FEDERAL REGISTER

Vol. 89 Friday,

No. 28 February 9, 2024

Pages 8989–9738

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 89 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Presidential Documents

Title 3—

The President

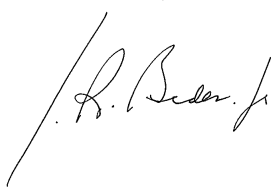
Notice of February 7, 2024

Continuation of the National Emergency With Respect to the Situation in and in Relation to Burma

On February 10, 2021, by Executive Order 14014, I declared a national emergency pursuant to the International Emergency Economic Powers Act (50 U.S.C. 1701–1706) to deal with the unusual and extraordinary threat to the national security and foreign policy of the United States constituted by the situation in and in relation to Burma.

The situation in and in relation to Burma, and in particular the February 1, 2021 coup, in which the military overthrew the democratically elected civilian government of Burma and unjustly arrested and detained government leaders, politicians, human rights defenders, journalists, and religious leaders, thereby rejecting the will of the people of Burma as expressed in elections held in November 2020 and undermining the country's democratic transition and rule of law, continues to pose an unusual and extraordinary threat to the national security and foreign policy of the United States. For this reason, the national emergency declared on February 10, 2021, must continue in effect beyond February 10, 2024. Therefore, in accordance with section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)), I am continuing for 1 year the national emergency declared in Executive Order 14014 with respect to the situation in and in relation to Burma.

This notice shall be published in the *Federal Register* and transmitted to the Congress.



THE WHITE HOUSE,
February 7, 2024.

Presidential Documents

Notice of February 7, 2024

Continuation of the National Emergency With Respect to the Widespread Humanitarian Crisis in Afghanistan and the Potential for a Deepening Economic Collapse in Afghanistan

On February 11, 2022, by Executive Order 14064, I declared a national emergency pursuant to the International Emergency Economic Powers Act (50 U.S.C. 1701 *et seq.*) to deal with the unusual and extraordinary threat to the national security and foreign policy of the United States constituted by the widespread humanitarian crisis in Afghanistan and the potential for a deepening economic collapse in Afghanistan.

The widespread humanitarian crisis in Afghanistan—including the urgent needs of the people of Afghanistan for food security, livelihoods support, water, sanitation, health, hygiene, and shelter and settlement assistance, among other basic human needs—and the potential for a deepening economic collapse in Afghanistan continue to pose an unusual and extraordinary threat to the national security and foreign policy of the United States. In addition, the preservation of certain property of Da Afghanistan Bank (DAB) held in the United States by United States financial institutions is of the utmost importance to addressing this national emergency and the welfare of the people of Afghanistan. Various parties, including representatives of victims of terrorism, have asserted legal claims against certain property of DAB or indicated in public court filings an intent to make such claims. This property is blocked under Executive Order 14064.

For these reasons, the national emergency declared in Executive Order 14064 of February 11, 2022, must continue in effect beyond February 11, 2024. Therefore, in accordance with section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)), I am continuing for 1 year the national emergency declared in Executive Order 14064 with respect to the widespread humanitarian crisis in Afghanistan and the potential for a deepening economic collapse in Afghanistan.

This notice shall be published in the *Federal Register* and transmitted to the Congress.

Rules and Regulations

Federal Register
Vol. 89, No. 28
Friday, February 9, 2024

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2024–0197; Airspace Docket No. 24–ASO–04

RIN 2120–AA66

Amendment of Class E Airspace; Ozark, AL and Columbus, GA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action makes the editorial changes, updating the airport names of two Army Airfields (AAF) and replacing the term Notice to Airmen with Notice to Air Missions in the Class E description. This action does not change the airspace boundaries or operating requirements.

DATES: Effective 0901 UTC, May 16, 2024. The Director of the Federal Register approves this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order JO 7400.11 and publication of conforming amendments.

ADDRESSES: This final rule may be viewed online at *www.regulations.gov* using the FAA Docket number. Electronic retrieval help and guidelines are available on the website. It is available 24 hours a day, 365 days a year.

FAA Order JO 7400.11H, Airspace Designations, and Reporting Points, and subsequent amendments can be viewed online at *www.faa.gov/air_traffic/publications/.* For further information, contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783.

FOR FURTHER INFORMATION CONTACT: John Fornito, Operations Support Group, Eastern Service Center, Federal Aviation Administration, 1701 Columbia Avenue, College Park, GA 30337; telephone: (404) 305–6364.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority, as it updates airport names and airspace descriptions. This update is an administrative change and does not change the airspace boundaries or operating requirements.

Incorporation by Reference

Class E airspace is published in paragraphs 6002 and 6004 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document amends the current version of that order, FAA Order JO 7400.11H, dated August 11, 2023, and effective September 15, 2023. FAA Order JO 7400.11H is publicly available as listed in the **ADDRESSES** section of this document. These amendments will be published in the next FAA Order JO 7400.11 update. FAA Order JO 7400.11H lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This amendment to 14 CFR part 71 amends Class E surface airspace and Class E airspace designated as an extension to a Class D surface area for Fort Novosel, Ozark, AL, and Fort Moore, Columbus, GA, by updating each airport's name (formerly Fort Rucker and Fort Benning, respectively), as well as updating the descriptions by making editorial changes, replacing the term Notice to Airmen with Notice to Air Missions in the appropriate descriptions. In addition, this action updates the geographic coordinates of CAIRNES VOR in the Class E airspace designated as an extension to a Class D surface area for Fort Novosel. This action is an administrative change and does not affect the airspace boundaries or operating requirements; therefore, notice and public procedure under 5 U.S.C. 553(b) is unnecessary.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures,'' paragraph 5–6.5a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances warrant the preparation of an environmental assessment.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order JO 7400.11H, Airspace Designations and Reporting Points, dated August 11, 2023, and effective September 15, 2023, is amended as follows:

Paragraph 6002 Class E Surface Airspace.

* * * * *

ASO GA E2 Columbus, GA [Amended]

Columbus Airport, GA
(Lat 32°30′59″ N, long 84°56′20″ W)
Lawson AAF (Fort Moore)
(Lat 32°19′54″ N, long 84°59′14″ W)

That airspace extending upward from the surface within a 4.4-mile radius of the Columbus Airport, and that airspace extending upward from the surface within a 5.2-mile radius of Lawson Army Airfield (Fort Moore), and that airspace within 1 mile each side of the 145° bearing from the AAF extending from the 5.2-mile radius to 6.8 miles southeast of the AAF. This Class E airspace is effective during the specific dates and times established in advance by a Notice to Air Missions. The effective date and time will thereafter be continuously published in the Chart Supplement.

* * * * *

Paragraph 6004 Class E Airspace Designated as an Extension to Class D or Class E Surface Area.

* * * * *

ASO AL E4 Fort Novosel (Ozark), AL [Amended]

Cairns Army Air Field (Fort Novosel), AL
(Lat 31°16′33″ N, long 85°42′48″ W)
Cairns VOR
(Lat 31°16′08″ N, long 85°43′35″ W)

That airspace extending upward from the surface within 3.5 miles on each side of Cairns VOR 231° radial, extending from the 5-mile radius of lat. 31°18′30″ N, long. 85°42′20″ W to 7 miles southwest of the VOR, and within 2 miles each side of Cairns Army Airfield Runway 36 extended centerline, extending from the 5-mile radius to 5 miles south of the runway end.

* * * * *

Issued in College Park, Georgia, on February 5, 2024.

Andreese C. Davis, Manager,

Airspace & Procedures Team South, Eastern Service Center, Air Traffic Organization.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG–2024–0128]

RIN 1625–AA00

Safety Zones; Delaware River Dredging, Marcus Hook, PA

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing two temporary safety zones on the waters of the Delaware River, in portions of Marcus Hook Range and Anchorage 7 off Marcus Hook Range. The safety zones temporarily restrict vessel traffic from transiting or anchoring in portions of the Delaware River while maintenance dredging is being conducted within the Delaware River. The safety zones are needed to protect personnel, vessels, and the marine environment from hazards created by dredging operations. Entry of vessels or persons into these zones is prohibited unless specifically authorized by the Captain of the Port (COTP) or his designated representatives.

DATES: This rule is effective without actual notice from February 9, 2024 through April 30, 2024. For the purposes of enforcement, actual notice will be used from February 6, 2024, through February 9, 2024

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *https://www.regulations.gov,* type USCG–2024–0128 in the search box, and click ''Search.'' Next, in the ''Document Type'' column, select ''Supporting & Related Material.''

FOR FURTHER INFORMATION CONTACT: If you have questions about this rule, call or email Petty Officer Christopher Payne, Waterways Management Branch, U.S. Coast Guard Sector Delaware Bay; telephone (267) 515–7294, email *SecDelBayWWM@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

COTP Captain of the Port
CFR Code of Federal Regulations
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

The Coast Guard is issuing this temporary rule without prior notice and opportunity to comment pursuant to authority under section 5 U.S.C. 553(b). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency, for good cause, finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because it is impracticable and contrary to the public interest. There is insufficient time to allow for a reasonable comment period prior to the start date for dredging operations. The rule must be in force by February 6, 2024 to serve its purpose of ensuring the safety of the public from hazards associated with dredging operations.

Under 5 U.S.C. 553(d)(3), the Coast Guard also finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register** for the same reasons discussed above.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority in 46 U.S.C. 70034 (previously 33 U.S.C. 1231). The COTP has determined that there are potential hazards associated with dredging operations, such as submerged and floating pipelines, booster pumps, head sections, and support vessels with a restricted ability to maneuver. The purpose of this rulemaking is to ensure the safety of personnel, vessels, and the marine environment within a 250-yard radius of dredging operations and all associated pipeline and equipment.

IV. Discussion of the Rule

This rule establishes two safety zones, both of which will be in effect from February 6, 2024 through April 30, 2024. The safety zones are necessary to facilitate annual maintenance dredging of the Delaware River in the vicinity of Marcus Hook Range and Anchorage 7 off Marcus Hook Range. (The location of the anchorage is described in 33 CFR 110.157(a)(8).) Dredging will most likely be conducted with the dredge ESSEX, though other dredges may be used, along with the associated dredge pipeline and booster pumps. The pipeline consists of a combination of floating hoses immediately behind the dredge and submerged pipeline leading to upland disposal areas. Booster pumps, located between the dredge

pump and the discharge point, allow the dredge pump to operate more efficiently. Due to the hazards related to dredging operations, the associated pipeline and the location of submerged pipeline, safety zones are being established in the following areas:

(1) Safety Zone One includes all navigable waters within 250 yards of the dredge, which will be displaying lights and shapes for vessels restricted in ability to maneuver, as described in 33 CFR 83.27, and all related dredge equipment when the dredge is operating in Marcus Hook Range, and Anchorage 7. This safety zone is being established for the duration of the maintenance project. Vessels requesting to transit the safety zone must contact the dredge on VHF channel 13 or 16 at least 1 hour prior to arrival to arrange safe passage. At least one side of the main navigational channel will be kept clear for safe passage of vessels in the vicinity of the safety zone. At no time will the entire main navigational channel be closed to vessel traffic. Vessels should avoid meeting in these areas where one side of the main navigational channel is open and proceed per this rule and the Rules of the Road (33 CFR subchapter E).

(2) Safety Zone Two includes all the waters of Anchorage 7 off Marcus Hook Range, as described in 33 CFR 110.157(a)(8). Vessels wishing to anchor in Anchorage 7 off Marcus Hook Range while this rule is in effect must obtain permission from the COTP at least 24 hours in advance by calling (215) 271–4807. Vessels requesting permission to anchor within Anchorage 7 off Marcus Hook must be at least 650 feet in overall length. The COTP will permit, at maximum, only one vessel to anchor at a time, on a ''first-come, first-served'' basis. Vessels will only be allowed to anchor for a 12 hour period. Vessels that require an examination by the Public Health Service, Customs, or Immigration authorities will be directed to an anchorage by the COTP for the required inspection. Vessels are encouraged to use Anchorage 9 near the entrance to Mantua Creek, Anchorage 10 at Naval Base, Philadelphia, and Anchorage 6 off Deepwater Point Range as alternative anchorages.

Preference is being given to vessels at least 650 feet in length in Anchorage 7 while this rule is in effect, because vessels of this size are limited in their ability to utilize other anchorages due to draft. The depth of Anchorage 7 provides an acceptable depth for large vessels to bunker and stage for facility arrival. Smaller vessels maintain a host of other options to include, but are not limited to, Anchorage 9 and 10, as recommended above.

Entry into, transiting, or anchoring within safety zone one is prohibited unless vessels obtain permission from the COTP or make satisfactory passing arrangements with the operating dredge per this rule and the Rules of the Road (33 CFR subchapter E). The COTP may issue updates regarding the vessel and equipment being utilized for these dredging operations via Marine Safety Information Bulletin and Broadcast Notice to Mariners.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This rule has not been designated a ''significant regulatory action,'' under Executive Order 12866, as amended by Executive Order 14094. Accordingly, this rule has not been reviewed by the Office of Management and Budget (OMB).

This regulatory action determination is based on size, location, duration, and traffic management of the safety zones. The safety zones will be enforced in an area and in a manner that does not conflict with transiting commercial and recreational traffic. At least one side of the main navigational channel will be open for vessels to transit at all times. Moreover, the Coast Guard will work in coordination with the pilots to ensure vessel traffic can transit the area safely.

Although this regulation will restrict access to regulated areas, the effect of this rule will not be significant because there are a number of alternate anchorages available for vessels to anchor. Furthermore, vessels may transit through the safety zones with the permission of the COTP or make satisfactory passing arrangements with the dredge ESSEX, or other dredge(s) that may be used in accordance with this rule and the Rules of the Road (33 CFR subchapter E). The Coast Guard will notify the maritime public about the safety zones through maritime advisories, allowing mariners to alter their plans accordingly.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section V. A. above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of

power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves two safety zones to protect waterway users that would prohibit entry within 250 yards of dredging operations and will close only one side of the main navigation channel. Vessels can request permission to enter the channel. It is categorically excluded from further review under paragraph L60(a) of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A Record of Environmental Consideration supporting this determination is available in the docket. For instructions on locating documents mentioned in this preamble as being available in the docket, see the **ADDRESSES** section of this preamble.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C. 70034, 70051, 70124; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 00170.1, Revision No. 01.3.

■ 2. Add § 165.T05–1004, to read as follows.

§ 165.T05–1004 Safety Zones, Delaware River Dredging; Marcus Hook, PA

(a) *Location.* The following areas are safety zones:

(1) Safety Zone One includes all waters within 250 yards of the dredge displaying lights and shapes for vessels restricted in ability to maneuver as described in 33 CFR 83.27, as well as all related dredge equipment, while the dredge is operating in Marcus Hook Range. For enforcement purposes Marcus Hook Range includes all navigable waters of the Delaware River shoreline to shoreline, bound by a line drawn perpendicular to the center line of the channel at the farthest upriver point of the range to a line drawn perpendicular to the center line of the channel at the farthest downriver point of the range.

(2) Safety Zone Two includes all the waters of Anchorage 7 off Marcus Hook Range, as described in 33 CFR 110.157(a)(8) and depicted on U.S. Nautical Chart 12312.

(b) *Definitions.* As used in this section—

Designated representative means any Coast Guard commissioned, warrant, or petty officer who has been authorized by the Captain of the Port to assist with enforcement of the safety zones described in paragraphs (a)(1) and (2) of this section.

(c) *Regulations.* (1) Entry into or transiting within Safety Zone One is prohibited unless vessels obtain permission from the Captain of the Port via VHF–FM channel 16 or 215–271–4807, or make satisfactory passing arrangements via VHF–FM channel 13 or 16 with the operating dredge per this section and the rules of the Road (33 CFR subchapter E). Vessels requesting to transit shall contact the operating dredge via VHF–FM channel 13 or 16 at least 1 hour prior to arrival.

(2) Vessels desiring to anchor in Safety Zone Two, Anchorage 7 off Marcus Hook Range, must obtain permission from the COTP at least 24 hours in advance by calling (215) 271–4807. The COTP will permit, at maximum, one vessel at a time to anchor on a ''first-come, first-served'' basis. Vessels will only be allowed to anchor for a 12 hour period. Vessels that require an examination by the Public Health Service, Customs, or Immigration authorities will be directed to an anchorage for the required inspection by the COTP.

(3) Vessels desiring to anchor in Safety Zone Two, Anchorage 7 off Marcus Hook Range, must be at least 650 feet in length overall.

(4) This section applies to all vessels except those engaged in the following operations: enforcement of laws, service of aids to navigation, and emergency response.

(d) *Enforcement.* The U.S. Coast Guard may be assisted by federal, state and local agencies in the patrol and enforcement of the zone.

(e) *Enforcement period.* This rule will be in effect and subject to enforcement from February 6, 2024 through April 30, 2024. If the Captain of the Port determines that conditions no longer warrant enforcement of the rule, he will provide notice to that effect via Marine Safety Information Bulletin and Broadcast Notice to Mariners.

Dated: February 6, 2024.

Kate F. Higgins-Bloom,

Captain, U.S. Coast Guard Captain of the Port, Delaware Bay.

[FR Doc. 2024–02704 Filed 2–8–24; 8:45 am]

BILLING CODE 9110–04–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R04–OAR–2022–0630; FRL–11582–02–R4]

Air Plan Approval; Georgia; Vehicle Inspection and Maintenance Program

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving changes to Georgia's State Implementation Plan (SIP) submitted by the State of Georgia through the Georgia Department of Natural Resources (GA DNR), Environmental Protection Division (EPD), on June 8, 2022, and on June 6, 2023. Georgia's June 8, 2022, SIP revision (hereinafter referred to as Georgia's 2022 I/M SIP revision) removes obsolete references and provisions; updates the State's inspection and maintenance (I/M) requirements; updates terminology, in part to reflect advances in test and vehicle technology; and makes other minor changes. The June 6, 2023, SIP revision (hereinafter referred to as Georgia's 2023 I/M SIP revision) removes outdated terminology; updates with new terminology; removes one requirement; and makes other minor changes to Georgia's enhanced I/M program. EPA is approving these changes pursuant to the Clean Air Act (CAA or Act).

DATES: This rule is effective March 11, 2024.

ADDRESSES: EPA has established a docket for this action under Docket Identification No. EPA–R04–OAR–2022–0630. All documents in the docket are listed on the regulations.gov website. Although listed in the index, some information may not be publicly available, *i.e.,* Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through www.regulations.gov or in hard copy at the Air Regulatory Management Section, Air Planning and Implementation Branch, Air and Radiation Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960. EPA requests that you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday 8:30 a.m. to 4:30 p.m., excluding Federal holidays.

FOR FURTHER INFORMATION CONTACT: Weston Freund, Air Regulatory Management Section, Air Planning and Implementation Branch, Air and Radiation Division, Region 4, U.S. Environmental Protection Agency, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960. The telephone number is (404) 562–8773. Mr. Freund can also be reached via electronic mail at *freund.weston@epa.gov*.

SUPPLEMENTARY INFORMATION:

I. Background

In 1991, EPA classified a 13-county area in and around the Atlanta, Georgia, metropolitan area as a serious ozone nonattainment area for the 1979 1-hour ozone national ambient air quality standards (NAAQS or standard), triggering the requirement for the State to establish an enhanced I/M program for the area.[1] In 1996, Georgia submitted its enhanced I/M program to EPA for incorporation into the SIP. EPA granted interim approval of the State's program in 1997 and full approval in 2000. *See* 62 FR 42916 (August 11, 1997) and 65 FR 4133 (January 26, 2000), respectively.

On June 8, 2022, and June 6, 2023, Georgia submitted SIP revisions seeking to amend various I/M regulations in Chapter 391–3–20—*Enhanced Inspection and Maintenance,* of Georgia's SIP. In this rulemaking, EPA is approving changes to Rules 391–3–20–.01—*Definitions;* Rule 391–3–20–.03, *Covered Vehicles; Exemptions;* Rule 391–3–20–.04—*Emission Inspection Procedures;* Rule 391–3–20–.05—*Emission Standards;* Rule 391–3–20–.09—*Inspection Station Requirements;* Rule 391–3–20–.10—*Certificates of Authorization;* Rule 391–3–20–.11—*Inspector Qualifications and Certification;* Rule 391–3–20–.13—*Certificate of Emission Inspection;* Rule 391–3–20–.15—*Repairs and Retests;* Rule 391–3–20–.17—*Waivers;* and Rule 391–3–20–.22—*Enforcement.* EPA is approving these revisions because these changes will not interfere with any applicable requirement concerning attainment and reasonable further progress, or any other applicable CAA requirement.[2]

In a notice of proposed rulemaking (NPRM), published on December 21, 2023 (88 FR 88310), EPA proposed to approve the June 8, 2022, and June 6, 2023, SIP submissions. The details of Georgia's submissions, which remove obsolete references and provisions; update the State's I/M requirements; update and remove outdated terminology; remove a requirement; and makes other minor changes to Georgia's enhanced I/M program of the Georgia SIP, as well as EPA's rationale for approve the changes, are described in the December 21, 2023, NPRM. Comments on the December 21, 2023, NPRM were due on or before January 22, 2024. No comments were received on the NPRM, adverse or otherwise.

II. Incorporation by Reference

In this document, EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, and as discussed in Section I of this preamble, EPA is finalizing the incorporation by reference of Georgia Rule 391–3–20–.09—*Inspection Station Requirements;* Rule 391–3–20–.10—*Certificates of Authorization;* Rule 391–3–20–.13—*Certificate of Emission Inspection;* Rule 391–3–20–.15—*Repairs and Retests;* Rule 391–3–20–.17—*Waivers;* and Rule 391–3–20–.22—*Enforcement,* all of which have a state-effective date of April 19, 2022, into the Georgia SIP. Further, EPA is finalizing the incorporation by reference of Georgia Rule 391–3–20–.01—*Definitions;* Rule 391–3–20–.03, *Covered Vehicles; Exemptions;* Rule 391–3–20–.04—*Emission Inspection Procedures;* Rule 391–3–20–.05—*Emission Standards,* and Rule 391–3–20–.11—*Inspector Qualifications and Certification,* all of which have a state-effective date of March 21, 2023, into the Georgia SIP. EPA has made, and will continue to make, these materials generally available through *www.regulations.gov* and at the EPA Region 4 Office (please contact the person identified in the ''For Further Information Contact'' section of this preamble for more information). Therefore, the revised materials as stated above, have been approved by EPA for inclusion in the State implementation plan, have been incorporated by reference by EPA into that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of EPA's approval, and will be incorporated by reference in the next update to the SIP compilation.[3]

III. Final Actions

EPA is approving the aforementioned changes to various I/M regulations in Chapter 391–3–20—*Enhanced Inspection and Maintenance,* of the Georgia SIP. Specifically, EPA is finalizing the approval of the June 8, 2022, and June 6, 2023, SIP revisions which amends Georgia Rules 391–3–20–.01—*Definitions;* Rule 391–3–20–.03, *Covered Vehicles; Exemptions;* Rule

[1] On November 6, 1991, EPA designated and classified the following counties in and around the Atlanta, Georgia, metropolitan area as a serious ozone nonattainment area for the 1-hour ozone NAAQS: Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Paulding, and Rockdale. *See* 56 FR 56694.

[2] See CAA section 110(l).

[3] 62 FR 27968 (May 22, 1997).

391–3–20–.04—*Emission Inspection Procedures;* Rule 391–3–20–.05—*Emission Standards;* Rule 391–3–20–.09—*Inspection Station Requirements;* Rule 391–3–20–.10—*Certificates of Authorization;* Rule 391–3–20–.11—*Inspector Qualifications and Certification;* Rule 391–3–20–.13—*Certificate of Emission Inspection;* Rule 391–3–20–.15—*Repairs and Retests;* Rule 391–3–20–.17—*Waivers;* and Rule 391–3–20–.22—*Enforcement.*

VI. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. *See* 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, these actions merely approve state law as meeting Federal requirements and do not impose additional requirements beyond those imposed by state law. For that reason, these actions:

- Are not significant regulatory actions subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 14094 (88 FR 21879, April 11, 2023);
- Do not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Are certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Do not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Do not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Are not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because they approve a state program;
- Are not significant regulatory actions subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Are not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the proposed rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

Executive Order 12898 (Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629, Feb. 16, 1994) directs Federal agencies to identify and address ''disproportionately high and adverse human health or environmental effects'' of their actions on minority populations and low-income populations to the greatest extent practicable and permitted by law. EPA defines environmental justice (EJ) as ''the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.'' EPA further defines the term fair treatment to mean that ''no group of people should bear a disproportionate burden of environmental harms and risks, including those resulting from the negative environmental consequences of industrial, governmental, and commercial operations or programs and policies.''

EPD did not evaluate EJ considerations as part of its SIP submittals; the CAA and applicable implementing regulations neither prohibit nor require such an evaluation. EPA did not perform an EJ analysis and did not consider EJ in these actions. Due to the nature of the actions being taken here, these actions are expected to have a neutral to positive impact on the air quality of the affected area. Consideration of EJ is not required as part of these actions, and there is no information in the record inconsistent with the stated goal of E.O. 12898 of achieving EJ for people of color, low-income populations, and Indigenous peoples.

These actions are subject to the Congressional Review Act, and EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. These actions are not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of these actions must be filed in the United States Court of Appeals for the appropriate circuit by April 9, 2024. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of these actions for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed and shall not postpone the effectiveness of such rule or action. These actions may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: February 2, 2024.

Jeaneanne Gettle,

Acting Regional Administrator, Region 4.

For the reasons stated in the preamble, the EPA amends 40 CFR part 52 as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart L—Georgia

■ 2. In § 52.570(c), amend Table (1) by revising the entries for ''Rule 391–3–20–.01,'' ''Rule 391–3–20–.03,'' ''Rule 391–3–20–.04,'' ''Rule 391–3–20–.05,'' ''Rule 391–3–20–.09,'' ''Rule 391–3–20–.10,'' ''Rule 391–3–20–.11,'' ''Rule 391–3–20–.13,'' ''Rule 391–3–20–.15,'' ''Rule 391–3–20–.17,'' and ''Rule 391–3–20–.22.''

The amendments read as follows:

§ 52.570 Identification of plan.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2023–0479; FRL–11425–03–R9]

Air Plan Approval; California; California Air Resources Board; Volatile Organic Compounds

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking final action to approve a revision to the California Air Resources Board (CARB) portion of the California State Implementation Plan (SIP). This revision concerns emissions of volatile organic compounds (VOCs) from vapor recovery systems of gasoline cargo tanks. We are approving a local rule that regulates this emission source under the Clean Air Act (CAA or the Act).

DATES: This rule is effective March 11, 2024.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R09–OAR–2023–0479. All documents in the docket are listed on the *https://www.regulations.gov* website. Although listed in the index, some information is not publicly available, *e.g.,* Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through *https://www.regulations.gov,* or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information. If you need assistance in a language other than English or if you are a person with a disability who needs a reasonable accommodation at no cost to you, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: La Kenya Evans-Hopper, EPA Region IX, 75 Hawthorne St., San Francisco, CA 94105. By phone: (415) 972–3245 or by email at *evanshopper.lakenya@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, ''we,'' ''us,'' and ''our'' refer to the EPA.

Table of Contents

I. Proposed Action

On November 2, 2023 (88 FR 75246), the EPA proposed to approve the following rule into the California SIP.

Local agency	Regulation or provision	Regulation title or subject	Amended	Submitted
CARB	California Code of Regulations, Title 17, Division 3, Chapter 1, Subchapter 8, Article 1, Section 94014, except sub-sections (a)–(d) *.	Certification of Vapor Recovery Systems for Cargo Tanks.	** 07/12/23	09/13/23
CARB	Certification Procedure CP–204	Certification Procedure for Vapor Recovery Systems of Cargo Tanks.	07/12/23	09/13/23

* Letter dated September 21, 2023, from Michael Benjamin, Chief, Air Quality Planning and Science Division, to Martha Guzman, Regional Administrator, EPA Region IX. The letter states that Section 94014, sub-sections (a)–(d), that describe fee provisions, were inadvertently submitted to the EPA. Therefore, CARB withdrew Section 94014, sub-sections (a)–(d), from consideration for inclusion into the SIP. The EPA is not acting on Section 94014, sub-sections (a)–(d) in this rulemaking.

** The California Air Resources Board amended the introductory paragraph of 17 California Code of Regulations Section 94014 on July 12, 2023, and the changed was filed with Thomson Reuters Westlaw on August 29, 2023. Therefore, the amendment for Section 94014 will be recorded as July 12, 2023.

We proposed to approve this rule because we determined that it complies with the relevant CAA requirements. Our proposed action contains more information on the rule and our evaluation.

II. Public Comments and EPA Responses

The EPA's proposed action provided a 30-day public comment period. During this period, we received two comments that concerned issues outside the scope of this rulemaking. These comments are available for review in the docket for this action.

III. EPA Action

No comments were submitted that change our assessment of the rule as described in our proposed action. Therefore, as authorized in section 110(k)(3) of the Act, the EPA is fully approving this rule into the California SIP. The July 12, 2023 versions of CARB's California Code of Regulations (CCR), Title 17, Division 3, Chapter 1, Subchapter 8, Article 1, Section 94014 and CP–204 Certification Procedure for Vapor Recovery Systems of Cargo Tanks (incorporated by reference) will replace the previously approved versions of this regulation in the SIP.

IV. Incorporation by Reference

In this rule, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is finalizing the incorporation by reference of California Air Resources Board, California Code of Regulations, Title 17, Division 3, Chapter 1, Subchapter 8, Article 1, Section 94014—Certification of Vapor Recovery Systems—Cargo Tanks, excluding sub-sections (a) through (d), amended on July 12, 2023, and Certification Procedure—CP–204 Certification Procedure for Vapor Recovery Systems of Cargo Tanks, amended on July 12, 2023 (incorporated by reference), both of which regulates VOCs from vapor recovery systems of gasoline cargo tanks. The EPA has made, and will continue to make, these documents available through *www.regulations.gov* and at the EPA Region IX Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

V. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 14094 (88 FR 21879, April 11, 2023);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it approves a state program;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

Executive Order 12898 (Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629, February 16, 1994) directs Federal agencies to identify and address ''disproportionately high and adverse human health or environmental effects'' of their actions on minority populations and low-income populations to the greatest extent practicable and permitted by law. The EPA defines environmental justice (EJ) as ''the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.'' The EPA further defines the term fair treatment to mean that ''no group of people should bear a disproportionate burden of environmental harms and risks, including those resulting from the negative environmental consequences of industrial, governmental, and commercial operations or programs and policies.''

The State did not evaluate environmental justice considerations as part of its SIP submittal; the CAA and applicable implementing regulations neither prohibit nor require such an evaluation. The EPA did not perform an

EJ analysis and did not consider EJ in this action. Consideration of EJ is not required as part of this action, and there is no information in the record inconsistent with the stated goal of Executive Order 12898 of achieving environmental justice for people of color, low-income populations, and Indigenous peoples.

This action is subject to the Congressional Review Act, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by April 9, 2024. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: February 5, 2024.

Martha Guzman Aceves,

Regional Administrator, Region IX.

For the reasons stated in the preamble, the Environmental Protection Agency amends part 52, chapter I, title 40 of the Code of Federal Regulations as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart F—California

■ 2. In § 52.220a, amend paragraph (c) by:

■ a. In Table 1, revising the entry ''94014'' and;

■ b. In Table 2 revising the entry for ''Certification Procedure CP–204 Certification Procedure for Vapor Recovery Systems of Cargo Tanks''.

The revisions read as follows:

§ 52.220a Identification of plan–in part.

Medicare Program: Hospital Outpatient Prospective Payment and Ambulatory Surgical Center Payment Systems; Quality Reporting Programs; Payment for Intensive Outpatient Services in Hospital Outpatient Departments, Community Mental Health Centers, Rural Health Clinics, Federally Qualified Health Centers, and Opioid Treatment Programs; Hospital Price Transparency; Changes to Community Mental Health Centers Conditions of Participation, Changes to the Inpatient Prospective Payment System Medicare Code Editor; Rural Emergency Hospital Conditions of Participation Technical Correction; Correction

AGENCY: Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services (HHS).

ACTION: Final rule with comment period; correction.

SUMMARY: This document corrects technical and typographical errors in the final rule with comment period that appeared in the **Federal Register** on November 22, 2023, titled ''Medicare Program: Hospital Outpatient Prospective Payment and Ambulatory Surgical Center Payment Systems; Quality Reporting Programs; Payment for Intensive Outpatient Services in Hospital Outpatient Departments, Community Mental Health Centers, Rural Health Clinics, Federally Qualified Health Centers, and Opioid Treatment Programs; Hospital Price Transparency; Changes to Community Mental Health Centers Conditions of Participation, Changes to the Inpatient Prospective Payment System Medicare Code Editor; Rural Emergency Hospital Conditions of Participation Technical Correction'' (referred to hereafter as the ''CY 2024 OPPS/ASC final rule with comment period'').

DATES:

Effective Date: This correcting document is effective February 9, 2024.

Applicability Date: This correcting document is applicable January 1, 2024.

SUPPLEMENTARY INFORMATION:

I. Background

In FR Doc. 2023–24293 of November 22, 2023 (88 FR 81540), there were a number of technical and typographical errors that are identified and corrected in this correcting document. The corrections in this correcting document are effective as if they had been included in the document that appeared in the November 22, 2023 **Federal Register**. Accordingly, the corrections are effective January 1, 2024.

II. Summary of Errors

A. Summary of Errors in the Preamble

1. Hospital Outpatient Prospective Payment System (OPPS) Corrections

On pages 81546, 82156, 82157, and 82158, we are correcting the estimates of the changes in payments to account for our correction to apply the trim that we inadvertently failed to apply to claims for the Hyperbaric Oxygen Therapy APC (APC 5061). When an individual claim contains 50 or more units on the primary code's line used for ratesetting, the OPPS ratesetting programs exclude, or trim, these lines from the calculation of the geometric mean for an ambulatory payment classification (APC). However, this trim was inadvertently not included in the ratesetting process for two APCs: Hyperbaric Oxygen Therapy (APC 5061) and Ancillary Outpatient Services When Patient Dies (APC 5881). We are applying this trim and removing these lines where the primary code's units contain 50 or more units for CY 2024 OPPS ratesetting. The geometric mean cost for APC 5061 will change significantly as a result of this trim, from what was originally $75.61 to $135.89, because there is a claim for this APC that contained more than 50 units on an individual line that was originally used in CY 2024 OPPS ratesetting.

In addition, the change in the geometric mean cost for APC 5061 necessitates changing the OPPS weight scalar and OPPS relative payment weights to maintain budget neutrality for CY 2024, which results in changes in OPPS payment rates for items and services calculated using the weight scalar.

On page 81578, we are correcting the weight scalar to use the updated number calculated after correct application of the trim.

On pages 81592, 81593, and 81595, we are correcting several figures used in the sample calculations of the full national unadjusted payment rate, the reduced national unadjusted payment rate, and the adjusted copayment amount for an APC group to use the

figures after application of the trim and resulting change in the payment rates.

On page 81669, we are adding additional language that we inadvertently omitted regarding HCPCS codes G2066 (Interrogation device evaluation(s), (remote) up to 30 days; implantable cardiovascular physiologic monitor system, implantable loop recorder system, or subcutaneous cardiac rhythm monitor system, remote data acquisition(s), receipt of transmissions and technician review, technical support and distribution of results), 93297 (Interrogation device evaluation(s), (remote) up to 30 days; implantable cardiovascular physiologic monitor system, including analysis of 1 or more recorded physiologic cardiovascular data elements from all internal and external sensors, analysis, review(s) and report(s) by a physician or other qualified health care professional), and 93298 (Interrogation device evaluation(s), (remote) up to 30 days; subcutaneous cardiac rhythm monitor system, including analysis of recorded heart rhythm data, analysis, review(s) and report(s) by a physician or other qualified health care professional). Specifically, we are adding language that we inadvertently omitted stating that the OPPS status indicators for CPT codes 93297 and 93298 have been revised to indicate that they will be separately payable under the OPPS.

On page 81801, in the table titled ''Table 95: Skin Substitute Assignments to High-Cost and Low-Cost Groups for CY 2024'', we are correcting an inadvertent error in the skin substitute group assignment for HCPCS code Q4282 (Cygnus dual, per square centimeter) for CY 2023 and CY 2024. HCPCS code Q4282 is assigned to the high-cost skin substitute group for those years.

2. Ambulatory Surgical Center (ASC) Payment System Corrections

On pages 81958 and 82162, our application of the trim and correction to the OPPS weight scalar and OPPS relative payment weights, results in a change to the OPPS payment rates. The revised OPPS payment rates required an alteration in our estimate of prospective aggregate ASC expenditures, which in turn necessitates a correction to the ASC weight scalar and ASC relative payment weights because the ASC Payment System ratesetting methodology utilizes the scaled OPPS relative weights. Therefore, we are revising our ASC weight scalar from 0.8881 to 0.889.

3. Hospital Outpatient Quality Reporting (OQR) Program Corrections

On page 81971, we are correcting the Cataracts Visual Function measure CBE number and endorsement date. Additionally, we are replacing inadvertently included language that did not pertain to the Cataracts Visual Function measure with the measure endorsement removal information.

On page 81993, in the table titled ''Table 128: Finalized Hospital OQR Program Measure Set for the CY 2026 Payment Determination,'' we are adding a dagger symbol (''†'') after the Cataracts Visual Function measure name, noting that the CBE endorsement for this measure was removed. We are also adding two double dagger symbols (''††'') both following the COVID–19 Vaccination Among Health Care Personnel (HCP) measure name in Table 128 and as a table note following the table to inform readers that the CBE number was assigned to the original version of the COVID–19 Vaccination Coverage Among HCP measure but not the modified version of the measure that we finalized in the CY 2024 OPPS/ASC final rule with comment period.

On page 81994, in the table titled ''Table 129: Finalized Hospital OQR Program Measure Set for the CY 2027 Payment Determination and Subsequent Years,'' we are removing inadvertent language related to the HOPD Procedure Volume measure—a measure that was proposed in the CY 2024 OPPS/ASC proposed rule and not finalized after consideration of the public comments received—in the table and in the associated table note following the table. We are also adding a dagger symbol (''†'') after the Cataracts Visual Function measure name, noting that CBE endorsement for this measure was removed. We are also adding two double dagger symbols (''††'') both following the COVID–19 Vaccination Among Health Care Personnel measure name in Table 129 and as a table note following the table to inform readers that the CBE number was assigned to the original version of the COVID–19 Vaccination Coverage Among HCP measure but not the modified version of the measure that we finalized in the CY 2024 OPPS/ASC final rule with comment period.

4. Ambulatory Surgical Center Quality Reporting Program (ASCQR) Corrections

On page 82014, we are correcting the citation to the CY 2024 OPPS/ASC COVID–19 Vaccination Coverage Among HCP measure modification proposal for the ASCQR Program.

On page 82031, we are correcting the link referenced in footnote 629 and updating the footnote citation accordingly.

On page 82037, in the table titled ''Table 139: Finalized ASCQR Program Measure Set for the CY 2024 Reporting Period/CY 2026 Payment Determination'', we are correcting the CBE number for the COVID–19 Vaccination Coverage Among HCP measure. We also are adding two dagger symbols (''††'') following the corrected CBE number for the COVID–19 Vaccination Among Health Care Personnel measure, and a related table note following the table associated with the two dagger symbols, to inform readers that the CBE number was assigned to the original version of the COVID–19 Vaccination Coverage Among HCP measure and not the modified version of the measure that we finalized in the CY 2024 OPPS/ASC final rule with comment period.

On page 82038, in table titled ''Table 140: Finalized ASCQR Program Measure Set for the CY 2025 Payment Determination/CY 2027 Payment Determination'', we are correcting the CBE numbers for the COVID–19 Vaccination Coverage Among HCP, and the Risk-Standardized Patient-Reported Outcome-Based Performance Measure (PRO–PM) Following Elective Primary Total Hip Arthroplasty (THA) and/or Total Knee Arthroplasty (TKA) in the ASC Setting (THA/TKA PRO–PM) measures. We also are adding two dagger symbols (''††'') following the corrected CBE number for the COVID–19 Vaccination Among Health Care Personnel measure, and a related table note following the table associated with the two dagger symbols, to inform readers that the CBE number was assigned to the original version of the COVID–19 Vaccination Coverage Among HCP measure and not the modified version of the measure that we finalized in the CY 2024 OPPS/ASC final rule with comment period.

On page 82142 through 82148, we inadvertently neglected to carry over the correct number of ASCs that performed THA/TKA procedures and the average number of paid Medicare FFS claims for THA/TKA procedures performed by ASCs in CY 2022, reflected in Table 138, into our burden calculation estimates. We are correcting the estimates of the number of ASCs that will perform THA/TKA procedures and the average number of THA/TKA procedures that will be performed by ASCs for the CY 2025 through 2028 reporting periods as well as the associated burden estimates for those same reporting periods.

5. Rural Emergency Health Quality Reporting Program (REHQR) Corrections

On page 82072, in the first full paragraph, first sentence, we incorrectly stated that REHs would be granted the opportunity to review their data before the information is published during a 30-day review and corrections period in our discussion of the preview period policy and public reporting of quality data generally. We are making corrections to state that REHs would be granted the opportunity to preview their data before the information is published during a 30-day preview period. Similarly, in the following sentence, we are replacing the current reference to ''preview process'' to ''preview period policy,'' to make clear that the policy described in this paragraph would align with that of the Hospital OQR Program. We are also adding inadvertently omitted language to finalize our policies as proposed related to public reporting of quality data generally under the REHQR Program and codifying these policies at § 419.95(f).

On page 82073, we are adding inadvertently omitted language to finalize our policies as proposed related to public reporting of REHQR Program claims-based measures.

On page 82074, we are adding inadvertently omitted language to finalize our policies as proposed related to public reporting of the Median Time from ED Arrival to ED Departure for Discharged ED Patients measure.

6. Hospital Price Transparency Corrections

On pages 81545, 82081, 82082, 82084, 82085, 82088, 82097, 82113, and 82120, we made grammatical and typographical errors.

On page 81547, we made a technical error. Specifically, the summary language that we included in the CY 2024 OPPS/ASC proposed rule was not updated to reflect the hospital price transparency regulatory impact analysis that we included in the CY 2024 OPPS/ASC final rule with comment period.

On page 82081, we made a technical error in our reference to the Consolidated Appropriations Act, 2021.

On pages 82099 and 82118, we inadvertently left out the links to articles referenced in the footnotes which should be included for ease of access.

On page 82171, we made a technical error in the link included in footnote 858 such that it does not direct the reader to the article referenced.

7. Medicare Coverage for Opioid Use Disorder Treatment Services Corrections Furnished by Opioid Treatment Programs Corrections

On page 81850, in the second full sentence in the third column, the citations to the CY 2024 Physician Fee Schedule (PFS) final rule are incorrect and should have instead read 88 FR 79089 through 79093. In that same sentence, the current policy description is inaccurate. We are correcting these errors by replacing the sentence with the following: ''Currently, periodic assessments are allowed to be furnished via audio-only telecommunication through CY 2023, and in the CY 2024 PFS final rule (88 FR 79089 through 79093), we finalized that periodic assessments may be furnished audio-only through the end of CY 2024, to the extent that use of audio-only communications technology is permitted under the applicable SAMHSA and DEA requirements at the time the service is furnished, and all other applicable requirements are met.''

On pages 81854, 81855 and 82162, we are making corrections to the value of the payment adjustment for IOP services furnished by OTPs due to technical corrections to the OPPS weight scalar.

B. Summary of Errors in and Corrections to the OPPS and ASC Addenda Posted on the CMS Website

1. Hospital Outpatient Prospective Payment System (OPPS) Addenda Summary of Errors

a. Errors in Addendum A

Due to the technical correction to apply a trim to lines for the primary codes for two APCs, Hyperbaric Oxygen Therapy (APC 5061) and Ancillary Outpatient Services When Patient Dies (APC 5881), which remove the resulting excluded claims from CY 2024 OPPS ratesetting, there is a significant change to the geometric mean cost for APC 5061. As there is a significant change in the payment rate for APC 5061, we had to slightly reduce the OPPS weight scalar and relative payment weights to maintain OPPS budget neutrality. This change results in a slight reduction in payment rates for other OPPS items and services calculated using the weight scalar. As a result of the technical correction to apply the trim and the associated adjustment to the weight scalar, all payment rates and copayment amounts for items and services calculated using the weight scalar have changed in Addendum A. We note that these changes to the OPPS payments and copayments are minor. The updated file is available online on the CMS website at *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient.*

b. Errors in Addendum B

Due to the technical correction to apply the trim to two APCs, Hyperbaric Oxygen Therapy (APC 5061) and Ancillary Outpatient Services When Patient Dies (APC 5881), which remove the resulting excluded claims from CY 2024 OPPS ratesetting, there is a significant change to the geometric mean cost for APC 5061. As there is a significant change in the payment rate for APC 5061, we had to slightly reduce the OPPS weight scalar and relative payment weights to maintain OPPS budget neutrality. This change results in a slight reduction in payment rates for other OPPS items and services calculated using the weight scalar. This correction will require minor changes to most payment and copayment rates in Addendum B. The updated file is available online on the CMS website at *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient.*

We inadvertently failed to account for the cost of a device that is an integral part of the kidney histotripsy procedure in our assignment of HCPCS code C9790 (Histotripsy (*i.e.,* non-thermal ablation via acoustic energy delivery) of malignant renal tissue, including image guidance) to APC 1575, which has payment rate of $12,500.50 and a minimum unadjusted copayment of $2,500.10. We failed to include the cost of the device for the kidney histotripsy procedure in the payment rate that we reported for HCPCS code C9790 in the CY 2024 OPPS/ASC final rule. To correct this error, we are assigning HCPCS code C9790 to the APC with a payment rate that includes the device cost for the kidney histotripsy procedure—APC 1576—with a payment rate of $17,500.50 and a minimum unadjusted copayment of $3,500.10.

We incorrectly assigned status indicator ''E1'' to CPT code 90623 (Meningococcal pentavalent vaccine, conjugated Men A, C, W, Y- tetanus toxoid carrier, and Men B–FHbp, for intramuscular use), meaning the code is not covered by Medicare, even though the meningococcal vaccine has approval from the Food and Drug Administration (FDA). We are correcting the error by changing the status indicator from ''E1'' to ''M,'' to indicate that the code is not paid under the OPPS.

We incorrectly assigned HCPCS code A9272 (Wound suction, disposable, includes dressing, all accessories and components, any type, each) status indicator ''E1'' to indicate that the code

is not covered by Medicare, even though this code is payable under the Home Health Prospective Payment System (HH PPS) effective January 1, 2024. We are correcting this error by changing the status indicator from ''E1'' to ''A'' to indicate that the code is payable under a fee schedule or payment system other than the OPPS.

We incorrectly listed HCPCS code C7561 (Debridement, bone (includes epidermis, dermis, subcutaneous tissue, muscle and/or fascia, if performed); first 20 sq cm or less with manual preparation and insertion of drug-delivery device(s), deep (*e.g.,* subfascial)) as an active code with an OPPS status indicator of ''E1'' to indicate that the code is an ASC-only code that is not separately payable under the OPPS because the combined service, as described by the code, is not reasonable and necessary. However, this code already exists as HCPCS code C7500 (Debridement, bone including epidermis, dermis, subcutaneous tissue, muscle and/or fascia, if performed, first 20 sq cm or less with manual preparation and insertion of deep (*e.g.,* subfacial) drug-delivery device(s)), and therefore this service does not require a new HCPCS code. Consequently, we are deleting HCPCS code C7561 and will not be establishing the code for the January 2024 update.

We inadvertently assigned CPT code 96202 (Multiple-family group behavior management/modification training for parent(s)/guardian(s)/caregiver(s) of patients with a mental or physical health diagnosis, administered by physician or other qualified health care professional (without the patient present), face-to-face with multiple sets of parent(s)/guardian(s)/caregiver(s); initial 60 minutes) a status indicator of ''E1,'' which indicates that the code is not covered by Medicare, even though this code is payable in settings other than the outpatient hospital setting. We also incorrectly assigned CPT code 96203 (Multiple-family group behavior management/modification training for parent(s)/guardian(s)/caregiver(s) of patients with a mental or physical health diagnosis, administered by physician or other qualified health care professional (without the patient present), face-to-face with multiple sets of parent(s)/guardian(s)/caregiver(s); each additional 15 minutes (list separately in addition to code for primary service)) a status indicator of ''N,'' which means that a service is payable in the OPPS but its cost is packaged into an associated primary service, because CPT code 96203 is an add-on code that is billed with CPT code 96202. However, an add-on service cannot have a payable status in the OPPS when its associated primary service has a non-payable status in the OPPS. These services are covered Medicare services and are assigned payable indicators under the Physician Fee Schedule (PFS). While these services are not payable under OPPS, they are payable under the PFS; therefore, we are correcting the status indicator to ''A.''

c. Errors in Addendum C

Due to the technical correction to apply a trim to two APCs, Hyperbaric Oxygen Therapy (APC 5061) and Ancillary Outpatient Services When Patient Dies (APC 5881) and removing the resulting excluded claims from CY 2024 OPPS ratesetting, there is a significant change to the geometric mean cost for APC 5061. As there is a significant change in the payment rate for APC 5061, we had to slightly reduce the OPPS weight scalar and relative payment weights to maintain OPPS budget neutrality. This change results in a slight reduction in payment rates for other OPPS items and services calculated using the weight scalar. This correction will require minor changes to most payment and copayment rates in Addendum C. The updated file is available online on the CMS website at *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient.*

We inadvertently failed to consider the cost of a device that is an integral part of the kidney histotripsy procedure when we assigned HCPCS code C9790 to APC 1575, which has payment rate of $12,500.50 and a minimum unadjusted copayment of $2,500.10. We failed to include the cost of the device for the kidney histotripsy procedure in the payment rate that we reported for HCPCS code C9790 in the CY 2024 OPPS/ASC final rule with comment period. To correct this error, we are assigning HCPCS code C9790 to the APC with a payment rate that includes the device cost for the kidney histotripsy procedure—APC 1576—with a payment rate of $17,500.50 and a minimum unadjusted copayment of $3,500.10.

d. Errors in Addendum P

Due to the technical correction to apply a trim to lines for the primary codes for two APCs, Hyperbaric Oxygen Therapy (APC 5061) and Ancillary Outpatient Services When Patient Dies (APC 5881), which remove the resulting excluded claims from CY 2024 OPPS ratesetting, there is a significant change to the geometric mean cost for APC 5061. As there is a significant change in the payment rate for APC 5061, we had to slightly reduce the OPPS weight scalar and relative payment weights to maintain OPPS budget neutrality. This change results in a slight reduction in payment rates for other OPPS items and services calculated using the weight scalar. The device offset amounts displayed in Addendum P are calculated by multiplying the OPPS APC payment rate by a procedure's device offset percentage, and therefore the correction to OPPS APC payment rates affects the affects the device offset amounts for any affected APCs. Therefore, we have recalculated the device offset amounts for both device-intensive and non-device-intensive procedures in Addendum P.

To view the corrected CY 2024 OPPS status indicators, APC assignments, relative weights, payment rates, copayment rates, device-intensive status, and short descriptors for Addenda A, B, C, and P that resulted from the technical corrections described in this correcting document, we refer readers to the Addenda and supporting files that are posted on the CMS website at: *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient/.* Select ''CMS–1786–CN'' from the list of regulations. All corrected Addenda for this correcting document are contained in the zipped folder titled ''2024 OPPS Final Rule Addenda'' at the bottom of the page for CMS–1786–CN.

2. Ambulatory Surgical Center (ASC) Payment System Addenda Summary of Errors

a. Errors in Addendum AA

Due to the technical correction to apply a trim to lines for the primary codes for two APCs, Hyperbaric Oxygen Therapy (APC 5061) and Ancillary Outpatient Services When Patient Dies (APC 5881), which remove the resulting excluded claims from CY 2024 OPPS ratesetting, there is a significant change to the geometric mean cost for APC 5061. As there is a significant change in the payment rate for APC 5061, we had to slightly reduce the OPPS weight scalar and relative payment weights to maintain OPPS budget neutrality. This change results in a slight reduction in payment rates for other OPPS items and services calculated using the weight scalar. The correction to apply the trim to APC 5061 and the resulting change to the OPPS weight scalar, OPPS relative payment weights, and OPPS payment rates necessitate a revision to the CY 2024 ASC weight scalar and ASC payment rates, which results in changes in the columns titled ''Final CY 2024

Payment Weight'' and ''Final CY 2024 Payment Rate'' in Addendum AA to separately paid covered surgical procedures that are not paid at the PFS-equivalent rate.

We inadvertently failed to account for the cost of a device that is an integral part of the kidney histotripsy procedure when establishing a payment rate for HCPCS code C9790 (Histotripsy (*i.e.,* non-thermal ablation via acoustic energy delivery) of malignant renal tissue, including image guidance), which has a payment weight of 127.0479 and a payment rate of $6,798.84. However, we failed to include the cost of the device for the kidney histotripsy procedure in the payment rate that we reported for HCPCS code C9790 in the CY 2024 OPPS/ASC final rule. To correct this error, we are replacing the payment weight of 127.0479 and the payment rate of $6,798.84 with the payment weight of 177.8649 and the payment rate of $9,527.91, respectively, for HCPCS code C9790 in Addendum AA.

We inadvertently omitted CPT code 0810T (Subretinal injection of a pharmacologic agent, including vitrectomy and 1 or more retinotomies) from Addendum AA. As we explained in pages 81617 through 81618 of the CY 2024 OPPS/ASC final rule with comment period, CPT code 0810T is replacing HCPCS code C9770. We are correcting this error in Addendum AA by adding CPT code 0810T (Subretinal injection of a pharmacologic agent, including vitrectomy and 1 or more retinotomies).

We inadvertently created HCPCS code C7561 (Debridement, bone (includes epidermis, dermis, subcutaneous tissue, muscle and/or fascia, if performed); first 20 sq cm or less with manual preparation and insertion of drug-delivery device(s), deep (*e.g.,* subfascial) to describe the code pair combination of CPT code 11044 (Debridement, bone (includes epidermis, dermis, subcutaneous tissue, muscle and/or fascia, if performed); first 20 sq cm or less) and CPT code 20700 (Manual preparation and insertion of drug-delivery device(s), deep (*e.g.,* subfascial) (list separately in addition to code for primary procedure). This code pair currently exists as HCPCS code C7500 (Debridement, bone including epidermis, dermis, subcutaneous tissue, muscle and/or fascia, if performed, first 20 sq cm or less with manual preparation and insertion of deep (*e.g.,* subfacial) drug-delivery device(s)). Because C7500 already describes this code pair, this code pair does not require a new HCPCS code. We are correcting this error in Addenda AA and FF by adding HCPCS code C7500 and removing HCPCS code C7561.

On page 81922 of the CY 2024 OPPS/ASC final rule with comment period, we stated we would finalize a device-intensive assignment with the default device offset percentage of 31 percent and assign a payment indicator of ''J8'' to HCPCS code C9734 (Focused ultrasound ablation/therapeutic intervention, other than uterine leiomyomata, with magnetic resonance (mr) guidance) for CY 2024; however, in Addendum AA, we inadvertently assigned a payment indicator of ''G2'' to this code. Therefore, in Addendum AA, in the column titled ''CY 2024 Payment Indicator,'' we are replacing payment indicator ''G2'' with payment indicator ''J8''—Device-intensive procedure; paid at adjusted rate—and are revising the ASC payment weight and payment rate to 152.9811 and $8,186.63, respectively.

On page 81921 of the CY 2024 OPPS/ASC final rule with comment period, we stated we are finalizing our proposed device offset amounts for CPT code 58356, which exceeded our device-intensive threshold of 30 percent and to which we assigned device-intensive status and a payment indicator of ''J8''—Device-intensive procedure; paid at adjusted rate. However, in Addendum AA, we inadvertently assigned a payment indicator of ''G2'' to this code. Therefore, in Addendum AA, we are correcting the payment indicator in the column titled ''CY 2024 Payment Indicator'' to ''J8'' and are revising the payment weight and payment rate to 62.4392 and $3,341.37, respectively.

We inadvertently assigned CPT codes 0266T and 0620T and HCPCS code C9790 a discounting status of ''Y'' (Yes) in the column titled ''Subject to Multiple Procedure Discounting''. Our multiple procedure discounting logic assigns a discounting status of ''N'' (No) to procedures with a status indicator ''S,'' which indicates that the procedure or service is separately paid and is not subject to multiple procedure discounting under the OPPS. We assigned CPT codes 0266T and 0620T and HCPCS code C9790 to status indicator ''S'' in OPPS Addendum B for CY 2024, and therefore, these codes should have a discounting status of ''N'' based on our multiple procedure discounting policy (72 FR 42513 through 42516). Therefore, we are correcting this error by deleting ''Y'' (Yes) and inserting ''N'' (No) in the column titled ''Subject to Multiple Procedure Discounting,'' indicating that the procedure is not subject to multiple procedure discounting, for CPT codes 0266T and 0620T and HCPCS code C9790.

b. Errors in Addendum BB

The correction to apply the trim to APC 5061 and the resulting change to the OPPS weight scalar and OPPS payment rates, necessitate a revision to the CY 2024 ASC weight scalar and ASC payment rates for certain separately paid ancillary procedures that are not paid at the PFS-equivalent rate. The correction to the ASC weight scalar and OPPS payment rates result in changes in the columns titled ''Final CY 2024 Payment Weight'' and ''Final CY 2024 Payment Rate'' in Addendum BB to separately paid ancillary procedures that are not paid at the PFS-equivalent rate.

We inadvertently assigned payment indicator ''J7''—OPPS pass-through device paid separately when provided integral to a surgical procedure on ASC list; payment contractor-priced—to both HCPCS codes C1831 (Interbody cage, anterior, lateral or posterior, personalized (implantable)) and C1604 (Graft, transmural transvenous arterial bypass (implantable), with all delivery system components) as both these devices are approved OPPS pass-through devices for CY 2024. However, these devices are not separately payable under the ASC payment system for CY 2024. Accordingly, we are correcting these errors in Addendum BB by deleting ''J7'' in the column titled ''Final CY 2024 Payment Indicator'' and replacing it with ''N1''—Packaged service/item; no separate payment made for both HCPCS codes C1831 and C1604.

b. Errors in Addendum FF

The correction to apply the trim to APC 5061 and the resulting change to the OPPS weight scalar and OPPS payment rates, necessitate a revision to the CY 2024 ASC weight scalar, ASC relative payment weights, and ASC payment rates and the device offset amounts/device portions for device-intensive procedures because device offset amounts are held at the OPPS rate (*i.e.,* the OPPS payment rate multiplied by the device offset percentage) for device-intensive procedures. Further, the correction to the ASC weight scalar necessitates a correction to ASC payment rates, which requires a correction to the device offset amounts/device portions for non device-intensive procedures because the device offset amounts are held at the ASC rate (*i.e.,* the ASC payment rate multiplied by the device offset percentage) for these procedures.

We inadvertently omitted CPT code 0810T (Subretinal injection of a pharmacologic agent, including

vitrectomy and 1 or more retinotomies) from Addendum FF. As we explained in pages 81617 through 81618 of the CY 2024 OPPS/ASC final rule with comment period, we finalized our proposal to delete HCPCS code C9770 and reassign CPT code 0810T to APC 1563. We are correcting this error by adding CPT code 0810T to Addendum FF.

We inadvertently created HCPCS code C7561 (Debridement, bone (includes epidermis, dermis, subcutaneous tissue, muscle and/or fascia, if performed); first 20 sq cm or less with manual preparation and insertion of drug-delivery device(s), deep (*e.g.,* subfascial) to describe the code pair combination of CPT code 11044 (Debridement, bone (includes epidermis, dermis, subcutaneous tissue, muscle and/or fascia, if performed); first 20 sq cm or less) and CPT code 20700 (Manual preparation and insertion of drug-delivery device(s), deep (*e.g.,* subfascial) (list separately in addition to code for primary procedure). This code pair currently exists as HCPCS code C7500 (Debridement, bone including epidermis, dermis, subcutaneous tissue, muscle and/or fascia, if performed, first 20 sq cm or less with manual preparation and insertion of deep (*e.g.,* subfacial) drug-delivery device(s)). Since this code pair currently is already reflected in C7500, this code pair does not require a new HCPCS code. We are correcting this error by deleting HCPCS code C7561 and adding HCPCS code C7500.

On page 81922 of the CY 2024 OPPS/ASC final rule with comment period, we stated we would finalize a device-intensive assignment with the default device offset percentage of 31 percent to HCPCS code C9734 (Focused ultrasound ablation/therapeutic intervention, other than uterine leiomyomata, with magnetic resonance (mr) guidance) for CY 2024; however, we inadvertently assigned a payment indicator of ''G2''—Non office-based surgical procedure added in CY 2008 or later; payment based on OPPS relative payment weight—to HCPCS code C9734 in Addendum FF. Therefore, we are correcting the payment indicator in the column titled ''Final CY 2024 Payment Indicator'' for C9734 to ''J8''—device-intensive procedure; paid at adjusted rate. We are also correcting the device offset percentage in the column titled ''Final CY 2024 Device Offset Percentage'' to 31 percent, and the device offset amount in the column titled ''Final CY 2024 Device Offset Amount/Device Portion'' to $3,701.33.

We inadvertently provided incorrect device offset amounts for CPT codes 0627T (Percutaneous injection of allogeneic cellular and/or tissue-based product, intervertebral disc, unilateral or bilateral injection, with fluoroscopic guidance, lumbar; first level); 0671T (Insertion of anterior segment aqueous drainage device into the trabecular meshwork, without external reservoir, and without concomitant cataract removal, one or more); 31295 (Nasal/sinus endoscopy, surgical, with dilation (*e.g.,* balloon dilation); maxillary sinus ostium, transnasal or via canine fossa); 58356 (Endometrial cryoablation with ultrasonic guidance, including endometrial curettage, when performed); 66989 (Extracapsular cataract removal with insertion of intraocular lens prosthesis (1-stage procedure), manual or mechanical technique (*e.g.,* irrigation and aspiration or phacoemulsification), complex, requiring devices or techniques not generally used in routine cataract surgery (*e.g.,* iris expansion device, suture support for intraocular lens, or primary posterior capsulorrhexis) or performed on patients in the amblyogenic developmental stage; with insertion of intraocular (*e.g.,* trabecular meshwork, supraciliary, suprachoroidal) anterior segment aqueous drainage device, without extraocular reservoir, internal approach, one or more); and 66991 (Extracapsular cataract removal with insertion of intraocular lens prosthesis (1 stage procedure), manual or mechanical technique (*e.g.,* irrigation and aspiration or phacoemulsification); with insertion of intraocular (*e.g.,* trabecular meshwork, supraciliary, suprachoroidal) anterior segment aqueous drainage device, without extraocular reservoir, internal approach, one or more) and HCPCS codes C9757 (Laminotomy (hemilaminectomy), with decompression of nerve root(s), including partial facetectomy, foraminotomy and excision of herniated intervertebral disc, and repair of annular defect with implantation of bone anchored annular closure device, including annular defect measurement, alignment and sizing assessment, and image guidance; 1 interspace, lumbar) and C9781 (Arthroscopy, shoulder, surgical; with implantation of subacromial spacer (*e.g.,* balloon), includes debridement (*e.g.,* limited or extensive), subacromial decompression, acromioplasty, and biceps tenodesis when performed).

On page 81921 of the CY 2024 OPPS/ASC final rule with comment period, we stated we are finalizing our proposed device offset percentages for these codes and displayed the final device offset percentages in Addendum FF to CY 2024 OPPS/ASC final rule with comment period. However, the device offset percentages in the addendum do not reflect these finalized device offset amounts. Therefore, we are correcting the device offset percentage in the column titled ''Final CY 2024 Device Offset Percentage,'' and we are correcting the device offset amount in the column titled ''Final CY 2024 Device Offset Amount/Device Portion.'' Further, for CPT code 58356, the corrected device offset percentage is above our device-intensive threshold and we are therefore assigning device-intensive status to CPT code 58356. In the column titled ''CY 2024 Payment Indicator,'' for CPT code 58356, we are replacing payment indicator ''G2'' with payment indicator ''J8''—Device-intensive procedure; paid at adjusted rate.

To view the corrected final CY 2024 ASC payment indicators, payment weights, payment rates, and multiple procedure discounting indicators for Addenda AA, BB, and FF that resulted from these technical corrections, we refer readers to the Addenda and supporting files on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/ASCPayment/ASC-Regulations-and-Notices.html.* Select ''CMS–1786–CN'' from the list of regulations. All corrected ASC addenda for this correcting document are contained in the zipped folder entitled ''Addendum AA, BB, and FF'' at the bottom of the page for CMS–1786–CN.

III. Waiver of Proposed Rulemaking and Delay in Effective Date

Under 5 U.S.C. 553(b) of the Administrative Procedure Act (APA), the agency is required to publish a notice of the proposed rulemaking in the **Federal Register** before the provisions of a rule take effect. Similarly, section 1871(b)(1) of the Act requires the Secretary to provide for notice of the proposed rulemaking in the **Federal Register** and provide a period of not less than 60 days for public comment. In addition, section 553(d) of the APA, and section 1871(e)(1)(B)(i) of the Act mandate a 30-day delay in effective date after issuance or publication of a rule. Sections 553(b)(B) and 553(d)(3) of the APA provide for exceptions from the notice and comment and delay in effective date APA requirements; in cases in which these exceptions apply, sections 1871(b)(2)(C) and 1871(e)(1)(B)(ii) of the Act provide exceptions from the notice and 60-day comment period and delay in effective date requirements of the Act as well. Section 553(b)(B) of the APA

and section 1871(b)(2)(C) of the Act authorize an agency to dispense with normal rulemaking requirements for good cause if the agency makes a finding that the notice and comment process are impracticable, unnecessary, or contrary to the public interest. In addition, both section 553(d)(3) of the APA and section 1871(e)(1)(B)(ii) of the Act allow the agency to avoid the 30-day delay in effective date where such delay is contrary to the public interest and an agency includes a statement of support. We believe that this correction does not constitute a rule that would be subject to the notice and comment or delayed effective date requirements. This correcting document corrects technical and typographical errors in the preamble, addenda, payment rates, and tables included or referenced in the CY 2024 OPPS/ASC final rule with comment period but does not make substantive changes to the policies or payment methodologies that were adopted in the CY 2024 OPPS/ASC final rule with comment period. As a result, this correction is intended to ensure that the information in the CY 2024 OPPS/ASC final rule with comment period accurately reflects the policies adopted in that document.

In addition, even if this were a rule to which the notice and comment procedures and delayed effective date requirements applied, we find that there is good cause to waive such requirements. Undertaking further notice and comment procedures to incorporate the corrections in this document into the final rule with comment period or delaying the effective date would be contrary to the public interest because it is in the public's interest for providers to receive appropriate payments in as timely a manner as possible, and to ensure that the CY 2024 OPPS/ASC final rule with comment period reflects our policies. Furthermore, such procedures would be unnecessary, as we are not altering our payment methodologies or policies, but rather, we are simply correctly implementing the policies that we previously proposed, requested comment on, and subsequently finalized. This correcting document is intended solely to ensure that the CY 2024 OPPS/ASC final rule with comment period accurately reflects these payment methodologies and policies. For these reasons, we believe we have good cause to waive the notice and comment and delayed effective date requirements.

Moreover, even if these corrections were considered to be retroactive rulemaking, they would be authorized under section 1871(e)(1)(A)(ii) of the Act, which permits the Secretary to issue a rule for the Medicare program with retroactive effect if the failure to do so would be contrary to the public interest. As we have explained previously, we believe it would be contrary to the public interest not to implement the corrections in this final rule correction because it is in the public's interest for providers to receive appropriate payments in as timely a manner as possible, and to ensure that the CY 2024 OPPS/ASC final rule with comment period accurately reflects our policies.

IV. Correction of Errors

In FR Doc. 2023–24293 of November 22, 2023 (88 FR 81540), we are making the following corrections:

1. On page 81545, third column, first partial bulleted paragraph, lines 44 and 45, the phrase ''(5) a requirement that hospitals to include a .txt file'' is corrected to read ''(5) a requirement that hospitals include a .txt file''.

2. On page 81546,

a. Second column, last partial paragraph, line 12, the figure ''9.2'' is corrected to read ''9.1''.

b. Third column, first full paragraph, line 4, the figure ''0.0'' is corrected to read ''0.1''.

3. On page 81547, first column, the paragraph under ''f. Impacts of Hospital Price Transparency'' is corrected in its entirety to read, ''The policies we are finalizing to enhance automated access to hospital MRFs and aggregation and use of MRF data are estimated to increase burden on hospitals, including a one-time mean of $10,587.10 per hospital, and a total national cost of $75,147,236 ($10,587.10 × 7,098). The cost estimate reflects estimated costs ranging from $4,833 and $15,881 per hospital, and a total national cost ranging from $34,305,344 to $112,720,854. As discussed in detail in section XXVI of this final rule with comment period, we believe that the benefits to the public (and to hospitals themselves) outweigh the burden imposed on hospitals.''.

4. On page 81578, first column, first full paragraph, line 5, the figure ''1.4429'' is corrected to read ''1.4414''.

5. On page 81592, third column,

a. Last paragraph under the heading ''Step 7'',

(1) Line 17, the figure ''$671.05'' is corrected to read ''$670.36''.

(2) Line 21, the figure $658.03''is corrected to read ''$657.36''.

b. Last paragraph,

(1) Line 3, the figure ''$402.63'' is corrected to read ''$402.22''.

(2) Line 4, the figure ''$671.05'' is corrected to read ''$670.36''.

(3) Line 6, the figure ''$394.82'' is corrected to read ''$394.42''.

(4) Line 7, the figure ''$658.03'' is corrected to read ''$657.36''.

6. On page 81593,

a. First column, second paragraph, line 4, the equation ''$546.05 ($402.63 *1.3562)'' is corrected to read ''$545.49 ($402.22 * 1.3562)''.

b. Second column,

(1) First partial paragraph, line 1, the figures ''$535.45 ($394.82'' are corrected to read ''$534.91 ($394.42''.

(2) First full paragraph,

(a) Line 3, the figure ''$268.42'' is corrected to read ''$268.14''.

(b) Line 4, the figure ''$671.05'' is corrected to read ''$670.36''.

(c) Line 6, the figure ''$263.21'' is corrected to read ''$262.94''.

(d) Line 7, the figure ''$658.03'' is corrected to read ''$657.36''.

c. Third column, first full paragraph,

(1) Line 4, the figures ''$814.47 ($546.05'' are corrected to read ''$813.63 ($545.49''.

(2) Line 5, the figure ''$268.42'' is corrected to read ''$268.14''.

(3) Line 7, the figures ''$798.66 ($535.45'' are corrected to read $797.85 ($534.91''.

(4) Line 8, the figure ''$263.21'' is corrected to read ''$262.94''.

(d) The table titled ''Table 7: Final Full National Unadjusted Payment Rate and Final Reduced National Adjusted Payment Rate,'' which appears near the top of the page, is corrected to read as follows:

BILLING CODE 4120–01–P

TABLE 7: FINAL FULL NATIONAL UNADJUSTED PAYMENT RATE AND FINAL REDUCED NATIONAL UNADJUSTED PAYMENT RATE

Final Full national unadjusted payment rate	Final Reduced national adjusted payment rate
$813.63	$797.85

7. On page 81595, third column, second full paragraph,

a. Line 5, the figure ''$134.21'' is corrected to read ''$134.08''.

b. Line 8, the figure ''$671.05'' is corrected to read ''$670.36''.

8. On page 81669, third column, first full paragraph, line 7, before the sentence that reads ''In addition, we did not receive any comments on our proposed APC assignment for CPT code 93296.'', add the following paragraph: ''Additionally, as noted by the commenter, CPT codes 93297 and 93298 have been assigned to direct practice inputs under the PFS for 2024. However, while not mentioned by the commenter, these codes have also been designated with a global, technical, and professional indicators under the PFS for 2024. As stated in the 2024 PFS final rule (88 FR 78914), CPT code 93297 and 93298 were previously billed under HCPCS code G2066. We note that under the OPPS, HCPCS code G2066 was assigned to status indicator ''Q1'' (STV-Packaged Codes) and APC 5741 (Level 1 Electronic Analysis of Devices). Since G2066 was the code previously reported for CPT codes 93297 and 93298, we are assigning these codes to separately payable status under the OPPS for CY 2024. Specifically, we are assigning CPT codes 93297 and 93298 to ''Q1'' and APC 5741 effective January 1, 2024.''.

9. On page 81801, in the table titled ''Table 95: Skin Substitute Assignments to High-Cost and Low-Cost Groups for CY 2024, in the row for HCPCS code Q4282 in the columns titled ''CY 2023 High/Low Cost Assignment'' and ''CY 2024 High/Low Cost Assignment'' the entries ''Low'' are corrected to read ''High''.

10. On page 81850, third column, first partial paragraph, lines 18 through 31, that reads ''Currently, periodic assessments are allowed to be furnished via audio-only telecommunication through CY 2023, and finalized in the CY 2024 PFS final rule (87 FR 69404; November 18, 2023) so that these services may be furnished audio-only through the end of CY 2024, to the extent that use of audio-only communications technology is permitted under the applicable SAMHSA and DEA requirements at the time the service is furnished, and all other applicable requirements are met.'' are corrected to read ''Currently, periodic assessments are allowed to be furnished via audio-only telecommunication through CY 2023, and in the CY 2024 PFS final rule (88 FR 79089 through 79093), we finalized that periodic assessments may be furnished audio-only through the end of CY 2024, to the extent that use of audio-only communications technology is permitted under the applicable SAMHSA and DEA requirements at the time the service is furnished, and all other applicable requirements are met.''.

11. On page 81854, second column, first partial paragraph, line 30, the figure ''$778.20'' is corrected to read ''$777.39.''

12. On page 81855, second column,

a. Second full paragraph,

(1) Line 31, the figure ''$259.40'' is corrected to read ''$259.13''.

(2) Line 35, the figure ''$778.20'' is corrected to read ''$777.39''.

b. In footnote 188, line 6, the figure ''$259.40'' is corrected to read ''$259.13''.

13. On page 81958,

a. Second column, last partial paragraph, line 7, the figure ''0.8881'' is corrected to read ''0.889''.

b. Third column, first full paragraph, line 8, the figure ''0.8881'' is corrected to read ''0.889''.

14. On page 81971, first column, first partial paragraph,

a. Line 20, the figure ''3636'' is corrected to read ''1536''.

b. Lines 20 through 21, the text ''July 26, 2022. The measure steward (CDC) is pursuing endorsement for the modified version of this measure.'' is corrected to read ''January 31, 2012. This measure's endorsement was removed in 2018.''.

15. On page 81993, in the table titled ''Table 128: Finalized Hospital OQR Program Measure Set for the CY 2026 Payment Determination'',

a. Row 9, column 2, the text ''Cataracts Visual Function (Previously referred to as Cataracts: Improvement in Patient's Visual Function within 90 Days Following Cataract Surgery) **'' is corrected to read ''Cataracts Visual Function (Previously referred to as Cataracts: Improvement in Patient's Visual Function within 90 Days Following Cataract Surgery)†**''.

b. Row 18, the text ''COVID–19 Vaccination Coverage Among Health Care Personnel ****'' is corrected to read ''COVID–19 Vaccination Coverage Among Health Care Personnel ††****'',

c. Adding the following table note ''†† This CBE endorsement number was assigned to the original version of the COVID–19 Vaccination Coverage Among Health Care Personnel measure and not the finalized modification of the measure we are finalizing in this rule.'' after the first table note (†We note that CBE endorsement for this measure was removed.) and before the second table note ''* In this final rule, we are finalizing our proposal to modify the Colonoscopy Follow-Up Interval measure beginning with the CY 2024 reporting period/CY 2026 payment determination.''.

16. On page 81994, the table titled ''Table 129: Finalized Hospital OQR Program Measure Set for the CY 2027 Payment Determination and Subsequent Years'', is corrected to read as follows:

BILLING CODE 4120–01–P

TABLE 129: FINALIZED HOSPITAL OQR PROGRAM MEASURE SET FOR THE CY 2027 PAYMENT DETERMINATION AND SUBSEQUENT YEARS

CBE #	Measure Name
0514	MRI Lumbar Spine for Low Back Pain†
None	Abdomen CT – Use of Contrast Material
0669	Cardiac Imaging for Preoperative Risk Assessment for Non-Cardiac, Low-Risk Surgery
0496	Median Time for Discharged ED Patients (Previously referred to as Median Time from ED Arrival to ED Departure for Discharged ED Patients)
0499	Left Without Being Seen†
0661	Head CT or MRI Scan Results for Acute Ischemic Stroke or Hemorrhagic Stroke who Received Head CT or MRI Scan Interpretation Within 45 minutes of ED Arrival
0658	Colonoscopy Follow-Up Interval (Previously referred to as Appropriate Follow-Up Interval for Normal Colonoscopy in Average Risk Patients)
1536	Cataracts Visual Function (Previously referred to as Cataracts: Improvement in Patient's Visual Function within 90 Days Following Cataract Surgery) †*
2539	Facility 7-Day Risk-Standardized Hospital Visit Rate after Outpatient Colonoscopy
3490	Admissions and Emergency Department (ED) Visits for Patients Receiving Outpatient Chemotherapy
2687	Hospital Visits after Hospital Outpatient Surgery
None	OAS CAHPS – About Facilities and Staff
None	OAS CAHPS – Communication About Procedure
None	OAS CAHPS – Preparation for Discharge and Recovery
None	OAS CAHPS – Overall Rating of Facility
None	OAS CAHPS – Recommendation of Facility
3636	COVID–19 Vaccination Coverage Among Health Care Personnel ††
None	Breast Cancer Screening Recall Rates
None	ST-Segment Elevation Myocardial Infarction (STEMI) eCQM
None	Risk-Standardized Patient-Reported Outcome-Based Performance Measure (PRO–PM) Following Elective Primary Total Hip Arthroplasty (THA) and/or Total Knee Arthroplasty (TKA) in the HOPD Setting (THA/TKA PRO–PM)**
3663e	Excessive Radiation eCQM (Previously referred to as Excessive Radiation Dose or Inadequate Image Quality for Diagnostic Computed Tomography (CT) in Adults eCQM)***

† We note that CBE endorsement of this measure was removed.

†† This CBE endorsement number was assigned to the original version of the COVID-19 Vaccination Coverage Among Health Care Personnel measure and not the finalized modification of the measure.

* In the CY 2023 OPPS/ASC final rule with comment period (87 FR 72097 through 72099), we finalized keeping data collection and submission voluntary for this measure for the CY 2025 reporting period and subsequent years.

** In this final rule, we are finalizing our proposal to adopt the THA/TKA PRO–PM beginning with the voluntary CY 2025 reporting period and with delayed implementation of mandatory reporting beginning

*** In this final rule, we are finalizing our proposal to adopt the Excessive Radiation eCQM beginning with the voluntary CY 2025 reporting period and with delayed implementation of mandatory reporting beginning with the CY 2027 reporting period/CY 2029 payment determination.

17. On page 82014, second column, first partial paragraph, lines 1 and 2, the citation ''(88 FR 49774 through 49776)'' is corrected to read ''(88 FR 49805 through 49807)''.

18. On page 82031, first partial footnoted paragraph (footnote 629), ''Centers for Medicare and Medicaid Services Measures Inventory Tool. (n.d.). Retrieved March 28, 2023, from *https://cmit.cms.gov/cmit/#/MeasureView?variantId=11547&sectionNumber=1*'' is corrected to read: ''Centers for Medicare and Medicaid Services Measures Inventory Tool. (n.d.). Retrieved November 30, 2023, from *https://cmit.cms.gov/cmit/#/MeasureView?variantId=11625&sectionNumber=1*''.

19. On page 82037, in the table titled ''Table 139: Finalized ASCQR Program Measures Set for the CY 2024 Reporting Period/CY 2026 Payment Determination'',

a. The entry for row 14 is corrected to read as follows:

ASC #	CBE #	Measure Name
		* * * * * * *
ASC-20	3636††	COVID–19 Vaccination Coverage Among Health Care Personnel**

BILLING CODE 4120–01–C

b. Add the following table note ''†† This CBE endorsement number was assigned to the original version of the COVID–19 Vaccination Coverage Among Health Care Personnel measure and not the modification of the measure we are finalizing in this rule.'' after the first table note († CBE endorsement was removed.) and before the second table note (* In the CY 2023 OPPS/ASC final rule with comment period (87 FR 72118 through 72120), we finalized to keep data collection and submission voluntary for this measure for the CY 2025 reporting period and subsequent years. In this final rule, we are finalizing our proposal to standardize the surveys offered to patients pre- and post-surgery beginning with the CY 2024 reporting period/CY 2026 payment determination.).

20. On page 82038, in the table titled ''Table 140: Finalized ASCQR Program Measure Set for the CY 2025 Reporting Period/CY 2027 Payment Determination'',

a. The entries for rows 20 and 21 are corrected to read as follows:

ASC #	CBE #	Measure Name
	* * * * * * *	
ASC-20	3636††	COVID–19 Vaccination Coverage Among Health Care Personnel
ASC-21	None	Risk-Standardized Patient-Reported Outcome-Based Performance Measure (PRO–PM) Following Elective Primary Total Hip Arthroplasty (THA) and/or Total Knee Arthroplasty (TKA) in the ASC Setting (THA/TKA PRO–PM)***

b. Add the following table note ''†† This CBE endorsement number was assigned to the original version of the COVID–19 Vaccination Coverage Among Health Care Personnel measure and not the modification of the measure we are finalizing in this rule.'' after the first table note († CBE endorsement was removed.) and before the second table note (* In the CY 2023 OPPS/ASC final rule with comment period (87 FR 72118 through 72120), we finalized to keep data collection and submission voluntary for this measure for the CY 2025 reporting period and subsequent years.).

21. On page 82072,

a. First column, first full paragraph,

(1) Lines 3 and 4, the phrase ''opportunity to review their data before the information is published'' is corrected to read ''opportunity to preview their data before the information is published''.

(2) Lines 5 and 6, the phrase ''30-day review and corrections period (the preview process).'' is corrected to read ''30-day preview period.''.

(3) Lines 22 through 24, the language ''This preview process would align with that of the Hospital OQR Program (81 FR 79791).'' is corrected to read ''This preview period policy would align with that of the Hospital OQR Program (81 FR 79791).''.

b. Third column, line 32 at the end of the second full paragraph, ending with the phrase ''will be collected quarterly.'', add the following paragraph: ''After consideration of the public comments we received, we are finalizing our policies as proposed related to public reporting of quality data generally under the REHQR Program and codifying these policies at § 419.95(f).''.

22. On page 82073, first column, line 2 at the end of the fourth full paragraph, ending with ''Response: We thank the commenter for their support.'', add the following paragraph: ''After consideration of the public comments we received, we are finalizing our policies as proposed related to public reporting of claims-based measure data under the REHQR Program.''.

23. On page 82074, first column, line 42 at the end of the first full paragraph, ending with ''transfer to more appropriate care settings.'', add the following paragraph: ''After consideration of the public comments we received, we are finalizing our policies as proposed related to public reporting of the Median Time from ED Arrival to ED Departure for Discharged ED Patients measure under the REHQR Program. Specifically, the following measure strata will be made publicly available: (1) Overall Rate; (2) Reported Measure; (3) Psychiatric/Mental Health Patients; and (4) Transfer Patients.''.

24. On page 82081, third column, first full paragraph,

a. Lines 32 through 33, the phrase ''Consolidation Appropriations Act of 2021'' is corrected to read ''Consolidated Appropriations Act, 2021''.

b. Lines 37 and 38, the phrase ''CY 2024 OPPS/ASC PPS proposed rule'' is corrected to read ''CY 2024 OPPS/ASC proposed rule''.

25. On page 82082, third column, last paragraph, line 35, the phrase ''hospitals to include'' is corrected to read ''hospitals include''.

26. On page 82084, second column, under the heading ''2. Requirement That Hospitals Affirm the Accuracy and Completeness of Their Standard Charge Information Displayed in the MRF'', line 29, the phrase ''the MRF count not be certain'' is corrected to read ''the MRF cannot be certain''.

27. On page 82085, first column, second full paragraph, lines 34 and 35, the phrase ''42 CFR 457.945), finally, a hospital'' is corrected to read ''42 CFR 457.945). Finally, a hospital''.

28. On page 82088, third column, first footnoted paragraph (footnote 779), line 9, the phrase ''identifier779 or employer'' is corrected to read ''identifier or employer''.

29. On page 82097,

a. Second column, first partial paragraph, line 6, the phrase ''hospitals provide'' is corrected to read ''hospitals to provide''.

b. Third column, first partial paragraph,

(1) Line 9, the phrase ''hospitals provide'' is corrected to read ''hospitals to provide''.

(2) Line 25, the phrase ''critical the allowed amount'' is corrected to read ''critical the algorithm''.

30. On page 82099, second column, first footnoted paragraph (footnote 790), add the following link to the end: *https://jamanetwork.com/journals/jamanetworkopen/fullarticle/2757483*.

31. On page 82113, second column, last partial paragraph, line 14, the phrase ''a link includen the footer'' is corrected to read ''a link in the footer''.

32. On page 82118, third column, first footnoted paragraph (footnote 802), add the following link to the end: *https://up-j-gemgem.ubiquityjournal.website/articles/10.5334/egems.200*.

33. On page 82120, first column, first full paragraph, line 14, the phrase ''CMS publicize when'' is corrected to read ''CMS should publicize when''.

34. On page 82142, third column, first full paragraph, lines 16 through 46, the text ''We found that there were 2,381 THA/TKA ASC claims in CY 2022 with

an average of 58 Medicare claims per ASC for 41 ASCs. Thus, we estimate that approximately 58 THA/TKA procedures will occur in each ASC each year, and that many patients could complete both the pre-operative and post-operative questionnaires. However, from our experience with using this measure in the Comprehensive Joint Replacement model, we are also aware that not all patients who complete the pre-operative questionnaire will complete the postoperative questionnaire. For the voluntary CYs 2025, 2026, and 2027 reporting periods, we assume 609 patients will complete the survey (58 patients × 0.50 × 21 ASCs) for a total of 74 hours annually (609 respondents × 0.120833 hours) at a cost of $1,524 (74 hours × $20.71) across all ASCs that perform these procedures. Beginning with mandatory reporting in the CY 2028 reporting period/CY 2031 payment determination, we estimate a total of 288 hours (2,381 patients × 0.120833 hours) at a cost of $5,958 (288 hours × $20.71) across all ASCs performing these procedures.'' is corrected to read ''We found that there were 881 ASCs which had an average of 48 THA/TKA paid Medicare FFS claims in CY 2022. Thus, we estimate that approximately 42,288 THA/TKA procedures will occur in ASCs each year, and that many patients could complete both the pre-operative and post-operative questionnaires. However, from our experience with using this measure in the Comprehensive Joint Replacement model, we are also aware that not all patients who complete the pre-operative questionnaire will complete the post-operative questionnaire. For the voluntary CYs 2025 through 2027 reporting periods, we assume 10,584 procedures of which patients can complete a survey (42,288 procedures × 0.50 survey completion rate × 50 percent ASC participation rate) for a total of 1,279 hours annually (10,584 possible surveys × 0.120833 hours per survey) at a cost of $26,486 (1,279 hours × $20.71) each year. Beginning with mandatory reporting in the CY 2028 reporting period/CY 2031 payment determination, we assume 21,144 procedures of which patients can complete a survey (42,288 procedures × 0.50 survey completion rate × 100 percent ASC participation rate) for a total of 2,555 hours annually (21,144 possible surveys × 0.120833 hours per survey) at a cost of $52,912 (2,555 hours × $20.71).''.

35. On page 82143,

a. First column, first partial paragraph,

(1) Lines 18 and 19, the figures ''4 hours (0.167 hours × 21 ASCs)'' is corrected to read ''74 hours (0.167 hours × 441 ASCs)''.

(2) Lines 19 and 20, the figures ''$182 (4 hours × $52.12)'' is corrected to read ''$3,831'' (74 hours × $52.12)''.

(3) Line 22, the figure ''7'' is corrected to read ''147''.

b. Second column, first partial paragraph,

(1) Line 1, the figures ''(0.33 hours × 21 ASCs)'' are corrected to read ''(0.33 hours × 441 ASCs)''.

(2) Line 2, the figures ''$365 (7 hours'' are corrected to read ''$7,662 (147 hours''.

(3) Line 4, the figure ''10'' is corrected to read ''220''.

(4) Line 5, the figure ''21'' is corrected to read ''441''.

(5) Line 6, the phrase ''41 ASCs)] at a cost of $539 (10'' is corrected to read ''881 ASCs)] at a cost of $11,484 (220''.

(6) Line 9, the figure ''14'' is corrected to read ''294''.

(7) Line 10, the phrase ''41 ASCs) at a cost of $712 (14'' is corrected to read ''881 ASCs) at a cost of $15,306 (294 hours''.

c. Third column, first partial paragraph, line 4, the text ''increase of 302 hours at a cost of $6,670'' is corrected to read ''increase of 2,849 hours at a cost of $68,218''.

d. The table titled ''Table 158: ''Summary of ASCQ Program Information Collection Burden Change for the CY 2025 Reporting Period/CY 2027 Payment Determination'' is corrected to read as follows:

BILLING CODE 4120–01–P

TABLE 158: SUMMARY OF ASCQR PROGRAM INFORMATION COLLECTION BURDEN CHANGE FOR THE CY 2025 REPORTING PERIOD/CY 2027 PAYMENT DETERMINATION

	Annual Recordkeeping and Reporting Requirements Under OMB Control Number 0938-1270 for the CY 2027 Payment Determination							
Activity	**Estimated time per record (minutes)**	**Number reporting quarters per year**	**Number of ASCs reporting**	**Average number records per ASC per quarter**	**Annual burden (hours) per ASC**	**Finalized annual burden (hours) across ASCs**	**Previously finalized annual burden (hours) across ASCs**	**Net difference in annual burden hours**
Add THA/TKA PRO-PM Measure (Survey Completion)	3.625	2	441	24	2.9	1,279	N/A	+1,279

CMHCs		32	6.6	0.0	9.9	9.1

Column (1) shows total hospitals and/or CMHCs.

Column (2) includes all final CY 2024 OPPS policies and compares those to the CY 2023 OPPS.

Column (3) shows the budget neutral impact of updating the wage index by applying the final FY 2024 hospital inpatient wage index. The final rural SCH adjustment would continue our current policy of 7.1 percent so the budget neutrality factor is 1. The final budget neutrality adjustment for the cancer hospital adjustment is 1.0005 because the final CY 2024 target payment-to-cost ratio is less than the CY 2023 PCR target.

Column (4) shows the impact of all budget neutrality adjustments and the addition of the final 3.1 percent OPD fee schedule update factor (3.3 percent inpatient PPS (IPPS) hospital market basket percentage increase reduced by 0.2 percentage point for the productivity adjustment).

Column (5) shows the additional adjustments to the conversion factor resulting from a change in the pass-through estimate and adding estimated outlier payments. Note that previous years included the frontier adjustment in this column, but we have the frontier adjustment to Column 3 in this table.

These 3,611 providers include children and cancer hospitals, which are held harmless to pre-BBA amounts, and CMHCs.

** Complete DSH numbers are not available for providers that are not paid under IPPS, including rehabilitation, psychiatric, and long-term care hospitals.

44. On page 82162,

a. Second column, first full paragraph, line 24, the figure ''$778.20'' is corrected to read ''$777.39''.

b. Third column, first partial paragraph, line 2, the figure ''$40,466'' is corrected to read ''$40,424''.

c. Third column, under ''2. Estimated Effects of CY 2024 ASC

Payment System Changes'', first paragraph, line 10, the figure ''0.8881'' is corrected to read ''0.889''.

45. On page 82168, second column, first partial paragraph, line 7, the phrase ''302 hours at a cost of $6,670'' is corrected to read ''2,849 hours at a cost of $68,218''.

46. On page 82171, third column, in footnote 858 the link *https://jamanetwork.com/journals/jamanetworkopen/fullarticle/2800088* is corrected to read ''*https://jamanetwork.com/journals/jamanetworkopen/fullarticle/2800083*''.

Elizabeth J. Gramling,

Executive Secretary to the Department, Department of Health and Human Services.

[FR Doc. 2024–02631 Filed 2–6–24; 4:15 pm]

BILLING CODE 4120–01–C

DEPARTMENT OF HEALTH AND HUMAN SERVICES

45 CFR Part 101

RIN 0908–AA00

Health Resources Priorities and Allocations System (HRPAS)

AGENCY: Office of the Secretary, Department of Health and Human Services.

ACTION: Final rule.

SUMMARY: The Department of Health and Human Services (HHS) is issuing a final rule establishing standards and

procedures by which it may require acceptance and priority performance of certain contracts or orders to promote the national defense over other contracts or orders with respect to health resources. This final rule also sets new standards and procedures by which HHS may allocate materials, services, and facilities to promote the national defense. This rule finalizes the regulations as proposed in the Notice of Proposed Rule Making (NPRM) of August 16, 2023, with minor technical edits based on comments received.

DATES: This rule is effective March 11, 2024.

FOR FURTHER INFORMATION CONTACT: L. Paige Ezernack, telephone at (202) 260–0365 or via email at *aspr.dpa@hhs.gov.*

SUPPLEMENTARY INFORMATION: This final rule implements HHS' administration of priorities and allocations actions with respect to health resources and establishes the Health Resources Priorities and Allocations System (HRPAS). The HRPAS covers health resources pursuant to the authority under section 101(a) of the Defense Production Act (DPA) of 1950 as delegated to the Secretary of HHS (Secretary) by Executive Order (E.O.) 13603. On September 26, 2022, the Secretary delegated to the Assistant Secretary for Preparedness and Response (the ASPR) within the Administration for Strategic Preparedness and Response (ASPR), the authority under section 201 of E.O. 13603 to exercise priorities authority under section 101 of the DPA. This delegation authorized the ASPR, on behalf of the Secretary, to approve DO—[–[M1–M9] priority rating requests for health resources that promote the national defense. This delegation excludes the authority to approve all priorities provisions for health resources that require DX—[–[M1–M9] priority ratings. The Secretary retains all other authorities delegated by the President in E.O. 13603.

The HRPAS has two principal components: priorities and allocations. Under the priorities' component, the Secretary is authorized to place priority ratings on contracts or orders for health resources to support programs which have been determined by the Department of Defense, Department of Energy, or Department of Homeland Security as necessary or appropriate to promote the national defense in accordance with section 202 of E.O. 13603. Through the HRPAS rule, HHS may also respond to requests to place priority ratings on contracts or orders (requiring priority performance of contracts or orders) for health resources, as specified in the DPA, if the necessity arises. Under the priorities' component, certain contracts or orders between the government and private parties or between private parties for the production or delivery of health resources are required to be prioritized over other contracts or orders to facilitate expedited production or delivery in promotion of the U.S. national defense. The Secretary retains the authority for allocations. Under the allocations' component, materials, services, and facilities may be allocated to promote the national defense. Such requests must be determined as necessary or appropriate to promote the national defense in accordance with section 202 of E.O. 13603. For both components, the term ''national defense'' is defined in section 801(j) of E.O. 13603 as ''programs for military and energy production or construction, military or critical infrastructure assistance to any foreign nation, homeland security, stockpiling, space, and any directly related activity.'' The term also includes emergency preparedness activities conducted pursuant to title VI of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act) and critical infrastructure protection and restoration. See E.O. 13603, section 801(j). Other authorities delegated to the Secretary in E.O. 13603, but not covered by this regulation may be re-delegated by the Secretary.

I. Background

HHS published an interim final rule in the **Federal Register** at 80 FR 42408 on July 17, 2015, to comply with the Part II—Priorities and Allocations, Sec 201(b) of E.O. 13603, dated March 16, 2012, and section 101(d) of the DPA, 50 U.S.C. 4511(d), and received no public comments. Based on the signficant amount of time between the publication of the interim final rule in 2015, HHS published, on August 16, 2023, a NPRM in the **Federal Register** at 88 FR 55613 to allow for comments based on HHS utilizing DPA authorities and the HRPAS to respond to COVID–19 Public Health Emergency (PHE) from 2020 to 2023 and the infant formula shortage in 2022.

II. Discussion and Analysis

HRPAS is a program established in accordance with the DPA and E.O. 13603 that supports national defense needs (for health resources), including emergency preparedness initiatives, by addressing essential civilian needs through the placing of priority ratings on contracts and orders for items and services or allocating resources, as necessary. Although a specific Presidential disaster declaration is not required, the ability to prioritize or allocate items or services requires a determination be made in accordance with section 202 of E.O. 13603, (except as provided in section 201(e) for use of the allocations authority) that the program or programs are necessary or appropriate to promote national defense, including emergency preparedness. The HRPAS outlines several conditions that must be met in order for HHS to undertake an allocation order, which include a finding, when necessary, under section 101(b) of the DPA that such a material is a scarce and critical material essential to the national defense and that the requirements of the national defense for such material cannot otherwise be met without creating a significant dislocation of the normal distribution of such material in the civilian market to such a degree as to create appreciable hardship. The President must approve the finding, in accordance with section 201(e) of E.O. 13603, before the Secretary may use the allocation authority. Under section 702(14) of the DPA (50 U.S.C. 4552(14)), the term ''national defense'' includes emergency preparedness activities conducted pursuant to the Stafford Act, and critical infrastructure protection and restoration. Authority for priorities and allocations is specified in the DPA and further defined in E.O. 13603, ''National Defense Resources Preparedness,'' dated March 16, 2012. E.O. 13603 replaced E.O. 12919 and further defined jurisdictional areas and national defense preparedness roles and responsibilities for specific agencies. E.O. 13603 did not change the intent of the DPA as it applies to HHS' functions in national defense, including emergency preparedness.

Jurisdiction

E.O. 13603 authorizes jurisdictional areas for each agency delegated title I authority under the DPA that is involved in national defense, including emergency preparedness. HHS has jurisdiction for items that fall under the category of health resources which is defined in E.O. 13603 as ''drugs, biological products, medical devices, materials, facilities, health supplies, services and equipment required to diagnose, mitigate, or prevent the impairment of, improve, treat, cure, or restore the physical or mental health conditions of the population.'' HHS cannot use its DPA authority for items or services not in its jurisdiction. Those entities in need of items or services that do not fall under the jurisdiction of HHS

should request priorities assistance from the applicable resource department. HHS will direct the requesters to the appropriate resource agency if the request comes to HHS. HHS intends to work with other resource agencies to address instances where HHS does not have jurisdiction—or where jurisdiction may be overlapping or ambiguous—for items necessary to complete the order. HHS intends to work with the other resource agencies to request prioritization of contracts or orders for other items or services necessary for use in support of programs approved for use by HHS (see next section).

HRPAS Approved Programs

On November 2, 2023, the Department of Homeland Security approved four programs to be eligible for priorities and allocations support in accordance with Section 202 of Executive Order 13603. These programs are listed in Appendix 1.

III. DPA Priorities and Allocations System Authority

The Defense Production Act Reauthorization (DPAR) of 2009 required that HHS, and all other agencies that previously have been delegated priorities and allocations authority under E.O. 13603, publish regulations providing standards and procedures for prioritization of contracts and orders and for allocation of materials, services, and facilities to promote the national defense under both emergency and nonemergency conditions. HHS' regulation, along with regulations promulgated by other agencies, are part of the Federal Priorities and Allocations System (FPAS).

On October 1, 2018, Congress amended the DPA through the John S. McCain National Defense Authorization Act (Pub. L. 115–232) which extended non-permanent provisions through September 30, 2025. Section 101(d) of the DPA, as amended, directs all agencies to which the President has delegated priorities and allocations authority under E.O. 13603 to publish final rules establishing standards and procedures by which that authority will be used to promote the national defense in both emergency and non-emergency situations. The DPAR also required all such agencies to consult with the heads of other Federal agencies as appropriate and to the extent practicable to develop a consistent and unified FPAS. This rulemaking is one of several rules published to implement section 101 of the DPA. The rules of the agencies with such authorities, which are the Departments of Commerce, Energy, Transportation, Health and Human Services, Homeland Security, Defense, and Agriculture, comprise the FPAS. HHS is publishing this NPRM rule in compliance with section 101(d) of the DPA. HHS' HRPAS provisions are consistent with the FPAS regulations issued by other agencies to the extent practicable.

The HRPAS, as part of the FPAS, has two principal components: priorities and allocations. Under the priorities component, contracts and orders between the government and private parties or between private parties for the production or delivery of health resources are required to be given priority over other contracts to facilitate expedited production and delivery in promotion of the U.S. national defense. Under the allocations component, materials, services, and facilities may be allocated to promote the national defense. For both components, the term ''national defense'' is defined broadly and includes emergency preparedness activities conducted pursuant to title VI of the Stafford Act and critical infrastructure protection and restoration priorities authorities. Priorities, allocations, and other authorities delegated to the Secretary in E.O. 13603, but not covered by this regulation may be re-delegated by the Secretary. The Secretary delegated the authority for DO priority ratings to the ASPR. The Secretary retains the authority for DX priority ratings and for allocations.

