bulk-Power System. As a result, these potentially impactful unregistered IBRs are not required to comply with any Reliability Standards. To address this concern, we find that unregistered IBRs connected to the Bulk-Power System, regardless of size and transmission or sub-transmission voltage, that in the aggregate have a material impact on Bulk-Power System performance should be registered.

33. Based on the record of IBR facilities materially impacting the reliability of the Bulk-Power System discussed above, we find that the current BES definition and NERC's application of the materiality test to individual entities do not address the potential impacts to the reliability of the Bulk-Power System of the increasing numbers of smaller non-BES Bulk-Power System-connected IBRs. Therefore, we direct NERC to develop and file a work plan within 90 days of the date of this order explaining how it will identify and register unregistered IBRs that, in the aggregate, have a material impact on the reliable operation of the Bulk-Power System, but that are not currently required to be registered with NERC under the BES definition. The work plan should explain how NERC will modify its processes to encompass unregistered IBRs (whether by working with stakeholders to change the BES definition, changing its Rules of Procedure related to registration, or some other solution) within 12 months of approval of the work plan. The work plan should also include implementation milestones ensuring that unregistered IBR owners and operators meeting the new registration criteria are identified within 24 months of the approval date of the work plan, and that they are registered and required to comply with applicable Reliability Standards within 36 months of the approval date of the work plan. The work plan will be noticed for public comment.

34. We recognize that the currently unregistered IBRs may not present the same impact in all circumstances as IBRs that fall under the current BES definition. Accordingly, NERC may determine that the full set of Reliability Standard Requirements otherwise applicable to generator owners and operators need not apply to currently

---

are a collection of best practices and are provided to the industry as voluntary guidance; they are not mandatory. All NERC guidelines referenced in this order are available on NERC's website at *https://www.nerc.com/comm/Pages/Reliability-and-Security-Guidelines.aspx.*

[76] The task force became the IBR Performance Working Group in October 2020, and most recently became the IBR Performance Subcommittee in March 2022. For consistency, this order uses ''IRPTF'' to refer to all three iterations.

[77] *See e.g.,* NERC, *Technical Report, BPS-Connected Inverter-Based Resource Modeling and Studies* (May 2020) (Modeling and Studies Report); NERC, *WECC Base Case Review: Inverter-Based Resources* (Aug. 2020), (WI Base Case IBR Review). All technical reports referenced in this order are available on NERC's website at *https://nerc.com/comm/PC/Pages/Inverter-Based-Resource-Performance-Task-Force.aspx.*

[78] NERC IBR Strategy, *supra* note 6.

[79] *See e.g.,* San Fernando Disturbance Report at 23; *see also* Odessa Disturbance Report at vi (finding that industry is aware of the guidance materials published by NERC yet are not comprehensively adopting those recommendations); *see also* NERC, *Agenda Member Representatives* Committee, at 16 (Apr. 2022) (stating that as NERC ''continue[s] to observe, significant amounts of inverter-based resources cease or reduce energy production during system faults just when needed—this increasingly risky behavior impacts the reliable operation of the bulk power system'').

[80] Modeling and Studies Report at 2.

[81] *Id.* at 25 n.34.

[82] *See id.* at 24, 25 (finding that while the WECC base case reflects around 14,500 MW of Bulk-Power System-connected non-BES solar PV IBRs, only approximately 7,200 MW of Bulk-Power System-connected non-BES solar PV IBRs submitted data during the NERC Alert process).

[83] WI Base Case IBR Review Report. The WI base case has been updated since the time of this report.

unregistered IBR generator owners and operators when they are registered.[84] For example, NERC may determine that currently unregistered IBR generator owners and operators that must register as a result of this order need comply only with provisions pertaining to facility interconnections and studies, protection systems, modeling, voltage support, and frequency response, as well as any new or modified standards developed through the rulemaking in Docket No. RM22–12–000. While we provide the above by way of example, NERC may, subject to Commission review and approval, determine whether specific provisions from the full set of Reliability Standard Requirements otherwise applicable to generator owners and operators need not apply to generator owners and operators when they are registered that currently only own unregistered IBRs.

35. Accordingly, consistent with the discussion in this order, we direct NERC to file the work plan within 90 days of the date of this order for Commission approval. The work plan filed by NERC will be noticed for public comment. Once the Commission approves the work plan, we direct NERC to file progress updates every 90 days from the date of approval documenting NERC's progress. We direct NERC to complete implementation of the work plan (whether by working with stakeholders to change the BES definition, changes to its registration program, or some other solution) within 12 months from the date of Commission approval of the work plan and to complete the identification of unregistered IBR owners and operators within 24 months from the date of Commission approval, so that they are registered and required to comply with applicable Reliability Standards within 36 months from the date of Commission approval of the work plan.

III. Information Collection Statement

36. The Paperwork Reduction Act (PRA)[85] requires each federal agency to seek and obtain approval by the Office of Management and Budget (OMB) before undertaking a collection of information (including reporting, record keeping, and public disclosure requirements) directed to ten or more persons or contained in a rule of general applicability. OMB regulations[86] require approval of certain information collection requirements (including deletion or revision of existing requirements, or implementation of new requirements). Upon approval of a collection of information, OMB will assign an OMB Control Number and an expiration date. Respondents subject to the filing requirements will not be penalized for failing to respond to the collection of information unless the collection of information displays a valid OMB control number.

37. The information collection affected by this order is FERC–725, ''Certification of Electric Reliability Organization; Procedures for Electric Reliability Standards'' (OMB Control Number 1902–0225). The information collection requirements in this order are covered by and included in, the existing OMB-approved FERC–725.[87]

38. This order directs the ERO to develop and submit to the Commission for approval within 90 days of the date of this order a work plan describing, in detail, how the ERO plans to modify its registration processes to identify and register owners and operators of unregistered IBRs that in the aggregate, materially impact the reliable operation of the Bulk-Power System, as discussed in the body of this order. NERC is required to submit progress updates every 90 days after approval of the work plan.

39. In this order, NERC is directed to: (1) complete modifications to its registration process within 12 months of Commission approval of the work plan; (2) complete identification of owners and operators of IBRs that are connected to the Bulk Power System and that, in the aggregate, materially impact the reliable operation of the Bulk-Power System within 24 months of Commission approval of the work plan; and (3) complete registration of unregistered IBR owners and operators so they are required to comply with applicable Reliability Standards within 36 months of Commission approval of the work plan, as discussed in the body of this order.

40. The Commission solicits comments on the Commission's need for the revision of the information collection, whether the information will have practical utility, the accuracy of the burden estimates, ways to enhance the quality, utility, and clarity of the information to be collected or retained.

41. Interested persons may submit questions about this information collection by contacting Ellen Brown, Office of the Executive Director, at *DataClearance@ferc.gov,* or (202) 502–8663. Please send comments concerning the collection of information and the associated burden estimates to: Office of Information and Regulatory Affairs, Office of Management and Budget [Attention: Federal Energy Regulatory Commission Desk Officer]. Due to security concerns, comments should be submitted at *www.reginfo.gov/public/do/PRAMain.* Comments submitted to OMB should be sent within 60 days of publication of this notice in the **Federal Register** and refer to FERC–725 and OMB Control No. 1902–0225.

The Commission orders:

(A) NERC is hereby directed to submit a work plan within 90 days of the date of this order describing, in detail, how it plans to modify with stakeholder input its BES definition, registration program, or some other solution to identify and register owners and operators of unregistered IBRs that are connected to the Bulk-Power System and that, in the aggregate, materially impact the reliable operation of the Bulk-Power System, as discussed in the body of this order.

(B) NERC is hereby directed to complete modifications in accordance with its work plan within 12 months of Commission approval of the work plan, complete identification of owners and operators of IBRs that in the aggregate, materially impact the reliable operation of the Bulk-Power System within 24 months of Commission approval of the work plan, and complete registration of IBR owners and operators so they are required to comply with applicable Reliability Standards within 36 months of Commission approval of the work plan, as discussed in the body of this order.

(C) NERC is hereby directed to file detailed progress updates on the status of its workplan, completed implementation milestones, and any delays, every 90 days from the date of Commission approval of the work plan, as discussed in the body of this order.

By the Commission. Commissioner Danly is concurring with a separate statement attached.

Issued: November 17, 2022.

Debbie-Anne A. Reese,

Deputy Secretary.

United States of America

Federal Energy Regulatory Commission

Registration of Inverter-based Resources.

Docket No. RD22–4–000 (Issued November 17, 2022)

DANLY, Commissioner, *concurring:*

[84] *See, e.g., New Harquahala Generating Co., LLC,* 123 FERC ¶ 61,173 (2008).

[85] 44 U.S.C. 3501–3521.

[86] 5 CFR pt. 1320 (2021).

[87] FERC–725 includes the burden, reporting, and recordkeeping requirements associated with Reliability Standards Development, Reliability Assessments, Self-Assessment and ERO Application, Reliability Compliance, Stakeholder Survey, and Other Reporting.

1. I concur in today's order.[1] I remain gravely concerned about the North American Electric Reliability Corporation's (NERC) inability to act swiftly and nimbly in response to emerging risks that threaten the reliability of the Bulk-Power System (BPS). This is due in no small part to the statutory framework of Federal Power Act (FPA) section 215.[2] According to NERC's Inverter-Based Resource (IBR) Strategy document,[3] ''[t]he [Electric Reliability Organization (ERO)] Enterprise has analyzed numerous widespread IBR loss events and identified many systemic performance issues with the inverter-based fleet *over the past six years*.'' [4] NERC explains that ''[t]he disturbance reports, alerts, guidelines, and other deliverables developed by the ERO thus far have highlighted that abnormal IBR performance issues pose a significant risk to BPS reliability.'' [5] Our actions today in this and another proceeding [6] propose firm deadlines by which NERC must act to register and hold IBR entities accountable for failure to comply with mandatory and enforceable Reliability Standards.

2. Better late than never, I suppose. Nevertheless, it could be at least four years before certain of the IBR entities are registered and another five years before the full suite of contemplated requirements are mandatory and enforceable. So, it will be about ten or eleven years *after* the significant reliability risk was definitively identified that we will have required registration and Reliability Standards in place. The reliability consequences that attend the rapid deployment of an unprecedented number of IBRs are, at this point, unarguable. As NERC's President and CEO explained last week: ''the pace of the transformation of the electric system needs to be managed and that transition needs to occur in an orderly way.'' [7] Mandatory reliability standards must be implemented as quickly as possible to ensure the reliable operation of the BPS. We at FERC are responsible for the reliability of the BPS under FPA section 215. I fear we may be taking too long to address reliability challenges that urgently need our attention.

For these reasons, I respectfully concur.

James P. Danly,

Commissioner.

[Project No. 1988–100]

Pacific Gas and Electric Company; Notice of Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Application Type:* Application for Temporary Variance of Minimum Flow Requirement.

b. *Project No:* 1988–100.

c. *Date Filed:* October 31, 2022.

d. *Applicant:* Pacific Gas and Electric Company (licensee).

e. *Name of Project:* Haas-Kings River Project.

f. *Location:* The project is located on the North Fork Kings River in Fresno County, California.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791a–825r.

h. *Applicant Contact:* Erin Wick, License Coordinator, Pacific Gas and Electric Company, (559) 203–4310.

i. *FERC Contact:* Katherine Schmidt, (415) 369–3348, *katherine.schmidt@ferc.gov.*

j. *Deadline for filing comments, motions to intervene, and protests:* December 16, 2022.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp*. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. The first page of any filing should include the docket number P–1988–100. Comments emailed to Commission staff are not considered part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. *Description of Request:* The licensee requests a temporary variance of its supplemental flow requirement in Dinkey Creek below the Dinkey Creek siphon. Specifically, the licensee proposes to forego releasing the required 15 cubic feet per second (cfs) supplemental flow from November 28, 2022, through February 5, 2023. The licensee explains that the variance is necessary as a result of planned powerhouse outages, which limit its ability to move water through the Kings penstock into Dinkey Creek. The licensee also explains that the proposed variance is unlikely to result in adverse effects to biological resources due to the approximate 15 cfs natural flows in Dinkey Creek, leakage from Wishon Reservoir of approximately 25 cfs, and 25 cfs natural flows further downstream in the North Fork Kings River and cooler water temperatures during the winter months.

l. *Locations of the Application:* This filing may be viewed on the Commission's website at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 1–866–208–3676 or email *FERCOnlineSupport@ferc.gov,* for TTY, call (202) 502–8659. Agencies may obtain copies of the application directly from the applicant.

m. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

n. *Comments, Protests, or Motions to Intervene:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, 211, 214, respectively. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

o. *Filing and Service of Documents:* Any filing must (1) bear in all capital letters the title ''COMMENTS'', ''PROTEST'', or ''MOTION TO INTERVENE'' as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person commenting, protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis. Any filing made by an intervenor must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 385.2010.

Dated: November 16, 2022.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings #1

Take notice that the Commission received the following electric corporate filings:

Docket Numbers: EC21–77–001.

Applicants: FirstEnergy Corp.

Description: FirstEnergy Corp. submits Notice of Non-Material Change in Fact.

Filed Date: 11/16/22.

Accession Number: 20221116–5167.

Comment Date: 5 p.m. ET 12/7/22.

Docket Numbers: EC23–28–000.

Applicants: Michigan Electric Transmission Company, LLC, ITC Interconnection LLC.

Description: Joint Application for Authorization Under Section 203 of the Federal Power Act of Michigan Electric Transmission Company, LLC, et al.

Filed Date: 11/16/22.

Accession Number: 20221116–5186.

Comment Date: 5 p.m. ET 12/7/22.

Take notice that the Commission received the following exempt wholesale generator filings:

Docket Numbers: EG23–24–000.

Applicants: Oak Solar, LLC.

Description: Oak Solar, LLC submits Notice of Self-Certification of Exempt Wholesale Generator Request.

Filed Date: 11/16/22.

Accession Number: 20221116–5183.

Comment Date: 5 p.m. ET 12/7/22.

Take notice that the Commission received the following electric rate filings:

Docket Numbers: ER10–1355–012.

Applicants: Southern California Edison Company.

Description: Errata to October 31, 2022, Notice of Change in Status of Southern California Edison Company.

Filed Date: 11/17/22.

Accession Number: 20221117–5123.

Comment Date: 5 p.m. ET 12/8/22.

Docket Numbers: ER21–762–001.

Applicants: Bishop Hill Energy II LLC.

Description: Midcontinent Independent System Operator, Inc. submits tariff filing per 35.19a(b): Refund Report_Bishop Hill Energy II LLC to be effective N/A.

Filed Date: 11/16/22.

Accession Number: 20221116–5165.
Comment Date: 5 p.m. ET 12/7/22.

Docket Numbers: ER21–2722–001.
Applicants: E. BarreCo Corp LLC.
Description: Refund Report: Second Revised Refund report to 2 to be effective N/A.
Filed Date: 11/17/22.
Accession Number: 20221117–5000.
Comment Date: 5 p.m. ET 12/8/22.

Docket Numbers: ER21–2816–000; ER21–2816–002; ER21–2816–003; ER21–2816–001.
Applicants: Gratiot County Wind LLC.
Description: Midcontinent Independent System Operator, Inc. submits tariff filing per 35.19a(b): Refund Report_Gratiot County Wind LLC to be effective N/A.
Filed Date: 11/16/22.
Accession Number: 20221116–5166.
Comment Date: 5 p.m. ET 12/7/22.

Docket Numbers: ER23–48–000.
Applicants: West Line Solar, LLC.
Description: Supplement to October 11, 2022, West Line Solar, LLC Application for Order Accepting Market-Based Rate under ER23–48.
Filed Date: 11/15/22.
Accession Number: 20221115–5225.
Comment Date: 5 p.m. ET 11/25/22.

Docket Numbers: ER23–114–000.
Applicants: ISO New England Inc.
Description: ISO New England Inc. submits Capital Budget Quarterly Filing for Third Quarter of 2022.
Filed Date: 10/14/22.
Accession Number: 20221014–5249.
Comment Date: 5 p.m. ET 12/8/22.

Docket Numbers: ER23–449–000.
Applicants: Shenandoah Hills Wind Project, LLC.
Description: Request for Prospective Tariff Waiver, et al. of Shenandoah Hills Wind Project, LLC.
Filed Date: 11/10/22.
Accession Number: 20221110–5282.
Comment Date: 5 p.m. ET 12/1/22.

Docket Numbers: ER23–450–000.
Applicants: Mercuria Energy America, LLC.
Description: Compliance filing: Compliance filing 2022 to be effective N/A.
Filed Date: 11/17/22.
Accession Number: 20221117–5002.
Comment Date: 5 p.m. ET 12/8/22.

Docket Numbers: ER23–451–000.
Applicants: TN Solar 1, LLC.
Description: Baseline eTariff Filing: TN Solar 1 MBR Application to be effective 11/18/2022.
Filed Date: 11/17/22.
Accession Number: 20221117–5087.
Comment Date: 5 p.m. ET 12/8/22.

Docket Numbers: ER23–452–000.
Applicants: EEC Skyhawk Lessee LLC.
Description: Baseline eTariff Filing: EEC Skyhawk Lessee MBR Application to be effective 12/31/9998.
Filed Date: 11/17/22.
Accession Number: 20221117–5089.
Comment Date: 5 p.m. ET 12/8/22.

Docket Numbers: ER23–453–000.
Applicants: PJM Interconnection, L.L.C.
Description: § 205(d) Rate Filing: Amendment to ISA, SA No. 5869; Queue No. AE2–126 (amend) to be effective 12/3/2020.
Filed Date: 11/17/22.
Accession Number: 20221117–5116.
Comment Date: 5 p.m. ET 12/8/22.

Docket Numbers: ER23–454–000.
Applicants: San Diego Gas & Electric Company.
Description: TO5 Formula Depreciation Rate Change for Common Plant and Electric General Plant of San Diego Gas & Electric Company.
Filed Date: 11/17/22.
Accession Number: 20221117–5125.
Comment Date: 5 p.m. ET 12/8/22.

Docket Numbers: ER23–455–000.
Applicants: New York Independent System Operator, Inc., Power Authority of the State of New York.
Description: § 205(d) Rate Filing: New York Independent System Operator, Inc. submits tariff filing per 35.13(a)(2)(iii): NYISO–NYPA Joint 205: LGIA NYISO, NYPA, North Side Solar SA2739—CEII to be effective 11/3/2022.
Filed Date: 11/17/22.
Accession Number: 20221117–5133.
Comment Date: 5 p.m. ET 12/8/22.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

Any person desiring to intervene or protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Regulations (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: November 17, 2022.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. IC22–29–000]

Commission Information Collection Activities (FERC–515); Comment Request; Extension

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of information collection and request for comments.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995, the Federal Energy Regulatory Commission (Commission or FERC) is soliciting public comment on the currently approved information collection, FERC–515 (Declaration of Intention), which will be submitted to the Office of Management and Budget (OMB) for review. No comments were received on the 60-day notice published on September 6, 2022.

DATES: Comments on the collection of information are due December 23, 2022.

ADDRESSES: Send written comments on FERC–515 to OMB through *www.reginfo.gov/public/do/PRAMain.* Attention: Federal Energy Regulatory Commission Desk Officer. Please identify the OMB Control Number (1902–0079) in the subject line of your comments. Comments should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.*

Please submit copies of your comments to the Commission. You may submit copies of your comments (identified by Docket No. IC22–29–000) by one of the following methods:

- *Electronic Filing (preferred method):* via *https://www.ferc.gov.*
  - Documents must be filed in acceptable native applications and print-to-PDF, but not in scanned or picture format.
- For those unable to file electronically, comments may be filed by USPS mail or by hand (including courier) delivery.
  - *Mail via U.S. Postal Service Only:* Addressed to: Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE, Washington, DC 20426.

○ *Hand (including courier) delivery:* Deliver to: Federal Energy Regulatory Commission, Secretary of the Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

Instructions: OMB submissions must be formatted and filed in accordance with submission guidelines at *www.reginfo.gov/public/do/PRAMain.* Using the search function under the ''Currently Under Review'' field, select Federal Energy Regulatory Commission; click ''submit,'' and select ''comment'' to the right of the subject collection. *FERC submissions* must be formatted and filed in accordance with submission guidelines at: *https://www.ferc.gov.* For user assistance, contact FERC Online Support by email at *ferconlinesupport@ferc.gov,* or by phone at: (866) 208–3676 (toll-free).

Docket: Users interested in receiving automatic notification of activity in this docket or in viewing/downloading comments and issuances in this docket may do so at *https://www.ferc.gov/ferc-online/overview.*

FOR FURTHER INFORMATION CONTACT: Ellen Brown may be reached by email at *DataClearance@FERC.gov,* telephone at (202) 502–8663.

SUPPLEMENTARY INFORMATION:

Title: FERC–515 (Declaration of Intention).

OMB Control No.: 1902–0079.

Type of Request: Three-year extension of the FERC–515 information collection requirements with no changes to the current reporting requirements.

Abstract: The purpose of FERC–515 is to implement the information collections pursuant to Section 24 of the Federal Power Act (FPA). This statute authorizes the Commission to make a determination as to whether it has jurisdiction over a proposed water project pursuant to section 23(b) of the FPA. Entities intending to construct project works on certain waters must file a declaration of their intention with the Commission. The information provided in the Declaration of Intention includes a written application, containing sufficient details to allow the Commission staff to research the jurisdictional aspects of the project. Commission staff will review maps land ownership records, and other related information to establish whether or not there is Federal jurisdiction over the lands and waters affected by the project. A finding of non-jurisdictional by the Commission eliminates a substantial paperwork burden for the applicant who might otherwise have to file for a license or exemption application.

Type of Respondents: Persons intending to construct project works on certain waters.

Estimate of Annual Burden.[1] The Commission estimates the annual public reporting burden and cost [2] for the information collection as:

FERC–515—DECLARATION OF INTENTION

Number of respondents	Annual number of responses per respondent	Total number of responses	Average burden hours & cost ($) per response	Total annual burden hours & total annual cost ($)	Cost per respondent ($)
(1)	(2)	(1) * (2) = (3)	(4)	(3) * (4) = (5)	(5) ÷ (1)
6	1	6	80 hrs.; $7,280	480 hrs.; $43,680	$7,280

Comments: Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: November 15, 2022.

Debbie-Anne A. Reese,

Deputy Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2579–065]

Georgia Power Company; Notice of Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Application Type:* Non-Project Use of Project Lands and Water-Dredging Application.

b. *Project No:* 2579–065.

c. *Date Filed:* October 7, 2022, and supplemented November 16, 2022.

d. *Applicants:* Indiana Michigan Power Company.

e. *Name of Project:* Twin Branch Hydroelectric Project.

f. *Location:* St. Joseph River in Mishawaka, St. Joseph County, Indiana.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791a–825r.

h. *Applicant Contact:* Elizabeth Parcel, (540) 985–2441, Indiana Michigan Power Company, 40 Franklin Road SW P.O. Box 2021, Roanoke, VA 24001.

i. *FERC Contact:* Jason Krebill, (202) 502–8268, *Jason.krebill@ferc.gov*

j. *Deadline for filing comments, motions to intervene, and protests:* December 19, 2022.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866)

[1] Burden is defined as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a federal agency. See 5 CFR part 1320 for additional information on the definition of information collection burden.

[2] Commission staff considers resources completing the FERC–515 to be compensated at rates similar to FERC employees. Therefore, we are using the 2022 FERC average hourly cost (for wages and benefits for one full-time employee) of $91.00/hour (or $188,922/year).

208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. The first page of any filing should include the docket number P–2579–065. Comments emailed to Commission staff are not considered part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. *Description of Request:* Indiana Michigan Power Company (licensee) is requesting Commission approval of a non-project use of project lands and water application for the purposes of permitting the St. Joseph County Surveyor (proponent) to undergo maintenance dredging of an existing channel (Woodward Ditch) within the Project boundary to remove approximately 3,883 cubic yards of accumulated sediment by hydraulic dredge. The original channel bottom will not be disturbed. The licensee is planning to dispose of the spoil in an upland manmade body of surface water created by excavating (agricultural irrigation pond) which was determined by U.S. Army Corps of Engineers to not be a jurisdictional water. The proposed dredging area is inside the project boundary, but the disposal area is outside of the project boundary.

l. *Locations of the Application:* This filing may be viewed on the Commission's website at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 1–866–208–3676 or email *FERCOnlineSupport@ferc.gov,* for TTY, call (202) 502–8659. Agencies may obtain copies of the application directly from the applicant.

m. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

n. *Comments, Protests, or Motions to Intervene:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214, respectively. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

o. *Filing and Service of Documents:* Any filing must (1) bear in all capital letters the title ''COMMENTS'', ''PROTEST'', or ''MOTION TO INTERVENE'' as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person commenting, protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis. Any filing made by an intervenor must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 385.2010.

Dated: November 17, 2022.

Debbie-Anne A. Reese,

Deputy Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings

Take notice that the Commission has received the following Natural Gas Pipeline Rate and Refund Report filings:

Filings in Existing Proceedings

Docket Numbers: PR22–66–001.

Applicants: DTE Gas Company.

Description: § 284.123 Rate Filing: DTE Gas Company Amended OS Filing to be effective 9/30/2022.

Filed Date: 11/14/22.

Accession Number: 20221114–5242.

Comment Date: 5 p.m. ET 11/28/22.

Any person desiring to protest in any the above proceedings must file in accordance with Rule 211 of the Commission's Regulations (18 CFR 385.211) on or before 5:00 p.m. Eastern time on the specified comment date.

Filings Instituting Proceedings

Docket Numbers: RP23–194–000.

Applicants: National Fuel Gas Supply Corporation.

Description: Compliance filing: TSCA—Informational Filing (November 2022) to be effective N/A.

Filed Date: 11/17/22.

Accession Number: 20221117–5026.

Comment Date: 5 p.m. ET 11/29/22.

Docket Numbers: RP23–195–000.

Applicants: Texas Eastern Transmission, LP.

Description: § 4(d) Rate Filing: Negotiated Rates—Various Releases eff 11–17–22 to be effective 11/17/2022.

Filed Date: 11/17/22.

Accession Number: 20221117–5056.

Comment Date: 5 p.m. ET 11/29/22.

Any person desiring to intervene or protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Regulations (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: November 17, 2022.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2341–033]

Georgia Power Company; Notice of Application for Surrender, Decommissioning, and Removal of Project, and Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Type of Proceeding:* Application for decommissioning and removal of project.

b. *Project No.:* 2341–033.

c. *Date Filed:* September 6, 2022, as supplemented on September 8, 2022.

d. *Licensee:* Georgia Power Company.

e. *Name of Project:* Langdale Hydroelectric Project.

f. *Location:* The project is located on the Chattahoochee River in the City of Valley, Chambers County, Alabama and Harris County, Georgia. The project does not include any federal lands.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791a–825r.

h. *Licensee Contact:* Ms. Courtenay O'Mara, Southern Company, 241 Ralph McGill Boulevard NE, Bin 10193, Atlanta, GA 30308–3374, (404) 506–7291, *cromara@southernco.com.*

i. *FERC Contact:* Dr. Mark Ivy, (202) 502–6156, *Mark.Ivy@ferc.gov.*

j. Deadline for filing comments, interventions, and protests is December 19, 2022.

The Commission strongly encourages electronic filing. Please file motions to intervene, protests and comments using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy: Submissions sent via the U.S. Postal Service must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. The first page of any filing should include docket number P–2341–033.

k. *Description of Request:* Georgia Power Company requests to decommission the Langdale Hydroelectric Project by removing the Langdale dam (except for a ten-foot abutment on the east and west sides of the river for historic documentation); decommissioning the Langdale powerhouse in place; and constructing a riprap lined channel from the mainstem of the Chattahoochee River to the Langdale tailrace to ensure flows in the tailrace as requested by the city of Valley, Alabama.

l. This filing may be viewed on the Commission's website at *http://www.ferc.gov/docs-filing/elibrary.asp.* Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* or toll-free at (866) 208–3676, or for TTY, (202) 502–8659. Agencies may obtain copies of the application directly from the applicant.

m. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

n. *Comments, Protests, or Motions to Intervene:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .212 and .214, respectively. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

o. *Filing and Service of Responsive Documents:* Any filing must (1) bear in all capital letters the title ''COMMENTS'', ''PROTEST'', or ''MOTION TO INTERVENE'' as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests should relate to the surrender application that is the subject of this notice. Agencies may obtain copies of the application directly from the applicant. A copy of any protest or motion to intervene must be served upon each representative of the applicant specified in the particular application. If an intervener files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

p. Agency Comments—Federal, state, and local agencies are invited to file comments on the described proceeding. If any agency does not file comments within the time specified for filing comments, it will be presumed to have no comments.

Dated: November 17, 2022.

Debbie-Anne A. Reese,

Deputy Secretary.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–10430–01–R5]

Great Lakes Advisory Board Notice for Virtual Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public meeting for Great Lakes Advisory Board.

SUMMARY: Pursuant to the Federal Advisory Committee Act (FACA), the Environmental Protection Agency (EPA) provides notice of a public meeting for the Great Lakes Advisory Board. Pre-registration is required.

DATES: This virtual public meeting will be held on December 6th, 2022, from 1:00 p.m. to 2:30 p.m. Central Standard Time. Members of the public seeking to view the meeting must register by 3:00 p.m. Central Standard Time on December 5th, 2022. Members of the public seeking to make comments relevant to issues discussed at the virtual meeting must register and indicate a request to make oral and/or written public comments in advance of the meeting. For information on how to register, please see [How do I participate in the meeting] below.

FOR FURTHER INFORMATION CONTACT: Todd Nettesheim, Acting Designated Federal Officer (DFO), at *Nettesheim.Todd@epa.gov* or 312–353–9153.

SUPPLEMENTARY INFORMATION:

I. General Information

The GLAB is chartered in accordance with the Federal Advisory Committee Act (FACA) of 1972 (5 U.S.C., Appendix 2, as amended) and 41 CFR 102–3.50(d). The Advisory Board provides advice and recommendations on matters related to the Great Lakes Restoration Initiative. The Advisory Board also advises on domestic matters related to implementation of the Great Lakes Water Quality Agreement between the U.S. and Canada. The major objectives are to provide advice and recommendations on: Great Lakes protection and restoration activities; long-term goals, objectives, and priorities for Great Lakes protection and

restoration; and other issues identified by the Great Lakes Interagency Task Force/Regional Working Group.

II. How do I participate in the remote public meeting?

A. Remote Meeting

This meeting will be conducted as a virtual meeting on December 6th, 2022, from 1:00 p.m. to 2:30 p.m. Central Standard Time. You must register by 3:00 p.m. Central Standard Time on December 5th, 2022, to receive information on how to participate. You may also submit written or oral comments for the committee by following the processes outlined below.

B. Registration

Individual registration is required for participation in this meeting. Information on registration for this meeting can be found at *https://event.capconcorp.com/form/view.php?id=150234.* When registering, please provide your name, email, organization, city, and state. Please also indicate whether you would like to provide oral and/or written comments during the meeting at the time of registration.

C. Procedures for Providing Public Comments

Oral Statements: In general, oral comments at this virtual conference will be limited to the Public Comments portions of the meeting agenda. Members of the public may provide oral comments limited to up to three minutes per individual or group and may submit further information as written comments. Persons interested in providing oral statements should register at *https://event.capconcorp.com/form/view.php?id=150234* for the meeting and indicate your interest to provide public comments. Oral commenters will be provided an opportunity to speak in the order in which their request was received by the DFO and to the extent permitted by the number of comments and the scheduled length of the meeting. Persons not able to provide oral comments during the meeting will be given an opportunity to provide written comments after the meeting.

Written Statements: Persons interested in providing written statements pertaining to this committee meeting may do so by indicating at *https://event.capconcorp.com/form/view.php?id=150234.* Written comments will be accepted before and during the public meeting for consideration by the Great Lakes Advisory Board members.

D. Availability of Meeting Materials

The meeting agenda and other materials for the virtual conference will be posted on the GLAB website at *www.glri.us/glab.*

E. Accessibility

Persons with disabilities who wish to request reasonable accommodations to participate in this event may contact the Acting DFO at *Nettesheim.todd@epa.gov* or 312–353–9153 by 3:00 p.m. Central Standard Time on December 5th, 2022. All final meeting materials will be posted to the GLAB website in an accessible format following the meeting, as well as a written summary of this meeting.

Dated: November 17, 2022.

Debra Shore,

Regional Administrator & Great Lakes National Program Manager, US EPA Region 5.

[FR Doc. 2022–25565 Filed 11–22–22; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPP–2022–0509; FRL–7661–01–OCSPP]

Notice of Approval Status; Certifying Authorities' Amended Plans for Certification of Commercial and Private Applicators of Restricted Use Pesticides; Batch One

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) is announcing its approval of thirteen amended certification plans for certifying applicators of Restricted Use Pesticides (RUPs) from the following certifying authorities: Alaska Department of Environmental Conservation (ADEC); California Department of Pesticide Regulation (DPR); Nebraska Department of Agriculture (NDA); New York Department of Environmental Conservation (NYSDEC); Oregon Department of Agriculture (ODA); Puerto Rico Department of Agriculture (PRDA); U.S. Department of Agriculture, Animal and Plant Health Inspection Service, Plant, Protection and Quarantine (USDA APHIS PPQ); U.S. Department of Agriculture, Forest Service (USDA FS); U.S. Department of Defense (DoD); U.S. Department of Energy (DoE); U.S. Department of the Interior, Bureau of Land Management (DOI BLM); Vermont Agency of Agriculture, Food and Markets (VAAFM); and Virgin Islands Department of Planning and Natural Resources (VIDPNR). The amended plans are consistent with the existing regulatory requirements, including revisions made in 2017 to enhance and improve the competency of certified applicators of RUPs and persons working under their direct supervision. The 2017 regulatory revisions are intended to further reduce potential exposure of RUPs to certified applicators and those working under their direct supervision, other workers, the public, and the environment. Federal, state, territory, and tribal certifying authorities with existing certification plans are required to revise their existing plans to conform with the updated federal standards for RUP applicator certification.

FOR FURTHER INFORMATION CONTACT:

For technical information contact: The designated EPA point of contact for the Certification Plan of interest as listed in Table 1 of Unit I.B.

For general information contact: Carolyn Schroeder, Pesticide Re-Evaluation Division (7508M), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 566–2376; email address: s*chroeder.carolyn@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are a federal, state, territory, or tribal agency who administers a certification program for pesticides applicators. You many also be potentially affected by this action if you are: A registrant of RUP products; a person who applies RUPs, including those under the direct supervision of a certified applicator; a person who relies upon the availability of RUPs; someone who hires a certified applicator to apply an RUP; a pesticide safety educator; or other person who provides pesticide safety training for pesticide applicator certification or recertification. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Agricultural Establishments (Crop Production) (NAICS code 111).
- Nursery and Tree Production (NAICS code 111421).

- Agricultural Pest Control and Pesticide Handling on Farms (NAICS code 115112).
- Crop Advisors (NAICS codes 115112, 541690, 541712).
- Agricultural (Animal) Pest Control (Livestock Spraying) (NAICS code 115210).
- Forestry Pest Control (NAICS code 115310).
- Wood Preservation Pest Control (NAICS code 321114).
- Pesticide Registrants (NAICS code 325320).
- Pesticide Dealers (NAICS codes 424690, 424910, 444220).
- Industrial, Institutional, Structural & Health Related Pest Control (NAICS code 561710).
- Ornamental & Turf, Rights-of-Way Pest Control (NAICS code 561730).
- Environmental Protection Program Administrators (NAICS code 924110).
- Governmental Pest Control Programs (NAICS code 926140).

If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How can I get copies of these documents and other related information?

For assistance in locating documents related to the approved plans identified in this notice, please consult the designated EPA point of contact for the Certification Plan of interest as listed in Table 1 of this unit, or the general contact person listed under **FOR FURTHER INFORMATION CONTACT**.

TABLE 1—DESIGNATED EPA POINT OF CONTACTS FOR THE CERTIFICATION PLANS

EPA region	Certification plan	EPA point of contact	POC phone	Email
Region 1	VAAFM	Robert Koethe	(617) 918–1535	*koethe.robert@epa.gov.*
Region 2	NYSDEC PRDA. VIDPNR.	Tara Glynn	(732) 906–6183	*glynn.tara@epa.gov.*
Region 7	NDA	Shawn Hackett	(913) 551–7774	*hackett.shawn@epa.gov.*
Region 9	DPR	Katy Wilcoxen	(415) 947–4205	*wilcoxen.katy@epa.gov.*
Region 10	ADEC ODA.	Bethany Plewe	(208) 378–5753	*plewe.bethany@epa.gov.*
Office of Pesticide Programs	USDA APHIS PPQ USDA FS. DoD. DoE. DOI BLM.	Jeanne Kasai	(202) 566–2388	*kasai.jeanne@epa.gov.*

II. What is the Agency's authority for taking this action?

Section 11 of the Federal Insecticide, Fungicide, Rodenticide Act (FIFRA), 7. U.S.C. 136 *et seq.,* requires certifying authorities to have an EPA-approved certification plan to certify applicators of RUPs. The Certification of Pesticide Applicators (CPA) regulation at 40 CFR part 171 was amended in 2017 (Ref. 1). As a result, federal, state, territory, and tribal certifying authorities with existing certification plans were required to revise their existing certification plans to conform with the updated federal standards for the certification of applicators of RUPs and submit their revisions to EPA by March 2020 for EPA review and approval. The CPA regulation specifies that the existing certification plans remain in place until the revised plans are approved by EPA on or before the regulatory deadline established in 40 CFR 171.5. The Agency has since issued a final rule extending the original deadline for certification plans to comply with the updated federal standards under the 2017 CPA rule. State, territory, tribal, and federal authorities can now continue existing applicator certification programs to November 4, 2023 (Ref. 2).

III. What action is the Agency taking?

This action gives notice that the following thirteen certifying authorities' certification plans submitted to the Agency meet or exceed the standards of 40 CFR part 171: ADEC, DPR, NDA, NYSDEC, ODA, PRDA, USDA APHIS PPQ, USDA FS, DoD, DoE, DOI BLM, VAAFM and VIDPNR. EPA hereby gives notice that the thirteen amended certification plans for certifying applicators of RUPs listed in this document are now approved plans; the certifying authorities may certify pesticide applicators and continue with implementation of the certification plans as outlined in the approved plans.

These thirteen plans represent the first in a series of batched notifications announcing the approval of the federal, state, territory, and tribal certification plans moving through the approval process. These batched notifications will continue to occur on a regular basis as plans are approved. EPA also provides frequent status updates on its website at *https://www.epa.gov/pesticide-worker-safety/certification-standards-pesticide-applicators.*

III. References

The following is a list of documents that are related to the issuance of this Notice. For assistance in locating these other documents, please consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

[EPA–HQ–OAR–2022–0073; FRL–10445–01–OMS]

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Perchloroethylene Dry Cleaning Facilities (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NESHAP for Perchloroethylene Dry Cleaning Facilities (EPA ICR Number 1415.13, OMB Control Number 2060–0234) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through January 31, 2023. Public comments were previously requested, via the **Federal Register**, on April 8, 2022 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before December 23, 2022.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OAR–2022–0073, to EPA online using *https://www.regulations.gov/* (our preferred method), or by email to *docket@epa.gov,* or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Muntasir Ali, Sector Policies and Program Division (D243–05), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina, 27711; telephone number: (919) 541–0833; email address: *ali.muntasir@epa.gov.*

SUPPLEMENTARY INFORMATION: Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at either *https://www.regulations.gov,* or in person, at the EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit: *http://www.epa.gov/dockets.*

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Perchloroethylene Dry Cleaning Facilities (40 CFR part 63, subpart M) were proposed on December 9, 1991; promulgated on September 22, 1993; and most-recently amended on November 19, 2020. These regulations apply to both existing and new dry-cleaning facilities that use perchloroethylene (PCE). New facilities include those that either commenced construction or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart M.

Form Numbers: None.

Respondents/affected entities: Dry cleaning facilities that use perchloroethylene (PCE).

Respondent's obligation to respond: Mandatory (40 CFR 63, subpart M).

Estimated number of respondents: 28,020 (total).

Frequency of response: Annual.

Total estimated burden: 1,590,343 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $197,000,000 (per year), which includes $948,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is no change in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations: (1) the regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Since there are no changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup or operation and maintenance (O&M) costs.

Courtney Kerwin,

Director, Regulatory Support Division.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Halogenated Solvent Cleaners/ Halogenated Hazardous Air Pollutants (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NESHAP for Halogenated Solvent Cleaners/Halogenated Hazardous Air Pollutants (EPA ICR Number 1652.11, OMB Control Number 2060–0273), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through January 31, 2023. Public comments were previously requested, via the **Federal Register**, on April 8, 2022, during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before December 23, 2022.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OAR–2022–0076, to: (1) EPA online using *https://www.regulations.gov/* (our preferred method), or by email to *docket@epa.gov,* or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to

www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Muntasir Ali, Sector Policies and Program Division (D243–05), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, NC 27711; telephone number: (919) 541–0833; email address: *ali.muntasir@epa.gov.*

SUPPLEMENTARY INFORMATION: Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at *https://www.regulations.gov,* or in person at the EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit: *http://www.epa.gov/dockets.*

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Halogenated Solvent Cleaners/Halogenated Hazardous Air Pollutants were proposed on November 29, 1993; promulgated on December 2, 1994; and most recently-amended on May 3, 2007. These regulations apply to each individual batch vapor, in-line vapor, in-line cold, and batch cold solvent cleaning machine that uses any solvent containing methylene chloride; perchloroethylene; 1,1,1-trichloroethane; trichloroethylene; carbon tetrachloride; chloroform; or any combination of these halogenated HAP solvents, in a total concentration greater than 5 percent by weight, as a cleaning and/or drying agent. New facilities include those that commenced either construction or reconstruction on or after December 2, 1994. This information is being collected to assure compliance with 40 CFR part 63, subpart T.

In general, all NESHAP standards require initial notification reports, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

Form Numbers: None.

Respondents/affected entities: Halogenated solvent cleaning machines.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart T).

Estimated number of respondents: 931 (total).

Frequency of response: Quarterly, semiannual.

Total estimated burden: 31,300 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $4,420,000 (per year), which includes $660,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is no change in the labor hours in this ICR compared to the previous ICR. This is due to two considerations: (1) the regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for the industry is either very low, negative, or non-existent, so there is no significant change in the overall burden.

Courtney Kerwin,

Director, Regulatory Support Division.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OGC–2022–0894; FRL–10411–01–OGC]

Proposed Consent Decree, Clean Air Act Citizen Suit

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed consent decree; request for public comment.

SUMMARY: In accordance with the Clean Air Act, as amended (CAA or the Act), EPA is providing notice of a proposed consent decree in *Comité Progreso de Lamont, et al.* v. *United States Environmental Protection Agency, et al.,* No. 3:21–cv–08733–WHA (N.D. Cal.). On November 10, 2021, Plaintiffs Comité Progreso de Lamont, Committee for a Better Arvin, Committee for a Better Shafter, Central California Environmental Justice Network, Association of Irritated Residents, Medical Advocates for Healthy Air, National Parks Conservation Association, and Sierra Club filed a complaint in the United States District Court for the Northern District of California. Plaintiffs alleged that the Environmental Protection Agency (EPA or the Agency) failed to perform certain non-discretionary duties in accordance with the Act. These duties pertain to promulgation of a Federal Implementation Plan (FIP) for the San Joaquin Valley area of California to address certain remaining nonattainment plan requirements for the 1997, 2006, and 2012 $PM_{2.5}$ national ambient air quality standards (NAAQS). The proposed consent decree would establish deadlines for EPA to sign notices of proposed and final actions.

DATES: Written comments on the proposed consent decree must be received by December 23, 2022.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OGC–2022–0894, online at *https://www.regulations.gov* (EPA's preferred method). Follow the online instructions for submitting comments.

Instructions: All submissions received must include the Docket ID number for this action. Comments received may be posted without change to *https://www.regulations.gov/,* including any personal information provided. For detailed instructions on sending comments and additional information on the rulemaking process, see the ''Additional Information about Commenting on the Proposed Consent Decree'' heading under the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Geoffrey L. Wilcox, Air and Radiation Law Office, Office of General Counsel, U.S. Environmental Protection Agency; telephone (202) 564–5601; email address *wilcox.geoffrey@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining a Copy of the Proposed Consent Decree

The official public docket for this action (identified by Docket ID No. EPA–HQ–OGC–2022–0894) contains a copy of the proposed consent decree. The official public docket is available for public viewing at the Office of Environmental Information (OEI) Docket in the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OEI Docket is (202) 566–1752.

The electronic version of the public docket for this action contains a copy of the proposed consent decree and is available through *https://www.regulations.gov.* You may use *https://www.regulations.gov* to submit or view public comments, access the index listing of the contents of the

official public docket, and access those documents in the public docket that are available electronically. Once in the system, key in the appropriate docket identification number then select ''search.''

II. Additional Information About the Proposed Consent Decree

This case pertains to EPA's duty to promulgate a FIP or FIPs to address certain nonattainment plan requirements for the for the San Joaquin Valley area of California for the 1997, 2006, and 2012 $PM_{2.5}$ NAAQS. EPA's duty at issue in this case arises from a finding of failure to submit that the agency made on December 6, 2018, and that was effective on January 7, 2019. Since that time, however, California submitted two State Implementation Plan (SIP) submissions intended to address the relevant nonattainment plan requirements for all of these $PM_{2.5}$ NAAQS simultaneously. Through a series of rulemakings, EPA has taken action on portions of these SIP submissions for specific iterations of the $PM_{2.5}$ NAAQS that have reduced the original scope of its FIP duty. The proposed consent decree would establish deadlines for EPA to take actions to address the remaining portions of its FIP duty.

Specifically, the proposed consent decree would establish deadlines for EPA to take action pursuant to the CAA to sign a notice or notices of a proposed and final FIP by no later than July 31, 2023, and September 30, 2024, respectively, to address the contingency measures element of the: (1) nonattainment plan for the section 189(d) requirements for the 1997 annual $PM_{2.5}$ NAAQS, (2) nonattainment plan for the Serious area requirements for the 2006 24-hour $PM_{2.5}$ NAAQS, and (3) nonattainment plan for Moderate area requirements for the 2012 $PM_{2.5}$ annual NAAQS. In addition, the proposed consent decree would establish a deadline for EPA to sign a notice or notices of a final FIP by no later than September 30, 2024, to address all plan elements, except for the contingency measures element and the baseline emissions inventory element, for the nonattainment plan for the section 189(d) requirements for the 1997 annual $PM_{2.5}$ NAAQS.

The proposed consent decree also provides that if California submits and EPA fully approves a SIP submission or submissions that satisfy any of the specific plan requirements above, then EPA's obligation to promulgate a proposed or final FIP under the consent decree with respect to the satisfied nonattainment plan element is automatically terminated, and Plaintiffs' claim as to that plan element is moot. Also, if EPA issues a clean data determination, *i.e.,* a determination that the air quality of an area has attained the NAAQS, for the San Joaquin Valley with respect to 1997 annual $PM_{2.5}$ NAAQS, the 2006 24-hour $PM_{2.5}$ NAAQS, or the 2012 $PM_{2.5}$ annual NAAQS, in accordance with 40 CFR 51.1015, then EPA's obligation under the consent decree to take the action or actions required with respect to that NAAQS is automatically terminated.

In accordance with section 113(g) of the CAA, for a period of thirty (30) days following the date of publication of this document, the Agency will accept written comments relating to the proposed consent decree. EPA or the Department of Justice may withdraw or withhold consent to the proposed consent decree if the comments disclose facts or considerations that indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the Act.

III. Additional Information About Commenting on the Proposed Consent Decree

Submit your comments, identified by Docket ID No. EPA–HQ–OGC–2022–0894, via *https://www.regulations.gov.* Once submitted, comments cannot be edited or removed from this docket. EPA may publish any comment received in its public docket. Do not submit to EPA's docket at *https://www.regulations.gov* any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.* For additional information about submitting information identified as CBI, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this document. Note that written comments containing CBI and submitted by mail may be delayed and deliveries or couriers will be received by scheduled appointment only.

If you submit an electronic comment, EPA recommends that you include your name, mailing address, and an email address or other contact information in the body of your comment. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. Any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Use of the *https://www.regulations.gov* website to submit comments to EPA electronically is EPA's preferred method for receiving comments. The electronic public docket system is an ''anonymous access'' system, which means EPA will not know your identity, email address, or other contact information unless you provide it in the body of your comment.

Please ensure that you submit your comments within the specified comment period. Comments received after the close of the comment period will be marked ''late.'' EPA is not required to consider these late comments.

Gautam Srinivasan,

Associate General Counsel.

Adequacy Status of Motor Vehicle Emissions Budgets for the New York Portion of the New York-Northern New Jersey-Long Island, NY-NJ-CT 2008 8-Hour Ozone Nonattainment Area

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of adequacy.

SUMMARY: In this notice, the EPA is notifying the public that it has found that the 2020 motor vehicle emissions budgets for volatile organic compounds (VOCs) and nitrogen oxides (NO_X), submitted by the New York State Department of Environmental

Conservation on November 29, 2021, for the 2008 national ambient air quality standard (NAAQS) for ozone (the Budgets), are adequate for transportation conformity purposes for the New York portion of the New York-Northern New Jersey-Long Island, NY-NJ-CT 8-hour ozone nonattainment area. This revision to the SIP included 2020 summer day VOC and NO_X Budgets associated with the SIP's reasonable further progress demonstration.

DATES: This finding is effective December 8, 2022.

ADDRESSES: Publicly available docket materials, identified by Docket ID Number EPA–R02–OAR–2022–0715, are available either electronically through *www.regulations.gov* or in hard copy at the EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The Docket Center's hours of operations are 8:30 a.m.–4:30 p.m., Monday–Friday (except Federal holidays). For further information on the EPA Docket Center services and the current status, see: *https://www.epa.gov/dockets.* You may access this **Federal Register** document electronically from *https://www.federalregister.gov/documents/current.* This finding will also be available at the EPA's conformity website: *https://www.epa.gov/state-and-local-transportation/state-implementation-plans-sip-submissions-currently-under-epa#newyork-ny-nj-ct.*

FOR FURTHER INFORMATION CONTACT: Lily Black, Environmental Protection Agency Region 2, Air and Radiation Division, 290 Broadway, 25th Floor, New York, New York 10007–1866; (212) 637–3884, *black.lily@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, whenever ''we,'' ''us,'' or ''our'' is used, we mean the EPA.

Today's notice is an announcement of a finding that we have already made. EPA Region 2 sent a letter to the New York Department of Environmental Conservation on July 26, 2022, stating that the 2020 motor vehicle emissions budgets (''Budgets'') are adequate for transportation conformity purposes.

The transportation conformity rule requires that the EPA conduct a public process and make an affirmative decision on the adequacy of these budgets before they can be used by metropolitan planning organizations in transportation conformity determinations.

As a result of this finding, upon the effective date of this notice of adequacy, the New York Metropolitan Transportation Council (NYMTC) must use the Budgets in future transportation conformity determinations. The Budgets are associated with the reasonable further progress milestone demonstration.

We announced availability of the plan and related Budgets on the EPA's transportation conformity website on March 8, 2022, requesting comments by April 8, 2022. We received no comments in response to the adequacy review posting.

The Budgets are provided in Table 1.

TABLE 1—MOTOR VEHICLE EMISSIONS BUDGETS FOR NYMTC

[tons per day]

Year	NO_X	VOC
2020	89.07	54.51

Transportation conformity is required by Clean Air Act section 176(c), 42 U.S.C. 7506(c). The EPA's conformity rule requires that long-range transportation plans, transportation improvement programs, and transportation projects conform to a state's air quality SIP and establishes the criteria and procedures for determining whether or not they conform. Conformity to a SIP means that transportation activities will not produce new air quality violations, worsen existing violations, or delay timely attainment of the NAAQS. *See id.* at section 7506(c)(1)(B).

The criteria the EPA uses to determine whether a SIP's motor vehicle emission budgets are adequate for conformity purposes are outlined in 40 CFR 93.118(e)(4).[1] And we have described our process for determining the adequacy of submitted SIP budgets in 40 CFR 93.118(f). Under 40 CFR 93.104(e), within 2 years of the effective date of this notice, NYMTC and the U.S. Department of Transportation will need to demonstrate conformity to the Budgets. To do so, the on-road motor vehicle emissions from implementation of the long-range transportation plan should be projected consistently with the Budgets.

Authority: 42 U.S.C. 7401–7671q.

Lisa Garcia,

Regional Administrator, Region 2.

[FR Doc. 2022–25605 Filed 11–22–22; 8:45 am]

BILLING CODE 6560–50–P

[1] An adequacy review is separate from the EPA's completeness review and should not be used to prejudge the EPA's ultimate action on the SIP. Even if we find a budget adequate, the SIP could later be disapproved.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Commercial Ethylene Oxide Sterilization and Fumigation Operations (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NESHAP for Commercial Ethylene Oxide Sterilization and Fumigation Operations (EPA ICR Number 1666.12, OMB Control Number 2060–0283), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through January 31, 2023. Public comments were previously requested, via the **Federal Register**, on April 8, 2022 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before December 23, 2022.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OAR–2022–0079, to EPA online using *https://www.regulations.gov/* (our preferred method), or by email to *docket@epa.gov,* or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to

www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Muntasir Ali, Sector Policies and Program Division (D243–05), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina, 27711; telephone number: (919) 541–0833; email address: *ali.muntasir@epa.gov.*

SUPPLEMENTARY INFORMATION: Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at *https://www.regulations.gov,* or in person, at the EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit: *http://www.epa.gov/dockets.*

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Commercial Ethylene Oxide Sterilization and Fumigation Operations (40 CFR part 63, subpart O) were proposed on March 7, 1994; promulgated on December 6, 1994; and most recently amended on February 27, 2014. These regulations apply to existing facilities and new facilities ethylene oxide (E.O.) sterilization and fumigation facilities using one ton of ethylene oxide (E.O.) (as defined in 40 CFR 63.361) after December 6, 1994. New facilities include those that commenced construction, modification, or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart O.

Form Numbers: None.

Respondents/affected entities: Existing facilities and new facilities E.O. sterilization and fumigation facilities using one ton of E.O. (as defined in 40 CFR 63.361) after December 6, 1994.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart O).

Estimated number of respondents: 97 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 6,640 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $1,330,000 (per year), which includes $534,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is a decrease in the total estimated respondent burden compared with the ICR currently approved by OMB. The adjustment decrease in burden from the most-recently approved ICR is due to a decrease in the number of sources. The previous ICR indicated 128 respondents. The EPA has recently identified 97 respondents over the next three years based on a section 114 request for the Ethylene Oxide Commercial Sterilization and Fumigation Operations from May 2021. Conclusively, there has been a 25% decrease in sources. This ICR also reflects that there is overall zero growth anticipated in the industry over the next three years, and removes the burden associated with new source activities. The overall result is a decrease in burden hours and operation and maintenance costs.

Courtney Kerwin,

Director, Regulatory Support Division.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; Polychlorinated Biphenyls (PCBs): Consolidated Reporting and Recordkeeping Requirements (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted the following information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (PRA): ''Polychlorinated Biphenyls (PCBs); Consolidated Information Collection Activities'' (EPA ICR No. 1446.14 and OMB Control No. 2070–0112). This is a request to renew an existing ICR that is currently approved through November 30, 2022. Public comments were previously requested via the **Federal Register** on April 7, 2022. This notice allows for an additional 30 days for public comments. The ICR, which is summarized in this document, describes the collection activities and estimated burden and cost to the public. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before December 23, 2022.

ADDRESSES: Submit your comments to EPA, referencing Docket ID No. EPA–HQ–OPPT–2017–0647, using *https://www.regulations.gov* (our preferred method) or by mail to: Environmental Protection Agency, EPA Docket Center, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. For additional delivery options and information about EPA's dockets, visit *https://www.epa.gov/dockets.* EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Katherine Sleasman, Regulatory Support Branch, Office of Chemical Safety and Pollution Prevention, 7602M, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (202) 566–1204; email address: *sleasman.katherine@epa.gov.*

SUPPLEMENTARY INFORMATION: Supporting documents which explain in detail the information that the EPA will be collecting, are available in the docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit *https://www.epa.gov/dockets.*

Abstract: Section 6(e)(1) of the Toxic Substances Control Act (TSCA), 15 U.S.C. 2605(e), directs EPA to regulate the marking and disposal of PCBs. TSCA section 6(e)(2) bans the manufacturing, processing, distribution in commerce, and use of PCBs in other than a totally enclosed manner. TSCA section 6(e)(3) establishes a process for obtaining exemptions from the

prohibitions on the manufacture, processing, and distribution in commerce of PCBs. Since 1978, EPA has promulgated numerous rules addressing all aspects of the life cycle of PCBs as required by the statute. The regulations are intended to prevent the improper handling and disposal of PCBs and to minimize the exposure of human beings or the environment to PCBs. These regulations have been codified in 40 CFR part 761, which includes approximately 100 specific reporting, third-party reporting, and recordkeeping requirements. To meet its statutory obligations to regulate PCBs, EPA must obtain sufficient information to conclude that specified activities do not result in an unreasonable risk of injury to health or the environment. EPA uses the information collected under 40 CFR part 761 to ensure that PCBs are managed in an environmentally safe manner and that activities are being conducted in compliance with the PCB regulations. The information collected by these requirements will update the Agency's knowledge of ongoing PCB activities, ensure that individuals using or disposing of PCBs are held accountable for their activities, and demonstrate compliance with the PCB regulations. Specific uses of the information collected include determining the efficacy of a disposal technology; evaluating exemption requests and exclusion notices; targeting compliance inspections; and ensuring adequate storage capacity for PCB waste. This collection addresses the several information reporting requirements found in the PCB regulations, 40 CFR part 761.

Form Numbers: 7720–12 and 7710–53.

Respondents/affected entities: Persons who currently possess PCB items, PCB-contaminated equipment, or other PCB waste.

Respondent's obligation to respond: Mandatory, per TSCA section 6(e) and 40 CFR part 761.

Estimated number of respondents: 121,967 (total).

Frequency of response: On occasion.

Total estimated burden: 659,882 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $35,460,639 (per year), includes $50 annualized capital or operation & maintenance costs.

Changes in the estimates: This request reflects a decrease of 19,505 hours (from 679,387 hours to 659,882 hours) in the total estimated respondent burden from that currently in the OMB inventory. This decrease is due to updates to the most current wage rate data and to revisions to the total number of respondents based on new data gathered for this ICR effort, updated Agency data regarding total numbers of regulated entities, and the overlapping coverage of the recently revised ICR for Universal Hazardous Waste Manifest, EPA ICR No. 0801.25 and OMB Control No. 2050–0039, which was approved by OMB through January 31, 2025.

Courtney Kerwin,

Director, Regulatory Support Division.

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

[FR ID 114495]

Federal Advisory Committee Act; Technological Advisory Council

AGENCY: Federal Communications Commission.

ACTION: Notice of public meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, this notice advises interested persons that the Federal Communications Commission's (FCC) Technological Advisory Council will hold a meeting on Thursday, December 8, 2022 in the Commission Meeting Room and available to the public via the internet at *http://www.fcc.gov/live* at 10 a.m.

DATES: Thursday, December 8, 2022.

ADDRESSES: Federal Communications Commission, 45 L Street NE, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Michael Ha, Chief, Policy and Rules Division 202–418–2099; *michael.ha@fcc.gov.*

SUPPLEMENTARY INFORMATION: At the December 8th meeting, the TAC will continue to consider and advise the Commission on topics such as 6G, artificial intelligence, advanced spectrum sharing technologies, and emerging wireless technologies, including new tools to restore internet access during shutdowns and other disruptions. This agenda may be modified at the discretion of the TAC Chair and the Designated Federal Officer (DFO). All attendees should arrive early to allow ample time for processing through the Commission's security screening. As required by Federal COVID–19 safety protocols, all visitors to FCC's facilities in any county where the COVID–19 Community Level is HIGH will be required to wear a ''high quality'' mask throughout their visit to that facility. Please refer to: *https://www.fcc.gov/visit* for further information. The public may submit written comments before the meeting to Michael Ha, the FCC's Designated Federal Officer for Technological Advisory Council by email: *michael.ha@fcc.gov* or U.S. Postal Service Mail (Michael Ha, Federal Communications Commission, 45 L Street NE, Washington, DC 20554). Open captioning will be provided for this event. Other reasonable accommodations for people with disabilities are available upon request. Requests for such accommodations should be submitted via email to *fcc504@fcc.gov* or by calling the Office of Engineering and Technology at 202–418–2470 (voice), (202) 418–1944 (fax). Such requests should include a detailed description of the accommodation needed. In addition, please include your contact information. Please allow at least five days advance notice; last minute requests will be accepted but may not be possible to fill.

Federal Communications Commission.

Ronald T. Repasi,

Acting Chief, Office of Engineering and Technology.

BILLING CODE 6712–01–P

FEDERAL MARITIME COMMISSION

Notice of Agreements Filed

The Commission hereby gives notice of filing of the following agreements under the Shipping Act of 1984. Interested parties may submit comments, relevant information, or documents regarding the agreements to the Secretary by email at *Secretary@fmc.gov,* or by mail, Federal Maritime Commission, 800 North Capitol Street, Washington, DC 20573. Comments will be most helpful to the Commission if received within 12 days of the date this notice appears in the **Federal Register**, and the Commission requests that comments be submitted within 7 days on agreements that request expedited review. Copies of agreements are available through the Commission's website (*www.fmc.gov*) or by contacting the Office of Agreements at (202)-523–5793 or *tradeanalysis@fmc.gov.*

Agreement No.: 201395.

Agreement Name: Volkswagen Konzernlogistik GmbH & Co. OHG/Neptune Lines Space Charter Agreement.

Parties: Neptune Pacific Line, Inc.; Volkswagen Konzernlogistik GmbH & Co. OHG.

Filing Party: Bryant Gardner, Winston & Strawn LLP.

Synopsis: The Agreement authorizes the parties to charter space to each other in all U.S. trades.

Proposed Effective Date: 11/14/2022.

Location: https://www2.fmc.gov/FMC.Agreements.Web/Public/AgreementHistory/72502.

Agreement No.: 201396.

Agreement Name: Toko Kaiun Kaisha/Daichi Chuo Kisen Kaisha Space Charter Agreement.

Parties: Daichi Chuo Kisen Kaisha; Toko Kaiun Kaisha, LTD.

Filing Party: Rebecca Fenneman, Jeffrey/Fenneman Law + Strategy, PLLC.

Synopsis: The Agreement authorizes the parties to charter space to each other in the trade between the United States and Japan.

Proposed Effective Date: 11/15/2022.

Location: https://www2.fmc.gov/FMC.Agreements.Web/Public/AgreementHistory/72503.

Dated: November 18, 2022.

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The public portions of the applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank(s) indicated below and at the offices of the Board of Governors. This information may also be obtained on an expedited basis, upon request, by contacting the appropriate Federal Reserve Bank and from the Board's Freedom of Information Office at *https://www.federalreserve.gov/foia/request.htm.* Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)).

Comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Ann E. Misback, Secretary of the Board, 20th Street and Constitution Avenue NW, Washington, DC 20551–0001, not later than December 23, 2022.

A. Federal Reserve Bank of St. Louis (Holly A. Rieser, Senior Manager) P.O. Box 442, St. Louis, Missouri 63166–2034. Comments can also be sent electronically to *Comments.applications@stls.frb.org:*

1. *Bradford Bancorp, Inc., Greenville, Illinois;* to merge with Community Bancshares, Inc., and thereby indirectly acquire Community Trust Bank, both of Irvington, Illinois.

Board of Governors of the Federal Reserve System.

Margaret McCloskey Shanks,

Deputy Secretary of the Board.

BILLING CODE P

FEDERAL RESERVE SYSTEM

Agency Information Collection Activities: Announcement of Board Approval Under Delegated Authority and Submission to OMB

AGENCY: Board of Governors of the Federal Reserve System.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) is adopting a proposal to extend for three years, without revision, the Notice by Financial Institutions of Government Securities Broker or Government Securities Dealer Activities and Notice by Financial Institutions of Termination of Activities as a Government Securities Broker or Government Securities Dealer (Form G–FIN and Form G–FINW; OMB No. 7100–0224).

FOR FURTHER INFORMATION CONTACT: Federal Reserve Board Clearance Officer—Nuha Elmaghrabi—Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, *nuha.elmaghrabi@frb.gov,* (202) 452–3884.

Office of Management and Budget (OMB) Desk Officer for the Federal Reserve Board, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW, Washington, DC 20503, or by fax to (202) 395–6974.

SUPPLEMENTARY INFORMATION: On June 15, 1984, OMB delegated to the Board authority under the Paperwork Reduction Act (PRA) to approve and assign OMB control numbers to collections of information conducted or sponsored by the Board. Board-approved collections of information are incorporated into the official OMB inventory of currently approved collections of information. The OMB inventory, as well as copies of the PRA Submission, supporting statements, and approved collection of information instrument(s) are available at *https://www.reginfo.gov/public/do/PRAMain.* These documents are also available on the Federal Reserve Board's public website at *https://www.federalreserve.gov/apps/reportforms/review.aspx* or may be requested from the agency clearance officer, whose name appears above.

Final Approval Under OMB Delegated Authority of the Extension for Three Years, Without Revision, of the Following Information Collections

Collection title: Notice by Financial Institutions of Government Securities Broker or Government Securities Dealer Activities and Notice by Financial Institutions of Termination of Activities as a Government Securities Broker or Government Securities Dealer.

Collection identifiers: Form G–FIN and Form G–FINW.

OMB control number: 7100–0224.

Frequency: Event-generated.

Respondents: State member banks, foreign banks, uninsured state branches or state agencies of foreign banks, commercial lending companies owned or controlled by foreign banks, and Edge Act corporations (collectively, Board-regulated financial institutions) that are required to register as government security brokers or government security dealers and those entities that have terminated such activities.

Estimated number of respondents:

Reporting
Form G–FIN: 39; Form G–FINW: 1
Recordkeeping
Form G–FIN: 39; Form G–FINW: 1

Estimated average hours per response:

Reporting
Form G–FIN: 1; Form G–FINW: 0.25
Recordkeeping
Form G–FIN: 0.25; Form G–FINW: 0.25

Estimated annual burden hours:

Reporting
Form G–FIN: 39; Form G–FINW: 10
Recordkeeping
Form G–FIN: 0; Form G–FINW: 0 [1]

General description of collection: The Securities Exchange Act of 1934, as amended (the Act), requires financial institutions to notify their appropriate regulatory agency (ARA) prior to using the mails or any means or

[1] Due to the mechanics of the RISC/OIRA Consolidated Information System (ROCIS), fractional amounts below 0.5 are rounded to 0.

instrumentality of interstate commerce to engage in government securities broker or dealer activities, and to notify their ARA upon terminating such activities. The Board is the ARA for Board-regulated financial institutions. A Board-regulated financial institution must use Form G–FIN to register as a government securities broker or dealer or to amend a previously submitted Form G–FIN and must use Form G–FINW to notify the Board of its termination of such activities.

Legal authorization and confidentiality: Form G–FIN and Form G–FINW are authorized under section 15C of the Act,[2] which requires a financial institution that is a broker or dealer of government securities to submit a written notice advising its ARA that it is a government securities broker or a government securities dealer or that it has ceased to act as such. The Act also directs the Board, in consultation with the other ARAs (the Federal Deposit Insurance Corporation (FDIC) and the Office of the Comptroller of the Currency (OCC)),[3] as well as with the Securities and Exchange Commission (SEC), to prescribe the form of and the information collected in these notices.[4] Further support for the creation and collection of these notices by the Board is found in Department of Treasury (Treasury) regulations, authorized by section 15 of the Act, which state that the Form G–FIN and Form G–FINW are promulgated by the Board and that such forms are to be used by non-exempt [5] financial institutions to notify their ARA of their status as government securities brokers or dealers or the termination of such status.[6]

Section 15C of the Act also instructs the Secretary of the Treasury to promulgate recordkeeping requirements regarding the forms and records to be retained by government securities brokers and dealers and to specify the time period for which such records shall be preserved. Accordingly, the recordkeeping requirement associated with these forms is contained in 17 CFR 404.4, which requires state member banks and uninsured state branches or state agencies of foreign banks, as well as other institutions, to retain these forms for three years after the financial institution notifies its ARA that it has ceased to function as a government securities broker or dealer. Although Treasury's recordkeeping requirement does not explicitly apply to foreign banks, to Edge corporations, or to commercial lending companies that are owned or controlled by foreign banks, the Board has the authority to ''issue such rules and regulations with respect to transactions in government securities as may be necessary to prevent fraudulent and manipulative acts and practices and to promote just and equitable principles of trade.'' [7] Imposing a recordkeeping requirement on foreign banks, Edge corporations, and commercial lending companies owned or controlled by foreign banks is necessary for the public interest and protection of investors in order to ensure that the proper notification has been provided when these institutions are transacting in government securities. In addition, the Board is authorized to impose recordkeeping requirements on foreign banks,[8] Edge corporations,[9] and on commercial lending companies that are owned or controlled by foreign banks.[10] The obligation to file the Form G–FIN and Form G–FINW with the Board, and the obligation for the government securities broker or dealer to retain a copy of the Form G–FIN and Form G–FINW, is mandatory for those financial institutions for which the Board serves as the ARA, unless the financial institution is exempt from the reporting requirement under Treasury's regulations. The filing of these forms and the records retention period is event-generated.

Under the Act, each ARA is instructed to make these forms available to the SEC, and the SEC is instructed to make the notices available to the public.[11] Thus, the information collected on Form G–FIN and Form G–FINW is ordinarily not treated as confidential.[12] However, given that Item 6 of Form G–FIN instructs the filer to attach copies of the confidential Form G–FIN–4, or if applicable, to attach copies of any previously filed confidential Form MSD–4 or confidential Form U–4, such attachments may be treated as confidential by the Board under exemptions 4 and/or 6 of the Freedom of Information Act.[13]

Current actions: On July 6, 2022, the Board published a notice in the **Federal Register** (87 FR 40239) requesting public comment for 60 days on the extension, without revision, of the Form G–FIN and Form G–FINW. The comment period for this notice expired on September 6, 2022. The Board did not receive any comments.

Board of Governors of the Federal Reserve System, November 17, 2022.

Michele Taylor Fennell,

Deputy Associate Secretary of the Board.

BILLING CODE 6210–01–P

FEDERAL RESERVE SYSTEM

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice, request for comment.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) invites comment on a proposal to extend for

[2] 15 U.S.C. 78o–5(a)(l)(B).

[3] These forms are also collected by the FDIC and the OCC, respectively, for government securities brokers and dealers under their supervision. A copy of the form filed with each ARA is also made available by the ARA to the SEC under the Act. 15 U.S.C. 78o–5(a)(1)(B)(iii).

[4] 15 U.S.C. 78o–5(a)(l)(B)(ii).

[5] The Act permits the Secretary of the Treasury to exempt certain government securities brokers or dealers, 15 U.S.C. 78o–5(a)(5), and the Secretary of the Treasury has promulgated regulations exempting certain types of firms. See 17 CFR part 401.

[6] See 17 CFR 400.1(d), 449.1, and 449.2; see also 17 CFR 400.5(b) (requiring that any amendments or corrections to the notice of status of government securities broker or dealer be filed by the financial institution on Form G–FIN within 30 days).

[7] 15 U.S.C. 78o–5(b)(3)(A). See 15 U.S.C. 78o–5(a)(1)(B).

[8] 12 U.S.C. 3107 and 3108.

[9] 12 U.S.C. 625.

[10] 12 U.S.C. 3106, as applied through 12 U.S.C. 1844(c).

[11] 15 U.S.C. 78o–5(a)(l)(B)(iii).

[12] The Board's Regulation H provides that any person filing any statement, report, or document under the Act may submit written objection to the public disclosure of the information when such information is filed in accordance with the procedures provided in 12 CFR 208.36(d). In addition, if a respondent believes that information disclosed on these forms constitutes nonpublic commercial or financial information, which is both customarily and actually treated as private by the respondent, the respondent may request confidential treatment pursuant to exemption 4 of the Freedom of Information Act (FOIA) pursuant to the Board's Rules Regarding the Availability of Information, 12 CFR 261.15.

[13] Generally, information provided on Form MSD–4 and Form MSD–5 will be kept confidential from the public under exemption 6 of the FOIA, which protects information in ''personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.'' 5 U.S.C. 552(b)(6). In addition, other information on Form MSD–4 and Form MSD–5, such as the name of the municipal securities dealer that filed the form, may be withheld under exemption 4 of the FOIA, if it constitutes nonpublic commercial or financial information, which is both customarily and actually treated as private by the respondent (*e.g.,* if a municipal securities dealer recently hired or terminated a number of municipal securities employees, disclosing these forms could reveal competitively sensitive commercial information about that dealer). 5 U.S.C. 552(b)(4). We note that FINRA's Form U–4 collects the social security number and other personally identifiable information about an individual, which may be withheld under the Privacy Act, 5 U.S.C. 552b. In addition, Treasury's Form G–FIN–4 states ''[t]he Department of the Treasury and the appropriate regulatory agencies regard the information provided by each respondent on this form as confidential.''

three years, without revision, the Recordkeeping and Disclosure Requirements Associated with Regulation RR (FR RR; OMB No. 7100–0372).

DATES: Comments must be submitted on or before January 23, 2023.

ADDRESSES: You may submit comments, identified by FR RR, by any of the following methods:

- *Agency Website: https://www.federalreserve.gov/.* Follow the instructions for submitting comments at *https://www.federalreserve.gov/apps/foia/proposedregs.aspx.*
- *Email: regs.comments@federalreserve.gov.* Include the OMB number or FR number in the subject line of the message.
- *Fax:* (202) 452–3819 or (202) 452–3102.
- *Mail:* Federal Reserve Board of Governors, Attn: Ann E. Misback, Secretary of the Board, Mailstop M–4775, 2001 C St. NW, Washington, DC 20551.

All public comments are available from the Board's website at *https://www.federalreserve.gov/apps/foia/proposedregs.aspx* as submitted, unless modified for technical reasons or to remove personally identifiable information at the commenter's request. Accordingly, comments will not be edited to remove any confidential business information, identifying information, or contact information. Public comments may also be viewed electronically or in paper in Room M–4365A, 2001 C St. NW, Washington, DC 20551, between 9:00 a.m. and 5:00 p.m. on weekdays. For security reasons, the Board requires that visitors make an appointment to inspect comments. You may do so by calling (202) 452–3684. Upon arrival, visitors will be required to present valid government-issued photo identification and to submit to security screening in order to inspect and photocopy comments.

Additionally, commenters may send a copy of their comments to the Office of Management and Budget (OMB) Desk Officer for the Federal Reserve Board, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW, Washington, DC 20503, or by fax to (202) 395–6974.

FOR FURTHER INFORMATION CONTACT: Federal Reserve Board Clearance Officer—Nuha Elmaghrabi—Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, *nuha.elmaghrabi@frb.gov,* (202) 452–3884.

SUPPLEMENTARY INFORMATION: On June 15, 1984, OMB delegated to the Board authority under the Paperwork Reduction Act (PRA) to approve and assign OMB control numbers to collections of information conducted or sponsored by the Board. In exercising this delegated authority, the Board is directed to take every reasonable step to solicit comment. In determining whether to approve a collection of information, the Board will consider all comments received from the public and other agencies.

During the comment period for this proposal, a copy of the proposed PRA OMB submission, including the draft reporting form and instructions, supporting statement, and other documentation, will be made available on the Board's public website at *https://www.federalreserve.gov/apps/reportforms/review.aspx* or may be requested from the agency clearance officer, whose name appears above. Final versions of these documents will be made available at *https://www.reginfo.gov/public/do/PRAMain,* if approved.

Request for Comment on Information Collection Proposal

The Board invites public comment on the following information collection, which is being reviewed under authority delegated by the OMB under the PRA. Comments are invited on the following:

a. Whether the proposed collection of information is necessary for the proper performance of the Board's functions, including whether the information has practical utility;

b. The accuracy of the Board's estimate of the burden of the proposed information collection, including the validity of the methodology and assumptions used;

c. Ways to enhance the quality, utility, and clarity of the information to be collected;

d. Ways to minimize the burden of information collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

e. Estimates of capital or startup costs and costs of operation, maintenance, and purchase of services to provide information.

At the end of the comment period, the comments and recommendations received will be analyzed to determine the extent to which the Board should modify the proposal.

Estimated annual burden hours: 340.

General description of collection: In 2014, the Board, Office of the Comptroller of the Currency (OCC), Federal Deposit Insurance Corporation (FDIC), U.S. Securities and Exchange Commission (SEC), Federal Housing Finance Agency (FHFA), and Department of Housing and Urban Development (HUD) adopted a joint final rule (credit risk retention rule) that implemented the credit risk retention requirements of section 15G of the Securities Exchange Act of 1934 (Exchange Act),[1] which was added by section 941 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.[2] The Board's credit risk retention rule, which applies to any securitizer of asset-backed securities (securitizer) that is a state member bank (SMB) or a subsidiary of an SMB, is codified in the Board's Regulation RR—Credit Risk Retention (12 CFR part 244). Regulation RR includes a number of mandatory recordkeeping and disclosure requirements.[3]

Legal authorization and confidentiality: The FR RR is authorized pursuant to section 15G of the Exchange Act, which requires the Board, jointly with the OCC, FDIC, and SEC, to prescribe risk retention regulations for securitizers (15 U.S.C. 78o–11). The FR RR is mandatory.

Records kept and information disclosed pursuant to the requirements of the FR RR are not submitted to the Board, so the issue of confidentiality will not normally arise. If the Board's examiners obtain a copy of the records as part of an examination, the records may be exempt from disclosure under exemption 8 of the Freedom of Information Act, which exempts from disclosure matters that are ''contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions'' (5 U.S.C. 552(b)(8)).

Consultation outside the agency: The credit risk retention rule was adopted on an interagency basis. The Board consulted with the OCC, FDIC, and SEC with respect to the extension, without revision, of this information collection.

Board of Governors of the Federal Reserve System, November 17, 2022.

Michele Taylor Fennell,

Deputy Associate Secretary of the Board.

BILLING CODE 6210–01–P

FEDERAL RESERVE SYSTEM

Agency Information Collection Activities: Announcement of Board Approval Under Delegated Authority and Submission to OMB

AGENCY: Board of Governors of the Federal Reserve System.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) is adopting a proposal to extend for three years, with revision, the Transfer Agent Registration and Amendment Form and Transfer Agent Deregistration Form (Form TA–1 and Form TA–W); OMB No. 7100–0099).

FOR FURTHER INFORMATION CONTACT: Federal Reserve Board Clearance Officer—Nuha Elmaghrabi—Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, *nuha.elmaghrabi@frb.gov,* (202) 452–3884.

Office of Management and Budget (OMB) Desk Officer for the Federal Reserve Board, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW, Washington, DC 20503, or by fax to (202) 395–6974.

SUPPLEMENTARY INFORMATION: On June 15, 1984, OMB delegated to the Board authority under the Paperwork Reduction Act (PRA) to approve and assign OMB control numbers to collections of information conducted or sponsored by the Board. Board-approved collections of information are incorporated into the official OMB inventory of currently approved collections of information. The OMB inventory, as well as copies of the PRA Submission, supporting statements, and approved collection of information instrument(s) are available at *https://www.reginfo.gov/public/do/PRAMain.* These documents are also available on the Federal Reserve Board's public website at *https://www.federalreserve.gov/apps/reportforms/review.aspx* or may be requested from the agency clearance officer, whose name appears above.

Final Approval Under OMB Delegated Authority of the Extension for Three Years, With Revision, of the Following Information Collection

Collection title: Transfer Agent Registration and Amendment Form and Transfer Agent Deregistration Form.

Collection identifier: Form TA–1 and Form TA–W.

OMB control number: 7100–0099.

Effective Date: December 23, 2022.

Frequency: As needed.

Respondents: The respondent panel for this collection of information consists of current and former transfer agents that are a state member bank (SMB) or a subsidiary thereof, a bank holding company (BHC), a savings and loan holding company (SLHC), or a subsidiary of a BHC that is a bank within the meaning of the Securities Exchange Act of 1934 (Exchange Act) and that is not required to register with the Office of the Comptroller of the Currency (OCC) or the Federal Deposit Insurance Corporation (FDIC).

Estimated number of respondents: Registrations, 1; Amendments, 1; Deregistrations, 1.

Estimated average hours per response: Registrations, 1.25; Amendments, 0.16; Deregistrations, 0.5.

Estimated annual burden hours: Registrations, 1; Amendments, 0.16; Deregistrations, 1.

General description of collection: The Exchange Act requires any person acting as a transfer agent [1] to register as such with the appropriate regulatory agency (ARA). The Board is the ARA for transfer agents listed in the respondents section above. Transfer agents for which the Board is the ARA must register with the Board using Form TA–1. Additionally, registered transfer agents for which the Board is their ARA may deregister by submitting Form TA–W.

Legal authorization and confidentiality: This information collection is authorized under section 17A(c) of the Exchange Act.[2] The collection is also authorized under sections 2, 17(a)(3), and 23(a) of the Exchange Act [3] and under the Board's

[1] 15 U.S.C. 78o–11.

[2] Public Law 111–203, 124 Stat. 1376 (2010).

[3] The FR RR currently takes burden for the SEC's credit risk retention rule insofar as it applies to securitizers that are, or are a subsidiary of, a bank holding company, savings and loan holding company, intermediate holding company, Edge or agreement corporation, foreign banking organization, or nonbank financial company supervised by the Board. The proposed extension of the FR RR would not include burden for the SEC's rule, because it is not a collection of information conducted or sponsored by the Board.

[1] Transfer agents are persons that provide securities transfer, registration, monitoring, and other specified services on behalf of securities issuers. See 15 U.S.C. 78c(25) (defining ''transfer agent'').

[2] 15 U.S.C. 78q–1(c) (requiring all transfer agents for securities registered under section 12 of the Exchange Act to register with the ARA by filing ''an application for registration in such form and containing such information'' as the ARA may prescribe).

[3] 12 U.S.C. 78b, 78q(a)(3) and 78w(a) (authorizing the Board to promulgate regulations and establish

Continued

general authority to require reports from SMBs,[4] BHCs,[5] and SLHCs.[6] The collection is mandatory for transfer agents for which the Board is the ARA. Information collected on the forms is available to the public upon request and is not considered confidential.

Current actions: On July 6, 2022, the Board published a notice in the **Federal Register** (87 FR 40236) requesting public comment for 60 days on the extension, with revision, of the Form TA–1 and Form TA–W. The Board proposed to utilize its own Form TA–W for respondents to deregister rather than asking respondents to use an SEC form or submit a separate letter, as has been done in the past. This would allow the Board to have its OMB control number on the form and make any changes in the future if necessary. The draft Form TA–W asks the same type of information that is on the SEC deregistration form. The comment period for this notice expired on September 6, 2022. The Board did not receive any comments. The revisions will be implemented as proposed.

Board of Governors of the Federal Reserve System, November 17, 2022.

Michele Taylor Fennell,

Deputy Associate Secretary of the Board.

BILLING CODE 6210–01–P

FEDERAL RESERVE SYSTEM

Agency Information Collection Activities: Announcement of Board Approval Under Delegated Authority and Submission to OMB

AGENCY: Board of Governors of the Federal Reserve System.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) is adopting a proposal to extend for three years, without revision, the Systemic Risk Report (FR Y–15; OMB No. 7100–0352).

FOR FURTHER INFORMATION CONTACT: Federal Reserve Board Clearance Officer—Nuha Elmaghrabi—Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, *nuha.elmaghrabi@frb.gov,* (202) 452–3884.

Office of Management and Budget (OMB) Desk Officer for the Federal Reserve Board, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW, Washington, DC 20503, or by fax to (202) 395–6974.

SUPPLEMENTARY INFORMATION: On June 15, 1984, OMB delegated to the Board authority under the Paperwork Reduction Act (PRA) to approve and assign OMB control numbers to collections of information conducted or sponsored by the Board. Board-approved collections of information are incorporated into the official OMB inventory of currently approved collections of information. The OMB inventory, as well as copies of the PRA Submission, supporting statements, and approved collection of information instrument(s) are available at *https://www.reginfo.gov/public/do/PRAMain.* These documents are also available on the Federal Reserve Board's public website at *https://www.federalreserve.gov/apps/reportforms/review.aspx* or may be requested from the agency clearance officer, whose name appears above.

Final Approval Under OMB Delegated Authority of the Extension for Three Years, Without Revision, of the Following Information Collection

Collection title: Systemic Risk Report.
Collection identifier: FR Y–15.
OMB control number: 7100–0352.
Frequency: Quarterly.
Respondents: The FR Y–15 panel is comprised of top-tier U.S. bank holding companies (BHCs) and covered savings and loan holding companies (SLHCs) with $100 billion or more in total consolidated assets,[1] foreign banking organizations (FBOs) with $100 billion or more in total combined U.S. assets, and any U.S. BHC designated as a global systemically important bank (GSIB) based on its method 1 score calculated under 12 CFR 217.404 as of December 31 of the previous calendar year.[2]
Estimated number of respondents: 52.
Estimated average hours per response: Reporting, 404; Recordkeeping, 1.
Estimated annual burden hours: Reporting, 84,032; Recordkeeping, 208.
General description of collection: The FR Y–15 quarterly report collects systemic risk data from the respondents listed above. The Board uses the FR Y–15 data to monitor, on an ongoing basis, the systemic risk profile of certain financial institutions that are subject to enhanced prudential standards under section 165 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act).[3] In addition, the FR Y–15 is used to (i) facilitate the implementation of the surcharge for GSIBs, (ii) identify other financial institutions which may present significant systemic risk, and (iii) analyze the systemic risk implications of proposed mergers and acquisitions.

Legal authorization and confidentiality: Sections 163 and 165 of the Dodd-Frank Act, as amended by the Economic Growth, Regulatory Relief, and Consumer Protection Act, authorize the Board to consider risk to U.S. financial stability in regulating and examining BHCs with $100 billion or more in consolidated assets and nonbank financial companies that are under the Board's supervision.[4] The Board is further authorized to impose prudential standards for such entities and to differentiate among companies on an individual basis or by category, taking into consideration their capital structure, complexity, financial activities, size, and any other risk-related factors that the Board deems appropriate.[5] This authorization also covers certain foreign banks with U.S. operations under the International Banking Act (IBA).[6] Sections 165(b)(1)(B) and 165(f) of the Dodd-Frank Act authorize the Board to establish enhanced public disclosures for companies subject to prudential standards under section 165.[7]

In addition, the reporting requirements associated with the FR Y–15 are authorized for BHCs pursuant to section 5 of the BHC Act; [8] for SLHCs pursuant to sections 10(b)(2) and 10(g) of the Home Owners' Loan Act; [9] and for IHCs pursuant to section 5 of the BHC Act and sections 8(a) and 13(a) of the IBA.[10]

The FR Y–15 report is mandatory. Most information provided on the FR Y–15 is made public unless a reporting entity submits a specific request for confidentiality, either on the FR Y–15 or on the form from which the data item

recordkeeping and reporting requirements with respect to Board-registered Transfer Agents).

[4] 12 U.S.C. 248(a) and 324.

[5] 12 U.S.C. 1844(c).

[6] 12 U.S.C. 1467a(b) and (g).

[1] Covered SLHCs are those that are not substantially engaged in insurance or commercial activities. *See* 12 CFR 217.2.

[2] *See* 12 CFR 217.402.

[3] Public Law 111–203 (2010); 12 U.S.C. 5365.

[4] 12 U.S.C. 5363; 5365.

[5] 12 U.S.C. 5365(a)(2)(C). The Board is required to establish prudential standards for BHCs with assets equal to or greater than $250 billion and nonbank financial companies supervised by the Board that (A) are more stringent than the standards and requirements applicable to nonbank financial companies and bank holding companies that do not present similar risks to the financial stability of the United States; and (B) increase in stringency based on the considerations enumerated in section 165(b)(3). 12 U.S.C. 5365(a)(1).

[6] 12 U.S.C. 3106(a). Section 8(a)provides that certain foreign banks with U.S. operations will be treated as BHCs for purposes of the Bank Holding Company Act (BHC Act), and sections 163 and 165 of the Dodd-Frank Act amend the BHC Act.

[7] 12 U.S.C. 5365(b)(1)(B) and (f).

[8] 12 U.S.C. 1844.

[9] 12 U.S.C. 1467a(b)(2); 1467a(g).

[10] 12 U.S.C. 3106(a); 3108(a).

is obtained.[11] Such information may be kept confidential under exemption 4 of the Freedom of Information Act (FOIA) if the submitter substantiates that it is confidential commercial or financial information that is both customarily and actually treated as private.[12] In addition, items 1 through 4 of Schedule G, which contain sensitive information regarding the reporting entity's liquidity position, may be accorded confidential treatment under exemption 4 until the first reporting date after the final liquidity coverage ratio disclosure standard has been implemented. Information collected on the FR Y–15 may also be considered confidential under FOIA exemption 8 if it is obtained as part of an examination or supervision of a financial institution.[13]

Current actions: On July 6, 2022, the Board published a notice in the **Federal Register** (87 FR 40235) requesting public comment for 60 days on the extension, without revision, of the FR Y–15. The comment period for this notice expired on September 6, 2022. The Board did not receive any comments.

Board of Governors of the Federal Reserve System, November 17, 2022.

Michele Taylor Fennell,

Deputy Associate Secretary of the Board.

FEDERAL RESERVE SYSTEM

Notice of Proposals To Engage in or To Acquire Companies Engaged in Permissible Nonbanking Activities

The companies listed in this notice have given notice under section 4 of the Bank Holding Company Act (12 U.S.C. 1843) (BHC Act) and Regulation Y, (12 CFR part 225) to engage de novo, or to acquire or control voting securities or assets of a company, including the companies listed below, that engages either directly or through a subsidiary or other company, in a nonbanking activity that is listed in § 225.28 of Regulation Y (12 CFR 225.28) or that the Board has determined by Order to be closely related to banking and permissible for bank holding companies. Unless otherwise noted, these activities will be conducted throughout the United States.

The public portions of the applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank(s) indicated below and at the offices of the Board of Governors. This information may also be obtained on an expedited basis, upon request, by contacting the appropriate Federal Reserve Bank and from the Board's Freedom of Information Office at *https://www.federalreserve.gov/foia/request.htm.* Interested persons may express their views in writing on the question whether the proposal complies with the standards of section 4 of the BHC Act.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Ann E. Misback, Secretary of the Board, 20th Street and Constitution Avenue NW, Washington DC 20551–0001, not later than December 8, 2022.

A. Federal Reserve Bank of Atlanta (Erien O. Terry, Assistant Vice President) 1000 Peachtree Street NE, Atlanta, Georgia 30309; Comments can also be sent electronically to *Applications.Comments@atl.frb.org:*

1. *Synovus Financial Corp., through its wholly-owned subsidiary, Synovus Bank, both of Columbus, Georgia;* to acquire Qualpay, Inc., San Mateo, California, and thereby engage in data processing activities pursuant to section 225.28(b)(14) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System.

Michele Taylor Fennell,

Deputy Associate Secretary of the Board.

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[Docket No. CDC–2022–0136]

Advisory Committee on Immunization Practices

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice of meeting and request for comment.

SUMMARY: In accordance with the Federal Advisory Committee Act, the Centers for Disease Control and Prevention (CDC), located within the Department of Health and Human Services (HHS), announces the following meeting of the Advisory Committee on Immunization Practices (ACIP). This meeting is open to the public. Time will be available for public comment.

DATES: The meeting will be held on December 9, 2022, from 10 a.m. to 5 p.m. EST (dates and times subject to change, see the ACIP website for updates at *http://www.cdc.gov/vaccines/acip/index.html*). The meeting will be webcast live via the World Wide Web. Written comments must be received on or before December 7, 2022.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2022–0136, by either of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H24–8, Atlanta, GA 30329–4027, Attn: December 9, 2022 ACIP Meeting.

Instructions: All submissions received must include the Agency name and Docket Number. All relevant comments received will be posted without change to *https://www.regulations.gov,* including any personal information provided. For access to the docket to read background documents or comments received, go to *https://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Stephanie Thomas, ACIP Committee Management Specialist, Centers for Disease Control and Prevention, National Center for Immunization and Respiratory Diseases, 1600 Clifton Road NE, MS H24–8, Atlanta, GA 30329–4027; Telephone: 404–639–8836; Email: *ACIP@cdc.gov.*

SUPPLEMENTARY INFORMATION:

Purpose: The committee is charged with advising the Director, CDC, on the use of immunizing agents. In addition, under 42 U.S.C. 1396s, the committee is mandated to establish and periodically review and, as appropriate, revise the list of vaccines for administration to vaccine-eligible children through the Vaccines for Children (VFC) program, along with schedules regarding dosing interval, dosage, and contraindications to administration of vaccines. Further, under provisions of the Affordable Care Act, section 2713 of the Public Health Service Act, immunization recommendations of the ACIP that have been approved by the CDC Director and appear on CDC immunization schedules must be covered by applicable health plans.

[11] Several data items in the FR Y–15 are retrieved from the FR Y–9C and other items may be retrieved from the FFIEC 101. Confidential treatment will also extend to any automatically calculated items on the FR Y–15 that have been derived from confidential data items and that, if released, would reveal the underlying confidential data.

[12] 5 U.S.C. 552(b)(4).

[13] 5 U.S.C. 552(b)(8).

Matters To Be Considered: The agenda will include discussions on use of Monkeypox vaccines. A recommendation vote(s) is not scheduled. Agenda items are subject to change as priorities dictate. For more information on the meeting agenda visit *https://www.cdc.gov/vaccines/acip/meetings/meetings-info.html.* A notice of this ACIP meeting has also been posted on CDC's ACIP website at: *http://www.cdc.gov/vaccines/acip/index.html.* In addition, CDC has sent notice of this ACIP meeting by email to those who subscribe to receive email updates about ACIP.

Public Participation

Interested persons or organizations are invited to participate by submitting written views, recommendations, and data. Please note that comments received, including attachments and other supporting materials, are part of the public record and are subject to public disclosure. Comments will be posted on *https://www.regulations.gov.* Therefore, do not include any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure. If you include your name, contact information, or other information that identifies you in the body of your comments, that information will be on public display. CDC will review all submissions and may choose to redact, or withhold, submissions containing private or proprietary information such as Social Security numbers, medical information, inappropriate language, or duplicate or near duplicate examples of a mass-mail campaign. CDC will carefully consider all comments submitted into the docket.

Written Public Comment: Written comments must be received on or before December 7, 2022.

Oral Public Comment: This meeting will include time for members of the public to make an oral comment. Oral public comment will occur before any scheduled votes, including all votes relevant to the ACIP's Affordable Care Act and Vaccines for Children Program roles. Priority will be given to individuals who submit a request to make an oral public comment before the meeting according to the procedures below.

Procedure for Oral Public Comment: All persons interested in making an oral public comment during the December 9, 2022 ACIP meeting must submit a request at *https://www.cdc.gov/vaccines/acip/meetings/* no later than 11:59 p.m. EST, December 7, 2022, according to the instructions provided.

If the number of persons requesting to speak is greater than can be reasonably accommodated during the scheduled time, CDC will conduct a lottery to determine the speakers for the scheduled public comment session. CDC staff will notify individuals by email on December 8, 2022 regarding their request to speak. To accommodate the significant interest in participation in the oral public comment session of ACIP meetings, each speaker will be limited to three minutes, and each speaker may only speak once per meeting.

The Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Kalwant Smagh,

Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention.

[FR Doc. 2022–25538 Filed 11–22–22; 8:45 am]

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2018–N–3240]

List of Bulk Drug Substances for Which There is a Clinical Need Under Section 503B of the Federal Food, Drug, and Cosmetic Act

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is developing a list of bulk drug substances (active pharmaceutical ingredients) for which there is a clinical need (the 503B Bulks List). Drug products that outsourcing facilities compound using bulk drug substances on the 503B Bulks List can qualify for certain exemptions from the Federal Food, Drug, and Cosmetic Act (FD&C Act) provided certain conditions are met. This notice identifies two bulk drug substances that FDA has considered and proposes to include on the 503B Bulks List to compound three categories of compounded drug products: arginine hydrochloride (HCl) for oral use, lysine HCl for oral use, and lysine HCl for intravenous use in combination with FDA-approved, single-ingredient arginine HCl for intravenous use. This notice identifies three bulk drug substances that FDA has considered and proposes not to include on the 503B Bulks List: etomidate, furosemide, and rocuronium bromide. Additional bulk drug substances nominated for inclusion on this list are under consideration and may be the subject of future notices.

DATES: Either electronic or written comments on the notice must be submitted by January 23, 2023.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of January 23, 2023. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

• For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2018–N–3240 for ''List of Bulk Drug Substances for Which There is a Clinical Need Under Section 503B of the Federal Food, Drug, and Cosmetic Act.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Tracy Rupp, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Silver Spring, MD 20993, 301–796–3100.

SUPPLEMENTARY INFORMATION:

I. Background

Section 503B of the FD&C Act (21 U.S.C. 353b) describes the conditions that must be satisfied for drug products compounded by an outsourcing facility to be exempt from section 505 of the FD&C Act (21 U.S.C. 355) (concerning the approval of drugs under new drug applications (NDAs) or abbreviated new drug applications (ANDAs)), section 502(f)(1) (21 U.S.C. 352(f)(1)) (concerning the labeling of drugs with adequate directions for use), and section 582 of the FD&C Act (21 U.S.C. 360eee–1) (concerning drug supply chain security requirements).[1]

Compounded drug products that meet the conditions in section 503B are not exempt from current good manufacturing practice (CGMP) requirements in section 501(a)(2)(B) of the FD&C Act (21 U.S.C. 351(a)(2)(B)).[2] Outsourcing facilities are also subject to FDA inspections according to a risk-based schedule, specific adverse event reporting requirements, and other conditions that help to mitigate the risks of the drug products they compound.[3] Outsourcing facilities may or may not obtain prescriptions for identified individual patients and can, therefore, distribute compounded drugs to healthcare practitioners for ''office stock,'' to hold in their offices in advance of patient need.[4]

One of the conditions that must be met for a drug product compounded by an outsourcing facility to qualify for the exemptions under section 503B of the FD&C Act is that the outsourcing facility may not compound a drug using a bulk drug substance unless: (1) the bulk drug substance appears on a list established by the Secretary of Health and Human Services identifying bulk drug substances for which there is a clinical need (the 503B Bulks List) or (2) the drug compounded from the bulk drug substance appears on the drug shortage list in effect under section 506E of the FD&C Act (21 U.S.C. 356e) at the time of compounding, distribution, and dispensing.[5]

Section 503B of the FD&C Act directs FDA to establish the 503B Bulks List by: (1) publishing a notice in the **Federal Register** proposing bulk drug substances to be included on the list, including the rationale for such proposal; (2) providing a period of not less than 60 calendar days for comment on the notice; and (3) publishing a notice in the **Federal Register** designating bulk drug substances for inclusion on the list.[6]

FDA has published a series of **Federal Register** notices addressing bulk drug substances nominated for inclusion on the 503B Bulks List.[7] This notice identifies two bulk drug substances that FDA has considered and proposes to include on the 503B Bulks List and three bulk drug substances that FDA has considered and proposes not to include on the 503B Bulks List.