IV. Summary of Significant Changes From the 2015 Interim Final Rule to the 2023 NPRM

a. HHS' interim final rule had a 60-day comment period that ended on September 15, 2015. HHS received no comments on the interim Final Rule. HHS has made minor revisions to its interim final rule based on the use of these authorities to response to the COVID–19 PHE, the infant formula shortage, and deliberations with interagency partners. These changes were reflected in the NPRM (88 FR 55613: 08/16/2023).

(1) Section 101.1, Purpose, was revised to add livestock resources, veterinary resources, and plant health resources.

(2) Section 101.20, Definitions, was revised to include a new definition of priority rating and program identification symbol and add a definition of ''working day.''

(3) Section 101.30, Delegation of Authority, was revised to include the delegation of DO priority rating authority of the DPA, and section 201 of E.O. 13603, from the Secretary of HHS to the Assistant Secretary for Preparedness and Response (the ASPR).

(4) Section 101.63, Letters and Memoranda of Understanding was revised to delete references to Memoranda.

b. Analysis of Other Technical Edits: Several editorial changes were made to the rule and are summarized below.

(1) Placement of Rated Orders

(a) Section 101.33. The acceptance and rejection times for rated orders are revised. The preamble section of the interim final rule was inconsistent with the provisions in §§ 101.32 and 101.33 with respect to the time limits for acceptance and rejection of rated orders. Most rated orders will continue to require acceptance or rejection within 10 or 15 working days depending on the type of rating. Rated orders placed in support of emergency preparedness requirements may require acceptance or rejection within a shorter timeframe that is specified in the rated order. The minimum times for acceptance or rejection that such orders may specify are six business (6) hours for emergencies that have occurred, or 12 business hours if needed to prepare for an imminent hazard. Also, ''time limit in'' has been changed to ''minimum times,'' which is the correct terminology.

(b) Section 101.33(d)(2). Customer notification requirements require persons who have accepted a rated order to give notice if performance will be delayed. The time limit to provide written confirmation of a verbal notice is five (working) days; the time limit is revised to one (1) working day to provide written confirmation of a verbal notice. HHS believes that the nature of rated orders supporting national defense requirements justifies expeditious communications and that once a verbal notice of delayed performance has been given, putting that notice into writing should not take more than one working day.

(2) Allocation Actions

Sections 101.51 and 101.51(a) are revised to conform with language in the other FPAS regulations and comply with the requirement in section 101(d)(2) of the DPA for the regulations to be consistent and unified.

Section 101.53 is revised 101.53 to change ''is requiring'' to ''as established.'' The rationale for this change is that ''is requiring'' implies that the allocations process is a constant obligation.

(3) Elements of an Allocation Order

(a). Section 101.54(c) is revised to include a new element to be included in an allocation order that gives constructive notice through publication in the **Federal Register**.

(4) Official Actions

(a) Section 101.63. ''Memorandums of Understanding'' (MOUs) are universally known in the Federal Government as an agreement between agencies/parties, sometimes completed under the Economy Act, and the use of MOUs in implementing priorities authorities could cause confusion. Therefore, the terms ''Memorandum of Understanding'' or ''Memoranda of Understanding'' in § 101.63 and other sections in the interim rule are deleted.

(b) Section 101.1 Purpose

Section 101.1 revises the sentence regarding guidance and procedures for use of DPA authorities to include livestock, veterinary resources, plant health resources, and all forms of energy. In addition, HHS deleted reference to 32 CFR part 555, referring to priorities and allocations for water resources.

(c) Section 101.3 Program Eligibility

Section 101.3 is revised to delete ''deployment and sustainment of military forces,'' to track with section 702(14) of the DPA.

(d) Section 101.20 Definitions

(1) Revise definition of ''National defense'' to delete ''health'' and add ''energy'' to track definition of ''national defense'' in section 702(14) of the DPA.

(2) Delete sentence stating, ''Natural resources such as oil and gas,'' from the definition of ''Materials.''

(3) Revise the definition of ''person.''

(4) Revise the definition of ''priority rating.''

(5) Add a definition for ''Working day.''

e. Section 101.30 Delegations of Authority

Revised to change ''priority rating activities'' to ''priorities authorities'' to track E.O. 13603.

f. Section 101.31 Priority Ratings

(1) Paragraph (a)(1), Levels of priority is revised to change ''Federal'' to ''Health Resources'' because agency regulations establish priority levels.

g. Section 101.32 Elements of a Rated Order

(2) Paragraph (d)(2)(i). The preamble discussion of § 101.33 is revised to correct the 2-day time frame for acceptance or rejection of rated orders for emergency preparedness to be consistent with §§ 101.32 and 101.33.

h. Section 101.33 Acceptance and Rejection of Rated Orders

Paragraph (e). The discussion of § 101.33 of the preamble of the interim final rule is inconsistent with the 2-working daytime frame for acceptance or rejection of rated orders in § 101.33. The preamble is revised to correct this inconsistency.

i. Section 101.37 Use of Rated Orders

(1) Paragraph (a)(4) ''Facilities needed to produce rated orders, and'' is deleted because ''facilities'' are considered an industrial resource and not eligible for priorities and allocations under the HHS-administered HRPAS regulation.

j. Section 101.38 Limitations on Placing Rated Orders

(1) Paragraph (b)(1). Revising paragraph (b)(1) to insert ''livestock resources, veterinary resources, and plant health resources,'' to track E.O. 13603.

(2) Paragraph (b)(2). Revising paragraph (b)(2) to add ''All forms of energy'' in lieu of ''Energy supplies,'' to track E.O. 13603.

(3) Paragraph (b)(5). (3) Paragraph (b)(5). Adding a paragraph clarifying Department of Commerce's resource jurisdiction over ''industrial resources.''

(4) Paragraph (b)(6). Changing former paragraph (b)(5) (now paragraph (b)(6)) to clarify that HRPAS priorities and allocations authority may not be applied to communication services as the ''resource judication.''

k. Section 101.40 General Provisions

Paragraph (a). Revised the introductory sentence of paragraph (a). The rationale for this change is once a rating is authorized, in most instances, no further action is required by HHS.

l. Section 101.60 General Provisions

Paragraph (b). Revising paragraph (b) to replace ''Memoranda'' of Understanding with ''Letters.''

m. Section 101.62 Directives

Paragraph (d). Deleting paragraph (d) relating to an Allocation Directive, as it was deleted in the Department of Commerce's final rule.

n. Section 101.63 Letters and Memoranda of Understanding

Revising § 101.63 to delete ''and Memoranda'' in paragraphs (a) and (b).

o. Section 101.74 Violations, Penalties, and Remedies

Paragraph (a). Deleted language specific to the Selective Service Act and related statutes because HHS has not been delegated authority under the Selective Service Act, and the sentence, as well as the reference to the Selective Service Act earlier in this paragraph, have been deleted.

p. Appendix 1 includes four approved programs that are eligible for priorities and allocations support in accordance with Section 202 of Executive Order 13603. These programs are listed in Appendix 1.

V. Summary of Public Comments to the HRPAS NPRM

Based on the signficant amount of time since the publication of the interim final rule in 2015, HHS published, on August 16, 2023, a NPRM in the **Federal Register** (88 FR 55613) to allow for comments based on HHS utilizing DPA and HRPAS authorities in response to COVID–19 and the infant formula shortage in 2022. The comment period for the NPRM closed on September 15, 2023. During the 30-day comment period, HHS received two comments on the HRPAS NPRM. One comment, from a private citizen, was generally supportive of the regulation and primarily requested clarification and identified minor technical errors that have been addressed in this final rule. The second comment was from a coalition advocating on behalf of their stakeholders. This second comment was not specific to the HRPAS or DPA authorities and no edits were required to the HRPAS final rule.

HHS considered all comments received on the NPRM and, based on the comments received, HHS has made minor technical changes from the NPRM (88 FR 55613) to include the following revisions in this final rule:

- In IV of the Preamble, § 101.54(e) is revised to reference § 101.54(c)
- In IV of the Preamble, ''State, local, or Tribal governments'' is revised to reference ''State, Local, Tribal, or Territorial governments.''
- In IV of the Preamble, ''commodities of products'' is revised to read ''commodities or products'' and § 101.20 was revised, consistent with this change.
- Section 101.32(a)(4) is revised to reference § 101.32(a)(4)(a) and (b).
- Section 101.33(c) is revised to reference § 101.32(a)(4)(b).
- Section 101.37(d)(1)(ii) is revised to reference § 101.32(a)(4).

• Section 101.43 is revised to delete reference to ''the Department of Commerce for industrial resources.''

VI. Regulatory Analysis

A. Review Under E.O. 12866, E.O. 13563, and E.O. 14094

(1) Executive Orders 12866 (''Regulatory Planning and Review''), 13563 (''Improving Regulation and Regulatory Review''), and 14094 (''Modernizing Regulatory Review) direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Under E.O. 12866, ''significant'' regulatory actions are subject to review by OMB. E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. E.O. 14094 amends section 3(f) of Executive Order 12866 (Regulatory Planning and Review). This final rule has been drafted and reviewed in accordance with these Executive Orders. This rule has been designated a ''significant regulatory action'' by the Office of Management and Budget's (OMB) Office of Information and Regulatory Affairs, under section 3(f) of E.O. 12866.

(2) This final rule adopts the interim final rule (IFR) that established standards and procedures by which HHS may require certain contracts or orders that promote the national defense be given priority over other contracts or orders and setting new standards and procedures by which HHS may allocate materials, services, and facilities to promote the national defense under emergency and non-emergency conditions pursuant to section 101 of the DPA of 1950, as amended. Accordingly, relative to a post-IFR baseline, this final rule has limited economic impact.

B. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires preparation of an initial regulatory flexibility analysis for any rule that by law must be proposed for public comment, unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. HHS reviewed this final rule under the provisions of the Regulatory Flexibility Act and has determined that this rulemaking, if promulgated, will not have a significant impact on a substantial number of small entities.

(1) Number of Small Entities

(a) Small entities include small businesses, small organizations, and small governmental jurisdictions. For purposes of assessing the impacts of this final rule on small entities, a small business, as described in the Small Business Administration's Table of Small Business Size Standards Matched to North American Industry Classification System Codes (January 2022 Edition), has a maximum annual revenue of $33.5 million and a maximum of 1,500 employees (for some business categories, these numbers are lower). A small governmental jurisdiction is a government of a city, town, school district or special district with a population of less than 50,000. A small organization is any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.

(b) This rulemaking sets criteria under which HHS (or agencies to which HHS delegates HHS' DPA authority to issue rated orders) will authorize prioritization of certain contracts or orders for health resources as well as criteria under which HHS will issue orders allocating materials, services, and facilities. Because the rulemaking affects specific commercial transactions, HHS believes that small non-profit organizations and small governmental jurisdictions are unlikely to be directly affected by this rulemaking.

(c) Prior to the COVID–19 PHE, HHS had minimally exercised its prioritization authority for contracts and orders and had not exercised its allocation authorities. To date, HHS has exercised title I priorities authorities approximately 70 times in responding to the COVID–19 PHE to prioritize contracts thus ensuring rapid industrial mobilization for critical health resources (*e.g.,* N95 facemasks, vaccines, therapeutics, and diagnostics) to meet urgent emergency preparedness and response requirements. In response to the initial wave of the COVID–19 pandemic, HHS leveraged its allocations authority, in conjunction with a DX rated order, to re-distribute N–95 facemasks that were seized by the U.S. Customs and Border Protection. Several health resource materials have been identified as essential in responding to the COVID–19 pandemic and these items, such as personal protective equipment (PPE), ventilators, medical countermeasures, and ancillary supplies are in high demand. Therefore, a priority rating was necessary to provide the quantities of these health resources within a specified timeframe to respond to the COVID–19 pandemic. Additionally, in response to the infant formula shortage, HHS issued three priority rated orders to help ensure timely delivery of key ingredients to infant formula manufacturers.

(2) Impact

(a) The final rule has two principal components: prioritization and allocation. Under prioritization, HHS, or its Delegate Agency, designates certain orders as one of two possible priority levels. Once so designated, such orders are referred to as ''rated orders.'' The recipient of a rated order must give it priority over an unrated order or an order with a lower priority rating as necessary to meet the delivery requirement of the rated order. A recipient of a rated order must place orders at the same priority level with suppliers and subcontractors for supplies and services necessary to fulfill the recipient's rated order. The suppliers and subcontractors must treat the request from the rated order recipient as a rated order with the same priority level as the original rated order. The rulemaking does not require recipients to fulfill rated orders if the price or terms of sale are not consistent with the price or terms of sale of similar non-rated orders. The rulemaking provides protection against claims for actions taken in, or inactions required for, compliance with the rulemaking.

(b) Although rated orders could require a firm to fill one order prior to filling another, they will not necessarily require a reduction in the total volume of orders. The regulations also do not require the recipient of a rated order to reduce prices or provide rated orders with more favorable terms than a similar non-rated order. Under these circumstances, the economic effects on the rated order recipient of substituting one order for another are likely to be mutually offsetting, resulting in no net economic impact.

(c) Allocations could be used to control the general distribution of materials or services in the civilian market. Specific allocation actions that HHS might take are as follows:

1. *Set-aside:* an official action that requires a person to reserve materials, services, or facilities capacity in anticipation of receipt of rated orders.

2. *Directive:* an official action that requires a person to take or refrain from taking certain actions in accordance with its provisions. A directive can require a person to stop or reduce production of an item; prohibit the use of selected materials, services, or

facilities; or divert the use of materials, services, or facilities from one purpose to another.

3. *Allotment:* an official action that specifies the maximum quantity of a material, service, or facility authorized for a specific use to promote the national defense.

(d) In response to the COVID–19 PHE, HHS leveraged its allocations authority, in conjunction with a DX rated order to re-distribute N–95 facemasks that were seized by the U.S. Customs and Border Protection. As required by section 101(a)(2) of the DPA and by section 201(a)(3) of E.O. 13603, HHS may implement allocations only if the materials, services, and facilities are deemed necessary or appropriate to promote the national defense. ''National defense'' covers programs for military and energy production or construction, military or critical infrastructure assistance to any foreign nation, homeland security, stockpiling, space, and any related activity. Such terms include emergency preparedness activities conducted pursuant to title VI of the Stafford Act and critical infrastructure protection and restoration.

(e) Any allocation actions taken by HHS must assure that small business concerns shall be accorded, to the extent practicable, a fair share of the materials or services covered by the allocation action, in proportion to the share received by small business concerns under normal conditions, giving such special consideration as may be possible to emerging business concerns. 50 U.S.C. 4551(e).

Conclusion

(f) Although HHS cannot precisely determine the number of small entities that will be affected by this rulemaking, HHS believes that the overall impact on such entities will not be significant. In most instances, rated contracts or orders will be fulfilled in addition to other (unrated) contracts or orders and, in some instances might actually increase the total amount of business of the firm that receives a rated contract or order.

(g) Because allocations can be imposed only after a finding required under section 101(b) of the DPA, and approved by the President in accordance with section 201(e) of E.O. 13603, that such material is a scarce and critical material essential to the national defense and that the requirements of the national defense for such material cannot otherwise be met without creating a significant dislocation of the normal distribution of such material in the civilian market to such a degree as to create appreciable hardship, and because HHS has only used its allocations authority one time in response to the initial wave of COVID–19, one can expect allocations will be ordered only in rare and unique circumstances. Any allocation actions would also have to comply with section 701(e) of DPA (50 U.S.C. 4551(e)), which provides that small business concerns be accorded, to the extent practicable, a fair share of the material, including services, in proportion to the share received by such business concerns under normal conditions, giving such special consideration as may be possible to emerging business concerns.

Therefore, HHS believes that the requirement for a finding under section 101(b) of the DPA, and approved by the President in accordance with section 201(e) of E.O. 13603, that such a material is a scarce and critical material essential to the national defense and that the requirements of the national defense for such material cannot otherwise be met without creating a significant dislocation of the normal distribution of such material in the civilian market to such a degree as to create appreciable hardship and the provisions of section 701 of the DPA indicate that any impact on small business will not be significant.

(h) For the reasons set forth above, the Secretary of HHS certifies that this final rule will not have a significant economic impact on a substantial number of small entities.

C. Review Under the Paperwork Reduction Act

The purposes of the Paperwork Reduction Act of 1995 (PRA), 44 U.S.C. 3501 *et seq.,* include minimizing the paperwork burden on affected entities. The PRA requires certain actions before an agency can adopt or revise a collection of information, including publishing for public comment a summary of the collection of information and a brief description of the need for and proposed use of the information.

A Federal agency may not conduct or sponsor a collection of information unless it is approved by OMB under the PRA, and it displays a currently valid OMB control number. The public is also not required to respond to a collection of information unless it displays a currently valid OMB control number. In addition, notwithstanding any other provisions of law, no person will be subject to penalty for failing to comply with a collection of information if the collection of information does not display a currently valid OMB control number (44 U.S.C. 3512).

In accordance with the PRA, the Department has submitted one new Information Collection Request (ICR) to OMB in concert with the publishing of this final rule.

D. Review Under E.O. 13132

HHS reviewed this proposed rule pursuant to E.O. 13132, ''Federalism,'' 64 FR 43255 (August 4, 1999), which imposes certain requirements on agencies formulating and implementing policies or regulations that preempt State law or that have federalism implications. HHS determined that the rulemaking will not have a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of Government.

E. Review Under Unfunded Mandates Reform Act

Title II of the Unfunded Mandate Reform Act of 1995 (UMRA, Pub. L. 104–4) requires Federal agencies to assess the effects of their regulatory actions on State, Local, Tribal, or Territorial governments or the private sector. Agencies generally must prepare a written statement, including a cost benefit analysis, for proposed and final rules with Federal mandates that may result in expenditures of $100 million or more in any one year for State, Local, Tribal, or Territorial governments, in the aggregate, or to the private sector. This rule contains no Federal mandates as defined by title II of UMRA for State, Local, Tribal, or Territorial governments or for the private sector; therefore, this rule is not subject to the requirements of sections 202 and 205 of Unfunded Mandate Reform Act.

F. Approval of the Office of the Secretary

The Secretary of Health and Human Services has approved publication of this final rule.

List of Subjects in 45 CFR Part 101

Administrative practice and procedure, Business and industry, Government contracts, National defense, Reporting and recordkeeping requirements, Strategic and critical materials.

■ For the reasons stated in the preamble, HHS is revising part 101 of title 45 of the Code of Federal Regulations as follows:

PART 101—HEALTH RESOURCES PRIORITIES AND ALLOCATIONS SYSTEM (HRPAS)

Sec.

Authority: Defense Production Act of 1950, as amended (50 U.S.C. 4501, *et seq.*), and Executive Order 13603 (77 FR 16651, 3 CFR, March 16, 2012).

Subpart A—General

§ 101.1 Purpose.

This part provides guidance and procedures for use of Defense Production Act (DPA) of 1950 section 101 priorities and allocations authority with respect to health resources necessary or appropriate to promote the national defense. The guidance and procedures in this part are consistent with the guidance and procedures provided in other regulations that form the Federal Priorities and Allocations System (FPAS). Guidance and procedures for use of the DPA priorities and allocations authority with respect to other types of resources are provided for: food resources, food resource facilities, livestock resources, veterinary resources, plant health resources, and the domestic distribution of farm equipment and commercial fertilizer in 7 CFR part 789; all forms of energy in 10 CFR part 217; all forms of civil transportation in 49 CFR part 33; and all other materials, services, and facilities, including construction materials in 15 CFR part 700.

§ 101.2 Priorities and allocations authority.

(a) Section 201 of Executive Order (E.O.) 13603, delegates the President's priorities and allocations authority under section 101 of the DPA. Section 101 of the DPA provides the President with authority to require acceptance and priority performance of contracts and orders (other than contracts of employment) to promote the national defense over performance of any other contracts or orders, and to allocate materials, services, and facilities as deemed necessary or appropriate to promote the national defense to a number of agencies. Section 201 of E.O. 13603 delegates the President's authority to specific agencies as follows:

(1) The Secretary of Agriculture with respect to food resources, food resource facilities, livestock resources, veterinary resources, plant health resources, and the domestic distribution of farm equipment and commercial fertilizer;

(2) The Secretary of Energy with respect to all forms of energy;

(3) The Secretary of Health and Human Services with respect to health resources;

(4) The Secretary of Transportation with respect to all forms of civil transportation;

(5) The Secretary of Defense with respect to water resources; and

(6) The Secretary of Commerce for all other materials, services, and facilities, including construction materials.

(b) Section 202 of E.O. 13603 states that the authority delegated in section 201, except as provided in section 201(e) of E.O. 13603, may be used only to support programs that have been determined in writing as necessary or appropriate to promote the national defense:

(1) By the Secretary of Defense with respect to military production and construction, military assistance to foreign nations, military use of civil transportation, stockpiles managed by the Department of Defense, space, and directly related activities.

(2) By the Secretary of Energy with respect to energy production and construction, distribution, and use, and directly related activities; and

(3) By the Secretary of Homeland Security with respect to all other national defense programs, including civil defense and continuity of Government.

(c) Section 201(e) of E.O. 13603 provides that each department that is delegated allocations authority under section 201(a) of E.O. 13603 may use this authority with respect to control of the general distribution of any material (including applicable services) in the civilian market only after:

(1) Making the finding required under section 101(b) of the DPA; and

(2) The finding has been approved by the President.

§ 101.3 Program eligibility.

Certain programs to promote the national defense are approved for priorities and allocations support. These include programs for military and energy production or construction, military or critical infrastructure assistance to any foreign nation, homeland security, stockpiling, space, and any directly related activity. Other eligible programs include emergency preparedness activities conducted pursuant to title VI of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*), and critical infrastructure protection and restoration.

Subpart B—Definitions

§ 101.20 Definitions.

The following definitions pertain to all sections of this part:

Allocation means the control of the distribution of materials, services, or facilities for a purpose deemed necessary or appropriate to promote the national defense.

Allocation order means an official action to control the distribution of materials, services, or facilities for a purpose deemed necessary or

appropriate to promote the national defense.

Allotment means an official action that specifies the maximum quantity or use of a material, service, or facility authorized for a specific use to promote the national defense.

Approved program means a program determined by the Secretary of Defense, the Secretary of Energy, or the Secretary of Homeland Security to be necessary or appropriate to promote the national defense, under the authority of the Defense Production Act and in accordance with section 202 of E.O. 13603.

Construction means the erection, addition, extension, or alteration of any building, structure, or project, using materials or products which are to be an integral and permanent part of the building, structure, or project. Construction does not include maintenance and repair.

Critical infrastructure means any systems and assets, whether physical or cyber-based, so vital to the United States that the degradation or destruction of such systems and assets would have a debilitating impact on national security, including, but not limited to, national economic security and national public health or safety.

Defense Production Act or *DPA* means the Defense Production Act of 1950, as amended (50 U.S.C. 4501 *et seq.*).

Delegate agency means a Federal Government agency authorized by delegation from the Department of Health and Human Services (HHS) to place priority ratings on contracts or orders needed to support approved programs.

Directive means an official action that requires a person to take or refrain from taking certain actions in accordance with its provisions.

Emergency preparedness means all those activities and measures designed or undertaken to prepare for or minimize the effects of a hazard upon the civilian population, to deal with the immediate emergency conditions which would be created by the hazard, and to effectuate emergency repairs to, or the emergency restoration of, vital utilities and facilities destroyed or damaged by the hazard. ''Emergency Preparedness'' includes the following:

(1) Measures to be undertaken in preparation for anticipated hazards (including the establishment of appropriate organizations, operational plans, and supporting agreements, the recruitment and training of personnel, the conduct of research, the procurement and stockpiling of necessary materials and supplies, the provision of suitable warning systems, the construction or preparation of shelters, shelter areas, and control centers, and, when appropriate, the nonmilitary evacuation of the civilian population).

(2) Measures to be undertaken during a hazard (including the enforcement of passive defense regulations prescribed by duly established military or civil authorities, the evacuation of personnel to shelter areas, the control of traffic and panic, and the control and use of lighting and civil communications).

(3) Measures to be undertaken following a hazard (including activities for firefighting; rescue; emergency medical, health and sanitation services; monitoring for specific dangers of special weapons; unexploded bomb reconnaissance; essential debris clearance; emergency welfare measures; and immediately essential emergency repair or restoration of damaged vital facilities).

Facilities includes all types of buildings, structures, or other improvements to real property (but excluding farms, churches or other places of worship, and private dwelling houses), and services relating to the use of any such building, structure, or other improvement.

Farm equipment means equipment, machinery, and repair parts manufactured for use on farms in connection with the production or preparation for market use of food resources.

Fertilizer means any product or combination of products that contain one or more of the elements nitrogen, phosphorous, and potassium for use as a plant nutrient.

Food resources means all commodities and products, (simple, mixed, or compound), or complements to such commodities or products, that are capable of being ingested by other human beings or animals, irrespective of other uses to which such commodities or products may be put, at all stages of processing from the raw commodity to the products thereof in vendible form for human or animal consumption. ''Food resources'' also means potable water packaged in commercially marketable containers, all starches, sugars, vegetable and animal or marine fats and oils, seed, cotton, hemp, and flax fiber, but does not mean any such material after it loses its identity as an agricultural commodity or agriculture product.

Food resource facilities means plants, machinery, vehicles (including on farm), and other facilities required for the production, processing, distribution, and storage (including cold storage) of food resources, and for the domestic distribution of farm equipment and fertilizer (excluding transportation thereof).

Hazard means an emergency or disaster resulting from:

(1) A natural disaster; or

(2) An accidental or man-caused event.

Health resources means drugs, biological products, medical devices, materials, facilities, health supplies, services and equipment required to diagnose, mitigate, or prevent the impairment of, improve, treat, cure, or restore the physical or mental health conditions of the population.

Homeland Security includes efforts—

(1) To prevent terrorist attacks within the United States;

(2) To reduce the vulnerability of the United States to terrorism;

(3) To minimize damage from a terrorist attack in the United States; and

(4) To recover from a terrorist attack in the United States.

Industrial resource means all materials, services, and facilities, including construction materials, the authority for which has not been delegated to other agencies under E.O. 13603. The term ''Industrial resource'' does not include food resources, food resource facilities, livestock resources, veterinary resources, and the domestic distribution of farm equipment and commercial fertilizer; all forms of energy; health resources; all forms of civil transportation; and water resources.

Item means any raw, in process, or manufactured material, article, commodity, supply, equipment, component, accessory, part, assembly, or product of any kind, technical information, process, or service.

Maintenance and Repair and/or Operating Supplies (*MRO*) includes the following—

(1) ''*Maintenance*'' is the upkeep necessary to continue any plant, facility, or equipment in working condition;

(2) ''*Repair*'' is the restoration of any plant, facility, or equipment to working condition when it has been rendered unsafe or unfit for service by wear and tear, damage, or failure of parts;

(3) ''*Operating Supplies*'' are any resources carried as operating supplies according to a person's established accounting practice. ''Operating Supplies'' may include hand tools and expendable tools, jigs, dies, fixtures used on production equipment, lubricants, cleaners, chemicals, and other expendable items; and

(4) *MRO* does not include items produced or obtained for sale to other persons or for installation upon or attachment to the property of another

person, or items required for the production of such items; items needed for the replacement of any plant, facility, or equipment; or items for the improvement of any plant, facility, or equipment by replacing items which are still in working condition with items of a new or different kind, quality, or design.

Materials includes—

(1) Any raw materials (including minerals, metals, and advanced processed materials), commodities, articles, components (including critical components), products, and items of supply; and

(2) Any technical information or services ancillary to the use of any such materials, commodities, articles, components, products, or items.

National defense means programs for military and energy production or construction, military or critical infrastructure assistance to any foreign nation, homeland security, stockpiling, space, and any directly related activity. Such term includes emergency preparedness activities conducted pursuant to title VI of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121, *et seq.*) and critical infrastructure protection and restoration.

Official action means an action taken by HHS under the authority of the DPA, E.O. 13603, and this part or another regulation under the FPAS. Such actions include the issuance of Rating Authorizations, Directives, Set Asides, Allotments, Letters of Understanding, and Demands for Information, Inspection Authorizations, and Administrative Subpoenas.

Person includes any individual, corporation, partnership, association, or any other organized group of persons, or legal successor or representative thereof; or any State or local government or agency thereof; and for purposes of administration of this part, includes the Federal Government and any authorized foreign government or international organization or agency thereof, delegated authority as provided in this part.

Priority rating is an identifying code assigned by HHS, a Delegate Agency or authorized person placed on all rated orders for health resources and consisting of the rating symbol and program identification symbol.

Program Identification Symbols is an abbreviation used to indicate which approved program is supported by a rated order.

Rated order means a prime contract, a subcontract, or a purchase order in support of an approved program issued in accordance with the provisions of this part.

Resource department means any agency delegated priorities and allocations authority as specified in § 101.2.

Secretary means the Secretary of HHS.

Services includes any effort that is needed for or incidental to—

(1) The development, production, processing, distribution, delivery, or use of a health resource.

(2) The construction of facilities.

(3) Other national defense programs and activities.

Set-aside means an official action that requires a person to reserve materials, services, or facilities capacity in anticipation of the receipt of rated orders.

Stafford Act means title VI (Emergency Preparedness) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as amended (42 U.S.C. 5121 *et seq.*).

Water resources means all usable water, from all sources, within the jurisdiction of the United States, that can be managed, controlled, and allocated to meet emergency requirements, except ''water resources'' do not include usable water that qualifies as ''food resources''.

Working day means any day that the recipient of an order is open for business.

Subpart C—Placement of Rated Orders

§ 101.30 Delegations of authority.

(a) The priorities and allocations authorities of the President under section 101 of the DPA with respect to health resources have been delegated to the Secretary under E.O. 13603. The Secretary may re-delegate the Secretary's priorities authorities under the DPA to authorize a Delegate Agency to assign priority ratings to orders for health resources needed for use in approved programs.

(b) Pursuant to 87 FR 58363 published in the **Federal Register** on September 26, 2022, the Secretary delegated to the Assistant Secretary for Preparedness and Response (the ASPR) within the Administration for Strategic Preparedness and Response (ASPR), the authority under section 201 of E.O. 13603 to exercise priorities authority under section 101 of the DPA. This delegation authorized the ASPR, on behalf of the Secretary, to approve DO—[–[M1–M9] priority rating requests for health resources that promote the national defense, though this delegation excludes the authority to approve all priorities provisions for health resources that require DX—[–[M1–M9] priority ratings.

§ 101.31 Priority ratings.

(a) *Levels of priority.* (1) There are two levels of priority established by the HRPAS, identified by the rating symbols ''DO'' and ''DX''.

(2) All DO rated orders have equal priority with each other and take precedence over unrated orders. All DX rated orders have equal priority with each other and take precedence over DO rated orders and unrated orders. (For resolution of conflicts among rated orders of equal priority, see § 101.34(c).

(3) In addition, a Directive regarding priority treatment for a given item issued by HHS for that item takes precedence over any DX rated order, DO rated order, or unrated order, as stipulated in the Directive. (For a full discussion of Directives, see § 101.62.)

(b) *Priority ratings.* A priority rating is an identifying code assigned by a Delegate Agency or authorized person placed on all rated orders for health resources. It consists of the rating symbol and the program identification symbol.

§ 101.32 Elements of a rated order.

(a) Each rated order must include:

(1) The appropriate priority rating (*e.g.,* DO–[M1–M9 or DX—[–[M1–M9];

(2) A required delivery date or dates. The words ''immediately'' or ''as soon as possible'' do not constitute a delivery date. A ''requirements contract,'' ''basic ordering agreement,'' ''prime vendor contract,'' or similar procurement document bearing a priority rating may contain no specific delivery date or dates and may provide for the furnishing of items or service from time-to-time or within a stated period against specific purchase orders, such as ''calls,'' ''requisitions,'' and ''delivery orders.'' These purchase orders must specify a required delivery date or dates and are to be considered as rated as of the date of their receipt by the supplier and not as of the date of the original procurement document;

(3) The written signature on a manually placed order, or the digital signature or name on an electronically placed order, of an individual authorized to sign rated orders for the person placing the order. The signature or use of the name certifies that the rated order is authorized under this part and that the requirements of this part are being followed; and

(4) A statement that reads in substance:

(b) This is a rated order certified for national defense use, and you are required to follow all the provisions of the Health Resources Priorities and Allocations System regulation at 45 CFR part 101.

(c) Additional element required for certain emergency preparedness rated orders. If the rated order is placed in support of emergency preparedness requirements and expedited action is necessary and appropriate to meet these requirements, the following statement must be included in the order: ''This rated order is placed for the purpose of emergency preparedness. It must be accepted or rejected within [Insert a time limit no less than the minimum applicable time limit specified in § 101.33(e)].''

§ 101.33 Acceptance and rejection of rated orders.

(a) *Mandatory acceptance.* (1) Except as otherwise specified in this section, a person shall accept every rated order received and must fill such orders regardless of any other rated or unrated orders that have been accepted.

(2) A person shall not discriminate against rated orders in any manner such as by charging higher prices or by imposing different terms and conditions than for comparable unrated orders.

(b) *Mandatory rejection.* Unless otherwise directed by HHS for a rated order involving health resources:

(1) A person shall not accept a rated order for delivery on a specific date if unable to fill the order by that date. However, the person must inform the customer of the earliest date on which delivery can be made and offer to accept the order on the basis of that date. Scheduling conflicts with previously accepted lower rated or unrated orders are not sufficient reason for rejection under this section.

(2) A person shall not accept a DO rated order for delivery on a date which would interfere with delivery of any previously accepted DO or DX rated orders. However, the person must offer to accept the order based on the earliest delivery date otherwise possible.

(3) A person shall not accept a DX rated order for delivery on a date which would interfere with delivery of any previously accepted DX rated orders but must offer to accept the order based on the earliest delivery date otherwise possible.

(4) If a person is unable to fill all of the rated orders of equal priority status received on the same day, the person must accept, based upon the earliest delivery dates, only those orders which can be filled, and reject the other orders. For example, a person must accept order A requiring delivery on December 15 before accepting order B requiring delivery on December 31. However, the person must offer to accept the rejected orders based on the earliest delivery dates otherwise possible.

(c) *Optional rejection.* Unless otherwise directed by HHS for a rated order involving health resources, rated orders may be rejected in any of the following cases as long as a supplier does not discriminate among customers:

(1) If the person placing the order is unwilling or unable to meet regularly established terms of sale or payment;

(2) If the order is for an item not supplied or for a service not capable of being performed;

(3) If the order is for an item or service produced, acquired, or provided only for the supplier's own use for which no orders have been filled for two years prior to the date of receipt of the rated order. If, however, a supplier has sold some of these items or provided similar services, the supplier is obligated to accept rated orders up to that quantity or portion of production or service, whichever is greater, sold or provided within the past two years;

(4) If the person placing the rated order, other than the U.S. Government, makes the item or performs the service being ordered;

(5) If acceptance of a rated order or performance against a rated order would violate any other regulation, official action, or order of the HHS issued under the authority of the DPA or another relevant statute.

(d) *Customer notification requirements.* (1) Except as provided in paragraph (e) of this section, a person must accept or reject a rated order in writing or electronically within fifteen (15) working days after receipt of a DO-rated order and within ten (10) working days after receipt of a DX-rated order. If the order is rejected, the person must give reasons in writing or electronically for the rejection.

(2) If a person has accepted a rated order and subsequently finds that shipment or performance will be delayed, the person must notify the customer immediately, give the reasons for the delay, and advise of a new shipment or performance date. If notification is given verbally, written (hard copy) or electronic confirmation must be provided within one (1) working day of the verbal notice.

(e) *Exception for emergency response conditions.* If the rated order is placed for the purpose of emergency preparedness, and expedited action is necessary or appropriate to meet these requirements and the order includes the statement as set forth in § 101.32(a)(4)(b), a person must accept or reject a rated order and transmit the acceptance or rejection in writing or in an electronic format within the time frame specified in the rated order (usually within two working days after receipt of the order). The minimum times for acceptance or rejection that such orders may specify are six (6) hours after receipt if the order is issued by an authorized person in response to a hazard that has occurred; or twelve (12) hours after receipt if the order is issued by an authorized person to prepare for an imminent hazard.

§ 101.34 Preferential scheduling.

(a) A person must schedule operations, including the acquisition of all needed production items or services, in a timely manner to satisfy the delivery requirements of each rated order. Modifying production or delivery schedules is necessary only when required delivery dates for rated orders cannot otherwise be met.

(b) DO rated orders must be given production preference over unrated orders, if necessary, to meet required delivery dates, even if this requires the diversion of items being processed or ready for delivery or services being performed against unrated orders. Similarly, DX rated orders must be given preference over DO rated orders and unrated orders. (Examples: If a person receives a DO rated order with a delivery date of June 3 and if meeting that date would mean delaying production or delivery of an item for an unrated order, the unrated order must be delayed. If a DX rated order is received calling for delivery on July 15 and a person has a DO rated order requiring delivery on June 2 and operations can be scheduled to meet both deliveries, there is no need to alter production schedules to give any additional preference to the DX rated order. However, if business operations cannot be altered to meet both the June 2 and July 15 delivery dates, then the DX rated order must be given priority over the DO rated order.)

(c)(1) If a person finds that delivery or performance against any accepted rated orders conflicts with the delivery or performance against other accepted rated orders of equal priority status, the person shall give precedence to the conflicting orders in the sequence in which they are to be delivered or performed (not to the receipt dates). If the conflicting orders are scheduled to be delivered or performed on the same day, the person shall give precedence to those orders that have the earliest receipt dates.

(2) If a person is unable to resolve rated order delivery or performance conflicts under this section, the person should promptly seek special priorities assistance as provided in §§ 101.40 through 101.44. If the person's customer objects to the rescheduling of delivery

or performance of a rated order, the customer should promptly seek special priorities assistance as provided in §§ 101.40 through 101.44. For any rated order against which delivery or performance will be delayed, the person must notify the customer as provided in § 101.33(d)(2).

(d) If a person is unable to purchase needed production items in time to fill a rated order by its required delivery date, the person must fill the rated order by using inventoried production items. A person who uses inventoried items to fill a rated order may replace those items with the use of a rated order as provided in § 101.37(b).

§ 101.35 Extension of priority ratings.

(a) A person must use rated orders with suppliers to obtain items or services needed to fill a rated order. The person must use the priority rating indicated on the customer's rated order, except as otherwise provided in this part or as directed by HHS.

(b) The priority rating must be included on each successive order placed to obtain items or services needed to fill a customer's rated order. This continues from contractor to subcontractor to supplier throughout the entire procurement chain.

§ 101.36 Changes or cancellations of priority ratings and rated orders.

(a) The priority rating on a rated order may be changed or canceled by:

(1) An official action of HHS; or

(2) Written notification from the person who placed the rated order (including a Delegate Agency).

(b) If an unrated order is amended to make it a rated order, or a DO rating is changed to a DX rating, the supplier must give the appropriate preferential treatment to the order as of the date the change is received by the supplier.

(c) An amendment to a rated order that significantly alters a supplier's original production or delivery schedule shall constitute a new rated order as of the date of its receipt. The supplier must accept or reject the amended order according to the provisions of § 101.33.

(d) The following amendments do not constitute a new rated order: a change in shipping destination; a reduction in the total amount of the order; an increase in the total amount of the order which has negligible impact upon deliveries; a minor variation in size or design (prior to the start of production); or a change which is agreed upon between the supplier and the customer.

(e) If a person no longer needs items or services to fill a rated order, any rated orders placed with suppliers for the items or services, or the priority rating on those orders, must be canceled.

(f) When a priority rating is added to an unrated order, or is changed or canceled, all suppliers must be promptly notified in writing.

§ 101.37 Use of rated orders.

(a) A person must use rated orders to obtain:

(1) Items which will be physically incorporated into other items to fill rated orders, including that portion of such items normally consumed or converted into scrap or by-products in the course of processing;

(2) Containers or other packaging materials required to make delivery of the finished items against rated orders;

(3) Services, other than contracts of employment, needed to fill rated orders;

(4) MRO needed to produce the finished items to fill rated orders.

(b) A person may use a rated order to replace inventoried items (including finished items) if such items were used to fill rated orders, as follows:

(1) The order must be placed within 90 days of the date of use of the inventory.

(2) A DO rating symbol and the program identification symbol indicated on the customer's rated order must be used on the order. A DX rating may not be used even if the inventory was used to fill a DX rated order.

(3) If the priority ratings on rated orders from one customer or several customers contain different program identification symbols, the rated orders may be combined.

(c) A person may combine DX and DO rated orders from one customer or several customers if the items or services covered by each level of priority are identified separately and clearly.

(d) Combining rated and unrated orders.

(1) A person may combine rated and unrated order quantities on one purchase order provided that:

(i) The rated quantities are separately and clearly identified; and

(ii) The four elements of a rated order, as required by § 101.32, are included on the order with the statement required in § 101.32(a)(4) modified to read in substance: ''This purchase order contains rated order quantities certified for national defense use, and you are required to follow all applicable provisions of the Health Resources Priorities and Allocations System regulations at 45 CFR part 101 only as it pertains to the rated quantities''.

(2) A supplier must accept or reject the rated portion of the purchase order as provided in § 101.33 and give preferential treatment only to the rated quantities as required by this part. This part may not be used to require preferential treatment for the unrated portion of the order.

(3) Any supplier who believes that rated and unrated orders are being combined in a manner contrary to the intent of this part or in a fashion that causes undue or exceptional hardship may submit a request for adjustment or exception under § 101.80.

(e) A person may place a rated order for the minimum commercially procurable quantity even if the quantity needed to fill a rated order is less than that minimum. However, a person must combine rated orders as provided in paragraph (c) of this section, if possible, to obtain minimum procurable quantities.

(f) A person is not required to place a priority rating on an order for less than one-half of the Simplified Acquisition Threshold (as established in the Federal Acquisition Regulation (FAR) (see 48 CFR 2.101) or in other authorized acquisition regulatory or management systems) whichever amount is greater, provided that delivery can be obtained in a timely fashion without the use of the priority rating.

§ 101.38 Limitations on placing rated orders.

(a) *General limitations.* (1) A person may not place a DO or DX rated order pursuant to this part unless the person in receipt of the rated order has been explicitly authorized to do so by HHS or a Delegate Agency or is otherwise permitted to do so by this part.

(2) Rated orders may not be used to obtain:

(i) Delivery on a date earlier than needed;

(ii) A greater quantity of the item or services than needed, except to obtain a minimum procurable quantity. Separate rated orders may not be placed solely for the purpose of obtaining minimum procurable quantities on each order;

(iii) Items or services in advance of the receipt of a rated order, except as specifically authorized by HHS (see § 101.41(c) for information on obtaining authorization for a priority rating in advance of a rated order);

(iv) Items that are not needed to fill a rated order, except as specifically authorized by HHS, or as otherwise permitted by this part; or

(v) Any of the following items unless specific priority rating authority has been obtained from HHS, a Delegate Agency, or the Department of Commerce, as appropriate:

(A) Items for plant improvement, expansion, or construction, unless they will be physically incorporated into a

construction project covered by a rated order; or

(B) Production or construction equipment or items to be used for the manufacture of production equipment. [For information on requesting priority rating authority, see § 101.41.]

(C) Any items related to the development of chemical or biological warfare capabilities or the production of chemical or biological weapons unless such development or production has been authorized by the President or the Secretary of Defense. This provision does not however prohibit the use of the priority and allocations authority to acquire or produce qualified countermeasures that are necessary to treat, identify, or prevent harm from any biological or chemical agent that may pose a public health threat affecting national security.

(b) *Jurisdictional limitations.* Unless authorized by the resource agency with jurisdiction, the provisions of this part are not applicable to the following resources:

(1) Food resources, food resource facilities, livestock resources, veterinary resources, plant health resources, and the domestic distribution of farm equipment and commercial fertilizer (Resource agency with jurisdiction—Department of Agriculture);

(2) All forms of energy (Resource agency with jurisdiction—Department of Energy);

(3) All forms of civil transportation (Resource agency with jurisdiction—Department of Transportation);

(4) Water resources (Resource agency with jurisdiction—Department of Defense/U.S. Army Corps of Engineers);

(5) All materials, services, and facilities, including construction materials (industrial resources) for which the authority has not been delegated to other agencies under E.O. 13603 (Resource agency with jurisdiction—Department of Commerce);

(6) The priorities and allocations authority of this part may not be applied to communications services (Resource agency with jurisdiction—National Communications System under E.O. 13618 of July 6, 2012).

Subpart D—Special Priorities Assistance

§ 101.40 General provisions.

(a) Once a priority rating has been authorized pursuant to this part, further action by HHS is generally not needed. However, from time-to-time, production or delivery problems will arise in connection with rated orders for health resources as covered under this part. In this event, a person should immediately contact ASPR for guidance, as specified in § 101.93. ASPR serves as the lead policy office for emergency preparedness and response operations on behalf of HHS and manages the Department's delegated DPA authorities. If ASPR is unable to resolve the problem or to authorize the use of a priority rating and believes additional assistance is warranted, ASPR may forward the request to another agency with resource jurisdiction, such as the Department of Commerce, as appropriate, for action. Special priorities assistance is provided to alleviate problems that do arise.

(b) Special priorities assistance is available for any reason consistent with this part. Generally, special priorities assistance is provided to expedite deliveries, resolve delivery conflicts, place rated orders, locate suppliers, or to verify information supplied by customers and vendors. Special priorities assistance may also be used to request rating authority for items that are not normally eligible for priority treatment.

§ 101.41 Requests for priority rating authority.

(a) *Rating authority for items or services not normally rated.* If a rated order is likely to be delayed because a person is unable to obtain items or services not normally rated under this part, the person may request the authority to use a priority rating in ordering the needed items or services.

(b) *Rating authority for production or construction equipment.* (1) A request for priority rating authority for production or construction equipment must be submitted to the U.S. Department of Commerce on Form BIS–999.

(2) When the use of a priority rating is authorized for the procurement of production or construction equipment, a rated order may be used either to purchase or to lease such equipment. However, in the latter case, the equipment may be leased only from a person engaged in the business of leasing such equipment or from a person willing to lease rather than sell.

(c) *Rating authority in advance of a rated prime contract.* (1) In certain cases, and upon specific request HHS may authorize a person to place a priority rating on an order to a supplier in advance of the issuance of a rated prime contract. In these instances, the person requesting advance-rating authority must obtain sponsorship of the request from HHS or the appropriate Delegate Agency. The person shall also assume any business risk associated with the placing of rated orders in the event the rated prime contract is not issued.

(2) The person must state the following in the request: It is understood that the authorization of a priority rating in advance of our receiving a rated prime contract from the Department of Health and Human Services (HHS) and our use of that priority rating with our suppliers in no way commits HHS or any other government agency to enter into a contract or order or to expend funds. Further, we understand that the Federal Government shall not be liable for any cancellation charges, termination costs, or other damages that may accrue if a rated prime contract is not eventually placed and, as a result, we must subsequently cancel orders placed with the use of the priority rating authorized as a result of this request.

(3) In reviewing requests for rating authority in advance of a rated prime contract, HHS will consider, among other things, the following criteria:

(i) The probability that the prime contract will be awarded;

(ii) The impact of the resulting rated orders on suppliers and on other authorized programs;

(iii) Whether the contractor is the sole source;

(iv) Whether the item being produced has a long lead time;

(v) The time period for which the rating is being requested;

(4) HHS may require periodic reports on the use of the rating authority granted under paragraph (c) of this section.

(5) If a rated prime contract is not issued, the person shall promptly notify all suppliers who have received rated orders pursuant to the advanced rating authority that the priority rating on those orders is cancelled.

§ 101.42 Examples of assistance.

(a) While special priorities assistance may be provided for any reason in support of this part, it is usually provided in situations where:

(1) A person is experiencing difficulty in obtaining delivery against a rated order by the required delivery date; or

(2) A person cannot locate a supplier for an item or service needed to fill a rated order.

(b) Other examples of special priorities assistance include:

(1) Ensuring that rated orders receive preferential treatment by suppliers;

(2) Resolving production or delivery conflicts between various rated orders;

(3) Assisting in placing rated orders with suppliers;

(4) Verifying the urgency of rated orders; and

(5) Determining the validity of rated orders.

§ 101.43 Criteria for assistance.

Requests for special priorities assistance should be timely, *i.e.,* the request has been submitted promptly and enough time exists for HHS, or the Delegate Agency to affect a meaningful resolution to the problem, and must establish that:

(a) There is an urgent need for the item; and

(b) The applicant has made a reasonable effort to resolve the problem.

§ 101.44 Instances where assistance may not be provided.

Special priorities assistance is provided at the discretion of HHS or the Delegate Agency when it is determined that such assistance is warranted to meet the objectives of this part. Examples where assistance may not be provided include situations when a person is attempting to:

(a) Secure a price advantage;

(b) Obtain delivery prior to the time required to fill a rated order;

(c) Gain competitive advantage;

(d) Disrupt an industry apportionment program in a manner designed to provide a person with an unwarranted share of scarce items; or

(e) Overcome a supplier's regularly established terms of sale or conditions of doing business.

Subpart E—Allocation Actions

§ 101.50 Policy.

(a) Allocation orders will:

(1) Only be used when there is insufficient supply of a material, service, or facility to satisfy national defense supply requirements through the use of the priorities authority or when the use of the priorities authority would cause a severe and prolonged disruption in the supply of materials, services, or facilities available to support normal U.S. economic activities; and

(2) Not be used to ration materials or services at the retail level.

(b) Allocation orders, when used, will be distributed equitably among the suppliers of the materials, services, or facilities being allocated and not require any person to relinquish a disproportionate share of the civilian market.

§ 101.51 General procedures.

Before the Department of Health and Human Services uses its allocations authority to address a supply problem within its resource jurisdiction, it will develop a plan that includes:

(a) A copy of the written determination made in accordance with section 202 of Executive Order 13603, that the program or programs that would be supported by the allocation action are necessary or appropriate to promote the national defense.

(b) A detailed description of the situation to include any unusual events or circumstances that have created the requirement for an allocation action;

(c) A statement of the specific objective(s) of the allocation action;

(d) A list of the materials, services, or facilities to be allocated;

(e) A list of the sources of the materials, services, or facilities that will be subject to the allocation action;

(f) A detailed description of the provisions that will be included in the allocation orders, including the type(s) of allocation orders, the percentages or quantity of capacity or output to be allocated for each purpose, and the duration of the allocation action (*i.e.,* anticipated start and end dates);

(g) An evaluation of the impact of the proposed allocation action on the civilian market; and

(h) Proposed actions, if any, to mitigate disruptions to civilian market operations.

§ 101.52 Controlling the general distribution of a material in the civilian market.

No allocation action taken by HHS may be used to control the general distribution of a material in the civilian market, unless the Secretary has:

(a) Made a written finding that:

(1) Such material is a scarce and critical material essential to the national defense, and

(2) The requirements of the national defense for such material cannot otherwise be met without creating a significant dislocation of the normal distribution of such material in the civilian market to such a degree as to create appreciable hardship;

(b) Submitted the finding for the President's approval through the Assistant to the President and National Security Advisor and the Assistant to the President for Homeland Security and Counterterrorism; and

(c) The President has approved the finding.

§ 101.53 Types of allocation orders.

There are three types of allocation orders available for communicating allocation actions.

(a) *Set-aside.* An official action that requires a person to reserve materials, services, or facilities capacity in anticipation of the receipt of rated orders.

(b) *Directive.* An official action that requires a person to take or refrain from taking certain actions in accordance with its provisions. A directive can require a person to: Stop or reduce production of an item; prohibit the use of selected materials, services, or facilities; or divert the use of materials, services, or facilities from one purpose to another; and

(c) *Allotment.* An official action that specifies the maximum quantity of a material, service, or facility authorized for a specific use to promote the national defense.

§ 101.54 Elements of an allocation order.

Allocation orders may be issued directly to the affected persons or by constructive notice through publication in the **Federal Register**. This section describes the elements that each order must include.

(a) Each allocation order must include:

(1) A detailed description of the required allocation action(s), including its relationship to any received DX rated orders, DO rated orders, and unrated orders;

(2) Specific start and end calendar dates for each required allocation action;

(3) The written signature on a manually placed order or the digital signature on an electronically placed order of the Secretary of HHS.

(b)(1) Elements to be included in orders issued directly to affected persons:

(2) A statement that reads in substance: ''This is an allocation order certified for national defense use. [Insert the name of the person receiving the order] is required to comply with this order, in accordance with the provisions of the Health Resources Priorities and Allocations System regulation (45 CFR part 101);

(c)(1) Elements to be included in an allocation order that gives constructive notice through publication in the **Federal Register***:*

(2) A statement that reads in substance: ''This is an allocation order certified for national defense use. [Insert the name(s) of the person(s) to whom the order applies or a description of the class of persons to whom the order applies] is (are) required to comply with this order, in accordance with the provisions of the Health Resources Priorities and Allocations System regulation (45 CFR part 101).

§ 101.55 Mandatory acceptance of an allocation order.

(a) Except as otherwise specified in this section (see paragraph (c) of this section), a person shall accept and comply with every allocation order received.

(b) A person shall not discriminate against an allocation order in any manner such as by charging higher prices for materials, services, or facilities covered by the order or by imposing terms and conditions for contracts and orders involving allocated materials, services, or facilities that differ from the person's terms and conditions for contracts and orders for the materials, services, or facilities prior to receiving the allocation order.

(c) If a person is unable to comply fully with the required action(s) specified in an allocation order, the person must notify the ASPR, as specified in § 101.93, immediately, explain the extent to which compliance is possible, and give the reasons why full compliance is not possible. If notification is given verbally, then written or electronic confirmation must be provided within one (1) working day. Such notification does not release the person from complying with the order to the fullest extent possible, until the person is notified by HHS that the order has been changed or cancelled.

§ 101.56 Changes or cancellations of an allocation order.

An allocation order may be changed or canceled by an official action of HHS. Notice of such changes or cancellations may be provided directly to persons to whom the order being cancelled or modified applies or constructive notice may be provided by publication in the **Federal Register**.

Subpart F—Official Actions

§ 101.60 General provisions.

(a) HHS may take specific official actions to implement the provisions of this part.

(b) These official actions include, but are not limited to, Rating Authorizations, Directives, and Letters of Understanding (See § 101.20.)

§ 101.61 Rating Authorizations.

(a) A Rating Authorization is an official action granting specific priority rating authority that:

(1) Permits a person to place a priority rating on an order for an item or service not normally ratable under this part; or

(2) Authorizes a person to modify a priority rating on a specific order or series of contracts or orders.

(b) To request priority rating authority, see § 101.41.

§ 101.62 Directives.

(a) A Directive is an official action that requires a person to take or refrain from taking certain actions in accordance with its provisions.

(b) A person must comply with each Directive issued. However, a person may not use or extend a Directive to obtain any items from a supplier, unless expressly authorized to do so in the Directive.

(c) A Directive takes precedence over all DX rated orders, DO rated orders, and unrated orders previously or subsequently received, unless a contrary instruction appears in the Directive.

§ 101.63 Letters of Understanding.

(a) A Letter of Understanding is an official action that may be issued in resolving special priorities assistance cases to reflect an agreement reached by all parties including HHS, the Department of Commerce (if applicable), a Delegate Agency (if applicable), the supplier, and the customer.

(b) A Letter of Understanding is not used to alter scheduling between rated orders, to authorize the use of priority ratings, to impose restrictions under this part. Rather, Letters of Understanding are used to confirm production or shipping schedules that do not require modifications to other rated orders.

Subpart G—Compliance

§ 101.70 General provisions.

(a) HHS may take specific official actions for any reason necessary or appropriate to the enforcement or the administration of the Defense Production Act and other applicable statutes, this part, or an official action. Such actions include Administrative Subpoenas, Demands for Information, and Inspection Authorizations.

(b) Any person who places or receives a rated order or an allocation order must comply with the provisions of this part.

(c) Willful violation of the provisions of title I or section 705 of the DPA and other applicable statutes, this part, or an official action of HHS is a criminal act, punishable as provided in the DPA and other applicable statutes, and as set forth in § 101.74.

§ 101.71 Audits and investigations.

(a) Audits and investigations are official examinations of books, records, documents, other writings, and information to ensure that the provisions of the DPA and other applicable statutes, this part, and official actions have been properly followed. An audit or investigation may also include interviews and a systems evaluation to detect problems or failures in the implementation of this part.

(b) When undertaking an audit or investigation, HHS shall:

(1) Define the scope and purpose in the official action given to the person under investigation; and

(2) Have ascertained that the information sought, or other adequate and authoritative data are not available from any Federal or other responsible agency.

(c) In administering this part, HHS may issue the following documents that constitute official actions:

(1) *Administrative Subpoenas.* An Administrative Subpoena requires a person to appear as a witness before an official designated by HHS to testify under oath on matters of which that person has knowledge relating to the enforcement or the administration of the DPA and other applicable statutes, this part, or official actions. An Administrative Subpoena may also require the production of books, papers, records, documents and physical objects or property.

(2) *Demands for Information.* A Demand for Information requires a person to furnish to a duly authorized representative of HHS any information necessary or appropriate to the enforcement or the administration of the DPA and other applicable statutes, this part, or official actions.

(3) *Inspection Authorizations.* An Inspection Authorization requires a person to permit a duly authorized representative of HHS to interview the person's employees or agents, to inspect books, records, documents, other writings, and information, including electronically-stored information, in the person's possession or control at the place where that person usually keeps them or otherwise, and to inspect a person's property when such interviews and inspections are necessary or appropriate to the enforcement or the administration of the DPA and related statutes, this part, or official actions.

(d) The production of books, records, documents, other writings, and information will not be required at any place other than where they are usually kept, if, prior to the return date specified in the Administrative Subpoena or Demand for Information, a duly authorized official of HHS is furnished with copies of such material that are certified under oath to be true copies. As an alternative, a duly authorized representative of HHS may enter into a stipulation with a person as to the content of the material.

(e) An Administrative Subpoena, Demand for Information, or Inspection Authorization shall include the name, title, or official position of the person to be served, the evidence sought to be adduced, and its general relevance to the scope and purpose of the audit, investigation, or other inquiry. If employees or agents are to be interviewed; if books, records,

documents, other writings, or information are to be produced; or if property is to be inspected; the Administrative Subpoena, Demand for Information, or Inspection Authorization will describe them with particularity.

(f) Service of documents shall be made in the following manner:

(1) Service of a Demand for Information or Inspection Authorization shall be made personally, or by Certified Mail-Return Receipt Requested at the person's last known address. Service of an Administrative Subpoena shall be made personally. Personal service may also be made by leaving a copy of the document with someone at least 18 years old at the person's last known dwelling or place of business.

(2) Service upon other than an individual may be made by serving a partner, corporate officer, or a managing or general agent authorized by appointment or by law to accept service of process. If an agent is served, a copy of the document shall be mailed to the person named in the document.

(3) Any individual 18 years of age or over may serve an Administrative Subpoena, Demand for Information, or Inspection Authorization. When personal service is made, the individual making the service shall prepare an affidavit as to the manner in which service was made and the identity of the person served, and return the affidavit, and in the case of subpoenas, the original document, to the issuing officer. In case of failure to make service, the reasons for the failure shall be stated on the original document.

§ 101.72 Compulsory process.

(a) If a person refuses to permit a duly authorized representative of HHS to have access to any premises or to the source of information necessary to the administration or the enforcement of the DPA and other applicable statutes, this part, or official actions, HHS, through its authorized representative may seek compulsory process. Compulsory process means the institution of appropriate legal action, including ex parte application for an inspection warrant or its equivalent, in any forum of appropriate jurisdiction.

(b) Compulsory process may be sought in advance of an audit, investigation, or other inquiry, if, in the judgment of the Secretary there is reason to believe that a person will refuse to permit an audit, investigation, or other inquiry, or that other circumstances exist which make such process desirable or necessary.

§ 101.73 Notification of failure to comply.

(a) At the conclusion of an audit, investigation, or other inquiry, or at any other time, HHS may inform the person in writing of HHS' position regarding that person's non-compliance with the requirements of the DPA and other applicable statutes, this part, or an official action.

(b) In cases where HHS determines that failure to comply with the provisions of the DPA and other applicable statutes, this part, or an official action was inadvertent, the person may be informed in writing of the particulars involved and the corrective action to be taken. Failure to take corrective action may then be construed as a willful violation of the DPA and other applicable statutes, this part, or an official action.

§ 101.74 Violations, penalties, and remedies.

(a) Willful violation of the provisions of the DPA, and related statutes (when applicable), this part, or an official action, is a crime and upon conviction, a person may be punished by fine or imprisonment, or both. The maximum penalties provided by the DPA are a $10,000 fine, or one year in prison, or both.

(b) The Government may also seek an injunction from a court of appropriate jurisdiction to prohibit the continuance of any violation of, or to enforce compliance with, the DPA, this part, or an official action.

(c) In order to secure the effective enforcement of the DPA and other applicable statutes, this part, and official actions, the following are prohibited:

(1) No person may solicit, influence, or permit another person to perform any act prohibited by, or to omit any act required by, the DPA and other applicable statutes, this part, or an official action.

(2) No person may conspire or act in concert with any other person to perform any act prohibited by, or to omit any act required by, the DPA and other applicable statutes, this part, or an official action.

(3) No person shall deliver any item if the person knows or has reason to believe that the item will be accepted, redelivered, held, or used in violation of the DPA and other applicable statutes, this part, or an official action. In such instances, the person must immediately notify HHS that, in accordance with this provision, delivery has not been made.

§ 101.75 Compliance conflicts.

If compliance with any provision of the DPA and other applicable statutes, this part, or an official action would prevent a person from filling a rated order or from complying with another provision of the DPA and other applicable statutes, this part, or an official action, the person must immediately notify HHS, as specified in § 101.93, for resolution of the conflict.

Subpart H—Adjustments, Exceptions, and Appeals

§ 101.80 Adjustments or exceptions.

(a) A person may submit a request to HHS for an adjustment or exception on the ground that:

(1) A provision of this part or an official action results in an undue or exceptional hardship on that person not suffered generally by others in similar situations and circumstances; or

(2) The consequences of following a provision of this part or an official action are contrary to the intent of the DPA and other applicable statutes, or this part.

(b) Each request for adjustment or exception must be in writing and contain a complete statement of all the facts and circumstances related to the provision of this part or official action from which adjustment is sought and a full and precise statement of the reasons why relief should be provided.

(c) The submission of a request for adjustment or exception shall not relieve any person from the obligation of complying with the provision of this part or official action in question while the request is being considered unless such interim relief is granted in writing by the Secretary or the Secretary's designated representative.

(d) A decision of the Secretary or the Secretary's designated representative under this section may be appealed to the Secretary. (For information on the appeal procedure, see § 101.81.)

§ 101.81 Appeals.

(a) Any person whose request for adjustment or exception was denied by the Secretary or the Secretary's designated representative under § 101.80, may appeal to the Secretary who, through the Secretary's designated representative, shall review and reconsider the denial.

(b)(1) Except as provided in paragraph (b)(2) of this section, an appeal must be received by the Secretary no later than 45 business days after receipt of a written notice of denial. After this 45-business day period, an appeal may be accepted at the discretion of the Secretary.

(2) For requests for adjustment or exception involving rated orders placed for the purpose of emergency

preparedness (see § 101.33(e)), an appeal must be received by the Secretary, no later than 15 business days after receipt of a written notice of denial. Contract performance under the order shall not be stayed pending resolution of the appeal.

(c) Each appeal must be in writing and contain a complete statement of all the facts and circumstances related to the action appealed from and a full and precise statement of the reasons the decision should be modified or reversed.

(d) In addition to the written materials submitted in support of an appeal, an appellant may request, in writing, an opportunity for an informal hearing. This request may be granted or denied at the discretion of the Secretary or the Secretary's designated representative.

(e) When a hearing is granted, the Secretary may designate an HHS employee to act as the Secretary's representative and hearing officer to conduct the hearing and to prepare a report. The hearing officer shall determine all procedural questions and impose such time or other limitations deemed reasonable. In the event that the hearing officer decides that a printed transcript is necessary, all expenses shall be borne by the appellant.

(f) When determining an appeal, the Secretary may consider all information submitted during the appeal as well as any recommendations, reports, or other relevant information and documents available to HHS or consult with any other persons or groups.

(g) The submission of an appeal under this section shall not relieve any person from the obligation of complying with the provision of this part or official action in question while the appeal is being considered unless such relief is granted in writing by the Secretary.

Subpart I—Miscellaneous Provisions

§ 101.90 Protection against claims.

A person shall not be held liable for damages or penalties for any act or failure to act resulting directly or indirectly from compliance with any provision of this part, or an official action, notwithstanding that such provision or action shall subsequently be declared invalid by judicial or other competent authority.

§ 101.91 Records and reports.

(a) Persons are required to make and preserve for at least three years, accurate and complete records of any transaction covered by this part or an official action.

(b) Records must be maintained in sufficient detail to permit the determination, upon examination, of whether each transaction complies with the provisions of this part or any official action. However, this part does not specify any method or system to be used.

(c) Records required to be maintained by this part must be made available for examination on demand by duly authorized representatives of HHS as provided in § 101.71.

(d) In addition, persons must develop, maintain, and submit any other records and reports to HHS that may be required for the administration of the DPA and other applicable statutes, and this part.

(e) DPA section 705(d), as implemented by E.O. 13603, provides that information obtained under this section which the Secretary deems confidential, or with reference to which a request for confidential treatment is made by the person furnishing such information, shall not be published or disclosed unless the Secretary determines that the withholding of this information is contrary to the interest of the national defense. Information required to be submitted to HHS in connection with the enforcement or administration of the DPA, this part, or an official action, is deemed to be confidential under DPA section 705(d) and shall be handled in accordance with applicable Federal law.

§ 101.92 Applicability of this part and official actions.

(a) This part and all official actions, unless specifically stated otherwise, apply to transactions in any state, territory, or possession of the United States and the District of Columbia.

(b) This part and all official actions apply not only to deliveries to other persons but also include deliveries to affiliates and subsidiaries of a person and deliveries from one branch, division, or section of a single entity to another branch, division, or section under common ownership or control.

(c) This part shall not be construed to affect any administrative actions taken by HHS, or any outstanding contracts or orders placed pursuant to any of the regulations, orders, schedules, or delegations of authority previously issued by HHS pursuant to authority granted to HHS, by the President under the DPA and E.O. 13603. Such actions, contracts, or orders shall continue in full force and effect under this part unless modified or terminated by proper authority.

§ 101.93 Communications.

All communications concerning this part, including requests for copies of the part and explanatory information, requests for guidance or clarification, and requests for adjustment or exception shall be addressed to the Administration for Strategic Preparedness and Response, U.S. Department of Health and Human Services, Washington, DC 20201. Ref: HRPAS, or email *aspr.dpa@hhs.gov*.

Civil Penalties Adjustment for 2024

AGENCY: National Endowment for the Arts, National Foundation on the Arts and the Humanities.

ACTION: Final rule.

SUMMARY: The National Endowment for the Arts (NEA) is adjusting the maximum civil monetary penalties (CMPs) that may be imposed for violations of the Program Fraud Civil Remedies Act (PFCRA) and the NEA's Restrictions on Lobbying to reflect the requirements of the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (the 2015 Act). The 2015 Act further amended the Federal Civil Penalties Inflation Adjustment Act of 1990 (the Inflation Adjustment Act) to improve the effectiveness of civil monetary penalties and to maintain their deterrent effect. This final rule provides the 2024 annual inflation adjustments to the initial ''catch-up'' adjustments made on June 15, 2017, and reflects all other inflation adjustments made in the interim.

DATES: This rule is effective February 9, 2024.

FOR FURTHER INFORMATION CONTACT: Daniel Fishman, Assistant General Counsel, National Endowment for the Arts, 400 7th St. SW, Washington, DC 20506, Telephone: 202–682–5418.

SUPPLEMENTARY INFORMATION:

1. Background

On December 12, 2017 the NEA issued a final rule entitled ''Federal Civil Penalties Adjustments'' [1] which finalized the NEA's June 15, 2017 interim final rule entitled ''Implementing the Federal Civil Penalties Adjustment Act Improvements Act'',[2] implementing the 2015 Act (section 701 of Pub. L. 114–74), which amended the Inflation Adjustment Act (28 U.S.C. 2461 note) requiring catch-up and annual adjustments to the NEA's CMPs. The 2015 Act requires agencies make annual adjustments to its CMPs for inflation.

A CMP is defined in the Inflation Adjustment Act as any penalty, fine, or other sanction that is (1) for a specific monetary amount as provided by Federal law, or has a maximum amount provided for by Federal law; (2) assessed or enforced by an agency pursuant to Federal law; and (3) assessed or enforced pursuant to an administrative proceeding or a civil action in the Federal courts.

These annual inflation adjustments are based on the percentage change in the Consumer Price Index for all Urban Consumers (CPI–U) for the month of October preceding the date of the adjustment, relative to the October CPI–U in the year of the previous adjustment. The formula for the amount of a CMP inflation adjustment is prescribed by law, as explained in OMB Memorandum M–16–06 (February 24, 2016), and therefore the amount of the adjustment is not subject to the exercise of discretion by the Chairman of the National Endowment for the Arts (Chairman).

The Office of Management and Budget has issued guidance on implementing and calculating the 2024 adjustment under the 2015 Act.[3] Per this guidance, the CPI–U adjustment multiplier for this annual adjustment is 1.03241. In its prior rules, the NEA identified two CMPs, which require adjustment: the penalty for false statements under the PFCRA and the penalty for violations of the NEA's Restrictions on Lobbying. With this rule, the NEA is adjusting the amount of those CMPs accordingly.

2. Dates of Applicability

The inflation adjustments contained in this rule shall apply to any violations assessed after January 15, 2024.

3. Adjustments

Two CMPs in NEA regulations require adjustment in accordance with the 2015 Act: (1) the penalty associated with the Program Fraud Civil Remedies Act (45 CFR 1149.9) and (2) the penalty associated with Restrictions on Lobbying (45 CFR 1158.400; 45 CFR part 1158, app. A).

A. Adjustments to Penalties Under the NEA's Program Fraud Civil Remedies Act Regulations

The current maximum penalty under the PFCRA for false claims and statements is currently set at $13,507. The post-adjustment penalty or range is obtained by multiplying the pre-adjustment penalty or range by the percent change in the CPI–U over the relevant time period and rounding to the nearest dollar. Between October 2022 and October 2023, the CPI–U increased by a multiplier of 103.241%. Therefore, the new post-adjustment maximum penalty under the PFCRA for false statements is $13,507 × 1.03241 = $13,944.76 which rounds to $13,945. Therefore, the maximum penalty under the PFCRA for false claims and statements will be $13,945.

B. Adjustments to Penalties Under the NEA's Restrictions on Lobbying Regulations

The penalty for violations of the Restrictions on Lobbying is currently set at a range of a minimum of $23,714 and a maximum of $237,268. The post-adjustment penalty or range is obtained by multiplying the pre-adjustment penalty or range by the percent change in the CPI–U over the relevant time period and rounding to the nearest dollar. Between October 2022 and October 2023, the CPI–U increased by a multiplier of 103.241%. Therefore, the new post-adjustment minimum penalty under the Restrictions on Lobbying is $23,714 × 1.03241 = $24,482.57074, which rounds to $24,483 and the maximum penalty under the Restrictions on Lobbying is $237,268 × 1.03241 = $244,957.86, which rounds to $244,958. Therefore, the range of penalties under the law on the Restrictions on Lobbying shall be between $24,483 and $244,958.

Administrative Procedure Act

Section 553 of the Administrative Procedure Act requires agencies to provide an opportunity for notice and comment on rulemaking and also requires agencies to delay a rule's effective date for 30 days following the date of publication in the **Federal Register** unless an agency finds good cause to forgo these requirements. However, section 4(b)(2) of the 2015 Act requires agencies to adjust civil monetary penalties notwithstanding section 553 of the Administrative Procedure Act (APA) and publish annual inflation adjustments in the **Federal Register**. ''This means that the public procedure the APA generally requires . . . is not required for agencies to issue regulations implementing the annual adjustment.'' OMB Memorandum M–18–03.

Even if the 2015 Act did not except this final rule from section 553 of the APA, the NEA has good cause to dispense with notice and comment. Section 553(b)(B), authorizes agencies to

[1] 82 FR 58348.

[2] 82 FR 27431.

[3] OMB Memorandum M–24–07 (December 19, 2023).

dispense with notice and comment procedures for rulemaking if the agency finds good cause that notice and comment are impracticable, unnecessary, or contrary to public interest. The annual adjustments to civil penalties for inflation and the method of calculating those adjustments are established by section 5 of the 2015 Act, as amended, leaving no discretion for the NEA. Accordingly, public comment would be impracticable because the NEA would be unable to consider such comments in the rulemaking process.

Regulatory Planning and Review (Executive Order 12866)

Executive Order 12866 (E.O. 12866) established a process for review of rules by the Office of Information and Regulatory Affairs, which is within the Office of Management and Budget (OMB). Only ''significant'' proposed and final rules are subject to review under this Executive Order. ''Significant,'' as used in E.O. 12866, means ''economically significant.'' It refers to rules with (1) an impact on the economy of $100 million; or that (2) were inconsistent or interfered with an action taken or planned by another agency; (3) materially altered the budgetary impact of entitlements, grants, user fees, or loan programs; or (4) raised novel legal or policy issues.

This final rule would not be a significant policy change and OMB has not reviewed this final rule under E.O. 12866. The NEA has made the assessments required by E.O. 12866 and determined that this final rule: (1) will not have an effect of $100 million or more on the economy; (2) will not adversely affect in a material way the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or Tribal governments or communities; (3) will not create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (4) does not alter the budgetary effects of entitlements, grants, user fees, or loan programs or the rights or obligations of their recipients; and (5) does not raise novel legal or policy issues.

Federalism (Executive Order 13132)

This final rule does not have federalism implications, as set forth in E.O. 13132. As used in this order, federalism implications mean ''substantial direct effects on the States, on the relationship between the [N]ational [G]overnment and the States, or on the distribution of power and responsibilities among the various levels of government.'' The NEA has determined that this final rule will not have federalism implications within the meaning of E.O. 13132.

Civil Justice Reform (Executive Order 12988)

This final rule meets the applicable standards set forth in section 3(a) and 3(b)(2) of E.O. 12988. Specifically, this final rule is written in clear language designed to help reduce litigation.

Indian Tribal Governments (Executive Order 13175)

Under the criteria in E.O. 13175, the NEA has evaluated this final rule and determined that it would have no potential effects on Federally recognized Indian Tribes.

Takings (Executive Order 12630)

Under the criteria in E.O. 12630, this final rule does not have significant takings implications. Therefore, a takings implication assessment is not required.

Regulatory Flexibility Act of 1980 (5 U.S.C. 605(b))

This final rule will not have a significant adverse impact on a substantial number of small entities, including small businesses, small governmental jurisdictions, or certain small not-for-profit organizations.

Paperwork Reduction Act of 1995 (44 U.S.C., Chapter 35)

This final rule will not impose any ''information collection'' requirements under the Paperwork Reduction Act. Under the Act, information collection means the obtaining or disclosure of facts or opinions by or for an agency by 10 or more nonfederal persons.

Unfunded Mandates Act of 1995 (Section 202, Pub. L. 104–4)

This final rule does not contain a Federal mandate that will result in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector of $100 million or more in any one year.

National Environmental Policy Act of 1969 (5 U.S.C. 804)

The final rule will not have a significant effect on the human environment.

Small Business Regulatory Enforcement Fairness Act of 1996 (Sec. 804, Pub. L. 104–121)

This final rule would not be a major rule as defined in section 804 of the Small Business Regulatory Enforcement Fairness Act of 1996. This final rule will not result in an annual effect on the economy of $100 million or more, a major increase in costs or prices, significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based companies to compete with foreign based companies in domestic and export markets.

E-Government Act of 2002 (44 U.S.C. 3504)

Section 206 of the E-Government Act requires agencies, to the extent practicable, to ensure that all information about that agency required to be published in the **Federal Register** is also published on a publicly accessible website. All information about the NEA required to be published in the **Federal Register** may be accessed at *https://www.arts.gov.* This Act also requires agencies to accept public comments on their rules ''by electronic means.'' See heading ''Public Participation'' for directions on electronic submission of public comments on this final rule.

Finally, the E-Government Act requires, to the extent practicable, that agencies ensure that a publicly accessible Federal Government website contains electronic dockets for rulemakings under the Administrative Procedure Act of 1946 (5 U.S.C. 551 *et seq.*). Under this Act, an electronic docket consists of all submissions under section 553(c) of title 5, United States Code; and all other materials that by agency rule or practice are included in the rulemaking docket under section 553(c) of title 5, United States Code, whether or not submitted electronically. The website *https://www.regulations.gov* contains electronic dockets for the NEA's rulemakings under the Administrative Procedure Act of 1946.

Plain Writing Act of 2010 (5 U.S.C. 301)

Under this Act, the term ''plain writing'' means writing that is clear, concise, well-organized, and follows other best practices appropriate to the subject or field and intended audience. To ensure that this final rule has been written in plain and clear language so that it can be used and understood by the public, the NEA has modeled the language of this final rule on the Federal Plain Language Guidelines.

Public Participation (Executive Order 13563)

The NEA encourages public participation by ensuring its documentation is understandable by the general public, and has written this final rule in compliance with Executive Order 13563 by ensuring its accessibility, consistency, simplicity of language, and overall comprehensibility.

List of Subjects in 45 CFR Parts 1149 and 1158

Administrative practice and procedure, Government contracts, Grant programs, Loan programs, Lobbying, Penalties.

For the reasons stated in the preamble, the NEA amends 45 CFR chapter XI, subchapter B, as follows:

PART 1149—PROGRAM FRAUD CIVIL REMEDIES ACT REGULATIONS

■ 1. The authority citation for part 1149 continues to read as follows:

Authority: 5 U.S.C. App. 8G(a)(2); 20 U.S.C. 959; 28 U.S.C. 2461 note; 31 U.S.C. 3801–3812.

§ 1149.9 [Amended]

■ 2. In § 1149.9 amend paragraph (a)(1) b removing the amount ''$13,507'' and adding in its place the amount ''$13,945''.

PART 1158—NEW RESTRICTIONS ON LOBBYING

■ 3. The authority citation for part 1158 continues to read as follows:

Authority: 20 U.S.C. 959; 28 U.S.C. 2461; 31 U.S.C. 1352.

§ 1158.400 [Amended]

■ 4. In § 1158.400 amend paragraphs (a), (b), and (e) by:
■ a. Removing the amount ''$23,714'' and adding in its place the amount ''$24,483'' wherever it appears; and
■ b. Removing the amount ''$237,268'' and adding in its place the amount ''$244,958'' wherever it appears.

Appendix A to Part 1158 [Amended]

■ 5. Amend appendix A to part 1158 by:
■ a. Removing the amount ''$23,714'' and adding in its place the amount ''$24,483'' wherever it appears.
■ b. Removing the amount ''$237,268'' and adding in its place the amount ''$244,958'' wherever it appears.

Dated: January 10, 2024.

Daniel Beattie,

Director of Guidelines and Panel Operations.

46 CFR Part 401

[Docket No. USCG–2023–0438]

RIN 1625–AC89

Great Lakes Pilotage Rates—2024 Annual Review

AGENCY: Coast Guard, DHS.

ACTION: Final rule.

SUMMARY: In accordance with the statutory provisions enacted by the Great Lakes Pilotage Act of 1960, the Coast Guard is issuing new pilotage rates for the 2024 shipping season. This rule adjusts the pilotage rates to account for changes in district operating expenses, an increase in the number of pilots, and anticipated inflation. These changes, when combined, result in a 7-percent net increase in pilotage costs compared to the 2023 season.

DATES: This final rule is effective March 11, 2024.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *www.regulations.gov,* type USCG–2023–0438 in the search box and click ''Search.'' Next, in the Document Type column, select ''Supporting & Related Material.''

FOR FURTHER INFORMATION CONTACT: For information about this document, call or email Mr. Brian Rogers, Commandant, Office of Waterways and Ocean Policy—Great Lakes Pilotage Division (CG–WWM–2), Coast Guard; telephone 410–360–9260, email *Brian.Rogers@uscg.mil.*

II. Executive Summary

In accordance with Title 46 of the United States Code (U.S.C.), Chapter 93,[1] the Coast Guard regulates pilotage for oceangoing vessels on the Great Lakes and St. Lawrence Seaway—including setting the rates for pilotage services and adjusting them on an annual basis for the upcoming shipping season. The shipping season begins when the locks open in the St. Lawrence Seaway, which allows traffic access to and from the Atlantic Ocean. The opening of the locks varies annually, depending on waterway conditions, but is generally in March or April. The rates, which for the 2024 season range from $430 to $927 per pilot hour (depending on which of the specific 6 areas pilotage service is provided), are paid by shippers to the pilot associations. The three pilot associations, which are the exclusive U.S. source of registered pilots on the Great Lakes, use this revenue to cover operating expenses, maintain infrastructure, compensate apprentice and registered pilots, acquire and implement technological advances, train new personnel, and provide for continuing professional development. These rates are the foundation for safe, efficient, and reliable pilotage service to facilitate maritime commerce, protect the marine environment, and comply with National Transportation Safety Board recommendations regarding staffing and pilot fatigue.

In accordance with statutory and regulatory requirements, the Coast Guard employs the ratemaking methodology introduced in 2016 [2] and last updated in 2022.[3] Our ratemaking methodology calculates the revenue needed for each pilotage association (operating expenses, compensation for the number of pilots, and anticipated inflation), and then divides that amount by the expected demand for pilotage services over the course of the coming year to produce an hourly rate. This is a 10-step methodology to calculate rates, which is explained in detail in section VI., Summary of the Ratemaking Methodology, in the preamble to this rule.

In this final rule, we conduct our annual review and interim adjustment to the base pilotage rates for 2024. The Coast Guard last conducted a full ratemaking in 2023, with the ''Great Lakes Pilotage Rates—2023 Annual Ratemaking and Review of Methodology'' final rule (hereafter the ''2023 final rule'') (88 FR 12226, published February 27, 2023).[4] Per title 46 of the Code of Federal Regulations (CFR), section 404.100(b), via this final rule, the Coast Guard's Director of the Great Lakes Pilotage (''the Director'') establishes base pilotage rates by an interim ratemaking pursuant to §§ 404.101 through 404.110.

The Coast Guard sets base rates to meet the goal of promoting safe, efficient, and reliable pilotage service on the Great Lakes by generating sufficient revenue for each pilotage association to reimburse its necessary and reasonable operating expenses, fairly compensate trained and rested pilots, and provide appropriate funds to use for improvements. A 10-year average is used when calculating traffic to smooth out anomalies caused by unexpected events, such as those caused by the COVID–19 pandemic. The Coast Guard estimates that this rule will result in $2,621,471 of additional costs. This represents an increase in revenue needed for target pilot compensation, an increase in revenue needed for the total apprentice pilot wage benchmark, an increase in the revenue needed for adjusted operating expenses, and an increase in the revenue needed for the working capital fund.

Based on the ratemaking model discussed in this final rule, the Coast Guard is establishing the rates shown in table 1.

TABLE 1—CURRENT AND 2024 PILOTAGE RATES ON THE GREAT LAKES

Area	Name	Final 2023 pilotage rate	Final 2024 pilotage rate
District One: Designated	St. Lawrence River	$876	$927
District One: Undesignated	Lake Ontario	586	608
District Two: Designated	Navigable waters from Southeast Shoal to Port Huron, MI.	601	667
District Two: Undesignated	Lake Erie	704	597
District Three: Designated	St. Mary's River	834	836
District Three: Undesignated	Lakes Huron, Michigan, and Superior	410	430

This rule affects 58 U.S. Registered pilots, 6 apprentice pilots, 3 pilot associations, and the owners and operators of an average of 296 oceangoing vessels that transit the Great Lakes annually. This rule will not affect the Coast Guard's budget or increase Federal spending. The estimated overall annual regulatory economic impact of this rate change is a net increase of $2,621,471 in estimated payments made by shippers during the 2024 shipping season. This rule establishes the 2024 yearly target compensation for pilots on the Great Lakes at $440,658 per pilot (a $16,260 increase, or 3.83 percent, over their 2023 target compensation). Because the Coast Guard must review, and, if necessary, adjust rates each year, we analyze these as single-year costs and do not annualize them over 10 years. Section X., Regulatory Analyses, in this preamble provides the regulatory impact analyses of this rule.

III. Basis and Purpose

The legal basis of this rulemaking is 46 U.S.C. Chapter 93,[5] which requires foreign merchant vessels and United States vessels operating ''on register'' (meaning United States vessels engaged in foreign trade) to use United States or Canadian pilots while transiting the United States waters of the St. Lawrence Seaway and the Great Lakes system.[6] For U.S. Great Lakes pilots, the statute requires the Secretary to ''prescribe by

[5] 46 U.S.C. 9301–9308.
[6] 46 U.S.C. 9302(a)(1).

regulation rates and charges for pilotage services, giving consideration to the public interest and the costs of providing the services.'' [7] The statute requires that rates be established or reviewed and adjusted each year, no later than March 1.[8] The statute also requires that base rates be established by a full ratemaking at least once every 5 years, and, in years when base rates are not established, they must be reviewed and, if necessary, adjusted.[9] The Secretary's duties and authority under 46 U.S.C. Chapter 93 have generally been delegated to the Coast Guard.[10]

Each pilot association is an independent business and is the sole provider of pilotage services in its district of operation. Each pilot association is responsible for funding its own operating expenses, maintaining infrastructure, compensating pilots and apprentice pilots,[11] acquiring and implementing technological advances, and training personnel and partners.

The Coast Guard uses a 10-step ratemaking methodology to derive a pilotage rate, based on the estimated amount of traffic, which covers these expenses.[12] The methodology is designed to measure how much revenue each pilotage association would need to cover expenses and to provide compensation to registered pilots. Since the Coast Guard cannot guarantee demand for pilotage services, target pilot compensation for registered pilots is a goal. The actual demand for service dictates the actual compensation for the registered pilots. We then divide that amount by the historic 10-year average for pilotage demand. We recognize that, in years where traffic is above average, pilot associations will accrue more revenue than projected while, in years where traffic is below average, they will take in less. We believe that, over the long term, however, this system ensures that infrastructure will be maintained, and that pilots will receive adequate compensation and work a reasonable number of hours, with adequate rest between assignments, to ensure retention of highly trained personnel.

The purpose of this rule is to issue new pilotage rates for the 2024 shipping season. The Coast Guard believes that the new rates will continue to promote our goal, as outlined in 46 CFR 404.1, of promoting safe, efficient, and reliable pilotage service to facilitate commerce and protect the marine environment in the Great Lakes by generating sufficient revenue for each pilotage association to reimburse its necessary and reasonable operating expenses, fairly compensate trained and rested pilots, and provide appropriate funds to use for improvements.

IV. Background

Pursuant to 46 U.S.C. 9303, the Coast Guard regulates shipping practices and rates on the Great Lakes. Under Coast Guard regulations, all vessels engaged in foreign trade (often referred to as ''salties'') are required to engage United States or Canadian pilots during their transit through the regulated waters.[13] United States and Canadian ''lakers,'' which account for most commercial shipping on the Great Lakes, are not affected.[14] Generally, vessels are assigned a United States or Canadian pilot, depending on the order in which they transit a particular area of the Great Lakes, and do not choose the pilot they receive. If a vessel is assigned a U.S. pilot, that pilot will be assigned by the pilotage association responsible for the district in which the vessel is operating, and the vessel operator will pay the pilotage association for the pilotage services. The Great Lakes Pilotage Authority (Canadian) (GLPA) establishes the rates for Canadian registered pilots.

The waters of the Great Lakes and the St. Lawrence Seaway subject to U.S. jurisdiction are divided into three pilotage districts. Pilotage in each district is provided by an association certified by the Director to operate a pilotage pool. The Saint Lawrence Seaway Pilotage Association (SLSPA) provides pilotage services in District One, which includes all waters of the St. Lawrence River and Lake Ontario subject to U.S. jurisdiction. The Lakes Pilots Association (LPA) provides pilotage services in District Two, which includes all waters of Lake Erie, the Detroit River, Lake St. Clair, and the St. Clair River subject to U.S. jurisdiction. Finally, the Western Great Lakes Pilots Association (WGLPA) provides pilotage services in District Three, which includes all waters of the St. Mary's River; Sault Ste. Marie Locks; and Lakes Huron, Michigan, and Superior subject to U.S. jurisdiction.

Each pilotage district is further divided into ''designated'' and ''undesignated'' areas, depicted in table 2. Designated areas, classified as such by Presidential Proclamation, are waters in which pilots must direct the navigation of vessels at all times.[15] Undesignated areas are open bodies of water not subject to the same pilotage requirements. While working in undesignated areas, pilots must ''be on board and available to direct the navigation of the vessel at the discretion of and subject to the customary authority of the master.'' [16] For these reasons, pilotage rates in designated areas can be significantly higher than those in undesignated areas. Table 2 shows the districts and areas of the Great Lakes and St. Lawrence Seaway.

TABLE 2—AREAS OF THE GREAT LAKES AND ST. LAWRENCE SEAWAY

District	Pilotage association	Designation	Area No.[17]	Area name[18]
One	Saint Lawrence Seaway Pilotage Association (SLSPA).	Designated	1	St. Lawrence River.
		Undesignated	2	Lake Ontario.
Two	Lakes Pilots Association (LPA)	Designated	5	Navigable waters from Southeast Shoal to Port Huron, MI.
		Undesignated	4	Lake Erie.

Three	Western Great Lakes Pilots Association (WGLPA).	Designated	7	St. Mary's River.
		Undesignated ...	6	Lakes Huron and Michigan.
		Undesignated ...	8	Lake Superior.

Over the past several years, the Coast Guard has adjusted the Great Lakes pilotage ratemaking methodology, per our authority in 46 U.S.C. 9303(f), to conduct annual reviews of base pilotage rates, and to adjust such base rates in each intervening year in consideration of the public interest and the costs of providing the services. The current methodology was finalized in the 2022 final rule.[19] We summarize the current methodology in section VI., Summary of the Ratemaking Methodology.

V. Discussion of Comments and Changes

In response to the notice of proposed rulemaking (NPRM) for this ratemaking (88 FR 55629, August 16, 2023) the Coast Guard received six comment submissions. These submissions include one comment filed jointly by the LPA, the SLSPA, and the WGLPA; one filed jointly by the Shipping Federation of Canada, the American Great Lakes Ports Association, and the United States Great Lakes Shipping Association (collectively, the Coalition); one from the president of the Saint Lawrence Seaway Pilots' Association (SLSPA); one from the president of the LPA; one from the Director of the Port of Monroe; and one from the president of the International Longshoreman Association (ILA).

As each of these commenters touched on numerous issues, for each response below, the Coast Guard notes which commenter raised the specific points addressed. In situations where multiple commenters raised similar issues, the Coast Guard provides one response to those issues.

A. Requests for Additional Pilots

One of the major requests made by the commenters was the addition of more pilots due to the increase in traffic, with several commenters pointing to cruise ship traffic as the driving force in the surge of vessels needing pilotage service. District One stated they estimate a need for three new pilots by 2025, and Districts Two and Three requested one additional pilot each to be added to this rulemaking.

The Coast Guard recognizes District One's need for more pilots going forward, but we believe that this need is addressed by the inclusion of an additional apprentice pilot as proposed in the NPRM. Added to the two existing apprentice pilots that were authorized in the 2023 ratemaking, this inclusion brings the total number of apprentice pilots in District One to three for the 2024 season. These apprentice pilots will be able to accommodate District One's projected need for three additional fully registered pilots for the 2025 season. The Coast Guard will, therefore, keep the pilot numbers for District One the same as they were in the proposed rule.

The LPA, WGLPA, ILA, and Capt. Paul C. Lamarre II all made comments that an additional pilot is needed in both District Two and District Three. After review of the provided documentation, the Coast Guard agrees with these comments. The Coast Guard verified the numbers that LPA provided, which show that another full member pilot is needed to safely provide pilotage service. Based on these comments, our analysis of the increase in demand for pilotage services created by cruise ship traffic,[20] and the unanimous recommendation made by the 2023 Great Lake Pilot Advisory Committee (See transcript, pages 87 and 88), the Coast Guard has added an additional pilot to this year's ratemaking for both Districts Two and Three. For District Two, the Coast Guard reduced the number of apprentice pilots from two to one, since the additional pilot referenced earlier will no longer be an apprentice.

B. Bridge Hour Allocation

Numerous commenters noted discrepancies in the allocation of bridge hours between designated and undesignated waters for all three districts. The error occurs in the ''area'' field of the data extract provided by the associations, where each trip number is only labeled with the area in which the trip started, rather than noting each area that the trip passed through. This error causes miscalculation of the designated and undesignated bridge hours in Step 7 of the ratemaking methodology, and the transits by vessel class in Step 8. The commenters suggested to instead use monthly reports from SeaPro to provide the necessary bridge hour calculations for Step 7 and to use weight factor reports from SeaPro to provide the transits by vessel class for Step 8.

The Coast Guard agrees with these comments and has worked with the pilot associations to correct Steps 7 and 8 using the monthly reports and weight factor reports. The Coast Guard could not verify which trips had been incorrectly attributed to either a designated or undesignated area in the economist extract data set previously provided. The Coast Guard will work with the associations to refine the data extracts provided by the associations to ensure that all fields are correctly specified and interpreted.

The reports used for this final rule are available in the docket. We appreciate the commenters who brought this to our attention and will take measures to ensure this error is corrected in data used in future rulemakings. These corrections are set out in further detail in tables 4 and 5.

C. Methodology

Numerous commenters noted concerns with the methodology by which the Coast Guard calculates this rate. Concerns included that weighting factors should be calculated using bridge hours instead of vessel transits per visit; that the Coast Guard should audit the pilotage program to find operational efficiencies and cost-savings; and that the Coast Guard should conduct an annual look-back at expenses to find cost-savings. These comments are outside the scope of the current rulemaking, which does not modify the ratemaking methodology. The Coast Guard appreciates these comments and encourages the stakeholders to request that they be placed on a future GLPAC agenda for

[17] Area 3 is the Welland Canal, which is serviced exclusively by the Canadian GLPA and, accordingly, is not included in the United States pilotage rate structure.

[18] The areas are listed by name at 46 CFR 401.405. *https://www.ecfr.gov/current/title-46/chapter-III/part-401/subpart-D/section-401.405* (Last accessed 5/17/23).

[19] 87 FR 18488, March 30, 2022.

[20] At least 76 Great Lakes cruises are listed online as scheduled for the 2024 season. Cruises listed at *vikingcruises.com, hl-cruises.com, pearlseacruises.com,* and *us.ponant.com.* (Last accessed 11/29/2023.)

discussion, or to resubmit them during the next full ratemaking in 2027.

D. Miscellaneous

We received a number of comments that we categorized as ''Miscellaneous'' and are best addressed one by one.

A few commenters urged the Coast Guard to continue having GLPAC meetings in person and in front of a stenographer, while another commenter urged the Coast Guard to investigate a hybrid in-person/virtual set up for future GLPAC meetings. These comments are outside the scope of this rule, but the Coast Guard will continue to engage with stakeholders to determine the best way to hold GLPAC meetings.

One commenter asked the Coast Guard to require an anonymous listing of each pilot's compensation in their annual reports. The Coast Guard disagrees with this recommendation. Compensation of individual pilots is not included in the expense base or methodology, and, therefore, we decline to add a regulatory requirement for pilot associations to publicly report the compensation of individual pilots. The Coast Guard does not use the actual earnings or average earnings; instead, we use target pilot compensation (described in Step 4 of the existing methodology), which the Coast Guard has determined to be reasonable and necessary. Because actual salary values are not used in the ratemaking, the Coast Guard believes that a requirement to report pilot compensation is not in the public interest or necessary to provide for the costs of services. Progress toward pilot retention can be reviewed through pilot turnover and the association's ability to promptly fill pilot vacancies for fully registered pilots and apprentice pilots.

Many commenters took the opportunity to recognize the Director's authority to add up to three additional pilots in each District. We agree with these commenters that the Director does have such authority, and, based on these comments and the unanimous recommendation at the 2023 GLPAC meeting, the Coast Guard has agreed to add one pilot each to Districts Two and Three, and one apprentice pilot to District One.

E. Changes to the Proposed Rule

Table 3 summarizes the changes between the 2024 Ratemaking NPRM and this final rule. This table includes changes from the proposed rule that are not based on comments from the NPRM.

TABLE 3—CHANGES BETWEEN PROPOSED RULE AND FINAL RULE

Change	Reasoning
Revise number of pilots in District Two from 16 to 17 and adjust number of apprentice pilots from 2 to 1. Revise number of pilots in District Three from 22 to 23.	An additional pilot will help Districts Two and Three handle an expected increase in cruise ship traffic in 2024.
Correct traffic data in Steps 7 and 8 for all districts to reflect discrepancy in the assignment of bridge hours and transits by vessel class to designated and undesignated areas.	These corrections will improve the accuracy of our ratemaking as it pertains to designated and undesignated areas.
Update inflation figures: • Updates 2022 Employment Cost Index (ECI) inflation from 4.4%, listed in the NPRM, to 3.9% • Updates 2023 Personal Consumption Expenditures (PCE) inflation from 3.5%, listed in the NPRM, to 3.9%. • Updates 2024 PCE inflation from 2.5%, listed in the NPRM, to 2.6%.	More recent figures were published since the Coast Guard conducted the analysis for the NPRM.
Change average vessel population from 277 to 296. Change average customer count from 40 to 41.	In the 2023 final ratemaking, District Three provided updated traffic data that was used to revise bridge hours and transits by vessel class but was not used to update the Regulatory Flexibility Act analysis. This final rule corrects that oversight. The revised data included additional trips that introduced new vessels and customers to the affected population and relabeled the vessel for trip 26879.

F. Changes to Step 7 Bridge Hours and Step 8 Transits

Table 4 shows the difference between the published figures for bridge hours in Step 7 in the NPRM and the updated figures used for this final rule.

TABLE 4—CHANGES TO STEP 7 BRIDGE HOURS FROM PROPOSED RULE TO FINAL RULE

Further, the Coast Guard updated the number of transits by vessel class in Step 8, ''Calculate Average Weighting Factors by Area,'' using updated weighting factor reports provided by the associations from SeaPro. Table 5 details the changes by area and vessel class for 2022, which will be used in this final rule; no changes are made to the 2021 figures.

TABLE 5—CHANGES TO STEP 8 FROM PROPOSED RULE TO FINAL RULE

Class 4	271	306	35

These refinements to the ratemaking continue to promote safe, efficient, and reliable pilotage service on the Great Lakes, and allow each pilotage association to generate sufficient revenue to cover its necessary and reasonable operating expenses, fairly compensate trained and rested pilots, and realize an appropriate revenue to use for improvements.

VI. Summary of the Ratemaking Methodology

As stated previously, the ratemaking methodology, outlined in 46 CFR 404.101 through 404.110, consists of 10 steps that are designed to account for the revenues needed and total traffic

expected in each district. The first several steps of the methodology establish base pilotage rates. Additional steps to incorporate the weighting factors are necessary to establish the final pilot rates. The result is an hourly rate, determined separately for each of the areas administered by the Coast Guard.

In Step 1, ''Recognize previous operating expenses,'' (§ 404.101), the Director reviews audited operating expenses from each of the three pilotage associations. Operating expenses include all allowable expenses, minus wages and benefits. This number forms the baseline amount that each association is budgeted. Because of the time delay between when the association submits raw numbers and when the Coast Guard receives audited numbers, this number is 3 years behind the projected year of expenses. Therefore, in calculating the 2024 rates in this rule, we begin with the audited expenses from the 2021 shipping season.

While each pilotage association operates in an entire district (including both designated and undesignated areas), the Coast Guard determines costs by area. We allocate certain operating expenses to designated areas and certain operating expenses to undesignated areas. In some cases, we can allocate the costs based on where they are accrued. For example, we can allocate the costs of insurance for apprentice pilots who operate in undesignated areas only. In other situations, such as general legal expenses, expenses are distributed between designated and undesignated waters on a *pro rata* basis, based upon the proportion of income forecasted from the respective portions of the district.

In Step 2, ''Project operating expenses, adjusting for inflation or deflation,'' (§ 404.102), the Director develops the 2024 projected operating expenses. To do this, we apply inflation adjustors for 3 years to the operating expense baseline received in Step 1. The inflation factors are from the Bureau of Labor Statistics' (BLS) Consumer Price Index (CPI) for the Midwest Region, or, if not available, the Federal Open Market Committee (FOMC) median economic projections for Personal Consumption Expenditures (PCE) inflation. This step produces the total operating expenses for each area and district.