For purposes of section 503B of the FD&C Act, *bulk drug substance* means an active pharmaceutical ingredient as defined in § 207.1 (21 CFR 207.1).[8] *Active pharmaceutical ingredient* means any substance that is intended for incorporation into a finished drug product and is intended to furnish pharmacological activity or other direct effect in the diagnosis, cure, mitigation, treatment, or prevention of disease, or to affect the structure or any function of the body, but the term does not include intermediates used in the synthesis of the substance.[9] [10]

[1] Section 503B(a) of the FD&C Act.

[2] Compare section 503A(a) of the FD&C Act (21 U.S.C. 353a(a)) (exempting drugs compounded in accordance with that section from CGMP requirements) with section 503B(a) of the FD&C Act (not providing an exemption from CGMP requirements).

[3] Section 503B(b)(4) and (5) of the FD&C Act.

[4] Section 503B(d)(4)(C) of the FD&C Act.

[5] Section 503B(a)(2)(A) of the FD&C Act.

[6] Section 503B(a)(2)(A)(i)(I) to (III) of the FD&C Act.

[7] See **Federal Register** of August 28, 2018 (83 FR 43877), March 4, 2019 (84 FR 7383), September 3, 2019 (84 FR 46014), July 31, 2020 (85 FR 46126), and March 24, 2021 (86 FR 15673). The comment period for the July 2020 notice was reopened for 30 days on January 8, 2021 (86 FR 1515), to allow interested parties an additional opportunity to comment. FDA has not yet reached a final determination on whether the substances evaluated in the September 2019, July 2020, or March 2021 notices will be added to the 503B Bulks List. In addition, bumetanide, which was considered in the August 2018 notice, remains under consideration by the Agency.

[8] See section 503B(a)(2) of the FD&C Act, which defines bulk drug substances used in compounding under section 503B according to 21 CFR 207.3(a)(4) ''or any successor regulation.'' Section 207.1 is the successor regulation.

[9] Section 503B(a)(2) of the FD&C Act and § 207.1.

[10] Inactive ingredients are not subject to section 503B(a)(2) of the FD&C Act and will not be included in the 503B Bulks List because they are not included within the definition of a bulk drug substance. Pursuant to section 503B(a)(3) of the FD&C Act, inactive ingredients used in compounding must comply with the standards of an applicable U.S. Pharmacopeia or National Formulary monograph, if a monograph exists.

II. Methodology for Developing the 503B Bulks List

A. Process for Developing the List

In the **Federal Register** of December 4, 2013 (78 FR 72838), FDA requested nominations for specific bulk drug substances for the Agency to consider for inclusion on the 503B Bulks List. FDA reopened the nomination process in the **Federal Register** of July 2, 2014 (79 FR 37747) and provided more detailed information on what FDA needs to evaluate nominations for the list. In the **Federal Register** of October 27, 2015 (80 FR 65770), the Agency opened a new docket, FDA–2015–N–3469, to provide an opportunity for interested persons to submit new nominations of bulk drug substances or to renominate substances with sufficient information or submit comments on nominated substances.

As FDA evaluates bulk drug substances, it intends to publish notices for public comment in the **Federal Register** that describe the FDA's proposed position on each substance along with the rationale for that position.[11] After considering any comments on FDA's proposals regarding whether to include nominated substances on the 503B Bulks List, FDA intends to consider whether input from the Pharmacy Compounding Advisory Committee (PCAC) on the nominations would be helpful to the Agency in making its determination, and if so, it will seek PCAC input.[12] Depending on its review of the docket comments and other relevant information before the Agency, FDA may finalize its proposed determination without change, or it may finalize a modification to its proposal to reflect new evidence or analysis regarding clinical need. FDA will then publish in the **Federal Register** a list identifying the bulk drug substances for which it has determined there is a clinical need and FDA's rationale in making that final determination. FDA will also publish in the **Federal Register** a list of those substances it considered but found that there is no clinical need to use in compounding and FDA's rationale in making this decision.

FDA intends to maintain a list of all bulk drug substances it has evaluated on its website, and separately identify bulk drug substances it has placed on the 503B Bulks List and those it has decided not to place on the 503B Bulks List. This list is available at *https://www.fda.gov/media/120692/download.* FDA will only place a bulk drug substance on the 503B Bulks List when it has determined there is a clinical need for outsourcing facilities to compound drug products using the bulk drug substance. If a clinical need to compound drug products using the bulk drug substance has not been demonstrated, based on the information submitted by the nominator and any other information considered by the Agency, FDA will not place a bulk drug substance on the 503B Bulks List.

FDA is evaluating bulk drug substances nominated for the 503B Bulks List on a rolling basis. FDA intends to evaluate and publish in the **Federal Register** its proposed and final determinations in groups of bulk drug substances until all nominated substances that were sufficiently supported have been evaluated and either placed on the 503B Bulks List or identified as bulk drug substances that were considered, but determined not to be appropriate for inclusion on the 503B Bulks List (Ref. 1).

B. Analysis of Substances Nominated for the List

As noted above, the 503B Bulks List includes bulk drug substances for which the Agency has determined there is a clinical need. The Agency is evaluating bulk drug substances that were nominated for inclusion on the 503B Bulks List, proceeding case by case, under the clinical need standard provided by the statute (Ref. 2).[13] In applying this standard to develop the proposals in this notice, FDA interprets the phrase ''bulk drug substances for which there is a clinical need'' to mean that the 503B Bulks List may include a bulk drug substance if: (1) there is a clinical need for an outsourcing facility to compound the drug product and (2) the drug product must be compounded using the bulk drug substance. FDA does not interpret supply issues, such as backorders, to be within the meaning of ''clinical need'' for compounding with a bulk drug substance. Section 503B of the FD&C Act separately provides for compounding from a bulk drug substance under the exemptions discussed above if the drug product compounded from the bulk drug substance is on the FDA drug shortage list at the time of compounding, distribution, and dispensing. Additionally, FDA does not consider convenience in administering a particular drug product (*e.g.,* a ready-to-use form) or the cost of the compounded drug product as compared with an FDA-approved drug product when assessing ''clinical need.''

All of the bulk drug substances that we are addressing in this notice are components of FDA-approved drug products,[14] and we therefore began our evaluation of the bulk drug substances by asking one or both, as applicable, of the following questions:

(1) Is there a basis to conclude, for each FDA-approved product that includes the nominated bulk drug substance, that: (a) an attribute of the FDA-approved drug product makes it medically unsuitable to treat certain patients for a condition that FDA has identified for evaluation and (b) the drug product proposed to be compounded is intended to address that attribute?

(2) Is there a basis to conclude that the drug product proposed to be compounded must be produced from a bulk drug substance rather than from an FDA-approved drug product?

The reason for question 1 is that unless an attribute of the FDA-approved drug is medically unsuitable for certain patients, and a drug product compounded using a bulk drug substance that is a component of the approved drug is intended to address that attribute, there is no clinical need to compound a drug product using that bulk drug substance. Rather, such compounding would unnecessarily expose patients to the risks associated with drug products that do not meet the standards applicable to FDA-approved drug products for safety, effectiveness, quality, and labeling and would undermine the drug approval process. The reason for question 2 is that to place a bulk drug substance on the 503B Bulks List, FDA must determine that there is a clinical need for outsourcing facilities to compound a drug product *using the bulk drug substance* rather than starting with an FDA-approved drug product. When it is feasible to compound a drug

[11] This is consistent with procedure set forth in section 503B(a)(2)(A)(i) of the FD&C Act. Although the statute only directs FDA to issue a **Federal Register** notice and seek public comment when it proposes to include bulk drug substances on the 503B Bulks List, we intend to seek comment when the Agency has evaluated a nominated substance and proposes either to include or not to include the substance on the list.

[12] Section 503B of the FD&C Act does not require FDA to consult the PCAC before developing a 503B Bulks List.

[13] On March 4, 2019, FDA announced the availability of a final guidance entitled ''Evaluation of Bulk Drug Substances Nominated for Use in Compounding Under Section 503B of the Federal Food, Drug, and Cosmetic Act'' (84 FR 7390); available at *https://www.fda.gov/media/121315/download.* This guidance describes FDA policies for developing the 503B Bulks List and the Agency's interpretation of the phrase ''bulk drug substances for which there is a clinical need'' as it is used in section 503B of the FD&C Act. The analysis under the statutory ''clinical need'' standard described in this notice is consistent with the approach described in FDA's guidance.

[14] Specifically, arginine HCl, etomidate, furosemide, lysine HCl, and rocuronium bromide.

product by starting with an approved drug product, there are certain benefits of doing so over starting with a bulk drug substance, including that approved drugs have undergone premarket review for safety, effectiveness, and quality, and are manufactured by a facility that is subject to premarket assessment, including site inspection, as well as routine post-approval risk-based inspections. In contrast, FDA does not conduct a premarket review of the quality standards, specifications, and controls for bulk drug substances used in compounding and does not conduct a premarket assessment of the manufacturer of the bulk drug substance.

If the answer to both of these questions is ''yes,'' there may be a clinical need for outsourcing facilities to compound using the bulk drug substance, and we would evaluate the substance further, applying the factors described below. If the answer to either of these questions is ''no,'' we generally would not include the bulk drug substance on the 503B Bulks List, because there would not be a basis to conclude that there may be a clinical need to compound drug products using the bulk drug substance instead of administering an approved drug or compounding starting with an approved drug product. FDA answered ''yes'' to both of the threshold questions for two of the bulk drug substances that are components of approved drug products that we are addressing in this notice. Accordingly, as explained further below, we proceeded further in our evaluation of these substances by conducting a balancing test and are proposing to include those substances on the 503B Bulks List.

We are conducting a balancing test using four factors. Specifically, on a substance-by-substance basis, we consider available data relevant to each factor in the context of the other factors and balance all four factors to determine whether the statutory ''clinical need'' standard has been met. The balancing test includes the following factors:

- The physical and chemical characterization of the substance;
- Any safety issues raised by the use of the substance in compounding;
- The available evidence of effectiveness or lack of effectiveness of a drug product compounded with the substance, if any such evidence exists; and
- Current and historical use of the substance in compounded drug products, including information about the medical condition(s) that the substance has been used to treat and any references in peer-reviewed medical literature.

The discussion below reflects FDA's consideration of these four factors where they are applicable and describes how they were applied to develop FDA's proposal to include three entries addressing two bulk drug substances on the 503B Bulks List.

In this notice, FDA evaluated certain nominated bulk drug substances for potential inclusion on the 503B Bulks List either alone or in combination with other bulk drug substances. FDA will not consider comments raising different combinations of bulk drug substances than those evaluated by FDA in this notice to be within the scope of this notice. New nominations may be submitted to docket FDA–2015–N–3469 for combinations of bulk drug substances that were not previously nominated and included for evaluation in this notice. The docket is available on *https://www.regulations.gov.*

To assess whether there is a clinical need for outsourcing facilities to use a bulk drug substance in compounding, FDA must evaluate the drug products that have been proposed to be made from the nominated bulk drug substances. Therefore, FDA's evaluation of a bulk drug substance includes detailed consideration of the drug products that are proposed to be compounded, including the conditions justifying clinical need under the applicable statutory standard. Comments on FDA's preliminary evaluation of a bulk drug substance should include adequate support for the commenter's position. For example, a commenter writing to support inclusion of a nominated bulk drug substance on the 503B Bulks List should include sufficient information to permit a meaningful clinical need evaluation by FDA of the proposed product. Commenters writing in favor of or in opposition to a proposal to include or not to include an entry on the 503B Bulks List should address, for each proposed compounded drug product, the factors FDA evaluated in making its proposal.[15] After FDA publishes a **Federal Register** notice making a final determination regarding whether a bulk drug substance will be placed on the 503B Bulks List, FDA will no longer consider comments submitted to the docket regarding that bulk drug substance, but interested parties may submit a citizen petition to FDA requesting specific action or relief (see 21 CFR 10.30).

C. Inclusion of Bulk Drug Substances on the 503B Bulks List

In preparing its proposal to include two bulk drug substances on the 503B Bulks List, FDA considered whether the clinical need for the bulk drug substance in the proposed compounded drug product is limited by, for example, route of administration or dosage form. As appropriate, and as explained further below, the Agency has tailored its proposed entries on the 503B Bulks List to reflect its findings related to clinical need for the bulk substances proposed for inclusion on the list. FDA requested comments on the proposal to limit listings in this manner in our **Federal Register** notice of July 31, 2020 (85 FR 46126). The comment period for the July 2020 notice was reopened for 30 days on January 8, 2021 (86 FR 1515), to provide interested parties an additional opportunity to comment before FDA began to develop its final determinations. After considering the comments submitted regarding the proposal, in the **Federal Register** notice of January 27, 2022 (87 FR 4240), FDA listed three bulk drug substances to compound drug products for topical use only.

Consistent with the approach described in the 2020 notice, and as reflected in the entries that appear on the 503B Bulks List to date, the entries proposed in this notice would authorize use of two bulk drug substances. Arginine HCl would be authorized for use to compound single-ingredient drug products for oral use only; lysine HCl would be authorized for use to compound single-ingredient drug products for oral use; and lysine HCl would also be authorized for use in combination with FDA-approved, single-ingredient arginine HCl injection, U.S. Pharmacoepia (USP) to compound drug products for intravenous (IV) use only.[16] As discussed further in this notice, FDA's proposals with respect to inclusion of lysine HCl and arginine HCl on the 503B Bulks List pertain to the L- forms of lysine HCl and arginine HCl exclusively.[17]

III. Substances Considered and Proposed for Inclusion on the 503B Bulks List

Because the substances in this section are components of FDA-approved drug products, we considered whether: (1)

[15] See also FDA's guidance for industry, ''Evaluation of Bulk Drug Substances Nominated for Use in Compounding Under Section 503B of the Federal Food, Drug, and Cosmetic Act'' (March 2019), and our **Federal Register** notice of October 27, 2015.

[16] In this notice, ''single-ingredient'' refers to a drug product containing one active ingredient. The drug product may also contain excipients.

[17] See footnote 18 below.

there is a basis to conclude that an attribute of each FDA-approved drug product that includes the nominated bulk drug substance makes each one medically unsuitable to treat certain patients for a condition that FDA has identified for evaluation, and the drug products proposed to be compounded are intended to address that attribute in each FDA-approved drug product and (2) whether the drug products proposed to be compounded must be compounded using a bulk drug substance. In addition, because we answered these two questions in the affirmative for certain drug products proposed to be compounded from the nominated bulk drug substances, we applied the four-factor balancing test described above. The bulk drug substances that were evaluated and that FDA is proposing to place on the 503B Bulks List are arginine HCl for oral use only, lysine HCl for oral use only, and lysine HCl for use in combination with FDA-approved, arginine HCl injection for intravenous use only. The reasons for FDA's proposals are included below.

A. Arginine HCl

Arginine HCl was nominated as a bulk drug substance for the 503B Bulks List to compound drug products that are used for acute hyperammonemia in urea cycle disorders (UCDs) and refractory metabolic alkalosis, among other conditions.[18] [19] The proposed routes of administration are oral and intravenous, among others,[20] and the proposed dosage forms are an oral solution or suspension, capsule, powder for dispersion, and injectable, among others.[21] The nominators proposed a range of concentrations (12.5 to 40 percent) and 200 and 500 milligrams/milliliters (mg/mL). They also proposed strengths of 250 mg-500 mg unspecified oral dosage forms and 700 mg-750 mg oral capsules. This nominated bulk drug substance is a component of an FDA-approved drug product (NDA 016931). FDA has approved arginine HCl (R-Gene 10) as a 10 gram (GM)/100 mL (100 mg/mL; 10 percent) injection for intravenous administration [22] (Ref. 3).

Because arginine HCl is a component of an FDA-approved drug product, we considered whether: (1) there is a basis to conclude that an attribute of the FDA-approved drug product that contains arginine HCl makes it medically unsuitable to treat certain patients for a condition that FDA has identified for evaluation, and the arginine HCl drug product proposed to be compounded is intended to address that attribute in the FDA-approved drug product and (2) whether the drug product proposed to be compounded must be compounded using a bulk drug substance. In addition, because we answered these two questions in the affirmative for an oral arginine HCl compounded drug product, we also conducted a balancing test to further evaluate this bulk drug substance by considering and applying the four factors described above.

1. Suitability of FDA-Approved Drug Products

A nominator proposes that there is a clinical need for an oral, single-ingredient arginine HCl compounded drug product to treat patients with certain UCDs. The references submitted with the nomination describe the use of arginine HCl orally for long-term maintenance therapy in patients with UCDs. There is a basis to conclude that the FDA-approved drug product that contains only arginine HCl (R-Gene 10) is medically unsuitable to treat patients who require long-term oral maintenance therapy because the approved drug product is only available for intravenous administration and would not be suitable for the use proposed in the nomination, which would involve daily oral administration.[23] The drug product proposed to be compounded is intended to address the attribute of the approved drug product that makes it medically unsuitable for some patients because the nominator proposes to compound oral formulations (capsules, powder for dispersion, and oral solution/suspension) of arginine HCl. Accordingly, FDA finds that the drug product proposed to be compounded is intended to address the attribute of the approved drug product that makes it medically unsuitable for some patients.

A nominator also proposes that there is a clinical need for an intravenous single-ingredient arginine HCl

[18] See Docket No. FDA–2015–N–3469, document nos. FDA–2015–N–3469–0244, FDA–2015–N–3469–0169, FDA–2015–N–3469–0156-attachment 10, FDA–2015–N–3469–0202, and FDA–2015–N–3469–0320. The nomination in Docket No. FDA–2015–N–3469–0156-attachment 10 was for ''Arginine HCL'' and stated that the common name of the substance is ''L-arginine hydrochloride; D-arginine hydrochloride.'' However, the nominator also stated that the chemical grade of the bulk drug substance is USP. The USP monograph for arginine HCl does not include D-arginine HCl. Therefore, this review focuses on L-arginine HCl, not the mixture of D- and L-arginine HCl. Arginine HCl USP grade consists of L-arginine monohydrochloride. The nomination discussed in this **Federal Register** notice nominated L-arginine HCl USP grade. ''Arginine HCl'' and ''L-arginine HCl'' are used interchangeably throughout this **Federal Register** notice. L-arginine HCl and L-lysine HCl were also nominated (Docket No. FDA–2015–N–3469–0073-attachment 10) to be used in combination for intravenous administration with LUTATHERA (lutetium Lu 177 dotatate injection) treatment. That nomination is the subject of another evaluation.

[19] The following uses will not be considered in this evaluation because the nominations did not provide sufficient information, including citations to relevant literature, supporting a clinical need for the proposed uses: thyroid cysts; arginine deficiency/supplementation; orgasmic dysfunction in women; prevention or treatment of heart and circulatory disease; combat fatigue; stimulation of wound healing; boosting production of nitric oxide, relaxing blood vessels, and treating circulatory and other cardiovascular problems; and reducing waist circumference, visceral fat, weight, and body mass index. In addition, the following labeled uses will not be considered in this evaluation because the nominations did not provide sufficient information, including citations to relevant literature, supporting a clinical need for a more concentrated IV product or for a product to be administered via the oral or topical route of administration: diagnostic aid in conditions such as panhypopituitarism, pituitary dwarfism, chromophobe adenoma, postsurgical craniopharyngioma, hypophysectomy, pituitary trauma, acromegaly, gigantism, and problems of growth and stature.

[20] The topical and IV routes of administration for use of arginine HCl to treat hyperammonemia associated with urea cycle disorder will not be considered further because the nominations did not provide sufficient evidence to support a clinical need for drug products with these routes of administration. Although some of the nominations included articles that describe the use of intravenous arginine HCl for treating patients with hyperammonemia in urea cycle disorder, the articles do not provide support for the nominator's proposal to make a more concentrated product than the approved IV drug product containing the same active ingredient. Therefore, the IV route of administration will not be considered further for treating hyperammonemia in urea cycle disorder because the nominations did not provide information supporting a clinical need for a more concentrated product. Similarly, the oral route of administration will not be considered further for the use of arginine HCl to treat refractory metabolic alkalosis because the nomination did not provide any evidence to support a clinical need for drug products with this route of administration. As explained in section II.B of this notice, if a member of the public would like FDA to evaluate arginine HCl based on a clinical need for a drug product to be compounded containing arginine HCl for administration by a route that was not evaluated in this notice, then that person should submit a nomination to Docket No. FDA–2015–N–3469, which is available on *https://www.regulations.gov.*

[21] The proposed dosage forms (cream, ointment, and gel) are associated with uses or routes of administration that will not be considered in this evaluation.

[22] See, *e.g.,* NDA 016931 labeling available as of the date of this notice at *https://www.accessdata.fda.gov/drugsatfda_docs/label/2010/016931s031lbl.pdf.* Arginine (not HCl salt) is available as a component of several approved drug products that contain multiple amino acids (*e.g.,* for parenteral nutrition) (*e.g.,* AMINOSYN II; NDA 020015). NDA 020015 labeling is available as of the date of this notice at *https://dailymed.nlm.nih.gov/dailymed/fda/fdaDrugXsl.cfm?setid=5b426208-f090-4650-86c3-89040ba45c2d&type=display.* The arginine in these approved drug products is not the same bulk drug substance as arginine HCl, which is the subject of this evaluation.

[23] Empower Pharmacy proposed to make several different dosage forms, including ''oral capsules, powder for dispersion, oral solutions/suspensions.'' We are not commenting on the potential suitability of these various proposed dosage forms due to the lack of data available on the various dosage forms. Furthermore, none of the scientific literature reviewed by FDA referred to off-label use of the approved intravenous arginine HCL drug product in patients with urea cycle disorder.

compounded drug product to treat patients with refractory metabolic alkalosis. The nomination does not identify an attribute of the FDA-approved arginine HCl (R-Gene 10) 10 GM/100 mL (100 mg/mL; 10 percent) injection for intravenous administration that makes it medically unsuitable for certain patients or indicate that the compounded drug product is intended to address any such attribute. FDA finds no basis to conclude that an attribute of the FDA-approved product makes it medically unsuitable to treat certain patients for a condition that FDA has identified for evaluation and that a proposed compounded product is intended to address.

2. Whether the Drug Product Must Be Compounded From a Bulk Drug Substance

FDA finds that there is a basis to conclude that the oral drug products proposed to be compounded must be made from a bulk drug substance rather than from FDA-approved R-Gene 10 because of the difficulties and complexities associated with starting with the approved solution for intravenous administration and converting it either to capsules or to a powder for dispersion that would be administered orally. The nominator also proposed to compound an oral solution of arginine HCl that is at a higher concentration than the approved intravenous product (100 mg/mL). There is a basis to conclude that the proposed oral liquid drug product must also be compounded starting from the bulk drug substance because of the difficulties and complexities associated with compounding a more concentrated solution beginning with the approved product.

With regard to an intravenous, single-ingredient arginine HCl compounded drug product proposed to treat patients with refractory metabolic alkalosis, the nominator has not identified patients for whom the approved products are medically unsuitable or identified an attribute of the approved drug product that the proposed compounded drug product is intended to address. Because the nominations do not identify specific differences between drug products that would be compounded using arginine HCl and the approved drug product containing arginine HCl, there is nothing for FDA to evaluate under question 2 for intravenous single-ingredient arginine HCl.

3. Balancing Test

Because FDA answered ''yes'' to both of the threshold questions for arginine HCl for oral administration, we next conducted the following balancing testing to determine whether the statutory ''clinical need'' standard has been met. We considered data and information regarding the physical and chemical characterization of arginine HCl, safety issues raised by use of this substance in compounding, available evidence of effectiveness or lack of effectiveness, and historical and current use in compounding.

Arginine HCl is a well-characterized amino acid and is stable under ordinary storage conditions. Provided the quality of arginine HCl meets the standards in its USP drug substance monograph, arginine HCl is well characterized physically and chemically.[24]

Oral administration of arginine HCl does not raise serious safety issues. The available literature and general clinical practice guidelines for the treatment of UCDs indicate that the oral formulation of arginine HCl may be effective in treating UCDs. There is evidence of the historical and current use of arginine HCl in compounding as an oral formulation for the treatment of UCDs (except those with arginase deficiency) in the United States, Belgium, and the United Kingdom. There are no FDA-approved oral arginine HCl drug products in the United States.

Arginine HCl is a well-characterized amino acid, does not raise serious safety concerns, may be effective in treating UCDs, and there is evidence of historical and current use of arginine HCl in compounding. Therefore, on balance, the physical and chemical characterization, safety, effectiveness, and historical and current use of arginine HCl for oral use weigh in favor of including this substance on the 503B Bulks List. Accordingly, we propose adding arginine HCl to the 503B Bulks List for oral use only.

B. Lysine HCl

Lysine HCl was nominated as a bulk drug substance for the 503B Bulks List to compound drug products that are used to correct lysine deficiency with lysinuric protein intolerance (LPI) and for prophylaxis and acute treatment of herpes simplex outbreak, among other conditions.[25] [26] The proposed route of administration is oral, among others; the proposed dosage forms are capsules and solutions, among others.[27] The nominations proposed a strength range of 100 to 500 mg. This nominated bulk drug substance is a component of many approved drug products as part of a combination with multiple other amino acids for intravenous administration (*e.g.,* NDA 018931).[28] Lysine HCl is not approved as a single-ingredient drug product in any dosage form (Ref. 4).

Because lysine HCl is a component of FDA-approved drug products, we considered whether: (1) there is a basis to conclude that an attribute of each FDA-approved drug product that contains lysine HCl makes each one medically unsuitable to treat certain patients for a condition that FDA has identified for evaluation, and the lysine HCl drug product proposed to be

[24] See section 503B(a)(2)(B) of the FD&C Act.

[25] See Docket No. FDA–2015–N–3469, document nos. FDA–2015–N–3469–0200 and FDA–2015–N–3469–0245. All of the nominations included in this evaluation nominated lysine HCl USP grade. Lysine HCl USP grade consists of L-lysine hydrochloride. A nominator submitted duplicate nominations for L-lysine HCl to the docket: FDA–2015–N–3469–0199 (submitted on August 31, 2018) and FDA–2015–N–3469–0200 (submitted on September 4, 2018). For the purposes of this evaluation, FDA referred to the information in the most recent nomination submitted to the docket (FDA–2015–N–3469–0200). On February 26, 2021, this nominator provided additional information regarding their nomination for lysine HCl to the University of Maryland Center of Excellence in Regulatory Science and Innovation (M–CERSI). The updated information is also considered in this evaluation. Another nominator nominated ''L-lysine;'' M–CERSI clarified with this nominator that they intended to nominate L-lysine HCl. L-arginine HCl and L-lysine HCl were also nominated by a different nominator (FDA–2015–N–3469–0074) to be used in combination for intravenous administration with LUTATHERA (lutetium Lu 177 dotatate injection) treatment, which is the subject of another evaluation.

[26] The following uses will not be considered in this evaluation because the nominations did not provide any information, including citations to relevant literature, supporting a clinical need for the proposed use: correcting lysine deficiency without LPI, rehydration and immune support, osteoporosis, muscle recovery, prevention of mucositis. The use of lysine HCl during peptide receptor radionuclide therapy to reduce the radiation dose to the kidneys is discussed in a separate evaluation. In the updated nomination information provided to M–CERSI, a nominator proposed an additional use of ''rehydration and immune support'' as an intramuscular injection.

[27] The proposed topical, intravenous, and intramuscular routes of administration will not be considered in this evaluation because the nominations do not provide any evidence to support a clinical need for drug products with these routes of administration for use of lysine HCL to correct lysine deficiency with LPI or for the use of lysine HCL for prophylaxis and acute treatment of herpes simplex outbreak. Accordingly, the proposed dosage forms associated with these routes of administration (cream, ointment, and solutions for injection) will not be considered in this evaluation. A nominator cited one article that studied the use of the topical product ''SuperLysinePlus+'' every 2 hours during waking hours in patients with symptoms of a cold sore consistent with a herpes simplex virus infection of ≤24 hours duration (Ref. 5). ''[L]ysine'' is included in ''SuperLysinePlus+'' as an inactive ingredient. Thus, this study does not provide evidence that there is a need for topical lysine HCl in patients with herpes simplex virus.

[28] See, *e.g.,* NDA 018931 labeling is available as of the date of this notice at *https://dailymed.nlm.nih.gov/dailymed/fda/fdaDrugXsl.cfm?setid=8543b5be-0f43-4891-9e56-d7c39fe839b5&type=display*.

compounded is intended to address that attribute in each FDA-approved drug product and (2) whether the drug product proposed to be compounded must be compounded using a bulk drug substance. In addition, because we answered these two questions in the affirmative for an oral lysine HCl compounded drug product, we also conducted a balancing test to further evaluate this bulk drug substance by considering and applying the four factors described above.

1. Suitability of FDA-Approved Drug Products

A nominator proposes that there is a clinical need for an oral, single-ingredient lysine HCl compounded drug product to treat patients with lysine deficiency with LPI and for prophylaxis and treatment of acute herpes simplex outbreak. We find there is a basis to conclude that the FDA-approved drug products that contain lysine HCl are medically unsuitable for the proposed uses. The approved drug products all contain lysine HCl in combination with multiple other amino acids and are for intravenous administration. The nominators did not provide, and FDA did not otherwise identify, evidence that these additional active ingredients are needed to treat the conditions proposed by the nominators. In addition, the approved products are only available for intravenous administration and would not be suitable for the uses proposed in the nominations, which would involve daily oral administration. Accordingly, FDA finds that the drug products proposed to be compounded, oral formulations of single-ingredient lysine HCl, are intended to address the attribute of the approved drugs that makes them medically unsuitable for some patients.

2. Whether the Drug Product Must Be Compounded From a Bulk Drug Substance

FDA finds that there is a basis to conclude that the oral drug products containing lysine as the single ingredient proposed to treat patients with lysine deficiency with LPI and for prophylaxis and treatment of acute herpes simplex outbreak must be produced from a bulk drug substance because of the difficulties and complexities associated with removing lysine HCl from the approved products, which are all multiple amino acid solutions.

3. Balancing Test

Because FDA answered ''yes'' to both of the threshold questions for lysine HCl, we next conducted the following balancing testing to determine whether the statutory ''clinical need'' standard has been met. We considered data and information regarding the physical and chemical characterization of lysine HCl, safety issues raised by use of this substance in compounding, available evidence of effectiveness or lack of effectiveness, and historical and current use in compounding.

Lysine HCl is well-characterized chemically and physically and is expected to be stable under ordinary storage conditions. Provided the quality of lysine HCl meets the standards in its USP drug substance monograph, lysine HCl is well characterized physically and chemically.[29]

The available data do not provide evidence to support the effectiveness of oral lysine in the prophylaxis or treatment of herpes simplex, and a number of FDA-approved therapies are available for acute treatment and prophylaxis of herpes simplex. Oral lysine is also nominated for use in LPI, an extremely rare disease, the exact prevalence of which in the United States is unknown. Oral lysine is used in the treatment of LPI patients in small doses established and prescribed on a per patient basis to avoid gastrointestinal intolerance. Published data show that oral lysine normalizes plasma concentration of lysine in patients with LPI. While the long-term results are inconclusive as to whether chronic supplementation or intermittent supplementation is consistently helpful (or needed), they do suggest a positive impact on growth in some patients. In addition, there are no FDA-approved products indicated for the treatment of LPI and no FDA-approved, single-ingredient lysine drug products for lysine supplementation. Oral use of lysine HCl does not raise serious safety issues. The most commonly reported adverse events of abdominal pain and diarrhea are associated with high doses of lysine HCl and are usually prevented by titrating the dose to a lower acceptable level. There is evidence regarding the current and historical use of lysine HCl in pharmacy compounding, commonly in an injectable dosage form, within the United States. We found no evidence of current or historical use of a compounded lysine HCl product for oral administration.

Lysine HCl is well-characterized chemically; does not raise serious safety issues; and although the data do not support the effectiveness of lysine HCl in the prophylaxis or treatment of herpes simplex, published data show that oral lysine normalizes plasma concentration of lysine in patients with LPI. There is evidence of historical and current use of lysine HCl in compounding. Therefore, on balance, the physical and chemical characterization, safety, effectiveness, and historical and current use of lysine HCl weigh in favor of including this substance for oral use on the 503B Bulks List. Accordingly, we propose adding lysine HCl to the 503B Bulks List for oral use only.

C. Lysine HCl as a Single Ingredient and in Combination With Single-Ingredient Arginine HCl

Lysine HCl was also nominated for the 503B Bulks List both as a single-ingredient and in combination with arginine HCl.[30] [31] Lysine HCl was nominated to compound single-ingredient drug products that are used for reduction of radiolabeled peptides during peptide receptor radionuclide therapy (PRRT).[32] Lysine HCl in combination with arginine HCl was nominated for post-LUTATHERA [33] treatment. LUTATHERA is indicated to treat somatostatin receptor-positive gastroenteropancreatic neuroendocrine tumors, including foregut, midgut, and hindgut neuroendocrine tumors in adults. The proposed route of administration for lysine HCl used in a compounded drug product in combination with arginine HCl, is intravenous and the proposed dosage form is injection. For lysine HCl as a

[29] See section 503B(a)(2)(B) of the FD&C Act.

[30] See Docket No. FDA–2015–N–3469, document nos. FDA–2015–N–3469–0073 attachment 10, FDA–2015–N–3469–0074 attachment 4, and FDA–2015–N–3469–0245. A nominator nominated ''L-lysine.'' M–CERSI clarified with the nominator that they intended to nominate L-lysine HCl. L-arginine HCl as a single ingredient product was nominated by other parties for different uses and in different formulations. Those nominations are the subject of another evaluation. In addition, L-lysine HCl was nominated as a single ingredient product for the following uses: to correct lysine deficiency with or without lysinuric protein intolerance, prophylaxis and treatment of herpes simplex outbreak, osteoporosis, muscle recovery, and prevention of mucositis. These nominated uses are the subject of another evaluation.

[31] Lysine HCl USP grade consists of L-lysine hydrochloride. All the nominations discussed in this **Federal Register** notice nominated lysine HCl USP grade. ''lysine HCl'' and ''L-lysine HCl'' are used interchangeably throughout this **Federal Register** notice. Arginine HCl USP grade consists of L-arginine monohydrochloride. The nomination discussed in this **Federal Register** notice nominated L-arginine HCl USP grade. ''Arginine HCl'' and ''L-arginine HCl'' are used interchangeably throughout this **Federal Register** notice.

[32] FDA interprets the nominator's proposed use to be to reduce the radiation dose to the kidneys during PRRT.

[33] Lutetium Lu-177 dotatate (LUTATHERA) was approved by FDA on January 26, 2018. It is a PRRT used to treat patients with neuroendocrine tumors.

single-ingredient drug product, the proposed route of administration is intravenous, among others, and the proposed dosage form is injection.[34] The nominations proposed a strength range of 25 to 100 mg/mL. The nominated bulk drug substances arginine HCl [35] and lysine HCl [36] are components of FDA-approved drug products labeled for intravenous administration. Lysine HCl is not a component of any single-ingredient, approved drug product in any dosage form, but arginine HCl is a component of one single-ingredient, approved drug product for intravenous administration (Ref. 6).

Because lysine HCl and arginine HCl are components of FDA-approved drug products, we considered whether: (1) there is a basis to conclude that an attribute of each FDA-approved drug product that contains lysine HCl or arginine HCl makes each one medically unsuitable to treat certain patients for a condition that FDA has identified for evaluation, and the lysine HCl and arginine HCl drug products proposed to be compounded are intended to address that attribute in each FDA-approved drug product and (2) whether the drug product proposed to be compounded must be compounded using a bulk drug substance. In addition, because we answered these two questions in the affirmative for lysine HCl for the intravenous route of administration, we also conducted a balancing test to further evaluate both the proposed lysine HCl single-ingredient product and the use of lysine HCl to compound a drug product containing both lysine HCl and FDA-approved arginine HCl by considering and applying the four factors described above.

1. Suitability of FDA-Approved Drug Products

A nominator proposes that there is a clinical need for an intravenous product containing a unique combination of lysine HCl and arginine HCl to be used in patients receiving LUTATHERA treatment.[37] According to the LUTATHERA labeling, a dual combination of arginine HCl and lysine HCl is recommended for renal protection during LUTATHERA treatment.[38] FDA-approved drug products that contain lysine HCl are medically unsuitable for the proposed use for patients. Although approved drug products that contain lysine HCl in combination with multiple other amino acids are used off-label for this indication, the nominators did not provide, and FDA did not otherwise identify, evidence that these additional active ingredients are needed for radiation protection. Furthermore, there is evidence that suggests that combination L-lysine HCl/L-arginine HCl compounded intravenous infusions produce less nausea in patients receiving them for this indication than the FDA-approved amino acid solutions, and therefore would lead to fewer episodes of vomiting. The FDA-approved product containing arginine HCl, R-Gene 10 10 GM/100 mL injection for intravenous administration, is medically unsuitable for patients receiving LUTATHERA treatment because LUTATHERA's labeling recommends administering an amino acid solution containing L-lysine and L-arginine before administering LUTATHERA, rather than administering arginine HCl as a single-ingredient.

The drug product proposed to be compounded is intended to address the attributes of the approved drugs that make them medically unsuitable for some patients because the nominator proposes to compound an intravenous formulation containing both lysine HCl and arginine HCl without additional active ingredients.

A nominator also proposes that there is a clinical need for an intravenous product containing lysine HCl as a single ingredient (*i.e.,* not in combination with arginine-HCl) to reduce radiolabeled peptides during PRRT. The FDA-approved drug products that contain lysine HCl all contain lysine HCl in combination with multiple other amino acids. The FDA-approved drug products that contain lysine HCl are medically unsuitable for the proposed use for some patients. Although FDA-approved drug products that contain lysine HCl in combination with multiple other amino acids are used off-label for this indication, the nominators did not provide, and FDA did not otherwise identify, evidence that these additional active ingredients are needed for radiation protection.

The drug product proposed to be compounded is intended to address the attribute of the approved drug that makes it medically unsuitable for some patients because the nominator proposes to compound an intravenous product containing lysine HCl as the single ingredient, without the other amino acids that are present in the approved drug product.

2. Whether the Drug Product Must Be Compounded From a Bulk Drug Substance

In order to compound the proposed drug product containing a combination of lysine HCl and arginine HCl, FDA has a basis to conclude that lysine HCl must be compounded from bulk drug substance rather than from the FDA-approved drug products. The bulk drug substance lysine HCl must be used because of the difficulties and complexities associated with removing lysine HCl from the approved drug products that contain multiple other amino acids (*e.g.,* TRAVASOL).[39]

FDA does not have a basis to conclude that, in order to compound the proposed drug product, arginine HCl must be compounded from a bulk drug substance rather than from the FDA-approved drug product. There is one FDA-approved drug product containing arginine HCl as the single ingredient (R-Gene 10). R-Gene 10 is a solution of 10 g/100 mL of arginine HCl, USP in water for injection, USP. We do not anticipate compatibility or stability issues if this approved drug product is used as the starting material to be combined with the bulk drug substance lysine HCl to produce a combined solution of lysine HCl and arginine HCl at the concentration proposed in the nomination. The pH of the compounded drug product must be adjusted to the target pH irrespective of the source of arginine HCl (R-Gene 10 or bulk drug substance). In addition, the desired osmolarity of <1050 mOsmol is attainable irrespective of the source of arginine (R-Gene 10 or bulk drug substance) used for compounding the

[34] The oral and topical routes of administration will not be considered in this evaluation because the nomination does not provide any evidence to support FDA's evaluation of these routes of administration for use of lysine HCl to reduce the radiation dose to the kidneys during PRRT.

[35] See NDA 016931 labeling is available as of the date of this notice at *https://www.accessdata.fda.gov/drugsatfda_docs/label/2010/016931s031lbl.pdf.*

[36] See, *e.g.,* NDA 018931 labeling is available as of the date of this notice at *https://www.accessdata.fda.gov/drugsatfda_docs/label/2020/018931s055,020849s025lbl.pdf.* TRAVASOL contains essential (including lysine as the HCl salt) and nonessential amino acids (including arginine base, not HCl salt).

[37] In addition, a letter from the Society of Nuclear Medicine and Molecular Imaging (SNMMI) provided support for the proposed compounded drug product, stating that ''patients receiving lysine and arginine solution suffered from much less vomiting incidents in comparison with patients infused with commercial solutions'' and ''lysine and arginine solution is also more effective in inhibiting renal uptake of radioactivity during peptide receptor radionuclide therapy.'' (Ref. 7).

[38] See NDA 208700 labeling is available as of the date of this notice at *https://www.accessdata.fda.gov/drugsatfda_docs/label/2018/208700s000lbl.pdf.*

[39] See, *e.g.,* NDA 018931 labeling available as of the date of this notice at *https://www.accessdata.fda.gov/drugsatfda_docs/label/2020/018931s055,020849s025lbl.pdf.*

lysine HCl and arginine HCl drug product for injection. The nomination does not provide any support for the proposition that the proposed product must be compounded from a bulk drug substance rather than by starting with the FDA-approved drug product R-Gene 10. Because the nomination does not provide support for the proposition that the arginine HCl component of the drug product must be compounded from a bulk drug substance rather than by starting with the FDA-approved drug product R-Gene 10, as explained further below, FDA is proposing not to add arginine HCl to the 503B Bulks List for use in combination with lysine HCl (bulk drug substance).

For the same reason that there is a basis to conclude that lysine HCl for combination with arginine HCl must be compounded from a bulk drug substance, there is also a basis to conclude that lysine HCl as a single-ingredient compounded drug product for the intravenous route of administration must be produced from a bulk drug substance. As with the preceding analysis, this is because of the difficulties and complexities associated with removing lysine HCl from the approved multiple amino acid solutions.

3. Balancing Test

Because FDA answered ''yes'' to both of the threshold questions for lysine HCl as a single ingredient for reducing the radiation dose to the kidneys during PRRT and for use in combination with FDA-approved arginine HCl, we next conducted the following balancing test to determine whether the statutory ''clinical need'' standard has been met. We considered data and information regarding the physical and chemical characterization of lysine HCl as a single ingredient and in combination with arginine HCl, safety issues raised by use of these substances in compounding, available evidence of effectiveness or lack of effectiveness, and historical and current use in compounding.

Arginine HCl and lysine HCl are well characterized physically and chemically. Each of these amino acids has a USP drug substance monograph. In addition, lysine HCl and arginine HCl are stable under ordinary storage conditions. The FDA-approved arginine HCl drug product, R-Gene 10, is stable at room temperature. Therefore, provided the quality of lysine HCl meets the standards in its USP drug substance monograph and L-arginine HCl is used starting from the FDA-approved drug product, R-Gene 10, both these components are physically and chemically well characterized.

Safety risks associated with the combination of lysine HCl and arginine HCl for intravenous infusion are not such that they outweigh the benefits, and can be managed. The most common adverse events associated with its use are nausea and vomiting. Although there are hyperkalemia concerns associated with lysine HCl/arginine HCl infusion, this risk could be monitored and managed, if necessary. There is evidence of effectiveness of lysine HCl as a single ingredient during PRRT; however, lysine HCl as a single ingredient for intravenous administration is associated with a higher risk of and more severe hyperkalemia and a higher incidence of vomiting than the lysine HCl/arginine HCl combination for intravenous administration. There is evidence of effectiveness of combination lysine HCl and arginine HCl infusions for reducing the radiation dose to the kidneys during PRRT in the published literature and as described in the approved labeling of LUTATHERA. There is also evidence in the published literature that suggests that combination lysine HCl/arginine HCl compounded intravenous infusions produce less nausea than FDA-approved amino acid solutions when used to reduce the radiation dose to the kidneys during PRRT, and therefore would lead to fewer episodes of vomiting. There is current and historical evidence that lysine HCl and arginine HCl are used in combination to compound injectable drug products within the United States for nephroprotection during PRRT. There also appears to be current and historical evidence that lysine HCl and arginine HCl are used in combination to compound injectable drug products outside the United States.

On balance, consideration of the physical and chemical characterization, safety, effectiveness, and historical and current use weighs against lysine HCl as a single ingredient (bulk drug substance) for intravenous use, but weighs in favor of placement on the 503B Bulks List of lysine HCl (bulk drug substance) in combination with FDA-approved, single ingredient arginine HCl injection for intravenous use only. Accordingly, we propose adding lysine HCl for use in combination with FDA-approved, single-ingredient arginine HCl injection to the 503B Bulks List for intravenous use only. FDA encourages public comment on any particular considerations related to compounding a drug product using FDA-approved, single-ingredient arginine HCl injection in combination with lysine HCl (bulk drug substance).

4. Additional Comments

Due to the safety risks referred to above, if the lysine HCl in combination with FDA-approved, single-ingredient arginine HCl injection is placed on the 503B Bulks List, FDA intends to make safety information about the use of lysine HCl/arginine HCl available to prescribers, pharmacists, outsourcing facilities, and the public through information on FDA's website, in a safety guide, or through other mechanisms, as appropriate.

IV. Substances Evaluated and Not Proposed for Inclusion on the 503B Bulks List

The three bulk drug substances that have been evaluated and that FDA is proposing not to place on the list are as follows: etomidate, furosemide, and rocuronium bromide. The reasons for FDA's proposals are included below.[40]

Because the substances in this section are components of FDA-approved drug products, we considered, as applicable, one or both of the following questions: (1) is there a basis to conclude that an attribute of each FDA-approved drug product containing the bulk drug substance makes each one medically unsuitable to treat certain patients for a condition that FDA has identified for evaluation, and the drug product proposed to be compounded is intended to address that attribute and (2) is there a basis to conclude that the drug product proposed to be compounded must be compounded using a bulk drug substance.

A. Etomidate

Etomidate has been nominated for inclusion on the 503B Bulks List to compound drug products for the

[40] We note that furosemide injection currently appears on FDA's drug shortage list. Under section 503B(a)(2)(A)(ii of the FD&C Act), outsourcing facilities may compound using a bulk drug substance if the drug compounded from such bulk drug substance appears on FDA's drug shortage list at the time of compounding, distribution, and dispensing, provided all of the conditions in section 503B are met. See also FDA's Guidance for Industry, ''Interim Policy on Compounding Using Bulk Drug Substances Under Section 503B of the Federal Food, Drug, and Cosmetic Act,'' which describes an enforcement policy for compounding a drug product that appeared on FDA's drug shortage list using a bulk drug substance that is not on the 503B Bulks List provided certain conditions are met. We further note that both furosemide and rocuronium bromide appear on the list maintained by FDA of drugs used for hospitalized patients with COVID–19. FDA's Guidance for Industry, ''Temporary Policy for Compounding of Certain Drugs for Hospitalized Patients by Outsourcing Facilities During the COVID–19 Public Health Emergency'' describes an enforcement policy, subject to certain conditions, for compounding a drug product using a bulk drug substance that is not on the 503B Bulks List during the COVID public health emergency.

induction of general anesthesia and as an adjunct in maintenance of general anesthesia.[41] The proposed route of administration is intravenous, the proposed dosage form is a preservative-free solution, and the proposed concentration is 2 mg/mL. The nominations propose to compound a preservative-free solution. However, they fail to acknowledge that there is a preservative-free formulation of etomidate that is FDA-approved or explain why that formulation would be medically unsuitable for certain patients. The nominations state that etomidate might also be used to compound other drug products, but do not identify those products. The nominated bulk drug substance is a component of FDA-approved drug products (*e.g.,* NDA 018227). FDA-approved etomidate is available as a single dose, preservative-free 20 mg/10 mL (2 mg/mL) solution to be administered by intravenous injection.[42] [43]

1. Suitability of FDA-Approved Drug Product(s)

The nominations do not explain why an attribute of each of the FDA-approved single dose, preservative-free 2 mg/mL solution products for intravenous injection is medically unsuitable for certain patients or identify an attribute of the approved drug products that the proposed compounded drug product is intended to address. FDA finds no basis to conclude that an attribute of the FDA-approved products makes them medically unsuitable to treat certain patients for a condition that FDA has identified for evaluation and that a proposed compounded product is intended to address.

2. Whether the Drug Product Must Be Compounded From a Bulk Drug Substance

Because the nominations do not identify specific differences between drug products that would be compounded using etomidate and approved drug products containing etomidate, there is nothing for FDA to evaluate under question 2.

B. Furosemide

Furosemide has been nominated for inclusion on the 503B Bulks List to compound drug products that treat congestive heart failure, edema, renal failure, and hypertension, among other conditions.[44] The proposed routes of administration are intravenous and intramuscular, the proposed dosage forms are both a preservative-free and a preserved solution, and the proposed concentration is 10 mg/mL. The nominations propose to compound both preservative-free and preserved solutions. However, they fail to acknowledge that there is a preservative-free formulation of furosemide that is FDA-approved or explain why that formulation would be medically unsuitable for certain patients. The nominations state that furosemide might also be used to compound other drug products, but do not identify those products. The nominated bulk drug substance is a component of FDA-approved drug products (*e.g.,* ANDA 212174). FDA-approved furosemide is available as a preservative-free 40 mg per 4 mL (10 mg/mL) solution for intravenous or intramuscular administration.[45] [46] [47]

1. Suitability of FDA-Approved Drug Product(s)

The nominations do not explain why an attribute of each of the FDA-approved preservative-free 40 mg per 4 mL (10 mg/mL) solution products for intravenous or intramuscular administration is medically unsuitable for certain patients or identify an attribute of the approved drug products that the proposed compounded drug products are intended to address. For example, the nominations propose to compound a preserved solution because the available FDA-approved products are preservative-free, but the nominations do not identify specific data or information supporting the need for a preserved product. FDA finds no basis to conclude that an attribute of the FDA-approved products makes them medically unsuitable to treat certain patients for a condition that FDA has identified for evaluation and that a proposed compounded product is intended to address.

2. Whether the Drug Product Must Be Compounded From a Bulk Drug Substance

Because the nominations have not identified a population for whom the approved products would be medically unsuitable, FDA has not evaluated whether the proposed preserved drug products containing furosemide must be compounded from bulk drug substances rather than using the approved drug product.

C. Rocuronium Bromide

Rocuronium bromide has been nominated for inclusion on the 503B Bulks List to compound drug products that serve as an adjunct to general anesthesia to facilitate both rapid sequence and routine tracheal intubation and to provide skeletal muscle relaxation during surgery or mechanical ventilation.[48] The proposed route of administration is intravenous, the proposed dosage form is a preservative-free solution for injection, and the proposed concentration is 10 mg/mL. The nominations propose to compound a preservative-free solution. However, they fail to acknowledge that there is a preservative-free formulation of rocuronium bromide that is FDA-approved or explain why that formulation would be medically unsuitable for certain patients. The nominations state that rocuronium bromide might also be used to compound other drug products, but do not identify those products. The nominated bulk drug substance is a component of FDA-approved drug products (*e.g.,* ANDA 079195). FDA-approved rocuronium bromide is available as a preservative-free 10 mg/mL solution for intravenous administration.[49] [50]

1. Suitability of FDA-Approved Drug Product(s)

The nominations do not explain why an attribute of each of the FDA-approved 10 mg/mL preservative-free solution products is medically unsuitable for certain patients or

[41] See Docket No. FDA–2013–N–1524, document nos. FDA–2013–N–1524–2292 and FDA–2013–N–1524–2298.

[42] See, *e.g.,* NDA 018227 labeling available as of the date of this notice at *https://www.accessdata.fda.gov/spl/data/41253af6-deac-43de-9af3-3b727ea351d8/41253af6-deac-43de-9af3-3b727ea351d8.xml.*

[43] According to the label for NDA 018227, each mL contains etomidate, 2 mg, propylene glycol 35% v/v.

[44] See Docket No. FDA–2013–N–1524, document nos. FDA–2013–N–1524–2292 and FDA–2013–N–1524–2298.

[45] See, *e.g.,* ANDA 212174 labeling available as of the date of this notice at *https://www.accessdata.fda.gov/spl/data/421aa6d5-623b-4dc2-abd5-bb9e7765bf37/421aa6d5-623b-4dc2-abd5-bb9e7765bf37.xml.*

[46] Per the label for ANDA 212174, the solution is preservative-free and is intended for intravenous or intramuscular administration.

[47] Furosemide is also approved as an oral solution and as a tablet.

[48] See Docket No. FDA–2013–N–1524, document nos. FDA–2013–N–1524–2292 and FDA–2013–N–1524–2298.

[49] See, *e.g.,* ANDA 079195 labeling available as of the date of this notice at *https://www.accessdata.fda.gov/spl/data/e21db7bf-3cab-4000-94dd-15c6d2a213de/e21db7bf-3cab-4000-94dd-15c6d2a213de.xml.*

[50] Per the label for ANDA 079195 each mL contains 10 mg rocuronium bromide and 2 mg sodium acetate. The aqueous solution is adjusted to isotonicity with sodium chloride and to a pH of 4 with acetic acid and/or sodium hydroxide.

identify an attribute of the approved drug products that the proposed compounded drug product is intended to address. FDA finds no basis to conclude that an attribute of the FDA-approved products makes them medically unsuitable to treat certain patients for a condition that FDA has identified for evaluation and that a proposed compounded product is intended to address.

2. Whether the Drug Product Must Be Compounded from a Bulk Drug Substance

Because the nominations do not identify specific differences between drug products that would be compounded using rocuronium bromide and approved drug products containing rocuronium bromide, there is nothing for FDA to evaluate under question 2.

VI. Conclusion

For the reasons stated above, we tentatively conclude that there is a clinical need for outsourcing facilities to compound drug products using the bulk drug substances arginine HCl for oral use only, lysine HCl for oral use only, and lysine HCl in combination with FDA-approved single-ingredient arginine HCl for injection for intravenous use only. We therefore propose to include those bulk drug substances on the 503B Bulks List as described in this notice.

At this time, we find no basis to conclude that there is a clinical need for outsourcing facilities to compound drug products using the bulk drug substances etomidate, furosemide, and rocuronium bromide. Therefore, we propose not to include these bulk drug substances on the 503B Bulks List.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2022–N–2796]

Bristol Myers Products Inc.; Proposal To Withdraw Approval of a New Drug Application for Bufferin (Aspirin) Tablets; Opportunity for a Hearing

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration's (FDA or Agency) Center for Drug Evaluation and Research (CDER) is proposing to withdraw approval of a new drug application (NDA) for Bufferin (aspirin) tablets, for which Bristol Myers Products Inc., 1350 Liberty Ave., Hillside, NJ 07205 is the last holder of record, and is announcing an opportunity for the holder of the NDA to request a hearing on this proposal. The basis for the proposal is that the holder of the NDA has repeatedly failed to file required annual reports for this NDA.

DATES: The holder of the NDA may submit a request for a hearing by December 23, 2022. Submit all data, information, and analyses upon which the request for a hearing relies by January 23, 2023. Submit electronic or written comments by January 23, 2023.

ADDRESSES: The request for a hearing may be submitted by the holder of the NDA by either of the following methods:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments to submit your request for a hearing. Comments submitted electronically to *https://www.regulations.gov,* including any attachments to the request for a hearing, will be posted to the docket unchanged.

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- Because your request for a hearing will be made public, you are solely responsible for ensuring that your request does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. The request for a hearing must include the Docket No. FDA–2022–N–2796 for ''Bristol Myers Products Inc.; Proposal To Withdraw Approval of a New Drug Application for Bufferin (Aspirin) Tablets; Opportunity for a Hearing.'' The request for a hearing will be placed in the docket and publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday. The holder of the NDA may submit all data and analyses upon which the request for a hearing relies in the same manner as the request for a hearing except as follows:
- Confidential Submissions—To submit any data analyses with confidential information that you do not wish to be made publicly available, submit your data and analyses only as a written/paper submission. You should submit two copies total of all data and analyses. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS

CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of any decisions on this matter. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov* or available at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday. Submit both copies to the Dockets Management Staff. Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law.

Comments Submitted by Other Interested Parties: For all comments submitted by other interested parties, submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2022–N–2796 for ''Bristol Myers Products Inc.; Proposal To Withdraw Approval of a New Drug Application for Bufferin (Aspirin) Tablets; Opportunity for a Hearing.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Jennifer Forde, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6228, Silver Spring, MD 20993–0002, 301–348–3035.

SUPPLEMENTARY INFORMATION: On June 30, 1948, NDA 006499 for Bufferin (aspirin) tablets became effective. The holder of NDA 006499 is currently identified in FDA's records as Bristol Myers Products Inc. The Agency has received conflicting information regarding the identity of the current NDA holder. However, to change the holder of record, information specified in § 314.72 (21 CFR 314.72) must be provided to the Agency. Since the time that the holder of record was identified as Bristol Myers Products Inc., the Agency has not received change of application ownership information that would satisfy the requirements of § 314.72. The Agency therefore is identifying Bristol Myers Products Inc. as the NDA holder of record in this **Federal Register** notice, but in the event that another entity holds NDA 006499, the Agency is also providing notice to that entity.

The holder of an approved NDA to market a new drug for human use is required to submit annual reports to FDA concerning its approved NDA under § 314.81 (21 CFR 314.81). The holder of NDA 006499 for Bufferin (aspirin) tablets has repeatedly failed to submit the required annual reports.

Therefore, notice is given to the holder of NDA 006499 and to all other interested persons that the Director of CDER proposes to issue an order, under section 505(e) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 355(e)), withdrawing approval of NDA 006499 and all amendments and supplements thereto on the grounds that the holder of the NDA has failed to submit reports required under § 314.81.

In accordance with section 505 of the FD&C Act and part 314 (21 CFR part 314), the holder of NDA 006499 is hereby provided an opportunity for a hearing to show why the approval of NDA 006499 should not be withdrawn and an opportunity to raise, for administrative determination, all issues relating to the legal status of the drug product covered by NDA 006499.

Withdrawal of the approval of NDA 006499 will not impact nonprescription aspirin products that are legally marketed without an approved application as over the counter (OTC) monograph drugs in accordance with section 505G of the FD&C Act (21 U.S.C 355h), including conforming to applicable conditions of use specified in OTC Monograph M013: Internal Analgesic, Antipyretic, and Antirheumatic Drug Products for Over-the-Counter Human Use (See OTC

Monographs@FDA web page available at *https://www.accessdata.fda.gov/scripts/cder/omuf/?event=reqOrders*). Based on information available to the Agency, it appears that the product covered by NDA 006499 has not been marketed for many years and another buffered aspirin drug product, using the same trade name ''Bufferin'' but with a different formulation, is currently being marketed as an OTC monograph drug. The marketing of this current ''Bufferin'' product is subject to the requirements for legal marketing of OTC monograph drugs under section 505G of the FD&C Act and will be unaffected by withdrawal of approval of NDA 006499.

To seek a hearing, the NDA holder must file the following: (1) a written notice of participation and request for a hearing (see **DATES** and **ADDRESSES**) and (2) the data, information, and analyses relied on to demonstrate that there is a genuine and substantial issue of fact that requires a hearing (see **DATES** and **ADDRESSES**). Any other interested person may also submit comments on this notice. The procedures and requirements governing this notice of opportunity for a hearing, notice of participation and request for a hearing, the information and analyses to justify a hearing, other comments, and a grant or denial of a hearing are contained in § 314.200 and in 21 CFR part 12.

The failure of the NDA holder to file a timely written notice of participation and request for a hearing, as required by § 314.200, constitutes an election by the NDA holder not to avail itself of the opportunity for a hearing concerning CDER's proposal to withdraw approval of the application and constitutes a waiver of any contentions concerning the legal status of the drug product. FDA will then withdraw approval of the application, and the drug product may not thereafter be lawfully introduced or delivered for introduction into interstate commerce. Any new drug product introduced or delivered for introduction into interstate commerce without an approved application is subject to regulatory action at any time.

A request for a hearing may not rest upon mere allegations or denials but must present specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If a request for a hearing is not complete or is not supported, the Commissioner of Food and Drugs will enter summary judgment against the person who requests the hearing, making findings and conclusions, and denying a hearing.

Paper submissions under this notice of opportunity for a hearing must be filed in two copies. Except for data and information prohibited from public disclosure under 21 U.S.C. 331(j) or 18 U.S.C. 1905, the submissions may be seen at the Dockets Management Staff (see **ADDRESSES**) between 9 a.m. and 4 p.m., Monday through Friday, and will be posted to the docket at *https://www.regulations.gov.*

This notice is issued under section 505(e) of the FD&C Act and under authority delegated to the Director of CDER by the Commissioner of Food and Drugs.

Dated: November 17, 2022.

Patrizia Cavazzoni,

Acting Director, Center for Drug Evaluation and Research.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2022–D–2922]

Compounding Certain Beta-Lactam Products in Shortage Under Section 503A of the Federal Food, Drug, and Cosmetic Act; Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA, Agency, or we) is announcing the availability of a final guidance for industry entitled ''Compounding Certain Beta-Lactam Products in Shortage Under Section 503A of the Federal Food, Drug, and Cosmetic Act.'' This guidance describes FDA's regulatory and enforcement priorities regarding preparation of beta-lactam oral antibiotic suspension products that appear on FDA's drug shortage list by a licensed pharmacist in a State-licensed pharmacy or Federal facility.

DATES: The announcement of the guidance is published in the **Federal Register** on November 23, 2022.

ADDRESSES: You may submit either electronic or written comments on Agency guidances at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2022–D–2922 for ''Compounding Certain Beta-Lactam Products in Shortage Under Section 503A of the Federal Food, Drug, and Cosmetic Act.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available

for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the guidance document.

FOR FURTHER INFORMATION CONTACT: Tracy Rupp, Office of Compounding Quality and Compliance, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Silver Spring, MD 20993, 301–796–3100.

SUPPLEMENTARY INFORMATION:

I. Background

We are announcing the availability of a guidance for industry entitled ''Compounding Certain Beta-Lactam Products in Shortage Under Section 503A of the Federal Food, Drug, and Cosmetic Act.'' This guidance is being implemented without prior public comment because FDA has determined that prior public participation for this guidance is not feasible or appropriate (see section 701(h)(1)(C) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 371(h)(1)(C)) and 21 CFR 10.115(g)(2)). This guidance document is being implemented immediately because of the public health need for amoxicillin oral antibiotic suspension products, but it remains subject to comment in accordance with the Agency's good guidance practices.

This guidance describes the Agency's regulatory and enforcement priorities regarding preparation of beta-lactam oral antibiotic suspension products that appear on FDA's drug shortage list by a licensed pharmacist in a State-licensed pharmacy or Federal facility. FDA has received a number of reports related to increased demand for amoxicillin oral antibiotic suspension products in particular. Amoxicillin oral antibiotic powder for suspension products currently appear on FDA's drug shortage list. FDA has also received requests for clarification about preparation of compounded versions of those products from FDA-approved tablets and capsules.

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on ''Compounding Certain Beta-Lactam Products in Shortage Under Section 503A of the FD&C Act.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

This guidance contains no collection of information. Therefore, clearance by the Office of Management and Budget under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521) is not required.

III. Electronic Access

Persons with access to the internet may obtain the document at *https://www.fda.gov/drugs/guidance-compliance-regulatory-information/guidances-drugs, https://www.fda.gov/regulatory-information/search-fda-guidance-documents,* or *https://www.regulations.gov.*

Dated: November 18, 2022.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4140–01–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID: FEMA–2022–0039; OMB No. 1660–0072]

Agency Information Collection Activities: Proposed Collection; Comment Request; FEMA Mitigation Grant Programs

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: 60-Day notice of revision and request for comments.

SUMMARY: The Federal Emergency Management Agency (FEMA), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on an extension, with change, of a currently approved information collection. In accordance with the Paperwork Reduction Act of 1995, this notice seeks comments concerning FEMA's Hazard Mitigation Assistance (HMA) financial and technical assistance programs; specifically, the Pre-Disaster Mitigation Program (PDM), the Building Resilient Infrastructure and Communities (BRIC) program, BRIC Direct Technical Assistance (DTA), and the Flood Mitigation Assistance (FMA) program.

DATES: Written comments must be received on or before January 23, 2023.

ADDRESSES: Submit comments at *www.regulations.gov* under Docket ID FEMA–2022–0039. Follow the instructions for submitting comments.

All submissions received must include the agency name and Docket ID. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to read the Privacy and Security Notice that is available via a link on the homepage of *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Jennie Orenstein, Branch Chief, Policy, Tools and Training Branch, Federal Insurance and Mitigation Administration, FEMA, at *jennie.gallardy@fema.dhs.gov* and 202–212–4071. You may contact the Records Management Division for copies of the proposed collection of information at *FEMA-Information-Collections-Management@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: This collection of information is necessary to implement grants for the FMA, PDM, and BRIC programs.

The FMA program is authorized pursuant to the National Flood Insurance Act of 1968, as amended (Pub. L. 90–448, 42 U.S.C. 4104c). FMA was created as part of the National Flood Insurance Reform Act (NFIRA) of 1994 (Pub. L. 103–325, 42 U.S.C. 4001). The Biggert-Waters Flood Insurance Reform Act of 2012 (BW–12), Pub. L. 112–141, 42 U.S.C. 4001) consolidated the Repetitive Flood Claims (RFC) and Severe Repetitive Loss grant (SRL) programs into FMA. Under FMA, cost-share requirements were changed to allow more Federal funds for properties with repetitive flood claims. The FMA program, under 44 CFR part 77 (October 1, 2021; previously under 44 CFR part 79), provides funding for measures taken to reduce or eliminate the long-

term risk of flood damage to buildings, manufactured homes, and other structures insured under the National Flood Insurance Program (NFIP). PDM was authorized under Section 203 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act), (Public Law 93–288, 42 U.S.C. 5133).

On August 4, 2020, FEMA established the BRIC program, implementing section 1234 of Disaster Recovery Reform Act (DRRA) (Pub. L. 93–288, 42 U.S.C. 5121 *et seq.*), which amended Section 203 of the Stafford Act (Pub. L. 93–288, 42 U.S.C. 5133). The BRIC program is designed to promote a national culture of preparedness and public safety through encouraging investments to protect our communities and infrastructure and through strengthening national mitigation capabilities to foster resilience. The BRIC program seeks to fund effective and innovative projects that will reduce risk, increase resilience, and serve as a catalyst to encourage the whole community to invest in and adopt policies related to mitigation.

The guiding principles of the BRIC program include (1) support State and local governments, Tribes, and territories through capability- and capacity-building to enable them to identify mitigation actions and implement projects that reduce risks posed by natural hazards; (2) encourage and enable innovation while allowing flexibility, consistency, and effectiveness; (3) promote partnerships and enable high-impact investments to reduce risk from natural hazards with a focus on critical services and facilities, public infrastructure, public safety, public health, and communities; (4) provide a significant opportunity to reduce future losses and minimize impacts on the Disaster Relief Fund; (5) promote equity, including by helping members of disadvantaged groups and prioritizing 40 percent of the benefits to disadvantaged communities as referenced in Executive Order (E.O.) 14008, *Tackling the Climate Crisis At Home and Abroad,* (86 FR 7619, Feb. 1, 2021) which describes the Administration's Justice40 Initiative; and (6) support the adoption and enforcement of building codes, standards, and policies that will protect the health, safety, and general welfare of the public, taking into account future conditions, prominently including the effects of climate change, and have long-lasting impacts on community risk reduction, including for critical services and facilities and for future disaster costs. The BRIC program distributes funds annually and applies a Federal/Non-Federal cost share. To increase transparency in decision-making while building capability and partnerships, FEMA convenes a National Review Panel to score subapplications based on qualitative evaluation criteria.

The BRIC program is authorized under section 203 of the Stafford Act to provide technical assistance for implementing predisaster hazard mitigation measures. BRIC implements this authority by providing non-financial DTA to eligible communities. The DTA initiative is specifically designed to assist economically disadvantaged rural communities, tribal entities, and Justice40 underserved communities. The Justice40 Initiative provides guidance on implementing environmental justice and equitable implementation of program resources. DTA delivers hazard mitigation assistance to communities who face resource barriers that prevent access to Hazard Mitigation grants and other Federal assistance grants.

In accordance with 2 CFR 200.203, FEMA requires all parties interested in receiving FEMA mitigation grants to submit an application package for grant assistance. Applications and subapplications for BRIC and FMA are submitted via FEMA GO. FEMA GO is the new system of record for grants for new grant applications beginning in Fiscal Year (FY) 2020.

The Mitigation (MT) eGrants system is used to manage FY 2022 FMA Swift Current grants, FMA annual grants awarded prior FY 2019 and Pre-Disaster Mitigation grant program offerings. The MT eGrants system is an intuitive, user-friendly, web-based application owned and operated by FIMA that allows eligible applicants and subapplicants to apply for grants and subgrants through the internet. MT eGrants is both an internal (FEMA-facing) system and an external facing system. The FEMA GO and MT eGrants systems were developed to meet the intent of the e-Government initiative, authorized by Federal Financial Assistance Management Improvement Act of 1999 (Pub. L. 106–107, 31 U.S.C. 6101). This initiative requires that all Government agencies both streamline grant application processes and provide for the means to electronically create, review, and submit a grant application via the internet.

Under 2 CFR part 200 (for BRIC and PDM) and 44 CFR 77.3 (FMA), Recipients must complete and submit progress report(s) to the FEMA Regional Administrator on a quarterly basis, certifying how the funds are being used and reporting on the progress of activities funded under the subrecipient awards made to the Recipient by FEMA. The Regional Administrator and Recipient negotiate the date for submission of the first report.

The Benefit Cost Determination is used to collect data to evaluate the proposed project's cost effectiveness. Mitigation projects must be cost effective to be eligible for Hazard Mitigation Assistance funding. Cost effectiveness is demonstrated through a FEMA-validated benefit cost analysis. The Environmental and Historic Preservation Review is used to collect information that is needed to ensure that a proposed project complies with applicable environmental and historic preservation regulations and laws. This information is collected to assure that adverse project impact is minimized according to the National Environmental Policy Act of 1969 (NEPA), as amended (Pub. L. 91–190, 42 U.S.C. 4321–4347); The Endangered Species Act of 1973 (ESA) (Pub. L. 93–205, 16 U.S.C. 1531); The National Historic Preservation Act of 1966 (Pub. L. 89–665, U.S.C. 16 U.S.C. 470); Executive Order (E.O.) 11988, *Floodplain Management,* (80 FR 6530, Feb. 5, 2015) regarding floodplains; and E.O. 11990 *Protection of Wetlands* (42 FR 26961, May 24, 1977) other applicable laws and executive orders. The Project Narrative—Subgrant Application process is used to collect the information necessary for FEMA to assess the financial needs of the applicants, as well as the projected benefits to be obtained from the use of grant funds for each of its mitigation grant programs. Quarterly Progress Reports describe the status of those projects on which a final payment of the Federal share has not been made to the Recipient and identify problems or circumstances expected to result in noncompliance with the approved award conditions.

Collection of Information

Title: FEMA Mitigation Grant Programs.

Type of Information Collection: Extension, with change, of a currently approved collection.

OMB Number: 1660–0072.

FEMA Forms: FEMA Form FF–206–FY–22–151, Quarterly Progress Report; FEMA Instruction FI–206–FY–22–102, Instructions to Recipients for Quarterly Progress Reports for FEMA's Building Resilient Infrastructure and Communities (BRIC), the Pre-Mitigation Disaster (PDM), and Flood Mitigation Assistance (FMA); FEMA Form FF–206–FY–22–155, BRIC DTA Request; FEMA Form FF–206–FY–22–158; Acknowledgement of Conditions For

Properties Using FEMA Hazard Mitigation Assistance Grant Funds; FEMA Form FF–206–FY–22–157, Model Deed Restriction; and FEMA Form FF–206–FY–22–156, Model Statement of Assurances for Property Acquisition Projects.

Abstract: The Federal Emergency Management Agency's (FEMA's) Flood Mitigation Assistance (FMA) and Building Resilient Infrastructure and Communities (BRIC) programs use an automated grant application and management system called FEMA GO. The Pre-Disaster Mitigation (PDM) program and the FMA program also uses an automated grant application and management system called Mitigation (MT) eGrants. The FEMA GO and MT eGrants systems include application information needed to apply for funding under these grant programs. FEMA uses the BRIC Panel Review Form to solicit volunteers from State, local, Tribal governments and Other Federal Agencies (OFA), to review applications that are routed to the qualitative panel reviews. The volunteers will review, and score applications based on a pre-determined scoring criteria. The PDM, FMA, and BRIC programs will use the same FEMA Form FF–206–FY–22–151 Quarterly Progress Report (QPR) Form.

Affected Public: State, local or Tribal governments.

Estimated Number of Respondents: 617.

Estimated Number of Responses: 17,249.

Estimated Total Annual Burden Hours: 97,858.

Estimated Total Annual Respondent Cost: $5,914,144.

Estimated Respondents' Operation and Maintenance Costs: $0.

Estimated Respondents' Capital and Start-Up Costs: $0.

Estimated Total Annual Cost to the Federal Government: $7,739,695.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Millicent Brown Wilson,

Records Management Branch Chief, Office of the Chief Administrative Officer, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

BILLING CODE 9111–BW–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2022–0040; OMB No. 1660–0076]

Agency Information Collection Activities: Submission for OMB Review; Comment Request; Hazard Mitigation Grant Program (HMGP) Application Reporting

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: 60 Day notice of revision and request for comments.

SUMMARY: The Federal Emergency Management Agency, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public to take this opportunity to comment on an extension, with change, of a currently approved information collection. In accordance with the Paperwork Reduction Act of 1995, this notice seeks comments regarding the requirements, grants management procedures, and implementation of grants awarded under the Hazard Mitigation Grant Program (HMGP), which is a post-disaster program that contributes funds toward the cost of hazard mitigation activities to reduce the risk of future damage, hardship, loss or suffering in any area affected by a major disaster.

DATES: Comments must be submitted on or before January 23, 2023.

ADDRESSES: To avoid duplicate submissions to the docket, please submit comments at *www.regulations.gov* under Docket ID FEMA–2022–0040. Follow the instructions for submitting comments.

FOR FURTHER INFORMATION CONTACT: Jennie Orenstein, Chief, HMA Grants Policy Branch, at (202) 212–4071 or *jennie.orenstein@fema.dhs.gov.* You may contact the Information Management Division for copies of the proposed collection of information at email address: *FEMA-Information-Collections-Management@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: Section 404 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5170c, authorizes the Hazard Mitigation Grant Program (HMGP). Program grant requirements and grants management procedures are outlined in 44 CFR part 206 subpart N, and 2 CFR parts 200 and 3002. The Federal Emergency Management Agency (FEMA) administers the HMGP, and Recipients implement the grants under the HMPG per grant agreement, rules, and regulations. The HMGP is a post-disaster program that contributes funds toward the cost of hazard mitigation activities to reduce the risk of future damage, hardship, loss or suffering in any area affected by a major disaster or any area affected by a fire for which assistance was provided under section 420 of the Stafford Act (42 U.S.C. 5187). Section 102 of the Stafford Act (42 U.S.C. 5122(4)) defines a ''state'' as any state of the United States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, and the commonwealth of the Northern Mariana Islands. ''Recipient'', as provided in 2 CFR 200, means a non-Federal entity that receives a Federal award directly from a Federal awarding agency to carry out an activity under a Federal program, or an Indian tribal government that chooses to act as a recipient rather than as a subrecipient. ''Subrecipient'' refers to a non-Federal entity that receives a subaward from a pass-through entity to carry out part of a Federal program; but does not include an individual that is a beneficiary of such program. A subrecipient may also be a recipient of other Federal awards directly from a Federal awarding agency. The term ''Indian tribal government'' is defined in Section 102 of the Stafford Act, 42 U.S.C. 5122(6), as the governing body of any Indian or Alaska Native tribe, band, nation, pueblo, village, or community that the Secretary of the Interior acknowledges to exist as an Indian tribe under the Federally Recognized Indian Tribe List Act of 1994. In addition, the Sandy Recovery Improvement Act of 2013 (Pub. L. 113–2, 42 U.S.C. 5170(b)) amended the Stafford Act to allow the Chief Executive of a federally recognized Indian tribe to make a direct request for a major disaster or emergency declaration to the President of the United States.

The Department of Homeland Security (DHS) adopted in its entirety the Uniform Administrative

Requirements, Cost Principles, and Audit Requirements for Federal Awards (2 CFR part 200) on December 26, 2014, at 2 CFR part 3002, (79 FR 75867, December 19, 2014). This rule eliminates overlapping and duplicative requirements for stakeholders, including states, territories and Indian tribal governments, by using general terms such as ''recipient'' and ''pass-through entity.''

The HMGP regulation describes the application process in 44 CFR 206.436. Information collected through the financial award application is the minimum information necessary for the financial award administration under the HMGP and includes the project narrative, analysis of the measure's cost-effectiveness referred to as the benefit-cost determination, and environmental review used in conjunction with OMB No. 1660–0025.

44 CFR 206.436(d) states: ''The State must submit all local HMGP applications and funding requests for the purpose of identifying new projects to the Regional Administrator within 12 months of the date of disaster declaration.'' Furthermore, Section 311 of the DHS Appropriations Act, 2022 (Pub. L. 117–103, 136 Stat. 331) states: ''beginning between January 1, 2020, and December 31, 2021, the Federal share of assistance, including direct Federal assistance, provided under such sections shall be not less than 90 percent of the eligible cost of such assistance.'' The legislation applies to all current FY 2022 HMGP local and Tribal sub applicants and significantly alters application and program financial management information collection requirements. The DHS Appropriations Act, 2022 does not provide additional funding for HMGP COVID–19 relief beyond the already established $3.46 billion.

Per 44 CFR 206.438(c), progress reports must be submitted by the HMGP Recipient to the Regional Administrator on a quarterly basis, certifying how the funds are being used and reporting on the progress of activities funded under the subrecipient awards made to the Recipient by FEMA. The Regional Administrator and Recipient negotiate the date for submission of the first report. Quarterly progress reports describe the status of those projects on which a final payment of the Federal share has not been made to the recipient, and outline any problems or circumstances expected to result in noncompliance with the approved award conditions.

The legislative changes are expected to trigger a significant increase in requests by local sub applicants who have not yet developed FY 2022 project applications. The requests will likely extend the application deadline beyond the standard 12-month deadline of August 5, 2022. Applications Period extension requests, authorized under 44 CFR 206.436(e), may add additional information collection burden.

The Foundations for Evidence-Based Policymaking Act of 2018 (Evidence Act) (Pub. L. 115–435, 5 U.S.C. 311–315) establishes evaluation using systematic data collection and analysis of programs, policies, and organizations intended to assess their effectiveness and efficiency as an essential program activity. Hazard Mitigation programs are currently revising information collections to simply data collection, reduce burden, coordinate data collection across programs, develop performance metrics, and meet goals and priorities as stipulated in the Evidence Act. Program implementation of the Evidence Act will necessitate changes to information collections. Additionally, the Build America, Buy America Act (BABAA) (Pub. L. 117–58, 70901–70927) and Executive Order (E.O.) 14008, *Tackling the Climate Crisis At Home and Abroad,* (86 FR 7619, February 1, 2021) establishes additional information collection requirements, goals and priorities.

Collection of Information

Title: Hazard Mitigation Grant Program (HMGP) Application and Reporting.

Type of Information Collection: Extension, with change, of a currently approved information collection.

OMB Number: OMB No. 1660–0076.

FEMA Forms: Project Narrative; Benefit-Cost Determination; Environmental Review; FEMA Form FF–206–FY–22–154 (formerly 009–0–111A), Quarterly Progress Reports.

Abstract: The Federal Emergency Management Agency (FEMA) administers the Hazard Mitigation Grant Program, which is a post-disaster program that contributes funds toward the cost of hazard mitigation activities to reduce the risk of future damage hardship, loss or suffering in any area affected by a major disaster. FEMA uses applications to provide financial assistance in the form of grant awards and, through grantee quarterly reporting, monitor grantee project activities and expenditure of funds.

Affected Public: State, local, or Tribal Government.

Estimated Number of Respondents: 236.

Estimated Number of Responses: 10,891

Estimated Total Annual Burden Hours: 100,280.

Estimated Total Annual Respondent Cost: $6,141,147.

Estimated Respondents' Operation and Maintenance Costs: $0.

Estimated Respondents' Capital and Start-Up Costs: $0.

Estimated Total Annual Cost to the Federal Government: $2,211,399

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Millicent Brown Wilson,

Records Management Branch Chief, Office of the Chief Administrative Officer, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

BILLING CODE 9111–BW–P

DEPARTMENT OF HOMELAND SECURITY

[Docket No. CISA–2022–0013]

Notice of President's National Infrastructure Advisory Council Meeting

AGENCY: Cybersecurity and Infrastructure Security Agency (CISA), Department of Homeland Security (DHS).

ACTION: Notice of Federal Advisory Committee Act (FACA) meeting; request for comments.

SUMMARY: CISA is publishing this notice to announce the following President's National Infrastructure Advisory Council (NIAC) meeting.

DATES: *Meeting Registration:* Registration is required to attend the meeting and must be received no later than 5 p.m. eastern time (ET) on

December 12, 2022. For more information on how to participate, please contact *NIAC@cisa.dhs.gov.*

Speaker Registration: Registration to speak during the meeting's public comment period must be received no later than 5 p.m. ET on December 12, 2022.

Written Comments: Written comments must be received no later than 5 p.m. ET on December 12, 2022.

Meeting Date: The NIAC will meet on December 16, 2022, from 1 p.m. to 2:45 p.m. ET. The meeting may close early if the council has completed its business.

ADDRESSES: The meeting will be held virtually and will be open to the public, per 41 CFR 102–3.150(a)(4). Requests to participate will be accepted and processed in the order in which they are received. For access to the meeting, information on services for individuals with disabilities, or to request special assistance, please email *NIAC@cisa.dhs.gov* by 5 p.m. ET on December 12, 2022. The NIAC is committed to ensuring all participants have equal access regardless of disability status. If you require a reasonable accommodation due to a disability to fully participate, please contact Erin McJeon at *NIAC@cisa.dhs.gov* as soon as possible.

Comments: The council will consider public comments on issues as listed in the **SUPPLEMENTARY INFORMATION** section below. Associated materials for potential discussions during the meeting will be available for review at *https://www.cisa.gov/niac* by December 8, 2022. Comments should be submitted by 5 p.m. ET on December 12, 2022 and must be identified by Docket Number CISA–2022–0013. Comments may be submitted by one of the following methods:

- *Federal eRulemaking Portal: www.regulations.gov.* Please follow the instructions for submitting written comments.
- *Email: NIAC@cisa.dhs.gov.* Include the Docket Number CISA–2022–0013 in the subject line of the email.

Instructions: All submissions received must include the words ''Department of Homeland Security'' and the Docket Number for this action. Comments received will be posted without alteration to *www.regulations.gov,* including any personal information provided. You may wish to read the Privacy & Security Notice which is available via a link on the homepage of *www.regulations.gov.*

Docket: For access to the docket and comments received by the National Infrastructure Advisory Council, please go to *www.regulations.gov* and enter docket number CISA–2022–0013.

A public comment period will take place from 2:30 p.m. to 2:40 p.m. Speakers who wish to participate in the public comment period must email *NIAC@cisa.dhs.gov* to register. Speakers should limit their comments to 3 minutes and will speak in order of registration. Please note that the public comment period may end before the time indicated, depending on the number of speakers who register to participate.

FOR FURTHER INFORMATION CONTACT: Erin McJeon, 202–819–6196, *NIAC@cisa.dhs.gov.*

SUPPLEMENTARY INFORMATION: The NIAC is established under section 10 of E.O. 13231 issued on October 16, 2001, continued and amended under the authority of E.O. 14048, dated September 30, 2021. Notice of this meeting is given under the Federal Advisory Committee Act (FACA), 5 U.S.C. appendix (Pub. L. 92–463). The NIAC provides the President, through the Secretary of Homeland Security, advice on the security and resilience of the Nation's critical infrastructure sectors.

Agenda: The National Infrastructure Advisory Council will meet virtually on Friday, December 16, 2022 from 1 p.m. to 2:45 p.m. ET to discuss critical infrastructure security and resilience and possible NIAC study topics. This meeting will include: (1) a period for public comment; (2) a keynote address on critical infrastructure security and resilience; and (3) a study topic discussion.

Dated: November 17, 2022.

Celinda E. Moening,

Alternate Designated Federal Officer, National Infrastructure Advisory Council, Cybersecurity and Infrastructure Security Agency, Department of Homeland Security.

BILLING CODE 9110–9P–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7050–N–59]

30-Day Notice of Proposed Information Collection: Comprehensive Transactional Forms Supporting FHA's Section 242 Mortgage Insurance Program for Hospitals; OMB Control No.: 2502–0602

AGENCY: Office of Policy Development and Research, Chief Data Officer, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for an additional 30 days of public comment.

DATES: *Comments Due Date:* December 23, 2022.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *OIRA_submission@omb.eop.gov* or *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email Colette Pollard at *Colette.Pollard@hud.gov* or telephone 202–402–3400. This is not a toll-free number. HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech and communication disabilities. To learn more about how to make an accessible telephone call, please visit *https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs.*

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

The **Federal Register** notice that solicited public comment on the information collection for a period of 60 days was published on April 26, 2022 at 87 FR 24574.

A. Overview of Information Collection

Title of Information Collection: Comprehensive Transactional Forms Supporting FHA's Section 242 Mortgage Insurance Program for Hospitals.

OMB Approval Number: 2502–0602.

OMB Expiration Date: November 30, 2022.

Type of Request: Revision of a currently approved collection.

Form Numbers: HUD–2510R, HUD–90032–OHF, HUD–90033–OHF, HUD–91070–OHF, HUD–91071–OHF, HUD–91073–OHF, HUD–91725–OHF, HUD–

Description of the Need for the Information and Proposed Use

This collection of information is required specifically for the application and administration of the Department of Housing and Urban Development, Federal Housing Administration Section 242 Hospital Mortgage Insurance Program pursuant to 24 CFR 242, 241, 223(f), and 223(a)(7). The collection is a comprehensive set of HUD documents that are critically needed for processing applications and loan endorsements for FHA mortgage insurance under the Section 242 Hospital Mortgage Insurance Program, for ongoing asset management of such facilities, and other information related to these facilities for loan modifications, construction projects, and physical and environmental reviews. This information is requested and is used by the Office of Healthcare Facilities (OHF) and Office of Architecture and Engineering (OAE) within FHA's Office of Healthcare Programs (OHP).

The purpose for which the information is being collected by HUD is to review Section 242 applications to determine the eligibility of applicant hospitals for FHA mortgage insurance, underwrite insured hospital loans, ensure that the collateral securing each loan is adequate, capture administrative data, process initial/final endorsement, and manage FHA's hospital portfolio. Additional information related to loan modifications, construction projects, and physical and environmental reviews is collected if applicable.

The information being collected consists of various HUD forms that program participants complete with project specifications, technical descriptions, details, and/or signatures that are utilized by HUD during various stages of the application, underwriting, commitment, closing, and asset management processes involved with the administration of FHA's Section 242 mortgage insurance program.

The information is used by HUD staff for internal review of applications to determine if projects qualify for Section 242 hospital mortgage insurance and to manage and monitor the application, commitment, initial/final endorsement, asset management, and administration processes needed to support hospital projects insured by FHA. Agreements and legal documents are used by HUD staff, lenders, borrowers, construction managers, and depository institutions, when applicable, to process initial/final endorsement of loans. Information reported for ongoing asset management of FHA-insured facilities will be used by HUD staff to monitor and manage risk within the FHA portfolio and ensure ongoing compliance with HUD Program Obligations. Information is also used by HUD staff to determine whether the Program meets its stated goals and management objectives. The information is collected from lenders/mortgage bankers, borrowers/hospital management officials, attorneys, general contractors/construction managers, architects/engineers, agents and others involved in hospital projects, which may, at times include local government entities and other third parties, as well as HUD staff to allow OHF to manage and monitor the application, commitment, initial/final endorsement, asset management, and administration processes needed to support hospital projects insured by FHA.

This collection is needed to update and renew the current collection that was approved for a 36-month period by OMB on November 12, 2019, with an expiration date of November 30, 2022.

Three new forms are being added to this collection that are listed in the table above: HUD–90032–OHF (Lender Narrative—Interest Rate Reduction), HUD–90033–OHF (Lender's Certification in Support of Request for IRR), and HUD–2510R (Release of Regulatory Agreement). The HUD–90033–OHF and HUD–90032–OHF are being added for occasional situations involving interest rate reductions of FHA-insured hospital loans. The forms allow the lender to summarize the rationale for the request and certify that programmatic requirements for interest rate reductions have been met. The documents are based on OHF draft guidance as well as similar forms used by the Section 232 program. The HUD–2510R has been added to facilitate the process regarding the release and discharge of the Regulatory Agreement.

Two forms will be removed from the collection: HUD–91111–OHF (Survey Instructions and Borrower's Certification) and HUD–94128–OHF (Environmental Assessment and Compliance Findings for the Related Laws). The HUD–91111–OHF will be removed from the collection and the information from this form has been combined with HUD–91073–OHF (formally: HUD Survey Instructions and Surveyor's Report; and now renamed: HUD Survey Instructions, Surveyor's Report, and Borrower's Survey Certification). The HUD–94128–OHF will be removed from the collection because HUD's Environmental Review Online System (HEROS) is now used to prepare environmental reviews.

The Public Burden Statement and the Warning have been revised on all forms.

Three documents within the collection are being renewed with only changes to the revised Public Burden Statement and the Warning. The remaining thirty-seven of the forty forms within the collection are being renewed with changes. Revisions include edits that were made to clarify current policies and definitions, reflect updated general accepted accounting standards, or to address inconsistencies across documents.

A summary of the specific changes (beyond the Public Burden Statement and the Warning) made to the revised documents is provided below.

Summary of Changes to Documents

- *HUD–2510R Release of Regulatory Agreement.* New document added to facilitate the process regarding the release and discharge of the Regulatory Agreement. This form will be used by the Office of Hospital Facilities, the Office of Residential Care Facilities, and Multifamily. The Number of Respondents will take the respondents from all three offices into consideration.
- *HUD–90032–OHF Lender Narrative—Interest Rate Reduction.* New document based on an existing Office of Residential Care Facilities application form to request an interest rate reduction, modified for Section 242-insured hospitals.
- *HUD–90033–OHF Lender's Certification in Support of Request for IRR.* New document based on an existing Office of Residential Care Facilities application form to request an interest rate reduction, modified for Section 242-insured hospitals.
- *HUD–91070–OHF Consolidated Certifications Borrower.* Changes were made to the parts of the certification as follows:
  - *Instructions.* Added Feasibility Consultant as an option. Removed N/A from each line to improve readability.
  - *Part VII.* Added a new section, similar to the Supplemental

Underwriting section on existing Office of Residential Care Facility form. Specifically, added questions on delinquency of federal debt; legal action and judgements; bankruptcy question; liens (liens must be addressed prior to closing); investigations; and physician involvement.

▪ *Part VII.* Re-organized the list of entities. Added additional lines for ''Other'' categories. Made consistent with page 1–2 of the form.

• *HUD–91071–OHF Escrow Agreement for Off-site Facilities.* Changes were made to the sections of the agreement as follows:

▪ *Section D.* Added new language to allow for extensions for up to 90 days which must be submitted in advance to HUD and the Lender with a detailed explanation for the extension. This was an issue during the pandemic because the document did not have any specific language to allow for extensions during a shutdown.

▪ *Agreement #1 and #8.* Capitalized Depository Institution and added that Depository Institution must be satisfactory to HUD as well as the Lender.

▪ *Agreement #5 and #7.* Lender was added as recipient of requested information. Added specific references to documents to be used for disbursements.

• *HUD–91073–OHF HUD Survey Instructions, Surveyor's Report, and Borrower's Survey Certification.* Combined HUD–91111–OHF and HUD–91073–OHF into a new updated HUD–91073–OHF HUD Survey Instructions, Surveyor's Report and Borrower's Certification. Updating ALTA/NSPS Standards to latest version (2021) and revising additional requirements. Clarifying language for when the Borrower's certification can be used. Also updated Table A requirements.

• *HUD–91725–OHF Opinion by Counsel to the Borrower.* Changes were made throughout to add clarity.

• *HUD–91725–INST–OHF Instructions to Opinion of Borrower's Counsel.* Only the Warning has been revised.

• *HUD–91725–CERT–OHF Exhibit A to Opinion of Borrower's Counsel Certification.* Only the Warning has been revised.

• *HUD–92013–OHF Application for Hospital Project Mortgage Insurance.* Changed the document from a Word document to an Excel document. This allows the user to enter data, which is totaled where necessary. Added a Schedule so that 92013-line items may be broken out into components.

• *HUD–92023–OHF Request for Final Endorsement of Credit Instrument.* Changes were made to clarify minor inconsistencies within the document, and an update was added to reflect email submission rather than standard mail.

• *HUD–92070–OHF Lease Addendum.* Removed the Instruction language for brevity, which is consistent with the existing Office of Residential Care Facilities form. Capitalized Tenant, Landlord, and Lender throughout the document for clarity. Added ''from an FHA Lender (Lender)'' to clearly define Lender in the transaction. Removed the language above the signatures indicating ''certifies under penalty of perjury'' because this language is not customary for a Lease Addendum, as there are no statements or representations provided.

• *HUD–92080–OHF Change of Mortgage Record.* Only the Public Burden Statement and the Warning have been revised.

• *HUD–92117–OHF Borrower's Certification—Full or Partial Completion of Project.* Added language to #5 to clarify that the requirement pertains to the advance.

• *HUD–92205–OHF Borrower's Certificate of Known Costs (Section 242/223f, 242/223(a)(7)).* Adjusted title of form to include ''Insurance Upon Completion,'' to differentiate it from the insurance of advances form (HUD–92330–OHF). Clarified terminology in the Instructions on page 1 to include repairs and limited rehabilitation. Corresponding schedules for each item were added to the table for greater clarity. Additional clarification added, which makes explicit that deferred repairs and deferred limited rehabilitation amounts are to be escrowed. Updated Schedules to explicitly include additional fees and expenses.

• *HUD–92223–OHF Surplus Cash Note.* Changes were made throughout to add clarity. In Section 2, added clarity to the document by combining sections and eliminated reference ''Except as provided in Section 5 below,'' Section 5 was eliminated and added to Section 2. Added clarity to payments due under the Surplus Cash Note by adding ''and per requirements under the Borrower's Regulatory Agreement and Commitment for Insurance (if applicable)'' (Section 4 eliminated as it is now contained in Section 2). Added ''No payments towards the Surplus Cash Note shall be made before final endorsement, unless HUD has approved,'' which incorporates Section 7 and provides for flexibility if approved by HUD. (Section 7 eliminated as it is now contained in Section 2).

• *HUD–92266–OHF Application for Transfer of Physical Assets.* Changes were made to clarify minor inconsistencies within the document and clarify directions as to what entities complete and submit the form.

• *HUD–92322–OHF Intercreditor Agreement.* Changes were made to the sections of the agreement as follows:

▪ *Section 1.14* definition for ''Facility'' changed to reference 24 CFR 242.1.

▪ *Section 1.15* includes ''Pledged Affiliates'' as defined in HUD's loan docs.

▪ *Section 2.3(e)* replaces ''operator or receiver'' with ''entity'' as Operator is typically used in 232.

▪ *Section 2.7(f)(iii)* removed because this subsection references the Section 232 Operator Regulatory Agreement.

▪ *Section 3.4(c)* clarified what costs are due under current mortgage costs.

▪ *Section 3.6(c)* added language that ''notwithstanding any contrary provision contained in the AR Loan Documents, a default under the FHA Loan Documents shall not constitute a default under the AR Loan Documents if no other default occurred under the AR Loan Documents''.

▪ *Section 4.1* changed ''donee'' to ''assignee''.

• *HUD–92330A–OHF Contractor's Certificate of Actual Cost.* Changes were made to the Trade Items, which were updated with latest Construction Specifications Institute (CSI) categories. Also, clarifies that an Attachment A shall be included when/if an Identity of Interest exists.

• *HUD–92330–OHF Borrower's Certificate of Actual Cost.* Added clarification/typographic changes to improve readability, as well as identify whether the HUD–92330A–OHF is accompanying the certification. Renumbered first 5 items in the table for standardization with other forms and processes.

• *HUD–92403A–OHF Borrower's and Architect's Certificate of Payment.* Only the Public Burden Statement and the Warning have been revised.

• *HUD–92403–OHF Application for Insurance of Advance of Mortgage Proceeds.* Updated Instructions to Borrower for electronic submission, to reference budget categories, and add clarity. Updated Instructions to Lender. Replaced the Table to include the Budget Category and references to HUD–92448–OHF, and updated drawings to documents. Updated Instructions to Lender for electronic submission, added Owner cash equity sentence, changed Mortgagor's to Borrower's, and changed escrow to equity. Removed references to an old Handbook 4480.1.

• *HUD–92415–OHF Request for Permission to Commence Construction*

Prior to Initial Endorsement for Mortgage Insurance. Updated wording in introduction to request and Term 1 for continuity. Changed wording in Term 2 to better reflect hospital program policies. Added Term 4 and revised Terms 5 and 7 for clarity, renumbered paragraphs as required. Revised paragraph 8 to match language in Terms 9 and 10 for continuity. Revised Term 9 to add construction manager agreement as an option and revised language for clarification. Added Term 10 regarding permits to clarify this is a requirement. Revised Terms 13 and 14 for continuity and update paragraph references.

• *HUD–92422–OHF Financial and Statistical Data for HUD Reporting.* Changes were made throughout to add clarity.

• *HUD–92434–OHF Lender's Certificate.* Reorganized the introductory section to add clarity and improve readability.

• *HUD–92441–OHF Building Loan Agreement.* Section 4b—clarified who at HUD should receive the information; changed the report deadline from 45 days after quarter end to 40 days to be consistent with similar report required under Regulatory Agreement.

• *HUD–92442–OHF Construction Contract.* Updated definitions paragraph to add clarity.

• *HUD–92448–OHF Contractor's Requisition Project Mortgages.* Changes were made throughout to add clarity.

• *HUD–92452A–OHF Payment Bond.* Updated to include Construction Managers and Project Description requirement.

• *HUD–92452–OHF Performance Bond.* Updated to include Construction Managers and Project Description requirement.

• *HUD–92455–OHF Request for Endorsement of Credit Instrument & Certificate of Lender, Borrower, & General Contractor.* Added Deferred Repairs and Deferred Limited Rehabilitation concepts to existing language, to differentiate Repairs (under 223(a)(7)) and Limited Rehabilitation (under 223(f)) that occur after initial/final endorsement (Deferred). Added paragraph (from Section 242 regulations) regarding required compliance of the Borrower to the Certificate of Borrower section.

• *HUD–92456–OHF Escrow Agreement for Incomplete Construction.* Updated references to related forms; added paragraphs for sources of escrow funds; and added language for use of remaining escrow funds.