In Step 3, ''Estimate number of registered pilots and apprentice pilots,'' (§ 404.103), the Director calculates how many registered and apprentice pilots, including apprentice pilots with limited registrations, are needed for each district. To do this, we employ a ''staffing model,'' described in § 401.220, paragraphs (a)(1) through (3), to estimate how many pilots would be needed to handle shipping during the beginning and close of the season. This number provides guidance to the Director in approving an appropriate number of pilots.

For the purpose of the ratemaking calculation, we determine the number of pilots provided by the pilotage associations (see § 404.103) and use that figure to determine how many pilots need to be compensated via the pilotage fees collected.

In the first part of Step 4, ''Determine target pilot compensation benchmark and apprentice pilot wage benchmark,''(§ 404.104(b)), the previous year's target compensation value is first adjusted by actual inflation using the ECI inflation value. If the ECI inflation value is not available, § 404.104(b)(1) and (2) specify the compensation inflation process the Director will use instead.

In the second part of Step 4, (§ 404.104(c)), the Director determines the total compensation figure for each district. To do this, the Director multiplies the compensation benchmark by the number of pilots for each area and district (from Step 3), producing a figure for total pilot compensation.

In Step 5, ''Project working capital fund,'' (§ 404.105), the Director calculates an added value to pay for needed capital improvements and other non-recurring expenses, such as technology investments and infrastructure maintenance. This value is calculated by adding the total operating expenses (derived in Step 2) to the total pilot compensation and the total target apprentice pilot wage (derived in Step 4), then by multiplying that figure by the preceding year's average annual rate of return for new issues of high-grade corporate securities. This figure constitutes the ''working capital fund'' for each area and district.

In Step 6, ''Project needed revenue,'' (§ 404.106), the Director simply adds the totals produced by the preceding steps. The projected operating expense for each area and district (from Step 2) is added to the total pilot compensation, including apprentice pilot wage benchmarks (from Step 4), and the working capital fund contribution (from Step 5). The total figure, calculated separately for each area and district, is the ''needed revenue.''

In Step 7, ''Calculate initial base rates,'' (§ 404.107), the Director calculates an hourly pilotage rate to cover the needed revenue, as calculated in Step 6. This step consists of first calculating the 10-year average of traffic hours for each area. Next, we divide the revenue needed in each area (calculated in Step 6) by the 10-year average of traffic hours to produce an initial base rate.

An additional element, the ''weighting factor,'' is required under § 401.400. Pursuant to that section, ships pay a multiple of the ''base rate'', as calculated in Step 7, by a number ranging from 1.0 (for the smallest ships, or ''Class I'' vessels) to 1.45 (for the largest ships, or ''Class IV'' vessels). This significantly increases the revenue collected, and we need to account for the added revenue produced by the weighting factors to ensure that shippers are not overpaying for pilotage services. We do this in the next step.

In Step 8, ''Calculate average weighting factors by Area,'' (§ 404.108), the Director calculates how much extra revenue, as a percentage of total revenue, has historically been produced by the weighting factors in each area. We do this by using a historical average of the applied weighting factors for each year since 2014 (the first year the current weighting factors were applied).

In Step 9, ''Calculate revised base rates,'' (§ 404.109), the Director modifies the base rates by accounting for the extra revenue generated by the weighting factors. We do this by dividing the initial pilotage rate for each area (from Step 7) by the corresponding average weighting factor (from Step 8), to produce a revised rate.

In Step 10, ''Review and finalize rates,'' (§ 404.110), often referred to informally as ''Director's discretion'', the Director reviews the revised base rates (from Step 9) to ensure that they meet the goals set forth in 46 U.S.C. 9303(f) and 46 CFR 404.1(a), which include promoting efficient, safe, and reliable pilotage service on the Great Lakes; generating sufficient revenue for each pilotage association to reimburse necessary and reasonable operating expenses; compensating trained and rested pilots fairly; and providing appropriate revenue for improvements.

After the base rates are set, § 401.401 permits the Coast Guard to apply surcharges. We are not using any surcharges in this final rule. In previous ratemakings, where apprentice pilot wages were not built into the rate, the Coast Guard used surcharges to cover applicant pilot compensation in those years to help with applicant recruitment. In this final rule, we include the applicant trainee compensation in the district's operating expenses used in Step 1. Consistent with the 2021, 2022, and 2023 rulemakings, in this final rule we

continue to believe that the pilot associations are able to plan for the costs associated with hiring applicant pilots to fill pilot vacancies without relying on the Coast Guard to impose surcharges to help with recruiting.

VII. Historic Methodological and Other Changes

The Coast Guard is using the existing ratemaking methodology to establish the base rates in this ratemaking. The Coast Guard is not issuing any methodological or other policy changes to the ratemaking within this final rule.

According to 46 U.S.C. 9303(f), and restated in 46 CFR 404.100(a), the Coast Guard must establish base rates by a full ratemaking at least once every 5 years. The Coast Guard has determined that the current base rates and methodology still adequately adhere to the Coast Guard's goals through rate and compensation stability, while promoting recruitment and retention of qualified U.S.-registered pilots.

The Coast Guard has made several changes to the ratemaking methodology over the last several years in consideration of the public interest and the costs of providing services. The recent changes and their impacts are summarized as follows.

In the 2017 ratemaking, Great Lakes Pilotage Rates—2017 Annual Review (82 FR 41466, published August 31, 2017),[21] the Coast Guard modified the methodology to account for the additional revenue produced by the application of weighting factors. This is discussed in detail in Steps 7 through 9 for each district, in section IX., Discussion of Rate Adjustments, of this preamble.

In the 2018 ratemaking, Great Lakes Pilotage Rates—2018 Annual Review and Revisions to Methodology (83 FR 26162, published June 5, 2018),[22] the Coast Guard adopted a new approach in the methodology for the compensation benchmark, based upon United States mariners, rather than Canadian working pilots.

In the 2020 ratemaking, Great Lakes Pilotage Rates—2020 Annual Review and Revisions to Methodology (85 FR 20088, published April 9, 2020),[23] the Coast Guard revised the methodology to accurately capture all costs and revenues associated with Great Lakes pilotage requirements, and to produce an hourly rate that adequately and accurately compensates pilots and covers expenses.

The 2021 ratemaking, Great Lakes Pilotage Rates—2021 Annual Review and Revisions to Methodology (86 FR 14184, published March 12, 2021),[24] changed the inflation calculation in Step 4, § 404.104(b), for interim ratemakings, so that the previous year's target compensation value is first adjusted by actual inflation value using the ECI. That change ensures that the target pilot compensation reimbursed to the association remains current with inflation and competitive with industry pay increases.

The 2022 ratemaking, Great Lakes Pilotage Rates—2022 Annual Review and Revisions to Methodology (87 FR 18488, published March 30, 2022),[25] implemented an apprentice pilot wage benchmark in Steps 3 and 4 to provide predictability and stability to pilot associations training apprentice pilots. The 2022 final rule also codified rounding up the staffing model's final number to ensure that the ratemaking does not undercount the pilot need presented by the staffing model and association circumstances.

VIII. Individual Target Pilot Compensation Benchmark

The Coast Guard is issuing the target pilot compensation benchmark in this final rule at the target compensation for the ratemaking year 2023, adjusted for inflation. In an interim ratemaking year, the base target pilot compensation is adjusted annually in accordance with § 404.104(b). The Coast Guard arrived at this compensation benchmark as explained in the following paragraphs.

Before 2016, the Coast Guard based the compensation benchmark on data provided by the American Maritime Officers Union (AMOU) regarding its contract for first mates on the Great Lakes. However, in 2016, the AMOU elected to no longer provide this data to the Coast Guard. In the 2016 ratemaking, Great Lakes Pilotage Rates—2016 Annual Review and Changes to Methodology (81 FR 11908, published March 7, 2016),[26] the Coast Guard used the average compensation for a Canadian pilot, plus a 10-percent adjustment. The shipping industry challenged the compensation benchmark, and the court found that the Coast Guard did not adequately support the 10-percent addition to the Canadian GLPA compensation benchmark. *American Great Lakes Ports Association* v. *Zukunft,* 296 F.Supp. 3d 27, 48 (D.D.C. 2017), *aff'd sub nom. American Great Lakes Ports Association* v. *Schultz,* 962 F.3d 510 (D.C. Cir. 2020). The Coast Guard then based the 2018 full ratemaking compensation benchmark on data provided by the AMOU, regarding its contract for first mates on the Great Lakes in the 2011 to 2015 period (83 FR 26162). The 2018 final rule adjusted the AMOU 2015 data for inflation using Federal Open Market FOMC median economic projections for PCE inflation.

In the 2020 interim year ratemaking final rule (85 FR 20088), the Coast Guard established its most recent pilot compensation benchmark. Given the lack of access to AMOU data, the Coast Guard did not rely on the AMOU aggregated wage and benefit information as the basis for the compensation benchmark. Instead, the Coast Guard adopted the 2019 target pilot compensation (with inflation) as our compensation benchmark going forward. The Coast Guard stated in the 2020 final rule that no other United States or Canadian pilot compensation data was appropriate to use as a benchmark at that time, and that the 2020 benchmark will be used for future rates (85 FR 20091). The Director determined that the ratemaking provided adequate compensation for pilots.

Based on our experience over the past four ratemakings (2020–2023), the Director continues to believe that the level of target pilot compensation for those years provided an appropriate level of compensation for U.S.-registered pilots. According to § 404.104(a), the Director may make necessary and reasonable adjustments to the benchmark based on current information. However, current circumstances do not indicate that an adjustment, other than for inflation, is necessary. The Director bases this decision on the fact that there is no indication that registered pilots are resigning due to their compensation, or that this compensation benchmark is causing shortfalls in achieving reliable pilotage service. The Coast Guard also does not believe that the pilot compensation benchmark is too high relative to the expertise required to perform the job. The compensation will continue to be adjusted annually, in accordance with published inflation rates, which will ensure the

compensation remains competitive and current for upcoming years.

Therefore, the Coast Guard does not seek alternative benchmarks for target compensation at this time and, instead, simply adjusts the amount of target pilot compensation for inflation as our target compensation benchmark for 2024, as shown in Step 4. This target compensation benchmark approach has advanced and will continue to advance the Coast Guard's goals through rate and compensation stability while also promoting recruitment and retention of qualified U.S. pilots.

The target compensation for 2024 is $440,658 per registered pilot and $158,637 per apprentice pilot, using the 2023 compensation as a benchmark. We follow the procedure outlined in paragraph (b) of § 404.104, which adjusts the existing compensation benchmark for inflation. We use a two-step process to adjust target pilot compensation for inflation. First, we adjust the 2023 target compensation benchmark of $424,398 by 1.2 percent for an adjusted value of $429,491. This first adjustment accounts for the difference in actual third quarter 2023 ECI inflation, which is 3.9 percent, and the 2023 PCE estimate of 2.7 percent.[27] The second step accounts for projected inflation from 2023 to 2024, which is 2.6 percent.[28] Based on the projected 2024 inflation estimate, the target compensation benchmark for 2024 is $440,658 per pilot. The apprentice pilot wage benchmark is 36 percent of the target pilot compensation, or $158,637 ($440,658 × 0.36).[29]

IX. Discussion of Rate Adjustments

In this final rule, based on the policy changes described in the previous section, we are issuing new pilotage rates for 2024. We conducted the 2024 ratemaking as an interim ratemaking, as we last did in 2022 (87 FR 18488). Thus, the Coast Guard adjusted the compensation benchmark following the interim ratemaking year procedures under § 404.100(b) rather than the procedures for a full ratemaking year in § 404.100(a).

This section discusses the rate changes using the ratemaking steps provided in 46 CFR part 404. We will detail all 10 steps of the ratemaking procedure for each of the 3 districts to show how we arrive at the new rates.

District One

A. Step 1: Recognize Previous Operating Expenses

Step 1 in the ratemaking methodology requires that the Coast Guard review and recognize the operating expenses for the last full year for which figures are available (§ 404.101). To do so, we begin by reviewing the independent accountant's financial reports for each association's 2021 expenses and revenues.[30] For accounting purposes, the financial reports divide expenses into designated and undesignated areas. For costs accrued by the pilot associations generally, such as employee benefits, the cost is divided between the designated and undesignated areas on a *pro rata* basis. The recognized operating expenses for District One are shown in table 6.

In the 2021 expenses used as the basis for this final rule, districts used the term ''applicant'' to describe applicant trainees and persons who will be called apprentices (applicant pilots), under the definition of ''apprentice pilot'', which was introduced in the 2022 final rule. Therefore, when describing past expenses, the term ''applicant'' is used to match what was reported from 2021, which includes both applicant and apprentice pilots. The term ''apprentice'' is used to distinguish apprentice pilot wages and describe the impacts of the ratemaking going forward.

The Coast Guard continues to include apprentice salaries as an allowable expense in the 2024 ratemaking, as this final rule is based on 2021 operating expenses, when salaries were still an allowable expense. Beginning with the 2025 ratemaking, apprentice pilot salaries will no longer be included as a 2022 operating expense, because apprentice pilot wages will have already been factored into the ratemaking Steps 3 and 4 in calculation of the 2022 rates. Beginning in 2025, the applicant salaries' operating expenses for 2022 will consist of only applicant trainees (those who are not yet apprentice pilots). The recognized operating expenses for District One are shown in table 6.

TABLE 6—2021 RECOGNIZED EXPENSES FOR DISTRICT ONE

District One reported operating expenses for 2021	Designated	Undesignated	Total
	St. Lawrence River	Lake Ontario	
Applicant Pilot Compensation

Total Operating Expenses (OpEx)	2,476,529	1,651,018	4,127,547

B. Step 2: Project Operating Expenses, Adjusting for Inflation or Deflation

In accordance with the text in § 404.102, having identified the recognized 2021 operating expenses in Step 1, the next step is to estimate the current year's operating expenses by adjusting for inflation over the 3-year period. We calculate inflation using the BLS data from the CPI for the Midwest Region of the United States for the 2022 inflation rate.[31] Because the BLS does not provide forecasted inflation data, we use economic projections from the Federal Reserve for the 2023 and 2024 inflation modification.[32] Based on that information, the calculations for Step 2 are as presented in table 7.

[31] The CPI is defined as ''All Urban Consumers (CPI–U), All Items, 1982–84=100.'' Series CUUR0200SA0 (Downloaded March 21, 2023). Available at *https://www.bls.gov/cpi/data.htm.,* All Urban Consumers (Current Series), multiscreen data, not seasonally adjusted, 0200 Midwest, Current, All Items, Monthly, 12-month Percent Change and Annual Data.

[32] The 2023 and 2024 inflation rates are available at *https://www.federalreserve.gov/monetarypolicy/files/fomcprojtabl20230920.pdf. We used the Median Core PCE June Projection found in table 1. (*Downloaded September 2023).

TABLE 7—ADJUSTED OPERATING EXPENSES FOR DISTRICT ONE

	District One		
	Designated	Undesignated	Total
Total Operating Expenses (Step 1)	$2,476,529	$1,651,018	$4,127,547
2022 Inflation Modification (@8%)	198,122	132,081	330,203
2023 Inflation Modification (@3.9%)	104,311	69,541	173,852
2024 Inflation Modification (@2.6%)	72,253	48,169	120,422
Adjusted 2024 Operating Expenses	2,851,215	1,900,809	4,752,024

* Figures are rounded to the nearest dollar and may not sum to totals.

C. Step 3: Estimate Number of Registered Pilots and Apprentice Pilots

In accordance with the text in § 404.103, the Coast Guard estimates the number of fully registered pilots in each district. We determine the number of fully registered pilots based on data provided by the SLSPA. Using these numbers, we estimate that there will be 18 registered pilots in 2024 in District One. We determine the number of apprentice pilots based on input from the district on anticipated retirements and staffing needs. Using these numbers, we estimate that there will be three apprentice pilots in 2024 in District One. Based on the seasonal staffing model discussed in the 2017 ratemaking (82 FR 41466) and rounding introduced in the 2022 ratemaking (87 FR 18488), a certain number of pilots are assigned to designated waters, and a certain number of pilots are assigned to undesignated waters, as shown in table 8. These numbers are used to determine the amount of revenue needed in their respective areas.

TABLE 8—AUTHORIZED PILOTS FOR DISTRICT ONE

Item	District One
Maximum Number of Pilots (per § 401.220(a)) *	18
2024 Authorized Pilots (total)	18
Pilots Assigned to Designated Areas	10
Pilots Assigned to Undesignated Areas	8
2024 Apprentice Pilots	3

* For a detailed calculation, refer to the Great Lakes Pilotage Rates—2017 Annual Review final rule, which contains the staffing model. See 82 FR 41466, table 6 at 41480 (August 31, 2017).

D. Step 4: Determine Target Pilot Compensation Benchmark and Apprentice Pilot Wage Benchmark

In this step, we determine the total pilot compensation for each area. Because we are issuing an ''interim'' ratemaking this year, we follow the procedure outlined in paragraph (b) of § 404.104, which adjusts the existing compensation benchmark by inflation. First, we adjust the 2023 target compensation benchmark of $424,398 by 1.2 percent for a value of $429,491. This accounts for the difference in actual third quarter 2023 ECI inflation, which is 3.9 percent, and the 2023 PCE estimate of 2.7 percent.[33] [34] The second step accounts for projected inflation from 2023 to 2024, which is 2.6 percent.[35] Based on the projected 2024 inflation estimate, the target compensation benchmark for 2024 is $440,658 per pilot. The apprentice pilot wage benchmark is 36 percent of the target pilot compensation, or $158,637 ($440,658 × 0.36).

In accordance with § 404.104(c), we use the revised target individual compensation level to derive the total pilot compensation by multiplying the individual target compensation by the estimated number of registered pilots for District One, as shown in table 9. We estimate that the number of apprentice pilots with limited registration needed for District One in the 2024 season will be three. The total target wages for apprentices are allocated with 60 percent for the designated area and 40 percent for the undesignated area, in accordance with the allocation for operating expenses.

TABLE 9—TARGET COMPENSATION FOR DISTRICT ONE

	District One		
	Designated	Undesignated	Total
Target Pilot Compensation	$440,658	$440,658	$440,658
Number of Pilots	10	8	18
Total Target Pilot Compensation	$4,406,580	$3,525,264	$7,931,844
Target Apprentice Pilot Compensation	$158,637	$158,637	$158,637

[33] Employment Cost Index, Total Compensation for Private Industry workers in Transportation and Material Moving, Annual Average, Series ID: CIU2010000520000A. *https://beta.bls.gov/dataViewer/view/timeseries/CIU2010000520000A*. (Last accessed 11/01/23.)

[35] Table 1 Summary of Economic Projections, Median Core PCE Inflation June Projection. *https://www.federalreserve.gov/monetarypolicy/files/fomcprojtabl20230920.pdf*. (Last accessed 09/2023.)

TABLE 9—TARGET COMPENSATION FOR DISTRICT ONE—Continued

	District One		
	Designated	Undesignated	Total
Number of Apprentice Pilots	.....	.....	3
Total Target Apprentice Pilot Compensation	$285,547	$190,364	$475,911

E. Step 5: Project Working Capital Fund

Next, the Coast Guard calculates the working capital fund revenues needed for each area. We first add the figures for projected operating expenses, total target pilot compensation, and total target apprentice pilot wage for each area, then we find the preceding year's average annual rate of return for new issues of high-grade corporate securities. Using Moody's data, the number is 4.0742 percent rounded.[36] By multiplying the two figures, we obtain the working capital fund contribution for each area, as shown in table 10.

TABLE 10—WORKING CAPITAL FUND CALCULATION FOR DISTRICT ONE

	District One		
	Designated	Undesignated	Total
Adjusted Operating Expenses (Step 2)	$2,851,215	$1,900,809	$4,752,024
Total Target Pilot Compensation (Step 4)	4,406,580	3,525,264	7,931,844
Total Target Apprentice Pilot Compensation (Step 4)	285,547	190,364	475,911
Total 2024 Expenses	7,543,342	5,616,437	13,159,779
Working Capital Fund (4.0742%)	307,331	228,825	536,156

F. Step 6: Project Needed Revenue

In this step, we add the expenses accrued to derive the total revenue needed for each area. These expenses include the projected operating expenses (from Step 2), the target total pilot compensation (from Step 4), total target apprentice pilot wage (from Step 4), and the working capital fund contribution (from Step 5). We show these calculations in table 11.

TABLE 11—REVENUE NEEDED FOR DISTRICT ONE

	District One		
	Designated	Undesignated	Total
Adjusted Operating Expenses (Step 2)	$2,851,215	$1,900,809	$4,752,024
Total Target Pilot Compensation (Step 4)	4,406,580	3,525,264	7,931,844
Total Target Apprentice Pilot Compensation (Step 4)	285,547	190,364	475,911
Working Capital Fund (Step 5)	307,331	228,825	536,156
Total Revenue Needed	7,850,673	5,845,262	13,695,935

G. Step 7: Calculate Initial Base Rates

Having determined the revenue needed for each area in the previous six steps, we divide that number by the expected number of traffic hours to develop an hourly rate.

Step 7 is a two-part process. The first part is calculating the 10-year traffic average in District One using the total time on task or pilot bridge hours. To calculate the time on task for each district from 2013–2020, the Coast Guard used billing data from SeaPro. The data is pulled from the system filtering by district, year, job status (including only processed jobs), and flagging code (including only U.S. jobs).

Because we calculate separate figures for designated and undesignated waters, there are two parts for each calculation. For 2021–2022, the Coast Guard used figures provided by the associations through SeaPro monthly reports. Where bridge hour figures did not match between the monthly reports and the weighted factor reports, the Coast Guard opted to use the figures from the monthly report for Step 7. We show these values in table 12.

TABLE 12—TIME ON TASK FOR DISTRICT ONE

[Hours]

	District One	
	Designated	Undesignated
2022	6,573	8,356

[36] Moody's Seasoned Aaa Corporate Bond Yield, average of 2022 monthly data. The Coast Guard uses the most recent year of complete data. Moody's is taken from Moody's Investors Service, which is a bond credit rating business of Moody's Corporation. Bond ratings are based on creditworthiness and risk. The rating of ''Aaa'' is the highest bond rating assigned with the lowest credit risk. See *https://fred.stlouisfed.org/series/AAA*. (Last accessed 03/21/23.)

TABLE 12—TIME ON TASK FOR DISTRICT ONE—Continued

[Hours]

	District One	
	Designated	Undesignated
2021	6,166	7,893
2020	6,265	7,560
2019	8,232	8,405
2018	6,943	8,445
2017	7,605	8,679
2016	5,434	6,217
2015	5,743	6,667
2014	6,810	6,853
2013	5,864	5,529
Average	6,564	7,460

Next, we derive the initial hourly rate by dividing the revenue needed by the average number of hours for each area. This produces an initial rate, which is necessary to produce the revenue needed for each area, assuming the amount of traffic is as expected. We present the calculations for District One in table 13.

TABLE 13—INITIAL RATE CALCULATIONS FOR DISTRICT ONE

	District One	
	Designated	Undesignated
Revenue needed (Step 6)	$7,850,673	$5,845,262
Average time on task (hours)	6,564	7,460
Initial rate	$1,196	$784

H. Step 8: Calculate Average Weighting Factors by Area

In this step, the Coast Guard calculates the average weighting factor for each designated and undesignated area by first collecting the weighting factors, set forth in 46 CFR 401.400, for each vessel trip. Using this data, we calculate the average weighting factor for each area using the data from each vessel transit from 2014 to 2021, as shown in tables 14 and 15. Data for 2022 was provided by the associations in a weighting factor report.

TABLE 14—AVERAGE WEIGHTING FACTOR FOR DISTRICT ONE, DESIGNATED AREAS

Vessel class/year	Number of transits	Weighting factor	Weighted transits
Class 1 (2014)	31	1	31
Class 1 (2015)	41	1	41
Class 1 (2016)	31	1	31
Class 1 (2017)	28	1	28
Class 1 (2018)	54	1	54
Class 1 (2019)	72	1	72
Class 1 (2020)	8	1	8
Class 1 (2021)	10	1	10
Class 1 (2022)	39	1	39
Class 2 (2014)	285	1.15	328
Class 2 (2015)	295	1.15	339
Class 2 (2016)	185	1.15	213
Class 2 (2017)	352	1.15	405
Class 2 (2018)	559	1.15	643
Class 2 (2019)	378	1.15	435
Class 2 (2020)	560	1.15	644
Class 2 (2021)	315	1.15	362
Class 2 (2022)	482	1.15	554
Class 3 (2014)	50	1.3	65
Class 3 (2015)	28	1.3	36

Class 4 (2019)	326	1.45	473
Class 4 (2020)	334	1.45	484
Class 4 (2021)	466	1.45	676
Class 4 (2022)	401	1.45	581
Total	6,524	.....	8,435
Average weighting factor (weighted transits/number of transits)	.....	1.29	.....

* Figures may not sum due to rounding.

I. Step 9: Calculate Revised Base Rates

In this step, we revise the base rates so that the total cost of pilotage will be equal to the revenue needed, after considering the impact of the weighting factors. To do this, the initial base rates calculated in Step 7 are divided by the average weighting factors calculated in Step 8, as shown in table 16.

TABLE 16—REVISED BASE RATES FOR DISTRICT ONE

Area	Initial rate (Step 7)	Average weighting factor (Step 8)	Revised rate (Initial rate ÷ average weighting factor)
District One: Designated	$1,196	1.29	$927
District One: Undesignated	784	1.29	608

J. Step 10: Review and Finalize Rates

In this step, the Director reviews the rates set forth by the staffing model and ensures that they meet the goal of ensuring safe, efficient, and reliable pilotage. To establish this, the Director considers whether the rates incorporate appropriate compensation for pilots to handle heavy traffic periods, and whether there are enough pilots to handle those heavy traffic periods. The Director also considers whether the rates cover operating expenses and infrastructure costs, including average traffic and weighting factors. Based on the financial information submitted by the pilots, the Director is not establishing any alterations to the rates in this step. We modified § 401.405(a)(1) and (2) to reflect the final rates shown in table 17.

TABLE 17—FINAL RATES FOR DISTRICT ONE

Area	Name	Final 2023 pilotage rate	Final 2024 pilotage rate
District One: Designated	St. Lawrence River	$876	$927
District One: Undesignated	Lake Ontario	586	608

District Two

A. Step 1: Recognize Previous Operating Expenses

Step 1 in our ratemaking methodology requires that the Coast Guard review and recognize the previous year's operating expenses (§ 404.101). To do so, we begin by reviewing the independent accountant's financial reports for each association's 2021 expenses and revenues.[37] For accounting purposes, the financial reports divide expenses into designated and undesignated areas. For costs generally accrued by the pilot associations, such as employee benefits, the cost is divided between the designated and undesignated areas on a *pro rata* basis.

In the 2021 expenses used as the basis for this final rule, districts used the term ''applicant'' to describe applicant trainees and persons who will be called apprentices (applicant pilots), under the definition of ''apprentice pilot'', which was introduced in the 2022 final rule. Therefore, when describing past expenses, the term ''applicant'' is used to match what was reported from 2021, which includes both applicant and apprentice pilots. The term ''apprentice'' is used to distinguish apprentice pilot wages and describe the impacts of the ratemaking going forward.

The Coast Guard continues to include apprentice salaries as an allowable expense in the 2024 ratemaking, as this final rule is based on 2021 operating expenses, when salaries were still an allowable expense. Beginning with the 2025 ratemaking, apprentice pilot salaries will no longer be included as a 2022 operating expense, because apprentice pilot wages will have already been factored into the ratemaking Steps 3 and 4 in calculation of the 2022 rates. Beginning in 2025, the applicant salaries' operating expenses for 2022 will consist of only applicant trainees (those who are not yet apprentice pilots). The recognized operating expenses for District Two are shown in table 18.

TABLE 18—2021 RECOGNIZED EXPENSES FOR DISTRICT TWO

Reported operating expenses for 2021	Undesignated	Designated	Total
	Lake Erie	Southeast Shoal to Port Huron	
Applicant Pilot Compensation			
Salaries	$79,538	$119,306	$198,844
Employee Benefits	11,066	16,599	27,665
Total Applicant Pilot Compensation	90,604	135,905	226,509
Other Applicant Cost			
Applicant Subsistence	5,280	7,920	13,200
Hotel/Lodging Costs	2,976	4,464	7,440
Hotel/Lodging Costs (D2–21–01)	(2,976)	(4,464)	(7,440)

[37] These reports are available in the docket for this final rule.

TABLE 18—2021 RECOGNIZED EXPENSES FOR DISTRICT TWO—Continued

Reported operating expenses for 2021	Undesignated	Designated	Total
	Lake Erie	Southeast Shoal to Port Huron	
Payroll taxes	6,901	10,352	17,253
Total Other Applicant Cost	12,181	18,272	30,453
Other Pilotage Cost			
Subsistence	73,921	110,880	184,800
Hotel/Lodging	62,496	93,744	156,240
Hotel/Lodging (D2–21–01)	(55,307)	(82,960)	(138,267)
Travel	42,625	63,937	106,562

Salaries	48,532	72,797	121,329
Accounting/Professional fees	17,846	26,769	44,615
Pilot Training	23,909	35,864	59,773
Applicant Pilot Training	209	313	522
Other	21,252	31,879	53,131
Total Administrative Expenses	326,469	489,707	816,176
Total Expenses (OPEX + Applicant + Pilot Boats + Admin + Capital)	957,768	1,436,655	2,394,422
Total Operating Expenses (OpEx + Adjustments)	957,768	1,436,655	2,394,422

B. Step 2: Project Operating Expenses, Adjusting for Inflation or Deflation

In accordance with the text in § 404.102, having identified the recognized 2021 operating expenses in Step 1, the next step is to estimate the current year's operating expenses by adjusting for inflation over the 3-year period. We calculate inflation using the BLS data from the CPI for the Midwest Region of the United States for the 2022 inflation rate.[38] Because the BLS does not provide forecasted inflation data, we use economic projections from the Federal Reserve for the 2023 and 2024 inflation modification.[39] Based on that information, the calculations for Step 2 are presented in table 19.

[38] The CPI is defined as ''All Urban Consumers (CPI–U), All Items, 1982–84=100.'' Series CUUR0200SA0 (Downloaded March 21, 2023). Available at *https://www.bls.gov/cpi/data.htm.,* All Urban Consumers (Current Series), multiscreen data, not seasonally adjusted, 0200 Midwest, Current, All Items, Monthly, 12-month Percent Change and Annual Data.

[39] The 2023 and 2024 inflation rates are available at Table 1 Summary of Economic Projections, Median Core PCE Inflation June Projection. *https://www.federalreserve.gov/monetarypolicy/files/fomcprojtabl20230920.pdf.* (Last accessed 12/4/2023).

TABLE 19—ADJUSTED OPERATING EXPENSES FOR DISTRICT TWO

	District Two		
	Undesignated	Designated	Total
Total Operating Expenses (Step 1)	$957,768	$1,436,655	$2,394,422
2022 Inflation Modification (@8%)	$76,621	114,932	191,553
2023 Inflation Modification (@3.9%)	40,341	60,512	100,853
2024 Inflation Modification (@2.6%)	27,943	41,915	69,858
Adjusted 2024 Operating Expenses	1,102,673	1,654,014	2,756,686

* Figures are rounded to the nearest dollar and may not sum to totals.

C. Step 3: Estimate Number of Registered Pilots and Apprentice Pilots

In accordance with the text in § 404.103, the Coast Guard estimates the number of fully registered pilots in each district. We determine the number of fully registered pilots based on data provided by the LPA. Using these numbers, we estimate that there will be 17 registered pilots in 2024 in District Two, including the additional pilot being granted for 2024. We determine the number of apprentice pilots based on input from the district on anticipated retirements and staffing needs. Using these numbers, we estimate that there will be one apprentice pilot in 2024 in District Two.

Based on the seasonal staffing model discussed in the 2017 ratemaking (82 FR 41466) and rounding introduced in the 2022 ratemaking (87 FR 18488), a certain number of pilots are assigned to designated waters, and a certain number of pilots are assigned to undesignated waters, as shown in table 20. These numbers are used to determine the amount of revenue needed in their respective areas.

TABLE 20—AUTHORIZED PILOTS FOR DISTRICT TWO

Item	District Two
Maximum Number of Pilots (per § 401.220(a)) *	16
2024 Authorized Pilots (total)	17
Pilots Assigned to Designated Areas	9
Pilots Assigned to Undesignated Areas	8
2024 Apprentice Pilots	1

* For a detailed calculation, refer to the Great Lakes Pilotage Rates—2017 Annual Review final rule, which contains the staffing model. See 82 FR 41466, table 6 at 41480 (August 31, 2017).

D. Step 4: Determine Target Pilot Compensation Benchmark and Apprentice Pilot Wage Benchmark

In this step, we determine the total pilot compensation for each area. Because we are issuing an ''interim'' ratemaking this year, we follow the procedure outlined in paragraph (b) of § 404.104, which adjusts the existing compensation benchmark by inflation.

First, we adjust the 2023 target compensation benchmark of $424,398 by 1.2 percent for a value of $429,491. This accounts for the difference in actual third quarter 2023 ECI inflation, which is 3.9 percent, and the 2023 PCE estimate of 2.7 percent.[40] [41] The second step accounts for projected inflation from 2023 to 2024, which is 2.6 percent.[42] Based on the projected 2024 inflation estimate, the target compensation benchmark for 2024 is $440,658 per pilot. The apprentice pilot wage benchmark is 36 percent of the target pilot compensation, or $158,637 ($440,658 × 0.36).

In accordance with § 404.104(c), the Coast Guard uses the revised target individual compensation level to derive the total pilot compensation by multiplying the individual target compensation by the estimated number of registered pilots for District Two, as shown in table 21. The Coast Guard estimates that the number of apprentice pilots with limited registration needed for District Two in the 2024 season will be one. The total target wages for apprentices are allocated at 60 percent for the designated area and 40 percent for the undesignated area, in accordance with the allocation for operating expenses.

TABLE 21—TARGET COMPENSATION FOR DISTRICT TWO

	District Two		
	Undesignated	Designated	Total
Target Pilot Compensation	$440,658	$440,658	$440,658
Number of Pilots	8	9	17
Total Target Pilot Compensation	3,525,264	3,965,922	7,491,186

[40] Employment Cost Index, Total Compensation for Private Industry workers in Transportation and Material Moving, Annual Average, Series ID: CIU2010000520000A. *https://beta.bls.gov/dataViewer/view/timeseries/CIU2010000520000A.* (Last accessed 11/01/23.)

[42] Table 1 Summary of Economic Projections, Median Core PCE Inflation June Projection. *https://www.federalreserve.gov/monetarypolicy/files/fomcprojtabl20230920.pdf* (Last accessed 12/4/2023).

TABLE 21—TARGET COMPENSATION FOR DISTRICT TWO—Continued

	District Two		
	Undesignated	Designated	Total
Target Apprentice Pilot Compensation	158,637	158,637	158,637
Number of Apprentice Pilots			1
Total Target Apprentice Pilot Compensation	63,455	95,182	158,637

E. Step 5: Project Working Capital Fund

Next, the Coast Guard calculates the working capital fund revenues needed for each area. We first add the figures for projected operating expenses, total target pilot compensation, and total target apprentice pilot wage for each area, and then we find the preceding year's average annual rate of return for new issues of high-grade corporate securities. Using Moody's data, the number is 4.0742 percent, rounded.[43] By multiplying the two figures, we obtain the working capital fund contribution for each area, as shown in table 22.

TABLE 22—WORKING CAPITAL FUND CALCULATION FOR DISTRICT TWO

	District Two		
	Undesignated	Designated	Total
Adjusted Operating Expenses (Step 2)	$1,102,673	$1,654,014	$2,756,686
Total Target Pilot Compensation (Step 4)	3,525,264	3,965,922	7,491,186
Total Target Apprentice Pilot Compensation (Step 4)	63,455	95,182	158,637
Total 2024 Expenses	4,691,392	5,715,118	10,406,509
Working Capital Fund (4.0742%)	191,137	232,845	423,982

F. Step 6: Project Needed Revenue

In this step, the Coast Guard adds all the expenses accrued to derive the total revenue needed for each area. These expenses include the projected operating expenses (from Step 2), the total target pilot compensation (from Step 4), total target apprentice pilot wage (from Step 4), and the working capital fund contribution (from Step 5). We show these calculations in table 23.

TABLE 23—REVENUE NEEDED FOR DISTRICT TWO

	District Two		
	Undesignated	Designated	Total
Adjusted Operating Expenses (Step 2)	$1,102,673	$1,654,014	$2,756,686
Total Target Pilot Compensation (Step 4)	3,525,264	3,965,922	7,491,186
Total Target Apprentice Pilot Compensation (Step 4)	63,455	95,182	158,637
Working Capital Fund (Step 5)	191,137	232,845	423,982
Total Revenue Needed	4,882,529	5,947,963	10,830,491

G. Step 7: Calculate Initial Base Rates

Having determined the revenue needed for each area in the previous six steps, the Coast Guard divides that number by the expected number of traffic hours to develop an hourly rate.

Step 7 is a two-part process. In the first part, we calculate the 10-year traffic average in District Two, using the total time on task or pilot bridge hours. To calculate the time on task for each district from 2013–2020, the Coast Guard used billing data from SeaPro. The data is pulled from the system filtering by district, year, job status (including only processed jobs), and flagging code (including only U.S. jobs).

Because we calculate separate figures for designated and undesignated waters, there are two parts for each calculation. For 2021–2022, the Coast Guard used figures provided by the associations through SeaPro monthly reports. Where bridge hour figures did not match between the monthly reports and the weighted factor reports, the Coast Guard opted to use the figures from the monthly report for Step 7. We show these values in table 24.

[43] Moody's Seasoned Aaa Corporate Bond Yield, average of 2022 monthly data. The Coast Guard uses the most recent year of complete data. Moody's is taken from Moody's Investors Service, which is a bond credit rating business of Moody's Corporation. Bond ratings are based on creditworthiness and risk. The rating of ''Aaa'' is the highest bond rating assigned with the lowest credit risk. See *https://fred.stlouisfed.org/series/AAA*. (Last accessed 03/21/2023).

TABLE 24—TIME ON TASK FOR DISTRICT TWO

[Hours]

Year	District Two	
	Undesignated	Designated
2022	7,668	8,613
2021	5,290	6,762
2020	6,232	8,401
2019	6,512	7,715
2018	6,150	6,655
2017	5,139	6,074
2016	6,425	5,615
2015	6,535	5,967
2014	7,856	7,001
2013	4,603	4,750
Average	6,241	6,755

Next, we derive the initial hourly rate by dividing the revenue needed by the average number of hours for each area. This produces an initial rate, which is necessary to produce the revenue needed for each area, assuming the amount of traffic is as expected. We present the calculations for District Two in table 25.

TABLE 25—INITIAL RATE CALCULATIONS FOR DISTRICT TWO

	Undesignated	Designated
Revenue needed (Step 6)	$4,882,529	$5,947,963
Average time on task (hours)	6,241	6,755
Initial rate	$782	$881

H. Step 8: Calculate Average Weighting Factors by Area

In this step, we calculate the average weighting factor for each designated and undesignated area. We collect the weighting factors, set forth in 46 CFR 401.400, for each vessel trip. Using this data, we calculate the average weighting factor for each area using the data from each vessel transit from 2014–2021, as shown in tables 26 and 27. Data for 2022 was provided by the associations in a weighting factor report.

TABLE 26—AVERAGE WEIGHTING FACTOR FOR DISTRICT TWO, UNDESIGNATED AREAS

Vessel class/year	Number of transits	Weighting factor	Weighted transits
Class 1 (2014)	31	1	31
Class 1 (2015)	35	1	35
Class 1 (2016)	32	1	32
Class 1 (2017)	21	1	21
Class 1 (2018)	37	1	37
Class 1 (2019)	54	1	54
Class 1 (2020)	1	1	1

Total	6,751	.....	8,882
Average weighting factor (weighted transits/number of transits)	.....	1.32	.....

* Figures may not sum due to rounding.

I. Step 9: Calculate Revised Base Rates

In this step, the Coast Guard revises the base rates, so that the total cost of pilotage will be equal to the revenue needed after considering the impact of the weighting factors. To do this, we divide the initial base rates calculated in Step 7 by the average weighting factors calculated in Step 8, as shown in table 28.

TABLE 28—REVISED BASE RATES FOR DISTRICT TWO

Area	Initial rate (Step 7)	Average weighting factor (Step 8)	Revised rate (initial rate ÷ average weighting factor)
District Two: Undesignated	$782	1.31	$597
District Two: Designated	881	1.32	667

J. Step 10: Review and Finalize Rates

In this step, the Director reviews the rates set forth by the staffing model and ensures that they meet the goal of ensuring safe, efficient, and reliable pilotage. To establish this, the Director considers whether the rates incorporate appropriate compensation for pilots to handle heavy traffic periods, and whether there are enough pilots to handle those heavy traffic periods. The Director also considers whether the rates cover operating expenses and infrastructure costs, taking average traffic and weighting factors into consideration. Based on the financial information submitted by the pilots, the Director is not establishing any alterations to the rates in this step. We modify § 401.405(a)(3) and (4) to reflect the final rates shown in table 29.

TABLE 29—FINAL RATES FOR DISTRICT TWO

Area	Name	Final 2023 pilotage rate	Final 2024 pilotage rate
District Two: Designated	Navigable waters from Southeast Shoal to Port Huron, MI.	$601	$667
District Two: Undesignated	Lake Erie	704	597

District Three

A. Step 1: Recognize Previous Operating Expenses

Step 1 in our ratemaking methodology requires that the Coast Guard review and recognize the previous year's operating expenses (§ 404.101). To do so, we review the independent accountant's financial reports for each association's 2021 expenses and revenues.[44] For accounting purposes, the financial reports divide expenses into designated and undesignated areas. For costs generally accrued by the pilot associations, such as employee benefits, the cost is divided between the designated and undesignated areas on a *pro rata* basis.

In the 2021 expenses used as the basis for this final rule, districts used the term ''applicant'' to describe applicant trainees and persons who will be called apprentices (applicant pilots), under the definition of ''apprentice pilot'', which was introduced in the 2022 final rule. Therefore, when describing past expenses, the term ''applicant'' is used to match what was reported in 2021, which includes both applicant and apprentice pilots. The term ''apprentice'' is used to distinguish apprentice pilot wages and to describe the impacts of the ratemaking going forward.

The Coast Guard continues to include apprentice salaries as an allowable expense in the 2024 ratemaking, as this final rule is based on 2021 operating expenses, when salaries were still an allowable expense. Beginning with the 2025 ratemaking, apprentice pilot salaries will no longer be included as a 2022 operating expense, because apprentice pilot wages will have already been factored into the ratemaking Steps 3 and 4 in calculation of the 2022 rates. Beginning in 2025, the applicant salaries' operating expenses for 2022 will consist of only applicant trainees (those who are not yet apprentice pilots). The recognized operating expenses for District Three are shown in table 30.

TABLE 30—2021 RECOGNIZED EXPENSES FOR DISTRICT THREE

Reported operating expenses for 2021	Undesignated	Designated	Undesignated	Total
	Lakes Huron and Michigan	St. Mary's River	Lake Superior	
Applicant Cost				
Applicant Salaries	$336,149	$140,111	$176,330	$652,590
Applicant Benefits	58,306	24,303	30,585	113,194
Total Applicant Cost	394,455	164,414	206,915	765,784
Other Pilotage Costs				
Pilot subsistence/travel	149,993	62,519	78,680	291,192
Hotel/Lodging Cost	136,769	57,007	71,744	265,520
Hotel/Lodging Cost (D3–21–03)	(18,162)	(7,570)	(9,527)	(35,260)
Travel	55,936	23,315	29,342	108,592

[44] These reports are available in the docket for this final rule.

TABLE 30—2021 RECOGNIZED EXPENSES FOR DISTRICT THREE—Continued

Reported operating expenses for 2021	Undesignated	Designated	Undesignated	Total
	Lakes Huron and Michigan	St. Mary's River	Lake Superior	
License Insurance—Pilots	881	367	462	1,710
Payroll taxes	.....	.....	.....	.....

Utilities (D3–21–03)	(34,248)	(14,275)	(17,965)	(66,488)
Accounting/Professional fees	22,765	9,489	11,941	44,195
Pilot Training	44,259	18,448	23,216	85,923
Other expenses	24,741	10,312	12,978	48,032
Total Administrative Expenses	568,336	236,889	298,122	1,103,347
Total Operating Expenses (OpEx)	2,096,160	873,705	1,099,554	4,069,419

B. Step 2: Project Operating Expenses, Adjusting for Inflation or Deflation

In accordance with the text in § 404.102, having identified the 2021 operating expenses in Step 1, the next step is to estimate the current year's operating expenses by adjusting those expenses for inflation over the 3-year period. We calculate inflation using the BLS data from the CPI for the Midwest Region of the United States for the 2022 inflation rate.[45] Because the BLS does not provide forecasted inflation data, we use economic projections from the Federal Reserve for the 2023 and 2024 inflation modification.[46] Based on that information, the calculations for Step 2 are as presented in table 31.

[45] The CPI is defined as ''All Urban Consumers (CPI–U), All Items, 1982–84=100.'' Series CUUR0200SA0 (Downloaded March 21, 2023). Available at *https://www.bls.gov/cpi/data.htm.,* All Urban Consumers (Current Series), multiscreen data, not seasonally adjusted, 0200 Midwest, Current, All Items, Monthly, 12-month Percent Change and Annual Data.

[46] The 2022 and 2023 inflation rates are available at *https://www.federalreserve.gov/monetarypolicy/files/fomcprojtabl20230920.pdf.* We used the Median Core PCE June Projection found in table 1. (Downloaded September 2023).

TABLE 31—ADJUSTED OPERATING EXPENSES FOR DISTRICT THREE

	District Three		
	Undesignated	Designated	Total
Total Operating Expenses (Step 1)	$3,195,714	$873,705	$4,069,419
2022 Inflation Modification (@8%)	255,657	69,896	325,553
2023 Inflation Modification (@3.9%)	134,603	36,800	171,403
2024 Inflation Modification (@2.6%)	93,235	25,490	118,725
Adjusted 2024 Operating Expenses	3,679,209	1,005,891	4,685,100

* Figures are rounded to the nearest dollar and may not sum to totals.

C. Step 3: Estimate Number of Registered Pilots and Apprentice Pilots

In accordance with the text in § 404.103, the Coast Guard estimates the number of registered pilots in each district. We determine the number of registered pilots based on data provided by the WGLPA. Using these numbers, we estimate that there will be 23 registered pilots in 2024 in District Three, including the additional pilot granted by the Director. We determine the number of apprentice pilots based on input from the district on anticipated retirements and staffing needs. Using these numbers, the Coast Guard estimates that there will be two apprentice pilots in 2024 in District Three. Based on the seasonal staffing model discussed in the 2017 ratemaking (82 FR 41466) and rounding introduced in the 2022 ratemaking (87 FR 18488), a certain number of pilots are assigned to designated waters, and a certain number of pilots are assigned to undesignated waters, as shown in table 32. These numbers are used to determine the amount of revenue needed in their respective areas.

TABLE 32—AUTHORIZED PILOTS FOR DISTRICT THREE

Item	District Three
Maximum Number of Pilots (per § 401.220(a)) *	22
2024 Authorized Pilots (total)	23
Pilots Assigned to Designated Areas	5
Pilots Assigned to Undesignated Areas	18
2024 Apprentice Pilots	2

* For a detailed calculation, refer to the Great Lakes Pilotage Rates—2017 Annual Review final rule, which contains the staffing model. See 82 FR 41466, table 6 at 41480 (August 31, 2017).

D. Step 4: Determine Target Pilot Compensation Benchmark and Apprentice Pilot Wage Benchmark

In this step, we determine the total pilot compensation for each area. Because we are issuing an ''interim'' ratemaking this year, we follow the procedure outlined in paragraph (b) of § 404.104, which adjusts the existing compensation benchmark by inflation. First, we adjust the 2023 target compensation benchmark of $424,398 by 1.2 percent for a value of $429,491. This accounts for the difference in actual third quarter 2023 ECI inflation, which is 3.9 percent, and the 2023 PCE estimate of 2.7 percent.[47] [48] The second step accounts for projected inflation from 2023 to 2024, which is 2.6 percent.[49] Based on the projected 2024 inflation estimate, the target compensation benchmark for 2024 is $440,658 per pilot. The apprentice pilot wage benchmark is 36 percent of the target pilot compensation, or $158,637 ($440,658 × 0.36).

In accordance with § 404.104(c), we use the revised target individual compensation level to derive the total pilot compensation by multiplying the individual target compensation by the estimated number of registered pilots for District Three, as shown in table 33. We estimate that the number of apprentice pilots with limited registration needed for District Three in the 2024 season will be two. The total target wages for apprentices are allocated with 21 percent for the designated area and 79 percent (52 percent + 27 percent) for the undesignated area, in accordance with the allocation for operating expenses.

TABLE 33—TARGET COMPENSATION FOR DISTRICT THREE

	District Three		
	Undesignated	Designated	Total
Target Pilot Compensation	$440,658	$440,658	$440,658
Number of Pilots	18	5	23
Total Target Pilot Compensation	$7,931,844	$2,203,290	$10,135,134
Target Apprentice Pilot Compensation	$158,637	$158,637	$158,637

TABLE 33—TARGET COMPENSATION FOR DISTRICT THREE—Continued

	District Three		
	Undesignated	Designated	Total
Number of Apprentice Pilots	.....	.....	2
Total Target Apprentice Pilot Compensation	$250,646	$66,628	$317,274

E. Step 5: Project Working Capital Fund

Next, the Coast Guard calculates the working capital fund revenues needed for each area. We first add the figures for projected operating expenses, total target pilot compensation, and total target apprentice pilot wage for each area, and then, we find the preceding year's average annual rate of return for new issues of high-grade corporate securities. Using Moody's data, the number is 4.0742 percent, rounded.[50] By multiplying the two figures, we obtain the working capital fund contribution for each area, as shown in table 34.

TABLE 34—WORKING CAPITAL FUND CALCULATION FOR DISTRICT THREE

	District Three		
	Undesignated	Designated	Total
Adjusted Operating Expenses (Step 2)	$3,679,209	$1,005,891	$4,685,100
Total Target Pilot Compensation (Step 4)	7,931,844	2,203,290	10,135,134
Total Target Apprentice Pilot Compensation (Step 4)	250,646	66,628	317,274
Total 2024 Expenses	11,861,699	3,275,809	15,137,508
Working Capital Fund (4.0742%)	483,269	133,463	616,732

F. Step 6: Project Needed Revenue

In this step, we add all the expenses accrued to derive the total revenue needed for each area. These expenses include the projected operating expenses (from Step 2), the total target pilot compensation (from Step 4), and the working capital fund contribution (from Step 5). The calculations are shown in table 35.

TABLE 35—REVENUE NEEDED FOR DISTRICT THREE

	District Three		
	Undesignated	Designated	Total
Adjusted Operating Expenses (Step 2)	$3,679,209	$1,005,891	$4,685,100
Total Target Pilot Compensation (Step 4)	7,931,844	2,203,290	10,135,134
Total Target Apprentice Pilot Compensation (Step 4)	250,646	66,628	317,274
Working Capital Fund (Step 5)	483,269	133,463	616,732
Total Revenue Needed	12,344,968	3,409,272	15,754,240

G. Step 7: Calculate Initial Base Rates

Having determined the revenue needed for each area in the previous six steps, we divide that number by the expected number of traffic hours to develop an hourly rate.

Step 7 is a two-part process. In the first part, the 10-year traffic average in District Three is calculated using the total time on task or pilot bridge hours. To calculate the time on task for each district from 2013–2020, the Coast Guard used billing data from SeaPro. The data is pulled from the system filtering by district, year, job status (including only processed jobs), and flagging code (including only U.S. jobs).

Because we calculate separate figures for designated and undesignated waters, there are two parts for each calculation. For 2021–2022, the Coast Guard used figures provided by the associations through SeaPro monthly reports. Where bridge hour figures did not match between the monthly reports and the weighted factor reports, the Coast Guard opted to use the figures from the monthly report for Step 7. We show these values in table 36.

[50] Moody's Seasoned Aaa Corporate Bond Yield, average of 2022 monthly data. The Coast Guard uses the most recent year of complete data. Moody's is taken from Moody's Investors Service, which is a bond credit rating business of Moody's Corporation. Bond ratings are based on creditworthiness and risk. The rating of ''Aaa'' is the highest bond rating assigned with the lowest credit risk. See *https://fred.stlouisfed.org/series/AAA.* (Last accessed 03/21/2023.)

TABLE 36—TIME ON TASK FOR DISTRICT THREE

[Hours]

Year	District Three	
	Undesignated	Designated
2022	23,914	3,345
2021	18,149	2,484
2020	23,678	3,520
2019	24,851	3,395
2018	19,967	3,455
2017	20,955	2,997
2016	23,421	2,769
2015	22,824	2,696
2014	25,833	3,835
2013	17,115	2,631
Average	22,071	3,113

Next, we derive the initial hourly rate by dividing the revenue needed by the average number of hours for each area. This produces an initial rate, which is necessary to produce the revenue needed for each area, assuming the amount of traffic is as expected. The calculations for District Three are set forth in table 37.

TABLE 37—INITIAL RATE CALCULATIONS FOR DISTRICT THREE

	Undesignated	Designated
Revenue needed (Step 6)	$12,344,968	$3,409,272
Average time on task (hours)	22,071	3,113
Initial rate	$559	$1,095

H. Step 8: Calculate Average Weighting Factors by Area

In this step, we calculate the average weighting factor for each designated and undesignated area. We collect the weighting factors, set forth in 46 CFR 401.400, for each vessel trip. Using this data, we calculate the average weighting factor for each area using the data from each vessel transit from 2014 to 2021, as shown in tables 38 and 39. Data for 2022 was provided by the associations in a weighting factor report.

TABLE 38—AVERAGE WEIGHTING FACTOR FOR DISTRICT THREE, UNDESIGNATED AREAS

* Figures may not sum due to rounding.

I. Step 9: Calculate Revised Base Rates

In this step, we revise the base rates, so that the total cost of pilotage will be equal to the revenue needed after considering the impact of the weighting factors. To do this, we divide the initial base rates calculated in Step 7 by the average weighting factors calculated in Step 8, as shown in table 40.

TABLE 40—REVISED BASE RATES FOR DISTRICT THREE

Area	Initial rate (Step 7)	Average weighting factor (Step 8)	Revised rate (initial rate ÷ average weighting factor)
District Three: Undesignated	$559	1.30	$430
District Three: Designated	1,095	1.31	836

J. Step 10: Review and Finalize Rates

In this step, the Director reviews the rates set forth by the staffing model and ensures that they meet the goal of ensuring safe, efficient, and reliable pilotage. To establish this, the Director considers whether the rates incorporate appropriate compensation for pilots to handle heavy traffic periods, and whether there are enough pilots to handle those heavy traffic periods. The Director also considers whether the rates cover operating expenses and infrastructure costs, taking average traffic and weighting factors into consideration. Based on this information, the Director is not establishing any alterations to the rates in this step. We modified § 401.405(a)(5) and (6) to reflect the rates shown in table 41.

TABLE 41—FINAL RATES FOR DISTRICT THREE

Area	Name	Final 2023 pilotage rate	Final 2024 pilotage rate
District Three: Designated	St. Mary's River	$834	$836
District Three: Undesignated	Lakes Huron, Michigan, and Superior	410	430

X. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on these statutes or Executive orders.

A. Regulatory Planning and Review

Executive Orders 12866 (Regulatory Planning and Review), as amended by

Executive Order 14094 (Modernizing Regulatory Review), and 13563 (Improving Regulation and Regulatory Review) direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility.

The Office of Management and Budget (OMB) has not designated this rule a significant regulatory action under section 3(f) of Executive Order 12866, as amended by Executive Order 14094. Accordingly, OMB has not reviewed this regulatory action.

The purpose of this final rule is to establish new pilotage rates, as 46 U.S.C. 9303(f) requires that rates be established or reviewed and adjusted each year. The statute also requires that base rates be established by a full ratemaking at least once every 5 years, and, in years when base rates are not established, they must be reviewed and, if necessary, adjusted. The Coast Guard concluded the last full ratemaking in February of 2023.[51]

For this final rule, the Coast Guard estimates an increase in cost of approximately $2.62 million to industry from 2023 to 2024. This is approximately a 7-percent increase because of the change in revenue needed in 2024 compared to the revenue needed in 2023. See table 42.

TABLE 42—ECONOMIC IMPACTS DUE TO RATE CHANGES

Change	Description	Affected population	Costs	Benefits
Rate changes	In accordance with 46 U.S.C. Chapter 93, the Coast Guard is required to review and adjust pilotage rates annually.	Owners and operators of 296 vessels transiting the Great Lakes system annually, 58 United States Great Lakes pilots, 6 apprentice pilots, and 3 pilotage associations.	Increase of $2,621,471 due to change in revenue needed for 2024 ($40,280,666) from revenue needed for 2023 ($37,659,195) as shown in table 43.	New rates cover an association's necessary and reasonable operating expenses. Promotes safe, efficient, and reliable pilotage service on the Great Lakes. Provides fair compensation, adequate training, and sufficient rest periods for pilots. Ensures the association receives sufficient revenues to fund future improvements.

The Coast Guard is required to review and adjust pilotage rates on the Great Lakes annually. See section III., Basis and Purpose, of this preamble for detailed discussions of the legal basis and purpose for this rulemaking. Based on our annual review for this rulemaking, we are adjusting the pilotage rates for the 2024 shipping season to generate sufficient revenues for each district to reimburse its necessary and reasonable operating expenses, fairly compensate properly trained and rested pilots, and provide an appropriate working capital fund to use for improvements. The result is an increase in rates for both areas in District One, the designated area for District Two, and both areas in District Three. There is a decrease in rates for the undesignated area in District Two. These changes also lead to a net increase in the cost of service to shippers. The change in per-unit cost to each individual shipper depends on their area of operation.

A detailed discussion of our economic impact analysis follows.

Affected Population

This final rule affects United States Great Lakes pilots and apprentice pilots, the 3 pilot associations, and the owners and operators of 296 oceangoing vessels that transit the Great Lakes annually on average from 2020 to 2022. The Coast Guard estimates that there will be 58 registered pilots and 6 apprentice pilots during the 2024 shipping season, an increase of 2 pilots and decrease of 1 apprentice pilot from the proposed numbers in the NPRM. The shippers affected by these rate changes are those owners and operators of domestic vessels operating ''on register'' (engaged in foreign trade) and the owners and operators of non-Canadian foreign vessels on routes within the Great Lakes system. These owners and operators must have pilots or pilotage service as required by 46 U.S.C. 9302. There is no minimum tonnage limit or exemption for these vessels.

The statute applies only to commercial vessels, not to recreational vessels. United States-flagged vessels not operating on register, and Canadian ''lakers,'' which account for most commercial shipping on the Great Lakes, are not required by 46 U.S.C. 9302 to have pilots. However, these United States- and Canadian-flagged lakers may voluntarily choose to engage a Great Lakes registered pilot. Vessels that are U.S.-flagged may opt to have a pilot for varying reasons, such as unfamiliarity with designated waters and ports, or for insurance purposes.

The Coast Guard used billing information from the years 2020 through 2022 from the SeaPro to estimate the average annual number of vessels affected by the rate adjustment. SeaPro tracks data related to managing and coordinating the dispatch of pilots on the Great Lakes, and billing in accordance with the services. As described in Step 7 of the ratemaking methodology, we use a 10-year average to estimate the traffic. We used 3 years of the most recent billing data to estimate the affected population. The associations did not provide updated trip-level billing data for 2022, as they did for 2021, to use to update the number of vessels or customers in this final rule, so we used what was provided in the NPRM. We believe that using 3 years of billing data is a better representation of the vessel population

[51] Great Lakes Pilotage Rates—2023 Annual Ratemaking and Review of Methodology (88 FR 12226), published February 27, 2023.

currently using pilotage services and impacted by this final rule.

We found that 437 unique vessels used pilotage services during the years 2020 through 2022. That is, these vessels had a pilot dispatched to the vessel, and billing information was recorded in SeaPro. Of these vessels, 407 were foreign-flagged vessels, and 30 were U.S.-flagged vessels. As stated previously, U.S.-flagged vessels not operating on register are not required to have a registered pilot per 46 U.S.C. 9302, but they can voluntarily choose to have one.

Numerous factors affect vessel traffic, which varies from year to year. Therefore, rather than using the total number of vessels over the time period, the Coast Guard took an average of the unique vessels using pilotage services from the years 2020 through 2022 as the best representation of vessels estimated to be affected by the rates in this final rule. From 2020 through 2022, an average of 296 vessels used pilotage services annually.[52] On average, 280 of these vessels were foreign-flagged and 16 were U.S.-flagged vessels that voluntarily opted into the pilotage service (these figures are rounded averages).

Total Cost to Shippers

The rate changes resulting from this adjustment to the rates result in a net increase in the cost of service to shippers. However, the change in per-unit cost to each individual shipper is dependent on their area of operation.

The Coast Guard estimates the effect of the rate changes on shippers by comparing the total projected revenues needed to cover costs in 2023 with the total projected revenues to cover costs in 2024. We set pilotage rates so pilot associations receive enough revenue to cover their necessary and reasonable expenses. Shippers pay these rates when they engage a pilot as required by 46 U.S.C. 9302. Therefore, the aggregate payments of shippers to pilot associations are equal to the projected necessary revenues for pilot associations. The revenues each year represent the total costs that shippers must pay for pilotage services. The change in revenue from the previous year is the additional cost to shippers discussed in this final rule.

The impacts of the rate changes on shippers are estimated from the district pilotage projected revenues (shown in tables 11, 23, and 35 of this preamble). The Coast Guard estimates that, for the 2024 shipping season, the projected revenue needed for all three districts is $40,280,666.

To estimate the change in cost to shippers from this final rule, the Coast Guard compared the 2024 total projected revenues to the 2023 projected revenues. Because we review and prescribe rates for Great Lakes pilotage annually, the effects are estimated as a single-year cost, rather than annualized over a 10-year period. In the 2023 final rule, we estimated the total projected revenue needed for 2023 as 37,659,195.[53] This is the best approximation of 2023 revenues, as, at the time of publication of this final rule, the Coast Guard does not have enough audited data available for the 2023 shipping season to revise these projections. Table 43 shows the revenue projections for 2023 and 2024 and details the additional cost increases to shippers by district as a result of the rate changes in traffic in Districts One, Two, and Three.

TABLE 43—EFFECT OF THE FINAL RULE BY DISTRICT

[U.S. Dollars; Non-discounted]

Area	Revenue needed in 2023	Revenue needed in 2024	Additional costs of this rule
Total, District One	$12,609,601	$13,695,935	$1,086,334
Total, District Two	10,392,542	10,830,491	437,949
Total, District Three	14,657,052	15,754,240	1,097,188
System Total	37,659,195	40,280,666	2,621,471

* All figures are rounded to the nearest dollar and may not sum.

The resulting difference between the projected revenue in 2023 and the projected revenue in 2024 is the annual change in payments from shippers to pilots as a result of the rate changes in this final rule. The effect of the rate changes to shippers varies by area and district. After considering the change in pilotage rates, the rate changes lead to affected shippers operating in District One experiencing an increase in payments of $1,086,334 over the previous year. Affected shippers operating in District Two and District Three experienced an increase in payments of $437,949 and $1,097,188, respectively, when compared with 2023. The overall adjustment in payments increased payments by shippers to $2,621,471 across all three districts (a 7-percent increase when compared with 2023). Again, because the Coast Guard reviews and sets rates for Great Lakes pilotage annually, we estimate the impacts as single-year costs rather than annualizing them over a 10-year period.

Table 44 shows the difference in revenue by revenue-component from 2023 to 2024 and presents each revenue-component as a percentage of the total revenue needed. In both 2023 and 2024, the largest revenue-component was target pilotage compensation (63 percent of total revenue needed in 2023 and 63 percent of total revenue needed in 2024), followed by operating expenses (32 percent of total revenue needed in 2023 and 30 percent of total revenue needed in 2024). The large increase in the working capital fund, 59 percent from 2023 to 2024, is driven by a large increase in the target rate of return on investment from 2.7033 percent in 2021 to 4.0742 percent in 2022.[54]

[52] Some vessels entered the Great Lakes multiple times in a single year, affecting the average number of unique vessels using pilotage services in any given year.

[53] 88 FR 12226. See table 42. *https://www.govinfo.gov/content/pkg/FR-2023-02-27/pdf/2023-03212.pdf.* (Last accessed 5/17/23.)

[54] Moody's Seasoned Aaa Corporate Bond Yield, average of 2022 monthly data. The Coast Guard uses the most recent year of complete data. Moody's is taken from Moody's Investors Service, which is a bond credit rating business of Moody's Corporation. Bond ratings are based on creditworthiness and risk. The rating of ''Aaa'' is the highest bond rating assigned with the lowest credit risk. See *https://fred.stlouisfed.org/series/AAA.* (Last accessed 03/21/2023.)

TABLE 44—DIFFERENCE IN REVENUE BY REVENUE-COMPONENT

Revenue component	Revenue needed in 2023	Percentage of total revenue needed in 2023 (%)	Revenue needed in 2024	Percentage of total revenue needed in 2024	Difference (2024 revenue–2023 revenue)	Percentage change from previous year (%)
Adjusted Operating Expenses	$11,984,950	32	$12,193,810	30	$208,860	2
Total Target Pilot Compensation	23,766,288	63	25,558,164	63	1,791,876	8
Total Target Apprentice Pilot Compensation	916,700	2	951,822	2	35,122	4
Working Capital Fund	991,257	3	1,576,870	4	585,613	59
Total Revenue Needed	37,659,195	100	40,280,666	100	2,621,471	7

* All figures are rounded to the nearest dollar and may not sum.

As stated above, we estimate a total increase in revenue needed by the pilot associations of $2,621,471. This represents an increase in revenue needed for target pilot compensation of $1,791,876, for the total apprentice pilot wage benchmark of $35,122, $208,860 for adjusted operating expenses, and $585,613 for an increase in the revenue needed for the working capital fund.

The change in revenue needed for pilot compensation, $1,791,876, is due to two factors: (1) The changes to adjust 2023 pilotage compensation to account for the difference between actual ECI inflation [55] (3.9 percent) and predicted PCE inflation [56] (2.7 percent) for 2023; and (2) projected inflation of pilotage compensation in Step 2 of the methodology, using predicted inflation through 2024.

The target compensation is $440,658 per pilot in 2024, compared to $424,398 in 2023. The changes to modify the 2023 pilot compensation to account for the difference between predicted and actual inflation increase the 2023 target compensation value by 1.2 percent. As shown in table 45, this inflation adjustment increases total compensation by $5,093 per pilot, and the total revenue needed by $295,381, when accounting for all 58 pilots.

TABLE 45—CHANGE IN REVENUE RESULTING FROM THE CHANGE TO INFLATION OF PILOT COMPENSATION CALCULATION IN STEP 4

2023 Target Pilot Compensation	$424,398
Adjusted 2023 Compensation ($424,398 × 1.012)	$429,491
Difference between Adjusted Target 2023 Compensation and Target 2023 Compensation ($429,491 − $424,398)	$5,093
Increase in total Revenue for 58 Pilots ($5,093 × 58)	$295,381

* All figures are rounded to the nearest dollar and may not sum.

Similarly, table 46 shows the impact of the difference between predicted and actual inflation on the target apprentice pilot compensation benchmark. The inflation adjustment increases the compensation benchmark by $1,833 per apprentice pilot, and the total revenue needed by $11,000 when accounting for all six apprentice pilots.

TABLE 46—CHANGE IN REVENUE RESULTING FROM THE CHANGE TO INFLATION OF APPRENTICE PILOT COMPENSATION CALCULATION IN STEP 4

Target Apprentice Pilot Compensation	$152,783
Adjusted Compensation ($152,783 × 1.012)	$154,617
Difference between Adjusted Target Compensation and Target Compensation ($154,617 − $152,783)	$1,833
Increase in total Revenue for Apprentices ($1,833 × 6)	$11,000

* All figures are rounded to the nearest dollar and may not sum.

As noted earlier, the Coast Guard predicts that 58 pilots will be needed for the 2024 season. This is two more pilots than in the 2023 final rule, which leads to an estimated $871,130 increase in revenue needed for pilot compensation, as shown in table 47.

TABLE 47—CHANGE IN REVENUE RESULTING FROM INCREASE OF TWO PILOTS

2024 Target Compensation	$440,658
Total Number of New Pilots	2
Total Cost of new Pilots ($440,658 × 2)	$881,316
Difference between Adjusted Target 2023 Compensation and Target 2023 Compensation ($429,491 − $424,398)	$5,093
Increase in Revenue for 2 Pilots ($5,093 × 2)	$10,186

[55] Employment Cost Index, Total Compensation for Private Industry workers in Transportation and Material Moving, Annual Average, Series ID: CIU2010000520000A. *https://beta.bls.gov/dataViewer/view/timeseries/CIU2010000520000A.* (Last accessed 08/28/23.)

[56] Table 1 Summary of Economic Projections, Median PCE Inflation. *https://www.federalreserve.gov/monetarypolicy/files/fomcprojtabl20220316.pdf.* (Last accessed 5/17/23.)

TABLE 47—CHANGE IN REVENUE RESULTING FROM INCREASE OF TWO PILOTS—Continued

Net Increase in total Revenue for 2 Pilots ($881,316 − $10,186)	$871,130

* All figures are rounded to the nearest dollar and may not sum.

Similarly, the Coast Guard predicts that six apprentice pilots will be needed for the 2024 season. This is the same as in the 2023 season, so there is no estimated change in revenue needed for pilot compensation, apart from the change in inflation accounted for in table 48.

Another increase, $647,699, is the result of increasing compensation for the 58 pilots to account for future inflation of 2.6 percent in 2024. This increased total compensation by $11,167 per pilot, as shown in table 48.

TABLE 48—CHANGE IN REVENUE RESULTING FROM INFLATING 2023 COMPENSATION TO 2024

Adjusted 2023 Compensation	$429,491
2024 Target Compensation ($429,491 × 1.026)	$440,658
Difference between Adjusted 2023 Compensation and Target 2024 Compensation ($440,658 − $429,491)	$11,167
Increase in total Revenue for 58 Pilots ($11,167 × 58)	$647,699

* All figures are rounded to the nearest dollar and may not sum.

Similarly, an increase of $24,122 is the result of increasing compensation for the 6 apprentice pilots to account for future inflation of 2.6 percent in 2024. This increased total compensation by $4,020 per apprentice pilot, as shown in table 49.

TABLE 49—CHANGE IN REVENUE RESULTING FROM INFLATING 2023 APPRENTICE PILOT COMPENSATION TO 2024

Adjusted 2023 Compensation	$154,617
2024 Target Compensation ($440,658 × 36%)	$158,637
Difference between Adjusted Compensation and Target Compensation ($158,637 − $154,617)	$4,020
Increase in total Revenue for 6 Apprentices ($4,020 × 6)	$24,122

* All figures are rounded to the nearest dollar and may not sum.

Table 50 presents the percentage change in revenue by area and revenue-component, excluding surcharges, as they are applied at the district level.[57]

[57] The 2023 projected revenues are from the Great Lakes Pilotage Rate—2023 Annual Review and Revisions to Methodology final rule (88 FR 12226), tables 10, 22, and 34. The 2024 projected revenues are from tables 11, 23, and 35 of this rule.

TABLE 50—DIFFERENCE IN REVENUE BY REVENUE-COMPONENT AND AREA

	Adjusted operating expenses			Total target pilot compensation			Total target apprentice pilot compensation			Working capital fund			Total revenue needed		
	2023	2024	Percentage change	2023	2024	Percentage change	2023	2024	Percentage change	2023	2024	Percentage change	2023	2024	Percentage change
District One:															
Designated	$2,599,777	$2,851,215	10	$4,243,980	$4,406,580	4	$183,340	$285,547	56	$189,966	$307,331	62	$7,217,063	$7,850,673	8.8
Undesignated	1,733,186	1,900,809	10	3,395,184	3,525,264	4	122,227	190,364	56	141,941	228,825	61	5,392,538	5,845,262	8.4

*All figures are rounded to the nearest dollar and may not sum.

Benefits

This final rule allows the Coast Guard to meet the requirements in 46 U.S.C. 9303 to review the rates for pilotage services on the Great Lakes. The rate changes promote safe, efficient, and reliable pilotage service on the Great Lakes by (1) ensuring that rates cover an association's operating expenses, (2) providing fair pilot compensation, adequate training, and sufficient rest periods for pilots, and (3) ensuring pilot associations produce enough revenue to fund future improvements. The rate changes also help recruit and retain pilots, which ensures enough pilots are available to meet peak shipping demand, helping to reduce delays caused by pilot shortages.

B. Small Entities

Under the Regulatory Flexibility Act, 5 U.S.C. 601–612, we have considered whether this rule would have a significant economic impact on a substantial number of small entities. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

For this final rule, the Coast Guard reviewed recent company size and ownership data for the vessels identified in SeaPro, and we reviewed business revenue and size data provided by publicly available sources such as ReferenceUSA.[58] As described in section II., Executive Summary, and section X., Regulatory Analyses, of this preamble, we found that 437 unique vessels used pilotage services during the years 2020 through 2022. These vessels are owned by 57 entities, of which 44 are foreign entities that operate primarily outside the United States, and the remaining 13 entities are U.S. entities. We compared the revenue and employee data found in the company search to the Small Business Administration's (SBA) small business threshold, as defined in the SBA's ''Table of Size Standards'' for small businesses, to determine how many of these companies are considered small entities.[59] Table 51 shows the North American Industry Classification System (NAICS) codes of the U.S. entities and the small entity standard size established by the SBA, either number of employees or annual revenue.

TABLE 51—NAICS CODES AND SMALL ENTITIES SIZE STANDARDS

NAICS	Description	Small entity size standard
238910	Site Preparation Contractors	$19,000,000.
425120	Wholesale Trade Agents And Brokers	125 Employees.
483211	Inland Water Freight Transportation	1,050 Employees.
484230	Specialized Freight (Except Used Goods) Trucking, Long-Distance	$34,000,000.
488330	Navigational Services to Shipping	$47,000,000.
488390	Other Support Activities for Water Transportation	$47,000,000.
523910	Miscellaneous Intermediation	
561510	Travel Agencies	$25,000,000.
561599	All Other Travel Arrangement And Reservation Services	$32,500,000.
713930	Marinas	$11,000,000.
813910	Business Associations	$15,500,000.

Of the 13 U.S. entities, 4 exceed the SBA's small business standards for small entities, and 1 only provided service to a public vessel. To estimate the potential impact on the remaining eight small entities, the Coast Guard used their 2022 invoice data to estimate their pilotage costs in 2024. We first increase their 2022 costs by 16 percent to account for the changes in pilotage rates resulting from the 2023 final rule, then by 7 percent to account for changes resulting from this final rule. Then, we estimated the change in cost to these entities resulting from this final rule by subtracting their estimated 2023 pilotage costs from their estimated 2024 pilotage costs, and found the average costs to small firms is approximately $10,075, with a range of $6,419 to $16,255. We then compared the estimated change in pilotage costs between 2023 and 2024 with each firm's annual revenue. For two entities, the impact of the change in estimated pilotage expenses is above 1 percent of revenues, at 3.27 percent and 4.28 percent.

In addition to the owners and operators discussed previously, three U.S. entities that receive revenue from pilotage services are affected by this final rule. These are the three pilot associations that provide and manage pilotage services within the Great Lakes districts. These associations are designated collectively as the Lake Carrier's Association, as well as individually by each separate district association, all with the same NAICS code, ''Business Association'' [60] with a small-entity size standard of $15,500,000 in annual revenue. Based on the reported revenues from audit reports, the associations individually qualify as small entities, but are not considered small by the reported revenue of the Lake Carrier's Association.

Finally, the Coast Guard did not find any small not-for-profit organizations that are independently owned and operated, and are not dominant in their fields, that are impacted by this final rule. We also did not find any small governmental jurisdictions with populations of fewer than 50,000 people that are impacted by this final rule. Based on this analysis, we conclude this final rule does not affect a substantial number of small entities, nor have a significant economic impact on any of the affected entities.

Therefore, the Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact

[58] See *https://resource.referenceusa.com/.* (Last accessed 05/18/2023.)

[59] See *https://www.sba.gov/document/support--table-size-standards.* (Last accessed 5/17/23.) SBA has established a ''Table of Size Standards'' for small businesses that sets small business size standards by NAICS code. ''A size standard, which is usually stated in number of employees or average annual receipts (''revenues''), represents the largest size that a business (including its subsidiaries and affiliates) may be in order to remain classified as a small business for SBA and Federal contracting programs.''

[60] In previous rulemakings, the associations used a different NAICS code, 483212 Inland Water Passenger Transportation. NAICS code 283212 had a size standard of 500 employees as of the latest SBA small business size table [published March 17, 2023] and, therefore, designated the associations as small entities. The change in NAICS code comes from an update to the association's ReferenceUSA profile in February 2022.

on a substantial number of small entities.

C. Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996, Public Law 104–121, we offer to assist small entities in understanding this rule so that they can better evaluate its effects on them and participate in the rulemaking. If the final rule affects your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please call or email the person in the **FOR FURTHER INFORMATION CONTACT** section of this final rule. The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247).

D. Collection of Information

This rule calls for no new collection of information nor does it impact an existing collection of information under the Paperwork Reduction Act of 1995, 44 U.S.C. 3501–3520.

E. Federalism

A rule has implications for federalism under Executive Order 13132 (Federalism) if it has a substantial direct effect on States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under Executive Order 13132 and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132. Our analysis follows.

Congress directed the Coast Guard to establish ''rates and charges for pilotage services.'' See 46 U.S.C. 9303(f). This regulation is issued pursuant to that statute and is preemptive of State law as specified in 46 U.S.C. 9306. Under 46 U.S.C. 9306, a ''State or political subdivision of a State may not regulate or impose any requirement on pilotage on the Great Lakes.'' As a result, States or local governments are expressly prohibited from regulating within this category. Therefore, this rule is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

It is well settled that States may not regulate in categories reserved for regulation by the Coast Guard. It is also well settled that all of the categories covered in 46 U.S.C. 3306, 3703, 7101, and 8101 (design, construction, alteration, repair, maintenance, operation, equipping, personnel qualification, and manning of vessels), as well as the reporting of casualties and any other category in which Congress intended the Coast Guard to be the sole source of a vessel's obligations, are within the field foreclosed from regulation by the States. *See* the Supreme Court's decision in *United States* v. *Locke* and *Intertanko* v. *Locke,* 529 U.S. 89, 120 S.Ct. 1135 (2000).

F. Unfunded Mandates

The Unfunded Mandates Reform Act of 1995, 2 U.S.C. 1531–1538, requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Although this rule will not result in such expenditure, we do discuss the effects of this rule elsewhere in this preamble.

G. Taking of Private Property

This rule will not cause a taking of private property or otherwise have taking implications under Executive Order 12630 (Governmental Actions and Interference with Constitutionally Protected Property Rights).

H. Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988 (Civil Justice Reform) to minimize litigation, eliminate ambiguity, and reduce burden.

I. Protection of Children

We have analyzed this rule under Executive Order 13045 (Protection of Children from Environmental Health Risks and Safety Risks). This rule is not an economically significant rule and will not create an environmental risk to health or risk to safety that might disproportionately affect children.

J. Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175 (Consultation and Coordination with Indian Tribal Governments), because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

K. Energy Effects

We have analyzed this rule under Executive Order 13211 (Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use). We have determined that it is not a ''significant energy action'' under that order because it is not a ''significant regulatory action'' under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy.

L. Technical Standards

The National Technology Transfer and Advancement Act, codified as a note to 15 U.S.C. 272, directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through OMB, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (*e.g.,* specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

M. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. A Record of Environmental Consideration supporting this determination is available in the docket. For instructions on locating the docket, see the **ADDRESSES** section of this preamble. This rule categorically excluded under paragraphs A3 and L54 of Appendix A,

Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. Paragraph A3 pertains to the promulgation of rules of the following nature: (a) those of a strictly administrative or procedural nature; (b) those that implement, without substantive change, statutory or regulatory requirements; (c) those that implement, without substantive change, procedures, manuals, and other guidance documents; (d) those that interpret or amend an existing regulation without changing its environmental effect; (e) those that provide technical guidance on safety and security matters; and (f) those that provide guidance for the preparation of security plans. Paragraph L54 pertains to regulations which are editorial or procedural.

This rule involves adjusting the pilotage rates for the 2024 shipping season to account for changes in district operating expenses, changes in the number of pilots, and anticipated inflation. This rule is not part of a larger action, and it will not result in significant impacts to the human environment. All changes are consistent with the Coast Guard's maritime safety missions.

List of Subjects in 46 CFR Part 401

Administrative practice and procedure, Great Lakes; Navigation (water), Penalties, Reporting and recordkeeping requirements, Seamen.

For the reasons discussed in the preamble, the Coast Guard amends 46 CFR part 401 as follows:

PART 401—GREAT LAKES PILOTAGE REGULATIONS

■ 1. The authority citation for part 401 continues to read as follows:

Authority: 46 U.S.C. 2103, 2104(a), 6101, 7701, 8105, 9303, 9304; DHS Delegation No. 00170.1, Revision No. 01.3, paragraphs (II)(92)(a), (d), (e), (f).

■ 2. Amend § 401.405 by revising paragraphs (a)(1) through (6) to read as follows:

§ 401.405 Pilotage rates and charges.

(a) * * *

(1) The St. Lawrence River is $927;

(2) Lake Ontario is $608;

(3) Lake Erie is $597

(4) The navigable waters from Southeast Shoal to Port Huron, MI is $667;

(5) Lakes Huron, Michigan, and Superior is $430; and

(6) The St. Mary's River is $836.

* * * * *

Dated: January 31, 2024.

W.R. Arguin,

Rear Admiral, U.S. Coast Guard, Assistant Commandant for Prevention Policy.

[FR Doc. 2024–02410 Filed 2–8–24; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 240205–0038; RTID 0648–XD564]

Fisheries of the Northeastern United States; Monkfish Fishery; 2024 Monkfish Specifications

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS is implementing specifications for the 2024 monkfish fishery. This action is necessary to ensure allowable monkfish harvest levels that will prevent overfishing and allow harvesting of optimum yield. This action is intended to establish the allowable 2024 harvest levels, consistent with the Monkfish Fishery Management Plan and previously announced multi-year specifications.

DATES: The final specifications for the 2024 monkfish fishery are effective May 1, 2024, through April 30, 2025.

FOR FURTHER INFORMATION CONTACT: Spencer Talmage, Fishery Policy Analyst, (978) 281–9232.

SUPPLEMENTARY INFORMATION: The New England and Mid-Atlantic Fishery Management Councils (together, the Councils) jointly manage the monkfish fishery. The Monkfish Fishery Management Plan includes a specifications process that requires the Councils to recommend quotas on a triennial basis. This action finalizes 2024 specifications approved by the Councils in Framework Adjustment 13 to the Monkfish Fishery Management Plan, which included specifications for fishing years 2023–2025.

On August 11, 2023, NMFS published a final rule approving Framework 13 measures for the 2023 fishing year (88 FR 54495), based on a recent stock assessment update and consistent with the New England Council's Scientific and Statistical Committee recommendations. At that time, NMFS also projected a continuation of those same specifications for 2024 and 2025. The final total allowable landings in both the Northern and Southern Fishery Management Areas for 2024 are summarized in table 1. The 2024 measures are the same as those implemented in 2023.

TABLE 1—MONKFISH SPECIFICATIONS FOR FISHING YEAR 2024

[in metric tons]

Catch limits	Northern area	Southern area
Acceptable Biological Catch	6,224	5,861
Annual Catch Limit	6,224	5,861
Management Uncertainty (3 percent)	187	176
Annual Catch Target (Total Allowable Landings + discards)	6,038	5,685
Expected Discards	729	2,205
Total Allowable Landings	5,309	3,481

NMFS has reviewed the available information on fishing years 2022 and 2023. There have been no annual catch limit overages, nor is there any new biological information that would require altering the projected 2024 specifications. Based on this, we are implementing the fishing year 2024 specifications announced in the Framework 13 final rule. The 2024 specifications will be effective until April 30, 2025.

This final rule makes no modification to other management measures for the monkfish fishery (*e.g.,* trip limits, Days-At-Sea allocations, *etc.*).

Classification

Pursuant to section 304(b)(3) of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), the NMFS Assistant Administrator has determined that this final rule is consistent with the Monkfish Fishery Management Plan, other provisions of the Magnuson-Stevens Act, and other applicable law.

This final rule is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(3)(B), we find good cause to waive prior public notice and opportunity for public comment on the catch limit and allocation adjustments because allowing time for notice and comment is unnecessary. The Framework 13 proposed rule provided the public with the opportunity to comment on the 2023–2025 specifications (88 FR 25351, April 26, 2023). Two comments were received on the proposed rule, only one of which specifically addressed the 2023–2025 specifications. This comment supported these specifications. Thus, the proposed and final rules that contained the projected 2023–2025 specifications provided a full opportunity for the public to comment on the substance and process of this action. No circumstances or conditions have changed in the monkfish fishery that would cause new concern or necessitate reopening the comment period and the final 2024 specifications being implemented by this rule are unchanged from those projected in the Framework 13 final rule.

The Chief Counsel for Regulation, Department of Commerce, previously certified to the Chief Counsel for Advocacy of the Small Business Administration (SBA) that the 2023–2025 monkfish specifications would not have a significant economic impact on a substantial number of small entities. Implementing status quo specifications for 2024 will not change the conclusions drawn in that previous certification to the SBA. Because advance notice and the opportunity for public comment are not required for this action under the Administrative Procedure Act, or any other law, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.,* do not apply to this rule. Therefore, no new regulatory flexibility analysis is required and none has been prepared.

This final rule contains no information collection requirements under the Paperwork Reduction Act of 1995.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: February 5, 2024.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

[FR Doc. 2024–02677 Filed 2–8–24; 8:45 am]

BILLING CODE 3510–22–P

Proposed Rules

Federal Register
Vol. 89, No. 28
Friday, February 9, 2024

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2024–0221; Project Identifier AD–2023–01233–T]

RIN 2120–AA64

Airworthiness Directives; Airbus SAS Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede Airworthiness Directive (AD) 2021–21–02, which applies to certain Airbus SAS Model A318, A319, A320, A321, A330–200, A330–200 Freighter, A330–300, A330–800, A330–900, A340–200, A340–300, A340–500, A340–600, and A380–800 series airplanes. AD 2021–21–02 requires replacing certain parts manufacturer approval (PMA) Ni-Cd batteries with serviceable Ni-Cd batteries or maintaining the electrical storage capacity of those PMA Ni-Cd batteries during airplane storage or parking. Since the FAA issued AD 2021–21–02, it was determined that the on-wing preservation procedures originally provided in that AD did not ensure the expected preservation of the battery capacity. This proposed AD would add airplanes to the applicability and would require replacing each affected part with a serviceable part before release to service of an airplane after a storage or parking period, as applicable. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by March 25, 2024.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2024–0221; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, any comments received, and other information. The street address for Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT: Dan Rodina, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 206–231–3225; email *dan.rodina@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2024–0221; Project Identifier AD–2023–01233–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend the proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this proposed AD.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Dan Rodina, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 206–231–3225; email *dan.rodina@faa.gov.* Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued AD 2021–21–02, Amendment 39–21762 (86 FR 62898, November 15, 2021) (AD 2021–21–02), for certain Airbus SAS Model A318, A319, A320, A321, A330–200, A330–200 Freighter, A330–300, A330–800, A330–900, A340–200, A340–300, A340–500, A340–600, and A380–800 series airplanes. AD 2021–21–02 was prompted by a determination that repetitive disconnection and reconnection of certain PMA Ni-Cd batteries during airplane parking or storage could lead to a reduction in capacity of those batteries. AD 2021–21–02 requires replacing certain PMA Ni-Cd batteries with serviceable Ni-Cd batteries or maintaining the electrical storage capacity of those PMA Ni-Cd batteries during airplane storage or parking. The agency issued AD 2021–21–02 to address reduced capacity of certain PMA Ni-Cd batteries, which could lead to reduced battery endurance performance and possibly result in failure to supply the minimum essential electrical power during abnormal or emergency conditions.

The FAA issued AD 2021–21–02 to address PMA Ni-Cd batteries that are similar in design to the type design Ni-Cd batteries identified in FAA AD 2021–20–08, Amendment 39–21746 (86 FR 57025, October 14, 2021) (AD 2021–20–08), which corresponds to European Union Aviation Safety Agency (EASA)

AD 2020–0274, dated December 10, 2020 (EASA AD 2020–0274).

Actions Since AD 2021–21–02 Was Issued

Since the FAA issued AD 2021–21–02, EASA superseded EASA AD 2020–0274, and issued EASA AD 2023–0196, dated November 10, 2023 (EASA AD 2023–0196), to correct an unsafe condition for all:

- Airbus SAS Model A300 B4–2C, B4–102, B4–103, B4–120, B4–203, and B4–220 airplanes;
- Airbus SAS Model A300 B4–601, B4–603, B4–620, and B4–622 airplanes;
- Airbus SAS Model A300 B4–605R and B4–622R airplanes;
- Airbus SAS Model A300 C4–203, C4–620, and C4–605R variant F airplanes;
- Airbus SAS Model A300 F4–203, F4–605R, F4–608ST, and F4–622R airplanes;
- Airbus SAS Model A310–203, –221, –222, –204, –203C, –322, –304, –324, –308, and –325 airplanes;
- Airbus SAS Model A318–111, –112, –121, and –122 airplanes;
- Airbus SAS Model A319–111, –112, –113, –114, –115, –131, –132, –133, –151N, –153N, and –171N airplanes;
- Airbus SAS Model A320–211, –212, –214, –215, –216, –231, –232, –233, –251N, –252N, –253N, –271N, –272N, and –273N airplanes;
- Airbus SAS Model A321–111, –112, –131, –211, –212, –213, –231, –232, –251N, –251NX, –252N, –252NX, –253N, –253NX, –271N, –271NX, –272N, and –272NX airplanes;
- Airbus SAS Model A330–201, –202, –203, –223, –223F, –243, –243F, –301, –302, –303, –321, –322, –323, –341, –342, –343, –743L, –841, and –941 airplanes;
- Airbus SAS Model A340–211, –212, –213, –311, –312, –313, –541, –542, –642, and –643 airplanes;
- Airbus SAS Model A350–941 and A350–1041 airplanes; and
- Airbus SAS Model A380–841, –842, and –861 airplanes.

EASA AD 2023–0196 stated that Airbus and the Ni-Cd battery manufacturer determined that the on-wing preservation procedures originally provided in the service information identified in that AD did not ensure the expected preservation of the battery capacity.

The FAA is considering rulemaking to supersede FAA AD 2021–20–08 that corresponds to EASA AD 2023–0196 to address the type design Ni-Cd batteries identified in that EASA AD. The FAA has determined that any PMA part approved for the type design Ni-Cd batteries identified in EASA AD 2023–0196 are also affected by the unsafe condition; therefore, this proposed AD would apply to those PMA Ni-Cd batteries.

FAA's Determination

The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would retain none of the requirements of AD 2021–21–02. This proposed AD would require replacing each affected part with a serviceable part before release to service of an airplane after a storage or parking period, as applicable. This proposed AD also adds Model A300 series airplanes; Model A300 B4–600, B4–600R, and F4–600R series airplanes, and Model A300 C4–605R Variant F airplanes (collectively called Model A300–600 series airplanes); Model A310 series airplanes; and Model A350–941 and –1041 airplanes to the applicability.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 1,814 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
New proposed actions	5 work-hours × $85 per hour = $425	$0	$425	$770,950

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA has determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2021–21–02, Amendment 39–21762 (86 FR 62898, November 15, 2021), and

■ b. Adding the following new AD:

Airbus SAS: Docket No. FAA–2024–0221; Project Identifier AD–2023–01233–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by March 25, 2024.

(b) Affected ADs

This AD replaces AD 2021–21–02, Amendment 39–21762 (86 FR 62898, November 15, 2021) (AD 2021–21–02).

(c) Applicability

This AD applies to Airbus SAS airplanes identified in paragraphs (c)(1) through (14) of this AD, certificated in any category, equipped with any parts manufacturer approval (PMA) part approved for the type design nickel cadmium (Ni-Cd) batteries having a part number identified in Figure 1 to the introductory text of paragraph (c) of this AD.

Figure 1 to the Introductory Text of Paragraph (c)—Ni-Cd Battery

Airplane Model	Battery Part Number	Time Limits (months)
A318, A319, A320, and A321	2758 or 416526 (equivalent to 285CH)	6
A330 and A340	4059, 405CH, or 505CH	6
A350	505CH2	12
A380	505CH2	12
A300, A300-600, A310, and A300F4-608ST	2520	6

(1) Model A300 B4–2C, B4–102, B4–103, B4–120, B4–203, and B4–220 airplanes.

(2) Model A300 B4–601, B4–603, B4–620, and B4–622 airplanes.

(3) Model A300 B4–605R and B4–622R airplanes.

(4) Model A300 C4–203, C4–605R variant F, and C4–620 airplanes.

(5) Model A300 F4–203, F4–605R, F4–608ST, and F4–622R airplanes.

(6) Model A310–203, –203C, –204, –221, –222, –304, –308, –322, –324, and –325 airplanes.

(7) Model A318–111, –112, –121, and –122 airplanes.

(8) Model A319–111, –112, –113, –114, –115, –131, –132, –133, –151N, –153N, and –171N airplanes.

(9) Model A320–211, –212, –214, –215, –216, –231, –232, –233, –251N, –252N, –253N, –271N, –272N, and –273N airplanes.

(10) Model A321–111, –112, –131, –211, –212, –213, –231, –232, –251N, –251NX, –252N, –252NX, –253N, –253NX, –271N, –271NX, –272N, and –272NX airplanes.

(11) Model A330–201, –202, –203, –223, –223F, –243, –243F, –301, –302, –303, –321, –322, –323, –341, –342, –343, –743L, –841, and –941 airplanes.

(12) Model A340–211, –212, –213, –311, –312, –313, –541, –542, –642, and –643 airplanes.

(13) Model A350–941 and A350–1041 airplanes.

(14) Model A380–841, –842, and –861 airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 24, Electrical Power.

(e) Unsafe Condition

This AD was prompted by a report that repetitive disconnection and reconnection of certain Ni-Cd batteries during airplane parking or storage could lead to a reduction in capacity of those batteries. The unsafe condition, if not addressed, could lead to reduced battery endurance performance and possibly result in failure to supply the minimum essential electrical power during abnormal or emergency conditions.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Definitions

(1) For the purposes of this AD, an ''affected PMA Ni-Cd battery'' is defined as any PMA Ni-Cd battery approved for a Ni-Cd battery identified in Figure 1 to the introductory text of paragraph (c) of this AD, all serial numbers, except those which are a serviceable PMA Ni-Cd battery as defined in paragraph (g)(2) of this AD.

(2) For the purposes of this AD, a ''serviceable PMA Ni-Cd battery'' is defined as a PMA Ni-Cd battery approved for a Ni-Cd battery identified in Figure 1 to the introductory text of paragraph (c) of this AD, all serial numbers, which was fully (re)charged at constant current and, after (re)charging, was not stored on wing during a period exceeding the applicable ''Time Limit'' specified in Figure 1 to the introductory text of paragraph (c) of this AD. Periodical, regular, and overhaul checks of a PMA Ni-Cd battery that include the battery (re)charge at constant current are acceptable methods to demonstrate that the battery was (re)charged.

(3) For the purposes of this AD, a ''serviceable non-PMA Ni-Cd battery'' is defined as a type design Ni-Cd battery having a part number identified in Figure 1 to the introductory text of paragraph (c) of this AD, all serial numbers, which was fully (re)charged at constant current and, after (re)charging, was not stored on wing during a period exceeding the applicable ''Time Limit'' specified in Figure 1 to the introductory text of paragraph (c) of this AD. Periodical, regular, and overhaul checks of a non-PMA Ni-Cd battery that include the battery (re)charge at constant current are acceptable methods to demonstrate that the battery was (re)charged.

(h) Replacement

Before release to service of an airplane after a storage or parking period, as applicable, replace each affected PMA Ni-Cd battery with a serviceable PMA Ni-Cd battery or a serviceable non-PMA Ni-Cd battery.

Note 1 to paragraph (h): Airplanes on which a battery is replaced with a serviceable non-PMA Ni-Cd battery are affected by AD 2021–20–08, Amendment 39–21746 (86 FR 57025, October 14, 2021), which provides requirements for non-PMA Ni-Cd batteries.

(i) Parts Installation Limitation

As of the effective date of this AD, release to service of an airplane is allowed, provided all PMA Ni-Cd batteries approved for a Ni-Cd battery identified in Figure 1 to the introductory text of paragraph (c) of this AD that are installed on that airplane are fully (re)charged at constant current and, after (re)charging, were not stored on wing during a period exceeding the applicable ''Time Limit'' specified in Figure 1 to the introductory text of paragraph (c) of this AD.

(j) Alternative Methods of Compliance (AMOCs)

The Manager, Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (k) of this AD. Information may be emailed to: *9-AVS-AIR-730-AMOC@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(k) Related Information

For more information about this AD, contact Dan Rodina, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 206–231–3225; email *dan.rodina@faa.gov.*

(l) Material Incorporated by Reference

None.

Issued on February 1, 2024.

Victor Wicklund,

Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

[Docket No. FAA–2024–0220; Project Identifier MCAI–2023–00760–T]

RIN 2120–AA64

Airworthiness Directives; Saab AB, Support and Services (Formerly Known as Saab AB, Saab Aeronautics) Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to remove Airworthiness Directive (AD) 2023–13–07, which applies to certain Saab AB, Support and Services Model SAAB 340B airplanes. AD 2023–13–07 requires amending the applicable airplane flight manual (AFM) by incorporating a temporary revision (TR) to reduce the maximum take-off weight (MTOW). AD 2023–13–07 is no longer necessary, because of a determination that affected airplanes can be safely operated up to the initially published MTOW. Accordingly, the FAA proposes to remove AD 2023–13–07.

DATES: The FAA must receive comments on this proposed AD by March 25, 2024.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2024–0220; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Related Service Information:

- For service information identified in this NPRM, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* website *easa.europa.eu.* You may find this material on the EASA website at *ad.easa.europa.eu.*
- You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

FOR FURTHER INFORMATION CONTACT: Shahram Daneshmandi, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 206–231–3220; email *shahram.daneshmandi@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2024–0220; Project Identifier MCAI–2023–00760–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend the proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Shahram Daneshmandi, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 206–231–3220; email *shahram.daneshmandi@faa.gov.* Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued AD 2023–13–07, Amendment 39–22492 (88 FR 43052, July 6, 2023) (AD 2023–13–07), for certain Saab AB, Support and Services Model SAAB 340B airplanes. AD 2023–13–07 was prompted by an MCAI originated by the European Union Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union. EASA issued AD 2023–0121, dated June 13, 2023 (EASA AD 2023–0121) (also referred to as the MCAI), to identify and correct an unsafe condition.

AD 2023–13–07 requires amending the applicable AFM by incorporating a TR to reduce the MTOW. AD 2023–13–07 was prompted by a determination that the affected airplanes must not be operated at a MTOW above 29,000 pounds. The FAA issued AD 2023–13–07 to address the possibility of flight in an uncertified envelope, which could result in reduced structural capability and reduced controllability of the airplane.

Actions Since AD 2023–13–07 Was Issued

Since the FAA issued AD 2023–13–07, EASA issued AD Cancellation Notice 2023–0121–CN, dated December 8, 2023 (EASA AD Cancellation Notice 2023–0121–CN), to cancel EASA AD 2023–0121. EASA AD Cancellation Notice 2023–0121–CN states that since EASA AD 2023–0121 was issued, Saab provided evidence demonstrating that affected airplanes can be operated safely

up to the initially published MTOW of 30,000 pounds.

FAA's Conclusions

Upon further consideration, the FAA has determined that AD 2023–13–07 is no longer necessary. Accordingly, this proposed AD would remove AD 2023–13–07. Removal of AD 2023–13–07 would not preclude the FAA from issuing another related action or commit the FAA to any course of action in the future. This proposed AD would remove all actions of AD 2023–13–07. Therefore, this proposed AD would terminate all requirements of AD 2023–13–07.

Related Costs of Compliance

This proposed AD would add no cost. This proposed AD would remove AD 2023–13–07 from 14 CFR part 39; therefore, operators would no longer be required to show compliance with that AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority.

Regulatory Findings

The FAA has determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2023–13–07, Amendment 39–22492 (88 FR 43052, July 6, 2023), and

■ b. Adding the following new AD:

Saab AB, Support and Services (formerly known as Saab AB, Saab Aeronautics): Docket No. FAA–2024–0220; Project Identifier MCAI–2023–00760–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by March 25, 2024.