• *HUD–92464–OHF Request for Approval of Advance of Escrow Funds.* Added document to be forwarded to HUD as well as the Lender. Changes for documents and supporting data to be submitted electronically to HUD—no longer in duplicates mailed to HUD. Clarified signatories for the Borrower for certain sections.

• *HUD–92466–OHF Regulatory Agreement—Borrower.* Changes were made to sections of the Regulatory Agreement as follows:

▪ Section 8(b)(ii)(1) and 8(b)(ii)(3) for Conditions to be Satisfied During and Following Construction. Expanded the report to include ''deferred work or limited rehabilitation'' for consistency with terminology in this section and clarify terms for Construction or repairs.

▪ Section 10(b) for Property and Operation; Encumbrances. Language changed to allow Borrowers to adjudicate liens, etc. in good faith with HUD's permission.

▪ Section 11(f) for Finances and Financial Records. Changed ''reasonable time'' to ''10 business days'' to better define the timeline to submit the documents. Added ''shall be maintained in accordance with U.S. GAAP'' to differentiate from OHF reporting requirements as required in the OHF Handbook. Although it should be obvious, 24 CFR 5.801 for uniform reporting financial standards for HUD programs does not specifically include the 242/OHF Program. Section 11(f) for Finances and Financial Records.

▪ Section 11(g) for Finances and Financial Records. Added language to allow HUD or its representatives to ask questions on the finances, operation and condition of the property.

▪ Section 13 for Mortgage Reserved Fund (MRF). Added clarifying language on type of account and beneficiary.

▪ Section 19(a)(i) for Additional Indebtedness and Leasing for Long Term Debt: reordered some of the subsections and added some clarifying language as it relates to proposed debt.

▪ Section 19(d) for Additional Indebtedness—Reporting Requirements: Changed the reporting requirements to an annual report due within 40 days of the Borrower's fiscal year.

▪ Section 45 for Definitions. Clarified definitions.

• *HUD–92476–OHF Escrow Agreement for Deferred Repairs.* Renamed Document from ''Escrow Agreement for Deferred Work'' to ''Escrow Agreement for Deferred Repairs'' to properly reflect the type of work involved. Similar changes were made throughout document. Added language in Section D to allow for extensions of up to 90 days if needed. Revised chart in Exhibit A to reflect a breakout of costs to be covered by the Escrow for Deferred Repairs.

• *HUD–92476A–OHF Escrow Agreement for Deferred Limited Rehabilitation.* Renamed Document from ''Escrow Agreement for Limited Rehabilitation'' to ''Escrow Agreement for Deferred Limited Rehabilitation'' to properly reflect the type of work involved. Similar changes were made throughout document. Added language in Section D to allow for extensions of up to 90 days if needed. Revised chart in Exhibit A to reflect a breakout of costs to be covered by the Escrow for Deferred Limited Rehabilitation.

• *HUD–92476B–OHF Escrow Agreement for Proceeds from Partial Release of Collateral.* Only the Public Burden Statement and the Warning have been revised.

• *HUD–92479–OHF Off-Site Bond—Dual Obligee.* Updated to include Construction Managers and Project Description requirement.

• *HUD–92554–OHF Supplementary Conditions of the Contract for Construction.* Article 1(B) Minimum Wages updated and clarified per program regulations.

• *HUD–92576–OHF Certificate for Need for Health Facility and Assurance of Enforcement of State Standards.* Renamed document. Removed unneeded requests for information.

• *HUD–93305–OHF Agreement and Certification.* Changed wording to reflect regulations for clarity.

• *HUD–94000–OHF Security Instrument/Mortgage/Deed of Trust.* Inserted ''Pledged Affiliates'' where Borrower appears. Updated definitions. Inserted clarifying language to ensure that all project funds are deposited into a DACA. Inserted language in Section 17(b) to allow subordinate liens to be repaid with prior Lender and HUD approval.

HUD–94001–OHF Healthcare Facility Note. In Section 7(a), deleted the language ''or in the Borrower's Security Instrument or in the Borrower's Regulatory Agreement'' because personal liability is not a concept recognized in the Section 242 program, unlike Multifamily and Section 232.

Respondents (i.e. affected public): Not-for-profit institutions; State, Local or Tribal Government.

Estimated Number of Respondents: 718.

Estimated Number of Responses: 1,302.

Frequency of Response: 70.

Average Hours per Response: 118.

Total Estimated Burden: 73,187 hours.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected

parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

(5) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Colette Pollard,

Department Reports Management Officer, Office of Policy Development and Research, Chief Data Officer.

HEARTH Act Approval of Saginaw Chippewa Indian Tribe of Michigan Leasing Ordinance

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Indian Affairs (BIA) approved the Saginaw Chippewa Indian Tribe of Michigan Leasing Ordinance under the Helping Expedite and Advance Responsible Tribal Homeownership Act of 2012 (HEARTH Act). With this approval, the Tribe is authorized to enter into business leases without further BIA approval.

DATES: BIA issued the approval on November 17, 2022.

FOR FURTHER INFORMATION CONTACT: Ms. Carla Clark, Bureau of Indian Affairs, Division of Real Estate Services, 1001 Indian School Road NW, Albuquerque, NM 87104, *carla.clark@bia.gov,* (702) 484–3233.

SUPPLEMENTARY INFORMATION:

I. Summary of the HEARTH Act

The HEARTH Act makes a voluntary, alternative land leasing process available to Tribes, by amending the Indian Long-Term Leasing Act of 1955, 25 U.S.C. 415. The HEARTH Act authorizes Tribes to negotiate and enter into business leases of Tribal trust lands with a primary term of 25 years, and up to two renewal terms of 25 years each, without the approval of the Secretary of the Interior (Secretary). The HEARTH Act also authorizes Tribes to enter into leases for residential, recreational, religious or educational purposes for a primary term of up to 75 years without the approval of the Secretary. Participating Tribes develop Tribal Leasing regulations, including an environmental review process, and then must obtain the Secretary's approval of those regulations prior to entering into leases. The HEARTH Act requires the Secretary to approve Tribal regulations if the Tribal regulations are consistent with the Department of the Interior's (Department) leasing regulations at 25 CFR part 162 and provide for an environmental review process that meets requirements set forth in the HEARTH Act. This notice announces that the Secretary, through the Assistant Secretary—Indian Affairs, has approved the Tribal regulations for the Saginaw Chippewa Indian Tribe of Michigan.

II. Federal Preemption of State and Local Taxes

The Department's regulations governing the surface leasing of trust and restricted Indian lands specify that, subject to applicable Federal law, permanent improvements on leased land, leasehold or possessory interests, and activities under the lease are not subject to State and local taxation and may be subject to taxation by the Indian Tribe with jurisdiction. See 25 CFR 162.017. As explained further in the preamble to the final regulations, the Federal Government has a strong interest in promoting economic development, self-determination, and Tribal sovereignty. 77 FR 72440, 72447–48 (December 5, 2012). The principles supporting the Federal preemption of State law in the field of Indian leasing and the taxation of lease-related interests and activities applies with equal force to leases entered into under Tribal leasing regulations approved by the Federal Government pursuant to the HEARTH Act.

Section 5 of the Indian Reorganization Act, 25 U.S.C. 5108, preempts State and local taxation of permanent improvements on trust land. *Confederated Tribes of the Chehalis Reservation* v. *Thurston County,* 724 F.3d 1153, 1157 (9th Cir. 2013) (citing *Mescalero Apache Tribe* v. *Jones,* 411 U.S. 145 (1973)). Similarly, section 5108 preempts State taxation of rent payments by a lessee for leased trust lands, because ''tax on the payment of rent is indistinguishable from an impermissible tax on the land.'' *See Seminole Tribe of Florida* v. *Stranburg,* 799 F.3d 1324, 1331, n.8 (11th Cir. 2015). In addition, as explained in the preamble to the revised leasing regulations at 25 CFR part 162, Federal courts have applied a balancing test to determine whether State and local taxation of non-Indians on the reservation is preempted. *White Mountain Apache Tribe* v. *Bracker,* 448 U.S. 136, 143 (1980). The *Bracker* balancing test, which is conducted against a backdrop of ''traditional notions of Indian self-government,'' requires a particularized examination of the relevant State, Federal, and Tribal interests. We hereby adopt the *Bracker* analysis from the preamble to the surface leasing regulations, 77 FR at 72447–48, as supplemented by the analysis below.

The strong Federal and Tribal interests against State and local taxation of improvements, leaseholds, and activities on land leased under the Department's leasing regulations apply equally to improvements, leaseholds, and activities on land leased pursuant to Tribal leasing regulations approved under the HEARTH Act. Congress's overarching intent was to ''allow Tribes to exercise greater control over their own land, support self-determination, and eliminate bureaucratic delays that stand in the way of homeownership and economic development in Tribal communities.'' 158 Cong. Rec. H. 2682 (May 15, 2012). The HEARTH Act was intended to afford Tribes ''flexibility to adapt lease terms to suit [their] business and cultural needs'' and to ''enable [Tribes] to approve leases quickly and efficiently.'' H. Rep. 112–427 at 6 (2012).

Assessment of State and local taxes would obstruct these express Federal policies supporting Tribal economic development and self-determination, and also threaten substantial Tribal interests in effective Tribal government, economic self-sufficiency, and territorial autonomy. *See Michigan* v. *Bay Mills Indian Community,* 572 U.S. 782, 810 (2014) (Sotomayor, J., concurring) (determining that ''[a] key goal of the

Federal Government is to render Tribes more self-sufficient, and better positioned to fund their own sovereign functions, rather than relying on Federal funding''). The additional costs of State and local taxation have a chilling effect on potential lessees, as well as on a Tribe that, as a result, might refrain from exercising its own sovereign right to impose a Tribal tax to support its infrastructure needs. *See id.* at 810–11 (finding that State and local taxes greatly discourage Tribes from raising tax revenue from the same sources because the imposition of double taxation would impede Tribal economic growth).

Similar to BIA's surface leasing regulations, Tribal regulations under the HEARTH Act pervasively cover all aspects of leasing. *See* 25 U.S.C. 415(h)(3)(B)(i) (requiring Tribal regulations be consistent with BIA surface leasing regulations). Furthermore, the Federal Government remains involved in the Tribal land leasing process by approving the Tribal leasing regulations in the first instance and providing technical assistance, upon request by a Tribe, for the development of an environmental review process. The Secretary also retains authority to take any necessary actions to remedy violations of a lease or of the Tribal regulations, including terminating the lease or rescinding approval of the Tribal regulations and reassuming lease approval responsibilities. Moreover, the Secretary continues to review, approve, and monitor individual Indian land leases and other types of leases not covered under the Tribal regulations according to the part 162 regulations.

Accordingly, the Federal and Tribal interests weigh heavily in favor of preemption of State and local taxes on lease-related activities and interests, regardless of whether the lease is governed by Tribal leasing regulations or Part 162. Improvements, activities, and leasehold or possessory interests may be subject to taxation by the Saginaw Chippewa Indian Tribe of Michigan.

Bryan Newland,

Assistant Secretary—Indian Affairs.

Indian Gaming; Approval of Tribal-State Class III Gaming Compact in the State of California

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: This notice publishes the approval of the Tribal-State Gaming Compact between the State of California sand the Santa Rosa Indian Community of the Santa Rosa Rancheria (Compact) providing for Class III gaming between the Santa Rosa Indian Community of the Santa Rosa Rancheria (Tribe) and the State of California (State).

DATES: The Amendment takes effect on November 23, 2022.

FOR FURTHER INFORMATION CONTACT: Ms. Paula L. Hart, Director, Office of Indian Gaming, Office of the Deputy Assistant Secretary—Policy and Economic Development, Washington, DC 20240, *paula.hart@bia.gov,* (202) 219–4066.

SUPPLEMENTARY INFORMATION: Under section 11 of the Indian Gaming Regulatory Act (IGRA), Public Law 100–497, 25 U.S.C. 2701 *et seq.,* the Secretary of the Interior shall publish in the **Federal Register** notice of approved Tribal-State compacts for the purpose of engaging in Class III gaming activities on Indian lands. As required by 25 CFR 293.4, all compacts and amendments are subject to review and approval by the Secretary. The Compact permits the Tribe to conduct class III gaming permitted in the State, including gaming devices, any banking or percentage card games, any devices authorized under state law to the California State Lottery, and off-track wagering on horse races. The Tribe is permitted to operate up to three gaming facilities on the Tribe's Indian lands, provided one of the gaming facilities has a primary purpose other than gaming and operates no more than 50 gaming devices. The Compact term is for 25 years from the effective date. The Compact is approved.

Bryan Newland,

Assistant Secretary—Indian Affairs.

DATES: The Amendment takes effect on November 23, 2022.

FOR FURTHER INFORMATION CONTACT: Ms. Paula L. Hart, Director, Office of Indian Gaming, Office of the Deputy Assistant Secretary—Policy and Economic Development, Washington, DC 20240, *paula.hart@bia.gov,* (202) 219–4066.

SUPPLEMENTARY INFORMATION: Under section 11 of the Indian Gaming Regulatory Act (IGRA), Public Law 100–497, 25 U.S.C. 2701 *et seq.,* the Secretary of the Interior shall publish in the **Federal Register** notice of approved Tribal-State compacts for the purpose of engaging in Class III gaming activities on Indian lands. As required by 25 CFR 293.4, all compacts and amendments are subject to review and approval by the Secretary. The Compact permits the Tribe to conduct class III gaming permitted in the State, including gaming devices, any banking or percentage card games, any devices authorized under state law to the California State Lottery, and off-track wagering on horse races. The Tribe is permitted to operate two gaming facilities on its Indian lands, provided one of the gaming facilities has a primary purpose other than gaming and operates no more than 50 gaming devices. The Compact term is for 25 years from the effective date. The Compact is approved.

Bryan Newland,

Assistant Secretary—Indian Affairs.

Bureau of Indian Affairs

[223A2100DD/AAKC001030/A0A501010.999900]

Land Acquisitions; White Earth Band of the Minnesota Chippewa Tribe, Minnesota, Buschelle Site, Clearwater County, Minnesota

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: The Assistant Secretary—Indian Affairs made a final agency determination to acquire in trust 92.18 acres, more or less, of land known as the Buschelle Site in Clearwater County, Wisconsin, (Site) for the White Earth Band of the Minnesota Chippewa Tribe, Minnesota, (Tribe) for gaming and other purposes.

DATES: This final determination was made on November 17, 2022.

FOR FURTHER INFORMATION CONTACT: Ms. Paula L. Hart, Director, Office of Indian Gaming, Mailstop 3543, 1849 C Street NW, Washington, DC 20240, *paula.hart@bia.gov,* (202) 219–4066.

SUPPLEMENTARY INFORMATION: On the date listed in the **DATES** section of this notice, the Assistant Secretary—Indian Affairs made a final agency determination to acquire the Site, consisting of 92.18 acres, more or less, in trust for the Tribe under the authority of the Indian Reorganization Act of June 18, 1934, 25 U.S.C. 5108.

The Assistant Secretary—Indian Affairs, on behalf of the Secretary of the Interior, will immediately acquire title to the Site in the name of the United States of America in trust for Tribe upon fulfillment of all Departmental requirements. The legal description for the Site is as follows:

The Southwest Quarter of the Northwest Quarter (SW1/4NW1/4) and Government Lot Four (4), Section Four (4), Township One Hundred Forty-six (146) North of Range Thirty-eight (38) West of the Fifth Principal Meridian in Clearwater County, Minnesota.

Authority

This notice is published in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 Departmental Manual 8.1, and is published to comply with the requirements of 25 CFR 151.12 (c)(2)(ii) that notice of the decision to acquire land in trust be promptly provided in the **Federal Register**.

Bryan Newland,

Assistant Secretary—Indian Affairs.

[223A2100DD/AAKC001030/A0A501010.999900]

Land Acquisitions; Tejon Tribe, Mettler Site, Kern County, California

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: The Assistant Secretary—Indian Affairs made a final agency determination to acquire in trust 320.04 acres, more or less, of land known as the Mettler Site in Kern County, California, (Site) for the Tejon Indian Tribe, (Tribe) for gaming and other purposes.

DATES: This final determination was made on November 17, 2022.

FOR FURTHER INFORMATION CONTACT: Ms. Paula L. Hart, Director, Office of Indian Gaming, Mailstop 3543, 1849 C Street NW, Washington, DC 20240, *paula.hart@bia.gov,* (202) 219–4066.

SUPPLEMENTARY INFORMATION: On the date listed in the **DATES** section of this notice, the Assistant Secretary—Indian Affairs made a final agency determination to acquire the Site, consisting of 320.04 acres, more or less, in trust for the Tribe under the authority of the Indian Reorganization Act of June 18, 1934, 25 U.S.C. 5108.

The Assistant Secretary—Indian Affairs, on behalf of the Secretary of the Interior, will immediately acquire title to the Site in the name of the United States of America in trust for Tribe upon fulfillment of all Departmental requirements. The 320.04 acres, more or less, are described as follows:

Real Property in the Unincorporated Area of the County of Kern, State of California, Described as Follows

Parcel 1

The northeast quarter of Section 2, Township 11 North, Range 20 West, San Bernardino Meridian, in the unincorporated area of the County of Kern, State of California, according to the official plat thereof.

Also known as: Lot No. 1 and Lot No. 2, Section 2 as shown on the approved February 3, 1863 General Land Office official Plat of Township 11 North, Range 20 West, San Bernardino Meridian, in the unincorporated area of the County of Kern, State of California, according to the official plat thereof.

Parcel 2

The northeast quarter of the southeast quarter of Section 2, Township 11 North, Range 20 West, San Bernardino Meridian, in the unincorporated area of the County of Kern, State of California, according to the official plat thereof.

Parcel 3

The west half of the southeast quarter and the southeast quarter of the southeast quarter of section 2, township 11 north, range 20 West, San Bernardino Meridian, in the unincorporated area of the County of Kern, State of California, according to the official plat thereof.

Excepting therefrom all oil, gas, minerals and other hydrocarbon substances within or underlying said land, or that may be produced and saved therefrom, providing however, grantor, his successors and assigns shall not conduct drilling or other operations upon the surface of said land, but nothing herein contained shall be deemed to prevent the grantor, his successors and assigns, from extracting or capturing said minerals by drilling on adjacent or neighboring lands and/or from conducting subsurface drilling operations under said land at a depth of 100 feet below the surface of said land, so as not to disturb the surface of said land or any improvements thereon, as reserved by Chanslor-Western Oil and Development Company, a Delaware corporation, successor in interest to Chanslor-Canfield Midway Oil Company, a California corporation, in Deed recorded November 8, 1954, in Book 2317, Page 102, of Official Records.

Parcel 4

All that portion of section 11, township 11 north, range 20 west, San Bernardino Meridian, in the unincorporated area of the County of Kern, State of California, according to the official plat thereof described as follows:

Beginning at the northeast corner of said section 11, thence South 78°07′14″ West 184.02 feet to the true point of beginning; thence South 89°48′55″ West 40.00 feet; thence North 0°11′05″ West 40.00 feet; thence North 89°48′55″ East 40.00 feet; thence South 0°11′05″ East 40.00 feet to the true point of beginning.

Excepting therefrom all oil, gas, minerals and other hydrocarbon substances within or underlying said land as reserved by Kern County Land Company, in Deed dated October 3,

1945, recorded in Book 1283, Page 212, of Official Records.

Authority: This notice is published in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 Departmental Manual 8.1, and is published to comply with the requirements of 25 CFR 151.12 (c)(2)(ii) that notice of the decision to acquire land in trust be promptly provided in the **Federal Register**.

Bryan Newland,

Assistant Secretary—Indian Affairs.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[LLWY920000.14400000.ET0000.223; WYW–172386]

Notice of Application for Permanent Withdrawal and Transfer of Jurisdiction, Wyoming

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Department of Energy, Office of Legacy Management (DOE–LM) has filed an application with the Bureau of Land Management (BLM) requesting that the Secretary of the Interior exercise authority under Title II of the Uranium Mill Tailings Radiation Control Act of 1978 (UMTRCA) and permanently withdraw and transfer administrative jurisdiction to DOE–LM of 869.08 acres of public lands and 3,454.39 acres of Federal mineral estate at the Split Rock Site in Wyoming. The public land and interests in the land would be withdrawn from operation of the general land laws, including the United States mining laws, the mineral and geothermal leasing laws, and the mineral materials disposal laws, subject to valid existing rights, and would be transferred to DOE–LM for long term maintenance and monitoring under a Nuclear Regulatory Commission license as part of the Split Rock Disposal Cell Site. The BLM previously published notice of a DOE–LM application for withdrawal and transfer of jurisdiction for some of these lands and minerals for the same purpose in the **Federal Register** on April 14, 2008 (73 FR 20062–63). This notice announces a 30-day opportunity for the public to comment on the DOE–LM application.

DATES: Comments must be received on or before December 23, 2022.

ADDRESSES: Comments should be sent to BLM Wyoming State Director, BLM Wyoming State Office, 5353 Yellowstone Road, Cheyenne, WY 82009.

FOR FURTHER INFORMATION CONTACT: Keesha Clay, Realty Specialist, BLM Wyoming State Office, (307) 775–6189, during regular business hours 8:00 a.m. to 4:30 p.m., Monday through Friday, except holidays. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Ms. Clay. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The DOE–LM filed with the BLM an application that requests the Secretary of the Interior to permanently withdraw and transfer administrative jurisdiction over the following described public lands and federally owned minerals, subject to valid existing rights. DOE–LM has requested that the land and minerals be withdrawn from location and entry under the United States mining laws, from leasing under the mineral or geothermal leasing laws, and from disposal under the mineral materials laws, subject to valid existing rights. Under the UMTRCA, as amended by the Uranium Mill Tailings Remedial Action Amendments Act of 1988 (42 U.S.C. 7916), the Secretary of the Interior may make such permanent withdrawals and transfers of administrative jurisdiction. The Secretary's actions under UMTRCA are explicitly exempt from the withdrawal and transfer provisions of Section 204 of the Federal Land Policy and Management Act of 1976, as amended. The following legal land description includes public lands and Federal mineral interest underlying non-Federal surface estate in both the new application and the 2008 application. The public lands and Federal mineral estate are requested for permanent withdrawal and jurisdictional transfer for long term maintenance and monitoring by DOE–LM under applicable provisions of UMTRCA:

Public Lands

Sixth Principal Meridian, Wyoming

T. 29 N., R. 91 W.,
- Sec. 6, lots 8 thru 13 and E1/2SE1/4;
- Sec. 7, N1/2NE1/4;
- Sec. 8, NW1/4NW1/4.

T. 29 N., R. 92 W.,
- Sec. 1, lots 1 and 2, S1/2NE1/4, and SE1/4SE1/4;
- Sec. 2, SE1/4SW1/4 and SW1/4SE1/4;
- Sec. 11, NW1/4NE1/4 and NE1/4NW1/4;
- Sec. 12, W1/2NE1/4.

The areas described aggregate 869.08 acres of surface and Federal minerals.

Federal Mineral Interests Underlying Non-Federal Surface

T. 29 N., R. 91 W.
- Sec. 5, S1/2;
- Sec. 6, lot 5, SE1/4NW1/4, and SW1/4SE1/4;
- Sec. 7, lots 1 thru 4, S1/2NE1/4, E1/2NW1/4, E1/2SW1/4, and SE1/4;
- Sec. 8, E1/2NE1/4, SW1/4NW1/4, and W1/2SW1/4;
- Sec. 18, lots 1 and 2 and E1/2NW1/4, those portions lying northerly of the northerly right-of-way boundary of U.S. Highway 287, as described on Document No. 2009–1328633, filed October 19, 2009, in the Fremont County Clerk's Office.

T. 29 N., R. 92 W.,
- Sec. 1, lot 4, SW1/4, and W1/2SE1/4;
- Sec. 2, SW1/4SW1/4, NE1/4SW1/4, N1/2SE1/4, and SE1/4SE1/4;
- Sec. 3, E1/2SE1/4;
- Sec. 10, E1/2SE1/4, that portion lying northerly of the northerly boundary of the Home on the Range Estates Subdivision, Document No. 970395, filed March 8, 1978, in the Fremont County Clerk's Office;
- Sec. 11, NE1/4NE1/4, S1/2NE1/4, SE1/4NW1/4, and S1/2, except that portion of SW1/4SW1/4 within said Home on the Range Subdivision;
- Sec. 12, E1/2NE1/4, NW1/4, and S1/2;
- Sec. 13, N1/2;
- Sec. 14, NE1/4 and NE1/4NW1/4.

The areas described aggregate approximately 3,454.39 acres of Federal minerals underlying non-Federal surface.

The purpose of the requested withdrawal and transfer of administrative jurisdiction is to allow the DOE–LM to administer the lands in perpetuity as a hazardous material site under the authority of the UMTRCA of 1978, 42 U.S.C. 7902 *et seq.*

For a period until December 23, 2022, all persons who wish to submit comments, suggestions, or objections in connection with the DOE–LM application may present their views in writing to the BLM Wyoming State Office at the address listed in the **ADDRESSES** section above. Records related to the applications may be examined by contacting the BLM Wyoming State Office at the address listed in the **ADDRESSES** section above. The BLM is preparing an environmental assessment under the National Environmental Policy Act in connection with the requested withdrawal and jurisdictional transfer. On January 28, 2022, the BLM posted a project description for DOI–BLM–WY–R050–2022–0009–EA on its ePlanning site at *eplanning.blm.gov/eplanning-ui/project/2017709/510.*

Your comments, including your name and street address, will be available for public review at the BLM Wyoming State Office during regular business hours 8:00 a.m. to 4:30 p.m. Monday through Friday, except Federal holidays. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

DOE–LM has acknowledged that segments of four National Historic Trails are present within the project area. The transfer of administrative jurisdiction would not invalidate or revoke the congressionally designated alignments of the National Historic Trail across the property, and trail wide administration would continue to be coordinated by the National Park Service.

(Authority: 42 U.S.C. 7916).

Andrew Archuleta,

BLM Wyoming State Director.

Notice of Inventory Completion: University of California, Berkeley; Berkeley, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the University of California, Berkeley has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary object and Indian Tribes or Native Hawaiian organizations in this notice. The human remains and associated funerary object were removed from Suffolk County, NY.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after December 23, 2022.

ADDRESSES: Alex Lucas, University of California, Berkeley; 50 University Hall, 2199 Addison Street, Berkeley, CA 94720, telephone (925) 791–7231, email *alexandra.lucas@berkeley.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the University of California, Berkeley. The National Park Service is not responsible for the determinations in this notice. Additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records held by the University of California, Berkeley.

Description

Human remains representing, at minimum, two individuals were removed from Suffolk County, NY. They were excavated at an unknown date by F. (Frank) M. Smith, head of the Pacific Coast Borax Company. Originally from Wisconsin, his Borax mining operations were based in Death Valley. He resided in Oakland, but he had a summer residence on Shelter Island in Suffolk County, NY. The individuals and associated funerary items were donated and accessioned to the University in 1910. The one associated funerary object is a lot of faunal bones.

Cultural Affiliation

The human remains and associated funerary objects in this notice are connected to one or more identifiable earlier groups, tribes, peoples, or cultures. There is a relationship of shared group identity between the identifiable earlier groups, tribes, peoples, or cultures and one or more Indian Tribes or Native Hawaiian organizations. The following types of information were used to reasonably trace the relationship: archeological, geographical, historical, kinship, oral traditional, and expert opinion.

Determinations

Pursuant to NAGPRA and its implementing regulations, and after consultation with the appropriate Indian Tribes and Native Hawaiian organizations, the University of California, Berkeley has determined that:

- The human remains described in this notice represent the physical remains of at least two individuals of Native American ancestry.
- The one object described in this notice is reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a relationship of shared group identity that can be reasonably traced between the human remains and associated funerary object described in this notice and the Shinnecock Indian Nation.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the Responsible Official identified in **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after December 23, 2022. If competing requests for repatriation are received, the University of California, Berkeley must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The University of California, Berkeley is responsible for sending a copy of this notice to the Indian Tribe identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.9, 10.10, and 10.14.

Dated: November 16, 2022.

Melanie O'Brien,

Manager, National NAGPRA Program.

Notice of Inventory Completion: Arizona State Museum, University of Arizona, Tucson, AZ

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Arizona State Museum (ASM) has completed an inventory of human

remains and an associated funerary object and has determined that there is a cultural affiliation between the human remains and associated funerary object and Indian Tribes or Native Hawaiian organizations in this notice. The human remains and associated funerary object were removed from Pima County, Arizona.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after December 23, 2022.

ADDRESSES: Cristin Lucas, Repatriation Coordinator, Arizona State Museum, University of Arizona, P.O. Box 210026, Tucson, AZ 85721–0026, telephone (520) 626–0320, email *lucasc@arizona.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of ASM. The National Park Service is not responsible for the determinations in this notice. Additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records held by the ASM.

Description

Human remains representing, at minimum, one individual were removed from site AZ BB:14:1(ASM) in Pima County, AZ. The site was first recorded in 1925 by an archeology field class under the direction of Byron Cummings with the University of Arizona (UA). Permitted excavation was subsequently conducted in 1927 by Edward John Hands under the direction of the UA. Collections from these field seasons were brought to ASM following fieldwork; no accession number was assigned. In 1941, ASM loaned to the Harvard Peabody Museum of Archaeology and Ethnology (Peabody) a ceramic cremation vessel containing cremated human remains that had been removed from site AZ BB:14:1(ASM). The human remains and vessel remained at the Peabody until 2021 when they were recalled by ASM. No known individual was identified. The one associated funerary object is a ceramic cremation vessel.

Cultural Affiliation

The human remains and associated funerary object in this notice are connected to one or more identifiable earlier groups, tribes, peoples, or cultures. There is a relationship of shared group identity between the identifiable earlier groups, tribes, peoples, or cultures and one or more Indian Tribes or Native Hawaiian organizations. The following types of information were used to reasonably trace the relationship: anthropological, archeological, biological, geographical, historical, linguistic, and oral traditional.

Determinations

Pursuant to NAGPRA and its implementing regulations, and after consultation with the appropriate Indian Tribes and Native Hawaiian organizations, ASM has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- The one object described in this notice is reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a relationship of shared group identity that can be reasonably traced between the human remains and associated funerary object described in this notice and the Ak-Chin Indian Community (*previously* listed as Ak Chin Indian Community of the Maricopa (Ak Chin) Indian Reservation, Arizona); Gila River Indian Community of the Gila River Indian Reservation, Arizona; Hopi Tribe of Arizona; Salt River Pima-Maricopa Indian Community of the Salt River Reservation, Arizona; Tohono O'odham Nation of Arizona; and the Zuni Tribe of the Zuni Reservation, New Mexico.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the Responsible Official identified in **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after December 23, 2022. If competing requests for repatriation are received, the ASM must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. ASM is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.9, 10.10, and 10.14.

Dated: November 16, 2022.

National Register of Historic Places; Notification of Pending Nominations and Related Actions

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The National Park Service is soliciting electronic comments on the significance of properties nominated before November 12, 2022, for listing or related actions in the National Register of Historic Places.

DATES: Comments should be submitted electronically by December 8, 2022.

ADDRESSES: Comments are encouraged to be submitted electronically to *National_Register_Submissions@nps.gov* with the subject line ''Public Comment on <property or proposed district name, (County) State>.'' If you have no access to email, you may send them via U.S. Postal Service and all other carriers to the National Register of Historic Places, National Park Service, 1849 C Street NW, MS 7228, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Sherry A. Frear, Chief, National Register of Historic Places/National Historic Landmarks Program, 1849 C Street NW, MS 7228, Washington, DC 20240, *sherry_frear@nps.gov,* 202–913–3763.

SUPPLEMENTARY INFORMATION: The properties listed in this notice are being considered for listing or related actions in the National Register of Historic Places. Nominations for their consideration were received by the National Park Service before November 12, 2022. Pursuant to Section 60.13 of 36 CFR part 60, comments are being accepted concerning the significance of

the nominated properties under the National Register criteria for evaluation.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Notice of Inventory Completion: U.S. Department of the Interior, Bureau of Land Management, Anchorage, AK

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the U.S. Department of the Interior, Bureau of Land Management (BLM Alaska) has completed an inventory of human remains and has determined that there is a cultural affiliation between the human remains and Indian Tribes or Native Hawaiian organizations in this notice. The human remains were removed from the Bethel Census Area, Alaska.

DATES: Repatriation of the human remains in this notice may occur on or after December 23, 2022.

ADDRESSES: Robert E. King, Bureau of Land Management, 222 W 7th Avenue, #13, Anchorage, AK 99513, telephone (907) 271–5510, email *r2king@blm.gov.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of BLM Alaska. The National Park Service is not responsible for the determinations in this notice. Additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records held by BLM Alaska.

Description

On September 9, 1907, human remains representing, at minimum, four individuals were removed from the Bethel Census Area, nearby the village of Bethel. They were removed during the 1905–1907 expedition to the middle of Alaska's Yukon Valley sponsored by the University of Pennsylvania Museum of Archaeology and Anthropology (Penn Museum) and conducted by George Byron Gordon, General Curator of American Archaeology, and his brother MacLaren Gordon. Subsequently, the human remains, which are over 150 years old, were brought back to the Penn Museum (PM 29–145–1, PM 29–145–2, PM 29–145–5, and PM 29–145–6). No known individuals were identified. No associated funerary objects are present.

Cultural Affiliation

The human remains in this notice are connected to one or more identifiable earlier groups, tribes, peoples, or cultures. There is a relationship of shared group identity between the identifiable earlier groups, tribes, peoples, or cultures and one or more Indian Tribes or Native Hawaiian organizations. The following types of information were used to reasonably trace the relationship: archeological information and oral tradition.

Determinations

Pursuant to NAGPRA and its implementing regulations, and after consultation with the appropriate Indian Tribes and Native Hawaiian organizations, BLM Alaska has determined that:

- The human remains described in this notice represent the physical remains of four individuals of Native American ancestry.
- There is a relationship of shared group identity that can be reasonably traced between the human remains described in this notice and the Orutsararmiut Traditional Native Council (*previously* listed as Orutsararmuit Native Village (aka Bethel)).

Requests for Repatriation

Written requests for repatriation of the human remains in this notice must be sent to the Responsible Official identified in **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains in this notice to a requestor may occur on or after December 23, 2022. If competing requests for repatriation are received, BLM Alaska must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains are considered a single request and not competing requests. BLM Alaska is responsible for sending a copy of this notice to the Indian Tribe identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.9, 10.10, and 10.14.

Dated: November 16, 2022.

Melanie O'Brien,

Manager, National NAGPRA Program.

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; NPS Case and Outbreak Investigation Data Collections

AGENCY: National Park Service, Interior.

ACTION: Notice of Information Collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, we, the National Park Service (NPS) are proposing a new information collection.

DATES: Interested persons are invited to submit comments on or before December 23, 2022.

ADDRESSES: Send written comments on this information collection request (ICR) to the Office of Management and Budget's Desk Officer for the Department of the Interior by email at *OIRA_Submission@omb.eop.gov;* or via facsimile to (202) 395–5806. Please provide a copy of your comments to Phadrea Ponds, Information Collection Clearance Officer, National Park Service, 12201 Sunrise Valley Drive, Reston, VA 20192 (mail); or to *phadrea_ponds@nps.gov* (email). Please reference OMB Control Number 1024–NEW in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, contact Dr. Stefanie Campbell at *stefanie_campbell@nps.gov* (email) or at 202–768–5008 (telephone); or Dr. Maria Said at maria_ (email), or at 202–538–5681 (telephone). Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States. You may also view the ICR at *http://www.reginfo.gov/public/do/PRAMain.*

SUPPLEMENTARY INFORMATION: In accordance with the PRA and 5 CFR 1320.8(d)(1), we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on January 27, 2022 (87 FR 4283). No comments were received.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again soliciting comments from the public and other Federal agencies on the proposed ICR that is described below. We are especially interested in public comment addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility.

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used.

(3) Ways to enhance the quality, utility, and clarity of the information to be collected.

(4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: Authorized by the NPS Organic Act (54 U.S.C. 100101 *et seq.*), and Public Health Service Act (42 U.S. Code Chapter 6A), the NPS Office of Public Health (OPH) is called upon to conduct disease surveillance, respond to urgent outbreaks, and prevent illnesses within or associated with National

Parks. National Parks are federally managed lands where state and local health departments may not have jurisdiction, therefore the public health response rests with the NPS OPH. This collection will allow the NPS OPH to conduct epidemiological investigations in response to public health events of concern, including:

- Incidents where 3 or more visitors, employees, or volunteers have similar symptoms or illnesses
- Single reports of rare or reportable diseases
- Incidents that result in death, serious injury, illness, and/or lead to overnight hospitalization
- Wildlife encounters of concern such as bites, scratches, or attacks and wildlife deaths that do not fit known patterns
- Any additional illnesses of public health concern

The information collected will be used to determine the agents, sources, modes of transmission, or risk factors so that effective prevention and control measures can be implemented.

Title of Collection: NPS Case and Outbreak Investigation Data Collections.

OMB Control Number: 1024–NEW.

Form Number: None.

Type of Review: New.

Respondents/Affected Public: Individuals/households, businesses, and local governments.

Total Estimated Number of Annual Respondents: 500.

Total Estimated Number of Annual Responses: 500.

Estimated Completion Time per Response: Varies from 10 minutes to 30 minutes, depending on the nature of the disease outbreak or event.

Total Estimated Number of Annual Burden Hours: 150.

Respondent's Obligation: Voluntary.

Frequency of Collection: On occasion.

Total Estimated Annual Nonhour Burden Cost: None.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Phadrea Ponds,

National Park Service Information Collections Clearance Officer.

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–NAGPRA–NPS0034908; PPWOCRADN0–PCU00RP14.R50000]

Notice of Inventory Completion: U.S. Department of the Interior, Bureau of Land Management, Anchorage, AK

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the U.S. Department of the Interior, Bureau of Land Management (BLM Alaska) has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice. The human remains and associated funerary objects were removed from the Aleutians West Census Area, AK.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after December 23, 2022.

ADDRESSES: Robert E. King, Bureau of Land Management, 222 W 7th Avenue, #13, Anchorage, AK 99513, telephone (907) 271–5510, email *r2king@blm.gov*.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of BLM Alaska. The National Park Service is not responsible for the determinations in this notice. Additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records held by BLM Alaska.

Description

Human remains representing, at minimum, three individuals were removed from two locations on Unalaska Island in the Aleutians West Census Area, AK. The human remains were determined to be more than 200 years old.

Sometime prior to 1961, human remains representing, at minimum, two individuals were removed by an unknown person from the Chernofski site. In 1961, Ron Boyce deposited these human remains at the University of Alaska Museum of the North (University Museum). No known individuals were identified. The 27 associated funerary objects are one bone shaft, 11 pieces of worked bone, two pieces of decorated ivory, one piece of worked wood, one bone drill bearing, seven bone points, one ivory point, one bone handle, and two wooden spoons.

Sometime prior to 1963, human remains representing, at minimum, one individual were removed by an unknown person from the Summer Bay area. In 1963, Ron Kent deposited these human remains at the University Museum. No known individual was identified. No associated funerary objects are present.

Cultural Affiliation

The human remains and associated funerary objects in this notice are connected to one or more identifiable earlier groups, tribes, peoples, or cultures. There is a relationship of shared group identity between the identifiable earlier groups, tribes, peoples, or cultures and one or more Indian Tribes or Native Hawaiian organizations. The following types of information were used to reasonably trace the relationship: archeological and oral traditional.

Determinations

Pursuant to NAGPRA and its implementing regulations, and after consultation with the appropriate Indian Tribes and Native Hawaiian organizations, BLM Alaska has determined that:

- The human remains described in this notice represent the physical remains of three individuals of Native American ancestry.
- The 27 objects described in this notice are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a relationship of shared group identity that can be reasonably traced between the human remains and associated funerary objects described in this notice and the Qawalangin Tribe of Unalaska.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the Responsible Official identified in **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or

a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after December 23, 2022. If competing requests for repatriation are received, BLM Alaska must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. BLM Alaska is responsible for sending a copy of this notice to the Indian Tribe identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.9, 10.10, and 10.14.

Dated: November 16, 2022.

Melanie O'Brien,

Manager, National NAGPRA Program.

[NPS–WASO–NAGPRA–NPS0034905; PPWOCRADN0–PCU00RP14.R50000]

Notice of Intent To Repatriate Cultural Items: Southern Ute Cultural Center and Museum, Ignacio, CO

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Southern Ute Cultural Center and Museum intends to repatriate certain cultural items that meet the definition of sacred objects and that have a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural items in this notice may occur on or after December 23, 2022.

ADDRESSES: Tallias Cantsee, Southern Ute Cultural Center and Museum, 503 Ouray Drive, Ignacio, CO 81137, telephone (970) 563–2996, email *tcantsee@southernute-nsn.gov.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Southern Ute Cultural Center and Museum. The National Park Service is not responsible for the determinations in this notice. Additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records held by the Southern Ute Cultural Center and Museum.

Description

The two cultural items were removed from Haudenosaunee territory through sale. Accession number SUM 251 was acquired through purchase by Southern Ute Cultural Center and Museum (SUCCM) Director Helen Hoskins, on January 29th, 1997. SUM 679 was originally a loan from the estate of Father Declan Madden to SUCCM during the directorship of Lynn Brittner. On July 17th, 2012, it was donated to SUCCM. The two sacred items are two Hatuwi (Broken Nose) False Face Masks.

Cultural affiliation

The cultural items in this notice are connected to one or more identifiable earlier groups, tribes, peoples, or cultures. There is a relationship of shared group identity between the identifiable earlier groups, tribes, peoples, or cultures and one or more Indian Tribes or Native Hawaiian organizations. The following types of information were used to reasonably trace the relationship: historical information available on Haudenosaunee False Face Masks was used as a baseline marker, and tribal expert opinion was utilized through virtual consultations as well as a site visit.

Determinations

Pursuant to NAGPRA and its implementing regulations, and after consultation with the appropriate Indian Tribes and Native Hawaiian organizations, the Southern Ute Cultural Center and Museum has determined that:

- The two cultural items described above are specific ceremonial objects needed by traditional Native American religious leaders for the practice of traditional Native American religions by their present-day adherents.
- There is a relationship of shared group identity that can be reasonably traced between the cultural items and the Cayuga Nation; Oneida Indian Nation (*previously* listed as Oneida Nation of New York); Oneida Nation (*previously* listed as Oneida Tribe of Indians of Wisconsin); Onondaga Nation; Saint Regis Mohawk Tribe (*previously* listed as St. Regis Band of Mohawk Indians of New York); Seneca Nation of Indians (*previously* listed as Seneca Nation of New York); and the Seneca-Cayuga Nation (*previously* listed as Seneca-Cayuga Tribe of Oklahoma).

Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the Responsible Official identified in **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on or after December 23, 2022. If competing requests for repatriation are received, the Southern Ute Cultural Center and Museum must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural items are considered a single request and not competing requests. The Southern Ute Cultural Center and Museum is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.8, 10.10, and 10.14.

Dated: November 16, 2022.

Melanie O'Brien,

Manager, National NAGPRA Program.

Notice of Inventory Completion: Field Museum of Natural History, Chicago, IL

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Field Museum of Natural History has completed an inventory of human remains and has determined that there is a cultural affiliation between the human remains and Indian Tribes or Native Hawaiian organizations in this notice. The human remains were removed from Glacier and Pondera Counties, Montana.

DATES: Repatriation of the human remains in this notice may occur on or after December 23, 2022.

ADDRESSES: Helen Robbins, Repatriation Director, Field Museum of Natural History, 1400 S Lake Shore Drive, Chicago, IL 60605–2496, telephone (312) 665–7317, email *hrobbins@fieldmuseum.org.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Field Museum. The National Park Service is not responsible for the determinations in this notice. Additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records held by the Field Museum.

Description

Human remains representing, at minimum, one individual were removed from Glacier and Pondera Counties, MT. The human remains—a cranium belonging to an adult male—were excavated from the Blackfeet Indian Reservation by George A. Dorsey and accessioned by the Field Museum in 1897. No known individual was identified. No associated funerary objects are present.

Cultural Affiliation

The human remains in this notice are connected to one or more identifiable earlier groups, tribes, peoples, or cultures. There is a relationship of shared group identity between the identifiable earlier groups, tribes, peoples, or cultures and one or more Indian Tribes or Native Hawaiian organizations. The following types of information were used to reasonably trace the relationship: geographical and historical.

Determinations

Pursuant to NAGPRA and its implementing regulations, and after consultation with the appropriate Indian Tribes and Native Hawaiian organizations, the Field Museum has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- There is a relationship of shared group identity that can be reasonably traced between the human remains described in this notice and the Blackfeet Tribe of the Blackfeet Indian Reservation of Montana.

Requests for Repatriation

Written requests for repatriation of the human remains in this notice must be sent to the Responsible Official identified in **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains in this notice to a requestor may occur on or after December 23, 2022. If competing requests for repatriation are received, the Field Museum must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains are considered a single request and not competing requests. The Field Museum is responsible for sending a copy of this notice to the Indian Tribe identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.9, 10.10, and 10.14.

Dated: November 16, 2022.

Melanie O'Brien,

Manager, National NAGPRA Program.

BILLING CODE 4312–52–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1277]

Certain Smart Thermostats, Load Control Switches, and Components Thereof; Notice of Request for Submissions on the Public Interest

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that on November 16, 2022, the presiding administrative law judge (''ALJ'') issued an Initial Determination on Violation of Section 337. The ALJ also issued a Recommended Determination on remedy and bonding should a violation be found in the above-captioned investigation. The Commission is soliciting submissions on public interest issues raised by the recommended relief should the Commission find a violation. This notice is soliciting comments from the public only.

FOR FURTHER INFORMATION CONTACT: Panyin A. Hughes, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–3042. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: Section 337 of the Tariff Act of 1930 provides that, if the Commission finds a violation, it shall exclude the articles concerned from the United States:

> unless, after considering the effect of such exclusion upon the public health and welfare, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, and United States consumers, it finds that such articles should not be excluded from entry.

19 U.S.C. 1337(d)(1). A similar provision applies to cease and desist orders. 19 U.S.C. 1337(f)(1).

The Commission is soliciting submissions on public interest issues raised by the recommended relief should the Commission find a violation, specifically: a limited exclusion order directed to certain smart thermostats, load control switches, and components thereof imported, sold for importation, and/or sold after importation by respondents Alarm.com Holdings, Inc. of Tysons, Virginia; Alarm.com Inc. of Tysons, Virginia; Ecobee, Inc. of Toronto, Ontario, Canada; EnergyHub, Inc. of Brooklyn, New York; Itron, Inc. of Liberty Lake, Washington; Resideo Smart Homes Technology (Tianjin) of Tianjin, China; and Ademco Inc. of Melville, New York (collectively, ''Respondents''); and cease and desist orders directed to Respondents. Parties are to file public interest submissions pursuant to 19 CFR 210.50(a)(4).

The Commission is interested in further development of the record on the public interest in this investigation. Accordingly, members of the public are invited to file submissions of no more than five (5) pages, inclusive of attachments, concerning the public interest in light of the ALJ's Recommended Determination on Remedy and Bonding issued in this

investigation on November 16, 2022. Comments should address whether issuance of the recommended remedial orders in this investigation, should the Commission find a violation, would affect the public health and welfare in the United States, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, or United States consumers.

In particular, the Commission is interested in comments that:

(i) explain how the articles potentially subject to the recommended remedial orders are used in the United States;

(ii) identify any public health, safety, or welfare concerns in the United States relating to the recommended orders;

(iii) identify like or directly competitive articles that complainant, its licensees, or third parties make in the United States which could replace the subject articles if they were to be excluded;

(iv) indicate whether complainant, complainant's licensees, and/or third-party suppliers have the capacity to replace the volume of articles potentially subject to the recommended orders within a commercially reasonable time; and

(v) explain how the recommended orders would impact consumers in the United States.

Written submissions must be filed no later than by close of business on December 16, 2022.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above. The Commission's paper filing requirements in 19 CFR 210.4(f) are currently waived. 85 FR 15798 (Mar. 19, 2020). Submissions should refer to the investigation number (''Inv. No. 337–TA–1277'') in a prominent place on the cover page and/or the first page. (*See Handbook for Electronic Filing Procedures, https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf.*). Persons with questions regarding filing should contact the Secretary (202–205–2000).

Any person desiring to submit a document to the Commission in confidence must request confidential treatment by marking each document with a header indicating that the document contains confidential information. This marking will be deemed to satisfy the request procedure set forth in Rules 201.6(b) and 210.5(e)(2) (19 CFR 201.6(b) & 210.5(e)(2)). Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. Any non-party wishing to submit comments containing confidential information must serve those comments on the parties to the investigation pursuant to the applicable Administrative Protective Order. A redacted non-confidential version of the document must also be filed simultaneously with any confidential filing and must be served in accordance with Commission Rule 210.4(f)(7)(ii)(A) (19 CFR 210.4(f)(7)(ii)(A)). All information, including confidential business information and documents for which confidential treatment is properly sought, submitted to the Commission for purposes of this investigation may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements. All nonconfidential written submissions will be available for public inspection on EDIS.

This action is taken under the authority of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in Part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: November 17, 2022.

Katherine Hiner,

Acting Secretary to the Commission.

[FR Doc. 2022–25491 Filed 11–22–22; 8:45 am]

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Bureau of Alcohol, Tobacco, Firearms and Explosives

[OMB Number 1140–0091]

Agency Information Collection Activities; Proposed eCollection of eComments Requested; National Response Team Customer Satisfaction Survey

AGENCY: Bureau of Alcohol, Tobacco, Firearms and Explosives, Department of Justice.

ACTION: 30-Day notice.

SUMMARY: The Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), Department of Justice (DOJ) will submit the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed collection OMB 1140–0091 (National Response Team Customer Satisfaction Survey) is being published to obtain comments from the public and affected agencies.

DATES: Comments are encouraged and will be accepted for an additional 30 days until December 23, 2022.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Evaluate whether and, if so, how the quality, utility, and clarity of the information to be collected can be enhanced; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

1. *Type of Information Collection:* Extension without Change of a Currently Approved Collection.

2. *The Title of the Form/Collection:* National Response Team Customer Satisfaction Survey.

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:*

Form number: None.

Component: Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Department of Justice.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:*

Primary: State, Local or Tribal Government.

Other: None.

Abstract: The National Response Team Customer Satisfaction Survey is used to obtain feedback regarding services provided by the ATF National Response Team.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An estimated 32 respondents will utilize the survey once a year, and it will take each respondent approximately 15 minutes to complete their responses.

6. *An estimate of the total public burden (in hours) associated with the collection:* The estimated annual public burden associated with this collection is 8 hours, which is equal to 32 (total respondents) * 1 (# of response per respondent) * .25 (15 minutes).

If additional information is required contact: Robert Houser, Department Clearance Officer, Policy and Planning Staff, Office of the Chief Information Officer, Justice Management Division, United States Department of Justice, Two Constitution Square, 145 N Street NE, 3.E–206, Washington, DC 20530.

Dated: November 17, 2022.

Robert Houser,

Department Clearance Officer, Policy and Planning Staff, Office of the Chief Information Officer, U.S. Department of Justice.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—Naval Surface Technology & Innovation Consortium

Notice is hereby given that, on October 17, 2022, pursuant to Section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* (''the Act''), Naval Surface Technology & Innovation Consortium (''NSTIC'') has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership. The notifications were filed for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, Alirrium LLC, Reston, VA; Amentum Services, Inc., Germantown, MD; Armtec Countermeasures Company, Coachella, CA; ASEG, Inc., San Diego, CA; Board of Trustees of the University of Illinois, Urbana, IL; Breault Research Organization, Tucson, AZ; Communications & Power Industries LLC, Palo Alto, CA; dataCon, Inc., Chelmsford, MA; Fairlead Integrated LLC, Portsmouth, VA; Fathom5 Corporation, Austin, TX; Fiore Industries, Inc., Albuquerque, NM; Herdt Consulting, Inc., Chelsea, AL; Integrated Consultants Incorporated, El Cajon, CA; ITA International LLC, Newport News, VA; iWorks Corporation, Reston, VA; Northrop Grumman Systems Corporation, Corrinne, UT; Optical Engines, Inc., Colorado Springs, CO; Pacific Star Communications (dba PacStar), Portland, OR; RADA Technologies, LLC, Germantown, MD; Telesto Group LLC, West Palm Beach, FL; and The Durbin Group, LLC, Fredericksburg, VA, have been added as parties to this venture.

Also, Southwest Dynamic Systems LLC, Albuquerque, NM, has withdrawn as a party to this venture.

No other changes have been made in either the membership or planned activity of the group research project. Membership in this group research project remains open, and NSTIC intends to file additional written notifications disclosing all changes in membership.

On October 8, 2019, NSTIC filed its original notification pursuant to Section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to Section 6(b) of the Act on November 12, 2019 (84 FR 61071).

The last notification was filed with the Department on June 23, 2022. A notice was published in the **Federal Register** pursuant to Section 6(b) of the Act on August 1, 2022 (87 FR 47006).

BILLING CODE 4410–11–P

DEPARTMENT OF JUSTICE

[OMB Number 1190–0018]

Agency Information Collection Activities: Proposed eCollection; eComments Requested: IER Charge Form

AGENCY: Civil Rights Division, Department of Justice.

ACTION: 60-Day notice.

SUMMARY: The Civil Rights Division, Department of Justice (DOJ), will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for sixty days until January 23, 2023.

FOR FURTHER INFORMATION CONTACT: If you have comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Alberto Ruisanchez, Deputy Special Counsel, USDOJ–CRT–IER, 950 Pennsylvania Avenue NW–4CON, Washington, DC 20530; 202–616–5594.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Overview of This Information Collection

1. *Type of Information Collection:* Extension of a currently approved collection.

2. *Title of the Form/Collection:* IER Charge Form.

3. *Agency form number, if any, and agency component sponsoring the collection:*

Agency form number: Form IER–1
Sponsor: Civil Rights Division, Department of Justice

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* Affected public: General Public. Abstract: The Immigrant and Employee Rights Section (IER) enforces the anti-discrimination provision (§ 274B) of the Immigration and Nationality Act (INA), 8 U.S.C. 1324b. The statute prohibits: (1) citizenship or immigration status discrimination in hiring, firing, or recruitment or referral for a fee, (2) national origin discrimination in hiring, firing, or recruitment or referral for a fee, (3) unfair documentary practices during the employment eligibility verification process (Form I–9 and E-Verify), and (4) retaliation or intimidation for asserting rights or privileges covered by the statute. IER, within the Department's Civil Rights Division, investigates and, where reasonable cause is found, litigates charges alleging discrimination. IER also initiates independent investigations, at times based on information developed during individual charge investigations. Independent investigations normally involve alleged discriminatory policies that potentially affect many employees or applicants. These investigations may result in complaints alleging a pattern or practice of discriminatory activity. If the Department lacks jurisdiction over a particular charge but believes another agency has jurisdiction over the claim, IER may forward the charge to the applicable Federal, state or local agency for any action deemed appropriate.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* It is estimated that 340 individuals will complete each form annually; each response will be completed in approximately 30 minutes.

6. *An estimate of the total public burden (in hours) associated with the collection:* There are an estimated 170 total annual burden hours associated with this collection.

If additional information is required contact: Robert Houser, Department Clearance Officer, Policy and Planning Staff, Justice Management Division, United States Department of Justice, Two Constitution Square, 145 N Street NE, Suite 3E.206, Washington, DC 20530.

Dated: November 18, 2022.

Robert Houser,

Department Clearance Officer for PRA, Policy and Planning Staff, Office of the Chief Information Officer, U.S. Department of Justice.

Agency Information Collection Activities; Proposed eCollection eComments Requested; Extension of Currently Approved Collection

AGENCY: Office on Violence Against Women, Department of Justice.

ACTION: 30-Day notice.

SUMMARY: The Office on Violence Against Women (OVW), Department of Justice, will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 30 days until December 23, 2022.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

1. *Type of Information Collection:* Extension of a currently approved collection.

2. *Title of the Form/Collection:* Financial Capability Form.

3. *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* Form Number: 1122–0030.

Sponsor: Office on Violence Against Women, U.S. Department of Justice.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* The affected public includes non-governmental applicants to OVW grant programs that do not currently (or within the last 3 years) have funding from OVW. In accordance with 2 CFR 200.205, the information is required for assessing the financial risk of an applicant's ability to administer federal funds. The form includes a mix of check box and narrative questions related to the organization's financial systems, policies and procedures.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to*

respond/reply: It is estimated that it will take the approximately 40 respondents (non-governmental) applicants to OVW grant programs approximately 4 hours to complete an online assessment form.

6. *An estimate of the total public burden (in hours) associated with the collection:* The total annual hour burden to complete the data collection forms is 160 hours, that is 40 applicants completing a form once as a new applicant with an estimated completion time for the form being 4 hours.

If additional information is required contact: Robert Houser, Department Clearance Officer, Policy and Planning Staff, Justice Management Division, United States Department of Justice, Two Constitution Square, 145 N Street NE, 3E.206, Washington, DC 20530.

Dated: November 17, 2022.

Robert Houser,

Department Clearance Officer, Policy and Planning Staff, Office of the Chief Information Officer, U.S. Department of Justice.

BILLING CODE 4410–FX–P

DEPARTMENT OF JUSTICE

[OMB Number 1121–0102]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Extension of a Currently Approved Collection: National Prisoner Statistics Program

AGENCY: Bureau of Justice Statistics, Department of Justice.

ACTION: 30-Day notice.

SUMMARY: The Bureau of Justice Statistics, Office of Justice Programs, Department of Justice (DOJ), will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 30 days until December 23, 2022.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact E. Ann Carson, Statistician, Bureau of Justice Statistics, 810 Seventh Street NW, Washington, DC 20531 (email: *elizabeth.carson@usdoj.gov;* telephone: 202–616–3496).

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

1. *Type of Information Collection:* Extension of a Currently Approved Collection.

2. *The Title of the Form/Collection:* National Prisoner Statistics program. The collection includes the following parts: Summary of Sentenced Population Movement, Prison Population Report—U.S. Territories.

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* Form numbers for the questionnaire are NPS–1B (Summary of Sentenced Population Movement) and NPS–1B(T) (Prisoner Population Report—U.S. Territories). The applicable component within the Department of Justice is the Bureau of Justice Statistics, in the Office of Justice Programs.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* For the NPS–1B form, 51 central reporters (one from each state and the Federal Bureau of Prisons) responsible for keeping records on inmates will be asked to provide information for the following categories:

(a) As of December 31, the number of male and female inmates within their custody and under their jurisdiction with maximum sentences of more than one year, one year or less; and unsentenced inmates;

(b) The number of inmates housed in privately operated facilities, county or other local authority correctional facilities, or in other state or Federal facilities on December 31;

(c) Prison admission information in the calendar year for the following categories: new court commitments, parole violators, other conditional release violators returned, transfers from other jurisdictions, AWOLs and escapees returned, and returns from appeal and bond;

(d) Prison release information in the calendar year for the following categories: expirations of sentence, commutations, other conditional releases, probations, supervised mandatory releases, paroles, other conditional releases, deaths by cause, AWOLs, escapes, transfers to other jurisdictions, and releases to appeal or bond;

(e) Number of inmates under jurisdiction on December 31 by race and Hispanic origin;

(f) Number of inmates under physical custody on December 31 classified as non-citizens; U.S. citizens; and unsentenced inmates;

(g) Number of inmates under physical custody on December 31 who are citizens of the U.S. with maximum sentences of more than one year, one year or less; and unsentenced inmates;

(h) The source of U.S. citizenship data;

(i) Testing of incoming inmates for HIV; and HIV infection and AIDS cases on December 31; and

(j) The aggregated rated, operational, and/or design capacities, by sex, of the state/BOP's correctional facilities at year-end.

For the NPS–1B(T) form, five central reporters from the U.S. Territories and Commonwealths of Guam, Puerto Rico, the Northern Mariana Islands, the Virgin Islands, and American Samoa will be asked to provide information for the following categories for the calendar year just ended, and, if available, for the previous calendar year:

(a) As of December 31, the number of male and female inmates within their custody and under their jurisdiction with maximum sentences of more than one year, one year or less; and unsentenced inmates; and an assessment of the completeness of these counts (complete, partial, or estimated)

(b) The number of inmates under jurisdiction on December 31 but in the custody of facilities operated by other jurisdictions' authorities solely to reduce prison overcrowding;

(c) Number of inmates under jurisdiction on December 31 by race and Hispanic origin;

(d) The aggregated rated, operational, and/or design capacities, by sex, of the

territory's/Commonwealth's correctional facilities at year-end.

The Bureau of Justice Statistics uses this information in published reports and for the U.S. Congress, Executive Office of the President, practitioners, researchers, students, the media, and others interested in criminal justice statistics.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* Data collection conducted in 2023, 2024, and 2025 (collecting prison data from 2022, 2023, and 2024, respectively) will require each respondent to spend an average of 6.5 total hours to respond to the NPS–1B form. 5 respondents, each taking an average of 2 hours to respond to the NPS–1B(T) form. The burden estimates are based on feedback from respondents, and the burden remains the same as the previous clearance.

6. *An estimate of the total public burden (in hours) associated with the collection:* There is an estimated 1,025 total burden hours associated with this collection for the three years of data collection, or approximately 341.5 hours for each year.

If additional information is required contact: Robert Houser, Department Clearance Officer, Policy and Planning Staff, Justice Management Division, United States Department of Justice, Two Constitution Square, 145 N Street NE, 3E.206, Washington, DC 20530.

Dated: November 17, 2022.

Robert Houser,

Department Clearance Officer for PRA, Policy and Planning Staff, Office of the Chief Information Officer, U.S. Department of Justice.

BILLING CODE 4410–18–P

DEPARTMENT OF LABOR

Employee Benefits Security Administration

Advisory Council on Employee Welfare and Pension Benefit Plans; Notice of Charter Renewal

In accordance with section 512(a)(1) of the Employee Retirement Income Security Act of 1974 (ERISA) and the provisions of the Federal Advisory Committee Act and its implementing regulations issued by the General Services Administration (GSA), the charter for the Advisory Council on Employee Welfare and Pension Benefit Plans is renewed.

The Advisory Council on Employee Welfare and Pension Benefit Plans shall advise the Secretary of Labor on technical aspects of the provisions of ERISA and shall provide reports and/or recommendations each year on its findings to the Secretary of Labor. The Council shall be composed of fifteen members appointed by the Secretary. Not more than eight members of the Council shall be of the same political party. Three of the members shall be representatives of employee organizations (at least one of whom shall be a representative of any organization members of which are participants in a multiemployer plan); three of the members shall be representatives of employers (at least one of whom shall be a representative of employers maintaining or contributing to multiemployer plans); three members shall be representatives appointed from the general public (one of whom shall be a person representing those receiving benefits from a pension plan); and there shall be one representative each from the fields of insurance, corporate trust, actuarial counseling, investment counseling, investment management, and accounting.

The Advisory Council will report to the Secretary of Labor. It will function solely as an advisory body and in compliance with the provisions of the Federal Advisory Committee Act, and its charter will be filed under the Act. For further information, contact Christine Donahue, Executive Secretary, Advisory Council on Employee Welfare and Pension Benefit Plans, U.S. Department of Labor, 200 Constitution Avenue NW, Suite N–5700, Washington, DC 20210, telephone (202) 693–8641 or via email to *donahue.christine@dol.gov.*

Signed at Washington, DC.

Lisa M. Gomez,

Assistant Secretary, Employee Benefits Security Administration.

BILLING CODE 4510–29–P

DEPARTMENT OF LABOR

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Certificate of Electrical Training and Applications for MSHA Approved Tests and State Tests Administered as Part of an MSHA-Approved State Program

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Mine Safety and Health Administration (MSHA)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that the agency receives on or before December 23, 2022.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) if the information will be processed and used in a timely manner; (3) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (4) ways to enhance the quality, utility and clarity of the information collection; and (5) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

FOR FURTHER INFORMATION CONTACT: Nora Hernandez by telephone at 202–693–8633, or by email at *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: Under section 305(g) of the Mine Act, all electric equipment located at a coal mine shall be frequently examined, tested, and properly maintained by a qualified person to assure safe operating conditions. The determination of a person as qualified to examine, test, and maintain electric equipment at a coal mine is further defined under the provisions of Title 30 CFR 75.153 and 77.103. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on August 19, 2022 (87 FR 51152).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition,

notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Agency: DOL–MSHA.

Title of Collection: Certificate of Electrical Training and Applications for MSHA Approved Tests and State Tests Administered as Part of an MSHA-approved State Program.

OMB Control Number: 1219–0001.

Affected Public: Businesses or other for-profits institutions.

Total Estimated Number of Respondents: 294.

Total Estimated Number of Responses: 1632.

Total Estimated Annual Time Burden: 772 hours.

Total Estimated Annual Other Costs Burden: $299.

(Authority: 44 U.S.C. 3507(a)(1)(D))

Nora Hernandez,

Departmental Clearance Officer.

DEPARTMENT OF LABOR

Agency Information Collection Activities; Consumer Expenditure Surveys: Quarterly Interview and Diary

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Bureau of Labor Statistics (BLS)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that the agency receives on or before December 23, 2022.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

FOR FURTHER INFORMATION CONTACT: Nicole Bouchet by telephone at 202–693–0213, or by email at *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: The Consumer Expenditure Surveys are used to gather information on expenditures, income, and other related subjects. These data are used to periodically update the national Consumer Price Index. In addition, the data are used by a variety of researchers in academia, government agencies, and the private sector. The data are collected from a national probability sample of households designed to represent the total civilian non-institutional population. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on September 15, 2022 (87 FR 56713).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2006–0028]

Eurofins Electrical and Electronic Testing NA, Inc. a/k/a MET Laboratories, Inc.: Application for Expansion of Recognition

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice.

SUMMARY: In this notice, OSHA announces the application of Eurofins Electrical and Electronic Testing NA, Inc. a/k/a MET Laboratories, Inc., for expansion of the recognition as a Nationally Recognized Testing Laboratory (NRTL) and presents the agency's preliminary finding to grant the application.

DATES: Submit comments, information, and documents in response to this notice, or requests for an extension of time to make a submission, on or before December 8, 2022.

ADDRESSES: Submit comments by any of the following methods:

Electronically: Submit comments and attachments electronically at *http://www.regulations.gov,* which is the Federal eRulemaking Portal. Follow the instructions online for making electronic submissions.

Docket: To read or download comments or other material in the docket, go to *http://www.regulations.gov.* All documents in the docket (including this **Federal Register** notice) are listed in the *http://www.regulations.gov* index; however, some information (*e.g.,* copyrighted material) is not publicly available to read or download through the website.

All submissions, including copyrighted material, are available for inspection through the OSHA Docket Office. Contact the OSHA Docket Office at (202) 693–2350 (TTY (877) 889–5627) for assistance in locating docket submissions.

Instructions: All submissions must include the agency name and the OSHA docket number (OSHA–2006–0028). OSHA places comments and other materials, including any personal information, in the public docket without revision, and these materials will be available online at *http://www.regulations.gov.* Therefore, the agency cautions commenters about submitting statements they do not want made available to the public, or submitting comments that contain personal information (either about themselves or others) such as Social Security numbers, birth dates, and medical data.

Extension of comment period: Submit requests for an extension of the comment period on or before December 8, 2022 to the Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue NW, Room N–3653, Washington, DC 20210, or by fax to (202) 693–1644.

FOR FURTHER INFORMATION CONTACT: Information regarding this notice is available from the following sources:

Press inquiries: Contact Mr. Frank Meilinger, Director, OSHA Office of Communications, phone: (202) 693–1999 or email: *meilinger.francis2@dol.gov.*

General and technical information: Contact Mr. Kevin Robinson, Director, Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, phone: (202) 693–2110 or email: *robinson.kevin@dol.gov.*

SUPPLEMENTARY INFORMATION:

I. Notice of the Application for Expansion

OSHA is providing notice that Eurofins Electrical and Electronic Testing NA, Inc. a/k/a MET Laboratories, Inc. (MET), is applying for expansion of the current recognition as a NRTL. MET requests the addition of two test standards to the NRTL scope of recognition.

OSHA recognition of a NRTL signifies that the organization meets the requirements specified in 29 CFR 1910.7. Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products covered within the scope of recognition. Each NRTL's scope of recognition includes: (1) the type of products the NRTL may test, with each type specified by the applicable test standard; and (2) the recognized site(s) that has/have the technical capability to perform the product-testing and product-certification activities for test standards within the NRTL's scope. Recognition is not a delegation or grant of government authority; however, recognition enables employers to use products approved by the NRTL to meet OSHA standards that require product testing and certification.

The agency processes applications by a NRTL for initial recognition and for an expansion or renewal of this recognition, following requirements in Appendix A to 29 CFR 1910.7. This appendix requires that the agency publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the application and provides a preliminary finding. In the second notice, the agency provides a final decision on the application. These notices set forth the NRTL's scope of recognition or modifications of that scope. OSHA maintains an informational web page for each NRTL, including MET, which details the NRTL's scope of recognition. These pages are available from the OSHA website at *http://www.osha.gov/dts/otpca/nrtl/index.html.*

MET currently has one facility (site) recognized by OSHA for product testing and certification, with the headquarters located at: MET Laboratories, Inc., 914 West Patapsco Avenue, Baltimore, Maryland 21230. A complete list of MET's scope of recognition is available at *https://www.osha.gov/nationally-recognized-testing-laboratory-program/met.*

II. General Background on the Application

MET submitted one application, dated September 3, 2021 (OSHA–2006–0028–0092), to expand the recognition to include two additional test standards. OSHA staff performed a detailed analysis of the application packet and reviewed other pertinent information. OSHA did not perform any on-site reviews in relation to this application.

Table 1, below, lists the appropriate test standards found in MET's application for expansion for testing and certification of products under the NRTL Program.

TABLE 1—PROPOSED APPROPRIATE TEST STANDARDS FOR INCLUSION IN MET'S NRTL SCOPE OF RECOGNITION

Test standards	Test standard title
UL 698A	Standard for Industrial Control Panels Related to Hazardous (Classified) Locations.
UL 60079–31	Standard for Safety Explosive Atmospheres—Part 31: Equipment Dust Ignition Protection by Enclosure "t".

III. Preliminary Findings on the Application

MET submitted an acceptable application for expansion of the scope of recognition. OSHA's review of the application file, and pertinent documentation, indicate that MET has met the requirements prescribed by 29 CFR 1910.7 for expanding the recognition to include the addition of the two test standards for NRTL testing and certification listed in Table 1. This preliminary finding does not constitute an interim or temporary approval of MET's application.

OSHA seeks comment on this preliminary determination.

IV. Public Participation

OSHA welcomes public comment as to whether MET meets the requirements of 29 CFR 1910.7 for expansion of recognition as a NRTL. Comments should consist of pertinent written documents and exhibits.

Commenters needing more time to comment must submit a request in writing, stating the reasons for the request by the due date for comments. OSHA will limit any extension to 10 days unless the requester justifies a longer time period. OSHA may deny a request for an extension if it is not adequately justified.

To review copies of the exhibits identified in this notice, as well as comments submitted to the docket, contact the Docket Office, Occupational Safety and Health Administration, U.S. Department of Labor. These materials also are generally available online at

https://www.regulations.gov under Docket No. OSHA–2006–0028 (for further information, see the ''*Docket*'' heading in the section of this notice titled **ADDRESSES**).

OSHA staff will review all comments to the docket submitted in a timely manner. After addressing the issues raised by these comments, staff will make a recommendation to the Assistant Secretary of Labor for Occupational Safety and Health on whether to grant MET's application for expansion of the scope of recognition. The Assistant Secretary will make the final decision on granting the application. In making this decision, the Assistant Secretary may undertake other proceedings prescribed in Appendix A to 29 CFR 1910.7.

OSHA will publish a public notice of the final decision in the **Federal Register**.

V. Authority and Signature

James S. Frederick, Deputy Assistant Secretary of Labor for Occupational Safety and Health, authorized the preparation of this notice. Accordingly, the agency is issuing this notice pursuant to 29 U.S.C. 657(g)(2), Secretary of Labor's Order No. 8–2020 (85 FR 58393, Sept. 18, 2020), and 29 CFR 1910.7.

Signed at Washington, DC, on November 17, 2022.

James S. Frederick,

Deputy Assistant Secretary of Labor for Occupational Safety and Health.

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2022–0011]

Maritime Advisory Committee on Occupational Safety and Health (MACOSH): Request for Nominations

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Request for nominations.

SUMMARY: OSHA invites interested persons to submit nominations for membership on the Maritime Advisory Committee on Occupational Safety and Health (MACOSH).

DATES: Nominations for MACOSH membership must be submitted by January 13, 2023.

ADDRESSES: You may submit nominations and supporting materials, including attachments, electronically at: *http://www.regulations.gov,* the Federal eRulemaking Portal. Follow the online instructions for submitting nominations.

OSHA will post submissions in response to this **Federal Register** notice, including personal information, in the public docket, which is available online. Therefore, OSHA cautions interested parties about submitting personal information such as Social Security numbers and birthdates.

Docket: To read or download submissions or other material in the docket, go to *http://www.regulations.gov.* All documents in the public docket are listed in the index; however, some documents (*e.g.,* copyrighted material) are not publicly available to read or download through *www.regulations.gov.* All submissions, including copyrighted material, are available for inspection through the OSHA Docket Office. Contact the OSHA Docket Office at (202) 693–2350 (TTY (877) 889–5627) for assistance in locating docket submissions.

FOR FURTHER INFORMATION CONTACT:

Press inquiries: Mr. Frank Meilinger, Director, OSHA Office of Communications, U.S. Department of Labor, telephone: (202) 693–1999; email: *meilinger.francis2@dol.gov.*

General information and technical inquiries: Ms. Amy Wangdahl, Director, Office of Maritime and Agriculture, Directorate of Standards and Guidance, Occupational Safety and Health Administration, U.S. Department of Labor, telephone (202) 693–2066; email: *wangdahl.amy@dol.gov.*

SUPPLEMENTARY INFORMATION: The Secretary of Labor (Secretary) invites interested persons to submit nominations for membership on MACOSH.

I. Background

MACOSH was established by Section 7(d) of the Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651, 656) to advise the Secretary of Labor through the Assistant Secretary of Labor for Occupational Safety and Health (Assistant Secretary) in formulating maritime industry standards and regarding matters pertaining to the administration of the OSH Act related to the maritime industry. MACOSH is a non-discretionary advisory committee of indefinite duration (see section 3510 of the National Defense Authorization Act of 2020 (Pub. L. 116–92)).

MACOSH operates in accordance with the Federal Advisory Committee Act (FACA) (5 U.S.C. App. 2), its implementing regulations (41 CFR parts 101–6 and 102–3), and OSHA's regulations on Advisory Committees (29 CFR part 1912). Pursuant to FACA (5 U.S.C. App. 2, 14(b)(2)), the MACOSH charter must be renewed every two years.

The Committee meets approximately two times per year. Committee members serve without compensation, but OSHA provides travel and per diem expenses. Members serve a two-year term, which begins from the date of appointment by the Secretary of Labor. The current MACOSH membership will expire on April 12, 2023.

II. MACOSH Membership

MACOSH consists of not more than 15 members appointed by the Secretary of Labor. The agency seeks committed members who have a strong interest in the safety and health of workers in the maritime industries. The U.S. Department of Labor is committed to equal opportunity in the workplace. The Secretary of Labor will appoint members to create a broad-based, balanced, and diverse committee reflecting the shipyard, longshoring, and commercial fishing industries, and representing affected interests such as employers, employees, safety and health professional organizations, government organizations with interests or activities related to the maritime industry, academia, and the public.

Nominations of new members, or resubmissions of current or former members, will be accepted in all categories of membership. Interested persons may nominate themselves or submit the name of another person whom they believe to be interested in and qualified to serve on MACOSH. Nominations may also be submitted by organizations from one of the categories listed above (*e.g.,* employer, employee, public, safety and health professional organization, state safety and health agency, academia).

III. Submission Requirements

Any individual or organization may nominate one or more qualified persons for membership on MACOSH. Nominations must include the following information:

(1) The nominee's name, contact information, and current employment or position;

(2) The nominee's resume or curriculum vitae, including prior membership on MACOSH and other relevant organizations and associations;

(3) The maritime industry interest (*e.g.,* employer, employee, public, safety and health professional organization, state safety and health agency, academia) that the nominee is qualified to represent;

(4) A summary of the background, experience, and qualifications that addresses the nominee's suitability for membership; and

(5) A statement that the nominee is aware of the nomination, is willing to regularly attend and participate in MACOSH meetings, and has no conflicts of interest that would preclude membership on MACOSH.

OSHA will conduct a basic background check of candidates before their appointment to MACOSH. The background check will involve accessing publicly available, internet-based sources.

IV. Member Selection

The Secretary of Labor will select MACOSH members based on their experience, knowledge, and competence in the field of occupational safety and health, particularly in the maritime industries. Information received through this nomination process, and other relevant sources of information, will assist the Secretary of Labor in appointing members to MACOSH. In selecting MACOSH members, the Secretary of Labor will consider individuals nominated in response to this **Federal Register** notice, as well as other qualified individuals. OSHA will publish a list of MACOSH members in the **Federal Register**.

Authority and Signature

James S. Frederick, Deputy Assistant Secretary of Labor for Occupational Safety and Health, authorized the preparation of this notice pursuant to 29 U.S.C. 653, 655, and 656, FACA, as amended (5 U.S.C. App. 2), the implementing regulations (41 CFR part 102–3), Department of Labor Manual Series Chapter 1–900 (August 31, 2020), OSHA's regulations on Advisory Committees (29 CFR part 1912), and Secretary of Labor's Order No. 8–2020 (85 FR 58393, Sept. 18, 2020).

Signed at Washington, DC, on November 17, 2022.

James S. Frederick,

Deputy Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510–26–P

MILLENNIUM CHALLENGE CORPORATION

[MCC FR 22–16]

Privacy Act of 1974; System of Records

AGENCY: Millennium Challenge Corporation.

ACTION: Notice of a new system of records.

SUMMARY: The Millennium Challenge Corporation (MCC) proposes to add a new system of records to its inventory of records systems subject to the Privacy Act of 1974, as amended. This action complies with the requirements of the Privacy Act to publish in the **Federal Register** notice of MCCs intent to collect and maintain records.

DATES: Comments must be received no later than November 30, 2022.

ADDRESSES: Send written comments to the Millennium Challenge Corporation, ATTN: Christopher Ice, Chief Privacy Officer, Department of Administration and Finance, 1099 Fourteenth Street NW, Suite 700, Washington, DC 20005–3550.

FOR FURTHER INFORMATION CONTACT: Christopher E. Ice, Chief Privacy Officer, Millennium Challenge Corporation, *icece@mcc.gov,* (202) 521–2652, or Miguel G. Adams, Deputy Privacy Officer, Millennium Challenge Corporation, *adamsmg@mcc.gov,* (202) 521–3574.

SUPPLEMENTARY INFORMATION: MCC is giving notice of a system of records pursuant to the Privacy Act of 1974 (5 U.S.C. 552a) for the MCC Evidence Platform. This platform is used to disseminate the data and documentation produced by MCC-funded data activities. The records information collected is required for researchers to obtain or retain a benefit of accessing MCC-funded data managed and shared through a public-facing platform by University of Michigan's Interagency Consortium for Political and Social Research (ICPSR). To manage access to specific data that must be protected to maintain data respondent confidentiality, ICPSR acts as MCC's data steward. The information collection is used by ICPSR to review and vet data users requesting access to restricted-use data. The information collected includes: (i) Restricted Data Use Agreement (RDUA) signed by both the data user and a representative of their institution; (ii) Documentation of Institutional Review Board (IRB) approval or exemption; (iii) research proposal; (iv) name and contact information of all researchers at the institution who will have access to the data; (v) list of data sets requested and why needed; and (vi) CV/Resume/Biosketch for each user that will access the restricted-use data.

SYSTEM NAME AND NUMBER:

MCC-Evidence Platform. MCC–003.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Millennium Challenge Corporation—1099 Fourteenth Street NW, Suite 700, Washington, DC 20005–3550

ICPSR—330 Packard Street, Ann Arbor, MI 48104

SYSTEM MANAGER(S):

My H. Le, Director Digital Services, Millennium Challenge Corporation, *lemh@mcc.gov,* 202–521–3664.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

22 U.S.C. 7705, Chapter 84—Millennium Challenge.

PURPOSE(S) OF THE SYSTEM:

The system will:

- Store and share de-identified data for public-use—To directly replace the MCC Evaluation Catalog, the platform is the mechanism by which MCC shares data and documentation that is de-identified by MCC contractors, reviewed for clearance by the MCC Disclosure Review Board (DRB), and posted to the new platform.
- Store and share restricted-access data—Given promises of confidentiality and MCC's commitments to protecting the privacy of data activity participants, some data cannot be de-identified in a way that reduces re-identification risk and retains the usability of the data for accountability and learning objectives. In cases where limited data sharing is facilitated by the informed consent process, this data can be prepared for sharing through a restricted-access mechanism which carefully protects access to data for specific statistical analysis. The platform is the mechanism by which MCC shares restricted-access data through an ICPSR-managed Virtual Data Enclave (VDE) following preparation by MCC contractors, review by the MCC DRB, and deposit of the restricted-access data with ICPSR.
- Collects:

(i) Restricted Data Use Agreement (RDUA) signed by both the data user and a representative of their institution;

(ii) Documentation of Institutional Review Board (IRB) approval or exemption;

(iii) Research proposal;

(iv) Name and contact information of all researchers at the institution who will have access to the data;

(v) List of data sets requested and why needed; and

(vi) CV/Resume/Biosketch—defining the qualifications the individual has to lead statistical analysis of the proposed research analysis.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

- US Congress, staffers, and general public;
- Country partners; and
- Academic researchers, faculty, and students.

CATEGORIES OF RECORDS IN THE SYSTEM:

(i) Restricted Data Use Agreement (RDUA) signed by both the data user and a representative of their institution; (ii) Documentation of Institutional Review Board (IRB) approval or exemption; (iii) research proposal; (iv) name and contact information of all researchers at the institution who will have access to the data; (v) list of data sets requested and why needed; and (vi) CV/Resume/Biosketch—defining the qualifications the individual has to lead statistical analysis of the proposed research analysis.

RECORD SOURCE CATEGORIES:

From the individual.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records or information contained in this system may be disclosed to authorized entities, as determined to be relevant and necessary, outside MCC as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

- Audits and oversight;
- Congressional inquiries;
- For investigations of potential violations of law;
- With the National Archives and Records Administration (NARA) for records management purposes; and
- For data breach and mitigation response.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

This system is electronically stored on a central computer database, hosted by ICPSR.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records are retrievable by personal name, organizational affiliation name, or a combination of search functions.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

MCC retains records in accordance with the National Archives and Records Administration (NARA), General Records Schedule (GRS).

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

MCC safeguards the information in accordance with applicable laws, rules, and policies, including the Federal Information Security Modernization Act of 2014; OMB Circular A–130, Management of Federal Resources; and MCC policies and procedures. MCC protects records from unauthorized access through appropriate administrative, physical, and technical safeguards. These safeguards include restricting access to authorized personnel who have need-to-know, and the process of authentication using user identifications (IDs) and passwords that function as an identity and authentication method of access. Personnel with authorized access to the system have received training in the proper handling of Privacy Act information and in information security requirements for both paper copies and electronically stored information.

RECORD ACCESS PROCEDURES:

Individuals seeking knowledge of the system's records must submit a written request to the MCC Privacy Officer, at the above mailing address, clearly marked as ''Privacy Act Request'' on the envelope and letter. The request must include the requestor's full name, current address, the name or number of the system to be searched, and if possible, the record identification number. The request must be signed by either notarized signature or by signature under penalty of perjury under 28 U.S.C. 1746.

CONTESTING RECORD PROCEDURES:

Same as the Records Access Procedure above; the request should also clearly and concisely describe the information contested, the reasons for contesting it, and the proposed amendment sought, pursuant to 45 CFR 5b.7.

NOTIFICATION PROCEDURES:

Same as Records Access Procedures.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

None.

Dated: November 18, 2022.

Thomas G. Hohenthaner,

Acting VP/General Counsel and Corporate Secretary.

[FR Doc. 2022–25540 Filed 11–22–22; 8:45 am]

BILLING CODE 9211–03–P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (22–093)]

Notice of Intent To Grant an Exclusive, Co-Exclusive or Partially Exclusive Patent License

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of intent to grant exclusive, co-exclusive or partially exclusive patent license.

SUMMARY: NASA hereby gives notice of its intent to grant an exclusive, co-exclusive or partially exclusive patent license to practice the inventions described and claimed in the patents and/or patent applications listed in **SUPPLEMENTARY INFORMATION** below.

DATES: The prospective exclusive, co-exclusive or partially exclusive license may be granted unless NASA receives written objections including evidence and argument, no later than December 8, 2022 that establish that the grant of the license would not be consistent with the requirements regarding the licensing of Federally owned inventions as set forth in the Bayh-Dole Act and implementing regulations. Competing applications completed and received by NASA no later than December 8, 2022 will also be treated as objections to the grant of the contemplated exclusive, co-exclusive or partially exclusive license. Objections submitted in response to this notice will not be made available to the public for inspection and, to the extent permitted by law, will not be released under the Freedom of Information Act.

ADDRESSES:

Objections and Further Information: Written objections relating to the prospective license or requests for further information may be submitted to Agency Counsel for Intellectual Property, NASA Headquarters at email: *hq-patentoffice@mail.nasa.gov.* Questions may be directed to Phone: (202) 358–3437.

SUPPLEMENTARY INFORMATION: NASA intends to grant an exclusive, co-exclusive, or partially exclusive patent license in the United States to practice the inventions described and claimed in U.S. Patent Application Serial No.17/451,643, entitled ''Large Format Fractional Thermal Runaway Calorimeter (L–FTRC)'' to KULR Technology Group, Inc., having its principal place of business in San Diego, California. The fields of use may be limited. NASA has not yet made a final determination to grant the requested license and may deny the requested license even if no objections

are submitted within the comment period.

This notice of intent to grant an exclusive, co-exclusive or partially exclusive patent license is issued in accordance with 35 U.S.C. 209(e) and 37 CFR 404.7(a)(1)(i). The patent rights in these inventions have been assigned to the United States of America as represented by the Administrator of the National Aeronautics and Space Administration. The prospective license will comply with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

Information about other NASA inventions available for licensing can be found online at *http://technology.nasa.gov.*

Helen M. Galus,

Agency Counsel for Intellectual Property.

[FR Doc. 2022–25568 Filed 11–22–22; 8:45 am]

BILLING CODE 7510–13–P

NATIONAL CREDIT UNION ADMINISTRATION

Agency Information Collection Activities: Proposed Collections

AGENCY: National Credit Union Administration (NCUA).

ACTION: Notice and request for comment.

SUMMARY: The National Credit Union Administration (NCUA), as part of a continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to comment on the following extensions of a currently approved collection, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments should be received on or before January 23, 2023 to be assured consideration.

ADDRESSES: Interested persons are invited to submit written comments on the information collection to Dawn Wolfgang, National Credit Union Administration, 1775 Duke Street, Suite 6032, Alexandria, Virginia 22314; email at *PRAComments@NCUA.gov.* Given the limited in-house staff because of the COVID–19 pandemic, email comments are preferred.

FOR FURTHER INFORMATION CONTACT: Address requests for additional information to Dawn Wolfgang at the address above or telephone 703–548–2279.

SUPPLEMENTARY INFORMATION:

OMB Number: 3133–0098.

Type of Review: Extension currently approved collection.

Title: Advertising of Excess Insurance, 12 CFR 740.3.

Abstract: Federally insured credit unions which offer or provide excess insurance coverage for their accounts must indicate the type and amount of such insurance, the name of the carrier and a statement that the carrier is not affiliated with the NCUSIF or the Federal government in all advertising that mentions account insurance. The disclosure requirements under § 740.3 are necessary to ensure that share account holders are aware that their accounts are insured by carriers other than the NCUA.

Affected Public: Private Sector: Not-for-profit institutions.

Estimated Number of Respondents: 291.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Responses: 291.

Estimated Hours per Response: 1.

Estimated Total Annual Burden Hours: 291.

OMB Number: 3133–0130.

Title: Written Reimbursement Policy, 12 CFR 701.33.

Type of Review: Extension of a currently approved collection.

Abstract: Federal Credit Unions (FCUs) may reimburse its board members for reasonable and proper costs incurred in conducting their official responsibilities only if the reimbursement is in accordance with the written reimbursement policies and procedures established by the FCU's board of directors. Access to this plan, and documentation related to its implementation is necessary for NCUA examiners to verify compliance with this requirement.

Affected Public: Private Sector: Not-for-profit institutions.

Estimated Number of Respondents: 3,321.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Responses: 3,321.

Estimated Burden Hours per Response: 0.50.

Estimated Total Annual Burden Hours: 1,661.

OMB Number: 3133–0203.

Title: IRPS 19–1, Exceptions to Employment Restrictions Under Section 205(d) of the Federal Credit Union Act (Second Chance IRPS).

Type of Review: Extension of a currently approved collection.

Abstract: This information collection is required under Section 205(d) of the Federal Credit Union Act (FCU Act) to allow the National Credit Union Administration (NCUA) Board to make an informed decision whether to grant a waiver of the prohibition imposed by law under Section 205(d) of the FCU Act. Section 205(d) of the FCU Act prohibits a person who has been convicted of any criminal offense involving dishonesty or breach of trust, or who has entered into a pretrial diversion or similar program in connection with a prosecution for such offense, from participating in the affairs of a federally-insured credit union except with the prior written consent of the NCUA Board.

Affected Public: Private Sector: Not-for-profit institutions.

Estimated Number of Respondents: 4.

Estimated Number of Responses per Respondent: 1

Estimated Total Annual Responses: 4.

Estimated Burden Hours per Response: 0.75.

Estimated Total Annual Burden Hours: 3.

OMB Number: 3133–0108.

Type of Review: Extension currently approved collection.

Title: Monitoring Bank Secrecy Act Compliance.

Abstract: Section 748.2 of NCUA's regulations, directs credit unions to establish a Bank Secrecy Act (BSA) compliance program that maintains procedures designed to assure and monitor compliance with the requirement of 31 U.S.C., Chap. 53, Subchapter II (sec. 5301–5329), the Bank Secrecy Act (31 U.S.C. 5318(g)), and 31 CFR Chapter X (parts 1000–1099), Financial Crimes Enforcement Network, Department of the Treasury. Each federally insured credit union (FICU) must develop and provide for the continued administration of a BSA compliance program to assure and monitor compliance with the recordkeeping and recording requirements prescribed by the BSA. At a minimum, a compliance program shall provide for a system of internal controls, independent testing for compliance, designation of an individual responsible for coordinating and monitoring day-to-day compliance; and training. NCUA examiners review the program to determine whether the credit union's procedures comply with all BSA requirements.

Affected Public: Private Sector: Not-for-profit institutions.

Estimated Number of Respondents: 5,308.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Responses: 5,308.

Estimated Hours per Response: 16.

Estimated Total Annual Burden Hours: 84,928.

OMB Number: 3133–0204.

Type of Review: Extension currently approved collection.

Title: NCUA Profile.

Form: NCUA Form 4501A.

Abstract: Sections 106 and 202 of the Federal Credit Union Act require federally insured credit unions (FICU) to make financial reports to the NCUA. Section 741.6 prescribes the method in which FICUs must submit this information to NCUA. NCUA Form 4501A, Credit Union Profile, is used to obtain non-financial data relevant to regulation and supervision such as the names of senior management and volunteer officials, and are reported through NCUA's online portal, CUOnline. The financial and statistical information is essential to NCUA in carrying out its responsibility for supervising federal credit unions. The information also enables NCUA to monitor all FICUs with National Credit Union Share Insurance Fund (NCUSIF) insured share accounts.

Affected Public: Private Sector: Not-for-profit institutions.

Estimated Number of Respondents: 5,281.

Estimated Number of Responses per Respondent: 4.

Estimated Total Annual Responses: 21,124.

Estimated Hours per Response: 2.

Estimated Total Annual Burden Hours: 42,248.

Request for Comments: Comments submitted in response to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will become a matter of public record. The public is invited to submit comments concerning: (a) whether the collection of information is necessary for the proper execution of the function of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of the information on the respondents, including the use of automated collection techniques or other forms of information technology.

By Melane Conyers-Ausbrooks, Secretary of the Board, the National Credit Union Administration, on November 17, 2022.

Dated: November 17, 2022.

Dawn D. Wolfgang,

NCUA PRA Clearance Officer.

[FR Doc. 2022–25461 Filed 11–22–22; 8:45 am]

BILLING CODE 7535–01–P

NATIONAL SCIENCE FOUNDATION

Advisory Committee for Social, Behavioral & Economic Sciences; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation (NSF) announces the following meeting:

Name and Committee Code: Advisory Committee for Social, Behavioral & Economic Sciences (#1171).

Date and Time:

December 15, 2022; 1 p.m.–5 p.m. (eastern).

December 16, 2022; 12 p.m.–4 p.m. (eastern).

Place: NSF, 2415 Eisenhower Avenue, Alexandria, VA 22314 (Virtual).

Type of Meeting: Open.

Contact Persons: John Garneski, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314; telephone: 703.292.4519.

Purpose of Meeting: To provide advice, recommendations and counsel on major goals and policies pertaining to engineering programs and activities.

Agenda

- Welcome, Introductions, Approval of Previous Advisory Committee (AC) Meeting Summary, and Preview of Agenda
- Directorate for Social, Behavioral, and Economic Sciences (SBE) Update
- CHIPS + Science Act Overview and SBE Impacts
- SBE Engagement and Partnerships
- Federal Research Public Access Directive
- New AC Member Presentation
- Meeting with NSF Leadership
- Committee on Equal Opportunities in Science and Engineering (CEOSE) Update

Dated: November 18, 2022.

Crystal Robinson,

Committee Management Officer.

[FR Doc. 2022–25524 Filed 11–22–22; 8:45 am]

BILLING CODE 7555–01–P

NATIONAL SCIENCE FOUNDATION

Notice and Request for Comments

AGENCY: National Science Foundation (NSF).

ACTION: Notice and request for comments.

SUMMARY: The National Science Foundation (NSF) is announcing plans to establish this information collection request. In accordance with the Paperwork Reduction Act of 1995, and as part of its continuing effort to reduce paperwork and respondent burden, NSF is providing an opportunity for public comment on this proposed information collection request. After obtaining and considering public comment, NSF will prepare the submission requesting Office of Management and Budget (OMB) clearance of this collection.

DATES: Written comments on this notice must be received by January 23, 2023, for consideration. Comments received after that date will be considered to the extent practicable. Please send comments to the address below.

FOR FURTHER INFORMATION CONTACT: Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 2415 Eisenhower Avenue, Suite W18200, Alexandria, Virginia 22314; telephone (703) 292–7556; or send email to *splimpto@nsf.gov.* Individuals who use a Telecommunications Device for the Deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including federal holidays).

SUPPLEMENTARY INFORMATION:

Title of Collection: Evaluation of NSF's Eddie Bernice Johnson INCLUDES (Inclusion across the Nation of Communities of Learners of Underrepresented Discoverers in Engineering and Science) Initiative (referred to as ''INCLUDES'' hereafter)

OMB Number: 3145–NEW.

Expiration Date of Approval: Not applicable.

Type of Request: Intent to seek approval to establish an information collection request to provide data necessary to evaluate the INCLUDES initiative.

Abstract: INCLUDES is a comprehensive national initiative to enhance U.S. leadership in science, technology, engineering, and mathematics (STEM) discoveries and innovations by catalyzing the STEM enterprise for inclusive change, resulting in a STEM workforce that reflects the diverse population of the Nation. The INCLUDES Initiative supports NSF's commitment to equity, inclusion, and broadening participation in the STEM fields and NSF's strategic objectives communicated in the *NSF Strategic Plan for Fiscal Years (FY) 2022–2026.*

More specifically, the INCLUDES initiative seeks to improve collaborative efforts for systemic change in STEM education and professions for groups that have been historically underrepresented in STEM fields. The historically underrepresented groups include African Americans/Blacks,

Alaska Natives/Native Americans, Hispanics/Latinos, Native Hawaiians, and Other Pacific Islanders, persons with disabilities, persons from economically disadvantaged backgrounds, and women and girls. INCLUDES aims to enhance these historically underrepresented groups' preparation for STEM education and professions, increase their participation in the STEM workforce, and ensure their contributions in STEM.

Significant advancement in the inclusion of underrepresented groups in STEM education and professions is expected to occur through collaboration among a diverse group of institutions that support the pathways of STEM students and professionals. This type of collaboration requires a strong infrastructure to facilitate the work and enable progress toward goals. INCLUDES has established five design elements of collaborative infrastructure that are essential to funded projects: (1) shared vision; (2) partnerships; (3) goals and metrics; (4) leadership and communication; and (5) expansion, sustainability, and scale. The Shared Measures framework for the INCLUDES initiative provides a common structure for documenting funded projects' individual and collective progress toward implementing the design elements of collaborative infrastructure, and implementing systemic approaches to solving broadening participation challenges in STEM.

NSF is requesting OMB approval to collect data for the evaluation of the INCLUDES initiative. The data will be used to:

1. Evaluate the initiative's effectiveness in broadening the participation of historically underrepresented groups in STEM education and the STEM workforce.

2. Assess the maturity of Alliances in building collaborative infrastructure and the degree to which their maturity contributes to progress toward broadening participation outcomes.

3. Document the expansion, sustainability, and scale of the relationships and networks established by the initiative.

4. Examine the degree to which leadership, actions, activities, and structures are inclusive of historically underrepresented groups.

The proposed information collection will use self-completed surveys, interviews, and focus groups to obtain data essential to the evaluation. Data will be collected using:

- A national survey of representatives of the different project types funded by the INCLUDES initiative, including Alliances (the largest funded project type investment), Planning Grants, Design and Development Launch Pilots (DDLPP), Collaborative Change Consortia, Network Connectors, Conferences, and Alliance partners. Specifically, this survey will ask about the demographics of project leads, the engagement of organizations focus on serving underserved communities, the presence of the five elements of collaborative infrastructure, and the impact of the Coordination Hub. Survey data will allow the evaluation to corroborate the information with multiple representatives from each of the above types of projects and with focus group findings. The survey questionnaire will contain mostly close-ended response options with a few open-ended options. Survey findings will inform (1) the determination of the maturity of the Alliances and correlations between their maturity and broadening participation outcomes, (2) the implementation of inclusive and equity-centered practices, and (3) the assessment of the expansion, sustainability, and scale of partnerships and networks.
- Focus groups with Alliance leads and program/project beneficiaries (*i.e.,* the individuals who are expected to gain access to STEM education and professions because of the Alliance's efforts); and leads of Planning Grants, DDLPs, Collaborative Change Consortia, Network Connectors, and Conferences. The focus groups will ask about how Alliances and their partners are inclusive and equitable in their relationships, decision-making processes, project implementation, and engagement of community stakeholders; systemic changes; and impact on program/project beneficiaries. Focus groups findings will allow the evaluation to corroborate the survey findings.
- Interviews with Coordination Hub staff to learn more about implementation outcomes. These findings will corroborate the information collected about the impact of the Hub through the survey and focus groups.