(b) Affected ADs

This AD replaces AD 2023–13–07, Amendment 39–22492 (88 FR 43052, July 6, 2023) (AD 2023–13–07).

(c) Applicability

This AD applies to Saab AB, Support and Services (formerly known as Saab AB, Saab Aeronautics) Model SAAB 340B airplanes, certificated in any category, as identified in European Union Aviation Safety Agency (EASA) AD 2023–0121, dated June 13, 2023: airplanes not having SAAB modification 2571 (extended wingtip modification) embodied and having GE Aviation Systems LTD (Dowty Propellers) installed.

(d) Subject

Air Transport Association (ATA) of America Code 51, Standard practices/structures.

(e) Terminating Action

This AD terminates all requirements of AD 2023–13–07.

(f) Related Information

For more information about this AD, contact Shahram Daneshmandi, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 206–231–3220; email *shahram.daneshmandi@faa.gov.*

(g) Material Incorporated by Reference

None.

Issued on February 1, 2024.

Victor Wicklund,

Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Chapter 1461

[Docket No. CPSC–2022–0017]

Notice of Availability of Updated ASTM Standard Under the Portable Fuel Container Safety Act

AGENCY: Consumer Product Safety Commission.

ACTION: Notice of availability and request for comment.

SUMMARY: In August 2023, the U.S. Consumer Product Safety Commission (Commission or CPSC) determined under the Portable Fuel Container Safety Act of 2020 (PFCSA) that ASTM F3429/F3429M–23 is a consumer product safety standard that impedes the propagation of flames into pre-filled portable fuel containers, and therefore incorporated the voluntary standard by reference as a mandatory rule. ASTM has since notified the Commission that it has revised this voluntary standard. CPSC seeks comment on whether the revision meets the PFCSA's requirements for adoption in the mandatory rule.

DATES: Comments must be received by February 23, 2024.

ADDRESSES: Submit comments, identified by Docket No. CPSC–2022–0017, by any of the following methods:

Electronic Submissions: Submit electronic comments to the Federal eRulemaking Portal at: *https://www.regulations.gov.* Follow the instructions for submitting comments. Do not submit through this website: confidential business information, trade secret information, or other sensitive or protected information that you do not want to be available to the public. CPSC typically does not accept comments submitted by email, except as described below.

Mail/Hand Delivery/Courier/Confidential Written Submissions: CPSC encourages you to submit electronic comments by using the Federal eRulemaking Portal. You may, however, submit comments by mail, hand delivery, or courier to: Office of the Secretary, Consumer Product Safety Commission, 4330 East West Highway, Bethesda, MD 20814; telephone: (301) 504–7479.

Instructions: All submissions must include the agency name and docket number. CPSC may post all comments without change, including any personal identifiers, contact information, or other personal information provided, to *https://www.regulations.gov.* If you wish to submit confidential business information, trade secret information, or other sensitive or protected information that you do not want to be available to the public, you may submit such comments by mail, hand delivery, or courier, or you may email them to: *cpsc-os@cpsc.gov.*

Docket: For access to the docket to read background documents or comments received, go to: *https://www.regulations.gov,* and insert the docket number, CPSC–2022–0017, into the ''Search'' box, and follow the prompts.

FOR FURTHER INFORMATION CONTACT: Scott Ayers, U.S. Consumer Product Safety Commission, 5 Research Place, Rockville, MD 20850; telephone: 301–987–2030; email: *sayers@cpsc.gov.*

SUPPLEMENTARY INFORMATION: The PFCSA requires the Commission to promulgate a final rule to require flame mitigation devices in portable fuel containers that impede the propagation of flame into the container. 15 U.S.C. 2056d(b)(1)–(2). However, the Commission is not required to promulgate a final rule for a class of portable fuel containers within the scope of the PFCSA if the Commission determines that:

- there is a voluntary standard for flame mitigation devices for those containers that impedes the propagation of flame into the container;
- the voluntary standard is or will be in effect not later than 18 months after the date of enactment of the PFCSA; and
- the voluntary standard is developed by ASTM International or such other standard development organization that the Commission determines to have met the intent of the PFCSA.

15 U.S.C. 2056d(b)(3)(A). After publication of the **Federal Register** notification announcing the Commission's positive determination, the requirements of such a voluntary standard ''shall be treated as a consumer product safety rule.'' 15 U.S.C. 2056d(b)(2)(B) and (b)(4). Under this authority, on January 13, 2023, the Commission published a notification determining that three voluntary standards for portable fuel containers meet the requirements of the PFCSA and would be treated as consumer product safety rules: ASTM F3429/F3429M–20 (pre-filled containers); ASTM F3326–21 (containers sold empty); and section 18 of UL 30:2022 (safety cans). 88 FR 2206.

Portable fuel containers sold pre-filled are within the scope of ASTM F3429/F3429M, *Standard Specification for Performance of Flame Mitigation Devices Installed in Disposable and Pre-Filled Flammable Liquid Containers.* ASTM lists the standard as a dual standard in inch-pound units (F3429 designation) and metric units (F3429M designation). ASTM F3429/F3429M was first published in 2020. ASTM published a revised version of ASTM F3429/F3429M–20 in May 2023, as ASTM F3429/F3429M–23. On August 22, 2023, the Commission determined that the 2023 revisions met the requirements of section 2056d(b)(3)(A) of the PFCSA. Accordingly, ASTM F3429/F3429M–23 is the current mandatory consumer product safety rule for pre-filled-portable fuel containers. On October 31, 2023, the Commission published a direct final rule creating 16 CFR part 1461 for portable fuel containers to incorporate by reference the revised ASTM F3429/F3429M–23, as well as ASTM F3326–21 and section 18 of UL 30:2022.5. 88 FR 74342.

Under section (b)(5) of the PFCSA, if the requirements of a voluntary standard that meet the requirements of section (b)(3) are subsequently revised, the organization that revised the standard shall notify the Commission after the final approval of the revision. 15 U.S.C. 2056d(b)(5). Any such revision to the voluntary standard shall become enforceable as the new consumer product safety rule not later than 180 days after the Commission is notified of a revised voluntary standard that meets the conditions of section (b)(3) (or such later date as the Commission determines appropriate), unless the Commission determines, within 90 days after receiving the notification, that the revised voluntary standard does not meet the requirements described in section (b)(3) of the PFCSA. 15 U.S.C. 2056d(b)(5).

On January 29, 2024, ASTM notified the Commission that it had approved and published ASTM F3429/F3429M–24. CPSC staff is assessing the revised voluntary standard to determine, consistent with section (b)(5) of the PFCSA, whether the revisions in ASTM F3429/F3429M–24 meet the requirements of section (b)(3)(A) of the PFCSA listed above. The Commission invites public comment on that question to inform staff's assessment and any subsequent Commission consideration of the revisions in ASTM F3429/F3429M–24.[1]

ASTM F3429/F3429M–24 is available for review in several ways. ASTM has provided on its website (at *www.astm.org/CPSC.htm*), at no cost, a read-only copy of ASTM F3429/F3429M–24, including a red-lined version that identifies the changes made to ASTM F3429/F3429M–23. A read-only copy of the existing standard (ASTM F3429/F3429M–23) is available for viewing, at no cost, on the ASTM website at: *www.astm.org/READINGLIBRARY/.* Interested parties can also download copies of the standards by purchasing them from ASTM International, 100 Barr Harbor Drive, P.O. Box C700, West Conshohocken, PA 19428–2959; phone: 610–832–9500; *https://www.astm.org.* Alternatively, interested parties can schedule an appointment to inspect copies of the standards at CPSC's Office of the Secretary, U.S. Consumer Product Safety Commission, 4330 East West Highway, Bethesda, MD 20814, telephone: 301–504–7479.

Comments must be received by February 23, 2024. Because of the short statutory time frame Congress established for the Commission to consider revised voluntary standards under section (b)(5) of the PFCSA, CPSC will not consider comments received after this date.

Alberta E. Mills,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355–01–P

DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

33 CFR Parts 325 and 330

[Docket ID: COE–2023–0004]

RIN 0710–AB46

Processing of Department of the Army Permits; Procedures for the Protection of Historic Properties

AGENCY: Army Corps of Engineers, Department of Defense (DoD).

ACTION: Proposed rule.

SUMMARY: To demonstrate the greatest possible consistency between the procedures used by the U.S. Army Corps of Engineers (Corps) Regulatory Program to comply with the National

[1] The Commission voted 4–0 to publish this notification.

Historic Preservation Act (NHPA) and its implementing regulations, ''Protection of Historic Properties'' when processing permit applications, the Corps is proposing to amend its Regulatory Program's permitting regulations. The Corps will instead follow the NHPA's implementing regulations, developed and interpreted by the Advisory Council on Historic Preservation (ACHP), relying on the flexibility in those regulations for Federal agency compliance with the steps of review. The Corps will take into account, among other factors, the degree and scope of the Federal involvement in the undertaking and the relationship of Federal actions to the overall proposed activities. Further, the Corps is also proposing to make conforming changes to its nationwide permit program regulations to eliminate references in the regulations.

DATES: Comments must be submitted on or before April 9, 2024.

ADDRESSES: You may submit comments, identified by docket number COE–2023–0004 and/or RIN 0710–AB46, by any of the following methods:

Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

Email: historicpropertyreg@usace.army.mil. Include the docket number, COE–2023–0004, in the subject line of the message.

Mail: U.S. Army Corps of Engineers, Attn: CECW–CO–R, 441 G Street NW, Washington, DC 20314–1000.

Hand Delivery/Courier: Due to security requirements, we cannot receive comments by hand delivery or courier.

Instructions: If submitting comments through the Federal eRulemaking Portal, direct your comments to docket number COE–2023–0004. All comments received will be included in the public docket without change and may be made available on-line at *http://www.regulations.gov,* including any personal information provided, unless the commenter indicates that the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI, or otherwise protected, through *regulations.gov* or email. The *regulations.gov* website is an anonymous access system, which means we will not know your identity or contact information unless you provide it in the body of your comment. If you send an email directly to the Corps without going through *regulations.gov* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. If you submit an electronic comment, we recommend that you include your name and other contact information in the body of your comment and with any compact disc you submit. If we cannot read your comment because of technical difficulties and cannot contact you for clarification we may not be able to consider your comment. Electronic comments should avoid the use of any special characters, any form of encryption, and be free of any defects or viruses.

Docket: For access to the docket to read background documents or comments received, go to *regulations.gov.* All documents in the docket are listed. Although listed in the index, some information is not publicly available, such as CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form.

FOR FURTHER INFORMATION CONTACT: Mr. Joseph McMahan, *historicpropertyreg@usace.army.mil,* or 202–236–7547.

SUPPLEMENTARY INFORMATION:

Background

Under section 106 (54 U.S.C. 306108) of the NHPA (54 U.S.C. 300101 *et seq.*), Federal agencies are required to consider the effects on historic properties from the undertakings they carry out, or non-Federal projects that rely on Federal licenses, permits, approvals, funds, or assistance, and to provide the ACHP a reasonable opportunity to comment on those undertakings. This process is set forth within the section 106 implementing regulations (36 CFR part 800). As required by the statute, the ACHP developed and issued the implementing regulations for this section of the NHPA, and as part of its oversight of the section 106 process, provides general guidance as well as specific comments on section 106 reviews for individual undertakings to ensure consistency with the regulations. The Corps Regulatory Program issues permits for certain activities in waters and wetlands subject to its jurisdictional authorities. The procedures which the Corps' Regulatory Program currently uses for complying with section 106 of the NHPA, as set forth in appendix C of the Corps' permitting regulations, were issued as a final rule in 1990 but did not go through separate approval by the ACHP, as required by the NHPA and the section 106 implementing regulations. Since that final rule was issued, the NHPA has been amended several times and the ACHP has also amended the section 106 implementing regulations. The NHPA requires that a Federal agency's procedures for compliance with section 106 be consistent with the section 106 implementing regulations issued by the ACHP, which specify a consultation process for ACHP review and approval of an agency's proposed alternative procedures (36 CFR 800.14).

The Corps Regulatory Program administers three laws: section 404 of the Clean Water Act, sections 9 and 10 of the Rivers and Harbors Act of 1899, and section 103 of the Marine Protection, Research, and Sanctuaries Act of 1972, as amended. Under section 404 of the Clean Water Act, a permit is required to discharge dredged or fill material into waters of the United States. Under Section 9 of the Rivers and Harbors Act of 1899, a permit is required to construct dams or dikes across navigable waters of the United States. The obstruction or alteration of a navigable water of the United States requires a permit under Section 10 of the Rivers and Harbors Act of 1899. Under Section 103 of the Marine Protection, Research and Sanctuaries Act of 1972, as amended, a permit is required to transport dredged material for disposal into ocean waters.

Section 106 of the NHPA (54 U.S.C. 306108) requires Federal agencies to consider the effects on historic properties from the undertakings they carry out or provide a Federal license, permit, approval, funding, or assistance to, and to provide the ACHP a reasonable opportunity to comment on the undertaking. Historic properties are properties that are included in, or eligible for inclusion in, the National Register of Historic Places. The consideration and issuance of a Department of the Army (DA) permit by the Corps Regulatory Program is a Federal action that makes a project, activity, or program, which includes activities that can potentially affect historic properties, subject to review by the Corps under section 106 of the NHPA and its implementing regulations, ''Protection of Historic Properties'' (36 CFR part 800).

Section 211 of the NHPA authorizes the ACHP to promulgate the regulations to govern the implementation of section 106 in its entirety. The regulations thus developed by the ACHP at 36 CFR part 800 define how Federal agencies meet their statutory responsibilities under section 106 the NHPA. Additionally, section 110(a)(2)(E) of the NHPA

requires Federal agency procedures for section 106 of the NHPA to be consistent with the section 106 regulations issued by the ACHP pursuant to section 211 of the Act. Under 36 CFR 800.14, an agency may develop alternate procedures or other program alternatives to implement section 106 and substitute them for 36 CFR part 800 after following a specified consultative process and a consistency determination by ACHP (see 36 CFR 800.14(a)). The ACHP oversees the operation of the section 106 process (36 CFR 800.2(b)). The Army Civil Works programs, other than the Regulatory Program, use the implementing regulations at 36 CFR part 800, for its compliance with section 106 of the NHPA.

Corps Regulatory Program and Appendix C

There are two categories of permits that the Corps Regulatory Program issues under its permitting authorities: individual permits and general permits. Individual permits include standard individual permits and letters of permission. A standard individual permit is an activity-specific permit that is processed through the public interest review procedures, including the issuance of a public notice and receipt of comments, the preparation of activity-specific National Environmental Policy Act documentation (*e.g.,* an environmental assessment or environmental impact statement), and, if the proposed activity involves discharges of dredged or fill material into waters of the United States, an activity-specific Clean Water Act section 404(b)(1) Guidelines analysis to ensure that the discharge of dredged or fill material complies with the environmental criteria in those Guidelines. A letter of permission is an individual permit issued after an abbreviated public interest review procedure and usually involves coordination with Federal and State agencies prior to making a decision on the permit application. Each year, the Corps issues approximately 3,000 individual permits.

General permits include nationwide permits, regional general permits, and programmatic general permits. General permits authorize categories of activities across the country that have no more than minimal individual and cumulative adverse environmental effects. Some general permits require the project proponent to submit a notification to the appropriate Corps district before beginning the authorized activity. Other activities authorized by general permits do not require prior notification to the Corps district, and the project proponent can proceed with the activity as long as they comply with all terms and conditions of the general permit. Each year, the Corps issues approximately 35,000 written general permit verifications, and thousands of other minor activities are authorized by non-reporting general permits that do not require the project proponent to contact the applicable Corps district office before proceeding with the general permit activity. The Corps Nationwide Permits program provides a list of available nationwide general permits as well as anticipated number of times they would be used within a five-year timeframe.[1]

When a Corps district issues a public notice to solicit comments on a proposed activity that requires a standard individual permit, or for a proposal to issue a regional general permit, the public notice includes a statement of the district engineer's current knowledge on historic properties (see 33 CFR 325.3(a)(10)). A copy of the public notice is provided to the State Historic Preservation Officer (SHPO), appropriate State agencies, appropriate Indian Tribes or Tribal representatives, or Native Hawaiian Organizations, concerned Federal agencies, appropriate city and county officials, as well as all parties who have specifically requested copies of public notices (see 33 CFR 325.3(d)(1)). The Corps Regulatory Program's general policies for evaluating permit applications are found at 33 CFR 320.4. The decision whether to issue a permit will be based on an evaluation of the probable impacts, including cumulative impacts, of the proposed activity and its intended use on the public interest.

The Corps' procedures for the processing of permit applications are provided at 33 CFR part 325. Section 325.1 identifies the information required for permit applications. Section 325.2 describes the standard procedures for processing permit applications, as well as more specific procedures that are needed for various types of regulated activities, such as water quality certification under section 401 of the Clean Water Act, Coastal Zone Management Act consistency determinations, National Historic Preservation Act compliance, and Endangered Species Act compliance. Section 325.2(d) addresses the timing of the processing of permit applications. Section 325.8 discusses which Corps officials have the authority to issue permits under various circumstances. There are also three appendices to 33 CFR part 325, which are the following: appendix A of 33 CFR to part 325 discusses permit form and special conditions; appendix B to part 325 discusses NEPA implementation procedures for the regulatory program; and appendix C to part 325 discusses procedures for the protection of historic properties.

Appendix C to 33 CFR part 325 was intended to provide a set of definitions and procedures to the Corps and the regulated public for the Corps Regulatory Program's compliance with the requirements of section 106 of the NHPA, which requires Federal agencies to consider the effects of undertakings on historic properties and to provide the ACHP with a reasonable opportunity to comment on those undertakings. However, differences between appendix C and the 36 CFR part 800 regulations have in many cases introduced confusion resulting in debate over the extent and appropriateness of the Corps review. The major differences relate to the scope of the effort to identify and address effects to historic properties from undertakings and the nature of consultation with appropriate stakeholders. The section 106 implementing regulations includes a definition of ''undertaking'' and ''area of potential effects'' which establish the basis for the scope of a Federal agency's responsibility to identify and address effects to historic properties. 36 CFR 800.16(y) defines the ''undertaking'' as a project, activity, or program funded in whole or in part under the direct or indirect jurisdiction of a Federal agency, including those carried out by or on behalf of a Federal agency; those carried out with Federal financial assistance; and those requiring a Federal permit, license or approval, while the ''area of potential effects'' includes the geographic area or areas within which an undertaking may directly or indirectly cause alterations in the character or use of historic properties, if any such historic properties exist. The area of potential effects is influenced by the scale and nature of an undertaking and may be different for different kinds of effects caused by the undertaking (36 CFR 800.16(d)). Paragraph 1(f) of appendix C defines the ''undertaking'' subject to the requirements of section 106 to be the work, structure or discharge that requires a DA permit. Rather than using ''area of potential effects,'' appendix C uses ''permit area'' which includes the areas consisting of jurisdictional waters, including

[1] *https://www.usace.army.mil/Missions/Civil-Works/Regulatory-Program-and-Permits/Nationwide-Permits/,* last accessed January 17, 2023.

wetlands, under the Corps' statutory authorities to regulate that will be directly affected by the proposed activity requiring DA authorization plus any uplands that would be directly affected by the activities requiring DA authorization. The definition of ''permit area'' includes a three-part test to identify activities outside of jurisdictional waters, including wetlands, (*e.g.,* activities in uplands) that would be included with the activities subject to the Corps' permitting authorities and the section 106 process. The definition of ''permit area'' in paragraph 1(g) of appendix C provides three examples to the Corps and the regulated public for applying the concept of ''permit area'' to a number of potential permitting scenarios.

Under the Corps Regulatory Program's appendix C procedures, after the undertaking and permit area are determined, Corps Regulatory Program staff identify historic properties that could potentially be affected by the undertaking and the activities in the permit area. If the Corps district is processing a standard individual permit for the proposed activity requiring DA authorization, the public notice includes a statement regarding the district engineer's current knowledge of the presence or absence of historic properties and the effects of the proposed activity requiring DA authorization on historic properties. Appendix C includes certain coordination procedures and procedures for assessing effects on historic properties, and for providing the ACHP the opportunity to review and comment on undertakings that require DA authorization.

Historical Context

Executive Order 11593, ''Protection and Enhancement of the Cultural Environment,'' which was issued on May 13, 1971 (36 FR 8921), directed Federal agencies, in consultation with the ACHP, to institute procedures to ensure that ''Federal plans and programs contributed to the preservation and enhancement of non-federally owned sites, structures and objects of historical, architectural or archeological significance.'' In addition, a Presidential Memorandum on Environmental Quality and Water Resource Management issued on July 12, 1978, directed the ACHP to issue regulations for implementing the NHPA by March 1, 1979. That Presidential Memorandum also directed Federal agencies such as the Corps with consultative responsibilities under the NHPA to publish separate procedures for implementing the section 106 implementing regulations within three months of ACHP's issuance of them. Furthermore, the Presidential Memorandum required Federal agency NHPA procedures to be reviewed by the ACHP, and if those procedures were consistent with the ACHP's regulations, to also be approved within 60 days by the Chairman of the ACHP.

In a final rule published in the **Federal Register** on January 30, 1979 (44 FR 6068), the ACHP amended its NHPA section 106 regulations at 36 CFR part 800. In response to the direction received in the Presidential Memorandum and the ACHP's amended regulations, the Corps drafted a proposed rule to implement NHPA section 106 for the processing of applications for DA permits. The rule would establish appendix C to 33 CFR part 325. The proposed rule for appendix C was published in the **Federal Register** on April 3, 1980 (45 FR 22112) for a 60-day public comment period. In that proposed rule, the Corps Regulatory Program stated that it would be using the proposed appendix C on an interim basis for the processing of applications for DA permits. The Corps Regulatory Program did not issue a final rule in response to the April 3, 1980, proposed rule.

Changes to the proposed appendix C were made in response to direction provided on May 7, 1982, by the Presidential Task Force on Regulatory Relief. The Task Force directed the Army to take steps to reduce or eliminate delays in the processing of DA permit applications, while fulfilling the Corps Regulatory Program's responsibilities under section 106 of the NHPA. The revised proposed rule was intended to give ACHP a reasonable opportunity to comment on permit applications for proposed activities that may affect historic properties, as well as provide SHPOs and the general public opportunities to provide comments on permit applications. The revised proposed rule for appendix C was published in the **Federal Register** on May 4, 1984 (49 FR 19036) for a 60-day public comment period. The Corps Regulatory Program published its final rule for appendix C to 33 CFR part 325 (June 29, 1990, 55 FR 27000) following the Administrative Procedure Act process. Separate ACHP review and approval was not obtained.

The NHPA was amended in 1992, and some of those amendments have direct relevance to the Corps Regulatory Program's processing of applications for DA permits. One amendment stated that properties of traditional and cultural importance to an Indian Tribe or Native Hawaiian Organization may be determined to be eligible for inclusion in the National Register of Historic Places. Another amendment requires Federal agencies, as part of their section 106 responsibilities, to consult with any Indian Tribe or Native Hawaiian Organization that attaches religious and cultural significance to historic properties. The 1992 amendments to the NHPA also included a provision that prohibits Federal agencies from granting a license or assistance to applicants who intend to avoid section 106 requirements by significantly adversely affecting historic properties to which the license or assistance would relate (section 110(k)).

Because the NHPA provides the ACHP the authority to issue regulations for section 106 in its entirety, and because the NHPA requires Federal agency section 106 procedures to be consistent with the section 106 regulations issued by the ACHP, the Corps Regulatory Program did not immediately propose any changes to Appendix C to address the 1992 amendments to the NHPA. The Corps Regulatory Program instead waited for the ACHP to make changes to section 106 implementing regulations to address those amendments to the NHPA. In the May 18, 1999, issue of the **Federal Register** (64 FR 27044), the ACHP published a final rule that amended 36 CFR part 800 to address the 1992 amendments to the NHPA. The ACHP subsequently published a revised final rule in the December 12, 2000 issue of the **Federal Register** (65 FR 77698). That final rule went into effect on January 11, 2001.

In the March 8, 2002, issue of the **Federal Register** (67 FR 10822), the Corps Regulatory Program published a notice to solicit comments on how its section 106 procedures should be revised to address the 1992 amendments to the NHPA and the ACHP's changes to the section 106 implementing regulations at 36 CFR part 800. In this notice, the Corps Regulatory Program also announced that it would be developing interim guidance to address the application of appendix C in consideration of the revised 36 CFR part 800 regulations until the rulemaking process was completed. The notice indicated that after the comment period ended, and the comments were fully considered, the Corps Regulatory Program may develop additional guidance, propose modifications to appendix C, develop programmatic agreements, or create other products to update its section 106 procedures.

On June 24, 2002, the Corps issued the interim guidance mentioned in the

previous paragraph. The 2002 interim guidance was intended to be a temporary measure until appendix C could be revised through Administrative Procedure Act rulemaking process, or through other approaches. The 2002 interim guidance discussed the identification of consulting parties for the section 106 process, consultation with Indian Tribes and Native Hawaiian Organizations, the use of memorandums of agreement to resolve adverse effects to historic properties, and the resolution of NHPA section 110(k) violations.

In 2004, the ACHP issued a final rule that made additional changes to 36 CFR part 800. That final rule was published in the July 6, 2004, issue of the **Federal Register** (69 FR 40544) and it went into effect on August 5, 2004. One change to the section 106 regulation confirmed that the ACHP could not require a Federal agency to change its determinations regarding whether its undertaking affected or adversely affected historic properties. Another modification of the ACHP's section 106 regulations reflected a court finding that section 106 does not apply to undertakings that are merely subject to State or local regulation administered pursuant to a delegation or approval by a Federal agency. The ACHP's 2004 final rule also clarified the time period for objections to a Federal agency's ''no adverse effect'' findings.

In the September 27, 2004, issue of the **Federal Register** (69 FR 57662), the Corps published an advance notice of proposed rulemaking (ANPRM) to obtain public comment on issues related to Corps Regulatory Program's fulfillment of the requirements of NHPA section 106. The Corps solicited comments on how its permit application processing procedures should be revised in response to the 1992 amendments to the NHPA and the ACHP's 2000 and 2004 revisions to the section 106 implementing regulations at 36 CFR part 800. The Corps also asked for suggestions for facilitating government-to-government consultation with American Indian and Alaska Native governments, as well as consultation with SHPOs, Tribal Historic Preservation Officers (THPOs), Native Hawaiian Organizations, interested organizations, the regulated public, and other interested parties during a potential future rulemaking process.

In the 2004 ANPRM, the Corps Regulatory Program also invited comments on specific options for updating the Corps' permit application processing procedures to address the 1992 amendments to the NHPA and the revised 36 CFR part 800. Those options included: (1) revising appendix C to incorporate the current requirements and procedures at 36 CFR part 800; (2) revoking appendix C and using 36 CFR part 800 when reviewing individual permit applications, and utilizing Federal agency program alternatives at 36 CFR 800.14 for general permits; (3) revoking appendix C and using 36 CFR part 800 for all individual permits and general permits; and (4) revoking appendix C and developing non-regulation alternative procedures in accordance with 36 CFR 800.14. The Corps also invited suggestions for other options that were not identified in the ANPRM.

On April 24, 2005, the Corps issued revised interim guidance [2] to address the changes to the section 106 implementing regulations that were finalized in 2000 and 2004. The 2005 revised interim guidance replaced the Corps Regulatory Program's interim guidance that was issued on June 24, 2002.

The Corps Regulatory Program issued additional interim guidance on January 31, 2007,[3] to supplement the interim guidance issued on April 25, 2005. The January 31, 2007, guidance clarified that when evaluating proposed activities that may be eligible for authorization by general permits, the Corps district is responsible for providing the SHPO/THPO with the opportunity to comment on ''no effect'' and ''no adverse effect'' determinations. The January 31, 2007, guidance also provided that Corps districts must complete the section 106 process before making a decision on whether to issue an individual permit or general permit verification.

In the June 3, 2022, issue of the **Federal Register** (87 FR 33756), the Assistant Secretary of the Army (Civil Works) published a notice to announce an effort to modernize the Civil Works program of the Corps through a number of related policy initiatives. In this notice, the Army stated that rulemaking on the Corps' Regulatory Program's procedures for complying with section 106 of the NHPA at 33 CFR part 325 appendix C is a priority policy initiative that would help modernize the Corps Regulatory Program with respect to section 106 of the NHPA. The Army acknowledged there has been longstanding disagreement between the Corps and ACHP regarding differences between the Corps' Regulatory Program appendix C and the regulations promulgated by ACHP governing the section 106 process. These differences have resulted in lengthy and challenging consultations involving, for example, disputes about the scope of the undertaking subject to review, the Corps' ''permit area,'' and the area of potential effects as defined in the section 106 implementing regulations. Further, under the regulations promulgated by ACHP, if an adverse effect cannot be avoided by modifying the undertaking, the resolution of adverse effects can be accomplished via the development of a Memorandum of Agreement or, for certain complex projects or programs, a Programmatic Agreement, while the Corps' regulations allow for resolution through a Memorandum of Agreement or permit conditioning, which is the equivalent of modifying the undertaking to avoid adverse effects. There are also timeline differences between the section 106 regulations and Appendix C, and the latter does not include Tribal or Native Hawaiian Organization consultation requirements. The June 3, 2022, notice also stated that the Corps Regulatory Program's reliance on appendix C and multiple guidance documents can result in inconsistency and confusion among the Federal agencies, the regulated public, SHPOs and THPOs, Tribes, Native Hawaiian Organizations, and others. In addition, Tribal Nations have also stated that the lack of updated and consistent implementing regulations reflecting the current NHPA language for the Corps' Regulatory Program indicates that the Corps is not meeting their statutory and Tribal trust responsibilities.

The Army asked for input in the June 2022 **Federal Register** notice on the best approach to modernizing the Corps Regulatory Program's procedures for the protection of historic properties. More specifically, the Army sought input on whether the Corps Regulatory Program should rely on the section 106 implementing regulations at 36 CFR part 800 promulgated by ACHP and remove appendix C from 33 CFR part 325, and whether any clarifying guidance is needed on the scope of the area of potential effects for the Corps Regulatory Program. The Army also asked whether development of a Program Alternative under 36 CFR 800.14 would provide clear and consistent NHPA section 106 implementation procedures for the Corps Regulatory Program, as well as improved Tribal and Native Hawaiian Organization consultation. Four virtual engagements were held with approximately 300 attendees in total, and the written docket received 127

[2] *https://usace.contentdm.oclc.org/utils/getfile/collection/p16021coll11/id/2478* (accessed April 3, 2022).

[3] *https://usace.contentdm.oclc.org/utils/getfile/collection/p16021coll11/id/4042* (accessed April 3, 2022).

written letters on the appendix C topic, including from 29 Tribal Nations. A summary of the comments received from this effort can be found on the Army Civil Works web page.[4] Over 95% of commenters recommended the removal of appendix C from 33 CFR part 325 and the requirement that the Corps follow the section 106 implementing regulations (36 CFR part 800) in order to comply with section 106 of the NHPA. The primary comments received stated: appendix C is not compliant with section 106 of the NHPA and is not consistent with 36 CFR part 800; appendix C is not legally valid due to lack of ACHP approval; there is a lack of consistency across Corps districts in implementing section 106 of the NHPA and between the Regulatory Program and the rest of Corps Civil Works which complies with section 106 of the NHPA through 36 CFR part 800; the definition of undertaking used in appendix C results in an inappropriately narrow scope of review with inappropriate assessment of direct and indirect effects; and that appendix C does not adequately address consultation requirements.

Description of Proposed Action for the Corps Regulatory Program's Adherence to the Section 106 Implementing Regulations at 36 CFR 800

This proposed rule takes the next step in the Assistant Secretary of the Army (Civil Works)'s efforts to modernize the Corps Regulatory Program's procedures for the protection of historic properties pursuant to section 106 of the NHPA. In this proposed rule, the Corps is soliciting public input on removing appendix C from 33 CFR part 325. With appendix C removed from part 325, the Corps would utilize and follow the section 106 implementing regulations at 36 CFR part 800, including its requirements regarding consulting with Tribes and Native Hawaiian Organizations during the section 106 review process. As a supplement, the Corps would also work with the ACHP to draft and disseminate guidance for the Corps' Regulatory Program to include illustrative examples regarding how to apply the 36 CFR part 800 regulations to potential permitting scenarios. This would ensure clarity and consistency for the Corps as well as transparency for the regulated public as to how the Corps Regulatory Program would comply with section 106 of the NHPA through its implementing regulations at 36 CFR 800. In a separate but parallel effort, the Corps would work with the ACHP, Tribal Nations, Native Hawaiian Organizations, SHPOs, THPOs, and other consulting parties to develop an appropriate program alternative under 36 CFR 800.14 to establish a more efficient and effective process for Corps compliance with section 106 for undertakings that rely on authorizations available through the Nationwide Permits program with a target of completion to align with the next issuance cycle for the Nationwide Permits (March 2026).

Under this proposed rule, the Corps Regulatory Program would amend its regulations for the processing of DA permit applications at 33 CFR part 325 by removing appendix C (''Procedures for the Protection of Historic Properties'') from those regulations. If Appendix C is removed from 33 CFR part 325, the Corps Regulatory Program will instead follow the section 106 implementing regulations at 36 CFR part 800 in order to take into account effects on historic properties from undertakings requiring DA authorization, including the processing of individual permit applications and general permit verification requests. To provide clarity regarding the applicable procedures for compliance with section 106 of the NHPA during the processing of applications for DA authorization, the Corps is also proposing to revise paragraph (b)(3) to 33 CFR 325.2, which references proposed activities involving historic properties. The Corps is proposing to modify this paragraph by removing the reference to the ''Corps National Historic Preservation Act implementing regulations.'' The Corps notes that the information provided in a public notice is preliminary information and comments gathered through the public notice process along with other information would be used to inform the section 106 review conducted by the Corps. The information in the public notice is only intended for disclosure and transparency purposes and is not intended to demonstrate or substitute for compliance with section 106. The Corps is proposing to revise section 325.2(b)(3) to state that when reviewing applications for DA permits, the Corps Regulatory Program will follow the section 106 implementing regulations at 36 CFR part 800 to comply with the requirements of section 106 of the NHPA. The Corps is also proposing to make conforming changes to its nationwide permit program regulations at 33 CFR 330.4(g) to remove references to appendix C and cite the regulations at 36 CFR part 800 instead.

Proposed Conforming Changes to the Corps' Nationwide Permit Regulations

The Corps Regulatory Program's regulations for implementing its nationwide general permit program are provided in part 330 of Title 33 of the Code of Federal Regulations. Section 330.4(g) addresses the Nationwide Permit Program's compliance with section 106 of the NHPA. Section 330.4(g) contains references to appendix C to 33 CFR part 325, and the Corps is proposing to amend paragraph (g) by removing the references to appendix C and replacing them with references to the applicable provisions of 36 CFR part 800. The Corps is also proposing to remove the remaining subparagraphs of paragraph (g) in the regulation because they are superseded by the current Nationwide Permits regulation and permits with general conditions issued on January 13, 2021 (86 FR 2744). The Corps would continue to utilize the January 2021 regulation regarding General Condition 18 for historic properties while the Corps and ACHP focus on developing a program alternative regarding the Nationwide Permits compliance with section 106 of the NHPA to align with issuance of the next cycle of Nationwide Permits in 2026. To be clear, once notification occurs under General Condition 18 of the Nationwide Permits, the Corps would then proceed in using 36 CFR part 800 under this proposed rule as Appendix C would be removed from the CFR.

Expected Impact of This Rule

This proposed rule would primarily impact the Corps, applicants for Corps authorizations, Tribal Nations, Native Hawaiian Organizations, Tribal and State Historic Preservation Officers, and the general public, including groups interested in historic and cultural resource preservation. The Corps will be impacted through an implementation change from appendix C to 36 CFR part 800 for implementing section 106 of the NHPA. This will require additional training as the Corps follows a new process for compliance. The remaining impacted groups, including Tribal Nations, will have the benefit of improved clarity and consistency for implementation of section 106 of the NHPA as applied to the Corps' Regulatory Program. This will include consistency within the Corps and consistency with the rest of the Federal government, including the Corps' own Civil Works programs. Note that this proposed change to the regulations cannot modify the Corps' existing statutory authorities.

[4] *https://api.army.mil/e2/c/downloads/2022/12/08/7e19d5a2/modernize-civil-works-frn-comments-on-appendix-c.pdf* (accessed April 19, 2023).

Army considered both a no action alternative as well as an alternative that would revise appendix C. The no action alternative would result in continued use of appendix C, which has not been updated to align with changes in section 106 of the NHPA and its implementing regulations at 36 CFR part 800, and therefore is not a viable alternative. The alternative to revise appendix C would essentially result in the same language found in 36 CFR part 800, rendering the revision inefficient and duplicative.

Invitation for Public Comment

The Corps of Engineers is inviting public comment on all aspects of the proposal to remove appendix C from its regulations for the processing of applications for DA authorization at 33 CFR part 325 and its possible effects. If appendix C is removed, the Corps Regulatory Program would comply with section 106 of the NHPA by following and using the section 106 implementing regulations at 36 CFR part 800 for the processing of those permit applications (supplemented by a guidance document to be developed and disseminated jointly by the Corps and ACHP using existing regulations and ACHP guidance and providing illustrative examples). When a Corps district determines that a type of undertaking requiring DA authorization has the potential to cause effects to historic properties, it would use the section 106 implementing regulations at 36 CFR part 800 during the processing of the permit application. The Corps is also soliciting public comment on the proposal to modify paragraph (b)(3) of CFR 325.2 to identify the section 106 implementing regulations at 36 CFR part 800 as the regulations the Corps Regulatory Program would follow to comply with section 106 of the NHPA. Interested parties are also invited to provide comments on the Corps' proposed conforming changes to its Nationwide Permit regulations at 33 CFR 330.4(g), which addresses the requirements of section 106 of the NHPA for the Nationwide Permit program.

Administrative Requirements

Plain Language

In compliance with the principles in the President's Memorandum of June 1, 1998 (63 FR 31885, June 10, 1998), regarding plain language, this preamble is written using plain language.

Paperwork Reduction Act

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. For the Corps Regulatory Program under section 10 of the Rivers and Harbors Act of 1899, section 404 of the Clean Water Act, and section 103 of the Marine Protection, Research and Sanctuaries Act of 1972, the current OMB approval number for information collection requirements is maintained by the Corps of Engineers (OMB approval number 0710–0003, Application for a Department of Army Permit).

This proposed rule would not impose any additional information collection requirements or require the Corps Regulatory Program to propose changes to its current information collection requirements for activities that require DA authorization.

Executive Orders 12866, 13563, and 14094

This action is a significant regulatory action under Executive Order 12866 (58 FR 51735, October 4, 1993), Executive Order 13563 (76 FR 3821, January 21, 2011), and Executive Order 14094 (88 FR 21879, April 11, 2023) that was submitted to the OMB for review. It also followed the principles of section 2 of Executive Order 14094 through early engagement during the Modernize Civil Works effort (Notice of Virtual Public and Tribal Meetings Regarding the Modernization of Army Civil Works Policy Priorities; Establishment of a Public Docket; Request for Input; 87 FR 33756, June 3, 2022). A summary of comments received can be found on the Army Civil Works web page.[5]

Executive Order 13132

Executive Order 13132, ''Federalism'' (64 FR 43255, August 10, 1999), requires the Corps to develop an accountable process to ensure ''meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.'' The proposal to remove Appendix C from the Corps' regulations at 33 CFR part 325 and use the regulations at 36 CFR part 800 during the Corps Regulatory Program's processing of individual permit applications and general permit verification requests does not have federalism implications. We do not believe that the proposed change in the Corps Regulatory Program's procedures for compliance with section 106 of the NHPA will have substantial direct effects on the states, on the relationship between the Federal government and the states, or on the distribution of power and responsibilities among the various levels of government. The proposal will not impose any additional substantive obligations on State or local governments. Therefore, Executive Order 13132 does not apply to this proposal.

Regulatory Flexibility Act, as Amended by the Small Business Regulatory Enforcement Fairness Act of 1996, 5 U.S.C. 601 et seq.

The Regulatory Flexibility Act generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice-and-comment rulemaking requirements under the Administrative Procedure Act or any other statute unless the agency certifies that the proposed rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small organizations, and small governmental jurisdictions.

For purposes of assessing the impacts of the proposed removal of appendix C from 33 CFR part 325, the use of the regulations at 36 CFR part 800 to comply with section 106 of the NHPA during the processing of applications for DA authorizations, and the proposed conforming changes to the Corps' nationwide permit program regulations at 33 CFR 330.4(g) on small entities, a small entity is defined as: (1) A small business based on Small Business Administration size standards; (2) a small governmental jurisdiction that is a government of a city, county, town, school district, or special district with a population of less than 50,000; or (3) a small organization that is any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.

After considering the economic impacts of the proposed rule on small entities, I certify that this action will not have a significant impact on a substantial number of small entities. The Corps Regulatory Program's proposed procedures for compliance with section 106 of the NHPA would follow the section 106 implementing regulations at 36 CFR part 800. Small entities that need to obtain required DA authorizations through individual permits or general permits would have to support compliance with section 106 of the NHPA through the existing section 106 procedures at 36 CFR part 800. All other Federal agencies, unless they have an approved program alternative, use the 36 CFR 800 regulations and as such the small entities who apply for permits or work with the Federal government would be

[5] *https://api.army.mil/e2/c/downloads/2022/12/08/7e19d5a2/modernize-civil-works-frn-comments-on-appendix-c.pdf,* last accessed on April 19, 2023.

familiar with the procedures outlined in 36 CFR part 800. This familiarity would eliminate confusion and reduce any burdens on the part of the small entities under implementation of any finalized rule. In addition, the rest of the Corps Civil Works programs use the 36 CFR part 800 regulations so any small entity working with the Corps Civil Works programs would also already be familiar with implementation. Following appendix C under its current form can actually cause delays and expenditure of additional resources for small entities when multiple authorizations and Federal agencies are involved in addition to any required Corps Regulatory Program review as the small entity must comply with and understand two sets of implementing regulations. In addition, as appendix C has not been updated to align with changes in the NHPA, this proposed rule is a matter of bringing the Corps Regulatory Program into alignment with the NHPA.

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and Tribal governments and the private sector. Under section 202 of the UMRA, the agencies generally must prepare a written statement, including a cost-benefit analysis, for proposed and final rules with ''Federal mandates'' that may result in expenditures to State, local, and Tribal governments, in the aggregate, or to the private sector, of $100 million or more in any one year. Before promulgating a rule for which a written statement is needed, section 205 of the UMRA generally requires the agencies to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, most cost-effective, or least burdensome alternative that achieves the objectives of the rule. The provisions of section 205 do not apply when they are inconsistent with applicable law. Moreover, section 205 allows an agency to adopt an alternative other than the least costly, most cost-effective, or least burdensome alternative if the agency publishes with the final rule an explanation why that alternative was not adopted. Before an agency establishes any regulatory requirements that may significantly or uniquely affect small governments, including Tribal governments, it must have developed, under section 203 of the UMRA, a small government agency plan. The plan must provide for notifying potentially affected small governments, enabling officials of affected small governments to have meaningful and timely input in the development of regulatory proposals with significant Federal intergovernmental mandates, and informing, educating, and advising small governments on compliance with the regulatory requirements.

The Corps has determined that the proposed removal of appendix C from its permit processing regulations at 33 CFR part 325 and the proposed conforming changes to 33 CFR 330.4(g) do not contain a Federal mandate that may result in expenditures of $100 million or more for State, local, and Tribal governments, in the aggregate, or the private sector in any one year. The proposed rule does not impose new substantive requirements and therefore does not contain a Federal mandate that may result in expenditures of $100 million or more for State, local, and Tribal governments, in the aggregate, or the private sector in any one year. Therefore, this proposed rule is not subject to the requirements of sections 202 and 205 of the UMRA. For the same reasons, we have determined that the proposed removal of appendix C from 33 CFR part 325 and the proposed conforming changes to 33 CFR 330.4(g) do not contain regulatory requirements that might significantly or uniquely affect small governments. Therefore, this proposed rule is not subject to the requirements of section 203 of UMRA.

Executive Order 13045

Executive Order 13045, ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997), applies to any rule that: (1) is determined to be ''economically significant'' as defined under Executive Order 12866, and (2) concerns an environmental health or safety risk that we have reason to believe may have a disproportionate effect on children. If the regulatory action meets both criteria, we must evaluate the environmental health or safety effects of the proposed rule on children, and explain why the regulation is preferable to other potentially effective and reasonably feasible alternatives.

The proposal to remove appendix C from 33 CFR part 325 and to make conforming changes to 33 CFR part 330 is not subject to this Executive Order because the proposed rule is not economically significant as defined in Executive Orders 12866 and 14094. In addition, the proposed removal of appendix C from 33 CFR part 325 does not concern an environmental health or safety risk that the Corps has reason to believe may have a disproportionate effect on children.

Executive Order 13175

Executive Order 13175, ''Consultation and Coordination with Indian Tribal Governments'' (published at 65 FR 67249 on November 9, 2000), requires agencies to develop an accountable process to ensure ''meaningful and timely input by Tribal officials in the development of regulatory policies that have Tribal implications.'' The phrase ''policies that have Tribal implications'' is defined in the Executive Order to include regulations and other policy statements or actions that have ''substantial direct effects on one or more Indian tribes, on the relationship between the Federal government and Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes.''

This rulemaking action will have Tribal implications. This rulemaking action will have direct effects on Tribal governments, on the relationship between the Federal government and the Indian Tribes, or on the distribution of power and responsibilities between the Federal government and Indian Tribes. The 1992 amendments to the NHPA and the current regulations at 36 CFR part 800 require consultation with Indian Tribes when undertakings have the potential to cause effects to historic properties on Tribal lands or to historic properties of religious and cultural significance to Indian Tribes located off Tribal lands. Therefore, revising the Corps Regulatory Program's procedures for the protection of historic properties by removing appendix C to 33 CFR part 325 and using the section 106 implementing regulations at 36 CFR part 800 for the processing of applications for DA permits, will have Tribal implications. In addition, a nationwide rulemaking action on procedures for compliance with section 106 of the NHPA inherently has Tribal implications.

Tribal Nations are encouraged to submit comments on the proposal to remove appendix C from 33 CFR part 325 (''Procedures for the Protection of Historic Properties''), the proposal to modify § 325.2(b)(3), and the proposed conforming changes to section 330.4(g) of the Corps' Nationwide Permit Program regulations. A letter has also been disseminated to all federally recognized Tribes, Alaska Native Corporations, and Native Hawaiian Organizations notifying them of this proposed rule action and offering Nation-to-Nation consultation. In addition, a virtual meeting on this proposed rule action has also been scheduled to solicit input from Tribal Nations, Alaska Native Corporations,

and Native Hawaiian Organizations to provide multiple opportunities for meaningful engagement on this action. Comments are also encouraged from Indigenous peoples and communities who may not be federally recognized.

Environmental Documentation

The Corps has prepared a draft Environmental Assessment (EA) for this proposed rule. The draft EA is available for public comment in the *www.regulations.gov* docket for this proposed rule (docket number COE–2023–0004).

Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. We will submit a report containing the final rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. The proposed removal of appendix C from the Corps Regulatory Program's permit processing regulations at 33 CFR part 325 is not a ''major rule'' as defined by 5 U.S.C. 804(2), because it is not likely to result in: (1) an annual effect on the economy of $100,000,000 or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic and export markets.

Executive Orders 12898 and 14096

Executive Order 14096, Revitalizing Our Nation's Commitment to Environmental Justice for All, makes clear that the pursuit of environmental justice is a duty of all executive branch agencies and should be incorporated into their missions. Executive Order 14096 includes a whole-of-government definition of environmental justice.[6] Under Executive Order 14096, agencies must, as appropriate and consistent with applicable law, identify, analyze, and address the disproportionate and adverse human health and environmental effects (including risks) and hazards of rulemaking actions and other Federal activities on communities with environmental justice concerns. Executive Order 14096 supplements the foundational efforts of Executive Order 12898 to address environmental justice.

The proposed removal of appendix C and the use of 36 CFR part 800 to comply with the requirements of section 106 of the NHPA and the proposed additional conforming amendments to the Corps Regulatory Program's regulations is not expected to negatively impact any communities (including to cause any disproportionate adverse impacts).

Executive Order 13211

The proposed removal of appendix C and the use of 36 CFR part 800 to comply with the requirements of section 106 of the NHPA is not a ''significant energy action'' as defined in Executive Order 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001) because it is not likely to have a significant adverse effect on the supply, distribution, or use of energy.

Authority

The Corps is issuing this proposed rule under the authority of section 404 of the Clean Water Act (33 U.S.C. 1344), sections 9 and 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 401 *et seq.*) and section 103 of the Marine Protection, Research, and Sanctuaries Act of 1972, as amended (33 U.S.C. 1413).

List of Subjects

33 CFR Part 325

Administrative practice and procedure, Dams, Environmental protection, Intergovernmental relations, Navigation (water), Water pollution control, Waterways.

33 CFR Part 330

Administrative practice and procedure, Intergovernmental relations, Navigation (water), Water pollution control, Waterways.

For the reasons stated in the preamble, the Corps proposes to amend 33 CFR chapter II as set forth below:

PART 325—PROCESSING OF DEPARTMENT OF THE ARMY PERMITS

■ 1. The authority citation for part 325 continues to read as follows:

Authority: 33 U.S.C. 401 *et seq.;* 33 U.S.C. 1344; 33 U.S.C. 1413.

■ 2. Amend § 325.2 by revising paragraph (b)(3) to read as follows:

§ 325.2 Processing of applications.

* * * * *

(b) * * *

(3) *Historic properties.* Applications will be reviewed for the potential impact of the relevant undertaking on historic properties pursuant to section 106 of the National Historic Preservation Act. The district engineer will include a statement in the public notice of their current knowledge of historic properties based on their initial review of the application (see paragraph (a)(2) of this section). If the district engineer determines that the proposed undertaking is of a type that would not have the potential to cause effects to historic properties, using the assumption that such properties are present, they will include a statement to this effect in the public notice. If the district engineer finds the proposed undertaking is of a type that has the potential to cause effects to historic properties they will continue proceeding in accordance with 36 CFR part 800.

* * * * *

Appendix C to Part 325–[Removed]

■ 3. Remove Appendix C to part 325.

PART 330—NATIONWIDE PERMIT PROGRAM

■ 4. The authority citation for part 330 continues to read as follows:

Authority: 33 U.S.C. 401 *et seq.;* 33 U.S.C. 1344; 33 U.S.C. 1413.

■ 5. Amend § 330.4 by revising paragraph (g) to read as follows:

§ 330.4 Conditions, limitations, and restrictions.

* * * * *

(g) *Historic properties.* No activity which has the potential to cause effects to properties listed or properties eligible for listing in the National Register of Historic Places, is authorized until the district engineer has complied with the applicable provisions of 36 CFR part 800.

Approved by:

Michael L. Connor,

Assistant Secretary of the Army (Civil Works).

RIN 2060–AV59

National Emission Standards for Hazardous Air Pollutants: Lime Manufacturing Plants Amendments

AGENCY: Environmental Protection Agency (EPA).

ACTION: Supplemental notice of proposed rulemaking.

SUMMARY: This action supplements our proposed amendments to the National Emission Standards for Hazardous Air Pollutants for Lime Manufacturing Plants (Lime Manufacturing NESHAP) published in the **Federal Register** on January 5, 2023. In that action, the Environmental Protection Agency (EPA) proposed hazardous air pollutant (HAP) emissions standards for the following pollutants: hydrogen chloride (HCl), mercury, total hydrocarbon (THC) as a surrogate for organic HAP, and dioxin/furans (D/F). The EPA is proposing revisions to the proposed emission limits for HCl, mercury, organic HAP, and D/F based on additional information gathered since the publication of the January 5, 2023, proposed rule amendments. We solicit comments on all aspects of this proposed action.

DATES: Comments must be received on or before March 11, 2024. Under the Paperwork Reduction Act (PRA), comments on the information collection provisions are best assured of consideration if the Office of Management and Budget (OMB) receives a copy of your comments on or before March 11, 2024.

FOR FURTHER INFORMATION CONTACT: For questions about this proposed action contact U.S. EPA, Attn: Mr. Brian Storey, Mail Drop: D143–04, 109 T.W. Alexander Drive, P.O. Box 12055, RTP, North Carolina 27711; telephone number: (919) 541–1103 and email address: *storey.brian@epa.gov.*

SUPPLEMENTARY INFORMATION:

Docket. The EPA has established a docket for this rulemaking under Docket ID No. EPA–HQ–OAR–2017–0015. All submissions received must include the Docket ID No. for this rulemaking. Comments received may be posted without change to *https://www.regulations.gov/,* including any personal information provided. All documents in the docket are listed in *https://www.regulations.gov/.* Although listed, some information is not publicly available, *e.g.,* Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy. With the exception of such material, publicly available docket materials are available electronically in *Regulations.gov*.

Instructions. Direct your comments to Docket ID No. EPA–HQ–OAR–2017–0015. The EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *https://www.regulations.gov/,* including any personal information provided, unless the comment includes information claimed to be CBI or other information whose disclosure is restricted by statute. Do not submit electronically to *https://www.regulations.gov/* any information that you consider to be CBI or other information whose disclosure is restricted by statute. This type of information should be submitted as discussed below.

The EPA may publish any comment received to its public docket. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the Web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.*

The *https://www.regulations.gov/* website allows you to submit your comment anonymously, which means the EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to the EPA without going through *https://www.regulations.gov/,* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. If you submit an electronic comment, the EPA recommends that you include your name and other contact information in the body of your comment and with any digital storage media you submit. If the EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, the EPA may not be able to consider your comment. Electronic files should not include special characters or any form of encryption and be free of any defects or viruses. For additional information about the EPA's public docket, visit the EPA Docket Center homepage at *https://www.epa.gov/dockets.*

Submitting CBI. Do not submit information containing CBI to the EPA through *https://www.regulations.gov/.* Clearly mark the part or all of the information that you claim to be CBI. For CBI information on any digital storage media that you mail to the EPA, note the docket ID, mark the outside of the digital storage media as CBI, and identify electronically within the digital storage media the specific information that is claimed as CBI. In addition to one complete version of the comments that includes information claimed as CBI, you must submit a copy of the comments that does not contain the information claimed as CBI directly to the public docket through the procedures outlined in *Instructions* above. If you submit any digital storage media that does not contain CBI, mark the outside of the digital storage media clearly that it does not contain CBI and note the docket ID. Information not marked as CBI will be included in the public docket and the EPA's electronic public docket without prior notice. Information marked as CBI will not be disclosed except in accordance with procedures set forth in 40 Code of Federal Regulations (CFR) part 2.

Our preferred method to receive CBI is for it to be transmitted electronically using email attachments, File Transfer Protocol (FTP), or other online file sharing services (*e.g.,* Dropbox, OneDrive, Google Drive). Electronic submissions must be transmitted directly to the OAQPS CBI Office at the email address *oaqpscbi@epa.gov,* and as described above, should include clear CBI markings and note the docket ID. If assistance is needed with submitting large electronic files that exceed the file size limit for email attachments, and if you do not have your own file sharing service, please email *oaqpscbi@epa.gov* to request a file transfer link. If sending CBI information through the postal service, please send it to the following address: OAQPS Document Control Officer (C404–02), OAQPS, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, Attention Docket ID No. EPA–HQ–OAR–2020–0430. The mailed CBI material should be double wrapped and clearly marked. Any CBI markings should not show through the outer envelope.

Preamble acronyms and abbreviations. Throughout this document the use of ''we,'' ''us,'' or ''our'' is intended to refer to the EPA. We use multiple acronyms and terms in this preamble. While this list may not be exhaustive, to ease the reading of this preamble and for reference purposes, the EPA defines the following terms and acronyms here:

CAA Clean Air Act
CBI Confidential Business Information
CFR Code of Federal Regulations
DB dead burned dolomitic lime
D/F dioxin/furans
DL dolomitic lime
DSI dry sorbent injection
EJ environmental justice
EPA Environmental Protection Agency
ESP electrostatic precipitator
FF fabric filter
FR Federal Register
g/dscm grams of pollutant per dry standard cubic meter of air
HAP hazardous air pollutant(s)
HBEL health-based emission limit
HCl hydrogen chloride
HQ hazard quotient
IQV intra-quarry variability
lb/hr pounds of pollutant per hour
lb/MMton pounds of pollutant per million tons of lime produced at the kiln
lb/tsf pounds of pollutant per ton of stone feed
MACT maximum achievable control technology
NESHAP national emission standards for hazardous air pollutants
NTTAA National Technology Transfer and Advancement Act
OAQPS Office of Air Quality Planning and Standards
OMB Office of Management and Budget
PM particulate matter
ppmvd parts per million by volume, dry
PR preheater rotary kiln
PRA Paperwork Reduction Act
PSH process stone handling
QL quick lime
RDL representative detection level
REL reference exposure limit
RFA Regulatory Flexibility Act
RfC non-cancer reference concentration
RTR residual risk and technology review
SR straight rotary kiln
SSM startup, shutdown, and malfunction
TEF toxicity equivalence factors
THC total hydrocarbons
tpy tons of pollutant per year
UMRA Unfunded Mandates Reform Act
UPL upper predictive limit
VK vertical kiln
VCS voluntary consensus standards

Organization of this document. The information in this preamble is organized as follows:

I. General Information

A. Does this action apply to me?

Table 1 of this preamble lists the NESHAP and associated regulated industrial source categories that are the subject of this supplemental proposal. Table 1 is not intended to be exhaustive, but rather provides a guide for readers regarding the entities that the proposed rule is likely to affect. The standards, if promulgated, will be directly applicable to the affected sources. Federal, State, local, and Tribal government entities would not be affected by this rule. As defined in the *Initial List of Categories of Sources Under Section 112(c)(1) of the Clean Air Act Amendments of 1990* (see 57 FR 31576; July 16, 1992) and *Documentation for Developing the Initial Source Category List, Final Report* (see EPA–450/3–91–030; July 1992), the Lime Manufacturing source category is ''any facility engaged in producing high calcium lime, dolomitic lime, and dead-burned dolomite.'' However, lime manufacturing plants located at pulp and paper mills or at beet sugar factories are not included in the source category (69 FR 394, 397, January 5, 2004).

TABLE 1—NESHAP AND INDUSTRIAL SOURCE CATEGORIES AFFECTED BY THIS PROPOSED ACTION

Source category and NESHAP	NAICS code [1]
Lime Manufacturing	32741, 33111, 3314, 327125.

[1] North American Industry Classification System.

B. Where can I get a copy of this document and other related information?

In addition to being available in the docket, an electronic copy of this action is available on the internet. Following signature by the EPA Administrator, the EPA will post a copy of this supplemental proposal at *https://www.epa.gov/stationary-sources-air-pollution/lime-manufacturing-plants-national-emission-standards-hazardous.* Following publication in the **Federal Register**, the EPA will post the **Federal Register** version of this supplemental proposal rule and key technical documents at this same website.

II. Background

A. What is the statutory authority for this action?

On January 5, 2023, the EPA proposed to amend the National Emission Standards for Hazardous Air Pollutants for Lime Manufacturing Plants (Lime Manufacturing NESHAP), to set emission standards for four previously unregulated pollutants.[1] This supplemental proposal seeks comment on revisions to the proposed emission limits for HCl, mercury, organic HAP, and D/F based on information received from public commenters and other sources of information, including the small business review panel.

In *Louisiana Environmental Action Network* v. *EPA (LEAN),* 955 F.3d 1088 (D.C. Cir. 2020) the U.S. Court of Appeals for the District of Columbia Circuit (D.C. Circuit) held that the EPA has an obligation to address unregulated emissions from a source category in the 8-year review. To meet this obligation, the EPA issued the January 5, 2023, proposed rule to address unregulated emissions of HAP from the lime manufacturing source category. The proposed amendments defined the maximum achievable control technology (MACT) standard for hydrogen chloride (HCl), mercury, total hydrocarbon (THC) as a surrogate for organic HAP, and dioxin/furans (D/F) within the lime manufacturing source category pursuant to the Clean Air Act (CAA) sections 112(d)(2) and (3). This proposal supplements the January 5, 2023, proposed rule amendments.

B. What is this source category and how does the current NESHAP regulate its HAP emissions?

The EPA promulgated the Lime Manufacturing NESHAP on January 5, 2004 (69 FR 394). The standards are codified at 40 CFR part 63, subpart AAAAA. The lime manufacturing industry consists of facilities that use a lime kiln to produce lime product from limestone by calcination. The source category covered by this MACT standard currently includes 34 facilities.

As promulgated in 2004, the current Lime Manufacturing NESHAP regulates HAP emissions from all new and existing lime manufacturing plants that are major sources, co-located with major sources, or are part of major sources. A lime manufacturing plant is defined as any plant which uses a lime kiln to produce lime product from limestone or other calcareous material by calcination. The NESHAP specifically excludes lime kilns that use only calcium carbonate waste sludge from water softening processes as the feedstock. In addition, lime manufacturing plants located at pulp and paper mills or at beet sugar factories are not subject to the NESHAP. Lime manufacturing operations at pulp and paper mills are subject to the NESHAP for combustion sources at kraft, soda, and sulfite pulp and paper mills.[2] Lime manufacturing operations at beet sugar processing plants are not subject to the Lime Manufacturing NESHAP because beet sugar lime kiln exhaust is typically routed through a series of gas washers to clean the exhaust gas prior to process use. Other lime manufacturing plants that are part of multiple operations, such as (but not limited to) those at steel mills and magnesia production facilities, are subject to the Lime Manufacturing NESHAP.

The current Lime Manufacturing NESHAP defines the affected source as each lime kiln and its associated cooler and each individual processed stone handling (PSH) operations system. The PSH operations system includes all equipment associated with PSH operations beginning at the process stone storage bin(s) or open storage pile(s) and ending where the process stone is fed into the kiln. It includes man-made process stone storage bins (but not open process stone storage piles), conveying system transfer points, bulk loading or unloading systems, screening operations, surge bins, bucket elevators, and belt conveyors.

The current Lime Manufacturing NESHAP established particulate matter (PM) emission limits for lime kilns, coolers, and PSH operations with stacks. The NESHAP also established opacity limits for kilns equipped with electrostatic precipitators (ESP) and fabric filters (FF) and scrubber liquid flow limits for kilns equipped with wet scrubbers. Particulate matter serves as a surrogate for the non-mercury metal HAP. The NESHAP also regulates opacity or visible emissions from most of the PSH operations, with opacity also serving as a surrogate for HAP metals.

The PM emission limit for existing kilns and coolers is 0.12 pounds PM per ton of stone feed (lb/tsf) for kilns using dry air pollution control systems (*e.g.,* dry scrubbers, fabric filters, baghouses) prior to January 5, 2004. Existing kilns that have installed and are operating wet scrubbers prior to January 5, 2004, must meet an emission limit of 0.60 lb/tsf. Kilns which meet the criteria for the 0.60 lb/tsf emission limit must continue to use a wet scrubber for PM emission control in order to be eligible to meet the 0.60 lb/tsf limit. If at any time such a kiln switches to a dry control, it would become subject to the 0.12 lb/tsf emission limit, regardless of the type of control device used in the future. The PM emission limit for all new kilns and lime coolers is 0.10 lb/tsf. As a compliance option, these emission limits (except for the 0.60 lb/tsf limit) may be averaged across kilns and coolers at the lime manufacturing plant. If the lime manufacturing plant has both new and existing kilns and coolers, then the emission limit would be an average of the existing and new kiln PM emissions limits, weighted by the annual actual production rates of the individual kilns, except that no new kiln may exceed the PM emission level of 0.10 lb/tsf. Existing kilns that have installed and are operating wet scrubbers prior to January 5, 2004, and that are required to meet a 0.60 lb/tsf emission limit must meet that limit individually, and they may not be included in any averaging calculations.

Emissions from PSH operations that are vented through a stack are subject to a limit of 0.05 grams PM per dry standard cubic meter (g/dscm) and 7 percent opacity. Stack emissions from PSH operations that are controlled by wet scrubbers are subject to the 0.05 g PM/dscm limit but are not subject to the opacity limit. Fugitive emissions from PSH operations are subject to a 10 percent opacity limit.

For each building enclosing any PSH operation, each of the affected PSH operations in the building must comply individually with the applicable PM and opacity emission limitations. Otherwise, there must be no visible emissions from the building, except from a vent, and the building's vent emissions must not exceed 0.05 g/dscm and 7 percent opacity. For each fabric filter that controls emissions from only an individual, enclosed processed stone storage bin, the opacity must not exceed 7 percent. For each set of multiple processed stone storage bins with combined stack emissions, emissions must not exceed 0.05 g/dscm and 7 percent opacity. The current Lime Manufacturing NESHAP does not allow averaging of PSH operations.

The 2020 amendments finalized the residual risk and technology review (RTR) conducted for the Lime Manufacturing NESHAP. The 2020 RTR found that the Lime Manufacturing NESHAP provided an ample margin of safety to protect public health, more stringent standards were not necessary to prevent an adverse environmental effect, and that there were no developments in practices, processes, or control technologies that would warrant

[1] 88 FR 805 (Jan. 5, 2023).

[2] 66 FR 3180, January 12, 2001.

revisions to the standards. In addition, the 2020 RTR addressed periods of startup, shutdown, and malfunction (SSM) by removing any exemptions during SSM operations. Lastly, the 2020 amendments included provisions requiring electronic reporting.

C. What changes did we propose for the lime manufacturing source category in our January 5, 2023, proposal?

On January 5, 2023, the EPA published a proposal in the **Federal Register** for the Lime Manufacturing NESHAP, 40 CFR part 63, subpart AAAAA to propose setting MACT standards for HCl, mercury, THC as a surrogate for organic HAP, and D/F. Table 2 includes a summary of the MACT standards in the January 5, 2023, proposal.

TABLE 2—SUMMARY OF NEW AND EXISTING SOURCE LIMITS FOR THE LIME MANUFACTURING NESHAP INCLUDED IN THE JANUARY 5, 2023, PROPOSAL

Pollutant [1]	Kiln type [2]	Stone produced [3]	New source limit	Unit of measure	Existing source limit	Unit of measure
HCl	SR	DL, DB	1.6	lb/ton stone produced	2.2	lb/ton stone produced.
	SR	QL	0.021	lb/ton stone produced	0.58	lb/ton stone produced.
	PR	DL, DB	0.39	lb/ton stone produced	0.39	lb/ton stone produced.
	PR	QL	0.015	lb/ton stone produced	0.015	lb/ton stone produced.
	VK	QL	0.021	lb/ton stone produced	0.021	lb/ton stone produced.
Mercury	All	QL, DL	24.9	lb/MMton stone produced	24.9	lb/MMton stone produced.
	All	DB	24.4	lb/MMton stone produced	33.1	lb/MMton stone produced.
THC	All	All	0.86	ppmvd as propane @7 percent O_2	3.47	ppmvd as propane @7 percent O_2.
D/F	All	All	0.028	ng/dscm (TEQ) @7 percent O_2	0.028	ng/dscm (TEQ) @7 percent O_2.

[1] Hydrogen chloride (HCl), total hydrocarbon (THC), dioxin/furans (D/F).
[2] Straight rotary kiln (SR), preheater rotary kiln (PR), vertical kiln (VK).
[3] Dolomitic lime (DL), quick lime (QL), dead burned dolomitic lime (DB).

III. Analytical Results and Proposed Decisions

This section provides a description of this proposal, which supplements the January 5, 2023, proposed amendments, and the EPA's rationale for this supplemental proposal.

A. What revisions are we proposing to the hydrogen chloride emission standards?

As a result of reviewing public comments received on the January 5, 2023, proposed amendments, the EPA was made aware of five instances where kilns were subcategorized as preheater rotary kilns (PR) producing quick lime (QL) but were in fact straight rotary kilns (SR) producing QL. All five kilns identified are located at the Carmeuse Lime and Stone plant in Gary, Indiana. One of these five kilns was in the HCl MACT pool for the PR, QL subcategory, and was included in the Upper Predictive Limit (UPL) calculations. This kiln was moved from this subcategory to the SR, QL subcategory. Removing this kiln from the PR, QL subcategory and adding it to the SR, QL subcategory changed the data used in the UPL calculation and therefore changed the UPL calculation results. Refer to the memorandum ''Maximum Achievable Control Technology (MACT) Floor Analysis for the Lime Manufacturing Plants Industry Supplemental Proposal,'' which is included in the docket for this rulemaking, for a detailed description of the revised calculations.

In addition, in the January 5, 2023, proposal we did not subcategorize vertical kilns by the type of stone produced. We received a comment that the EPA should subcategorize vertical kilns by product, similar to the subcategorization of rotary kilns. (See Docket ID No. EPA–HQ–OAR–20177–0015–0166). In this action we are proposing a vertical kiln (VK): dolomitic lime (DL), dead-burned, dolomitic lime (DB) subcategory as was done with the proposed PR, DL/DB rotary kiln emission limits.

The changes in our proposed HCl emission limits for new and existing sources are include in table 3.

TABLE 3—SUMMARY OF RE-PROPOSED NEW AND EXISTING SOURCE LIMITS FOR HYDROGEN CHLORIDE

Kiln type [1]	Stone produced [2]	New source limit (lb/ton stone produced)	Existing source limit (lb/ton stone produced)
SR	QL	0.015	0.52
SR	DL, DB	1.7	2.3
PR	QL	0.096	0.096
PR	DL, DB	0.39	0.39
VK	QL	0.021	0.021
VK	DL, DB	0.39	0.39

[1] Straight rotary kiln (SR), preheater rotary kiln (PR), vertical kiln (VK).
[2] Dolomitic lime (DL), quick lime (QL), dead burned dolomitic lime (DB).

In the January 5, 2023, proposal the EPA estimated that applying a removal efficiency of dry sorbent injection (DSI) controls using hydrated lime to each kiln in the source category to meet the MACT floor would result in a reduction of HCl emissions from these sources of 1,163 tons per year (tpy). As a result of the changes to these subcategories, explained in this section, the EPA now estimates that applying a removal efficiency of DSI controls to meet the MACT floor would result in a reduction of HCl emissions from these sources of 884 tons of HCl per year.

We conducted a revised beyond-the-floor analysis, where we evaluated whether existing kilns would be able to comply with the proposed new source HCl MACT floor limits. We found that

the estimated reduction in HCl emissions from existing sources complying with a beyond-the-floor HCl limit is 1,453 tpy. The estimated incremental reduction, where we compare the existing source beyond-the-floor limit to the existing source MACT floor limit, is 568 tpy. Refer to the memorandum ''Maximum Achievable Control Technology (MACT) Floor Analysis for the Lime Manufacturing Plants Industry Supplemental Proposal,'' which is included in the docket for this rulemaking, for a detailed description of the revised calculations. Using revised cost calculations (refer to section IV.C. of this preamble) we estimate the total capital investment to be $749,000,000 and total annual costs to be $139,000,000 per year for beyond-the-floor limits. This results in a cost effectiveness of approximately $95,000 per ton of HCl removal. We do not consider these control costs to be reasonable compared to other rules where we have regulated HCl and costs were a consideration.[3] Therefore we are not proposing a beyond-the-floor standard for HCl. Refer to the memorandum, ''Cost Impacts for the Lime Manufacturing Plants Industry Supplemental Proposal'', included in the docket of this rulemaking.

As part of our beyond-the-floor analysis, we typically identify control techniques that have the ability to achieve an emissions limit more stringent than the MACT floor. No techniques were identified that would achieve HAP reductions greater than the new source floors for the HCl subcategories. Therefore, consistent with the January 5, 2023, proposal the EPA is not proposing a beyond-the-floor HCl limit for new sources in this supplemental proposal.

In its report, the Small Business Advocacy Review Panel requested that the EPA consider establishing a health-based emission limit (HBEL) for HCl and asked the EPA to take comment on a potential HBEL standard. For a HAP with an established health threshold, CAA section 112(d)(4) allows the EPA to consider such health thresholds when establishing emission standards under CAA section 112(d). Section 112(d)(4) of the CAA states, ''With respect to pollutants for which a health threshold has been established, the Administrator may consider such threshold level, with an ample margin of safety, when establishing emission standards under this subsection.'' In other words, for HAP with a health threshold, standards may be promulgated under a process different from that otherwise specified in CAA section 112(d), and these standards are referred to as HBEL. Based on the request, the EPA seeks comment on establishing an HBEL under CAA section 112(d)(4) for HCl.

The EPA is mindful that, in *Sierra Club* v. *Environmental Protection Agency,* 895 F.3d 1 (D.C. Cir. 2018), the court remanded the NESHAP for Brick and Structural Clay Products Manufacturing and for Clay Ceramics Manufacturing. The court found that the EPA had not sufficiently supported its determination that HCl is a ''pollutant for which a health threshold has been established''; specifically, the court determined that the rulemaking record did not show that HCl is not a carcinogen. 895 F.3d at 11. The court also stated that the EPA had not sufficiently explained why it had used the EPA inhalation Reference Concentration (RfC) instead of using California's health value in setting the HBEL. Below, the EPA considers the court's points related to the denying the use of an HBEL for HCl as well as an example of how an HBEL may be established for this rulemaking.

With regard to carcinogenicity, it is important to acknowledge that the science and methods of cancer risk assessment have evolved over the 33 years since the CAA amendments were issued. The EPA now recognizes that carcinogens can be either non-threshold or threshold pollutants.[4] Linear non-threshold carcinogens can cause adverse health effects, including cancer, at any level of exposure. In contrast, non-linear threshold carcinogens may pose a cancer risk only above a certain exposure level. Based on the science and methods developed over the last 33 years, and CAA section 112(d)(4)'s focus on a threshold, not cancer risk, we believe that the issue is not whether HCl is a carcinogen but rather whether HCl has a threshold.

An important consideration when determining if a carcinogen has a threshold is whether it is mutagenic. If a pollutant is mutagenic, science supports that any dose may cause cancer; in other words, there is not likely to be a threshold. In the case of HCl, the available evidence does not indicate that HCl has a mutagenic effect. Bacteria that have been exposed to HCl in research studies have not exhibited any mutations.[5] Although studies reported by Morita *et al.* (1989)[6] and Brusick (1986)[7] involving mammalian exposure to HCl have found mutagenicity, researchers have concluded that these effects are an artifact of acidic conditions caused by exceptionally high doses of HCl. Genotoxic or mutagenic effects caused at high doses by changes in pH are not relevant to environmental levels of exposure under normal physiological conditions.

Another important consideration in determining whether a pollutant has a threshold is understanding whether there are alternative mechanisms by which the observed effects could lead to the development of cancer. In an animal study designed to observe cancer outcomes, rats exposed to HCl showed increased cell production and tissue enlargement, known as hyperplasia, in the respiratory tract. However, the rats showed no evidence of HCl-induced tumors or cancer.[8] Hyperplasia may or may not progress to tumor development and cancer over time.[9] However, cancer cannot occur through this mechanism if exposure is below the threshold at which hyperplasia occurs. Continuous exposure to a chemical or its metabolite can cause persistent cell killing which in turn may result in regenerative hyperplasia in the damaged tissue. The EPA's Office of Pesticides recognizes that ''for irreversible tissue alterations to occur in humans, including cancer by this mode of action, a *sufficient exposure* (emphasis added) must be encountered over a prolonged period.'' [10] The EPA's Integrated Risk Information System (IRIS) program has similarly recognized the existence of a threshold of exposure for hyperplasia and resulting cancer outcomes from exposure to chloroform. Chloroform was

[3] See 86 FR 64393, November 18,2021, where we found that $26,000/ton for HCl was not cost effective as a beyond-the-floor option.

labeled as likely to be carcinogenic to humans under high-exposure conditions that cause hyperplasia. However, the EPA concluded that chloroform is not likely to be carcinogenic to humans under exposure conditions that do not cause hyperplasia.[11]

The EPA derived a reference concentration (RfC) for HCl which identifies a health-based threshold for hyperplasia [12]. This RfC represents an estimate (with uncertainty spanning perhaps an order of magnitude) of a daily inhalation exposure to the human population (including sensitive subgroups) that is likely to be without an appreciable risk of deleterious effects during a lifetime. An expert review workshop had previously evaluated the evidence available for HCl and for a similar chemical, sulfuric acid, and suggested that no adverse effects from exposure to HCl would be expected in humans at or below 3 mg/m3.[13] The EPA performed an independent evaluation to identify a value expected to be without adverse effects, including in sensitive subgroups. The EPA's dose-response evaluation incorporated a 300-fold factor to account for any residual uncertainty, including the potential for variability in response across the human population. The final RfC derived by the EPA was 0.02 mg/m3.[14] Exposure to HCl in the general population is expected to occur below 3 mg/m3 and 0.02 mg/m3, below which there are no observable adverse health effects. Considering the evidence regarding [15] and the availability of a hyperplasia protective health threshold, the EPA seeks comment on whether it is appropriate to consider HCl a threshold pollutant under CAA section 112(d)(4). The EPA also requests comments on new or additional scientific evidence that will inform the agency whether or not HCl has a threshold.

In its 2018 opinion in *Sierra Club,* the D.C. Circuit also stated that the EPA did not fully explain why the EPA's RfC for HCl, which the Agency has designated as a ''low confidence'' value, was preferable to an alternative value developed by the California EPA, known as the chronic reference exposure level (REL). The EPA had previously explained in its *Methods for Derivation of Inhalation Reference Concentrations and Application of Inhalation Dosimetry* and *Guidelines for Carcinogenic Risk Assessment* that the Agency derives RfC only when there are enough data to designate a pollutant as having a threshold and there are enough data to set a numerical RfC. Also, after deriving an RfC, the EPA evaluates the data used to derive the RfC and assigns confidence levels of high, medium, or low to each of its reference concentrations based on the completeness of the supporting data base.[16] A ''low confidence'' label in the RfC is applied to a derivation that is based on several data extrapolations and a less complete data base than those with a ''high confidence'' or ''medium confidence'' labels. Therefore, a ''low confidence'' RfC value indicates that it may change if additional supporting data become available. It does not mean that the current available data base is weak or unreliable. In fact, the principal and supporting studies selected to derive the RfC for HCl meet the data base criteria for estimation of an RfC which means that the data base is adequate and acceptable. The California EPA chronic REL for HCl was derived using the same principal and supporting studies. Therefore, the California EPA value reflects the same data base confidence as the EPA RfC.

While the EPA and California EPA values were derived using the same principal study and similar methodologies, there was a significant difference in the derivation of each value, which led to the California EPA value being more stringent. The principal driver for this difference was the California EPA's exclusion of mid-respiratory tract (*i.e.,* trachea) effects from its dosimetry adjustment calculations.[17] By contrast, the EPA incorporated both upper- (*i.e.,* nose, mouth) and mid-respiratory tract effects. California EPA's sole rationale for the exclusion of mid-respiratory tract effects was based on the prediction that humans are expected to be relatively more susceptible in the upper-respiratory tract.

Although the predominant effects of inhaled HCl are expected to occur in the upper respiratory tract, the EPA disagrees with the California EPA's exclusion of mid-respiratory tract effects and believes that California EPA's approach is inconsistent with the EPA's own guidelines for deriving inhalation reference concentrations. The principal study relied upon by the EPA and California EPA reported that rats exposed to HCl developed a higher incidence of hyperplasia in both upper- and mid-respiratory tracts. Furthermore, the EPA guidelines establish that when effects are observed in the mid-respiratory tract, this region should also be considered in the dosimetry adjustment calculations.[18] Therefore, the EPA approach to derive the RfC is more robust because it better represents the observed respiratory effects reported in the scientific literature.

In contemplating whether the EPA could set an HBEL for HCl emissions in the lime manufacturing source category, the EPA reviewed the conclusions on the potential for HCl to cause adverse health effects in the 2020 RTR. The maximum chronic Hazard Quotient (HQ) for HCl was 0.04, and the maximum acute HQ hazard was 0.6 based upon actual emissions. Because the hazards associated with HCl were acceptable with an ample margin of safety in the 2020 RTR, it is possible to contemplate setting an HBEL for this rule. Refer to the November 2023 memorandum ''Risk Approach to Assess a Health-Based Emission Limit for Hydrochloric Acid for the Lime Manufacturing Source Category,'' located in the docket for this rulemaking. The modeling methodology applied for both the 2020 RTR and the 2023 HBEL proposal accounts for aggregate impacts to census blocks for locations that may have multiple lime manufacturing plants within a 50 km domain. The proposed HBEL for HCl is at an emission level that is higher than the modeled actual emissions for the 2020 RTR. An example of what an HBEL for HCl might look like is presented below.

To set an HBEL for HCl, we would establish an emission standard to ensure that levels of HCl remain well below the concentrations at which any impacts would be expected to occur. As an example, an appropriate approach to

setting a health-based threshold might be to establish a mass-based standard. Such a standard could include both a tons per year limit as well as a pounds per hour limit to ensure protection from both chronic and acute impacts. We have provided an analysis of such a standard in the November 2023 memorandum ''Risk Approach to Assess a Health-Based Emission Limit for Hydrochloric Acid for the Lime Manufacturing Source Category,'' located in the docket for this rulemaking. Based on this analysis, the HBEL would be an emission limit of 300 tpy, not to exceed 685 pounds per hour (lb/hr). We would expect such a limit to ensure that HCl emissions from this source category, while could be higher than in the proposal would remain at levels consistent with a chronic HQ no greater than 0.2 and a maximum acute HQ no greater than 0.6. We request comment on whether such a standard would provide an ample margin of safety and whether additional measures would be needed to do so.

Appropriate monitoring, recordkeeping, and reporting requirements would also be required to ensure compliance with the limit. The EPA is requesting comment on an appropriate structure for incorporating an HBEL in the rule text. Refer to the memorandum, ''Revisions to 40 CFR part 63 Subpart AAAAA to Accommodate a Health-Based Standard'', included in the docket for this rulemaking, for a description of potential revisions to the subpart to include initial compliance, continuous compliance, recordkeeping, and reporting rule language in support of an HBEL.

B. What revisions are we proposing to the mercury emission standards?

Prior to the January 5, 2023, proposed rule, the EPA evaluated the use of an intra-quarry variability (IQV) factor to be applied in the mercury UPL calculations to account for the naturally occurring variability in mercury content of the raw materials. The formation of the rock being mined for raw materials occurred over a large span of geological time. Consistent with the approach followed in the Portland Cement Manufacturing NESHAP, 40 CFR part 63, subpart LLL, and the Brick and Structural Clay Products NESHAP, 40 CFR part 63, subpart JJJJJ, the IQV factor accounts for this variability in the mercury content of the raw material over geological time. However, in the January 5, 2023, proposed rule amendments we did not believe we had sufficient data to apply an IQV factor.

As described in the January 5, 2023, proposal, the EPA was provided data from the quarries of two separate lime manufacturing facilities (Carmeuse Maysville and Graymont Eden quarries). Both facilities were included in the mercury MACT floor calculations. At the first facility, the mercury content of the kiln feed was sampled, and the results tabulated. At the second facility the quarry was sampled, at multiple bore-hole depths, as well as the kiln feed, and the results tabulated.

When developing the January 5, 2023, proposal, the EPA had believed that the kiln feed data was more representative of the mercury content of the raw material, but wrongly assumed this was due to the mined quarry stone first being stored in open storage piles over time, where new stone added to the storage pile was assumed to homogenize with other stone in the storage pile. In the public comments received, industry representatives explained that stone from the quarry is stored in ''short-term'' storage piles,[19] where new stone added does not have time to ''homogenize'' with other stone before being fed into the kiln. It was also noted that quarry samples, as collected in the Graymont bore-hole sample data, represent the intent of the IQV by reporting on the measured variability of the mercury content of the rock over varying depths, representing variations over geologic time. Based on these comments, the EPA reconsidered the suitability of these data to develop an IQV factor.

The EPA considered both the Graymont and Carmeuse quarry data in the IQV factor analysis. Both facilities were part of the MACT floor pool in the QL subcategory. From this analysis a relative standard deviation (RSD) was calculated by dividing the standard deviation by the data average. The RSD was then incorporated into the UPL calculations for new and existing QL sources as part of the ''pooled variance'' factor of the UPL equation. Refer to the memorandum ''Maximum Achievable Control Technology (MACT) Floor Analysis for the Lime Manufacturing Plants Industry Supplemental Proposal,'' which is included in the docket for this rulemaking, for a detailed description of the revised calculations. The application of an IQV factor revised the originally proposed mercury emission limit for new and existing QL sources from 24.9 pounds per million tons of lime produced (rounded to 25 lb/MMton) for both new and existing sources to 27 lb/MMton for new sources, and 34 lb/MMton for existing sources in the QL subcategory.

As part of the evaluation of a mercury standard with the inclusion of an IQV factor, the EPA reconsidered whether a separate subcategory was necessary for kilns producing dead-burned dolomitic lime (DB), as proposed in the January 5, 2023, proposed amendments. To do this, we first developed standards based on no subcategorization and the application of an IQV factor. The result of this analysis was 27 lb Hg/MMton for new sources and 34 lb Hg/MMton for existing sources. These standards were developed based on the kilns that made up the MACT pool. These kilns were producing high calcium quick lime (QL) and dolomitic lime (DL). Based on test data available, the EPA determined that kilns producing DB would be able to comply with this existing source standard after the application of air pollution controls. Based on the test data available, the EPA determined that there was little difference in mercury emissions from SR and PR kilns producing Ql and/or DL. Moreover, we have found that residence time of raw materials in a kiln has little impact on mercury emissions. We are proposing to not create subcategories based on kiln type in setting mercury emission limits.

Our proposed mercury emission limits for new and existing sources, without subcategories, are included in table 4.

TABLE 4—SUMMARY OF RE-PROPOSED NEW AND EXISTING SOURCE LIMITS FOR MERCURY

Kiln type	Stone produced	New source limit (lb/MMton stone produced)	Existing source limit (lb/MMton stone produced)
All	All	27	34

[19] Docket ID No. EPA–HQ–OAR–2017–0015–0166, section X. A.

In the January 5, 2023, proposed amendments the EPA estimated that applying a removal efficiency of activated carbon injection (ACI) controls to the source category to meet the MACT floor would result in a reduction of mercury emissions from these sources of approximately 489 pounds of mercury per year. As a result of this supplemental proposal, and the inclusion of an IQV factor in the UPL calculations for mercury, the EPA estimates that applying ACI controls would result in a reduction of mercury emissions from these sources of 460 pounds of mercury per year.

We conducted a beyond-the-floor analysis, where we evaluated whether existing kilns would be able to comply with the new source mercury MACT floor limits. We found that the estimated reduction in mercury emissions from a beyond-the-floor mercury limit is approximately 490 pounds (0.24 tons) of mercury per year. The estimated incremental reduction, where we compare the existing source beyond-the-floor limit to the existing source MACT floor limit, is 30 pounds (0.01 tons) of mercury per year. We estimate the total capital investment to be $244,000,000 and total annual costs to be $116,000,000 per year for beyond-the-floor limits. This results in a cost effectiveness of approximately $238,000 per pound ($476,000,000 per ton) of mercury removal. We do not consider the control costs to be reasonable compared to other rules where we have regulated mercury and costs are consideration.[20] Therefore we are not proposing a beyond-the-floor standard for mercury. This is a change from that in the January 5, 2023, proposal. Refer to the memorandum, ''Cost Impacts for the Lime Manufacturing Plants Industry Supplemental Proposal'', included in the docket of this rulemaking.

As part of our beyond-the-floor analysis, we typically identify control techniques that have the ability to achieve an emissions limit more stringent than the MACT floor. No techniques were identified that would achieve HAP reductions greater than the new source floors for the mercury. Therefore, consistent with the January 5, 2023, proposal, the EPA is not proposing a beyond-the-floor mercury limit for new sources in this proposed rule. A detailed description of our beyond-the-floor analysis and conclusions is provided in the memorandum, ''Maximum Achievable Control Technology (MACT) Floor Analysis for the Lime Manufacturing Plants Industry Supplemental Proposal'' which is included in the docket for this rulemaking.

C. What revisions are we proposing to the organic HAP emission standards?

The EPA received comments on the January 5, 2023, proposed amendments opposing the use of THC as a surrogate for organic HAP. Commenters representing industry noted that vertical kilns have relatively elevated THC emissions, while organic HAP emissions are relatively low. They note that this is because of the influence of unburned fuel in the kiln exhaust either due to countercurrent flow switching directions in twin-shaft vertical kilns, or incomplete air-fuel mixing in single-shaft vertical kilns.

The EPA re-evaluated the test data of organic HAP emissions and identified eight pollutants from the data that were found to be consistently emitted by the lime manufacturing source category. The list includes both ''high volume'' and ''low volume'' organic HAP. These include the following pollutants: formaldehyde, acetaldehyde, toluene, benzene, xylenes (a mixture of m, o, and p isomers), styrene, ethyl benzene, and naphthalene. The EPA has determined that the emissions data of these eight pollutants best represent the typical organic HAP emissions of the source category. Furthermore, the EPA has determined that controlling the emissions of these eight pollutants from a lime manufacturing facility by use of activated carbon or other means would also control potential emissions of all other organic HAP because the same controls applied to control the eight pollutants would also be effective controls for all organic HAP. For these reasons, the EPA is re-proposing to use an aggregated emission standard of the eight organic HAP identified in the data analysis as a surrogate for total organic HAP instead of the previously proposed THC standard. Commenters requested that the EPA consider a list of 13 pollutants but further review of the data for which the EPA could validate test reports showed that only the eight pollutants listed in this section were found to be emitted consistently.

For each of the eight organic HAP, the EPA calculated the emission limit value equivalent to three times the representative detection level (3xRDL) of the test method. This was then compared to UPL calculations for the eight pollutants. In all cases for both new and existing sources the 3xRDL value, which represents the lowest value that can be accurately measured, was above the calculated UPL. We are accordingly proposing to set the MACT floor at this level. Refer to the memorandum titled, ''Maximum Achievable Control Technology (MACT) Floor Analysis for the Lime Manufacturing Plants Industry Supplemental Proposal'' included in the docket of this rulemaking for a detailed description of the methodology used. Table 5 includes a summary of the 3xRDL values for each organic HAP used to develop the aggregated limit.

TABLE 5—SUMMARY OF 3xRDL VALUES FOR NEW AND EXISTING ORGANIC HAP

Pollutant	RDL (ppmvd @ 7 percent O_2)	3xRDL (ppmvd @ 7 percent O_2)
Formaldehyde	0.14	0.42
Acetaldehyde	0.29	0.87
Toluene	0.014	0.028
Benzene	0.022	0.066
Xylenes (mixture of m, o, and p isomers)	0.023	0.069
Styrene	0.0043	0.013
Ethyl benzene	0.057	0.18
Napthalene	0.0081	0.025
Total	.....	1.7

[20] See 79 FR 75638, December 18, 2014, where the EPA found that a beyond-the-floor option for mercury of $74,000/lb was not cost effective.

Similar to the organic HAP limit in the Portland Cement NESHAP, the EPA is proposing to set the new and existing source organic HAP limit as a sum of the 3xRDL emission limit values for the eight pollutants identified in table 5 (1.7 ppmvd at 7 percent O_2) as a surrogate for total organic HAP. The EPA believes that by controlling the emissions of the eight organic HAP identified in table 5 a source would also control the emissions of any organic HAP potentially emitted by the source. Refer to the memorandum ''Maximum Achievable Control Technology (MACT) Floor Analysis for the Lime Manufacturing Plants Industry Supplemental Proposal,'' which is included in the docket for this rulemaking, for a detailed description of the revised calculations and analyses.

In the January 5, 2023, proposed amendments the EPA proposed a THC emission limit for new and existing sources and estimated that applying ACI controls to the source category to meet the MACT floor would result in a reduction of THC emissions by 566 tons of THC per year from these sources. With the revised proposed limits, the EPA estimates the new and existing source organic HAP limit would result in a reduction of organic HAP emissions by 20 tons of organic HAP per year.

We conducted a beyond-the-floor analysis and found that because we are proposing emission limits for both new and existing sources that are set at 3xRDL of the test method, which is defined as the lowest level where a test method performs with acceptable precision, even if controls were available that had better performance, such performance could not be accurately measured. Therefore, we are not proposing a beyond-the-floor standard for organic HAP for new or existing sources.

D. What revisions are we proposing to the dioxin/furan emission standards?

In the January 5, 2023, proposed amendments, the EPA followed the guidance of the June 5, 2014, memorandum titled, ''Determination of 'non-detect' from EPA Method 29 (multi-metals) and EPA Method 23 (dioxin/furan) test data when evaluating the setting of MACT floors versus establishing work practice standards'' (Docket ID No. EPA–HQ–OAR–2017–0015–0117), which provides guidance on using detection limits as an indicator of the measurable presence of a given pollutant, specifically where multi-component samples, such as with D/F congeners, are the pollutants of concern. Additionally, the EPA used the procedures laid out in the December 13, 2011, memorandum titled ''Data and procedure for handling below detection level data in analyzing various pollutant emissions databases for MACT and RTR emissions limits'' (Docket ID No. EPA–HQ–OAR–2017–0015–0119), which describes the procedure for handling below detection level (BDL) data and developing RDL data when setting MACT emission limits. Similar to organic HAP, and in accordance with these guidance documents, the new and existing UPL for D/F were compared to the emission limit value determined to be equivalent to 3xRDL of the test method, and the 3xRDL value was found to be greater than the UPL. Therefore, the MACT floor limit for D/F was set based on the 3xRDL value of the test method.

Commenters on the January 5, 2023, proposed amendments noted that in setting the 3xRDL value, the EPA set the value based on a sample collection volume of 4 dry standard cubic meters (dscm). Commenters stated that the EPA should have set the 3xRDL value based on a 3 dscm sample collection volume. After further review of the tables in the two guidance memoranda, the EPA agrees that the 3xRDL value should be based on a 3 dscm sample volume. In this action we are correcting the 3xRDL value for new and existing sources based on 3 dscm of sample collection volume as indicated in table 6.

TABLE 6—SUMMARY OF RE-PROPOSED NEW AND EXISTING SOURCE LIMITS FOR DIOXIN/FURANS

Kiln type	Stone produced	New source limit	Unit of measure	Existing source limit	Unit of measure
All	All	0.037	ng/dscm (TEQ) @ 7 percent O_2.	0.037	ng/dscm (TEQ) @ 7 percent O_2.

Applying the limits listed above, the EPA estimates the new and existing source D/F MACT floor limit would result in a reduction of D/F emissions by 9.5×10^{-5} pounds per year (4.7×10^{-8} tons per year).

Similar to the organic HAP limits, we are proposing D/F emission limits for both new and existing sources that are set at 3xRDL of the test method. Because the emission limits could not be set any lower than 3xRDL we did not identify beyond-the-floor options and are proposing MACT floor-based D/F standards for new and existing sources.

The EPA also considered whether it would be appropriate to set a work practice standard for D/F emissions in lieu of a numeric limit. Section 112(h) allows the EPA to set a work practice standard when it is not feasible to prescribe or enforce an emission standard. In this case the provision that could apply would be the application of measurement methodology to a particular class of sources is not practicable due to technological and economic limitations. This situation could occur if a significant majority, but not all, of the emissions data were below the detection limit.

The data for D/F emissions available to the EPA consisted of three tests with three test runs each and five tests where there was only a single test run. Given that the EPA does not consider single-run emission tests to be valid tests for establishing MACT standards, we focused on the three-run emission tests. Two of these three-run tests detected D/F emissions. We note that none of the single-run tests detected D/F emissions, but overall, the EPA is proposing that the data do not support establishing a work practice standard because they do not support a finding that the application of measurement methodology is impracticable.

As a result, we have determined to propose a numeric limit for D/F emissions. However, given the significant number of non-detect emission results, we are specifically requesting comment on the appropriateness of a work practice standard for D/F as well as any additional data that could support such a finding. Commenters supporting a work practice standard should describe how the standard would work, provide supporting data to demonstrate the work practice will control D/F emissions, and address the issue of the limited D/F emission test data available to the EPA.

E. What other actions are we proposing, and what is the rationale for those actions?

The EPA is including definitions of the terms ''new source'' and ''existing source'' as related to the requirements of this supplemental proposal and to clearly indicate that a ''new source'' in reference to the requirements of this supplemental proposal is any applicable source constructed after January 5, 2023, and an ''existing source'' in reference to the requirements of this supplemental proposal is any applicable source constructed before January 5, 2023.

Additionally, the EPA is providing a definition of the term ''stone produced'' used in the units of measure for HCl and mercury emission limits. The limits are in units of mass of pollutant per mass of production, or pounds per ton of stone produced, where ''stone produced'' refers to the production of lime (QL, DL, and/or DB).

F. What revisions are we proposing to the performance testing, monitoring, and recordkeeping and reporting requirements?

We are proposing an emissions averaging compliance alternative that would allow lime manufacturing facilities to demonstrate compliance with the HCl and mercury standards by averaging emissions of each pollutant across existing kilns located at the same facility. Under the emissions averaging compliance alternative, a facility with more than one existing kiln may average emissions across the kilns located at the facility provided that the emissions averaged do not exceed the limits included in table 7.

TABLE 7—EMISSIONS AVERAGING COMPLIANCE ALTERNATIVE FOR HCL AND MERCURY

Pollutant [1]	Kiln type [2]	Stone produced [3]	Emissions averaging alternative limit	Unit of measure
HCl	SR	DL, DB	2.1	lb/ton stone produced.
	SR	QL	0.47	lb/ton stone produced.
	PR	DL, DB	0.36	lb/ton stone produced.
	PR	QL	0.087	lb/ton stone produced.
	VK	DL, DB	0.36	lb/ton stone produced.
	VK	QL	0.019	lb/ton stone produced.
Mercury	All	All	31	lb/MMton stone produced.

[1] Hydrogen chloride (HCl), total hydrocarbon (THC), dioxin/furans (D/F).
[2] Straight rotary kiln (SR), preheater rotary kiln (PR), vertical kiln (VK).
[3] Dolomitic lime (DL), quick lime (QL), dead burned dolomitic lime (DB).

This emission limit reflects a 10 percent adjustment factor to the MACT floor standard; according to our analysis, we expect this emission limit would result in reductions of HCL and mercury greater than those achieved by application of the MACT floor on a unit-by-unit basis.

We are proposing the emissions averaging compliance alternative for existing sources because we expect that it will result in a greater level of emissions reduction than the unit-by-unit MACT floor limits at a lower cost per pound of pollutant removed, while also providing compliance flexibility. The proposed emissions averaging compliance alternative is available only to existing kilns in the same subcategory at lime manufacturing facilities. New or reconstructed sources would be subject to the unit-by-unit MACT floor standards and would be required to comply with those standards on a unit-by-unit basis.

This proposed emissions averaging program would have restrictions. First, emissions averaging would not be allowed between HCL and mercury emissions. Second, emissions averaging would only be permissible among individual existing affected units at a single lime manufacturing plant. Third, emissions averaging would only be permitted among kilns in the same subcategory. Lastly, new affected sources could not use emissions averaging for compliance purposes. Accordingly, we believe that this proposed emissions averaging program is consistent with the CAA.

Emissions averaging also addresses those emission sources exhausting to a common stack. In a ''common stack'' scenario, a group of two or more existing units in the same subcategory that does not receive emissions from units in other subcategories or categories, a facility would treat such averaging group as a single existing unit for purposes of compliance with the requirements of the rule.

We are also proposing to require each facility intending to use this emissions averaging program to develop a emissions averaging plan that identifies: (1) all units in the averaging group; (2) the control technology installed; (3) the process parameter(s) that will be monitored; (4) the specific control technology or pollution prevention measure to be used; (5) the test plan for measuring the HAP being averaged; and (6) the operating parameters to be monitored for each control device.

We are proposing an emissions averaging compliance alternative because we expect that it will provide a more flexible and less costly alternative to controlling HCL and mercury emissions from the source category, and we expect it will result in greater annual reductions of HCL and mercury emissions from the source category than unit-by-unit compliance. We expect that the proposed emissions averaging compliance alternative as described above would not lessen the stringency of the overall MACT floor level of performance and would provide flexibility in compliance, cost, and energy savings to lime manufacturing facilities. We also recognize that we must ensure that any emissions averaging option can be implemented and enforced, will be clear to sources, and most importantly, will be no less stringent than unit-by-unit implementation of the MACT floor limits.

Under the proposed emissions averaging compliance alternative, we expect that the 10 percent adjustment factor will ensure that the total quantity of HCl and mercury emitted from a facility's kiln exhaust will not exceed the facility's aggregate HCl emissions if its kilns individually complied with the unit-by-unit MACT floor standards. We expect that the practical outcome of emissions averaging will be emissions reductions equivalent to, or greater than, reductions achieved through

compliance with the MACT floor limits for each discrete kiln on a unit-by-unit basis. Therefore, we expect that our proposed emissions averaging approach will result in the maximum achievable emissions reduction as required by statute. We request comment on allowing sources to comply with the HCL and mercury MACT standards through the proposed emissions averaging compliance alternative. We also request comment on the appropriate adjustment factor to apply under this proposed compliance alternative.