Use of the Information: The data collected will be used for NSF internal reports to inform program decision-making and internal studies of the initiative. Select information may be used for public stakeholder reports. Public reporting of evaluation findings will be in aggregate form, and any personal identifiers will be removed. Plans for public release of findings are consistent with the transparency and reproducibility principle in the NSF Evaluation Policy (*https://www.nsf.gov/od/oia/eac/PDFs/nsf_evaluation_policy_september_2020.pdf,* p. 3), ''NSF promotes transparency in the planning, implementation, and reporting phases of evaluation activities to promote dialogue that enhances quality, enables accountability, and prevents tailoring that influences findings. Transparency is crucial to support reproducibility and contribute to advancing knowledge. Whenever possible, completed evaluations will be released in a timely manner and with sufficient detail to support use of findings (including comparability to the existing literature) and replication.''

Expected respondents: The respondents will be (1) INCLUDES Coordination Hub staff; (2) leads/representatives of Alliances and their partners; (3) program beneficiaries of the Alliances' efforts (*e.g.,* students, faculty, and other individuals from the underrepresented groups who have access to STEM education and professions because of the Alliances); and (4) leads of Planning Grants, DDLPs, Network Connectors, Collaborative Change Consortia, and Conferences. The number of respondents every year from 2023 until 2026 will increase as INCLUDES makes new awards, grant periods conclude for each project type, and projects expand their networks. The estimated total potential respondents for the survey, interviews, and focus group are shown in Table 1.

TABLE 1—ESTIMATED NUMBER OF RESPONDENTS FOR EACH DATA COLLECTION METHOD

	2023	2024	2025	2026	Total
Survey	2,000	2,200	2,400	2,600	9,200
Interviews	6	6	6	6	24
Focus groups	364	354	278	238	1,234

Response rates: For the survey, NSF anticipates a minimum of 50% response rate based on (1) past surveys administered by the Coordination Hub which indicated an average response rate of approximately 40% and (2) studies that suggest a minimum 60% response rate for online surveys is acceptable and reasonable to expect with multiple follow-ups to non-respondents (Fincham, 2008; Hendra & Hill, 2019). For the interviews and focus groups, NSF anticipates a minimum of 75% response rate based on qualitative research studies (Kelley et al., 2003) and 100% response rate for the Coordination Hub staff.

Estimate burden to the public: The amount of time to complete the survey will be approximately 20 minutes. NSF estimates the average annual burden for the survey will be no more than 383 hours (about 6 weeks) per year ([9,200 individuals × 50% response × 20 minutes]/4 years].

The amount of time to participate in the interviews will be approximately 60 minutes. NSF estimates the average annual burden for the evaluation will be no more than 6 hours (almost one day) per [24 individuals × 100% response × 60 minutes]/4 years).

The amount of time to participate in the focus groups will be approximately 60 minutes. NSF estimates the average annual burden for the evaluation will be no more than 231 hours (about 4 weeks) per year ([1,234 individuals × 75% response × 60 minutes]/4 years).

Comments: Written comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of NSF, including suggestions on increasing the practical utility of the information; (b) the accuracy of NSF's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of automated collection techniques or other forms of information technology.

Please submit one copy of your comments by only one method. All submissions received must include the agency name and collection name identified above for this information collection. Commenters are strongly encouraged to transmit their comments electronically via email. Comments, including any personal information provided become a matter of public record. They will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request.

NUCLEAR REGULATORY COMMISSION

[NRC–2021–0043]

Information Collection: NRC Forms 540 and 540A, Uniform Low-Level Radioactive Waste Manifest (Shipping Paper) and Continuation Page

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of submission to the Office of Management and Budget; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has recently submitted a request for renewal of an existing collection of information to the Office of Management and Budget (OMB) for review. The information collection is entitled, ''NRC Forms 540 and 540A, Uniform Low-Level Radioactive Waste Manifest (Shipping Paper) and Continuation Page.''

DATES: Submit comments by December 23, 2022. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: David C. Cullison, NRC Clearance Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *Infocollects.Resource@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2021–0043 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2021–0043.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *PDR.Resource@nrc.gov.* A copy of the NRC Forms 540 and 540A and related instructions may be obtained without charge by accessing ADAMS Accession Nos. ML22132A240, ML22132A241, and ML20178A433, respectively. The supporting statement is available in ADAMS under Accession No. ML22301A050.
- *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8:00 a.m. and 4:00 p.m. Eastern Time (ET), Monday through Friday, except Federal holidays.
- *NRC's Clearance Officer:* A copy of the collection of information and related instructions may be obtained without charge by contacting the NRC's Clearance Officer, David C. Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *Infocollects.Resource@nrc.gov.*

B. Submitting Comments

Written comments and recommendations for the proposed information collection should be sent

within 30 days of publication of this notice to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at *https://www.regulations.gov* and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, ''NRC Forms 540 and 540A, Uniform Low-Level Radioactive Waste Manifest (Shipping Paper) and Continuation Page.'' The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on August 10, 2022 (87 FR 48700).

1. *The title of the information collection:* NRC Forms 540 and 540A, Uniform Low-Level Radioactive Waste Manifest (Shipping Paper) and Continuation Page.

2. *OMB approval number:* 3150–0164.

3. *Type of submission:* Extension.

4. *The form number, if applicable:* NRC Forms 540 and 540A.

5. *How often the collection is required or requested:* NRC Form 540 and 540A, or the Agreement State equivalent forms, are used by low-level radioactive waste (LLW) shippers when LLW is shipped. NRC Form 540/540A, combined with NRC Forms 541/541A and 542/542A, are collectively referred to as the Uniform Low-Level Radioactive Waste Manifest forms. The disposal facilities and their Agreement State regulators, where applicable, use the information found on the forms to ensure waste disposal meets the requirements in part 61 of title 10 of the *Code of Federal Regulations* (10 CFR) for the protection of the public and environment. The NRC does not collect or retain data on the forms and the forms are not sent to or received by the NRC. NRC Form 541/541A and NRC Form 542/542A are (1) mailed or electronically transferred to the intended consignee prior to the shipment arriving at the consignee or (2) delivered with the waste to the consignee. NRC Form 540 and 540A are required to be with the shipment regardless of which of the above methods is chosen.

6. *Who will be required or asked to respond:* NRC Form 540 and continuation Form 540A are completed by generators, collectors, and processors of LLW intended for ultimate disposal at a licensed land disposal facility.

7. *The estimated number of annual responses:* 4,616.

8. *The estimated number of annual respondents:* 712.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 3,462.

10. *Abstract:* The completed NRC Form 540 contains information needed to satisfy the Department of Transportation shipping paper requirements in 49 CFR part 172 and the waste manifesting requirements of the NRC's 10 CFR part 20. NUREG/BR–0204, Rev. 3, contains instructions for completing NRC Forms 540, 540A, 541, 541A, 542, and 542A. The forms were originally developed by the NRC at the request of low-level waste industry groups. The forms are intended to provide uniformity and efficiency in the collection of information contained in manifests which are required to control transfers of LLW intended for disposal at a land disposal facility. However, as stated in 10 CFR part 20, appendix G, ''Licensees need not use originals of these NRC Forms as long as any substitute forms are equivalent to the original documentation in respect to content, clarity, size, and location of information . . .'' The NRC previously noticed the availability of revisions to the Uniform Low-Level Radioactive Waste Manifest Forms in the **Federal Register** on June 25, 2021 (86 FR 33783). The information collection contained in the current extension request does not include any material changes to the forms, except for: (1) changes to the Paperwork Reduction Act statement to indicate that licensees may use equivalent forms, and (2) the deletion of the expiration date.

Dated: November 17, 2022.

For the Nuclear Regulatory Commission.

David C. Cullison,

NRC Clearance Officer, Office of the Chief Information Officer.

[FR Doc. 2022–25487 Filed 11–22–22; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2022–0088]

Information Collection: NRC Form 327, Special Nuclear Material (SNM) and Source Material (SM) Physical Inventory Summary Report, and NUREG/BR–0096, Instructions and Guidance for Completing Physical Inventory Summary Reports

AGENCY: Nuclear Regulatory Commission.

ACTION: Renewal of existing information collection; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) invites public comment on the renewal of Office of Management and Budget (OMB) approval for an existing collection of information. The information collection is entitled, ''NRC Form 327, Special Nuclear Material (SNM) and Source Material (SM) Physical Inventory Summary Report, and NUREG/BR–0096, Instructions and Guidance for Completing Physical Inventory Summary Reports.''

DATES: Submit comments by January 23, 2023. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2022–0088. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* David C. Cullison, Office of the Chief Information Officer, Mail Stop: T–6 A10M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: David C. Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *Infocollects.Resource@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2022–0088 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov/* and search for Docket ID NRC–2022–0088. A copy of the collection of information and related instructions may be obtained without charge by accessing Docket ID NRC–2022–0088 on this website.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *PDR.Resource@nrc.gov.* A copy of the collection of information and related instructions may be obtained without charge by accessing ADAMS Accession Nos. ML22167A077 and ML082620258. The supporting statement is available in ADAMS under Accession No. ML22167A076.
- *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8:00 a.m. and 4:00 p.m. Eastern Time (ET), Monday through Friday, except Federal holidays.
- *NRC's Clearance Officer:* A copy of the collection of information and related instructions may be obtained without charge by contacting the NRC's Clearance Officer, David C. Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *Infocollects.Resource@nrc.gov.*

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (*https://www.regulations.gov*). Please include Docket ID NRC–2022–0088 in your comment submission.

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at *https://www.regulations.gov* and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC is requesting public comment on its intention to request the OMB's approval for the information collection summarized below.

1. *The title of the information collection:* NRC Form 327, Special Nuclear Material (SNM) and Source Material (SM) Physical Inventory Summary Report, and NUREG/BR–0096, Instructions and Guidance for Completing Physical Inventory Summary Reports.

2. *OMB approval number:* 3150–0139.

3. *Type of submission:* Extension.

4. *The form number, if applicable:* NRC Form 327.

5. *How often the collection is required or requested:* Certain licensees possessing strategic SNM are required to report inventories on NRC Form 327 every 6 months. Licensees possessing SNM of moderate strategic significance must report every 9 months. Licensees possessing SNM of low strategic significance must report annually, except one licensee (enrichment facility) that must report its dynamic inventories every 2 months and its static inventory annually.

6. *Who will be required or asked to respond:* Fuel facility licensees possessing SNM, *i.e.,* enriched uranium, plutonium, or U–233.

7. *The estimated number of annual responses:* 80.

8. *The estimated number of annual respondents:* 9.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 320.

10. *Abstract:* NRC Form 327 is submitted by certain fuel cycle facility licensees to account for SNM. The data is used by the NRC to assess licensee material control and accounting programs and to confirm the absence of (or detect the occurrence of) SNM theft or diversion. NUREG/BR–0096 provides guidance and instructions for completing the form in accordance with the requirements appropriate for a particular licensee.

III. Specific Requests for Comments

The NRC is seeking comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility? Please explain your answer.

2. Is the estimate of the burden of the information collection accurate? Please explain your answer.

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

Dated: November 17, 2022.

For the Nuclear Regulatory Commission.

David C. Cullison,

NRC Clearance Officer, Office of the Chief Information Officer.

NUCLEAR REGULATORY COMMISSION

[NRC–2022–0051]

Information Collection: Regulatory Issue Summary 2009–06, Revision 1, Importance of Giving the NRC Advance Notice of Intent To Pursue License Renewal

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed information collection; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) invites public comment on this proposed information collection. The information collection is entitled, ''Regulatory Issue Summary 2009–06, Revision 1, Importance of Giving the NRC Advance Notice of Intent to Pursue License Renewal.''

DATES: Submit comments by January 23, 2023. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2022–0051. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* David C. Cullison, Office of the Chief Information Officer, Mail Stop: T–6 A10M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: David C. Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *Infocollects.Resource@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2022–0051 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2022–0051. A copy of the collection of information and related instructions may be obtained without charge by accessing Docket ID NRC–2022–0051 on this website.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *PDR.Resource@nrc.gov.* A copy of the collection of information and related instructions may be obtained without charge by accessing ADAMS Accession No. ML21272A267. The supporting statement is available in ADAMS under Accession No. ML22116A159.
- *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8:00 a.m. and 4:00 p.m. Eastern Time (ET), Monday through Friday, except Federal holidays.
- *NRC's Clearance Officer:* A copy of the collection of information and related instructions may be obtained without charge by contacting the NRC's Clearance Officer, David C. Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *Infocollects.Resource@nrc.gov.*

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (*https://www.regulations.gov*). Please include Docket ID NRC–2022–0051 in your comment submission.

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at *https://www.regulations.gov* and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC is requesting public comment on its intention to request the OMB's approval for the information collection summarized below.

1. *The title of the information collection:* Regulatory Issue Summary

2009–06, Revision 1, Importance of Giving the NRC Advance Notice of Intent to Pursue License Renewal.

2. *OMB approval number:* An OMB control number has not yet been assigned to this proposed information collection.

3. *Type of submission:* New.

4. *The form number, if applicable:* N/A.

5. *How often the collection is required or requested:* There is a one-time application for any licensee wishing to renew the operating license for its nuclear power plant. There is a one-time requirement for each licensee with a renewed operating license to submit a letter documenting the completion of inspection and testing activities. All holders of renewed licenses must perform yearly record keeping.

6. *Who will be required or asked to respond:* Commercial nuclear power plant licensees who wish to renew their operating licenses and holders of renewed licenses.

7. *The estimated number of annual responses:* 4.

8. *The estimated number of annual respondents:* 4.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 32 hours.

10. *Abstract:* The NRC is issuing Revision 1 of this regulatory issue summary (RIS) to emphasize the importance of (1) providing the NRC with advance notice of licensee plans for license renewal and (2) notifying the NRC of changes in previously announced plans for license renewal. Responses to this RIS will allow the NRC staff to better plan and budget for the reviews of applications submitted in accordance with Part 54 of title 10 of the *Code of Federal Regulations,* ''Requirements for Renewal of Operating Licenses for Nuclear Power Plants.''

III. Specific Requests for Comments

The NRC is seeking comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility? Please explain your answer.

2. Is the estimate of the burden of the information collection accurate? Please explain your answer.

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

Dated: November 17, 2022.

For the Nuclear Regulatory Commission.

David C. Cullison,

NRC Clearance Officer, Office of the Chief Information Officer.

[FR Doc. 2022–25489 Filed 11–22–22; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2022–0107]

Information Collection: NRC Form 313, Application for Materials License and NRC Forms 313A (RSO), 313A (AMP), 313A (ANP), 313A (AUD), 313A (AUT), and 313A (AUS)

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of submission to the Office of Management and Budget; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has recently submitted a request for renewal of an existing collection of information to the Office of Management and Budget (OMB) for review. The information collection is entitled, ''NRC Form 313, ''Application for Materials License'' and NRC Forms 313A (RSO), 313A (AMP), 313A (ANP), 313A (AUD), 313A (AUT), and 313A (AUS).''

DATES: Submit comments by December 23, 2022. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: David C. Cullison, NRC Clearance Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *Infocollects.Resource@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2022–0107 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2022–0107.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *PDR.Resource@nrc.gov.* For the convenience of the reader, instructions about obtaining materials referenced in this document are provided in the ''Availability of Documents'' section.
- *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8:00 a.m. and 4:00 p.m. Eastern Time (ET), Monday through Friday, except Federal holidays.
- *NRC's Clearance Officer:* A copy of the collection of information and related instructions may be obtained without charge by contacting the NRC's Clearance Officer, David C. Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *Infocollects.Resource@nrc.gov.*

B. Submitting Comments

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at *https://www.regulations.gov* and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you

should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, ''NRC Form 313, ''Application for Materials License'' and NRC Forms 313A (RSO), 313A (AMP), 313A (ANP), 313A (AUD), 313A (AUT), and 313A (AUS).'' The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on August 24, 2022 (87 FR 52032).

1. *The title of the information collection:* NRC Form 313, Application for Materials License and NRC Forms 313A (RSO), 313A (AMP), 313A (ANP), 313A (AUD), 313A (AUT), and 313A (AUS).

2. *OMB approval number:* 3150–0120.

3. *Type of submission:* Extension.

4. *The form number, if applicable:* NRC Form 313, Application for Materials License and NRC Forms 313A (RSO), 313A (AMP), 313A (ANP), 313A (AUD), 313A (AUT), and 313A (AUS).

5. *How often the collection is required or requested:* There is a one-time submittal of the NRC Form 313 (which may include the NRC Form 313A series of forms) with information to receive a license. Once a specific license has been issued, there is a 15-year resubmittal of the NRC Form 313 (which may include the NRC form 313A series of forms) with information for renewal of the license. Amendment requests are submitted as needed by the licensee. There is a one-time submittal for all limited specific medical use applicants of a NRC Form 313A series form to have each new individual identified as a Radiation Safety Officer (RSO) or Associate Radiation Safety Officer (ARSO) [NRC Form 313A (RSO)], authorized medical physicist or ophthalmic physicist [NRC Form 313A (AMP)], authorized nuclear pharmacist [NRC Form 313A (ANP)], or authorized user [NRC Form 313A (AUD), NRC Form 313A (AUS), or NRC Form 313A (AUT)] or a subsequent submittal of additional information for one of these individuals to be identified with a new authorization on a limited specific medical use license. NRC Form 313A (RSO) is also used by medical broad scope licensees when identifying a new individual as an RSO, a new individual as an ARSO, adding an additional RSO authorization, or adding an additional ARSO authorization for the individual. This submittal may occur when applying for a new license, amendment, or renewal. NRC Form 313A (ANP) is also used by commercial nuclear pharmacy licensees when requesting an individual be identified for the first time as ANP. This submittal may occur when applying for a new license, amendment, or renewal.

6. *Who will be required or asked to respond:* All applicants requesting a license, amendment or renewal of a license for byproduct or source material.

7. *The estimated number of annual responses:* 12,222 (1,174 NRC licensees + 10,296 Agreement States licensees + 752 Third Party respondents).

8. *The estimated number of annual respondents:* 12,222 (1,174 NRC licensees + 10,296 Agreement States licensees + 752 Third Party respondents).

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 49,359 (5,053 NRC licensee hours + 44,306 Agreement States licensee hours).

10. *Abstract:* Applicants must submit NRC Form 313, which may include the six forms in the 313A series, to obtain a specific license to possess, use, or distribute byproduct or source material. These six forms in the 313A series are: (1) NRC Form 313A (RSO), ''Radiation Safety Officer or Associate Radiation Safety Officer Training, Experience and Preceptor Attestation [10 CFR 35.57, 35.50]''; (2) NRC Form 313A (AMP), ''Authorized Medical Physicist or Ophthalmic Physicist, Training, Experience and Preceptor Attestation [10 CFR 35.51, 35.57(a)(3), and 35.433''; (3) NRC Form 313A (ANP), ''Authorized Nuclear Pharmacist Training, Experience, and Preceptor Attestation 10 CFR 35.55''; (4) NRC Form 313A (AUD), ''Authorized User Training, Experience and Preceptor Attestation (for uses defined under 35.100, 35.200, and 35.500) 10 CFR 35.57, 35.190, 35.290, and 35.590''; (5) NRC Form 313A (AUT), ''Authorized User Training, Experience, and Preceptor Attestation (for uses defined under 35.300) 10 CFR 35.57, 35.390, 35.392, 35.394, and 35.396''; and (6) NRC Form 313A (AUS), ''Authorized User Training, Experience and Preceptor Attestation (for uses defined under 35.400 and 35.600) 10 CFR 35.57, 35.490, 35.491, and 35.690.'' The NRC Form 313A series of forms requires preceptor attestations for certain individuals. The preceptor attestation is provided by a third party and not an applicant or licensee. The information is reviewed by the NRC to determine whether the applicant is qualified by training and experience, and has equipment, facilities, and procedures which are adequate to protect the public health and safety and minimize danger to life or property.

IV. Availability of Documents

The documents identified in the following table are available to interested persons through ADAMS.

Document description	ADAMS accession No.
Final OMB supporting statement for NRC Form 313	ML22306A056
NRC Form 313, ''Application for Materials License''	ML22306A064
NRC Form 313A (AMP)—Authorized Medical Physicist or Ophthalmic Physicist	ML22306A062
NRC Form 313A (RSO)—Radiation Safety Officer or Associate Radiation Safety Officer	ML22306A063
NRC Form 313A (ANP)—Authorized Nuclear Pharmacist	ML22306A061
NRC Form 313A (AUD)—Authorized User requesting authorization for diagnostic uses defined under 10 CFR 35.100, 10 CFR 35.200, or 10 CFR 35.500.	ML22306A059
NRC Form 313A (AUS)—Authorized User requesting authorization for use of sealed sources defined under 10 CFR 35.400 or 10 CFR 35.600.	ML22306A060
NRC Form 313A (AUT)—Authorized User requesting authorization for use of unsealed radioactive material for therapy defined under 10 CFR 35.300.	ML22306A058

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2021–0045]

Information Collection: NRC Forms 542 and 542A, Uniform Low-Level Radioactive Waste Manifest Index and Regional Compact Tabulation and Continuation Page

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of submission to the Office of Management and Budget; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has recently submitted a request for renewal of an existing collection of information to the Office of Management and Budget (OMB) for review. The information collection is entitled, ''NRC Forms 542 and 542A, Uniform Low-Level Radioactive Waste Manifest Index and Regional Compact Tabulation and Continuation Page.''

DATES: Submit comments by December 23, 2022. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: David C. Cullison, NRC Clearance Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *Infocollects.Resource@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2021–0045 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2021–0045.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *PDR.Resource@nrc.gov.* A copy of the NRC Forms 542 and 542A and related instructions may be obtained without charge by accessing ADAMS Accession Nos. ML22132A261, ML22132A262, and ML20178A433, respectively. The supporting statement is available in ADAMS under Accession No. ML22301A003.
- *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8:00 a.m. and 4:00 p.m. Eastern Time (ET), Monday through Friday, except Federal holidays.
- *NRC's Clearance Officer:* A copy of the collection of information and related instructions may be obtained without charge by contacting the NRC's Clearance Officer, David C. Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *Infocollects.Resource@nrc.gov.*

B. Submitting Comments

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at *https://www.regulations.gov* and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, ''NRC Forms 542 and 542A, Uniform Low-Level Radioactive Waste Manifest Index and Regional Compact Tabulation and Continuation Page.'' The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on August 10, 2022 (87 FR 48699).

1. *The title of the information collection:* NRC Forms 542 and 542A, Uniform Low-Level Radioactive Waste Manifest Index and Regional Compact Tabulation and Continuation Page.
2. *OMB approval number:* 3150–0165.
3. *Type of submission:* Extension.
4. *The form number, if applicable:* NRC Forms 542 and 542A.
5. *How often the collection is required or requested:* NRC Form 542 and 542A,

or the Agreement State equivalent forms, are used by low-level radioactive waste (LLW) collectors and processors that are shipping LLW attributed to others for disposal at a licensed land disposal facility. NRC Form 542/542A, combined with NRC Forms 540/540A and 541/541A, are collectively referred to as the Uniform Low-Level Radioactive Waste Manifest forms. The disposal facilities and their Agreement State regulators, where applicable, use the information found on the forms to ensure waste disposal meets the requirements in part 61 of title 10 of the *Code of Federal Regulations* (10 CFR) for the protection of the public and environment. The NRC does not collect or retain data on the forms and the forms are not sent to or received by the NRC. NRC Form 541/541A and NRC Form 542/542A are (1) mailed or electronically transferred to the intended consignee prior to the shipment arriving at the consignee or (2) delivered with the waste to the consignee. NRC Form 540 and 540A are required to be with the shipment regardless of which of the above methods is chosen.

6. *Who will be required or asked to respond:* NRC Form 542 and continuation Form 542A are completed by collectors and processors of LLW intended for ultimate disposal at a licensed land disposal facility.

7. *The estimated number of annual responses:* 623.

8. *The estimated number of annual respondents:* 71.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 467.

10. *Abstract:* The NRC Form 542, completed by LLW collectors and processors, contains information needed to satisfy the waste manifesting requirements of the NRC's 10 CFR part 20 and information on the attribution of the waste. Each waste container shipped from a waste collector or processor may contain waste from several different generators. Tracking the identity of the original waste generator becomes more complicated when the waste forms, dimensions, or packaging are changed by the waste processor. These forms are used to attribute the waste to the original generator for regional waste compact tabulation. The information provided on the NRC Form 542 permits the States and Compacts to know the original generators of LLW, as authorized by the Low-Level Radioactive Waste Policy Amendments Act of 1985, so they can ensure that waste is disposed of in the appropriate Compact. NUREG/BR–0204, Rev. 3, contains instructions for completing NRC Forms 540, 540A, 541, 541A, 542, and 542A. The forms were originally developed by the NRC at the request of low-level waste industry groups. The forms are intended to provide uniformity and efficiency in the collection of information contained in manifests which are required to control transfers of LLW intended for disposal at a land disposal facility. However, as stated in 10 CFR part 20, Appendix G, ''Licensees need not use originals of these NRC Forms as long as any substitute forms are equivalent to the original documentation in respect to content, clarity, size, and location of information . . .'' The NRC previously noticed the availability of revisions to the Uniform Low-Level Radioactive Waste Manifest Forms in the **Federal Register** on June 25, 2021 (86 FR 33783). The information collection contained in the current extension request does not include any material changes to the forms, except for: (1) changes to the Paperwork Reduction Act statement to indicate that licensees may use equivalent forms, and (2) the deletion of the expiration date.

Dated: November 17, 2022.

For the Nuclear Regulatory Commission.

David C. Cullison,

NRC Clearance Officer, Office of the Chief Information Officer.

[FR Doc. 2022–25485 Filed 11–22–22; 8:45 am]

BILLING CODE 7590–01–P

OFFICE OF PERSONNEL MANAGEMENT

Notice of Submission for a New Information Collection Common Form: Personnel Vetting Questionnaire

AGENCY: Office of Personnel Management.

ACTION: 60-Day notice and request for comments.

SUMMARY: The Office of Personnel Management (OPM) offers the opportunity to comment on a new information collection request (ICR) titled Personnel Vetting Questionnaire (PVQ). The proposed information collection will streamline multiple existing information collections, as well as the renewal cycle for them, commensurate with on-going efforts to improve personnel vetting processes and the experience of individuals undergoing personnel vetting. OPM is proposing to discontinue the information collections for OMB control numbers 3206–0261, 3206–0258, and 3206–0005 as these information collections will become parts of the new Personnel Vetting Questionnaire information collection and assigned a new OMB control number.

DATES: Comments are encouraged and will be accepted until January 23, 2023.

ADDRESSES: You may submit comments, identified by docket number and/or Regulatory Information Number (RIN) and title, by the following method:

—*Federal Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

All submissions received must include the agency name and docket number or RIN for this document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: A copy of this ICR, with applicable supporting documentation, may be obtained by email to *SuitEAforms@opm.gov,* or by contacting Alexys Stanley, 202–606–1800, or U.S. Office of Personnel Management, Suitability Executive Agent Programs, P.O. Box 699, Slippery Rock, PA 16057.

SUPPLEMENTARY INFORMATION: As required by the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. chapter 35) as amended by the Clinger-Cohen Act (Pub. L. 104–106), OPM is soliciting comments for this collection (OMB No. 3206–XXXX). OPM is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

Background

The PVQ will be a common form and will consolidate the following ICRs:

Office of Management and Budget (OMB) No. 3206–0261 Questionnaire for Non-Sensitive Positions (SF 85), OMB No. 3206–0258 Questionnaire for Public Trust Positions and Supplemental Questionnaire for Selected Positions (SF 85P and SF 85P–S), and OMB No. 3206–0005 Questionnaire for National Security Positions (SF 86) into one comprehensive information collection, consisting of four parts. As a ''common form'' this information collection will be hosted by the OPM and other agencies can request authorization to use the collection from OMB. Individual respondents will be asked to complete only the parts that are appropriate to the risk and sensitivity of their position, also known as their position designation, as directed by the federal agency requesting their background investigation consistent with guidance issued by OPM and the Office of the Director of National Intelligence as the Suitability and Credentialing Executive Agent and the Security Executive Agent, respectively.

As appropriate to the risk and sensitivity of an individual's position, questions contained within the proposed personnel vetting questionnaire will be used by the U.S. Government in conducting personnel vetting investigations for persons under consideration for, or retention in, low risk, public trust, and/or national security positions as defined in 5 CFR 731 and 5 CFR 1400, including individuals requiring eligibility for access to classified information under Executive Order 12968, as amended.

This questionnaire will also be used for making trust determinations associated with an individual's initial and ongoing suitability or fitness for Federal employment, fitness for contract employment, eligibility to hold a sensitive position or for access to classified information, or eligibility for physical and logical access to federally controlled facilities or information systems.

OPM serves as the sponsor for the common form PVQ, collecting comments as well as posting the information collection; however, OPM works closely with the Office of the Director of National Intelligence (ODNI), National Counterintelligence and Security Center to develop and propose content, since the information collected is used for background investigations that are under the purview of OPM as the Suitability and Credentialing Executive Agent and ODNI as the Security Executive Agent, pursuant to Executive Order 13467, as amended. The information collection is used for background investigations conducted by the Defense Counterintelligence and Security Agency (DCSA), the Government's primary background investigations provider and other authorized investigating agencies. The information is used by federal agencies in making trust determinations as described above.

OPM is requesting clearance of the comprehensive personnel vetting questionnaire that contains all of the potential questions that could be asked of individuals undergoing personnel vetting investigations; however, the respondent completing the form will only be asked to complete the questions required for their position risk and designation. The higher the risk and sensitivity of the position, the greater the information collection. Part A of the PVQ contains a set of core required questions that will be required of all individuals undergoing a background investigation. Part B contains additional questions that will be required of individuals in non-sensitive public trust positions as well as individuals in sensitive positions, and Part C contains further questions that will be required only of individuals in sensitive positions.

Currently, there are multiple standard form questionnaires for personnel vetting investigations:

- The SF 85, Questionnaire for Non-Sensitive Positions, completed by individuals in non-sensitive low risk positions. This will be replaced by Part A of the PVQ.
- The SF 85P, Questionnaire for Public Trust Positions, completed by individuals in non-sensitive moderate risk and high-risk positions. The SF 85P will be replaced by Parts A and B of the PVQ.
- The SF 86, Questionnaire for National Security Positions, completed by individuals in national security positions, as the term is defined at 5 CFR part 1400, including individuals requiring eligibility for access to classified information under E.O. 12968. The SF 86 will be replaced by Parts A, B, and C of the PVQ.
- Individuals in certain law enforcement positions may also complete the supplemental form SF 85P–S, Supplemental Questionnaire for Selected Positions. The SF 85P–S will be replaced by Part D of the PVQ.

Questions within the PVQ will be presented to individuals in the electronic application system of the Defense Counterintelligence and Security Agency (DCSA) that is the successor to the Electronic Questionnaires for Investigations Processing (e-QIP) system. As in e-QIP today, the questions will branch to collect additional details as appropriate to the individual's response. For example, if a respondent responds affirmatively to a question regarding foreign travel, the question will expand to ask for the country, dates of travel, and other details. In this sense, the information collection is tailored to the individual's personal history and the burden on the individual will vary depending on the extent to which each individual has relevant information to provide.

For further clarity, below is a comparison, by position designation, of the current forms required and the parts of the PVQ that will be required to be completed.

Position designation	Current form	PVQ part
Non-Sensitive Low Risk	SF 85	Part A.
Non-Sensitive Moderate Risk Public Trust	SF 85P	Part A and Part B.
Non-Sensitive High Risk Public Trust	SF 85P	Part A and Part B.
Non-Critical Sensitive Moderate Risk Public Trust	SF 86	Part A, Part B, and Part C.
Critical-Sensitive High Risk Public Trust	SF 86	Part A, Part B and Part C.
Special-Sensitive High Risk Public Trust	SF 86	Part A, Part B and Part C.
Non-Sensitive Moderate Risk or High Risk Law Enforcement Position as specified by an agency.	SF 85P and SF 85P–S	Part A, Part B, and Part D.

Part A contains questions covering the following areas:

- Introduction
- General Information
- U.S. Passport Information
- U.S. Citizenship Information
- Additional Citizenships
- Residences
- Education

- Employment Activities
- Other Federal Employment
- U.S. Military and U.S. Uniform Service
- People Who Know You Well
- Police Record
- Drug Activity
- Marijuana and Cannabis-Derivative Use
- U.S. Personnel Vetting Investigations, Security Clearances, and Federal Debarments
- Federal Debt
- Information Technology Systems
- Handling Protected Information
- Associations

Part B contains the following additional areas:

- Continuation Questions for Sections 4,5, 6, 7, and 11
- Use of Alcohol and Rehabilitative Actions
- Relationship Status
- Relatives
- Foreign Travel
- Financial Record
- Civil Court Actions

Part C contains the following additional areas:

- Continuation Questions for Section 9
- Foreign Contacts
- Foreign Financial Interest and Foreign Benefits
- Foreign Business Affairs and Foreign Government Activities
- Psychological and Emotional Health
- Criminal Convictions Resulting in Sentences Over One Year

Part D contains the following areas:

- Psychological and Emotional Health

Streamlining the multiple existing information collections into parts that build upon one another according to the risk and sensitivity of the position will allow for greater efficiency in vetting processes and reduce the burden on individuals who move to positions of greater risk or sensitivity. The PVQ will introduce the ability to collect the additional part(s) needed for the position rather than requiring the individual to start from scratch with a different investigative questionnaire. This practice will align with the streamlined personnel vetting investigative requirements for transfer of trust and upgrades as issued by OPM and ODNI under the Trusted Workforce 2.0 transformation of personnel vetting. In addition to enhancing the experience of individuals undergoing personnel vetting and providing efficiencies for federal agencies' personnel vetting processes, the PVQ will consolidate the renewal cycle and process for the personnel vetting information collections, thereby reducing the level of effort and resources required for managing multiple renewal cycles.

In comparison to the content of the current investigative questionnaires, the content of each part of the PVQ uses more plain language to collect information from the respondents and provides additional explanations to the respondents regarding the reasons for the questions. To the extent practicable, the framing of more complex questions has been simplified and avoids ''double-barreled'' questions. While some questions in Part A have been expanded to cover a greater scope of time, the overall effect of streamlining the collection into parts that build upon each other in support of the Trusted Workforce investigative standards is a general reduction in the scope of time covered by the questions.

Other differences between the PVQ and the current investigative questionnaires are provided as follows:

Sex and Gender. Unlike the current investigative questionnaires, the PVQ does not require the respondent to indicate ''Male'' or ''Female.'' Data collection on sex has traditionally been used to assist in identity matching for a small number of data checks in the investigative process. However, over time, the utility of this information for data matching has been reduced by changes at the state and municipality level. At present, approximately 45 states allow an individual to amend their birth certificate to match their gender. A subset of 15 states allows an individual to choose a non-binary option. The process to change these records varies from self-certification to requiring court orders, depending on the jurisdiction. Similarly, states and municipalities vary on how they code certain records checked in investigations. Given the variables in data fields used by various records providers and the possibility that an individual's self-identified sex may differ than what was previously provided (such as at the time of a past arrest), the effectiveness of using an individual's self-identified sex as a tool for identity verification/validation has decreased. While additional fields could be added to the questionnaire, workarounds would be required to accomplish data matching due to the way vital records and criminal history repositories maintain the information and because an individual's self-identification may change over time. Ultimately, OPM and ODNI concluded that asking the respondent to indicate ''Male'' or ''Female'' no longer has utility in the investigative process to justify the burden of requiring it from respondents.

The PVQ uses gender inclusive terminology, such as parent and sibling, rather than terms that are not gender inclusive, such as mother, father, sister, brother. OPM and ODNI considered whether changes to use gender inclusive terminology would have any adverse consequences for effective background investigation and adjudication processing. OPM and ODNI concluded that changing terminology on the forms to be gender inclusive would not adversely affect personnel vetting processes.

The PVQ retains the requirement to provide ''Other Names Used'' as OPM and ODNI considered the necessity of this collection and determined that this collection is necessary for properly conducting background investigations of individuals. Recognizing that this collection is particularly sensitive for transgender and gender non-conforming and non-binary employees and applicants, the PVQ includes new instruction language designed to help mitigate privacy concerns by clarifying how the collected information will be used during the personnel vetting process.

These aspects of the PVQ are consistent with Administration priorities. On June 15, 2021, President Biden issued Executive Order (E.O.) 14035, on *Diversity, Equity, Inclusion, and Accessibility in the Federal Workforce,* which established DEIA as priorities for the Administration and established additional procedures to advance these priorities across the Federal workforce. E.O. 14035 reaffirmed support for, and built upon, the procedures established by E.O.s 13583, 13988, and 14020, the Presidential Memorandum on Promoting Diversity and Inclusion in the National Security Workforce, and the National Security Memorandum on Revitalizing America's Foreign Policy and National Security Workforce, Institutions, and Partnerships (NSM–3).

E.O. 14035 directed that the Director of National Intelligence, in consultation with the Director of OPM and the heads of agencies, ''take steps to mitigate any barriers in security clearance and background investigation processes for LGBTQ+ employees and applicants, in particular transgender and gender non-conforming and non-binary employees and applicants.'' Taken together with the NSM–3 direction to assess additional reforms to eliminate bias within personnel vetting processes, OPM and ODNI have embarked upon initiatives to improve federal personnel vetting processes in support of DEIA in the federal workforce.

Selective Service. Questions regarding Selective Service registration are no longer included as employing agencies collect necessary information regarding Selective Service registration earlier in the process using the Declaration for Federal Employment (OF 306). Confirmation of registration is available to agencies as a service during the hiring and staffing process and is no longer automatically included as part of the personnel vetting background investigation.

Handling Protected Information. The PVQ includes questions not included in the existing investigative questionnaires that inquire as to whether the respondent has deliberately violated rules or regulations for safeguarding protected information. In addition, questions regarding use of information technology systems that were previously asked of public trust positions and national security positions are now presented to all respondents in Part A. These questions are appropriate for all respondents as they are relevant to inform decisions regarding eligibility to be issued a federal personal identity credential permitting access to federal facilities and information systems. OPM's July 31, 2008, *Final Credentialing Standards for Issuing Personal Identity Verification Cards under HSPD–12,* require consideration of whether ''There is reasonable basis to believe the individual will attempt to gain unauthorized access to classified documents, information protected by the Privacy Act, information that is proprietary in nature, or other sensitive or protected information,'' and whether ''There is a reasonable basis to believe the individual will use Federally-controlled information systems unlawfully, make unauthorized modifications to such systems, corrupt or destroy such systems, or engage in inappropriate uses of such systems.'' Responses to these questions may also inform suitability determinations pursuant to OPM's regulation at 5 CFR part 731.202 and national security determinations pursuant to Security Executive Agent Directive 4, Guideline K: Handling Protected Information and Guideline M: Use of Information Technology, issued June 8, 2017.

Illegal Use of Drugs and Drug Activity. Questions regarding illegal drug use on the PVQ are divided into separate areas to distinguish between use of marijuana or cannabis derivatives containing THC and use of other illegal drugs or controlled substances, in recognition of changing societal norms. In addition, the PVQ has a more limited scope of questioning regarding past use of marijuana in comparison to other illegal drugs. Currently, use of marijuana by federal employees is prohibited, while past use of marijuana by applicants is evaluated on a case-by-case basis when agencies make trust determinations. Given the legal landscape at the state level regarding use of marijuana, distinguishing between past marijuana use and use of other illegal drugs on the PVQ may improve the pool of applicants for federal employee and federal contractor positions.

Association Record. OPM and ODNI conducted a careful review of the questions regarding association record on the existing investigative questionnaires. The PVQ contains some new questions as well as some updated questions that have been modified to reduce complexity and further compel candid responses. As with all aspects of PVQ, the information collection serves to inform investigations that are the basis for personnel vetting determinations, consistent with OPM's guidance for credentialing, suitability, and fitness determinations and ODNI's guidance for national security positions, as applicable.

The Association Record aspects of the PVQ are also consistent with Administration priorities. On his first full day in office, President Biden directed his national security team to lead a 100-day comprehensive review of U.S. Government efforts to address domestic terrorism. As part of that review, interagency experts identified the possibility that domestic terrorists could attempt to exploit or abuse authoritative positions or sensitive access and recommended potential modifications for consideration as part of the periodic update of the SF 85, 85P and 86.

As noted in the Administration's June 2021 National Strategy for Countering Domestic Terrorism, ''Pre-employment background checks and re-investigations for government employees are a critical screening process that must account for all possible terrorist threats.'' Strategic Goal 3.3 of the Strategy, ''Ensure that screening and vetting processes consider the full range of terrorism threats'' recommended augmenting personnel vetting screening processes by considering changes to the investigative questionnaires, as recommended by the interagency experts. The objectives of the changes are to ensure new applicants and employees undergoing vetting abide by legal obligations, including in providing candid and forthright representations and to prevent individuals who pose domestic terrorism threats from being placed in positions of trust.

Psychological and Emotional Health. Questions regarding psychological and emotional health are presented only in Parts C and D of the PVQ, consistent with the existing questioning in this area that is limited to the Questionnaire for National Security Positions (SF 86) and the Supplemental Questionnaire for Selected Positions (SF 85P–S).

The language in the current SF 86 has been in place since 2016 and was the outcome of a protracted effort to shift the focus away from questions about seeking mental health treatment while allowing for the collection of information regarding potentially serious or uncontrolled conditions that could substantially affect judgment or reliability. While the intent this area of questioning has always been to surface any concerns regarding the individual's judgment or reliability, the approach has shifted from asking about all mental health treatment or counseling to a more tailored set of questions regarding hospitalization and specific diagnoses. The PVQ seeks to further reduce perceived stigma associated with seeking mental health treatment or counseling by further limiting the scope of questioning.

ODNI, as the Security Executive Agent, convened a working group through the ODNI National Security Psychology Leadership Council (NSPLC) consisting of clinical and research psychologists with subject matter expertise in personnel security, to examine the utility of the psychological and emotional health questions on the SF 86. The NSPLC provided recommendations to improve the efficacy of the questions while targeting issues of concern for national security, addressing perceived stigma, and protecting privacy.

The resulting questioning in the PVQ focuses on serious mental health illnesses that have very low base rates in the general population. Respondents receiving treatment or counseling for the most common mental health issues, such as depression and anxiety, as well as those seeking treatment or counseling after experiencing trauma or other stressful events, are unlikely to answer affirmatively to any of the items in the PVQ. By focusing on the most serious mental health illness, the PVQ will assist in enabling security professionals to screen for significant psychological and emotional health concerns with the intent to decrease the risk from insiders with significant mental illness, including risk of violence at federal installations.

Analysis: The following analysis of the burden associated with this information collection is specific to

OPM as the agency sponsoring the common form. Other agencies will be required to seek expedited approval to use the common form by submitting their agency-specific burden analyses to OMB.

Agency: Office of Personnel Management.

Title: Personnel Vetting Questionnaire.

OMB Number: 3206–XXXX.

Frequency: On occasion.

Affected Public: Individuals or Households.

Number of Respondents: 319.

Estimated Time per Respondent: 140 minutes.

Total Burden Hours: 780 hours.

Office of Personnel Management.

Kellie Cosgrove Riley,

Director, Office of Privacy and Information Management.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–96338; File No. SR–PEARL–2022–51]

Self-Regulatory Organizations; MIAX PEARL, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Trading Permit Fees for Market Makers in the MIAX PEARL Options Fee Schedule

November 17, 2022.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 15, 2022, MIAX PEARL, LLC (''MIAX Pearl'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to amend the MIAX Pearl Options Fee Schedule (the ''Fee Schedule'') to amend its monthly Trading Permit [3] fees for Market Makers.[4]

The text of the proposed rule change is available on the Exchange's website at *http://www.miaxoptions.com/rule-filings/pearl* at MIAX Pearl's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Fee Schedule to amend the amount and calculation of the monthly Trading Permit fees for Market Makers. Currently, the Exchange assesses Trading Permit fees based upon the monthly total volume executed by the Member [5] and its Affiliates [6] on the Exchange across all origin types, not including Excluded Contracts,[7] as compared to the Total Consolidated Volume (''TCV'') [8] in all MIAX Pearl-listed options. This Trading Permit fee structure has been in place since 2018.[9] The Exchange adopted a tier-based fee structure based upon the volume-based tiers detailed in the definition of ''Non-Transaction Fees Volume-Based Tiers'' [10] in the Definitions section of the Fee Schedule. The Exchange also assesses Trading Permit fees based upon the type of interface used by the Member to connect to the Exchange—the FIX Interface [11] and/or the MEO Interface.[12]

The Exchange now proposes to amend the calculation and amount of Trading Permit fees for Market Makers by moving away from the above-described volume tier-based fee structure to harmonize the Trading Permit fee structure for Market Makers with that of the Exchange's affiliates, Miami International Securities Exchange, LLC (''MIAX'') and MIAX Emerald, LLC (''MIAX Emerald'').[13] The Exchange also notes that this proposal is substantially

---

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] The term ''Trading Permit'' means a permit issued by the Exchange that confers the ability to transact on the Exchange. *See* Exchange Rule 100.

[4] The term ''Market Maker'' or ''MM'' means a Member registered with the Exchange for the purpose of making markets in options contracts traded on the Exchange and that is vested with the rights and responsibilities specified in Chapter VI of the Exchange Rules. *See* the Definitions Section of the Fee Schedule and Exchange Rule 100.

[5] The term ''Member'' means an individual or organization that is registered with the Exchange pursuant to Chapter II of Exchange Rules for purposes of trading on the Exchange as an ''Electronic Exchange Member'' or ''Market Maker.'' Members are deemed ''members'' under the Exchange Act. *See* Exchange Rule 100 and the Definitions Section of the Fee Schedule.

[6] ''Affiliate'' means (i) an affiliate of a Member of at least 75% common ownership between the firms as reflected on each firm's Form BD, Schedule A, or (ii) the Appointed Market Maker of an Appointed EEM (or, conversely, the Appointed EEM of an Appointed Market Maker). An ''Appointed Market Maker'' is a MIAX Pearl Market Maker (who does not otherwise have a corporate affiliation based upon common ownership with an EEM) that has been appointed by an EEM and an ''Appointed EEM'' is an EEM (who does not otherwise have a corporate affiliation based upon common ownership with a MIAX Pearl Market Maker) that has been appointed by a MIAX Pearl Market Maker, pursuant to the following process. A MIAX Pearl Market Maker appoints an EEM and an EEM appoints a MIAX Pearl Market Maker, for the purposes of the Fee Schedule, by each completing and sending an executed Volume Aggregation Request Form by email to *membership@miaxoptions.com* no later than 2 business days prior to the first business day of the month in which the designation is to become effective. Transmittal of a validly completed and executed form to the Exchange along with the Exchange's acknowledgement of the effective designation to each of the Market Maker and EEM will be viewed as acceptance of the appointment. The Exchange will only recognize one designation per Member. A Member may make a designation not more than once every 12 months (from the date of its most recent designation), which designation shall remain in effect unless or until the Exchange receives written notice submitted 2 business days prior to the first business day of the month from either Member indicating that the appointment has been terminated. Designations will become operative on the first business day of the effective month and may not be terminated prior to the end of the month. Execution data and reports will be provided to both parties. *See* the Definitions Section of the Fee Schedule.

[7] ''Excluded Contracts'' means any contracts routed to an away market for execution. *See* the Definitions Section of the Fee Schedule.

[8] ''TCV'' means total consolidated volume calculated as the total national volume in those classes listed on MIAX Pearl for the month for which the fees apply, excluding consolidated volume executed during the period of time in which the Exchange experiences an Exchange System Disruption (solely in the option classes of the affected Matching Engine). *See* the Definitions Section of the Fee Schedule.

[9] *See* Securities Exchange Act Release No. 82867 (March 13, 2018), 83 FR 12044 (March 19, 2018) (SR–PEARL–2018–07).

[10] *See* the Definitions Section of the Fee Schedule for the monthly volume thresholds associated with each Tier.

[11] ''FIX Interface'' means the Financial Information Exchange interface for certain order types as set forth in Exchange Rule 516. *See* the Definitions Section of the Fee Schedule and Exchange Rule 100.

[12] ''MEO Interface'' or ''MEO'' means a binary order interface for certain order types as set forth in Rule 516 into the MIAX Pearl System. *See* the Definitions Section of the Fee Schedule and Exchange Rule 100.

[13] *See* MIAX Fee Schedule, Section 3)b) and MIAX Emerald Fee Schedule, Section 3)b).

based on the recent filing by BOX Exchange LLC (''BOX'') to adopt monthly Electronic Market Maker Trading Permit Fees based on options classes assigned, which filing has since passed the 60-day suspension deadline.[14]

The Exchange proposes that the amount of the monthly Trading Permit fees for Market Makers would be based on the lesser of either the per class traded or percentage of total national average daily volume (''ADV'') measurement based on classes traded by volume. The amount of monthly Market Maker Trading Permit fee would be based upon the number of classes in which the Market Maker was registered to quote on any given day within the calendar month, or upon the class volume percentages.

Specifically, the Exchange proposes to adopt the following Trading Permit fees for Market Makers: (i) $3,000 for Market Maker registrations in up to 10 option classes or up to 20% of option classes by national ADV; (ii) $5,000 for Market Maker registrations in up to 40 option classes or up to 35% of option classes by ADV; (iii) $7,000 for Market Maker registrations in up to 100 option classes or up to 50% of option classes by ADV; and (iv) $9,000 for Market Maker registrations in over 100 option classes or over 50% of option classes by ADV up to all option classes listed on MIAX Pearl. For example, if Market Maker 1 elects to quote the top 40 option classes which consist of 58% of the total national average daily volume in the prior calendar quarter, the Exchange would assess $5,000 to Market Maker 1 for the month which is the lesser of 'up to 40 classes' and 'over 50% of classes by volume up to all classes listed on MIAX Pearl'. If Market Maker 2 elects to quote the bottom 1000 option classes which consist of 10% of the total national average daily volume in the prior quarter, the Exchange would assess $3,000 to Market Maker 2 for the month which is the lesser of 'over 100 classes' and 'up to 20% of classes by volume.' The Exchange notes that the proposed tiers (ranging from $3,000 to $9,000) are lower than the tiers recently approved by the Commission in BOX's filing to adopt market maker trading permit fees (ranging from $4,000 to $10,000) for similar per class tier thresholds.[15]

With the proposed changes, a Market Maker would be determined to be registered in a class if that Market Maker has been registered in one or more series in that class.[16] The Exchange will assess MIAX Pearl Market Makers the monthly Market Maker Trading Permit fee based on the greatest number of classes listed on MIAX Pearl that the MIAX Pearl Market Maker registered to quote in on any given day within a calendar month. Therefore, with the proposed changes to the calculation of Market Maker Trading Permit fees, the Exchange's Market Makers would be encouraged to quote in more series in each class they are registered in because each additional series in that class would not count against their total classes for purposes of the Trading Permit fee tiers. The class volume percentage is based on the total national ADV in classes listed on MIAX Pearl in the prior calendar quarter. Newly listed option classes are excluded from the calculation of the monthly Market Maker Trading Permit fee until the calendar quarter following their listing, at which time the newly listed option classes will be included in both the per class count and the percentage of total national ADV.

The Exchange also proposes to adopt an alternative lower Trading Permit fee for Market Makers who fall within the 2nd, 3rd and 4th levels of the Market Maker Trading Permit fee table: (i) Market Maker registrations in up to 40 option classes or up to 35% of option classes by volume; (ii) Market Maker registrations in up to 100 option classes or up to 50% of option classes by volume; and (iii) Market Maker registrations in over 100 option classes or over 50% of option classes by volume up to all option classes listed on MIAX Pearl. In particular, the Exchange proposes to adopt footnote ''**'' following the Market Maker Trading Permit fee table for these Monthly Trading Permit tier levels. New proposed footnote ''**'' will provide that if the Market Maker's total monthly executed volume during the relevant month is less than 0.040% of the total monthly TCV for MIAX Pearl–listed option classes for that month, then the fee will be $3,500 instead of the fee otherwise applicable to such level.

The purpose of the alternative lower fee designated in proposed footnote ''**'' is to provide a lower fixed cost to those Market Makers who are willing to quote the entire Exchange market (or substantial amount of the Exchange market), as objectively measured by either number of classes assigned or national ADV, but who do not otherwise execute a significant amount of volume on the Exchange. The Exchange believes that, by offering lower fixed costs to Market Makers that execute less volume, the Exchange will retain and attract smaller-scale Market Makers, which are an integral component of the option marketplace, but have been decreasing in number in recent years, due to industry consolidation and lower market maker profitability. Since these smaller-scale Market Makers utilize less Exchange capacity due to lower overall volume executed, the Exchange believes it is reasonable and equitable to offer such Market Makers a lower fixed cost. The Exchange notes that the Exchange's affiliates, MIAX and MIAX Emerald, also provide lower Trading Permit fees for Market Makers who quote the entire MIAX and MIAX Emerald markets (or substantial amount of those markets), as objectively measured by either number of classes assigned or national ADV, but who do not otherwise execute a significant amount of volume on MIAX or MIAX Emerald.[17] The Exchange also notes that other options exchanges assess certain of their membership fees at different rates, based upon a member's participation on that exchange (as described in the table below), and, as such, this concept is not new or novel. The proposed changes to the Trading Permit fees for Market Makers who fall within the 2nd, 3rd and 4th levels of the fee table are based upon a business determination of current Market Maker assignments and trading volume.

* * * * *

As illustrated by the table below, the Exchange notes that the proposed Trading Permit fees for Market Makers are in line with, or cheaper than, the similar trading permit fees and membership fees charged by other options exchanges. The Exchange believes other exchanges' membership and trading permit fees are useful examples of alternative approaches to providing and charging for membership and provides the table for comparison purposes only to show how the Exchange's proposed fees compare to fees currently charged by other options exchanges for similar membership and trading permits.

[14] *See* Securities Exchange Act Release No. 94894 (May 11, 2022), 87 FR 29987 (May 17, 2022) (SR–BOX–2022–17); see also BOX Exchange LLC (''BOX'') Fee Schedule, Section I.C.

[15] *Id.*

[16] Pursuant to Exchange Rule 602(a), a Member that has qualified as a Market Maker may register to make markets in individual series of options.

[17] *See* MIAX Fee Schedule, Section 3)b) and MIAX Emerald Fee Schedule, Section 3)b).

Exchange	Monthly membership/trading permit fee
MIAX Pearl Options (as proposed)	Market Maker Trading Permit fees: —Tier 1: $3,000 for Market Maker Assignments in up to 10 option classes or up to 20% of option classes by national ADV. —Tier 2: $5,000 for Market Maker Assignments in up to 40 option classes or up to 35% of option classes by ADV. —Tier 3: $7,000 for Market Maker Assignments in up to 100 option classes or up to 50% of option classes by ADV. —Tier 4: $9,000 for Market Maker Assignments in over 100 option classes or over 50% of option classes by ADV up to all option classes listed on MIAX Pearl. *Discounted rate of $3,500 for Market Makers in Tiers 2, 3 and 4 if the Market Maker's total monthly executed volume during the relevant month is less than 0.040% of the total monthly TCV for MIAX Pearl-listed option classes for that month.
BOX Options Exchange LLC (''BOX'') [18]	Electronic Market Maker Trading Permit Fees: Tier 1 (up to and including 10 classes): $4,000. Tier 2 (up to and including 40 classes): $6,000. Tier 3 (up to and including 100 classes): $8,000. Tier 4 (over 100 classes): $10,000.
NYSE Arca, Inc. (''NYSE Arca'') [19]	Options Trading Permits: Market Makers: 1st OTP—$8,000 for up to 60 plus the bottom 45% of option issues. 2nd OTP—Additional $6,000 for up to 150 plus the bottom 45% of option issues. 3rd OTP—Additional $5,000 for up to 500 plus the bottom 45% of option issues. 4th OTP—Additional $4,000 for up to 1,100 plus the bottom 45% of option issues. 5th OTP—Additional $3,000 for all option issues. 6th—9th OTP—Additional $2,000. 10th or more OTPs—$500 for all options issues.
NYSE American, LLC (''NYSE American'') [20].	ATP Trading Permits: Market Makers: $8,000 for up to 60 plus the bottom 45% of option issues. Additional $6,000 for up to 150 plus the bottom 45% of option issues. Additional $5,000 for up to 500 plus the bottom 45% of option issues. Additional $4,000 for up to 1,100 plus the bottom 45% of option issues. Additional $3,000 for all option issues. Additional $2,000 for 6th to 9th ATPs (plus additional fee for premium products). Additional $500 for the 10th or more ATPs.
Nasdaq PHLX LLC (''Nasdaq PHLX'') [21]	Streaming Quote Trader (''SQT'') permit fees: Tier 1 (up to 200 option classes): $0.00. Tier 2 (up to 400 option classes): $2,200. Tier 3 (up to 600 option classes): $3,200. Tier 4 (up to 800 option classes): $4,200. Tier 5 (up to 1,000 option classes): $5,200. Tier 6 (up to 1,200 option classes): $6,200. Tier 7 (all option classes): $7,200. Remote Market Maker Organization (''RMMO'') permit fees: Tier 1 (less than 100 option classes): $5,000. Tier 2 (more than 100 and less than 999 option classes): $8,000. Tier 3 (1,000 or more option classes): $11,000.
Nasdaq ISE LLC (''Nasdaq ISE'') [22]	Access Fees: Primary Market Maker: $5,000 per membership. Competitive Market Maker: $2,500 per membership.
Cboe Exchange, Inc. (''Cboe'') [23]	Electronic Trading Permit Fees: Market Maker: $5,000. Electronic Access Permit: $3,000.
Cboe C2 Exchange, Inc. (''Cboe C2'') [24]	Access Permit Fees for Market Makers: $5,000.
Cboe BZX Exchange, Inc. (''Cboe BZX Options'') [25].	$500 where member has an ADV <5,000 contracts traded. $1,000 where member has an ADV ≥5,000 contracts traded.

Clarifying Change

The Exchange also proposes to amend the first table of Trading Permit fees in Section 3)b) of the Fee Schedule to provide additional clarity. The Exchange has two categories of Members, Market Makers and Electronic Exchange Members [26] (''EEMs''). The

[18] *See* BOX fee schedule, Section 1.C., *available at https://boxexchange.com/assets/BOX-Fee-Schedule-as-of-October-28-2022.pdf* (last visited November 15, 2022). BOX had an average daily market share of 6.62% for the month of October 2022. *See* Market at a Glance, *available at https://www.miaxoptions.com/* (last visited November 15, 2022).

[25] *See* ''Membership Fees'' section of the Cboe BZX Options Fee Schedule, *available at https://www.cboe.com/us/options/membership/fee_schedule/bzx* (last visited November 15, 2022). The Exchange understands Cboe BZX Options charges the same Membership Fee to all of its Options Members.

[26] The term ''Electronic Exchange Member'' or ''EEM'' means the holder of a Trading Permit who is a Member representing as agent Public Customer

Exchange, therefore, proposes to replace the word ''Member'' with ''EEM'' under the heading ''Type of Trading Permit'' in the table of Trading Permit fees that are based on type of interface used, FIX or MEO. The purpose of this change is to clarify that the first table of Trading Permit fees will now be applicable only to EEMs since the Exchange proposes herein to provide a separate table describing the new calculation and amount of Trading Permit fees for Market Makers.

History and Implementation

The Exchange notes that it previously filed similar proposals to amend the amount and calculation of Trading Permit fees for Market Makers, which filings contained other changes to the Exchange's Trading Permit fees for EEMs. The Exchange has withdrawn those filings and replaced them with the current filing.[27] The Exchange previously filed this proposal on November 7, 2022.[28] On November 15, 2022, the Exchange withdrew SR–PEARL–2022–49 and replaced it with this filing.

The proposed rule change is immediately effective.

2. Statutory Basis

The Exchange believes that the proposal is consistent with the requirements of Section 6(b) of the Act, in general, and Section 6(b)(4) and 6(b)(5) of the Act,[29] in particular, in that it provides for the equitable allocation of reasonable dues, fees, and other charges among Exchange Members and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The Exchange commenced operations in February 2017 [30] and adopted its initial fee schedule that waived fees for Trading Permits to trade on the Exchange.[31] Although trading permit fees were waived, an initial fee structure was put in place to communicate the Exchange's intent to charge trading permit fees in the future. As a new exchange entrant, the Exchange chose to offer Trading Permits free of charge to encourage market participants to trade on the Exchange and experience, among things, the quality of the Exchange's technology and trading functionality. This practice is not uncommon. New exchanges often do not charge fees or charge lower fees for certain services such as memberships/trading permits to attract order flow to an exchange, and later amend their fees to reflect the true value of those services, absorbing all costs to provide those services in the meantime. Allowing new exchange entrants time to build and sustain market share through various pricing incentives before increasing non-transaction fees encourages market entry and promotes competition. It also enables new exchanges to mature their markets and allow market participants to trade on the new exchanges without fees serving as a potential barrier to attracting memberships and order flow.[32]

Later in 2018, as the Exchange's market share increased,[33] the Exchange adopted nominal fees for Trading Permits along with a tiered-volume based fee credit, known as the Trading Permit Fee Credit, and a Monthly Volume Credit.[34] At that time, the Exchange chose to adopt a volume tier-based fee for Trading Permits along with the type of interface used—FIX or MEO—as a way to provide different choices regarding how potential Members could access the Exchange's System. This was for business and competitive reasons and to provide choice regarding Trading Permits and membership that had not previously existed. The Exchange now proposes to move away from the above described volume tier-based Trading Permit fee structure and align its Market Maker Trading Permit fees with the Trading Permit fee structure of the Exchange's affiliates, MIAX and MIAX Emerald, as well as other options exchanges by assessing Market Makers Trading Permit fees based on options classes assigned or percentage of national ADV.

The Exchange recently reviewed its current Trading Permit fees. In its review, the Exchange determined that the calculation and amount of Trading Permit fees would need to be amended, and volume tier-based Trading Permit fees for all Member types is no longer appropriate. Specifically, the Exchange found that Market Makers were benefitting from lower Trading Permit fees while (1) consuming the most bandwidth and resources of the network; (2) transacting the vast majority of the volume on the Exchange; and (3) requiring the high touch network support services provided by the Exchange and its staff. The Exchange notes that Broker Dealers, Professional Customers, and Priority Customers [35] take up significantly less Exchange resources and costs. Further, the Exchange notes that Market Makers account for greater than 99% of message traffic over the network, while other non-Market Maker market participants account for less than 1% of message traffic over the network. Market Makers are the primary users of the Exchange's high performance MEO Interface. The Exchange's high performance MEO Interface (including employee support for such interface), utilized by Market

Orders or Non-Customer Orders on the Exchange and those non-Market Maker Members conducting proprietary trading. Electronic Exchange Members are deemed ''members'' under the Exchange Act. *See* the Definitions Section of the Fee Schedule and Exchange Rule 100.

[35] The term ''Priority Customer'' means a person or entity that (i) is not a broker or dealer in securities, and (ii) does not place more than 390 orders in listed options per day on average during a calendar month for its own beneficial accounts(s). The number of orders shall be counted in accordance with Interpretation and Policy .01 of Exchange Rule 100. *See* the Definitions Section of the Fee Schedule and Exchange Rule 100, including Interpretation and Policy .01.

Makers, provides unparalleled system throughput and the capacity to handle 10.8 million quotes per second and average round trip latency rate of approximately 30.76 microseconds for a single quote. Over the period from March 2022 through May 2022, the Exchange processed 386.1 billion messages (99.67% of total messages received) over the MEO Interface, almost entirely from Market Maker message traffic (which equals approximately 6 billion messages per day over that time period) (386.1 billion messages divided 64 trading days from March through May 2022).

The Exchange notes that while Market Makers continue to account for a vast majority of the increased costs and resources placed on the Exchange and its systems (as discussed herein), Market Makers continue to be valuable market participants on the exchanges as the options market is a quote driven industry. The Exchange recognizes the value that Market Makers bring to the Exchange. In fact, the Exchange provides Market Makers transactional volume-based discounts and rebates to incentivize Market Makers to direct order flow to the Exchange to obtain the benefit of the rebate, which will in turn benefit all market participants by increasing liquidity on the Exchange.[36] The proposed Trading Permit fees discussed herein are meant to strike a balance between offsetting the costs to which Market Makers place on the Exchange and continuing to incentivize Market Makers to access and make markets on the Exchange.

In its review of Trading Permit fees, the Exchange found that since 2018, Market Makers were paying nearly the same Trading Permit fees as EEMs that used the MEO Interface despite Market Makers consuming the most resources on the Exchange's system and contributing to increased costs for the Exchange. As such, the Exchange proposes to establish higher, separate electronic Trading Permit fees for Market Makers that are more aligned with the costs and resources that Market Makers continue to place on the Exchange and its systems and will align the Trading Permit fees with those of the majority of other options exchanges at similar or lower rates.[37]

Additionally, the Exchange believes that the proposed change will better align the Exchange's Trading Permit fees with rates charged by its affiliates and competing options exchanges in the industry for similar Trading Permits for such market participants. As such, the Exchange believes the proposed Market Maker Trading Permit fees are reasonable in that they are lower than comparable fees at other options exchanges.[38] Further, the Exchange believes that the proposal is reasonably designed to continue to compete with other options exchanges by incentivizing market participants to register as Market Makers on the Exchange in a manner than enables the Exchange to improve its overall competitiveness and strengthen market quality for all market participants. As stated above, the Exchange believes the proposed Market Maker Trading Permit fees are an appropriate balance between offsetting the costs to which Market Makers cost the Exchange and continuing to incentivize Market Makers to access and make a market on the Exchange.

The proposed fees are equitable and not unfairly discriminatory as the fees apply equally to all Market Makers. As such, all similarly situated Market Makers, with the same number of appointments, will be subject to the same Market Maker Trading Permit fee. With the proposed changes, a Market Maker would be determined to be registered in a class if that Market Maker has been registered in one or more series in that class. Exchange Rule 602(a) provides that a Member that has qualified as a Market Maker may register to make markets in individual series of options. The proposed tiered structure is based on the number of options classes the Market Maker is registered in, not the number of series within the options class. The Exchange believes its proposal is fair and reasonable because the proposed tiered structure would encourage Market Makers to register in more series within each options class as each additional series in that class would not count towards the particular Market Maker's overall number of classes assigned, and cause them to qualify for a higher tier and higher fee.

The Exchange also believes that assessing lower fees to Market Makers that quote in fewer classes is reasonable and appropriate as it will allow the Exchange to retain and attract smaller-scale Market Makers, which are an integral component of the options industry marketplace. Since these smaller Market Makers utilize less bandwidth and capacity on the Exchange network due to the lower number of quoted classes, the Exchange believes it is reasonable and appropriate to offer such Market Makers a lower fee. The Exchange also notes that other options exchanges assess permit fees at different rates, based upon a member's participation on that exchange,[39] and, as such, this concept is not new or novel.

Further, the Exchange believes the proposed tiered structure of the Market Maker Trading Permit fees is reasonable and appropriate. Under the proposal, Market Makers will be charged monthly fees based on the greatest number of classes quoted on any given trading day in a calendar month or upon certain class volume percentages of national ADV. Under the proposed fee structure, the fees increase as the number of classes quoted by a Market Maker increases. The Exchange believes this structure is reasonable and not unfairly discriminatory because the Exchange's system requires increased performance and capacity in order to provide the opportunity for Market Makers to quote in a higher number of options classes on the Exchange. Specifically, the more classes that are actively quoted on the Exchange by a Market Maker requires increased memory for record retention, increased bandwidth for optimized performance, increased functionalities on each application layer, and increased optimization with regard to surveillance and monitoring of such classes quoted. As such, basing the Market Maker Trading Permit fee on the greatest number of classes quoted in on any given day in a calendar month is reasonable and appropriate when taking into account how the increased number of quoted classes directly impact the costs and resources required for the Exchange. Further, the Exchange believes that the proposed structure is equitable and not unfairly discriminatory as all similarly situated Market Makers will be charged the same fee. The Exchange notes that options exchanges in the industry calculate Market Maker Permit Fees in the same manner.[40]

There is no requirement, regulatory or otherwise, that any broker-dealer connect to and access any (or all of) the available options exchanges. One other exchange recently noted in a proposal to amend their own trading permit fees

[36] For example, Market Makers may qualify for higher Tier 3 rebates as follows: (i) Maker rebates of ($0.44) in SPY, QQQ and IWM options for their Market Maker Origin when trading against Origins not Priority Customer, and (ii) Maker rebates of ($0.42) in SPY, QQQ and IWM options for their Market Maker Origin when trading against Priority Customer Origins, if the Market Maker executes at least 1.10% in SPY when adding liquidity. This is compared to a lower Professional Customer Tier 3 rebate of ($0.40) for options transactions in the same classes. *See* Fee Schedule, Section 1)a), footnote "✦."

[37] *See supra* notes 18 to 25.

[38] *See id.*

[39] *See supra* notes 18 to 25; *see also* MIAX Fee Schedule, Section 3)b) and MIAX Emerald Fee Schedule, Section 3)b).

[40] *See supra* notes 18 to 25.

that of the 62 market making firms that are registered as Market Makers across Cboe, MIAX, and BOX, 42 firms access only one of the three exchanges.[41] Further, the Exchange and its affiliates, MIAX and MIAX Emerald, have a total of 47 members. Of those 47 total members, 36 are members of all three exchanges, four (4) are members of only two (2) exchanges, and seven (7) are members of only one exchange. Of those that are currently Market Makers on the Exchange, two (2) are not registered as Market Makers on MIAX, four (4) are not registered as Market Makers on MIAX Emerald, and one (1) is not registered as a Market Maker on MIAX or MIAX Emerald. The above data evidences that a Market Maker need not be a Member of all options exchanges, let alone the Exchange and its two affiliates, and market makers elect to do so based on their own business decisions and need to directly access each exchange's liquidity pool. Not only is there not an actual regulatory requirement to connect to every options exchange, the Exchange believes there is also no ''de facto'' or practical requirement as well, as further evidenced by the market maker membership analysis of the options exchanges discussed above. Indeed, Market Makers choose if and how to access a particular exchange and because it is a choice, the Exchange must set reasonable pricing, otherwise prospective market makers would not connect and existing Market Makers would disconnect from the Exchange.

The Exchange believes that elasticity of demand for Exchange Membership exists when it comes to purchasing a Trading Permit and, as evidenced by the data provided below, prior fee proposals have resulted in Members terminating their memberships.[42] For example, over the course of those prior filings, three Members terminated their memberships in the time since the proposed fee increase first went into effect.

Further, other exchanges have also experienced termination of memberships if their members deem permit or membership fees to be unreasonable or excessive. For example, the Exchange notes that a BOX participant modified its access to BOX in connection with the implementation of a proposed change to BOX's permit fees.[43] The absence of new memberships coupled with the termination of three memberships on the Exchange, as well as similar membership changes on another options exchange in relation to a trading permit fee increase, clearly shows that elasticity of demand exists.

The Exchange notes that there are material costs associated with providing the infrastructure and headcount to fully-support access to the Exchange. The Exchange incurs technology expenses related to establishing and maintaining Information Security services, enhanced network monitoring and customer reporting associated with its network technology. While some of the expense is fixed, much of the expense is not fixed, and thus increases as the expenses associated with access services for Market Makers increases. For example, new Market Makers to the Exchange may require the purchase of additional hardware to support those Members as well as enhanced monitoring and reporting of customer performance that the Exchange provides. Further, as the total number of Market Makers increase, the Exchange may need to increase its data center footprint and consume more power, resulting in increased costs charged by their third-party data center provider. Accordingly, the cost to the Exchange to provide access to its Market Makers is not fixed. The Exchange believes the proposed Market Maker Trading Permit fees are reasonable in order to offset a portion of the costs to the Exchange associated with providing access to Market Makers to its quote and order infrastructure.

The Exchange believes that charging higher fees to Market Makers, who connect solely through the MEO Interface, is not unfairly discriminatory because Market Makers continue to account for the vast majority of network capacity utilization and trading activity on the Exchange and the MEO Interface provides higher throughput and enhanced functionality compared to the FIX Interface, justifying the increased cost. MEO Interface users account for the majority of expenses placed on the Exchange's systems. The MEO Interface also provides additional functionality that Market Makers using the MEO Interface use to fulfill their market making obligations. The Exchange offers three time-in-force modifiers: [44] Day Limit (''Day''), Immediate-Or-Cancel (''IOC''), and Good 'Til Cancelled (''GTC'').[45] While all order types are available for use on either interface, only the time-in-force modifiers of IOC and Day are available on the MEO Interface.[46] Market Makers utilize the time-in-force of Day on orders to be posted on the MIAX Pearl Options Book [47] and to meet Market Makers' continuous quoting obligations under Exchange Rule 605(d).[48] The MEO Interface allows the submission of Cancel-Replacement orders,[49] which allow for the immediate cancellation of a previously received order and the replacement of that order with a new order with new terms and conditions.[50] Cancel-Replacement orders are primarily used by Market Makers as part of their continuous quoting obligations. Market Makers use only the MEO Interface due to its lower latency, higher throughput, available time-in-force instructions and order types that assist them in satisfying their market making obligations. Market Makers do not use the FIX Interface due to the unavailability of the above functionality. The MEO Interface is the

[41] *See* Securities Exchange Act Release No. 94894 (May 11, 2022), 87 FR 29987 (May 17, 2022) (SR–BOX–2022–17) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to Amend the Fee Schedule on the BOX Options Market LLC Facility To Adopt Electronic Market Maker Trading Permit Fees). The Exchange believes that BOX's observation demonstrates that market making firms can, and do, select which exchanges they wish to access, and, accordingly, options exchanges must take competitive considerations into account when setting fees for such access.

[42] *See* Securities Exchange Act Release No. 95419 (August 4, 2022), 87 FR 48702 (August 10, 2022) (SR–PEARL–2022–30).

[43] According to BOX, a Market Maker on BOX terminated its status as a Market Maker in response to BOX's proposed modification of Market Maker trading permit fees. *See* Securities Exchange Act Release No. 94894 (May 11, 2022), 87 FR 29987 (May 17, 2022) (SR–BOX–2022–17). BOX noted, and the Exchange agrees, that this Market Maker's decision demonstrates that Market Makers can, and do, alter their membership status if they deem permit fees at an exchange to be unsuitable for their business needs, thus demonstrating the competitive environment for Market Maker permit fees and the constraints on options exchanges when setting Market Maker permit fees.

[50] *See* Exchange Rule 516(d).

more robust interface offering lower latency and higher throughput. Market Makers use only the MEO Interface.

The Exchange notes that while Market Makers continue to account for a vast majority of the increased System usage placed on the Exchange, Market Makers continue to be valuable market participants on the exchanges as the options market is a quote driven industry. The Exchange recognizes the value that Market Makers bring to the Exchange. The Exchange proposes higher, separate fees for Market Makers that are more aligned with the costs and resources that Market Makers continue to place on the Exchange and its systems.

The Exchange believes that the proposed Market Maker Trading Permit fees are reasonable, equitable, and not unfairly discriminatory. The Exchange believes that the reasonableness of its proposed fees is demonstrated by the very fact that such fees are in line with, and in some cases lower than, the costs of similar access fees at other exchanges.[51] The Exchange notes these fees were similarly filed with the Commission and neither suspended nor disapproved.[52] The proposed fees are fair and equitable and not unfairly discriminatory because they apply equally to all Market Makers and access to the Exchange is offered on terms that are not unfairly discriminatory. The Exchange designed the fee rates in order to provide objective criteria for Market Makers of different sizes and business models that best matches their quoting activity on the Exchange. The Exchange believes that the proposed fee rates and criteria provide an objective and flexible framework that will encourage Market Makers to be appointed and quote in option classes while also equitably allocating the fees in a reasonable manner amongst Market Maker appointments to account for quoting and trading activity.

The Exchange again notes that it operates in a highly competitive market in which market makers can readily favor competing venues if they deem fee levels at a particular venue to be excessive. In such an environment, the Exchange must continually adjust its fees for services and products, in addition to order flow, to remain competitive with other exchanges. The Exchange believes that the proposed changes reflect this competitive environment.

The Exchange again notes it is not aware of any reason why Market Makers could not simply drop their access to an exchange (or not initially access an exchange) if an exchange were to establish prices for its non-transaction fees that, in the determination of such Market Maker, did not make business or economic sense for such Market Maker to access such exchange. The Exchange again notes that no market makers are required by rule, regulation, or competitive forces to be a Market Maker on the Exchange.

In sum, the Exchange believes the proposed fees are reasonable and reflect a competitive environment, as the Exchange seeks to amend its Trading Permit fees for Market Makers, while still attracting Market Makers to continue to, or seek to, access the Exchange. The Exchange further believes the proposed Trading Permit fees discussed herein are an appropriate balance between offsetting the costs to which Market Makers cost the Exchange and continuing to incentivize Market Makers to access and make a market on the Exchange.

Clarifying Change

The Exchange believes its proposal to change the word ''Member'' to ''EEM'' under the heading ''Type of Trading Permit'' in the table of Trading Permit fees that are based on type of interface used, FIX or MEO, is reasonable because it will provide additional clarity within the Fee Schedule. As stated above, the Exchange has two categories of Members, Market Makers and EEMs. This proposed change would remove impediments to and perfect the mechanism of a free and open market and a national market system because it specify that there are separate Trading Permit fee tables for EEMs and Market Makers, removing the potential investor confusion and clearly setting forth which fee is applicable to EEMs and which fee is applicable to Market Makers.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

Intra-Market Competition

The Exchange believes that the proposed Market Maker Trading Permit fees do not place certain market participants at a relative disadvantage to other market participants because the proposed fees do not favor certain categories of market participants in a manner that would impose a burden on competition; rather, the fee rates are designed in order to provide objective criteria for Market Makers of different sizes and business models that best matches their quoting activity on the Exchange. Further, the Exchange believes that the proposed Market Maker Trading Permit fees will not impose a burden on intramarket competition because, when these fees are viewed in the context of the overall activity on the Exchange, Market Makers: (1) consume the most bandwidth and resources of the network; (2) transact the vast majority of the volume on the Exchange; and (3) require the high touch network support services provided by the Exchange and its staff, including more costly network monitoring, reporting and support services, resulting in a much higher cost to the Exchange. The Exchange notes that the majority of customer demand comes from Market Makers, whose transactions make up a majority of the volume on the Exchange. Further, as discussed herein, other Member types (Broker Dealers, Professional Customers, and Priority Customers) take up significantly less Exchange resources and costs. As such, the Exchange does not believe charging Market Makers higher Trading Permit fees than other Member types will impose a burden on intramarket competition.

The Exchange believes that the tiered structure of the proposed Market Maker Trading Permit fees will not impose a burden on intramarket competition because the tiered structure takes into account the number of classes quoted by each individual Market Maker. As discussed herein, the Exchange's system requires increased performance and capacity in order to provide the opportunity for each Market Maker to quote in a higher number of options classes on the Exchange. Specifically, the more classes that are actively quoted on the Exchange by a Market Maker requires increased memory for record retention, increased bandwidth for optimized performance, increased functionalities on each application layer, and increased optimization with regard to surveillance and monitoring of such classes quoted. As such, basing the Market Maker Trading Permit fee on the greatest number of classes quoted in on any given day in a calendar month is reasonable and appropriate when taking into account how the increased number of quoted classes directly impact the costs and resources for the Exchange.

Inter-Market Competition

The Exchange believes the proposed Market Maker Trading Permit fees do

[51] *See supra* notes 18 to 25.

[52] The Exchange presumes that the fees of other exchanges are reasonable, as required by the Exchange Act in the absence of any suspension or disapproval order by the Commission providing otherwise.

not place an undue burden on competition on other self-regulatory organizations that is not necessary or appropriate. The proposed tiered structure is based on the number of options classes the Market Maker is registered in, not the number of series within the options class. The Exchange believes its proposal would promote intermarket competition because the proposed tiered structure would encourage Market Makers to register in more series within each options class as each additional series in that class would not count towards the particular Market Maker's overall number of classes assigned, and cause them to qualify for a higher tier and higher fee. This could improve the Exchange's market quality by encouraging Market Makers to quote more series within an options class without it impacting its Trading Permit fee.

Market making firms are not forced to become market makers on all options exchanges. The Exchange notes that it has far less Market Makers as compared to the much greater number of market makers at other options exchanges. There are a number of large market makers that are participants of other options exchange but not Members of the Exchange. The Exchange is also unaware of any assertion that its existing fee levels or the proposed Market Maker Trading Permit fees would somehow unduly impair its competition with other options exchanges. To the contrary, if the fees charged are deemed too high by a market making firm, they can simply discontinue their membership with the Exchange.

The Exchange operates in a highly competitive market in which market participants can readily favor one of the 15 competing options venues if they deem fee levels at a particular venue to be excessive. Based on publicly-available information, and excluding index-based options, no single exchange has more than 11–12% equity options market share.[53] Therefore, no exchange possesses significant pricing power in the execution of multiply-listed equity and exchange-traded fund (''ETF'') options order flow. For the month of October 2022, the Exchange had a market share of approximately 4.32% of executed multiply-listed equity options[54] and the Exchange believes that the ever-shifting market share among exchanges from month to month demonstrates that market participants can discontinue or reduce use of certain categories of products, or shift order flow, in response to fee changes. In such an environment, the Exchange must continually adjust its fees and fee waivers to remain competitive with other exchanges and to attract order flow to the facility.

Finally, the Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues. In such an environment, the Exchange must continually review, and consider adjusting, its fees and credits to remain competitive with other exchanges. For the reasons described above, the Exchange believes that the proposed rule change reflects this competitive environment.

Clarifying Change

The Exchange believes its proposal to change the word ''Member'' to ''EEM'' under the heading ''Type of Trading Permit'' in the table of Trading Permit fees that are based on type of interface used, FIX or MEO, will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes the proposed changes will not impose any burden on intra-market competition because the change simply clarifies that the first table of Trading Permit fees applies only to EEMs. The Exchange believes the proposed change will have not impose any burden on intra-market competition as the proposed change is not designed to address any competitive issue but rather is designed to provide clarity to the Fee Schedule. In addition, the Exchange does not believe the proposal will impose any burden on inter-market competition as the proposal does not address any competitive issues and is intended to protect investors by providing further transparency and precision for the Fee Schedule.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act,[55] and Rule 19b–4(f)(2)[56] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–PEARL–2022–51 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–PEARL–2022–51. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–96341; File No. SR–NASDAQ–2022–065]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Delay Implementation of Pending Amendments to Equity 4, Rules 4120, 4702 and 4703

November 17, 2022.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 14, 2022, The Nasdaq Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to delay implementation of pending amendments to Equity 4, Rules 4120, 4702 and 4703[3] in light of planned changes to the System.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/nasdaq/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

On November 14, 2022, the Exchange plans introduce a new upgraded version of the OUCH Order entry protocol[4] that will, when fully implemented, enable the Exchange to make functional improvements to specific Order Types[5] and Order Attributes.[6] The Exchange filed its proposal (the ''Proposal'') for these enhancements with the SEC on September 14, 2022, and in the Proposal the Exchange stated that its operative date would be November 14.[7] The Exchange recently issued a reminder of that operative date in an Equity Trader Alert.[8] The Exchange now wishes to inform participants that while it intends to proceed with introducing technical upgrades to OUCH on November 14th, the functional upgrades affecting Order Types, Order Attributes, and Order Handling and trading behavior will not be available on that date.

By way of background, the functional enhancements to OUCH set forth in the Proposal will enable the Exchange to upgrade the logic and implementation of certain of its Order Types and Order Attributes so that the features are more robust, streamlined, and harmonized across the Exchange's Systems and Order entry protocols. The Exchange developed OUCH with simplicity in mind, and therefore, it presently lacks certain complex order handling capabilities. By contrast, the Exchange specifically designed its RASH Order Entry Protocol[9] to support advanced functionality, including discretion, random reserve, pegging and routing. The introduction of OUCH upgrades will enable participants to utilize OUCH, in addition to RASH, to enter Order Types that require advanced functionality. Thus, the upgrades will not introduce new functionality, but rather, it will offer to OUCH users advanced functionality that already exists for RASH users.

Specifically, the Proposal will amend Rule 4702 pertaining to Order Types to specify that, going forward, OUCH may be used to enter certain Order Types together with certain Order Attributes, whereas now, Rule 4702 specifies that RASH, FIX, and QIX, but not OUCH, may be used to enter such combinations of Order Types and Attributes.[10] The Proposal will also adjust the current functionality of the Pegging,[11] Reserve,[12] and Trade Now Order Attributes,[13] as described therein, so that they align with how OUCH, once upgraded, will handle these Order Attributes going forward.

Unfortunately, none of these new OUCH functionalities set forth in the Proposal will be available on November 14, 2022, and they may not be available for several months thereafter due to delays in completing the necessary

[2] 17 CFR 240.19b–4.

[3] References herein to Nasdaq Rules in the 4000 Series shall mean Rules in Nasdaq Equity 4.

[4] The OUCH Order entry protocol is a proprietary protocol that allows subscribers to quickly enter orders into the System and receive executions. OUCH accepts limit Orders from members, and if there are matching Orders, they will execute. Non-matching Orders are added to the Limit Order Book, a database of available limit Orders, where they are matched in price-time priority. OUCH only provides a method for members to send Orders and receive status updates on those Orders. See *https://www.nasdaqtrader.com/Trader.aspx?id=OUCH.*

[5] An ''Order Type'' is a standardized set of instructions associated with an Order that define how it will behave with respect to pricing, execution, and/or posting to the Exchange Book when submitted to Nasdaq. *See* Equity 1, Section 1(a)(7).

[6] An ''Order Attribute'' is a further set of variable instructions that may be associated with an Order to further define how it will behave with respect to pricing, execution, and/or posting to the Exchange Book when submitted to the Exchange. *See id.*

[7] *See* Securities Exchange Act Release No. 34–95768 (September 14, 2022); 87 FR 57534 (September 20, 2022) (SR–Nasdaq–2022–051).

[8] *See* Equity Trader Alert 2022–96 (October 26, 2022), available at *http://www.nasdaqtrader.com/TraderNews.aspx?id=%20ETA2022-96.*

[9] The RASH (Routing and Special Handling) Order entry protocol is a proprietary protocol that allows members to enter Orders, cancel existing Orders and receive executions. RASH allows participants to use advanced functionality, including discretion, random reserve, pegging and routing. *See http://nasdaqtrader.com/content/technicalsupport/specifications/TradingProducts/rash_sb.pdf.*

[10] The planned upgrades will enable members to utilize OUCH in additional circumstances, including for the entry of: (1) Price to Comply and Price to Display Orders with the Reserve Size, Primary and Market Pegging, and Discretion Order Attributes; (2) Non-Displayed Orders with the Primary and Market Pegging, Midpoint Pegging (in scenarios described in amended Rule 4703(d)), and Discretion Order Attributes; and (3) Market Maker Peg Orders.

[11] *See* Rule 4703(d).

[12] *See* Rule 4703(h).

[13] *See* Rule 4703(m)–(n).

development work. The Exchange still will make the new version of OUCH available for participant use on November 14th, as the Exchange will be in a position on that date to implement certain technical enhancements to the OUCH Protocol of value to participants. However, these technical enhancements will not affect existing Order Types, Order Attributes, or Order handling or trading behavior on the Exchange.

As such, the new Rules set forth in the Proposal will not be operational on November 14th. Instead, existing Rules governing Order Types, Order Attributes and Order handling and trading behavior on the Exchange will continue to apply as of November 14th and until such date as all of the functional upgrades to OUCH are complete and ready for implementation. The Exchange will announce the implementation date of the new OUCH functionalities, and of the new Rules set forth in the Proposal, in an Equity Trader Alert at least 30 days prior to implementation. A present, the Exchange expects that the new OUCH functionality will be ready for full implementation in the second or third quarter of 2023, although that time frame is subject to change.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[14] in general, and furthers the objectives of Section 6(b)(5) of the Act,[15] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

It is consistent with the Act to delay implementation of pending amendments to the Exchange's Rulebook relating to effectuate functional upgrades to OUCH because such functional upgrades will not be ready for implementation upon the launch of the new version of the OUCH protocol on November 14, 2022. The Exchange believes that it is in the best interests of investors and the public, and consistent with the maintenance of an orderly market, to avoid confusion by maintaining its current Rulebook governing OUCH until such time as the Exchange is ready to implement the new functionality.

[14] 15 U.S.C. 78f(b).

[15] 15 U.S.C. 78f(b)(5).

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change will merely delay the implementation schedule for the Proposal as well as the Rules that will apply to participants and their Orders in the interim period.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act [16] and Rule 19b–4(f)(6) thereunder.[17]

A proposed rule change filed under Rule 19b–4(f)(6) normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii), the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing.

The Commission believes that a waiver of the operative delay is consistent with the protection of investors and the public interest because it allow the Exchange to avoid confusion that might otherwise arise on November 14, 2022, the date when the Proposal is currently scheduled to become operative, if the Exchange's Rulebook was to suggest to participants that OUCH Orders will behave in a manner that is not yet accurate. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposal operative upon filing.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [18] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–NASDAQ–2022–065 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2022–065. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of

[16] 15 U.S.C. 78s(b)(3)(A)(iii).

[17] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[18] 15 U.S.C. 78s(b)(2)(B).

10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NASDAQ–2022–065 and should be submitted on or before December 14,2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[19]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–96345; File Nos. SR–DTC–2022–006; SR–FICC–2022–004; SR–NSCC–2022–006]

Self-Regulatory Organizations; The Depository Trust Company; Fixed Income Clearing Corporation; National Securities Corporation; Order Granting Proposed Rule Changes To Amend the Stress Testing Framework and Liquidity Risk Management Framework

November 17, 2022.

On May 26, 2022, The Depository Trust Company (''DTC''), Fixed Income Clearing Corporation (''FICC''), and National Securities Clearing Corporation (''NSCC'') (each a ''Clearing Agency,'' and collectively, the ''Clearing Agencies''), filed with the Securities and Exchange Commission (''Commission'') proposed rule changes SR–DTC–2022–006, SR–FICC–2022–004, and SR–NSCC–2022–006 (the ''Proposed Rule Changes'') pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder [2] to amend the Stress Testing Framework and Liquidity Risk Management Framework adopted by the Clearing Agencies, as well as to update the FICC Mortgage-Backed Securities Division (''MBSD'') Rules.

The Proposed Rule Changes were published for comment in the **Federal Register** on June 15, 2022.[3] On July 14, 2022, the Commission published notices designating a longer period of time for Commission action and a longer period for public comment on the Proposed Rule Changes.[4] On September 9, 2022, the Commission issued orders instituting proceedings on the Proposed Rule Changes.[5] The Commission has received comments on the changes proposed therein.[6] This order approves the Proposed Rule Changes.

I. Description of the Proposed Rule Changes

A. Background and Overview of the Changes

The Clearing Agencies adopted the Clearing Agency Stress Testing Framework (Market Risk) (''ST Framework'') to set forth the manner in which they identify, measure, monitor, and manage their credit exposures to participants and those arising from their respective payment, clearing, and settlement processes by, for example, maintaining sufficient prefunded financial resources to cover its credit exposures to each participant fully with a high degree of confidence and testing the sufficiency of those prefunded financial resources through stress testing.[7] The ST Framework describes the stress testing activities of each of the Clearing Agencies. The Clearing Agencies adopted the Clearing Agency Liquidity Risk Management Framework (''LRM Framework,'' and, together with the ST Framework, the ''Frameworks'') to set forth the manner in which they measure, monitor and manage the liquidity risks that arise in or are borne by each of the Clearing Agencies by, for example, (1) maintaining sufficient liquid resources to effect same-day settlement of payment obligations with a high degree of confidence under a wide range of foreseeable stress scenarios that includes, but is not limited to, the default of the participant family that would generate the largest aggregate payment obligation for each Clearing Agency in extreme but plausible market conditions, and (2) determining the amount and regularly testing the sufficiency of qualifying liquid resources by conducting stress testing of those resources.[8] The LRM Framework describes the liquidity risk management activities of each of the Clearing Agencies.

First, the proposed rule change would amend both the ST Framework and the LRM Framework to move descriptions of the Clearing Agencies' liquidity stress testing activities,[9] from the LRM Framework to the ST Framework. In connection with this proposed change, the Clearing Agencies are also proposing to recategorize the liquidity stress scenarios by removing the Level 1, Level 2 and Level 3 labels and instead categorizing all stress scenarios as either regulatory or informational.

Second, the proposed changes would amend the ST Framework to (1) enhance stress testing for GSD to obtain certain data utilized in stress testing from external vendors and implement a back-up stress testing calculation that would

[4] Securities Exchange Act Release No. 95282 (July 14, 2022), 87 FR 43354 (July 20, 2022) (SR–DTC–006); Securities Exchange Act Release No. 95283 (July 14, 2022), 87 FR 43364 (July 20, 2022) (SR–FICC–2022–004); Securities Exchange Act Release No. (July 14, 2022), 87 FR 43354 (July 20, 2022) (SR–NSCC–2022–006).

[5] Securities Exchange Act Release No. 95729 (Sept. 9, 2022), 87 FR 56733 (Sept. 15, 2022) (SR–DTC–2022–006); Securities Exchange Act Release No. 95724 (Sept. 9, 2022), 87 FR 56732 (Sept. 15, 2022) (SR–FICC–2022–004); Securities Exchange Act Release No. 95725 (Sept. 9, 2022), 87 FR 56735 (Sept. 15, 2022) (SR–NSCC–2022–006).

[6] Specifically, the Commission received comments only on the DTC Notice, and the comment is available at *https://www.sec.gov/comments/sr-dtc-2022-006/srdtc2022006.htm.* The commenter raised a concern regarding the confidentiality of the proposed rule. *Id.* DTC asserted that the exhibits to the filing, including the proposed rule, were entitled to confidential treatment because, if released, they could cause harm to the Clearing Agencies and their participants. Under Section 23(a)(3) of the Exchange Act, the Commission is not required to make public statements filed with the Commission in connection with a proposed rule change of a self-regulatory organization if the Commission could withhold the statements from the public in accordance with the Freedom of Information Act (''FOIA''), 5 U.S.C. 552. 15 U.S.C. 78w(a)(3). The Commission has reviewed the documents for which DTC requests confidential treatment and concludes that they could be withheld from the public under the FOIA. FOIA Exemption 4 protects confidential commercial or financial information. 5 U.S.C. 552(b)(4). Under Exemption 4, information is confidential if it ''is both customarily and actually treated as private by its owner and provided to government under an assurance of privacy.'' *Food Marketing Institute* v. *Argus Leader Media,* 139 S. Ct. 2356, 2366 (2019). The Commission understands that DTC has not disclosed the confidential exhibits to the public, and believes that the information is the type that would not customarily be disclosed to the public. In addition, by requesting confidential treatment, DTC had an assurance of privacy because the Commission generally protects information that can be withheld under Exemption 4. Thus, the Commission has determined to accord confidential treatment to the confidential exhibits.

[7] Securities Exchange Act Release No. 82368 (Dec. 19, 2017), 82 FR 61082 (Dec. 26, 2017) (SR–DTC–2017–005; SR–FICC–2017–009; SR–NSCC–2017–006) (''Initial ST Framework Order'').

[8] Securities Exchange Act Release Nos. 82377 (December 21, 2017), 82 FR 61617 (December 28, 2017) (File Nos. SR–DTC–2017–004; SR–FICC–2017–008; SR–NSCC–2017–005) (''Initial LRM Framework Order'').

[9] 17 CFR 240.17Ad–22(e)(7)(vi).

be utilized in the event such data is not supplied by its vendors, and amend the ST Framework to reflect these practices for both GSD and MBSD; (2) reflect that a stress testing team is primarily responsible for the actions described in the ST Framework, and (3) make other revisions to update and clarify the statements in the ST Framework, as further described below.

Third, the proposed changes would amend the LRM Framework to update and clarify the statements in the LRM Framework, as further described below.

Finally, the proposed changes would amend the MBSD Rules to remove duplicative disclosures regarding the stress testing program, as further described below.

B. Changes To Move Activities Related To Stress Testing Qualifying Liquid Resources From the LRM Framework to the ST Framework

The proposed changes would amend both the ST Framework and the LRM Framework to move descriptions of the Clearing Agencies' liquidity stress testing activities from the LRM Framework to the ST Framework. These activities are primarily performed by the Stress Testing Team within the Group Chief Risk Office (''GCRO'') of the Depository Trust and Clearing Corporation, which includes members of the Market Risk Management and the Liquidity Risk Management groups within the GCRO.[10] The Clearing Agencies state that the Stress Testing Team, which was previously responsible for stress testing the Clearing Agencies' prefunded financial resources, as part of the market risk management function, took over stress testing of the Clearing Agencies' liquidity resources related to liquidity risk management in order to centralize stress testing activities and related responsibilities under one team.[11]

The Clearing Agencies propose several amendments to both the ST Framework and the LRM Framework to incorporate these changes. First, Section 1 (Executive Summary) and Section 4 (Liquidity Risk Management Regulatory Requirements) of the LRM Framework would be amended to make clear that compliance with the requirements of Rule 17Ad–22(e)(7)(vi) are not addressed in that document, and are addressed in the ST Framework. Section 2 (Glossary of Key Terms) of the LRM Framework would also be amended to include definitions of ''Clearing Agency Stress Testing Framework'' and the ''Stress Testing Team,'' and to remove the definition of the Enterprise Stress Testing Council, which is an internal forum that addresses stress testing matters. Finally, Section 6 (Liquidity Risk Management) of the LRM Framework would be amended to describe at a high-level the activities related to stress testing of the Clearing Agencies' qualifying liquid resources and to state that these activities are described in greater detail in the ST Framework.

The proposed change would also require revisions throughout the ST Framework to include descriptions of liquidity stress testing activities that support the Clearing Agencies' compliance with the requirements of Rule 17Ad–22(e)(7)(vi) within the existing sections of the ST Framework. These proposed changes would include revisions to Section 1 (Executive Summary) of the ST Framework to clarify that stress testing related to liquidity risk management is described in this document, and revisions to Section 2 (Glossary of Key Terms) to include definitions related to these activities. These definitions would include the Liquidity Risk Management group within GCRO and a Clearing Agency Liquidity Risk Management Framework. Section 4 of the ST Framework would be renamed ''Stress Testing Requirements'' and would be amended to make clearer which requirements in Rules 17Ad–22(e)(4) and (7) are addressed in the ST Framework, and to identify the documents where the requirements not addressed in the ST Framework are addressed.

The proposed changes to the ST Framework would create a new Section 6, which would be named ''Qualifying Liquid Resources—Liquidity Risk Management,'' to describe at a high-level how each of the Clearing Agencies determine the amount and regularly test the sufficiency of their respective qualifying liquid resources. This new section would include language that is substantially identical to language that would be removed from Section 6 (Liquidity Risk Management) of the LRM Framework.

The new Section 7 (Stress Testing Methodologies) (previously numbered Section 6) of the ST Framework would be updated to include descriptions of the methodologies used in liquidity stress testing. Such methodologies would not change substantively, and the language used in the revisions to this section would be substantively identical to language that would be removed from Section 6 (Liquidity Risk Management) of the LRM Framework.

Finally, the new Section 8 of the ST Framework (previously numbered Section 7), which would be renamed ''Stress Testing Governance and Escalation Procedures,'' would be amended to include matters related to liquidity stress testing. More specifically, the new Section 8.1 would address governance and oversight of stress testing, which is set forth in a number of internal documents, and overseen by a stress testing committee, the Management Risk Committee and the Risk Committee of the Board of Directors of the Clearing Agencies. The new Section 8.2 would describe the daily monitoring for threshold breaches and liquidity shortfalls, and the escalations and actions that would follow those breaches. More specifically, the Clearing Agencies monitor for breaches of a ''Cover One Ratio,'' which is defined as the ratio of a family of affiliated Members' deficiency over the total value of the applicable Clearing Agencies' Clearing Fund or Participants Fund, excluding the sum value of the applicable family's required deposit to the Clearing Fund or Participants Fund, as applicable. With respect to liquidity stress testing, the Clearing Agencies monitor daily for liquidity shortfalls, which trigger a series of escalations and remediation actions, which would be identified in this new Section 8.2.

The new Section 8.3 would address comprehensive analyses of stress scenarios, which occur on at least a monthly basis. These analyses include (1) daily stress testing results, model parameters, model assumptions, and model performance, and (2) each stress scenario set for its comprehensiveness and relevance, including any changes or updates to such scenarios for the period. The new Section 8.4 would address the escalations and reporting of the monthly analyses of stress scenarios. Finally, the new Section 8.5 would address the regular escalation of the results of stress testing, including any concerns related to those results.

Each of these subsections would address stress testing related to market risk, using language that is currently in the ST Framework, and would include language to address liquidity stress testing that would be substantially similar to the language removed from the LRM Framework. Revisions to the language removed from the LRM

[10] DTCC is the parent company of the Clearing Agencies. DTCC operates on a shared services model with respect to the Clearing Agencies and its other subsidiaries. Most corporate functions are established and managed on an enterprise-wide basis pursuant to intercompany agreements under which it is generally DTCC that provides a relevant service to its subsidiaries, including the Clearing Agencies.

[11] DTC Notice, *supra* note 3, 87 FR at 36193; FICC Notice, *supra* note 3, 87 FR at 36184; NSCC Notice, *supra* note 3, 87 FR at 36159.

Framework would be primarily drafting revisions, as the Clearing Agencies are not proposing changes to how they conduct liquidity stress testing.[12]

In connection with the changes described above, the proposed amendments would also reflect the recategorization of liquidity stress scenarios. Previously, liquidity stress scenarios were categorized as Level 1, 2 and 3 scenarios. Level 1 scenarios described qualifying liquid resources under normal market conditions and were considered ''baseline'' scenarios. Level 2 scenarios assumed a wide range of foreseeable stress scenarios that included, but were not limited to, the default of the family of affiliated Members that would generate the largest aggregate payment obligation for each Clearing Agency in extreme but plausible market conditions. These scenarios were designed to identify the qualifying liquid resources each Clearing Agency should maintain to meet compliance with Rule 17Ad–22(e)(7)(i). Finally, the Level 3 scenarios were divided into either (1) regulatory scenarios, which were designed to meet the requirements of Rule 17Ad–22(e)(7)(vi)(A), and (2) informational scenarios, which were designed to be performed for informational and monitoring purposes using stress scenarios that exceed the requirements of Rule 17Ad–22(e)(7)(vi)(A).[13]

The Clearing Agencies state that, while they continue to maintain a wide range of stress scenarios that are designed to comply with the requirements of Rules 17Ad–22(e)(7), in order to simplify the descriptions of its liquidity stress scenarios and align them with the categorization of market risk stress scenarios, the Clearing Agencies have re-categorized the liquidity stress scenarios and eliminated the Level 1, Level 2 and Level 3 categories. Instead, all stress scenarios would be described in Section 6 of the ST Framework as being either (1) regulatory stress scenarios, which are designed to comply with the requirements of Rules 17Ad–22(e)(4)(i) and (vi)(A), and Rules 17Ad–22(e)(7)(i) and (vi)(A); or (2) informational stress scenarios, which may utilize parameters and assumptions that exceed the requirements of Rules 17Ad–22(e)(4)(vi)(A) and (7)(vi)(A) and are utilized for informational, analytical and/or monitoring purposes only. The Clearing Agencies state that this proposed change is a change only to the categorization of these stress scenarios and is not a change to how the Clearing Agencies conduct liquidity stress testing or otherwise meet the requirements of Rule 17Ad–22(e)(7)(vi)(A).[14] Those revisions regarding the categorization of the liquidity stress scenarios would be reflected in Section 7 of the ST Framework.

C. Proposed Amendments to the ST Framework

The proposed changes would amend the ST Framework to (1) incorporate the use of certain data utilized in stress testing from external vendors and implement a back-up stress testing calculation that would be utilized in the event such data is not supplied by its vendors, similar to the process currently used at MBSD, which is currently the case; (2) reflect that a stress testing team is primarily responsible for the actions described in the ST Framework, and (3) make other revisions to update and clarify the statements in the ST Framework, as further described below.

1. Enhance GSD Stress Testing To Use Vendor-Sourced Data

First, the proposed changes would amend GSD stress testing to utilize vendor-supplied historical risk factor time series data (''Historical Data'') and vendor-supplied security-level risk sensitivity data (''Security-Level Data'') in the stress testing program. This proposed enhancement would be similar to the approach utilized in MBSD stress testing.[15]

The vendor-sourced Historical Data would include data regarding (1) interest rate, (2) implied inflation rate, (3) agency spread, (4) mortgage option adjusted spread, (5) interest rate volatility, and (6) mortgage basis. The vendor-sourced Security-Level Data would include data regarding (1) sensitivity to interest rates, (2) implied inflation rate, (3) agency spread, (4) convexity, (5) sensitivity to mortgage option adjusted spread, (6) sensitivity to interest rate volatility, and (7) sensitivity to mortgage basis. FICC currently utilizes the Historical Data and Security-Level Data in GSD's value-at-risk (''VaR'') model, which calculates the VaR Charge component of GSD's Clearing Fund (referred to in the GSD Rulebook as Required Fund Deposit).[16] FICC now proposes to use at GSD the data set currently used in MBSD's stress testing program.

As described in greater detail in the ST Framework,[17] stress testing involves three key components: (1) risk identification, (2) scenario development, which involves the construction of comprehensive and relevant sets of extreme but plausible historical and hypothetical stress scenarios; and (3) risk measurement and aggregation, in which risk metrics are calculated to estimate the profits and losses in connection with the hypothetical close out of a participant's portfolio in certain stress scenarios.

FICC would utilize the vendor-sourced data in the development of historical stress scenarios and in the risk measurement and aggregation process of the GSD stress testing program. More specifically, the Historical Data would be used to identify the largest historical changes of risk factors that influence the pricing of product cleared by GSD, in connection with the development of stress scenarios. The vendor-sourced Historical Data would identify stress risk exposures under broader and more varied market conditions than the data currently available to FICC.

FICC would utilize both the Historical Data and the Security-Level Data in the risk measurement and aggregation process of stress testing. FICC believes that the vendor-sourced Security-Level Data is more stable and robust than the data currently utilized by FICC for GSD stress testing.[18] Because the stress profits and losses calculation that occur in connection with the risk measurement and aggregation process in stress testing would include Security-Level Data, FICC believes that the calculated results would be improved and would reflect results that are closer to actual price changes for government securities during larger market moves which are typical of stress testing scenarios.[19]

Finally, the proposed changes to enhance GSD stress testing would also implement a back-up calculation that GSD would utilize in the event that the vendor fails to provide such data to GSD. Specifically, if the vendor fails to provide any data or a significant portion of data in accordance with the timeframes agreed to by FICC and the vendor, FICC would use the most recently available data on the first day that such disruption occurs in its stress

[19] *Id.*

testing calculations. Subject to discussions with the vendor, if FICC determines that the vendor would resume providing data within five (5) Business Days, FICC would determine whether the daily stress testing calculation should continue to be calculated by using the most recently available data or whether the back-up calculation (as described below) should be invoked. Subject to discussions with the vendor, if FICC determines that the data disruption would extend beyond five (5) Business Days, the back-up calculation would be employed for daily stress testing, subject to appropriate internal governance.

The proposed back-up calculation would include the following calculations: (1) calculate each Netting Member's portfolio net exposures, (2) calculate the historical stress return, and (3) calculate each Netting Member's stress profits and losses. FICC would use publicly available indices as the data source for the stress return calculations. This calculation would be referred to as the Back-up Stress Testing Calculation in the ST Framework.

The Clearing Agencies would describe the use of vendor-sourced data in stress testing for GSD and MBSD and the Back-up Stress Testing Calculation, as described above, in a new Section 7.1 of the ST Framework.

2. Identify the Stress Testing Team as Responsible for Stress Testing

As described above, stress testing for the Clearing Agencies is primarily performed by the Stress Testing Team, which includes members of both Market Risk Management and Liquidity Risk Management of DTCC within GCRO. The Stress Testing Team took over stress testing responsibilities related to liquidity risk management in late 2019 to centralize stress testing and related responsibilities under one team.

Therefore, the Clearing Agencies are proposing to include a general statement in Section 1 (Executive Summary) of the ST Framework that, unless otherwise specified, actions in the ST Framework related to stress testing are performed by the Stress Testing Team. The proposed changes would also amend Section 3 (Framework Ownership and Change Management) of the ST Framework to make it clear that the Stress Testing Team owns and manages the ST Framework and is responsible for reviewing the ST Framework no less frequently than annually.

In connection with this proposed change, the ST Framework would also be updated to describe actions related to stress testing without specifically identifying the group responsible for those actions. These proposed changes would simplify the descriptions in the ST Framework, while clarifying the team responsible for conducting these actions in a general statement in the ST Framework.

3. Update and Clarify the ST Framework

Finally, the proposed changes would also make immaterial revisions to update and clarify the ST Framework. For example, the proposed changes would update the names of certain documents that support the ST Framework to refer to the Clearing Agencies, rather than DTCC, in the document titles. These documents were renamed to conform to internal document naming conventions. The proposed changes would also amend Section 2 (Glossary of Key Terms) of the ST Framework to clarify and simplify the use of certain key terms. For example, the proposed changes would move the definitions of ''Members'' and ''Participants'' from a footnote in Section 4 to Section 2, and would update the definition of ''BRC,'' which refers to the Risk Committee of the Boards of Directors of the Clearing Agency, to be more descriptive.

The proposed amendments would update Section 4 (Stress Testing Requirements) of the ST Framework to (1) more clearly state which requirements under Rules 17Ad–22(e)(4) and (7) are addressed in the ST Framework, (2) identify the separate documents that describe the requirements that are not addressed in the ST Framework, and (3) identify the requirements that are not applicable to the Clearing Agencies and, therefore, not described in any document.

In addition, the proposed change would also revise the description of reverse stress testing to more clearly describe the goal and purpose of this testing.[20] Specifically, reverse stress testing is used to identify tail risks by using extreme stress scenarios. In this way, reverse stress testing, which is conducted semi-annually, can be used to inform regular stress testing activities. The proposed changes would provide more transparency into the purpose of reverse stress testing conducted by the Clearing Agencies.

None of these proposed changes would make substantive revisions to the ST Framework or reflect material changes to how the Clearing Agencies conduct the activities described in the ST Framework but would update and clarify those descriptions.[21]

D. Proposed Amendments To Update and Clarify the LRM Framework

In addition to removing descriptions of stress testing activities from the LRM Framework, as described in section I.A above, the proposed changes would also make immaterial revisions to update and clarify the LRM Framework. For example, the proposed changes would update the name of the team within the GCRO that is responsible for liquidity risk management from the Liquidity Product Risk Unit, or LPRU, to Liquidity Risk Management. This proposed change would reflect a recent organizational change to the name of this group.[22]

Additionally, the proposed changes would update Section 10 (Liquidity Risk Tolerances) of the LRM Framework to state that an officer in Liquidity Risk Management is responsible for reviewing the Liquidity Risk Tolerance Statement.[23] The LRM Framework currently identifies the specific title of the individual who is responsible for reviewing the Liquidity Risk Tolerance Statement on at least an annual basis. The proposed change would provide the Clearing Agencies with flexibility to change the title of the person responsible for this review.[24]

E. Proposed Amendments to MBSD Rules To Remove Stress Testing Descriptions

Finally, the proposed rule change would remove descriptions of stress testing from the MBSD Rules, which would be duplicative of statements added to the ST Framework, described above. The Clearing Agencies do not believe that it is necessary to describe its stress testing program in multiple places in its rules, and that duplicative disclosures create a risk of inconsistencies. The ST Framework was designed to, among other things, describe the manner in which the Clearing Agencies test the sufficiency of their respective prefunded financial

[20] Tail risk generally refers to risks of outcomes that are caused by extreme or rare events.

[21] DTC Notice, *supra* note 3, 87 FR at 36195; FICC Notice, *supra* note 3, 87 FR at 36186; NSCC Notice, *supra* note 3, 87 FR at 36161.

[22] DTC Notice, *supra* note 3, 87 FR at 36195; FICC Notice, *supra* note 3, 87 FR at 36186; NSCC Notice, *supra* note 3, 87 FR at 36161.

[23] The Liquidity Risk Tolerance Statement is liquidity risk management control that, among other things, (1) defines liquidity risk and describes how liquidity risk would materialize for each Clearing Agency specifically, (2) sets forth how liquidity risk is monitored by the Clearing Agencies, and (3) describes the various risk tolerance levels and thresholds for each Clearing Agency.

[24] DTC Notice, *supra* note 3, 87 FR at 36195; FICC Notice, *supra* note 3, 87 FR at 36186; NSCC Notice, *supra* note 3, 87 FR at 36161–62.

resources through stress testing and, therefore, the Clearing Agencies believe this is the appropriate rule for these disclosures.[25]

As such, the proposed change would remove the duplicative descriptions of the MBSD stress testing program from the MBSD Rules by deleting the definition of ''Back-up Stress Testing Calculation'' from MBSD Rule 1 and Section 13 of MBSD Rule 4. As described in section II.C.1 above, the matters being removed from the MBSD Rules in this proposal would be addressed in the ST Framework.

II. Discussion and Commission Findings

Section 19(b)(2)(C) of the Act[26] directs the Commission to approve a proposed rule change of a self-regulatory organization if it finds that such proposed rule change is consistent with the requirements of the Act and rules and regulations thereunder applicable to such organization. After carefully considering the Proposed Rule Change, the Commission finds that the Proposed Rule Change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to FICC. In particular, the Commission finds that the Proposed Rule Change is consistent with Sections 17A(b)(3)(F)[27] of the Act and Rule 17Ad–22(e)(4) thereunder.[28]

A. Consistency With Section 17A(b)(3)(F) of the Act

Section 17A(b)(3)(F) of the Act[29] requires the rules of a clearing agency to, among other things, (i) promote the prompt and accurate clearance and settlement of securities transactions, (ii) assure the safeguarding of securities and funds which are in the custody or control of the clearing agency or for which it is responsible, and (iii) protect investors and the public interest.

As described above in sections I.B, I.C.2, I.C.3, I.D, and I.E, the proposed changes would (1) amend both the ST Framework and the LRM Framework to move the descriptions of liquidity stress testing from the LRM Framework to the ST Framework, as well as to simplify the categorization of the liquidity stress scenarios; (2) amend the ST Framework to reflect that the Stress Testing Team is primarily responsible for stress testing activities; (3) update and clarify descriptions within the ST Framework; (4) update and clarify descriptions within the LRM Framework; and (5) remove certain duplicative sections from the MBSD Rules, as described above. These proposed changes should assist the Clearing Agencies in carrying out their stress testing and liquidity risk management functions and improve the clarity of the Frameworks in describing the Clearing Agencies' processes and responsibilities. With respect to the ST Framework, as described in sections I.B, I.C.2, and I.C.3, these changes should help maintain the Clearing Agencies' ability to determine and evaluate the credit risk presented by Clearing Agencies' members by testing (i) the sufficiency of their credit resources in a variety of extreme but plausible scenarios, and (ii) the potential losses to the Clearing Agencies from a participant default. The continued ability to evaluate credit risk could, in turn, enable the Clearing Agencies to deploy their risk-management tools more effectively to manage the credit and market presented by such members. Through such preparation, the Framework could decrease the possibility of a member default. By enabling the Clearing Agencies to use their risk-management tools to monitor its credit and market more effectively, the proposed amendments to the ST Framework are designed to help mitigate the risk that the Clearing Agencies and their non-defaulting members would suffer a loss from a member default.

Similarly, with respect to the LRM Framework, as described in sections I.D, these changes should help continue the Clearing Agencies' ability to carry out its liquidity risk management strategy such that, with respect to FICC and NSCC, they maintain liquid resources sufficient to meet the potential amount of funding required to settle outstanding transactions of a defaulting participant or family of affiliated participants in a timely manner, and with respect to DTC, it maintains sufficient available liquid resources to complete system-wide settlement on each business day, with a high degree of confidence and notwithstanding the failure to settle of the participant or affiliated family of participants with the largest settlement obligation. As such, the Clearing Agencies' liquidity risk management strategies address the Clearing Agencies' maintenance of sufficient liquid resources, which allow them to continue the prompt and accurate clearance and settlement of securities and can continue to assure the safeguarding of securities and funds which are in their custody or control or for which they are responsible notwithstanding the default of a participant or family of affiliated participants.

In addition, moving the description of the Clearing Agencies' liquidity stress testing activities into the ST Framework, the proposed change should create a description of the Clearing Agencies' collective stress testing activities in one place. Moreover, based on its review of the Proposed Rule Changes and its supervisory knowledge, the Commission understands that the Clearing Agencies are not amending their stress testing program in a substantive manner, but instead are reorganizing the stress testing scenarios and Frameworks to avoid duplication and confusion.

Therefore, the Commission finds that the proposed rule changes are designed to help promote prompt and accurate clearance and settlement, and assure the safeguarding of securities and funds which are in the custody or control of the Clearing Agencies or for which they are responsible, consistent with Section 17A(b)(3)(F) of the Act.[30]

Second, as described in Section I.C.1, FICC proposes to use vendor-supplied data in GSD's stress testing program. The Commission believes that vendor-supplied data should allow FICC to identify and analyze risk exposures under a broad and varied range of stressed market conditions, which should, in turn, help FICC identify the amount of financial resources necessary to cover its credit exposure under stress scenarios in extreme but plausible market conditions. The Commission further believes that the use of vendor-supplied data should enable FICC to perform a robust assessment of the stress profits and losses calculation, identify and address potential risks with respect to specific Clearing Members and their affiliates, and in turn, should help FICC ensure that it is collecting adequate prefunded financial resources to cover its potential losses resulting from the default of clearing members and their affiliates under extreme but plausible market conditions.

Moreover, as also described in Section I.C.1., FICC proposes to use a back-up calculation for the GSD stress testing program in the event the vendor fails to provide FICC with the vendor-sourced data. The Commission believes that the back-up calculation is designed to provide FICC with a reasonable alternative method for calculating stress profit-and-loss in the event of an interruption in the vendor-sourced data feed. By providing FICC with a reasonable alternative method for conducting stress testing, the

[25] FICC Notice, *supra* note 3, 87 FR at 36186–87.

[26] 15 U.S.C. 78s(b)(2)(C).

[27] 15 U.S.C. 78q–1(b)(3)(F).

[28] 17 CFR 240.17Ad–22(e)(4).

[29] 15 U.S.C. 78q–1(b)(3)(F).

[30] 15 U.S.C. 78q–1(b)(3)(F).

Commission believes that the proposed back-up calculation is designed to help FICC avoid gaps in assessing the sufficiency of its prefunded financial resources due to the inability to access the vendor-sourced data.

Taken together, the Commission believes that these aspects of the proposed rule change, as described in section I.C.1, should better enable FICC to evaluate and manage the credit risk presented by its Clearing Members. The Commission believes that the proposed rule change is designed to improve FICC's ability to establish, implement, maintain and enforce written policies and procedures reasonably designed to maintain sufficient prefunded financial resources that, at a minimum, enable FICC to cover the default of the Clearing Member (including relevant affiliates) that would potentially cause the largest aggregate credit exposure for FICC in extreme but plausible conditions, as required under Rule 17Ad–22(e)(4)(iii).[31] Accordingly, the Commission believes that the proposed rule change should help FICC to continue providing prompt and accurate clearance and settlement of securities transactions even in extreme but plausible historical and hypothetical stress scenarios, consistent with Section 17A(b)(3)(F) of the Act.[32]

B. Consistency With Rule 17Ad–22(e)(4)(iii) and (vi)

Rule 17Ad–22(e)(4)(iii) requires, in part, each covered clearing agency to establish, implement, maintain and enforce written policies and procedures reasonably designed to effectively identify, measure, monitor, and manage its credit exposures to participants and those arising from its payment, clearing, and settlement processes, by maintaining additional financial resources at the minimum to enable it to cover a wide range of foreseeable stress scenarios that include, but are not limited to, the default of the participant family that would potentially cause the largest aggregate credit exposure for the covered clearing agency in extreme but plausible market conditions.[33] Rule 17Ad–22(e)(4)(vi) requires, in part, each covered clearing agency to effectively identify, measure, monitor, and manage its credit exposures to participants and those arising from its payment, clearing, and settlement processes, by testing the sufficiency of its total financial resources available by conducting stress testing of its total financial resources once each day using standard predetermined parameters and assumptions.[34]

As described above in Section I.C.1, FICC proposes to change its stress testing methodology to use vendor-supplied data in the GSD stress testing program and to incorporate a back-up calculation that it would utilize in the event of an interruption in the availability of that data. Taken together, these changes should allow FICC to identify and analyze risk exposures under a broader range of stressed market conditions covering a longer time period, which should, in turn, help FICC identify the amount of financial resources necessary to cover its credit exposure under stress scenarios in extreme but plausible market conditions.

Accordingly, the Commission believes that FICC's proposed amendments to the ST Framework with respect to the GSD stress testing program set forth in section I.C.1 are consistent with Rule 17Ad–22(e)(4)(iii) because it should better enable FICC to assess its ability to maintain sufficient financial resources to cover a wide range of foreseeable stress scenarios that include the default of the member (including relevant affiliates) that would potentially cause FICC's largest aggregate credit exposure in extreme but plausible conditions.[35] Additionally, the Commission believes FICC's proposed amendments to the ST Framework set forth in section I.C.1 are consistent with Rule 17Ad–22(e)(4)(vi) because it should enable FICC to test the sufficiency of its minimum financial resources by conducting stress testing using standard predetermined parameters and assumptions.[36]

V. Conclusion

On the basis of the foregoing, the Commission finds that the Proposed Rule Changes are consistent with the requirements of the Act and in particular with the requirements of Section 17A of the Act [37] and the rules and regulations promulgated thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act [38] that proposed rule changes SR–DTC–2022–006, SR–FICC–2022–004, and SR–NSCC–2022–006, be, and hereby are, *approved*.[39]

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[40]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–96346; File No. SR–MSRB–2022–08]

Self-Regulatory Organizations; Municipal Securities Rulemaking Board; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend MSRB Rule G–27, on Supervision, To Further Extend the Current Regulatory Relief for Remote Office Inspections Through June 30, 2023

November 17, 2022.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'' or ''Exchange Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 16, 2022, the Municipal Securities Rulemaking Board (''MSRB'' or ''Board'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the MSRB. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The MSRB filed with the Commission a proposed rule change to amend Supplementary Material .01, Temporary Relief for Completing Office Inspections, of MSRB Rule G–27, on supervision, to further extend the current regulatory relief and permit brokers, dealers and municipal securities dealers (collectively, ''dealers'') to conduct office inspections, due to be completed during calendar year 2023, remotely, through June 30, 2023 (the ''proposed rule change'').

The MSRB has designated the proposed rule change as constituting a ''noncontroversial'' rule change under Section 19(b)(3)(A) [3] of the Act and Rule 19b–4(f)(6) [4] thereunder, which renders the proposal effective upon receipt of

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(6).

this filing by the Commission. The MSRB proposes an operative date of January 1, 2023.

The text of the proposed rule change is available on the MSRB's website at *https://msrb.org/2022-SEC-Filings,* at the MSRB's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the MSRB included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The MSRB has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The MSRB has continued to monitor the impact of the coronavirus disease (''COVID–19'' or ''pandemic'') on municipal market participants and how dealers' operations and business models have evolved during the public health crisis. The MSRB understands that a large number of firms have integrated a hybrid work environment in which particular business functions continue to be de-centralized. Given that dealers are still devising plans and spending time to implement hybrid work environments more fully, the MSRB believes the additional time of a six-month extension to conduct office inspections remotely, due to be completed in calendar year 2023, would allow dealers time to focus on the integration of their hybrid work environments.

The MSRB previously filed a proposed rule change for immediate effectiveness with the SEC in April 2020,[5] a second proposed rule change in December 2020,[6] a third proposed rule change in October 2021,[7] and a fourth proposed rule change in March 2022 [8] (''April relief,'' ''December relief'' ''October relief,'' and ''March relief''). In connection with the April relief, the MSRB provided an extension of time for dealers to complete certain supervisory obligations, including, among other things, that office inspections due to be conducted during calendar year 2020 could be conducted by March 31, 2021, but with the expectation that dealers would conduct their inspections on-site. The December relief provided dealers with the option to conduct their office inspections remotely that were due to be completed by March 31, 2021 (for calendar year 2020) and those for calendar year 2021, subject to certain conditions being met. The October relief provided an additional extension of time permitting dealers to continue to conduct office inspections remotely until June 30, 2022, for their office inspections that were due to be completed for calendar year 2022.[9] The March relief allowed for dealers to complete office inspections, due to be completed during calendar year 2022, remotely until December 31, 2022.

Through stakeholder engagement, the MSRB understands that dealers delayed their original return to office plans due to the continued pandemic and only more recently implemented long-term hybrid work arrangements dependent on functions and regulatory requirements, which continue to lead to logistical challenges to conducting in-person office inspections that are still being addressed. To that end, in recognition of the aforementioned challenges, and in order to address ongoing industry-wide concerns regarding having to conduct in-person office inspections while safety concerns continue to evolve as new infections, hospitalizations, and deaths due to the COVID–19 virus still persist in the United States,[10] the MSRB is proposing amendments to Supplementary Material .01 of MSRB Rule G–27. Specifically, the proposed amendments to Supplementary Material .01 of MSRB Rule G–27 would allow dealers to satisfy their office inspection obligations by permitting dealers to conduct calendar year 2023 office inspections remotely for the first six months of 2023—extending the current relief for an additional six months from December 31, 2022, to June 30, 2023.[11]

The conditions required to be met for dealers to avail themselves of the option to conduct office inspections remotely would remain unchanged under Rule G–27; however, amendments are being proposed to paragraphs (a) and (d) of Supplementary Material .01 to reflect the additional extension of time under the proposed rule change. Pursuant to paragraphs (b)–(d) of Supplementary Material .01 of MSRB Rule G–27, dealers electing to conduct their office inspections remotely must (i) amend or supplement their written supervisory procedures as appropriate to provide for remote inspections that are reasonably designed to assist in detecting and preventing violations of, and achieving compliance with, applicable securities laws and regulations, and with applicable Board rules; (ii) use remote office inspections as part of an effective supervisory system, which would include the ongoing review of activities and functions occurring at all offices and locations whether or not the dealer conducts inspections remotely; and (iii) make and maintain the required records for all offices or locations that had inspections that were conducted remotely; and any offices or locations for which the dealer determined to impose additional supervisory procedures or more frequent monitoring.

2. Statutory Basis

The MSRB believes that the proposed rule change is consistent with Section 15B(b)(2)(C) of the Exchange Act,[12] which provides that the MSRB's rules shall be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and

[5] *See* Exchange Act Release No. 88694 (April 20, 2020), 85 FR 23088 (April 24, 2020) (File No. SR–MSRB–2020–01).

[6] *See* Exchange Act Release No. 90621 (December 9, 2020), 85 FR 81254 (December 15, 2020) (File No. SR–MSRB–2020–09).

[7] *See* Exchange Act Release No. 93435 (October 27, 2021), 86 FR 60522 (November 2, 2021) (File No. SR–MSRB–2021–06).

[8] *See* Exchange Act Release No. 94383 (March 9. 2022), 87 FR 14596 (March 15, 2022) (File No. SR–MSRB–2022–01).

[9] The MSRB noted in the October relief that it would continue to assess through engagement with key stakeholders the effectiveness of remote office inspections on dealers' overall supervisory systems and would consider more long-term regulatory initiatives that align with and promote the evolving ways dealers are doing business and supervising the activities of the dealer and its associated persons. *See* Exchange Act Release No. 93435 (October 27, 2021), 86 FR 60522 (November 2, 2021) (File No. SR–MSRB–2021–06). The MSRB is still undertaking such review.

[10] *See* The Centers for Disease Control and Prevention (''CDC''), COVID Data Tracker (showing that as of September 29, 2022, there are 47,112 daily average new cases of COVID–19, 343 daily average new deaths from COVID–19, and 3,634 daily average new hospitalizations from COVID–19 in the United States). The CDC's COVID Data Tracker is available at *https://covid.cdc.gov/covid-data-tracker/#datatracker-home.* The MSRB recognizes that the aforementioned numbers are not representative of cases, hospitalizations and deaths during the height of the pandemic, but is also mindful that new variants and breakthrough cases persist.

[11] As previously noted, a temporary location established in response to the implementation of a business continuity plan is not deemed an office for purposes of complying with the office inspection obligations, under MSRB Rule G–27. *See supra* note 5.

[12] 15 U.S.C. 78*o*–4(b)(2)(C).

facilitating transactions in municipal securities and municipal financial products, to remove impediments to and perfect the mechanism of a free and open market in municipal securities and municipal financial products, and, in general, to protect investors, municipal entities, obligated persons, and the public interest.

The proposed rule change is designed to provide dealers additional time to comply with certain obligations under MSRB rules for a temporary period of time. The proposed rule change does not relieve dealers from compliance with their core regulatory obligations to establish and maintain a system to supervise the activities of each of their associated persons that is reasonably designed to achieve compliance with applicable rules and regulations, and with applicable MSRB rules, which serve to protect investors, municipal entities, obligated persons, and the public interest. The MSRB continues to believe that an additional extension affording dealers the option to conduct remote inspections, due to be completed in calendar year 2023, for the first half of the calendar year, or until June 30, 2023, is a prudent regulatory approach. This approach will allow dealers time to adapt to long-term hybrid work arrangements more fully and to continue to assess the ongoing events related to the pandemic while continuing to serve the important investor protection objectives of the inspection obligations.

In a time when faced with unique challenges resulting from the sustained pandemic and while much uncertainty still remains, the proposed rule change will afford dealers the ability to safeguard the health and safety of their personnel and to more effectively allocate resources to serve and promote the protection of investors, municipal entities, obligated persons and the public interest. In addition, the proposed rule change also will alleviate some of the operational challenges dealers may be experiencing, which will allow them to more effectively allocate resources to the operations that facilitate transactions in municipal securities and municipal financial products, to remove impediments to and perfect the mechanism of a free and open market in municipal securities and municipal financial products.[13]

[13] The proposed amendments only create the option for dealers to conduct office inspections remotely through June 30, 2023. With that in mind, dealers should consider whether, under their particular operating conditions, electing to conduct the required office inspections remotely would be reasonable under facts and circumstances.

B. Self-Regulatory Organization's Statement on Burden on Competition

Section 15B(b)(2)(C) of the Act requires that MSRB rules be designed not to impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.[14] In fact, the MSRB does not believe that the proposed rule change will have any burden on competition because the proposed rule change treats all dealers equally in that all dealers have the option to elect to conduct remote inspections remotely until June 30, 2023. The goal of the proposed rule change is to grant additional time for dealers to fully focus their time on the establishment and integration of long-term hybrid work arrangements—recognizing the use of a remote work force and transformative technology to decentralize functions—while also balancing the regulatory obligation to establish office inspection schedules for the first half of 2023 and meet their office inspection obligations, under Supplementary Material .01 of Rule G–27. The temporary relief afforded does not alter dealers' underlying obligations under the rule and with applicable MSRB rules that directly serve investor protection.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [15] and Rule 19b–4(f)(6) [16] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–MSRB–2022–08 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

All submissions should refer to File Number SR–MSRB–2022–08. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the MSRB. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–MSRB–2022–08 and should be submitted on or before December 14, 2022.

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 34754; File No. 812–15387]

Hennessy Funds Trust, et al.

November 18, 2022.

AGENCY: Securities and Exchange Commission (''Commission'').

ACTION: Notice.

Notice of an application under section 6(c) of the Investment Company Act of 1940 (the ''Act'') for an exemption from sections 2(a)(32), 5(a)(1), 22(d) and 22(e) of the Act and rule 22c–1 under the Act and under sections 6(c) and 17(b) of the Act for an exemption from sections 17(a)(1) and 17(a)(2) of the Act.

Summary of Application: Applicants request an order (''Order'') that permits: (a) The Funds (as defined below) to issue shares (''Shares'') redeemable in large aggregations only (''creation units''); (b) secondary market transactions in Shares to occur at negotiated market prices rather than at net asset value; (c) certain Funds to pay redemption proceeds, under certain circumstances, more than seven days after the tender of Shares for redemption; and (d) certain affiliated persons of a Fund to deposit securities into, and receive securities from, the Fund in connection with the purchase and redemption of creation units. The relief in the Order would incorporate by reference terms and conditions of the same relief of a previous order granting the same relief sought by applicants, as that order may be amended from time to time (''Reference Order'').[1]

Applicants: Hennessy Funds Trust, Hennessy Advisors, Inc. and Quasar Distributors, LLC.

Filing Dates: The application was filed on September 21, 2022 and amended on November 3, 2022 and November 16, 2022.

Hearing or Notification of Hearing: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing on any application by emailing the Commission's Secretary at *Secretarys-Office@sec.gov* and serving applicants with a copy of the request by email, if an email address is listed for the relevant applicant below, or personally or by mail, if a physical address is listed for the relevant applicant below. Hearing requests should be received by the Commission by 5:30 p.m. on December 13, 2022, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing the Commission's Secretary.

ADDRESSES: The Commission: *Secretarys-Office@sec.gov.* Applicants: Teresa M. Nilsen, Hennessy Advisors, Inc., 7250 Redwood Blvd., Suite 200, Novato, California 94945, *terry@hennessyfunds.com;* Peter D. Fetzer, 777 East Wisconsin Avenue, Suite 3800, Milwaukee, Wisconsin 53202, *pfetzer@foley.com.*

FOR FURTHER INFORMATION CONTACT: Deepak T. Pai, Senior Counsel, or Lisa Reid Ragen, Branch Chief, at (202) 551–6825 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: For Applicants' representations, legal analysis, and conditions, please refer to Applicants' second amended and restated application, dated November 16, 2022, which may be obtained via the Commission's website by searching for the file number at the top of this document, or for an Applicant using the Company name search field, on the SEC's EDGAR system. The SEC's EDGAR system may be searched at *https://www.sec.gov/edgar/searchedgar/legacy/companysearch.html.* You may also call the SEC's Public Reference Room at (202) 551–8090.

For the Commission, by the Division of Investment Management, under delegated authority.

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–96336; File No. SR–NYSENAT–2022–25]

Self-Regulatory Organizations; NYSE National, Inc.; Notice of Filing and Order Granting Accelerated Approval of a Proposed Rule Change To Make Certain Revisions to the Preamble to Rule 10.9217 and Add Rule 2.1210 to the List of Minor Rule Violations in Rule 10.9217(f)

November 17, 2022.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the ''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on November 4, 2022, NYSE National, Inc. (''NYSE National'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons and approving the proposal on an accelerated basis.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to (1) make certain revisions to the preamble to Rule 10.9217 (Violations Appropriate for Disposition Under Rule 10.9216(b)); (2) add Rule 2.1210 (Registration Requirements) to the list of minor rule violations in Rule 10.9217(f) and associated fine levels in Rule 10.9217(g); and (3) make certain non-substantive clarifying changes to Rule 10.9217. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item III below. The Exchange has prepared summaries, set forth in sections A, B, and C below,

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to (1) make certain revisions to the preamble to Rule 10.9217 (Violations Appropriate for Disposition Under Rule 10.9216(b)); (2) add Rule 2.1210 (Registration Requirements) to the list of minor rule violations in Rule 10.9217(f) and associated fine levels in Rule 10.9217(g); and (3) make certain non-substantive clarifying changes to Rule 10.9217.

Preamble to Rule 10.9217

The preamble to current Rule 10.9217 consists of four subsections (a) through (d). The Exchange propose to modify subsections (a) through (d) based on the preamble to the version of Rule 10.9217 adopted by the Exchange's affiliate NYSE Arca, Inc. (''NYSE Arca''), as follows.

Subsection (a) currently provides that any ETP Holder or Associated Person may be subject to a fine under Rule 10.9216(b) with respect to any rules listed in the rule and that the fine amounts and fine levels set forth therein apply to the fines imposed. Subsection (a) further provides that any fine imposed pursuant to the rule and not contested shall not be publicly reported, except as may be required by Rule 19d–1 under the Exchange Act or as may be required by any other regulatory authority.

The Exchange proposes that the current first sentence of subsection (a) would be unchanged except that the Exchange would add '', not to exceed $5,000,'' after ''fine'' to clarify that a minor rule fine on the Exchange cannot exceed $5,000.[4] The Exchange proposes to delete the second sentence providing that any fine imposed pursuant to this Rule and not contested shall not be publicly reported, except as may be required by Rule 19d–1 under the Exchange Act or as may be required by any other regulatory authority. This information is duplicative of information contained in Rule 10.9216(b)(4) and 10.9217(c) in greater detail and further contains a process for contesting a fine which, as discussed below, the Exchange proposes to eliminate. As proposed, NYSE National Rule 10.9217(a) would be the same as NYSE Arca Rule 10.9217(a).

Subsection (b) currently provides that if a person or organization that has been fined pursuant to the rule pays the fine, such payment shall be deemed a waiver of any right to a disciplinary proceeding under the Rule 10.9000 Series and of any right to review of the matter by the BCC, CFR or the Board of Directors. This provision incorporated requirements originally set forth in the Exchange's legacy Rule 8.15(c). The Exchange's affiliates' rules contained similar provisions.[5] The Exchange believes that provision would be redundant and unnecessary. As discussed below, the Exchange proposes to eliminate the specific process detailed in Rule 10.9217(c) to convert a minor rule fine into a disciplinary hearing. Moreover, under the Exchange's current procedures set forth in Rule 10.9216(b)(1), if Enforcement has reason to believe a violation has occurred and if the ETP Holder or Associated Person does not dispute the violation, Enforcement may prepare and request that the ETP Holder or Associated Person execute a minor rule violation plan letter accepting a finding of violation, consenting to the imposition of sanctions, and agreeing to waive such ETP Holder's or Associated Person's right to a hearing before a Hearing Panel or, if applicable, an Extended Hearing Panel, and any right of review by the Exchange Board of Directors, the SEC, and the courts, or to otherwise challenge the validity of the letter, if the letter is accepted. Under current Rule 10.9216(b)(4), if an ETP Holder or Associated Person executes the minor rule violation plan letter and the letter is accepted by the CRO, it is deemed final. The Exchange accordingly proposes to replace the current text of subsection (b) with the sentence ''Regulatory Staff designated by the Exchange shall have the authority to impose a fine pursuant to this Rule.'' As proposed, NYSE National Rule 10.9217(b) would be the same as NYSE Arca Rule 10.9217(b).

Subsection (c) currently provides that any person or organization that has been fined pursuant to Rule 10.9217 may contest such fine by filing with Enforcement a written application containing: (1) an identification of the Exchange action over which the review is being requested; (2) the reason(s) why the applicant disagrees with such action; and (3) the relief sought. Such written application must be submitted not more than five (5) business days after receipt of written notification that a fine has been imposed pursuant to this Rule. The subsection further provides that if a determination is contested pursuant to this subsection, the matter shall become a formal disciplinary action, and any penalty imposed by a hearing panel shall be publicly reported to the Exchange membership after such decision has become ''final'' pursuant to Rule 10.8313. Further, any person or organization found in violation of a minor rule under this plan is not required to report such violation on SEC Form BD or Form U–4, provided that the sanction imposed consists of a fine not exceeding $2,500 and the sanctioned person or organization has not sought an adjudication, including a hearing, or otherwise exhausted the administrative remedies available with respect to the matter. Finally, any fine imposed in excess of $2,500 will be subject to current rather than quarterly reporting pursuant to Rule 19d–1 under the Act.

The Exchange proposes to no longer permit persons or organizations fined pursuant to Rule 10.9217 to contest the minor rule violation letter by filing a written application and converting it into a regular disciplinary proceeding. None of the Exchange's affiliates that adopted the FINRA disciplinary rules permit persons or organizations fined pursuant to their version of Rule 10.9217 to contest the fine in this manner, including affiliates such as the NYSE that also permitted such a procedures under its legacy rules.[6] The

[4] *See* Securities Exchange Act Release No. 83289 (May 17, 2018), 83 FR 23968, 23968 n.6 (May 23, 2018) (SR–NYSENAT–2018–02) (Notice of Filing of Amendment No. 1 and Order Granting Accelerated Approval of a Proposed Rule Change, as Amended by Amendment No. 1, To Support the Re-Launch of NYSE National, Inc. on the Pillar Trading Platform). As part of Amendment No. 1, the Exchange, among other things, adopted NYSE American's maximum $5,000 fine for minor rule violations under Rule 10.9217. *See* Amendment No.1, n. 59, available at: *https://www.sec.gov/comments/sr-nysenat-2018-02/nysenat201802-3653908-162416.pdf.*

[5] For instance, the New York Stock Exchange LLC's (''NYSE'') legacy Rule 476A(c) provided that if the person against whom a minor rule violation fine is imposed pays the fine, such payment is deemed to be a waiver by such person of such person's right to a disciplinary proceeding under NYSE Rule 476 and any review of the matter by a Hearing Panel or the Exchange Board of Directors. NYSE's legacy rules came into effect when the NYSE adopted disciplinary rules modeled on the rules of the Financial Industry Regulatory Authority, Inc. (''FINRA''). *See* Securities Exchange Act Release No. 69045 (March 5, 2013), 78 FR 15394 (March 11, 2013) (SR–NYSE–2013–02) (Order Approving Proposed Rule Change Adopting Investigation, Disciplinary, Sanction, and Other Procedural Rules That Are Modeled on the Rules of the Financial Industry Regulatory Authority and To Make Certain Conforming and Technical Changes). The NYSE recently proposed to delete its legacy disciplinary rules. *See* SR–NYSE–2022–48.

[6] Under legacy NYSE Rule 476A(d), any person against whom a minor rule violation was imposed could contest the Exchange's determination by timely filing a written response meeting the requirements of an answer as provided in NYSE Rule 476(d), at which point the matter became a

Continued

proposed changes would thereby further harmonize the Exchange's Rule 10.9217 with the version adopted by the Exchange's affiliates. Moreover, the Exchange believes that its current disciplinary rules already provide similar and sufficient procedural protections to persons fined under Rule 10.9217. Currently, if an ETP Holder or Associated Person disputes a minor rule fine, Enforcement's only recourse would be to file a complaint under Rule 10.9211. Similarly, if an ETP Holder or Associated Person executes a minor rule plan letter under Rule 10.9216 and the CRO rejects the letter, the Exchange may take any other appropriate disciplinary action with respect to the alleged violation. Further, the ETP Holder or Associated Person shall not be prejudiced by the execution of the minor rule violation plan letter under Rule 10.9216(b)(1) and, under Rule 10.9216(b)(4), the letter may not be introduced into evidence in connection with the determination of the issues set forth in any complaint or in any other proceeding.

In order to effectuate this change, the Exchange proposes to delete the first three sentences of subsection (c). The last two sentences, which are identical to NYSE Arca Rule 10.9217(c), would remain unchanged.

The Exchange does not proposes any changes to current Rule 10.9217(d).

Addition of Rule 2.1210 to the List of Eligible Rules

The Exchange proposes to add Rule 2.1210 the list of eligible rules in Rule 10.9217(f).

Rule 2.1210, which was adopted in 2018,[7] sets forth the requirements for persons engaged in the investment banking or securities business of an ETP Holder to be registered with the Exchange as a representative or principal in each category of registration appropriate to his or her functions and responsibilities as specified in Rule 2.1220.

The Exchange proposes to add Rule 2.1210 to the list of rules in Rule 10.9217(f) eligible for disposition pursuant to a fine. A substantially similar version of Rule 2.1210 was adopted by the NYSE in 2018 [8] and is currently eligible for minor rule fines under the NYSE's version of Rule 9217.[9] The Exchange also proposes to add first, second and third level fines for violations of Rule 2.1210 to Rule 10.9217(g)(2) as new item 6. As proposed, failure to comply with the registration requirements of Rule 2.1210 would be eligible for a $1,000 fine for the first violation, $2,500 for the second violation and $5,000 for the third and subsequent violations. The proposed fine levels would be the same as the applicable fine levels for individuals violating NYSE Rule 1210 set forth in NYSE Rule 9217.[10] Current item 6 under Rule 10.9217(g)(2) governing failure to comply with the CAT Compliance Rules in the Rule 6.6800 Series would become new item 7. As discussed below, the Exchange would add a new footnote 2 to current item 6 (new item 7) setting forth the range for violations of the CAT Compliance Rules and delete ''Up to $2,500.00'' from the chart.

The Exchange believes that the proposed change would strengthen the Exchange's ability to carry out its oversight and enforcement responsibilities in cases where full disciplinary proceedings are unwarranted in view of the minor nature of the particular violation.

Non-Substantive Clarifying Changes

The Exchange proposes to add clarifying language regarding the disposition of minor rule fines for violations of the CAT Compliance Rules in the Rule 6.6800 Series based on language adopted by the Exchange's affiliates. Specifically, the Exchange would add a new footnote 2 to current item 6 (proposed item 7, discussed above) of Rule 10.9217(g)(2) that would provide as follows:

For failures to comply with the Consolidated Audit Trail Compliance Rule requirements of the Rule 6.6800 Series, the Exchange may impose a minor rule violation fine of up to $2,500. For more serious violations, other disciplinary action may be sought.

The language is identical to that adopted by the Exchange's affiliates NYSE and NYSE Chicago, Inc.[11] As noted, ''Up to $2,500.00'' would be deleted from the chart in current item 6 as redundant of proposed footnote 2. The proposed change is not intended to make a substantive change. Violations of the CAT Compliance Rules are currently eligible for minor rule fines and $2,500 is currently the maximum eligible fine.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b) of the Act,[12] in general, and furthers the objectives of Section 6(b)(5),[13] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to, and perfect the mechanism of, a free and open market and a national market system and, in general, to protect investors and the public interest.

Preamble to Rule 10.9217

The Exchange believes that harmonizing the preamble to Rule 10.9217 with that of its affiliates would remove impediments to and perfect the mechanism of a free and open market and a national market system by a providing greater harmonization between Exchange rules and those of its affiliates in connection with minor rule fines, thereby fostering cooperation and coordination with persons engaged in facilitating transactions in securities and will remove impediments to and perfect the mechanism of a free and open market and a national market system. Moreover, by adopting the same applicable minor rule standards for violations of those standards as its affiliates, the Exchange would promote regulatory consistency.

More specifically, the Exchange believes that the proposed changes to Rule 10.9217(a) clarifying that minor rule fines cannot exceed $5,000 and deleting duplicative information

disciplinary proceeding subject to NYSE Rule 476. As adopted, NYSE Rule 9216 does not permit a Respondent (as defined in the disciplinary rules) to contest a minor rule violation letter by filing an answer and convert it into a regular disciplinary proceeding. *See* Securities Exchange Act Release No. 68678 (January 16, 2013), 78 FR 5213, 5226 (January 24, 2013) (SR–NYSE–2013–02) (Notice of Filing of Proposed Rule Change Adopting Investigation, Disciplinary, Sanction, and Other Procedural Rules That Are Modeled on the Rules of the Financial Industry Regulatory Authority and To Make Certain Conforming and Technical Changes). As noted above, the NYSE recently filed to delete its legacy disciplinary rules. *See also* note 4, *supra*.

[7] *See* Securities Exchange Act Release No. 84350 (October 3, 2018), 83 FR 51030 (October 10, 2018) (SR–NYSENAT–2018–21) (Notice of Filing and Immediate Effectiveness of Amendments to Rules Regarding Qualification, Registration and Continuing Education Applicable to Equity Trading Permit Holders).

[8] *See* Securities Exchange Act Release No. 84336 (October 2, 2018), 83 FR 50727 (October 9, 2018) (SR–NYSE–2018–44) (Notice of Filing and Immediate Effectiveness of Amendments To Rules Regarding Qualification, Registration and Continuing Education Applicable to Members and Member Organizations).

[9] *See* NYSE Rule 9217.

[10] As set forth in Rule 10.9217(c), any fine imposed in excess of $2,500 would be subject to current rather than quarterly reporting to the Commission pursuant to Rule 19d–1 under the Act.

[11] *See* NYSE Rule 9217(d) (''For failures to comply with the Consolidated Audit Trail Compliance Rule requirements of the Rule 6800 Series, the Exchange may impose a minor rule violation fine of up to $2,500. For more serious violations, other disciplinary action may be sought.''); NYSE Chicago 10.9217(f), n. ** (same).

[12] 15 U.S.C. 78f(b).

[13] 15 U.S.C. 78f(b)(5).

regarding the public reporting of uncontested minor rule fines would further the goal of transparency and add clarity to the Exchange's rules. The Exchange believes that the proposed changes would also be consistent with the public interest and the protection of investors because investors will not be harmed and in fact would benefit from increased transparency, thereby reducing potential confusion. In addition, the Exchange believes that deleting current rule text in Rule 10.9217(b) providing that payment of a minor fine is deemed a waiver of any right to a disciplinary proceeding and of any right to review would be redundant of the Exchange's current procedures set forth in Rule 10.9216(b)(1) whereby execution of a minor rule violation plan letter accepted by the CRO is final and waives the right to a hearing and any right of review by an ETP Holder or Associated Person. Finally, the proposed elimination of the procedure set forth in Rule 10.9217(c) to contest the minor rule violations would further harmonize the Exchange's Rule 10.9217 with the version adopted by the Exchange's affiliates. As discussed above, the Exchange believes that its current disciplinary rules already provide similar and sufficient procedural protections to persons fined under Rule 10.9217. Eliminating the legacy contestation procedure in Rule 10.9217(c) would accordingly promote efficiency by applying uniform procedures for contesting a minor rule fine across exchanges.

Addition of Rule 2.1210 to the List of Eligible Rules

Minor rule fines provide a meaningful sanction for minor or technical violations of rules when the conduct at issue does not warrant stronger, immediately reportable disciplinary sanctions. The inclusion of a rule in Rule 10.9217 does not minimize the importance of compliance with the rule, nor does it preclude the Exchange from choosing to pursue violations of eligible rules through formal disciplinary action if the nature of the violations or prior disciplinary history warrants more significant sanctions. Rather, the Exchange believes that the proposed rule change will strengthen the Exchange's ability to carry out its oversight and enforcement responsibilities in cases where full disciplinary proceedings are unwarranted in view of the minor nature of the particular violation. The option to impose a minor rule sanction gives the Exchange additional flexibility to administer its enforcement program in the most effective and efficient manner while still fully meeting the Exchange's remedial objectives in addressing violative conduct.

The proposed rule change is thus designed to prevent fraudulent and manipulative acts and practices because it will provide the Exchange the ability to issue a minor rule fine for violations of the registration requirements set forth in Rule 2.1210 where a more formal disciplinary action may not be warranted or appropriate. In addition, the Exchange believes that adding rules based on the rules of its affiliate to the Exchange's minor rule plan, and adding associated fine levels based on the treatment of similar registration rule violations by its affiliate NYSE, would promote fairness and consistency in the marketplace by permitting the Exchange to issue a minor rule fine for violations of substantially similar rules that are already eligible for minor rule treatment, thereby harmonizing minor rule plan fines across affiliated exchanges for the same conduct. As noted, the proposed fine levels would be the same as the applicable fine levels for individuals violating NYSE Rule 1210 set forth in NYSE Rule 9217.

The Exchange further believes that the proposed amendments to Rule 10.9217 are consistent with Section 6(b)(6) of the Act,[14] which provides that members and persons associated with members shall be appropriately disciplined for violation of the provisions of the Act, the rules and regulations thereunder and the rules of the exchange, by expulsion, suspension, limitation of activities, functions, and operations, fine, censure, being suspended or barred from being associated with a member, or any other fitting sanction. As noted, the proposed rule change would provide the Exchange ability to sanction minor or technical violations of proposed Rule 2.1210 pursuant to the Exchange's rules. Finally, the Exchange also believes that the proposed changes are designed to provide a fair procedure for the disciplining of members and persons associated with members, consistent with Sections 6(b)(7) and 6(d) of the Act.[15] Rule 10.9217 does not preclude an ETP Holder or Associated Person from contesting an alleged violation under Rule 10.9216(b)and receiving a hearing on the matter with the same procedural rights through a litigated disciplinary proceeding.

Non-Substantive Clarifying Changes

The Exchange believes that the proposed non-substantive clarifying changes described above would add clarity, consistency and transparency to the Exchange's rules. The Exchange believes that adding such clarity and transparency would also be consistent with the public interest and the protection of investors because investors will not be harmed and in fact would benefit from increased transparency, thereby reducing potential confusion. In addition, the Exchange believes that the incorporating language relating to violations of the CAT Compliance Rules adopted by the Exchange's affiliates would promote fairness and consistency in the marketplace by eliminating differences and harmonizing language related to minor rule treatment of similar rule violations across affiliates. The proposed change is not intended to make any substantive change to the applicability of minor rule fines to violations of the CAT Compliance Rules or the amount of those fines.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed change is not designed to address any competitive issue but rather to update the Exchange's rules to strengthen the Exchange's ability to carry out its oversight and enforcement functions and deter potential violative conduct and to align the Exchange's rule setting forth violations eligible for a minor rule fine more closely with that of its affiliates.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSENAT–2022–25 on the subject line.

[14] 15 U.S.C. 78f(b)(6).

[15] 15 U.S.C. 78f(b)(7) and 78f(d).

Paper Comments

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSENAT–2022–25. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSENAT–2022–25 and should be submitted on or before December 14, 2022.

IV. Commission's Findings and Order Granting Accelerated Approval of Proposed Rule Change

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange.[16] In particular, the Commission finds that the proposed rule change is consistent with Section 6(b)(5) of the Act,[17] which requires that the rules of an exchange be designed to promote just and equitable principles of trade, to remove impediments and to perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. The Commission also believes that the proposal is consistent with Sections 6(b)(1) and 6(b)(6) of the Act[18] which require that the rules of an exchange enforce compliance with, and provide appropriate discipline for, violations of Commission and Exchange rules. Finally, the Commission finds that the proposal is consistent with the public interest, the protection of investors, or otherwise in furtherance of the purposes of the Act, as required by Rule 19d–1(c)(2) under the Act,[19] which governs minor rule violation plans.

As stated above, the Exchange proposes to (1) make certain revisions to the preamble to Rule 10.9217 (Violations Appropriate for Disposition Under Rule 10.9216(b)); (2) add Rule 2.1210 (Registration Requirements) to the list of minor rule violations in Rule 10.9217(f) and associated fine levels in Rule 10.9217(g); and (3) make certain non-substantive clarifying changes to Rule 10.9217.

The Commission believes that Rules 10.9216(b) and 10.9217 are an effective way to discipline a member for a minor violation of a rule. More specifically, the Commission believes that the proposed revisions to the preamble of Rule 10.9217 are consistent with the Act because they would add clarity to the Exchange's rules and may help the Exchange's ability to better carry out its oversight and enforcement responsibilities. The proposed revisions to the preamble of Rule 10.9217 also would align Rule 10.9217 with the rules of the Exchange's affiliates. The Commission believes that the proposed addition of Rule 2.1210 (Registration Requirements) to the Exchange's list of current minor rule violations provides a reasonable means of addressing violations that do not rise to the level of requiring formal disciplinary proceedings, while providing greater flexibility in handling certain violations. Furthermore, the Commission believes that amending the associated fine schedule is consistent with the Act because it may help the Exchange's ability to better carry out its oversight and enforcement responsibilities by levying appropriate fines for minor violations of the rules included in Rule 10.9217, including minor violations of Rule 2.1210. Finally the Commission believes that the Exchange's proposal to make certain non-substantive changes to Rule 10.9217 are consistent with the Act because these changes will add clarity to the Exchange's rules.

In approving the proposed rule change, the Commission in no way minimizes the importance of compliance with the Exchange's rules and all other rules subject to fines under Rules 10.9216(b) and 10.9217. The Commission believes that a violation of any self-regulatory organization's rules, as well as Commission rules, is a serious matter. However, Rules 10.9216(b) and 10.9217 provide a reasonable means of addressing rule violations that may not rise to the level of requiring formal disciplinary proceedings, while providing greater flexibility in handling certain violations. The Commission expects that the Exchange will continue to conduct surveillance with due diligence and make a determination based on its findings, on a case-by-case basis, whether a fine of more or less than the recommended amount is appropriate for a violation under Rules 10.9216(b) and 10.9217 or whether a violation requires formal disciplinary action.

For the same reasons as discussed above, the Commission finds good cause, pursuant to Section 19(b)(2) of the Act,[20] for approving the proposed rule change prior to the thirtieth day after the date of publication of the notice of the filing thereof in the **Federal Register**. The proposal will assist the Exchange in preventing fraudulent and manipulative practices by allowing the Exchange to adequately enforce compliance with, and provide appropriate discipline for, violations of Exchange rules. Moreover, the proposed changes raise no new or novel issues. Accordingly, the Commission believes that a full notice-and-comment period is not necessary before approving the proposal.

V. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act[21] and Rule 19d–1(c)(2) thereunder,[22] that the proposed rule change (SR–NYSENAT–2022–25) be, and hereby is, approved on an accelerated basis.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[23]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–96342; File No. SR–MIAX–2022–41]

Self-Regulatory Organizations; Miami International Securities Exchange, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 404, Series of Option Contracts Open for Trading and the Short Term Option Series Program

November 17, 2022.

Pursuant to the provisions of Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 16, 2022, Miami International Securities Exchange, LLC (''MIAX Options'' or the ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to amend Exchange Rule 404, Series of Option Contracts Open for Trading.

The text of the proposed rule change is available on the Exchange's website at *http://www.miaxoptions.com/rule-filings/* at MIAX Options' principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Exchange Rule 404, Series of Option Contracts Open for Trading. Specifically, the Exchange proposes to amend Interpretations and Polices .02 of Rule 404 to (i) limit the number of Short Term Option Expiration Dates for options on SPDR S&P 500 ETF Trust (SPY), the INVESCO QQQ Trust℠, Series 1(QQQ), and iShares Russell 2000 ETF (IWM) from five to two expirations for Monday and Wednesday expirations; and (ii) expand the Short Term Option Series program to permit the listing and trading of options series with Tuesday and Thursday expirations for options on SPY and QQQ listed pursuant to the Short Term Option Series Program, subject to the same proposed limitation of two expirations.

The Exchange also proposes to amend the definition of a Short Term Option Series contained in Exchange Rule 100.

Curtail Short Term Option Expiration Dates

Currently, after an option class has been approved for listing and trading on the Exchange, the Exchange may open for trading on any Thursday or Friday that is a business day (''Short Term Option Opening Date'') series of options on that class that expire at the close of business on each of the next five Fridays that are business days and are not Fridays in which monthly options series or Quarterly Options Series expire (''Short Term Option Expiration Dates''). The Exchange may have no more than a total of five Short Term Option Expiration Dates not including any Monday or Wednesday SPY, QQQ, and IWM Expirations. Further, if the Exchange is not open for business on the respective Thursday or Friday, the Short Term Option Opening Date will be the first business day immediately prior to that respective Thursday or Friday. Similarly, if the Exchange is not open for business on a Friday, the Short Term Option Expiration Date will be the first business day immediately prior to that Friday.

Today, with respect to Wednesday SPY, QQQ, and IWM Expirations, the Exchange may open for trading on any Tuesday or Wednesday that is a business day series of options on SPY, QQQ, and IWM to expire on any Wednesday of the month that is a business day and is not a Wednesday in which Quarterly Options Series expire (''Wednesday SPY Expirations,'' ''Wednesday QQQ Expirations,'' and ''Wednesday IWM Expirations''). With respect to Monday SPY, QQQ, and IWM Expirations, the Exchange may open for trading on any Friday or Monday that is a business day series of options on SPY, QQQ, or IWM to expire on any Monday of the month that is a business day and is not a Monday in which Quarterly Options Series expire (''Monday SPY Expirations,'' ''Monday QQQ Expirations,'' and ''Monday IWM Expirations''), provided that Monday SPY Expirations, Monday QQQ Expirations, and Monday IWM Expirations that are listed on a Friday must be listed at least one business week and one business day prior to the expiration. The Exchange may list up to five consecutive Wednesday SPY Expirations, Wednesday QQQ Expirations, and Wednesday IWM Expirations and five consecutive Monday SPY Expirations, Monday QQQ Expirations, and Monday IWM Expirations at one time; the Exchange may have no more than a total of five each of Wednesday SPY Expirations, Wednesday QQQ Expirations, and Wednesday IWM Expirations and a total of five each of Monday SPY Expirations, Monday QQQ Expirations, and Monday IWM Expirations. Monday and Wednesday SPY Expirations, Monday and Wednesday QQQ Expirations, and Monday and Wednesday IWM Expirations will be subject to the provisions of Interpretations and Policies .02 of Exchange Rule 404.

Proposal

At this time, the Exchange proposes to curtail the number of Short Term Option Expiration Dates from five to two[3] for SPY, QQQ, and IWM for Monday and Wednesday Expirations, as well as the proposed Tuesday and Thursday Expirations in SPY and QQQ (''Short Term Option Daily Expirations'').

The Exchange proposes to create a new category of Short Term Option Expiration Dates called ''Short Term Option Daily Expirations'' which will only permit two Short Term Option Expiration Dates for each of Monday, Tuesday, Wednesday, and Thursday expirations at one time. The Exchange proposes to include a table, labeled ''Table 1,'' within Interpretations and Policies .02 of Rule 404, which specifies each symbol that qualifies as a Short Term Option Daily Expiration. The table would note the number of expirations for each symbol as well as expiration days. The Exchange proposes to include

[3] The Exchange proposes to list the two front months for Short Term Option Daily Expirations.

Monday and Wednesday expirations for SPY, QQQ, and IWM and Tuesday and Thursday expirations for SPY and QQQ and list the number of expirations as ''2'' for these symbols. The Exchange's proposal to permit Tuesday and Thursday expirations for options on SPY and QQQ listed pursuant to the Short Term Option Series Program is explained below in more detail. In the event Short Term Option Daily Expirations expire on the same day in the same class as a monthly options series or a Quarterly Options Series the Exchange would skip that week's listing and instead list the following week; the two weeks of Short Term Option Expiration Dates would therefore not be consecutive. Specifically, the Exchange proposes to state within Policy .02 of Exchange Rule 404,

> In addition to the above, the Exchange may open for trading series of options on the symbols provided in Table 1 below that expire at the close of business on each of the next two Mondays, Tuesdays, Wednesdays, and Thursdays, respectively, that are business days and are not business days in which monthly options series or Quarterly Options Series expire (''Short Term Option Daily Expirations''). The Exchange may have no more than a total of two Short Term Option Daily Expirations for each of Monday, Tuesday, Wednesday, and Thursday expirations at one time. Short Term Option Daily Expirations would be subject to this Policy .02

SPY, QQQ, and IWM Friday expirations and other option symbols expiring on a Friday that are not noted in Table 1 will continue to have a total of five Short Term Option Expiration Dates provided those Friday expirations are not Fridays in which monthly options series or Quarterly Options Series expire (''Friday Short Term Option Expiration Dates''). These expirations would be referred to as ''Short Term Option Weekly Expirations'' to distinguish them from the proposed expirations that would be subject to Short Term Option Daily Expirations. The Exchange proposes to add rule text to Policy .02 of Exchange Rule 404, which states that Monday Short Term Option Expiration Dates, Tuesday Short Term Option Expiration Dates, Wednesday Short Term Option Expiration Dates, and Thursday Short Term Option Expiration Dates, together with Friday Short Term Option Expiration Dates, are collectively ''Short Term Option Expiration Dates.'' [4]

Tuesday and Thursday Expirations

At this time, the Exchange proposes to expand the Short Term Option Series Program to permit the listing and trading of no more than a total of two consecutive Tuesday and Thursday ''Tuesday Short Term Option Daily Expirations'' and ''Thursday Short Term Option Daily Expirations'' each for SPY and QQQ at one time. Tuesday and Thursday Short Term Option Daily Expirations would be subject to Policy .02 of Exchange Rule 404.

A Short Term Option Series means a series in an option class that is approved for listing and trading on the Exchange in which the series is opened for trading on any Monday, Tuesday, Wednesday, Thursday, or Friday, that is a business day and that expires on the Monday, Wednesday, or Friday of the following business week that is a business day, or, in the case of a series that is listed on a Friday and expires on a Monday, is listed one business week and one business day prior to that expiration. If a Tuesday, Wednesday, Thursday, or Friday, is not a business day, the series may be opened (or shall expire) on the first business day immediately prior to that Tuesday, Wednesday, Thursday, or Friday. For a series listed pursuant to this section for Monday expiration, if a Monday is not a business day, the series shall expire on the first business day immediately following that Monday.

The Exchange proposes to amend the definition of Short Term Option Series in Exchange Rule 100 to accommodate the listing of options series that expire on Tuesdays and Thursdays. Specifically, the Exchange proposes to add Tuesday and Thursday to the permitted expiration days, which currently include Monday, Wednesday, and Friday, that it may open for trading.

The Exchange also proposes corresponding changes within Policy .02 of Exchange Rule 404, which sets forth the requirements for SPY and QQQ options that are listed pursuant to the Short Term Option Series Program as Short Term Option Daily Expirations. Similar to Monday and Wednesday SPY, QQQ, and IWM Short Term Option Daily Expirations within Policy .02 of Exchange Rule 404, the Exchange proposes that it may open for trading on any Monday or Tuesday that is a business day series of options on the symbols provided in Table 1 that expire at the close of business on each of the next two Tuesdays that are business days and are not business days in which monthly options series or Quarterly Options Series expire (''Tuesday Short Term Option Expiration Date'').

Likewise, the Exchange proposes that it may open for trading on any Wednesday or Thursday that is a business day series of options on symbols provided in Table 1 that expire at the close of business on each of the next two Thursdays that are business days and are not business days in which monthly options series or Quarterly Options Series expire (''Thursday Short Term Option Expiration Date'').

In the event that options on SPY and QQQ expire on a Tuesday or Thursday and that Tuesday or Thursday is the same day that a monthly option series or Quarterly Options Series expires, the Exchange would skip that week's listing and instead list the following week; the two weeks would therefore not be consecutive. Today, Monday and Wednesday Expirations in SPY, QQQ, and IWM skip the weekly listing in the event the weekly listing expires on the same day in the same class as a Quarterly Options Series. Currently, there is no rule text provision that states that Monday and Wednesday Expirations in SPY, QQQ, and IWM skip the weekly listing in the event the weekly listing expires on the same day in the same class as a monthly option series. Practically speaking, Monday and Wednesday Expirations in SPY, QQQ, and IWM would not expire on the same day as a monthly expiration.

The interval between strike prices for the proposed Tuesday and Thursday SPY and QQQ Short Term Option Daily Expirations will be the same as those for the current Short Term Option Series for Monday, Wednesday, and Friday expirations applicable to the Short Term Option Series Program.[5] Specifically, the Tuesday and Thursday SPY and QQQ Short Term Option Daily Expirations will have a $0.50 strike interval minimum.[6] As is the case with other equity options series listed pursuant to the Short Term Option Series Program, the Tuesday and Thursday SPY and QQQ Short Term Option Daily Expiration series will be P.M.-settled.

With respect to the Short Term Option Series Program, a Tuesday or Thursday expiration series shall expire on the first business day immediately prior to that Tuesday or Thursday, *e.g.,* Monday or Wednesday of that week, respectively, if the Tuesday or Thursday is not a business day.[7]

Currently, for each option class eligible for participation in the Short

[4] Defining the term ''Short Term Option Expiration Dates'' will make clear that this term includes expiration dates for each day Short Term Options are listed.

[5] *See* Interpretations and Policies .02(e) of Exchange Rule 404.

[6] *See* Interpretations and Policies .02(e) of Exchange Rule 404.

[7] *See* Interpretations and Policies .02 of Exchange Rule 404.

Term Option Series Program, the Exchange is limited to opening thirty (30) series for each expiration date for the specific class.[8] The thirty (30) series restriction does not include series that are opened by other securities exchanges under their respective weekly rules; the Exchange may list these additional series that are listed by other exchanges.[9] This thirty (30) series restriction would apply to Tuesday and Thursday SPY and QQQ Short Term Option Daily Expiration series as well. In addition, the Exchange will be able to list series that are listed by other exchanges, assuming they file similar rules with the Commission to list SPY and QQQ options expiring on Tuesdays and Thursdays with a limit of two Tuesday Short Term Daily Expirations and two Thursday Short Term Daily Expirations.

Finally, the Exchange is amending Policy .02(b) of Exchange Rule 404, to conform the rule text to the usage of the term ''Short Term Option Daily Expirations.'' Today, with the exception of Monday and Wednesday SPY Expirations, Monday and Wednesday QQQ Expirations, and Monday and Wednesday IWM Expirations, no Short Term Option Series may expire in the same week in which monthly option series on the same class expire. With this proposal, Tuesday and Thursday SPY Expirations and Tuesday and Thursday QQQ Expirations would be treated similarly to existing Monday and Wednesday SPY, QQQ, and IWM Expirations. With respect to monthly option series, Short Term Option Daily Expirations will be permitted to expire in the same week in which monthly option series on the same class expire. Not listing Short Term Option Daily Expirations for one week every month because there was a monthly on that same class on the Friday of that week would create investor confusion.

Further, as with Monday and Wednesday SPY, QQQ, and IWM Expirations, the Exchange would not permit Tuesday and Thursday Short Term Option Daily Expirations to expire on a business day in which monthly options series or Quarterly Options Series expire.[10] Therefore, all Short Term Option Daily Expirations would expire at the close of business on each of the next two Mondays, Tuesdays, Wednesdays, and Thursdays, respectively, that are business days and are not business days in which monthly options series or Quarterly Options Series expire. The Exchange believes that it is reasonable to not permit two expirations on the same day in which a monthly options series or a Quarterly Options Series would expire.

The Exchange does not believe that any market disruptions will be encountered with the introduction of P.M.-settled Tuesday and Thursday Short Term Option Daily Expirations. The Exchange has the necessary capacity and surveillance programs in place to support and properly monitor trading in the proposed Tuesday and Thursday Short Term Option Daily Expirations. The Exchange currently trades P.M.-settled Short Term Option Series that expire Monday and Wednesday for SPY, QQQ, and IWM and has not experienced any market disruptions nor issues with capacity. Today, the Exchange has surveillance programs in place to support and properly monitor trading in Short Term Option Series that expire Monday and Wednesday for SPY, QQQ, and IWM.

The Exchange's proposal mirrors that of Nasdaq ISE, which was recently approved by the Commission.[11] In its proposal Nasdaq ISE provides an analysis of the impact of the proposal which the Exchange does not dispute.

Implementation

Notwithstanding this implementation, Monday and Wednesday Expirations in SPY, QQQ, and IWM that were listed prior to the date of implementation will continue to be listed on the Exchange until those options expire pursuant to current Short Term Option Series Rules within Interpretations and Policies .02 of Exchange Rule 404.

2. Statutory Basis

The Exchange believes that its proposed rule change is consistent with Section 6(b) of the Act[12] in general, and furthers the objectives of Section 6(b)(5) of the Act[13] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanisms of a free and open market and a national market system and, in general, to protect investors and the public interest.

The proposal is consistent with the Act as this proposal reduces the number of Short term Option Expirations to be listed on the Exchange. This reduction would remove impediments to and perfect the mechanism of a free and open market by encouraging Market Makers[14] to continue to deploy capital more efficiently and improve displayed market quality.[15] Also, the Exchange's proposal curtails the number of Monday, Tuesday, Wednesday, and Thursday expirations in SPY, QQQ, and IWM without reducing the classes of options available for trading on the Exchange. The Exchange believes that despite the proposed curtailment of expirations, Members will continue to be able to expand hedging tools and tailor their investment and hedging needs more effectively in SPY, QQQ, and IWM.

Similar to SPY, QQQ, and IWM Monday and Wednesday Expirations (proposed to be SPY, QQQ, and IWM Monday and Wednesday Short Term Daily Expirations), the introduction of SPY and QQQ Tuesday and Thursday Short Term Daily Expirations is consistent with the Act as it will, among other things, expand hedging tools available to market participants and continue the reduction of the premium cost of buying protection. The Exchange believes that SPY and QQQ Tuesday and Thursday expirations (renamed SPY and QQQ Tuesday and Thursday Short Term Daily Expirations) will allow market participants to purchase SPY and QQQ options based on their timing as needed and allow them to tailor their investment and hedging needs more effectively. Further, the proposal to permit Tuesday and Thursday Short Term Daily Expirations for options on SPY and QQQ listed pursuant to the Short Term Option Series Program, subject to the proposed limitation of two expirations, would protect investors and the public interest by providing the investing public and other market participants more flexibility to closely tailor their investment and hedging decisions in SPY and QQQ options, thus

[8] *See* Interpretations and Policies .02(c) of Exchange Rule 404.

[9] *See* Interpretations and Policies .02(a) of Exchange Rule 404.

[10] While the Exchange proposes to add rule text within Policy .02 of Exchange Rule 404 with respect to Monday Expirations, Tuesday Expirations, and Wednesday Expirations, stating that those expirations would not expire on business days that are business days in which monthly options series expire, practically speaking this would not occur.

[11] *See* Securities Exchange Act Release No. 96281 (November 9, 2022), 87 FR 68769 (November 16, 2022) (SR–ISE–2022–18) (Order Granting Approval of a Proposed Rule Change to Amend the Short Term Option Series Program).

[12] 15 U.S.C. 78f(b).

[13] 15 U.S.C. 78f(b)(5).

[14] The term ''Market Makers'' refers to ''Lead Market Makers'', ''Primary Lead Market Makers'' and Registered Market Makers'' collectively. *See* Exchange Rule 100.

[15] Today, Primary Lead Market Makers, Lead Market Makers, and Registered Market Makers are required to quote a specified time in the appointed classes. *See* Exchange Rule 603(e)(1)(i), 603(e)(2)(i), and 603(e)(3)(i) respectively.

allowing them to better manage their risk exposure.

In particular, the Exchange believes the Short Term Option Series Program has been successful to date and that Tuesday and Thursday SPY and QQQ Short Term Daily Expirations should simply expand the ability of investors to hedge risk against market movements stemming from economic releases or market events that occur throughout the month in the same way that the Short Term Option Series Program has expanded the landscape of hedging. Similarly, the Exchange believes Tuesday and Thursday SPY and QQQ Short Term Daily Expirations should create greater trading and hedging opportunities and flexibility, and will provide customers with the ability to tailor their investment objectives more effectively. The Exchange currently lists Monday and Wednesday SPY, QQQ, and IWM Expirations (renamed SPY, QQQ, and IWM Monday and Wednesday Short Term Daily Expirations).[16]

Today, with the exception of Monday and Wednesday SPY Expirations, Monday and Wednesday QQQ Expirations, and Monday and Wednesday IWM Expirations, no Short Term Option Series may expire in the same week in which monthly option series on the same class expire. With this proposal, Tuesday and Thursday SPY Expirations and Tuesday and Thursday QQQ Expirations would be treated similarly to existing Monday and Wednesday SPY, QQQ, and IWM Expirations. The Exchange believes that permitting Short Term Option Daily Expirations to expire in the same week that standard monthly options expire on Fridays is consistent with the Act. Not listing Short Term Option Daily Expirations for one week every month because there was a monthly on that same class on the Friday of that week would create investor confusion.

Further, as with Monday and Wednesday SPY, QQQ, and IWM Expirations, the Exchange would not permit Tuesday and Thursday Short Term Option Daily Expirations to expire on a business day in which monthly options series or Quarterly Options Series expire. Therefore, all Short Term Option Daily Expirations would expire at the close of business on each of the next two Mondays, Tuesdays, Wednesdays, and Thursdays, respectively, that are business days and are not business days in which monthly options series or Quarterly Options Series expire. The Exchange believes that it is consistent with the Act to not permit two expirations on the same day in which a monthly options series or a Quarterly Options Series would expire similar to Monday and Wednesday SPY, QQQ, and IMW [sic] Expirations.

There are no material differences in the treatment of Wednesday SPY and QQQ expirations for Short Term Option Series as compared to the proposed Tuesday and Thursday SPY and QQQ Short Term Daily Expirations. Given the similarities between Wednesday SPY, QQQ, and IWM Expirations and the proposed Tuesday and Thursday SPY and QQQ Short Term Daily Expirations, the Exchange believes that applying the provisions in Policy .02 of Exchange Rule 404 that currently apply to Wednesday SPY, QQQ, and IWM Expirations to Tuesday and Thursday SPY and QQQ Short Term Daily Expirations is justified.

Finally, the Exchange represents that it has an adequate surveillance program in place to detect manipulative trading in the proposed Tuesday and Thursday SPY and QQQ Short Term Daily Expirations, in the same way that it monitors trading in the current Short Term Option Series and trading in Monday and Wednesday SPY, QQQ, and IWM Expirations. The Exchange also represents that it has the necessary systems capacity to support the new options series. Finally, the Exchange does not believe that any market disruptions will be encountered with the introduction of Tuesday and Thursday SPY and QQQ Short Term Daily Expirations.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The proposal will provide an overall reduction in the number of Short Term Option Expirations to be listed on the Exchange. The Exchange believes this reduction will not impose an undue burden on competition, rather, it should encourage Market Makers to continue to deploy capital more efficiently and improve displayed market quality.[17] Also, the Exchange's proposal curtails the number of weekly expirations in SPY, QQQ, and IWM without reducing the classes of options available for trading on the Exchange. The Exchange believes that despite the proposed curtailment of weekly expirations, Members will continue to be able to expand hedging tools and tailor their investment and hedging needs more effectively in SPY, QQQ, and IWM.

Similar to SPY, QQQ, and IWM Monday and Wednesday Expirations, the introduction of SPY and QQQ Tuesday and Thursday Short Term Daily Expirations does not impose an undue burden on competition. The Exchange believes that it will, among other things, expand hedging tools available to market participants and continue the reduction of the premium cost of buying protection. The Exchange believes that SPY and QQQ Tuesday and Thursday Short Term Daily Expirations will allow market participants to purchase SPY and QQQ options based on their timing as needed and allow them to tailor their investment and hedging needs more effectively.

The Exchange does not believe the proposal will impose any burden on inter-market competition, as nothing prevents the other options exchanges from proposing similar rules to list and trade Short Term Option Series with Tuesday and Thursday Short Term Daily Expirations. The Exchange notes that having Tuesday and Thursday SPY and QQQ expirations is not a novel proposal, as Wednesday SPY, QQQ, and IWM Expirations are currently listed on the Exchange.[18]

Further, the Exchange does not believe the proposal will impose any burden on intra-market competition, as all market participants will be treated in the same manner under this proposal.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[19] and Rule 19b–4(f)(6) thereunder.[20] Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act[21] and

[16] *See* Interpretations and Policies .02 of Exchange Rule 404.

[17] *See supra* note 15.

[18] *See* Interpretations and Policies .02 of Exchange Rule 404.

[19] 15 U.S.C. 78s(b)(3)(A)(iii).

[20] 17 CFR 240.19b–4(f)(6).

[21] 15 U.S.C. 78s(b)(3)(A)(iii).

subparagraph (f)(6) of Rule 19b–4 thereunder.[22]

A proposed rule change filed pursuant to Rule 19b–4(f)(6) under the Act[23] normally does not become operative for 30 days after the date of its filing. However, Rule 19b–4(f)(6)(iii)[24] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposed rule change may become operative upon filing. The Commission notes that it recently approved Nasdaq ISE's substantially similar proposal.[25] The Exchange has stated that waiver of the 30-day operative delay will allow the Exchange to implement the proposal at the same time as competitor exchanges. For these reasons, the Commission believes that the proposed rule change presents no novel issues and that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the operative delay and designates the proposed rule change operative upon filing.[26]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.

[22] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[23] 17 CFR 240.19b–4(f)(6).

[24] 17 CFR 240.19b–4(f)(6)(iii).

[26] For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–MIAX–2022–41 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–MIAX–2022–41. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–MIAX–2022–41 and should be submitted on or before December 14,2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[27]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–96348; File No. SR–MSRB–2022–09]

Self-Regulatory Organizations; Municipal Securities Rulemaking Board; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Rule G–3, on Professional Qualification Requirements, To Delete References to Certain Temporary Regulatory Relief Implemented During the Height of the Coronavirus Disease

November 17, 2022.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'' or ''Exchange Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 16, 2022, the Municipal Securities Rulemaking Board (''MSRB'' or ''Board'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the MSRB. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The MSRB filed with the Commission a proposed rule change to amend Rule G–3, on professional qualification requirements, to delete references to certain temporary regulatory relief,[3] implemented during the height of the coronavirus disease (''COVID–19'' or ''pandemic'') (the ''proposed rule change'').

The MSRB has designated the proposed rule change as constituting a ''non-controversial'' rule change under Section 19(b)(3)(A)[4] of the Act and Rule 19b–4(f)(6)[5] thereunder, which renders the proposed rule change effective upon receipt of this filing by the Commission. The MSRB would have the proposed rule change become operative on December 27, 2022.

The text of the proposed rule change is available on the MSRB's website at *https://msrb.org/2022-SEC-Filings,* at the MSRB's principal office, and at the Commission's Public Reference Room.

[5] 17 CFR 240.19b–4(f)(6).

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the MSRB included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The MSRB has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

In 2020, 2021 and 2022, the MSRB provided temporary regulatory relief to brokers, dealers, and municipal securities dealers (''dealers'') and municipal advisors (collectively ''regulated entities'') in complying with certain obligations under MSRB rules in light of operational challenges due to the pandemic.[6] Specifically, with respect to regulatory relief provided from certain professional qualification standards, the MSRB was guided in part by operational concerns related to Prometric Test Centers, the physical facilities used for the MSRB-owned professional qualification examinations.[7] In March 2020, Prometric announced that, due to the pandemic, it was temporarily closing all test center locations in the United States and Canada through April 15, 2020.[8]

In response to the test center closures and in light of other operational challenges due to the pandemic, such as stay-at-home orders imposed by many states and the vast number of regulated entities operating under business continuity plans, the April 2020 relief extended the time to comply with certain professional qualification obligations, as follows:

- The date by which an individual functioning in the capacity as a principal before passing the applicable MSRB-owned principal qualification examination pursuant to Rule G–3(b)(ii)(D), G–3(b)(iv)(B)(4) and G–3(c)(ii)(D), as applicable, would be extended 120 days from the time that the MSRB announces that Prometric has resumed access to its testing centers; thereby, marking the expiration date of the temporary period.[9]
- The date by which an individual must complete their Regulatory Element component of continuing education training,[10] as required by Rule G–3(i)(i)(A)(1), would be extended 120 days from the time the MSRB announces that Prometric has resumed access to its testing centers; thereby, marking the expiration date of the temporary period.[11]
- The date by which certain individuals are required to become qualified with the Municipal Advisor Principal Qualification Examination (''Series 54'') was extended until November 30, 2021. On October 11, 2019, the MSRB announced that a municipal advisor principal, as defined under Rule G–3(e),[12] had a one-year grace period, sunsetting on November 12, 2020, to pass the Series 54.[13] The MSRB subsequently extended the grace period until March 31, 2021,[14] and further extended it to November 30, 2021.[15] These extensions permitted individuals qualified with the Municipal Advisor Representative Qualification Examination (Series 50) to continue to engage in principal-level activities without passing the Series 54 until November 30, 2021.[16]
- The Firm Element [17] obligations for calendar year 2020 were deemed satisfied if completed on or before March 31, 2021.[18]
- The annual needs analysis and the delivery of continuing education pursuant to Rule G–3(i)(i)(B) and G–3(i)(ii), as applicable, was deemed to have been timely completed for calendar year 2020, provided that the needs analysis and the delivery of continuing education were completed on or before March 31, 2021.[19]

These modified obligations were reflected in Supplementary Material to Rule G–3. By their terms, Supplementary Material paragraphs .13, .15 and .16 have expired.[20] The MSRB stated in the April 2020 relief that it would announce an end date for the temporary relief provided under Supplementary Material .10 through .12 and .14 by a notice published on its website.[21]

Prometric fully restored access to its test centers, thus permitting individuals seeking to take an MSRB-owned professional qualification examination to visit any Prometric test center in-person to take a principal qualification examination.[22] Therefore, on July 25,

[6] *See supra* note 3. In 2020, 2021 and 2022, the MSRB provided and further extended other COVID–19 related temporary relief to regulated entities for certain compliance obligations under MSRB rules. *See* Release No. 34–90621 (December 9, 2020), 85 FR 81254 (December 15, 2020) (File No. SR–MSRB–2020–09), Release No. 34–93435 (October 27, 2021), 86 FR 60522 (November 2, 2021) (File No. SR–MSRB–2021–06) and Release No. 34–94383 (March 9, 2022), 87 FR 14596 (March 15, 2022) (File No. SR–MSRB–2022–01).

[7] The Financial Industry Regulatory Authority (''FINRA'') has been designated to provide test administration services to the MSRB for the delivery of MSRB-owned professional qualification examinations. FINRA uses Prometric as its sole vendor for the delivery of MSRB-owned professional qualification examinations. *See e.g.,* Release No. 34–75714 (August 17, 2015), 85 FR 50863 (August 21, 2015) (Designation of the Financial Industry Regulatory Authority to Administer Professional Qualification Tests for Associated Persons of Registered Municipal Advisors).

[8] *See https://www.prometric.com/corona-virus-update.*

[9] *See* Rule G–3, Supplementary Material .10–.12.

[10] The Regulatory Element component of continuing education is a computer-based training program that focuses on dealer compliance, regulatory, ethical and sales practice standards with the content derived from common industry rules and regulations for dealers, as well as widely accepted standards and practices within the industry.

[11] *See* Rule G–3, Supplementary Material .14. This extension was only for purposes of compliance with MSRB Rule G–3(i)(i)(A)(1) and was not intended to provide regulatory relief to individuals who needed to complete Regulatory Element pursuant to the rules of another regulatory authority.

[12] The term ''municipal advisor principal'' is defined in Rule G–3(e)(i) to mean a natural person associated with a municipal advisor who is directly engaged in the management, direction or supervision of the municipal advisory activities of the municipal advisor and its associated persons. To become qualified as a municipal advisor principal a person must, as a pre-requisite, take and pass the Municipal Advisor Representative Qualification Examination; and take and pass the Municipal Advisor Principal Qualification Examination.

[13] *See* MSRB Notice 2019–18 (October 21, 2019) announcing the launch of the Series 54 exam, which the SEC had approved on November 20, 2018. *See* Release No. 34–84630 (November 20, 2018), 80 FR 60927 (November 27, 2018) (File No. SR–MSRB–2018–07).

[14] *See* Release No. 34–90621 (December 9, 2020), 85 FR 81254 (December 15, 2020) (File No. SR–MSRB–2020–09).

[15] *See* Release No. 34–92938 (September 10, 2021), 86 FR 51696 (September 16, 2021) (File No. SR–MSRB–2021–05).

[16] *See* Rule G–3, Supplementary Material .13.

[17] The Firm Element component of continuing education is a firm-administered training program that requires all regulated entities to annually evaluate and prioritize their training needs based on a completed needs analysis. A needs analysis generally reflects a firm's assessment of its unique training needs based on various factors, for example, the business activities the firm and its associated persons engage in, the level of industry experience the firm's associated persons have and any changes to applicable rules or regulations.

[18] *See* Rule G–3, Supplementary Material .15.

[19] *See* Rule G–3, Supplementary Material .16.

[20] In an effort to provide regulated entities the opportunity to better manage and allocate resources, the MSRB modified the date by which compliance obligations were due to be completed, under certain MSRB rules, to March 31, 2021.

[21] *See supra* note 3. Specifically, the MSRB stated it would publish a notice on its website announcing when Prometric resumes operations in its testing centers so regulated entities are on notice of when the 120-day period begins to toll.

[22] While Prometric test centers are now open, regulated entities are reminded that, due to the uncertain nature of the ongoing pandemic,

2022, the MSRB published a notice (the ''2022 Notice''),[23] announcing that the remaining temporary relief under Supplementary Material .10 through .12 under Rule G–3, which provisions provided temporary relief for persons designated as municipal securities principals, municipal securities limited principals, and/or municipal securities sale principals would expire on August 29, 2022. Accordingly, principals designated under Supplementary Material .10 through .12, who, under the rule provisions, were required to be qualified in a representative capacity with at least 18 months experience functioning as representatives within the preceding five-year period of such principal designation, may continue to do so until December 27, 2022, without taking and passing the appropriate principal qualification examination.

The 2022 Notice also announced that the temporary relief from Regulatory Element requirements for registered persons under Supplementary Material .14 of Rule G–3 would expire on August 29, 2022. Accordingly, persons designated under Supplementary Material .14 who are subject to the Regulatory Element must complete any Regulatory Element required under Rule G–3 (i)(i)(A)(1) within 120 days of August 29, 2022, or by December 27, 2022—recognizing the stated regulatory relief was not intended to provide regulatory relief to individuals who may need to complete Regulatory Element pursuant to the rule of another regulatory authority; and thereby, may have completed such continuing education requirements.

The MSRB intends to have the proposed rule change become operative on December 27, 2022. This aligns with the provision of allowing 120 days from August 29, 2022, the expiration date of the temporary regulatory relief under Supplementary Material .10 through .12 and .14 under Rule G–3, for individuals to meet their regulatory obligation. Thus, upon the operative date of December 27, 2022, the expired regulatory relief will be deleted from MSRB Rule G–3. The MSRB notes that, while the temporary regulatory relief related to Supplementary Material .10 through .12 and .14 expired on August 29, 2022, the MSRB will continue to monitor the impact of the ongoing pandemic and work in close coordination with other regulatory and governmental authorities, as needed, to address any additional pandemic-related issues that may arise in the future.[24]

2. Statutory Basis

Section 15B(b)(2) of the Exchange Act,[25] provides that the Board shall propose and adopt rules to effect the purposes of this title with respect to transactions in municipal securities effected by brokers, dealers, and municipal securities dealers and advice provided to or on behalf of municipal entities or obligated persons by brokers, dealers, municipal securities dealers, and municipal advisors with respect to municipal financial products, the issuance of municipal securities, and solicitations of municipal entities or obligated persons undertaken by brokers, dealers, municipal securities dealers, and municipal advisors.

Section 15B(b)(2)(C) of the Act[26] provides that the MSRB's rules shall be designed to: prevent fraudulent and manipulative acts and practices; promote just and equitable principles of trade; foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating, transactions in municipal securities and municipal financial products; remove impediments to and perfect the mechanism of a free and open market in municipal securities and municipal financial products; and, in general, protect investors, municipal entities, obligated persons, and the public interest.

The proposed rule change to remove outdated references to the regulatory relief that is no longer applicable would ensure that rule provisions are clear, accurate, and streamlined, thereby facilitating compliance and promoting just and equitable principles of trade by clarifying the regulatory obligations of dealers and municipal advisors. The removal of expired and outdated references will promote just and equitable principles of trade by reducing the risk of potential confusion as to the current state of one or more regulatory obligations and ensuring that the existing rule provisions are accurate and understandable by all dealers and municipal advisors.

B. Self-Regulatory Organization's Statement on Burden on Competition

Section 15B(b)(2)(C) of the Exchange Act requires that MSRB rules not be designed to impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Exchange Act.[27] In fact, the MSRB does not believe that the proposed rule change will have any burden on competition because the proposed rule change would apply equally to all regulated entities by deleting references to certain temporary regulatory relief implemented during the height of the pandemic for all regulated entities. Regulated entities of all size would be equitably and proportionately impacted by the proposed rule change. Therefore, the proposed rule change would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Exchange Act.[28]

Additionally, Section 15B(b)(2)(L)(iv) of the Act requires that MSRB rules not impose a regulatory burden on small municipal advisors that is not necessary or appropriate in the public interest and for the protection of investors, municipal entities, and obligated persons, provided that there is robust protection of investors against fraud.[29] The MSRB believes that the proposed rule change is consistent with Section 15B(b)(2)(L)(iv) of the Act in that, while the proposed rule change will affect all municipal advisors, including small municipal advisors, there is no new regulatory burden that results.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public

individuals are advised to continue to review Prometric's website, at *https://www.prometric.com/* for any operational changes that may affect test center access.

[23] *See* MSRB Notice 2022–05 (July 25, 2022) announcing the end of regulatory relief that extended certain professional qualification requirements due to COVID–19.

[24] The MSRB notes that while certain professional qualifications pandemic-related regulatory relief expired on August 29, 2022, other relief remains in place; specifically, the ability for dealers to continue to conduct office inspections remotely.

[25] 15.U.S.C. 78*o*-4(b)(2).

[26] 15 U.S.C. 78*o*-4(b)(2)(C).

[27] *Id.*

[28] The Board's ''Policy on the Use of Economic Analysis in MSRB Rulemaking'' (''policy''), available at: *https://msrb.org/Rules-and-Interpretations/Economic-Analysis-Policy.aspx,* maintains that proposed rule changes filed for immediate effectiveness under Section 19(b)(3)(A) of the Exchange Act are not subject to the policy. With such filings, the MSRB usually focuses its economic analysis exclusively on the burden of competition to regulated entities. However, the MSRB may include further analysis based upon facts and circumstances if it believes that such analysis may inform the rulemaking process.

[29] 15 U.S.C. 78o–4(b)(2)(L)(iv).

interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [30] and Rule 19b–4(f)(6) [31] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov. Please include File Number SR–MSRB–2022–09 on the subject line.*

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

All submissions should refer to File Number SR–MSRB–2022–09. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street, NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the MSRB. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–MSRB–2022–09 and should be submitted on or before December 14, 2022.

For the Commission, pursuant to delegated authority.[32]

Sherry R. Haywood,

Assistant Secretary.

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #17708 and #17709; Oklahoma Disaster Number OK–00163]

Administrative Declaration of a Disaster for the State of Oklahoma

AGENCY: U.S. Small Business Administration.

ACTION: Notice.

SUMMARY: This is a notice of an Administrative declaration of a disaster for the State of Oklahoma dated 11/17/2022.

Incident: Severe Storms and Tornadoes.

Incident Period: 11/04/2022.

DATES: Issued on 11/17/2022.

Physical Loan Application Deadline Date: 01/17/2023.

Economic Injury (EIDL) Loan Application Deadline Date: 08/17/2023.

ADDRESSES: Submit completed loan applications to: U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR FURTHER INFORMATION CONTACT: A. Escobar, Office of Disaster Assistance, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given that as a result of the Administrator's disaster declaration, applications for disaster loans may be filed at the address listed above or other locally announced locations.

The following areas have been determined to be adversely affected by the disaster:

Primary Counties: McCurtain.

Contiguous Counties:

Oklahoma: Choctaw, Le Flore, Pushmataha.

Arkansas: Little River, Polk, Sevier.

Texas: Bowie, Red River.

The Interest Rates are:

	Percent
For Physical Damage:	
Homeowners with Credit Available Elsewhere	4.625
Homeowners without Credit Available Elsewhere	2.313
Businesses with Credit Available Elsewhere	6.610
Businesses without Credit Available Elsewhere	3.305
Non-Profit Organizations with Credit Available Elsewhere	2.375
Non-Profit Organizations without Credit Available Elsewhere	2.375
For Economic Injury:	
Businesses & Small Agricultural Cooperatives without Credit Available Elsewhere	3.305
Non-Profit Organizations without Credit Available Elsewhere	2.375

The number assigned to this disaster for physical damage is 17708 C and for economic injury is 17709 0.

The States which received an EIDL Declaration # are Oklahoma, Arkansas, Texas.

(Catalog of Federal Domestic Assistance Number 59008)

Isabella Guzman,

Administrator.

BILLING CODE 8026–09–P

SOCIAL SECURITY ADMINISTRATION

[Docket No: SSA–2022–0059]

Agency Information Collection Activities: Proposed Request

The Social Security Administration (SSA) publishes a list of information collection packages requiring clearance by the Office of Management and Budget (OMB) in compliance with Public Law 104–13, the Paperwork Reduction Act of 1995, effective October 1, 1995. This notice includes revisions of OMB-approved information collections.

SSA is soliciting comments on the accuracy of the agency's burden estimate; the need for the information; its practical utility; ways to enhance its quality, utility, and clarity; and ways to minimize burden on respondents, including the use of automated collection techniques or other forms of information technology. Mail, email, or

fax your comments and recommendations on the information collection(s) to the OMB Desk Officer and SSA Reports Clearance Officer at the following addresses or fax numbers.

(OMB)

Office of Management and Budget

Attn: Desk Officer for SSA

Comments: https://www.reginfo.gov/public/do/PRAMain. Submit your comments online referencing Docket ID Number [SSA–2022–0059].

(SSA)

Social Security Administration, OLCA

Attn: Reports Clearance Director

3100 West High Rise, 6401 Security Blvd., Baltimore, MD 21235, Fax: 410–966–2830, email address: *OR.Reports.Clearance@ssa.gov*

Or you may submit your comments online through *https://www.reginfo.gov/public/do/PRAMain,* referencing Docket ID Number [SSA–2022–0059].

The information collections below are pending at SSA. SSA will submit them to OMB within 60 days from the date of this notice. To be sure we consider your comments, we must receive them no later than January 23, 2023. Individuals can obtain copies of the collection instruments by writing to the above email address.

1. Incorporation by Reference of Oral Findings of Fact and Rationale in Wholly Favorable Written Decisions (Bench Decision Regulation)—20 CFR 404.953 and 416.1453—0960–0694. If a judge makes a wholly favorable oral decision, including all the findings and rationale for the decision for a claimant of Title II or Title XVI payments, at an administrative appeals hearing, the judge sends a Notice of Decision (Form HA–82), as the records from the oral hearing preclude the need for a written decision. We call this the incorporation-by-reference process. In addition, as part of the information we include on the HA–82, if the involved parties want a record of the oral decision, they may submit a written request for these records. As explained to the respondent on the HA–82, SSA collects identifying information under the aegis of sections 20 CFR 404.953 and 416.1453 of the Code of Federal Regulations to determine how to send interested individuals written records of a favorable incorporation-by-reference oral decision made at an administrative review hearing. Since SSA did not create a form for the public to use to request a written record of the decision, the involved parties send SSA their contact information and reference the hearing for which they would like a record to the hearings office indicated on the HA–82. SSA employees collect this information only once. The respondents are applicants for Disability Insurance Benefits and Supplemental Security Income (SSI) payments based on disability, or their representatives as applicable, who receive a fully favorable oral decision under the regulations cited above, and who choose to request a copy of the records for this decision.