G. What revisions to the compliance dates are we proposing?

Amendments to the Lime Manufacturing NESHAP proposed in this rulemaking for adoption under CAA section 112(d)(2) and (3) are subject to the compliance deadlines outlined in the CAA under section 112(i). For existing sources, CAA section 112(i)(3) requires compliance ''as expeditiously as practicable, but in no event later than 3 years after the effective date of such standard'' subject to certain exemptions further detailed in the statute.[21] To establish a compliance period consistent with the statute, we consider the amount of time needed to plan and construct projects and change operating procedures. As provided in CAA section 112(i), all new affected sources would comply with these provisions by the effective date of the final amendments to the Lime Manufacturing NESHAP or upon startup, whichever is later. The final action is not a ''major rule'' as defined by 5 U.S.C. 804(2), so the effective date of the final rule will be the promulgation date as specified in CAA section 112(d)(10).

The EPA projects that many existing sources would need to install add-on controls to comply with the proposed limits. These sources would require time to construct, conduct performance testing, and implement monitoring to comply with the revised provisions. Therefore, we are proposing to allow 3 years from the effective date of the amendments to the NESHAP for existing lime manufacturing sources to come into compliance.

For all affected sources that commence construction or reconstruction on or before January 5, 2023, we are proposing to require compliance with the proposed standards within 3 years after the effective date of the final rule (or upon startup, whichever is later). For all affected sources that commenced construction or reconstruction after January 5, 2023, we are proposing that owners or operators comply with the provisions by the effective date of the final rule (or upon startup, whichever is later).

IV. Summary of Cost, Environmental, and Economic Impacts and Additional Analyses Conducted

A. What are the affected sources?

Currently, 34 major sources subject to the Lime Manufacturing NESHAP are operating in the United States. An affected source under the NESHAP is the owner or operator of a lime manufacturing plant that is a major source, or that is located at, or is a part of, a major source of HAP emissions, unless the lime manufacturing plant is located at a kraft pulp mill, soda pulp mill, sulfite pulp mill, beet sugar manufacturing plant, or only processes sludge containing calcium carbonate from water softening processes. A lime manufacturing plant is an establishment engaged in the manufacture of lime products (calcium oxide, calcium oxide with magnesium oxide, or dead burned dolomite) by calcination of limestone, dolomite, shells, or other calcareous substances. A major source of HAP is a plant site that emits or has the potential to emit any single HAP at a rate of 9.07 megagrams (10 tons) or more, or any combination of HAP at a rate of 22.68 megagrams (25 tons) or more per year from all emission sources at the plant site.

The Lime Manufacturing NESHAP applies to each existing or new lime kiln and their associated cooler(s). In addition, the NESHAP applies to each PSH operation located at the plant. This includes storage bins, conveying systems and transfer points, bulk loading and unloading operations, screening operations, surge bins, and bucket elevators.

B. What are the air quality impacts?

As with the January 5, 2023, proposed rule, this action proposes standards for HCl, mercury, organic HAP, and D/F that will limit emissions and require, in some cases, the installation of additional controls at lime manufacturing plants at major sources. Compliance with the emission standards set in this proposed rule will result in a combined reduction of total HAP of 905 tons of HAP per year. Specifically, installation of controls will reduce HCl emissions by 884 tpy. The installation of controls will reduce mercury emissions by 457 lbs per year (0.23 tpy). The installation of controls will reduce organic HAP emissions by 20 tpy. Finally, the installation of controls will reduce D/F emissions by 9.5×10^{-5} lbs per year (4.7×10^{-8} tpy).

Indirect or secondary air emissions impacts are impacts that would result from the increased electricity usage associated with the operation of control devices (*e.g.,* increased secondary emissions of criteria pollutants from power plants). Energy impacts consist of the electricity and steam needed to operate control devices and other equipment. We find that the secondary impacts of this action are minimal. Refer to the ''Lime Impacts Memorandum,'' in the docket for a detailed discussion of the analyses performed on potential secondary impacts. (Docket ID No. EPA–HQ–OAR–2017–0015).

C. What are the cost impacts?

This action proposes emission limits for new and existing sources in the lime manufacturing source category. Although the action contains requirements for new sources, we are not aware of any new sources being constructed now or planned in the next year, and, consequently, we did not estimate any cost impacts for new sources. We estimate the total annualized cost of the proposed rule to existing sources in the lime manufacturing source category to be $174,000,000 per year. The annual costs are expected to be based on operation and maintenance of the added control systems. A memorandum titled ''Maximum Achievable Control Technology (MACT) Floor Analysis for the Lime Manufacturing Plants Industry Supplemental Proposal'' includes details of our cost assessment and is included in the docket for this rulemaking (Docket ID No. EPA–HQ–OAR–2017–0015).

D. What are the economic impacts?

For the proposed rule, the EPA estimated the cost of installing additional air pollution control devices in order to comply with the proposed emission limits. This includes both the capital costs of the initial installation and subsequent operation and maintenance costs. The assumed equipment life of the recommended controls for this NESHAP is twenty years. To assess the potential economic impacts, the expected annual cost was compared to the total sales revenue for the ultimate owners of affected facilities. For this rule, the expected annual cost is $5,200,0000 (on average) for each facility, with an estimated nationwide annual cost of $174,000,000

[21] *Association of Battery Recyclers* v. *EPA,* 716 F.3d 667, 672 (D.C. Cir. 2013) (''Section 112(i)(3)'s 3-year maximum compliance period applies generally to any emission standard . . . promulgated under [section 112]'' (brackets in original)).

per year. The 34 affected facilities are owned by 11 parent companies, and the total costs associated with the proposed amendments are expected to be greater than 1 percent of annual sales revenue per ultimate owner.

The EPA also prepared a small business screening assessment to determine if any of the identified affected entities are small entities, as defined by the U.S. Small Business Administration. This analysis is available in the docket for this rulemaking. Because the total costs associated with the proposed amendments are expected to be greater than 1 percent of annual sales revenue per owner in the lime manufacturing source category, there are economic impacts from these proposed amendments on the three affected facilities that are owned by small entities. Refer to section VII.C. of this preamble for a detailed description of the small business outreach and regulatory flexibility analysis performed in conjunction with this proposed rule.

The EPA predicts that the affected sources in the lime manufacturing source category will be able to fully pass on their compliance costs to their customers. International trade of lime products is quite limited and there are no readily available cost-competitive substitutes for lime. Therefore, affected sources are not likely to face competition from foreign lime producers or from substitutes for their product.

Information on our cost impact estimates on the sources in the lime manufacturing source category is available in the document titled, ''Regulatory Impact Analysis for the Supplemental Proposed Amendments to the National Emission Standards for Hazardous Air Pollutants: Lime Manufacturing Plants,'' which is included in the docket for this rulemaking.

E. What are the benefits?

The EPA did not monetize the benefits from the estimated emission reductions of HAP associated with this final action. The EPA currently does not have sufficient methods to monetize benefits associated with HAP, HAP reductions, and risk reductions for this rulemaking. However, we estimate that the final rule amendments would reduce emissions by 905 tons per year and thus lower risk of adverse health effects in communities near lime manufacturing plants.

F. What analysis of environmental justice did we conduct?

The results of the demographic analysis performed alongside the January 5, 2023, proposed amendments remain unchanged as a result of this supplemental proposal. For convenience, the demographic analysis is repeated in this preamble for the public's information.

The EPA defines environmental justice (EJ) as ''the just treatment and meaningful involvement of all people regardless of income, race, color, national origin, Tribal affiliation, or disability, in agency decision-making and other Federal activities that affect human health and the environment so that people (i) are fully protected from disproportionate and adverse human health and environmental effects (including risk) and hazards, including those related to climate change, the cumulative impacts of environmental and other burdens, and the legacy of racism or other structural or systemic barriers; and (ii) have equitable access to a healthy, sustainable, and resilient environment in which to live, play, work, grow, worship, and engage in cultural and subsistence practices''.[22] In recognizing that particular communities often bear an unequal burden of environmental harms and risks, the EPA continues to consider ways of to advance environmental justice and of protecting communities with from disproportionate adverse public health and environmental effects of air pollution.

To examine the potential for any EJ issues that might be associated with lime manufacturing facilities, we performed a proximity demographic analysis, which is an assessment of individual demographic groups of the populations living within 5 km (~3.1 miles) and 50 km (~31 miles) of the facilities. The EPA then compared the data from this analysis to the national average for each of the demographic groups. In this preamble, we focus on the proximity results for the populations living within 5 km (~3.1 miles) of the facilities. The results of this proximity analysis for populations living within 50 km are included in the document titled ''Analysis of Demographic Factors for Populations Living Near Lime Manufacturing Facilities'', which is available in the docket for this action.

The results (see table 8) show that for populations within 5 km of the 34 Lime Manufacturing facilities, the following demographic groups were above the national average: Hispanic/Latino (37 percent versus 19 percent nationally), linguistically isolated households 21 percent versus 5 percent nationally), people living below the poverty level (27 percent versus 13 percent nationally), people of color (50 percent versus 40 percent nationally, and people without a high school diploma (17 percent versus 12 percent nationally). A summary of the proximity demographic assessment performed for the major source lime manufacturing facilities is included as table 8. The methodology and the results of the demographic analysis are presented in a technical report, *Analysis of Demographic Factors for Populations Living Near Lime Manufacturing Facilities,* available in this docket for this action (Docket ID EPA–HQ–OAR–2017–0015).

TABLE 8—PROXIMITY DEMOGRAPHIC ASSESSMENT RESULTS FOR MAJOR SOURCE LIME MANUFACTURING FACILITIES

Demographic group	Nationwide	Population within 5 km of facilities
Total Population	328,016,242	473,343.
Race and Ethnicity by Percent		
White	60 percent	50 percent.
Black	12 percent	9 percent.
Native American	0.7 percent	0.9 percent.
Hispanic or Latino (includes white and nonwhite)	19 percent	37 percent.
Other and Multiracial	8 percent	3 percent.

[22] *https://www.federalregister.gov/documents/2023/04/26/2023-08955/revitalizing-our-nations-commitment-to-environmental-justice-for-all.*

TABLE 8—PROXIMITY DEMOGRAPHIC ASSESSMENT RESULTS FOR MAJOR SOURCE LIME MANUFACTURING FACILITIES—Continued

Demographic group	Nationwide	Population within 5 km of facilities
Income by Percent		
Below Poverty Level	13 percent	27 percent.
Above Poverty Level	87 percent	73 percent.
Education by Percent		
Over 25 and without a High School Diploma	12 percent	17 percent.
Over 25 and with a High School Diploma	88 percent	83 percent.
Linguistically Isolated by Percent		
Linguistically Isolated	5 percent	21 percent.

Notes:
• Nationwide population and demographic percentages are based on the Census' 2015–2019 American Community Survey 5-year block group averages and include Puerto Rico. Demographic percentages based on different averages may differ. The total population counts within 5 km of all facilities are based on the 2010 Decennial Census block populations.
• Minority population is the total population minus the white population.
• To avoid double counting, the ''Hispanic or Latino'' category is treated as a distinct demographic category for these analyses. A person is identified as one of five racial/ethnic categories above: White, Black, Native American, Other and Multiracial, or Hispanic/Latino. A person who identifies as Hispanic or Latino is counted as Hispanic/Latino for this analysis, regardless of what race this person may have also identified as in the Census.

The human health risk estimated for this source category for the July 24, 2020, RTR (85 FR 44960) was determined to be acceptable, and the standards were determined to provide an ample margin of safety to protect public health. Specifically, the maximum individual cancer risk was 1-in-1 million for actual emissions (2-in-1 million for allowable emissions) and the noncancer hazard indices for chronic exposure were well below 1 (0.04 for actual emissions, 0.05 for allowable emissions). The noncancer hazard quotient for acute exposure was 0.6, also below 1. The proposed changes to the NESHAP subpart AAAAA will reduce emissions by 905 tons of HAP per year, and therefore, further improve human health exposures for the populations and individuals most exposed to this pollution, including communities with environmental justice concerns . The proposed changes will have beneficial effects on air quality and public health for populations exposed to emissions from lime manufacturing facilities.

G. What analysis of children's environmental health did we conduct?

In the July 24, 2020, final Lime Manufacturing NESHAP RTR (85 FR 44960), the EPA conducted a residual risk assessment and determined that risk from the lime manufacturing source category was acceptable, and the standards provided an ample margin of safety to protect public health. This action proposes first-time emissions standards for HCl, mercury, organic HAP, and D/F. Specifically, compliance with the emission standards set in this proposed rule will result in a combined reduction of total HAP of 905 tons of HAP per year.

This action's health and risk assessments are protective of the most vulnerable populations, including children, due to how we determine exposure and through the health benchmarks that we use. Specifically, the risk assessments we perform assume a lifetime of exposure, in which populations are conservatively presumed to be exposed to airborne concentrations at their residence continuously, 24 hours per day for a 70-year lifetime, including childhood. With regards to children's potentially greater susceptibility to noncancer toxicants, the assessments rely on the EPA's (or comparable) hazard identification and dose-response values that have been developed to be protective for all subgroups of the general population, including children. For more information on the risk assessment methods, see the risk report for the 2020 RTR rule, which is available in the docket (Docket ID No. EPA–HQ–OAR–2017–0015).

V. Request for Comments

We solicit comments on all aspects of this proposed action. In addition to general comments on this proposed action, we are also interested in additional data that may improve the analyses. We are specifically interested in receiving any information regarding developments in practices, processes, and control technologies that reduce HAP emissions. We request comment on the assumptions regarding the costs of capital, work practices, and emissions. We request comment of all aspects of the economic impacts of this proposal.

VI. Submitting Data Corrections

The site-specific emissions data used in setting MACT standards for HCl, mercury, organic HAP, and D/F, as emitted from the lime manufacturing source category, are provided in the docket for this rulemaking (Docket ID No. EPA–HQ–OAR–2017–0015).

If you believe that the data are not representative or are inaccurate, please identify the data in question, provide your reason for concern, and provide any ''improved'' data that you have, if available. When you submit data, we request that you provide documentation of the basis for the revised values to support your suggested changes. For information on how to submit comments, including the submittal of data corrections, refer to the instructions provided in the introduction of this preamble.

VII. Statutory and Executive Order Reviews

Additional information about these statutes and Executive Orders can be found at *https://www.epa.gov/laws-regulations/laws-and-executive-orders.*

A. Executive Order 12866: Regulatory Planning and 13563 Improving Regulation and Regulatory Review

This action is a ''significant regulatory action'' as defined in Executive Order 12866, as amended by Executive Order 14094. Accordingly, the EPA submitted

this action to the Office of Management and Budget (OMB) for Executive Order 12866 review. Documentation of any changes made in response to the Executive Order 12866 review is available in the docket. The EPA prepared an economic analysis of the potential impacts associated with this action. This analysis is included in the document titled, *Regulatory Impact Analysis for the Supplemental Proposed Amendments to the National Emission Standards for Hazardous Air Pollutants: Lime Manufacturing Plants* and is also available in the docket.

B. Paperwork Reduction Act (PRA)

The information collection activities in this proposed rule have been submitted for approval to the OMB under the PRA. The Information Collection Request (ICR) document that the EPA prepared has been assigned EPA ICR number 2072.10. You can find a copy of the ICR in the docket for this rule, and it is briefly summarized here.

We are proposing changes to the reporting and recordkeeping requirements for the Lime Manufacturing Plants NESHAP by incorporating the reporting and recordkeeping requirements associated with the new and existing source MACT standards for HCl, mercury, THC, and D/F.

Respondents/affected entities: Owners or operators of lime manufacturing plants that are major sources, or that are located at, or are part of, major sources of HAP emissions, unless the lime manufacturing plant is located at a kraft pulp mill, soda pulp mill, sulfite pulp mill, sugar beet manufacturing plant, or only processes sludge containing calcium carbonate from water softening processes.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart AAAAA).

Estimated number of respondents: On average over the next 3 years, approximately 34 existing major sources will be subject to these standards. It is also estimated that no additional respondent will become subject to the emission standards over the 3-year period.

Frequency of response: The frequency of responses varies depending on the burden item.

Total estimated burden: The average annual burden to industry over the next 3 years from the proposed recordkeeping and reporting requirements is estimated to be 8.392 hours per year. Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: The annual recordkeeping and reporting costs for all facilities to comply with all of the requirements in the NESHAP is estimated to be $3,570,000 per year, of which $1,370,000 (first year) is for this rule, and the rest is for other costs related to continued compliance with the current NESHAP requirements including $1,005,000 in annualized capital and operation and maintenance costs.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for the EPA's regulations in 40 CFR are listed in 40 CFR part 9. Submit your comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the EPA using the docket identified at the beginning of this rule. The EPA will respond to any ICR-related comments in the final rule. You may also send your ICR-related comments to OMB's Office of Information and Regulatory Affairs using the interface at *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function. OMB must receive comments no later than April 9, 2024.

C. Regulatory Flexibility Act (RFA)

Pursuant to section 603 of the RFA, the EPA prepared an initial regulatory flexibility analysis (IRFA) that examines the impact of the proposed rule on small entities along with regulatory alternatives that could minimize that impact. The complete IRFA is included as section 6.3 of the document titled, *Regulatory Impact Analysis for the Supplemental Proposed Amendments to the National Emission Standards for Hazardous Air Pollutants: Lime Manufacturing Plants,* for review in the docket and is summarized here.

As discussed in section II.A. of this preamble, the statutory authority for this action is provided by sections 112 and 301 of the CAA, as amended (42 U.S.C. 7401 *et seq.*). The EPA is proposing to revise the Lime Manufacturing NESHAP by establishing new emission standards for this source category, exercising authority under multiple provisions of section 112 of the CAA.

For purposes of assessing the impacts of this rule on small entities, a small entity is defined as a small business in the lime manufacturing industry whose parent company has revenues or numbers of employees below the Small Business Administration (SBA) Size Standards for the relevant NAICS code. We have identified 8 different NAICS codes of the parent companies within this source category. A complete list of those NAICS codes and SBA Size Standards is available in section 6.2.1 of the document titled, *Regulatory Impact Analysis for the Supplemental Proposed Amendments to the National Emission Standards for Hazardous Air Pollutants: Lime Manufacturing Plants* which is included in the docket for this rulemaking. This supplemental proposal contains provisions that would affect approximately 2 small entities. Under the proposed rule requirements, small entities would be required to comply with the emission standards of four previously unregulated pollutants, which may require the use of new air pollution control devices. Small entities would also need to demonstrate compliance with the emission standards through periodic performance testing. This supplemental proposal includes reporting, recordkeeping, and other administrative requirements. The EPA estimates that the two identified small entities could incur total annual costs associated with the proposal that are at least 3 percent of their annual revenues. Considering the level of total annual costs relative to annual sales for these small entities, the EPA determined that there is potential for the proposed requirements to have a 'Significant Impact on a Substantial Number of Small Entities' (SISNOSE). See section 6.2.2 of the document titled, *Regulatory Impact Analysis for the Supplemental Proposed Amendments to the National Emission Standards for Hazardous Air Pollutants: Lime Manufacturing Plants* for more information on the characterization of the impacts to small businesses under the proposed rule.

As required by section 609(b) of the RFA, the EPA also convened a Small Business Advocacy Review (SBAR) Panel to obtain advice and recommendations from small entity representatives (SERs) that potentially would be subject to the rule's requirements. On August 3, 2023, the EPA's Small Business Advocacy Chairperson convened the Panel, which consisted of the Chairperson, the Director of the Sector Policies and Programs Division within the EPA's Office of Air Quality Planning and Standards, the Administrator of the Office of Information and Regulatory Affairs within OMB, and the Chief Counsel for Advocacy of the Small Business Administration (SBA).

Prior to convening the Panel, the EPA conducted outreach and solicited comments from the SERs. After the Panel was convened, the Panel provided

additional information to the SERs and requested their input. The Panel's review identified several significant alternatives for consideration by the Administrator of the EPA which accomplish the stated objectives of the CAA and minimize economic impacts of the proposed rule on small entities.

The SBAR Panel recommended several flexibilities including the consideration of health-based standards for HCl, an IQV for mercury, an aggregated organic HAP emission standard, and work practice standards for D/F. The EPA is including some of these flexibilities as a part of this supplemental proposal and is soliciting comment on others that may be considered for the final rule. The report was finalized and transmitted to the EPA Administrator for consideration. A copy of the full SBAR Panel Report is available in the docket of this rulemaking.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain an unfunded mandate of $100 million or more as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action imposes no enforceable duty on any State, local, or Tribal governments or the private sector.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have Tribal implications as specified in Executive Order 13175. The EPA does not know of any lime manufacturing facilities owned or operated by Indian Tribal governments. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

Executive Order 13045 directs Federal agencies to include an evaluation of the health and safety effects of the planned regulation on children in Federal health and safety standards and explain why the regulation is preferable to potentially effective and reasonably feasible alternatives. This action is not subject to Executive Order 13045 because it is not a significant regulatory action under section 3(f)(1) of Executive Order 12866, and because the EPA does not believe the environmental health or safety risks addressed by this action present a disproportionate risk to children. This action proposes emission standards for four previously unregulated pollutants; therefore, the rule proposes health benefits to children by reducing the level of HAP emissions emitted from the lime manufacturing process.

However, the EPA's *Policy on Children's Health* applies to this action. This action is subject to the EPA's Policy on Children's Health [23] because the proposed rule has considerations for human health. Information on how the policy was applied is available in section V.F. ''What analysis of children's environmental health did we conduct'' of this preamble.

H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This action is not a ''significant energy action'' because it is not likely to have a significant adverse effect on the supply, distribution or use of energy. In this proposed action, the EPA is setting emission standards for previously unregulated pollutant. This does not impact energy supply, distribution, or use.

I. National Technology Transfer and Advancement Act (NTTAA) and 1 CFR Part 51

This action involves technical standards. Therefore, the EPA conducted searches for the Lime Manufacturing NESHAP through the Enhanced National Standards Systems Network (NSSN) Database managed by the American National Standards Institute (ANSI). We also conducted a review of voluntary consensus standards (VCS) organizations and accessed and searched their databases. We conducted searches for EPA Methods 23, 25A, 29, 30B, 320, and 321. During the EPA's VCS search, if the title or abstract (if provided) of the VCS described technical sampling and analytical procedures that are similar to the EPA's referenced method, the EPA ordered a copy of the standard and reviewed it as a potential equivalent method. We reviewed all potential standards to determine the practicality of the VCS for this rule. This review requires significant method validation data that meet the requirements of EPA Method 301 for accepting alternative methods or scientific, engineering, and policy equivalence to procedures in the EPA referenced methods. The EPA may reconsider determinations of impracticality when additional information is available for any particular VCS.

Two VCS were identified as acceptable alternatives to the EPA test methods for this proposed rule. The VCS ASTM D6784–16, ''Standard Test Method for Elemental, Oxidized, Particle-Bound and Total Mercury Gas Generated from Coal-Fired Stationary Sources (Ontario Hydro Method)'' is an acceptable alternative to EPA Method 29 (portion for mercury only) as a method for measuring mercury. The VCS ASTM D6348–12e1, ''Determination of Gaseous Compounds by Extractive Direct Interface Fourier Transform (FTIR) Spectroscopy'' is an acceptable alternative to EPA Method 320 with certain conditions. Detailed information on the VCS search and determination can be found in the memorandum, ''Voluntary Consensus Standard Results for National Emission Standards for Hazardous Air Pollutants: Lime Manufacturing Technology Review'', which is available in the docket for this action (Docket ID No. EPA–HQ–OAR–2017–0015).

The EPA is incorporating by reference the VCS ASTM D6348–12e1, ''Determination of Gaseous Compounds by Extractive Direct Interface Fourier Transform (FTIR) Spectroscopy,'' as an acceptable alternative to EPA Method 320. ASTM D6348–03 (Reapproved 2010) was determined to be equivalent to EPA Method 320 with caveats. ASTM D6348–12e1 is a revised version of ASTM D6348–03 (Reapproved 2010) and includes a new section on accepting the results from the direct measurement of a certified spike gas cylinder, but lacks the caveats placed on the ASTM D6348–03(2010) version. ASTM D6348–12e1 is an extractive FTIR field test method used to quantify gas phase concentrations of multiple analytes from stationary source effluent and is an acceptable alternative to EPA Method 320 at this time with caveats requiring inclusion of selected annexes to the standard as mandatory. When using ASTM D6348–12e1, the following conditions must be met:

- The test plan preparation and implementation in the Annexes to ASTM D6348–03, sections A1 through A8 are mandatory; and
- In ASTM D6348–03, Annex A5 (Analyte Spiking Technique), the percent (%) R must be determined for each target analyte (Equation A5.5).

[23] *https://www.epa.gov/children/childrens-health-policy-and-plan.*

In order for the test data to be acceptable for a compound, percent R must be 70 percent ≥ R ≤ 130 percent. If the percent R value does not meet this criterion for a target compound, the test data is not acceptable for that compound and the test must be repeated for that analyte (*i.e.,* the sampling and/or analytical procedure should be adjusted before a retest). The percent R value for each compound must be reported in the test report, and all field measurements must be corrected with the calculated percent R value for that compound by using the following equation:

Reported Results = ((Measured Concentration in Stack))/(percent R) × 100.

The EPA is incorporating by reference the VCS ASTM D6784–16, ''Standard Test Method for Elemental, Oxidized, Particle-Bound and Total Mercury in Flue Gas Generated from Coal-Fired Stationary Sources (Ontario Hydro Method),'' as an acceptable alternative to EPA Method 29 (portion for mercury only) as a method for measuring elemental, oxidized, particle-bound, and total mercury concentrations ranging from approximately 0.5 to 100 micrograms per normal cubic meter. This test method describes equipment and procedures for obtaining samples from effluent ducts and stacks, equipment and procedures for laboratory analysis, and procedures for calculating results. VCS ASTM D6784–16 allows for additional flexibility in the sampling and analytical procedures for the earlier version of the same standard VCS ASTM D6784–02 (Reapproved 2008).

ASTM D6784–16 and ASTM D6348–12e1 are available at ASTM International, 1850 M Street NW, Suite 1030, Washington, DC 20036. See *https://www.astm.org/*. The standards are available to everyone at a cost determined by ASTM ($82). The costs of obtaining these methods are not a significant financial burden, making the methods reasonably available.

Additionally, the EPA is incorporating by reference EPA/100/R–10/005, ''Recommended Toxicity Equivalence Factors (TEFs) for Human Health Risk Assessments of 2, 3, 7, 8-Tetrachlorodibenzo-p-dioxin and Dioxin-Like Compounds,'' December 2010, which is the source of the toxicity equivalence factors (TEF) for dioxins and furans used in calculating the toxic equivalence quotient of the proposed dioxin and furan standard. This document describes the EPA's updated approach for evaluating the human health risks from exposures to environmental media containing dioxin-like compounds. The EPA recommends that the TEF methodology, a component mixture method, be used to evaluate human health risks posed by these mixtures, using TCDD as the index chemical. The EPA recommends the use of the consensus TEF values for 2,3,7,8-tetrachlorodibenzo-p-dioxin and dioxin-like compounds published in 2005 by the World Health Organization. EPA/100/R–10/005 is available on the EPA website, *https://www.epa.gov/risk/documents-recommended-toxicity-equivalency-factors-human-health-risk-assessments-dioxin-and.*

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations and Low-Income Populations and Executive Order 14096: Revitalizing Our Nation's Commitment to Environmental Justice for All

The EPA believes that the human health or environmental conditions that exist prior to this action result in or have the potential to result in disproportionate and adverse human health or environmental effects on communities with environmental justice (EJ) concerns. The assessment of populations in close proximity of lime manufacturing facilities shows Hispanic and linguistically isolated groups are higher than the national average (see section V.E. of the preamble). The higher percentages are driven by 4 of the 34 facilities in the source category.

The EPA believes that this action is likely to reduce existing disproportionate and adverse effects on communities with EJ concerns. The EPA is proposing MACT standards for HCl, mercury, organic HAP, and D/F. The EPA expects that the 4 facilities would have to implement control measures to reduce emissions to comply with the MACT standards and that HAP exposures for the people of color and low-income individuals living near these facilities would decrease.

The EPA will additionally identify and address environmental justice concerns by conducting outreach after signature of this proposed rule. The EPA will address this rule during the monthly Environmental Justice call for communities burdened by disproportionate environmental impacts.

The information supporting these Executive Orders is contained in section V.E. of this preamble.

List of Subjects in 40 CFR Part 63

Environmental protection, Air pollution control, Hazardous substances, Incorporation by reference, Reporting and recordkeeping requirements.

Michael S. Regan,

Administrator.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2023–0069; FRL–10579–12–OCSPP]

Receipt of a Pesticide Petition Filed for Residues of Pesticide Chemicals in or on Various Commodities (December 2023)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of filing of petition and request for comment.

SUMMARY: This document announces the Agency's receipt of an initial filing of a pesticide petition requesting the establishment or modification of regulations for residues of pesticide chemicals in or on various commodities.

DATES: Comments must be received on or before March 11, 2024.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPP–2023–0069, through the *Federal eRulemaking Portal* at *https://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Additional instructions on commenting and visiting the docket, along with more information about dockets generally, is available at *https://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Madison H. Le, Biopesticides and Pollution Prevention Division (BPPD) (7511M), main telephone number: (202) 566–1400, email address: *BPPDFRNotices@epa.gov;* or Dan Rosenblatt, Registration Division (RD) (7505T), main telephone number: (202) 566–2875, email address: *RDFRNotices@epa.gov.* The mailing address for each contact person is Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001. As part of the mailing address, include the contact person's name, division, and mail code. The division to contact is listed at the end of each application summary.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through regulations.gov or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD–ROM that you mail to EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at *https://www.epa.gov/dockets/comments.html.*

3. *Environmental justice.* EPA seeks to achieve environmental justice, the fair treatment and meaningful involvement of any group, including minority and/or low-income populations, in the development, implementation, and enforcement of environmental laws, regulations, and policies. To help address potential environmental justice issues, the Agency seeks information on any groups or segments of the population who, as a result of their location, cultural practices, or other factors, may have atypical or disproportionately high and adverse human health impacts or environmental effects from exposure to the pesticides discussed in this document, compared to the general population.

II. What action is the Agency taking?

EPA is announcing receipt of a pesticide petition filed under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a, requesting the establishment or modification of regulations in 40 CFR part 180 for residues of pesticide chemicals in or on various food commodities. The Agency is taking public comment on the request before responding to the petitioner. EPA is not proposing any particular action at this time. EPA has determined that the pesticide petition described in this document contains data or information prescribed in the FFDCA section 408(d)(2), 21 U.S.C. 346a(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data supports granting of the pesticide petition. After considering the public comments, EPA intends to evaluate whether and what action may be warranted. Additional data may be needed before EPA can make a final determination on this pesticide petition.

Pursuant to 40 CFR 180.7(f), a summary of the petition that is the subject of this document, prepared by the petitioner, is included in a docket EPA has created for this rulemaking. The docket for this petition is available at *https://www.regulations.gov.*

As specified in the FFDCA section 408(d)(3), 21 U.S.C. 346a(d)(3), EPA is publishing notice of the petition so that the public has an opportunity to comment on this request for the establishment or modification of regulations for residues of pesticides in or on food commodities. Further information on the petition may be obtained through the petition summary referenced in this unit.

A. Notice of Filing—Amended Tolerances for Non-Inerts

PP 2E9037. EPA–HQ–OPP–2023–0077. Interregional Research Project #4 (IR–4), North Carolina State University, 1730 Varsity Drive, Venture IV, Suite 210, Raleigh, NC 27606, requests, pursuant to section 408(d) of the FFDCA, 21 U.S.C. 346a(d), to amend 40 CFR part 180 by withdrawing the existing tolerance for residues of the insecticide cyclaniliprole, 3-bromo-N-[2-bromo-4-chloro-6-[[(1-cyclopropylethyl)amino] carbonyl]phenyl]-1-(3-chloro-2-pyridinyl)-1H-pyrazole-5-carboxamide, including its metabolites and degradates, in or on the raw agricultural commodity Vegetable, cucurbit, group 9 at 0.15 parts per million (ppm). *Contact:* RD.

B. New Tolerance Exemptions for Non-Inerts (Except PIPS)

1. *PP 2F9043.* EPA–HQ–OPP–2023–0503. Indigo Ag, Inc., 500 Rutherford Ave., Charlestown, MA 02129, requests to establish an exemption from the requirement of a tolerance in 40 CFR part 180 for residues of the nematicide *Pseudomonas oryzihabitans* strain SYM23945 in or on all food commodities. The petitioner believes no analytical method is needed because genomic analysis and in-depth literature analysis indicate no metabolites of concern are produced. *Contact:* BPPD.

2. *PP 3F9071.* EPA–HQ–OPP–2023–0621. Indigo Ag, Inc., 500 Rutherford Ave., Charlestown, MA 02129, requests to establish an exemption from the requirement of a tolerance in 40 CFR part 180 for residues of the fungicide *Bacillus aryabhattai* strain SYM36613 in or on all food commodities. The petitioner believes no analytical method is needed because an exemption from the requirement of a tolerance is being proposed. *Contact:* BPPD.

C. New Tolerances for Non-Inerts

1. *PP 2E9037.* EPA–HQ–OPP–2023–0077. IR–4, North Carolina State University, 1730 Varsity Drive, Venture IV, Suite 210, Raleigh, NC 27606, requests, pursuant to section 408(d) of the FFDCA, 21 U.S.C. 346a(d), to amend 40 CFR part 180 by establishing a tolerance for residues of the insecticide cyclaniliprole, 3-bromo-N-[2-bromo-4-chloro-6-[[(1-cyclopropylethyl)amino] carbonyl]phenyl]-1-(3-chloro-2-pyridinyl)-1H-pyrazole-5-carboxamide, including its metabolites and degradates, in or on the raw agricultural commodity vegetable, cucurbit, group 9 at 0.3 ppm. Adequate analytical methods for determining dodine in/on appropriate raw agricultural commodities and processed commodities have been developed and validated. *Contact:* RD.

2. *PP 2E9039.* EPA–HQ–OPP–2023–0639. Bayer CropScience, AG, 800 N. Lindbergh Blvd. St. Louis, MO 63141, requests to establish a tolerance in 40 CFR part 180 for residues of the insecticide and miticide, Spiromesifen, in or on oranges at 0.15 ppm and orange oil at 40 ppm. The High-Performance Liquid Chromatography/mass spectrometry (LC/MS/MS) is used to measure and evaluate the chemical residues of Spiromesifen and residues of the metabolites, Spiromesifen-enol. *Contact:* RD.

3. *PP 3E9052.* EPA–HQ–OPP–2023–0259. IR–4, North Carolina State University, 1730 Varsity Drive, Venture IV, Suite 210, Raleigh, NC 27606,

requests to establish tolerances in 40 CFR 180.622 for residues of the fungicide, ethaboxam, (RS)-N-[cyano(2-thienyl)methyl]-4-ethyl-2-(ethylamino)thiazole-5-carboxamid in or on the raw agricultural commodity: Leaf petiole vegetable subgroup 22B at 0.15 parts per million. An adequate enforcement methodology LC/MS/MS is available to measure and evaluate the residues of ethaboxam to enforce the tolerance expression. *Contact:* RD.

Authority: 21 U.S.C. 346a.

Dated: January 26, 2024.

Delores Barber,

Director, Information Technology and Resources Management Division, Office of Program Support.

[WC Docket No. 17–84; Report No. 3209; FR ID 201345]

Petitions for Reconsideration of Action in Rulemaking Proceeding

AGENCY: Federal Communications Commission.

ACTION: Petition for Reconsideration; correction.

SUMMARY: The Federal Communications Commission published a document in the **Federal Register** on January 29, 2024, announcing the dates for filing oppositions and replies to a Petition for Reconsideration of Action in a Rulemaking Proceeding in WC Docket No. 17–84, adopted by the Commission on December 13, 2023. There is an error in the Dates section of this document, incorrectly setting the deadline for replies to oppositions as February 8, 2024 rather than February 23, 2024.

DATES: February 9, 2024.

FOR FURTHER INFORMATION CONTACT: For further information, please contact Michael Ray, Competition Policy Division, Wireline Competition Bureau, at *Michael.Ray@fcc.gov,* 202–418–0357.

SUPPLEMENTARY INFORMATION:

Correction

In the **Federal Register** of January 29, 2024, in FR Doc. 2024–01633, on page 5439, in the third column, fourth paragraph from the bottom, correct the ''Dates'' caption to read:

DATES: Oppositions to the Petitions must be filed on or before February 13, 2024. Replies to oppositions must be filed on or before February 23, 2024.

Federal Communications Commission.

Marlene Dortch,

Secretary.

RIN 0648–BM75

Pacific Halibut Fisheries of the West Coast; 2024 Catch Sharing Plan and Recreational Fishery Management Measures

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes to approve changes to the Pacific Halibut Catch Sharing Plan for the International Pacific Halibut Commission's regulatory Area 2A off Washington, Oregon, and California. In addition, NMFS proposes to implement new management measures for the 2024 recreational fisheries in Area 2A that are not implemented through the International Pacific Halibut Commission (IPHC). These measures include the recreational fishery seasons and subarea allocations for Area 2A. This action would also add a new inseason management provision to transfer anticipated uncaught recreational fishery allocation between states. Additionally, this action proposes to establish a new management line at Point Arena, CA, creating two subareas with separate allocations off California. These actions are intended to conserve Pacific halibut and provide angler opportunity where available.

DATES: Comments on the proposed rule must be received on or before March 11, 2024.

ADDRESSES: Submit your comments, identified by NOAA–NMFS–2024–0014, by either of the following methods:

- *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *https://www.regulations.gov* and enter NOAA–NMFS–2024–0014 in the Search box. Click on the ''Comment'' icon, complete the required fields, and enter or attach your comments.
- *Mail:* Submit written comments to Jennifer Quan, Regional Administrator, c/o Melissa Mandrup, West Coast Region, NMFS, 501 W Ocean Blvd., Long Beach, CA 90802.

Instructions: NMFS may not consider comments if they are sent by any other method, to any other address or individual, or received after the comment period ends. All comments received are a part of the public record and NMFS will post them for public viewing on *https://www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, *etc.*), confidential business information, or otherwise sensitive information submitted voluntarily by the sender is publicly accessible. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

Docket: This rule is accessible via the internet at the Office of the Federal Register website at *https://www.federalregister.gov.* Background information and documents are available at the NMFS West Coast Region Pacific Halibut Recreational Fishery website at *https://www.fisheries.noaa.gov/action/2023-pacific-halibut-recreational-fishery* and at the Council's website at *http://www.pcouncil.org.* Other comments received may be accessed through *Regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Melissa Mandrup, phone: 562–980–3231 or email: *melissa.mandrup@noaa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The Northern Pacific Halibut Act of 1982 (Halibut Act), 16 U.S.C. 773–773k, gives the Secretary of Commerce responsibility for implementing the provisions of the Convention between Canada and the United States for the Preservation of the Halibut Fishery of the North Pacific Ocean and Bering Sea (Halibut Convention), signed at Ottawa, Ontario, on March 2, 1953, as amended by a Protocol Amending the Convention (signed at Washington, DC, on March 29, 1979). The Halibut Act requires that the Secretary of Commerce adopt regulations to carry out the purposes and objectives of the Halibut Convention and Halibut Act (16 U.S.C. 773c). Additionally, as provided in the Halibut Act, the regional fishery management councils having authority for the geographic area concerned may develop, and the Secretary of Commerce may implement, regulations governing Pacific halibut fishing in in U.S. waters that are in addition to, and not in

conflict with, approved International Pacific Halibut Commission (IPHC) regulations (16 U.S.C. 773c(c)).

At its annual meeting January 22–26, 2024, the IPHC recommended an Area 2A catch limit also known as the Fishery Constant Exploitation Yield (FCEY) for 2024. This FCEY is derived from the total constant exploitation yield (TCEY) for Pacific halibut, which includes commercial discards and bycatch estimates calculated using a formula developed by the IPHC. The 2024 TCEY and FCEY for Area 2A will be published as part of a separate rulemaking.

As provided in the Halibut Act at 16 U.S.C. 773b, the Secretary of State, with the concurrence of the Secretary of Commerce, may accept or reject, on behalf of the United States, regulations recommended by the IPHC in accordance with the Convention. Following acceptance by the Secretary of State, the annual management measures promulgated by the IPHC are published in the **Federal Register** to provide notice of their immediate regulatory effectiveness and to inform persons subject to the regulations of their restrictions and requirements (50 CFR 300.62). Allocations based on IPHC's recommended 2024 Area 2A FCEY will be subject to acceptance by the Secretary of State with concurrence by the Secretary of Commerce and will be included in the final rule.

Since 1988, the Pacific Fishery Management Council (Council) has developed a Catch Sharing Plan that allocates the IPHC regulatory Area 2A Pacific halibut FCEY between treaty tribal and non-tribal harvesters, and among non-tribal commercial and recreational (sport) fisheries. NMFS has implemented at 50 CFR 300.63 *et seq.* certain provisions of the Catch Sharing Plan and implemented annual rules containing annual management measures consistent with the Catch Sharing Plan. In 1995, the Council recommended and NMFS approved a long-term Area 2A Catch Sharing Plan (60 FR 14651, March 20, 1995). NMFS has been approving adjustments to the Area 2A Catch Sharing Plan based on Council recommendations each year to address the changing needs of these fisheries. While the full Catch Sharing Plan is not published in the **Federal Register**, it is made available on the Council website.

This rule proposes to approve the changes the Council recommended at its November 2023 meeting to the Catch Sharing Plan for Area 2A. The recommended changes to the Catch Sharing Plan were developed through the Council's public process over multiple meetings. This rule also proposes to implement recreational Pacific halibut fishery management measures for 2024, which include season opening and closing dates. These management measures are consistent with the recommendations made by the Council in the 2024 Catch Sharing Plan as modified based on its 2023 recommendations and are detailed below.

Proposed Changes to the Area 2A Catch Sharing Plan

Each year at the Council's September meeting, members of the public have an opportunity to propose changes to the Catch Sharing Plan for consideration by the Council. At the September 2023 Council meeting, per the typical annual process, the Washington Department of Fish and Wildlife (WDFW), Oregon Department of Fish and Wildlife (ODFW), and California Department of Fish and Wildlife (CDFW) proposed changes to the Catch Sharing Plan for the fisheries that occur off of their respective coasts.

At its November 2023 meeting, the Council considered the results of state-sponsored workshops on the proposed changes to the Catch Sharing Plan, along with public input provided at the September and November 2023 Council meetings, and made its recommendations for modifications to the Catch Sharing Plan. NMFS proposes to approve all the Council's recommended changes to the Catch Sharing Plan, which are discussed below.

1. In multiple sections of the Catch Sharing Plan, the Council recommended administrative changes to the management objectives and fishery flexibility language contained in the Catch Sharing Plan. These changes are intended to provide consistency and clarity throughout the document. The Council also recommended changes to section 5.7.5 that would allow incidental retention of Pacific halibut to continue in the salmon troll fishery beyond June 30 without the need for NMFS to specifically notice that continuation, improving efficiency.

2. In section 6.8 of the Catch Sharing Plan, the Council recommended creating a new management provision that would allow NMFS to take inseason action to reallocate or transfer recreational fishery allocation between states if one or more states was projected to not fully attain their recreational fishery allocation for the current season. This new proposed type of inseason action is intended to allow greater utilization of overall Area 2A recreational allocation by providing additional angler opportunity later in the season across a larger portion of the coast.

3. The Council recommended changes to Section 5.6.4 of the Catch Sharing Plan regarding the notice and timing of non-tribal directed commercial fishery sequential season openings. Specifically, NMFS proposes to announce one or two open periods for the non-tribal directed commercial fishery each year, with intervals between open periods anticipated to be 2 to 4 weeks. The intent of this change is to allow more stability and certainty for the fishery participants as the season progresses. Management measures regulating the non-tribal directed commercial fishery are typically established through a separate rulemaking in the spring of each year.

4. In section 6.9.1(d) of the Catch Sharing Plan, the Council recommended that NMFS revise the season structure in the Washington Puget Sound subarea to allow fishing up to 7 days per week in April, May, and June if the Area 2A FCEY is at least 1.3 million pounds (lbs, 589.7 metric tons (mt)); if the Area 2A FCEY is less than 1.3 million lbs (589.7 mt), then seasons may be open up to 5 days per week in April, May and June.

5. In section 6.9.2(d) of the Catch Sharing Plan, the Council recommended that NMFS revise the season structure in the Washington North Coast subarea to allow fishing up to 3 days per week in May if the Area 2A FCEY is at least 1.3 million lbs (589.7 mt); and if the Area 2A FCEY is less than 1.3 million lbs (589.7 mt), then allowing fishing up to 2 days per week.

6. In section 6.9.3(d) of the Catch Sharing Plan, the Council recommended that NMFS revise the season structure in the Washington South Coast subarea to allow fishing up to 3 days per week in May and 8 days in June if sufficient subarea allocation remains after April 30.

7. In section 6.10 of the Catch Sharing Plan, the Council recommended that NMFS revise the season structure in the Columbia River subarea to allow fishing during May and June.

8. In section 6.11(d)(ii) of the Catch Sharing Plan, the Council recommended that NMFS revise the season structure in the Oregon central coast subarea Spring all-depth fishery to allow additional dates to be established every week, as opposed to every other week, except week(s) may be skipped to avoid adverse tidal conditions. The potential additional dates will be identified preseason and may be opened if enough subarea allocation is available to allow for additional fishing days after the spring season.

9. In section 6.12 of the Catch Sharing Plan, the Council recommended that NMFS establish a new management line at Point Arena, California (38°57.5′ N lat.), to create two subareas off California, along with a criteria and management framework for the newly established subarea south of Point Arena, California. The area between the Oregon/California border (42°00.00′ N lat.) and Point Arena would be called the Northern California Coast subarea. The area south of Point Arena would be called the South of Point Arena subarea. Sections 6.12.1 and 6.12.2 of the Catch Sharing Plan were created to describe the management measures for the Northern California Coast subarea and South of Point Arena subarea, respectively. New management measures for the proposed subareas include 500 lbs (0.23 mt) of the California recreational fishery allocation to be assigned to the South of Point Arena subarea, with the remaining California recreational fishery allocation to be assigned to the Northern California Coast subarea. The South of Point Arena subarea will be open from May 1 to December 31 or until the 500 lbs (0.23 mt) have been caught with a one-fish daily bag limit. The Northern California Coast subarea will be open May 1 and closing November 15, or until the allocation has been attained, and a one-fish daily bag limit.

Additional discussion of these changes is included in the materials submitted to the Council at its September and November meetings, available at *https://www.pcouncil.org/council-meetings/previous-meetings/*. A version of the Catch Sharing Plan including these changes can be found at *https://www.pcouncil.org/managed_fishery/pacific-halibut/*.

Proposed 2024 Recreational Fishery Management Measures

As described above, NMFS proposes to implement recreational fishery management measures, including season dates for the 2024 fishery, consistent with the Council's recommendations in the 2024 Catch Sharing Plan. The Catch Sharing Plan includes a framework for setting days open for fishing by subarea; under this framework, each state submits final recommended season dates annually to NMFS during the proposed rule comment period. However, this proposed rule contains preliminary dates based on the Catch Sharing Plan framework and/or recommendations received to date.

After the opportunity for public comment, including comments from WDFW, ODFW, and CDFW after each state has concluded its public meetings gathering input on season dates, NMFS will publish a final rule approving the Catch Sharing Plan and promulgating the annual management measures for the Area 2A recreational fishery, as required by implementing regulations at 50 CFR 300.63(b)(1). If there is any discrepancy between the Catch Sharing Plan and federal regulations, federal regulations take precedence.

2024 Annual Recreational Management Measures

NMFS proposes recreational fishing subareas, allocations, and fishing dates as described below. These provisions may be modified through inseason action consistent with 50 CFR 300.63(c). Inseason actions taken by NMFS will be published in the **Federal Register**. In addition to publication in the **Federal Register**, NMFS will make the public aware of inseason management actions by a telephone hotline, (206) 526–6667 or (800) 662–9825, and fishery bulletins administered through email by NMFS West Coast Region. Since provisions of these regulations may be changed by inseason actions, recreational anglers are encouraged to monitor the telephone hotline and subscribe to receive fishery bulletin emails for current information for the area in which they are fishing. All recreational fishing in Area 2A is managed on a ''port of landing'' basis, whereby any Pacific halibut landed into a port counts toward the allocation for the area in which that port is located, and the regulations governing the area of landing apply, regardless of the specific area of catch.

Washington Puget Sound and the U.S. Convention Waters in the Strait of Juan de Fuca

The subarea allocation for landings into ports in Puget Sound and the U.S. waters in the Strait of Juan de Fuca will be provided in the final rule based on the allocation formula in the Catch Sharing Plan.

(a) If the 2024 Area 2A FCEY is 1.3 million lbs (589.7 mt) or greater, NMFS is proposing to open the Puget Sound and the U.S. Convention Waters in the Strait of Juan de Fuca fishery on April 4 through June 30, 7 days a week. If the subarea allocation remains for at least another full day of fishing after June 30, NMFS may take inseason action to reopen the fishery in August, up to 7 days per week, through September. The area will be closed when there is not sufficient subarea allocation for another full day of fishing. If the 2024 Area 2A FCEY is less than 1.3 million lbs (589.7 mt), then NMFS proposes to open the fishery every Thursday, Friday, Saturday, Sunday, and Monday from April 4 through June 30. If the subarea allocation remains for at least another full day of fishing after June 30, NMFS may take inseason action to reopen the fishery in August, up to 7 days per week, through September. The area will be closed when there is not sufficient subarea allocation for another full day of fishing. Any inseason action, including closures, will be announced in accordance with Federal regulations at 50 CFR 300.63(c) and on the NMFS hotline at (206) 526–6667 or (800) 662–9825.

(b) The daily bag limit is one Pacific halibut of any size per person.

Washington North Coast Subarea

The allocation for landings into ports in the Washington North Coast subarea will be provided in the final rule based on the allocation formula in the Catch Sharing Plan.

(a) If the Area 2A 2024 FCEY is greater than 1.3 million lbs (589.7 mt), NMFS is proposing to open the Washington North Coast fishery:

- every Thursday, Friday, and Saturday from May 2 through May 18;
- Friday, May 24 and Sunday, May 26; and
- every Thursday, Friday, Saturday, and Sunday from May 30 through June 30.

If the subarea allocation remains for at least another full day of fishing after June 30, NMFS may take inseason action to reopen the fishery in August, up to 7 days per week, through September. The area will be closed when there is not sufficient subarea allocation for another full day of fishing. Any inseason action, including closures, will be announced in accordance with Federal regulations at 50 CFR 300.63(c) and on the NMFS hotline at (206) 526–6667 or (800) 662–9825. If the 2024 Area 2A FCEY is less than 1.3 million lbs (589.7 mt), then NMFS is proposing to open the fishery:

- every Thursday and Saturday from May 2 through May 20;
- Friday, May 24 and Sunday, May 26;
- and every Thursday, Friday, Saturday, and Sunday from May 30 through June 30.

If the subarea allocation remains for at least another full day of fishing after June 30, NMFS may take inseason action to reopen the fishery in August, up to 7 days per week, through September. The area will be closed when there is not sufficient subarea allocation for another full day of fishing. Any inseason action, including closures, will be announced in accordance with Federal regulations at 50 CFR 300.63(c)

and on the NMFS hotline at (206) 526–6667 or (800) 662–9825.

(b) The daily bag limit is one Pacific halibut of any size per person.

Washington South Coast Subarea

The allocation for landings into ports in the South Coast subarea will be provided in the final rule based on the allocation formula in the Catch Sharing Plan. The South Coast subarea has a primary and a nearshore fishery.

(a) NMFS is proposing to open the Washington South Coast primary fishery every Thursday, Sunday, and Tuesday from May 2 through May 21 and on Thursday, May 23. If sufficient subarea allocation remains, the primary fishery will reopen June 13, 16, 18, 20, 23, 25, 27, and 30 or until there is not sufficient subarea allocation for another full day of fishing. If the subarea allocation remains for at least another full day of fishing after June 30, NMFS may take inseason action to reopen the fishery in August, up to 7 days per week, through September. The area will be closed when there is not sufficient subarea allocation for another full day of fishing. Any inseason action, including closures, will be announced in accordance with Federal regulations at 50 CFR 300.63(c) and on the NMFS hotline at (206) 526–6667 or (800) 662–9825.

When the South Coast subarea primary fishery does not have sufficient allocation to open for at least another full day of fishing, any remaining primary fishery allocation will be used to open a nearshore fishery. The nearshore fishery will open the first Saturday after the closure of the primary fishery and will be open 7 days per week until there is not sufficient nearshore fishery allocation remaining for another full day of fishing, at which point the area will be closed. Any inseason action will be announced in accordance with Federal regulations at 50 CFR 300.63(c) and on the NMFS hotline at (206) 526–6667 or (800) 662–9825.

If the primary fishery is closed prior to September 30 and there is not sufficient allocation remaining for at least a full day of fishing in the nearshore fishery, NMFS may take inseason action to transfer any remaining subarea allocation to another Washington coastal subarea, in accordance with Federal regulations at 50 CFR 300.63(c).

(b) The daily bag limit is one Pacific halibut of any size per person.

Columbia River Subarea

The allocation for landings into ports in the Columbia River subarea will be provided in the final rule based on the allocation formula in the Catch Sharing Plan. The Columbia River subarea has an all-depth fishery and a nearshore fishery.

(a) For the all-depth fishery, NMFS proposes to open the fishery as follows:

- every Thursday, Sunday, and Tuesday from May 2 through May 21;
- Thursday, May 23 and Sunday, May 26; and
- every Thursday, Sunday, and Tuesday from May 30 through June 30.

If the subarea allocation remains for at least another full day of fishing after June 30, NMFS may take inseason action to reopen the fishery in August, up to 7 days per week, through September. The area will be closed when there is not sufficient subarea allocation for another full day of fishing. Any remaining subarea allocation may be transferred inseason to other Washington or Oregon subareas by NMFS in proportion to the allocation formula in the Catch Sharing Plan, in accordance with Federal regulations at 50 CFR 300.63(c). Any inseason action, including closures and reallocation, will be announced in accordance with Federal regulations at 50 CFR 300.63(c) and on the NMFS hotline at (206) 526–6667 or (800) 662–9825.

For the nearshore fishery, NMFS is proposing to open the fishery every Monday, Tuesday, and Wednesday from May 6 through September 30 until there is not sufficient nearshore fishery allocation remaining for another full day of fishing, at which point the area will be closed. Any closure will be announced in accordance with Federal regulations at 50 CFR 300.63(c)(3) and on the NMFS hotline at (206) 526–6667 or (800) 662–9825.

(b) The daily bag limit is one Pacific halibut of any size per person.

Oregon Central Coast Subarea

The allocation for landings into ports in the Oregon Central Coast subarea will be provided in the final rule based on the allocation formula in the Catch Sharing Plan. The Oregon Central Coast subarea has a nearshore, a spring all-depth, and a summer all-depth fishery.

(a) The allocation to the nearshore fishery will be provided in the final rule based on the allocation formula in the Catch Sharing Plan. NMFS is proposing to open the nearshore fishery 7 days per week from May 1 through October 31 if the nearshore fishery allocation is 25,000 lbs (11.3 mt) or more or from June 1 through October 31 if the nearshore fishery allocation is less than 25,000 lbs (11.3 mt). The area will be closed when there is not sufficient subarea allocation for another full day of fishing. Any closure will be announced in accordance with Federal regulations at 50 CFR 300.63(c)(3) and on the NMFS hotline at (206) 526–6667 or (800) 662–9825.

The allocation to the spring all-depth fishery will be provided in the final rule based on the allocation formula in the Catch Sharing Plan. If the spring all-depth fishery the allocation is greater than 100,000 lbs (45.4 mt), NMFS is proposing to open the spring all-depth fishery up to 7 days per week from May 1 through July 31. The area will be closed when there is not sufficient subarea allocation for another full day of fishing. If the spring all-depth fishery allocation is 100,000 lbs (45.4 mt) or less, NMFS is proposing to open the fishery every Thursday, Friday and Saturday from May 9 through July. The area will close when there is not sufficient subarea allocation for another full day of fishing. Any closure will be announced in accordance with Federal regulations at 50 CFR 300.63(c)(3) and on the NMFS hotline at (206) 526–6667 or (800) 662–9825.

The allocation to the summer all-depth fishery will be provided in the final rule based on the allocation formula in the Catch Sharing Plan. If the overall Area 2A allocation is 700,000 lbs (317.5 mt) or greater and the summer all-depth fishery allocation is less than 60,000 lbs (27.2 mt), NMFS is proposing to open the summer all-depth fishery every Friday and Saturday from August 2 through October 31. The area will close when there is not sufficient subarea allocation for another full day of fishing. If the summer all-depth fishery allocation is 60,000 lbs (27.2 mt) or greater, NMFS proposes to open the summer all-depth fishery every other Thursday, Friday, and Saturday from August 1 through October 31. The area will close when the remaining combined spring all-depth fishery and summer all-depth fishery allocations in the Oregon Central Coast subarea is not sufficient for another full day of fishing. Any closure will be announced in accordance with Federal regulations at 50 CFR 300.63(c)(3) and on the NMFS hotline at (206) 526–6667 or (800) 662–9825.

NMFS may take inseason action to reopen the summer all-depth fishery if sufficient subarea allocation remains for additional fishing days after the first scheduled open period, August 2–3. If, after August 3, 60,000 lbs (27.2 metric tons (mt)) or more remains from the combined nearshore, spring all-depth, and summer all-depth fishery allocations, NMFS may take inseason action to reopen the summer all-depth fishery every Thursday, Friday, and Saturday beginning August 15 and/or

allow fishing up to 7 days a week beginning September 1 through October 31 or until there is not sufficient subarea allocation remaining for another full day of fishing, at which point the fishery will be closed. If, after September 3, 30,000 lbs (13.6 mt) or greater remains from the combined nearshore, spring all-depth, and summer all-depth fishery allocations and the summer all-depth fishery is not already open every Thursday, Friday and Saturday, NMFS may take inseason action to reopen the summer all-depth fishery every Thursday, Friday, and Saturday beginning September 5 through October 31 until there is not sufficient subarea allocation for another full day of fishing, at which point the area will be closed. NMFS will announce when the summer all-depth fishery will reopen and the bag limit in accordance with Federal procedures at 50 CFR 300.63(c) and on the NMFS hotline (206) 526–6667 or (800) 662–9825.

(b) The daily bag limit is one Pacific halibut of any size per person. If the Central Oregon Coast subarea allocation (all-depth and nearshore combined) is 200,000 lbs (90.7 mt) or greater, NMFS may take inseason action to set the daily bag limit at two fish per day. NMFS will announce bag limits in accordance with Federal procedures at 50 CFR 300.63(c) and on the NMFS hotline (206) 526–6667 or (800) 662–9825.

Southern Oregon Coast Subarea

The allocation for landings into ports in the Southern Oregon subarea will be provided in the final rule based on the allocation formula in the Catch Sharing Plan.

(a) NMFS is proposing to open the fishery May 1 through October 31 or until there is not sufficient subarea allocation for another full day of fishing, at which point the area will be closed. Any closure will be announced in accordance with Federal regulations at 50 CFR 300.63(c)(3) and on the NMFS hotline at (206) 526–6667 or (800) 662–9825.

(b) The daily bag limit is one Pacific halibut of any size per person unless otherwise specified through inseason action. NMFS will announce any bag limit changes in accordance with Federal procedures at 50 CFR 300.63(c) and on the NMFS hotline (206) 526–6667 or (800) 662–9825.

Northern California Coast Subarea

The Northern California Coast subarea is located south of the OR/CA border (42°00.00′ N lat.) to Point Arena (38°57.5′ N lat.). The allocation for landings into ports in the Northern California Coast subarea will be provided in the final rule based on the allocation formula in the Catch Sharing Plan.

(a) NMFS is proposing to open the fishery May 1 through November 15 or until there is not sufficient subarea allocation for another full day of fishing, at which point the area will be closed. NMFS will announce any closure in accordance with Federal procedures at 50 CFR 300.63(c) and on the NMFS hotline (206) 526–6667 or (800) 662–9825.

(b) The daily bag limit is one Pacific halibut of any size per person.

South of Point Arena Subarea

The South of Point Arena subarea is located south of Point Arena (38°57.5′ N lat.) to the U.S./Mexico border. The allocation for landings into ports in the South of Point Arena subarea will be provided in the final rule based on the allocation formula in the Catch Sharing Plan.

(a) NMFS is proposing to open the fishery May 1 through December 31 or until there is not sufficient subarea allocation for another full day of fishing, at which point the area will be closed. NMFS will announce any closure in accordance with Federal procedures at 50 CFR 300.63(c)(3) and on the NMFS hotline (206) 526–6667 or (800) 662–9825.

(b) The daily bag limit is one Pacific halibut of any size per person.

Additional Recreational Management Measures

In addition to the state-specific recreational fishing measures described above, NMFS also proposes to create a new management provision that would allow NMFS to take inseason action to reallocate or transfer anticipated uncaught recreational fishery allocation [1] between states for 2024 and beyond. At the June 2023 Council meeting, it was identified that, in recent years, under-attainment of the state recreational fishery allocations has occurred. During the same meeting, the Groundfish Advisory Subpanel and the Salmon Advisory Subpanel supported the development of an inseason management provision that would allow for transfer of the unused recreational fishery allocation between all the states to better utilize the Area 2A FCEY.

While each year NMFS, in working with the Council and states, establishes state-specific season structures and management measures intended to fully attain the state's recreational fishery allocation and management objectives, partial attainment of a state recreational fishery allocation may occur, which contributes to lower attainment of the overall Area 2A FCEY. Certain existing inseason action provisions were intended as tools to achieve full attainment, such as modifying bag limits or the transfer of uncaught allocations within the Washington subareas and from the Columbia River subarea to other Washington and Oregon subareas as specified at 50 CFR 300.63(c)(6). However, under-attainment of the state recreational fishery allocations has still occurred despite these efforts to modify management measures inseason to meet the needs of the fishery.

To address under-attainment of the state recreational fishery allocations, the Council, states, and advisory bodies, through the Council's public process at the September and November 2023 meetings, developed the framework for a new type of inseason action to transfer anticipated uncaught recreational allocation between states for greater utilization of overall Area 2A recreational allocation by providing additional angler opportunity across a larger portion of the coast later in the season. This framework was included in the recommendation to NMFS as part of the 2024 recreational fishery management measures.

Under this proposed inseason action provision, if, through consultation with an applicable state, NMFS determines that a state will be unable or unlikely to attain their originally established recreational allocation for that fishing year, then NMFS may transfer any anticipated uncaught recreational fishery allocation between states. Under such a scenario, NMFS would reallocate the net pounds available equally to each of the other two states. Should one state decline any portion of the additional allocation or NMFS determined that a receiving state would not be able to fully utilize the additional allocation, a portion or the full amount of the anticipated uncaught recreational fishery subarea allocation would go to the remaining state. NMFS will announce any inseason action in accordance with Federal procedures at 50 CFR 300.63(c)(6) and on the NMFS hotline (206) 526–6667 or (800) 662–9825.

At the September and November Council meetings CDFW proposed, and Council subsequently recommended to NMFS, to establish a new management line at Point Arena, CA (38°57.5′ N lat.) and create two subareas off California. The area between the OR/CA border (42°00.00′ N lat.) and Point Arena would be called the Northern California

[1] Recreational subarea allocations are in net pounds, the weight of Pacific halibut that is without gill and entrails, head-off, washed and without slime and ice.

Coast subarea. The area south of Point Arena would be called the South of Point Arena subarea. The area represented by the proposed Northern California Coast subarea is where the majority of targeted recreational fishing for Pacific halibut occurs off California. The intent of proposing the new South of Point Arena subarea is to be able to structure management in this area to better accommodate the de minimis retention of Pacific halibut catch that occurs in recreational fisheries not directly targeting Pacific halibut in this area. Additionally, the proposed season structure for the South of Point Arena subarea includes opening May 1 and closing December 31, or until there is not sufficient subarea allocation remaining for another full day of fishing and the area is therefore closed, and a one-fish daily bag and possession limit. This proposed closing date of December 31 is 46 days later in the year than has been past practice and what is proposed to be maintained for the Northern California Coast subarea, May 1 through November 15. NMFS would announce any closure in accordance with notice procedures at 50 CFR 300.63(c)(3) and on the NMFS hotline (206) 526–6667 or (800) 662–9825. The CDFW proposal and Council recommendation also includes a 500 lbs (0.23 mt) subarea allocation for the South of Point Arena subarea to be subtracted from the California recreational fishery allocation, with the remainder of the California recreational fishery allocation to be assigned to the Northern California Coast subarea.

The establishment of these two subareas, including the separate subarea allocations and closure dates, are intended to allow anglers along more of the California coast access to the California recreational allocation while reducing the potential for regulatory discarding. In recent years, the California recreational fishery has closed in late July/early August. During the summer Pacific halibut are known to be encountered in other non-Pacific halibut directed recreational fisheries in the proposed subarea south of Point Arena. Due to the California recreational fishery typically closing in early summer, these encountered fish must be released. By reserving a de minimis allocation to allow for retention in non-Pacific halibut directed recreational fisheries, the proposed subarea south of Point Arena is intended to prevent potential discard while maintaining the conservation of Pacific halibut and providing angler opportunity.

Classification

Under section 773 of the Halibut Act, the Pacific Fishery Management Council may develop, and the Secretary of Commerce may implement, regulations governing Pacific halibut fishing by U.S. fishermen in Area 2A that are in addition to, and not in conflict with, approved IPHC regulations (16 U.S.C. 773c(c)). The proposed rule is consistent with the Council and NMFS's authority under the Halibut Act.

This proposed rule has been determined to be not significant for purposes of Executive Order 12866.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities, for the following reasons:

For Regulatory Flexibility Act (RFA) purposes only, NMFS has determined that charter boats targeting Pacific halibut are all small businesses. Charter fishing operations are classified under NAICS code 487210, with a corresponding Small Business Association size standard of $14 million in annual receipts (13 CFR 121.201).

This proposed rule would revise various recreational fishing management measures, add an inseason mechanism to transfer anticipated uncaught recreational fishery allocation between states, and establish a new management line at Point Arena, CA, creating two subareas with separate allocations within California. This proposed rule would open the recreational fishery with 2024 season dates and subarea allocations impacting charter boats, anglers, and businesses relying on recreational fishing across all of Area 2A. These changes were uncontroversial throughout the Council's public process, and overall participation in the recreational fisheries is not expected to change. There are no large entities involved in the Pacific halibut fisheries off the West Coast. Since this action will only impact recreational charter vessels in Area 2A (no commercial fishing entities are directly affected by this rule), which are small entities, none of these changes will have a disproportionately negative effect on small entities versus large entities. Private vessels used for recreational fishing are not businesses and are therefore not included in the RFA analysis.

In 2023, NMFS issued 136 licenses to the charter boat fleet for Area 2A. Recent information on charter boat activity is not available; however, historically, approximately 60 percent of charter boat license holders have participated in the Pacific halibut recreational fishery. Thus, based on historical information, NMFS assumes a majority of license holders may be affected by these regulations as those vessels operate in Area 2A. The major effect of Pacific halibut management on small entities (*i.e.,* profitability) will be from the catch limit decisions (*i.e.,* FCEYs) made by the IPHC at its annual meeting January 22–26, 2024, a decision independent from this proposed action. This proposed action would implement non-controversial management measures that NMFS believes will provide increased recreational opportunities under the IPHC allocations with minimal positive economic effects. Therefore, the proposed rule is unlikely to affect the profitability of the recreational fishery or the small charter fishing businesses that target Pacific halibut.

For the reasons described above, the proposed action, if adopted, will not have a significant economic impact on a substantial number of small entities. As a result, an initial regulatory flexibility analysis is not required and none has been prepared.

This proposed rule contains no information collection requirements under the Paperwork Reduction Act of 1995.

List of Subjects in 50 CFR Part 300

Administrative practice and procedure, Antarctica, Canada, Exports, Fish, Fisheries, Fishing, Imports, Indians, Labeling, Marine resources, Reporting and recordkeeping requirements, Russian Federation, Transportation, Treaties, Wildlife.

Dated: January 30, 2024.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, NMFS proposes to amend 50 CFR part 300, subpart E, as follows:

PART 300—INTERNATIONAL FISHERIES REGULATIONS

Subpart E—Pacific Halibut Fisheries

■ 1. The authority citation for part 300, subpart E, continues to read as follows:

Authority: 16 U.S.C. 773–773k.

■ 2. In § 300.63 revise paragraphs (c)(5)(iii), (6)(i)(F), (ii)(E) through (G) to read as follows:

§ 300.63 Catch sharing plan and domestic management measures in Area 2A.

* * * * *

(c) * * *

(5) * * *

(iii) *California.* The California recreational fishery is divided into the following subareas:

(A) *Northern California Coast Subarea.* The Northern California Coast subarea is located south of the OR/CA border (42°00.00′ N lat.) to Point Arena (38°57.5′ N lat.).

(B) *South of Point Arena Subarea.* The South of Point Area subarea is located south of Point Arena (38°57.5′ N lat.) to the U.S./Mexico border.

(6) * * *

(i) * * *

(F) If any state is projected to not utilize its respective recreational allocation by the end of the fishing season, NMFS may take inseason action to transfer any projected unused allocation to another state. After a state notifies NMFS of the amount of their recreational subarea allocation in net pounds that is projected to be unused after accounting for state management objectives, NMFS may take inseason action to reallocate the amount of net pounds available equally to the other two states. If a state eligible to receive the additional pounds declines all or part of the additional pounds, or NMFS determines a state is unlikely to use additional allocation, a portion or the full amount of the remainder would go to the other state.

(ii) Inseason management provisions include, but are not limited to, the following:

* * * * *

(E) Modification of state recreational allocation, including a shift in recreational allocation from one state to another;

(F) Modification of subarea allocation; and

(G) Modification of the Stonewall Bank Yelloweye Rockfish Conservation Area (YRCA) restrictions off Oregon using YRCA expansions as defined in groundfish regulations at 50 CFR 660.70(g) or (h).

* * * * *

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 665

[RTID 0648–XD180]

Pacific Island Fisheries; Standardized Bycatch Reporting Methodologies

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability of fishery ecosystem plan amendments; request for comments.

SUMMARY: NMFS announces that the Western Pacific Fishery Management Council (Council) proposes to amend the five fishery ecosystem plans (FEP) for fisheries in the Pacific Islands Region. If approved, the FEPs would be amended to update data collection mechanisms identified as standardized bycatch reporting methodologies (SBRM) as needed, and revise descriptions of SBRM for consistency with current NMFS regulations. The proposed action considers the best available scientific, commercial, and other information about the fisheries, and supports the long-term sustainability of fishery resources.

DATES: NMFS must receive comments on the proposed amendment by April 9, 2024.

ADDRESSES: You may submit comments on the proposed amendment, identified by NOAA–NMFS–2023–0151, by either of the following methods:

- *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *https://www.regulations.gov* and type NOAA–NMFS–2023–0151 in the Search box (note: copying and pasting the FDMS Docket Number directly from this document may not yield search results). Click on the ''Comment'' icon, complete the required fields, and enter or attach your comments.
- *Mail:* Send written comments to Sarah Malloy, Acting Regional Administrator, NMFS Pacific Islands Regional Office (PIRO), 1845 Wasp Blvd., Bldg. 176, Honolulu, HI 96818.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on *https://www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, *etc.*), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

The Council and NMFS prepared a draft omnibus amendment that describes changes that would be made to the FEPs. The draft amendment is available from *https://www.regulations.gov* or the Council, 1164 Bishop St., Suite 1400, Honolulu, HI 96813, telephone 808–522–8220, fax 808–522–8226, *https://www.wpcouncil.org.*

FOR FURTHER INFORMATION CONTACT: Brett Schumacher, Sustainable Fisheries Division, NMFS PIR, 808–725–5176.

SUPPLEMENTARY INFORMATION: The Council and NMFS manage Federal fisheries in the Pacific Islands Region pursuant to the Magnuson-Stevens Fishery and Conservation and Management Act (Magnuson-Stevens Act). Management of these fisheries is organized through five FEPs: the American Samoa Archipelago FEP, the Mariana Archipelago FEP, the Hawaii Archipelago FEP, the Pacific Remote Island Areas (PRIA) FEP, and the Pelagic Fisheries of the Western Pacific Region FEP. NMFS proposes to amend these FEPs.

Section 303(a)(11) of the Magnuson-Stevens Act requires that the FEPs establish a standardized bycatch reporting methodology for each fishery. On January 19, 2017, NMFS published a final rule (82 FR 6317) establishing national guidance regulations at 50 CFR 600.1600 through 600.1610 for compliance with the Magnuson-Stevens Act SBRM requirements. The SBRM final rule requires the Council in coordination with NMFS to review their management plans and make any necessary changes to be consistent with published guidance. The final rule also requires the Council to explain how the SBRMs meet the stated purpose in the rule based on the analysis of four considerations: (1) characteristics of bycatch in the fishery, (2) the feasibility of the reporting methodology, (3) the uncertainty of data resulting from the methodology, and (4) how the data will be used to assess the amount and type of bycatch in the fishery (60 CFR 600.1610(a)).

Current descriptions of SBRM for Pacific Island fisheries were approved in 1999 (64 FR 19067, April 19, 1999) and 2003 (68 FR 46112, August 5, 2003) as part of omnibus bycatch amendments and later incorporated into the five FEPs

in. As such, the descriptions of bycatch characteristics and data collection methods pre-date the 2017 SBRM rule, and do not describe SBRM consistent with current regulations.

The Council completed a consistency review of all five FEPs in 2021, and took final action at their 187th meeting on September 21, 2021, to recommend an omnibus amendment for all FEPs to establish consistency with SBRM regulations, clarify language for SBRM, and explain how the SBRM in each FEP meets the purpose as defined in the 2017 SBRM rule.

The proposed amendment would update data collection mechanisms identified as SBRM as needed, and revise descriptions of SBRM in each FEP for consistency with current regulations. The proposed amendments to the FEPs are administrative in nature and would not change any fishery data collection, recording, or reporting methods or requirements, and would not implement any new regulations. Therefore, the amendments would not affect any fishery in terms of gear used; area fished; seasonality; species caught; level of catch or effort; bycatch of target stocks, non-target stocks, or protected species; or any other aspect of any fishery. Also, the amendments would not add any additional administrative or enforcement requirements. Therefore no effects of the proposed omnibus amendment are expected with respect to the natural environment in the Pacific Islands Region; social, economic, or cultural conditions related to any fishery; or to the administration and enforcement of any fishery.

NMFS must receive comments on the proposed amendment by April 9, 2024, for consideration in the decision to approve, partially approve, or disapprove the amendment.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: February 5, 2024.

Everett Wayne Baxter,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Federal Register
Vol. 89, No. 28
Friday, February 9, 2024

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

AGENCY FOR INTERNATIONAL DEVELOPMENT

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Employment Records Collection From Implementing Partners of Contracts in Afghanistan

AGENCY: United States Agency for International Development (USAID).

ACTION: Notice of emergency OMB approval.

SUMMARY: In accordance with the emergency review procedures of the Paperwork Reduction Act of 1995 (PRA), USAID is requesting emergency approval from the Office of Management and Budget (OMB) for a new data collection survey on employees of the Implementing Partners of USAID contracts in Afghanistan for the purpose of facilitating the Special Immigrant Visa (SIV) Chief Of Mission (COM) approval process overseen by the Department of State.

DATES: USAID plans to collect this information starting from the second week of February, 2024.

FOR FURTHER INFORMATION CONTACT: Sulieman Hedayat, Management and Program Analyst, U.S. Agency for International Development Afghanistan Partner Relocation Task Force, by email at *afghansiv@usaid.gov* or by phone at 202–712–1914.

SUPPLEMENTARY INFORMATION: Pursuant to 5 CFR 1320.13, the Agency submitted a request for emergency approval to collect new information on the employment records of full-time Afghan employees from USAID contractors in Afghanistan.

Description of Proposed Use of Information: The information will include employee details such as dates of employment and contract number, which will be used to verify employment as part of the COM approval step of the SIV application process. This information will be collected via email through encrypted Microsoft Excel spreadsheets.

Estimated Time Burden: The total amount of time estimated for this data collection is less than 1,000 hours (considered at 3 hours per partner for an estimated 300 contractors).

Kevin Brownawell,

Executive Director, Afghan Partner Relocation Task Force USAID.

BILLING CODE 6116–01–P

AGENCY FOR INTERNATIONAL DEVELOPMENT

Privacy Act of 1974; System of Records

AGENCY: Agency for International for Development (USAID).

ACTION: Notice of new privacy act system of records.

SUMMARY: The Agency for International Development (USAID) proposes to establish a new system of records titled, ''USAID–38: Responsibility, Safeguarding, and Compliance Case Management System (RSC CMS)'' subject to the Privacy Act of 1974, as amended. The purpose of publishing this notice is to meet federal requirements and promote consistent maintenance of USAID RSC CMS records. The new system is a dedicated incident and case management system which will contain records that capture reports of misconduct allegations and issues related to USAID programming and supports USAID's ability to monitor and respond to misconduct.

DATES: Submit comments on or before March 11, 2024. This new system of records will be effective upon publication. The Routine Uses are effective at the close of the comment period.

ADDRESSES: You may submit comments:

Electronic

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions on the website for submitting comments.
- *Email: Privacy@usaid.gov.*

Paper

- *Fax:* 202–916–4946.
- *Mail:* Chief Privacy Officer, United States Agency for International Development, 1300 Pennsylvania Avenue NW, Washington, DC 20523.

FOR FURTHER INFORMATION CONTACT: Ms. Celida A. Malone, USAID Privacy Program at United States Agency for International Development, Bureau for Management, Office of the Chief Information Officer, Information Assurance Division: ATTN: USAID Privacy Program, 1300 Pennsylvania Avenue, NW, Washington, DC 20523, or by phone number at 202–916–4605.

SUPPLEMENTARY INFORMATION: USAID proposes to establish a new System of Records subject to the Privacy Act of 1974, 5 U.S.C. 552a. The new system, Responsibility, Safeguarding, and Compliance Case Management System (RSC CMS), is a dedicated incident and case management system which will contain records that capture reports of misconduct allegations and issues from all partner types, including grantees, contractors, public international organizations, and sub awardees. This collection supports USAID's ability to monitor and respond to allegations of any partners engaging in misconduct and prohibited activities. RSC CMS will provide a coordinated, streamlined, and consistent mechanism for the Agency to receive, track and respond to allegations of misconduct consistent with the statutory authorities for the collection. This system will assist USAID in documenting, recording and responding to safeguarding allegations and managing administrative actions, such as suspension and debarment proceedings, related to misconduct allegations of all types, including fraud, waste, and abuse. The system will also assist USAID in tracking and documenting USAID's assistance appeal resolution process that gives implementing partners the right to appeal an Agreement Officer's final decision.

Dated: November 9, 2023

Sensitive But Unclassified.

SYSTEM LOCATION:

USAID AWS East for ServiceNow MID Servers (AWS US–EAST–1): 7600 Doane Drive, Manassas VA, 20109); and ServiceNow's data centers (primary in Culpepper, VA and alternate in Miami, FL) for ServiceNow SaaS/PaaS.

SYSTEM MANAGER(S):

Position: Compliance Division Chief.

Office: Bureau for Management/Management Policy, Budget, and Performance/Compliance (M/MPBP/COMP).

Email: disclosures@usaid.gov.

Address: 500 D Street SW, Washington DC, 20024.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM

Foreign Assistance Act of 1961, as amended. Executive Order 12549, 2 CFR part 180, 2 CFR 200.342 and 700.14, 2 CFR subtitle A, chapter I, parts 175, 180, 182, and 183. 2 CFR subtitle A, chapter I, parts 175, 180, 182, and 183.

PURPOSE(S) OF THE SYSTEM:

Responsibility, Safeguarding, and Compliance Case Management System (RSC CMS) is a comprehensive system which will be used to, record, investigate, track, respond to and report on allegations of misconduct including sexual exploitation and abuse (SEA), trafficking in persons (TIP), and child abuse, exploitation, and neglect (CAEN) allegations that USAID (''Agency'') receives. The RSC CMS is a dedicated incident and case management module to support a coordinated, streamlined, and consistent response to all misconduct allegations and issues from all partner types, including grantees, contractors, public international organizations, and sub awardees. The RSC CMS will contain information needed to track and take administrative actions, such as suspension and debarment, in response to misconduct allegations of all types, including safeguarding violations and allegations of fraud, waste, and abuse. It will also contain information related to USAID's assistance appeal resolution process that gives implementing partners the right to appeal an Agreement Officer's final decision.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM

The System of Records covers individuals related to current, former and prospective deal participants (individuals and businesses), applicants, USAID employees, contractors, contractor employees, executives, managers, and personal and professional references associated with the deal applicants and participants; USAID's implementing partners, portfolio companies, service providers, participating United States Government (USG) Agency administrators, and certain other individuals associated, affiliated with or involved with USAID.

CATEGORIES OF RECORDS IN THE SYSTEM

This system consists of records created or compiled during suspension and debarment and other administrative actions, USAID Office of Inspector General referrals, and disclosures of misconduct including sexual exploitation and abuse; child exploitation, abuse and neglect; and trafficking in persons associated with partners supporting USAID programs. These records contain names, position titles, email addresses, physical addresses, email address, system account creation date and time, last login, IP address, and browser type.

RECORD SOURCE CATEGORIES

USAID implementing partners, the USAID Office of Inspector General, media, civil society organizations, witnesses, survivors, and USAID workforce.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the information contained in this system may be disclosed to authorized entities, as is determined to be relevant and necessary, outside USAID as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

(1) To coordinators of the various USAID business development and entrepreneurial events, such as training, outreach, marketing, and matchmaking activities.

(2) To an agency or organization, including the USAID's Office of Inspector General, for the purpose of performing audit or oversight operations as authorized by law, but only such information as is necessary and relevant to such audit or oversight function.

(3) In the event of an indication of a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by statute or particular program pursuant thereto, to the appropriate agency, whether federal, state, local, or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order involved.

(4) To a Federal, State, or local agency maintaining civil, criminal, or other relevant enforcement information or other pertinent information if necessary to obtain information relevant to an Agency decision concerning the hiring or retention of an employee; the issuance of a security clearance; the reporting of an investigation of an employee; the assignment, detail, or deployment of an employee; the letting of a contract; or the approval of a grant or other benefits.

(5) To provide information to a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of that individual.

(6) To a court, magistrate, or other administrative body in the course of presenting evidence, including disclosures to counsel or witnesses in the course of civil discovery, litigation, or settlement negotiations or in connection with criminal proceedings, when the USAID is a party to the proceeding or has a significant interest in the proceeding, to the extent that the information is determined to be relevant and necessary.

(7) To disclose information to officials of the Merit Systems Protection Board or the Office of the Special Counsel, when requested in connection with appeals, special studies of the civil service and other merit systems, review of OPM rules and regulations, investigations of alleged or possible prohibited personnel practices, and such other functions, *e.g.,* as promulgated in 5 U.S.C. 1205 and 1206, or as may be authorized by law.

(8) To the National Archives and Records Administration for the purposes of records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906.

(9) To disclose information to the Equal Employment Opportunity Commission when requested in connection with investigations into alleged or possible discrimination practices in the Federal sector, compliance by Federal agencies with the Uniform Guidelines on Employee Selection Procedures or other functions vested in the Commission and to otherwise ensure compliance with the provisions of 5 U.S.C. 7201.

(10) To appropriate agencies, entities, and persons when (a) USAID suspects or has confirmed that there has been a breach of the System of Records, (b) USAID has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, USAID (including its information systems, programs, and operations), the Federal Government, or national security; and (c) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist with

USAID's efforts to respond to the suspected or confirmed breach and/or to prevent, minimize, or remedy such harm.

(11) To another Federal agency or Federal entity when USAID determines information from this System of Records is reasonably necessary to assist the recipient agency or entity in: (a) responding to a suspected or confirmed breach; or (b) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

(12) To another agency or agent of a Government jurisdiction within or under the control of the U.S., lawfully engaged in national security or homeland defense when disclosure is undertaken for intelligence, counterintelligence activities (as defined by 50 U.S.C. 3003(3)), counterterrorism, homeland security, or related law enforcement purposes, as authorized by U.S. law or Executive Order.

(13) To either House of Congress, or, to the extent of matter within its jurisdiction, any committee or subcommittee thereof, any joint committee of Congress or subcommittee of any such joint committee.'' 5 U.S.C. 552a(b)(9).

(14) To the Department of State and its posts abroad for the purpose of transmission of information between organizational units of the Agency, or for purposes related to the responsibilities of the Department of State in conducting United States foreign policy or protecting United States citizens, such as the assignment of employees to positions abroad, the reporting of accidents abroad, evacuation of employees and dependents, and other purposes for which officers and employees of the Department of State have a need for the records in the performance of their duties.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

All information contained in the System of Record is stored in electronic format. The data is encrypted at rest and in transit using Agency approved FIPS-compliant encryption solutions.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records are retrieved by case identification number or by the name of the individual or organization that is the subject of a disclosure, referral, or administrative action. Users must be properly authenticated in the system to retrieve the data.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records are maintained and dispositioned in accordance with USAID Automated Directive System, Chapter 502 Records Management policy and the General Records Schedule/USAID Combined Records Disposition Schedules on a retention schedule of five years which are consistent with guidance established by the National Archives and Records Administration.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Technical, administrative, and physical security safeguards are implemented in accordance with the requirements of the Privacy Act, the Federal Information Security Modernization Act (FISMA), and USAID Automated Directive System privacy and security policies and system specific operating procedures. Detailed implementation descriptions are documented in the RSC CMS Privacy Impact Assessment and System Security Plan and include but are not limited to the following security controls to ensure the confidentiality and integrity of the data and records that are stored, processed, and transmitted: user awareness training, rules of behavior, and user agreements; logical and physical access; system and communications protections; identification and authentication; media protection; and audit and accountability controls. User access and roles are explicitly approved and assigned specific permissions to prevent, restrict, or allow individuals with the appropriate clearances and need to know access to the system and/or information only to the degree necessary in the performance of their official associated duties. These controls are monitored and assessed on a continuous basis to ensure the safeguards remain effective throughout the system and data lifecycles.

RECORD ACCESS PROCEDURES:

Under the Privacy Act, individuals may request access to records about themselves. These individuals must be limited to citizens of the United States or aliens lawfully admitted for permanent residence. If a Federal Department or Agency or a person who is not the individual who is the subject of the records, requests access to records about an individual, the written consent of the individual who is the subject of the records is required.

Individuals seeking access to information about themselves contained in this System of Records should address inquiries to the Bureau for Management, Office of Management Services, Information and Records Division (M/MS/IRD), USAID Annex—Room 2.4.0C, 1300 Pennsylvania Avenue NW, Washington, DC 20523. The requester may complete and sign a USAID Form 507–1, Certification of Identity Form or submit signed, written requests that should include the individual's full name, current address, telephone number and this System of Records Notice number. In addition, the requester must provide either a notarized statement or an unsworn declaration made in accordance with 28 U.S.C. 1746, in the following format:

If executed outside the United States: ''I declare (or certify, verify, or state) under penalty of perjury under the laws of the United States of America that the foregoing is true and correct. Executed on (date). (Signature).''

If executed within the United States, its territories, possessions, or commonwealths: ''I declare (or certify, verify, or state) under penalty of perjury that the foregoing is true and correct. Executed on (date). (Signature).''

CONTESTING RECORD PROCEDURES:

The USAID rules for accessing records, contesting contents, and appealing initial agency determinations are contained in 22 CFR part 212 or may be obtained from the program manager or system owner.

NOTIFICATION PROCEDURES:

Individuals seeking to determine if information about themselves is contained in this System of Records should address inquiries to the Bureau for Management, Office of Management Services, Information and Records Division (M/MS/IRD), USAID Annex—Room 2.4.0C, 1300 Pennsylvania Avenue NW, Washington, DC 20523. Individuals may complete and sign a USAID Form 507–1, Certification of Identity Form or submit signed, written requests that should include the individual's full name, current address, and telephone number. In addition, the requester must provide either a notarized statement or an unsworn declaration made in accordance with 28 U.S.C. 1746, in the following format:

If executed outside the United States: ''I declare (or certify, verify, or state) under penalty of perjury under the laws of the United States of America that the foregoing is true and correct. Executed on (date). (Signature).''

If executed within the United States, its territories, possessions, or

commonwealths: ''I declare (or certify, verify, or state) under penalty of perjury that the foregoing is true and correct. Executed on (date). (Signature).

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

To the extent permitted under the Privacy Act of 1974, 5 U.S.C. 552a(k)(2), this system has been exempted from the provisions of the Privacy Act of 1974 that permit access and correction. However, USAID may, in its discretion, fully grant individual requests for access and correction if it determines that the exercise of these rights will not interfere with an interest that the exemption is intended to protect. The exemption from access is limited in some instances by law to information that would reveal the identity of a confidential source.

Pursuant to 5 U.S.C. 552a(k)(2), this system is exempt from the following provisions of the Privacy Act of 1974, subject to the limitations set forth in that subsection: 5 U.S.C. 552a (c)(3); (d); (e)(1); (e)(4)(G); (e)(4)(H); and (f)(2) through (5). Pursuant to 5 U.S.C. 552a(k)(5), this system is exempt from the following provisions of the Privacy Act, subject to the limitations set forth in that subsection: 5 U.S.C. 552a(c)(3) and (d).

HISTORY:

None.

Celida Ann Malone,

Government Privacy Task Lead.

BILLING CODE 6116–01–P

DEPARTMENT OF AGRICULTURE

U.S. Codex Office

Codex Alimentarius Commission: Meeting of the Codex Committee on Contaminants in Foods

AGENCY: U.S. Codex Office, USDA.

ACTION: Notice of public meeting and request for comments.

SUMMARY: The U.S. Codex Office is sponsoring a public meeting on March 21, 2024. The objective of the public meeting is to provide information and receive public comments on agenda items and draft U.S. positions to be discussed at the 17th Session of the Codex Committee on Contaminants in Foods (CCCF) of the Codex Alimentarius Commission (CAC). CCCF17 will be held in Panama City, Panama from April 15–19, 2024. The U.S. Manager for Codex Alimentarius and the Under Secretary for Trade and Foreign Agricultural Affairs recognize the importance of providing interested parties the opportunity to obtain background information on the 17th Session of the CCCF and to address items on the agenda.

DATES: The public meeting is scheduled for March 21, 2024, from 1 to 3 p.m. EDT.

ADDRESSES: The public meeting will take place via Video Teleconference only. Documents related to the 17th Session of the CCCF will be accessible via the internet at the following address: *https://www.fao.org/fao-who-codexalimentarius/meetings/detail/it/?meeting=CCCF&session=17.*

Dr. Lauren Posnick Robin, U.S. Delegate to the 17th Session of the CCCF, invites interested U.S. parties to submit their comments electronically to the following email address: Quynh-Anh Nguyen, *quynh-anh.nguyen@fda.hhs.gov.* Emailed comments should state in the title that they relate to activities of the 17th Session of the CCCF.

Registration: Attendees may register to attend the public meeting here: *https://www.zoomgov.com/meeting/register/vJIsdOmsrjgpGbqn89rYPIXUAWJawQCq39Y.* After registering, you will receive a confirmation email containing information about joining the meeting.

For further information about the 17th Session of the CCCF, contact U.S. Delegate, Dr. Lauren Posnick Robin, Chief, Plant Products Branch, in the Division of Plant Products and Beverages, Office of Food Safety, Center for Food Safety and Applied Nutrition, U.S. Food and Drug Administration, at *lauren.robin@fda.hhs.gov.* For additional information regarding the public meeting, contact the U.S. Codex Office by email at: *uscodex@usda.gov* or Quynh-Anh Nguyen, *quynh-anh.nguyen@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

Background

The Codex Alimentarius Commission was established in 1963 by two United Nations organizations, the Food and Agriculture Organization (FAO) and the World Health Organization (WHO). Through adoption of food standards, codes of practice, and other guidelines developed by its committees, and by promoting their adoption and implementation by governments, Codex seeks to protect the health of consumers and ensure fair practices in the food trade.

The Terms of Reference of the Codex Committee on Contaminants in Foods (CCCF) are:

(a) to establish or endorse permitted maximum levels or guidelines levels for contaminants and naturally occurring toxicants in food and feed;

(b) to prepare priority lists of contaminants and naturally occurring toxicants for risk assessment by the Joint FAO/WHO Expert Committee on Food Additives;

(c) to consider methods of analysis and sampling for the determination of contaminants and naturally occurring toxicants in food and feed;

(d) to consider and elaborate standards or codes of practice for related subjects; and

(e) to consider other matters assigned to it by the Commission in relation to contaminants and naturally occurring toxicants in food and feed.

The Netherlands hosts the CCCF and is co-hosting the 17th Session of the CCCF with Panama. The United States attends the CCCF as a member country of Codex.

Issues To Be Discussed at the Public Meeting

The following items from the forthcoming Agenda for the 17th Session of the CCCF will be discussed during the public meeting:

- Matters referred to the Committee by the Codex Alimentarius Commission and/or its subsidiary bodies
- Matters of interest arising from FAO and WHO (including the Joint FAO/WHO Expert Committee on Food Additives)
- Matters of interest arising from other international organizations
- Maximum levels for lead in certain food categories
- Sampling plans for methylmercury in fish
- Definition for ready-to-eat peanuts for the establishment of a maximum level for total aflatoxins in this product
- Sampling plans for total aflatoxins and ochratoxin A in certain spices
- Code of practice/guidelines for the prevention and reduction of ciguatera poisoning
- Discussion Papers on the following materials:
  - Pyrrolizidine alkaloids
  - Tropane alkaloids
  - Acrylamide in foods
  - Cadmium and lead in quinoa
  - Review of the *Code of Practice for the Prevention and Reduction of Aflatoxin Contamination in Peanuts* (CXC 55–2004)
- Review of the *Code of Practice for the Reduction of Aflatoxin B1 in Raw Materials and Supplemental Feedingstuffs for Milk-Producing Animals* (CXC 45–1997)

- Development of a Code of practice for the prevention and reduction of cadmium contamination in foods
- Guidance on data analysis for development of maximum levels and for improved data collection
- Review of Codex standards for contaminants
- Follow-up work to the outcomes of JECFA evaluations and FAO/WHO expert consultations
- Priority list of contaminants for evaluation by JECFA
- Foresight on emerging issues in food and feed safety relevant to contaminants
- Other business and future work

Public Meeting

At the March 21, 2024, public meeting, draft U.S. positions on the agenda items will be described and discussed, and attendees will have the opportunity to pose questions and offer comments. Written comments may be offered at the meeting or sent to Quynh-Anh Nguyen, at *quynh-anh.nguyen@fda.hhs.gov.* Written comments should state that they relate to activities of the 17th Session of the CCCF.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, the U.S. Codex Office will announce this **Federal Register** publication on-line through the USDA Codex web page located at: *http://www.usda.gov/codex,* a link that also offers an email subscription service providing access to information related to Codex. Customers can add or delete their subscriptions themselves and have the option to password protect their accounts.

USDA Non-Discrimination Statement

No agency, officer, or employee of the USDA shall, on the grounds of race, color, national origin, religion, sex, gender identity, sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, or political beliefs, exclude from participation in, deny the benefits of, or subject to discrimination any person in the United States under any program or activity conducted by the USDA.

How To File a Complaint of Discrimination

To file a complaint of discrimination, complete the USDA Program Discrimination Complaint Form, which may be accessed online at *https://www.usda.gov/oascr/filing-program-discrimination-complaint-usda-customer,* or write a letter signed by you or your authorized representative. Send your completed complaint form or letter to USDA by mail, fax, or email. Mail: U.S. Department of Agriculture, Director, Office of Adjudication, 1400 Independence Avenue SW, Washington, DC 20250–9410; Fax: (202) 690–7442; Email: *program.intake@usda.gov.* Persons with disabilities who require alternative means for communication (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720–2600 (voice and TDD).

Done at Washington, DC, on February 5, 2024.

Mary Frances Lowe,

U.S. Manager for Codex Alimentarius.

Rural Utilities Service

[Docket No. RUS–23–ELECTRIC–0026]

60-Day Notice of Proposed Information Collection: Accounting Requirements for RUS Electric and Telecommunications Borrowers; OMB Control No.: 0572–0003

AGENCY: Rural Utilities Service, USDA.

ACTION: Notice; request for comments.

SUMMARY: The Rural Utilities Service (RUS) announces its' intention to request a revision of a currently approved information collection and invites comments on this information collection.

DATES: Comments on this notice must be received by April 9, 2024 to be assured of consideration.

ADDRESSES: Comments may be submitted through the Federal eRulemaking Portal at: *https://www.regulations.gov.* To comment, in the ''Search'' box, enter the docket number: ''RUS–23–ELECTRIC–0026.'' You will be taken to the ''Search Results'' page and a link to the Notice. To submit a comment, click on the ''Comments'' button under the Notice document name (this will be under the ''Documents'' tab if not already brought there). When you comment, you must complete all the required information, and include the Agency name and docket number. When done commenting, select the ''Submit Comment'' button at the bottom of the page. Information on commenting is available in the ''Commenter's Checklist'' located at the top of the comment page or by viewing the FAQ tab. All comments submitted, from all sources, will be posted, without change to *https://www.regulations.gov.* Comments containing profanity, vulgarity, threats, or other inappropriate language or content will not be considered. The Agency requests that no business proprietary information, copyrighted information, or personally identifiable information be submitted in response to this Notice.

FOR FURTHER INFORMATION CONTACT: Crystal Pemberton, Management Analyst, Branch 1, Rural Development Innovation Center—Regulations Management Division, United States Department of Agriculture, 1400 Independence Avenue SW, South Building, Washington, DC 20250–1522. Telephone: (202) 260–8621, Email: *Crystal.Pemberton@usda.gov.*

SUPPLEMENTARY INFORMATION: The Office of Management and Budget's (OMB) regulation (5 CFR part 1320) implementing provisions of the Paperwork Reduction Act of 1995 (Pub. L. 104–13) requires that interested members of the public and affected agencies have an opportunity to comment on information collection and recordkeeping activities (see, 5 CFR 1320.8(d)). This notice identifies the following information collection that RUS is submitting to OMB as a revision to an existing collection with Agency adjustment.

Title: Accounting Requirements for Electric and Telecommunications Borrowers.

OMB Control Number: 0572–0003.

Expiration Date of Approval: August 31, 2024.

Type of Request: Revision of a currently approved information collection.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 2 hours per response. The recordkeeping burden for this collection of information is estimated to average 25 hours per response.

Respondents: Business or other for-profit, Not-for-profit institutions.

Estimated Number of Respondents: 1,252.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 2,504 hours.

Estimated Total Annual Burden on Recordkeepers: 31,300 hours.

Abstract: The Rural Utilities Service (RUS) is a credit agency of the USDA which makes direct and guaranteed loans to finance electric and telecommunications facilities in rural areas. Accounting requirements that are unique to RUS borrowers are contained in 7 CFR parts 1767 and 1770 which

establish basic accounting requirements for the recording of financial information that must be available to the management, investors, and lenders of any business enterprise. This collection is primarily a record keeping requirement, although the Agency is requiring borrowers to establish an index of records. The hours of burden to maintain this index are directly related to the portions of the accounting system that are unique to the Agency. There are many important financial considerations for retention and preservation of accounting records. One of the most important considerations to RUS is that documentation be available so that the borrower's records may be audited for proper disbursements of funds.

Comments are invited on:

(a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) the accuracy of the agency's estimate of the burden of the collection of information including the validity of the methodology and assumptions used;

(c) ways to enhance the quality, utility and clarity of the information to be collected; and

(d) ways to minimize the burden of the collection of information on respondents, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. All responses to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record.

Copies of this information collection can be obtained from Crystal Pemberton, Management Analyst, Rural Development Innovation Center—Regulations Management Division, at (202) 260–8621. Email: *Crystal.Pemberton@usda.gov.*

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Andrew Berke,

Administrator, Rural Utilities Service.

BILLING CODE 3410–XV–P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Puerto Rico Advisory Committee to the U.S. Commission on Civil Rights

AGENCY: Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission), and the Federal Advisory Committee Act (FACA), that a meeting of the Puerto Rico Advisory Committee to the Commission will convene by virtual web conference on Wednesday, February 28, 2024, at 3:30 p.m. Atlantic Time and 2:30 p.m. Eastern Time. The purpose is to continue discussion on their project on the civil rights impacts of the Insular Cases in Puerto Rico.

DATES: February 28, 2024, Wednesday, at 3:30 p.m. Atlantic Time (2:30 p.m. ET).

ADDRESSES: Meeting will be held via Zoom.

Registration Link (Audio/Visual): http://tinyurl.com/yfc4tukr.

Join by Phone (Audio Only): 1–833 435 1820 USA Toll Free; Meeting ID: 160 604 6578#.