Type of Request: Revision of an OMB-approved information collection.

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)	Average theoretical hourly cost amount (dollars) *	Total annual opportunity cost (dollars) **
HA–82	2,500	1	5	208	$11.70 *	$2,434 **

* We based this figure on the average DI payments based on SSA's current FY 2022 data (*https://www.ssa.gov/legislation/2022factsheet.pdf*).
** This figure does not represent actual costs that SSA is imposing on recipients of Social Security payments to complete this application; rather, these are theoretical opportunity costs for the additional time respondents will spend to complete the application. There is no actual charge to respondents to complete the application.

2. Request for Waiver of Special Veterans Benefits (SVB) Overpayment Recovery or Change in Repayment Rate—20 CFR 408.900–408.950—0960–0698. Title VIII of the Social Security Act (Act) requires SSA to pay a monthly benefit to qualified World War II veterans who reside outside the United States. When SSA notes an overpayment in this SVB, we inform the beneficiary. As part of the information we send, SSA explains how the beneficiary can request a waiver of recovery of the overpayment or a change in the repayment rate. SSA requests the respondent to submit Form SSA–2032–BK via mail to ensure SSA obtains the information necessary to establish whether the claimant meets the waiver of recovery provisions of the overpayment, and to determine the repayment rate if we do not waive repayment. Respondents are SVB beneficiaries who have overpayments on their Title VIII record and wish to file a claim for waiver of recovery or change in repayment rate.

Type of Request: Revision of an OMB-approved information collection.

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)	Average theoretical hourly cost amount (dollars) *	Total annual opportunity cost (dollars) **
SSA–2032–BK	34	1	120	68	$28.01 *	$1,905 **

* We based this figure on the average U.S. worker's hourly wages, as reported by Bureau of Labor Statistics data (*https://www.bls.gov/oes/current/oes_nat.htm*).
** This figure does not represent actual costs that SSA is imposing on recipients of Social Security payments to complete this application; rather, these are theoretical opportunity costs for the additional time respondents will spend to complete the application. There is no actual charge to respondents to complete the application.

3. Methods for Conducting Personal Conferences When Waiver of Recovery of a Title II or Title XVI Overpayment Cannot Be Approved—20 CFR 404.506 & 416.557—0960–0769. SSA conducts personal conferences when we cannot approve a waiver of recovery of a Title II or Title XVI overpayment. The Act and our regulatory citations require SSA to give overpaid Social Security beneficiaries and SSI recipients the right to request a waiver of recovery and

automatically schedule a personal conference if we cannot approve their request for waiver of overpayment. We conduct these conferences face-to-face, via telephone, or through video teleconferences. Social Security beneficiaries and SSI recipients or their representatives may provide documents to demonstrate they are without fault in causing the overpayment and do not have the ability to repay the debt. They may submit these documents by completing Form SSA–632, Request for Waiver of Overpayment Recovery (OMB No. 0960–0037); Form SSA–795, Statement of Claimant or Other Person (OMB No. 0960–0045); or through a personal statement submitted by mail, telephone, personal contact, or other suitable method, such as fax or email. This information collection satisfies the requirements for request for waiver of recovery of an overpayment and allows individuals to pursue further levels of administrative appeal via personal conference. Respondents are Social Security Title II beneficiaries and Title XVI SSI recipients or their representatives seeking reconsideration of an SSA waiver decision.

Type of Request: Revision of an OMB-approved information collection.

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)	Average theoretical hourly cost amount (dollars) *	Average wait time in field office or for teleservice centers (minutes) **	Total annual opportunity cost (dollars) ***
Title II, Personal Conference, 404.506: submittal of documents, additional mitigating financial information, and verifications for consideration at personal conferences	23,410	1	45	17,558	* $11.70	** 21	*** $301,298
Title XVI, Personal Conference, 416.557: submittal of documents, additional mitigating financial information, and verifications at personal conferences	34,190	1	45	25,643	* $11.70	** 21	*** $440,037
Totals	57,600			43,201			*** 741,335

* We based this figure on the average DI payments based on SSA's current FY 2022 data (*https://www.ssa.gov/legislation/2022factsheet.pdf*).
** We based this figure by averaging the average FY 2022 wait times for field offices and teleservice centers, based on SSA's current management information data.
*** This figure does not represent actual costs that SSA is imposing on recipients of Social Security payments to complete this application; rather, these are theoretical opportunity costs for the additional time respondents will spend to complete the application. There is no actual charge to respondents to complete the application.

Dated: November 18, 2022.

Naomi Sipple,

Reports Clearance Officer, Social Security Administration.

BILLING CODE 4191–02–P

DEPARTMENT OF STATE

[Public Notice: 11924]

Advisory Committee on International Law

ACTION: Notice of open meeting.

SUMMARY: A meeting of the Department of State's Advisory Committee on International Law will take place on Monday, December 12, 2022, from 9:00 a.m. to 3:15 p.m. at the George Washington University Law School, Michael K. Young Faculty Conference Center, 716 20th St. NW, 5th Floor, Washington, DC. Acting Legal Adviser Richard Visek will chair the meeting, which will be open to the public up to the capacity of the meeting room. The meeting will include discussions on the future of the international rules-based order, a special tribunal on the crime of aggression in Ukraine, and developments in international law concerning state responsibility in outer space.

Members of the public who wish to attend should contact the Office of the Legal Adviser by December 8 at *rangchitm@state.gov* or (202) 485–6590 and provide their name, professional affiliation, address, and phone number. Attendees who require reasonable accommodation should make their requests by December 8. Requests received after that date will be considered but might not be possible to accommodate.

FOR FURTHER INFORMATION CONTACT: Tara M. Rangchi, Executive Director, Advisory Committee on International Law, U.S. Department of State (telephone: (202) 485–6590, email: *rangchitm@state.gov*).

Tara M. Rangchi,

Executive Director, Advisory Committee on International Law, Department of State.

BILLING CODE 4710–08–P

SURFACE TRANSPORTATION BOARD

[Docket No. FD 36612]

Revolution Rail Holding Company, LLC—Acquisition Exemption—Saratoga and North Creek Railway, LLC

Revolution Rail Holding Company, LLC (RRHC), a noncarrier, has filed a verified notice of exemption under 49 CFR 1150.31 to acquire from Saratoga and North Creek Railroad (SNCR) approximately 29.71 miles of rail line between milepost NC 0.0 at North Creek, N.Y., and its terminus at milepost NC 29.71 near the former Tahawus Mine, as well as approximately 2.97 miles of passing tracks and siding (the Line).[1]

RRHC states that that it was the successful bidder in the March 2022 bankruptcy auction of SNCR's assets and it subsequently entered into an Amended Asset Purchase Agreement (the Agreement) with the Plan Administrator to purchase those assets, including the Line. (Verified Notice 5, 8–9, Ex. B.) RRHC further states that it is willing to assume the common carrier obligation and has partnered with SMS Rail Service, Inc. (SMS), a Class III rail carrier, to provide freight rail service on the Line if any service is requested in

[1] RRHC submitted its verified notice of exemption on April 20, 2022. However, by decision served on May 19, 2022, the effective date of the exemption was postponed because of uncertainty involving the interrelationship between RRHC's proposed acquisition exemption and the pending application for adverse abandonment of the Line filed by the New York State Department of Environmental Conservation (the Department) in Docket No. AB 1261. The Department filed letters addressing these issues on June 21, 2022, and July 19, 2022. By decision served November 18, 2022, the Board concluded that the uncertainty had been addressed and notice of RRHC's exemption could proceed.

accordance with 49 U.S.C. 11101.[2] (*Id.* at 8.)

The transaction may be consummated on or after December 7, 2022, the effective date of the exemption.

RRHC certifies that proposed transaction will not result in projected annual operating revenues exceeding $5 million and will not result in the creation of a Class I or Class II rail carrier.

If the verified notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Petitions for stay must be filed no later than November 30, 2022 (at least seven days before the exemption becomes effective).

All pleadings, referring to Docket No. FD 36612, must be filed with the Surface Transportation Board either via e-filing on the Board's website or in writing addressed to 395 E Street SW, Washington, DC 20423–0001. In addition, a copy of each pleading must be served on RRHC's representative, Daniel R. Elliott, GKG Law, P.C., 1050 Thomas Jefferson Street NW, Suite 500, Washington, DC 20007.

According to RRHC, this action is categorically excluded from environmental review under 49 CFR 1105.6 and from historic reporting requirements under 49 CFR 1105.8.

Board decisions and notices are available at *www.stb.gov.*

Decided: November 17, 2022.

By the Board, Mai T. Dinh, Director, Office of Proceedings.

Kenyatta Clay,

Clearance Clerk.

BILLING CODE 4915–01–P

DEPARTMENT OF THE TREASURY

Bureau of the Fiscal Service

Proposed Collection of Information: Management of Federal Agency Disbursements

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995. Currently the Bureau of the Fiscal Service within the Department of the Treasury is soliciting comments concerning the Management of Federal Agency Disbursements.

DATES: Written comments should be received on or before January 23, 2023 to be assured of consideration.

ADDRESSES: Direct all written comments and requests for additional information to Bureau of the Fiscal Service, Bruce A. Sharp, Room #4006–A, P.O. Box 1328, Parkersburg, WV 26106–1328, or *bruce.sharp@fiscal.treasury.gov.*

SUPPLEMENTARY INFORMATION:

Title: Management of Federal Agency Disbursements.

OMB Number: 1530–0016.

Form Number: None.

Abstract: This regulation requires that most Federal payments be made by Electronic Funds Transfer (EFT); sets forth waiver requirements; and provides for a low-cost Treasury-designated account to individuals at a financial institution that offers such accounts.

Current Actions: Extension of a currently approved collection.

Type of Review: Regular.

Affected Public: Individuals or Households, Business or other for-profit institutions, Not-for-profit Institutions.

Estimated Number of Respondents: 1,300.

Estimated Time per Respondent: 15 minutes.

Estimated Total Annual Burden Hours: 325.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: 1. Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; 2. the accuracy of the agency's estimate of the burden of the collection of information; 3. ways to enhance the quality, utility, and clarity of the information to be collected; 4. ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and 5. estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Dated: November 18, 2022.

Bruce A. Sharp,

Bureau PRA Clearance Officer.

DEPARTMENT OF THE TREASURY

Bureau of the Fiscal Service

Proposed Collection of Information: Application Form for U.S. Department of the Treasury Accountable Official Stored Value Card (SVC) Program

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995. Currently the Bureau of the Fiscal Service within the Department of the Treasury is soliciting comments concerning the Application Form for U.S. Department of the Treasury Accountable Official Stored Value Card (SVC) Program.

DATES: Written comments should be received on or before January 23, 2023 to be assured of consideration.

ADDRESSES: Direct all written comments and requests for additional information to Bureau of the Fiscal Service, Bruce A. Sharp, Room #4006–A, P.O. Box 1328, Parkersburg, WV 26106–1328, or *bruce.sharp@fiscal.treasury.gov.*

SUPPLEMENTARY INFORMATION:

Title: Application Form for U.S. Department of the Treasury Accountable Official Stored Value Card (SVC) Program.

OMB Number: 1530–0020.

Form Number: FS Form 2888.

Abstract: This form is used to collect information from accountable officials requesting enrollment in the Treasury SVC program in their official capacity, to obtain authorization to initiate debit and credit entries to their bank or credit union accounts, and to facilitate collection of any delinquent amounts that may become due and yet to be paid as a result of the use of the cards.

This information is collected under the authority in: 31 U.S.C. 321, General Authority of the Secretary of the Treasury; Public Law 104–134, Debt Collection Improvement Act of 1996, as amended; Department of Defense Financial Management Regulation (DoDFMR) 7000.14–R, as amended; 5

[2] RRHC notes that SMS would need to obtain the necessary Board authority to operate on the Line when service is required.

U.S.C. 5514, Installment deduction for indebtedness to the United States; 31 U.S.C. 1322, Payments of unclaimed trust fund amounts and refund of amounts erroneously deposited; 31 U.S.C. 3720, Collection of payments; 31 U.S.C. 3720A, Reduction of tax refund by amount of debt; 31 U.S.C. 7701, Taxpayer identifying number; 37 U.S.C. 1007, Deductions from pay; 31 CFR part 210, Federal Government Participation in the Automated Clearing House; 31 CFR part 285, Debt Collection Authorities under the Debt Collection Improvement Act of 1996; and E.O. 9397 (SSN), as amended.

The information on this form may be disclosed as generally permitted under 5 U.S.C. 552(a)(b) of the Privacy Act of 1974, as amended. It may be disclosed outside of the U.S. Department of the Treasury to its Fiscal and Financial Agents and their contractors involved in providing SVC services, or to the Department of Defense (DoD) for the purpose of administering the Treasury SVC programs. In addition, other Federal, State, or local government agencies that have identified a need to know may obtain this information for the purpose(s) as identified by Fiscal Service's Routine Uses as published in the **Federal Register**.

Current Actions: Extension of a currently approved collection.

Type of Review: Regular.

Affected Public: Individuals or households.

Estimated Number of Respondents: 7,500.

Estimated Time per Respondent: 10 minutes.

Estimated Total Annual Burden Hours: 1,250.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: 1. Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; 2. the accuracy of the agency's estimate of the burden of the collection of information; 3. ways to enhance the quality, utility, and clarity of the information to be collected; 4. ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and 5. estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Dated: November 18, 2022.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995. Currently the Bureau of the Fiscal Service within the Department of the Treasury is soliciting comments concerning the Request to Reissue United States Savings Bonds.

DATES: Written comments should be received on or before January 23, 2023 to be assured of consideration.

ADDRESSES: Direct all written comments and requests for additional information to Bureau of the Fiscal Service, Bruce A. Sharp, Room #4006–A, P.O. Box 1328, Parkersburg, WV 26106–1328, or *bruce.sharp@fiscal.treasury.gov.*

SUPPLEMENTARY INFORMATION:

Title: Request to Reissue United States Savings Bonds.

OMB Number: 1530–0025.

Form Number: FS Form 4000.

Abstract: The information is requested to support a request to reissue paper (definitive) Series EE, HH, and I United States Savings Bonds; Retirement Plan Bonds; and Individual Retirement Plan Bonds and to indicate the new registration required.

Current Actions: Extension of a currently approved collection.

Type of Review: Regular.

Affected Public: Individuals or households.

Estimated Number of Respondents: 38,000.

Estimated Time per Respondent: 30 minutes.

Estimated Total Annual Burden Hours: 19,000.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: 1. Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; 2. the accuracy of the agency's estimate of the burden of the collection of information; 3. ways to enhance the quality, utility, and clarity of the information to be collected; 4. ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and 5. estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Dated: November 18, 2022.

Bruce A. Sharp,

Bureau PRA Clearance Officer.

DEPARTMENT OF THE TREASURY

Bureau of the Fiscal Service

Proposed Collection of Information: Electronic Funds Transfer (EFT) Market Research Study

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995. Currently the Bureau of the Fiscal Service within the Department of the Treasury is soliciting comments concerning the Electronic Funds Transfer (EFT) Market Research Study.

DATES: Written comments should be received on or before January 23, 2023 to be assured of consideration.

ADDRESSES: Direct all written comments and requests for additional information to Bureau of the Fiscal Service, Bruce A. Sharp, Room #4006–A, P.O. Box 1328, Parkersburg, WV 26106–1328, or *bruce.sharp@fiscal.treasury.gov.*

SUPPLEMENTARY INFORMATION:

Title: Electronic Funds Transfer (EFT) Market Research Study.

OMB Number: 1530–0022.

Form Number: None.

Abstract: This is a generic clearance to conduct customer satisfaction surveys, focus groups, and interviews among recipients of federal benefit and vendor payments through EFT. The need for this market research continues to arise from a Congressional directive that accompanied legislation enacted in 1996, as part of the Debt Collection Improvement Act (Pub. L. 104–134), expanding the scope of check recipients required to use direct deposit to receive Federal benefit payments (see 31 U.S.C. 3332). Congress directed Treasury to ''study the socioeconomic and demographic characteristics of those who currently do not have Direct Deposit and determine how best to increase usage among all groups.'' 142 Cong. Rec. H4090 (daily ed. April 25, 1996).

Current Actions: Extension of a currently approved collection.

Type of Review: Regular.

Affected Public: Individuals or households, Federal Government.

Estimated Number of Respondents: 19,500.

Estimated Time per Respondent: 16 minutes.

Estimated Total Annual Burden Hours: 5,200.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: 1. Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; 2. the accuracy of the agency's estimate of the burden of the collection of information; 3. ways to enhance the quality, utility, and clarity of the information to be collected; 4. ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and 5. estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Dated: November 18, 2022.

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Notice of OFAC Sanctions Actions

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of one or more persons that have been placed on OFAC's List of Specially Designated Nationals and Blocked Persons (SDN List) based on OFAC's determination that one or more applicable legal criteria were satisfied. All property and interests in property subject to U.S. jurisdiction of these persons are blocked, and U.S. persons are generally prohibited from engaging in transactions with them.

DATES: See **SUPPLEMENTARY INFORMATION** section for effective date.

FOR FURTHER INFORMATION CONTACT: OFAC: Andrea Gacki, Director, tel.: 202–622–2490; Associate Director for Global Targeting, tel.: 202–622–2420; Assistant Director for Licensing, tel.: 202–622–2480; Assistant Director for Regulatory Affairs, tel.: 202–622–4855; or the Assistant Director for Sanctions Compliance & Evaluation, tel.: 202–622–2490.

SUPPLEMENTARY INFORMATION:

Electronic Availability

The SDN List and additional information concerning OFAC sanctions programs are available on OFAC's website (*www.treasury.gov/ofac*).

Notice of OFAC Actions

On November 17, 2022, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following persons are blocked under the relevant sanctions authority listed below.

Individuals

1. HURTADO OLASCOAGA, Johnny (a.k.a. ''EL FISH''; a.k.a. ''EL MOJARRO''; a.k.a. ''EL MUHADO''; a.k.a. ''EL PESCADO''; a.k.a. ''EL PEZ''; a.k.a. ''PECADO PEZ''), Mexico; DOB 01 Mar 1973; POB Guerrero, Mexico; nationality Mexico; Gender Male;

C.U.R.P. HUOJ730301HGRRLH02 (Mexico) (individual) [ILLICIT–DRUGS–EO14059]. Sanctioned pursuant to section 1(a)(i) of Executive Order 14059 of December 15, 2021, ''Imposing Sanctions on Foreign Persons Involved in the Global Illicit Drug Trade'' (the ''Order''), for having engaged in, or attempted to engage in, activities or transactions that have materially contributed to, or pose a significant risk of materially contributing to, the international proliferation of illicit drugs or their means of production.

2. HURTADO OLASCOAGA, Jose Alfredo (a.k.a. ''EL FRESA''), Mexico; DOB 02 Sep 1984; POB Guerrero, Mexico; nationality Mexico; Gender Male; C.U.R.P. HUOA840902HGRRLL03 (Mexico) (individual) [ILLICIT–DRUGS–EO14059]. Sanctioned pursuant to section 1(a)(i) of the Order for having engaged in, or attempted to engage in, activities or transactions that have materially contributed to, or pose a significant risk of materially contributing to, the international proliferation of illicit drugs or their means of production.

Entity

1. LA NUEVA FAMILIA MICHOACANA (a.k.a. ''LNFM''), Guerrero, Mexico; Michoacan, Mexico; Target Type Criminal Organization [ILLICIT–DRUGS–EO14059]. Sanctioned pursuant to section 1(a)(i) of the Order for having engaged in, or attempted to engage in, activities or transactions that have materially contributed to, or pose a significant risk of materially contributing to, the international proliferation of illicit drugs or their means of production.

Dated: November 17, 2022.

Andrea M. Gacki,

Director, Office of Foreign Assets Control, U.S. Department of the Treasury.

BILLING CODE 4810–AL–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Form 2063

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Internal Revenue Service, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995 (PRA). The IRS is soliciting comments concerning Form 2063, U.S. Departing Alien Income Tax Statement.

DATES: Written comments should be received on or before January 23, 2023 to be assured of consideration.

ADDRESSES: Direct all written comments to Andres Garcia, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington, DC 20224 or by email to *pra.comments@irs.gov.* Please reference the information collection's ''OMB number 1545–0138'' in the subject line of the message.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form and instructions should be directed to Sara Covington, (202) 317–5744, at Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington, DC 20224, or through the internet at *sara.l.covington@irs.gov.*

SUPPLEMENTARY INFORMATION:

Title: U.S. Departing Alien Income Tax Statement.

OMB Number: 1545–0138.

Form Number: 2063.

Abstract: Form 2063 is used by a departing resident alien against whom a termination assessment has not been made, or a departing nonresident alien who has no taxable income from United States sources, to certify that they have satisfied all U.S. income tax obligations. The data is used by the IRS to certify that departing aliens have complied with U.S. income tax laws.

Current Actions: There are no changes being made to the form at this time.

Type of Review: Extension of a currently approved collection.

Affected Public: Individuals or households.

Estimated Number of Responses: 20,540.

Estimated Time per Response: 50 minutes.

Estimated Total Annual Burden Hours: 17,049.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: November 17, 2022.

Sara L. Covington,

IRS Tax Analyst.

BILLING CODE 4830–01–P

DEPARTMENT OF THE TREASURY

Notice and Request for Information—Opportunities and Challenges in Federal Community Investment Programs

AGENCY: Department of the Treasury (Treasury), Small Business Administration (SBA), Department of Commerce (Commerce), Department of Transportation (DOT), Department of Housing and Urban Development (HUD), and Department of Agriculture (USDA), (collectively, the Agencies).

ACTION: Request for information; extension of comment period.

SUMMARY: On October 4, 2022, representatives comprising the Interagency Community Investment Committee (ICIC)—the Department of the Treasury (Treasury), Small Business Administration (SBA), Department of Commerce (Commerce), Department of Transportation (DOT), Department of Housing and Urban Development (HUD), and Department of Agriculture (USDA), (collectively, the Agencies)—invited the public to comment on how the ICIC can promote economic conditions and systems that reduce racial disparities and produce stronger economic outcomes for all communities. Responses may be used to inform ICIC's future actions to improve the operations and delivery of federal community investment programs through stronger

federal collaboration. The purpose of this notice is to extend the comment period for a period of two weeks until December 19, 2022 as to provide more time for interested parties to submit comments.

DATES: The comment period for the notice published at 87 FR 60236 on October 4 2022, is extended by two weeks. Responses must be received by December 19, 2022 to be assured of consideration.

ADDRESSES: Please submit comments electronically through the Federal eRulemaking Portal: *https://www.regulations.gov,* specifically at *https://www.regulations.gov/commenton/TREAS-DO-2022-0020-0001.* All comments should be captioned with ''Community Investment Request for Information Comments.'' Please include your name, organization affiliation, address, email address, and telephone number in your comment. Where appropriate, a comment should include a short executive summary. In general, comments received will be posted on *http://www.regulations.gov* without change, including any business or personal information provided. Comments received, including attachments and other supporting materials, will be part of the public record and subject to public disclosure. Do not enclose any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure.

FOR FURTHER INFORMATION CONTACT: Please contact Viraj Parikh, Phone Number: 202–923–5161, or *ORPCommunityDevRFI@treasury.gov.* Further information may be obtained from the Treasury website detailing the initiative.

SUPPLEMENTARY INFORMATION: The Biden-Harris Administration is deploying trillions of dollars of public-sector investment authorized through programs under the American Rescue Plan Act of 2021 (ARP), Bipartisan Infrastructure Law (BIL), Consolidated Appropriations Act, 2021, the bipartisan CHIPS and Science Act (CHIPS) and the Inflation Reduction Act (IRA). These transformational investments present an opportunity to implement federal service delivery solutions that will support catalytic growth in historically underserved communities and address racial and geographic economic disparities.

On October 4, 2022, the Agencies published a Notice in the **Federal Register** to request public comment on how to improve the operations and delivery of federal community investment programs through stronger federal collaboration.[1] The Notice requested that respondents address the Key Questions listed below and stated that comments must be received by December 5, 2022 to be assured of consideration. This notice announces the extension of the comment period for a period of two weeks as to provide more time for interested parties to submit comments. Responses must be received by December 19, 2022 to be assured of consideration.

Key Questions

Note: To assist with responding to these questions, a brief but non-exhaustive list of ICIC-relevant programs are listed at the end of this RFI.

1. Please describe examples of best practices and lessons learned from community investment projects that have layered a mix of public, private, and/or philanthropic capital. How could these projects have been more impactful or more cost effective to implement? In responding to this question, examples may address any of the four substantive areas of focus described in this RFI: (1) strengthening the capacity of community financial institutions; (2) supporting small businesses and entrepreneurship; (3) improving financial health and inclusion; and (4) investing in community facilities and infrastructure. In addition, a non-exhaustive list of example programs is provided in the appendix of this RFI as a reference.

2. From the examples provided in response to question 1, what specific changes could agencies consider to facilitate the layering of federal funds to attract greater private follow-on funding, as they implement new community investment programs and contemplate modifications to others?

3. As agencies are implementing new programs under recent CHIPS and IRA legislation, how can they best incorporate these lessons to streamline design and delivery, as well as ensure historically underserved communities benefit from federal funds?

4. Community financial institutions play a critical role in providing safe, affordable capital and financial services to historically underserved communities. How can federal agency coordination help build the capacity of these organizations to serve their communities?

5. What specific changes to federal credit or securitization programs could facilitate additional private investment in community financial institutions, and what are the most important existing limitations of these programs that may prohibit additional scale that could be achieved?

6. How can the Agencies incentivize or structure data collection and reporting to promote increased private sector and philanthropic investment in community financial institutions?

7. How can further alignment of and coordination between federal agencies in the four areas of substantive focus result in stronger outcomes with regards to reducing racial economic disparities, improving financial security and economic mobility, and generating broadly shared economic opportunity?

8. What data should the Agencies consider collecting to better understand and report the impact of community investments in reducing racial, gender, and geographic, or other economic disparities?

9. How can the Agencies collaborate on providing technical assistance, opportunities for peer-to-peer learning, and other non-financial resources to support the deployment of capital or implementation of community-serving projects in historically underserved communities?

10. Please describe best-in-class examples of how federal technical assistance has been best implemented through public-private partnerships.

Jessica Milano,

Chief Program Officer, Office of Recovery Programs.

Appendix

I. Strengthen Community Financial Institutions

Programs that support CDFIs, MDIs, credit unions, and community banks with assets less than $1 billion:

Commerce	EDA Build to Scale, EDA Revolving Loan Funds.
DOT	Thriving Communities,* Reconnecting Communities.
HUD	Federal Housing Administration, Ginnie Mae, Section 108, HOME Investment Partnership, Housing Trust Fund.

[1] Opportunities and Challenges in Federal Community Investment Programs, 87 FR 60236 (October 4, 2022), *https://www.regulations.gov/commenton/TREAS-DO-2022-0020-0001.*

Treasury	Emergency Capital Investment Fund (ECIP), CDFI Fund, State Small Business Credit Initiative (SSBCI).
SBA	Community Advantage, Microloan programs, 7(a) Loan Program, 504 Loan Program, Program for Investment in Micro-Entrepreneurs (PRIME) grants.
USDA	RD B&I loan program, RD Community Facilities Program, Intermediary Relending Program, Rural Business Development Grants, Rural Microentrepreneur Assistance Program.

II. Increase Small Business Creation, Growth, and Profitability

Programs that support small business access to capital (debt & equity), technical assistance for entrepreneurs, contracting:

Commerce	Minority Business Development Agency (MBDA) programs: • SSBCI Technical Assistance Program. • National Business Center Network Program. • Specialty Centers. • American Indian, Alaska Native, and Native Hawaiian Projects. • Enterprising Women of Color Program. • Entrepreneurship Education for Formerly Incarcerated Persons Pilot. • Minority Colleges and University Pilot. • MBE Equity Multiplier Project. • Inner City Innovation Hub Pilot. EDA Build to Scale, EDA Revolving Loan Funds.
DOT	Railroad Rehabilitation and Improvement Financing (RRIF), Transportation Infrastructure Finance and Innovation Act (TIFIA), Small Business Transportation Resource Centers*.
HUD	Community Development Block Grant, Section 3.
Treasury	ECIP, CDFI Fund, SSBCI.
SBA	All programs.
USDA	Rural Microentrepreneur Assistance Program, Rural Business Development Grant* RD B&I loan program, RD Community Facilities Program, Intermediary Relending Program.

III. Improve Financial Health and Inclusion

Programs that support the creation of high-quality jobs and access to consumer credit, payments, and savings products:

Commerce	EDA Good Jobs Challenge, EDA Build Back Better Regional Challenge, MBDA Access to Capital: Innovative Finance Pilot.
DOT	N/A.
HUD	Housing Counseling, Community Development Block Grant, Section 3, Asset Building Programs (*e.g.,* Family Self-Sufficient, Resident Opportunities and Self-Sufficiency).
Treasury	State and Local Fiscal Recovery Fund, Emergency Rental Assistance Program, ECIP, CDFI Fund.
SBA	All programs.
USDA	Rural Innovation Stronger Economy, Rural Economic Development Loan and Grant.

IV. Expand Community Infrastructure

Programs that support the preservation or development of affordable housing, community facilities, public transportation, and high-quality broadband:

Commerce	EDA Build Back Better Regional Challenge. NTIA Technical Assistance and Infrastructure programs, including: • Connecting Minority Communities Program. • Broadband Infrastructure Program. • Tribal Broadband Connectivity Program. • Broadband Equity, Access, and Deployment Program (BEAD). • Middle Mile Broadband Infrastructure Grant Program. • State Digital Equity Planning Grant Program. • Digital Equity Competitive Grant Program.
DOT	TIFIA, RRIF, Private Activity Bonds, Thriving Communities*, Reconnecting Communities, Regional Infrastructure Accelerators*, Safe Streets for All, Asset Concession-Innovative Financing Grant*, Rural-Tribal Technical Assistance Grant*, Capital Investment Grants (other public transport programs), FTA Pilot Program.
HUD	Section 108, Community Development Block Grant, HOME Investment Partnership, Project-Based Rental Assistance, Project Based Vouchers, FHA Mortgage Insurance, Housing Trust Fund, Choice Neighborhoods.
Treasury	State and Local Fiscal Recovery Fund, Capital Projects Fund, Homeowners Assistance Fund, Low-Income Housing Tax Credit.
SBA	504 Loan Program, Contracting Assistance Programs.

USDA	RD Community Facilities Programs, Rural Community Development Initiative Grants, Section 502 loans, Section 504 loans and grants, Mutual Self Help Grants, Housing Preservation Grants, Rural Rental Housing and Farm Labor Housing Loans and Grants, Rental Assistance, Rural Development ReConnect and Community Connect Programs. Rural Development Water Emergency Community Water Assistance Grants, Water Infrastructure Grants for Rural and Native Alaskan Villages, Rural Decentralized Water Systems Grant Program, Individual Water & Wastewater Grants in Colonia Areas, Water & Waste Disposal Grants to Alleviate Health Risks on Tribal Lands and Colonias, Water & Waste Disposal Loans & Grants, Solid Waste Management Grants.

* Technical Assistance Program.

BILLING CODE 4810–AK–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0874]

Agency Information Collection Activity Under OMB Review: Employment Certification Form

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Veterans Benefits Administration (VBA), Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden, and it includes the actual data collection instrument.

DATES: Written comments and recommendations for the proposed information collection revision should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Refer to ''OMB Control No. 2900–0874.

FOR FURTHER INFORMATION CONTACT: Maribel Aponte, Office of Enterprise and Integration, Data Governance Analytics (008), 810 Vermont Ave. NW, Washington, DC 20006, (202) 266–4688 or email *maribel.aponte@va.gov.* Please refer to ''OMB Control No. 2900–0874'' in any correspondence.

SUPPLEMENTARY INFORMATION:

Authority: Section 116, Public Law 115–48; Section 8006, Public Law 117.2.

Title: Employment Certification Form, VA Form 22–10201.

OMB Control Number: 2900–0874.

Type of Review: Revision of a currently approved collection.

Abstract: On August 16, 2017, the President signed into law, the Harry W. Colmery Veterans Educational Assistance Act of 2017 (''Forever GI Bill''), Public Law 115–48, which amended Title 38, United States Code to make certain improvements in the laws administered by the Secretary of Veterans Affairs (VA), and for other purposes.

Section 116 of the law authorizes VA to establish a 5-year high technology pilot program for Veterans as an educational program provided by leading technology employers. Section 116 also requires that VA receive Employment Certification from School Certifying Officials (SCOs) and Veterans enrolled in the VET TEC pilot program.

Additionally, Section 116 of Public Law 115–48, and Section 8006 of Public Law 117–2, authorized VA to implement both the Veteran Employment through Technology Education Courses (VET TEC), and the Veteran Rapid Retraining Assistance Program (VRRAP), respectively. Both of these programs provide assistance to an eligible Veteran for the pursuit of a covered program of education. This form therefore allows Veterans who either participated in a VRRAP or VET TEC program to certify to VA that they have found employment in a field related to their program of education. The VET TEC Employment Certification Form 22–10201, which is also used as the employment certification for VRRAP, will allow student Veterans and SCOs to certify that a student Veteran has obtained meaningful employment with the skills acquired during their training program funded by those programs. VA continues to require approval of this information collection, so that VA can verify Veteran employment, as required by the law. VA would not comply with statute, if we do not collect the Veteran Employment Certification. The new laws require VA to certify and verify employment for student Veterans, which aligns with the skills acquired during their training program, funded by the VET TEC program offered by the Department of Veterans Affairs.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at 87 FR 20141 on September 19, 2022, page(s) 57261–57262.

Affected Public: Individuals and Households.

Estimated Annual Burden: 159 hours.

Estimated Average Burden Time per Respondent: 5 minutes.

Frequency of Response: Once.

Estimated Number of Respondents: 1,908.

By direction of the Secretary.

Dorothy Glasgow,

VA PRA Clearance Officer, (Alt) Office of Enterprise and Integration, Data Governance Analytics, Department of Veterans Affairs.

[FR Doc. 2022–25623 Filed 11–22–22; 8:45 am]

BILLING CODE 8320–01–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0138]

Agency Information Collection Activity Under OMB Review: Request for Details of Expenses

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Veterans Benefits Administration (VBA), Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden and it includes the actual data collection instrument.

DATES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular

information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Refer to ''OMB Control No. 2900–0138.

FOR FURTHER INFORMATION CONTACT: Maribel Aponte, Office of Enterprise and Integration, Data Governance Analytics (008), 810 Vermont Ave. NW, Washington, DC 20006, (202) 266–4688 or email *maribel.aponte@va.gov.* Please refer to ''OMB Control No. 2900–0138'' in any correspondence.

SUPPLEMENTARY INFORMATION:

Authority: 38 U.S.C. 1522.

Title: Request for Details of Expenses, VA Form 21P–8049.

OMB Control Number: 2900–0138.

Type of Review: Revision of a currently approved collection.

Abstract: VA Form 21P–8049 is primarily used to gather the necessary information to determine eligibility for VA Pension. Without VA Form 21P–8049, VA will not be able to properly evaluate the totality of a claimant's circumstances when considering an application for benefits. VA will also be unable to evaluate the totality of claimant's circumstances when VA receives evidence of a significant increase in the corpus of a claimant's estate. The collection is conducted on a one-time basis and cannot be conducted less frequently. The respondent burden has decreased due to the number of receivables over the past year with non substantive and substantive changes. These changes include updated instructions, reformatting to include optical character recognition boxes, and renumbering section headers and questions.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at 87 FR 56151 on September 13, 2022, pages 56151 and 56152.

Affected Public: Individuals or Households.

Estimated Annual Burden: 218 hours.

Estimated Average Burden per Respondent: 15 minutes.

Frequency of Response: One time.

Estimated Number of Respondents: 871 per year.

By direction of the Secretary.

Dorothy Glasgow,

VA PRA Clearance Officer, (Alt) Office of Enterprise and Integration, Data Governance Analytics, Department of Veterans Affairs.

Medicare Program: Hospital Outpatient Prospective Payment and Ambulatory Surgical Center Payment Systems and Quality Reporting Programs; Organ Acquisition; Rural Emergency Hospitals: Payment Policies, Conditions of Participation, Provider Enrollment, Physician Self-Referral; New Service Category for Hospital Outpatient Department Prior Authorization Process; Overall Hospital Quality Star Rating; COVID–19

AGENCY: Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services (HHS).

ACTION: Final rule with comment period; final rules.

SUMMARY: This final rule with comment period revises the Medicare hospital outpatient prospective payment system (OPPS) and the Medicare ambulatory surgical center (ASC) payment system for Calendar Year (CY) 2023 based on our continuing experience with these systems. We describe the changes to the amounts and factors used to determine the payment rates for Medicare services paid under the OPPS and those paid under the ASC payment system. Also, this final rule updates and refines the requirements for the Hospital Outpatient Quality Reporting (OQR) Program; the ASC Quality Reporting (ASCQR) Program; and the Rural Emergency Hospital Quality Reporting (REH) Program. We also make updates to the requirements for Organ Acquisition, REHs, Prior Authorization, and Overall Hospital Quality Star Rating. We are establishing a new provider type for REHs, and we are finalizing proposals regarding payment policy, quality measures, and enrollment policy for REHs. In addition, we are finalizing the Conditions of Participation that REHs must meet in order to participate in the Medicare and Medicaid programs. This rule also finalizes changes to the Critical Access Hospitals (CAH) CoPs for the location and distance requirements, patient's rights requirements, and flexibilities for CAHs that are part of a larger health system. Finally, we are finalizing as implemented a number of provisions included in the COVID–19 interim final rules with comment period (IFCs).

DATES:

Effective date: The provisions of this rule are effective January 1, 2023.

Comment period: To be assured consideration, comments must be received at one of the addresses provided below, by January 3, 2023.

Incorporation by reference: The incorporation by reference of certain publications listed in the rule is approved by the Director of the Federal Register as of January 1, 2023.

ADDRESSES: In commenting, please refer to file code CMS–1772–FC.

Comments, including mass comment submissions, must be submitted in one of the following three ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to *https://www.regulations.gov*. Follow the ''Submit a comment'' instructions.

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1772–FC; CMS–1744–F; CMS–3419–F; CMS–5531–FC; CMS–9912–F, P.O. Box 8010, Baltimore, MD 21244–1810.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1772–FC; CMS–1744–F; CMS–3419–F; CMS–5531–F; CMS–9912–F, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following website as soon as possible after they have been received: *https://www.regulations.gov.* Follow the search instructions on that website to view public comments. CMS will not post on *Regulations.gov* public comments that make threats to individuals or institutions or suggest that the individual will take actions to harm the individual. CMS continues to encourage individuals not to submit duplicative comments. We will post acceptable comments from multiple unique commenters even if the content is identical or nearly identical to other comments.

Addenda Available Only Through the Internet on the CMS Website

In the past, a majority of the Addenda referred to in our OPPS/ASC proposed and final rules were published in the **Federal Register** as part of the annual rulemakings. However, beginning with the CY 2012 OPPS/ASC proposed rule, all of the Addenda no longer appear in the **Federal Register** as part of the annual OPPS/ASC proposed and final rules to decrease administrative burden and reduce costs associated with publishing lengthy tables. Instead, these Addenda are published and available only on the CMS website. The Addenda relating to the OPPS are available at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices.* The Addenda relating to the ASC payment system are available at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/ASCPayment/ASC-Regulations-and-Notices.*

I. Congressional Review

I. Summary and Background

A. Executive Summary of This Document

1. Purpose

In this final rule with comment period, we are updating the payment policies and payment rates for services furnished to Medicare beneficiaries in hospital outpatient departments (HOPDs) and ambulatory surgical centers (ASCs), beginning January 1, 2023. Section 1833(t) of the Social Security Act (the Act) requires us to annually review and update the payment rates for services payable under the Hospital Outpatient Prospective Payment System (OPPS). Specifically, section 1833(t)(9)(A) of the Act requires the Secretary of the Department of Health and Human Services (the Secretary) to review certain components of the OPPS not less often than annually, and to revise the groups, the relative payment weights, and the wage and other adjustments that take into account changes in medical practice, changes in technology, and the addition of new services, new cost data, and other relevant information and factors. In addition, under section 1833(i)(D)(v) of the Act, we annually review and update the ASC payment rates. This final rule with comment period also includes additional policy changes made in accordance with our experience with the OPPS and the ASC payment system and recent changes in our statutory authority. We describe these and various other statutory authorities in the relevant sections of this final rule with comment period. In addition, this rule updates and refines the requirements for the Hospital Outpatient Quality Reporting (OQR) Program and the ASC Quality Reporting (ASCQR) Program. We also make updates to the requirements for Organ Acquisition, Prior Authorization, and Overall Hospital Quality Star Rating. We are also proposing new regulatory requirements to codify payment policy, quality measures, and enrollment policy for REHs. In addition, we are finalizing the Conditions of Participation that REHs must meet in order to participate in the Medicare and Medicaid programs. This rule also finalizes changes to the Critical Access Hospitals (CAH) CoPs for the location and distance requirements, patient's rights requirements, and flexibilities for CAHs that are part of a larger health system. We thank commenters for submitting comment on the use of CMS data to drive competition in healthcare marketplaces, and the request for information on an alternative methodology for counting organs. Finally, we are finalizing as implemented, a number of provisions included in the COVID–19 interim final rules with comment period (IFCs).

2. Summary of the Major Provisions

- *OPPS Update:* For 2023, we are increasing the payment rates under the OPPS by an Outpatient Department (OPD) fee schedule increase factor of 3.8 percent. This increase factor is based on the final hospital inpatient market basket percentage increase of 4.1 percent for inpatient services paid under the hospital inpatient prospective payment system (IPPS) reduced by a final productivity adjustment of 0.3 percentage point. Based on this update, we estimate that total payments to OPPS providers (including beneficiary cost-sharing and estimated changes in enrollment, utilization, and case-mix) for calendar year (CY) 2023 would be approximately $86.5 billion, an increase of approximately $6.5 billion compared to estimated CY 2022 OPPS payments.

We are continuing to implement the statutory 2.0 percentage point reduction in payments for hospitals that fail to meet the hospital outpatient quality reporting requirements by applying a reporting factor of 0.9807 to the OPPS payments and copayments for all applicable services.

- *Data used in CY 2023 OPPS/ASC Ratesetting:* To set CY 2023 OPPS and ASC payment rates, we would normally use the most updated claims and cost report data available. The best available claims data is the most recent set of data which would be from 2 years prior to the calendar year that is the subject of rulemaking. However, cost report data usually lags the claims data by a year and we believe that the CY 2020 cost report data are not the best overall approximation of expected outpatient hospital service costs as the majority of the cost reports we would typically use for CY 2023 rate setting have cost reporting periods that overlap with parts of the CY 2020 Public Health Emergency (PHE). In order to mitigate the impact of some of the temporary changes in hospitals cost report data from CY 2020, we are utilizing cost report data from the June 2020 extract from Healthcare Cost Report Information System (HCRIS), which includes cost report data from prior to the PHE. This is the same cost report extract we used to set OPPS rates for CY 2022. We believe using the CY 2021 claims data with cost reports data through CY 2019 (prior to the PHE) for CY 2023 OPPS ratesetting is the best approximation of expected costs for CY 2023 hospital outpatient service ratesetting purposes. As a result, we are utilizing the CY 2021 claims data with cost reporting periods prior to the PHE to set CY 2023 OPPS and ASC payment system rates.

- *Partial Hospitalization Update:* For CY 2023, we are using the hospital-based PHP (HB PHP) geometric mean per diem costs consistent with our existing methodology. In addition, we are finalizing our proposal to use the latest available CY 2021 claims data and to continue to use the cost data that was available for the CY 2021 rulemaking. Based on public comments, and in order to pay appropriately and protect access to PHP services in CMHCs, for CY 2023 but not for subsequent years, we are applying an equitable adjustment, under the authority set forth in section 1833(t)(2)(E) of the Act, to the CY 2023 CMHC APC payment rate. For CY 2023, we are maintaining the CY 2022 CMHC APC payment rate of $142.70 as the CY 2023 CMHC APC final payment rate.

- *Changes to the Inpatient Only (IPO) List:* For 2023, we are finalizing our proposal, with modification, to remove eleven services from the Inpatient Only list.

- *340B-Acquired Drugs:* For CY 2023, in light of the Supreme Court decision in *American Hospital Association* v. *Becerra,* 142 S. Ct. 1896 (2022), we are applying the default rate, generally average sales price (ASP) plus 6 percent, to 340B acquired drugs and biologicals in this final rule with comment period for CY 2023 and removing the increase to the conversion factor that was made in CY 2018 to implement the 340B policy in a budget neutral manner.

We are still evaluating how to apply the Supreme Court's decision to prior calendar years. In the CY 2023 OPPS/ASC proposed rule, we solicited public comments on the best way to craft any potential remedies affecting cost years 2018–2022, and we will take these comments into consideration for separate rulemaking that will be published in advance of the CY 2024 OPPS/ASC proposed rule.

- *Device Pass-Through Payment Applications:* For CY 2023, we received 8 applications for device pass-through payments. We solicited public comment on these applications and are making final determinations on these applications in this final rule with comment period. Beginning for OPPS device pass-through applications received on or after March 1, 2023, we are publicly posting online the completed application forms and related materials that we receive from applicants, excluding certain copyrighted or other materials that

applicants indicate cannot otherwise be released to the public.

• *Cancer Hospital Payment Adjustment:* For CY 2023, we are continuing to provide additional payments to cancer hospitals so that a cancer hospital's payment-to-cost ratio (PCR) after the additional payments is equal to the weighted average PCR for the other OPPS hospitals using the most recently submitted or settled cost report data. However, section 16002(b) of the 21st Century Cures Act requires that this weighted average PCR be reduced by 1.0 percentage point. Based on the data and the required 1.0 percentage point reduction, we are using a target PCR of 0.89 to determine the CY 2023 cancer hospital payment adjustment to be paid at cost report settlement. That is, the payment adjustments will be the additional payments needed to result in a PCR equal to 0.89 for each cancer hospital.

• *ASC Payment Update:* For CYs 2019 through 2023, we adopted a policy to update the ASC payment system using the hospital market basket update. Using the hospital market basket methodology, for CY 2023, we are increasing payment rates under the ASC payment system by 3.8 percent for ASCs that meet the quality reporting requirements under the ASCQR Program. This increase is based on a hospital market basket percentage increase of 4.1 percent reduced by a productivity adjustment of 0.3 percentage point. Based on this update, we estimate that total payments to ASCs (including beneficiary cost-sharing and estimated changes in enrollment, utilization, and case-mix) for CY 2023 will be approximately $5.3 billion, an increase of approximately $230 million compared to estimated CY 2022 Medicare payments.

• *Changes to the List of ASC Covered Surgical Procedures:* For CY 2023, we are finalizing our proposal, with modification, to add four procedures, to the ASC covered procedures list (CPL) based upon existing criteria at § 416.166.

• *Hospital Outpatient Quality Reporting (OQR) Program:* For the Hospital OQR Program measure set, we are finalizing our proposals to: (1) add a data validation targeting criterion to our existing four targeting criteria that reads: ''Any hospital with a two-tailed confidence interval that is less than 75 percent, and that had less than four quarters of data due to receiving an ECE for one or more quarters,'' beginning with the CY 2023 reporting period/CY 2025 payment determination; (2) align patient encounter quarters with the calendar year, beginning with the CY 2024 reporting period/CY 2026 payment determination; and (3) change the Cataracts: Improvement in Patient's Visual Function within 90 Days Following Cataract Surgery (OP–31) Measure from Mandatory to Voluntary Beginning with the CY 2027 Payment Determination. We also requested comment on the future readoption of the Hospital Outpatient Volume on Selected Outpatient Surgical Procedures (OP–26) measure or another volume indicator in the Hospital OQR Program.

• *Ambulatory Surgical Center Quality Reporting (ASCQR) Program:* For the ASCQR Program measure set, we are finalizing our proposal to change the Cataracts: Improvement in Patient's Visual Function within 90 Days Following Cataract Surgery (ASC–11) Measure from Mandatory to Voluntary Beginning with the CY 2027 Payment Determination. We also requested comment on: (1) the potential future implementation of a measures value pathways approach in the ASCQR Program; (2) the status and feasibility of interoperability initiatives in the ASCQR Program; and (3) the potential readoption of the ASC Facility Volume Data on Selected ASC Surgical Procedures (ASC–7) measure or another volume indicator in the ASCQR Program.

• *Organ acquisition payment policy:* We issued a Request for Information on counting Medicare organs for use in calculating Medicare's share of organ acquisition costs, rather than making a proposal, and will use the information to inform potential future rulemaking. Also, we are finalizing our proposal to exclude research organs from the ratio used to calculate Medicare's share of organ acquisition costs and are modifying our requirement to offset costs by allowing providers to follow their accounting practices of adjusting costs, offsetting revenue or establishing a non-reimbursable cost center, which will maintain or lower the cost of procuring and providing research organs to the research community. Finally, we are finalizing our proposal to cover as organ acquisition costs certain hospital services provided to donors whose death is imminent, to promote organ procurement and enhance equity.

• *Rural Emergency Hospitals (REH) and Critical Access Hospital Conditions of Participation (CoP):* We are finalizing the Conditions of Participation that REHs must meet in order to participate in the Medicare and Medicaid programs. This rule also finalizes changes to the Critical Access Hospitals (CAH) CoPs for the location and distance requirements, patient's rights requirements, and flexibilities for CAHs that are part of a larger health system.

• *Rural Emergency Hospitals (REH):* Provider Enrollment: We are outlining provider enrollment requirements for REHs. The most important of these are that REHs: (1) must comply with all applicable provider enrollment provisions in 42 CFR part 424, subpart P, in order to enroll in Medicare; and (2) may submit a Form CMS–855A change of information application (rather than an initial enrollment application) to convert to an REH.

• *Rural Emergency Hospitals (REH) Physician Self-Referral Law Update:* We are finalizing revisions to certain existing exceptions to make them applicable to compensation arrangements to which an REH is a party. We are not finalizing the proposed exception for ownership or investment interests in an REH.

• *Rural Emergency Hospital Quality Reporting (REHQR) Program:* For the REHQR Program, we are finalizing our proposal to require a QualityNet account and Security Official (SO) requirement in line with other quality programs for purposes of data submission and access of facility level reports. Also, we requested information on: (1) measures recommended by the National Advisory Committee on Rural Health and Human Services and additional suggested measures for the REHQR Program, and (2) requested comments on rural telehealth, behavioral and mental health, maternal health services, emergency services, and health equity.

• *Overall Hospital Quality Star Ratings:* For the Overall Hospital Quality Star Ratings, we are finalizing amending § 412.190(c) to state the use of publicly available measure results on Hospital Compare or its successor websites from a quarter within the previous 12 months (instead of the ''previous year'').

• *REH Payment Policy:* Section 125 of the Consolidated Appropriations Act of 2021 (CAA) established a new provider type called REHs, effective January 1, 2023. REHs are facilities that convert from either a critical access hospital (CAH) or a rural hospital (or one treated as such under section 1886(d)(8)(E) of the Social Security Act) with less than 50 beds, and that do not provide acute care inpatient services with the exception of post-hospital extended care services furnished in a unit of the facility that is a distinct part licensed as a skilled nursing facility. By statute, REH services include emergency department services and observation care and, at the election of the REH, other outpatient medical and health

services furnished on an outpatient basis, as specified by the Secretary through rulemaking.

By statute, covered outpatient department services provided by REHs will receive an additional 5 percent payment for each service. Beneficiaries will not be charged a copayment on the additional 5 percent payment.

We are finalizing all covered outpatient department services, other than inpatient hospital services as described in section 1833(t)(1)(B)(ii) of the Act, that would otherwise be paid under the OPPS as REH services. REHs would be paid for furnishing REH services at a rate that is equal to the OPPS payment rate for the equivalent covered outpatient department service increased by 5 percent. Also, we are finalizing our proposal that REHs may provide outpatient services that are not otherwise paid under the OPPS (such as services paid under the Clinical Lab Fee Schedule) as well as post-hospital extended care services furnished in a unit of the facility that is a distinct part of the facility licensed as a skilled nursing facility; however, these services would not be considered REH services and therefore would be paid under the applicable fee schedule and will not receive the additional 5 percent payment increase that CMS will apply to REH services.

Finally, we are finalizing that REHs would receive a monthly facility payment of $272,866. After the initial payment is established in CY 2023, the monthly facility payment amount will increase in subsequent years by the hospital market basket percentage increase.

• *Addition of a New Service Category for Hospital Outpatient Department Prior Authorization Process:* We are adding Facet joint interventions as a category of services to the prior authorization process for hospital outpatient departments beginning for dates of service on or after July 1, 2023.

• *Mental Health Services Furnished Remotely by Hospital Staff to Beneficiaries in Their Homes:* For CY 2023, we are considering mental health services furnished remotely by hospital staff using communications technology to beneficiaries in their homes as covered outpatient department services payable under the OPPS and have created OPPS-specific coding for these services. We are finalizing our proposal to require an in-person service within 6 months prior to the initiation of the remote service and then every 12 months thereafter, that exceptions to the in-person visit requirement may be made based on beneficiary circumstances (with the reason documented in the patient's medical record), and that more frequent visits are also allowed under our policy, as driven by clinical needs on a case-by-case basis. We are clarifying that the requirement that an in-person visit occur within 6 months prior to the initial mental health telehealth service does not apply to beneficiaries who began receiving mental health telehealth services in their homes during the PHE or during the 151-day period after the end of the PHE. We are also finalizing our proposal that audio-only interactive telecommunications systems may be used to furnish these services in instances where the beneficiary is not capable of, or does not consent to, the use of two-way, audio/video technology.

• *Supervision by Nonphysician Practitioners of Hospital and CAH Diagnostic Services Furnished to Outpatients:* For CY 2023, to improve clarity, we are finalizing our proposal to replace cross-references at §§ 410.27(a)(1)(iv)(A) and (B) and 410.28(e) to the definitions of general and personal supervision at § 410.32(b)(3)(i) and (iii) with the text of those definitions. We also are finalizing our proposal to revise § 410.28(e) for clarity so that certain nonphysician practitioners (nurse practitioners, physician assistants, clinical nurse specialists and certified nurse midwifes) may supervise the performance of diagnostic tests to the extent they are authorized to do so under their scope of practice and applicable State law.

• *Exemption of Rural Sole Community Hospitals (SCH) from the Method to Control Unnecessary Increases in the Volume of Clinic Visit Services Furnished in Excepted Off-Campus Provider-Based Departments (PBDs):* We are finalizing our proposal to exempt rural Sole Community Hospitals (rural SCHs) from the site-specific Medicare Physician Fee Schedule (PFS)-equivalent payment for the clinic visit service, as described by Healthcare Common Procedure Coding System (HCPCS) code G0463, when provided at an off-campus PBD excepted from section 1833(t)(21) of the Act (departments that bill the modifier ''PO'' on claim lines).

• *Final Payment Adjustments under the IPPS and OPPS for Domestic National Institute for Occupational Safety and Health (NIOSH)-Approved Surgical N95 Respirators:* As discussed in section X.H of this final rule with comment period, the Biden-Harris Administration has made it a priority to ensure America is prepared to continue to respond to COVID–19, and to combat future pandemics. To improve hospital preparedness and readiness for future threats, we are finalizing our proposal to provide payment adjustments to hospitals under the IPPS and OPPS for the additional resource costs they incur to acquire domestic NIOSH-approved surgical N95 respirators. These surgical respirators, which faced severe shortage at the onset of the COVID–19 pandemic, are essential for the protection of beneficiaries and hospital personnel that interface with patients. The Department of Health and Human Services (HHS) recognizes that procurement of domestic NIOSH-approved surgical N95 respirators, while critical to pandemic preparedness and protecting health care workers and patients, can result in additional resource costs for hospitals. The payment adjustments will account for these additional resource costs.

We believe the payment adjustments will help achieve a strategic policy goal, namely, sustaining a level of supply resilience for surgical N95 respirators that is critical to protect the health and safety of personnel and patients in a public health emergency. We are finalizing our proposal that the payment adjustments will commence for cost reporting periods beginning on or after January 1, 2023.

• *Finalization of Certain COVID–19 Interim Final Rules With Comment Period Provisions:* In this final rule with comment period, we are responding to public comments and stating our final policies for certain provisions in the IFCs titled ''Medicare and Medicaid Programs; Policy and Regulatory Revisions in Response to the COVID–19 Public Health Emergency'' (CMS–5531–IFC), ''Medicare and Medicaid Programs, Basic Health Program, and Exchanges; Additional Policy and Regulatory Revisions in Response to the COVID–19 Public Health Emergency and Delay of Certain Reporting Requirements for the Skilled Nursing Facility Quality Reporting Program'' (CMS–5531–IFC), and ''Additional Policy and Regulatory Revisions in Response to the COVID–19 Public Health Emergency'' (CMS–9912–IFC).

3. Summary of Costs and Benefits

In section XXV of this final rule with comment period, we set forth a detailed analysis of the regulatory and federalism impacts that the changes will have on affected entities and beneficiaries. Key estimated impacts are described below.

a. Impacts of All OPPS Changes

Table 110 in section XXV.C of this final rule with comment period displays the distributional impact of all the OPPS changes on various groups of hospitals and CMHCs for CY 2023 compared to all

estimated OPPS payments in CY 2022. We estimate that the policies in this final rule with comment period will result in a 4.5 percent overall increase in OPPS payments to providers. We estimate that total OPPS payments for CY 2023, including beneficiary cost-sharing, to the approximately 3,500 facilities paid under the OPPS (including general acute care hospitals, children's hospitals, cancer hospitals, and CMHCs) will increase by approximately $3.0 billion compared to CY 2022 payments, excluding our estimated changes in enrollment, utilization, and case-mix.

We estimated the isolated impact of our OPPS policies on CMHCs because CMHCs are only paid for partial hospitalization services under the OPPS. Continuing the provider-specific structure we adopted beginning in CY 2011, and basing payment fully on the type of provider furnishing the service, we estimate no change in CY 2023 payments to CMHCs relative to their CY 2022 payments, based on our final policy of maintaining the CY 2022 OPPS payment rates in CY 2023.

b. Impacts of the Updated Wage Indexes

We estimate that our update of the wage indexes based on the fiscal year (FY) 2023 IPPS final rule wage indexes will result in a 0.2 percent increase for urban hospitals under the OPPS and no change for rural hospitals. These wage indexes include the continued implementation of the Office of Management and Budget (OMB) labor market area delineations based on 2010 Decennial Census data, with updates, as discussed in section II.C of this final rule with comment period.

c. Impacts of the Rural Adjustment and the Cancer Hospital Payment Adjustment

There are no significant impacts of our CY 2023 payment policies for hospitals that are eligible for the rural adjustment or for the cancer hospital payment adjustment. We are not making any change in policies for determining the rural hospital payment adjustments. While we are implementing the reduction to the cancer hospital payment adjustment for CY 2023 required by section 1833(t)(18)(C) of the Act, as added by section 16002(b) of the 21st Century Cures Act, the target payment-to-cost ratio (PCR) for CY 2023 is 0.89, equivalent to the 0.89 target PCR for CY 2022, and therefore has no budget neutrality adjustment.

d. Impacts of the OPD Fee Schedule Increase Factor

For the CY 2023 OPPS/ASC, we are establishing an OPD fee schedule increase factor of 3.8 percent and applying that increase factor to the conversion factor for CY 2023. As a result of the OPD fee schedule increase factor and other budget neutrality adjustments, we estimate that urban hospitals will experience an increase in payments of approximately 5.3 percent and that rural hospitals would experience an increase in payments of 2.7 percent. Classifying hospitals by teaching status, we estimate nonteaching hospitals will experience an increase in payments of 3.4 percent, minor teaching hospitals would experience an increase in payments of 4.6 percent, and major teaching hospitals would experience an increase in payments of 7.2 percent. We also classified hospitals by the type of ownership. We estimate that hospitals with voluntary ownership would experience an increase of 5.2 percent in payments, while hospitals with government ownership would experience an increase of 6.3 percent in payments. We estimate that hospitals with proprietary ownership will experience an increase of 1.6 percent in payments.

We estimate that the effect of paying for drugs acquired under the 340B program at ASP plus 6 percent and removing the increase to the conversion factor that was added in CY 2018 to implement the 340B payment policy in a budget neutral manner will have varying effects across different provider categories. We note that while urban hospitals are estimated to have a 1.2 percent increase in payments, rural hospitals overall are estimated to have a 1.0 percent decrease in payments as a result of these changes.

e. Impacts of the Final ASC Payment Update

For impact purposes, the surgical procedures on the ASC covered surgical procedure list are aggregated into surgical specialty groups using CPT and HCPCS code range definitions. The percentage change in estimated total payments by specialty groups under the CY 2023 payment rates, compared to estimated CY 2022 payment rates, generally ranges between an increase of 1 and 6 percent, depending on the service, with some exceptions. We estimate the impact of applying the hospital market basket update to ASC payment rates will increase payments by $230 million under the ASC payment system in CY 2023.

B. Legislative and Regulatory Authority for the Hospital OPPS

When Title XVIII of the Act was enacted, Medicare payment for hospital outpatient services was based on hospital-specific costs. In an effort to ensure that Medicare and its beneficiaries pay appropriately for services and to encourage more efficient delivery of care, the Congress mandated replacement of the reasonable cost-based payment methodology with a prospective payment system (PPS). The Balanced Budget Act of 1997 (BBA) (Pub. L. 105–33) added section 1833(t) to the Act, authorizing implementation of a PPS for hospital outpatient services. The OPPS was first implemented for services furnished on or after August 1, 2000. Implementing regulations for the OPPS are located at 42 CFR parts 410 and 419.

The Medicare, Medicaid, and SCHIP Balanced Budget Refinement Act of 1999 (BBRA) (Pub. L. 106–113) made major changes in the hospital OPPS. The following Acts made additional changes to the OPPS: the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (BIPA) (Pub. L. 106–554); the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) (Pub. L. 108–173); the Deficit Reduction Act of 2005 (DRA) (Pub. L. 109–171), enacted on February 8, 2006; the Medicare Improvements and Extension Act under Division B of Title I of the Tax Relief and Health Care Act of 2006 (MIEA–TRHCA) (Pub. L. 109–432), enacted on December 20, 2006; the Medicare, Medicaid, and SCHIP Extension Act of 2007 (MMSEA) (Pub. L. 110–173), enacted on December 29, 2007; the Medicare Improvements for Patients and Providers Act of 2008 (MIPPA) (Pub. L. 110–275), enacted on July 15, 2008; the Patient Protection and Affordable Care Act (Pub. L. 111–148), enacted on March 23, 2010, as amended by the Health Care and Education Reconciliation Act of 2010 (Pub. L. 111–152), enacted on March 30, 2010 (these two public laws are collectively known as the Affordable Care Act); the Medicare and Medicaid Extenders Act of 2010 (MMEA, Pub. L. 111–309); the Temporary Payroll Tax Cut Continuation Act of 2011 (TPTCCA, Pub. L. 112–78), enacted on December 23, 2011; the Middle Class Tax Relief and Job Creation Act of 2012 (MCTRJCA, Pub. L. 112–96), enacted on February 22, 2012; the American Taxpayer Relief Act of 2012 (Pub. L. 112–240), enacted January 2, 2013; the Pathway for SGR Reform Act of 2013 (Pub. L. 113–67) enacted on December

26, 2013; the Protecting Access to Medicare Act of 2014 (PAMA, Pub. L. 113–93), enacted on March 27, 2014; the Medicare Access and CHIP Reauthorization Act (MACRA) of 2015 (Pub. L. 114–10), enacted April 16, 2015; the Bipartisan Budget Act of 2015 (Pub. L. 114–74), enacted November 2, 2015; the Consolidated Appropriations Act, 2016 (Pub. L. 114–113), enacted on December 18, 2015, the 21st Century Cures Act (Pub. L. 114–255), enacted on December 13, 2016; the Consolidated Appropriations Act, 2018 (Pub. L. 115–141), enacted on March 23, 2018; the Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment for Patients and Communities Act (Pub. L. 115–271), enacted on October 24, 2018; the Further Consolidated Appropriations Act, 2020 (Pub. L. 116–94), enacted on December 20, 2019; the Coronavirus Aid, Relief, and Economic Security Act (Pub. L. 116–136), enacted on March 27, 2020; the Consolidated Appropriations Act, 2021 (Pub. L. 116–260), enacted on December 27, 2020; and the Inflation Reduction Act, 2022 (Pub. L. 117–169), enacted on August 16, 2022.

Under the OPPS, we generally pay for hospital Part B services on a rate-per-service basis that varies according to the APC group to which the service is assigned. We use the Healthcare Common Procedure Coding System (HCPCS) (which includes certain Current Procedural Terminology (CPT) codes) to identify and group the services within each APC. The OPPS includes payment for most hospital outpatient services, except those identified in section I.C of this final rule. Section 1833(t)(1)(B) of the Act provides for payment under the OPPS for hospital outpatient services designated by the Secretary (which includes partial hospitalization services furnished by CMHCs), and certain inpatient hospital services that are paid under Medicare Part B.

The OPPS rate is an unadjusted national payment amount that includes the Medicare payment and the beneficiary copayment. This rate is divided into a labor-related amount and a nonlabor-related amount. The labor-related amount is adjusted for area wage differences using the hospital inpatient wage index value for the locality in which the hospital or CMHC is located.

All services and items within an APC group are comparable clinically and with respect to resource use, as required by section 1833(t)(2)(B) of the Act. In accordance with section 1833(t)(2)(B) of the Act, subject to certain exceptions, items and services within an APC group cannot be considered comparable with respect to the use of resources if the highest median cost (or mean cost, if elected by the Secretary) for an item or service in the APC group is more than 2 times greater than the lowest median cost (or mean cost, if elected by the Secretary) for an item or service within the same APC group (referred to as the ''2 times rule''). In implementing this provision, we generally use the cost of the item or service assigned to an APC group.

For new technology items and services, special payments under the OPPS may be made in one of two ways. Section 1833(t)(6) of the Act provides for temporary additional payments, which we refer to as ''transitional pass-through payments,'' for at least 2 but not more than 3 years for certain drugs, biological agents, brachytherapy devices used for the treatment of cancer, and categories of other medical devices. For new technology services that are not eligible for transitional pass-through payments, and for which we lack sufficient clinical information and cost data to appropriately assign them to a clinical APC group, we have established special APC groups based on costs, which we refer to as New Technology APCs. These New Technology APCs are designated by cost bands which allow us to provide appropriate and consistent payment for designated new procedures that are not yet reflected in our claims data. Similar to pass-through payments, an assignment to a New Technology APC is temporary; that is, we retain a service within a New Technology APC until we acquire sufficient data to assign it to a clinically appropriate APC group.

C. Excluded OPPS Services and Hospitals

Section 1833(t)(1)(B)(i) of the Act authorizes the Secretary to designate the hospital outpatient services that are paid under the OPPS. While most hospital outpatient services are payable under the OPPS, section 1833(t)(1)(B)(iv) of the Act excludes payment for ambulance, physical and occupational therapy, and speech-language pathology services, for which payment is made under a fee schedule. It also excludes screening mammography, diagnostic mammography, and effective January 1, 2011, an annual wellness visit providing personalized prevention plan services. The Secretary exercises the authority granted under the statute to also exclude from the OPPS certain services that are paid under fee schedules or other payment systems. Such excluded services include, for example, the professional services of physicians and nonphysician practitioners paid under the Medicare Physician Fee Schedule (MPFS); certain laboratory services paid under the Clinical Laboratory Fee Schedule (CLFS); services for beneficiaries with end-stage renal disease (ESRD) that are paid under the ESRD prospective payment system; and services and procedures that require an inpatient stay that are paid under the hospital IPPS. In addition, section 1833(t)(1)(B)(v) of the Act does not include applicable items and services (as defined in subparagraph (A) of paragraph (21)) that are furnished on or after January 1, 2017 by an off-campus outpatient department of a provider (as defined in subparagraph (B) of paragraph (21)). We set forth the services that are excluded from payment under the OPPS in regulations at 42 CFR 419.22.

Under § 419.20(b) of the regulations, we specify the types of hospitals that are excluded from payment under the OPPS. These excluded hospitals are:

- Critical access hospitals (CAHs);
- Hospitals located in Maryland and paid under Maryland's All-Payer or Total Cost of Care Model;
- Hospitals located outside of the 50 States, the District of Columbia, and Puerto Rico; and
- Indian Health Service (IHS) hospitals.

D. Prior Rulemaking

On April 7, 2000, we published in the **Federal Register** a final rule with comment period (65 FR 18434) to implement a prospective payment system for hospital outpatient services. The hospital OPPS was first implemented for services furnished on or after August 1, 2000. Section 1833(t)(9)(A) of the Act requires the Secretary to review certain components of the OPPS, not less often than annually, and to revise the groups, the relative payment weights, and the wage and other adjustments to take into account changes in medical practices, changes in technology, the addition of new services, new cost data, and other relevant information and factors.

Since initially implementing the OPPS, we have published final rules in the **Federal Register** annually to implement statutory requirements and changes arising from our continuing experience with this system. These rules can be viewed on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices.html.*

E. Advisory Panel on Hospital Outpatient Payment (the HOP Panel or the Panel)

1. Authority of the Panel

Section 1833(t)(9)(A) of the Act, as amended by section 201(h) of Public Law 106–113, and redesignated by section 202(a)(2) of Public Law 106–113, requires that we consult with an expert outside advisory panel composed of an appropriate selection of representatives of providers to annually review (and advise the Secretary concerning) the clinical integrity of the payment groups and their weights under the OPPS. In CY 2000, based on section 1833(t)(9)(A) of the Act, the Secretary established the Advisory Panel on Ambulatory Payment Classification Groups (APC Panel) to fulfill this requirement. In CY 2011, based on section 222 of the Public Health Service Act (the PHS Act), which gives discretionary authority to the Secretary to convene advisory councils and committees, the Secretary expanded the panel's scope to include the supervision of hospital outpatient therapeutic services in addition to the APC groups and weights. To reflect this new role of the panel, the Secretary changed the panel's name to the Advisory Panel on Hospital Outpatient Payment (the HOP Panel or the Panel). The HOP Panel is not restricted to using data compiled by CMS, and in conducting its review, it may use data collected or developed by organizations outside the Department.

2. Establishment of the Panel

On November 21, 2000, the Secretary signed the initial charter establishing the Panel, and, at that time, named the APC Panel. This expert panel is composed of appropriate representatives of providers (currently employed full-time, not as consultants, in their respective areas of expertise) who review clinical data and advise CMS about the clinical integrity of the APC groups and their payment weights. Since CY 2012, the Panel also is charged with advising the Secretary on the appropriate level of supervision for individual hospital outpatient therapeutic services. The Panel is technical in nature, and it is governed by the provisions of the Federal Advisory Committee Act (FACA). The current charter specifies, among other requirements, that the Panel—

- May advise on the clinical integrity of Ambulatory Payment Classification (APC) groups and their associated weights;
- May advise on the appropriate supervision level for hospital outpatient services;
- May advise on OPPS APC rates for ASC covered surgical procedures;
- Continues to be technical in nature;
- Is governed by the provisions of the FACA;
- Has a Designated Federal Official (DFO); and
- Is chaired by a Federal Official designated by the Secretary.

The Panel's charter was amended on November 15, 2011, renaming the Panel and expanding the Panel's authority to include supervision of hospital outpatient therapeutic services and to add critical access hospital (CAH) representation to its membership. The Panel's charter was also amended on November 6, 2014 (80 FR 23009), and the number of members was revised from up to 19 to up to 15 members. The Panel's current charter was approved on November 20, 2020, for a 2-year period.

The current Panel membership and other information pertaining to the Panel, including its charter, **Federal Register** notices, membership, meeting dates, agenda topics, and meeting reports, can be viewed on the CMS website at: *https://www.cms.gov/Regulations-and-Guidance/Guidance/FACA/AdvisoryPanelonAmbulatoryPaymentClassificationGroups.html.*

3. Panel Meetings and Organizational Structure

The Panel has held many meetings, with the last meeting taking place on August 22, 2022. Prior to each meeting, we publish a notice in the **Federal Register** to announce the meeting, new members, and any other changes of which the public should be aware. Beginning in CY 2017, we have transitioned to one meeting per year (81 FR 31941). In CY 2018, we published a **Federal Register** notice requesting nominations to fill vacancies on the Panel (83 FR 3715). CMS is currently accepting nominations at: *https://mearis.cms.gov.* In addition, the Panel has established an administrative structure that, in part, currently includes the use of three subcommittee workgroups to provide preparatory meeting and subject support to the larger panel. The three current subcommittees include the following:

- APC Groups and Status Indicator Assignments Subcommittee, which advises and provides recommendations to the Panel on the appropriate status indicators to be assigned to HCPCS codes, including but not limited to whether a HCPCS code or a category of codes should be packaged or separately paid, as well as the appropriate APC assignment of HCPCS codes regarding services for which separate payment is made;
- Data Subcommittee, which is responsible for studying the data issues confronting the Panel and for recommending options for resolving them; and
- Visits and Observation Subcommittee, which reviews and makes recommendations to the Panel on all technical issues pertaining to observation services and hospital outpatient visits paid under the OPPS.

Each of these workgroup subcommittees was established by a majority vote from the full Panel during a scheduled Panel meeting, and the Panel recommended at the August 22, 2022, meeting that the subcommittees continue. We accepted this recommendation.

For discussions of earlier Panel meetings and recommendations, we refer readers to previously published OPPS/ASC proposed and final rules, the CMS website mentioned earlier in this section, and the FACA database at *https://facadatabase.gov.*

Comment: One commenter requested that CMS include at least one representative from the ASC community in the membership of the advisory Panel. The commenter explained that decisions regarding the clinical integrity of payment groups and relative payment weights impact ASC payments and, therefore, are of critical importance to ASCs.

Response: We thank the commenter for their suggestion. This expert panel is composed of appropriate representatives of providers (currently employed full-time by hospitals or hospital systems, not as consultants, in their respective areas of expertise) who review clinical data and advise CMS about the clinical integrity of the APC groups and their payment weights. Beginning in 2019, the Panel may also include a representative of a provider with ASC expertise, who advises CMS only on OPPS APC rates, as appropriate, impacting ASC covered procedures within the context and purview of the Panel's scope. Interested individuals, including those with relevant ASC expertise, are encouraged to apply to serve on the Panel. Nominations for the Panel are currently being accepted in the new electronic application system, Medicare Electronic Application Request Information System™ (MEARIS). Interested individuals may submit nominations for themselves or others on *https://mearis.cms.gov.*

F. Public Comments Received on the CY 2023 OPPS/ASC Proposed Rule

We received approximately 1,599 timely pieces of correspondence on the CY 2023 OPPS/ASC proposed rule that appeared in the **Federal Register** on July 27, 2022 (87 FR 44502) from individuals, elected officials, providers and suppliers, practitioners, and advocacy groups. We provide summaries of the public comments and our responses are set forth in the various sections of this final rule with comment period under the appropriate headings.

G. Public Comments Received on the CY 2022 OPPS/ASC Final Rule With Comment Period

We received approximately 13 timely pieces of correspondence on the CY 2022 OPPS/ASC final rule with comment period that appeared in the **Federal Register** on November 16, 2021 (86 FR 63458).

II. Updates Affecting OPPS Payments

A. Recalibration of APC Relative Payment Weights

1. Database Construction

a. Use of CY 2021 Data in the CY 2023 OPPS Ratesetting

We primarily use two data sources in OPPS ratesetting: claims data and cost report data. Our goal is always to use the best available data overall for ratesetting. Ordinarily, the best available full year of claims data would be the data from the year 2 years prior to the calendar year that is the subject of the rulemaking. As discussed in section X.D of the CY 2023 OPPS/ASC proposed rule (87 FR 44680 through 44682), unlike CY 2020 claims data, we do not believe there are overwhelming concerns with CY 2021 claims data as a result of the COVID–19 PHE. Therefore, as discussed in further detail in section X.B. of this final rule with comment period, we are finalizing our proposal to use CY 2021 claims data and the data components related to it in establishing the CY 2023 OPPS.

b. Database Source and Methodology

Section 1833(t)(9)(A) of the Act requires that the Secretary review not less often than annually and revise the relative payment weights for Ambulatory Payment Classifications (APCs). In the April 7, 2000 OPPS final rule with comment period (65 FR 18482), we explained in detail how we calculated the relative payment weights that were implemented on August 1, 2000 for each APC group.

For the CY 2023 OPPS, we proposed to recalibrate the APC relative payment weights for services furnished on or after January 1, 2023, and before January 1, 2024 (CY 2023), using the same basic methodology that we described in the CY 2022 OPPS/ASC final rule with comment period (86 FR 63466), using CY 2021 claims data. That is, we proposed to recalibrate the relative payment weights for each APC based on claims and cost report data for hospital outpatient department (HOPD) services to construct a database for calculating APC group weights.

For the purpose of recalibrating the proposed APC relative payment weights for CY 2023, we began with approximately 180 million final action claims (claims for which all disputes and adjustments have been resolved and payment has been made) for HOPD services furnished on or after January 1, 2021, and before January 1, 2022, before applying our exclusionary criteria and other methodological adjustments. After the application of those data processing changes, we used approximately 93 million final action claims to develop the proposed CY 2023 OPPS payment weights. For exact numbers of claims used and additional details on the claims accounting process, we refer readers to the claims accounting narrative under supporting documentation for the CY 2023 OPPS/ASC proposed rule on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html.*

Addendum N to the CY 2023 OPPS/ASC proposed rule (which is available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Feefor-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices.html*) includes the proposed list of bypass codes for CY 2023. The proposed list of bypass codes contains codes that are reported on claims for services in CY 2021 and, therefore, includes codes that were in effect in CY 2021 and used for billing. We proposed to retain deleted bypass codes on the proposed CY 2023 bypass list because these codes existed in CY 2021 and were covered OPD services in that period, and CY 2021 claims data were used to calculate proposed CY 2023 payment rates. Keeping these deleted bypass codes on the bypass list potentially allows us to create more ''pseudo'' single procedure claims for ratesetting purposes. ''Overlap bypass codes'' that are members of the proposed multiple imaging composite APCs are identified by asterisks (*) in the third column of Addendum N to the CY 2023 OPPS/ASC proposed rule. HCPCS codes that we proposed to add for CY 2023 are identified by asterisks (*) in the fourth column of Addendum N.

We did not receive any public comments on our general proposal to recalibrate the relative payment weights for each APC based on claims and cost report data for HOPD services or on our proposed bypass code process. We are adopting as final the proposed ''pseudo'' single claims process and the final CY 2023 list of bypass codes, as displayed in Addendum N to this final rule with comment period (which is available via the internet on the CMS website). For this final rule with comment period, for the purpose of recalibrating the final APC relative payment weights for CY 2023, we used approximately 93 million final actions claims (claims for which all disputes and adjustments have been resolved and payment has been made) for HOPD services furnished on or after January 1, 2021, and before January 1, 2022. For exact numbers of claims used and additional details on the claims accounting process, we refer readers to the claims accounting narrative under supporting documentation for this final rule with comment period on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html.*

c. Calculation and Use of Cost-to-Charge Ratios (CCRs)

For CY 2023, we proposed to continue to use the hospital-specific overall ancillary and departmental cost-to-charge ratios (CCRs) to convert charges to estimated costs through application of a revenue code-to-cost center crosswalk. However, roughly half of the cost reports we would typically use for CY 2023 ratesetting purposes are from cost reporting periods that overlap with parts of CY 2020. When utilizing this cost report data, more than half of the APC geometric mean costs increased by more than 10 percent relative to estimates based on prior ratesetting cycles. While some of this increase may be attributable to changes that will continue into CY 2023, other aspects of those changes may be more specific to the COVID–19 PHE. In the CY 2022 OPPS/ASC final rule with comment period (86 FR 63751 through 63754), we described how CY 2020 claims data were too influenced by the COVID–19 PHE to be utilized for setting CY 2022 OPPS payment rates. After reviewing the cost report data from the December 2021 HCRIS data set, we believed cost report data that overlap with CY 2020 are also too influenced by the COVID–19 PHE for purposes of calculating the CY 2023 OPPS payment rates.

Therefore, in order to mitigate the impact on our ratesetting process from the COVID–19 PHE effects in the CY 2020 cost report data we would typically use for this CY 2023 OPPS/ASC proposed rule, we proposed to use cost report data from the June 2020 HCRIS data set, which only includes cost report data through CY 2019, for CY 2023 OPPS/ASC ratesetting purposes. We discuss this proposal, the public comments we received, as well as our final policy in Section X.B. of this final rule with comment period.

To calculate the APC costs on which the CY 2023 APC payment rates are based, we proposed to calculate hospital-specific overall ancillary CCRs and hospital-specific departmental CCRs for each hospital for which we had CY 2021 claims data by comparing these claims data to hospital cost reports available for the CY 2022 OPPS/ASC final rule with comment period ratesetting, which, in most cases, are from CY 2019. For the proposed CY 2023 OPPS payment rates, we proposed to use CY 2021 claims processed through December 31, 2021. We applied the hospital-specific CCR to the hospital's charges at the most detailed level possible, based on a revenue code-to-cost center crosswalk that contains a hierarchy of CCRs used to estimate costs from charges for each revenue code. To ensure the completeness of the revenue code-to-cost center crosswalk, we reviewed changes to the list of revenue codes for CY 2021 (the year of claims data we used to calculate the proposed CY 2023 OPPS payment rates) and updates to the National Uniform Billing Committee (NUBC) 2020 Data Specifications Manual. That crosswalk is available for review and continuous comment on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html.*

Comment: One commenter requested that we revise our revenue code-to-cost center crosswalk to provide consistency with the National Uniform Billing Committee (NUBC) definitions and to improve the accuracy of cost data for OPPS ratesetting with respect to chimeric antigen receptor therapy (CAR–T) administration services. The commenter suggested the following changes:

- Revising revenue code 0871 from Reserved to describe ''cell collection'' and that revenue code 0871 be mapped to a primary cost center 6000 for clinic;
- Revising revenue codes 0872 and 0873 from Reserved to describe ''cell processing'' and remapping revenue codes 0872 and 0873 to a primary cost center 3350 for laboratory/hematology;
- Map revenue codes 0874 or 0875 to cost center 4800 for intravenous therapy in the revenue code-to-cost center crosswalk;
- Map revenue code 089x series to cost center 5600 (drugs charged to patients), or, at the very least, only map revenue codes 0891 and 0892 to cost center 5600.

Response: We appreciate the commenter's recommendation for changes to our revenue code-to-cost center crosswalk. While we believe the current APC assignment and payment rate for CPT code 0540T (Chimeric antigen receptor t-cell (car-t) therapy; car-t cell administration, autologous) is appropriate, we intend to explore the implications of the commenter's recommendation further and may revisit these changes in future rulemaking.

In accordance with our longstanding policy, we proposed to calculate CCRs for the standard cost centers—cost centers with a predefined label—and nonstandard cost centers—cost centers defined by a hospital—accepted by the electronic cost report database. In general, the most detailed level at which we calculate CCRs is the hospital-specific departmental level. Additionally, we have historically not included cost report lines for certain nonstandard cost centers in the OPPS ratesetting database construction when hospitals have reported these nonstandard cost centers on cost report lines that do not correspond to the cost center number. We have determined that hospitals are routinely reporting a number of nonstandard cost centers in this way and that including this additional data could significantly reduce certain APC geometric mean costs. In particular, we estimate that the additional cost data from nonstandard cost centers would decrease the geometric mean cost of APC 8004 (Ultrasound Composite) by 20 percent, APC 5863 (Partial Hospitalizations (3 or more services) for hospital-based PHPs) by 12 percent and APC 5573 (Level 3 Imaging with Contrast) by 11 percent. In other instances, we note that there are also potential increases in the geometric mean costs of certain APCs, such as APC 5741 (Level 1 Electronic Analysis of Devices), which would increase by 4 percent, APC 5723 (Level 3 Diagnostic Tests and Related Services), which would increase by 2.6 percent, and APC 5694 (Level 4 Drug Administration), which would increase by 2.3 percent.

While we generally view the use of additional cost data as improving our OPPS ratesetting process, we have historically not included cost report lines for certain nonstandard cost centers in the OPPS ratesetting database construction when hospitals have reported these nonstandard cost centers on cost report lines that do not correspond to the cost center number. Additionally, we are concerned about the significant changes in APC geometric mean costs that our analysis indicates would occur if we were to include such lines. We believe it is important to further investigate the accuracy of these cost report data before including such data in the ratesetting process. Further, we believe it is appropriate to gather additional information from the public as well before including them in OPPS ratesetting. For CY 2023, we proposed not to include the nonstandard cost centers reported in this way in the OPPS ratesetting database construction. We solicited comment on whether there exist any specific concerns with regards to the accuracy of the data from these nonstandard cost center lines that we would need to consider before including them in future OPPS ratesetting.

For a discussion of the hospital-specific overall ancillary CCR calculation, we refer readers to the CY 2007 OPPS/ASC final rule with comment period (71 FR 67983 through 67985). The calculation of blood costs is a longstanding exception (since the CY 2005 OPPS) to this general methodology for calculation of CCRs used for converting charges to costs on each claim. This exception is discussed in detail in the CY 2007 OPPS/ASC final rule with comment period and discussed further in section II.A.2.a.(1) of this final rule with comment period.

Comment: One commenter supported our proposal and recommended that we not use current nonstandard lines in determining OPPS payment rates for CY 2023 without further understanding of the revenues and expenses going into those nonstandard lines.

Response: We thank the commenter for their support. While we did not receive any specific concerns from commenters with regards to the data from these nonstandard cost center lines, we agree that additional context for and analyses into these nonstandard lines would be beneficial before including them in OPPS ratesetting.

After consideration of the public comment we received, we are finalizing our proposal, without modification, not to include nonstandard cost centers on cost report lines that do not correspond to the cost center number.

2. Final Data Development and Calculation of Costs Used for Ratesetting

In this section of this final rule with comment period, we discuss the use of claims to calculate the OPPS payment

rates for CY 2023. The Hospital OPPS page on the CMS website on which this final rule with comment period is posted (*https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html*) provides an accounting of claims used in the development of the proposed payment rates. That accounting provides additional detail regarding the number of claims derived at each stage of the process. In addition, later in this section we discuss the file of claims that comprises the data set that is available upon payment of an administrative fee under a CMS data use agreement. The CMS website, *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html,* includes information about obtaining the ''OPPS Limited Data Set,'' which now includes the additional variables previously available only in the OPPS Identifiable Data Set, including ICD–10–CM diagnosis codes and revenue code payment amounts. This file is derived from the CY 2021 claims that are used to calculate the proposed payment rates for the final rule with comment period.

Previously, the OPPS established the scaled relative weights on which payments are based using APC median costs, a process described in the CY 2012 OPPS/ASC final rule with comment period (76 FR 74188). However, as discussed in more detail in section II.A.2.f of the CY 2013 OPPS/ASC final rule with comment period (77 FR 68259 through 68271), we finalized the use of geometric mean costs to calculate the relative weights on which the CY 2013 OPPS payment rates were based. While this policy changed the cost metric on which the relative payments are based, the data process in general remained the same under the methodologies that we used to obtain appropriate claims data and accurate cost information in determining estimated service cost.

We used the methodology described in sections II.A.2.a through II.A.2.c of this final rule with comment period to calculate the costs we used to establish the proposed relative payment weights used in calculating the OPPS payment rates for CY 2023 shown in Addenda A and B to this final rule with comment period (which are available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Feefor-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices.html*). We refer readers to section II.A.4 of this final rule with comment period for a discussion of the conversion of APC costs to scaled payment weights.

We note that under the OPPS, CY 2019 was the first year in which the claims data used for setting payment rates (CY 2017 data) contained lines with the modifier ''PN'', which indicates nonexcepted items and services furnished and billed by off-campus provider-based departments (PBDs) of hospitals. Because nonexcepted items and services are not paid under the OPPS, in the CY 2019 OPPS/ASC final rule with comment period (83 FR 58832), we finalized a policy to remove those claim lines reported with modifier ''PN'' from the claims data used in ratesetting for the CY 2019 OPPS and subsequent years. For the CY 2023 OPPS, we will continue to remove claim lines with modifier ''PN'' from the ratesetting process.

For details of the claims accounting process used in this final rule with comment period, we refer readers to the claims accounting narrative under supporting documentation for this final rule with comment period on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html.*

a. Calculation of Single Procedure APC Criteria-Based Costs

(1) Blood and Blood Products

Since the implementation of the OPPS in August 2000, we have made separate payments for blood and blood products through APCs rather than packaging payment for them into payments for the procedures with which they are administered. Hospital payments for the costs of blood and blood products, as well as for the costs of collecting, processing, and storing blood and blood products, are made through the OPPS payments for specific blood product APCs.

We proposed in the CY 2023 OPPS/ASC proposed rule to continue to establish payment rates for blood and blood products using our blood-specific CCR methodology, which utilizes actual or simulated CCRs from the most recently available hospital cost reports to convert hospital charges for blood and blood products to costs. This methodology has been our standard ratesetting methodology for blood and blood products since CY 2005. It was developed in response to data analysis indicating that there was a significant difference in CCRs for those hospitals with and without blood-specific cost centers, and past public comments indicating that the former OPPS policy of defaulting to the overall hospital CCR for hospitals not reporting a blood-specific cost center often resulted in an underestimation of the true hospital costs for blood and blood products. Specifically, to address the differences in CCRs and to better reflect hospitals' costs, we proposed to continue to simulate blood CCRs for each hospital that does not report a blood cost center by calculating the ratio of the blood-specific CCRs to hospitals' overall CCRs for those hospitals that do report costs and charges for blood cost centers. We also proposed to apply this mean ratio to the overall CCRs of hospitals not reporting costs and charges for blood cost centers on their cost reports to simulate blood-specific CCRs for those hospitals. We proposed to calculate the costs upon which the proposed CY 2023 payment rates for blood and blood products are based using the actual blood-specific CCR for hospitals that reported costs and charges for a blood cost center and a hospital-specific, simulated, blood-specific CCR for hospitals that did not report costs and charges for a blood cost center.

We continue to believe that the hospital-specific, simulated, blood-specific CCR methodology better responds to the absence of a blood-specific CCR for a hospital than alternative methodologies, such as defaulting to the overall hospital CCR or applying an average blood-specific CCR across hospitals. Because this methodology takes into account the unique charging and cost accounting structure of each hospital, we believe that it yields more accurate estimated costs for these products. We continue to believe that using this methodology in CY 2023 would result in costs for blood and blood products that appropriately reflect the relative estimated costs of these products for hospitals without blood cost centers and, therefore, for these blood products in general.

We note that we defined a comprehensive APC (C–APC) as a classification for the provision of a primary service and all adjunctive services provided to support the delivery of the primary service. Under this policy, we include the costs of blood and blood products when calculating the overall costs of these C–APCs. We proposed to continue to apply the blood-specific CCR methodology described in this section when calculating the costs of the blood and blood products that appear on claims with services assigned to the C–APCs. Because the costs of blood and blood products would be reflected in the overall costs of the C–APCs (and, as a result, in the proposed payment rates of the C–APCs), we proposed not to make

separate payments for blood and blood products when they appear on the same claims as services assigned to the C–APCs (we refer readers to the CY 2015 OPPS/ASC final rule with comment period (79 FR 66795 through 66796) for more information about our policy not to make separate payments for blood and blood products when they appear on the same claims as services assigned to a C–APC).

We refer readers to Addendum B to the CY 2023 OPPS/ASC proposed rule (which is available via the internet on the CMS website) for the proposed CY 2023 payment rates for blood and blood products (which are generally identified with status indicator ''R''). For a more detailed discussion of the blood-specific CCR methodology, we refer readers to the CY 2005 OPPS proposed rule (69 FR 50524 through 50525). For a full history of OPPS payment for blood and blood products, we refer readers to the CY 2008 OPPS/ASC final rule with comment period (72 FR 66807 through 66810).

For CY 2023, we proposed to continue to establish payment rates for blood and blood products using our blood-specific CCR methodology. We did not receive any comments on our proposal to establish payment rates for blood and blood products using our blood-specific CCR methodology and we are finalizing this policy as proposed. Please refer to Addendum B to this final rule with comment period (which is available via the internet on the CMS website) for the final CY 2023 payment rates for blood and blood products.

(2) Brachytherapy Sources

Section 1833(t)(2)(H) of the Act mandates the creation of additional groups of covered OPD services that classify devices of brachytherapy—cancer treatment through solid source radioactive implants—consisting of a seed or seeds (or radioactive source) (''brachytherapy sources'') separately from other services or groups of services. The statute provides certain criteria for the additional groups. For the history of OPPS payment for brachytherapy sources, we refer readers to prior OPPS final rules, such as the CY 2012 OPPS/ASC final rule with comment period (77 FR 68240 through 68241). As we have stated in prior OPPS updates, we believe that adopting the general OPPS prospective payment methodology for brachytherapy sources is appropriate for a number of reasons (77 FR 68240). The general OPPS methodology uses costs based on claims data to set the relative payment weights for hospital outpatient services. This payment methodology results in more consistent, predictable, and equitable payment amounts per source across hospitals by averaging the extremely high and low values, in contrast to payment based on hospitals' charges adjusted to costs. We believe that the OPPS methodology, as opposed to payment based on hospitals' charges adjusted to cost, also would provide hospitals with incentives for efficiency in the provision of brachytherapy services to Medicare beneficiaries. Moreover, this approach is consistent with our payment methodology for the vast majority of items and services paid under the OPPS. We refer readers to the CY 2016 OPPS/ASC final rule with comment period (80 FR 70323 through 70325) for further discussion of the history of OPPS payment for brachytherapy sources.

For CY 2023, except where otherwise indicated, we proposed to use the costs derived from CY 2021 claims data to set the proposed CY 2023 payment rates for brachytherapy sources because CY 2021 is the year of data we proposed to use to set the proposed payment rates for most other items and services that would be paid under the CY 2023 OPPS. With the exception of the proposed payment rate for brachytherapy source C2645 (Brachytherapy planar source, palladium-103, per square millimeter) and the proposed payment rates for low-volume brachytherapy APCs discussed in section III.D of the CY 2023 OPPS/ASC proposed rule (87 FR 44568 through 44569), we proposed to base the payment rates for brachytherapy sources on the geometric mean unit costs for each source, consistent with the methodology that we propose for other items and services paid under the OPPS, as discussed in section II.A.2. of the CY 2023 OPPS/ASC proposed rule (87 FR 44512 through 44513). We also proposed to continue the other payment policies for brachytherapy sources that we finalized and first implemented in the CY 2010 OPPS/ASC final rule with comment period (74 FR 60537). We proposed to pay for the stranded and nonstranded not otherwise specified (NOS) codes, HCPCS codes C2698 (Brachytherapy source, stranded, not otherwise specified, per source) and C2699 (Brachytherapy source, non-stranded, not otherwise specified, per source), at a rate equal to the lowest stranded or nonstranded prospective payment rate for such sources, respectively, on a per-source basis (as opposed to, for example, per mCi), which is based on the policy we established in the CY 2008 OPPS/ASC final rule with comment period (72 FR 66785). We also proposed to continue the policy we first implemented in the CY 2010 OPPS/ASC final rule with comment period (74 FR 60537) regarding payment for new brachytherapy sources for which we have no claims data, based on the same reasons we discussed in the CY 2008 OPPS/ASC final rule with comment period (72 FR 66786; which was delayed until January 1, 2010, by section 142 of Pub. L. 110–275). Specifically, this policy is intended to enable us to assign new HCPCS codes for new brachytherapy sources to their own APCs, with prospective payment rates set based on our consideration of external data and other relevant information regarding the expected costs of the sources to hospitals. The proposed CY 2023 payment rates for brachytherapy sources are included on Addendum B to the CY 2023 OPPS/ASC proposed rule (which is available via the internet on the CMS website) and identified with status indicator ''U''.

For CY 2018, we assigned status indicator ''U'' (Brachytherapy Sources, Paid under OPPS; separate APC payment) to HCPCS code C2645 (Brachytherapy planar source, palladium-103, per square millimeter) in the absence of claims data and established a payment rate using external data (invoice price) at $4.69 per mm^2. For CY 2019, in the absence of sufficient claims data, we continued to establish a payment rate for C2645 at $4.69 per mm^2. Our CY 2018 claims data available for the CY 2020 OPPS/ASC final rule with comment period included two claims with a geometric mean cost for HCPCS code C2645 of $1.02 per mm^2. In response to comments from interested parties, we agreed that, given the limited claims data available and a new outpatient indication for C2645, a payment rate for HCPCS code C2645 based on the geometric mean cost of $1.02 per mm^2 may not adequately reflect the cost of HCPCS code C2645. In the CY 2020 OPPS/ASC final rule with comment period, we finalized our policy to use our equitable adjustment authority under section 1833(t)(2)(E) of the Act, which states that the Secretary shall establish, in a budget neutral manner, other adjustments as determined to be necessary to ensure equitable payments, to maintain the CY 2019 payment rate of $4.69 per mm^2 for HCPCS code C2645 for CY 2020. Similarly, in the absence of sufficient claims data to establish an APC payment rate, in the CY 2021 and CY 2022 OPPS/ASC final rules (85 FR 85879 through 85880 and 86 FR 63469) with comment period, we finalized our policy to use our equitable

adjustment authority under section 1833(t)(2)(E) of the Act to maintain the CY 2019 payment rate of $4.69 per mm² for HCPCS code C2645 for CY 2021 and for CY 2022.

We did not receive any CY 2021 claims data for HCPCS code C2645. Therefore, we proposed to use our equitable adjustment authority under section 1833(t)(2)(E) of the Act to maintain the CY 2019 payment rate of $4.69 per mm² for HCPCS code C2645 for CY 2023.

Additionally, for CY 2022 and subsequent calendar years, we adopted a Universal Low Volume APC policy for clinical and brachytherapy APCs. As discussed in further detail in section X.C of the CY 2022 OPPS/ASC final rule with comment period (86 FR 63743 through 63747), we adopted this policy to mitigate wide variation in payment rates that occur from year to year for APCs with low utilization. Such volatility in payment rates from year to year can result in even lower utilization and potential barriers to access. For these Low Volume APCs, which had fewer than 100 CY 2021 single claims used for ratesetting purposes in the CY 2023 OPPS/ASC proposed rule, we used up to four years of claims data to establish a payment rate for each item or service as we historically have done for low volume services assigned to New Technology APCs. Further, we calculated the cost for Low Volume APCs based on the greatest of the arithmetic mean cost, median cost, or geometric mean cost using all claims for the APC for up to four years. For CY 2023, we proposed to designate 4 brachytherapy APCs as Low Volume APCs as these APCs meet our criteria to be designated as a Low Volume APC. For more information on the brachytherapy APCs we proposed to designate as Low Volume APCs, see section III.D of the CY 2023 OPPS/ASC proposed rule (87 FR 44568 through 44569). In section III.D. of this final rule with comment period, we are finalizing our proposal to designate four brachytherapy APCs as Low Volume APCs for CY 2023.