FOR FURTHER INFORMATION CONTACT: Email Victoria Moreno, Designated Federal Officer at *vmoreno@usccr.gov,* or by phone at 434–515–0204.

SUPPLEMENTARY INFORMATION: This meeting will take place in Spanish with English interpretation. This committee meeting is available to the public through the registration link above. Any interested member of the public may listen to the meeting. An open comment period will be provided to allow members of the public to make a statement as time allows. Per the Federal Advisory Committee Act, public minutes of the meeting will include a list of persons who are present at the meeting. If joining via phone, callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Closed captioning will be available for individuals who are deaf, hard of hearing, or who have certain cognitive or learning impairments. To request additional accommodations, please email *ebohor@usccr.gov* at least 10 business days prior to the meeting.

Members of the public are entitled to submit written comments; the comments must be received in the regional office within 30 days following the meeting. Written comments may be emailed to Victoria Moreno at *vmoreno@usccr.gov.* Persons who desire additional information may contact the Regional Programs Coordination Unit at 1–312–353–8311.

Records generated from this meeting may be inspected and reproduced at the Regional Programs Coordination Unit Office, as they become available, both before and after the meeting. Records of the meetings will be available via *www.facadatabase.gov* under the Commission on Civil Rights, Puerto Rico Advisory Committee link. Persons interested in the work of this Committee are directed to the Commission's website, *http://www.usccr.gov,* or may contact the Regional Programs Coordination Unit at *ebohor@usccr.gov.*

Agenda

1. Welcome & Roll Call
2. Committee Discussion on Project Regarding the Civil Rights Impacts of the Insular Cases in Puerto Rico
3. Next Steps
4. Public Comment
5. Other Business
6. Adjourn

Dated: February 6, 2024.

David Mussatt,

Supervisory Chief, Regional Programs Unit.

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Nebraska Advisory Committee to the U.S. Commission on Civil Rights

AGENCY: U.S. Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act that the Nebraska Advisory Committee (Committee) to the U.S. Commission on Civil Rights will hold a briefing meeting via web conference. The purpose is a public briefing to gather testimony on effects of the Covid–19 Pandemic on K–12 Education in the state.

DATES: Wednesday, March 6, 2024 at 11 a.m. central time.

ADDRESSES: The meeting will be held via Zoom.

March 6th Briefing Meeting:

Registration Link (Audio/Visual): https://www.zoomgov.com/s/1602204952?pwd=aWRUOUFud2VQcG84T3pOYk5abU9ZZz09.

Join by Phone (Audio Only): 1–833–435–1820 USA Toll Free; Meeting ID: 160 220 4952.

FOR FURTHER INFORMATION CONTACT: Victoria Moreno, DFO, at *vmoreno@usccr.gov* or by phone at 434–515–0204.

SUPPLEMENTARY INFORMATION: Members of the public may listen to the discussions through the above call-in numbers (audio only) or online registration links (audio/visual). An open comment period at each meeting will be provided to allow members of the public to make a statement as time allows. Callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Individuals who are deaf, deafblind, and/or hard of hearing may also follow the proceedings by first calling the Federal Relay Service at 1–800–877–8339 and providing the Service with the conference call number and meeting ID number.

Members of the public are entitled to submit written comments; the comments must be received in the regional office within 30 days following the meetings. Written comments may be emailed to Victoria at *vmoreno@usccr.gov.*

Records generated from this meeting may be inspected and reproduced at the Regional Programs Unit Office, as they become available, both before and after the meetings. Records of the meetings will be available via *www.facadatabase.gov* under the Commission on Civil Rights, Nebraska Advisory Committee link. Persons interested in the work of this Committee are directed to the Commission's website, *http://www.usccr.gov,* or may contact the Regional Programs Unit at the above email or street address.

BILLING CODE P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Florida Advisory Committee to the U.S. Commission on Civil Rights

AGENCY: U.S. Commission on Civil Rights.

ACTION: Notice of public meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act, that the Florida Advisory Committee (Committee) to the U.S. Commission on Civil Rights will hold a public meeting via Zoom at 2:30 p.m. ET on Monday, March 18, 2024. The purpose of the meeting is to discuss the Committee's project proposal on voting rights in the state.

DATES: Monday, March 18, 2024, from 2:30 p.m.–3:30 p.m. eastern time.

ADDRESSES: The meeting will be held via Zoom Webinar.

Registration Link (Audio/Visual): https://www.zoomgov.com/s/1616259973.

Join by Phone (Audio Only): (833) 435–1820 USA Toll-Free; Meeting ID: 161 625 9973.

FOR FURTHER INFORMATION CONTACT: Melissa Wojnaroski, Designated Federal Officer, at *mwojnaroski@usccr.gov* or (202) 618–4158.

SUPPLEMENTARY INFORMATION: This committee meeting is available to the public through the registration link above. Any interested member of the public may listen to the meeting. An open comment period will be provided to allow members of the public to make a statement as time allows. Per the Federal Advisory Committee Act, public minutes of the meeting will include a list of persons who are present at the meeting. If joining via phone, callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Closed captioning will be available. Individuals with disabilities who would like to request additional accommodations should email *lschiller@usccr.gov* at least 10 business days prior to the meeting to make their request.

Members of the public are entitled to submit written comments; the comments must be received in the regional office within 30 days following the meeting. Written comments may be emailed to Liliana Schiller at *lschiller@usccr.gov.* Persons who desire additional information may contact the Regional Programs Coordination Unit at (312) 353–8311.

Records generated from this meeting may be inspected and reproduced at the Regional Programs Coordination Unit Office, as they become available, both before and after the meeting. Records of the meetings will be available via *www.facadatabase.gov* under the Commission on Civil Rights, Florida Advisory Committee link. Persons interested in the work of this Committee are directed to the Commission's website, *http://www.usccr.gov,* or may contact the Regional Programs Coordination Unit at *lschiller@usccr.gov.*

BILLING CODE P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the U.S. Virgin Islands Advisory Committee to the U.S. Commission on Civil Rights

AGENCY: U.S. Commission on Civil Rights.

ACTION: Notice of virtual business meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act, that the U.S. Virgin Islands Advisory Committee (Committee) to the U.S. Commission on Civil Rights will hold a public meeting via Zoom. The purpose of the meeting is to discuss, plan, and vote, as needed, on matters related to follow-up to the Committee's inaugural civil rights report.

DATES: Thursday, Febraury 29, 2024, from 11 a.m.–12:30 p.m. Atlantic time.

ADDRESSES: The meeting will be held via Zoom.

Registration Link (Audio/Visual): https://bit.ly/481g76n.

Join by Phone (Audio Only): 1–833–435–1820 USA Toll Free; Webinar ID: 160 253 9119#.

FOR FURTHER INFORMATION CONTACT: David Barreras, Designated Federal Officer, at *dbarreras@usccr.gov* or 1–202–656–8937.

SUPPLEMENTARY INFORMATION: This Committee meeting is available to the public through the registration link above. Any interested member of the public may attend this meeting. An open comment period will be provided to allow members of the public to make oral statements as time allows. Pursuant to the Federal Advisory Committee Act, public minutes of the meeting will include a list of persons who are present at the meeting. If joining via phone, callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Closed captioning is available by selecting ''CC'' in the meeting platform. To request additional accommodations, please email *svillanueva@usccr.gov* at least 10 business days prior to the meeting.

Members of the public are entitled to submit written comments; the comments must be received in the regional office within 30 days following the scheduled meeting. Written comments may be emailed to Sarah Villanueva at *svillanueva@usccr.gov.* Persons who desire additional information may contact the Regional Programs Coordination Unit at 1–202–656–8937.

Records generated from this meeting may be inspected and reproduced at the Regional Programs Coordination Unit Office, as they become available, both before and after the meeting. Records of the meetings will be available via *www.facadatabase.gov* under the Commission on Civil Rights, U.S. Virgin Islands Advisory Committee link. Persons interested in the work of this Committee are directed to the Commission's website, *http://www.usccr.gov,* or may contact the Regional Programs Coordination Unit at *svillanueva@usccr.gov.*

BILLING CODE P

DEPARTMENT OF COMMERCE

Census Bureau

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Building Permits Survey Program

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on December 1, 2023 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: U.S. Census Bureau, Department of Commerce.

Title: Building Permits Survey Program.

OMB Control Number: 0607–0094.

Form Number(s): C–404, C–411.

Type of Request: Regular submission, Request for a Revision of a Currently Approved Collection.

Number of Respondents: C–404—19,842; C–411—3,150.

Average Hours per Response: C–404—9 minutes; C–411—15 minutes.

Burden Hours: C–404—17,229; C–411—788.

Needs and Uses: The Census Bureau is requesting a revision of the current Office of Management and Budget clearance for the surveys known as the Survey of Residential Building or Zoning Permit Systems (C–411) and the Report of Building or Zoning Permits Issued for New Privately-Owned Housing Units (C–404) also known as BPS. The C–411 and the C–404 are related collections sharing the same universe called the Active Governments File (AGF) universe. The C–411 is utilized to update the permit issuing status of all jurisdictions in the AGF. The C–404 is utilized to collect both monthly and annual data on the totals of new housing unit permits issued. These two surveys, currently cleared separately under control numbers 0607–0350 and 0607–0094, respectively, will therefore be combined under one control number and will be collectively called the Building Permits Survey Program.

The Census Bureau produces statistics used to monitor activity in the large and dynamic construction industry. Given the importance of this industry, several of the statistical series have been designated by the Office of Management and Budget as Principal Economic Indicators. These statistics help state and local governments and the federal government, as well as private industry, to analyze this important sector of the economy.

The BPS, and the Survey of Housing Starts, Sales, and Completions (OMB number 0607–0110), also known as Survey of Construction (SOC) provide widely used measures of construction activity, including the principal economic indicators, New Residential Construction and New Home Sales. Data from the BPS and SOC are used by the Bureau of Economic Analysis (BEA) in the calculation of estimates of the Residential Fixed Investment portion of the Nation's Gross Domestic Product (GDP). In addition, data from the BPS are used by the Census Bureau in the calculation of annual population estimates; these estimates are widely used by government agencies to allocate

funding and other resources to local governments.

The key estimates from the C–404 are the numbers of new housing units authorized by building permits; data are also collected on the valuation of the housing units. Form C–404 specifically collects information on changes to the geographic coverage of the permit-issuing place, the number and valuation of new residential housing units authorized by building permits, and additional information on residential permits valued at $2 million or more, including, but not limited to, site address and type of building. The form is titled ''Report of Building or Zoning Permits Issued for New Privately-Owned Housing Units''.

Two Principal Economic Indicators are directly dependent on the key estimates from the BPS. For New Residential Construction (which includes Housing Units Authorized by Building Permits, Housing Starts, and Housing Completions), form C–404 is used to collect the estimate for Housing Units Authorized by Building Permits. For New Residential Construction and Sales, the number of housing units authorized by building permits is a key component utilized in the estimation of housing units started, completed, and sold.

Beginning January 2022, the U.S. Census Bureau changed the methodology for the tabulation of the Building Permit Survey. The methodology changed from a representative sample to a cutoff sample based on recent permit activity by jurisdiction. Published data from the survey can be found on the Census Bureau's website at *www.census.gov/permits.*

The Census Bureau primarily collects these data through the Centurion internet Reporting System, by mail using the Form C–404 or by telephone. Some data are also collected via receipt of proprietary electronic files or mailed printouts for jurisdictions who have established reporting arrangements which allow them to submit their responses using their own file format.

The Census Bureau uses Form C–404 to collect data that provides estimates of the number and valuation of new residential housing units authorized by building permits. There are roughly 20,000 permit issuing jurisdictions in the United States. Slightly less than one-half of those permit offices are requested to report monthly. The remaining offices are surveyed annually. We use the data, which is a component of The Conference Board Leading Economic Index, to estimate the number of housing units authorized, started, completed, and sold (single-family only). In addition, the Census Bureau uses the detailed geographic data in the development of annual population estimates; those population estimates are used by government agencies to allocate funding and other resources to local areas, inform policy, and aid in city planning. Policymakers, planners, businesses, and others use the detailed geographic data to monitor growth and plan for local services, and to develop production and marketing plans. The BPS is the only source of statistics on residential construction for states, counties, and smaller geographic areas. Since building permits are public records, we can release data for individual jurisdictions, and annual data are published for every permit-issuing jurisdiction.

The Census Bureau uses Form C–411 to obtain information from state and local building permit officials needed for updating the universe of permit-issuing places, which serves as the sampling frame for the BPS and the SOC. The accuracy of the Census Bureau statistics regarding the amount of construction authorized depends on data supplied by building and zoning officials throughout the country.

The questions on Form C–411 pertain to the legal requirements for issuing building or zoning permits in local jurisdictions. Information is obtained on such items as geographic coverage and types of construction for which permits are issued.

One of three variants of Form C–411 is sent to a jurisdiction when the Census Bureau needs to verify whether a new permit system has been established or an existing one has changed. This is based on the length of time since the jurisdiction last verified their permit issuing status, or on information the Census Bureau obtains from a variety of sources including survey respondents, regional planning councils, and data from the Census Bureau's Geography Division on newly incorporated jurisdictions. While the C–411 was previously a mailed paper form, the Census Bureau plans to add this collection to the standard online collection instrument (Centurion) in 2024.

There are three versions of the form:

- C–411(V) for verification of coverage for jurisdictions with existing permit systems,
- C–411(M) for municipalities where a new permit system may have been established,
- C–411(C) for counties where new permit systems may have been established.

Prior to 2022, the universe of permit issuing places was updated every 10 years. In 2012 and every ten years prior, we mailed the survey to approximately 20,000 jurisdictions that were designated in our records as non-permit issuing jurisdictions, or permit issuing jurisdictions that needed verification of coverage. In processing the 2012 survey, it was determined that it was too burdensome to the Census Bureau's staff to process all 20,000 jurisdictions in the same year. As a result, the process was spread out into 5-year intervals, starting with the mailing in 2017. In 2017, we mailed 3,500 priority jurisdictions of the potential 20,000, with the intent of mailing another priority group in 2022 to complete the 10-year collection cycle. The planned 2022 mailing was deferred. Beginning January 2023, we began updating the universe annually and as a result, we can now incorporate more frequent updates to non-permit issuing jurisdictions. Beginning in 2024 we expect to attempt to collect information from 3,150 jurisdictions annually using either the C–411(C) or C–411(M) regarding the existence of new permit-issuing systems, or to resolve coverage questions or issues concerning existing permit-issuing systems using the C–411(V). This will allow us to attempt collection on all 20,000 jurisdictions approximately every seven years, on a rotating basis.

Based on previous collections, we anticipate approximately a 50% response rate to the mailed C–411 forms. This will be supplemented with existing known information from the C–404 monthly and annual collection, individual follow-ups with jurisdictions by email or phone, and publicly available information to maintain coverage for the universe of permit issuing places. We anticipate having accurate and up to date coverage for over 85% of the annually targeted jurisdictions as a result of these combined operations.

Failure to maintain the universe of permit-issuing places would result in deficient samples and inaccurate statistics. This in turn jeopardizes the accuracy of the Census Bureau's construction-related Principal Federal Economic Indicators. These indicators are closely monitored by the Board of Governors of the Federal Reserve System and other economic policy makers because of the sensitivity of the housing industry to changes in interest rates.

Frequency: C–404—Monthly and annually; C–411—Annually.

Respondent's Obligation: Voluntary.

Legal Authority: Title 13 U.S.C., Sections 131 and 182.

This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the collection or the OMB Control Number 0607–0094.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

BILLING CODE 3510–07–P

DEPARTMENT OF COMMERCE

Bureau of Industry and Security

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Request for Appointment of a Technical Advisory Committee

AGENCY: Bureau of Industry and Security, Department of Commerce.

ACTION: Notice of Information Collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before April 9, 2024.

ADDRESSES: Interested persons are invited to submit comments by email to Mark Crace, IC Liaison, Bureau of Industry and Security, at *mark.crace@bis.doc.gov* or to *PRAcomments@doc.gov.* Please reference OMB Control Number 0694–0100 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Mark Crace, IC Liaison, Bureau of Industry and Security, phone 202–482–8093 or by email at *mark.crace@bis.doc.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

The Technical Advisory Committees (TACs) were established to advise and assist the U.S. Government on export control matters. In managing the operations of the TACs, the Department of Commerce is responsible for implementing the policies and procedures prescribed in the Federal Advisory Committee Act. The Bureau of Industry and Security provides technical and administrative support for the TACs, such as scheduling a conference room, publishing TAC meeting notices in the **Federal Register**, circulating an agenda, copying documents, etc. The TACs advise the government on proposed revisions to export control lists, licensing procedures, assessments of the foreign availability of controlled products, and export control regulations.

II. Method of Collection

Supplement No. 2 to Part 730 of the Export Administration Regulations, states that any producers of articles, materials, or supplies, including technology, software, and other information, that are subject to export controls, or are being considered for such controls because of their significance to the national security of the United States, may request (via a letter or an attachment to an email) the Secretary of Commerce to establish a technical advisory committee. Such requests are sent to the Assistant Secretary of Export Administration.

III. Data

OMB Control Number: 0694–0100.

Form Number(s): None.

Type of Review: Regular submission, extension of a current information collection.

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 1.

Estimated Time per Response: 5 hours.

Estimated Total Annual Burden Hours: 5.

Estimated Total Annual Cost to the Public: 0.

Respondent's Obligation: Voluntary.

Legal Authority: Section 4812(b)(7) and 4814(b)(1)(B) of the Export Control Reform Act (ECRA).

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

BILLING CODE 3510–33–P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–570–919]

Electrolytic Manganese Dioxide From the People's Republic of China: Final Results of Antidumping Duty Administrative Review; 2021–2022

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) continues to determine that the sole respondent under review, Duracell (China) Limited (DCL), is not eligible for a separate rate and is therefore a part of the China-wide entity. The period of review (POR) is

October 1, 2021, through September 30, 2022.

DATES: Applicable February 9, 2024.

FOR FURTHER INFORMATION CONTACT: Krisha Hill or Luke Caruso, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4037 or (202) 482–2081, respectively.

SUPPLEMENTARY INFORMATION:

Background

On October 18, 2023, Commerce published in the **Federal Register** the preliminary results of the 2021–2022 administrative review of the antidumping duty order on electrolytic manganese dioxide from the People's Republic of China (China).[1] We invited interested parties to comment on the *Preliminary Results.* No parties commented on the *Preliminary Results.* Accordingly, the *Preliminary Results* remain unchanged in the final results of this review, and no decision memorandum accompanies this notice.

Scope of the Order [2]

The merchandise covered by the *Order* includes all manganese dioxide (MnO2) that has been manufactured in an electrolysis process, whether in powder, chip, or plate form. Excluded from the scope are natural manganese dioxide (NMD) and chemical manganese dioxide (CMD). The merchandise subject to the *Order* is classified in the Harmonized Tariff Schedule of the United States (HTSUS) at subheading 2820.10.00.00. While the HTSUS subheading is provided for convenience and customs purposes, the written description of the scope of the *Order* is dispositive.

Final Results of Review

Consistent with the *Preliminary Results,* we continue to determine that the sole respondent under review, DCL, did not establish its eligibility for a separate rate and is part of the China-wide entity.

Disclosure

Because Commerce received no comments on the *Preliminary Results,* we have not modified our analysis and no decision memorandum accompanies this **Federal Register** notice. We are adopting the *Preliminary Results* as the final results of this review. Consequently, there are no calculations to disclose in accordance with 19 CFR 351.224(b) for these final results.

Assessment Rates

Pursuant to section 751(a)(2)(C) of the Act and 19 CFR 351.212(b), Commerce has determined, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries of subject merchandise in accordance with the final results of this review. No earlier than 35 days after the date of publication of this notice in the **Federal Register**, Commerce intends to instruct CBP to liquidate any entries of subject merchandise from DCL that entered the United States during the POR at the China-wide rate (*i.e.,* 149.92 percent). If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of this notice in the **Federal Register** for all shipments of subject merchandise from China entered, or withdrawn from warehouse, for consumption on or after the publication date of this notice, as provided by section 751(a)(2)(C) of the Act: (1) for any previously investigated or reviewed Chinese or non-Chinese exporter that has a separate rate, the cash deposit rate will continue to be the exporter's existing cash deposit rate; (2) for all Chinese exporters of subject merchandise that do not have a separate rate, including DCL, the cash deposit rate will be equal to the dumping margin assigned to the China-wide entity, which is 149.92 percent; [3] and (3) for all non-Chinese exporters of subject merchandise that do not have a separate rate, the cash deposit rate will be equal to the dumping margin applicable to the Chinese exporter(s) that supplied that non-Chinese exporter. These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this POR. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Administrative Protective Order

This notice also serves as the only reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation subject to sanction.

Notification to Interested Parties

We are issuing and publishing the final results of this review in accordance with sections 751(a)(1) and 777(i) of the Act, and 19 CFR 351.213(h) and 351.221(b)(5).

Dated: February 2, 2024.

Abdelali Elouaradia,

Deputy Assistant Secretary for Enforcement and Compliance.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–570–133]

Certain Metal Lockers and Parts Thereof From the People's Republic of China: Final Results of Antidumping Duty Administrative Review; 2021–2022

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) finds that Zhejiang Xingyi Metal Products Co., Ltd. (ZXM)/Xingyi Metalworking Technology (Zhejiang) Co., Ltd. (XMT) (collectively, ZXM/XMT) and Hangzhou Evernew Machinery & Equipment Company Limited/Zhejiang Yinghong Metalworks Co., Ltd. (Hangzhou Evernew) made sales of certain metal lockers and parts thereof (metal lockers) from the People's Republic of China (China) during the period of review (POR), February 11, 2021, through July 31, 2022.

DATES: Applicable February 9, 2024.

FOR FURTHER INFORMATION CONTACT: Deborah Cohen or Matthew Palmer, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4521 or (202) 482–1678, respectively.

SUPPLEMENTARY INFORMATION:

Background

On September 8, 2023, Commerce published the *Preliminary Results* in the **Federal Register**.[1] On December 19, 2023, Commerce extended the deadline of the final results of this administrative review to February 6, 2024 in accordance with section 751(a)(3)(A) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.213(h)(2).[2] For a complete description of the events that followed the *Preliminary Results, see* the Issues and Decision Memorandum.[3] Commerce conducted this review in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act).

Scope of the Order [4]

The products covered by the *Order* are metal lockers from China. For a complete description of the *Order, see* the Issues and Decision Memorandum.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs are addressed in the Issues and Decision Memorandum. A list of the issues that parties raised and to which we responded in the Issues and Decision Memorandum is attached as the appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Changes Since the Preliminary Results

Based on a review of the record and comments received from interested parties regarding the *Preliminary Results,* we made certain changes to the margin calculations for Hangzhou Evernew and ZXM/XMT.[5]

Rate for Non-Examined Separate Rate Respondents

In the *Preliminary Results,* we determined that three non-individually examined companies are eligible for separate rates in this administrative review.[6] We did not receive any comments or argument since the issuance of the *Preliminary Results* that provide a basis for reconsideration of this determination. Therefore, for these final results, we continue to find that Kunshan Dongchu Precision Machinery Co., Ltd., Tianjin Jia Mei Metal Furniture Ltd., and Zhejiang Focus-On Import & Export Co., Ltd. qualify for a separate rate in this review.

The Act and Commerce's regulations do not address the establishment of a separate rate to be applied to companies not selected for individual examination when Commerce limits its examination in an administrative review pursuant to section 777A(c)(2) of the Act. Generally, Commerce looks to section 735(c)(5) of the Act, which provides instructions for calculating the all-others rate in an investigation, for guidance when calculating the rate for separate-rate respondents which Commerce did not examine individually in an administrative review. Section 735(c)(5)(A) of the Act states that the all-others rate should be calculated by averaging the weighted-average dumping margins calculated for individually-examined respondents, excluding dumping margins that are zero, *de minimis,* or based entirely on facts available. Accordingly, for the final results of this review, we are assigning to the non-selected separate rate respondents an estimated weighted-average dumping margin based on the average of Hangzhou Evernew and ZXM/XMT weighted-average dumping margins weighted by their publicly available ranged U.S. sales values.

Final Results of Review

Commerce determines that the following estimated weighted-average dumping margins exist for the period February 11, 2021, through July 31, 2022:

Exporter	Weighted-average dumping margin (percent)
Zhejiang Xingyi Metal Products Co., Ltd./Xingyi Metalworking Technology (Zhejiang) Co., Ltd	59.52
Hangzhou Evernew Machinery & Equipment Company Limited/Zhejiang Yinghong Metalworks Co., Ltd.[7]	190.01
Kunshan Dongchu Precision Machinery Co., Ltd	75.08
Tianjin Jia Mei Metal Furniture Ltd	75.08
Zhejiang Focus-On Import & Export Co., Ltd	75.08

Disclosure

Commerce intends to disclose the calculations performed in connection with these final results to interested parties within five days of the date of publication of this notice, in accordance with 19 CFR 351.224(b).

Assessment Rates

Pursuant to section 751(a)(2)(C) of the Act and 19 CFR 351.212(b), Commerce determined, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries of subject merchandise in accordance with the final results of this review. Pursuant to 19 CFR 351.212(b)(1), where ZXM/XMT and Hangzhou Evernew reported the entered values of their U.S. sales, we calculated importer-specific antidumping duty assessment rates by aggregating the total amount of dumping calculated for the examined sales of each importer and dividing each of these amounts by the total entered value associated with those sales. Where ZXM/XMT and Hangzhou Evernew did not report entered value, we calculated a per-unit assessment rate for each importer by dividing the total amount of dumping calculated for the examined sales made to that importer by the total quantity associated with those sales. To determine whether an

[1] *See Certain Metal Lockers and Parts Thereof from the People's Republic of China: Preliminary Results and Partial Rescission of Antidumping Duty Administrative Review,* 88 FR 62061 (September 8, 2023) (*Preliminary Results*), and accompanying Preliminary Decision Memorandum (PDM).

[2] *See* Memorandum, ''Extension of Deadline for Final Results of Antidumping Duty Administrative Review,'' dated December 19, 2023.

[3] *See* Memorandum, ''Issues and Decision Memorandum for the Final Results of the Administrative Review of the Antidumping Duty Order on Certain Metal Lockers and Parts Thereof from the People's Republic of China; 2021–2022,'' dated concurrently with this notice (Issues and Decision Memorandum).

[4] *See Certain Metal Lockers and Parts Thereof from the People's Republic of China: Antidumping and Countervailing Duty Orders,* 86 FR 46826 (August 20, 2021) (*Order*).

[5] For a full description of these changes, *see* the Issues and Decision Memorandum.

[6] *See Preliminary Results* PDM at the ''Separate Rate Determination'' section for further details.

[7] We preliminarily found that Hangzhou Evernew and its producer, Zhejiang Yinghong Metalworks Co., Ltd., are affiliated, pursuant to section 771(33)(F) of the Act and 19 CFR 351.102(b)(3) and should be treated as a single entity pursuant to 19 CFR 351.401(f)(1) for the purposes of the *Preliminary Results. See Preliminary Results* PDM at the ''Single Entity Analysis'' section for further discussion of the preliminary collapsing determination. We received no comments from interested parties on this preliminary determination; thus, we continue to find these companies should be treated as a single entity for purposes of these final results.

importer-specific, per-unit assessment rate is *de minimis,* in accordance with 19 CFR 351.106(c)(2), we also calculated an importer-specific *ad valorem* ratio based on estimated entered values. Where either a respondent's weighted-average dumping margin is zero or *de minimis* within the meaning of 19 CFR 351.106(c)(1), or an importer-specific assessment rate is zero or *de minimis,* we will instruct CBP to liquidate the appropriate entries without regard to antidumping duties. Pursuant to a refinement in our non-market economy practice, for sales that were not reported in the U.S. sales data submitted by ZXM/XMT and Hangzhou Evernew during this review, we will instruct CBP to liquidate entries associated with those sales at the rate for the China-wide entity.[8]

For the respondents which were not selected for individual examination in this administrative review, and which qualified for a separate rate, the assessment rate will be equal to the weighted-average dumping margin assigned to them for the final results.

Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of these final results. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of administrative review for all shipments of subject merchandise entered, or withdrawn from warehouse, for consumption on, or after, the publication date of the final results of review, as provided for by section 751(a)(2)(C) of the Act: (1) the cash deposit rates for the companies identified above in the ''Final Results of Review'' section will be equal to the company-specific weighted-average dumping margin established in the final results of this administrative review; (2) for a previously investigated or reviewed exporter of subject merchandise not listed in the final results of review that has a separate rate, the cash deposit rate will continue to be the exporter's existing cash deposit rate; (3) for all Chinese exporters of subject merchandise that do not have a separate rate, the cash deposit rate will be the cash deposit rate established for the China-wide entity, *i.e.,* 322.25 percent; [9] and (4) for all exporters of subject merchandise that are not located in China and that are not eligible for a separate rate, the cash deposit rate will be the rate applicable to the China exporter(s) that supplied that non-Chinese exporter. These deposit requirements, when imposed, shall remain in effect until further notice.

As discussed in the *Preliminary Results,* we preliminarily determined that the record no longer supports a finding that ZXM should be collapsed with XMT subsequent to January 13, 2022, as ZXM ceased involvement with the production and/or exportation of subject merchandise prior to the POR, was acquired by an unrelated third-party a month prior, and all indicia of affiliation and/or control between the two companies ceased as of that date.[10] Accordingly, we continue to review the single entity for the February 11, 2021, through January 13, 2022, segment of this review and for the purposes of subsequent assessment. This finding has not changed for the final results as no new evidence to the contrary has been timely placed on the record. Therefore, because XMT remains the only component of the former ZXM/XMT entity involved in the exportation of subject merchandise in the final results, we will assign the cash deposit rate only to XMT as the exporter, and instruct CBP to discontinue the ZXM/XMT combination rate.

Notification to Importers

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping and/or countervailing duties prior to liquidation of the relevant entries during this POR. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping and/or countervailing duties occurred and the subsequent assessment of double antidumping duties and/or an increase in the amount of antidumping duties by the amount of the countervailing duties.

Administrative Protective Order

This notice also serves as the final reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

Notification to Interested Parties

We are issuing and publishing this notice in accordance with sections 751(a)(l) and 777(i)(l) of the Act, 19 CFR 351.221(b)(5) and 19 CFR 351.213(h)(1).

Dated: February 2, 2024.

Abdelali Elouaradia,

Deputy Assistant Secretary for Enforcement and Compliance.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before April 9, 2024.

ADDRESSES: Interested persons are invited to submit written comments by mail to Liz Reinhart, Management Analyst, National Institute of Standards and Technology, at *elizabeth.reinhart@nist.gov* or *PRAcomments@doc.gov.* Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Cierra Bean, Business Operations Specialist, CHIPS Program Office, at *askchips@chips.gov* or 1–202–815–2677.

SUPPLEMENTARY INFORMATION:

I. Abstract

The CHIPS Incentives Program is authorized by title XCIX—Creating Helpful Incentives to Produce Semiconductors for America of the William M. (Mac) Thornberry National Defense Authorization Act for Fiscal Year 2021 (Pub. L. 116–283, referred to as the CHIPS Act or Act), as amended by the CHIPS Act of 2022 (Division A of Pub. L. 117–167). The CHIPS Incentives Program is administered by the CHIPS Program Office (CPO) within the National Institute of Standards and Technology (NIST) of the United States Department of Commerce (Department).

On February 28, 2023, the CHIPS Program Office (CPO) released a notice of funding opportunity (NOFO) to solicit applications for CHIPS Incentives that will support investments in the construction, expansion, and modernization of (a) commercial facilities in the United States for the front- and back-end fabrication of leading-edge, current-generation, and mature-node semiconductors; (b) commercial facilities in the United States for wafer manufacturing; and (c) commercial facilities in the United States for materials used to manufacture semiconductors and semiconductor manufacturing equipment, provided that the capital investment, equals or exceeds $300 million.

As stated on p. 14 of the NOFO, ''[t]he Department will engage outside advisors, consultants, and/or attorneys at the due diligence stage. . . .'' The information request seeks information from potential advisors, consultants, and/or attorneys to determine their qualifications to provide advice on transactions under the NOFO in fields such as construction management, corporate investigations and risk, finance and audits, insurance, market reviews, legal, real estate, and other technical issues.

II. Method of Collection

The CPO intends to collect information from applicants through email, although other methods, *e.g.,* interviews, etc., may also be leveraged.

III. Data

OMB Control Number: 0693–XXXX.

Form Number(s): None.

Type of Review: Regular submission.

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 200.

Estimated Time per Response: 8 hours.

Estimated Total Annual Burden Hours: 1,600 hours.

Estimated Total Annual Cost to Public: $75,750.

Respondent's Obligation: Mandatory to be retained as an outside advisor.

Legal Authority: CHIPS Act of 2022 (Division A of Pub. L. 117–167) (the Act).

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

BILLING CODE 3510–13–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; West Coast Region Groundfish Trawl Fishery Monitoring and Catch Accounting Program

AGENCY: National Oceanic & Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before April 9, 2024.

ADDRESSES: Interested persons are invited to submit written comments to Adrienne Thomas, NOAA PRA Officer, at *Adrienne.thomas@noaa.gov.* Please reference OMB Control Number 0648–0619 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection

activities should be directed to Matt Dunlap, Fishery Policy Analyst, West Coast Regional Office, 7600 Sand Point Way NE, Seattle, WA 98115, (206) 526–6119, or *matthew.dunlap@noaa.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

This submission is a renewal of an existing package. The program was developed through Amendment 20 to the Groundfish Fishery Management Plan (FMP), under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*) and consists of an individual fishing quota (IFQ) program for the shore based trawl fleet (including whiting and non-whiting fisheries); and cooperative (coop) programs for the at-sea mothership (MS) and catcher/processor (C/P) trawl fleets (whiting only). As part of its fishery management responsibilities, the National Marine Fisheries Service (NMFS) collects information to determine the amount and type of catch taken by fishing vessels. This collection supports monitoring requirements including scale test requirements for first receivers in the Pacific Coast groundfish fishery's shore based individual fishery quota (IFQ) program; and mothership and catcher/processors in the at-sea whiting fisheries. The collection also supports permits for businesses that provide certified observer and certified catch monitor services. The respondents are principally shore-based first receivers, catch monitor and observer service providers, mothership processors, and catcher/processors which are companies/partnerships.

II. Method of Collection

This collection utilizes both electronic and paper forms, depending on the specific item. Methods of submittal include email of electronic forms, and mail and facsimile transmission of paper forms. Additionally, this collection utilizes interviews for some information collection and phone calls for transmission of other information.

III. Data

OMB Control Number: 0648–0619.

Form Number(s): None.

Type of Review: Regular submission (extension of a current information collection).

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 150.

Estimated Time Per Response: For 2 existing observer providers: 2 hours for preparation and submission of the annual observer provider permit renewal application. For 1 new observer provider: 10 hours for observer provider permit application preparation and submission. For 1 observer provider: 4 hours for a written response and submission of an appeal if an observer provider permit is denied. For 45 catch monitors: 1 hour for submission of qualifications to work as a catch monitor. For 5 catch monitors: 4 hours for a written response and submission of an appeal if a catch monitor permit is denied. For 16 vessels in the Mothership or Catcher/Processor fleet, 30 minutes or less for satisfying requirements for use of at-sea scales, including daily testing reports (30 minutes), daily catch and cumulative weight reports (10 minutes), audit trail (1 minute), calibration log (2 minutes), and fault log (3 minutes).

Estimated Total Annual Burden Hours: 441 hours (83 hours for observer and catch monitor providers and 358 hours for Motherships or Catcher/Processors).

Estimated Total Annual Cost to Public: $3,678. Annualized capital costs for computer hardware are $3,510. Annualized reporting/recordkeeping costs are $168.

Respondent's Obligation: Mandatory.

Legal Authority: The regulations at §§ 660.140(h), 660.150(j), and 660.160(g), specify observer coverage requirements for trawl vessels and define the responsibilities for observer providers, including reporting requirements. Regulations at § 660.140(i) specify requirements for catch monitor coverage for first receivers. Regulations at § 660.15 specify equipment, performance and technical requirements for scales used to weigh catch at sea.

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

[RTID 0648–XD633]

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to the Coastal Virginia Offshore Wind Commercial Project Offshore of Virginia

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of Letter of Authorization.

SUMMARY: In accordance with the Marine Mammal Protection Act (MMPA) as amended, and implementing regulations, notification is hereby given that a Letter of Authorization (LOA) has been issued to the Virginia Electric and Power Company, doing business as Dominion Energy Virginia (Dominion Energy), for the taking of marine mammals incidental to the construction of the Coastal Virginia Offshore Wind Commercial (CVOW–C) Project (hereafter known as the ''CVOW–C Project'' or the ''Project'').

DATES: The LOA is effective from February 5, 2024 through February 4, 2029.

ADDRESSES: The LOA and supporting documentation are available online at: *https://www.fisheries.noaa.gov/permit/incidental-take-authorizations-under-marine-mammal-protection-act.* In case of problems accessing these documents, please call the contact listed below (see **FOR FURTHER INFORMATION CONTACT**).

FOR FURTHER INFORMATION CONTACT: Kelsey Potlock, Office of Protected Resources, NMFS, (301) 427–8401.

SUPPLEMENTARY INFORMATION:

Background

The MMPA prohibits the ''take'' of marine mammals, with certain exceptions. Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made, regulations are promulgated (when applicable), and public notice and an opportunity for public comment are provided.

An authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for taking for subsistence uses (where relevant). If such findings are made, NMFS must prescribe the permissible methods of taking; ''other means of effecting the least practicable adverse impact'' on the affected species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of the species or stocks for taking for certain subsistence uses (referred to as ''mitigation''); and requirements pertaining to the monitoring and reporting of such takings. The MMPA defines ''take'' to mean harass, hunt, capture, or kill, or attempt to harass, hunt, capture, or kill any marine mammal (16 U.S.C. 1362(13); 50 CFR 216.103). Level A harassment is defined as any act of pursuit, torment, or annoyance which has the potential to injure a marine mammal or marine mammal stock in the wild (16 U.S.C. 1362(18); 50 CFR 216.3). Level B harassment is defined as any act of pursuit, torment, or annoyance which has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering (16 U.S.C. 1362(18); 50 CFR 216.3). Section 101(a)(5)(A) of the MMPA and the implementing regulations at 50 CFR part 216, subpart I authorize NMFS to propose and, if appropriate, promulgate regulations and issue associated LOA(s). NMFS promulgated regulations on January 23, 2024 (89 FR 4370) for the taking of marine mammals incidental to the construction of the CVOW–C Project offshore of Virginia. The LOA authorizes Dominion Energy and those persons it authorizes or funds to conduct activities on its behalf to take marine mammals incidental to specified activities during the construction of the Project and requires them to implement mitigation, monitoring, and reporting requirements.

Summary of Request

On January 23, 2024, NMFS promulgated a final rule (89 FR 4370) responding to a request from Dominion Energy for authorization to take marine mammals (21 species comprising 22 stocks) by Level B harassment (all 22 stocks) and by Level A harassment (7 stocks) incidental to construction activities occurring in Federal and State waters off of Virginia, specifically within and around the Bureau of Ocean Energy Management (BOEM) Commercial Lease of Submerged Lands for Renewable Energy Development on the Outer Continental Shelf (OCS) Lease Area OCS–A 0483 (Lease Area) and along an export cable route to sea-to-shore transition points (collectively referred to as the ''Project Area''), over the course of 5 years (February 5, 2024 through February 4, 2029). The final rule included the following specified activities: the installation of 176 wind turbine generators (WTGs) on monopile foundations (through a maximum of 183 separate piling events) and 3 offshore substations (OSSs) on jacket foundations using pin piles by vibratory and impact pile driving; nearshore cable landfall work comprising of the installation and subsequent removal of nearshore temporary cofferdams by vibratory pile driving and the installation and subsequent removal of temporary goal posts by impact pile driving at the sea-to-shore transition point located at the State Military Reservation in Virginia Beach, Virginia; high-resolution geophysical (HRG) marine site characterization surveys using active acoustic sources; fishery and ecological monitoring surveys; the placement of scour protection; the installation of the export cable route from OSSs to shore-based converter stations and inter-array cables between turbines by trenching, laying, and burial activities; vessel transit within the specified geographical region to transport crew, supplies, and materials; and WTG operation.

Marine mammals exposed to elevated noise levels during foundation impact pile driving may be taken by Level A harassment, and marine mammals exposed to elevated noise levels during impact and vibratory pile driving and HRG site characterization surveys may be taken by Level B harassment. No mortality or serious injury of any marine mammal is anticipated or authorized. The number of takes, by species, authorized may be found in table 1 in the LOA, which is available at *https://www.fisheries.noaa.gov/permit/incidental-take-authorizations-under-marine-mammal-protection-act.*

Authorization

In accordance with the final rule (89 FR 4370, January 23, 2024; see 50 CFR 217.296), NMFS has issued a LOA to Dominion Energy authorizing the take, by harassment, of marine mammals incidental to specified activities within the specified geographical region. As previously stated, no mortality or serious injury of any marine mammal species is anticipated or authorized. The incidental takes authorized herein are the same as those analyzed and authorized in the final rule (89 FR 4370, January 23, 2024). Takes of marine mammals will be minimized through the following planned mitigation and monitoring measures, as applicable for each specified activity: (1) implementation of spatio-temporal seasonal/time of day work restrictions; (2) use of multiple NMFS-approved Protected Species Observers (PSOs) to visually observe for marine mammals (with any detection within specifically designated zones triggering a delay or shutdown, as applicable); (3) use of NMFS-approved passive acoustic monitoring (PAM) operators to acoustically detect marine mammals, with a focus on detecting baleen whales (with any detection within designated zones triggering a delay or shutdown, as applicable); (4) implementation of clearance and shutdown zones; (5) use of soft-start upon commencement of impact pile driving and ramp-up of acoustic sources during HRG surveys; (6) use of noise attenuation technology during foundation pile driving; (7) use of situational awareness monitoring for marine mammal presence; (8) use of sound field verification monitoring; (9) use of PAM within the vessel transit corridor for Project vessels to travel over 10 knots (11.5 miles per hour); and (10) implementation of several vessel strike avoidance measures to avoid vessel strikes, including but not limited to, vessel separation zones between marine mammals and project vessels. Additionally, NMFS may modify the LOA's mitigation, monitoring, or reporting measures, based on new information. Dominion Energy is also

required to submit reports, as specified in the final rule.

Based on the findings discussed in the preamble of the final rule, NMFS has determined that the take authorized in the LOA is of small numbers, will have a negligible impact on marine mammal stocks, will not have an unmitigable adverse impact on the availability of the affected marine mammal stock for subsistence uses, and the mitigation measures provide a means of affecting the least practicable adverse impact on the affected stocks and their habitat.

Dated: February 6, 2024.

Shannon Bettridge,

Acting Director, Office of Protected Resources, National Marine Fisheries Service.

[FR Doc. 2024–02689 Filed 2–8–24; 8:45 am]

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Tornado Watch/Warning Post-Event Evaluation

AGENCY: National Oceanic & Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before April 9, 2024.

ADDRESSES: Interested persons are invited to submit written comments to Adrienne Thomas, NOAA PRA Officer, at *NOAA.PRA@noaa.gov.* Please reference OMB Control Number 0648–0797 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Dr. Makenzie Krocak, Research Scientist, NOAA NSSL, 120 David L. Boren Blvd., Norman, OK 73071, 405–325–0805, *makenzie.krocak@noaa.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

Each year over 1,000 tornadoes affect communities across the United States, yet little is known about how individuals receive, interpret, and respond to information from NOAA relating to this hazard. In fact, only a small sample of tornadoes ever receive study, and most often those are only the most violent tornadoes. No generalizable, or even relatively large-scale information on tornado forecast and warning response after real-world events exists. The NOAA National Weather Service (NWS) and National Severe Storms Laboratory (NSSL) designed the data collection instrument to allow for more routine collection of this information. Respondents include members of the United States public who have been in or near a tornado, received a tornado warning, or were in or near a strong storm that made them concerned about tornadoes. They answer questions about the ways they received, understood, and responded to information about the event, including NWS watch and warning information. This survey is delivered through a web application hosted by NSSL called Tornado Tales, available online at *https://inside.nssl.noaa.gov/tornado-tales/.*

After approval of our initial data collection instrument (that shown on the website), the OU Cooperative Institute for Severe and High-Impact Weather Research and Operations (CIWRO) and NOAA NSSL Behavioral Insights Unit carried out post-event data collections for multiple tornado events, validating the questions and identifying issues for improvement. This fieldwork led to several needed improvements, including the addition of questions about the event more broadly, changing some response types, rephrasing some questions that were interpreted too broadly, and including questions about efficacy and the availability of forecast information to individuals. While the revisions have added questions to the survey, their improved clarity should allow for faster response times per question. We estimate the time to complete the survey is five to ten minutes on average. Subject recruitment will primarily be done by NOAA NSSL and its partners advertising the survey via websites and social media outlets. In addition to these efforts, there is also the possibility that during post-storm damage assessment activities NWS forecasters may direct impacted individuals to the Tornado Tales website.

In addition to the changes to the survey instrument, researchers at NOAA NSSL and at the OU CIWRO Behavioral Insights Unit would like to conduct interviews with emergency managers, broadcast meteorologists, and members of the public after certain tornado events. These more in-depth interviews will collect similar information to the survey instrument from members of the public, broadcast meteorologists, and Emergency Management personnel who recently experienced a tornado event. The interviews will walk respondents through a timeline of events leading up to the tornado event. Researchers will use a skip-logic approach, meaning participants will only answer questions about the time periods relevant to their personal experience. The purpose of these interviews will be to more thoroughly explore how residents, broadcast meteorologists, and Emergency Managers received, understood, and responded to tornado forecasts and warnings. Given the in-person nature of these interviews, we expect them to take between 15 and 30 minutes on average.

II. Method of Collection

The method of data collection currently gathers tornado survivor stories through a web-based interface (*https://inside.nssl.noaa.gov/tornado-tales*). Specific questions in the web-based application are aimed at discovering whether and how information about potential tornado threats was received across time, including tornado watches and warnings, and what action citizens did or did not take as the event unfolded. We use a 'skip-logic' method in the survey so that individuals only answer questions that are relevant to their experiences.

The interviews will be conducted in-person or via video call with individuals who recently experienced a tornado event. Researchers will also use a skip-logic approach during the interviews such that respondents will not be asked questions that are not relevant to their experience (*i.e.,* questions about time periods before respondents received any forecast or warning information). Consent will be obtained to take notes and record the interviews.

III. Data

OMB Control Number: 0648–0797.
Form Number(s): None.

Type of Review: Revision.

Affected Public: Individuals or households.

Estimated Number of Respondents: survey: 1,200, interviews: 50.

Estimated Time per Response: survey: 5–10 minutes, interviews: 15–30 minutes.

Estimated Total Annual Burden Hours: survey: 200 hours, interviews: 25 hours.

Estimated Total Annual Cost to Public: None.

Respondent's Obligation: Voluntary.

Legal Authority:

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

BILLING CODE 3510–KE–P

COMMISSION OF FINE ARTS

Notice of Meeting

Per 45 CFR 2102.3, the next meeting of the U.S. Commission of Fine Arts is scheduled for February 15, 2024, at 9 a.m. and will be held via online videoconference. Items of discussion may include buildings, infrastructure, parks, memorials, and public art.

Draft agendas, the link to register for the online public meeting, and additional information regarding the Commission are available on our website: *www.cfa.gov.* Inquiries regarding the agenda, as well as any public testimony, should be addressed to Thomas Luebke, Secretary, U.S. Commission of Fine Arts, at the above address; by emailing *cfastaff@cfa.gov;* or by calling 202–504–2200. Individuals requiring sign language interpretation for the hearing impaired should contact the Secretary at least 10 days before the meeting date.

Dated: February 5, 2024, in Washington, DC.

Susan M. Raposa,

Technical Information Specialist.

[FR Doc. 2024–02622 Filed 2–8–24; 8:45 am]

BILLING CODE 6330–01–P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Proposed Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed deletions from the Procurement List.

SUMMARY: The Committee is proposing to delete product(s) and service(s) from the Procurement List that were furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

DATES: *Comments must be received on or before:* March 10, 2024.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 355 E Street SW, Suite 325, Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: For further information or to submit comments contact: Michael R. Jurkowski, Telephone: (703) 785–6404, or email *CMTEFedReg@AbilityOne.gov.*

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 8503 (a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the proposed actions.

Deletions

The following product(s) and service(s) are proposed for deletion from the Procurement List:

Product(s)

NSN(s)—Product Name(s):

7510–01–664–8784—DAYMAX System, 2023 Calendar Pad, Type I

7510–01–664–8815—DAYMAX System, 2023, Calendar Pad, Type II

Designated Source of Supply: Anthony Wayne Rehabilitation Ctr for Handicapped and Blind, Inc., Fort Wayne, IN

Contracting Activity: GSA/FAS ADMIN SVCS ACQUISITION BR(2, NEW YORK, NY

NSN(s)—Product Name(s):

7520–00–8LP–6520—Pen, Ballpoint, ''Navy'', White

Designated Source of Supply: The Arkansas Lighthouse for the Blind, Little Rock, AR

Contracting Activity: U S FLEET FORCES COMMAND, NORFOLK, VA

Service(s)

Service Type: Tool and MRO Sourcing and Fulfillment Services

Mandatory for: USPFO Connecticut, Army National Guard, National Guard Bureau, 360 Broad Street, Hartford, CT

Designated Source of Supply: Industries for the Blind and Visually Impaired, Inc., West Allis, WI

Contracting Activity: DEPT OF THE ARMY, W7MZ USPFO ACTIVITY CT ARNG

Service Type: Furniture Design, Configuration and Installation

Mandatory for: U.S. Department of the Interior, OS Office, Herndon Atrium Building, 381 Elden Street, Herndon, VA

Designated Source of Supply: Industries for the Blind and Visually Impaired, Inc., West Allis, WI

Contracting Activity: DEPARTMENTAL OFFICES, IBC ACQ SVCS DIRECTORATE (00004)

Service Type: Medical Transcription

Mandatory for: Department of the Navy, Naval Medical Center San Diego (NMCSD), 34800 Bob Wilson Drive, San Diego, CA

Designated Source of Supply: Lighthouse for the Blind of Houston, Houston, TX

Contracting Activity: DEPT OF THE NAVY, NAVAL MEDICAL CENTER SAN DIEGO CA

Service Type: Mailroom Operation

Mandatory for: Federal Deposit Insurance Corporation: 1910 Pacific Avenue, Dallas, TX

Designated Source of Supply: Dallas Lighthouse for the Blind, Inc., Dallas, TX

Contracting Activity: HEALTH AND HUMAN SERVICES, DEPARTMENT OF, DEPT OF HHS

Service Type: Mailroom Operation

Mandatory for: Department of Health and Human Services: Program Support Center Headquarters, Dallas, TX

Designated Source of Supply: Dallas Lighthouse for the Blind, Inc., Dallas, TX

Contracting Activity: HEALTH AND HUMAN SERVICES, DEPARTMENT OF, DEPT OF HHS

Service Type: Grounds Maintenance/ Vegetation Control

Mandatory for: US Navy, Housing and Station Areas, Naval Air Station Fallon, 4755 Pasture Road, Fallon, NV

Designated Source of Supply: PRIDE

Industries, Roseville, CA
Contracting Activity: DEPT OF THE NAVY, NAVFAC SOUTHWEST
Service Type: Janitorial/Custodial
Mandatory for: US Navy, Naval and Marine Corps Reserve Center,7117 West Plank Road, Peoria, IL
Designated Source of Supply: Community Workshop and Training Center, Inc., Peoria, IL
Contracting Activity: DEPT OF THE NAVY, NAVAL FAC ENGINEERING CMD MID LANT

Michael R. Jurkowski,

Acting Director, Business Operations.

BILLING CODE 6353–01–P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Deletions from the Procurement List.

SUMMARY: This action deletes product(s) from the Procurement List that were furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

DATES: *Date deleted from the Procurement List:* March 10, 2024.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 355 E Street SW, Suite 325, Washinton, DC 20024.

FOR FURTHER INFORMATION CONTACT: Michael R. Jurkowski, Telephone: (703) 785–6404, or email *CMTEFedReg@AbilityOne.gov.*

SUPPLEMENTARY INFORMATION:

Deletions

On 1/5/2024, the Committee for Purchase From People Who Are Blind or Severely Disabled published notice of proposed deletions from the Procurement List. This notice is published pursuant to 41 U.S.C. 8503 (a)(2) and 41 CFR 51–2.3.

After consideration of the relevant matter presented, the Committee has determined that the product(s) listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 8501–8506 and 41 CFR 51–2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in additional reporting, recordkeeping or other compliance requirements for small entities.

2. The action may result in authorizing small entities to furnish the product(s) to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501–8506) in connection with the product(s) deleted from the Procurement List.

End of Certification

Accordingly, the following product(s) are deleted from the Procurement List:

Product(s)

NSN(s)—Product Name(s):
4730–00–470–6625—Kit, Brass Fittings, 88 Automotive Types, 430 Pieces
Designated Source of Supply: The Opportunity Center Easter Seal Facility—The Ala ES Soc, Inc., Anniston, AL
Contracting Activity: DLA LAND AND MARITIME SUPPLIER, COLUMBUS, OH

NSN(s)—Product Name(s):
6515–01–576–8837—Combat Arms Ear Plug, Single Ended, Size Small, BX/50 Pairs
6515–01–576–8861—Combat Arms Ear Plug, Single Ended, Size Medium, BX/50 Pairs
6515–01–576–8869—Combat Arms Ear Plug, Single Ended, Size Large, BX/50 Pairs
6515–00–SAM–0013—Combat Arms Ear Plug, Single Ended, Size Small, PR
6515–00–SAM–0014—Combat Arms Ear Plug, Single Ended, Size Medium, PR
6515–00–SAM–0015—Combat Arms Ear Plug, Single Ended, Size Large, PR
6515–01–686–9817—Combat Arms 4.1 Ear Plug, Single Ended, Size Small, BX/50
6515–01–686–9808—Combat Arms 4.1 Ear Plug, Single Ended Size Medium, BX/50
6515–01–686–9804—Combat Arms 4.1 Ear Plug, Single Ended Size Large, BX/50
Designated Source of Supply: Access: Supports for Living Inc., Middletown, NY
Contracting Activity: DLA TROOP SUPPORT, PHILADELPHIA, PA

Michael R. Jurkowski,

Acting Director, Business Operations.

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Sunshine Act Meetings

The Board of Directors of the Corporation for National and Community Service (operating as AmeriCorps) gives notice of the following meeting:

TIME AND DATE: Friday, March 1, 2024, 2:00 p.m.–3:30 p.m. (ET).

PLACE: AmeriCorps, 250 E Street SW, Washington, DC 20525. For health and safety reasons, this will be a virtual meeting.

- To register for the meeting, please use this link: *https://americorps.zoomgov.com/webinar/register/WN_d5hKOeCqT-2xpGJiPiml3Q.*
- *Webinar ID:* 160 953 1136 Passcode: 834402.
- To participate by phone, call toll free: (833) 568–8864.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

I. Opening Remarks by the Chair
II. CEO Remarks
III. Review of the CEO Letter and Outcome
IV. Oversight, Governance, and Audit Committee Report
V. Actions From the Board
VI. Spotlight: Tribal and Native Grantees
VII. Public Comment
VIII. Chair's Closing Remarks and Adjournment

Members of the public who would like to comment on the business of the Board may do so in writing or virtually. Submit written comments to *board@americorps.gov* with the subject line: ''Comments for March 1, 2024, AmeriCorps Board Meeting'' no later than 5:00 p.m. (ET) February 23, 2024. Individuals who would like to comment during the meeting will be given instructions for signing up when they join the meeting. Comments should be limited to two minutes.

AmeriCorps provides reasonable accommodation upon request to individuals with disabilities, where needed.

CONTACT PERSON FOR MORE INFORMATION: Heather Leinenbach by telephone: (202) 489–5266 or by email: *board@americorps.gov.*

Fernando Laguarda,

General Counsel.

BILLING CODE 6050–28–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2023–SCC–0200]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Application for Grants Under the Predominantly Black Institutions Formula Grant Program

AGENCY: Office of Postsecondary Education (OPE), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing an extension without change of a currently approved information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before March 11, 2024.

ADDRESSES: Written comments and recommendations for proposed information collection requests should be submitted within 30 days of publication of this notice. Click on this link *www.reginfo.gov/public/do/PRAMain* to access the site. Find this information collection request (ICR) by selecting ''Department of Education'' under ''Currently Under Review,'' then check the ''Only Show ICR for Public Comment'' checkbox. Reginfo.gov provides two links to view documents related to this information collection request. Information collection forms and instructions may be found by clicking on the ''View Information Collection (IC) List'' link. Supporting statements and other supporting documentation may be found by clicking on the ''View Supporting Statement and Other Documents'' link.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Shakir Davy, 202–453–7792.

SUPPLEMENTARY INFORMATION: The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Application for Grants Under the Predominantly Black Institutions Formula Grant Program.

OMB Control Number: 1840–0812.

Type of Review: An extension without change of a currently approved ICR.

Respondents/Affected Public: Private sector; State, local, and Tribal government.

Total Estimated Number of Annual Responses: 39.

Total Estimated Number of Annual Burden Hours: 780.

Abstract: The Higher Education Opportunity Act of 2008 amended title III, part A of the Higher Education Act to include section 318—the Predominantly Black Institutions (PBI) Program. The PBI Program makes 5-year grant awards to eligible colleges and universities to plan, develop, undertake and implement programs to enhance the institution's capacity to serve more low- and middle-income Black American students; to expand higher education opportunities for eligible students by encouraging college preparation and student persistence in secondary school and postsecondary education; and to strengthen the financial ability of the institution to serve the academic needs of these students.

Dated: February 6, 2024.

Kun Mullan,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

[FR Doc. 2024–02698 Filed 2–8–24; 8:45 am]

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Request for Information Regarding the Manufacturing Capital Connector

AGENCY: Office of Manufacturing and Energy Supply Chains, Department of Energy.

ACTION: Request for information (RFI).

SUMMARY: The Department of Energy (DOE or the Department)'s Office of Manufacturing and Energy Supply Chains is issuing this RFI to notify parties of its potential interest in initiating a Manufacturing Capital Connector (MCC) to support applicants seeking clean energy manufacturing funding opportunities and/or tax credits. The Department also seeks input from all stakeholders through this RFI to help gauge the interest in and to inform the overall design of the MCC.

DATES: Written comments and information are requested by March 4, 2024.

ADDRESSES: Interested parties may submit comments electronically to *CapitalConnector-RFI@hq.doe.gov* in accordance with the Response Guidelines in section VI of this document.

FOR FURTHER INFORMATION CONTACT: Questions may be addressed to Rachel Gould, *CapitalConnector-RFI@hq.doe.gov* or (202) 586–6116.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Energy (DOE)'s Office of Manufacturing and Energy Supply Chains (MESC) is considering establishing a Manufacturing Capital Connector (MCC). The goal of the MCC is to facilitate the commitment of private sector capital necessary to bring important clean energy manufacturing projects to commercial operation. Specifically, the MCC will:

(1) Educate capital providers about DOE's supply chain priority areas and DOE-administered clean energy manufacturing opportunities, such as the Qualifying Advanced Energy Project Credit (48C);

(2) Develop a list of capital providers interested in financing clean energy manufacturing projects and the Best Practices they offer (Best Practices are defined as a private capital provider's proposed minimum level of consistent terms across applications regarding response time, pricing, minimum amount of capital, diligence requests (*i.e.,* all topics covered under Question 14 in the For Potential Capital Providers questions)) and share the list of interested capital providers and their Best Practices on a publicly accessible DOE website; and

(3) If an applicant decides to do so, the applicant may directly share their application information with those capital providers that offer Best Practices they find appealing. DOE is prohibited from providing capital providers with any information about the applicant nor confirmation of whether an organization has applied. Thus, information exchange would be independent of DOE and voluntary.

The notional MCC could be particularly beneficial to applicants for programs like 48C. The 48C program is an investment tax credit (ITC), and as such the IRS will make final allocation decisions, with companies receiving the tax credit only after the project is placed in service and the credit is earned. Therefore, unlike many DOE-administered grant and loan programs,

the applicant must commit all capital upfront for development and construction, with costs offset by the tax credit only after the fact. Given the scale of the 48C program, the Department's broader manufacturing investments, and focus on historical energy communities and disadvantaged communities, the Department of Energy seeks to find ways to facilitate, expedite and streamline the initial non-federal funding required. In summary, the intent of this RFI is to explore a potential pathway to connect private capital to clean energy manufacturing projects as outlined in the three goals above and increase the likelihood that these projects reach completion and reap the financial benefits, including tax credits or grant funding.

II. A Case Study—48C

A. Background

The 48C program was established by the American Recovery and Reinvestment Act of 2009 [1] and expanded with a $10 billion investment under the Inflation Reduction Act of 2022.[2] [3] The Department of the Treasury and the IRS, in partnership with DOE, have announced that approximately $4 billion will be allocated in Round 1, full applications for which were due on December 26, 2023, with the remaining to be announced in at least one more round of applications. The expanded program provides an ITC for up to 30% of the qualified investment for certified projects that meet prevailing wage and apprenticeship requirements. At least forty percent of tax credit allocations must go toward projects in energy communities [4] and, as one of its program policy factors, MESC seeks to support manufacturers of all sizes including small- and medium-sized manufacturers. Although using an MCC participating capital provider would not provide an applicant any preference or advantage over a non-MCC participating capital source, the creation of the MCC facilitates companies in obtaining the 48C tax credit, which may be particularly helpful as those in energy communities and/or small- and medium-sized manufacturers have, historically, had less access to broader financing sources.

The 48C program targets three topic areas:

(1) Clean energy manufacturing and recycling, including renewable energy; electric grid modernization; carbon capture, utilization, or storage; chemical/fuel refining, blending or electrolyzing equipment; energy efficiency; and electric or fuel cell vehicles and associated recharging/refueling infrastructure;

(2) Industrial Greenhouse Gas (GHG) Emissions Reductions (*e.g.,* GHG reductions of an existing facility such as steel, cement, chemicals etc.); and,

(3) Critical material refining, processing, and recycling.

The 48C program competitively selects the most qualified projects from the applicant pool for receipt of the tax credit allocation based on commercial viability, greenhouse gas emissions impacts, workforce and community engagement, and ability to strengthen U.S. supply chains and domestic manufacturing for a net-zero economy.

B. 48C Concept Papers

In August 2023, DOE received concept papers, *i.e.,* high-level application information, from applicants seeking the Round 1 tax credit allocation. DOE provided encourage or discourage letters to applicants who submitted concept papers on November 3, 2023. The submission deadline for full applications was December 26, 2023.

In Round 1, concept papers requesting $42 billion in tax credit allocations were received, of which nearly $11 billion were for projects proposed in 48C energy communities. Together, Round 1 concept papers represented over $142 billion of total investment in potential projects.

III. Manufacturing Capital Connector—General Characteristics

The proposed MCC, as presently conceived, would encourage capital providers to leverage the time-intensive, competitive, and thorough application processes for Federal programs by providing applicants the option to share their application information with participating private sector financing counterparties. Applicants could choose to share their application materials with potential private sector capital providers without DOE serving as an intermediary. DOE cannot directly provide capital providers any information about whether an organization is or is not a 48C program applicant. Applicants would be able to share their materials with the capital providers that offer Best Practices preferred by the applicant that enhance their project's potential for success. Applicants could also choose to share their application materials with capital providers not participating in the MCC. Private capital providers would be able to select the clean energy projects they would like to finance at their discretion and following any additional due diligence steps required by the private capital provider, without DOE involvement.

DOE seeks feedback on the proposal for the structure of the MCC as well as expressions of interest from private sector capital providers potentially interested in joining the MCC. If the proposed MCC moves forward, DOE aims to compile a list of capital providers in March 2024 and outline Best Practices during the second quarter of 2024.

IV. Potential Benefits

For the company applicants participating in MCC, the MCC would strive to (1) improve the timing and magnitude of available capital, (2) reduce the redundancy of work due to the overlap of document requirements between their application and private sector commercial due diligence processes (*e.g.,* financial model, market report), (3) lower the cost of capital, and (4) enable potentially less financially sophisticated and smaller manufacturers better and more affordable access to larger pools of capital with lower transaction costs. Note that federal program applicants that choose to use an MCC participating capital provider would not receive any preference in the application process for doing so over other sources of financing.

For the private sector financing partners, the MCC would (1) facilitate access to an origination stream of mature-technology clean energy projects with a combined enterprise value in the tens of billions, (2) enable a faster due diligence process because of the extensive relevant documentation already generated for an application to Federal programs, and (3) help federal program applicants with de-risked projects that have received or are being evaluated to receive a Federal financial benefit and that align with priority investment areas to connect with potential private sector financing partners.

In making recommendations to the IRS about which 48C projects should receive allocations and in making selections for clean energy

---

[2] Inflation Reduction Act of 2022, Public Law 117–169 (August 16, 2022), *https://www.congress.gov/bill/117th-congress/house-bill/5376/text.*

[3] *https://www.energy.gov/infrastructure/qualifying-advanced-energy-project-credit-48c-program.*

[4] Project located in a census tract that satisfies the relevant requirements of an energy community and has not received funding in a prior round of 48C: *https://arcgis.netl.doe.gov/portal/apps/experiencebuilder/experience/?id=a44704679a4f44a5aac122324eb00914&page=home.*

manufacturing awards under DOE grants, DOE aims to select the most impactful projects that align with DOE priority areas, considering commercial viability and a full ecosystem that promotes their success. To further this aim, the MCC as described previously could increase the number of selected projects that obtain the financing needed to reach completion and secure the ITC as well as potentially provide a lower cost of capital and ease the financing process for some organizations.

V. Questions for Request for Information

To help inform the interest in and design of the MCC for clean energy manufacturing programs, DOE is seeking public input on the potential structure, benefits, and risks of the proposed MCC from potential capital providers and clean energy manufacturing program applicants or selectees. DOE specifically welcomes comment on the following questions:

For Applicants or Selectees

1. What impediments do you see in DOE providing applicants and the public with information about private sector capital providers interested in financing clean energy projects?

2. Would you be more likely to apply for a grant, tax credit allocation, or other Federal funding, if you knew that a list of private sector financial institutions interested in financing clean energy manufacturing projects would be available on a publicly accessible DOE website?

3. What information would be most helpful to have from interested private sector capital providers?

4. Does the establishment of the MCC potentially increase the speed at which you can develop your project?

5. Do you anticipate your organization would review the list of interested private sector capital providers and/or would your company be likely to share your application materials? Are there any materials typical to a Federal application that an applicant would not be willing to share with private sector capital providers?

6. Do you foresee risks to the involved stakeholders in leveraging already provided application materials with applicants directly sharing information with private sector financing? What are those risks and how could they be mitigated in the creation and operation of the MCC?

7. What Best Practices should private sector capital providers offer in order to participate in the MCC?

8. What types of capital and support from private sector financial institutions does your project need to proceed forward to commercial operations? For example, if your project is seeking the 48C tax credit allocation, would your company need support in monetizing the tax credits?

For Potential Capital Providers

9. Would your institution have interest in participating in the MCC as described in (or similar to) this RFI and have information about your interest available on a publicly accessible DOE website?

10. What is the most effective way DOE could catalyze private sector investment into clean energy projects? Are there alternatives to the MCC that DOE can provide to achieve the same goals? Are there other tenets to the MCC that DOE should try to include?

11. What is the most effective way DOE could educate private capital providers on Federal clean energy programs in order to facilitate private sector investment?

12. Financial institutions interested in financing clean energy projects such as those that apply to 48C need to evaluate projects in a timely manner and commit to deploy capital. What are some Best Practices your institution would be willing to offer in evaluating clean energy manufacturing projects? For instance, would private sector capital providers commit to finance a certain amount ($) or number of projects, respond with a term sheet in a certain number of days, and/or commit to a percentage of viewed opportunities, within a range of parameters (*e.g.,* interest rate, tenor)?

13. Application overview and information sharing (for reference, DOE funding opportunity announcements often require a detailed application narrative, workforce and community benefits plan, data sheet, and appendices that include a financial model, financial statements, and offtake/sales agreements):

a. What information and documentation are most pertinent for a financing institution's decision? Is there further information that your institution may need to make an investment decision?

b. What are industry best practices for protecting applicants' privacy? How can private sector financial institutions seeking to participate in the MCC demonstrate that they have appropriate safeguards in place to prevent the release of confidential business?

14. Questions regarding Capital Provider's Best Practices:

a. Based on the three topic areas noted in the 48C Case Study, is your institution interested in all/most of the three topic areas? If not, please specify topics areas that are not of interest.

b. What part of the capital structure would your institution be interested in participating in (*e.g.,* senior secured, mezzanine, preferred equity, common equity, tax equity (original investment or subsequent transferability), other)? Please outline all structures of interest.

c. What is your typical minimum and maximum investment amount, advance rate, and tenor on an investment in these topic areas?

d. Is there a minimum or maximum number of projects your institution would be interested in financing?

e. How much capital would your financial institution be potentially willing to make available to projects via the MCC?

f. Does your institution require a type of revenue/offtake contract? If so, what kind, what tenor, and for what percentage of the output? Please provide as much detail as possible.

g. What balance sheet metrics (*e.g.,* liquidity, debt-to-equity) does your institution look for in the project and in the Sponsor of a project?

h. What terms (*e.g.,* interest rate, DSCR, tenor, maturity) would your institution potentially be willing to provide as one of the private sector capital providers?

15. What would enable a capital provider to view eligible clean energy manufacturing projects, such as 48C projects, as a portfolio versus one-off projects? Would viewing as a portfolio lower the cost of capital from your institution?

16. What would be the potential sources of your capital? Would your financial institution be using existing funds, or would they raise outside capital?

17. Do you foresee risks to the involved stakeholders in using the MCC to find potential manufacturing projects to finance?

VI. Response Guidelines

Commenters are welcome to comment on any question regardless of status as a potential applicant or private capital provider. Commenters do not need to identify whether they are a previous, current, or potential applicant or private capital provider. RFI responses shall include:

1. RFI title;

2. Name(s), phone number(s), and email address(es) for the principal point(s) of contact;

3. Institution or organization affiliation and postal address; and

4. Clear indication of the specific question(s) to which you are responding.

Responses to this RFI must be submitted electronically to *CapitalConnector-RFI@hq.doe.gov.* with the subject line ''*Manufacturing Capital Connector*'' no later than 5:00 p.m. (ET) on March 4, 2024. Responses must be provided as attachments to an email. It is recommended that attachments with file sizes exceeding 25 MB be compressed (*i.e.,* zipped) to ensure message delivery. Responses must be provided as a Microsoft Word (*.docx) or Adobe Acrobat (*.pdf) attachment to the email, and *no more than 10 pages in length, 12-point font, 1-inch margins. Only electronic responses will be accepted.*

Responses including confidential business information will be handled per guidance in section VII of this document.

A response to this RFI will not be viewed as a binding commitment to develop or pursue the project or ideas discussed. MESC may engage in pre- and post-response conversations with interested parties.

VII. Confidential Business Information

Because information received in response to this RFI may be used to structure future programs and/or otherwise be made available to the public, *respondents are strongly advised NOT to include any information in their responses that might be considered business sensitive, proprietary, or otherwise confidential.*

Pursuant to 10 CFR 1004.11, any person submitting information that he or she believes to be confidential and exempt by law from public disclosure should submit via email two well-marked copies: One copy of the document marked ''confidential'' including all the information believed to be confidential, and one copy of the document marked ''non-confidential'' with the information believed to be confidential deleted. Failure to comply with these marking requirements may result in the disclosure of the unmarked information under the Freedom of Information Act or otherwise. The U.S. Government is not liable for the disclosure or use of unmarked information and may use or disclose such information for any purpose.

If your response contains confidential, proprietary, or privileged information, you must include a cover sheet marked as follows identifying the specific pages containing confidential, proprietary, or privileged information:

Notice of Restriction on Disclosure and Use of Data:

Pages [*list applicable pages*] of this response may contain confidential, proprietary, or privileged information that is exempt from public disclosure. Such information shall be used or disclosed only for the purposes described in this RFI. The Government may use or disclose any information that is not appropriately marked or otherwise restricted, regardless of source.

In addition, (1) the header and footer of every page that contains confidential, proprietary, or privileged information must be marked as follows: ''Contains Confidential, Proprietary, or Privileged Information Exempt from Public Disclosure'' and (2) every line and paragraph containing proprietary, privileged, or trade secret information must be clearly marked with [[double brackets]] or highlighting.

Signing Authority

This document of the Department of Energy was signed on February 6, 2024, by Giulia Siccardo, Director, Office of Manufacturing and Energy Supply Chains, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE **Federal Register** Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on February 6, 2024.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

[GDO Docket No. EA–465–A]

Application for Renewal of Authorization To Export Electric Energy; Brookfield Renewable Trading and Marketing LP

AGENCY: Grid Deployment Office, Department of Energy.

ACTION: Notice of application.

SUMMARY: Brookfield Renewable Trading and Marketing LP (the Applicant or BRTM) has applied for renewed authorization to transmit electric energy from the United States to Canada pursuant to the Federal Power Act.

DATES: Comments, protests, or motions to intervene must be submitted on or before March 11, 2024.

ADDRESSES: Comments, protests, motions to intervene, or requests for more information should be addressed by electronic mail to *Electricity.Exports@hq.doe.gov.*

FOR FURTHER INFORMATION CONTACT: Christina Gomer, (240) 474–2403, *Electricity.Exports@hq.doe.gov.*

SUPPLEMENTARY INFORMATION: The United States Department of Energy (DOE) regulates electricity exports from the United States to foreign countries in accordance with section 202(e) of the Federal Power Act (FPA) (16 U.S.C. 824a(e)) and regulations thereunder (10 CFR 205.300 *et seq.*). Sections 301(b) and 402(f) of the DOE Organization Act (42 U.S.C. 7151(b) and 7172(f)) transferred this regulatory authority, previously exercised by the now-defunct Federal Power Commission, to DOE.

Section 202(e) of the FPA provides that an entity which seeks to export electricity must obtain an order from DOE authorizing that export (16 U.S.C. 824a(e)). On April 10, 2023, the authority to issue such orders was delegated to the DOE's Grid Deployment Office (GDO) by Delegation Order No. S1–DEL–S3–2023 and Redelegation Order No. S3–DEL–GD1–2023.

On March 26, 2019, DOE issued Order No. EA–465, authorizing BRTM to transmit electric energy from the United States to Canada as a power marketer. On January 11, 2024, BRTM filed an application with DOE (Application or App.) for renewal of their export authority for an additional five-year term. App. at 1.

According to the Application, Brookfield Energy Marketing LLC owns a 0.01 percent general partner interest in BRTM, and Brookfield Power New York Holding Corporation (BPNYHO) owns a 99.99 percent limited partner interest in BRTM. App. at 1. Brookfield Energy Market LLC is a Delaware limited liability company and wholly-owned subsidiary of Brookfield Power US Holding America Company (BPUSHA). *Id.* BPNYHO is a Delaware corporation and a wholly-owned indirect subsidiary of BPUSHA. *Id.*

The Applicant states it does not ''own or control any electric generation, transmission, or distribution facilities in the United States and does not have a franchise or service territory for the transmission, distribution or sale of

electricity.'' App. at 3. However, the Applicant ''operates as a wholesale marketer of electric energy and as electric energy agent to Brookfield Renewable, which owns companies regulated as public utilities under the FPA and companies owning qualifying facilities.'' *Id.* BRTM notes it has ''market-based rate authorization issued by the Federal Energy Regulatory Commission ('FERC') under Section 205 of the FPA.'' *Id.*

The Applicant asserts that it ''does not have a franchised service area and, consequently, has no native load obligations'' and will purchase the electric energy that it exports from electric utilities, qualifying cogeneration facilities, qualifying small power production facilities, Independent System Operators, Regional Transmission Operators, or from other exempt wholesale generators. App. at 6. Therefore, BRTM contends that ''the electric energy that will be sold to BRTM is surplus to the needs of the selling entities'' and ''will not impair the sufficiency of the electric energy supply within the United States.'' *Id.* BRTM also states it will comply with existing industry procedures for obtaining transmission capacity and asserts the proposed transmission would not impede or tend to impede the coordination in the public interest of facilities subject to DOE's jurisdiction. *Id.*

The existing international transmission facilities to be utilized by the Applicant have been previously authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties. *See* App. at Exhibit C.

Procedural Matters: Any person desiring to be heard in this proceeding should file a comment or protest to the Application at *Electricity.Exports@hq.doe.gov.* Protests should be filed in accordance with Rule 211 of Federal Energy Regulatory Commission's (FERC's) Rules of Practice and Procedure (18 CFR 385.211). Any person desiring to become a party to this proceeding should file a motion to intervene at *Electricity.Exports@hq.doe.gov* in accordance with FERC Rule 214 (18 CFR 385.214).

Comments and other filings concerning BRTM's Application should be clearly marked with GDO Docket No. EA–465–A. Additional copies are to be provided directly to the Senior Director, Legal, Attn: EMR Legal, Brookfield Renewable Trading and Marketing LP, 200 Liberty Street, 14th Floor, New York, New York 10281, *EMRLegal@brookfieldrenewable.com.*

A final decision will be made on the requested authorization after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Procedures (10 CFR part 1021) and after DOE evaluates whether the proposed action will have an adverse impact on the sufficiency of supply or reliability of the United States electric power supply system.

Copies of this Application will be made available, upon request, by accessing the program website at *https://www.energy.gov/gdo/pending-applications-0* or by emailing *Electricity.Exports@hq.doe.gov.*

Signing Authority: This document of the Department of Energy was signed on January 30, 2024, by Maria Robinson, Director, Grid Deployment Office, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE **Federal Register** Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC on February 6, 2024.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

[GDO Docket No. EA–498–A]

Application for Amended Authorization To Export Electric Energy; NRG Business Marketing LLC

AGENCY: Grid Deployment Office, Department of Energy.

ACTION: Notice of application.

SUMMARY: NRG Business Marketing LLC (the Applicant or NRGBM), formerly known as Direct Energy Business Marketing, LLC (DEBM), has applied for amended authorization to transmit electric energy from the United States to Canada pursuant to the Federal Power Act.

DATES: Comments, protests, or motions to intervene must be submitted on or before February 26, 2024.

ADDRESSES: Comments, protests, motions to intervene, or requests for more information should be addressed by electronic mail to *Electricity.Exports@hq.doe.gov.*

FOR FURTHER INFORMATION CONTACT: Christina Gomer, (240) 474–2403, *Electricity.Exports@hq.doe.gov.*

SUPPLEMENTARY INFORMATION: The United States Department of Energy (DOE) regulates electricity exports from the United States to foreign countries in accordance with section 202(e) of the Federal Power Act (FPA) (16 U.S.C. 824a(e)) and regulations thereunder (10 CFR 205.300 *et seq.*). Sections 301(b) and 402(f) of the DOE Organization Act (42 U.S.C. 7151(b) and 7172(f)) transferred this regulatory authority, previously exercised by the now-defunct Federal Power Commission, to DOE.

Section 202(e) of the FPA provides that an entity which seeks to export electricity must obtain an order from DOE authorizing that export (16 U.S.C. 824a(e)). On April 10, 2023, the authority to issue such orders was delegated to the DOE's Grid Deployment Office (GDO) by Delegation Order No. S1–DEL–S3–2023 and Redelegation Order No. S3–DEL–GD1–2023.

On March 31, 2023, DEBM applied for authorization to transmit electric energy from the United States to Canada as a power marketer for a term of five years. On September 13, 2023, DOE issued EA–498, granting DEBM its requested permission. *See* EA–498. On December 29, 2023, NRGBM filed an application with DOE (Application or App.) to amend the authorization to reflect DEBM's name change to NRGBM. *See* App. at 1.

The Application states that on July 31, 2023, DEBM changed its name to NRGBM. App. at 1. NRGBM notes that ''[t]his action was solely a name change'' and there were ''no changes to the corporate structure, governance, or ownership of the LLC.'' *Id.* at 2. The Application reflects that the other information concerning the subject exports provided in DEBM's initial application for authorization, approved in EA–497, remains unchanged. *See Id.* at 1–4.

Procedural Matters: Any person desiring to be heard in this proceeding should file a comment or protest to the Application at *Electricity.Exports@hq.doe.gov.* Protests should be filed in accordance with Rule 211 of FERC's Rules of Practice and Procedure (18 CFR 385.211). Any person desiring to become a party to this proceeding should file a motion to intervene at *Electricity.Exports@hq.doe.gov* in

accordance with FERC Rule 214 (18 CFR 385.214).

Comments and other filings concerning NRGBM's Application should be clearly marked with GDO Docket No. EA–498–A. Additional copies are to be provided directly to Ryan Harwell, Manager, Regulatory Licensing & Reporting, NRG Business Marketing LLC, 910 Louisiana Street, Suite B200, Houston, Texas 77002, *ryan.harwell@nrg.com,* and Ryan C. Norfolk, Baker Botts LLP, 700 K Street NW, Washington, DC 20001, *ryan.norfolk@bakerbotts.com.*

A final decision will be made on the requested authorization after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Procedures (10 CFR part 1021) and after DOE evaluates whether the proposed action will have an adverse impact on the sufficiency of supply or reliability of the United States electric power supply system.

Copies of this Application will be made available, upon request, by accessing the program website at *https://www.energy.gov/gdo/pending-applications-0* or by emailing *Electricity.Exports@hq.doe.gov.*

DEPARTMENT OF ENERGY

[GDO Docket No. EA–507]

Application for Authorization To Export Electric Energy; Second Foundation US Trading, LLC

AGENCY: Grid Deployment Office, Department of Energy.

ACTION: Notice of application.

SUMMARY: Second Foundation US Trading, LLC (the Applicant or SFUST, LLC) has applied for authorization to transmit electric energy from the United States to Mexico pursuant to the Federal Power Act.

DATES: Comments, protests, or motions to intervene must be submitted on or before March 11, 2024.

ADDRESSES: Comments, protests, motions to intervene, or requests for more information should be addressed by electronic mail to *Electricity.Exports@hq.doe.gov.*

FOR FURTHER INFORMATION CONTACT: Christina Gomer, (240) 474–2403, *Electricity.Exports@hq.doe.gov.*

SUPPLEMENTARY INFORMATION: The United States Department of Energy (DOE) regulates electricity exports from the United States to foreign countries in accordance with section 202(e) of the Federal Power Act (FPA) (16 U.S.C. 824a(e)) and regulations thereunder (10 CFR 205.300 *et seq.*). Sections 301(b) and 402(f) of the DOE Organization Act (42 U.S.C. 7151(b) and 7172(f)) transferred this regulatory authority, previously exercised by the now-defunct Federal Power Commission, to DOE.

Section 202(e) of the FPA provides that an entity which seeks to export electricity must obtain an order from DOE authorizing that export (16 U.S.C. 824a(e)). On April 10, 2023, the authority to issue such orders was delegated to the DOE's Grid Deployment Office (GDO) by Delegation Order No. S1–DEL–S3–2023 and Redelegation Order No. S3–DEL–GD1–2023.

On January 8, 2024, the Applicant filed an application with DOE (Application or App.) for export authority to transmit electric power across international facilities into Mexico as a power marketer for a term of five-years. App. at 1.

SFUST, LLC is a Delaware limited liability company with its principal place of business in Houston, Texas. App. at 1. The Applicant states it is ''a power marketer engaged in the business of marketing and trading electric energy and other energy related products in the United States.'' *Id.* at 2. According to the Application, SFUST, LLC is solely owned by Second Foundation Holding, a joint-stock company organized under the laws of the Czech Republic. *Id.* The Applicant states it ''is authorized to sell wholesale electric energy, capacity and ancillary services at market-based rates pursuant to authority granted by the Federal Energy Regulatory Commission (FERC) under a wholesale power sales tariff currently on file with FERC in Docket No. ER22–2959–000.'' *Id.*

According to the Application, SFUST, LLC does not ''own any franchised service territory, and does not control any electric generation or transmission facilities in the United States'' and ''has no other affiliates or upstream owners that own any franchised service territory or control any electric generation or transmission facilities in the United States.'' App. at 2. Further, SFUST, LLC notes it ''will purchase surplus electric energy to be exported from a variety of entities within the United States including power marketers, wholesale generators, electric utilities, and federal power marketing agencies.'' *Id.* at 4. The Applicant asserts its proposed exports will be ''surplus to the needs of those entities selling electric power to the Applicant'' and ''will not impair the sufficiency of electric supply within the United States[.]'' *Id.* Further, the Applicant states its exports will be ''transmitted pursuant to arrangements with utilities that own and operate existing transmission facilities and will be consistent with all applicable export limits on transmission facilities,'' and thus the Applicant asserts it ''meets the second statutory criterion of Section 202(e).'' *Id.* at 5.

The existing international transmission facilities to be utilized by the Applicant have been previously authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties. *See* App. at Exhibit C.

Procedural Matters: Any person desiring to be heard in this proceeding should file a comment or protest to the Application at *Electricity.Exports@hq.doe.gov.* Protests should be filed in accordance with Rule 211 of Federal Energy Regulatory Commission's (FERC's) Rules of Practice and Procedure (18 CFR 385.211). Any person desiring to become a party to this proceeding should file a motion to intervene at *Electricity.Exports@hq.doe.gov* in accordance with FERC Rule 214 (18 CFR 385.214).

Comments and other filings concerning SFUST, LLC's Application should be clearly marked with GDO Docket No. EA–507. Additional copies are to be provided directly to Jakub Sedlacek, Chief Operating Officer, Second Foundation US Trading, LLC, 808 Travis St., Suite 1030, Houston, TX 77002, *jakub.sedlacek@second-foundation.com,* and Zori Ferkin, King & Spalding LLP, 1700 Pennsylvania Avenue, Suite 900, Washington, DC 20006, *zferkin@kslaw.com.*

A final decision will be made on the requested authorization after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Procedures (10 CFR part 1021) and after DOE evaluates whether the proposed action will have an adverse impact on the sufficiency of supply or reliability of the United States electric power supply system.

Copies of this Application will be made available, upon request, by accessing the program website at *https://www.energy.gov/gdo/pending-applications-0* or by emailing *Electricity.Exports@hq.doe.gov.*

Signing Authority: This document of the Department of Energy was signed on January 30, 2024, by Maria Robinson, Director, Grid Deployment Office, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE **Federal Register** Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

[GDO Docket No. EA–506]

Application for Authorization To Export Electric Energy; Second Foundation US Trading, LLC

AGENCY: Grid Deployment Office, Department of Energy.

ACTION: Notice of application.

SUMMARY: Second Foundation US Trading, LLC (the Applicant or SFUST, LLC) has applied for authorization to transmit electric energy from the United States to Canada pursuant to the Federal Power Act.

DATES: Comments, protests, or motions to intervene must be submitted on or before March 11, 2024.

ADDRESSES: Comments, protests, motions to intervene, or requests for more information should be addressed by electronic mail to *Electricity.Exports@hq.doe.gov.*

FOR FURTHER INFORMATION CONTACT: Christina Gomer, (240) 474–2403, *Electricity.Exports@hq.doe.gov.*

SUPPLEMENTARY INFORMATION: The United States Department of Energy (DOE) regulates electricity exports from the United States to foreign countries in accordance with section 202(e) of the Federal Power Act (FPA) (16 U.S.C. 824a(e)) and regulations thereunder (10 CFR 205.300 *et seq.*). Sections 301(b) and 402(f) of the DOE Organization Act (42 U.S.C. 7151(b) and 7172(f)) transferred this regulatory authority, previously exercised by the now-defunct Federal Power Commission, to DOE.

Section 202(e) of the FPA provides that an entity which seeks to export electricity must obtain an order from DOE authorizing that export (16 U.S.C. 824a(e)). On April 10, 2023, the authority to issue such orders was delegated to the DOE's Grid Deployment Office (GDO) by Delegation Order No. S1–DEL–S3–2023 and Redelegation Order No. S3–DEL–GD1–2023.

On January 8, 2024, the Applicant filed an application with DOE (Application or App.) for export authority to transmit electric energy from the United States to Canada for a term of five-years. App. at 1.

SFUST, LLC is a Delaware limited liability company with its principal place of business in Houston, Texas. App. at 1. The Applicant states it is ''a power marketer engaged in the business of marketing and trading electric energy and other energy related products in the United States.'' *Id.* at 2. According to the Application, SFUST, LLC is solely owned by Second Foundation Holding, a joint-stock company organized under the laws of the Czech Republic. *Id.* The Applicant states it ''is authorized to sell wholesale electric energy, capacity and ancillary services at market-based rates pursuant to authority granted by the Federal Energy Regulatory Commission (FERC) under a wholesale power sales tariff currently on file with FERC in Docket No. ER22–2959–000.'' *Id.*

According to the Application, SFUST, LLC does not ''own any franchised service territory, and does not control any electric generation or transmission facilities in the United States'' and ''has no other affiliates or upstream owners that own any franchised service territory or control any electric generation or transmission facilities in the United States.'' App. at 2. Further, SFUST, LLC notes it ''will purchase surplus electric energy to be exported from a variety of entities within the United States including power marketers, wholesale generators, electric utilities, and federal power marketing agencies.'' *Id.* at 4. The Applicant asserts its proposed exports will be ''surplus to the needs of those entities selling electric power to the Applicant'' and ''will not impair the sufficiency of electric supply within the United States[.]'' *Id.* Further, the Applicant states its exports will be ''transmitted pursuant to arrangements with utilities that own and operate existing transmission facilities and will be consistent with all applicable export limits on transmission facilities,'' and thus the Applicant asserts it ''meets the second statutory criterion of Section 202(e).'' *Id.* at 5.

The existing international transmission facilities to be utilized by the Applicant have previously been authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties. *See* App. at Exhibit C.

Procedural Matters: Any person desiring to be heard in this proceeding should file a comment or protest to the Application at *Electricity.Exports@hq.doe.gov.* Protests should be filed in accordance with Rule 211 of Federal Energy Regulatory Commission's (FERC's) Rules of Practice and Procedure (18 CFR 385.211). Any person desiring to become a party to this proceeding should file a motion to intervene at *Electricity.Exports@hq.doe.gov* in accordance with FERC Rule 214 (18 CFR 385.214).

Comments and other filings concerning SFUST, LLC's Application should be clearly marked with GDO Docket No. EA–507. Additional copies are to be provided directly to Jakub Sedlacek, Chief Operating Officer, Second Foundation US Trading, LLC, 808 Travis St., Suite 1030, Houston, TX 77002, *jakub.sedlacek@second-foundation.com,* and Zori Ferkin, King & Spalding LLP, 1700 Pennsylvania Avenue, Suite 900, Washington, DC 20006, *zferkin@kslaw.com.*

A final decision will be made on the requested authorization after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Procedures (10 CFR part 1021) and after DOE evaluates whether the proposed action will have an adverse impact on the sufficiency of supply or reliability of the United States electric power supply system.

Copies of this Application will be made available, upon request, by accessing the program website at *https://www.energy.gov/gdo/pending-applications-0* or by emailing *Electricity.Exports@hq.doe.gov.*

Signing Authority: This document of the Department of Energy was signed on January 30, 2024, by Maria Robinson, Director, Grid Deployment Office, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE **Federal Register** Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC on February 6, 2024.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

[GDO Docket No. EA–505]

Application for Authorization To Export Electric Energy; Altop Energy Trading LLC

AGENCY: Grid Deployment Office, Department of Energy.

ACTION: Notice of application.

SUMMARY: Altop Energy Trading LLC (the Applicant) has applied for authorization to transmit electric energy from the United States to Mexico pursuant to the Federal Power Act.

DATES: Comments, protests, or motions to intervene must be submitted on or before March 11, 2024.

ADDRESSES: Comments, protests, motions to intervene, or requests for more information should be addressed by electronic mail to *Electricity.Exports@hq.doe.gov.*

FOR FURTHER INFORMATION CONTACT: Christina Gomer, (240) 474–2403, *Electricity.Exports@hq.doe.gov.*

SUPPLEMENTARY INFORMATION: The United States Department of Energy (DOE) regulates electricity exports from the United States to foreign countries in accordance with section 202(e) of the Federal Power Act (FPA) (16 U.S.C. 824a(e)) and regulations thereunder (10 CFR 205.300 *et seq.*). Sections 301(b) and 402(f) of the DOE Organization Act (42 U.S.C. 7151(b) and 7172(f)) transferred this regulatory authority, previously exercised by the now-defunct Federal Power Commission, to DOE.

Section 202(e) of the FPA provides that an entity which seeks to export electricity must obtain an order from DOE authorizing that export (16 U.S.C. 824a(e)). On April 10, 2023, the authority to issue such orders was delegated to the DOE's Grid Deployment Office (GDO) by Delegation Order No. S1–DEL–S3–2023 and Redelegation Order No. S3–DEL–GD1–2023.

On December 28, 2023, the Applicant filed an application with DOE (Application or App.) to transmit electric energy from the United States to Mexico for a term of five-years. App. at 1.

Altop Energy Trading LLC is a Delaware Limited Liability Company with its principal place of business in Houston, Texas. App. at 1. The Applicant is engaged in the trading and marketing of both financial and physical electricity in the wholesale power markets in North America. *Id.* Altop Energy Trading LLC represents that is ''solely owned by Altop Energy Investments LP.'' *Id.* Further, the Applicant states that it has a Market-Based Rate Authorization from FERC. *Id.*

The Applicant states it ''has no obligation to serve native load, does not own or operate any electric distribution or transmission facilities, does not own or operate any natural gas distribution or transmission facilities, and does not own or operate any generation assets.'' App. at 1. The Applicant represents that the ''electric power will either be purchased from the bordering wholesale markets of ERCOT or CAISO, or a variety of third parties such as power marketers, independent power producers, electric utilities, or federal power marketing entities.'' *Id.* at 2. Altop Energy Trading LLC asserts that its proposed exports would ''be surplus to the requirements of the selling entities and the overall electrical system'' and ''will not impair the reliability of the grid.'' *Id.*

The existing international transmission facilities to be utilized by the Applicant have been previously authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties. *See* App. at Exhibit C.

Procedural Matters: Any person desiring to be heard in this proceeding should file a comment or protest to the Application at *Electricity.Exports@hq.doe.gov.* Protests should be filed in accordance with Rule 211 of Federal Energy Regulatory Commission's (FERC's) Rules of Practice and Procedure (18 CFR 385.211). Any person desiring to become a party to this proceeding should file a motion to intervene at *Electricity.Exports@hq.doe.gov* in accordance with FERC Rule 214 (18 CFR 385.214).

Comments and other filings concerning Altop Energy Trading LLC's Application should be clearly marked with GDO Docket No. EA–505. Additional copies are to be provided directly to Gebre-Egziabher Gebre, Principal, 440 Louisiana Street, Suite 575, Houston, TX 77002, *gebre.gebre@altopenergy.com.*

A final decision will be made on the requested authorization after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Procedures (10 CFR part 1021) and after DOE evaluates whether the proposed action will have an adverse impact on the sufficiency of supply or reliability of the United States electric power supply system.

Copies of this Application will be made available, upon request, by accessing the program website at *https://www.energy.gov/gdo/pending-applications-0* or by emailing *Electricity.Exports@hq.doe.gov.*

Signing Authority: This document of the Department of Energy was signed on January 30, 2024, by Maria Robinson, Director, Grid Deployment Office, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE **Federal Register** Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC on February 6, 2024.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Energy Information Administration

Agency Information Collection Proposed Extension

AGENCY: U.S. Energy Information Administration (EIA), Department of Energy (DOE).

ACTION: Notice and request for comments.

SUMMARY: EIA invites public comment on the proposed extension of the collection of information for the Cryptocurrency Mining Facilities Survey, as required under the Paperwork Reduction Act of 1995. The original collection was approved by the Office of Management and Budget on January 26, 2024, under the emergency approval provisions of the Paperwork Reduction Act.

DATES: EIA must receive all comments on this proposed information collection no later than April 9, 2024. If you anticipate any difficulties in submitting your comments by the deadline, contact the person listed in the **ADDRESSES** section of this notice as soon as possible.

ADDRESSES: Written comments may be sent to Glenn McGrath by email at *Glenn.McGrath@eia.gov.*

FOR FURTHER INFORMATION CONTACT: Glenn McGrath, EI–23, U.S. Energy Information Administration, telephone 1–202–586–4325, email *Glenn.McGrath@eia.gov.* The form and instructions are available at *www.eia.gov/survey/#eia-862.*

SUPPLEMENTARY INFORMATION: Comments are invited on whether or not: (a) The proposed collection of information is necessary for the proper performance of agency functions, including whether the information will have a practical utility; (b) EIA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used, is accurate; (c) EIA can improve the

quality, utility, and clarity of the information it will collect; and (d) EIA can minimize the burden of the collection of information on respondents, such as automated collection techniques or other forms of information technology.

This information collection request contains:

(1) *OMB No.:* 1905–0213;

(2) *Information Collection Request Title:* Cryptocurrency Mining Facilities Survey;

(3) *Type of Request:* Three-year extension without change;

(4) *Purpose:* The mining of cryptocurrency is an energy-intensive activity that requires substantial amounts of electricity. Several cryptocurrencies, most notably Bitcoin, use a *proof of work* approach that requires cryptocurrency miners to validate blocks of transactions by solving complex cryptographic puzzles that require significant computational power. Commercial mining facilities typically operate thousands of computers that work to add blocks of virtual currency transactions to a distributed ledger called a blockchain. The computational equipment must be cooled, which further increases the associated electricity consumption. Given its high rate of consumption, companies, organizations and government agencies engaged in the electricity business require detailed information about how much electrical energy is being consumed by cryptocurrency miners and where it is occurring. The U.S. Energy Information Administration (EIA) has engaged in a rigorous evaluation of U.S. cryptocurrency mining activity using publicly available information. EIA estimates cryptocurrency mining activity demands as much as 2.3% of U.S. electricity consumption. Furthermore, there is evidence that this electricity consumption is growing rapidly. The combined effects of increased cryptocurrency mining and stressed electricity systems create heightened uncertainty in electric power markets, which could contribute to public harm during an unexpected event.

On January 26, 2024, the Office of Management and Budget (OMB) granted approval under the emergency approval provisions of the Paperwork Reduction Act (PRA) for EIA to immediately begin collecting monthly information that will inform the public on the impact of recent increases in U.S. commercial cryptocurrency mining activity on both the supply and demand side of the electric power system. The Cryptocurrency Mining Facilities Survey, Form EIA–862, uses facility-level reporting to provide a baseline snapshot of the cryptocurrency mining companies in the sample and their energy use, quantify the rate of change in cryptocurrency mining activity among the companies and their facilities, identify electricity sources supplying U.S. cryptocurrency mining activity, and identify regions in the U.S. with concentrated cryptocurrency mining activity.

Due to the need to begin collecting this information right away, EIA was unable to allow for the time periods normally required for clearance under the PRA. The approval granted by OMB is through July 31, 2024. This approval allows EIA to conduct the Cryptocurrency Mining Facilities Survey for up to 6 months. EIA now seeks to extend clearance for the survey for an additional three years.

(5) *Annual Estimated Number of Respondents:* 82;

(6) *Annual Estimated Number of Total Responses:* 984;

(7) *Annual Estimated Number of Burden Hours:* 492;

(8) *Annual Estimated Reporting and Recordkeeping Cost Burden:* The cost of the burden hours is estimated to be $42,981 (492 burden hours times $87.36 per hour). EIA estimates that respondents will have no additional costs associated with the surveys other than the burden hours and maintenance of the information as part of the normal course of business.

Statutory Authority: 15 U.S. C. 772(b) and 42 U.S.C. 7101 *et seq.*

Signed in Washington, DC, on February 5, 2024.

Samson A. Adeshiyan,

Director, Office of Statistical Methods and Research, U. S. Energy Information Administration.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

National Nuclear Security Administration

Minor Construction Threshold Increase

AGENCY: National Nuclear Security Administration, Department of Energy.

ACTION: Notice.

SUMMARY: This notice is being issued under the authority the *Atomic Energy Defense Act* as amended by the *James M. Inhofe National Defense Authorization Act for Fiscal Year 2023.* The Department is adjusting the minor construction threshold to account for inflation. The threshold is being increased from $30 million to $34 million.

DATES: The new minor construction threshold is effective on February 9, 2024.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas Wilson, Office of Infrastructure, National Nuclear Security Administration, Department of Energy. Telephone: (301) 903–2173, or email: *Thomas.Wilson@nnsa.doe.gov.*

SUPPLEMENTARY INFORMATION:

Background

The *James M. Inhofe National Defense Authorization Act for Fiscal Year 2023* provides the Department of Energy's National Nuclear Security Administration (DOE/NNSA) Administrator with pilot authority to adjust the minor construction threshold to account for inflation at any point until December 1, 2025. Under this authority, the Administrator must submit a report to the congressional defense committees describing the method used to calculate the adjustment, wait a period of 30 days, and then publish the adjusted threshold to the **Federal Register** before it can take effect.