Comment: One commenter supported our proposal to use our equitable adjustment authority under section 1833(t)(2)(E) of the Act to maintain the CY 2019 payment rate of $4.69 per mm² for HCPCS code C2645 for CY 2023.

Response: We thank the commenter for their support of our proposal.

After consideration of the public comment we received, we are finalizing our proposal, without modification, to use our equitable adjustment authority under section 1833(t)(2)(E) of the Act to maintain the CY 2019 payment rate of $4.69 per mm² for HCPCS code C2645 for CY 2023. Additionally, we are finalizing our proposal to continue to set the payment rates for other brachytherapy sources that are not otherwise assigned to designated Low Volume APCs for CY 2023 using our established prospective payment methodology.

The final CY 2023 payment rates for brachytherapy sources are included in Addendum B to this final rule with comment period (which is available via the internet on the CMS website) and are identified with status indicator ''U''.

We continue to invite interested parties to submit recommendations for new codes to describe new brachytherapy sources. Such recommendations should be directed via email to *outpatientpps@cms.hhs.gov* or by mail to the Division of Outpatient Care, Mail Stop C4–01–26, Centers for Medicare and Medicaid Services, 7500 Security Boulevard, Baltimore, MD 21244. We will continue to add new brachytherapy source codes and descriptors to our systems for payment on a quarterly basis.

b. Comprehensive APCs (C–APCs) for CY 2023

(1) Background

In the CY 2014 OPPS/ASC final rule with comment period (78 FR 74861 through 74910), we finalized a comprehensive payment policy that packages payment for adjunctive and secondary items, services, and procedures into the most costly primary procedure under the OPPS at the claim level. The policy was finalized in CY 2014 but the effective date was delayed until January 1, 2015, to allow additional time for further analysis, opportunity for public comment, and systems preparation. The comprehensive APC (C–APC) policy was implemented effective January 1, 2015, with modifications and clarifications in response to public comments received regarding specific provisions of the C–APC policy (79 FR 66798 through 66810).

A C–APC is defined as a classification for the provision of a primary service and all adjunctive services provided to support the delivery of the primary service. We established C–APCs as a category broadly for OPPS payment and implemented 25 C–APCs beginning in CY 2015 (79 FR 66809 through 66810). We have gradually added new C–APCs since the policy was implemented beginning in CY 2015, with the number of C–APCs now totaling 69 (80 FR 70332; 81 FR 79584 through 79585; 83 FR 58844 through 58846; 84 FR 61158 through 61166; 85 FR 85885; and 86 FR 63474).

Under our C–APC policy, we designate a service described by a HCPCS code assigned to a C–APC as the primary service when the service is identified by OPPS status indicator ''J1''. When such a primary service is reported on a hospital outpatient claim, taking into consideration the few exceptions that are discussed below, we make payment for all other items and services reported on the hospital outpatient claim as being integral, ancillary, supportive, dependent, and adjunctive to the primary service (hereinafter collectively referred to as ''adjunctive services'') and representing components of a complete comprehensive service (78 FR 74865 and 79 FR 66799). Payments for adjunctive services are packaged into the payments for the primary services. This results in a single prospective payment for each of the primary, comprehensive services based on the costs of all reported services at the claim level. One example of a primary service would be a partial mastectomy and an example of a secondary service packaged into that primary service would be a radiation therapy procedure.

Services excluded from the C–APC policy under the OPPS include services that are not covered OPD services, services that cannot by statute be paid for under the OPPS, and services that are required by statute to be separately paid. This includes certain mammography and ambulance services that are not covered OPD services in accordance with section 1833(t)(1)(B)(iv) of the Act; brachytherapy seeds, which also are required by statute to receive separate payment under section 1833(t)(2)(H) of the Act; pass-through payment drugs and devices, which also require separate payment under section 1833(t)(6) of the Act; self-administered drugs (SADs) that are not otherwise packaged as supplies because they are not covered under Medicare Part B under section 1861(s)(2)(B) of the Act; and certain preventive services (78 FR 74865 and 79 FR 66800 through 66801). A list of services excluded from the C–APC policy is included in Addendum J to this final rule with comment period (which is available via the internet on the CMS website at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices*). If a service does not appear on this list of excluded services, payment for it will be packaged into the payment for the primary C–APC service when it appears

on an outpatient claim with a primary C–APC service.

In the interim final rule with request for comments (IFC) titled ''Additional Policy and Regulatory Revisions in Response to the COVID–19 Public Health Emergency'', published on November 6, 2020, we stated that, effective for services furnished on or after the effective date of the IFC and until the end of the PHE for COVID–19, there is an exception to the OPPS C–APC policy to ensure separate payment for new COVID–19 treatments that meet certain criteria (85 FR 71158 through 71160). Under this exception, any new COVID–19 treatment that meets the following two criteria will, for the remainder of the PHE for COVID–19, always be separately paid and will not be packaged into a C–APC when it is provided on the same claim as the primary C–APC service. First, the treatment must be a drug or biological product (which could include a blood product) authorized to treat COVID–19, as indicated in section ''I. Criteria for Issuance of Authorization'' of the Food and Drug Administration (FDA) letter of authorization for the emergency use of the drug or biological product, or the drug or biological product must be approved by FDA for treating COVID–19. Second, the emergency use authorization (EUA) for the drug or biological product (which could include a blood product) must authorize the use of the product in the outpatient setting or not limit its use to the inpatient setting, or the product must be approved by FDA to treat COVID–19 disease and not limit its use to the inpatient setting. For further information regarding the exception to the C–APC policy for COVID–19 treatments, please refer to the November 6, 2020 IFC (85 FR 71158 through 71160). Please see section XXIII.C. for additional details regarding our finalized policy, which will end when the PHE ends.

The C–APC policy payment methodology set forth in the CY 2014 OPPS/ASC final rule with comment period and modified and implemented beginning in CY 2015 is summarized as follows (78 FR 74887 and 79 FR 66800):

Basic Methodology. As stated in the CY 2015 OPPS/ASC final rule with comment period, we define the C–APC payment policy as including all covered OPD services on a hospital outpatient claim reporting a primary service that is assigned to status indicator ''J1'',[1] excluding services that are not covered OPD services or that cannot by statute be paid for under the OPPS. Services and procedures described by HCPCS codes assigned to status indicator ''J1'' are assigned to C–APCs based on our usual APC assignment methodology by evaluating the geometric mean costs of the primary service claims to establish resource similarity and the clinical characteristics of each procedure to establish clinical similarity within each APC.

In the CY 2016 OPPS/ASC final rule with comment period, we expanded the C–APC payment methodology to qualifying extended assessment and management encounters through the ''Comprehensive Observation Services'' C–APC (C–APC 8011). Services within this APC are assigned status indicator ''J2''.[2] Specifically, we make a payment through C–APC 8011 for a claim that:

- Does not contain a procedure described by a HCPCS code to which we have assigned status indicator ''T'';
- Contains 8 or more units of services described by HCPCS code G0378 (Hospital observation services, per hour);
- Contains services provided on the same date of service or one day before the date of service for HCPCS code G0378 that are described by one of the following codes: HCPCS code G0379 (Direct admission of patient for hospital observation care) on the same date of service as HCPCS code G0378; CPT code 99281 (Emergency department visit for the evaluation and management of a patient (Level 1)); CPT code 99282 (Emergency department visit for the evaluation and management of a patient (Level 2)); CPT code 99283 (Emergency department visit for the evaluation and management of a patient (Level 3)); CPT code 99284 (Emergency department visit for the evaluation and management of a patient (Level 4)); CPT code 99285 (Emergency department visit for the evaluation and management of a patient (Level 5)) or HCPCS code G0380 (Type B emergency department visit (Level 1)); HCPCS code G0381 (Type B emergency department visit (Level 2)); HCPCS code G0382 (Type B emergency department visit (Level 3)); HCPCS code G0383 (Type B emergency department visit (Level 4)); HCPCS code G0384 (Type B emergency department visit (Level 5)); CPT code 99291 (Critical care, evaluation and management of the critically ill or critically injured patient; first 30–74 minutes); or HCPCS code G0463 (Hospital outpatient clinic visit for assessment and management of a patient); and
- Does not contain services described by a HCPCS code to which we have assigned status indicator ''J1''.

The assignment of status indicator ''J2'' to a specific set of services performed in combination with each other allows for all other OPPS payable services and items reported on the claim (excluding services that are not covered OPD services or that cannot by statute be paid for under the OPPS) to be deemed adjunctive services representing components of a comprehensive service and resulting in a single prospective payment for the comprehensive service based on the costs of all reported services on the claim (80 FR 70333 through 70336).

Services included under the C–APC payment packaging policy, that is, services that are typically adjunctive to the primary service and provided during the delivery of the comprehensive service, include diagnostic procedures, laboratory tests, and other diagnostic tests and treatments that assist in the delivery of the primary procedure; visits and evaluations performed in association with the procedure; uncoded services and supplies used during the service; durable medical equipment as well as prosthetic and orthotic items and supplies when provided as part of the outpatient service; and any other components reported by HCPCS codes that represent services that are provided during the complete comprehensive service (78 FR 74865 and 79 FR 66800).

In addition, payment for hospital outpatient department services that are similar to therapy services, such as speech language pathology, and delivered either by therapists or nontherapists is included as part of the payment for the packaged complete comprehensive service. These services that are provided during the perioperative period are adjunctive services and are deemed not to be therapy services as described in section 1834(k) of the Act, regardless of whether the services are delivered by therapists or other nontherapist health care workers. We have previously noted that therapy services are those provided by therapists under a plan of care in accordance with section 1835(a)(2)(C) and section 1835(a)(2)(D) of the Act and are paid for under section 1834(k) of the Act, subject to annual therapy caps as applicable (78 FR 74867 and 79 FR 66800). However, certain other services similar to therapy services are considered and paid for as hospital outpatient department services. Payment for these nontherapy

[1] Status indicator ''J1'' denotes Hospital Part B Services Paid Through a Comprehensive APC. Further information can be found in CY 2023 Addendum D1.

[2] Status indicator ''J2'' denotes Hospital Part B Services That May Be Paid Through a Comprehensive APC. Further information can be found in CY 2023 Addendum D1.

outpatient department services that are reported with therapy codes and provided with a comprehensive service is included in the payment for the packaged complete comprehensive service. We note that these services, even though they are reported with therapy codes, are hospital outpatient department services and not therapy services. We refer readers to the July 2016 OPPS Change Request 9658 (Transmittal 3523) for further instructions on reporting these services in the context of a C–APC service.

Items included in the packaged payment provided in conjunction with the primary service also include all drugs, biologicals, and radiopharmaceuticals, regardless of cost, except those drugs with pass-through payment status and SADs, unless they function as packaged supplies (78 FR 74868 through 74869 and 74909 and 79 FR 66800). We refer readers to Section 50.2M, Chapter 15, of the Medicare Benefit Policy Manual for a description of our policy on SADs treated as hospital outpatient supplies, including lists of SADs that function as supplies and those that do not function as supplies.[3]

We define each hospital outpatient claim reporting a single unit of a single primary service assigned to status indicator ''J1'' as a single ''J1'' unit procedure claim (78 FR 74871 and 79 FR 66801). Line item charges for services included on the C–APC claim are converted to line item costs, which are then summed to develop the estimated APC costs. These claims are then assigned one unit of the service with status indicator ''J1'' and later used to develop the geometric mean costs for the C–APC relative payment weights. (We note that we use the term ''comprehensive'' to describe the geometric mean cost of a claim reporting ''J1'' service(s) or the geometric mean cost of a C–APC, inclusive of all of the items and services included in the C–APC service payment bundle.) Charges for services that would otherwise be separately payable are added to the charges for the primary service. This process differs from our traditional cost accounting methodology only in that all such services on the claim are packaged (except certain services as described above). We apply our standard data trims, which exclude claims with extremely high primary units or extreme costs.

The comprehensive geometric mean costs are used to establish resource similarity and, along with clinical similarity, dictate the assignment of the primary services to the C–APCs. We establish a ranking of each primary service (single unit only) to be assigned to status indicator ''J1'' according to its comprehensive geometric mean costs. For the minority of claims reporting more than one primary service assigned to status indicator ''J1'' or units thereof, we identify one ''J1'' service as the primary service for the claim based on our cost-based ranking of primary services. We then assign these multiple ''J1'' procedure claims to the C–APC to which the service designated as the primary service is assigned. If the reported ''J1'' services on a claim map to different C–APCs, we designate the ''J1'' service assigned to the C–APC with the highest comprehensive geometric mean cost as the primary service for that claim. If the reported multiple ''J1'' services on a claim map to the same C–APC, we designate the most costly service (at the HCPCS code level) as the primary service for that claim. This process results in initial assignments of claims for the primary services assigned to status indicator ''J1'' to the most appropriate C–APCs based on both single and multiple procedure claims reporting these services and clinical and resource homogeneity.

Complexity Adjustments. We use complexity adjustments to provide increased payment for certain comprehensive services. We apply a complexity adjustment by promoting qualifying paired ''J1'' service code combinations or paired code combinations of ''J1'' services and certain add-on codes (as described further below) from the originating C–APC (the C–APC to which the designated primary service is first assigned) to the next higher paying C–APC in the same clinical family of C–APCs. We apply this type of complexity adjustment when the paired code combination represents a complex, costly form or version of the primary service according to the following criteria:

- Frequency of 25 or more claims reporting the code combination (frequency threshold); and
- Violation of the 2 times rule, as stated in section 1833(t)(2) of the Act and section III.B.2 of this final rule with comment period, in the originating C–APC (cost threshold).

These criteria identify paired code combinations that occur commonly and exhibit materially greater resource requirements than the primary service. The CY 2017 OPPS/ASC final rule with comment period (81 FR 79582) included a revision to the complexity adjustment eligibility criteria. Specifically, we finalized a policy to discontinue the requirement that a code combination (that qualifies for a complexity adjustment by satisfying the frequency and cost criteria thresholds described above) also not create a 2 times rule violation in the higher level or receiving APC.

After designating a single primary service for a claim, we evaluate that service in combination with each of the other procedure codes reported on the claim assigned to status indicator ''J1'' (or certain add-on codes) to determine if there are paired code combinations that meet the complexity adjustment criteria. For a new HCPCS code, we determine initial C–APC assignment and qualification for a complexity adjustment using the best available information, crosswalking the new HCPCS code to a predecessor code(s) when appropriate.

Once we have determined that a particular code combination of ''J1'' services (or combinations of ''J1'' services reported in conjunction with certain add-on codes) represents a complex version of the primary service because it is sufficiently costly, frequent, and a subset of the primary comprehensive service overall according to the criteria described above, we promote the claim including the complex version of the primary service as described by the code combination to the next higher cost C–APC within the clinical family, unless the primary service is already assigned to the highest cost APC within the C–APC clinical family or assigned to the only C–APC in a clinical family. We do not create new APCs with a comprehensive geometric mean cost that is higher than the highest geometric mean cost (or only) C–APC in a clinical family just to accommodate potential complexity adjustments. Therefore, the highest payment for any claim including a code combination for services assigned to a C–APC would be the highest paying C–APC in the clinical family (79 FR 66802).

We package payment for all add-on codes into the payment for the C–APC. However, certain primary service add-on combinations may qualify for a complexity adjustment. As noted in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70331), all add-on codes that can be appropriately reported in combination with a base code that describes a primary ''J1'' service are evaluated for a complexity adjustment.

To determine which combinations of primary service codes reported in conjunction with an add-on code may

[3] *https://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/Downloads/bp102c15.pdf.*

qualify for a complexity adjustment for CY 2023, we proposed to apply the frequency and cost criteria thresholds discussed above, testing claims reporting one unit of a single primary service assigned to status indicator ''J1'' and any number of units of a single add-on code for the primary ''J1'' service. If the frequency and cost criteria thresholds for a complexity adjustment are met and reassignment to the next higher cost APC in the clinical family is appropriate (based on meeting the criteria outlined above), we make a complexity adjustment for the code combination; that is, we reassign the primary service code reported in conjunction with the add-on code to the next higher cost C–APC within the same clinical family of C–APCs. As previously stated, we package payment for add-on codes into the C–APC payment rate. If any add-on code reported in conjunction with the ''J1'' primary service code does not qualify for a complexity adjustment, payment for the add-on service continues to be packaged into the payment for the primary service and is not reassigned to the next higher cost C–APC. We list the complexity adjustments for ''J1'' and add-on code combinations for CY 2023, along with all of the other final complexity adjustments, in Addendum J to this final rule comment period (which is available via the internet on the CMS website at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices*).

Addendum J to this final rule with comment period includes the cost statistics for each code combination that would qualify for a complexity adjustment (including primary code and add-on code combinations). Addendum J to this final rule with comment period also contains summary cost statistics for each of the paired code combinations that describe a complex code combination that would qualify for a complexity adjustment and will be reassigned to the next higher cost C–APC within the clinical family. The combined statistics for all final reassigned complex code combinations are represented by an alphanumeric code with the first four digits of the designated primary service followed by a letter. For example, the final geometric mean cost listed in Addendum J for the code combination described by complexity adjustment assignment 3320R, which is assigned to C–APC 5224 (Level 4 Pacemaker and Similar Procedures), includes all paired code combinations that will be reassigned to C–APC 5224 when CPT code 33208 is the primary code. Providing the information contained in Addendum J to the CY 2023 OPPS/ASC final rule allows interested parties the opportunity to better assess the impact associated with the assignment of claims with each of the paired code combinations eligible for a complexity adjustment.

Comment: Multiple commenters requested that CMS apply a complexity adjustment to additional code combinations. The specific C–APC complexity adjustment code combinations requested by the commenters for CY 2023 are listed in Table 1 below.

BILLING CODE 4120–01–P

TABLE 1: C-APC Complexity Adjustments Requested by Commenters for CY 2023

Primary "J1" HCPCS/CPT Code	Secondary "J1" HCPCS/CPT code	Primary C-APC Assignment	Requested complexity adjusted C-APC assignment
20902 (Bone graft, any donor area; major or large)	**28740** (Arthrodesis, midtarsal or tarsometatarsal, single joint)	5114	5115
20982 (Ablation therapy for reduction or eradication of 1 or more bone tumors (eg, metastasis) including adjacent soft tissue when involved by tumor extension, percutaneous, including imaging guidance when performed; radiofrequency)	**22510** (Percutaneous vertebroplasty (bone biopsy included when performed), 1 vertebral body, unilateral or bilateral injection, inclusive of all imaging guidance; cervicothoracic)	5114	5115
	22511 (Percutaneous vertebroplasty (bone biopsy included when performed), 1 vertebral body, unilateral or bilateral injection, inclusive of all imaging guidance; lumbosacral)	5114	5115
28297 (Correction, hallux valgus (bunionectomy), with sesamoidectomy, when performed; with first metatarsal and medial cuneiform joint arthrodesis, any method)	**27687** (Gastrocnemius recession (eg, strayer procedure))	5114	5115
28740 (Arthrodesis, midtarsal or tarsometatarsal, single joint)	**28270** (Capsulotomy; metatarsophalangeal joint, with or without tenorrhaphy, each joint (separate procedure))	5114	5115
	27687 (Gastrocnemius recession (eg, strayer procedure))	5114	5115
	27691 (Transfer or transplant of single tendon (with muscle redirection or rerouting); deep (eg, anterior tibial or posterior tibial through interosseous space, flexor digitorum longus, flexor hallucis longus, or peroneal tendon to midfoot or hindfoot))	5114	5115
	28299 (Correction, hallux valgus (bunionectomy), with sesamoidectomy, when performed; with double osteotomy, any method)	5114	5115
	28740 (Arthrodesis, midtarsal or tarsometatarsal, single joint)	5114	5115

Primary "J1" HCPCS/CPT Code	Secondary "J1" HCPCS/CPT code	Primary C-APC Assignment	Requested complexity adjusted C-APC assignment
37243 (Vascular embolization or occlusion, inclusive of all radiological supervision and interpretation, intraprocedural roadmapping, and imaging guidance necessary to complete the intervention; for tumors, organ ischemia, or infarction)	**C1982** (Catheter, pressure-generating, one-way valve, intermittently occlusive)	5193	5194
37187 (Percutaneous transluminal mechanical thrombectomy, vein(s), including intraprocedural pharmacological thrombolytic injections and fluoroscopic guidance)	**37248** (Transluminal balloon angioplasty (except dialysis circuit), open or percutaneous, including all imaging and radiological supervision and interpretation necessary to perform the angioplasty within the same vein; initial vein)	5193	5194
52000 (Cystourethroscopy (separate procedure))	**C9738** (Adjunctive blue light cystoscopy with fluorescent imaging agent (list separately in addition to code for primary procedure))	5372	5373
52214 (Cystourethroscopy, with fulguration (including cryosurgery or laser surgery) of trigone, bladder neck, prostatic fossa, urethra, or periurethral glands)		5374	5375
52224 (Cystourethroscopy, with fulguration (including cryosurgery or laser surgery) or treatment of minor (less than 0.5 cm) lesion(s) with or without biopsy)		5374	5375
52234 (Cystourethroscopy, with fulguration (including cryosurgery or laser surgery) and/or resection of; small bladder tumor(s) (0.5 up to 2.0 cm))		5374	5375
52235 (Cystourethroscopy, with fulguration (including cryosurgery or laser surgery) and/or resection of; medium bladder tumor(s) (2.0 to 5.0 cm))		5374	5375
52240 (Cystourethroscopy, with fulguration (including cryosurgery or laser surgery) and/or resection of; large bladder tumor(s))		5375	5376

BILLING CODE 4120–01–C

Response: We reviewed the requested code combinations suggested by commenters, listed in Table 1, against our complexity adjustment criteria. The code combination for primary HCPCS code 52000 with secondary HCPCS code C9738 met our cost and frequency criteria, qualifying for a complexity adjustment for CY 2023. The remaining code combinations failed to meet our cost or frequency criteria and do not qualify for complexity adjustments for CY 2023. Addendum J to the CY 2023 OPPS/ASC final rule with comment period includes the cost statistics for each code combination that was evaluated for a complexity adjustment.

We note that one code combination, HCPCS 20902 and HCPCS 28740, requested by comments was already proposed in the CY 2023 OPPS/ASC proposed rule and is being finalized in

this final rule with comment period as a qualifying complexity adjustment. Additionally, one code combination commenters requested, HCPCS 37243 and HCPCS C1983, does not qualify for a complexity adjustment because the secondary code, C1983, is not an add-on code and does not have a J1 status indicator. Accordingly, this code combination was not evaluated for a CY 2023 complexity adjustment.

Comment: We also received support from commenters for a variety of existing and proposed complexity adjustments, including neurostimulator procedures as well as fusion and bunion surgery procedures.

Response: We thank the commenters for their support.

Comment: Several commenters requested that CMS modify or eliminate the established C–APC complexity adjustment eligibility criteria of 25 or more claims reporting the code combination (frequency) and a violation of the 2 times rule in the originating C–APC (cost) to allow additional code combinations to qualify for complexity adjustments. Some commenters expressed concern that CMS' methodology for determining complexity adjustments is unnecessarily restrictive, particularly the 25-claim threshold, and suggested that CMS implement a complexity adjustment whenever a code pair exceeds the cost threshold.

Several commenters reiterated their request to allow clusters of procedures, consisting of a ''J1'' code pair and multiple other associated add-on codes used in combination with that ''J1'' code pair to qualify for complexity adjustments, stating that this may allow for more accurate reflection of medical practice when multiple procedures are performed together or there are certain complex procedures that include numerous add-on codes. Commenters also requested that CMS continue to monitor and report on the impact of complexity adjustments.

Response: We appreciate these comments. At this time, we do not believe changes to the C–APC complexity adjustment criteria are necessary or that we should make exceptions to the criteria to allow claims with the code combinations suggested by the commenters to receive complexity adjustments. As we stated in the CY 2017 OPPS/ASC final rule (81 FR 79582), we believe that the complexity adjustment criteria, which require a frequency of 25 or more claims reporting a code combination and a violation of the 2 times rule in the originating C–APC, are appropriate to determine if a combination of procedures represents a complex, costly subset of the primary service that should qualify for the adjustment and be paid at the next higher paying C–APC in the clinical family. As we previously stated in the CY 2020 OPPS/ASC final rule with comment period (84 FR 61161), a minimum of 25 claims is already a very low threshold for a national payment system. Lowering the minimum of 25 claims further could lead to unnecessary complexity adjustments for service combinations that are rarely performed.

As we explained in the CY 2019 OPPS/ASC final rule with comment period (83 FR 58843), we do not believe that it is necessary to adjust the complexity adjustment criteria to allow claims that include more than two ''J1'' procedures or procedures that are not assigned to C–APCs to qualify for a complexity adjustment. As previously mentioned, we believe the current criteria are adequate to determine if a combination of procedures represents a complex, costly subset of the primary service. We will continue to monitor the application of the complexity adjustment criteria.

After consideration of the public comments we received on the proposed complexity adjustment policy, we are finalizing the C–APC complexity adjustment policy for CY 2023 as proposed. We are also finalizing the proposed complexity adjustments with the addition of the one new code combination, primary HCPCS code 52000 with secondary HCPCS code C9738, that meet our complexity adjustment criteria.

(2) Exclusion of Procedures Assigned to New Technology APCs From the C–APC Policy

Services that are assigned to New Technology APCs are typically new procedures that do not have sufficient claims history to establish an accurate payment for them. Beginning in CY 2002, we retain services within New Technology APC groups until we gather sufficient claims data to enable us to assign the service to an appropriate clinical APC. This policy allows us to move a service from a New Technology APC in less than 2 years if sufficient data are available. It also allows us to retain a service in a New Technology APC for more than 2 years if sufficient data upon which to base a decision for reassignment have not been collected (82 FR 59277).

The C–APC payment policy packages payment for adjunctive and secondary items, services, and procedures into the most costly primary procedure under the OPPS at the claim level. Prior to CY 2019, when a procedure assigned to a New Technology APC was included on the claim with a primary procedure, identified by OPPS status indicator ''J1'', payment for the new technology service was typically packaged into the payment for the primary procedure. Because the new technology service was not separately paid in this scenario, the overall number of single claims available to determine an appropriate clinical APC for the new service was reduced. This was contrary to the objective of the New Technology APC payment policy, which is to gather sufficient claims data to enable us to assign the service to an appropriate clinical APC.

To address this issue and ensure that there are sufficient claims data for services assigned to New Technology APCs, in the CY 2019 OPPS/ASC final rule with comment period (83 FR 58847), we finalized excluding payment for any procedure that is assigned to a New Technology APC (APCs 1491 through 1599 and APCs 1901 through 1908) from being packaged when included on a claim with a ''J1'' service assigned to a C–APC. In the CY 2020 OPPS/ASC final rule with comment period, we finalized that beginning in CY 2020, payment for services assigned to a New Technology APC would be excluded from being packaged into the payment for comprehensive observation services assigned status indicator ''J2'' when they are included on a claim with a ''J2'' service (84 FR 61167). We proposed to continue to exclude payment for any procedure that is assigned to a New Technology APC (APCs 1491 through 1599 and APCs 1901 through 1908) from being packaged when included on a claim with a ''J1'' or ''J2'' service assigned to a C–APC. We did not receive any public comments on this policy and are finalizing it as proposed.

(3) Exclusion of Drugs and Biologicals Described by HCPCS Code C9399 (Unclassified Drugs or Biologicals) From the C–APC Policy

Section 1833(t)(15) of the Act, as added by section 621(a)(1) of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (Pub. L. 108–173), provides for payment under the OPPS for new drugs and biologicals until HCPCS codes are assigned. Under this provision, we are required to make payment for a covered outpatient drug or biological that is furnished as part of covered outpatient department services but for which a HCPCS code has not yet been assigned in an amount equal to 95 percent of

average wholesale price (AWP) for the drug or biological.

In the CY 2005 OPPS/ASC final rule with comment period (69 FR 65805), we implemented section 1833(t)(15) of the Act by instructing hospitals to bill for a drug or biological that is newly approved by the FDA and that does not yet have a HCPCS code by reporting the National Drug Code (NDC) for the product along with the newly created HCPCS code C9399 (Unclassified drugs or biologicals). We explained that when HCPCS code C9399 appears on a claim, the Outpatient Code Editor (OCE) suspends the claim for manual pricing by the Medicare Administrative Contractor (MAC). The MAC prices the claim at 95 percent of the drug or biological's AWP, using Red Book or an equivalent recognized compendium, and processes the claim for payment. We emphasized that this approach enables hospitals to bill and receive payment for a new drug or biological concurrent with its approval by the FDA. The hospital does not have to wait for the next quarterly release or for approval of a product-specific HCPCS code to receive payment for a newly approved drug or biological or to resubmit claims for adjustment. We instructed that hospitals would discontinue billing HCPCS code C9399 and the NDC upon implementation of a product specific HCPCS code, status indicator, and appropriate payment amount with the next quarterly update. We also note that HCPCS code C9399 is paid in a similar manner in the ASC setting, as 42 CFR 416.171(b) outlines that certain drugs and biologicals for which separate payment is allowed under the OPPS are considered covered ancillary services for which the OPPS payment rate, which is 95 percent of AWP for HCPCS code C9399, applies. Since the implementation of the C–APC policy in 2015, payment for drugs and biologicals described by HCPCS code C9399 has been included in the C–APC payment when these products appear on a claim with a primary C–APC service. Packaging payment for these drugs and biologicals that appear on a hospital outpatient claim with a primary C–APC service is consistent with our C–APC packaging policy under which we make payment for all items and services, including all non-pass-through drugs, reported on the hospital outpatient claim as being integral, ancillary, supportive, dependent, and adjunctive to the primary service and representing components of a complete comprehensive service, with certain limited exceptions (78 FR 74869). It has been our position that the total payment for the C–APC with which payment for a drug or biological described by HCPCS code C9399 is packaged includes payment for the drug or biological at 95 percent of its AWP.

However, we have determined that in certain instances, drugs and biologicals described by HCPCS code C9399 are not being paid at 95 percent of their AWPs when payment for them is packaged with payment for a primary C–APC service. In order to ensure payment for new drugs, biologicals, and radiopharmaceuticals described by HCPCS code C9399 at 95 percent of their AWP, for CY 2023 and subsequent years, we proposed to exclude any drug, biological, or radiopharmaceutical described by HCPCS code C9399 from packaging when the drug, biological, or radiopharmaceutical is included on a claim with a ''J1'' service, which is the status indicator assigned to a C–APC, and a claim with a ''J2'' service, which is the status indicator assigned to comprehensive observation services. Please see OPPS Addendum J for the final CY 2023 comprehensive APC payment policy exclusions.

We also included a corresponding proposal in section XI ''Proposed CY 2023 OPPS Payment Status and Comment Indicators'' of the CY 2023 OPPS/ASC proposed rule (87 FR 44698), to add a new definition to status indicator ''A'' to include unclassified drugs and biologicals that are reportable with HCPCS code C9399. The definition, found in Addendum D1 to the CY 2023 OPPS/ASC proposed rule, would ensure the MAC prices claims for drugs, biologicals or radiopharmaceuticals billed with HCPCS code C9399 at 95 percent of the drug or biological's AWP and pays separately for the drug, biological, or radiopharmaceutical under the OPPS when it appears on the same claim as a primary C–APC service.

Comment: Interested parties expressed support of the proposal to exclude C9399 from ''J1'' and ''J2'' claims and to add a new definition to status indicator ''A'' to include unclassified drugs and biologicals that are reportable with C9399.

Response: We thank commenters for their support.

After consideration of the public comments we received, to ensure payment for new drugs, biologicals, and radiopharmaceuticals described by HCPCS code C9399 at 95 percent of their AWP, for CY 2023 and subsequent years we are finalizing, without modification, our proposal to exclude any drug, biological, or radiopharmaceutical described by HCPCS code C9399 from packaging when the drug, biological, or radiopharmaceutical is included on a claim with a ''J1'' service, which is the status indicator assigned to a C–APC, and a claim with a ''J2'' service, which is the status indicator assigned to comprehensive observation services. Please see the section titled ''CY 2023 OPPS Payment Status and Comment Indicators'' of this CY 2023 OPPS/ASC final rule with comment period for details regarding the new definition of status indicator ''A''.

(4) Additional C–APCs for CY 2023

For CY 2023, we proposed to continue to apply the C–APC payment policy methodology. We refer readers to the CY 2017 OPPS/ASC final rule with comment period (81 FR 79583) for a discussion of the C–APC payment policy methodology and revisions.

Each year, in accordance with section 1833(t)(9)(A) of the Act, we review and revise the services within each APC group and the APC assignments under the OPPS. As a result of our annual review of the services and the APC assignments under the OPPS, we proposed to add one C–APC under the existing C–APC payment policy in CY 2023: C–APC 5372 (Level 2 Urology and Related Services). This APC was proposed because, similar to other C–APCs, this APC included primary, comprehensive services, such as major surgical procedures, that are typically reported with other ancillary and adjunctive services. Also, similar to other clinical APCs that have been converted to C–APCs, there are higher APC levels (Levels 3–8 Urology and Related Services) within the clinical family or related clinical family of this APC that were previously converted to C–APCs.

Comment: Commenters supported the creation of the new proposed C–APC, based on resource cost and clinical characteristics.

Response: We appreciate the commenters' support.

Comment: Several commenters were concerned that the C–APC methodology lacks the charge capture mechanisms to accurately reflect the cost of radiation oncology services, particularly the delivery of brachytherapy for the treatment of cervical cancer. They stated that this type of cancer disproportionately impacts minorities, women, and rural populations and that undervaluing brachytherapy procedures risks exacerbating existing disparities in treatment. These commenters suggested that CMS discontinue the C–APC payment policy for all brachytherapy insertion codes and allow these procedures to be reported through

traditional APCs, move brachytherapy procedures (CPT codes 57155 and 58346) to higher paying C–APCs, or pay separately for preparation and planning services to more fully account for the costs associated with these procedures.

Response: We appreciate the comments. The calculations provided by commenters as to the cost of these services do not match how we calculate C–APC costs. We believe that the current C–APC methodology is appropriately applied to these surgical procedures and is accurately capturing costs, particularly as the brachytherapy sources used for these procedures are excluded from C–APC packaging and are separately payable. This methodology also enables hospitals to manage their resources with maximum flexibility by monitoring and adjusting the volume and efficiency of services themselves.

We also reviewed the request by commenters to move brachytherapy procedures, CPT code 57155 and CPT code 58346, to a higher paying C–APC. For CPT code 57155, the claims data in the two times rule evaluation show that this code is being paid at the appropriate level in C–APC 5415 (Level 5 Gynecologic Procedures). For CPT code 53846, given that this code has less than 100 claims, it does not meet the significance threshold of the two times rule evaluation and we do not believe the few claims available provide an accurate reflection of the service's cost sufficient to move this procedure to a higher C–APC. We will continue to examine these concerns and will determine if any modifications to this policy are warranted in future rulemaking.

After consideration of the public comments we received, we are finalizing as proposed C–APC 5372 (Level 2 Urology and Related Services) for CY 2023. Table 2 lists the final C–APCs for CY 2023. All C–APCs are displayed in Addendum J to this CY 2023 OPPS/ASC final rule with comment period (which is available via the internet on the CMS website). Addendum J to this final rule with comment period also contains all of the data related to the C–APC payment policy methodology, including the list of complexity adjustments and other information for CY 2023.

BILLING CODE 4120–01–P

TABLE 2: FINAL CY 2023 C-APCs

C-APC Clinical Family Descriptor Key:

AENDO = Airway Endoscopy
AICDP = Automatic Implantable Cardiac Defibrillators, Pacemakers, and Related Devices.
BREAS = Breast Surgery
COCHL = Cochlear Implant
EBIDX = Excision/ Biopsy/Incision and Drainage
ENTXX = ENT Procedures
EPHYS = Cardiac Electrophysiology/
EVASC = Endovascular Procedures
EXEYE = Extraocular Ophthalmic Surgery
GIXXX = Gastrointestinal Procedures
GYNXX = Gynecologic Procedures
INEYE = Intraocular Surgery
LAPXX = Laparoscopic Procedures
NERVE = Nerve Procedures
NSTIM = Neurostimulators
ORTHO = Orthopedic Surgery
PUMPS = Implantable Drug Delivery Systems
RADTX = Radiation Oncology
SCTXX = Stem Cell Transplant
UROXX = Urologic Procedures
VASCX = Vascular Procedures
WPMXX = Wireless PA Pressure Monitor

c. Calculation of Composite APC Criteria-Based Costs

As discussed in the CY 2008 OPPS/ASC final rule with comment period (72 FR 66613), we believe it is important that the OPPS enhance incentives for hospitals to provide necessary, high quality care as efficiently as possible. For CY 2008, we developed composite APCs to provide a single payment for groups of services that are typically performed together during a single clinical encounter and that result in the provision of a complete service. Combining payment for multiple, independent services into a single OPPS payment in this way enables hospitals to manage their resources with maximum flexibility by monitoring and adjusting the volume and efficiency of services themselves. An additional advantage to the composite APC model is that we can use data from correctly coded multiple procedure claims to calculate payment rates for the specified combinations of services, rather than relying upon single procedure claims which may be low in volume and/or incorrectly coded. Under the OPPS, we currently have composite policies for mental health services and multiple imaging services. We refer readers to the CY 2008 OPPS/ASC final rule with comment period (72 FR 66611 through 66614 and 66650 through 66652) for a full discussion of the development of the composite APC methodology, and the CY 2012 OPPS/ASC final rule with comment period (76 FR 74163) and the CY 2018 OPPS/ASC final rule with comment period (82 FR 59241 through 59242 and 59246 through 52950) for more recent background.

(1) Mental Health Services Composite APC

We proposed to continue our longstanding policy of limiting the aggregate payment for specified less resource-intensive mental health services furnished on the same date to the payment for a day of partial hospitalization services provided by a hospital, which we consider to be the most resource-intensive of all outpatient mental health services. We refer readers to the April 7, 2000 OPPS final rule with comment period (65 FR 18452 through 18455) for the initial discussion of this longstanding policy and the CY 2012 OPPS/ASC final rule with comment period (76 FR 74168) for more recent background.

In the CY 2018 OPPS/ASC proposed rule and final rule with comment period (82 FR 33580 through 33581 and 59246 through 59247, respectively), we proposed and finalized the policy for CY 2018 and subsequent years that, when the aggregate payment for specified mental health services provided by one hospital to a single beneficiary on a single date of service, based on the payment rates associated with the APCs for the individual services, exceeds the maximum per diem payment rate for partial hospitalization services provided by a hospital, those specified mental health services will be paid through composite APC 8010 (Mental Health Services Composite). In addition, we set the payment rate for composite APC 8010 for CY 2018 at the same payment rate that will be paid for APC 5863, which is the maximum partial hospitalization per diem payment rate for a hospital, and finalized a policy that the hospital will continue to be paid the payment rate for composite APC 8010. Under this policy, the Integrated OCE (I/OCE) will continue to determine whether to pay for these specified mental health services individually, or to make a single payment at the same payment rate established for APC 5863 for all of the specified mental health services furnished by the hospital on that single date of service. We continue to believe that the costs associated with administering a partial hospitalization program at a hospital represent the most resource intensive of all outpatient mental health services. Therefore, we do not believe that we should pay more for mental health services under the OPPS than the highest partial hospitalization per diem payment rate for hospitals.

We proposed that when the aggregate payment for specified mental health services provided by one hospital to a single beneficiary on a single date of service, based on the payment rates associated with the APCs for the individual services, exceeds the maximum per diem payment rate for partial hospitalization services provided by a hospital, those specified mental health services would be paid through composite APC 8010 for CY 2023. In addition, we proposed to set the payment rate for composite APC 8010 at the same payment rate that we proposed for APC 5863, which is the maximum partial hospitalization per diem payment rate for a hospital, and that the hospital continue to be paid the proposed payment rate for composite APC 8010.

Comment: Several commenters recommended that CMS change the status indicator for two neuropsychological testing codes (HCPCS 96133 and 96137) from SI = N to SI = Q3 to allow separate payment for additional hours of testing on the same date or increase the payment rate for the primary testing procedure code. The commenters noted that the payment rate for Composite APC 8010, which is capped at the maximum per diem partial hospitalization rate, is lower than the individual HCPCS code APC payment rates and does not provide sufficient payment for these procedures.

Response: After reviewing this issue, we believe the Composite APC methodology is being appropriately applied in this case, as packaging multiple testing services performed on a single date of service creates incentives for hospitals to provide these services in the most cost-efficient manner. We will continue to examine these concerns and will determine if any modifications to this policy are warranted in future rulemaking.

After consideration of the public comments we received, we are finalizing our proposal, without modification, that when the aggregate payment for specified mental health services provided by one hospital to a single beneficiary on a single date of service, based on the payment rates associated with the APCs for the individual services, exceeds the maximum per diem payment rate for partial hospitalization services provided by a hospital, those specified mental health services would be paid through composite APC 8010 for CY 2023. In addition, we are finalizing our proposal to set the payment rate for composite APC 8010 for CY 2023 at the same payment rate that we set for APC 5863, which is the maximum partial hospitalization per diem payment rate for a hospital.

(2) Multiple Imaging Composite APCs (APCs 8004, 8005, 8006, 8007, and 8008)

Effective January 1, 2009, we provide a single payment each time a hospital submits a claim for more than one imaging procedure within an imaging family on the same date of service, to reflect and promote the efficiencies hospitals can achieve when performing multiple imaging procedures during a single session (73 FR 41448 through 41450). We utilize three imaging families based on imaging modality for purposes of this methodology: (1) ultrasound; (2) computed tomography (CT) and computed tomographic angiography (CTA); and (3) magnetic resonance imaging (MRI) and magnetic resonance angiography (MRA). The HCPCS codes subject to the multiple imaging composite policy and their respective families are listed in Table 3 below.

While there are three imaging families, there are five multiple imaging

composite APCs due to the statutory requirement under section 1833(t)(2)(G) of the Act that we differentiate payment for OPPS imaging services provided with and without contrast. While the ultrasound procedures included under the policy do not involve contrast, both CT/CTA and MRI/MRA scans can be provided either with or without contrast. The five multiple imaging composite APCs established in CY 2009 are:

- APC 8004 (Ultrasound Composite);
- APC 8005 (CT and CTA without Contrast Composite);
- APC 8006 (CT and CTA with Contrast Composite);
- APC 8007 (MRI and MRA without Contrast Composite); and
- APC 8008 (MRI and MRA with Contrast Composite).

We define the single imaging session for the ''with contrast'' composite APCs as having at least one or more imaging procedures from the same family performed with contrast on the same date of service. For example, if the hospital performs an MRI without contrast during the same session as at least one other MRI with contrast, the hospital will receive payment based on the payment rate for APC 8008, the ''with contrast'' composite APC.

We make a single payment for those imaging procedures that qualify for payment based on the composite APC payment rate, which includes any packaged services furnished on the same date of service. The standard (noncomposite) APC assignments continue to apply for single imaging procedures and multiple imaging procedures performed across families. For a full discussion of the development of the multiple imaging composite APC methodology, we refer readers to the CY 2009 OPPS/ASC final rule with comment period (73 FR 68559 through 68569).

For CY 2023, we proposed to continue to pay for all multiple imaging procedures within an imaging family performed on the same date of service using the multiple imaging composite APC payment methodology. We continue to believe that this policy would reflect and promote the efficiencies hospitals can achieve when performing multiple imaging procedures during a single session.

For CY 2023, except where otherwise indicated, we proposed to use the costs derived from CY 2021 claims data to set the proposed CY 2023 payment rates. Therefore, for CY 2023, the payment rates for the five multiple imaging composite APCs (APCs 8004, 8005, 8006, 8007, and 8008) are based on proposed geometric mean costs calculated from CY 2021 claims available for the CY 2023 OPPS/ASC proposed rule that qualify for composite payment under the current policy (that is, those claims reporting more than one procedure within the same family on a single date of service). To calculate the proposed geometric mean costs, we have used the same methodology that we use to calculate the geometric mean costs for these composite APCs since CY 2014, as described in the CY 2014 OPPS/ASC final rule with comment period (78 FR 74918). The imaging HCPCS codes referred to as ''overlap bypass codes'' that we removed from the bypass list for purposes of calculating the proposed multiple imaging composite APC geometric mean costs, in accordance with our established methodology as stated in the CY 2014 OPPS/ASC final rule with comment period (78 FR 74918), are identified by asterisks in Addendum N to this final rule (which is available via the internet on the CMS website [4]) and are discussed in more detail in section II.A.1.b of this final rule with comment period.

In the CY 2023 OPPS/ASC proposed rule, for CY 2023, we were able to identify approximately 0.95 million ''single session'' claims out of an estimated 2.0 million potential claims for payment through composite APCs from our ratesetting claims data, which represents approximately 47.5 percent of all eligible claims, to calculate the proposed CY 2023 geometric mean costs for the multiple imaging composite APCs. Table 3 of the CY 2023 OPPS/ASC final rule with comment period lists the final HCPCS codes that would be subject to the multiple imaging composite APC policy and their respective families and approximate composite APC proposed geometric mean costs for CY 2023.

We did not receive any public comments on this policy. We are finalizing continuing the use of multiple imaging composite APCs to pay for services providing more than one imaging procedure from the same family on the same date, without modification. Table 3 below lists the HCPCS codes that will be subject to the multiple imaging composite APC policy and their respective families and approximate composite APC final geometric mean costs for CY 2023.

[4] CY 2023 Medicare Hospital Outpatient Prospective Payment System and Ambulatory Surgical Center Payment System Proposed Rule (CMS–1772–P); Notice of Final Rulemaking. Available at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices.*

3. Changes to Packaged Items and Services

a. Background and Rationale for Packaging in the OPPS

Like other prospective payment systems, the OPPS relies on the concept of averaging to establish a payment rate for services. The payment may be more or less than the estimated cost of providing a specific service or a bundle of specific services for a particular beneficiary. The OPPS packages

payments for multiple interrelated items and services into a single payment to create incentives for hospitals to furnish services most efficiently and to manage their resources with maximum flexibility. Our packaging policies support our strategic goal of using larger payment bundles in the OPPS to maximize hospitals' incentives to provide care in the most efficient manner. For example, where there are a variety of devices, drugs, items, and supplies that could be used to furnish a service, some of which are more costly than others, packaging encourages hospitals to use the most cost-efficient item that meets the patient's needs, rather than to routinely use a more expensive item, which may occur if separate payment is provided for the item.

Packaging also encourages hospitals to effectively negotiate with manufacturers and suppliers to reduce the purchase price of items and services or to explore alternative group purchasing arrangements, thereby encouraging the most economical health care delivery. Similarly, packaging encourages hospitals to establish protocols that ensure that necessary services are furnished, while scrutinizing the services ordered by practitioners to maximize the efficient use of hospital resources. Packaging payments into larger payment bundles promotes the predictability and accuracy of payment for services over time. Finally, packaging may reduce the importance of refining service-specific payment because packaged payments include costs associated with higher cost cases requiring many ancillary items and services and lower cost cases requiring fewer ancillary items and services. Because packaging encourages efficiency and is an essential component of a prospective payment system, packaging payments for items and services that are typically integral, ancillary, supportive, dependent, or adjunctive to a primary service has been a fundamental part of the OPPS since its implementation in August 2000. As we continue to develop larger payment groups that more broadly reflect services provided in an encounter or episode of care, we have expanded the OPPS packaging policies. Most, but not necessarily all, categories of items and services currently packaged in the OPPS are listed in 42 CFR 419.2(b). Our overarching goal is to make payments for all services under the OPPS more consistent with those of a prospective payment system and less like those of a per-service fee schedule, which pays separately for each coded item. As a part of this effort, we have continued to examine the payment for items and services provided under the OPPS to determine which OPPS services can be packaged to further achieve the objective of advancing the OPPS toward a more prospective payment system.

b. Policy and Comment Solicitation on Packaged Items and Services

For CY 2023, we examined the items and services currently provided under the OPPS, reviewing categories of integral, ancillary, supportive, dependent, or adjunctive items and services for which we believe payment would be appropriately packaged into payment for the primary service that they support. Specifically, we examined the HCPCS code definitions (including CPT code descriptors) and hospital outpatient department billing patterns to determine whether there were categories of codes for which packaging would be appropriate according to existing OPPS packaging policies or a logical expansion of those existing OPPS packaging policies.

For CY 2023, we did not propose any changes to the overall packaging policy previously discussed. We proposed to continue to conditionally package the costs of selected newly identified ancillary services into payment for a primary service where we believe that the packaged item or service is integral, ancillary, supportive, dependent, or adjunctive to the provision of care that was reported by the primary service HCPCS code.

While we did not propose any changes to the overall packaging policy above, we solicited comments on potential modifications to our packaging policy, as described in section XIII.E.5 of the CY 2023 OPPS/ASC proposed rule (87 FR 44717). Specifically, we solicited comments and data regarding whether to expand the current ASC payment system policy for non-opioid pain management drugs and biologicals that function as surgical supplies to the HOPD setting. Details on the current ASC policy can be found in section XIII.E of this final rule with comment period.

We did not receive any public comments on our overall OPPS packaging policy and therefore, we are continuing the OPPS packaging policy for CY 2023 without modification. Specific packaging concerns are discussed in detail in their respective sections throughout this final rule with comment period.

As discussed above and in the proposed rule, we solicited comments and data regarding whether to expand the current ASC payment system policy for non-opioid pain management drugs and biologicals that function as surgical supplies to the HOPD setting. Details on the current ASC policy can be found in section XIII.E of this final rule with comment period. Below is a summary of the comments received in response to the comment solicitation.

Comment: Many commenters suggested CMS extend the policy described at § 416.174 to also encompass the HOPD setting. Generally, commenters believed these products serve a valuable clinical purpose and their use should be encouraged in all settings of care. Several commenters provided data regarding how packaging negatively impacted the utilization of their products in the HOPD. Some commenters conceded that it is reasonable to think that the average hospital outpatient department would be able to absorb the extra costs; however, they believe that does not mean that every hospital outpatient department would be able to do so.

Commenters also presented data showing potential access barriers affecting underserved communities. Commenters believed that the HOPD setting is more accessible to vulnerable and underserved populations relative to the ASC setting. Commenters stated that these are the populations that are also most negatively impacted by opioids.

Response: We thank commenters for their comments on the comment solicitation to expand the non-opioid drug or biological payment policy to the HOPD setting. We will take these comments into consideration for future rulemaking. We remind interested parties that we are not modifying our policy at § 416.174 or creating new policies in response to these comment solicitations. Any change to or expansion of the policy described at § 416.174 would be done through notice and comment rulemaking.

4. Calculation of OPPS Scaled Payment Weights

We established a policy in the CY 2013 OPPS/ASC final rule with comment period (77 FR 68283) of using geometric mean-based APC costs to calculate relative payment weights under the OPPS. In the CY 2022 OPPS/ASC final rule with comment period (85 FR 63497 through 63498), we applied this policy and calculated the relative payment weights for each APC for CY 2022 that were shown in Addenda A and B of the CY 2022 OPPS/ASC final rule with comment period (which were made available via the internet on the CMS website) using the APC costs discussed in sections II.A.1. and II.A.2. of the CY 2022 OPPS/ASC final rule

with comment period (86 FR 63466 through 63483). For CY 2023, as we did for CY 2022, we proposed to continue to apply the policy established in CY 2013 and calculate relative payment weights for each APC for CY 2023 using geometric mean-based APC costs.

For CY 2012 and CY 2013, outpatient clinic visits were assigned to one of five levels of clinic visit APCs, with APC 0606 representing a mid-level clinic visit. In the CY 2014 OPPS/ASC final rule with comment period (78 FR 75036 through 75043), we finalized a policy that created alphanumeric HCPCS code G0463 (Hospital outpatient clinic visit for assessment and management of a patient), representing any and all clinic visits under the OPPS. HCPCS code G0463 was assigned to APC 0634 (Hospital Clinic Visits). We also finalized a policy to use CY 2012 claims data to develop the CY 2014 OPPS payment rates for HCPCS code G0463 based on the total geometric mean cost of the levels one through five CPT Evaluation or Assessment and Management (E/M) codes for clinic visits previously recognized under the OPPS (CPT codes 99201 through 99205 and 99211 through 99215). In addition, we finalized a policy to no longer recognize a distinction between new and established patient clinic visits.

For CY 2016, we deleted APC 0634 and reassigned the outpatient clinic visit HCPCS code G0463 to APC 5012 (Level 2 Examinations and Related Services) (80 FR 70372). For CY 2023, as we did for CY 2022, we proposed to continue to standardize all of the relative payment weights to APC 5012. We believe that standardizing relative payment weights to the geometric mean of the APC to which HCPCS code G0463 is assigned maintains consistency in calculating unscaled weights that represent the cost of some of the most frequently provided OPPS services. For CY 2023, as we did for CY 2022, we proposed to assign APC 5012 a relative payment weight of 1.00 and to divide the geometric mean cost of each APC by the geometric mean cost for APC 5012 to derive the unscaled relative payment weight for each APC. The choice of the APC on which to standardize the relative payment weights does not affect payments made under the OPPS because we scale the weights for budget neutrality.

We note that in the CY 2019 OPPS/ASC final rule with comment period (83 FR 59004 through 59015) and the CY 2020 OPPS/ASC final rule with comment period (84 FR 61365 through 61369), we discussed our policy, implemented beginning on January 1, 2019, to control for unnecessary increases in the volume of covered outpatient department services by paying for clinic visits furnished at excepted off-campus provider-based departments (PBDs) at a reduced rate. While the volume associated with these visits is included in the impact model, and thus used in calculating the weight scalar, the policy has a negligible effect on the scalar. Specifically, under this policy, there is no change to the relativity of the OPPS payment weights because the adjustment is made at the payment level rather than in the cost modeling. Further, under this policy, the savings that result from the change in payments for these clinic visits are not budget neutral. Therefore, the impact of this policy will generally not be reflected in the budget neutrality adjustments, whether the adjustment is to the OPPS relative weights or to the OPPS conversion factor. For a full discussion of this policy, we refer readers to the CY 2020 OPPS/ASC final rule with comment period (84 FR 61142).

Section 1833(t)(9)(B) of the Act requires that APC reclassification and recalibration changes, wage index changes, and other adjustments be made in a budget neutral manner. Budget neutrality ensures that the estimated aggregate weight under the OPPS for CY 2023 is neither greater than nor less than the estimated aggregate weight that would have been calculated without the changes. To comply with this requirement concerning the APC changes, we propose to compare the estimated aggregate weight using the CY 2022 scaled relative payment weights to the estimated aggregate weight using the proposed CY 2023 unscaled relative payment weights.

For CY 2022, we multiplied the CY 2022 scaled APC relative payment weight applicable to a service paid under the OPPS by the volume of that service from CY 2021 claims to calculate the total relative payment weight for each service. We then added together the total relative payment weight for each of these services in order to calculate an estimated aggregate weight for the year. For CY 2023, we proposed to apply the same process using the estimated CY 2023 unscaled relative payment weights rather than scaled relative payment weights. We proposed to calculate the weight scalar by dividing the CY 2022 estimated aggregate weight by the unscaled CY 2023 estimated aggregate weight.

For a detailed discussion of the weight scalar calculation, we refer readers to the OPPS claims accounting document available on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html.* Click on the link labeled ''CY 2023 OPPS/ASC Notice of Proposed Rulemaking'', which can be found under the heading ''Hospital Outpatient Prospective Payment System Rulemaking'' and open the claims accounting document link at the bottom of the page, which is labeled ''2023 NFRM OPPS Claims Accounting (PDF)''.

We proposed to compare the estimated unscaled relative payment weights in CY 2023 to the estimated total relative payment weights in CY 2022 using CY 2021 claims data, holding all other components of the payment system constant to isolate changes in total weight. Based on this comparison, we proposed to adjust the calculated CY 2023 unscaled relative payment weights for purposes of budget neutrality. We proposed to adjust the estimated CY 2023 unscaled relative payment weights by multiplying them by a proposed weight scalar of 1.4152 to ensure that the proposed CY 2023 relative payment weights are scaled to be budget neutral. The proposed CY 2023 relative payment weights listed in Addenda A and B to the CY 2023 OPPS/ASC proposed rule (which are available via the internet on the CMS website) are scaled and incorporate the recalibration adjustments discussed in sections II.A.1 and II.A.2 of this CY 2023 OPPS/ASC proposed rule (87 FR 44510 through 44525).

Section 1833(t)(14) of the Act provides the payment rates for certain specified covered outpatient drugs (SCODs). Section 1833(t)(14)(H) of the Act provides that additional expenditures resulting from this paragraph shall not be taken into account in establishing the conversion factor, weighting, and other adjustment factors for 2004 and 2005 under paragraph (9), but shall be taken into account for subsequent years. Therefore, the cost of those SCODs (as discussed in section V.B.2 of the CY 2023 OPPS/ASC proposed rule (87 FR 44644 through 44646)) is included in the budget neutrality calculations for the CY 2023 OPPS.

We did not receive any public comments on the proposed weight scalar calculation. Therefore, we are finalizing our proposal to use the calculation process described in the proposed rule, without modification, for CY 2023. For CY 2023, as we did for CY 2022, we will continue to apply the policy established in CY 2013 and calculate relative payment weights for each APC for CY 2023 using geometric mean-based APC costs. For CY 2023, as we did for CY 2022, we will assign APC

5012 a relative payment weight of 1.00 and we will divide the geometric mean cost of each APC by the geometric mean cost for APC 5012 to derive the unscaled relative payment weight for each APC. To comply with this requirement concerning the APC changes, we will compare the estimated aggregate weight using the CY 2022 scaled relative payment weights to the estimated aggregate weight using the CY 2023 unscaled relative payment weights.

Using updated final rule claims data, we are updating the estimated CY 2023 unscaled relative payment weights by multiplying them by a weight scalar of 1.4122 to ensure that the final CY 2023 relative payment weights are scaled to be budget neutral. The final CY 2023 relative payments weights listed in Addenda A and B of this final rule with comment period (which are available via the internet on the CMS website) were scaled and incorporate the recalibration adjustments discussed in sections II.A.1 and II.A.2 of this final rule with comment period.

B. Conversion Factor Update

Section 1833(t)(3)(C)(ii) of the Act requires the Secretary to update the conversion factor used to determine the payment rates under the OPPS on an annual basis by applying the OPD rate increase factor. For purposes of section 1833(t)(3)(C)(iv) of the Act, subject to sections 1833(t)(17) and 1833(t)(3)(F) of the Act, the OPD rate increase factor is equal to the hospital inpatient market basket percentage increase applicable to hospital discharges under section 1886(b)(3)(B)(iii) of the Act. In the FY 2023 IPPS/Long Term Care Hospital (LTCH) PPS proposed rule (87 FR 28402), consistent with current law, based on IHS Global, Inc.'s fourth quarter 2021 forecast of the FY 2023 market basket increase, the proposed FY 2023 IPPS market basket update was 3.1 percent. We noted in the proposed rule that under our regular process for the CY 2023 OPPS/ASC final rule, we would use the market basket update for the FY 2023 IPPS/LTCH PPS final rule, which would be based on IHS Global, Inc.'s second quarter 2022 forecast of the FY 2023 market basket increase. If that forecast is different than the market basket used for the proposed rule, the CY 2023 OPPS/ASC final rule OPD rate increase factor would reflect that different market basket estimate.

Section 1833(t)(3)(F)(i) of the Act requires that, for 2012 and subsequent years, the OPD fee schedule increase factor under subparagraph (C)(iv) be reduced by the productivity adjustment described in section 1886(b)(3)(B)(xi)(II) of the Act. Section 1886(b)(3)(B)(xi)(II) of the Act defines the productivity adjustment as equal to the 10-year moving average of changes in annual economy-wide, private nonfarm business multifactor productivity (MFP) (as projected by the Secretary for the 10-year period ending with the applicable fiscal year, year, cost reporting period, or other annual period) (the ''MFP adjustment''). In the FY 2012 IPPS/LTCH PPS final rule (76 FR 51689 through 51692), we finalized our methodology for calculating and applying the MFP adjustment, and then revised this methodology, as discussed in the FY 2016 IPPS/LTCH PPS final rule (80 FR 49509). In the FY 2023 IPPS/LTCH PPS proposed rule (87 FR 28402), the proposed MFP adjustment for FY 2023 was 0.4 percentage point.

Therefore, we proposed that the MFP adjustment for the CY 2023 OPPS would be 0.4 percentage point. We also proposed that if more recent data become subsequently available after the publication of the CY 2023 OPPS/ASC proposed rule (for example, a more recent estimate of the market basket increase and/or the MFP adjustment), we would use such updated data, if appropriate, to determine the CY 2023 market basket update and the MFP adjustment, which are components in calculating the OPD fee schedule increase factor under sections 1833(t)(3)(C)(iv) and 1833(t)(3)(F) of the Act.

We note that section 1833(t)(3)(F) of the Act provides that application of this subparagraph may result in the OPD fee schedule increase factor under section 1833(t)(3)(C)(iv) of the Act being less than 0.0 percent for a year, and may result in OPPS payment rates being less than rates for the preceding year. As described in further detail below, we proposed for CY 2023 an OPD fee schedule increase factor of 2.7 percent for the CY 2023 OPPS (which is the proposed estimate of the hospital inpatient market basket percentage increase of 3.1 percent, less the proposed 0.4 percentage point MFP adjustment).

We proposed that hospitals that fail to meet the Hospital OQR Program reporting requirements would be subject to an additional reduction of 2.0 percentage points from the OPD fee schedule increase factor adjustment to the conversion factor that would be used to calculate the OPPS payment rates for their services, as required by section 1833(t)(17) of the Act. For further discussion of the Hospital OQR Program, we refer readers to section XIV of the CY 2023 OPPS/ASC proposed rule.

To set the OPPS conversion factor for 2023, we proposed to increase the CY 2022 conversion factor of $84.177 by 2.7 percent. In accordance with section 1833(t)(9)(B) of the Act, we proposed further to adjust the conversion factor for CY 2023 to ensure that any revisions made to the wage index and rural adjustment are made on a budget neutral basis. We proposed to calculate an overall budget neutrality factor of 1.0010 for wage index changes by comparing proposed total estimated payments from our simulation model using the proposed FY 2023 IPPS wage indexes to those payments using the FY 2022 IPPS wage indexes, as adopted on a calendar year basis for the OPPS. We further proposed to calculate an additional budget neutrality factor of 0.9995 to account for our proposed policy to cap wage index reductions for hospitals at 5 percent on an annual basis.

We note that we did not include a budget neutrality factor for the proposed rule to account for the adjustment for drugs purchased under the 340B Program because we formally proposed to continue paying such drugs at ASP minus 22.5 percent, which was the same payment rate as in CY 2022. Given the timing of the Supreme Court's decision in *American Hospital Association* v. *Becerra,* 142 S. Ct. 1896 (2022), we lacked the necessary time to fully incorporate the adjustments to our budget neutrality calculations to account for that decision before issuing the CY 2023 OPPS/ASC proposed rule. Instead, we included alternative files with the proposed rule that detailed the impact of removing the 340B policy for CY 2023. The final budget neutrality factor for the 340B policy is discussed later in this section and section V.B.6. of this final rule with comment period.

For the CY 2023 OPPS, we proposed to maintain the current rural adjustment policy, as discussed in section II.E. of the CY 2023 OPPS/ASC proposed rule. Therefore, the proposed budget neutrality factor for the rural adjustment was 1.0000.

We proposed to continue previously established policies for implementing the cancer hospital payment adjustment described in section 1833(t)(18) of the Act, as discussed in section II.F of the CY 2023 OPPS/ASC proposed rule. We proposed to calculate a CY 2023 budget neutrality adjustment factor for the cancer hospital payment adjustment by comparing estimated total CY 2023 payments under section 1833(t) of the Act, including the proposed CY 2023 cancer hospital payment adjustment, to estimated CY 2023 total payments using the CY 2022 final cancer hospital

payment adjustment, as required under section 1833(t)(18)(B) of the Act. The proposed CY 2023 estimated payments applying the proposed CY 2023 cancer hospital payment adjustment were the same as estimated payments applying the CY 2022 final cancer hospital payment adjustment. Therefore, we proposed to apply a budget neutrality adjustment factor of 1.0000 to the conversion factor for the cancer hospital payment adjustment. In accordance with section 1833(t)(18)(C) of the Act, as added by section 16002(b) of the 21st Century Cures Act (Pub. L. 114–255), we applied a budget neutrality factor calculated as if the proposed cancer hospital adjustment target payment-to-cost ratio was 0.90, not the 0.89 target payment-to-cost ratio we applied as stated in section II.F of the CY 2023 OPPS/ASC proposed rule.

We estimated that proposed pass-through spending for drugs, biologicals, and devices for CY 2023 would equal approximately $772.0 million, which represents 0.90 percent of total projected CY 2023 OPPS spending. Therefore, the proposed conversion factor would be adjusted by the difference between the 1.24 percent estimate of pass-through spending for CY 2022 and the 0.90 percent estimate of proposed pass-through spending for CY 2023, resulting in a proposed increase to the conversion factor for CY 2023 of 0.34 percent.

Proposed estimated payments for outliers would remain at 1.0 percent of total OPPS payments for CY 2023. We estimated for the CY 2023 OPPS/ASC proposed rule that outlier payments would be approximately 1.29 percent of total OPPS payments in CY 2022; the 1.00 percent for proposed outlier payments in CY 2023 would constitute a 0.29 percent decrease in payment in CY 2023 relative to CY 2022.

We also proposed to make an OPPS budget neutrality adjustment of 0.01 percent of the OPPS for the estimated spending of $8.3 million associated with the proposed payment adjustment under the CY 2023 OPPS for domestic NIOSH-approved surgical N95 respirators, as discussed in section X.H of the CY 2023 OPPS/ASC proposed rule.

For CY 2023, we also proposed that hospitals that fail to meet the reporting requirements of the Hospital OQR Program would continue to be subject to a further reduction of 2.0 percentage points to the OPD fee schedule increase factor. For hospitals that fail to meet the requirements of the Hospital OQR Program, we proposed to make all other adjustments discussed above, but use a reduced OPD fee schedule update factor of 0.7 percent (that is, the proposed OPD fee schedule increase factor of 2.7 percent further reduced by 2.0 percentage points). This would result in a proposed reduced conversion factor for CY 2023 of $85.093 for hospitals that fail to meet the Hospital OQR Program requirements (a difference of −1.692 in the conversion factor relative to hospitals that met the requirements).

In summary, for 2023, we proposed to use a reduced conversion factor of $85.093 in the calculation of payments for hospitals that fail to meet the Hospital OQR Program requirements (a difference of −1.692 in the conversion factor relative to hospitals that met the requirements).

For 2023, we proposed to use a conversion factor of $86.785 in the calculation of the national unadjusted payment rates for those items and services for which payment rates are calculated using geometric mean costs; that is, the proposed OPD fee schedule increase factor of 2.7 percent for CY 2023, the required proposed wage index budget neutrality adjustment of approximately 1.0010, the proposed 5 percent annual cap for individual hospital wage index reductions adjustment of approximately 0.9995, the proposed cancer hospital payment adjustment of 1.0000, the proposed adjustment to account for the 0.01 percentage point of OPPS spending associated with the payment adjustment for domestic NIOSH-approved surgical N95 respirators, and the proposed adjustment of an increase of 0.34 percentage point of projected OPPS spending for the difference in pass-through spending, which resulted in a proposed conversion factor for CY 2023 of $86.785.

Comment: Many commenters believed that the proposed OPD rate increase of 2.7 percent substantially underestimated the increases in costs for labor, equipment, and supplies that hospitals are facing. Commenters also asserted that the adjusted inpatient hospital rate increase of 3.8 percent that was implemented for the IPPS and calculated using more current economic data is also inadequate to address the large cost increases faced by hospitals. Many commenters raised concerns about sharply rising labor costs, especially the cost of nursing care. Commenters stated that during the COVID–19 pandemic, hospitals greatly increased their use of contract nurses whose wages and support costs were substantially higher than nurses regularly employed by hospitals. Commenters had serious concerns about whether the market basket data that measures labor costs were measuring the increased hospital labor costs. Commenters also were in favor of eliminating or substantially reducing the productivity adjustment from the OPD rate update. They believe that disruptions caused by the pandemic, inflation, and supply-chain issues have inhibited productivity growth, and that the proposed adjustment overestimates productivity efficiencies in the hospital sector of the economy.

Commenters had several suggested actions or sources of information that could be used to measure and compensate for the increased costs hospitals face. Some commenters suggested using different measures of changes in costs and of inflation, including Medicare cost reports and the Consumer Price Index (CPI). Many commenters support a one-time Medicare payment rate increase in addition to the proposed OPD rate increase to meet current sharply rising costs and remedy what commenters said were inadequate increases to OPD rates in prior years.

One commenter contended that we do not have to accept the adjusted inpatient hospital rate increase for the final OPD rate increase, pointing out that section 1833(t)(3)(C)(iv) of the Act states that ''. . . the 'OPD fee schedule increase factor' for services furnished in a year is equal to the market basket percentage increase applicable under section 1886(b)(3)(B)(iii) . . .'' The commenter explained that section 1886(b)(3)(B)(iii) of the Act defines the IPPS market basket percentage increase that section 1833(t)(3)(C)(iv) requires to be adopted by the OPPS. The commenter believes that section 1886(d)(5)(I)(i) of the Act, which states that ''(t)he Secretary shall provide by regulation for such other exceptions and adjustments to such payment amounts under this subsection as the Secretary deems appropriate . . . ,'' gives CMS flexibility to identify adjustments that could update the IPPS market basket to better reflect rapidly increasing input costs for hospitals.

Response: Section 1833(t)(3)(C)(iv) of the Act requires that the OPD fee schedule increase factor equal the IPPS market basket percentage increase. The IPPS authority in section 1886(d)(5)(I)(i) of the Act gives the Secretary authority to make exceptions and adjustments to IPPS payment amounts under subsection (d) of section 1886; it does not give the Secretary authority to adjust OPPS payment amounts. Section 1833(t)(3)(C)(iv) does give the Secretary discretion to substitute for the market basket percentage increase an annual percentage increase that is computed and applied with respect to covered OPD services furnished in a year in the same manner as the market basket

increase is determined and applied to inpatient hospital services for discharges occurring in a fiscal year, but we did not propose to substitute a covered OPD services-specific increase for the market percentage increase factor for CY 2023. Where CMS does not substitute this alternative, the OPD fee schedule increase factor must equal the market basket percentage increase. And as we noted in the FY 2023 IPPS/LTCH PPS final rule, the final IPPS market basket growth rate of 4.1 percent would be the highest market basket update implemented in an IPPS final rule since FY 1998 (87 FR 49052).

Comment: Several commenters supported our proposed OPD rate increase of 2.7 percent updated based on more current market basket information for this final rule. Some of the commenters noted that our proposed increase was the minimum amount needed to reflect hospitals' higher costs and they encouraged us to implement an OPD rate increase larger than the proposed 2.7 percent OPD rate increase.

Response: We appreciate the commenter's support for our proposed OPD rate increases. After reviewing the public comments that we received, we are finalizing these proposals with modification.

For CY 2023, we proposed to continue previously established policies for implementing the cancer hospital payment adjustment described in section 1833(t)(18) of the Act (discussed in section II.F of this final rule with comment period). Based on the final rule updated data used in calculating the cancer hospital payment adjustment in section II.F. of this final rule with comment period, the target payment-to-cost ratio for the cancer hospital payment adjustment, which was 0.90 for CY 2022, is 0.90 for CY 2023. As a result, we are applying a budget neutrality adjustment factor of 1.0000 to the conversion factor for the cancer hospital payment adjustment.

For this CY 2023 OPPS/ASC final rule with comment period, based on more recent data available for the FY 2023 IPPS/LTCH PPS final rule (87 FR 49056) (that is, IHS Global Inc.'s (IGI's) second quarter 2022 forecast of the 2018-based IPPS market basket rate-of-increase with historical data through the first quarter of 2022), the hospital market basket update for CY 2023 is 4.1 percent and the productivity adjustment for FY 2023 is 0.3 percent.

We note that as a result of the modifications in final policy for the CY 2023 wage index we are also including a change to the wage index budget neutrality adjustment so that the final overall budget neutrality factor of 0.9998 would apply for wage index changes. This adjustment is comprised of a 1.0002 budget neutrality adjustment, using our standard calculation of comparing proposed total estimated payments from our simulation model using the final FY 2023 IPPS wage indexes to those payments using the FY 2022 IPPS wage indexes, as adopted on a calendar year basis for the OPPS as well as a 0.9996 budget neutrality adjustment for the final CY 2023 5-percent cap on wage index decreases (as discussed in section II.C of this final rule with comment period), requiring application of the 5-percent cap on CY 2022 wage indexes, to ensure that this wage index is implemented in a budget neutral manner.

As a result of these finalized policies, the OPD fee schedule increase factor for the CY 2023 OPPS is 3.8 percent (which reflects the 4.1 percent final estimate of the hospital inpatient market basket percentage increase with a −0.3 percentage point productivity adjustment). For CY 2023, we are using a conversion factor of $84.177 in the calculation of the national unadjusted payment rates for those items and services for which payment rates are calculated using geometric mean costs; that is, the OPD fee schedule increase factor of 3.8 percent for CY 2023, the required wage index budget neutrality adjustment of 0.9998, the adjustment to account for the change in policy for drugs purchased under the 340B Program of 0.9691, and the adjustment of 0.16 percentage point of projected OPPS spending for the difference in pass-through spending that results in a conversion factor for CY 2023 of $85.585. This information is listed in Table 4.

TABLE 4: CY 2023 CONVERSION FACTOR UPDATE

Unadjusted Conversion Factor	$84.177
OPD Fee Schedule Increase	3.8 percent
Wage Index Budget Neutrality Adjustment	0.9998
340B Budget Neutrality Adjustment	0.9691
Pass-Through Spending Adjustment	0.16 percent point
Final CY 2023 Conversion Factor	**$85.585**

C. Wage Index Changes

Section 1833(t)(2)(D) of the Act requires the Secretary to determine a wage adjustment factor to adjust the portion of payment and coinsurance attributable to labor-related costs for relative differences in labor and labor-related costs across geographic regions in a budget neutral manner (codified at 42 CFR 419.43(a)). This portion of the OPPS payment rate is called the OPPS labor-related share. Budget neutrality is discussed in section II.B of the CY 2023 OPPS/ASC proposed rule (87 FR 44528).

The OPPS labor-related share is 60 percent of the national OPPS payment. This labor-related share is based on a regression analysis that determined that, for all hospitals, approximately 60 percent of the costs of services paid under the OPPS were attributable to wage costs. We confirmed that this labor-related share for outpatient services is appropriate during our regression analysis for the payment adjustment for rural hospitals in the CY 2006 OPPS final rule with comment period (70 FR 68553). In the CY 2023 OPPS/ASC proposed rule, we proposed to continue this policy for the CY 2023 OPPS. We referred readers to section II.H of the CY 2023 OPPS/ASC proposed rule (87 FR 44535 through 44536) for a description and an example of how the wage index for a particular hospital is used to determine payment for the hospital.

We did not receive any public comments on our proposal, and we are finalizing our proposal without modification.

As discussed in the claims accounting narrative included with the supporting documentation for this final rule (which is available via the internet on the CMS website (*https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices*)), for estimating APC costs, we standardize 60 percent of estimated claims costs for geographic area wage variation using the same FY 2023 pre-reclassified wage index that we use under the IPPS to standardize costs. This standardization process removes the effects of differences in area wage levels from the determination of a national unadjusted OPPS payment rate and copayment amount.

Under 42 CFR 419.41(c)(1) and 419.43(c) (published in the OPPS April 7, 2000 final rule with comment period (65 FR 18495 and 18545)), the OPPS adopted the final fiscal year IPPS post-reclassified wage index as the calendar year wage index for adjusting the OPPS standard payment amounts for labor market differences. Therefore, the wage index that applies to a particular acute care, short-stay hospital under the IPPS also applies to that hospital under the OPPS. As initially explained in the September 8, 1998 OPPS proposed rule (63 FR 47576), we believe that using the IPPS wage index as the source of an adjustment factor for the OPPS is reasonable and logical, given the inseparable, subordinate status of the HOPD within the hospital overall. In accordance with section 1886(d)(3)(E) of the Act, the IPPS wage index is updated annually.

The Affordable Care Act contained several provisions affecting the wage index. These provisions were discussed in the CY 2012 OPPS/ASC final rule with comment period (76 FR 74191). Section 10324 of the Affordable Care Act added section 1886(d)(3)(E)(iii)(II) to the Act, which defines a frontier State and amended section 1833(t) of the Act to add paragraph (19), which requires a frontier State wage index floor of 1.00 in certain cases, and states that the frontier State floor shall not be applied in a budget neutral manner. We codified these requirements at § 419.43(c)(2) and (3) of our regulations. In the CY 2023 OPPS/ASC proposed rule, we proposed to implement this provision in the same manner as we have since CY 2011. Under this policy, the frontier State hospitals would receive a wage index of 1.00 if the otherwise applicable wage index (including reclassification, the rural floor, and rural floor budget neutrality) is less than 1.00. Because the HOPD receives a wage index based on the geographic location of the specific inpatient hospital with which it is associated, the frontier State wage index adjustment applicable for the inpatient hospital also would apply for any associated HOPD. We referred readers to the FY 2011 through FY 2022 IPPS/LTCH PPS final rules for discussions regarding this provision, including our methodology for identifying which areas meet the definition of ''frontier States'' as provided for in section 1886(d)(3)(E)(iii)(II) of the Act: for FY 2011, 75 FR 50160 through 50161; for FY 2012, 76 FR 51793, 51795, and 51825; for FY 2013, 77 FR 53369 through 53370; for FY 2014, 78 FR 50590 through 50591; for FY 2015, 79 FR 49971; for FY 2016, 80 FR 49498; for FY 2017, 81 FR 56922; for FY 2018, 82 FR 38142; for FY 2019, 83 FR 41380; for FY 2020, 84 FR 42312; for FY 2021, 85 FR 58765; and for FY 2022, 86 FR 45178.

We did not receive any public comments on our proposal, and we are finalizing our proposal without modification.

In addition to the changes required by the Affordable Care Act, we noted in the CY 2023 OPPS/ASC proposed rule (87 FR 44529) that the proposed FY 2023 IPPS wage indexes continue to reflect a number of adjustments implemented in past years, including, but not limited to, reclassification of hospitals to different geographic areas, the rural floor provisions, the imputed floor wage index adjustment in all-urban states, an adjustment for occupational mix, an adjustment to the wage index based on commuting patterns of employees (the out-migration adjustment), and an adjustment to the wage index for certain low wage index hospitals to help address wage index disparities between low and high wage index hospitals. We referred readers to the FY 2023 IPPS/LTCH PPS proposed rule (87 FR 28357 through 28380) for a detailed discussion of all proposed changes to the FY 2023 IPPS wage indexes. We noted in particular that in the FY 2023 IPPS/LTCH PPS proposed rule (87 FR 28377 through 28380), we proposed a permanent approach to smooth year-to-year decreases in hospitals' wage indexes. Specifically, for FY 2023 and subsequent years, we proposed to apply a 5-percent cap on any decrease to a hospital's wage index from its wage index in the prior FY, regardless of the circumstances causing the decline. That is, we proposed that a hospital's wage index for FY 2023 would not be less than 95 percent of its final wage index for FY 2022, and that for subsequent years, a hospital's wage index would not be less than 95 percent of its final wage index for the prior FY. We stated that we believe this policy would increase the predictability of IPPS payments for hospitals and mitigate instability and significant negative impacts to hospitals resulting from changes to the wage index. It would also eliminate the need for temporary and potentially uncertain transition adjustments to the wage index in the future due to specific policy changes or circumstances outside hospitals' control.

Core Based Statistical Areas (CBSAs) are made up of one or more constituent counties. Each CBSA and constituent county has its own unique identifying codes. The FY 2018 IPPS/LTCH PPS final rule (82 FR 38130) discussed the two different lists of codes to identify counties: Social Security Administration (SSA) codes and Federal Information Processing Standard (FIPS) codes. Historically, CMS listed and used SSA and FIPS county codes to identify and crosswalk counties to CBSA codes for purposes of the IPPS and OPPS wage indexes. However, the SSA county codes are no longer being maintained and updated, although the FIPS codes continue to be maintained by the U.S. Census Bureau. The Census Bureau's most current statistical area information is derived from ongoing census data received since 2010; the most recent data are from 2015. The Census Bureau maintains a complete list of changes to counties or county equivalent entities on the website at: *https://www.census.gov/geo/reference/county-changes.html* (which, as of May 6, 2019, migrated to: *https://www.census.gov/programs-surveys/geography.html*). In the FY 2018 IPPS/LTCH PPS final rule (82 FR 38130), for purposes of crosswalking counties to CBSAs for the IPPS wage index, we finalized our proposal to discontinue the use of the SSA county codes and begin using only the FIPS county codes. Similarly, for the purposes of crosswalking counties to CBSAs for the OPPS wage index, in the CY 2018 OPPS/ASC final rule with comment period (82 FR 59260), we finalized our proposal to discontinue the use of SSA county codes and begin using only the FIPS county codes. For CY 2023, under the OPPS, we are continuing to use only the FIPS county codes for purposes of crosswalking counties to CBSAs.

In the CY 2023 OPPS/ASC proposed rule, we proposed to use the FY 2023 IPPS post-reclassified wage index for urban and rural areas as the wage index for the OPPS to determine the wage adjustments for both the OPPS payment rate and the copayment rate for CY 2023. We stated that, therefore, any policies and adjustments for the FY 2023 IPPS post-reclassified wage index,

including, but not limited to, the 5-percent cap on any decrease to a hospital's wage index from its wage index in the prior FY described above, would be reflected in the final CY 2023 OPPS wage index beginning on January 1, 2023. We referred readers to the FY 2023 IPPS/LTCH PPS proposed rule (87 FR 28357 through 28380) and the proposed FY 2023 hospital wage index files posted on the CMS website at *https://www.cms.gov/medicare/acute-inpatient-pps/fy-2023-ipps-proposed-rule-home-page.* With regard to budget neutrality for the CY 2023 OPPS wage index, we referred readers to section II.B of the CY 2023 OPPS/ASC proposed rule (78 FR 44528). We stated that we continue to believe that using the IPPS post-reclassified wage index as the source of an adjustment factor for the OPPS is reasonable and logical, given the inseparable, subordinate status of the HOPD within the hospital overall.

Hospitals that are paid under the OPPS, but not under the IPPS, do not have an assigned hospital wage index under the IPPS. Therefore, for non-IPPS hospitals paid under the OPPS, it is our longstanding policy to assign the wage index that would be applicable if the hospital was paid under the IPPS, based on its geographic location and any applicable wage index policies and adjustments. In the CY 2023 OPPS/ASC proposed rule, we proposed to continue this policy for CY 2023 and included a brief summary of the major proposed FY 2023 IPPS wage index policies and adjustments that we propose to apply to these hospitals under the OPPS for CY 2023. We referred readers to the FY 2023 IPPS/LTCH PPS proposed rule (87 FR 28357 through 28380) for a detailed discussion of the proposed changes to the FY 2023 IPPS wage indexes.

It has been our longstanding policy to allow non-IPPS hospitals paid under the OPPS to qualify for the out-migration adjustment if they are located in a section 505 out-migration county (section 505 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA)). Applying this adjustment is consistent with our policy of adopting IPPS wage index policies for hospitals paid under the OPPS. We noted that, because non-IPPS hospitals cannot reclassify, they are eligible for the out-migration wage index adjustment if they are located in a section 505 out-migration county. This is the same out-migration adjustment policy that would apply if the hospital were paid under the IPPS. For CY 2023, we proposed to continue our policy of allowing non-IPPS hospitals paid under the OPPS to qualify for the outmigration adjustment if they are located in a section 505 out-migration county (section 505 of the MMA). Furthermore, we proposed that the wage index that would apply for CY 2023 to non-IPPS hospitals paid under the OPPS would continue to include the rural floor adjustment and any policies and adjustments applied to the IPPS wage index to address wage index disparities. We stated that in addition, the wage index that would apply to non-IPPS hospitals paid under the OPPS would include the 5 percent cap on wage index decreases that we may finalize for the FY 2023 IPPS wage index as discussed previously.

Comment: Multiple commenters supported our proposal for FY 2023 and subsequent years to apply a 5-percent cap on any decrease to a hospital's wage index from its wage index in the prior FY, regardless of the circumstances causing the decline. Commenters stated that the proposal would provide payment stability for hospitals. Commenters also requested that the proposed 5-percent cap policy be excluded from budget neutrality, which would allow the cap to be applied while avoiding decreases to the wage index in areas with high wage indexes.

Response: We appreciate the commenters' support of our proposal in the FY 2023 IPPS/LTCH PPS proposed rule to apply a 5-percent cap on any decrease to a hospital's wage index from its wage index in the prior FY. We finalized this proposal and the associated proposed budget neutrality adjustment in the FY 2023 IPPS/LTCH PPS final rule (87 FR 49018 through 49021) and agree that the policy will promote payment stability for hospitals.

We refer readers to the FY 2023 IPPS/LTCH PPS final rule (87 FR 49018 through 49021) for a detailed discussion of the wage index cap policy finalized for the FY 2023 IPPS wage index and for responses to these and other comments relating to the wage index cap policy.

As we noted, in the FY 2023 IPPS/LTCH PPS final rule (87 FR 49018 through 49021), for FY 2023 and subsequent years, we finalized an IPPS wage index policy to apply a 5-percent cap on any decrease to a hospital's wage index from its wage index in the prior fiscal year, regardless of the circumstances causing the decline. A hospital's wage index for FY 2023 will not be less than 95 percent of its final wage index for FY 2022, and for subsequent years, a hospital's wage index will not be less than 95 percent of its final wage index for the prior fiscal year. Except for newly opened hospitals, we will apply the cap for a fiscal year using the final wage index applicable to the hospital on the last day of the prior fiscal year. A newly opened hospital would be paid the wage index for the area in which it is geographically located for its first full or partial fiscal year, and it would not receive a cap for that first year because it would not have been assigned a wage index in the prior year. We stated in the FY 2023 IPPS/LTCH PPS final rule (87 FR 49021) that we will apply the cap in a budget neutral manner through a national adjustment to the standardized amount each fiscal year. Specifically, we will apply a budget neutrality adjustment to ensure that estimated aggregate payments under our wage index cap policy for hospitals that would have a decrease in their wage indexes for the upcoming fiscal year of more than 5 percent would equal what estimated aggregate payments would have been without the wage index cap policy. We will apply a similar budget neutrality adjustment in the OPPS for each calendar year. For the OPPS, section 1833(t)(2)(D) of the Act requires the Secretary to determine a wage adjustment factor to adjust the portion of payment and coinsurance attributable to labor related costs for relative differences in labor and labor-related costs across geographic regions in a budget neutral manner.

Comment: One commenter was opposed to our proposal to apply a 5-percent cap on any decrease to a hospital's wage index from its wage index in the prior FY. The commenter stated that our proposal goes against the purpose of having a wage index, which the commenter believes is to adjust payment rates to reflect the substantial geographic differences in hospital labor costs.

Response: We appreciate the commenter's concerns. However, we believe applying a 5-percent cap on all wage index decreases supports increased predictability about OPPS payments for hospitals in the upcoming calendar year, enabling them to more effectively budget and plan their operations. That is, we proposed to cap decreases because we believe that a hospital would be able to more effectively budget and plan when there is predictability about its expected minimum level of OPPS payments in the upcoming calendar year. We believe that any potential difference in the wage index value hospitals in the same labor market area receive would likely be minimal and temporary.

Comment: One commenter supported the application of the imputed floor wage index policy, including the policy's definition of all-urban states as well as its non-budget neutral application as required by section 9831

of the American Rescue Plan Act of 2021. Another commenter opposed the imputed floor policy, stating that it unfairly manipulates the wage index to benefit a handful of only-urban states and territories.

Response: We appreciate the commenter's support of our application of the imputed floor wage index policy. In response to the commenter that opposed this policy, we underscore that the imputed floor was established for the IPPS wage index by section 9831 of the American Rescue Plan Act of 2021. As we stated in the CY 2022 OPPS/ASC final rule (86 FR 63502), we continue to believe that it is appropriate to apply the imputed floor policy in the OPPS in the same manner as under the IPPS, given the inseparable, subordinate status of the HOPD within the hospital overall.

Comment: Multiple commenters requested that rural emergency hospitals (REHs) be eligible to be reclassified under Medicare Geographic Classification Review Board (MGCRB) reclassification process.

Response: Pursuant to section 1861(kkk)(2)(B) of the Act, REHs may not provide acute care inpatient hospital services other than post-hospital extended care services furnished by a distinct part unit licensed as a skilled nursing facility. Therefore, REHs are considered to be non-IPPS hospitals. Non-IPPS hospitals are not eligible for Medicare Geographic Classification Review Board (MGCRB) reclassification.

After consideration of the public comments we received, we are finalizing our proposal without modification to use the FY 2023 IPPS post-reclassified wage index for urban and rural areas as the wage index for the OPPS to determine the wage adjustments for both the OPPS payment rate and the copayment rate for CY 2023. Any policies and adjustments for the FY 2023 IPPS post-reclassified wage index will be reflected in the final CY 2023 OPPS wage index beginning on January 1, 2023, including, but not limited to, reclassification of hospitals to different geographic areas, the rural floor provisions, the imputed floor wage index adjustment in all-urban states, an adjustment for occupational mix, an adjustment to the wage index based on commuting patterns of employees (the out-migration adjustment), an adjustment to the wage index for certain low wage index hospitals to help address wage index disparities between low and high wage index hospitals, and a 5-percent cap on any decrease to a hospital's wage index from its wage index in the prior FY. We refer readers to the FY 2023 IPPS/LTCH PPS final rule (87 FR 48990 through 49021) and the FY 2023 hospital wage index files posted on the CMS website at *https://www.cms.gov/medicare/acute-inpatient-pps/fy-2023-ipps-final-rule-home-page.* With regard to budget neutrality for the CY 2023 OPPS wage index, we refer readers to section II.B. of this CY 2023 OPPS/ASC final rule.

We also are finalizing our proposal without modification to continue our policy of allowing non-IPPS hospitals paid under the OPPS to qualify for the outmigration adjustment if they are located in a section 505 out-migration county (section 505 of the MMA). Furthermore, we also are finalizing our proposal without modification that the wage index that would apply for CY 2023 to non-IPPS hospitals paid under the OPPS would continue to include the rural floor adjustment and any policies and adjustments applied to the IPPS wage index to address wage index disparities.

For CMHCs, for CY 2023, we proposed to continue to calculate the wage index by using the post-reclassification IPPS wage index based on the CBSA where the CMHC is located. Furthermore, we proposed that the wage index that would apply to a CMHC for CY 2023 would continue to include the rural floor adjustment and any policies and adjustments applied to the IPPS wage index to address wage index disparities. In addition, we stated that the wage index that would apply to CMHCs would include the 5 percent cap on wage index decreases that we may finalize for the FY 2023 IPPS wage index as discussed above. Also, we proposed that the wage index that would apply to CMHCs would not include the outmigration adjustment because that adjustment only applies to hospitals.

We did not receive any public comments on these proposals, and we are finalizing these proposals without modification.

Table 4A associated with the FY 2023 IPPS/LTCH PPS final rule (available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index*) identifies counties eligible for the out-migration adjustment. Table 2 associated with the FY 2023 IPPS/LTCH PPS final rule (available for download via the website above) identifies IPPS hospitals that receive the out-migration adjustment for FY 2023. We are including the outmigration adjustment information from Table 2 associated with the FY 2023 IPPS/LTCH PPS final rule as Addendum L to this final rule, with the addition of non-IPPS hospitals that would receive the section 505 outmigration adjustment under this final rule. Addendum L is available via the internet on the CMS website. We refer readers to the CMS website for the OPPS at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.* At this link, readers will find a link to the final FY 2023 IPPS wage index tables and Addendum L.

D. Proposed Statewide Average Default Cost-to-Charge Ratios (CCRs)

In addition to using CCRs to estimate costs from charges on claims for ratesetting, we use overall hospital-specific CCRs calculated from the hospital's most recent cost report (OMB NO: 0938–0050 for Form CMS–2552–10) to determine outlier payments, payments for pass-through devices, and monthly interim transitional corridor payments under the OPPS during the PPS year. For certain hospitals, under the regulations at 42 CFR 419.43(d)(5)(iii), we use the statewide average default CCRs to determine the payments mentioned earlier if it is not possible to determine an accurate CCR for a hospital in certain circumstances. This includes hospitals that are new, hospitals that have not accepted assignment of an existing hospital's provider agreement, and hospitals that have not yet submitted a cost report. We also use the statewide average default CCRs to determine payments for hospitals whose CCR falls outside the predetermined ceiling threshold for a valid CCR or for hospitals in which the most recent cost report reflects an all-inclusive rate status (Medicare Claims Processing Manual (Pub. 100–04), Chapter 4, Section 10.11).

We discussed our policy for using default CCRs, including setting the ceiling threshold for a valid CCR, in the CY 2009 OPPS/ASC final rule with comment period (73 FR 68594 through 68599) in the context of our adoption of an outlier reconciliation policy for cost reports beginning on or after January 1, 2009. For details on our process for calculating the statewide average CCRs, we refer readers to the CY 2022 OPPS final rule Claims Accounting Narrative that is posted on our website. Due to concerns with cost report data as a result of the COVID–19 PHE, we proposed to calculate the default ratios for CY 2023 using the June 2020 HCRIS cost reports, consistent with the broader proposal regarding CY 2023 OPPS ratesetting discussed in section X.D of the CY 2023 OPPS/ASC proposed rule (87 FR 44680 through 44682).

We did not receive any public comments on our proposal and are

finalizing our proposal, without modification, to calculate the default ratios for CY 2023 using the June 2020 HCRIS cost reports, consistent with the broader proposal regarding CY 2023 OPPS ratesetting.

We no longer publish a table in the **Federal Register** containing the statewide average CCRs in the annual OPPS proposed rule and final rule with comment period. These CCRs with the upper limit will be available for download with each OPPS CY proposed rule and final rule on the CMS website. We refer readers to our website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices.html;* click on the link on the left of the page titled ''Hospital Outpatient Regulations and Notices'' and then select the relevant regulation to download the statewide CCRs and upper limit in the downloads section of the web page.

E. Adjustment for Rural Sole Community Hospitals (SCHs) and Essential Access Community Hospitals (EACHs) Under Section 1833(t)(13)(B) of the Act for CY 2023

In the CY 2006 OPPS final rule with comment period (70 FR 68556), we finalized a payment increase for rural sole community hospitals (SCHs) of 7.1 percent for all services and procedures paid under the OPPS, excluding drugs, biologicals, brachytherapy sources, and devices paid under the pass-through payment policy, in accordance with section 1833(t)(13)(B) of the Act, as added by section 411 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) (Pub. L. 108–173). Section 1833(t)(13) of the Act provided the Secretary the authority to make an adjustment to OPPS payments for rural hospitals, effective January 1, 2006, if justified by a study of the difference in costs by APC between hospitals in rural areas and hospitals in urban areas. Our analysis showed a difference in costs for rural SCHs. Therefore, for the CY 2006 OPPS, we finalized a payment adjustment for rural SCHs of 7.1 percent for all services and procedures paid under the OPPS, excluding separately payable drugs and biologicals, brachytherapy sources, items paid at charges reduced to costs, and devices paid under the pass-through payment policy, in accordance with section 1833(t)(13)(B) of the Act.

In the CY 2007 OPPS/ASC final rule with comment period (71 FR 68010 and 68227), for purposes of receiving this rural adjustment, we revised our regulations at § 419.43(g) to clarify that essential access community hospitals (EACHs) are also eligible to receive the rural SCH adjustment, assuming these entities otherwise meet the rural adjustment criteria. Currently, two hospitals are classified as EACHs, and as of CY 1998, under section 4201(c) of Public Law 105–33, a hospital can no longer become newly classified as an EACH.

This adjustment for rural SCHs is budget neutral and applied before calculating outlier payments and copayments. We stated in the CY 2006 OPPS final rule with comment period (70 FR 68560) that we would not reestablish the adjustment amount on an annual basis, but we may review the adjustment in the future and, if appropriate, would revise the adjustment. We provided the same 7.1 percent adjustment to rural SCHs, including EACHs, again in CYs 2008 through 2022.

For CY 2023, we proposed to continue the current policy of a 7.1 percent payment adjustment for rural SCHs, including EACHs, for all services and procedures paid under the OPPS, excluding separately payable drugs and biologicals, brachytherapy sources, items paid at charges reduced to costs, and devices paid under the pass-through payment policy, applied in a budget neutral manner.

Comment: Two commenters requested that the 7.1 percent payment adjustment be allowed for providers other than rural SCHs and EACHs. The commenters suggested the following providers should receive the adjustment: Medicare dependent hospitals, rural referral centers, urban sole community hospitals, and rural hospitals with fewer than 100 beds that cannot be classified as SCHs or CAHs because they do not meet the mileage requirements for SCHs and CAHs.

Response: Our study of the difference in costs by APC between hospitals in rural areas and hospitals in urban areas only showed a significant difference in costs for rural SCHs. We did not identify significant cost differences between hospitals in urban areas and hospitals in rural areas for the types of hospitals described by the commenters. Therefore, we are not expanding the types of hospitals eligible for the 7.1 percent payment adjustment.

Comment: Multiple commenters are in favor of our policy to apply a 7.1 percent payment adjustment for rural SCHs, including EACHs.

Response: We appreciate the commenters' support of our policy.

After consideration of the public comments we received, we are finalizing our proposal, without modification, to continue our current policy of utilizing a budget neutral 7.1 percent payment adjustment for rural SCHs, including EACHs, for all services and procedures paid under the OPPS, excluding separately payable drugs and biologicals, devices paid under the passthrough payment policy, and items paid at charges reduced to costs.

F. Payment Adjustment for Certain Cancer Hospitals for CY 2023

1. Background

Since the inception of the OPPS, which was authorized by the Balanced Budget Act of 1997 (BBA) (Pub. L. 105–33), Medicare has paid the 11 hospitals that meet the criteria for cancer hospitals identified in section 1886(d)(1)(B)(v) of the Act under the OPPS for covered outpatient hospital services. These cancer hospitals are exempted from payment under the IPPS. With the Medicare, Medicaid and SCHIP Balanced Budget Refinement Act of 1999 (Pub. L. 106–113), the Congress added section 1833(t)(7), ''Transitional Adjustment to Limit Decline in Payment,'' to the Act, which requires the Secretary to determine OPPS payments to cancer and children's hospitals based on their pre-BBA payment amount (these hospitals are often referred to under this policy as ''held harmless'' and their payments are often referred to as ''hold harmless'' payments).

As required under section 1833(t)(7)(D)(ii) of the Act, a cancer hospital receives the full amount of the difference between payments for covered outpatient services under the OPPS and a ''pre-BBA amount.'' That is, cancer hospitals are permanently held harmless to their ''pre-BBA amount,'' and they receive transitional outpatient payments (TOPs) or hold harmless payments to ensure that they do not receive a payment that is lower in amount under the OPPS than the payment amount they would have received before implementation of the OPPS, as set forth in section 1833(t)(7)(F) of the Act. The ''pre-BBA amount'' is the product of the hospital's reasonable costs for covered outpatient services occurring in the current year and the base payment-to-cost ratio (PCR) for the hospital defined in section 1833(t)(7)(F)(ii) of the Act. The ''pre-BBA amount'' and the determination of the base PCR are defined at § 419.70(f). TOPs are calculated on Worksheet E, Part B, of the Hospital Cost Report or the Hospital Health Care Complex Cost Report (Form CMS–2552–96 or Form CMS–2552–10 (OMB NO: 0938–0050), respectively), as applicable each year.

Section 1833(t)(7)(I) of the Act exempts TOPs from budget neutrality calculations.

Section 3138 of the Affordable Care Act amended section 1833(t) of the Act by adding a new paragraph (18), which instructs the Secretary to conduct a study to determine if, under the OPPS, outpatient costs incurred by cancer hospitals described in section 1886(d)(1)(B)(v) of the Act with respect to APC groups exceed outpatient costs incurred by other hospitals furnishing services under section 1833(t) of the Act, as determined appropriate by the Secretary. Section 1833(t)(18)(A) of the Act requires the Secretary to take into consideration the cost of drugs and biologicals incurred by cancer hospitals and other hospitals. Section 1833(t)(18)(B) of the Act provides that, if the Secretary determines that cancer hospitals' costs are higher than those of other hospitals, the Secretary shall provide an appropriate adjustment under section 1833(t)(2)(E) of the Act to reflect these higher costs. In 2011, after conducting the study required by section 1833(t)(18)(A) of the Act, we determined that outpatient costs incurred by the 11 specified cancer hospitals were greater than the costs incurred by other OPPS hospitals. For a complete discussion regarding the cancer hospital cost study, we refer readers to the CY 2012 OPPS/ASC final rule with comment period (76 FR 74200 through 74201).

Based on these findings, we finalized a policy to provide a payment adjustment to the 11 specified cancer hospitals that reflects their higher outpatient costs, as discussed in the CY 2012 OPPS/ASC final rule with comment period (76 FR 74202 through 74206). Specifically, we adopted a policy to provide additional payments to the cancer hospitals so that each cancer hospital's final PCR for services provided in a given calendar year is equal to the weighted average PCR (which we refer to as the ''target PCR'') for other hospitals paid under the OPPS. The target PCR is set in advance of the calendar year and is calculated using the most recently submitted or settled cost report data that are available at the time of final rulemaking for the calendar year. The amount of the payment adjustment is made on an aggregate basis at cost report settlement. We note that the changes made by section 1833(t)(18) of the Act do not affect the existing statutory provisions that provide for TOPs for cancer hospitals. The TOPs are assessed, as usual, after all payments, including the cancer hospital payment adjustment, have been made for a cost reporting period. Table 5 displays the target PCR for purposes of the cancer hospital adjustment for CY 2012 through CY 2022.

TABLE 5: CANCER HOSPITAL ADJUSTMENT TARGET PAYMENT PAYMENT-TO-COST RATIOS (PCRs), CY 2012 THROUGH CY 2022

Calendar Year	Target PCR
2012	0.91
2013	0.91
2014	0.90
2015	0.90
2016	0.92
2017	0.91
2018	0.88
2019	0.88
2020	0.89
2021	0.89
2022	0.89

2. Policy for CY 2023

Section 16002(b) of the 21st Century Cures Act (Pub. L. 114–255) amended section 1833(t)(18) of the Act by adding subparagraph (C), which requires that in applying § 419.43(i) (that is, the payment adjustment for certain cancer hospitals) for services furnished on or after January 1, 2018, the target PCR adjustment be reduced by 1.0 percentage point less than what would otherwise apply. Section 16002(b) also provides that, in addition to the percentage reduction, the Secretary may consider making an additional percentage point reduction to the target PCR that takes into account payment rates for applicable items and services described under section 1833(t)(21)(C) of the Act for hospitals that are not cancer hospitals described under section 1886(d)(1)(B)(v) of the Act. Further, in making any budget neutrality adjustment under section 1833(t) of the Act, the Secretary shall not take into account the reduced expenditures that result from application of section 1833(t)(18)(C) of the Act.

We proposed to provide additional payments to the 11 specified cancer hospitals so that each cancer hospital's proposed PCR is equal to the weighted average PCR (or ''target PCR'') for the other OPPS hospitals, generally using the most recent submitted or settled cost report data that are available, reduced by 1.0 percentage point, to comply with section 16002(b) of the 21st Century Cures Act. We did not propose an additional reduction beyond the 1.0 percentage point reduction required by section 16002(b) of the 21st Century Cures Act for CY 2023.

Under our established policy, to calculate the proposed CY 2023 target PCR, we used the same extract of cost report data from HCRIS used to estimate costs for the CY 2023 OPPS which, in most cases, would be the most recently available hospital cost reports. However, as discussed in section II.A.1.c and X.D of the CY 2023 OPPS/ASC proposed rule (87 FR 44510 through 44511 and 87 FR 44680 through 44682), we proposed to use cost report data from the June 2020 HCRIS data set, which does not

contain cost reports from CY 2020, given our concerns with CY 2020 cost report data as a result of the COVID–19 PHE. We believe a target PCR based on the most recently available cost reports may provide a less accurate estimation of cancer hospital PCRs and non-cancer hospital PCRs than the data used for the CY 2022 rulemaking cycle, which pre-dated the COVID–19 PHE. Therefore, for CY 2023, we proposed to continue to use the same target PCR we used for CY 2021 and CY 2022 of 0.89. This proposed CY 2023 target PCR of 0.89 includes the 1.0-percentage point reduction required by section 16002(b) of the 21st Century Cures Act for CY 2023. For a description of the CY 2021 target PCR calculation, on which the proposed CY 2023 target PCR is based, we refer readers to the CY 2021 OPPS/ASC final rule with comment period (84 FR 85912 through 85914).

Comment: One commenter supported our proposed target PCR of 0.89.

Response: We thank the commenter for their support.

After consideration of the public comment we received, we are finalizing our proposal to continue to use the CY 2021 and CY 2022 target PCR of 0.89 for the 11 specified cancer hospitals for CY 2023 without modification.

Table 6 shows the estimated percentage increase in OPPS payments to each cancer hospital for CY 2023, due to the cancer hospital payment adjustment policy. The cost reporting periods for all cancer hospitals in Table 6 overlaps with CY 2020 and the costs and payments associated with each cancer hospital may be impacted by the effects of the COVID–19 PHE. Therefore, the estimates in Table 6 are likely to be less accurate than in other years and may overstate the percentage increase in cancer hospital payments for CY 2023. The actual, final amount of the CY 2023 cancer hospital payment adjustment for each cancer hospital would be determined at cost report settlement and would depend on each hospital's CY 2023 payments and costs from the settled CY 2023 cost report. We note that the requirements contained in section 1833(t)(18) of the Act do not affect the existing statutory provisions that provide for TOPs for cancer hospitals. The TOPs will be assessed, as usual, after all payments, including the cancer hospital payment adjustment, have been made for a cost reporting period.

TABLE 6: Estimated CY 2023 Hospital-Specific Payment Adjustment For Cancer Hospitals To Be Provided At Cost Report Settlement

Provider Number	Hospital Name	Estimated Percentage Increase in OPPS Payments for CY 2023 due to Payment Adjustment
050146	City of Hope Comprehensive Cancer Center	45.5%
050660	USC Norris Cancer Hospital	31.7%
100079	Sylvester Comprehensive Cancer Center	24.1%
100271	H. Lee Moffitt Cancer Center & Research Institute	23.1%
220162	Dana-Farber Cancer Institute	42.7%
330154	Memorial Sloan-Kettering Cancer Center	69.2%
330354	Roswell Park Cancer Institute	15.2%
360242	James Cancer Hospital & Solove Research Institute	12.9%
390196	Fox Chase Cancer Center	23.5%
450076	M.D. Anderson Cancer Center	49.4%
500138	Seattle Cancer Care Alliance	46.1%

G. Hospital Outpatient Outlier Payments

1. Background

The OPPS provides outlier payments to hospitals to help mitigate the financial risk associated with high-cost and complex procedures, where a very costly service could present a hospital with significant financial loss. As explained in the CY 2015 OPPS/ASC final rule with comment period (79 FR 66832 through 66834), we set our projected target for aggregate outlier payments at 1.0 percent of the estimated aggregate total payments under the OPPS for the prospective year. Outlier payments are provided on a service-by-service basis when the cost of a service exceeds the APC payment amount multiplier threshold (the APC payment amount multiplied by a certain amount) as well as the APC payment amount plus a fixed-dollar amount threshold (the APC payment plus a certain dollar amount). In CY 2022, the outlier threshold was met when the hospital's cost of furnishing a service exceeded 1.75 times (the multiplier threshold) the APC payment amount and exceeded the APC payment amount plus $6,175 (the fixed-dollar amount threshold) (86 FR 63508 through 63510). If the hospital's

cost of furnishing a service exceeds both the multiplier threshold and the fixed-dollar threshold, the outlier payment is calculated as 50 percent of the amount by which the hospital's cost of furnishing the service exceeds 1.75 times the APC payment amount. Beginning with CY 2009 payments, outlier payments are subject to a reconciliation process similar to the IPPS outlier reconciliation process for cost reports, as discussed in the CY 2009 OPPS/ASC final rule with comment period (73 FR 68594 through 68599).

It has been our policy to report the actual amount of outlier payments as a percent of total spending in the claims being used to model the OPPS. Our estimate of total outlier payments as a percent of total CY 2021 OPPS payments, using CY 2021 claims available for this final rule with comment period, is approximately 1.16 percent. Therefore, for CY 2021, we estimate that we exceeded the outlier target by 0.16 percent of total aggregated OPPS payments.

For this final rule with comment period, using CY 2021 claims data and CY 2022 payment rates, we estimate that the aggregate outlier payments for CY 2022 would be approximately 1.26 percent of the total CY 2022 OPPS payments. We provide estimated CY 2023 outlier payments for hospitals and CMHCs with claims included in the claims data that we used to model impacts in the Hospital–Specific Impacts—Provider-Specific Data file on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html*.

2. Outlier Calculation for CY 2023

For CY 2023, we proposed to continue our policy of estimating outlier payments to be 1.0 percent of the estimated aggregate total payments under the OPPS. We proposed that a portion of that 1.0 percent, an amount equal to less than 0.01 percent of outlier payments (or 0.0001 percent of total OPPS payments), would be allocated to CMHCs for PHP outlier payments. This is the amount of estimated outlier payments that would result from the proposed CMHC outlier threshold as a proportion of total estimated OPPS outlier payments. We proposed to continue our longstanding policy that if a CMHC's cost for partial hospitalization services, paid under APC 5853 (Partial Hospitalization for CMHCs), exceeds 3.40 times the payment rate for proposed APC 5853, the outlier payment would be calculated as 50 percent of the amount by which the cost exceeds 3.40 times the proposed APC 5853 payment rate.

For further discussion of CMHC outlier payments, we refer readers to section VIII.C of this final rule with comment period.

To ensure that the estimated CY 2023 aggregate outlier payments would equal 1.0 percent of estimated aggregate total payments under the OPPS, we proposed that the hospital outlier threshold be set so that outlier payments would be triggered when a hospital's cost of furnishing a service exceeds 1.75 times the APC payment amount and exceeds the APC payment amount plus $8,350.

We calculated the proposed fixed-dollar threshold of $8,350 using the standard methodology most recently used for CY 2022 (86 FR 63508 through 63510). For purposes of estimating outlier payments for CY 2023, we use the hospital-specific overall ancillary CCRs available in the April 2022 update to the Outpatient Provider-Specific File (OPSF). The OPSF contains provider-specific data, such as the most current CCRs, which are maintained by the MACs and used by the OPPS Pricer to pay claims. The claims that we generally use to model each OPPS update lag by 2 years.

In order to estimate the CY 2023 hospital outlier payments, we inflate the charges on the CY 2021 claims using the same proposed charge inflation factor of 1.13218 that we used to estimate the IPPS fixed-loss cost threshold for the FY 2023 IPPS/LTCH PPS proposed rule (87 FR 28667). We used an inflation factor of 1.06404 to estimate CY 2022 charges from the CY 2021 charges reported on CY 2021 claims before applying CY 2022 CCRs to estimate the percent of outliers paid in CY 2022. The proposed methodology for determining these charge inflation factors, as well as the solicitation of comments on an alternative approach, is discussed in the FY 2023 IPPS/LTCH PPS proposed rule (87 FR 28667 through 28678). As we stated in the CY 2005 OPPS final rule with comment period (69 FR 65844 through 65846), we believe that the use of the same charge inflation factors is appropriate for the OPPS because, with the exception of the inpatient routine service cost centers, hospitals use the same ancillary and cost centers to capture costs and charges for inpatient and outpatient services.

As noted in the CY 2007 OPPS/ASC final rule with comment period (71 FR 68011), we are concerned that we could systematically overestimate the OPPS hospital outlier threshold if we did not apply a CCR inflation adjustment factor. Therefore, we proposed to apply the same CCR adjustment factor that we proposed to apply for the FY 2023 IPPS outlier calculation to the CCRs used to simulate the proposed CY 2023 OPPS outlier payments to determine the fixed-dollar threshold. Specifically, for CY 2023, we proposed to apply an adjustment factor of 0.974495 to the CCRs that were in the April 2022 OPSF to trend them forward from CY 2022 to CY 2023. The methodology for calculating the proposed CCR adjustment factor, as well as the solicitation of comments on an alternative approach, is discussed in the FY 2023 IPPS/LTCH PPS proposed rule (87 FR 28668). We note that we proposed to use the April 2022 OPSF for purposes of estimating costs for the OPPS outlier threshold calculation whereas in Section X.D. of the CY 2023 OPPS/ASC proposed rule (87 FR 44680 through 44682) we discussed using June 2020 HCRIS data extract for modeling hospital outpatient costs in construction of our CY 2023 OPPS relative weights. For modeling estimated outlier payments, since the April 2022 OPSF contains cost data primarily from CY 2021 and CY 2022 and is the basis for current CY 2022 OPPS outlier payments, we stated that we believe the April 2022 OPSF provides a more updated and accurate data source for determining the CCRs that will be applied to CY 2023 hospital outpatient claims. Therefore, we explained that we believe the April 2022 OPSF is a more accurate data source for determining the fixed-dollar threshold to ensure that the estimated CY 2023 aggregate outlier payments would equal 1.0 percent of estimated aggregate total payments under the OPPS.

To model hospital outlier payments for the CY 2023 proposed rule, we applied the overall CCRs from the April 2022 OPSF after adjustment (using the proposed CCR inflation adjustment factor of 0.974495 to approximate CY 2023 CCRs) to charges on CY 2021 claims that were adjusted (using the proposed charge inflation factor of 1.13218 to approximate CY 2023 charges). We simulated aggregated CY 2021 hospital outlier payments using these costs for several different fixed-dollar thresholds, holding the 1.75 multiplier threshold constant and assuming that outlier payments would continue to be made at 50 percent of the amount by which the cost of furnishing the service would exceed 1.75 times the APC payment amount, until the total outlier payments equaled 1.0 percent of aggregated estimated total CY 2023 OPPS payments. We estimated that a proposed fixed-dollar threshold of $8,350, combined with the proposed

multiplier threshold of 1.75 times the APC payment rate, would allocate 1.0 percent of aggregated total OPPS payments to outlier payments. For CMHCs, we proposed that, if a CMHC's cost for partial hospitalization services, paid under APC 5853, exceeds 3.40 times the payment rate for APC 5853, the outlier payment would be calculated as 50 percent of the amount by which the cost exceeds 3.40 times the APC 5853 payment rate.

Section 1833(t)(17)(A) of the Act, which applies to hospitals, as defined under section 1886(d)(1)(B) of the Act, requires that hospitals that fail to report data required for the quality measures selected by the Secretary, in the form and manner required by the Secretary under section 1833(t)(17)(B) of the Act, incur a 2.0 percentage point reduction to their OPD fee schedule increase factor; that is, the annual payment update factor. The application of a reduced OPD fee schedule increase factor results in reduced national unadjusted payment rates that would apply to certain outpatient items and services furnished by hospitals that are required to report outpatient quality data and that fail to meet the Hospital Outpatient Quality Reporting (OQR) Program requirements. For hospitals that fail to meet the Hospital OQR Program requirements, we proposed to continue the policy that we implemented in CY 2010 that the hospitals' costs would be compared to the reduced payments for purposes of outlier eligibility and payment calculation. For more information on the Hospital OQR Program, we refer readers to Section XIV of the CY 2023 OPPS/ASC proposed rule (87 FR 44726 through 44740).

Comment: Many commenters expressed concern about the proposed CY 2023 fixed-dollar threshold of $8,350 and its large increase from the final CY 2022 fixed-dollar threshold of $6,175. Many commenters were concerned that fewer cases would qualify for OPPS outlier payments, potentially underfunding hospitals, and missing our 1.0 percent target. Commenters also noted that, in the FY 2023 Inpatient Prospective Payment System (IPPS)/Long Term Care Hospital (LTCH) Prospective Payment System final rule, in response to stakeholder comments, we finalized a lower fixed loss amount for IPPS outliers after blending fixed loss amounts that were modeled with COVID inpatient admissions and without COVID inpatient admissions. Commenters recommended that we revisit our methodology for determining the CY 2023 OPPS fixed-dollar threshold to be sure that we meet our 1.0 percent target.

Response: We appreciate the commenters' concerns regarding the large increase in CY 2023 OPPS fixed-dollar threshold from CY 2022. We have reviewed and analyzed our methodology as well as the most up to date CCRs available in the July 2022 OPSF for determining estimated outlier payments. We estimate that the increase in the fixed-dollar threshold from CY 2022 to CY 2023 is largely attributable to an increase in reported charges on hospital outpatient claims. Holding CCRs constant, an increase in reported charges otherwise increases the charges reduced to cost on hospital outpatient claims. An additional contributing factor is an increase in hospital CCRs in the July 2022 OPSF when compared to the July 2021 OPSF. The increase in hospital CCRs further increases the charges reduced to cost on hospital outpatient claims. We believe the combination of these two factors has increased hospital outpatient costs, thereby allowing more cases to qualify for OPPS outlier payments. To counterbalance these increases, as described in our final calculation below, our modeling estimates a large increase in the OPPS fixed-dollar threshold is required to maintain a 1.0 percent OPPS outlier spending target. As discussed further in section X.D of this final rule with comment period, we believe it is reasonable to assume that there would continue to be some effects of the COVID–19 PHE on the outpatient claims that we use for OPPS ratesetting, similar to the CY 2021 claims data. As a result, we did not exclude such COVID–19 cases for determining the CY 2023 fixed-dollar threshold.

As described in our final calculation below, we do not believe modification to the underlying methodology is warranted at this time. Therefore, we are finalizing our proposal to determine a fixed-dollar threshold, combined with the proposed multiplier threshold of 1.75 times the APC payment rate, that would allocate 1.0 percent of aggregated total OPPS payments to outlier payments.

3. Final Outlier Calculation

Historically, we have used updated data for the outlier fixed-dollar threshold calculation for the final rule. However, as discussed in the CY 2022 OPPS/ASC final rule with comment period (86 FR 63510), we finalized our proposal to not use the most recent CCRs in the OPSF as they may be significantly impacted by the PHE. As we discussed in the CY 2023 OPPS/ASC proposed rule (87 FR 44533 through 44534), we believe the updated OPSF data for modeling the outlier fixed dollar threshold in the CY 2023 OPPS/ASC proposed rule provides a more accurate data source for estimating CY 2023 aggregate outlier payments. Similarly, we believe using updated OPSF data for this final rule with comment period provides the best source of CCRs for OPPS outlier calculations. For CY 2023, we are applying the overall ancillary CCRs from the July 2022 OPSF file after adjustment (using the CCR inflation adjustment factor 0.974495 to approximate CY 2023 CCRs) to charges on CY 2021 claims that were adjusted using a charge inflation factor of 1.13218 to approximate CY 2023 charges. These are the same CCR adjustment and charge inflation factors that were used to model IPPS outlier payments and to determine the final IPPS fixed-loss threshold for the FY 2023 IPPS/LTCH PPS final rule (87 FR 49427). We simulated aggregated CY 2023 hospital outlier payments using these costs for several different fixed-dollar thresholds, holding the 1.75 multiple-threshold constant and assuming that outlier payments will continue to be made at 50 percent of the amount by which the cost of furnishing the service would exceed 1.75 times the APC payment amount, until the total outlier payment equaled 1.0 percent of aggregated estimated total CY 2023 OPPS payments. We estimated that a fixed-dollar threshold of $8,625 combined with the multiple-threshold of 1.75 times the APC payment rate, will allocate 1.0 percent of aggregated total OPPS payments to outlier payments. For example, in CY 2023, if 1.75 times the APC amount is $5,000 and the applicable costs on the claim totaled $10,000 (which also exceeds our CY 2023 fixed-dollar threshold of $8,625), the hospital would receive an outlier payment of $2,500 (($10,000 − $5,000) * 0.50). However, if the applicable cost on the claim totaled $8,000, which does not exceed our CY 2023 fixed-dollar threshold, no outlier payment would be made.

For CMHCs, if a CMHC's cost for partial hospitalization services, paid under APC 5853, exceeds 3.40 times the payment rate, the outlier payment will be calculated as 50 percent of the amount by which the cost exceeds 3.40 times APC 5853.

H. Calculation of an Adjusted Medicare Payment From the National Unadjusted Medicare Payment

The national unadjusted payment rate is the is payment rate for most APC's before accounting for the wage index

adjustment or any applicable adjustments. The basic methodology for determining prospective payment rates for HOPD services under the OPPS is set forth in existing regulations at 42 CFR part 419, subparts C and D. For this CY 2023 OPPS/ASC final rule with comment period, the payment rate for most services and procedures for which payment is made under the OPPS is the product of the conversion factor calculated in accordance with section II.B of this final rule with comment period and the relative payment weight described in section II.A of this final rule with comment period. The national unadjusted payment rate for most APCs contained in Addendum A to this final rule with comment period (which is available via the CMS website at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Addendum-A-and-Addendum-B-Updates*) and for most HCPCS codes to which separate payment under the OPPS has been assigned in Addendum B to this final rule with comment period (which is available on the CMS website link above) is calculated by multiplying the final CY 2023 scaled weight for the APC by the CY 2023 conversion factor.

We note that section 1833(t)(17) of the Act, which applies to hospitals, as defined under section 1886(d)(1)(B) of the Act, requires that hospitals that fail to submit data required to be submitted on quality measures selected by the Secretary, in the form and manner and at a time specified by the Secretary, incur a reduction of 2.0 percentage points to their OPD fee schedule increase factor, that is, the annual payment update factor. The application of a reduced OPD fee schedule increase factor results in reduced national unadjusted payment rates that apply to certain outpatient items and services provided by hospitals that are required to report outpatient quality data and that fail to meet the Hospital OQR Program requirements. For further discussion of the payment reduction for hospitals that fail to meet the requirements of the Hospital OQR Program, we refer readers to section XIV of this final rule with comment period.

We demonstrated the steps used to determine the APC payments that will be made in a CY under the OPPS to a hospital that fulfills the Hospital OQR Program requirements and to a hospital that fails to meet the Hospital OQR Program requirements for a service that has any of the following status indicator assignments: ''J1'', ''J2'', ''P'', ''Q1'', ''Q2'', ''Q3'', ''Q4'', ''R'', ''S'', ''T'', ''U'', or ''V'' (as defined in Addendum D1 to this final rule with comment period, which is available via the internet on the CMS website), in a circumstance in which the multiple procedure discount does not apply, the procedure is not bilateral, and conditionally packaged services (status indicator of ''Q1'' and ''Q2'') qualify for separate payment. We note that, although blood and blood products with status indicator ''R'' and brachytherapy sources with status indicator ''U'' are not subject to wage adjustment, they are subject to reduced payments when a hospital fails to meet the Hospital OQR Program requirements.

Individual providers interested in calculating the payment amount that they will receive for a specific service from the national unadjusted payment rates presented in Addenda A and B to this final rule with comment period (which are available via the internet on the CMS website) should follow the formulas presented in the following steps. For purposes of the payment calculations below, we refer to the national unadjusted payment rate for hospitals that meet the requirements of the Hospital OQR Program as the ''full'' national unadjusted payment rate. We refer to the national unadjusted payment rate for hospitals that fail to meet the requirements of the Hospital OQR Program as the ''reduced'' national unadjusted payment rate. The reduced national unadjusted payment rate is calculated by multiplying the reporting ratio of 0.9807 times the ''full'' national unadjusted payment rate. The national unadjusted payment rate used in the calculations below is either the full national unadjusted payment rate or the reduced national unadjusted payment rate, depending on whether the hospital met its Hospital OQR Program requirements to receive the full CY 2023 OPPS fee schedule increase factor.

Step 1. Calculate 60 percent (the labor-related portion) of the national unadjusted payment rate. Since the initial implementation of the OPPS, we have used 60 percent to represent our estimate of that portion of costs attributable, on average, to labor. We refer readers to the April 7, 2000 OPPS/ASC final rule with comment period (65 FR 18496 through 18497) for a detailed discussion of how we derived this percentage. During our regression analysis for the payment adjustment for rural hospitals in the CY 2006 OPPS final rule with comment period (70 FR 68553), we confirmed that this labor-related share for hospital outpatient services is appropriate.

The formula below is a mathematical representation of Step 1 and identifies the labor-related portion of a specific payment rate for a specific service.

X is the labor-related portion of the national unadjusted payment rate.

$X = .60 *$ (national unadjusted payment rate).

Step 2. Determine the wage index area in which the hospital is located and identify the wage index level that applies to the specific hospital. The wage index values assigned to each area would reflect the geographic statistical areas (which are based upon OMB standards) to which hospitals are assigned for FY 2023 under the IPPS, reclassifications through the Medicare Geographic Classification Review Board (MGCRB), section 1886(d)(8)(B) ''Lugar'' hospitals, and reclassifications under section 1886(d)(8)(E) of the Act, as implemented in § 412.103 of the regulations. We are continuing to apply for the CY 2023 OPPS wage index any adjustments for the FY 2023 IPPS post-reclassified wage index, including, but not limited to, the rural floor adjustment, a wage index floor of 1.00 in frontier states, in accordance with section 10324 of the Affordable Care Act of 2010, and an adjustment to the wage index for certain low wage index hospitals. For further discussion of the wage index we are applying for the CY 2023 OPPS, we refer readers to section II.C of this final rule with comment period.

Step 3. Adjust the wage index of hospitals located in certain qualifying counties that have a relatively high percentage of hospital employees who reside in the county, but who work in a different county with a higher wage index, in accordance with section 505 of Public Law 108–173. Addendum L to this final rule with comment period (which is available via the internet on the CMS website) contains the qualifying counties and the associated wage index increase developed for the final FY 2023 IPPS wage index, which are listed in Table 3 associated with the FY 2023 IPPS final rule and available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html.* (Click on the link on the left side of the screen titled ''FY 2023 IPPS Final Rule Home Page'' and select ''FY 2023 Final Rule Tables.'') This step is to be followed only if the hospital is not reclassified or redesignated under section 1886(d)(8) or section 1886(d)(10) of the Act.

Step 4. Multiply the applicable wage index determined under Steps 2 and 3 by the amount determined under Step 1 that represents the labor-related portion of the national unadjusted payment rate.

The formula below is a mathematical representation of Step 4 and adjusts the

labor-related portion of the national unadjusted payment rate for the specific service by the wage index.

X_a *is the labor-related portion of the national unadjusted payment rate (wage adjusted).*

X_a = *labor-portion of the national unadjusted payment rate * applicable wage index.*

Step 5. Calculate 40 percent (the nonlabor-related portion) of the national unadjusted payment rate and add that amount to the resulting product of Step 4. The result is the wage index adjusted payment rate for the relevant wage index area.

The formula below is a mathematical representation of Step 5 and calculates the remaining portion of the national payment rate, the amount not attributable to labor, and the adjusted payment for the specific service.

Y is the nonlabor-related portion of the national unadjusted payment rate.

Y = .40 * (national unadjusted payment rate).

Step 6. If a provider is an SCH, as set forth in the regulations at § 412.92, or an EACH, which is considered to be an SCH under section 1886(d)(5)(D)(iii)(III) of the Act, and located in a rural area, as defined in § 412.64(b), or is treated as being located in a rural area under § 412.103, multiply the wage index adjusted payment rate by 1.071 to calculate the total payment.

The formula below is a mathematical representation of Step 6 and applies the rural adjustment for rural SCHs.

Adjusted Medicare Payment (SCH or EACH) = Adjusted Medicare Payment * 1.071.

Step 7. The adjusted payment rate is the sum the wage adjusted labor-related portion of the national unadjusted payment rate and the nonlabor-related portion of the national unadjusted payment rate.

X_a *is the labor-related portion of the national unadjusted payment rate (wage adjusted).*

Y is the nonlabor-related portion of the national unadjusted payment rate.

Adjusted Medicare Payment = $X_a + Y$

We are providing examples below of the calculation of both the full and reduced national unadjusted payment rates that will apply to certain outpatient items and services performed by hospitals that meet and that fail to meet the Hospital OQR Program requirements, using the steps outlined previously. For purposes of this example, we are using a provider that is located in Brooklyn, New York that is assigned to CBSA 35614. This provider bills one service that is assigned to APC 5071 (Level 1 Excision/Biopsy/Incision and Drainage). The CY 2023 full national unadjusted payment rate for APC 5071 is $648.97. The reduced national adjusted payment rate for APC 5071 for a hospital that fails to meet the Hospital OQR Program requirements is $636.44. This reduced rate is calculated by multiplying the reporting ratio of 0.9807 by the full unadjusted payment rate for APC 5071.

Step 1. The labor-related portion of the full national unadjusted payment is approximately $389.38 (.60 * $648.97). The labor-related portion of the reduced national adjusted payment is approximately $381.86 (.60 * $636.44).

Step 2 & 3. The FY 2023 wage index for a provider located in CBSA 35614 in New York, which includes the adoption of IPPS 2023 wage index policies, is 1.3329.

Step 4. The wage adjusted labor-related portion of the full national unadjusted payment is approximately $519.00 ($389.38 * 1.3329). The wage adjusted labor-related portion of the reduced national adjusted payment is approximately $508.98 ($381.86 * 1.3329).

Step 5. The nonlabor-related portion of the full national unadjusted payment is approximately $259.59 (.40 * $648.97). The nonlabor-related portion of the reduced national adjusted payment is approximately $254.58 (.40 * $636.44).

Step 6. For this example of a provider located in Brooklyn, New York, the rural adjustment for rural SCHs does not apply.

Step 7. The sum of the labor-related and nonlabor-related portions of the full national unadjusted payment is approximately $778.59 ($519.00 + $259.59). The sum of the portions of the reduced national adjusted payment is approximately $763.56 ($508.98 + $254.58).

Full national unadjusted payment rate	Reduced national adjusted payment rate
$778.59	$763.56

We did not receive any public comments on our proposal and therefore, we are finalizing it as proposed.

I. Beneficiary Copayments

1. Background

Section 1833(t)(3)(B) of the Act requires the Secretary to set rules for determining the unadjusted copayment amounts to be paid by beneficiaries for covered OPD services. Section 1833(t)(8)(C)(ii) of the Act specifies that the Secretary must reduce the national unadjusted copayment amount for a covered OPD service (or group of such services) furnished in a year in a manner so that the effective copayment rate (determined on a national unadjusted basis) for that service in the year does not exceed a specified percentage. As specified in section 1833(t)(8)(C)(ii)(V) of the Act, the effective copayment rate for a covered OPD service paid under the OPPS in CY 2006, and in CYs thereafter, shall not exceed 40 percent of the APC payment rate.

Section 1833(t)(3)(B)(ii) of the Act provides that, for a covered OPD service (or group of such services) furnished in a year, the national unadjusted copayment amount cannot be less than 20 percent of the OPD fee schedule amount. However, section 1833(t)(8)(C)(i) of the Act limits the amount of beneficiary copayment that may be collected for a procedure (including items such as drugs and biologicals) performed in a year to the amount of the inpatient hospital deductible for that year.

Section 4104 of the Affordable Care Act eliminated the Medicare Part B coinsurance for preventive services furnished on and after January 1, 2011, that meet certain requirements, including flexible sigmoidoscopies and screening colonoscopies, and waived the Part B deductible for screening colonoscopies that become diagnostic during the procedure. For a discussion of the changes made by the Affordable Care Act with regard to copayments for preventive services furnished on and after January 1, 2011, we refer readers to section XII.B of the CY 2011 OPPS/ASC final rule with comment period (75 FR 72013).

Section 122 of the Consolidated Appropriations Act (CAA) of 2021 (Pub. L. 116–260), Waiving Medicare Coinsurance for Certain Colorectal Cancer Screening Tests, amends section 1833(a) of the Act to offer a special coinsurance rule for screening flexible sigmoidoscopies and screening colonoscopies, regardless of the code that is billed for the establishment of a diagnosis as a result of the test, or for the removal of tissue or other matter or other procedure, that is furnished in connection with, as a result of, and in the same clinical encounter as the colorectal cancer screening test. We refer readers to section X.B, ''Changes to Beneficiary Coinsurance for Certain Colorectal Cancer Screening Tests,'' of the CY 2022 OPPS/ASC final rule with comment period for the full discussion of this policy (86 FR 63740 through 63743). Under the regulation at 42 CFR 410.152(l)(5)(i)(B), the Medicare Part B payment percentage for colorectal cancer screening tests described in the regulation at § 410.37(j) that are furnished in CY 2023 through 2026 (and the corresponding reduction in coinsurance) is 85 percent (with beneficiary coinsurance equal to 15 percent).

On August 16, 2022, the Inflation Reduction Act of 2022 (IRA) (Pub. L. 117–169) was signed into law. Section 11101 of the Inflation Reduction Act requires a Part B inflation rebate for a Part B rebatable drug if the ASP of the drug rises at a rate that is faster than the rate of inflation. Section 11101(b) of the IRA amended sections 1833(i) and 1833(t)(8) by adding a new paragraph (9) and subparagraph (F), respectively, that specifies coinsurance under the ASC and OPPS payment systems. Section 1833(i)(9) requires that under the ASC payment system that beneficiary coinsurance for a Part B rebatable drug that is not packaged to be calculated using the inflation-adjusted amount when that amount is less than the otherwise applicable payment amount for the drug furnished on or after April 1, 2023. Section 1833(t)(8)(F) requires that under the OPPS payment system that beneficiary copayment for a Part B rebatable drug (except for a drug that has no copayment applied under subparagraph (E) of such section or packaged into the payment for a procedure) is to be calculated using the inflation-adjusted amount when that amount is less than ASP plus 6 percent beginning April 1, 2023. Sections 1833(i)(9) and 1833(t)(8)(F) reference sections 1847A(i)(5) for the computation of the beneficiary coinsurance and 1833(a)(1)(EE) for the computation of the payment to the ASC or provider and state that the computations would be done in the same manner as described in such provisions. The computation of the coinsurance is described in section 1847A(i), specifically, in computing the amount of any coinsurance applicable under Part B to an individual to whom such Part B rebatable drug is furnished, the computation of such coinsurance shall be equal to 20 percent of the inflation-adjusted payment amount determined under section 1847A(i)(3)(C) for such part B rebatable drug. The calculation of the payment to the provider or ASC is described in section 1833(a)(1)(EE), and the provider or ASC would be paid the difference between the beneficiary coinsurance or copayment of the inflation-adjusted amount and ASP plus 6 percent. We wish to make readers aware of this statutory change that begins April 1, 2023. We wish to make readers of this OPPS/ASC final rule aware of this statutory change. There are no regulatory changes reflecting this provision of the Act in this final rule. Additionally, we refer readers to the full text of the IRA.[5] Additional details on the implementation of section 11101 of the IRA are forthcoming and will be communicated through a vehicle other than the OPPS/ASC regulation.

2. OPPS Copayment Policy

For CY 2023, we proposed to determine copayment amounts for new and revised APCs using the same methodology that we implemented beginning in CY 2004. (We refer readers to the November 7, 2003 OPPS final rule with comment period (68 FR 63458).) In addition, we proposed to use the same standard rounding principles that we have historically used in instances where the application of our standard copayment methodology would result in a copayment amount that is less than 20 percent and cannot be rounded, under standard rounding principles, to 20 percent. (We refer readers to the CY 2008 OPPS/ASC final rule with comment period (72 FR 66687) in which we discuss our rationale for applying these rounding principles.) The final national unadjusted copayment amounts for services payable under the OPPS that would be effective January 1, 2023 are included in Addenda A and B to the CY 2023 OPPS/ASC final rule (which are available via the internet on the CMS website).

As discussed in section XIV.E of the CY 2023 proposed rule (87 FR 44536) and this final rule with comment period, for CY 2023, the Medicare beneficiary's minimum unadjusted copayment and national unadjusted copayment for a service to which a reduced national unadjusted payment rate applies will equal the product of the reporting ratio and the national unadjusted copayment, or the product of the reporting ratio and the minimum unadjusted copayment, respectively, for the service.

We note that OPPS copayments may increase or decrease each year based on changes in the calculated APC payment rates, due to updated cost report and claims data, and any changes to the OPPS cost modeling process. However, as described in the CY 2004 OPPS final rule with comment period, the development of the copayment methodology generally moves beneficiary copayments closer to 20 percent of OPPS APC payments (68 FR 63458 through 63459).

In the CY 2004 OPPS final rule with comment period (68 FR 63459), we adopted a new methodology to calculate unadjusted copayment amounts in situations including reorganizing APCs, and we finalized the following rules to determine copayment amounts in CY 2004 and subsequent years.

- When an APC group consists solely of HCPCS codes that were not paid under the OPPS the prior year because they were packaged or excluded or are new codes, the unadjusted copayment amount would be 20 percent of the APC payment rate.
- If a new APC that did not exist during the prior year is created and consists of HCPCS codes previously assigned to other APCs, the copayment amount is calculated as the product of the APC payment rate and the lowest coinsurance percentage of the codes comprising the new APC.
- If no codes are added to or removed from an APC and, after recalibration of its relative payment weight, the new payment rate is equal to or *greater than* the prior year's rate, the copayment amount remains constant (unless the resulting coinsurance percentage is less than 20 percent).
- If no codes are added to or removed from an APC and, after recalibration of its relative payment weight, the new payment rate is *less than* the prior year's rate, the copayment amount is calculated as the product of the new payment rate and the prior year's coinsurance percentage.
- If HCPCS codes are added to or deleted from an APC and, after recalibrating its relative payment weight, holding its unadjusted copayment amount constant results in a

[5] H.R. 5376 available online at: *https://www.congress.gov/bill/117th-congress/house-bill/5376/text.*

decrease in the coinsurance percentage for the reconfigured APC, the copayment amount would not change (unless retaining the copayment amount would result in a coinsurance rate less than 20 percent).

- If HCPCS codes are added to an APC and, after recalibrating its relative payment weight, holding its unadjusted copayment amount constant results in an increase in the coinsurance percentage for the reconfigured APC, the copayment amount would be calculated as the product of the payment rate of the reconfigured APC and the lowest coinsurance percentage of the codes being added to the reconfigured APC.

We noted in the CY 2004 OPPS final rule with comment period that we would seek to lower the copayment percentage for a service in an APC from the prior year if the copayment percentage was greater than 20 percent. We noted that this principle was consistent with section 1833(t)(8)(C)(ii) of the Act, which accelerates the reduction in the national unadjusted coinsurance rate so that beneficiary liability will eventually equal 20 percent of the OPPS payment rate for all OPPS services to which a copayment applies, and with section 1833(t)(3)(B) of the Act, which achieves a 20-percent copayment percentage when fully phased in and gives the Secretary the authority to set rules for determining copayment amounts for new services. We further noted that the use of this methodology would, in general, reduce the beneficiary coinsurance rate and copayment amount for APCs for which the payment rate changes as the result of the reconfiguration of APCs and/or recalibration of relative payment weights (68 FR 63459).

We did not receive any public comments on our proposal and therefore, we are finalizing our proposal to determine copayment amounts for new and revised APCs using the same methodology that we implemented beginning in CY 2004. In addition, we are finalizing the use of the same standard rounding principles that we have historically used in instances where the application of our standard copayment methodology would result in a copayment amount that is less than 20 percent and cannot be rounded, under standard rounding principles, to 20 percent. (We refer readers to the CY 2008 OPPS/ASC final rule with comment period (72 FR 66687) in which we discuss our rationale for applying these rounding principles.) The finalized national unadjusted copayment amounts for services payable under the OPPS that would be effective January 1, 2023 are included in Addenda A and B to the CY 2023 OPPS/ASC final rule (which are available via the internet on the CMS website).

3. Calculation of an Adjusted Copayment Amount for an APC Group

Individuals interested in calculating the national copayment liability for a Medicare beneficiary for a given service provided by a hospital that met or failed to meet its Hospital OQR Program requirements should follow the formulas presented in the following steps.

Step 1. Calculate the beneficiary payment percentage for the APC by dividing the APC's national unadjusted copayment by its payment rate. For example, using APC 5071, $129.79 is approximately 20 percent of the full national unadjusted payment rate of $648.97. For APCs with only a minimum unadjusted copayment in Addenda A and B to this final rule with comment period (which are available via the internet on the CMS website), the beneficiary payment percentage is 20 percent.

The formula below is a mathematical representation of Step 1 and calculates the national copayment as a percentage of national payment for a given service.

B is the beneficiary payment percentage.

B = National unadjusted copayment for APC/national unadjusted payment rate for APC.

Step 2. Calculate the appropriate wage-adjusted payment rate for the APC for the provider in question, as indicated in Steps 2 through 4 under section II.H of this final rule with comment period. Calculate the rural adjustment for eligible providers, as indicated in Step 6 under section II.H of this final rule with comment period.

Step 3. Multiply the percentage calculated in Step 1 by the payment rate calculated in Step 2. The result is the wage-adjusted copayment amount for the APC.

The formula below is a mathematical representation of Step 3 and applies the beneficiary payment percentage to the adjusted payment rate for a service calculated under section II.H of this final rule with comment period, with and without the rural adjustment, to calculate the adjusted beneficiary copayment for a given service.

Wage-adjusted copayment amount for the APC = Adjusted Medicare Payment * *B.*

Wage-adjusted copayment amount for the APC (SCH or EACH) = (Adjusted Medicare Payment * 1.071) * *B.*

Step 4. For a hospital that failed to meet its Hospital OQR Program requirements, multiply the copayment calculated in Step 3 by the reporting ratio of 0.9807.

The unadjusted copayments for services payable under the OPPS that will be effective January 1, 2023 are shown in Addenda A and B to this final rule with comment period (which are available via the CMS website). We note that the national unadjusted payment rates and copayment rates shown in Addenda A and B to this final rule with comment period reflect the CY 2023 OPD increase factor discussed in section II.B of this final rule with comment period.

In addition, as noted earlier, section 1833(t)(8)(C)(i) of the Act limits the amount of beneficiary copayment that may be collected for a procedure performed in a year to the amount of the inpatient hospital deductible for that year.

III. OPPS Ambulatory Payment Classification (APC) Group Policies

A. OPPS Treatment of New and Revised HCPCS Codes

Payments for OPPS procedures, services, and items are generally based on medical billing codes, specifically, HCPCS codes, that are reported on HOPD claims. HCPCS codes are used to report surgical procedures, medical services, items, and supplies under the hospital OPPS. The HCPCS is divided into two principal subsystems, referred to as Level I and Level II of the HCPCS. Level I is comprised of CPT (Current Procedural Terminology) codes, a numeric and alphanumeric coding system that is established and maintained by the American Medical Association (AMA), and consists of Category I, II, III, MAAA, and PLA CPT codes. Level II, which is established and maintained by CMS, is a standardized coding system that is used primarily to identify products, supplies, and services not included in the CPT codes. Together, Level I and II HCPCS codes are used to report procedures, services, items, and supplies under the OPPS payment system. Specifically, we recognize the following codes on OPPS claims:

- Category I CPT codes, which describe surgical procedures, diagnostic and therapeutic services, and vaccine codes;
- Category III CPT codes, which describe new and emerging technologies, services, and procedures;
- MAAA CPT codes, which describe laboratory multianalyte assays with algorithmic analyses (MAAA);

- PLA CPT codes, which describe proprietary laboratory analyses (PLA) services; and
- Level II HCPCS codes (also known as alpha-numeric codes), which are used primarily to identify drugs, devices, supplies, temporary procedures, and services not described by CPT codes.

The codes are updated and changed throughout the year. CPT and Level II HCPCS code changes that affect the OPPS are published through the annual rulemaking cycle and through the OPPS quarterly update Change Requests (CRs). Generally, these code changes are effective January 1, April 1, July 1, or October 1. CPT code changes are released by the AMA (via their website) while Level II HCPCS code changes are released to the public via the CMS HCPCS website. CMS recognizes the release of new CPT and Level II HCPCS codes outside of the formal rulemaking process via OPPS quarterly update CRs. Based on our review, we assign the new codes to interim status indicators (SIs) and APCs. These interim assignments are finalized in the OPPS/ASC final rules. This quarterly process offers hospitals access to codes that more accurately describe the items or services furnished and provides payment for these items or services in a timelier manner than if we waited for the annual rulemaking process. We solicit public comments on the new CPT and Level II HCPCS codes, status indicators, and APC assignments through our annual rulemaking process.

We note that, under the OPPS, the APC assignment determines the payment rate for an item, procedure, or service. The items, procedures, or services not exclusively paid separately under the hospital OPPS are assigned to appropriate status indicators. Certain payment status indicators provide separate payment while other payment status indicators do not. In section XI of this final rule with comment period, specifically, the ''CY 2023 Payment Status and Comment Indicators'' section, we discuss the various status indicators used under the OPPS. We also provide a complete list of the status indicators and their definitions in Addendum D1 to this final rule with comment period.

1. HCPCS Codes That Were Effective for April 2022 for Which We Solicited Public Comments in the CY 2023 OPPS/ASC Proposed Rule

For the April 2022 update, 48 new HCPCS codes were established and made effective on April 1, 2022. Through the April 2022 OPPS quarterly update CR (Transmittal 11305, Change Request 12666, dated March 24, 2022), we recognized several new HCPCS codes for separate payment under the OPPS. We solicited public comments on the proposed APC and status indicator assignments for the codes listed in Table 5 (New HCPCS Codes Effective April 1, 2022) of the CY 2023 OPPS/ASC proposed rule (87 FR 44539–44541), which are also displayed in Table 7.

We received some public comments on the proposed OPPS APC and SI assignments for the new Level II HCPCS codes implemented in April 2022. The comments and our responses are addressed in their respective sections of this final rule with comment period, which include, but are not limited to: sections III.C. (New Technology APCs), III.E. (OPPS APC-Specific Policies), and IV. (OPPS Payment for Devices). For those April 2022 codes for which we received no comments, we are finalizing the proposed APC and status indicator assignments. We note that several of the temporary HCPCS C-codes have been replaced with permanent HCPCS J-codes, effective January 1, 2023.[6] Their replacement codes are listed in Table 7. In addition, in prior years we included the final OPPS status indicators and APC assignments in the coding preamble tables, however, because the same information can be found in Addendum B, we are no longer including them in Table 7. Therefore, readers are advised to refer to the OPPS Addendum B for the final OPPS status indicators, APC assignments, and payment rates for all codes reportable under the hospital OPPS. These new codes that were effective April 1, 2022, were assigned to comment indicator ''NP'' in Addendum B to the CY 2023 OPPS/ASC proposed rule to indicate that the codes are assigned to an interim APC assignment and comments would be accepted on their interim APC assignments. The complete list of status indicators and definitions used under the OPPS can be found in Addendum D1 to this final rule with comment period, while the complete list of comment indicators and definitions can be found in Addendum D2 to this final rule with comment period. We note that OPPS Addendum B (OPPS payment file by HCPCS code), Addendum D1 (OPPS Status Indicators), and Addendum D2 (OPPS Comment Indicators) are available via the internet on the CMS website.

BILLING CODE 4120–01–P

[6] HCPCS C-codes are temporary billing codes that describe items and services for hospital outpatient use, including pass-through devices, pass-through drugs and biologicals, brachytherapy sources, new technology procedures, and certain other services. HCPCS J-codes are permanent billing codes that describe drugs.

TABLE 7: NEW HCPCS CODES EFFECTIVE APRIL 1, 2022

CY 2022 HCPCS Code	CY 2023 HCPCS Code	CY 2023 Long Descriptor
A2011	A2011	Supra sdrm, per square centimeter
A2012	A2012	Suprathel, per square centimeter
A2013	A2013	Innovamatrix fs, per square centimeter
A4100	A4100	Skin substitute, fda cleared as a device, not otherwise specified
A4238	A4238	Supply allowance for adjunctive continuous glucose monitor (cgm), includes all supplies and accessories, 1 month supply = 1 unit of service
A9291	A9291	Prescription digital behavioral therapy, fda cleared, per course of treatment
C9090	J2998	Injection, plasminogen, human-tvmh, 1 mg
C9091	J9331	Injection, sirolimus protein-bound particles, 1 mg
C9092	J3299	Injection, triamcinolone acetonide (xipere), 1 mg
C9093	J2779	Injection, ranibizumab, via intravitreal implant (susvimo), 0.1 mg
C9781	C9781	Arthroscopy, shoulder, surgical; with implantation of subacromial spacer (e.g., balloon), includes debridement (e.g., limited or extensive), subacromial decompression, acromioplasty, and biceps tenodesis when performed
C9782	C9782	Blinded procedure for New York Heart Association (NYHA) Class II or III heart failure, or Canadian Cardiovascular Society (CCS) Class III or IV chronic refractory angina; transcatheter intramyocardial transplantation of autologous bone marrow cells (e.g., mononuclear) or placebo control, autologous bone marrow harvesting and preparation for transplantation, left heart catheterization including ventriculography, all laboratory services, and all imaging with or without guidance (e.g., transthoracic echocardiography, ultrasound, fluoroscopy), all device(s), performed in an approved Investigational Device Exemption (IDE) study
C9783	C9783	Blinded procedure for transcatheter implantation of coronary sinus reduction device or placebo control, including vascular access and closure, right heart catherization, venous and coronary sinus angiography, imaging guidance and supervision and interpretation when performed in an approved Investigational Device Exemption (IDE) study
J0219	J0219	Injection, avalglucosidase alfa-ngpt, 4 mg
J0491	J0491	Injection, anifrolumab-fnia, 1 mg
J0879	J0879	Injection, difelikefalin, 0.1 microgram, (for esrd on dialysis)
J9071	J9071	Injection, cyclophosphamide, (auromedics), 5 mg

CY 2022 HCPCS Code	CY 2023 HCPCS Code	CY 2023 Long Descriptor
J9273	J9273	Injection, tisotumab vedotin-tftv, 1 mg
J9359	J9359	Injection, loncastuximab tesirine-lpyl, 0.1 mg
K1028	K1028	Power source and control electronics unit for oral device/appliance for neuromuscular electrical stimulation of the tongue muscle for the reduction of snoring and obstructive sleep apnea, controlled by phone application
K1029	K1029	Oral device/appliance for neuromuscular electrical stimulation of the tongue muscle, used in conjunction with the power source and control electronics unit, controlled by phone application, 90-day supply
K1030	K1030	External recharging system for battery (internal) for use with implanted cardiac contractility modulation generator, replacement only
K1031	K1031	Non-pneumatic compression controller without calibrated gradient pressure
K1032	K1032	Non-pneumatic sequential compression garment, full leg
K1033	K1033	Non-pneumatic sequential compression garment, half leg
Q4224	Q4224	Human health factor 10 amniotic patch (hhf10-p), per square centimeter
Q4225	Q4225	Amniobind, per square centimeter
Q4256	Q4256	Mlg-complete, per square centimeter
Q4257	Q4257	Relese, per square centimeter
Q4258	Q4258	Enverse, per square centimeter
Q5124	Q5124	Injection, ranibizumab-nuna, biosimilar, (byooviz), 0.1 mg
V2525	V2525	Contact lens, hydrophilic, dual focus, per lens
0306U	0306U	Oncology (minimal residual disease [mrd]), next-generation targeted sequencing analysis, cell-free dna, initial (baseline) assessment to determine a patient specific panel for future comparisons to evaluate for mrd
0307U	0307U	Oncology (minimal residual disease [mrd]), next-generation targeted sequencing analysis of a patient-specific panel, cell-free dna, subsequent assessment with comparison to previously analyzed patient specimens to evaluate for mrd
0308U	0308U	Cardiology (coronary artery disease [cad]), analysis of 3 proteins (high sensitivity [hs] troponin, adiponectin, and kidney injury molecule-1 [kim-1]), plasma, algorithm reported as a risk score for obstructive cad
0309U	0309U	Cardiology (cardiovascular disease), analysis of 4 proteins (nt-probnp, osteopontin, tissue inhibitor of metalloproteinase-1 [timp-1], and kidney injury molecule-1 [kim-1]), plasma, algorithm reported as a risk score for major adverse cardiac event
0310U	0310U	Pediatrics (vasculitis, kawasaki disease [kd]), analysis of 3 biomarkers (nt-probnp, c-reactive protein, and t-uptake), plasma, algorithm reported as a risk score for kd
0311U	0311U	Infectious disease (bacterial), quantitative antimicrobial susceptibility reported as phenotypic minimum inhibitory concentration (MIC)–based antimicrobial susceptibility for each organisms identified
0312U	0312U	Autoimmune diseases (eg, systemic lupus erythematosus [sle]), analysis of 8 igg autoantibodies and 2 cell-bound complement activation products using enzyme-linked immunosorbent immunoassay (elisa), flow cytometry and indirect immunofluorescence, serum, or plasma and whole blood, individual components reported along with an algorithmic sle-likelihood assessment

CY 2022 HCPCS Code	CY 2023 HCPCS Code	CY 2023 Long Descriptor
0313U	0313U	Oncology (pancreas), dna and mrna next-generation sequencing analysis of 74 genes and analysis of cea (ceacam5) gene expression, pancreatic cyst fluid, algorithm reported as a categorical result (ie, negative, low probability of neoplasia or positive, high probability of neoplasia)
0314U	0314U	Oncology (cutaneous melanoma), mrna gene expression profiling by rt-pcr of 35 genes (32 content and 3 housekeeping), utilizing formalin-fixed paraffin-embedded (ffpe) tissue, algorithm reported as a categorical result (ie, benign, intermediate, malignant)
0315U	0315U	Oncology (cutaneous squamous cell carcinoma), mrna gene expression profiling by rt-pcr of 40 genes (34 content and 6 housekeeping), utilizing formalin-fixed paraffin-embedded (ffpe) tissue, algorithm reported as a categorical risk result (ie, class 1, class 2a, class 2b)
0316U	0316U	Borrelia burgdorferi (Lyme disease), ospa protein evaluation, urine
0317U	0317U	Oncology (lung cancer), four-probe fish (3q29, 3p22.1, 10q22.3, 10cen) assay, whole blood, predictive algorithm-generated evaluation reported as decreased or increased risk for lung cancer
0318U	0318U	Pediatrics (congenital epigenetic disorders), whole genome methylation analysis by microarray for 50 or more genes, blood
0319U	0319U	Nephrology (renal transplant), rna expression by select transcriptome sequencing, using pretransplant peripheral blood, algorithm reported as a risk score for early acute rejection
0320U	0320U	Nephrology (renal transplant), rna expression by select transcriptome sequencing, using posttransplant peripheral blood, algorithm reported as a risk score for acute cellular rejection
0321U	0321U	Infectious agent detection by nucleic acid (dna or rna), genitourinary pathogens, identification of 20 bacterial and fungal organisms and identification of 16 associated antibiotic-resistance genes, multiplex amplified probe technique
0322U	0322U	Neurology (autism spectrum disorder [asd]), quantitative measurements of 14 acyl carnitines and microbiome-derived metabolites, liquid chromatography with tandem mass spectrometry (lc-ms/ms), plasma, results reported as negative or positive for risk of metabolic subtypes associated with asd

2. HCPCS Codes That Were Effective July 1, 2021, for Which We Solicited Public Comments in the CY 2023 OPPS/ASC Proposed Rule

For the July 2022 update, 63 new codes were established and made effective July 1, 2022. Through the July 2022 OPPS quarterly update CR (Transmittal 11457, Change Request 12761, dated June 15, 2022), we recognized several new codes for separate payment and assigned them to appropriate interim OPPS status indicators and APCs. We solicited public comments on the proposed APC and status indicator assignments for the codes listed in Table 6 (New HCPCS Codes Effective July 1, 2022) of the CY 2023 OPPS/ASC proposed rule, which are also listed in Table 8 below.

We received some public comments on the proposed OPPS APC and SI assignments for the new Level II HCPCS codes implemented in July 1, 2022. The comments and our responses are addressed in their respective sections of this final rule with comment period, which include, but are not limited to: sections III.C (New Technology APCs), III.E (OPPS APC-Specific Policies), and IV (OPPS Payment for Devices). For those July 1, 2022, codes for which we received no comments, we are finalizing the proposed APC and status indicator assignments. We note that several of the HCPCS C-codes have been replaced with HCPCS J-codes and one with a HCPCS Q-code. Their replacement codes are listed in Table 8 below. We note that in prior years we included the final OPPS status indicators and APC assignments in the coding preamble tables, however, because the same information can be found in Addendum B, we are no longer including them in Table 8 below. Therefore, readers are advised to refer to the OPPS Addendum B for the final OPPS status indicators, APC assignments, and payment rates for all codes reportable under the hospital OPPS. These new codes that were effective July 1, 2022, were assigned to comment indicator ''NP'' in Addendum B to the CY 2023 OPPS/ASC proposed rule to indicate that the codes are assigned to an interim APC assignment and comments would be accepted on their interim APC assignments. The complete list of status indicators and definitions used under the OPPS can be found in Addendum D1 to this final rule with comment period, while the

complete list of comment indicators and definitions can be found in Addendum D2 to this final rule with comment period. We note that OPPS Addendum B (OPPS payment file by HCPCS code), Addendum D1 (OPPS Status Indicators), and Addendum D2 (OPPS Comment Indicators) are available via the internet on the CMS website.

TABLE 8: NEW HCPCS CODES EFFECTIVE JULY 1, 2022

CY 2022 HCPCS Code	CY 2023 HCPCS Code	CY 2023 Long Descriptor
A9596	A9596	Gallium ga-68 gozetotide, diagnostic, (illuccix), 1 millicurie
A9601	A9601	Flortaucipir f 18 injection, diagnostic, 1 millicurie
C9094	J1302	Injection, sutimlimab-jome, 10 mg
C9095	J9274	Injection, tebentafusp-tebn, 1 microgram
C9096	Q5125	Injection, filgrastim-ayow, biosimilar, (releuko), 1 microgram
C9097	J2777	Inj, faricimab-svoa, 0.1 mg
C9098	Q2056	Ciltacabtagene autoleucel, up to 100 million autologous b-cell maturation antigen (bcma) directed car-positive t cells, including leukapheresis and dose preparation procedures, per therapeutic dose
D1708	D1708	Pfizer-BioNTech Covid-19 vaccine administration – third dose
D1709	D1709	Pfizer-BioNTech Covid-19 vaccine administration – booster dose
D1710	D1710	Moderna Covid-19 vaccine administration – third dose
D1711	D1711	Moderna Covid-19 vaccine administration – booster dose
D1712	D1712	Janssen Covid-19 vaccine administration - booster dose
D1713	D1713	Pfizer-BioNTech Covid-19 vaccine administration tris-sucrose pediatric – first dose
D1714	D1714	Pfizer-BioNTech Covid-19 vaccine administration tris-sucrose pediatric – second dose
G0308	G0308	Creation of subcutaneous pocket with insertion of 180 day implantable interstitial glucose sensor, including system activation and patient training
G0309	G0309	Removal of implantable interstitial glucose sensor with creation of subcutaneous pocket at different anatomic site and insertion of new 180 day implantable sensor, including system activation
J0739	J0739	Injection, cabotegravir, 1 mg
J1306	J1306	Injection, inclisiran, 1 mg
J1551	J1551	Injection, immune globulin (cutaquig), 100 mg
J2356	J2356	Injection, tezepelumab-ekko, 1 mg
J2779	J2779	Injection, ranibizumab, via intravitreal implant (susvimo), 0.1 mg
J2998	J2998	Injection, plasminogen, human-tvmh, 1 mg
J3299	J3299	Injection, triamcinolone acetonide (xipere), 1 mg
J9331	J9331	Injection, sirolimus protein-bound particles, 1 mg
J9332	J9332	Injection, efgartigimod alfa-fcab, 2mg
K1034	K1034	Provision of covid-19 test, nonprescription self-administered and self-collected use, fda approved, authorized or cleared, one test count
Q4259	Q4259	Celera dual layer or celera dual membrane, per square centimeter
Q4260	Q4260	Signature apatch, per square centimeter
Q4261	Q4261	Tag, per square centimeter
90584	90584	Dengue vaccine, quadrivalent, live, 2 dose schedule, for subcutaneous use

CY 2022 HCPCS Code	CY 2023 HCPCS Code	CY 2023 Long Descriptor
0714T	0714T	Transperineal laser ablation of benign prostatic hyperplasia, including imaging guidance
0715T	0715T	Percutaneous transluminal coronary lithotripsy (List separately in addition to code for primary procedure)
0716T	0716T	Cardiac acoustic waveform recording with automated analysis and generation of coronary artery disease risk score
0717T	0717T	Autologous adipose-derived regenerative cell (ADRC) therapy for partial thickness rotator cuff tear; adipose tissue harvesting, isolation and preparation of harvested cells, including incubation with cell dissociation enzymes, filtration, washing and concentration of ADRCs
0718T	0718T	Autologous adipose-derived regenerative cell (ADRC) therapy for partial thickness rotator cuff tear; injection into supraspinatus tendon including ultrasound guidance, unilateral
0719T	0719T	Posterior vertebral joint replacement, including bilateral facetectomy, laminectomy, and radical discectomy, including imaging guidance, lumbar spine, single segment
0720T	0720T	Percutaneous electrical nerve field stimulation, cranial nerves, without implantation
0721T	0721T	Quantitative computed tomography (CT) tissue characterization, including interpretation and report, obtained without concurrent CT examination of any structure contained in previously acquired diagnostic imaging
0722T	0722T	Quantitative computed tomography (CT) tissue characterization, including interpretation and report, obtained with concurrent CT examination of any structure contained in the concurrently acquired diagnostic imaging dataset (List separately in addition to code for primary procedure)
0723T	0723T	Quantitative magnetic resonance cholangiopancreatography (QMRCP) including data preparation and transmission, interpretation and report, obtained without diagnostic magnetic resonance imaging (MRI) examination of the same anatomy (eg, organ, gland, tissue, target structure) during the same session
0724T	0724T	Quantitative magnetic resonance cholangiopancreatography (QMRCP) including data preparation and transmission, interpretation and report, obtained with diagnostic magnetic resonance imaging (MRI) examination of the same anatomy (eg, organ, gland, tissue, target structure) (List separately in addition to code for primary procedure)
0725T	0725T	Vestibular device implantation, unilateral
0726T	0726T	Removal of implanted vestibular device, unilateral
0727T	0727T	Removal and replacement of implanted vestibular device, unilateral
0728T	0728T	Diagnostic analysis of vestibular implant, unilateral; with initial programming
0729T	0729T	Diagnostic analysis of vestibular implant, unilateral; with subsequent programming
0730T	0730T	Trabeculotomy by laser, including optical coherence tomography (OCT) guidance
0731T	0731T	Augmentative AI-based facial phenotype analysis with report
0732T	0732T	Immunotherapy administration with electroporation, intramuscular

CY 2022 HCPCS Code	CY 2023 HCPCS Code	CY 2023 Long Descriptor
0733T	0733T	Remote real-time, motion capture-based neurorehabilitative therapy ordered by a physician or other qualified health care professional; supply and technical support, per 30 days
0734T	0734T	Remote body and limb kinematic measurement-based therapy ordered by a physician or other qualified health care professional; treatment management services by a physician or other qualified health care professional, per calendar month
0735T	0735T	Preparation of tumor cavity, with placement of a radiation therapy applicator for intraoperative radiation therapy (IORT) concurrent with primary craniotomy (List separately in addition to code for primary procedure)
0736T	0736T	Colonic lavage, 35 or more liters of water, gravity-fed, with induced defecation, including insertion of rectal catheter
0737T	0737T	Xenograft implantation into the articular surface
0323U	0323U	Infectious agent detection by nucleic acid (DNA and RNA), central nervous system pathogen, metagenomic next-generation sequencing, cerebrospinal fluid (CSF), identification of pathogenic bacteria, viruses, parasites, or fungi
0324U	0324U	Oncology (ovarian), spheroid cell culture, 4-drug panel (carboplatin, doxorubicin, gemcitabine, paclitaxel), tumor chemotherapy response prediction for each drug
0325U	0325U	Oncology (ovarian), spheroid cell culture, poly (ADP-ribose) polymerase (PARP) inhibitors (niraparib, olaparib, rucaparib, velparib), tumor response prediction for each drug
0326U	0326U	Targeted genomic sequence analysis panel, solid organ neoplasm, cell-free circulating DNA analysis of 83 or more genes, interrogation for sequence variants, gene copy number amplifications, gene rearrangements, microsatellite instability and tumor mutational burden
0327U	0327U	Fetal aneuploidy (trisomy 13, 18, and 21), DNA sequence analysis of selected regions using maternal plasma, algorithm reported as a risk score for each trisomy, includes sex reporting, if performed
0328U	0328U	Drug assay, definitive, 120 or more drugs and metabolites, urine, quantitative liquid chromatography with tandem mass spectrometry (LC-MS/MS), includes specimen validity and algorithmic analysis describing drug or metabolite and presence or absence of risks for a significant patient-adverse event, per date of service
0329U	0329U	Oncology (neoplasia), exome and transcriptome sequence analysis for sequence variants, gene copy number amplifications and deletions, gene rearrangements, microsatellite instability and tumor mutational burden utilizing DNA and RNA from tumor with DNA from normal blood or saliva for subtraction, report of clinically significant mutation(s) with therapy associations
0330U	0330U	Infectious agent detection by nucleic acid (DNA or RNA), vaginal pathogen panel, identification of 27 organisms, amplified probe technique, vaginal swab
0331U	0331U	Oncology (hematolymphoid neoplasia), optical genome mapping for copy number alterations and gene rearrangements utilizing DNA from blood or bone marrow, report of clinically significant alternations

3. October 2022 HCPCS Codes for Which We Are Soliciting Public Comments in This CY 2023 OPPS/ASC Final Rule With Comment Period

As has been our practice in the past, we are soliciting comments on the new CPT and Level II HCPCS codes that became effective October 1, 2022, in this final rule with comment period, thereby allowing us to finalize the status indicators and APC assignments for the codes in the CY 2024 OPPS/ASC final rule with comment period. The HCPCS codes will be released to the public through the October 2022 OPPS Update CR and the CMS HCPCS website while the CPT codes will be released to the public through the AMA website.

For CY 2023, we proposed to continue our established policy of assigning comment indicator ''NI'' in Addendum B to the CY 2023 OPPS/ASC final rule with comment period to those new HCPCS codes that will be effective October 1, 2022, to indicate that we are assigning them an interim status indicator, which is subject to public comment. We invite public comments in this final rule with comment period on the status indicator and APC assignments for these codes, which would be finalized in the CY 2024 OPPS/ASC final rule with comment period.

4. January 2023 HCPCS Codes

a. New Level II HCPCS Codes for Which We Are Soliciting Public Comments in This CY 2023 OPPS/ASC Final Rule With Comment Period

Consistent with past practice, we are soliciting comments on the new Level II HCPCS codes that will be effective January 1, 2023, in this final rule with comment period, thereby allowing us to finalize the status indicators and APC assignments for the codes in the CY 2024 OPPS/ASC final rule with comment period. Unlike the CPT codes that are effective January 1 and are included in the OPPS/ASC proposed rules, and except for the proposed new C-codes and G-codes listed in Addendum O of the CY 2023 OPPS/ASC proposed rule, most Level II HCPCS codes are not released until sometime around November to be effective January 1. Because these codes are not available until November, we are unable to include them in the OPPS/ASC proposed rules. Consequently, for CY 2023, we proposed to include in Addendum B to the CY 2023 OPPS/ASC final rule with comment period the new Level II HCPCS codes effective January 1, 2023, that would be incorporated in the January 2023 OPPS quarterly update CR. Specifically, for CY 2023, we are finalizing our process of continuing our established policy of assigning comment indicator ''NI'' in Addendum B to this final rule with comment period to the new HCPCS codes that will be effective January 1, 2023, to indicate that we are assigning them an interim status indicator, which is subject to public comment. We are inviting public comments in this final rule with comment period on the status indicator and APC assignments for these codes, which would be finalized in the CY 2024 OPPS/ASC final rule with comment period.

b. CPT Codes for Which We Solicited Public Comments in the CY 2023 OPPS/ASC Proposed Rule

In the CY 2015 OPPS/ASC final rule with comment period (79 FR 66841 through 66844), we finalized a revised process of assigning APC and status indicators for new and revised Category I and III CPT codes that would be effective January 1. Specifically, for the new/revised CPT codes that we receive in a timely manner from the AMA's CPT Editorial Panel, we finalized our proposal to include the codes that would be effective January 1 in the OPPS/ASC proposed rules, along with proposed APC and status indicator assignments for them, and to finalize the APC and status indicator assignments in the OPPS/ASC final rules beginning with the CY 2016 OPPS update. For those new/revised CPT codes that were received too late for inclusion in the OPPS/ASC proposed rule, we finalized our proposal to establish and use HCPCS G-codes that mirror the predecessor CPT codes and retain the current APC and status indicator assignments for a year until we can propose APC and status indicator assignments in the following year's rulemaking cycle. We note that even if we find that we need to create HCPCS G-codes in place of certain CPT codes for the PFS proposed rule, we do not anticipate that these HCPCS G-codes will always be necessary for OPPS purposes. We will make every effort to include proposed APC and status indicator assignments for all new and revised CPT codes that the AMA makes publicly available in time for us to include them in the proposed rule, and to avoid resorting to use of HCPCS G-codes and the resulting delay in utilization of the most current CPT codes. Also, we finalized our proposal to make interim APC and status indicator assignments for CPT codes that are not available in time for the proposed rule and that describe wholly new services (such as new technologies or new surgical procedures), to solicit public comments in the final rule, and to finalize the specific APC and status indicator assignments for those codes in the following year's final rule.

For the CY 2023 OPPS update, we received the CPT codes that will be effective January 1, 2023, from the AMA in time to be included in this proposed rule. The new, revised, and deleted CPT codes can be found in Addendum B to this proposed rule (which is available via the internet on the CMS website). We note that the new and revised CPT codes are assigned to comment indicator ''NP'' in Addendum B of this proposed rule to indicate that the code is new for the next calendar year or the code is an existing code with substantial revision to its code descriptor in the next calendar year as compared to the current calendar year with a proposed APC assignment, and that comments will be accepted on the proposed APC assignment and status indicator.

Further, we reminded readers that the CPT code descriptors that appear in Addendum B are short descriptors and do not accurately describe the complete procedure, service, or item described by the CPT code. Therefore, we included the 5-digit placeholder codes and their long descriptors for the new and revised CY 2023 CPT codes in Addendum O to the proposed rule (which is available via the internet on the CMS website) so that the public could adequately comment on the proposed APCs and SI assignments. The 5-digit placeholder codes were included in Addendum O, specifically under the column labeled ''CY 2023 OPPS/ASC Proposed Rule 5-Digit AMA Placeholder Code,'' to the proposed rule. We noted that the final CPT code numbers would be included in this CY 2023 OPPS/ASC final rule with comment period. We also noted that not every code listed in Addendum O is subject to public comment. For the new and revised Category I and III CPT codes, we requested public comments on only those codes that are assigned comment indicator ''NP''.

In summary, in the CY 2023 OPPS/ASC proposed rule, we solicited public comments on the proposed CY 2023 SI and APC assignments for the new and revised Category I and III CPT codes that will be effective January 1, 2023. The CPT codes were listed in Addendum B to the proposed rule with short descriptors only. We listed them again in Addendum O to the proposed rule with long descriptors. We also proposed to finalize the SI and APC assignments for these codes (with their final CPT code numbers) in the CY 2023 OPPS/ASC final rule with comment period. The proposed SI and APC assignments for these codes were included in

Addendum B to the proposed rule (which is available via the internet on the CMS website).

We received comments on several of the new CPT codes that were assigned to comment indicator ''NP'' in Addendum B to the CY 2023 OPPS/ASC proposed rule. We have responded to those public comments in sections III.C (New Technology APCs), III.E (OPPS APC-Specific Policies), and IV (OPPS Payment for Devices) of this final rule with comment period.

The final SIs, APC assignments, and payment rates for the new CPT codes that are effective January 1, 2023, can be found in Addendum B to this final rule with comment period. In addition, the SI meanings can be found in Addendum D1 (OPPS Payment Status Indicators for CY 2023) to this final rule with comment period. Both Addendum B and D1 are available via the internet on the CMS website.

Finally, Table 9 below, which is a reprint of Table 7 from the CY 2023 OPPS/ASC proposed rule (87 FR 44548), shows the comment timeframe for new and revised HCPCS codes. Table 9 provides information on our current process for updating codes through our OPPS quarterly update CRs, seeking public comments, and finalizing the treatment of these codes under the OPPS.

BILLING CODE 4120–01–P

TABLE 9: COMMENT AND FINALIZATION TIMEFRAMES FOR NEW AND REVISED OPPS-RELATED HCPCS CODES

OPPS Quarterly Update CR	Type of Code	Effective Date	Comments Sought	When Finalized
April 2022	HCPCS (CPT and Level II codes)	April 1, 2022	CY 2023 OPPS/ASC proposed rule	CY 2023 OPPS/ASC final rule with comment period
July 2022	HCPCS (CPT and Level II codes)	July 1, 2022	CY 2023 OPPS/ASC proposed rule	CY 2023 OPPS/ASC final rule with comment period

BILLING CODE 4120–01–C

B. OPPS Changes—Variations Within APCs

1. Background

Section 1833(t)(2)(A) of the Act requires the Secretary to develop a classification system for covered hospital outpatient department services. Section 1833(t)(2)(B) of the Act provides that the Secretary may establish groups of covered OPD services within this classification system, so that services classified within each group are comparable clinically and with respect to the use of resources. In accordance with these provisions, we developed a grouping classification system, referred to as Ambulatory Payment Classifications (APCs), as set forth in regulations at 42 CFR 419.31. We use Level I (also known as CPT codes) and Level II HCPCS codes (also known as alphanumeric codes) to identify and group the services within each APC. The APCs are organized such that each group is homogeneous both clinically and in terms of resource use. Using this classification system, we have established distinct groups of similar services. We also have developed separate APC groups for certain medical devices, drugs, biologicals, therapeutic radiopharmaceuticals, and brachytherapy devices that are not packaged into the payment for the procedure.

We have packaged into the payment for each procedure or service within an APC group the costs associated with those items and services that are typically ancillary and supportive to a primary diagnostic or therapeutic modality and, in those cases, are an integral part of the primary service they

support. Therefore, we do not make separate payment for these packaged items or services. In general, packaged items and services include, but are not limited to, the items and services listed in regulations at 42 CFR 419.2(b). A further discussion of packaged services is included in section II.A.3 of this rule.

Under the OPPS, we generally pay for covered hospital outpatient department services on a rate-per-service basis, where the service may be reported with one or more HCPCS codes. Payment varies according to the APC group to which the independent service or combination of services is assigned. In the CY 2023 OPPS/ASC proposed rule (87 FR 44548), for CY 2023, we proposed that each APC relative payment weight represents the hospital cost of the services included in that APC, relative to the hospital cost of the services included in APC 5012 (Clinic Visits and Related Services). The APC relative payment weights are scaled to APC 5012 because it is the hospital clinic visit APC and clinic visits are among the most frequently furnished services in the hospital outpatient setting.

2. Application of the 2 Times Rule

Section 1833(t)(9)(A) of the Act requires the Secretary to review, not less often than annually, and revise the APC groups, the relative payment weights, and the wage and other adjustments described in paragraph (2) to take into account changes in medical practice, changes in technology, the addition of new services, new cost data, and other relevant information and factors. Section 1833(t)(9)(A) of the Act also requires the Secretary to consult with an expert outside advisory panel composed of an appropriate selection of representatives of providers to review (and advise the Secretary concerning) the clinical integrity of the APC groups and the relative payment weights. We note that the Advisory Panel on Hospital Outpatient Payment (also known as the HOP Panel or the Panel) recommendations for specific services for the CY 2023 OPPS update will be discussed in the relevant specific sections throughout this final rule with comment period.

In addition, section 1833(t)(2) of the Act provides that, subject to certain exceptions, the items and services within an APC group cannot be considered comparable with respect to the use of resources if the highest cost for an item or service in the group is more than 2 times greater than the lowest cost for an item or service within the same group (referred to as the ''2 times rule''). The statute authorizes the Secretary to make exceptions to the 2 times rule in unusual cases, such as for low-volume items and services (but the Secretary may not make such an exception in the case of a drug or biological that has been designated as an orphan drug under section 526 of the Federal Food, Drug, and Cosmetic Act). In determining the APCs with a 2 times rule violation, we consider only those HCPCS codes that are significant based on the number of claims. We note that, for purposes of identifying significant procedure codes for examination under the 2 times rule, we consider procedure codes that have more than 1,000 single major claims or procedure codes that both have more than 99 single major claims and contribute at least 2 percent of the single major claims used to establish the APC cost to be significant (75 FR 71832). For an example of significant procedure codes, refer to the discussion on cardiac computed tomography angiography (CCTA), specifically as it relates to CPT codes 75572 and 75574, which are discussed in section III.E. (Cardiac Computed Tomography Angiography (CCTA) (APC 5571)) of this final rule with comment period. This longstanding definition of when a procedure code is significant for purposes of the 2 times rule was selected because we believe that a subset of 1,000 or fewer claims is negligible within the set of approximately 100 million single procedure or single session claims we use for establishing costs. Similarly, a procedure code for which there are fewer than 99 single claims and that comprises less than 2 percent of the single major claims within an APC will have a negligible impact on the APC cost (75 FR 71832). In the CY 2023 OPPS/ASC proposed rule, for CY 2023, we proposed to make exceptions to this limit on the variation of costs within each APC group in unusual cases, such as for certain low-volume items and services.

For the CY 2023 OPPS update, we identified the APCs with violations of the 2 times rule and we proposed changes to the procedure codes assigned to these APCs (with the exception of those APCs for which we proposed a 2 times rule exception) in Addendum B to the CY 2023 OPPS/ASC proposed rule. We note that Addendum B does not appear in the printed version of the **Federal Register** as part of this final rule with comment period. Rather, it is published and made available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/index.html*. To eliminate a violation of the 2 times rule and improve clinical and resource homogeneity in the APCs for which we did not propose a 2 times rule exception, we proposed to reassign these procedure codes to new APCs that contain services that are similar with regard to both their clinical and resource characteristics. Refer to section III.E (APC-Specific Policies) of this final rule with comment period for examples of various APC reassignments. In many cases, the proposed procedure code reassignments and associated APC reconfigurations for CY 2023 included in the CY 2023 OPPS/ASC proposed rule are related to changes in costs of services that were observed in the CY 2021 claims data available for CY 2023 ratesetting. Addendum B to the CY 2023 OPPS/ASC proposed rule identifies with a comment indicator ''CH'' those procedure codes for which we proposed a change to the APC assignment or status indicator, or both, that were initially assigned in the July 1, 2022 OPPS Addendum B Update (available via the internet on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Addendum-A-and-Addendum-B-Updates.html*).

3. APC Exceptions to the 2 Times Rule

Taking into account the APC changes that we proposed to make for CY 2023, we reviewed all of the APCs for which we identified 2 times rule violations to determine whether any of the APCs would qualify for an exception. We used the following criteria to evaluate whether to propose exceptions to the 2 times rule for affected APCs:

- Resource homogeneity;
- Clinical homogeneity;
- Hospital outpatient setting utilization;
- Frequency of service (volume); and
- Opportunity for upcoding and code fragments.

For a detailed discussion of these criteria, we refer readers to the April 7, 2000 final rule (65 FR 18457 through 18458).

Based on the CY 2021 claims data available for the CY 2023 OPPS/ASC proposed rule, we found 23 APCs with violations of the 2 times rule. We applied the criteria as described above to identify the APCs for which we proposed to make exceptions under the 2 times rule for CY 2023 and found that all of the 23 APCs we identified meet the criteria for an exception to the 2 times rule based on the CY 2021 claims data available for the CY 2023 OPPS/ASC proposed rule. We note that, on an annual basis, based on our analysis of the latest claims data, we identify

violations to the 2 times rule and propose changes when appropriate. Those APCs that violate the 2 times rule are identified and appear in Table 10 below. In addition, we did not include in that determination those APCs where a 2 times rule violation was not a relevant concept, such as APC 5401 (Dialysis), which only has two HCPCS codes assigned to it that have similar geometric mean costs and do not create a 2 times rule violation. Therefore, we have only identified those APCs, including those with criteria-based costs, such as device-dependent CPT/HCPCS codes, with violations of the 2 times rule, where a 2 times rule violation is a relevant concept.

Table 8 of the CY 2023 OPPS/ASC proposed rule listed the 23 APCs for which we proposed to make an exception under the 2 times rule for CY 2023 based on the criteria cited above and claims data submitted between January 1, 2021, and December 31, 2021, and processed on or before December 31, 2021, and CCRs, if available. The proposed geometric mean costs for covered hospital outpatient services for these and all other APCs that were used in the development of this proposed rule can be found on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices.html*.

Based on the updated final rule CY 2021 claims data used for this CY 2023 final rule with comment period, we found a total of 25 APCs with violations of the 2 times rule. Of these 25 total APCs, 22 were identified in the proposed rule and three are newly identified APCs. The three newly identified APCs with violations of the 2 times rule are the following:

- APC 5341 (Abdominal/Peritoneal/Biliary and Related Procedures)
- APC 5361 (Level 1 Laparoscopy and Related Services)
- APC 5723 (Level 3 Diagnostic Tests and Related Services)

Although we did not receive any comments on Table 8 of the CY 2023 OPPS/ASC proposed rule (87 FR 44550), we did receive comments on APC assignments for specific HCPCS codes. The comments, and our responses, can be found in section III.D. (OPPS APC-Specific Policies) of this final rule with comment period.

After considering the public comments we received on APC assignments and our analysis of the CY 2021 costs from hospital claims and cost report data available for this CY 2023 OPPS/ASC final rule with comment period, we are finalizing our proposals with some modifications. Specifically, we are finalizing our proposal to except 22 of the 23 proposed APCs from the 2 times rule for CY 2021 and also excepting three additional APCs (APCs 5341, 5361, and 5723) for a total of 25 APCs.

In summary, Table 10 below lists the 25 APCs that we are excepting from the 2 times rule for CY 2023 based on the criteria described earlier and a review of updated claims data for dates of service between January 1, 2021, and December 31, 2021, that were processed on or before June 30, 2022, and updated CCRs, if available. We note that, for cases in which a recommendation by the HOP Panel appears to result in or allow a violation of the 2 times rule, we generally accept the HOP Panel's recommendation because those recommendations are based on explicit consideration of resource use, clinical homogeneity, site of service, and the quality of the claims data used to determine the APC payment rates. The geometric mean costs for hospital outpatient services for these and all other APCs that were used in the development of this final rule with comment period can be found on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices*.

BILLING CODE 4120–01–C

C. New Technology APCs

1. Background

In the CY 2002 OPPS final rule (66 FR 59903), we finalized changes to the time period in which a service can be eligible for payment under a New Technology APC. Beginning in CY 2002, we retain services within New Technology APC groups until we gather sufficient claims data to enable us to assign the service to an appropriate clinical APC. This policy allows us to move a service from a New Technology APC in less than 2 years if sufficient data are available. It also allows us to retain a service in a New Technology APC for more than 2 years if sufficient data upon which to base a decision for reassignment have not been collected.

We also adopted in the CY 2002 OPPS final rule the following criteria for assigning a complete or comprehensive service to a New Technology APC: (1) the service must be truly new, meaning it cannot be appropriately reported by an existing HCPCS code assigned to a clinical APC and does not appropriately fit within an existing clinical APC; (2) the service is not eligible for transitional pass-through payment (however, a truly new, comprehensive service could qualify for assignment to a new technology APC even if it involves a device or drug that could, on its own, qualify for a pass-through payment); and (3) the service falls within the scope of Medicare benefits under section 1832(a) of the Act and is reasonable and necessary in accordance with section 1862(a)(1)(A) of the Act (66 FR 59898 through 59903). For additional information about our New Technology APC policy, we refer readers to *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/passthrough_payment* on the CMS website and then follow the instructions to access the

MEARISTM system for OPPS New Technology APC applications.

In the CY 2004 OPPS final rule with comment period (68 FR 63416), we restructured the New Technology APCs to make the cost intervals more consistent across payment levels and refined the cost bands for these APCs to retain two parallel sets of New Technology APCs: one set with a status indicator of ''S'' (Significant Procedures, Not Discounted when Multiple. Paid under OPPS; separate APC payment) and the other set with a status indicator of ''T'' (Significant Procedure, Multiple Reduction Applies. Paid under OPPS; separate APC payment). These current New Technology APC configurations allow us to price new technology services more appropriately and consistently.

For CY 2022, there were 52 New Technology APC levels, ranging from the lowest cost band assigned to APC 1491 (New Technology—Level 1A ($0-$10)) to the highest cost band assigned to APC 1908 (New Technology—Level 52 ($145,001-$160,000)). We note that the cost bands for the New Technology APCs, specifically, APCs 1491 through 1599 and 1901 through 1908, vary with increments ranging from $10 to $14,999. These cost bands identify the APCs to which new technology procedures and services with estimated service costs that fall within those cost bands are assigned under the OPPS. Payment for each APC is made at the mid-point of the APC's assigned cost band. For example, payment for New Technology APC 1507 (New Technology—Level 7 ($501—$600)) is made at $550.50.

Under the OPPS, one of our goals is to make payments that are appropriate for the services that are necessary for the treatment of Medicare beneficiaries. The OPPS, like other Medicare payment systems, is budget neutral and increases are limited to the annual hospital market basket increase reduced by the productivity adjustment. We believe that our payment rates reflect the costs that are associated with providing care to Medicare beneficiaries and are adequate to ensure access to services (80 FR 70374). For many emerging technologies, there is a transitional period during which utilization may be low, often because providers are first learning about the technologies and their clinical utility. Quite often, parties request that Medicare make higher payments under the New Technology APCs for new procedures in that transitional phase. These requests, and their accompanying estimates for expected total patient utilization, often reflect very low rates of patient use of expensive equipment, resulting in high per-use costs for which requesters believe Medicare should make full payment. Medicare does not, and we believe should not, assume responsibility for more than its share of the costs of procedures based on projected utilization for Medicare beneficiaries and does not set its payment rates based on initial projections of low utilization for services that require expensive capital equipment. For the OPPS, we rely on hospitals to make informed business decisions regarding the acquisition of high-cost capital equipment, taking into consideration their knowledge about their entire patient base (Medicare beneficiaries included) and an understanding of Medicare's and other payers' payment policies. We refer readers to the CY 2013 OPPS/ASC final rule with comment period (77 FR 68314) for further discussion regarding this payment policy.

We note that, in a budget-neutral system, payments may not fully cover hospitals' costs in a particular circumstance, including those for the purchase and maintenance of capital equipment. We rely on hospitals to make their decisions regarding the acquisition of high-cost equipment with the understanding that the Medicare program must be careful to establish its initial payment rates, including those made through New Technology APCs, for new services that lack hospital claims data based on realistic utilization projections for all such services delivered in cost-efficient hospital outpatient settings. As the OPPS acquires claims data regarding hospital costs associated with new procedures, we regularly examine the claims data and any available new information regarding the clinical aspects of new procedures to confirm that our OPPS payments remain appropriate for procedures as they transition into mainstream medical practice (77 FR 68314). For CY 2023, we included the proposed payment rates for New Technology APCs 1491 to 1599 and 1901 through 1908 in Addendum A to the CY 2023 OPPS/ASC proposed rule (which is available on the CMS website at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Hospital-Outpatient-Regulations-and-Notices.*

2. Establishing Payment Rates for Low-Volume New Technology Services

Services that are assigned to New Technology APCs are typically new services that do not have sufficient claims history to establish an accurate payment for the services. One of the objectives of establishing New Technology APCs is to generate sufficient claims data for a new service so that it can be assigned to an appropriate clinical APC. Some services that are assigned to New Technology APCs have very low annual volume, which we consider to be fewer than 100 claims. We consider services with fewer than 100 claims annually to be low-volume services because there is a higher probability that the payment data for a service may not have a normal statistical distribution, which could affect the quality of our standard cost methodology that is used to assign services to an APC. In addition, services with fewer than 100 claims per year are not generally considered to be significant contributors to the APC ratesetting calculations and, therefore, are not included in the assessment of the 2 times rule. As we explained in the CY 2019 OPPS/ASC final rule with comment period (83 FR 58892), we were concerned that the methodology we use to estimate the cost of a service under the OPPS by calculating the geometric mean for all separately paid claims for a HCPCS service code from the most recent available year of claims data may not generate an accurate estimate of the actual cost of the service for these low-volume services.

In accordance with section 1833(t)(2)(B) of the Act, services classified within each APC must be comparable clinically and with respect to the use of resources. As described earlier, assigning a service to a New Technology APC allows us to gather claims data to price the service and assign it to the APC with services that use similar resources and are clinically comparable. However, where utilization of services assigned to a New Technology APC is low, it can lead to wide variation in payment rates from year to year, resulting in even lower utilization and potential barriers to access to new technologies, which ultimately limits our ability to assign the service to the appropriate clinical APC. To mitigate these issues, we adopted a policy in the CY 2019 OPPS/ASC final rule with comment period to utilize our equitable adjustment authority at section 1833(t)(2)(E) of the Act to adjust how we determine the costs for low-volume services assigned to New Technology APCs (83 FR 58892 through 58893).

For purposes of this adjustment, we stated in the CY 2019 OPPS/ASC final rule with comment period that we believed that it was appropriate to use up to 4 years of claims data in calculating the applicable payment rate for the prospective year, rather than using solely the most recent available

year of claims data, when a service assigned to a New Technology APC has an annual claims volume of fewer than 100 claims (83 FR 58893). Using multiple years of claims data will potentially allow for more than 100 claims to be used to set the payment rate, which would, in turn, create a more statistically reliable payment rate.

In addition, to better approximate the cost of a low-volume service within a New Technology APC, we also stated that using the median or arithmetic mean rather than the geometric mean (which ''trims'' the costs of certain claims out) could be more appropriate in some circumstances, given the extremely low volume of claims. Low claim volumes increase the impact of ''outlier'' claims; that is, claims with either a very low or very high payment rate as compared to the average claim, which would have a substantial impact on any statistical methodology used to estimate the most appropriate payment rate for a service. Also, having the flexibility to utilize an alternative statistical methodology to calculate the payment rate in the case of low-volume new technology services helps to create a more stable payment rate.

In the CY 2019 OPPS/ASC final rule (83 FR 58893), we implemented a policy that we would seek public comments on which statistical methodology should be used to determine the payment rate for each low-volume service assigned to a New Technology APC. In the preamble of each annual rulemaking, we stated that we would present the result of each statistical methodology and solicit public comment on which methodology should be used to establish the payment rate for a low-volume new technology service. In addition, we explained that we would use our assessment of the resources used to perform a service and guidance from the developer or manufacturer of the service, as well as other interested parties, to determine the most appropriate payment rate. Once we identified the most appropriate payment rate for a service, we would assign the service to the New Technology APC with the cost band that includes its payment rate.

In the CY 2022 OPPS/ASC final rule with comment period, we adopted a policy to continue to utilize our equitable adjustment authority under section 1833(t)(2)(E) of the Act to calculate the geometric mean, arithmetic mean, and median using up to four years of claims data to select the appropriate payment rate for purposes of assigning services with fewer than 100 claims per year to a New Technology APC (86 FR 63529). However, we replaced our specific low-volume New Technology APC policy with the universal low volume APC policy that we adopted beginning in CY 2022. Our universal low volume APC policy is similar to our past New Technology APC low volume policy except that the universal low volume APC policy applies to clinical APCs and brachytherapy APCs as well as low volume procedures assigned to New Technology APCs, and uses the highest of the geometric mean, arithmetic mean, or median based on up to 4 years of claims data to assign a procedure with fewer than 100 claims per year to an appropriate New Technology APC. In the CY 2023 OPPS/ASC proposed rule, we proposed to designate three procedures assigned to New Technology APCs as low volume procedures and use the highest of the geometric mean, arithmetic mean, or median based on up to 4 years of claims data to assign such procedures to the appropriate New Technology APCs.

We did not receive any public comments on our proposed methodology for assigning low volume new technology procedures to New Technology APCs and, therefore, we are finalizing our proposal without modification.

3. Procedures Assigned to New Technology APC Groups for CY 2023

As we described in the CY 2002 OPPS final rule (66 FR 59902), we generally retain a procedure in the New Technology APC to which it is initially assigned until we have obtained sufficient claims data to justify reassignment of the procedure to a clinically appropriate APC. In addition, in cases where we find that our initial New Technology APC assignment was based on inaccurate or inadequate information (although it was the best information available at the time), where we obtain new information that was not available at the time of our initial New Technology APC assignment, or where the New Technology APCs are restructured, we may, based on more recent resource utilization information (including claims data) or the availability of refined New Technology APC cost bands, reassign the procedure or service to a different New Technology APC that more appropriately reflects its cost (66 FR 59903).

Consistent with our current policy, for CY 2023, we proposed to retain services within New Technology APC groups until we obtain sufficient claims data to justify reassignment of the service to an appropriate clinical APC. The flexibility associated with this policy allows us to reassign a service from a New Technology APC in less than 2 years if we have obtained sufficient claims data. It also allows us to retain a service in a New Technology APC for more than 2 years if we have not obtained sufficient claims data upon which to base a reassignment decision (66 FR 59902).

We did not receive any public comments on our proposal to retain services within New Technology APC groups until we obtain sufficient claims data to justify reassignment of the service to an appropriate clinical APC, and we are finalizing our proposal without modification. The procedures assigned to the New Technology APCs are discussed below.

a. Retinal Prosthesis Implant Procedure

CPT code 0100T (Placement of a subconjunctival retinal prosthesis receiver and pulse generator, and implantation of intra-ocular retinal electrode array, with vitrectomy) describes the implantation of a retinal prosthesis, specifically, a procedure involving the use of the Argus® II Retinal Prosthesis System. This first retinal prosthesis was approved by FDA in 2013 for adult patients diagnosed with severe to profound retinitis pigmentosa. For information on the utilization and payment history of the Argus® II procedure and the Argus® II device through CY 2022, please refer to the CY 2022 OPPS/ASC final rule with comment period (86 FR 63529 through 63530).

Early in 2022, we learned that the manufacturer of the Argus® II device discontinued manufacturing the device in 2020. We also contacted the consultant who represented the manufacturer in presentations with CMS, and he confirmed that the Argus® II device is no longer being implanted. A review of OPPS claims data found that there were no claims billed for CPT code 0100T in either CY 2020 or CY 2021. Based on this information, we have determined that the Argus® II device is no longer available in the marketplace and that outpatient hospital providers are no longer performing the Argus® II implantation procedure. Therefore, we proposed to make changes to the OPPS status indicators for HCPCS and CPT codes that are related to the Argus® II device and the Argus® II implantation procedure to indicate that Medicare payment is no longer available for the device and the implementation procedure as the Argus® II device is no longer on the market and, therefore, is not being implanted. These coding changes would mean that providers could no longer receive payment for performing the

Argus® II device or the device implantation procedure. These changes are described in Table 11.

We did not receive any public comments on our proposal and, therefore, we are finalizing our proposal without modification.

TABLE 11: CY 2022 AND 2023 FINAL OPPS STATUS INDICATOR AND APC ASSIGNMENTS FOR THE ARGUS® II DEVICE AND THE ARGUS® II IMPLANTATION PROCEDURE

CPT Code	Long Descriptor	Final CY 2022 OPPS SI	Final CY 2022 OPPS APC	Final CY 2023 OPPS SI	Final CY 2023 OPPS APC

C1841	Retinal prosthesis, includes all internal and external components	N	N/A	D	N/A

b. Administration of Subretinal Therapies Requiring Vitrectomy (APC 1562)

Effective January 1, 2021, CMS established HCPCS code C9770 (Vitrectomy, mechanical, pars plana approach, with subretinal injection of pharmacologic/biologic agent) and assigned it to a New Technology APC based on the geometric mean cost of CPT code 67036 (Vitrectomy, mechanical, pars plana approach) due to similar resource utilization. For CY 2021, HCPCS code C9770 was assigned to APC 1561 (New Technology—Level 24 ($3001–$3500)). This code may be used to describe the administration of HCPCS code J3398 (Injection, voretigene neparvovec-rzyl, 1 billion vector genomes). This procedure was previously discussed in depth in the CY 2021 OPPS/ASC final rule with comment period (85 FR 85939 through 85940). For CY 2022, we maintained the APC assignment of APC 1561 (New Technology—Level 24 ($3001–$3500)) for HCPCS code C9770 (86 FR 63531 through 63532).

HCPCS code J3398 (Injection, voretigene neparvovec-rzyl, 1 billion vector genomes) is for a gene therapy product indicated for a rare mutation-associated retinal dystrophy. Voretigene neparvovec-rzyl (Luxturna®) was approved by FDA in December of 2017 and is an adeno-associated virus vector-based gene therapy indicated for the treatment of patients with confirmed biallelic RPE65 mutation-associated retinal dystrophy.[7] This therapy is administered through a subretinal injection, which interested parties describe as an extremely delicate and sensitive surgical procedure. The FDA package insert describes one of the steps for administering Luxturna as, ''after completing a vitrectomy, identify the intended site of administration. The subretinal injection can be introduced via pars plana.''

Interested parties, including the manufacturer of Luxturna®, recommended CPT code 67036 (Vitrectomy, mechanical, pars plana approach) for the administration of the gene therapy.[8] However, the manufacturer previously contended the administration was not accurately described by any existing codes as CPT code 67036 (Vitrectomy, mechanical, pars plana approach) does not account for the administration itself.