NNSA submitted the required report to the congressional defense committees on January 9, 2024. The 30-day waiting period ended on February 8, 2024. The publication of this notice implements the new minor construction threshold of $34 million.

Signing Authority

This document of Department of Energy was signed February 5, 2024, by Jill Hruby, Under Secretary for Nuclear Security and Administrator, NNSA, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE **Federal Register** Liaison Officer has been authorized to sign and submit the document in electronic format for publication as an official document of the Department of Energy. This administrative Process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on February 6, 2024.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

[Project No. 10441–019]

City of Aspen, Colorado; Notice of Intent To File License Application, Filing of Pre-Application Document, and Approving Use of the Traditional Licensing Process

(February 5, 2024.)

a. *Type of Filing:* Notice of Intent to File License Application and Request to Use the Traditional Licensing Process.

b. *Project No.*: 10441–019.

c. *Date Filed:* June 30, 2023.

d. *Submitted By:* City of Aspen, Colorado.

e. *Name of Project:* Maroon Creek Hydroelectric Project.

f. *Location:* On Maroon Creek in Pitkin County, Colorado.

g. *Filed Pursuant to:* 18 CFR 5.3 of the Commission's regulations.

h. *Potential Applicant Contact:* Phil Overenyder at City of Aspen at (970) 920–5111; or email at *phil.overeynder@aspen.gov.*.

i. *FERC Contact:* Everard Baker at (202) 502–8554; or email at *everard.baker@ferc.gov.*

j. The City of Aspen filed its request to use the Traditional Licensing Process on June 30, 2023. The City of Aspen provided public notice of its request on July 31, 2023. In a letter dated September 28, 2023, the Director of the Division of Hydropower Licensing approved the City of Aspen's request to use the Traditional Licensing Process.

k. With this notice, we are initiating informal consultation with the U.S. Fish and Wildlife Service under section 7 of the Endangered Species Act and the joint agency regulations thereunder at 50 CFR part 402. We are also initiating consultation with the Colorado State Historic Preservation Officer, as required by section 106, National Historical Preservation Act, and the implementing regulations of the Advisory Council on Historic Preservation at 36 CFR 800.2.

l. With this notice, we are designating the City of Aspen as the Commission's non-Federal representative for carrying out informal consultation, pursuant to section 7 of the Endangered Species Act and section 106 of the National Historic Preservation Act.

m. The City of Aspen filed a Pre-Application Document (PAD; including a proposed process plan and schedule) with the Commission, pursuant to 18 CFR 5.6 of the Commission's regulations.

n. A copy of the PAD may be viewed and/or printed on the Commission's website (*http://www.ferc.gov*), using the ''eLibrary'' link. Enter the docket number, excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll free, (886) 208–3676 or TTY (202) 502–8659.

o. The licensee states its unequivocal intent to submit an application for a subsequent license for Project No. 10441. Pursuant to 18 CFR 16.20 each application for a subsequent license and any competing license applications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by June 30, 2026.

p. Register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filing and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

q. The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202)502–6595 or *OPP@ferc.gov.*

Debbie-Anne A. Reese,

Acting Secretary.

Combined Notice of Filings

Take notice that the Commission has received the following Natural Gas Pipeline Rate and Refund Report filings:

Filings Instituting Proceedings

Docket Numbers: PR24–51–000.

Applicants: Black Hills/Kansas Gas Utility Company, LLC.

Description: 284.123 Rate Filing: BHKG Revised Statement of Rates to be effective 2/1/2024.

Filed Date: 2/5/24.

Accession Number: 20240205–5032.

Comment Date: 5 p.m. ET 2/26/24.

Docket Numbers: RP24–388–000.

Applicants: Rockies Express Pipeline LLC.

Description: 4(d) Rate Filing: REX 2024–02–02 Negotiated Rate Agreements to be effective 2/3/2024.

Filed Date: 2/2/24.

Accession Number: 20240202–5117.

Comment Date: 5 p.m. ET 2/14/24.

Docket Numbers: RP24–389–000.

Applicants: White River Hub, LLC.

Description: 4(d) Rate Filing: Negotiated Rate Contract REX 7309 to be effective 12/2/2023.

Filed Date: 2/2/24.

Accession Number: 20240202–5175.

Comment Date: 5 p.m. ET 2/14/24.

Docket Numbers: RP24–391–000.

Applicants: Sabine Pipe Line LLC.

Description: Compliance filing: Settlement petition filing 2024 to be effective N/A.

Filed Date: 2/2/24.

Accession Number: 20240202–5191.

Comment Date: 5 p.m. ET 2/14/24.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

[Project No. 2821–014]

City of Portland; Notice of Intent To File License Application, Filing of Pre-Application Document (PAD), Commencement of ILP Pre-Filing Process, and Scoping; Request for Comments on the PAD and Scoping Document, and Identification of Issues and Associated Study Requests

a. *Type of Filing:* Notice of Intent to File License Application for a New License and Commencing Pre-filing Licensing Process.

b. *Project No.:* 2821–014.

c. *Dated Filed:* December 8, 2023.

d. *Submitted By:* City of Portland, Portland Water Bureau.

e. *Name of Project:* Portland Hydroelectric Project.

f. *Location:* The project is located on the Bull Run River in Clackamas and Multnomah counties, Oregon, approximately 26 miles east of the City of Portland. The project boundary does not include any Federal lands since a land exchange with the U.S. Forest Service was completed in 2022.[1]

g. *Filed Pursuant to:* 18 CFR part 5 of the Commission's regulations.

h. *Applicant Contact:* Ms. Shannon Mills, Portland Water Bureau; 1120 SW 5th Avenue, Room 405, Portland, OR 97204; phone: (971) 347–9870.

i. *FERC Contact:* Golbahar Mirhosseini, (202) 502–6820 *golbahar.mirhosseini@ferc.gov.*

j. *Cooperating agencies:* Federal, State, local, and Tribal agencies with jurisdiction and/or special expertise with respect to environmental issues that wish to cooperate in the preparation of the environmental document should follow the instructions for filing such requests described in item o below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of the environmental document cannot also intervene. *See* 94 FERC ¶ 61,076 (2001).

k. With this notice, we are initiating informal consultation with: (a) the U.S. Fish and Wildlife Service and NOAA Fisheries under section 7 of the Endangered Species Act and the joint agency regulations thereunder at 50 CFR part 402; (b) NOAA Fisheries under section 305(b) of the Magnuson-Stevens Fishery Conservation and Management Act and implementing regulations at 50 CFR 600.920; and (c) the Oregon State Historic Preservation Officer, as required by section 106, National Historic Preservation Act, and the implementing regulations of the Advisory Council on Historic Preservation at 36 CFR 800.2.

l. By letters dated January 2, 2024, and January 17, 2024, we notified the U.S. Fish and Wildlife Service, NOAA Fisheries, and the Oregon State Historic Preservation Officer that we are designating the City of Portland as the Commission's non-federal representative for carrying out informal consultation pursuant to section 7 of the Endangered Species Act, section 305(b) of the Magnuson-Stevens Fishery Conservation and Management Act, and section 106 of the National Historic Preservation Act.

m. A copy of the PAD is available for review on the Commission's website (*http://www.ferc.gov*), using the ''eLibrary'' link. Enter the docket number, excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). A copy is also available via the contact in paragraph h.

You may register online at *https://ferconline.ferc.gov/FERCOnline.aspx* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202)502–6595, or at *OPP@ferc.gov.*

n. With this notice, we are soliciting comments on the PAD and Commission staff's Scoping Document 1 (SD1), as well as study requests. All comments on the PAD and SD1, and study requests should be sent to the address above in paragraph h. In addition, all comments on the PAD and SD1, study requests, requests for cooperating agency status, and all communications to and from Commission staff related to the merits of the potential application must be filed with the Commission.

[1] On November 8, 2023, the City filed an application to amend the current license to revise Federal lands within the project boundary.

The Commission strongly encourages electronic filing. Please file documents using the Commission's eFiling system at *https://ferconline.ferc.gov/FERC Online.aspx.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *https://ferconline.ferc.gov/QuickComment.aspx.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online. In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Deputy Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Deputy Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. All filings must clearly identify the project name and docket number on the first page: Portland Hydroelectric Project (P–2821–014).

All filings with the Commission must bear the appropriate heading: ''Comments on Pre-Application Document,'' ''Study Requests,'' ''Comments on Scoping Document 1,'' ''Request for Cooperating Agency Status,'' or ''Communications to and from Commission Staff.'' Any individual or entity interested in submitting study requests, commenting on the PAD or SD1, and any agency requesting cooperating status must do so by April 6, 2024.

o. *Scoping Process:*

In accordance with the National Environmental Policy Act (NEPA), Commission staff will prepare either an environmental assessment (EA) or an environmental impact statement (EIS) (collectively referred to as the ''NEPA document''). The NEPA document will consider both site-specific and cumulative environmental effects, and reasonable alternatives to the proposed action. The Commission's scoping process will help determine the required level of analysis and satisfy the NEPA scoping requirements, irrespective of whether the Commission prepares an environmental assessment or Environmental Impact Statement.

Scoping Meetings

Commission staff will hold two scoping meetings for the project to receive input on the scope of the NEPA document. An evening meeting will focus on receiving input from the public and a daytime meeting will focus on concerns of resource agencies, Native American tribes, and non-governmental organizations (NGO). We invite all interested agencies, Native American tribes, NGOs, and the public to attend one or both meetings to assist us in identifying the scope of environmental issues that should be analyzed in the NEPA document. The dates and times of the virtual scoping meetings are listed below.

Evening meeting for the general public
Tuesday, February 27, 2024
Starting Time: 6:30 p.m. Pacific Standard Time (PST)
Location: Portland Water Bureau, Interstate Facility Auditorium, 664 N. Tillamook Street, Portland, OR 97227
Phone Number: (971) 347–9870

Daytime meeting for resource agencies, Tribes, and NGOs
Wednesday, February 28, 2024
Starting Time: 10:00 a.m. PST
Location: Portland Building, 1120 SW 5th Avenue, Room 108, Portland, OR 97204
Phone Number: (971) 347–9870

Copies of SD1, outlining the subject areas to be addressed in the environmental document, was mailed to the individuals and entities on the Commission's mailing list and City of Portland's PAD distribution list. Copies of SD1 may be viewed on the web at *http://www.ferc.gov,* using the ''eLibrary'' link. Follow the directions for accessing information in paragraph m. Based on all oral and written comments, a Scoping Document 2 (SD2) may be issued. SD2 may include a revised process plan and schedule, as well as a list of issues, identified through the scoping process.

Environmental Site Visit

City of Portland and Commission staff will hold an environmental site visit of the Portland Hydroelectric Project on Tuesday, February 27, 2024, 10 a.m. to 1:30 p.m. PST. You must register in advance if you are interested in attending a site visit. Please contact Ms. Shannon Mills by email at *HydroelectricProject@portlandoregon.gov,* or by phone at 971–347–9870 before Tuesday February 20, 2024, if you plan to attend the environmental site review. Please note that inclement weather may necessitate a virtual tour instead of an in-person site visit.

Meeting Objectives

At the scoping meetings, Commission staff will: (1) initiate scoping of the issues; (2) review and discuss existing conditions; (3) review and discuss existing information and identify preliminary information and study needs; (4) review and discuss the process plan and schedule for pre-filing activity that incorporates the time frames provided for in Part 5 of the Commission's regulations and, to the extent possible, maximizes coordination of Federal, State, and Tribal permitting and certification processes; and (5) discuss the potential of any Federal or State agency or Native American tribe to act as a cooperating agency for development of an environmental document. Meeting participants should come prepared to discuss their issues and/or concerns. Please review City of Portland's PAD in preparation for the scoping meetings. Directions on how to obtain a copy of the PAD and SD1 are included in item m of this document.

Meeting Procedures

The scoping meetings will be recorded by a court reporter, and all statements will become part of the Commission's public record for the project.

Agencies, Native American Tribes, NGOs, and individuals with environmental expertise and concerns are encouraged to attend the meetings and to assist Commission staff in defining and clarifying the issues to be addressed in the NEPA document.

Dated: February 2, 2024.

Debbie-Anne A. Reese,

Acting Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings #1

Take notice that the Commission received the following electric corporate filings:

Docket Numbers: EC24–46–000.
Applicants: Dogwood Energy LLC.
Description: Application for Authorization Under Section 203 of the Federal Power Act of Dogwood Energy LLC.
Filed Date: 2/1/24.
Accession Number: 20240201–5254.
Comment Date: 5 p.m. ET 2/22/24.

Take notice that the Commission received the following exempt wholesale generator filings:

Docket Numbers: EG24–101–000.
Applicants: Prescott Wind Energy LLC.
Description: Prescott Wind Energy LLC submits Notice of Self–Certification of Exempt Wholesale Generator Status.

Filed Date: 2/5/24.
Accession Number: 20240205–5026.
Comment Date: 5 p.m. ET 2/26/24.

Take notice that the Commission received the following electric rate filings:

Docket Numbers: ER10–2721–018.
Applicants: El Paso Electric Company.
Description: Notice of Non-Material Change in Status of El Paso Electric Company.
Filed Date: 1/31/24.
Accession Number: 20240131–5635.
Comment Date: 5 p.m. ET 2/21/24.

Docket Numbers: ER10–2984–065.
Applicants: Merrill Lynch Commodities, Inc.
Description: Notice of Change in Status of Merrill Lynch Commodities, Inc., et al.
Filed Date: 1/31/24.
Accession Number: 20240131–5643.
Comment Date: 5 p.m. ET 2/21/24.

Docket Numbers: ER10–3193–016; ER10–1901–015; ER10–3194–010; ER17–580–006; ER10–3195–011; ER19–2707–006; ER22–2030–003; ER22–2031–004; ER22–2580–003.
Applicants: CPV Three Rivers, LLC, Sonoran West Solar Holdings 2, LLC, Sonoran West Solar Holdings, LLC, Poseidon Wind, LLC, MATEP Limited Partnership, Axium Modesto Solar, LLC, MATEP LLC, Upper Peninsula Power Company, Brooklyn Navy Yard Cogeneration Partners, L.P.
Description: Notice of Non-Material Change in Status of Brooklyn Navy Yard Cogeneration Partners, L.P., et al.
Filed Date: 1/31/24.
Accession Number: 20240131–5640.
Comment Date: 5 p.m. ET 2/21/24.

Comment Date: 5 p.m. ET 2/26/24.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf*. For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov*.

Dated: February 5, 2024.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER24–1183–000]

Fanfare Energy, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of Fanfare Energy, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426,

in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is February 26, 2024.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact the Federal Energy Regulatory Commission at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Dated: February 5, 2024.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. OR24–3–000]

QT Fuels Incorporated v. Colonial Pipeline Company; Notice of Complaint

Take notice that on February 1, 2024, pursuant to Rule 206 of the Rules of Practice and Procedure of the Federal Energy Regulatory Commission, 18 CFR 385.206 (2023), QT Fuels Incorporated filed a complaint against Colonial Pipeline Company (''Colonial'') challenging the justness and reasonableness of the rates charged by Colonial for transportation service pursuant to certain tariffs on file with the Commission.

The Complainant certifies that copies of the complaint were served on the contacts listed for Respondents in the Commission's list of Corporate Officials.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. The Respondent's answer and all interventions, or protests must be filed on or before the comment date. The Respondent's answer, motions to intervene, and protests must be served on the Complainants.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field. User assistance is available for eLibrary and the Commission's website during normal business hours from FERC Online Support at 202–502–6652 (toll free at 1–866–208–3676) or email at *ferconlinesupport@ferc.gov,* or the Public Reference Room at (202) 502–8371, TTY (202) 502–8659. Email the Public Reference Room at *public.referenceroom@ferc.gov.*

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Comment Date: 5 p.m. eastern time on March 4, 2024.

EXPORT-IMPORT BANK

Sunshine Act Meetings

Notice of Open Meeting of the Advisory Committee of the Export-Import Bank of the United States (EXIM).

TIME AND DATE: Thursday, February 22, 2023, from 2:00 p.m.–3:30 p.m. EDT.

PLACE: Virtual meeting—The meeting will be virtually for committee members, EXIM's Board of Directors and support staff, and virtually for all other participants.

STATUS: Public Participation: The meeting will be open to public participation and time will be allotted for questions or comments submitted online. Members of the public may also file written statements before or after the meeting to *external@exim.gov.* Interested parties may register below for the meeting: *https://events.teams.microsoft.com/event/78ee9dee-6388-44d5-b95f-dce679df6ac5@b953013c-c791-4d32-996f-518390854527.*

MATTERS TO BE CONSIDERED:

Discussion of EXIM policies and programs to provide competitive financing to expand United States exports and comments for inclusion in EXIM's Report to the U.S. Congress on Global Export Credit Competition.

CONTACT PERSON FOR MORE INFORMATION: For further information, contact India Walker, External Enagagement Specialist, at 202–480–0062 or at *india.walker@exim.gov.*

Lin Zhou,

IT Specialist.

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[30Day–24–0840]

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled ''Formative Research and Tool Development'' to the Office of Management and Budget (OMB) for review and approval. CDC previously published a ''Proposed Data Collection Submitted for Public Comment and Recommendations'' notice on September 26, 2023 to obtain comments from the public and affected agencies. CDC received one non-substantive public comment related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

Formative Research and Tool Development (OMB Control No. 0920–0840, Exp. 7/31/2024)—Extension—National Center for HIV, Viral Hepatitis, STD, TB Prevention (NCHHSTP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Centers for Disease Control and Prevention (CDC), National Center for HIV, Viral Hepatitis, STD, and TB Prevention (NCHHSTP) requests approval for an Extension and a three-year approval for the previously approved Generic Clearance, ''Formative Research and Tool Development''. This information collection request is designed to allow NCHHSTP to conduct formative research information collection activities used to inform many aspects of surveillance, communications, health promotion, and research project development for NCHHSTP's four priority diseases (HIV/AIDS, sexually transmitted diseases/infections (STD/STI), viral hepatitis, tuberculosis elimination and the Division of School and Adolescent Heath (DASH)).

Formative research is the basis for developing effective strategies including communication channels, for influencing behavior change. It helps researchers identify and understand the characteristics—interests, behaviors and needs—of target populations that influence their decisions and actions. Formative research is integral in developing programs as well as improving existing and ongoing programs. Formative research also looks at the community in which a public health intervention is being, or will be implemented, and helps the project staff understand the interests, attributes and needs of different populations and persons in that community. Formative research is research that occurs before a program is designed and implemented,

or while a program is being conducted. NCHHSTP formative research is necessary for developing new programs or adapting programs that deal with the complexity of behaviors, social context, cultural identities, and health care that underlie the epidemiology of HIV/AIDS, viral hepatitis, STDs, and TB in the U.S, as well as for school and adolescent health. CDC conducts formative research to develop public-sensitive communication messages and user-friendly tools prior to developing or recommending interventions, or care. Sometimes these studies are entirely behavioral but most often they are cycles of interviews and focus groups designed to inform the development of a product.

Products from these formative research studies will be used for prevention of HIV/AIDS, Sexually Transmitted Infections (STI), viral Hepatitis, and Tuberculosis. Findings from these studies may also be presented as evidence to disease-specific National Advisory Committees, to support revisions to recommended prevention and intervention methods, as well as to develop new recommendations. Much of CDC's health communication takes place within campaigns that have lengthy planning periods—timeframes that accommodate the standard federal process for approving data collections. Short-term qualitative interviewing and cognitive research techniques have previously proven invaluable in the development of scientifically valid and population-appropriate methods, interventions, and instruments.

This request includes studies investigating the utility and acceptability of proposed sampling and recruitment methods, intervention contents and delivery, questionnaire domains, individual questions, and interactions with project staff or electronic data collection equipment. These activities will also provide information about how respondents answer questions and ways in which question response bias and error can be reduced. This request also includes collection of information from public health programs to assess needs related to initiation of a new program activity or expansion or changes in scope or implementation of existing program activities to adapt them to current needs. The information collected will be used to advise programs and provide capacity-building assistance tailored to identified needs.

Overall, these development activities are intended to provide information that will increase the success of the surveillance or research projects through increasing response rates and decreasing response error, thereby decreasing future data collection burden to the public. The studies that will be covered under this request will include one or more of the following investigational modalities: (1) structured and qualitative interviewing for surveillance, research, interventions and material development; (2) cognitive interviewing for development of specific data collection instruments; (3) methodological research; (4) usability testing of technology-based instruments and materials; (5) field testing of new methodologies and materials; (6) investigation of mental models for health decision-making, to inform health communication messages; and (7) organizational needs assessments to support development of capacity. Respondents who will participate in individual and group interviews (qualitative, cognitive, and computer assisted development activities) are selected purposively from those who respond to recruitment advertisements. In addition to utilizing advertisements for recruitment, respondents who will participate in research on survey methods may be selected purposively or systematically from within an ongoing surveillance or research project.

CDC requests OMB approval for an estimated 46,516 annual burden hours. Participation by respondents is voluntary, and there is no cost to participants other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form mame	Number of respondents	Number of responses per respondent	Average hours per response
General public	Screener	56,840	1	10/60
Health care providers	Screener	24,360	1	10/60
General public	Consent Forms	28,420	1	5/60
Health care providers	Consent Forms	12,180	1	5/60
General public	Individual Interview	4,620	1	1
Health care providers	Individual Interview	1,980	1	1
General public	Focus Group Interview	2,800	1	2
Health care providers	Focus Group Interview	1,200	1	2
General public	Survey of Individual	21,000	1	30/60
Health care providers	Survey of Individual	9,000	1	30/60

Jeffrey M. Zirger,

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled ''The Division of Workforce Development (DWD) Fellowship Alumni Assessment'' to the Office of Management and Budget (OMB) for review and approval. CDC previously published a ''Proposed Data Collection Submitted for Public Comment and Recommendations'' notice on October 30, 2023, to obtain comments from the public and affected agencies. CDC received one comment related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

The Division of Workforce Development (DWD) Fellowship Alumni Assessment (OMB Control No. 0920–1078, Exp. 02/29/2024)—Revision—National Center for State, Tribal, Local, and Territorial Public Health Infrastructure and Workforce (NCSTLTPHIW), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Centers for Disease Control and Prevention (CDC) works to protect America from health, safety and security threats, both foreign and in the U.S. CDC strives to fulfill this mission, in part, through a competent and capable public health workforce. One mechanism for developing the public health workforce is through fellowship programs like those sponsored and supported by the Division of Workforce Development (DWD). A robust public health workforce has sufficient workforce, organizational, and systems capacity to deliver essential public health services and protect the public's health. In 2023, after an agency-wide CDC reorganization, a number of CDC career fellowships were consolidated within one new division, DWD, which has a lead role in public health workforce development. Across all of its branches, DWD manages or supports many full-time, cross-cutting career fellowship programs that support CDC and State, Tribal, local, and Territorial health departments, and partner organizations. Through these programs, DWD strives to provide quality training for current and future members of the public health workforce to ensure they have foundational and contemporary public health skills. Nearly all these programs serve as a pathway to CDC career communities and are an important source of supply for the public health workforce.

In 2015, CDC obtained OMB approval to conduct follow-up surveys of alumni who had completed the Public Health Associate Program (PHAP) (OMB No. 0920–1078). Findings from the PHAP alumni surveys have improved CDC's understanding of alumni retention and career progression in the public health workforce and have informed management of the PHAP. In this Revision, CDC proposes to build on lessons learned in PHAP fellowship evaluation. CDC will broaden the scope of information collection to accommodate the full portfolio of DWD fellowships, which currently includes the Epidemiology Elective Program (EEP), Evaluation Fellowship Program(EFP), Epidemic Intelligence Service (EIS), Future Leaders in Infectious and Global Health Threats (FLIGHT), Laboratory Leadership Service (LLS), CDC Steven M. Teutsch Prevention Effectiveness (PE) Fellowship, Public Health Informatics Fellowship Program (PHIFP), and the Science Ambassador Fellowship (SAF), in addition to the Public Health Associate Program (PHAP). This ICR is also intentionally removing the host site supervisor component included in the original ICR. This revision will specifically focus on fellowship alumni only. A new ICR will be created for any host site supervisor surveys these fellowships may seek to conduct.

Each year, new cohorts ranging from three to 200 individuals are enrolled across these fellowship programs. While each fellowship differs in focus area, type of fellow, and projects, they all have the same mission: to train and provide learning opportunities to early- and mid-career professionals who contribute to the public health workforce. All share a common goal that, post-fellowship, alumni seek employment within the public health system (*i.e.,* Federal, State, Tribal, local, or Territorial health agencies, or non-governmental organizations). Given this common goal, CDC will apply a common approach to assessing how fellowship participation impacts the job placement, retention in the public health workforce, and career progression of alumni. DWD Fellowship Alumni Surveys will be administered to individual program alumni at three different time points (one year, three years, and five years post-program completion). Each fellowship program will invite their program's alumni to participate. Fellowships will be deploying surveys specific to their programs. Assessment questions will remain consistent at each administration timepoint (*i.e.,* one year, three years, or five years post-program completion). The language, however, will be updated for each survey administration to reflect the appropriate time period. There is a core set of assessment questions that all fellowship programs will use. Each program can also add fellowship-specific questions to their surveys to ensure relevance of the surveys to each program's alumni. Surveys will be administered electronically; a link to the survey will be provided in an email invitation. CDC will use survey findings to document program outcomes, demonstrate evidence of impact, and inform decision making about future program direction. The results of these surveys may be published in peer reviewed journals and/or in non-scientific publications such as practice reports and/or fact sheets.

OMB approval is requested for three years. The estimated burden is between 8–25 minutes per respondent per survey, and the total annualized estimated burden is 175 hours. Participation is voluntary and there are no costs to respondents other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
EEP Alumni	EEP Alumni Survey	135	1	20/60
EFP Alumni	EFP Alumni Survey	60	1	8/60
EIS/LLS Alumni	EIS/LLS Alumni Survey	210	1	25/60
FLIGHT Alumni	FLIGHT Alumni Survey	5	1	8/60
PE Fellowship Alumni	PE Fellowship Alumni Survey	25	1	8/60
PHIFP Alumni	PHIFP Alumni Survey	20	1	8/60
PHAP Alumni	PHAP Alumni Survey	130	1	8/60
SAF Alumni	SAF Alumni Survey	60	1	10/60

Jeffrey M. Zirger,

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–24–0493; Docket No. CDC–2024–0010]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies the opportunity to comment on a continuing information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled 2025 and 2027 National Youth Risk Behavior Survey (YRBS). CDC is requesting a three-year approval to reinstate, with changes, the data collection for the national YRBS, a biennially school-based survey of high school students in the United States. This project includes a validation study that will inform the development of questions for the 2027 YRBS questionnaire.

DATES: CDC must receive written comments on or before April 9, 2024.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2024–0010 by either of the following methods:

- *Federal eRulemaking Portal: www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to *www.regulations.gov.*

Please note: Submit all comments through the Federal eRulemaking portal (*www.regulations.gov*) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329; Telephone: 404–639–7118; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected;

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses; and

5. Assess information collection costs.

Proposed Project

2025 and 2027 National Youth Risk Behavior Survey (OMB Control No. 0920–0493)—Reinstatement with Change—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The purpose of this request is to obtain OMB approval to reinstate with change, the data collection for the National Youth Risk Behavior Survey (YRBS) (OMB Control No. 0920–0493), a school-based survey that has been conducted biennially since 1991. OMB approval for the 2021 YRBS and 2023 YRBS expired November 30, 2023. CDC seeks a three-year approval to conduct the YRBS in Spring 2025 and Spring 2027. Changes incorporated into this Reinstatement request include the addition of a validation study of fruit and vegetable intake, the results of which will be used to inform changes to the 2027 YRBS questionnaire. Additional changes include an updated title for the information collection to accurately reflect the years in which the survey will be conducted and minor

changes to the data collection instrument.

The YRBS assesses priority health risk behaviors related to the major preventable causes of mortality, morbidity, and social problems among both youth and young adults in the United States. Data on health risk behaviors of adolescents are the focus of approximately 65 national health objectives in Healthy People 2030, an initiative of the U.S. Department of Health and Human Services (HHS). The YRBS provides data to measure 14 Healthy People 2030 objectives. In addition, the YRBS can identify racial and ethnic disparities in health risk behaviors. No other national source of data measures as many of the Healthy People 2030 objectives addressing adolescent health risk behaviors as the YRBS. The data also will have significant implications for policy and program development for school health programs nationwide.

In Spring 2025 and Spring 2027, the YRBS will be conducted among nationally representative samples of students attending public and private schools in Grades 9–12, and in 2025, the validation study will be conducted among a convenience sample of schools and students. Information supporting the YRBS also will be collected from state-, district-, and school-level administrators and teachers. The table below reports the number of respondents annualized over the three-year project period. The total estimated annualized burden hours are 4,388. There are no costs to respondents other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hr)	Total burden (in hr)
State Administrators	State-level Recruitment Script for the Youth Risk Behavior Survey.	17	1	30/60	9
District Administrators	District-level Recruitment Script for the Youth Risk Behavior Survey.	80	1	30/60	40
School Administrators	School-level Recruitment Script for the Youth Risk Behavior Survey.	133	1	30/60	67
School Administrators	School-level Recruitment Script for the Validation Study.	6	1	30/60	3
Teachers	Permission Form Tracking Log for the Youth Risk Behavior Survey.	440	1	15/60	110
Teachers	Permission Form Tracking Log for the Validation Study.	14	1	15/60	4
Students	Youth Risk Behavior Survey	8,045	1	30/60	4022
Students	Dietary Behavior Questionnaire	200	1	10/60	33
Students	24-hour Dietary Recall Interview	200	1	30/60	100
Total					4,388

[60Day–24–24CR; Docket No. CDC–2024–0011]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other federal agencies the opportunity to comment on a proposed information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled Global Public Health Data Innovation Performance Monitoring. This data collection is designed to help government decision makers gather timely, accurate, and comprehensive public health data to effectively prevent, detect, and respond to public health threats.

DATES: CDC must receive written comments on or before April 9, 2024.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2024–0011 by either of the following methods:

- *Federal eRulemaking Portal: www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to *www.regulations.gov.*

Please note: Submit all comments through the Federal eRulemaking portal (*www.regulations.gov*) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329; Telephone: 404–639–7570; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new

proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected;

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses; and

5. Assess information collection costs.

Proposed Project

Global Public Health Data Innovation (GPHDI) Performance Monitoring—New—Global Health Center (GHC), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Global Public Health Data Innovation (GPHDI) initiative, led by the Centers for Disease Control and Prevention (CDC), aims to equip government decision makers with timely, accurate, and comprehensive public health data to effectively prevent, detect, and respond to public health threats. Challenges, such as limited data access, non-standardization, workforce limitations, and gaps in data systems and governance, often hinder the optimal use of data in public health response efforts. To overcome these challenges, GPHDI focuses on strengthening global outbreak response, pandemic preparedness, and surveillance through improved data availability and utilization. This is achieved by modernizing data systems and processes at all levels.

GPHDI is made possible by the American Rescue Plan Act passed by the Congress in 2021 and is rooted in key strategic pillars within CDC, namely the Data Modernization Initiative (DMI) and the Global Digital Health Strategy (GDHS). DMI is an agency-wide initiative aimed at improving data systems infrastructure within the United States. It offers valuable insights and artifacts that can be adapted and leveraged for the global context of the GPHDI initiative. The goal of DMI is to get better, faster, actionable insights for decision making at all levels of public health. Complementing this, the GDHS incorporates inputs from a multi-partner engagement process, enhancing the strategic approach of the initiative.

GPHDI is a current three-year investment that builds on an existing foundation laid by various country governments, donor agencies, and multilateral organizations. This investment is specifically allocated to advance the initiative in 10 selected countries, including Kenya, Sierra Leone, Uganda, and Zambia in Africa; Colombia and Paraguay in the South American Region; Georgia and Ukraine in Eastern Europe; Thailand in the Central Asia Region; and Honduras in the Central American Region. This data collection is aimed at monitoring and assessing the contributions of current GPHDI investments in data modernization and digital public health infrastructure towards improving data availability to prevent, detect, and respond to public health threats in the selected countries. The indicators to be collected include both structured response-type questions (Yes-No answers, coded answers) and narrative response-type questions. CDC contractors, RTI International (RTI) will conduct the interviews and CDC funded implementing partners (IPs) monitoring and evaluation (M&E) point of contacts will provide responses to the indicators based on their funded activities. RTI will document the responses from the interviews using CDC RedCap. Interviews will be conducted in a live one-on-one session between RTI and identified M&E point of contacts at the funded IPs. No patient-level or individual level or identifiable data will be collected for this project.

CDC requests OMB approval for an estimated 64 annual burden hours. Respondents will be responding to this data collection as a part of the organizations' funding requirements and obligation. There is no cost to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Implementing partners (Monitoring and evaluation point of contacts).	Monitoring question guide	32	1	2	64
					64

Jeffrey M. Zirger,

Lead, Information Collection Review Office, Office of Public Health Ethics and Regulations, Office of Science, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifiers: CMS–10291, CMS–10529, CMS–10722, and CMS–R–148]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by April 9, 2024.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to *http://www.regulations.gov.* Follow the instructions for ''Comment or Submission'' or ''More Search Options'' to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number: Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, please access the CMS PRA website by copying and pasting the following web address into your web browser: *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.*

FOR FURTHER INFORMATION CONTACT: William N. Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS–10291 State Collection and Reporting of Dental Provider and Benefit Package Information on the Insure Kids Now! Website and Hotline

CMS–10529 Quarterly Medicaid and CHIP Budget and Expenditure Reporting for the Medical Assistance Program, Administration and CHIP

CMS–10722 Annual State Report on CMS Value Based Purchasing Arrangements (VBP) Supplemental Rebate Agreements

CMS–R–148 Limitations on Provider Related Donations and Health Care Related Taxes, Medicaid and Supporting Regulations in 42 CFR 433.68 through 433.74

Under the PRA (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires Federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collection

1. Type of Information Collection Request: Extension without change of a currently approved collection; *Title of Information Collection:* State Collection and Reporting of Dental Provider and Benefit Package Information on the Insure Kids Now! Website and Hotline; *Use:* On the Insure Kids Now (IKN) website, the Secretary is required to post a current and accurate list of dentists and providers that provide dental services to children enrolled in the State plan (or waiver) under Medicaid or the State child health plan (or waiver) under CHIP. States collect the information pertaining to their Medicaid and CHIP dental benefits. *Form Number:* CMS–10291 (OMB control number: 0938–1065); *Frequency:* Yearly and quarterly; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 51; Total Annual Responses: 255; *Total Annual Hours:* 11,781. (For policy questions regarding this collection contact Andrew Snyder at 410–786–1274.)

2. Type of Information Collection Request: Extension without change of a currently approved collection; *Title of Information Collection:* Quarterly Medicaid and CHIP Budget and Expenditure Reporting for the Medical Assistance Program, Administration and CHIP; *Use:* The Medicaid and CHIP Financial System is a financial reporting system that produces budget estimate statements for Forms CMS–37 and CMS–21B. The Medicaid and CHIP Budget and Expenditure System is a financial reporting system that produces expenditure statements for Forms CMS–64 and CMS–21. All forms are to be filed on a quarterly basis and need to be certified by the States. *Form Number:* CMS–10529 (OMB control number: 0938–1265); *Frequency:* Quarterly; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 56; *Total Annual Responses:* 672; *Total Annual Hours:* 18,144. (For policy questions regarding this collection contact Robert Lane at 410–786–2015.)

3. Type of Information Collection Request: Revision of a currently approved collection; *Title of Information Collection:* Annual State Report on CMS Value Based Purchasing Arrangements (VBP) Supplemental Rebate Agreements; *Use:* The reported data is being collected to safeguard against unnecessary utilization of such care and services and to assure that State payments to providers of Medicaid

services are consistent with efficiency, economy, and quality of care. CMS will collect this data to ensure that VBP programs adopted by States continue to meet these standards. *Form Number:* CMS–10722 (OMB control number: 0938–1385); *Frequency:* Yearly; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 51; *Total Annual Responses:* 51; *Total Annual Hours:* 306. (For policy questions regarding this collection contact Abraham Weinschneider at 410–786–5688.)

4. Type of Information Collection Request: Extension without change of a currently approved collection; *Title of Information Collection:* Limitations on Provider Related Donations and Health Care Related Taxes, Medicaid and Supporting Regulations in 42 CFR 433.68 through 433.74; *Use:* States may elect to submit a waiver to CMS for the broad based and/or uniformity requirements for any health care related tax program which does not conform to the broad based and uniformity requirements. It is also the responsibility of each State to demonstrate that their tax program(s) do not violate the hold harmless provision. For a waiver to be approved and a determination that the hold harmless provision is not violated, States must submit written documentation which satisfies the regulatory requirements. Without this information, the amount of FFP (Federal financial participation) payable to a State cannot be correctly determined. *Form Number:* CMS–R–148 (OMB control number: 0938–0618); *Frequency:* Quarterly and occasionally; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 50; *Total Annual Responses:* 40; *Total Annual Hours:* 3,200. (For policy questions regarding this collection contact Stuart Goldstein at 410–786–0694.)

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2023–P–4279]

Determination That QMIIZ (Meloxicam) Orally Disintegrating Tablets, 7.5 Milligrams and 15 Milligrams, Were Not Withdrawn From Sale for Reasons of Safety or Effectiveness

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) has determined that QMIIZ (meloxicam) Orally Disintegrating Tablets, 7.5 milligrams (mg) and 15 mg, were not withdrawn from sale for reasons of safety or effectiveness. This determination will allow FDA to approve abbreviated new drug applications (ANDAs) for QMIIZ (meloxicam) Orally Disintegrating Tablets, 7.5 mg and 15 mg, if all other legal and regulatory requirements are met.

FOR FURTHER INFORMATION CONTACT: Nikki Mueller, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6280, Silver Spring, MD 20993–0002, 301–796–3507, *Nicole.Mueller@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Section 505(j) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 355(j)) allows the submission of an ANDA to market a generic version of a previously approved drug product. To obtain approval, the ANDA applicant must show, among other things, that the generic drug product: (1) has the same active ingredient(s), dosage form, route of administration, strength, conditions of use, and (with certain exceptions) labeling as the listed drug, which is a version of the drug that was previously approved, and (2) is bioequivalent to the listed drug. ANDA applicants do not have to repeat the extensive clinical testing otherwise necessary to gain approval of a new drug application (NDA).

Section 505(j)(7) of the FD&C Act requires FDA to publish a list of all approved drugs. FDA publishes this list as part of the ''Approved Drug Products With Therapeutic Equivalence Evaluations,'' which is known generally as the ''Orange Book.'' Under FDA regulations, drugs are removed from the list if the Agency withdraws or suspends approval of the drug's NDA or ANDA for reasons of safety or effectiveness or if FDA determines that the listed drug was withdrawn from sale for reasons of safety or effectiveness (21 CFR 314.162).

A person may petition the Agency to determine, or the Agency may determine on its own initiative, whether a listed drug was withdrawn from sale for reasons of safety or effectiveness. This determination may be made at any time after the drug has been withdrawn from sale, but must be made prior to approving an ANDA that refers to the listed drug (§ 314.161 (21 CFR 314.161)). FDA may not approve an ANDA that does not refer to a listed drug.

QMIIZ (meloxicam) Orally Disintegrating Tablets, 7.5 mg and 15 mg, are the subject of NDA 211210, held by TerSera Therapeutics LLC (TerSera), and initially approved on October 19, 2018. QMIIZ is a non-steroidal anti-inflammatory indicated for osteoarthritis in adults, rheumatoid arthritis in adults, and pauciarticular or polyarticular course juvenile rheumatoid arthritis in pediatric patients who weigh greater than or equal to 60 kilograms.

In a letter dated March 24, 2021, TeraSera notified FDA that QMIIZ (meloxicam) Orally Disintegrating Tablets, 7.5 mg and 15 mg, were being discontinued, and FDA moved the drug product to the ''Discontinued Drug Product List'' section of the Orange Book.

Pharmobedient Consulting submitted a citizen petition dated September 27, 2023 (Docket No. FDA–2023–P–4279), under 21 CFR 10.30, requesting that the Agency determine whether QMIIZ (meloxicam) Orally Disintegrating Tablets, 7.5 mg and 15 mg, were withdrawn from sale for reasons of safety or effectiveness.

After considering the citizen petition and reviewing Agency records and based on the information we have at this time, FDA has determined under § 314.161 that QMIIZ (meloxicam) Orally Disintegrating Tablets, 7.5 mg and 15 mg, were not withdrawn for reasons of safety or effectiveness. The petitioner has identified no data or other information suggesting that QMIIZ (meloxicam) Orally Disintegrating Tablets, 7.5 mg and 15 mg, were withdrawn for reasons of safety or effectiveness. We have carefully reviewed our files for records concerning the withdrawal of QMIIZ (meloxicam) Orally Disintegrating Tablets, 7.5 mg and 15 mg, from sale. We have also independently evaluated relevant literature and data for possible postmarketing adverse events. We have reviewed the available evidence and determined that this drug product was

not withdrawn from sale for reasons of safety or effectiveness.

Accordingly, the Agency will continue to list QMIIZ (meloxicam) Orally Disintegrating Tablets, 7.5 mg and 15 mg, in the ''Discontinued Drug Product List'' section of the Orange Book. The ''Discontinued Drug Product List'' delineates, among other items, drug products that have been discontinued from marketing for reasons other than safety or effectiveness. ANDAs that refer to QMIIZ (meloxicam) Orally Disintegrating Tablets, 7.5 mg and 15 mg, may be approved by the Agency as long as they meet all other legal and regulatory requirements for the approval of ANDAs. If FDA determines that labeling for this drug product should be revised to meet current standards, the Agency will advise ANDA applicants to submit such labeling.

Dated: February 6, 2024.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–N–0014]

Vaccines and Related Biological Products Advisory Committee; Notice of Meeting; Establishment of a Public Docket; Request for Comments

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; establishment of a public docket; request for comments.

SUMMARY: The Food and Drug Administration (FDA) announces a forthcoming public advisory committee meeting of the Vaccines and Related Biological Products Advisory Committee (VRBPAC). The general function of the committee is to provide advice and recommendations to FDA on regulatory issues. This meeting will be held to discuss and make recommendations on the selection of strains to be included in the influenza virus vaccines for the 2024 to 2025 influenza season. The meeting will be open to the public.

DATES: The meeting will be held virtually on March 5, 2024, from 9 a.m. to 3:30 p.m. Eastern Time.

ADDRESSES: All meeting participants will be heard, viewed, captioned, and recorded for this advisory committee meeting via an online teleconferencing and/or video conferencing platform. The online web conference meeting will be available at the following link on the day of the meeting: *https://youtube.com/live/Wf0aE32DPKc.*

Answers to commonly asked questions about FDA advisory committee meetings may be accessed at: *https://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm408555.htm.* FDA is establishing a docket for public comment on this meeting. The docket number is FDA–2024–N–0014. The docket will close on March 4, 2024. Please note that late, untimely filed comments will not be considered. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of March 4, 2024. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Comments received on or before February 26, 2024, will be provided to the committee. Comments received on or after February 26, 2024, and by March 4, 2024, will be taken into consideration by FDA. In the event that the meeting is cancelled, FDA will continue to evaluate any relevant applications or information, and consider any comments submitted to the docket, as appropriate.

You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2024–N–0014 for ''Vaccines and Related Biological Products Advisory Committee (VRBPAC); Notice of Meeting; Establishment of a Public Docket; Request for Comments.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' FDA will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify the information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Sussan Paydar or Valerie Vashio, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Silver Spring, MD 20993–0002, 202–657–8533, *CBERVRBPAC@fda.hhs.gov* or FDA Advisory Committee Information Line, 1–800–741–8138 (301–443–0572 in the Washington, DC area). A notice in the **Federal Register** about last minute modifications that impact a previously announced advisory committee meeting cannot always be published quickly enough to provide timely notice. Therefore, you should always check the FDA's website at *https://www.fda.gov/AdvisoryCommittees/default.htm* and scroll down to the appropriate advisory committee meeting link, or call the advisory committee information line to learn about possible modifications before coming to the meeting.

SUPPLEMENTARY INFORMATION:

Agenda: The meeting presentations will be heard, viewed, captioned, and recorded through an online teleconferencing and/or video conferencing platform. On March 5, 2024, the committee will meet in open session to discuss and make recommendations on the selection of strains to be included in the influenza virus vaccines for the 2024 to 2025 influenza season.

FDA intends to make background material available to the public no later than 2 business days before the meeting. If FDA is unable to post the background material on its website prior to the meeting, the background material will be made publicly available on FDA's website at the time of the advisory committee meeting. Background material and the link to the online teleconference and/or video conference meeting will be available at: *https://www.fda.gov/AdvisoryCommittees/Calendar/default.htm.* Scroll down to the appropriate advisory committee meeting link. The meeting will include slide presentations with audio and video components to allow the presentation of materials in a manner that most closely resembles an in-person advisory committee meeting.

Procedure: Interested persons may present data, information, or views, orally or in writing, on issues pending before the Committee. All electronic and written submissions to the Docket (see **ADDRESSES**) on or before February 26, 2024, will be provided to the Committee. Comments received on or after February 26, 2024, and by March 4, 2024, will be taken into consideration by FDA. Oral presentations from the public will be scheduled between approximately 1:30 p.m. and 2:30 p.m. Eastern Time. Those individuals interested in making formal oral presentations should notify the contact person and submit a brief statement of the general nature of the evidence or arguments they wish to present, along with their names, email addresses, and direct contact phone numbers of proposed participants, on or before 12 p.m. Eastern Time on Friday, February 16, 2024. Time allotted for each presentation may be limited. If the number of registrants requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session, FDA may conduct a lottery to determine the speakers for the scheduled open public hearing session. The contact person will notify interested persons regarding their request to speak by 6 p.m. Wednesday, February 21, 2024.

For press inquiries, please contact the Office of Media Affairs at *fdaoma@fda.hhs.gov* or 301–796–4540.

FDA welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with disabilities. If you require accommodations due to a disability, please contact Sussan Paydar or Valerie Vashio (See **FOR FURTHER INFORMATION CONTACT**) at least 7 days in advance of the meeting.

FDA is committed to the orderly conduct of its advisory committee meetings. Please visit our website at *https://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm111462.htm* for procedures on public conduct during advisory committee meetings.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. 1001 *et seq.*) This meeting notice also serves as notice that, pursuant to 21 CFR 10.19, the requirements in 21 CFR 14.22(b), (f), and (g) relating to the location of advisory committee meetings are hereby waived to allow for this meeting to take place using an online meeting platform. This waiver is in the interest of allowing greater transparency and opportunities for public participation, in addition to convenience for advisory committee members, speakers, and guest speakers. The conditions for issuance of a waiver under 21 CFR 10.19 are met.

Dated: February 6, 2024.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2023–N–4717]

Brendon Gagne: Final Debarment Order

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is issuing an order under the Federal Food, Drug, and Cosmetic Act (the FD&C Act) debarring Brendon Gagne for a period of 5 years from importing or offering for import any drug into the United States. FDA bases this order on a finding that Mr. Gagne was convicted of one felony

count under Federal law for conspiracy to smuggle goods into the United States. The factual basis supporting Mr. Gagne's conviction, as described below, is conduct relating to the importation into the United States of a drug or controlled substance. Mr. Gagne was given notice of the proposed debarment and was given an opportunity to request a hearing to show why he should not be debarred. As of January 5, 2024 (30 days after receipt of the notice), Mr. Gagne had not responded. Mr. Gagne's failure to respond and request a hearing constitutes a waiver of his right to a hearing concerning this matter.

DATES: This order is effective February 9, 2024.

ADDRESSES: Any application by Mr. Gagne for termination of debarment under section 306(d)(1) of the FD&C Act (21 U.S.C. 335a(d)(1)) may be submitted as follows:

Electronic Submissions

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. An application submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your application will be made public, you are solely responsible for ensuring that your application does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your application, that information will be posted on *https://www.regulations.gov.*
- If you want to submit an application with confidential information that you do not wish to be made available to the public, submit the application as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For a written/paper application submitted to the Dockets Management Staff, FDA will post your application, as well as any attachments, except for information submitted, marked, and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All applications must include the Docket No. FDA–2023–N–4717. Received applications will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit an application with confidential information that you do not wish to be made publicly available, submit your application only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of your application. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852 between 9 a.m. and 4 p.m., Monday through Friday. Publicly available submissions may be seen in the docket.

FOR FURTHER INFORMATION CONTACT: Jaime Espinosa, Division of Compliance and Enforcement, Office of Policy, Compliance, and Enforcement, Office of Regulatory Affairs, Food and Drug Administration, at 240–402–8743, or *debarments@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Section 306(b)(1)(D) of the FD&C Act (21 U.S.C. 335a(b)(1)(D)) permits debarment of an individual from importing or offering for import any drug into the United States if FDA finds, as required by section 306(b)(3)(C) of the FD&C Act, that the individual has been convicted of a felony for conduct relating to the importation into the United States of any drug or controlled substance.

On August 31, 2023, Mr. Gagne was convicted as defined in section 306(l)(1) of the FD&C Act in the U.S. District Court for Western District of Michigan when the court accepted his plea of guilty and entered judgment against him for two offenses, one of which was for conspiracy to smuggle goods into the United States in violation of 18 U.S.C. 371 and 545. The underlying facts supporting the conviction are as follows: As contained in the indictment from Mr. Gagne's case, filed on March 1, 2022, in the transcript from his guilty plea proceeding which was held on February 27, 2023, and from the Defendant's sentencing brief filed on August 15, 2023, beginning in or about 2018 and continuing until in or about October 2021, several individuals ran a website, *www.ExpressPCT.com,* which sold misbranded prescription drugs, as well as some Schedule III and Schedule IV controlled substances, in the United States without requiring a prescription. The drugs were manufactured overseas and then shipped in bulk to the United States to domestic redistributors. The packages did not declare their illicit contents and instead took steps to conceal their true nature. Once the packages entered the United States, the redistributors sent the bulk orders to second tier U.S.-based distributors who then finally shipped the drugs to the customers, making the purchasers think their drugs came from the United States and not from overseas. Part of Mr. Gagne's role in the scheme was to receive, repackage, and reship prescription drugs he received from other co-conspirators outside of the United States that were purchased by customers on the website *www.ExpressPCT.com.* In addition, Mr. Gagne recruited, managed and, using the profits from the sale of the misbranded prescription drugs, paid others engaged in the scheme who also received, repackaged, and reshipped prescription drugs they received from other co-conspirators outside of the United States.

As a result of this conviction, FDA sent Mr. Gagne, by certified mail, on November 30, 2023, a notice proposing to debar him for a 5-year period from importing or offering for import any drug into the United States. The proposal was based on a finding under section 306(b)(3)(C) of the FD&C Act that Mr. Gagne's felony conviction under Federal law for conspiracy to smuggle goods into the United States in violation of 18 U.S.C. 371 and 545, was

for conduct relating to the importation of any drug or controlled substance into the United States because Mr. Gagne was involved in a scheme to illegally import and introduce misbranded prescription drugs into the United States. In proposing a debarment period, FDA weighed the considerations set forth in section 306(c)(3) of the FD&C Act that it considered applicable to Mr. Gagne's offense and concluded that the offense warranted the imposition of a 5-year period of debarment.

The proposal informed Mr. Gagne of the proposed debarment and offered him an opportunity to request a hearing, providing him 30 days from the date of receipt of the letter in which to file the request, and advised him that failure to request a hearing constituted a waiver of the opportunity for a hearing and of any contentions concerning this action. Mr. Gagne received the proposal and notice of opportunity for a hearing on December 6, 2023. Mr. Gagne failed to request a hearing within the timeframe prescribed by regulation and has, therefore, waived his opportunity for a hearing and waived any contentions concerning his debarment (21 CFR part 12).

II. Findings and Order

Therefore, the Assistant Commissioner, Office of Human and Animal Food Operations, under section 306(b)(3)(C) of the FD&C Act, under authority delegated to the Assistant Commissioner, finds that Mr. Brendon Gagne has been convicted of a felony under Federal law for conduct relating to the importation into the United States of any drug or controlled substance. FDA finds that the offense should be accorded a debarment period of 5 years as provided by section 306(c)(2)(A)(iii) of the FD&C Act.

As a result of the foregoing finding, Mr. Gagne is debarred for a period of 5 years from importing or offering for import any drug into the United States, effective (see **DATES**). Pursuant to section 301(cc) of the FD&C Act (21 U.S.C. 331(cc)), the importing or offering for import into the United States of any drug by, with the assistance of, or at the direction of Mr. Gagne is a prohibited act.

Dated: February 6, 2024.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Submission to OMB for Review and Approval; Public Comment Request; HRSA Grantee Satisfaction Survey

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, HRSA submitted an Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and approval. Comments submitted during the first public review of this ICR will be provided to OMB. OMB will accept further comments from the public during the review and approval period. OMB may act on HRSA's ICR only after the 30-day comment period for this notice has closed.

DATES: Comments on this ICR should be received no later than March 11, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: To request a copy of the clearance requests submitted to OMB for review, email Joella Roland, the HRSA Information Collection Clearance Officer, at *paperwork@hrsa.gov* or call (301) 443–3983.

SUPPLEMENTARY INFORMATION:

Information Collection Request Title: HRSA Grantee Satisfaction Survey:

OMB No. 0906–0006—Revision.

Abstract: HRSA plans to survey HRSA grant recipients to better understand their opinions about HRSA's grants processes and to improve the way HRSA conducts business with them. This survey will focus on grantee customer satisfaction areas related to the grant life cycle, grantee relationships with HRSA staff (*e.g.,* Project Officers, Grants Management Officers), technical assistance received from HRSA Bureaus and Offices, availability of grant resources, and grantee access to guidance and instructional documents, etc. The seven grants management areas, which are directly related to the grants life cycle, are: Customer Service/Cooperation; Policies and Procedures; Pre-Award Phase; Award Phase; Reporting/Post-Award Administration; Technical Assistance; and Priorities for Improvement. Receiving this information from external customers will provide HRSA with a repository of information that will be incorporated into strategic efforts to improve grants management services and customer service.

HRSA revised the planned survey to reflect a change in the sampling methodology. In past survey administration cycles, HRSA sent a single survey to each organization and asked them to complete the survey for the award they had received from HRSA for the longest time period. This past approach did not allow for a range of program-specific feedback from HRSA grantees. In this survey administration cycle, HRSA will send the survey to each individual grant project director and ask them to complete the survey for a specific award. This new approach will enable HRSA to obtain more granular and actionable information regarding the full range of grant awards received by HRSA awardees.

Compared to the 60-day **Federal Register** notice, HRSA anticipates the number of potential survey respondents will increase from 3,690 to 7,813 due to the change in the sampling methodology. HRSA also anticipates an increase in the burden hours compared to the 60-day **Federal Register** notice, based on a reassessment of the time completion of the survey conducted during a pre-test. The adjusted average of completing the survey is 0.34 hours per response.

A 60-day notice for this information collection was published in the **Federal Register** on March 10, 2023, Vol. 88, No. 47; pp. 15053. There were no public comments.

Need and Proposed Use of the Information: The HRSA Grantee Satisfaction Survey will provide meaningful and relevant results to agency decision-makers about various customer satisfaction domains (*e.g.,* efficiency, timeliness, usefulness, responsiveness, quality of and overall satisfaction with HRSA project officers, products and services). The information collected will assist HRSA in its efforts to gauge, understand and respond to the needs and concerns of its customers, especially as they relate to the aforementioned areas. The survey results will provide HRSA with concrete indicators regarding the best areas in which to dedicate resources to improve

customer service. HRSA will use this information to support agency-wide continuous quality improvement efforts. HRSA will use survey results to improve the efficiency, quality, and timeliness of its grants business processes, as well as to strengthen its partnership with external customers.

Likely Respondents: Individuals who are identified as the project director for a current HRSA grant award.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
HRSA Grantee Satisfaction Survey	7,813	0.32	2,500	0.34	850
Total	7,813		2,500		850

*HRSA will send the survey to 7,813 potential respondents. Based on HRSA Grantee Satisfaction Surveys administered in previous years, HRSA estimates a 32 percent response rate.

Maria G. Button,

Director, Executive Secretariat.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Announcement of the President's Advisory Commission on Asian Americans, Native Hawaiians, and Pacific Islanders Meeting and Solicitation for Oral and Written Comments

AGENCY: Department of Health and Human Services, Office of the Secretary, Office of Intergovernmental and External Affairs, White House Initiative on Asian Americans, Native Hawaiians, and Pacific Islanders.

ACTION: Notice of meeting and solicitation for written and oral comments.

SUMMARY: The U.S. Department of Health and Human Services (HHS) announces the next meeting of the President's Advisory Commission on Asian Americans, Native Hawaiians, and Pacific Islanders (Commission) and the solicitation of written and oral comment regarding the advancement of equity, justice, and opportunity for Asian American, Native Hawaiian, and Pacific Islander (AA and NHPI) communities. The meeting is open to the public and will be held in Clark County, Nevada. Virtual attendance will be available through livestream on February 27 and in-person attendance will be available on February 28, 2024. The Commission is working to accomplish its mission to provide independent advice and recommendations to the President on ways to advance equity, justice, and opportunity for AA and NHPI communities.

DATES: The Commission will meet on February 27, 2024, from 11:45 a.m. Eastern Time (ET) to 8:30 p.m. ET and February 28, 2024, from 12:00 p.m. ET to 4:00 p.m. ET. The final location and agenda will be posted on the website for the President's Advisory Commission on Asian Americans, Native Hawaiians, and Pacific Islanders: *https://www.hhs.gov/about/whiaanhpi/commission/index.html* when this information becomes available.

ADDRESSES: Members of the public may attend the meeting virtually or in person, depending on the portion of the meeting. Registration is required through the following links:

February 27 meeting (virtual attendance only): *https://www.eventbrite.com/e/public-meeting-of-the-presidents-commission-on-aa-and-nhpis-tickets-814521895917?aff=oddtdtcreator.*

February 28 public listening session (in-person attendance only): *https://www.eventbrite.com/e/white-house-initiative-aa-and-nhpi-community-engagement-event-nevada-tickets-814515466687?aff=oddtdtcreator.*

FOR FURTHER INFORMATION CONTACT: Judith Teruya, Designated Federal Officer, President's Advisory Commission on Asian Americans, Native Hawaiians, and Pacific Islanders, U.S. Department of Health and Human Services, Office of the Secretary, Office of Intergovernmental and External Affairs, U.S. Department of Health and Human Services, Hubert Humphrey Building, 620E, 200 Independence Ave. SW, Washington, DC 20201; email: *AANHPICommission@hhs.gov;* telephone: (202) 951–0235.

SUPPLEMENTARY INFORMATION:

Background: The meeting is the eighth in a series of federal advisory committee meetings regarding the development of recommendations to advance equity, justice, and opportunity for AA and NHPI communities. The meeting is open to the public and will be live streamed. The Commission, co-chaired by U.S. Health and Human Services Secretary Xavier Becerra and the U.S. Trade Representative Ambassador Katherine Tai, advises the President on: the development, monitoring, and coordination of executive branch efforts to advance equity, justice, and opportunity for AA and NHPI communities in the United States, including efforts to close gaps in health, socioeconomic, employment, and educational outcomes; policies to address and end anti-Asian bias, xenophobia, racism, and nativism, and opportunities for the executive branch to advance inclusion, belonging, and public awareness of the diversity and accomplishments of AA and NHPI people, cultures, and histories; policies, programs, and initiatives to prevent, report, respond to, and track anti-Asian hate crimes and hate incidents; ways in which the Federal Government can build on the capacity and contributions of AA and NHPI communities through equitable Federal funding, grantmaking, and employment opportunities; policies and practices to improve research and equitable data disaggregation regarding AA and NHPI communities; policies

and practices to improve language access services to ensure AA and NHPI communities can access Federal programs and services; and strategies to increase public-and private-sector collaboration, and community involvement in improving the safety and socioeconomic, health, educational, occupational, and environmental well-being of AA and NHPI communities.

Information is available on the President's Advisory Commission on Asian Americans, Native Hawaiians, and Pacific Islanders website at *https://www.hhs.gov/about/whiaanhpi/commission/index.html.* The names of the members of the President's Advisory Commission on Asian Americans, Native Hawaiians, and Pacific Islanders are available at *https://www.hhs.gov/about/whiaanhpi/commission/commissioners/index.html.*

Purpose of Meeting: The President's Advisory Commission on Asian Americans, Native Hawaiians, and Pacific Islanders, authorized by Executive Order 14031 and amended by Executive Order 14109, will meet to discuss recommendations by the Commission's six subcommittees on ways to advance equity, justice, and opportunity for Asian American, Native Hawaiian, and Pacific Islander communities. The subcommittees are: Belonging, Inclusion, Anti-Asian Hate, Anti-Discrimination; Data Disaggregation and Education; Economic Equity; Health Equity; Immigration and Citizenship Status; and Language Access.

Public Participation at Meeting: Members of the public may attend the meeting virtually and the public listening session in person. Registration is required through the following links:

February 27 (virtual attendance only): *https://www.eventbrite.com/e/public-meeting-of-the-presidents-commission-on-aa-and-nhpis-tickets-814521895917?aff=oddtdtcreator.*

February 28 public listening session (in-person attendance only): *https://www.eventbrite.com/e/white-house-initiative-aa-and-nhpi-community-engagement-event-nevada-tickets-814515466687?aff=oddtdtcreator.*

Written public comments: Written comments are welcomed throughout the development of the Commission's recommendations to promote equity, justice, and opportunity for Asian Americans, Native Hawaiians, and Pacific Islanders and may be emailed to *AANHPICommission@hhs.gov* at any time. Respond concisely and in plain language. You may use any structure or layout that presents your information well. You may respond to some or all of the questions, and you can suggest other factors or relevant questions. You may also include links to online material or interactive presentations. Clearly mark any proprietary information and place it in its own section or file. Your response will become government property, and we may publish some of its non-proprietary content.

Oral public comments: Individuals may submit a request to make an oral public comment at the February 28, 2024, meeting in response to the questions below. Advance copy of oral public comment must be sent via email at *AANHPICommission@hhs.gov* with the subject line ''PACAANHPI: In-person Response to <insert the issue and question>'' no later than 11:59 p.m. ET on Friday, February 19, 2024. Submissions received after the deadline will not be considered for oral public comment. Your submitted oral comment will become government property and may be published as part of the meeting record.

Registration for oral public comment is on a first-come, first-served basis. Comments are limited to two (2) minutes or less per person. After the maximum number of speakers is exceeded, individuals registered to provide oral comment will be placed on a wait list and notified should an opening become available. You will be notified via email no later than February 26, 2024, if you have been identified to provide in-person public comment.

The Commission is interested in soliciting comments on the following questions:

1. Belonging, Inclusion, Anti-Asian Hate, Anti-Discrimination Subcommittee Questions:

a. Please describe policies, programs, models, or best practices that have been effective in reducing race-based violence, cyberbullying, or bias targeting AA and NHPI communities, including any programs geared toward children or youth.

b. What policies, programs, models, or best practices, if any, have reduced incidents of gun violence in AA and NHPI communities?

2. Data Disaggregation and Education Subcommittee Questions:

a. What obstacles do AA and NHPI communities face regarding federal datasets?

b. What is the status of educational programs in your respective state that address the AA and NHPI experience?

3. Economic Equity Subcommittee Questions:

a. How familiar are you with the federal government's resources dedicated to supporting small businesses through loans or grants, and what can be done to increase awareness of these services?

b. Do you think AA and NHPI community members are informed about federal government resources for apprentice training? What additional assistance or resources would be beneficial at the federal level to enhance access to the apprentice training?

4. Health Equity Subcommittee Questions:

a. What are the mental health concerns impacting AA and NHPI communities in Nevada and what are some of the ways communities are working to address these challenges?

b. What are some of the biggest barriers AA and NHPI communities face to accessing health care?

5. Immigration and Citizenship Status Subcommittee Questions:

a. Are you, or individuals you know, afraid to utilize public resources (*e.g.,* federal benefit programs) because you believe it will impact your immigration status? Please explain in detail. What can the government do to decrease concerns with accessing federal benefits?

b. How can the U.S. Department of Homeland Security (DHS) better conduct outreach to impacted communities in order to more effectively disseminate accurate immigration information? What can DHS subagencies offer to local community organizations to increase the spread of accurate information?

6. Language Access Subcommittee Questions:

a. How can the Federal Government promote the preservation, teaching, learning of, maintenance and utilization of AA and NHPI languages?

b. Are there any programs you recommend the Commission examine that provide meaningful language access to government benefits and services to persons with limited English proficiency?

Authority: Executive Order 14031 as amended by Executive Order 14109. The President's Advisory Commission on Asian Americans, Native Hawaiians, and Pacific Islanders is governed by provisions of the Federal Advisory Committee Act, Public Law 92–463, as amended (5 U.S.C. App.), which sets forth standards for the formation and use of Federal advisory committees.

Krystal Ka'ai,

Executive Director, White House Initiative on Asian Americans, Native Hawaiians, and Pacific Islanders, President's Advisory Commission on Asian Americans, Native Hawaiians, and Pacific Islanders.

[FR Doc. 2024–02258 Filed 2–8–24; 8:45 am]

BILLING CODE 4153–03–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

[Document Identifier: OS–0990–new]

Agency Information Collection Request. 60-Day Public Comment Request

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: In compliance with the requirement of the Paperwork Reduction Act of 1995, the Office of the Secretary (OS), Department of Health and Human Services, is publishing the following summary of a proposed collection for public comment.

DATES: Comments on the ICR must be received on or before April 9, 2024.

ADDRESSES: Submit your comments to *Sherrette.Funn@hhs.gov* or by calling (202) 264–0041 and *PRA@HHS.GOV*.

FOR FURTHER INFORMATION CONTACT: When submitting comments or requesting information, please include the document identifier 0990–New–60D and project title for reference, to Sherrette A. Funn, email: *Sherrette.Funn@hhs.gov, PRA@HHS.GOV* or call (202) 264–0041 the Reports Clearance Officer.

SUPPLEMENTARY INFORMATION: Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Title of the Collection: Research Misconduct and Noncompliance in Clinical Trials and Translational Research.

Type of Collection: New.

OMB No.: 0990–XXXX.

Abstract: The Department of Health and Human Services (HHS) Office of Research Integrity (ORI) has partnered with the Office for Human Research Protections (OHRP) to launch this data collection effort to better understand how to serve those who might benefit from additional education and resources to improve research integrity. ORI and OHRP have found that researchers, Institutional Review Board (IRB) Chairs, Research Integrity Officers (RIOs), Human Protections and Compliance Officers, and Human Protections Administrators, who oversee the conduct of research involving human research subjects, may struggle with identifying reportable noncompliance or unanticipated problems, protocol violations, protocol deficiencies, and falsifications and fabrications of data and methods in that research. Failure to recognize these concerns may result in noncompliance, protocol violations and research misconduct not being adequately addressed; falsified and/or fabricated methods, data, and results that may be published or used to obtain federal funding; human research subjects being harmed; and/or Public Health Service (PHS) funds not being protected.

This data collection is a new request and includes an online survey instrument used with stakeholders holding positions at institutions holding a Federalwide Assurance (FWA) and/or operating an IRB, and is designed to identify barriers in the identification, evaluation, and reporting of potential research misconduct, protocol violations, reportable noncompliance, and unanticipated problems in research that involves human subjects. This data collection is intended to assist ORI and OHRP in developing approaches to improve how to identify and distinguish incidents that are reportable to ORI and OHRP from those that do not require reporting to these offices. This information is also intended to give RIOs, IRBs, human protections administrators, compliance officers, and other institutional officials involved with human subjects' research insight into how they can strengthen their policies and procedures for identifying, evaluating, and/or communicating potential research misconduct and reportable noncompliance and unanticipated problems by identifying gaps, barriers, and areas in which communication and education may need to be enhanced within their institution.

ANNUALIZED BURDEN HOUR TABLE

Forms (If necessary)	Respondents (If necessary)	Number of respondents	Number of responses per respondents	Average burden per response	Total burden hours
ORI/OHRP Survey		1165	1	20/60	388

Sherrette A. Funn,

Paperwork Reduction Act Reports Clearance Officer, Office of the Secretary.

BILLING CODE 4150–36–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Meeting of the National Vaccine Advisory Committee

AGENCY: Office of Infectious Disease and HIV/AIDS Policy, Office of the Assistant Secretary for Health, Office of the Secretary, Department of Health and Human Services.

ACTION: Notice.

SUMMARY: As stipulated by the Federal Advisory Committee Act, the Department of Health and Human Services (HHS) hereby gives notice that the National Vaccine Advisory Committee (NVAC) will hold an in-person meeting. The meeting will be open to the public and public comment will be heard during the meeting.

DATES: The meeting will be held February 22–23, 2024. The confirmed meeting times and agenda will be posted on the NVAC website at *http://www.hhs.gov/nvpo/nvac/meetings/index.html* as soon as they become available.

ADDRESSES: Instructions regarding attending this meeting will be posted online at: *http://www.hhs.gov/nvpo/nvac/meetings/index.html* at least one week prior to the meeting. Pre-registration is required for those who wish to attend the meeting in person or participate in public comment. Please register at *http://www.hhs.gov/nvpo/nvac/meetings/index.html*.

FOR FURTHER INFORMATION CONTACT: Ann Aikin, Acting Designated Federal Officer, Office of Infectious Disease and HIV/AIDS Policy, U.S. Department of Health and Human Services, Tower Building, Room, 1101 Wootton Parkway, Rockville, MD 20852. Email: *nvac@hhs.gov*. Phone: 202–795–7697.

SUPPLEMENTARY INFORMATION: Pursuant to section 2101 of the Public Health

Service Act (42 U.S.C. 300aa–1), the Secretary of HHS was mandated to establish the National Vaccine Program to achieve optimal prevention of human infectious diseases through immunization and to achieve optimal prevention against adverse reactions to vaccines. The NVAC was established to provide advice and make recommendations to the Director of the National Vaccine Program on matters related to the Program's responsibilities. The Assistant Secretary for Health serves as Director of the National Vaccine Program.

During this meeting, NVAC will hear presentations to support the recent charge on innovation from Admiral Rachel L. Levine, MD, the Assistant Secretary for Health and Director of the National Vaccine Program. NVAC will also hear presentations on recent surges in measles cases, the Vaccines for Children's Program, real uses of artificial intelligence to support vaccination efforts, and supply chains. Presenters will also cover ways to improve immunization of children, adults, and pregnant people. Please note that agenda items are subject to change, as priorities dictate. Information on the final meeting agenda will be posted prior to the meeting on the NVAC website: *http://www.hhs.gov/nvpo/nvac/index.html*.

Members of the public will have the opportunity to provide comment at the NVAC meeting during the public comment period designated on the agenda. Public comments made during the meeting will be limited to three minutes per person to ensure time is allotted for all those wishing to speak. Members of the public may also submit written comments. Written comments should not exceed three pages in length. Individuals planning to submit comments should email their written comments or their request to provide a comment during the meeting to *nvac@hhs.gov* at least five business days prior to the meeting.

Dated: January 11, 2024.

Ann Aikin,

Acting Designated Federal Official, Office of the Assistant Secretary for Health.

BILLING CODE 4140–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Notice of Meeting

Pursuant to Public Law 92–463, notice is hereby given that the Substance Abuse and Mental Health Services Administration's (SAMHSA) Center for Substance Abuse Prevention's (CSAP) Drug Testing Advisory Board (DTAB) will convene via web conference on March 5, 2024, from 10 a.m. EST to 12:45 p.m. EST.

The board will meet in open-session March 5, 2024, from 10 a.m. EST to 12:45 p.m. EST to hear presentations regarding proposed changes to the analyte table including fentanyl prevalence, fentanyl immunoassay updates, cost and benefits analysis and a summary of public comments received regarding the proposed changes to the HHS Drug Testing Panels.

Section 8105 of the Fighting Opioid Abuse in Transportation Act, included in the SUPPORT for Patients and Communities Act, required the Secretary to determine whether it is justified, based on the reliability and cost-effectiveness of testing, to revise the Mandatory Guidelines for Federal Workplace Drug Testing Programs to include fentanyl. Section 8105 additionally required the Secretary to consider whether to include any other drugs or other substances listed in Schedule I and II of Controlled Substances Act (CSA). Norfentanyl is a metabolite of fentanyl. Because it is also an immediate precursor used in the illicit manufacture of fentanyl, it is a Schedule II substance under the CSA.

Fentanyl is involved in a large proportion of overdose deaths in the United States and is therefore an important public safety concern. Furthermore, fentanyl is increasingly used as a stand-alone substance, not in conjunction with heroin and other substances. According to the National Forensic Laboratory Information System (NFLIS) 2022 report, fentanyl was the 3rd most frequently identified drug and accounted for 13.81% of all drugs reported by forensic laboratories.[1] Norfentanyl is an important component of identifying people who use fentanyl when urine is the specimen matrix. Fentanyl has been detected in oral fluid in patients receiving pain management

[1] National Forensic Laboratory Information System (NFLIS). (2022). *NFLIS-Drug 2022 Annual Report*. U.S. Department of Justice, Drug Enforcement Agency, Diversion Control Division. *2022 NFLIS-Drug Annual Report.pdf.*

services, overdose cases, and driving under the influence of drugs (DUID) cases. Information provided by HHS-certified laboratories in 2023 indicated that a majority (84%) of the laboratories analyzed non-regulated workplace specimens for fentanyl and/or norfentanyl, and that all had the ability to analyze urine specimens for fentanyl with sufficiently sensitive detection limits using commercially available immunoassay kits and confirmatory test instrumentation commonly used in HHS-certified laboratories.

Proposed addition to HHS Drug Testing Panels as listed below:

Urine analyte	Initial test cutoff	Confirmation cutoff
Fentanyl	1 ng/mL	1.0 ng/mL.
Norfentanyl	.....	1.0 ng/mL.

Oral fluid analyte	Initial test cutoff	Confirmation cutoff
Fentanyl	1 ng/mL	1.0 ng/mL.

The Department plans to remove MDA and methylenedioxy-methamphetamine (MDMA) from the drug testing panel, because the number of positive specimens reported by HHS-certified laboratories does not support testing all specimens for MDA and MDMA in Federal workplace drug testing programs. Information provided to the Department through the NLCP in 2021 and 2022 shows the positivity rate for MDMA ranges from 0.001 to 0.003%, and a review of the results indicate that >25% of the positive specimens are likely agency blind samples. MDA has a lower positivity rate than MDMA and both have lower positivity rates than phencyclidine (PCP). SAMHSA also considered removing PCP but decided against this change. While PCP has an overall positivity rate nearly as low as MDMA, there are regional differences in positivity, with some areas of the country having much higher rates, so PCP remains a regulated test analyte. Because MDA and MDMA are Schedule I drugs, a Federal agency may test specimens for these analytes in accordance with Section 3.2 of the UrMG and OFMG (*i.e.,* on a case-by-case basis for reasonable suspicion or post-accident testing, or routinely with a waiver from the Secretary).

Meeting registration information can be completed at *https://snacregister.samhsa.gov/.* Web conference and call information will be sent after completing registration. Meeting information and a roster of DTAB members may be obtained by accessing the SAMHSA Advisory Committees website, *https://www.samhsa.gov/about-us/advisory-councils/meetings,* or by contacting the Designated Federal Officer, Lisa Davis.

Committee Name: Substance Abuse and Mental Health Services Administration, Center for Substance Abuse Prevention, Drug Testing Advisory Board.

Dates/Time/Type: March 5, 2024, from 10:00 a.m. EST to 12:45 p.m. EST: OPEN.

Place: Virtual.

BILLING CODE 4162–20–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID: FEMA–2024–0006; OMB No. 1660–0110]

Agency Information Collection Activities: Proposed Collection; Comment Request; Nonprofit Security Grant Program (NSGP) Investment Justification & NSGP Prioritization Tracker

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: 60-Day notice of extension and request for comments.

SUMMARY: The Federal Emergency Management Agency (FEMA), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public to take this opportunity to comment on an extension of a currently approved information collection. In accordance with the Paperwork Reduction Act of 1995, this notice seeks comments concerning the Nonprofit Security Grant Program (NSGP). The NSGP provides funding support for security-related enhancements to nonprofit organizations that are at high risk of a terrorist or other extremist attack.

DATES: Comments must be submitted on or before April 9, 2024.

ADDRESSES:

To avoid duplicate submissions to the docket, please submit comments at *www.regulations.gov* under Docket ID FEMA–2024–0006. Follow the instructions for submitting comments.

All submissions received must include the agency name and Docket ID. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to read the Privacy Act notice that is available via the link in the footer of *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Mark Silveira, Branch Chief, FEMA Grant Programs Directorate, Preparedness Grants Program, 202–786–9598 *mark.silveira@fema.dhs.gov.* You may contact the Information Management Division for copies of the proposed collection of information at email address: *FEMA-Information-Collections-Management@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: The collection of information for the Nonprofit Security Grant Program is mandated by sections 2003 and 2004 of the *Homeland Security Act of 2002* (6 U.S.C. 604), as amended by section 101, Title I of the *Implementing Recommendations of the 9/11 Commission Act of 2007* (Pub. L. 110–053). These sections mandate that applicants submit plans to describe the proposed division of responsibilities and distribution of funding among the local and tribal government in the high-risk urban area; mandate that applicants submit information in support of the application as the Administrator may reasonably require; mandate that applicants submit their application to each State for review before submission of such application to the Department; and delineate and describe the actions Governors must take if deeming that an application is inconsistent with their States' Homeland Security Strategy.

This program is designed to promote coordination and collaboration in emergency preparedness activities among public and private community representatives, State, and local government agencies.

Collection of Information

Title: FEMA Preparedness Grants: Nonprofit Security Grant Program (NSGP).

Type of Information Collection: Extension of a currently approved information collection.

OMB Number: 1660–0110.

FEMA Forms: FEMA Form FF–207–FY–21–115 (formally 089–25), NSGP Investment Justification; FEMA Form FF–207–FY–21–114 (formerly 089–24), NSGP Prioritization of Investments Tracker.

Abstract: The Nonprofit Security Grant Program provides funding support for security related enhancements to nonprofit organizations that are at high risk of a terrorist or other extremist attack. The program seeks to integrate the preparedness activities of nonprofit organizations that are at high risk of a terrorist or other extremist attack with broader state and local preparedness efforts. The NSGP Investment Justification summarizes the nonprofit organization's mission, vulnerability assessment, and proposed project(s) details. The Prioritization of Investments Tracker is for State Administrative Agencies to use to prioritize which NSGP subapplicants/projects are recommended for funding.

Affected Public: State, Local or Tribal Governments; Not for Profits.

Estimated Number of Respondents: 6,056.

Estimated Number of Responses: 6,056.

Estimated Total Annual Burden Hours: 24,840.

Estimated Total Annual Respondent Cost: $807,221.

Estimated Respondents' Operation and Maintenance Costs: $0.

Estimated Respondents' Capital and Start-Up Costs: $0.

Estimated Total Annual Cost to the Federal Government: $354,515.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the Agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Millicent Brown Wilson,

Records Management Branch Chief, Office of the Chief Administrative Officer, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2008–0010]

Board of Visitors for the National Fire Academy

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: Notice of open Federal Advisory Committee meeting.

SUMMARY: The Board of Visitors for the National Fire Academy (Board) will meet virtually on Monday, April 22, 2024. The meeting will be open to the public.

DATES: The meeting will take place on Monday, April 22, 2024, 2 p.m. to 4 p.m. Eastern Daylight Time (EDT). Please note that the meeting may close early if the Board has completed its business.

ADDRESSES: Members of the public who wish to participate in the virtual conference should contact Deborah Gartrell-Kemp as listed in the **FOR FURTHER INFORMATION CONTACT** section by close of business on April 12, 2024, to obtain the call-in number and access code for the April 22, 2024, virtual meeting. For more information on services for individuals with disabilities or to request special assistance, contact Deborah Gartrell-Kemp as soon as possible. The Board is committed to ensuring all participants have equal access regardless of disability status. If you require a reasonable accommodation due to a disability to fully participate, please contact Deborah Gartrell-Kemp as listed in the **FOR FURTHER INFORMATION CONTACT** section as soon as possible.

To facilitate public participation, we are inviting public comment on the issues to be considered by the Board as listed in the **SUPPLEMENTARY INFORMATION** section. Participants seeking to have their comments considered during the meeting should submit them in advance or during the public comment segment. Comments submitted up to 30 days after the meeting will be included in the public record and may be considered at the next meeting. Comments submitted in advance must be identified by Docket ID FEMA–2008–0010 and may be submitted by *one* of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments.
- *Electronic Delivery:* Email Deborah Gartrell-Kemp at *Deborah.Gartrell-Kemp@fema.dhs.gov* no later than April 12, 2024, for consideration at the April 22, 2024 meeting.

Instructions: All submissions received must include the words ''Federal Emergency Management Agency'' and the Docket ID for this action. Comments received will be posted without alteration at *https://www.regulations.gov,* including any personal information provided. You may wish to view the Privacy and Security Notice via a link on the homepage of *https://www.regulations.gov/.*

Docket: For access to the docket and to read background documents or comments received by the National Fire Academy Board of Visitors, go to *https://www.regulations.gov,* click on ''Advanced Search,'' then enter ''FEMA–2008–0010'' in the ''By Docket ID'' box, then select ''FEMA'' under ''By Agency,'' and then click ''Search.''

FOR FURTHER INFORMATION CONTACT:

Designated Federal Officer: Eriks Gabliks, telephone (301) 447–1308, email *Eriks.Gabliks@fema.dhs.gov.*

Logistical Information: Deborah Gartrell-Kemp, telephone (301) 447–7230, email *Deborah.Gartrell-Kemp@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: The Board will meet virtually on Monday, April 22, 2024. The meeting will be open to the public. Notice of this meeting is given under the Federal Advisory Committee Act, 5 U.S.C. ch. 10.

Purpose of the Board

The purpose of the Board is to review annually the programs of the National Fire Academy (Academy) and advise the Administrator of the Federal Emergency Management Agency (FEMA), through the United States Fire Administrator, on the operation of the Academy and any improvements therein that the Board deems appropriate. In carrying out its responsibilities, the Board examines Academy programs to determine

whether these programs further the basic missions that are approved by the Administrator of FEMA, examines the physical plant of the Academy to determine the adequacy of the Academy's facilities, and examines the funding levels for Academy programs. The Board submits a written annual report through the United States Fire Administrator to the Administrator of FEMA. The report provides detailed comments and recommendations regarding the operation of the Academy.

Agenda

On Monday, April 22, 2024, there will be four sessions, with deliberations and voting at the end of each session, as necessary:

1. The Board will discuss United States Fire Administration Data, EMS, Research, Prevention and Response.
2. The Board will discuss deferred maintenance and capital improvements on the National Emergency Training Center campus and Fiscal Year 2024 and beyond Budget Request/Budget Planning.
3. The Board will deliberate and vote on recommendations on Academy program activities to include developments, deliveries, staffing, admissions, and strategic plan.
4. There will also be an update on the Board of Visitors Subcommittee Groups for the Professional Development Initiative Update and the National Fire Incident Report System.

There will be a 10-minute comment period after each agenda item and each speaker will be given no more than 2 minutes to speak. Please note that the public comment period may end before the time indicated following the last call for comments. Contact Deborah Gartrell-Kemp to register as a speaker. Meeting materials will be posted by April 12, 2024, at *https://www.usfa.fema.gov/nfa/about/board-of-visitors.html.*

Eriks J. Gabliks,

Superintendent, National Fire Academy, United States Fire Administration, Federal Emergency Management Agency.

[FR Doc. 2024–02628 Filed 2–8–24; 8:45 am]

BILLING CODE 9111–74–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–6442–N–01]

Fair Market Rents for the Housing Choice Voucher Program, Moderate Rehabilitation Single Room Occupancy Program, and Other Programs, Fiscal Year 2024; Revised

AGENCY: Office of the Assistant Secretary for Policy Development and Research, Department of Housing and Urban Development, HUD.

ACTION: Notice of Revised Fiscal Year (FY) 2024 Fair Market Rents (FMRs).

SUMMARY: This notice updates the FY 2024 FMRs for one area based on new survey data.

DATES: The revised FY 2024 FMRs for this one area are effective on March 11, 2024.

FOR FURTHER INFORMATION CONTACT: Adam Bibler, Director, Program Parameters and Research Division, Office of Economic Affairs, Office of Policy Development and Research, HUD Headquarters, 451 7th Street SW, Room 8208, Washington, DC 20410, Department of Housing and Urban Development, telephone (202) 402–6057. Questions related to use of FMRs or voucher payment standards should be directed to the respective local HUD program staff. For technical information on the methodology used to develop FMRs or a listing of all FMRs, please call the HUD USER information line at 800–245–2691 (toll-free), email the Program Parameters and Research Division via *pprd@hud.gov,* or access the information on the HUD USER website: *http://www.huduser.gov/portal/datasets/fmr.html.* HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit *https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs.*

SUPPLEMENTARY INFORMATION: On August 31, 2023, HUD published the FY 2024 FMRs, requested comments on the FY 2024 FMRs, and outlined procedures for requesting a reevaluation of an area's FY 2024 FMRs (88 FR 60223). This notice revises FY 2024 FMRs for one area based on data provided to HUD.

I. Revised FY 2024 FMRs

The updated FY 2024 FMRs appear in the following table. The FMRs are based on a survey conducted by the area public housing agencies (PHAs) and reflect the estimated 40th percentile rent levels trended to FY 2024.

The FMRs for the affected area are revised as follows:

2024 Fair Market Rent area	FMR by number of bedrooms in unit				
	0 BR	1 BR	2 BR	3 BR	4 BR
Urban Honolulu, HI MSA	$1,668	$1,824	$2,388	$3,365	$4,052

HUD has published these revised FMR values on the HUD USER website at: *http://www.huduser.gov/portal/datasets/fmr.html.* In addition, HUD has updated the FY 2024 Small Area FMRs (SAFMRs) for metropolitan areas with revised FMRs, which can be found at *https://www.huduser.gov/portal/datasets/fmr/smallarea/index.html.* HUD has also updated the 50th percentile rents for all affected FMR areas, which are published at *http://www.huduser.gov/portal/datasets/50per.html.*

II. Environmental Impact

This notice involves the establishment of Fair Market Rent schedules and does not constitute a development decision affecting the physical condition of specific project areas or building sites. Accordingly, under 24 CFR 50.19(c)(6), this notice is categorically excluded from environmental review under the National Environmental Policy Act of 1969 (42 U.S.C. 4321).

Solomon Greene,

Principal Deputy Assistant Secretary for Policy Development and Research.

[FR Doc. 2024–02666 Filed 2–8–24; 8:45 am]

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS–HQ–IA–2024–0019; FXIA16710900000–245–FF09A30000]

Foreign Endangered Species; Receipt of Permit Applications

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of permit applications; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service, invite the public to comment on applications to conduct certain activities with foreign species that are listed as endangered under the Endangered Species Act (ESA). With some exceptions, the ESA prohibits activities with listed species unless Federal authorization is issued that allows such activities. The ESA also requires that we invite public comment before issuing permits for any activity otherwise prohibited by the ESA with respect to any endangered species.

DATES: We must receive comments by March 11, 2024.

ADDRESSES:

Obtaining Documents: The applications, application supporting materials, and any comments and other materials that we receive will be available for public inspection at *https://www.regulations.gov* in Docket No. FWS–HQ–IA–2024–0019.

Submitting Comments: When submitting comments, please specify the name of the applicant and the permit number at the beginning of your comment. You may submit comments by one of the following methods:

- *Internet: https://www.regulations.gov.* Search for and submit comments on Docket No. FWS–HQ–IA–2024–0019.
- *U.S. mail:* Public Comments Processing, Attn: Docket No. FWS–HQ–IA–2024–0019; U.S. Fish and Wildlife Service Headquarters, MS: PRB/3W; 5275 Leesburg Pike; Falls Church, VA 22041–3803.

For more information, see Public Comment Procedures under **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Brenda Tapia, by phone at 703–358–2185 or via email at *DMAFR@fws.gov*.Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION:

I. Public Comment Procedures

A. How do I comment on submitted applications?

We invite the public and local, State, Tribal, and Federal agencies to comment on these applications. Before issuing any of the requested permits, we will take into consideration any information that we receive during the public comment period.

You may submit your comments and materials by one of the methods in **ADDRESSES**. We will not consider comments sent by email or to an address not in **ADDRESSES**. We will not consider or include in our administrative record comments we receive after the close of the comment period (see **DATES**).

When submitting comments, please specify the name of the applicant and the permit number at the beginning of your comment. Provide sufficient information to allow us to authenticate any scientific or commercial data you include. The comments and recommendations that will be most useful and likely to influence agency decisions are: (1) Those supported by quantitative information or studies; and (2) those that include citations to, and analyses of, the applicable laws and regulations.

B. May I review comments submitted by others?

You may view and comment on others' public comments at *https://www.regulations.gov* unless our allowing so would violate the Privacy Act (5 U.S.C. 552a) or Freedom of Information Act (5 U.S.C. 552).

C. Who will see my comments?

If you submit a comment at *https://www.regulations.gov,* your entire comment, including any personal identifying information, will be posted on the website. If you submit a hardcopy comment that includes personal identifying information, such as your address, phone number, or email address, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. Moreover, all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

II. Background

To help us carry out our conservation responsibilities for affected species, and in consideration of section 10(c) of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), we invite public comments on permit applications before final action is taken. With some exceptions, the ESA prohibits certain activities with listed species unless Federal authorization is issued that allows such activities. Permits issued under section 10(a)(1)(A) of the ESA allow otherwise prohibited activities for scientific purposes or to enhance the propagation or survival of the affected species. Service regulations regarding prohibited activities with endangered species, captive-bred wildlife registrations, and permits for any activity otherwise prohibited by the ESA with respect to any endangered species are available in title 50 of the Code of Federal Regulations in part 17.

III. Permit Applications

We invite comments on the following applications.

Applicant: Milwaukee County Zoo, Milwaukee, WI; Permit No. PER1012710

The applicant requests a permit to import one wild jaguar (*Panthera onca*) from Belize Zoo, Belize, for the purpose of enhancing the propagation or survival of the species. This notification is for a single import.

Applicant: University of New Orleans, New Orleans, LA; Permit No. PER5817086

The applicant requests a permit to import hair and blood samples collected from wild lowland tapir (*Tapirus terrestris*) for the purpose of scientific research. This notification is for a single import.

Applicant: Memphis Zoo, Memphis, TN; Permit No. PER3939197

The applicant requests a permit to import two captive-bred Sumatran tigers (*Panthera tigris sumatrae*) from Taronga Conservation Society Australia in Mosman, Australia, for the purpose of enhancing the propagation or survival of the species. This notification is for a single import.

Applicant: Audubon Nature Institute, New Orleans, LA; Permit No. PER0054404

The applicant requests a captive-bred wildlife registration under 50 CFR 17.21(g) for the following species, to enhance the propagation or survival of the species. This notification covers activities to be conducted by the applicant over a 5-year period.

Common name	Scientific name
Panamanian golden frog	*Atelopus varius zeteki.*
Fiji banded iguana	*Brachylophus fasciatus.*
False gharial (Tomistoma)	*Tomistoma schlegelii.*
Komodo dragon	*Varanus komodoensis.*
Amur leopard	*Panthera pardus.*
African wild dog	*Lycaon pictus.*
Sumatran orangutan	*Pongo abelii.*
Asian elephant	*Elephas maximus.*
North Sulawesi babirusa	*Babyrousa celebensis.*
Swamp deer (barasingha)	*Cervus duvauceli.*
Bali myna (Rothschild's [myna]) starling	*Leucopsar rothschildi.*
Blue-throated macaw	*Ara glaucogularis.*
Mandrill	*Mandrillus (=Papio) sphinx.*

Applicant: Louisiana State University, Baton Rouge, LA; Permit No. PER6612201

The applicant requests the renewal of their permit to export and re-import non-living museum/herbarium specimens of endangered and threatened species (excluding animals) previously legally accessioned into the permittee's collection for scientific research. This notification covers activities to be conducted by the applicant over a 5-year period.

IV. Next Steps

After the comment period closes, we will make decisions regarding permit issuance. If we issue permits to any of the applicants listed in this notice, we will publish a notice in the **Federal Register**. You may locate the notice announcing the permit issuance by searching *https://www.regulations.gov* for the permit number listed above in this document. For example, to find information about the potential issuance of Permit No. 12345A, you would go to *regulations.gov* and search for ''12345A''.

V. Authority

We issue this notice under the authority of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*), and its implementing regulations.

Brenda Tapia,

Supervisory Program Analyst/Data Administrator, Branch of Permits, Division of Management Authority.

[FR Doc. 2024–02668 Filed 2–8–24; 8:45 am]

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS–R6–ES–2014–0048; [FXES11140600000–245–FF06E22000]

R-Project Transmission Line, Nebraska; Revised Proposed Habitat Conservation Plan for the American Burying Beetle and Draft Supplemental Environmental Impact Statement

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce the availability of documents related to an application for an incidental take permit (ITP) under the Endangered Species Act. The Nebraska Public Power District (NPPD) is applying for a permit associated with incidental take of the American burying beetle (*Nicrophorus americanus;* ABB) during construction, operation, and maintenance of a new transmission line in central Nebraska (known as the R-Project). NPPD has submitted a new application for a 50-year ITP, including a revised proposed habitat conservation plan (revised HCP) and associated documents. We previously issued an ITP for the R-Project and the applicant's earlier HCP to NPPD in 2019. However, that ITP was remanded by a Court. In response to the Court remand, NPPD has prepared the revised HCP as part of the new ITP application. In accordance with the National Environmental Policy Act, we now announce the availability of the draft supplemental EIS (draft SEIS) associated with the revised HCP. We invite comment from the public and local, State, Tribal, and Federal agencies.

DATES: *Submitting Comments:* We must receive your written comments on or before April 9, 2024. Comments submitted online at *https://www.regulations.gov/* must be received by 11:59 p.m. eastern time on April 9, 2024.

Public Meetings: During the public comment period, the Service will hold two in-person public meetings in Nebraska, weather permitting, and one virtual public meeting.

- *In-person meetings:*
  - Tuesday, February 27, 2024, from 5:00 to 7:00 p.m. CST; North Platte, Nebraska, The Prairie Arts Center.
  - Thursday, February 29, 2024, from 1:00 to 3:00 p.m. CST; Broken Bow, Nebraska, Mid Plains Community College.
- *Virtual meeting:* Thursday, March 7, 2024, from 5:00 to 7:00 p.m. CST.

Additional information on the public meetings will be posted at least one week prior on our website, at *https://fws.gov/office/nebraska-ecological-services.* Following the virtual public meeting, an on demand recording of the virtual public meeting will be available for viewing by the public online, at *https://fws.gov/office/nebraska-ecological-services,* and at the following locations:

- North Platte Public Library, 120 W 4th St., North Platte, NE 69101.
- Thomas County Library, 501 Main St., Thedford, NE 69166.
- Taylor Public Library, 106 William St., Taylor, NE 68879.

ADDRESSES: *Obtaining Documents:* The draft SEIS and revised HCP, as well as any comments and other materials that we receive, will be available for public inspection online in Docket No. FWS–R6–ES–2014–0048 at *https://www.regulations.gov.* Copies of the documents will be available for viewing at the three libraries with the recording of the virtual public meeting (see **DATES**).

Submitting Comments: You may submit comments by one of the following methods:

- *Online: https://www.regulations.gov.* Follow the instructions for submitting comments to Docket No. FWS–R6–ES–2014–0048.

• *U.S. Mail:* Public Comments Processing, Attn: Docket No. FWS–R6–ES–2014–0048; U.S. Fish and Wildlife Service Headquarters, MS: PRB/3W; 5275 Leesburg Pike; Falls Church, VA 22041–3803.

• *Public Meetings:* Comments will also be accepted at the in-person and virtual public meetings (see **DATES**).

Reasonable Accommodations

Persons needing reasonable accommodations to attend and participate in the public meetings should contact the Service's Nebraska Ecological Services Field Office (see **FOR FURTHER INFORMATION CONTACT**) as soon as possible. To allow sufficient time to process requests, please make contact no later than 1 week before the desired public meeting. Information and documents are available in alternative formats upon request.

FOR FURTHER INFORMATION CONTACT: Jeff Runge, by phone at (308) 382–6468 or by email at *jeff_runge@fws.gov*. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TTD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service (Service), announce the availability of documents related to an application for an incidental take permit (ITP) under section 10(a)(1)(B) of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The Nebraska Public Power District (NPPD) is applying for a 50-year permit associated with incidental take of the American burying beetle (*Nicrophorus americanus;* ABB) during construction, operation, and maintenance of a new transmission line in central Nebraska (known as the R-Project). NPPD submitted an application for an ITP covering the take of ABB to the Service. If granted, the ITP would authorize incidental take of ABB resulting from the revised HCP's covered activities, as well as incidental take resulting from activities carried out as part of the revised HCP's conservation strategy. We invite comment on the documents from the public and local, State, Tribal, and Federal agencies.

Background

Section 9 of the ESA and Federal regulations prohibit the taking of a species listed as endangered or threatened. The ESA defines ''take'' to mean to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct. We may issue permits, under limited circumstances, to take listed species incidental to, and not the purpose of, otherwise lawful activities. Section 10(a)(1)(B) of the ESA and its implementing regulations (50 CFR 17.22(b) and 17.32(b)) provide for authorizing incidental take of listed species. Issuance of an ITP also must not jeopardize the existence of federally listed fish, wildlife, or plant species, pursuant to section 7 of the ESA and 50 CFR 402.02. The permittee would receive assurances under our ''No Surprises'' regulations (50 CFR 17.22(b)(5) and 17.32(b)(5)).

The Service issued a **Federal Register** notice of availability for the original ITP application, final habitat conservation plan (final HCP), and final environmental impact statement (final EIS) for the R-Project on February 8, 2019 (84 FR 2900) and issued the ITP on June 12, 2019. However, on June 17, 2020, the U.S. District Court for the District of Colorado issued a decision on a lawsuit challenging the Service's decision to issue this ITP under the ESA, the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*), and the National Historic Preservation Act (16 U.S.C. 470) (*Oregon-California Trails Association* v. *Walsh,* 1:19 cv 01945–WJM, D. Colo 2020). In its ruling, the Court vacated and remanded the ITP to the Service for further proceedings consistent with the Court's order. In response to the Court vacating the ITP, NPPD prepared the R-Project Transmission Line Revised Habitat Conservation Plan (revised HCP) and submitted the ITP application. We published a **Federal Register** notice of intent to prepare a SEIS for the R-Project revised HCP on November 18, 2022 (87 FR 69294).

The Service has prepared a draft SEIS to address the issues identified by the Court and to address new information and changed circumstances, as relevant, to the R-Project revised HCP and ITP application proposed by NPPD. The ITP application submitted by NPPD addresses the potential take of ABB associated with the revised HCP's covered activities associated with the R-Project.

Project Information

The R-Project is a proposed 226-mile transmission line that would start at NPPD's Gerald Gentleman Substation near Sutherland, Nebraska; go north to a 345-kV substation located in Thomas County near Thedford; and then extend eastward to another 345-kV substation sited in Holt County, and interconnect with Western Area Power Administration's existing Fort Thompson-to-Grand Island 345-kV line that is located on the eastern border of Holt County, Nebraska.

The ITP, if issued, would authorize take of the ABB that may occur incidental to the covered activities, which include components of the construction, operation, and maintenance of the R-Project and implementation of the revised HCP's conservation strategy. The revised HCP describes the covered activities, the anticipated impacts to ABB from the covered activities, and the measures that NPPD will implement to minimize and mitigate such impacts. The revised HCP also includes avoidance and minimization measures for ESA-listed species that are not covered species but may be present in the revised HCP Study Area (*i.e.,* ESA-listed species for which incidental take is not being requested because take will be avoided). The revised HCP also describes the environmental setting and biological resources present in the study area, the biological goals and objectives of the revised HCP, monitoring, adaptive management, and funding assurances.

National Environmental Policy Act Background

The potential issuance of the ITP is considered a Federal action under NEPA, and we determined that preparation of a supplemental EIS to analyze the potential impacts on the human (biological, physical, social, and economic) environment caused by the R-Project and implementation of the revised HCP was appropriate. The Draft SEIS also addresses the issues identified in the court remand issued on June 17, 2020. We prepared the Draft SEIS in accordance with the requirements of NEPA, with input from cooperating organizations and agencies, including History Nebraska, the Nebraska Game and Parks Commission, the National Park Service, the U.S. Army Corps of Engineers, and the U.S. Environmental Protection Agency. We analyzed four alternatives in the draft SEIS, including the issuance of the ITP and implementation of the revised HCP (proposed action), a no action alternative, and two action alternatives. The action alternatives include construction of the R-Project and implementation of the HCP, with the following modifications: Alternative A reflects the proposed action from the final HCP and FEIS, and Alternative B reflects the use of steel monopole construction only.

We are seeking public input on the NEPA analysis in the Draft SEIS, including the associated impacts of the alternatives, as well as comments on the draft revised HCP submitted with the ITP application. We will respond to all substantive comments received during the comment period in the Final Supplemental EIS. No sooner than 30 days after the Final SEIS publication, we will issue a NEPA Record of Decision (ROD).

Public Availability of Comments

You may submit your comments and materials by one of the methods listed in **ADDRESSES**. Before including your address, phone number, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—might be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

Comments and materials we receive, as well as supporting documentation we use in preparing the DEIS, will be available for public inspection online in Docket No. FWS–R6–ES–2014–0048, at *https://www.regulations.gov/*.)

Next Steps and Decision To Be Made

We will make a permit decision based on the statutory and regulatory criteria of the ESA. This decision will also be informed by the data, analyses, and findings in the EIS and public comments received on the Draft SEIS and HCP. We will document our determinations in an ESA section 10 findings document, ESA section 7 biological opinion, and NEPA ROD developed at the conclusion of the ESA and NEPA compliance processes. If we find that all requirements for issuance of the ITP are met, we will issue the requested permit, subject to terms and conditions deemed necessary or appropriate to carry out the purposes of ESA Section 10.

Authority

We provide this notice under section 10(c) of the ESA (16 U.S.C. 1531 *et seq.*) and its implementing regulations (50 CFR 17.22 and 17.32) and NEPA (42 U.S.C. 4321 *et seq.*) and its implementing regulations (40 CFR 1506.6 and 43 CFR 46.305).

Marjorie Nelson,

Acting Assistant Regional Director, Ecological Services, Mountain-Prairie Region.

[FR Doc. 2024–02490 Filed 2–8–24; 8:45 am]

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

[245A2100DD/AAKC001030/A0A51010.999900]

Notice of Deadline for Submitting Completed Applications To Begin Participation in the Tribal Self-Governance Program in Fiscal Year 2025 or Calendar Year 2025

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of application deadline.

SUMMARY: In this notice, the Office of Self-Governance (OSG) establishes a deadline for Indian tribes/consortia to submit completed applications to begin participation in the tribal self-governance program in fiscal year 2025 or calendar year 2025.

DATES: Completed application packages must be received by the Director, Office of Self-Governance, by March 1, 2024.

ADDRESSES: Application packages for inclusion in the applicant pool should be sent to Sharee M. Freeman, Director, Office of Self-Governance, Department of the Interior, Mail Stop 3624–MIB, 1849 C Street NW, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Vickie Hanvey, Office of Self Governance, *Vickie.Hanvey@bia.gov*; Telephone (918) 931–0745. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services.

SUPPLEMENTARY INFORMATION: Under the Tribal Self-Governance Act of 1994 (Public Law 103–413), as amended by the Practical Reforms and Other Goals to Reinforce the Effectiveness of Self-Governance and Self-Determination Act of 2019–2020 and section 402(b)(1)(A) of the Practical Reforms and Other Goals To Reinforce the Effectiveness of Self-Governance and Self-Determination (PROGRESS Act), the Secretary, acting through the Director of the Office of Self-Governance, may select not more than 50 new Indian Tribes per year from those eligible tribes. The application deadline listed in the **DATES** section is predicated upon providing the parties enough time to complete funding agreement negotiations in advance of the FY or CY start date of the 2025 funding agreement. The Act mandates that copies of the funding agreements be sent at least 90 days before the proposed effective date to each Tribe that is served by the Bureau of Indian Affairs' agency that is serving the Tribe that is a party to the funding agreement. Initial negotiations with a Tribe/consortium located in a region and/or agency which has not previously been involved with self-governance negotiations will take approximately 2 months from start to finish. Agreements for an October 1 to September 30 funding year need to be signed and submitted by July 1. Agreements for a January 1 to December 31 need to be signed and submitted by October 1.

Purpose of Notice

The regulations at 25 CFR 1000.10 through 1000.31 have been modified by section 201 of the newly enacted PROGRESS Act as follows:

Section 201. Definitions; reporting and audit requirements; application of programs.

To be eligible to participate in self-governance, an Indian Tribe shall:

(1) successfully complete the planning phase described in subsection (d);

(2) request participation in self-governance by resolution or other official

action by the Tribal governing body; and

(3) demonstrate for the 3 fiscal years preceding the date on which the Tribe requests participation, fiscal stability and financial management capability as evidenced by the Indian Tribe having no uncorrected significant and internal audit exceptions in the required annual audit of its self-determination or self-governance agreements with any Federal agency.

An Indian Tribe seeking to begin participation in self-governance shall complete the planning phase. The planning phase shall:

(A) be conducted to the satisfaction of the Indian Tribe; and

(B) include:

(i) legal and budgetary research; and

(ii) internal Tribal governing planning, training, and organizational preparation.

Applicants should be guided by the referenced requirements in preparing their applications to begin participation in the tribal self-governance program in fiscal year 2025 and calendar year 2025. Copies of these requirements may be obtained from the information contact person identified in this notice.

Tribes/consortia wishing to be considered for participation in the tribal self-governance program in fiscal year 2025 or calendar year 2025 must respond to this notice, except for those tribes/consortia which are one of the 142 tribal entities with signed self-governance agreements.

Information Collection

This information collection is authorized by OMB Control Number 1076–0143, Tribal Self-Governance Program, which expires February 28, 2026.

Bryan Newland,

Assistant Secretary—Indian Affairs.

BILLING CODE 4337–15–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[BLM_OR_FRN_MO4500160505]

Notice of Realty Action: Application by Randall L. Christian and Lynn L. Christian for Conveyance of Federally Owned Mineral Interests in Lake County, OR

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action.

SUMMARY: The Bureau of Land Management (BLM) is processing an application for the conveyance of federally owned mineral interests in a 640-acre parcel of land located in Lake County, Oregon, to the surface owners, Randall L. Christian and Lynn L. Christian.

DATES: Interested persons may submit written comments to the BLM on or before March 25, 2024.

ADDRESSES: Submit written comments to the BLM Lakeview Field Office, 1301 S. G Street, Lakeview, OR 97630.

FOR FURTHER INFORMATION CONTACT: Jami Ludwig, Field Manager, BLM Lakeview, at the address listed earlier, by telephone at (541) 947–6102, or email at *jludwig@blm.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services.

SUPPLEMENTARY INFORMATION: The BLM is processing an application under section 209 of the Federal Land Policy and Management Act (FLPMA) to convey federally owned mineral interests that total 640 acres situated in Lake County, Oregon. The location of the federally owned mineral interests proposed for conveyance is identical in location to the privately owned surface interest of the applicant, and is described as follows:

Willamette Meridian, Oregon

T. 25 S., R. 14 E., sec. 25.

The area described contains 640 acres, according to the official plat of the survey of the said land, on file with the BLM.

Under certain conditions, section 209(b) of FLPMA authorizes the conveyance of the federally owned mineral interests in land when the surface estate is not federally owned. The objective is to allow consolidation of the surface and mineral interests when either one of the following conditions exist: (1) There are no known mineral values in the land; or (2) The reservation of the mineral rights in the United States is interfering with or precluding appropriate nonmineral development of the land and such development is a more beneficial use of the land than mineral development.

The applicant has deposited a sufficient sum of funding to cover the administrative costs of processing the application, including, but not limited to, the cost of the mineral potential report.

Subject to valid existing rights, on February 9, 2024 the federally owned mineral interests in the land described above is hereby segregated from all forms of appropriation under the public land laws, including the mining laws. The segregative effect will terminate upon: (1) Issuance of a patent or other document of conveyance of the mineral interests; (2) Final rejection of the application; or (3) February 9, 2026, whichever occurs first.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

(Authority: 43 CFR 2720.1–1(b))

James Forbes,

Lakeview District Manager.

BILLING CODE 4331–24–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[BLM_CO_FRN_MO4500177759]

Notice of Filing of Plats of Survey, Colorado

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of official filing.

SUMMARY: The plats of survey of the following described lands are scheduled to be officially filed in the Bureau of Land Management (BLM), Colorado State Office, Lakewood, Colorado, 30 calendar days from the date of this publication. The surveys, which were executed at the request of the U.S. Forest Service and the National Park Service, are necessary for the management of these lands.

DATES: Unless there are protests of this action, the plats described in this notice will be filed on March 11, 2024.

ADDRESSES: You may submit written protests to the BLM Colorado State Office, Cadastral Survey, P.O. Box 151029, Lakewood, CO 80215.

FOR FURTHER INFORMATION CONTACT: David W. Ginther, Chief Cadastral Surveyor for Colorado, telephone: (970) 826–5064; email: *dginther@blm.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The plat, in two sheets, incorporating the field notes of the dependent resurvey in Township 6 North, Range 75 West, Sixth Principal Meridian, Colorado, was accepted on November 27, 2023.

The plat and field notes of the dependent resurvey and survey in partially surveyed Township 5 North, Range 73 West, Sixth Principal Meridian, Colorado, were accepted on December 27, 2023.

The plat, in two sheets, incorporating the field notes of the dependent resurvey in Township 11 North, Range 85 West, Sixth Principal Meridian, Colorado, was accepted on January 11, 2024.

The plat incorporating the field notes of the dependent resurvey in Township 2 North, Range 84 West, Sixth Principal Meridian, Colorado, was accepted on January 19, 2024.

A person or party who wishes to protest any of the above surveys must file a written notice of protest within 30 calendar days from the date of this publication at the address listed in the **ADDRESSES** section of this notice. A statement of reasons for the protest may be filed with the notice of protest and must be filed within 30 calendar days after the protest is filed. If a protest against the survey is received prior to the date of official filing, the filing will be stayed pending consideration of the protest. A plat will not be officially filed until the day after all protests have

been dismissed or otherwise resolved.

Before including your address, phone number, email address, or other personal identifying information in your protest, please be aware that your entire protest, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

(Authority: 43 U.S.C. ch. 3)

David W. Ginther,

Chief Cadastral Surveyor.

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–NRSS–EQD–RPB—NPS00; PPMRSNR1Y.NM0000; PPWONRADE1; OMB Control Number 1024–NEW]

Agency Information Collection Activities; National Park Service Scenic Valuation Study

AGENCY: National Park Service, Interior.

ACTION: Notice of Information Collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 we, the National Park Service (NPS) are proposing a new information collection.

DATES: Interested persons are invited to submit comments on or before April 9, 2024.

ADDRESSES: Written comments on this information collection request (ICR) can be sent to the NPS Information Collection Clearance Officer (ADIR–ICCO), 13461 Sunrise Valley Drive, (MS 244) Herndon, VA 20171, VA 20191 (mail); or *phadrea_ponds@nps.gov* (email). Please reference Office of Management and Budget (OMB) Control Number ''1024–NEW (Scenic Valuation)'' in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, contact Heather Best, Economist, at *heather_best@nps.gov* (email) or 970–420–3153 (telephone). Please reference OMB Control Number 1024–NEW (Scenic Valuation) in the subject line of your comments. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point of contact in the United States.

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995 (PRA, 44 U.S.C. 3501 *et seq.*) and 5 CFR 1320.8(d)(1), we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

We are soliciting comments on the proposed ICR that is described below. We are especially interested in public comment addressing the following issues: (1) is the collection necessary for the proper functions of the NPS; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the NPS enhance the quality, utility, and clarity of the information to be collected; and (5) how might the NPS minimize the burden of this collection on the respondents, including through the use of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: The National Park Service (NPS) is authorized by 54 U.S.C. 100701 and the System Unit Resource Protection Act (54 U.S.C. 100721) to collect information that can be used to assess the economic value of lost or damaged resources. Currently, the NPS does not have any valuation estimates for quantifying the loss of scenic resources due to intentional or accidental actions. The NPS Environmental Quality Division will request approval to conduct a short on-site survey followed by a mail-back survey to determine the economic value associated with the preservation (avoided loss) of scenic resources within NPS units from intentional or accidental loss. Data from the study will be used by the NPS to provide parks with estimates of economic losses to park visitors associated with damages to park scenic resources.

Title of Collection: National Park Service Scenic Valuation Study.

OMB Control Number: 1024–NEW.

Form Number: None.

Type of Review: New.

Respondents/Affected Public: Individuals and Households.

Total Estimated Number of Annual Responses: 5,326 (3360 on-site respondents, 756 non-response respondents,1210 mail-back survey respondents).

Estimated Completion Time per Response: Varies between 2 and 15 minutes (5 min. on-site survey, 2 min. non-response survey, 15 min. mail-back survey).

Total Estimated Number of Annual Burden Hours: 608 hrs. (280 hrs. on-site survey; 25 hrs. non-response survey; 303 hrs. mail-back survey).

Respondent's Obligation: Voluntary.

Frequency of Collection: Once.

Total Estimated Annual Nonhour Burden Cost: None.

An agency may not conduct or sponsor nor is a person required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Phadrea Ponds,

Information Collection Clearance Officer, National Park Service.

[FR Doc. 2024–02725 Filed 2–8–24; 8:45 am]

BILLING CODE 4312–52–P

DEPARTMENT OF THE INTERIOR

Bureau of Ocean Energy Management

[OMB Control Number 1010–NEW; Docket ID: BOEM–2024–0007]

Agency Information Collection Activities; Cook Inlet Recreation and Tourism Survey

AGENCY: Bureau of Ocean Energy Management, Interior.

ACTION: Notice of information collection; request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Bureau of Ocean Energy Management (BOEM) proposes a new information collection request (ICR).

DATES: Comments must be received by BOEM no later than April 9, 2024.

ADDRESSES: Send your comments on this ICR by mail to the BOEM Information Collection Clearance Officer, Anna Atkinson, Bureau of Ocean Energy Management, 45600 Woodland Road, Sterling, Virginia 20166; or by email to *anna.atkinson@boem.gov.* Please reference Office of Management and Budget (OMB) Control Number 1010–NEW in the subject line of your comments. You may also view and comment on the ICR and its related documents by searching the docket number BOEM–2024–0007 at *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Anna Atkinson by email at *anna.atkinson@boem.gov,* or by telephone at 703–787–1025. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside of the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995, BOEM provides the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps BOEM assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand BOEM's information collection requirements and provide the requested data in the desired format.

BOEM solicits comments on the proposed ICR described below. BOEM is especially interested in public comments addressing the following issues: (1) is the collection necessary to the proper functions of BOEM; (2) what can BOEM do to ensure that this information is processed and used in a timely manner; (3) is the burden estimate accurate; (4) how might BOEM enhance the quality, utility, and clarity of the information to be collected; and (5) how might BOEM minimize the burden of this collection on the respondents, including minimizing the burden through the use of information technology?

Comments submitted in response to this notice are a matter of public record. BOEM will include or summarize each comment in its ICR to OMB for approval of this information collection. You should be aware that your entire comment—including your address, phone number, email address, or other personally identifiable information included in your comment—may be made publicly available.

In order for BOEM to consider withholding from disclosure your personally identifiable information, you must identify, in a cover letter, any information contained in your comment that, if released, would constitute a clearly unwarranted invasion of your privacy. You must also briefly describe any possible harmful consequences of the disclosure of information, such as embarrassment, injury, or other harm. Note that BOEM will make available for public inspection, in their entirety, all comments submitted by organizations and businesses, or by individuals identifying themselves as representatives of organizations or businesses.

Even if BOEM withholds your information in the context of this ICR, your comment is subject to the Freedom of Information Act (FOIA). If your comment is requested under FOIA, your information will only be withheld if BOEM determines that one of the FOIA exemptions to disclosure applies. Such a determination will be made in accordance with the Department's FOIA regulations and applicable law.

BOEM protects proprietary information in accordance with FOIA and the Department's implementing regulations.

Title of Collection: Cook Inlet Recreation and Tourism Survey.

Abstract: Natural resource-based recreation in the marine and coastal environments of Cook Inlet, Alaska, offers numerous economic, cultural, environmental, health, educational, and quality-of-life benefits. Recreation and tourism play a vital role in supporting local economies, preserving cultural heritage, promoting environmental stewardship, and improving the well-being of both residents and visitors. The Outer Continental Shelf Lands Act charges BOEM with managing the energy and mineral resources of the Outer Continental Shelf (OCS) for protection of marine and coastal environments that support human lives and society. Additionally, to ensure the scientific integrity of its National Environmental Policy Act (NEPA) assessments, BOEM requires reliable data and information to evaluate the extent to which its activities adversely affect the human environment (40 CFR 1502.23). As defined in 40 CFR 1508.1, the effects on the human environment evaluated in NEPA assessments include social and economic impacts, as well as the ecological, aesthetic, historic, cultural, and health effects.

BOEM intends to conduct a research study of outdoor recreation and tourism in the Cook Inlet OCS Planning Area and adjacent coastal areas (*i.e.,* the study area). BOEM seeks updated baseline information on the nature, distribution, and seasonality of outdoor recreation and tourism in the study area, and the relative preferences and values for these activities. BOEM would use this information to determine how stakeholders and the recreational and tourism economy may be affected by potential future oil, gas, renewable energy, and other energy exploration and development activities. This study would help BOEM identify any appropriate mitigation strategies to address potential adverse effects of its activities on recreation and tourism in the study area. Altogether, the study would enable BOEM to develop more rigorous and thorough environmental analyses during any NEPA processes related to future Cook Inlet OCS energy and mineral activities.

Specifically, this information collection would involve primary data collection (following ICR approval by OMB) to elicit information on: (a) activities and attributes contributing to the value of recreational experiences; (b) expenditures related to recreational activities; and (c) how these things differ across the region and different user groups (residents and visitors). The primary research would provide meaningful insight regarding the influence of energy development on recreation and tourism (*e.g.,* by comparing areas in the Upper Cook Inlet with existing energy infrastructure to other areas in Cook Inlet without any energy infrastructure). The study also would document user attitudes regarding how recreation and tourism may be affected by different energy development-related activities (*e.g.,* noise, space use conflicts, spill risks, aesthetic effects of infrastructure, and vessel traffic).

The study's primary research design would include three components: focus groups, cognitive interviews, and onsite intercept surveys. The focus groups and cognitive interviews would be used to develop and pretest a draft survey, first in a group setting (focus groups) and then in a one-on-one interview setting (cognitive interviews). The final onsite intercept surveys would be administered at approximately two dozen sites in the study area during the primary recreation season from May to October. Potential respondents would be approached as they arrive to or depart from a site and invited to fill out the survey.

1. Focus Groups—To inform survey development, BOEM would conduct focus groups with recreationists in the study area. The recreationists would identify their preferred coastal- and marine-related recreation sites; why they choose their preferred sites; the differences they perceive between sites near existing energy infrastructure (in portions of the Upper Cook Inlet) to sites that are not near any energy infrastructure, and the recreational quality of those sites; what they like about their recreational experiences around Cook Inlet; what they do not like about the Cook Inlet sites they avoid; how offshore energy exploration and development activities may affect their recreation site choice and experience; and other related issues.

2. Cognitive Interviews—The findings of the focus groups would be used to develop a draft survey instrument. BOEM would then conduct 25 cognitive interviews to test and refine the survey. Specifically, the interviews would test if the survey is working as expected. Factors relevant to that determination include evaluating if questions are easily understood, how respondents formulate their answers, whether response categories are exhaustive and mutually exclusive, and other similar issues.

3. Onsite Intercept Surveys—BOEM expects the final survey would cover topics such as recreational destinations, frequency of use in the past 12 months, recreation trip-related expenditures, preferences for recreation site attributes, attitudes about and recreation behavioral responses to offshore energy exploration and development, and demographics. Surveys would be administered at a range of sites, including at some hub cities, smaller communities, public lands, visitor centers, seaports, airports, and marinas. Because the surveys would be administered between May and October, a potential respondent may be intercepted on more than one occasion. If a respondent clarifies that they have already taken the survey, they would not be asked to take it again.

OMB Control Number: OMB Control Number 1010–NEW.

Respondents/Affected Public: Participants in the focus groups and cognitive interviews would be members of the public who have engaged in coastal or marine recreation in the study area in the past year. Respondents to the surveys would be members of the public engaged in coastal or marine recreational activities in the study area. Members of the public would consist of a mixture of local, State, and out-of-State residents.

Total Estimated Number of Annual Responses: 565: 40 focus group participants, 25 cognitive interview participants, and 500 completed surveys. The focus group questions would be semi-structured and open-ended. Survey questions would be primarily discrete choice and closed-ended with minimal open-ended questions.

Estimated Completion Time per Response: 90 minutes per focus group participant, 45 minutes per cognitive interview participant, and 12 minutes per survey participant. (BOEM anticipates that the survey would comprise approximately 30 questions with each question taking about 20–30 seconds to complete on average.)

Total Estimated Number of Annual Burden Hours: 60 hours for focus groups, 18.75 hours for cognitive interviews, and 100 hours for survey; total of 178.75 hours.

Respondent's Obligation: Voluntary.

Frequency of Collection: One time.

Total Estimated Annual Non-hour Burden Cost: There is no non-hour cost burden associated with this collection.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Karen Thundiyil,

Chief, Office of Regulations, Bureau of Ocean Energy Management.

[FR Doc. 2024–02694 Filed 2–8–24; 8:45 am]

BILLING CODE 4340–98–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–684 and 731–TA–1597 (Final)]

Gas Powered Pressure Washers From China

Determinations

On the basis of the record [1] developed in the subject investigations, the United States International Trade Commission (''Commission'') determines, pursuant to the Tariff Act of 1930 (''the Act''), that an industry in the United States is materially injured by reason of imports of gas powered pressure washers from China, provided for in subheadings 8424.30.90 and 8424.90.90 of the Harmonized Tariff Schedule of the United States, that have been found by the U.S. Department of Commerce (''Commerce'') to be sold in the United States at less than fair value (''LTFV'') and subsidized by the government of China.[2] [3]

Background

The Commission instituted these investigations effective December 30, 2022, following receipt of petitions filed with the Commission and Commerce by FNA Group, Inc., Pleasant Prairie, Wisconsin. The Commission scheduled the final phase of the investigations following notification of preliminary determinations by Commerce that imports of gas powered pressure washers from Vietnam were being sold at LTFV within the meaning of section 733(b) of the Act (19 U.S.C. 1673b(b)) and that imports of gas powered pressure washers from China were being subsidized by the government of China within the meaning of section 703(b) of the Act (19 U.S.C. 1671b(b)). Notice of the scheduling of the final phase of the Commission's investigations and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** on June 22, 2023 (*88 FR 40865*). The Commission conducted its hearing through written testimony and video conference on August 24, 2023. All persons who requested the opportunity were permitted to participate.

The investigation schedules became staggered when Commerce did not postpone its final determination for the antidumping duty investigation regarding gas powered pressured washers from Vietnam, while it did postpone the final determinations for the antidumping and countervailing duty investigations regarding gas powered pressure washers from China. On October 13, 2023, the Commission issued a final affirmative determination in its antidumping duty investigation of gas powered pressure washers from Vietnam (88 FR 71885, October 18, 2023). Following notification of final determinations by Commerce that imports of gas powered pressure washers from China were being sold at LTFV within the meaning of section 735(a) of the Act (19 U.S.C. 1673d(a))

[1] The record is defined in § 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

[2] 88 FR 88365 (December 21, 2023), 88 FR 88578 (December 22, 2023).

[3] The Commission also finds that imports subject to Commerce's affirmative critical circumstances determinations are not likely to undermine seriously the remedial effect of the antidumping or countervailing duty orders on gas powered pressure washes from China.

and subsidized by the government of China within the meaning of section 705(a) of the Act (19 U.S.C. 1671d(a)), notice of the supplemental scheduling of the final phase of the Commission's antidumping and countervailing duty investigations was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of January 2, 2024 (*89 FR 90*).

The Commission made these determinations pursuant to §§ 705(b) and 735(b) of the Act (19 U.S.C. 1671d(b) and 19 U.S.C. 1673d(b)). It completed and filed its determinations in these investigations on February 5, 2024. The views of the Commission are contained in USITC Publication 5488 (February 2024), entitled *Gas Powered Pressure Washers from China: Investigation Nos. 701–TA–684 and 731–TA–1597 (Final).*

By order of the Commission.

Issued: February 5, 2024.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2024–02627 Filed 2–8–24; 8:45 am]

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

[OMB Number 1125–0018]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Revision of a Previously Approved Collection; FOIAXpress/FOIA Public Access Link

AGENCY: Executive Office for Immigration Review, Department of Justice.

ACTION: 60-Day notice.

SUMMARY: The Executive Office for Immigration Review (EOIR), Department of Justice (DOJ), will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until April 9, 2024.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Raechel Horowitz, Chief, Immigration Law Division, Office of Policy, Executive Office for Immigration Review, 5107 Leesburg Pike, Suite 2500, Falls Church, VA 22041, telephone: (703) 305–0473, *Raechel.Horowitz@usdoj.gov.*

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Abstract: This information collection is optional and voluntary. FOIAXpress is a software program that provides the EOIR Freedom of Information Act (FOIA) Program with a single, unified application for managing the entire lifecycle of FOIA requests and appeals. The Public Access Link (PAL) is a secure web-based application that provides an online platform for the public to file a FOIA request with EOIR. The PAL is integrated directly with FOIAXpress and offers a centralized location for EOIR to receive online FOIA requests, deliver responsive records, communicate with requesters, collect fees, if applicable, and provide access to released documents in a public reading room in accordance with agency proactive disclosure guidelines.

EOIR has developed several changes to the PAL platform to improve the Agency's FOIA request and response process and to reduce the burden on members of the public that submit FOIA requests to EOIR. These developments include the following substantive changes: modifying the request form to display only those data fields relevant to the type of FOIA request selected by the requestor; changing the date range field from voluntary to mandatory; prompting an individual that requests a Record of Proceeding (ROP) to provide on a voluntary basis the charging document date and a record subject's alias, parents' names, port and date of entry, and place and date of proceeding; and removing data fields that EOIR determined were no longer necessary for the Agency to fulfill a FOIA request. In addition, EOIR has identified the following non-substantive changes: modifying the appearance and formatting of the PAL request form; updating links to web pages and resources embedded throughout the form; revising existing form instructions for clarity; and reorganizing some data fields under different sections of the PAL form. EOIR intends these developments to reduce the public's burden in completing the PAL form and to improve the Agency's FOIA request and response process, and the public's experience with that process. These enhancements include: assisting requestors in making the most appropriate selection for the type of FOIA request; enhancing the logical direction with which a requestor completes the form; and tailoring the information solicited from the requestor to generate more precise requests, thereby reducing processing time.

Overview of This Information Collection

1. *Type of Information Collection:* Revision of a previously approved collection.

2. *The Title of the Form/Collection:* FOIAXpress/FOIA Public Access Link.

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* None.

4. *Affected public who will be asked or required to respond, as well as the obligation to respond:* Individuals and households. The obligation to respond is voluntary.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* It is estimated that 24,804 respondents will complete each form within approximately 3 minutes each.

6. *An estimate of the total annual burden (in hours) associated with the collection:* The estimated total annual burden hours for this collection is 1,240 annual burden hours.

7. *An estimate of the total annual cost burden associated with the collection, if applicable:* $0.

TOTAL BURDEN HOURS

Activity	Number of respondents	Frequency	Total annual responses	Time per response (min)	Total annual burden (hours)
Completing the form (individuals)	24,804	1/annually	24,804	3	1,240

If additional information is required contact: Darwin Arceo, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE, 4W–218, Washington, DC.

Dated: February 5, 2024.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

BILLING CODE 4410–30–P

DEPARTMENT OF LABOR

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Employer's First Report of Injury or Occupational Disease; Employer's Supplementary Report of Accident or Occupational Illness

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Office of Workers' Compensation Programs (OWCP)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that the agency receives on or before March 11, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain*. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) if the information will be processed and used in a timely manner; (3) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (4) ways to enhance the quality, utility and clarity of the information collection; and (5) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

FOR FURTHER INFORMATION CONTACT: Michelle Neary by telephone at 202–693–6312, or by email at *DOL_PRA_PUBLIC@dol.gov*.

SUPPLEMENTARY INFORMATION: Forms LS–202 and LS–210 are used to report injuries, periods of disability, and medical treatment under the Longshore and Harbor Workers' Compensation Act. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on September 12, 2023 (88 FR 62603).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Agency: DOL–OWCP.

Title of Collection: Employer's First Report of Injury or Occupational Disease; Employer's Supplementary Report of Accident or Occupational Illness.

OMB Control Number: 1240–0003.

Affected Public: Private Sector—Businesses or other for-profits; Not-for-profit institutions.

Total Estimated Number of Respondents: 42,575.

Total Estimated Number of Responses: 43,039.

Total Estimated Annual Time Burden: 10,760 hours.

Total Estimated Annual Other Costs Burden: $611.

(Authority: 44 U.S.C. 3507(a)(1)(D))

Michelle Neary,

Senior PRA Analyst.

BILLING CODE 4510–CF–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2009–0025]

UL LLC: Application for Expansion of Recognition and Proposed Modification to the NRTL Program's List of Appropriate Test Standards

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice.

SUMMARY: In this notice, OSHA announces the application of UL LLC, for expansion of the scope of recognition as a Nationally Recognized Testing Laboratory (NRTL) and presents the agency's preliminary finding to grant the application. Additionally, OSHA proposes to add two test standards to the NRTL Program's List of Appropriate Test Standards.

DATES: Submit comments, information, and documents in response to this notice, or requests for an extension of time to make a submission, on or before February 26, 2024.

ADDRESSES: Submit comments by any of the following methods:

Electronically: Submit comments and attachments electronically at *https://www.regulations.gov,* which is the Federal eRulemaking Portal. Follow the instructions online for making electronic submissions.

Docket: To read or download comments or other material in the docket, go to *https://www.regulations.gov* or the OSHA Docket Office. All documents in the docket (including this **Federal Register** notice) are listed in the *http://www.regulations.gov* index; however,

some information (*e.g.,* copyrighted material) is not publicly available to read or download through the website. All submissions, including copyrighted material, are available for inspection through the OSHA Docket Office. Contact the OSHA Docket Office at (202) 693–2350 (TTY (877) 889–5627) for assistance in locating docket submissions.

Instructions: All submissions must include the agency name and the OSHA docket number (OSHA–2009–0025). OSHA places comments and other materials, including any personal information, in the public docket without revision, and these materials will be available online at *http://www.regulations.gov.* Therefore, the agency cautions commenters about submitting statements they do not want made available to the public, or submitting comments that contain personal information (either about themselves or others) such as Social Security numbers, birth dates, and medical data.

Extension of comment period: Submit requests for an extension of the comment period on or before February 26, 2024 to the Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue NW, Room N–3653, Washington, DC 20210, or by fax to (202) 693–1644.

FOR FURTHER INFORMATION CONTACT: Information regarding this notice is available from the following sources:

Press inquiries: Contact Mr. Frank Meilinger, Director, OSHA Office of Communications, U.S. Department of Labor, telephone: (202) 693–1999; email: *meilinger.francis2@dol.gov.*

General and technical information: Contact Mr. Kevin Robinson, Director, Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, U.S. Department of Labor, phone: (202) 693–1911 or email: *robinson.kevin@dol.gov.*

SUPPLEMENTARY INFORMATION:

I. Notice of the Application for Expansion

OSHA is providing notice that UL LLC, (UL) is applying to expand the current recognition as a NRTL. UL requests the addition of three test standards to the NRTL scope of recognition.

OSHA recognition of a NRTL signifies that the organization meets the requirements specified in 29 CFR 1910.7. Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products covered within the scope of recognition. Each NRTL's scope of recognition includes (1) the type of products the NRTL may test, with each type specified by the applicable test standard; and (2) the recognized site(s) that has/have the technical capability to perform the product-testing and product-certification activities for test standards within the NRTL's scope. Recognition is not a delegation or grant of government authority; however, recognition enables employers to use products approved by the NRTL to meet OSHA standards that require product testing and certification.

The agency processes applications by NRTLs or applicant organizations for initial recognition, as well as for expansion or renewal of recognition, following requirements in Appendix A to 29 CFR 1910.7. This appendix requires that the agency publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the application and provides a preliminary finding. In the second notice, the agency provides the final decision on the application. These notices set forth the NRTL's scope of recognition or modifications of that scope. OSHA maintains an informational web page for each NRTL, including UL, which details that NRTL's scope of recognition. These pages are available from the OSHA website at *https://www.osha.gov/dts/otpca/nrtl/index.html.*

UL currently has fifty-five facilities (sites) recognized by OSHA for product testing and certification, with headquarters located at: UL LLC, 333 Pfingsten Road, Northbrook, Illinois 60062. A complete list of UL sites recognized by OSHA is available at *https://www.osha.gov/dts/otpca/nrtl/ul.html.*

II. General Background on the Application

UL submitted an application, dated July 26, 2022 (OSHA–2009–0025–0059), to expand recognition to include three additional test standards. OSHA staff performed a detailed analysis of the application packet and other pertinent information. OSHA did not perform any on-site reviews in relation to this application.

Table 1, below, lists the test standards found in UL's application for expansion for testing and certification of products under the NRTL Program.

TABLE 1—PROPOSED TEST STANDARDS FOR INCLUSION IN UL'S NRTL SCOPE OF RECOGNITION

Test standard	Test standard title
UL 6420	Equipment Use for System Isolation and Rated as a Single Unit.
UL 6200 *	Controllers for Use in Power Production.
UL 62091 *	Low-Voltage Switchgear and Controlgear—Controllers for Drivers of Stationary Fire Pump.

* In this notice, OSHA also proposes to add these test standards to the NRTL Program's List of Appropriate Test Standards.

III. Proposal To Add New Test Standards to the NRTL Program's List of Appropriate Test Standards

Periodically, OSHA will propose to add new test standards to the NRTL list of appropriate test standards following an evaluation of the test standard document. To qualify as an appropriate test standard, the agency evaluates the document to: (1) verify it represents a product category for which OSHA requires certification by a NRTL; (2) verify the document represents a product and not a component; and (3) verify the document defines safety test specifications (not installation or operational performance specifications). OSHA becomes aware of new test standards through various avenues. For example, OSHA may become aware of new test standards by: (1) monitoring notifications issued by certain Standards Development Organizations; (2) reviewing applications by NRTLs or applicants seeking recognition to include new test standards in their scopes of recognition; and (3) obtaining notification from manufacturers, manufacturing organizations, government agencies, or other parties. OSHA may determine to include a new test standard in the list, for example, if the test standard is for a particular type of product that another test standard also covers or it covers a type of product that no standard previously covered.

In this notice, OSHA proposes to add two new test standards to the NRTL Program's list of appropriate test standards. Table 2, below, lists the test standards that are new to the NRTL Program. OSHA preliminarily determines that these test standards are appropriate test standards. OSHA seeks public comment on this preliminary determination.

TABLE 2—STANDARDS OSHA IS PROPOSING TO ADD TO THE NRTL PROGRAM'S LIST OF APPROPRIATE TEST STANDARDS

Test standard	Test standard title
UL 6200	Controllers for Use in Power Production.
UL 62091	Low-Voltage Switchgear and Controlgear—Controllers for Drivers of Stationary Fire Pump.

IV. Preliminary Findings on the Application

UL submitted an acceptable application for expansion of the scope of recognition. OSHA's review of the application files and related material preliminarily indicates that UL can meet the requirements prescribed by 29 CFR 1910.7 for expanding recognition to include the addition of the test standards listed above for NRTL testing and certification. This preliminary finding does not constitute an interim or temporary approval of UL's application.

OSHA also preliminarily determined that the test standards listed above are appropriate test standards.

OSHA seeks public comment on these preliminary determinations.

V. Public Participation

OSHA welcomes public comment as to whether UL meets the requirements of 29 CFR 1910.7 for expansion of recognition as a NRTL and whether the test standard listed above is an appropriate test standard that should be included in the NRTL Program's List of Appropriate Test Standards. Comments should consist of pertinent written documents and exhibits.

Commenters needing more time to comment must submit a request in writing, stating the reasons for the request by the due date for comments. OSHA will limit any extension to 10 days unless the requester justifies a longer time period. OSHA may deny a request for an extension if it is not adequately justified.

To review copies of the exhibits identified in this notice, as well as comments submitted to the docket, contact the Docket Office, Occupational Safety and Health Administration, U.S. Department of Labor. These materials also are generally available online at *https://www.regulations.gov* under Docket No. OSHA–2009–0025 (for further information, see the ''*Docket*'' heading in the section of this notice titled **ADDRESSES**).

OSHA staff will review all comments to the docket submitted in a timely manner and after addressing the issues raised by these comments, make a recommendation to the Assistant Secretary for Occupational Safety and Health on whether to grant UL's application for expansion of its scope of recognition and to add the test standards listed above to the NRTL Program's List of Appropriate Test Standards. The Assistant Secretary will make the final decision on granting the application and on adding the test standards listed above to the NRTL Program's List of Appropriate Test Standards. In making these decisions, the Assistant Secretary may undertake other proceedings prescribed in Appendix A to 29 CFR 1910.7.

OSHA will publish a public notice of its final decision in the **Federal Register**.

VI. Authority and Signature

James S. Frederick, Deputy Assistant Secretary of Labor for Occupational Safety and Health, authorized the preparation of this notice. Accordingly, the agency is issuing this notice pursuant to 29 U.S.C. 657(g)(2), Secretary of Labor's Order No. 8–2020 (85 FR 58393, Sept. 18, 2020)), and 29 CFR 1910.7.

Signed at Washington, DC, on February 2, 2024.

James S. Frederick,

Deputy Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510–26–P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

[NARA–2024–015]

Freedom of Information Act (FOIA) Advisory Committee Meeting

AGENCY: Office of Government Information Services (OGIS), National Archives and Records Administration (NARA).

ACTION: Notice of Federal advisory committee meeting.

SUMMARY: We are announcing an upcoming Freedom of Information Act (FOIA) Advisory Committee meeting in accordance with the Federal Advisory Committee Act and the second United States Open Government National Action Plan.

DATES: The meeting will be on March 5, 2024, from 10 a.m. to 1 p.m. EST. You must register by 11:59 p.m. EST March 3, 2024, to attend.

ADDRESSES: This meeting will be a virtual meeting. We will send access instructions for the meeting to those who register according to the instructions below.

FOR FURTHER INFORMATION CONTACT: Kirsten Mitchell, Designated Federal Officer for this committee, by email at *foia-advisory-committee@nara.gov,* or by telephone at 202.741.5770.

SUPPLEMENTARY INFORMATION:

Agendas and meeting materials: We will post all meeting materials, including the agenda, at *https://www.archives.gov/ogis/foia-advisory-committee/2022-2024-term.*

This meeting will be the eighth of the 2022–2024 committee term. The purpose of the meeting will be to hear reports from and consider any recommendations from each of the three subcommittees: Implementation, Modernization, and Resources.

Procedures: This virtual meeting is open to the public in accordance with the Federal Advisory Committee Act (5 U.S.C. app. 2). If you wish to offer oral public comments during the public comments periods of the meetings, you must register in advance through Eventbrite *https://www.eventbrite.com/o/office-of-government-information-services-7515239993.* You must provide an email address so that we can provide you with information to access the meeting online. Public comments will be limited to three minutes per individual. We will also live-stream the meeting on the National Archives YouTube channel, *https://www.youtube.com/user/usnationalarchives,* and include a captioning option. To request additional

accommodations (*e.g.,* a transcript), email *foia-advisory-committee@nara.gov* or call 202.741.5770. Members of the media who wish to register, those who are unable to register online, and those who require special accommodations, should contact Kirsten Mitchell (contact information listed above).

Merrily Harris,

Committee Management Officer.

BILLING CODE 7515–01–P

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts

Arts Advisory Panel Meetings

AGENCY: National Endowment for the Arts.

ACTION: Notice of meetings.

SUMMARY: Pursuant to the Federal Advisory Committee Act, as amended, notice is hereby given that 1 meeting of the Arts Advisory Panel to the National Council on the Arts will be held by teleconference or videoconference.

DATES: See the **SUPPLEMENTARY INFORMATION** section for individual meeting times and dates. All meetings are Eastern time and ending times are approximate:

ADDRESSES: National Endowment for the Arts, Constitution Center, 400 7th St. SW, Washington, DC 20506.

FOR FURTHER INFORMATION CONTACT: Further information with reference to these meetings can be obtained from David Travis, Office of Guidelines & Panel Operations, National Endowment for the Arts, Washington, DC 20506; *travisd@arts.gov,* or call 202–682–5001.

SUPPLEMENTARY INFORMATION: The closed portions of meetings are for the purpose of Panel review, discussion, evaluation, and recommendations on financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including information given in confidence to the agency. In accordance with the determination of the Chair of March 11, 2022, these sessions will be closed to the public pursuant to 5 U.S.C. 10.

The upcoming meetings are:

FY25 Federal Advisory Committee on International Exhibitions (review of applications): This meeting will be closed.

Date and time: March 12, 2024; 2 p.m. to 4 p.m.

Dated: February 6, 2024.

David Travis,

Specialist, National Endowment for the Arts.

BILLING CODE 7537–01–P

NATIONAL SCIENCE FOUNDATION

Sunshine Act Meetings

The National Science Board's Committee on Awards and Facilities (A&F) hereby gives notice of the scheduling of a teleconference for the transaction of National Science Board business pursuant to the NSF Act and the Government in the Sunshine Act.

TIME AND DATE: Monday, February 12, 2024, from 1:00–2:00 p.m. Eastern.

PLACE: This meeting will be via videoconference through the National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314.

STATUS: Closed.

MATTERS TO BE CONSIDERED: The agenda is: Committee Chair's opening remarks about the agenda; Discussion of the Astro2020 Decadal Recommendations; Vote on proposed resolution.

CONTACT PERSON FOR MORE INFORMATION: Point of contact for this meeting is: Chris Blair, *cblair@nsf.gov,* 703/292–7000. Meeting information and updates may be found at *www.nsf.gov/nsb.*

Christopher Blair,

Executive Assistant to the National Science Board Office.

[FR Doc. 2024–02707 Filed 2–6–24; 4:15 pm]

NATIONAL SCIENCE FOUNDATION

Service Contract Inventory; Notice of Availability

AGENCY: National Science Foundation.

ACTION: Notice.

SUMMARY: The Division of Acquisition and Cooperative Support within the National Science Foundation (NSF) is publishing this notice to advise the public of the availability of its Fiscal Year (FY) 2023 Service Contracts Inventory Analysis Report.

FOR FURTHER INFORMATION CONTACT: Raymond McCollum, Policy Branch Chief, Division of Acquisition and Cooperative Support, National Science Foundation. Phone: 703–292–4225; email: *rmccollu@nsf.gov.*

SUPPLEMENTARY INFORMATION: NSF's FY 2023 Service Contract Inventory Analysis Report is included as part of a governmentwide service contract inventory. The inventory includes covered service contracts that were awarded in FY 2023. The NSF analyzes this data for the purpose of determining whether its contract labor is being used in an effective and appropriate manner and if the mix of federal employees and contractors in the agency is effectively balanced. The report does not include contractor proprietary or sensitive information.

The FY 2023 Service Contract Inventory Analysis Report is provided at the following link: *https://www.nsf.gov/bfa/dcca/contracts/index.jsp.*

Authority: 42 U.S.C. 1861, *et seq.*

Dated: February 2, 2024.

Raymond L. McCollum,

Policy Branch Chief, National Science Foundation.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 70–0152; NRC–2024–0021]

Purdue University; License Renewal Application

AGENCY: Nuclear Regulatory Commission.

ACTION: Acceptance for docketing; opportunity to request a hearing and to petition for leave to intervene; order imposing procedures.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has received an application from Purdue University (Purdue or the applicant), to renew Special Nuclear Material (SNM) License Number 142 (SNM–142). The renewed license would authorize the applicant to continue to use SNM in various research operations, calibration, and testing at its campus in West Lafayette, Indiana. If the license renewal application is approved, the license would authorize Purdue to continue to possess and use SNM under NRC regulations for 10 years beyond its current license. Because the license application contains sensitive unclassified non-safeguards information (SUNSI) and safeguards information (SGI), an order imposes procedures to obtain access to SUNSI and SGI for contention preparation.

DATES: A request for a hearing or petition for leave to intervene must be filed by April 9, 2024. Any potential party as defined in section 2.4 of title 10 of the *Code of Federal Regulations* (10 CFR) who believes access to SUNSI or SGI is necessary to respond to this notice must request document access by February 20, 2024.

ADDRESSES: Please refer to Docket ID NRC–2024–0021 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2024–0021. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.
- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Jenny Tobin, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2328; email: *Jennifer.Tobin@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC received, by letter dated September 18, 2023 (ADAMS Package Accession No. ML23268A087), an application from Purdue to renew its license, SNM–142. Purdue is authorized to use SNM under 10 CFR part 70, ''Domestic Licensing of Special Nuclear Material,'' at its campus in West Lafayette for research operations, calibration, and testing. More specifically, Purdue may possess and use SNM for, among other things, activities associated with the study of thermal and mechanical properties of uranium dioxide (UO_2); activation analysis studies, instrument calibration, and other research projects as approved by the university's radiation safety committee using plutonium-beryllium (PuBe) sources; and activities associated with the Fast Breeder Blanket Facility.

The renewed SNM license would allow Purdue to continue licensed activities for 10 years. Purdue filed the original license renewal application on July 21, 2023, at least 30 days before the license's expiration date of September 25, 2023. This original application included incorrect security markings, leading Purdue to re-submit the application (including all of the enclosures) with the correct security markings by letter dated September 18, 2023. The NRC staff docketed the resubmitted application. Under 10 CFR 70.38(a), when a licensee files an application for renewal not less than 30 days before the expiration date of the existing license, the license will not expire until the Commission makes a final determination regarding the license renewal application. Although the original renewal request was incorrectly marked, Purdue submitted it at least 30 days before the expiration date. Therefore, pursuant to the timely renewal provisions in 10 CFR 70.38(a), Purdue is permitted to continue using its SNM in accordance with the existing SNM–142 license, pending final decision by the Commission on the license renewal application.

An NRC acceptance review of the revised application, dated December 13, 2023 (ADAMS Accession No. ML23324A448), found the application acceptable for a technical review. In its letter accepting the application for a technical review, the NRC included three observations related to information the NRC could potentially request during the technical review. These observations where that: (1) the application was not updated to include financial awareness of the Nuclear Energy Innovation and Modernization Act and the requirements therein; (2) the material control and accounting portions of the application included outdated regulatory citations; and (3) the radioactive waste management program at Purdue is tied to the NRC's broadscope license under 10 CFR part 33 and thus, the application should highlight what commitments are needed for the renewal of the part 70 SNM license. During the technical review, the NRC will evaluate the application for radiation safety, nuclear criticality safety, chemical safety, fire safety, security, decommissioning, decommissioning financial assurance, and material control/accountability. The NRC will document its findings in a safety evaluation report.

II. Opportunity To Request a Hearing and Petition for Leave To Intervene

Within 60 days after the date of publication of this notice, any person (petitioner) whose interest may be affected by this action may file a request for a hearing and petition for leave to intervene (petition) with respect to the renewal of the special nuclear materials license. Petitions shall be filed in accordance with the Commission's ''Agency Rules of Practice and Procedure'' in 10 CFR part 2. Interested persons should consult 10 CFR 2.309. If a petition is filed within 60 days, the presiding officer will rule on the petition and, if appropriate, a notice of a hearing will be issued.

Petitions must be filed no later than 60 days from the date of publication of this notice in accordance with the filing instructions in the ''Electronic Submissions (E-Filing)'' section of this document. Petitions and motions for leave to file new or amended contentions that are filed after the deadline will not be entertained absent a determination by the presiding officer that the filing demonstrates good cause by satisfying the three factors in 10 CFR 2.309(c)(1)(i) through (iii).

A State, local governmental body, Federally recognized Indian Tribe, or designated agency thereof, may submit a petition to the Commission to participate as a party under 10 CFR 2.309(h), no later than 60 days from the date of publication of this notice. Alternatively, a State, local governmental body, Federally recognized Indian Tribe, or agency thereof may participate as a non-party under 10 CFR 2.315(c).

For information about filing a petition and about participation by a person not a party under 10 CFR 2.315, see ADAMS Accession No. ML20340A053 (*https://;adamswebsearch2.nrc.gov/webSearch2/main.jsp?AccessionNumber=ML20340A053*) and on the RC website at *https://www.nrc.gov/about-nrc/regulatory/adjudicatory/hearing.html#participate.*

III. Electronic Submissions (E-Filing)

All documents filed in NRC adjudicatory proceedings, including documents filed by an interested State, local governmental body, Federally recognized Indian Tribe, or designated agency thereof that requests to participate under 10 CFR 2.315(c), must be filed in accordance with 10 CFR 2.302. The E-Filing process requires participants to submit and serve all adjudicatory documents over the

internet, or in some cases, to mail copies on electronic storage media, unless an exemption permitting an alternative filing method, as discussed below, is granted. Detailed guidance on electronic submissions is located in the Guidance for Electronic Submissions to the NRC (ADAMS Accession No. ML13031A056) and on the NRC website at *https://www.nrc.gov/site-help/e-submittals.html.*

To comply with the procedural requirements of E-Filing, at least 10 days prior to the filing deadline, the participant should contact the Office of the Secretary by email at *Hearing.Docket@nrc.gov,* or by telephone at 301–415–1677, to (1) request a digital identification (ID) certificate, which allows the participant (or its counsel or representative) to digitally sign submissions and access the E-Filing system for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a petition or other adjudicatory document (even in instances in which the participant, or its counsel or representative, already holds an NRC-issued digital ID certificate). Based upon this information, the Secretary will establish an electronic docket for the proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on the NRC's public website at *https://www.nrc.gov/site-help/e-submittals/getting-started.html.* After a digital ID certificate is obtained and a docket created, the participant must submit adjudicatory documents in Portable Document Format. Guidance on submissions is available on the NRC's public website at *https://www.nrc.gov/site-help/electronic-sub-ref-mat.html.* A filing is considered complete at the time the document is submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. ET on the due date. Upon receipt of a transmission, the E-Filing system timestamps the document and sends the submitter an email confirming receipt of the document. The E-Filing system also distributes an email that provides access to the document to the NRC's Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the document on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before adjudicatory documents are filed to obtain access to the documents via the E-Filing system.

A person filing electronically using the NRC's adjudicatory E-Filing system may seek assistance by contacting the NRC's Electronic Filing Help Desk through the ''Contact Us'' link located on the NRC's public website at *https://www.nrc.gov/site-help/e-submittals.html,* by email to *MSHD.Resource@nrc.gov,* or by a toll-free call at 1–866–672–7640. The NRC Electronic Filing Help Desk is available between 9 a.m. and 6 p.m., ET, Monday through Friday, except Federal holidays.

Participants who believe that they have good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing stating why there is good cause for not filing electronically and requesting authorization to continue to submit documents in paper format. Such filings must be submitted in accordance with 10 CFR 2.302(b)–(d). Participants filing adjudicatory documents in this manner are responsible for serving their documents on all other participants. Participants granted an exemption under 10 CFR 2.302(g)(2) must still meet the electronic formatting requirement in 10 CFR 2.302(g)(1), unless the participant also seeks and is granted an exemption from 10 CFR 2.302(g)(1).

Documents submitted in adjudicatory proceedings will appear in the NRC's electronic hearing docket, which is publicly available at *https://adams.nrc.gov/ehd,* unless excluded pursuant to an order of the presiding officer. If you do not have an NRC-issued digital ID certificate as described above, click ''cancel'' when the link requests certificates and you will be automatically directed to the NRC's electronic hearing dockets where you will be able to access any publicly available documents in a particular hearing docket. Participants are requested not to include personal privacy information such as social security numbers, home addresses, or personal phone numbers in their filings unless an NRC regulation or other law requires submission of such information. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants should not include copyrighted materials in their submission.

Order Imposing Procedures for Access to Sensitive Unclassified Non-Safeguards Information and Safeguards Information for Contention Preparation

A. This Order contains instructions regarding how potential parties to this proceeding may request access to documents containing sensitive unclassified information (including Sensitive Unclassified Non-Safeguards Information (SUNSI) and Safeguards Information (SGI)). Requirements for access to SGI are primarily set forth in 10 CFR parts 2 and 73. Nothing in this Order is intended to conflict with the SGI regulations.

B. Within 10 days after publication of this notice of hearing or opportunity for hearing, any potential party who believes access to SUNSI or SGI is necessary to respond to this notice may request access to SUNSI or SGI. A ''potential party'' is any person who intends to participate as a party by demonstrating standing and filing an admissible contention under 10 CFR 2.309. Requests for access to SUNSI or SGI submitted later than 10 days after publication will not be considered absent a showing of good cause for the late filing, addressing why the request could not have been filed earlier.

C. The requestor shall submit a letter requesting permission to access SUNSI, SGI, or both to the Office of the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemakings and Adjudications Staff, and provide a copy to the Deputy General Counsel for Licensing, Hearings, and Enforcement, Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001. The expedited delivery or courier mail address for both offices is: U.S. Nuclear Regulatory Commission, 11555 Rockville Pike, Rockville, Maryland 20852. The email addresses for the Office of the Secretary and the Office of the General Counsel are *Hearing.Docket@nrc.gov* and *RidsOgcMailCenter.Resource@nrc.gov,* respectively.[1] The request must include the following information:

(1) A description of the licensing action with a citation to this **Federal Register** notice;

(2) The name and address of the potential party and a description of the potential party's particularized interest that could be harmed by the action identified in C.(1);

[1] While a request for hearing or petition to intervene in this proceeding must comply with the filing requirements of the NRC's ''E-Filing Rule,'' the initial request to access SUNSI and/or SGI under these procedures should be submitted as described in this paragraph.

(3) If the request is for SUNSI, the identity of the individual or entity requesting access to SUNSI and the requestor's basis for the need for the information in order to meaningfully participate in this adjudicatory proceeding. In particular, the request must explain why publicly available versions of the information requested would not be sufficient to provide the basis and specificity for a proffered contention; and

(4) If the request is for SGI, the identity of each individual who would have access to SGI if the request is granted, including the identity of any expert, consultant, or assistant who will aid the requestor in evaluating the SGI. In addition, the request must contain the following information:

(a) A statement that explains each individual's ''need to know'' the SGI, as required by 10 CFR 73.2 and 10 CFR 73.22(b)(1). Consistent with the definition of ''need to know'' as stated in 10 CFR 73.2, the statement must explain:

(i) Specifically, why the requestor believes that the information is necessary to enable the requestor to proffer and/or adjudicate a specific contention in this proceeding; [2] and

(ii) The technical competence (demonstrable knowledge, skill, training or education) of the requestor to effectively utilize the requested SGI to provide the basis and specificity for a proffered contention. The technical competence of a potential party or its counsel may be shown by reliance on a qualified expert, consultant, or assistant who satisfies these criteria.

(b) A completed Form SF–85, ''Questionnaire for Non-Sensitive Positions,'' for each individual who would have access to SGI. The completed Form SF–85 will be used by the Office of Administration to conduct the background check required for access to SGI, as required by 10 CFR part 2, subpart C, and 10 CFR 73.22(b)(2), to determine the requestor's trustworthiness and reliability. For security reasons, Form SF–85 can only be submitted electronically through the National Background Investigation Services e-App system, a secure website that is owned and operated by the Defense Counterintelligence and Security Agency (DCSA). To obtain online access to the form, the requestor should contact the NRC's Office of Administration at 301–415–3710.[3]

(c) A completed Form FD–258 (fingerprint card), signed in original ink, and submitted in accordance with 10 CFR 73.57(d). Copies of Form FD–258 will be provided in the background check request package supplied by the Office of Administration for each individual for whom a background check is being requested. The fingerprint card will be used to satisfy the requirements of 10 CFR part 2, subpart C, 10 CFR 73.22(b)(1), and Section 149 of the Atomic Energy Act of 1954, as amended, which mandates that all persons with access to SGI must be fingerprinted for an FBI identification and criminal history records check.

(d) A check or money order payable in the amount of $310.00 [4] to the U.S. Nuclear Regulatory Commission for each individual for whom the request for access has been submitted.

(e) If the requestor or any individual(s) who will have access to SGI believes they belong to one or more of the categories of individuals that are exempt from the criminal history records check and background check requirements in 10 CFR 73.59, the requestor should also provide a statement identifying which exemption the requestor is invoking and explaining the requestor's basis for believing that the exemption applies. While processing the request, the Office of Administration, Personnel Security Branch, will make a final determination whether the claimed exemption applies. Alternatively, the requestor may contact the Office of Administration for an evaluation of their exemption status prior to submitting their request. Persons who are exempt from the background check are not required to complete the SF–85 or Form FD–258; however, all other requirements for access to SGI, including the need to know, are still applicable.

Note: Copies of documents and materials required by paragraphs C.(4)(b), (c), and (d) of this Order must be sent to the following address:

U.S. Nuclear Regulatory Commission, Office of Administration, ATTN: Personnel Security Branch, Mail Stop: TWFN–07D04M, 11555 Rockville Pike, Rockville, MD 20852

These documents and materials should *not* be included with the request letter to the Office of the Secretary, but the request letter should state that the forms and fees have been submitted as required.

D. To avoid delays in processing requests for access to SGI, the requestor should review all submitted materials for completeness and accuracy (including legibility) before submitting them to the NRC. The NRC will return incomplete packages to the sender without processing.

E. Based on an evaluation of the information submitted under paragraphs C.(3) or C.(4), as applicable, the NRC staff will determine within 10 days of receipt of the request whether:

(1) There is a reasonable basis to believe the petitioner is likely to establish standing to participate in this NRC proceeding; and

(2) The requestor has established a legitimate need for access to SUNSI or need to know the SGI requested.

F. For requests for access to SUNSI, if the NRC staff determines that the requestor satisfies both E.(1) and E.(2), the NRC staff will notify the requestor in writing that access to SUNSI has been granted. The written notification will contain instructions on how the requestor may obtain copies of the requested documents, and any other conditions that may apply to access to those documents. These conditions may include, but are not limited to, the signing of a Non-Disclosure Agreement or Affidavit, or Protective Order setting forth terms and conditions to prevent the unauthorized or inadvertent disclosure of SUNSI by each individual who will be granted access to SUNSI.[5]

G. For requests for access to SGI, if the NRC staff determines that the requestor has satisfied both E.(1) and E.(2), the Office of Administration will then determine, based upon completion of the background check, whether the proposed recipient is trustworthy and reliable, as required for access to SGI by 10 CFR 73.22(b). If the Office of Administration determines that the individual or individuals are trustworthy and reliable, the NRC will promptly notify the requestor in writing. The notification will provide the names of approved individuals as well as the conditions under which the SGI will be provided. Those conditions may include, but are not limited to, the signing of a Non-Disclosure Agreement

[2] Broad SGI requests under these procedures are unlikely to meet the standard for need to know; furthermore, NRC staff redaction of information from requested documents before their release may be appropriate to comport with this requirement. These procedures do not authorize unrestricted disclosure or less scrutiny of a requestor's need to know than ordinarily would be applied in connection with an already-admitted contention or non-adjudicatory access to SGI.

[3] The requestor will be asked to provide the requestor's full name, social security number, date and place of birth, telephone number, and email address. After providing this information, the requestor usually should be able to obtain access to the online form within one business day.

[4] This fee is subject to change pursuant to DCSA's adjustable billing rates.

[5] Any motion for Protective Order or draft Non-Disclosure Affidavit or Agreement for SUNSI must be filed with the presiding officer or the Chief Administrative Judge if the presiding officer has not yet been designated, within 30 days of the deadline for the receipt of the written access request.

or Affidavit, or Protective Order [6] by each individual who will be granted access to SGI.

H. Release and Storage of SGI. Prior to providing SGI to the requestor, the NRC staff will conduct (as necessary) an inspection to confirm that the recipient's information protection system is sufficient to satisfy the requirements of 10 CFR 73.22. Alternatively, recipients may opt to view SGI at an approved SGI storage location rather than establish their own SGI protection program to meet SGI protection requirements.

I. Filing of Contentions. Any contentions in these proceedings that are based upon the information received as a result of the request made for SUNSI or SGI must be filed by the requestor no later than 25 days after receipt of (or access to) that information. However, if more than 25 days remain between the petitioner's receipt of (or access to) the information and the deadline for filing all other contentions (as established in the notice of hearing or opportunity for hearing), the petitioner may file its SUNSI or SGI contentions by that later deadline.

J. Review of Denials of Access.

(1) If the request for access to SUNSI or SGI is denied by the NRC staff either after a determination on standing and requisite need, or after a determination on trustworthiness and reliability, the NRC staff shall immediately notify the requestor in writing, briefly stating the reason or reasons for the denial.

(2) Before the Office of Administration makes a final adverse determination regarding the trustworthiness and reliability of the proposed recipient(s) for access to SGI, the Office of Administration, in accordance with 10 CFR 2.336(f)(1)(iii), must provide the proposed recipient(s) any records that were considered in the trustworthiness and reliability determination, including those required to be provided under 10 CFR 73.57(e)(1), so that the proposed recipient(s) have an opportunity to correct or explain the record.

(3) The requestor may challenge the NRC staff's adverse determination with respect to access to SUNSI or with respect to standing or need to know for SGI by filing a challenge within 5 days of receipt of that determination with: (a) the presiding officer designated in this proceeding; (b) if no presiding officer has been appointed, the Chief Administrative Judge, or if this individual is unavailable, another administrative judge, or an Administrative Law Judge with jurisdiction pursuant to 10 CFR 2.318(a); or (c) if another officer has been designated to rule on information access issues, with that officer.

(4) The requestor may challenge the Office of Administration's final adverse determination with respect to trustworthiness and reliability for access to SGI by filing a request for review in accordance with 10 CFR 2.336(f)(1)(iv).

(5) Further appeals of decisions under this paragraph must be made pursuant to 10 CFR 2.311.

K. Review of Grants of Access. A party other than the requestor may challenge an NRC staff determination granting access to SUNSI whose release would harm that party's interest independent of the proceeding. Such a challenge must be filed within 5 days of the notification by the NRC staff of its grant of access and must be filed with: (a) the presiding officer designated in this proceeding; (b) if no presiding officer has been appointed, the Chief Administrative Judge, or if this individual is unavailable, another administrative judge, or an Administrative Law Judge with jurisdiction pursuant to 10 CFR 2.318(a); or (c) if another officer has been designated to rule on information access issues, with that officer.

If challenges to the NRC staff determinations are filed, these procedures give way to the normal process for litigating disputes concerning access to information. The availability of interlocutory review by the Commission of orders ruling on such NRC staff determinations (whether granting or denying access) is governed by 10 CFR 2.311.[7]

L. The Commission expects that the NRC staff and presiding officers (and any other reviewing officers) will consider and resolve requests for access to SUNSI or SGI, and motions for protective orders, in a timely fashion in order to minimize any unnecessary delays in identifying those petitioners who have standing and who have propounded contentions meeting the specificity and basis requirements in 10 CFR part 2. The attachment to this Order summarizes the general target schedule for processing and resolving requests under these procedures.

It is so ordered.

Dated: February 5, 2024.

For the Nuclear Regulatory Commission.

Carrie M. Safford,

Secretary of the Commission.

ATTACHMENT 1—GENERAL TARGET SCHEDULE FOR PROCESSING AND RESOLVING REQUESTS FOR ACCESS TO SENSITIVE UNCLASSIFIED NON-SAFEGUARDS INFORMATION AND SAFEGUARDS INFORMATION IN THIS PROCEEDING

Day	Event/activity
0	Publication of **Federal Register** notice of hearing or opportunity for hearing, including order with instructions for access requests.
10	Deadline for submitting requests for access to Sensitive Unclassified Non Safeguards Information (SUNSI) and/or Safeguards Information (SGI) with information: supporting the standing of a potential party identified by name and address; describing the need for the information in order for the potential party to participate meaningfully in an adjudicatory proceeding; demonstrating that access should be granted (*e.g.,* showing technical competence for access to SGI); and, for SGI, including application fee for fingerprint/background check.
60	Deadline for submitting petition for intervention containing: (i) Demonstration of standing; (ii) all contentions whose formulation does not require access to SUNSI and/or SGI (+25 Answers to petition for intervention; +7 requestor/petitioner reply).

[6] Any motion for Protective Order or draft Non-Disclosure Agreement or Affidavit for SGI must be filed with the presiding officer or the Chief Administrative Judge if the presiding officer has not yet been designated, within 180 days of the deadline for the receipt of the written access request.

[7] Requestors should note that the filing requirements of the NRC's E-Filing Rule (72 FR 49139; August 28, 2007, as amended at 77 FR 46562; August 3, 2012, 78 FR 34247, June 7, 2013) apply to appeals of NRC staff determinations (because they must be served on a presiding officer or the Commission, as applicable), but not to the initial SUNSI/SGI request submitted to the NRC staff under these procedures.

ATTACHMENT 1—GENERAL TARGET SCHEDULE FOR PROCESSING AND RESOLVING REQUESTS FOR ACCESS TO SENSITIVE UNCLASSIFIED NON-SAFEGUARDS INFORMATION AND SAFEGUARDS INFORMATION IN THIS PROCEEDING—Continued

Day	Event/activity
20	U.S. Nuclear Regulatory Commission (NRC) staff informs the requestor of the staff's determination whether the request for access provides a reasonable basis to believe standing can be established and shows (1) need for SUNSI or (2) need to know for SGI. (For SUNSI, NRC staff also informs any party to the proceeding whose interest independent of the proceeding would be harmed by the release of the information.) If NRC staff makes the finding of need for SUNSI and likelihood of standing, NRC staff begins document processing (preparation of redactions or review of redacted documents). If NRC staff makes the finding of need to know for SGI and likelihood of standing, NRC staff begins background check (including fingerprinting for a criminal history records check), information processing (preparation of redactions or review of redacted documents), and readiness inspections.
25	If NRC staff finds no ''need,'' no ''need to know,'' or no likelihood of standing, the deadline for requestor/petitioner to file a motion seeking a ruling to reverse the NRC staff's denial of access; NRC staff files copy of access determination with the presiding officer (or Chief Administrative Judge or other designated officer, as appropriate). If NRC staff finds ''need'' for SUNSI, the deadline for any party to the proceeding whose interest independent of the proceeding would be harmed by the release of the information to file a motion seeking a ruling to reverse the NRC staff's grant of access.
30	Deadline for NRC staff reply to motions to reverse NRC staff determination(s).
40	(Receipt +30) If NRC staff finds standing and need for SUNSI, deadline for NRC staff to complete information processing and file motion for Protective Order and draft Non-Disclosure Agreement or Affidavit. Deadline for applicant/licensee to file Non-Disclosure Agreement or Affidavit for SUNSI.
190	(Receipt +180) If NRC staff finds standing, need to know for SGI, and trustworthiness and reliability, deadline for NRC staff to file motion for Protective Order and draft Non-Disclosure Agreement or Affidavit (or to make a determination that the proposed recipient of SGI is not trustworthy or reliable). Note: Before the Office of Administration makes a final adverse determination regarding access to SGI, the proposed recipient must be provided an opportunity to correct or explain information.
205	Deadline for petitioner to seek reversal of a final adverse NRC staff trustworthiness or reliability determination under 10 CFR 2.336(f)(1)(iv).
A	If access granted: Issuance of a decision by a presiding officer or other designated officer on motion for protective order for access to sensitive information (including schedule for providing access and submission of contentions) or decision reversing a final adverse determination by the NRC staff.
A + 3	Deadline for filing executed Non-Disclosure Agreements or Affidavits. Access provided to SUNSI and/or SGI consistent with decision issuing the protective order.
A + 28	Deadline for submission of contentions whose development depends upon access to SUNSI and/or SGI. However, if more than 25 days remain between the petitioner's receipt of (or access to) the information and the deadline for filing all other contentions (as established in the notice of opportunity to request a hearing and petition for leave to intervene), the petitioner may file its SUNSI or SGI contentions by that later deadline.
A + 53	(Contention receipt +25) Answers to contentions whose development depends upon access to SUNSI and/or SGI.
A + 60	(Answer receipt +7) Petitioner/Intervenor reply to answers.
>A + 60	Decision on contention admission.

POSTAL REGULATORY COMMISSION

[Docket Nos. CP2023–181; MC2024–182 and CP2024–188; MC2024–183 and CP2024–189]

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* February 13, 2024.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *https://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction

The Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to negotiated service agreement(s). The request(s) may propose the addition or removal of a negotiated service agreement from the Market Dominant or the Competitive product list, or the modification of an existing product currently appearing on the Market Dominant or the Competitive product list.

Section II identifies the docket number(s) associated with each Postal Service request, the title of each Postal Service request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 (Public Representative). Section II also establishes comment deadline(s) pertaining to each request.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.[1]

The Commission invites comments on whether the Postal Service's request(s) in the captioned docket(s) are consistent with the policies of title 39. For request(s) that the Postal Service states concern Market Dominant product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3622, 39 U.S.C. 3642, 39 CFR part 3030, and 39 CFR part 3040, subpart B. For request(s) that the Postal Service states concern

[1] *See* Docket No. RM2018–3, Order Adopting Final Rules Relating to Non-Public Information, June 27, 2018, Attachment A at 19–22 (Order No. 4679).

Competitive product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3040, subpart B. Comment deadline(s) for each request appear in section II.

II. Docketed Proceeding(s)

1. *Docket No(s).:* CP2023–181; *Filing Title:* USPS Notice of Amendment to Priority Mail, First-Class Package Service, Parcel Select & Parcel Return Service Contract 1, Filed Under Seal; *Filing Acceptance Date:* February 5, 2024; *Filing Authority:* 39 CFR 3035.105; *Public Representative:* Cherry Yao; *Comments Due:* February 13, 2024.

2. *Docket No(s).:* MC2024–182 and CP2024–188; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 46 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* February 5, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3040.130 through 3040.135, and 39 CFR 3035.105; *Public Representative:* Alain Brou; *Comments Due:* February 13, 2024.

3. *Docket No(s).:* MC2024–183 and CP2024–189; *Filing Title:* USPS Request to Add Priority Mail & USPS Ground Advantage Contract 184 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* February 5, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3040.130 through 3040.135, and 39 CFR 3035.105; *Public Representative:* Samuel Robinson; *Comments Due:* February 13, 2024.

This Notice will be published in the **Federal Register**.

Jennie L. Jbara,

Alternate Certifying Officer.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99470; File No. SR–NYSEARCA–2024–09]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Modify Rule 6.62P–O

February 5, 2024.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that on January 23, 2024, NYSE Arca, Inc. (''NYSE Arca'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to modify Rule 6.62P–O (Orders and Modifiers) to adopt electronic Customer Cross Order and Complex Customer Cross Order functionality and to amend Rule 1.1 (Definitions) to clarify the treatment of Professional Customer interest. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to modify Rule 6.62P–O (Orders and Modifiers) to adopt electronically-entered Customer Cross (''C2C'') Orders and Complex Customer Cross (''Complex C2C'') Orders (collectively, ''Customer Cross Orders''). The Exchange also proposes to amend the definition of ''Customer and Professional Customer'' (Rule 1.1.) to clarify the treatment of Professional Customer interest.

Proposed Rule 6.62P–O(g)(2): Customer Cross Orders [4]

The Exchange proposes to adopt rules governing electronically-entered Customer Cross Orders, which rules are substantively identical to the recently-adopted Customer Cross Orders on the Exchange's affiliate, NYSE American LLC (''NYSE American'').[5]

Proposed Rule 6.62P–O(g)(2) would describe Customer Cross Orders. Proposed Rule 6.62P–O(g)(2)(A) would provide that a C2C Order and a Complex C2C Order must be comprised of a Customer (but not a Professional Customer) order to buy and a Customer (but not a Professional Customer) order to sell at the same price and for the same quantity. The proposal to limit eligible interest to Customer but not Professional Customer interest is substantively identical to the rules of NYSE American.[6] In addition, as proposed, a C2C Order or Complex C2C Order that is not rejected on arrival would immediately trade in full at its limit price.[7] Further, proposed Rule 6.62P–O(g)(2)(A) would provide that C2C Orders and Complex C2C Orders would not route and may be entered with a Minimum Price Variation (''MPV'') of $0.01 regardless of the MPV of the options series.[8] Finally, the proposed Rule would specify that Commentary .01 to Rule 6.47A–O would apply to Customer Cross Orders, which means that OTP Holders and OTP Firms may not utilize Customer Cross Orders to increase their economic gain without first giving other trading interest on the Exchange an opportunity to participate in the trade or to trade at the transaction price when the OTP Holder or OTP Firm was already bidding or offering at that price.[9] This proposed handling of Customer Cross Orders is substantively identical to the rules on NYSE

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] To reflect the addition of Customer Cross Orders, the Exchange proposes to amend current Rule 6.62P–O(g) by removing the statement that ''[a] Cross Order is a Qualified Contingent Cross (''QCC'') Order'' and retaining the title of ''Cross Orders''. In addition, the Exchange proposes to update the title of paragraph Rule 6.62P–O (g)(1) to ''Qualified Contingent Cross (''QCC'') Orders.'' The Exchange believes that these proposed changes would add clarity and transparency to, and improve the accuracy of, the Exchange's rules. *See* proposed Rule 6.62P–O(g) and (g)(1).

[5] *See* NYSE American Rule 900.3NYP(g)(2) (describing single-leg and complex Customer Cross Orders). *See also* Securities Exchange Act Release No. 99231 (December 22, 2023), 88 FR 89783 (December 28, 2023) (SR–NYSEAMER–2023–66) (immediately effective rule change to adopt electronically-entered Customer Cross Orders).

[6] *See* NYSE American Rule 900.3NYP(g)(2)(A).

[7] *See* proposed Rule 6.62P–O(g)(2)(A) (providing, in relevant part, that ''[a] C2C Order or Complex C2C Order that is not rejected per Rule 6.62P–O(g)(2)(B) [Execution of C2C Orders] or (C) [Execution of Complex C2C Orders], respectively, will immediately trade in full at its limit price'').

[8] Rule 1.1 defines ''Minimum Price Variation'' or ''MPV'' as the price variations established by the Exchange, which for quoting and trading options traded on the Exchange are set forth in 6.72–O(a).

[9] *See* proposed Rule 6.62P–O(g)(2)(A). *See also* Rule 6.47A–O, Commentary .01.

American regarding the handling of such orders on that exchange.[10]

Proposed Rule 6.62P–O(g)(2)(B) provides that a C2C Order that has one option leg would be rejected if received when the NBBO is crossed or if the C2C would trade at a price that (i) is at the same price as a displayed Customer order on the Consolidated Book and (ii) is not at or between the NBBO and the Exchange BBO. The Exchange believes that the proposal would provide for the efficient entry and execution of C2C Orders while continuing to protect same-priced, displayed Customer interest (*i.e.,* by ensuring that the C2C Order does not trade ahead of displayed Customer interest resting in the Consolidated Book). As noted above, the proposed C2C Orders would operate in a manner that is identical to the handling of single-leg customer cross orders per NYSE American rules.[11]

Proposed Rule 6.62P–O(g)(2)(C) would describe the Exchange's pricing requirements for a Complex C2C Order, which requirements are identical to those set forth in NYSE American Rule 900.3NYP(g)(2)(C). As is the case per NYSE American rules, to validate the price of a Complex C2C Order, the Exchange would rely on the Derived BBO (''DBBO'') as described in Rule 6.91P–O(a)(5).[12] If the Exchange is not able to calculate the DBBO for a complex strategy because of one of the circumstances described in Rule 6.91P–O(a)(5)(B)–(C), the Exchange will not execute an order for that strategy until the circumstance is resolved.[13]

Consistent with this handling, the Exchange proposes that it would reject a Complex C2C Order if the Exchange is unable to calculate the DBBO for a leg of the Complex C2C Order per Rule 6.91P–O(a)(5)(B) or (a)(5)(C).[14]

In addition, proposed Rule 6.62P–O(g)(2)(C) provides that no option leg of a Complex C2C Order will trade at a price worse than the Exchange BBO and such order would be rejected if it fails to meet the following requirements:

- the transaction price must be at or between the DBBO and may not equal the DBBO if the DBBO is calculated using the Exchange BBO and the Exchange BBO of any component of the complex strategy on either side of the market includes displayed Customer interest. If the DBB (DBO) includes displayed Customer interest on the Exchange, the transaction price must improve the DBB (DBO) by at least one cent ($0.01) (per proposed Rule 6.62P–O(g)(2)(C)(i)); and
- the transaction price must be at or between the best-priced Complex Orders to buy and sell in the complex strategy and may not equal the price of a resting Customer Complex Order (per proposed Rule 6.62P–O(g)(2)(C)(ii)).

As noted above the pricing requirements for the proposed Complex C2C Orders are identical to NYSE American's requirement for such orders.[15]

The Exchange also proposes a conforming change to Rule 6.91P–O(b)(1) to include Complex Customer Cross Orders among the type of Electronic Complex Orders available for trading on the Exchange, which change would add clarity, transparency, and internal consistency to the Exchange's rules.[16]

Rule 1.1: Definitions of Customer and Professional Customer

The Exchange proposes to modify the definition of ''Customer'' to provide that, ''unless otherwise specified'', the definition of ''Customer'' includes a ''Professional Customer'', as described below.[17]

Per Rule 1.1, for options traded on the Exchange, the terms ''Customer'' and ''Professional Customer'' do not include a broker or dealer.[18] When the Exchange adopted its definition of Professional Customer nearly a decade ago, it noted that its definition was ''similar to designations that have been adopted by all other options exchanges.'' [19] At that time, however, the Exchange explicitly stated that it was not proposing ''to revise any order execution or processing rules, including its priority rules, to change the treatment of Professional Customers'' but noted instead that ''Professional Customer orders will be treated as Customer orders under Exchange rules for all purposes, except those related to order marking.'' [20] The Exchange further noted that ''[a]s the only options Exchange to have not yet adopted the Professional Customer definition, the Exchange's proposal will allow OTP Holders to mark their Professional Customer orders similarly regardless of whether the order is placed on the Exchange or another options exchange'' and that adopting the Professional Customer designation would ''facilitate cross-market initiatives (such as harmonizing rules relating to Obvious Errors).'' [21] Although the Exchange was clear as to its intent when it adopted the Professional Customer designation, it did not modify its definition of ''Customer'' to reflect this intention. Thus, for avoidance of doubt and consistent with the Exchange's previously stated intent, the Exchange proposes to modify the definition of Customer to include

[10] *See* Rule 6.47A–O, Commentary .01 (providing an identical prohibition to the one set forth in NYSE American Rule 935NY, Commentary .01, which prevents order-senders from using the customer crossing mechanism to increase economic gain without first providing an opportunity of eligible interest to trade at the transaction price of the cross order).

[11] *See* NYSE American Rule 900.3NYP(g)(2)(B).

[12] The DBBO provides for the establishment of a derived (theoretical) bid or offer for a particular complex strategy. *See* Rule 6.91P–O(a)(5) (defining the DBBO and providing that the bid (offer) price used to calculate the DBBO on each leg will be the Exchange BB (BO) (if available), bound by the maximum allowable Away Market Deviation). The Away Market Deviation, as defined in Rule 6.91P–O(a)(1), ensures that an ECO does not execute too far away from the prevailing market. Rule 6.91P–O(a)(5) also provides for the establishment of the DBBO in the absence of an Exchange BB (BO), or ABB(ABO), or both. The Exchange's definition of DBBO and its use in relation to Complex C2C Orders is identical to how this concept is defined and utilized by NYSE American. *Compare* Rule 6.91P–O(a)(5) *with* NYSE American Rule 980NYP(a)(5).

[13] *See* proposed Rule 6.62P–O(g)(2)(C). *See also* Rule 6.91P–O(a)(5)(B) (providing that, ''[i]f, for a leg of a complex strategy, there is neither an Exchange BBO nor an ABBO, the Exchange will not allow the complex strategy to trade until, for that leg, there is either an Exchange BB or BO, or an ABB or ABO, on at least one side of the market'') and (a)(5)(C) (providing, in relevant part that, ''[i]f the best bid and offer prices (when not based solely on the Exchange BBO) for a component leg of the complex strategy are locked or crossed, the Exchange will not allow an ECO for that strategy to execute against another ECO until this condition resolves''). This proposed handling of Complex C2C Orders is identical to the handling of such orders on NYSE American. *Compare* proposed Rule 6.62P–O(g)(2)(C) *with* NYSE American Rule 900.3NYP(g)(2)(C).

[14] *See* proposed Rule 6.62P–O(g)(2)(B). *See also* NYSE American Rule 900.3NYP(g)(2)(B).

[15] *See* NYSE American Rule 900.3NYP(g)(2)(C)(i)–(ii).

[16] *See* proposed Rule 6.91P–O(b)(1) (providing that Electronic Complex Orders ''may be entered as Limit Orders, Limit Orders designated as Complex Only Orders, Complex QCCs, *or as Complex Customer Cross Orders*) (emphasis added). *See also* NYSE American Rule 980NYP(b)(1).

[17] *See* proposed Rule (emphasis added). *See also* NYSE American Rule 980NYP(b)(1).

[18] *See* Rule 1.1 (defining Customer and Professional Customer). For order counting purposes, the term ''Professional Customer'' applies to an individual or organization that ''places more than 390 orders in listed options per day on average during a calendar month for its own beneficial account(s).'' *See id.*

[19] *See* Securities Exchange Act Release No. 73665 (November 21, 2014), 79 FR 70907, 70908 at n. 7 (November 28, 2014) (SR–NYSEARCA–2014–133) (immediately effective rule change to adopt the definition of Professional Customer) (the ''2014 Proposal''). *See id.,* 79 FR, at 70908 at n. 7 (citing other options markets that had already adopted the Professional Customer designation).

[20] *See id.,* 79 FR at 70908, n. 8 (specifying that, at that time, at least two other options exchanges had adopted a definition of Professional Customer that was the ''same'' as the Exchange's then-proposed definition and that those exchanges likewise did ''not treat Professional Customers differently than Customers for purposes of execution or processing.''). Thus, from inception, the treatment of market participants designated as Professional Customers differed among options exchanges.

[21] *See id.,* 79 FR at 70908.

Professional Customer, ''unless otherwise specified'' in Exchange rules.[22] The Exchange believes this rule change would add clarity and transparency to the Exchange's rules, making them easier to navigate and understand.

Implementation

Because of the technology changes associated with this proposed rule change, the Exchange will announce the implementation date by Trader Update, which, subject to effectiveness of this proposed rule change, is anticipated to be in the first quarter of 2024.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b) of the Securities Exchange Act of 1934,[23] in general, and furthers the objectives of Section 6(b)(5),[24] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to, and perfect the mechanism of, a free and open market and a national market system and, in general, to protect investors and the public interest.

The Exchange believes that the proposed Customer Cross Orders (for single-leg and complex interest) would remove impediments to and perfect the mechanism of a free and open market and a national market system because the proposed rules would allow OTP Holders and OTP Firms to electronically trade these types of crossing orders on the Exchange. The proposed functionality would benefit investors and the public interest because it would enhance and automate each order entry firms' ability to submit two-sided Customer orders—*i.e.,* Customer Cross Orders (both single-leg and complex). As such, the proposed rule change would provide OTP Holders and OTP Firms with an efficient means of executing their Customer orders. In addition, the proposed Customer Cross Orders would remove impediments to and perfect the mechanism of a free and open market and a national market system because OTP Holders and OTP Firms would be given an additional way to execute single-leg and Complex Orders on the Exchange. As noted herein, the proposed Customer Cross Orders functionality is identical to functionality described in the rules of the Exchange's affiliate, NYSE American.[25] With this proposal, OTP Holders and OTP Firms would likewise have an additional venue on which to execute two-sided Customer orders electronically—*i.e.,* Customer Cross Orders. As such, the proposed order types may attract additional Customer order flow (both two-sided and single-sided) to the Exchange, which may, in turn, result in greater liquidity available for trading on the Exchange.

Regarding the proposed single-leg C2C Order type, the Exchange believes that the adoption of this order type would provide for the efficient entry and execution of C2C Orders while continuing to protect same-priced, displayed Customer interest (*i.e.,* by ensuring that the C2C Order does not trade ahead of displayed Customer interest resting in the Consolidated Book). Further, as noted herein, the proposed order type is not new or novel because each C2C Order would operate in a manner that is identical to the handling of single-leg customer cross orders per the rules of NYSE American.[26]

The proposed Complex C2C Order would protect investors and the public interest by assuring that these orders comply with the existing priority and allocation rules applicable to the processing and execution of Complex Orders per Rule 6.91P–O. In particular, the proposed Complex C2C Orders would continue to protect same-priced, displayed Customer interest and would ensure that Complex C2C Orders do not trade ahead of such displayed Customer interest, whether in the leg markets or as Customer Complex Orders. The Exchange believes the proposed Complex C2C Orders would promote just and equitable principles of trade because (as discussed herein) the proposed orders—which are not new or novel—would operate in a manner that is identical to the handling of complex customer cross orders per the rules of NYSE American.[27]

The Exchange believes the proposed amendment to the Rule 1.1 definition of Customer and Professional Customer would remove impediments to and perfect the mechanism of a free and open market and a national market system because it would add clarity and transparency to—and improve the accuracy of—the Exchange's rules making them easier to comprehend to the benefit of all market participants.

Finally, the proposed conforming changes to Rules 6.62P–O(g) and 6.91P–O(b)(1) to accommodate the adoption of single-leg and Complex Customer Cross Orders on the Exchange would remove impediments to and perfect the mechanism of a free and open market and a national market system because the rule changes would add clarity and transparency to—and improve the accuracy of—the Exchange's rules making them easier to comprehend to the benefit of all market participants.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Specifically, the Exchange's proposal to adopt a new electronically-entered crossing order type (*i.e.,* the Customer Cross Order) would not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes that the proposed change would not impose a burden on intra-market competition because the proposed order types would provide OTP Holders and OTP Firms with the option of utilizing another means of executing two-sided Customer interest—both single-leg and Complex Orders on the Exchange. The proposed change would also benefit investors by providing another venue (*i.e.,* in addition to NYSE American) on which Customer Cross Orders may be submitted electronically.

The Exchange believes that the proposed change would enhance intermarket competition. The Exchange believes that adopting Customer Cross Orders would promote competition as it would afford OTP Holders and OTP Firms another venue on which to execute two-sided Customer orders for single-leg and complex trading interest. Further, the Exchange anticipates that this proposal will create new opportunities for the Exchange to attract new business to the Exchange. As such, the Exchange believes that this proposal does not create an undue burden on intermarket competition. Rather, the Exchange believes that the proposed rule would bolster intermarket competition by promoting fair competition among individual markets.

The Exchange does not believe the proposed amendment to the Rule 1.1

[22] *See* proposed Rule 1.1 (providing that ''[f]or options traded on the Exchange, the term 'Customer' does not include a broker or dealer *and, unless otherwise specified, includes a* ''*Professional Customer*''(emphasis added) *See, e.g.,* proposed Rule 6.62P–O(g)(2) (specifying that Customer Cross Orders ''must be comprised of a Customer (but not a Professional Customer) order to buy and a Customer (but not a Professional Customer) order to sell at the same price and for the same quantity'')).

[23] 15 U.S.C. 78f(b).

[24] 15 U.S.C. 78f(b)(5).

[25] *See* NYSE American Rule 900.3NYP(g)(2).

[26] *See* NYSE American Rule 900.3NYP(g)(2)(B).

[27] *See* NYSE American Rule 900.3NYP(g)(2)(C).

definition of Customer and Professional Customer would impose any undue burden on intra-market or intermarket competition as all market participants on the Exchange would be subject to the updated definition. In addition, the proposal to limit the availability of the proposed Customer Cross Orders to interest submitted on behalf of Customers would align the Exchange with the rules of NYSE American, which has the same limitation.[28]

In addition, the proposed conforming changes to Rules 6.62P–O(g) and 6.91P–O(b)(1) to accommodate the addition of single-leg and Complex Customer Cross Orders would not impose an undue burden on intra-market or intermarket competition but would instead add clarity, transparency, and internal consistency to the Exchange's rules.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [29] and Rule 19b–4(f)(6) thereunder.[30] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[31]

A proposed rule change filed under Rule 19b–4(f)(6) [32] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b4(f)(6)(iii),[33] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Exchange states that waiver of the operative delay will provide market participants with an additional venue for executing two-sided single-leg and complex Customer orders electronically. In addition, the proposed change to the definition of ''Customer'' is designed to reflect the Exchange's intention when it adopted the definition of definition of Professional Customer in 2014, as described above.

The proposed C2C and Complex C2C Orders are substantively identical to order types adopted by the Exchange's affiliate, NYSE American.[34] Among other things, the proposed rules protect the priority of displayed Customer interest on the Exchange by providing that a C2C Order with one option leg will be rejected if it would trade at the same price as a displayed Customer order on the Exchange's Consolidated Book.[35] In addition, a Complex C2C Order must trade at a price that is (i) better than the DBB (DBO) if the DBB (DBO) includes displayed Customer interest on the Exchange, and (ii) better than a resting Customer Complex Order on the Exchange.[36] Consistent with the rules of other options exchanges that offer customer cross orders, the proposed Customer Cross Orders are limited to Customer orders.[37] The proposed change to the definition of Customer is designed to ensure that the definition reflects the Exchange's intention, as described in the 2014 Proposal, to treat Professional Customers as Customers, unless otherwise specified. The proposed conforming changes to Exchange Rules 6.62P–O(g)(1) and 6.91P–O(b)(1) will update the Exchange's rules to reflect the addition of Customer Cross Orders. The proposal, which does not raise new or novel regulatory issues, will provide market participants with an additional venue for crossing single-leg and complex Customer Cross Orders electronically. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change operative upon filing.[38]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include file number SR–NYSEARCA–2024–09 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSEARCA–2024–09. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99471; File No. SR–IEX–2024–04]

Self-Regulatory Organizations; Investors Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Pursuant to IEX Rule 15.110 To Amend IEX's Fee Schedule

February 5, 2024.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the ''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on January 24, 2024, the Investors Exchange LLC (''IEX'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Pursuant to the provisions of Section 19(b)(1) under the Act,[4] and Rule 19b–4 thereunder,[5] the Exchange is filing with the Commission a proposed rule change to amend its Fee Schedule, [6] pursuant to IEX Rule 15.110(a) and (c) (the ''Fee Schedule''), to revise the Fee Codes [7] applicable to transactions that involve a Post Only order that executes on entry. Changes to the Fee Schedule pursuant to this proposal are effective upon filing,[8] and the Exchange plans to implement the changes on February 15, 2024.

The text of the proposed rule change is available at the Exchange's website at *www.iextrading.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fee Schedule, pursuant to IEX Rule 15.110(a) and (c), to revise the Fee Codes applicable to transactions that involve a Post Only order that executes on entry. IEX recently filed a rule change to introduce a Post Only order parameter instruction and a Trade Now instruction.[9] The Post Only Filing was effective on filing but will not be implemented until February 15, 2024.[10]

As described in the Post Only Filing, Members [11] may attach a Post Only parameter instruction to any displayable, non-routable order priced at or above $1.00 per share (*i.e.,* a Post Only order).[12] A Post Only order will not remove contra-side liquidity from the IEX Order Book [13] on entry (and will rest on the Order Book as a displayed liquidity adding order), except in two specific circumstances: (i) if the value of such execution when removing liquidity equals or exceeds the value of such execution if the order instead posted to the IEX Order Book and subsequently provided liquidity, including the applicable fees charged or rebates provided (the ''Sum of Fees''), or (ii) if the contra-side resting order with which the incoming order could match is a non-displayed order with a ''Trade Now'' instruction.[14] When an incoming Post Only order matches a resting order with a Trade Now instruction, the resting order converts into an executable order that removes liquidity against the incoming Post Only order, and the incoming Post Only order becomes the liquidity adding order.

Fee Schedule Changes

IEX proposes to introduce two new Fee Codes, to specify (1) when a Post Only order executed on entry, and (2) when a resting non-displayed order with a Trade Now instruction removed liquidity from a Post Only order that executed on entry. Specifically, as proposed, Fee Code Y will be included on any execution report for a Post Only order that executes on entry, and Fee Code W will be included on any execution report for a resting order with a Trade Now instruction that removes liquidity against an incoming liquidity-adding Post Only order. IEX proposes to add these Fee Codes to the Fee Code Modifiers table on the IEX Fee Schedule as follows:

Additional Fee Codes	Description	Fee
Y	Post Only order executes on entry	See Relevant Fee Code Combinations Below.
W	Resting order removes against Post Only order	See Relevant Fee Code Combinations Below.

[39] 17 CFR 200.30–3(a)(12), (59).

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[6] *See* Fee Schedule at *https://www.iexexchange.io/resources/trading/fee-schedule* for the complete list of fee code combinations and their corresponding fees.

[7] Fee Codes are identified on each execution report message from the Exchange in the Trade Liquidity Indicator (FIX tag 9730) field. *See* ''Transaction Fees/Definitions'' on the Fee Schedule.

[8] 15 U.S.C. 78s(b)(3)(A)(ii).

[9] *See* Securities Exchange Act Release No. 98988 (November 20, 2023), 88 FR 82926 (November 27, 2023) (SR–IEX–2023–13) (''Post Only Filing'').

[10] *See* IEX Trading Alert 2024–003, available at *https://iextrading.com/alerts/#/239.*

[11] *See* IEX Rule 1.160(s).

[12] If a Member submits a Post Only order that is priced below $1.00 per share, the Exchange will disregard the Post Only instruction. *See* IEX Rule 11.190(b)(20)(A).

[13] *See* IEX Rule 1.160(p).

[14] *See* IEX Rule 11.190(b)(21).

Additionally, IEX proposes to add four new Fee Code Combinations to the Additional Fee Code Combinations and Associated Fees table that reflect the fees IEX will assess for an execution involving a Post Only order that executes on entry:

• Fee Code Combination TIY, would apply to a Post Only order priced at $1.00 or more that removes non-displayed liquidity on entry. The fees associated with Fee Code Combination TIY are the same as the fees associated with Fee Code Combination TI, the fee code for an order that removes non-displayed liquidity on entry (currently $0.0010 per share). IEX would include Fee Code Combination TIY on execution reports to specify that a Post Only order executed on entry because the Sum of Fees was less than the value of the execution if the order had added displayed liquidity on the Exchange. Because the Exchange will disregard the Post Only instruction on orders priced less than $1.00 per share (''sub-dollar''),[15] IEX proposes to have the ''Executions below $1.00'' column of the Additional Fee Code Combinations and Associated Fees table read ''N/A''.[16]

• Fee Code Combination TLY, would apply to a Post Only order priced at $1.00 or more per share that removes displayed liquidity on entry. The fees associated with Fee Code Combination TLY are the same as the fees associated with Fee Code Combination TL, the fee code for an order that removes displayed liquidity on entry (currently $0.0010 per share). IEX would include Fee Code Combination TLY on execution reports to specify that a Post Only order executed on entry because the Sum of Fees was less than the value of the execution if the order had added displayed liquidity on the Exchange. Because the Exchange will disregard the Post Only instruction on sub-dollar orders,[17] IEX proposes to have the ''Executions below $1.00'' column of the Additional Fee Code Combinations and Associated Fees table read ''N/A''.[18]

• Fee Code Combination MLY, would apply to a Post Only order priced at $1.00 or more per share that executes on entry with a contra-side order with the Trade Now instruction. The fees associated with Fee Code Combination MLY are the same as the fees associated with Fee Code Combination ML, the fee code for an order that adds displayed liquidity (currently a rebate of $0.0004 per share). IEX would include Fee Code Combination MLY on execution reports to specify that although the order executed on entry, it executed as the adder of displayed liquidity because of the contra-side order's Trade Now instruction. Because the Exchange will disregard the Post Only instruction on sub-dollar orders,[19] IEX proposes to have the ''Executions below $1.00'' column of the Additional Fee Code Combinations and Associated Fees table column read ''N/A''.[20]

• Fee Code Combination TLW, would apply to a resting non-displayed order with the Trade Now instruction that executes against an incoming Post Only order priced at $1.00 or more per share. The fees associated with Fee Code Combination TLW are the same as the fees associated with Fee Code Combination MI, the fee code for an execution that adds non-displayed liquidity (currently $0.0010 per share for executions at or above $1.00). IEX would include Fee Code Combination TLW on execution reports that the order executed as the taker of displayed liquidity. Because the Exchange will disregard the Post Only instruction on an incoming sub-dollar Post Only order,[21] that order will not trigger a resting order with the ''Trade Now'' instruction to become the taking order. Therefore, Fee Code Combination TLW would never apply to a resting non-displayed order that matches with an incoming sub-dollar order with a Post Only instruction, and IEX proposes to have the ''Executions below $1.00'' column of the Additional Fee Code Combinations and Associated Fees table column read ''N/A''.

IEX proposes to add these Fee Codes to the Additional Fee Code Combinations and Associated Fees table on the IEX Fee Schedule as follows:

Fee Codes	Description	Executions at or above $1.00	Executions below $1.00
MLY	Post Only order adds liquidity against resting non-displayed order	($0.0004)	N/A
TIY	Post Only order removes non-displayed liquidity	0.0010	N/A
TLY	Post Only order removes displayed liquidity	0.0010	N/A
TLW	Resting non-displayed order removes liquidity against incoming Post Only order	0.0010	N/A

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[22] in general, and furthers the objectives of Section 6(b)(4)[23] of the Act, in particular, in that it is designed to provide for the equitable allocation of reasonable fees among IEX Members and persons using its facilities. As described in the Purpose section, these proposed Fee Code changes will not change the fees the Exchange charges for impacted orders but will simply provide additional information with respect to such fees. Therefore, the Exchange does not believe that adding this additional information raises any new or novel issues not already considered by the Commission. IEX also believes that the proposed rule change is nondiscriminatory since all Members are eligible to enter orders with Post Only and/or Trade Now instructions.

Additionally, IEX believes that the proposed changes to the Fee Schedule are consistent with the investor protection objectives of Section 6(b)(5)[24] of the Act, in particular, in that they are designed to prevent fraudulent and manipulative acts and practices; to promote just and equitable principles of trade; to foster cooperation and

[15] *See supra* note 9.

[16] An incoming sub-dollar order with a disregarded Post Only instruction that executes on entry with a resting non-displayed order will result in a Fee Code Combination of TI (''Removes non-displayed liquidity'') on the execution report and be charged the normal sub-dollar dark taking fee of 0.10% of the Total Dollar Value (''TDV'').

[17] *See supra* note 9.

[18] An incoming sub-dollar order with a disregarded Post Only instruction that executes on entry with a resting displayed order will result in a Fee Code Combination of TL (''Removes displayed liquidity'') on the execution report and be charged the normal sub-dollar lit taking fee of 0.09% of the TDV.

[19] *See supra* note 9.

[20] An incoming sub-dollar order with a disregarded Post Only instruction will not trigger a resting order with the ''Trade Now'' instruction to become the taking order and will not be treated as the making order. Thus, Fee Code Combination MLY would never apply. If the incoming order matched with a resting non-displayed or displayed order, it will result in a Fee Code Combination of TL or TI, with fees of 0.09% or 0.10% of TDV, respectively.

[21] *See supra* note 9.

[22] 15 U.S.C. 78f(b).

[23] 15 U.S.C. 78f(b)(4).

[24] 15 U.S.C. 78f(b)(5).

coordination with persons engaged in facilitating transactions in securities; to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest; and are not designed to permit unfair discrimination between customers, brokers, or dealers. IEX believes that providing additional specificity to Members on execution reports about the circumstances under which a Post Only order executed on entry, as well as when an order with a Trade Now instruction executed as a liquidity remover, will assist Members with their order routing strategies, thereby facilitating transactions in securities. Further, IEX believes that specifying that these new Fee Code Combinations do not apply to sub-dollar executions because IEX disregards the Post Only instruction on orders priced below $1.00 per share will also assist Members with their order routing strategies, thereby facilitating transactions in securities.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed Fee Code changes will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. As described in the Purpose and Statutory Basis sections, the Exchange is not proposing to change any fees but merely to provide additional information to Members regarding certain executions.

The Exchange also does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed fees will apply to all Members in the same manner, as discussed in the Statutory Basis section. Accordingly, the Exchange does not believe that these changes will have any impact on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) [25] of the Act.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [26] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–IEX–2024–04 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–IEX–2024–04. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–IEX–2024–04 and should be submitted on or before March 1, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[27]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99476; File No. SR–MIAX–2024–06]

Self-Regulatory Organizations; Miami International Securities Exchange, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to Amend Its Fee Schedule to Modify Certain Connectivity and Port Fees

February 5, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 25, 2024, Miami International Securities Exchange, LLC (''MIAX'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the MIAX Options Exchange Fee Schedule (the ''Fee Schedule'') to amend certain connectivity and port fees.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

The text of the proposed rule change is available on the Exchange's website at *https://www.miaxglobal.com/markets/us-options/miax-options/rule-filings,* at MIAX's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. *Purpose*

The Exchange proposes to amend the Fee Schedule as follows: (1) increase the fees for a 10 gigabit (''Gb'') ultra-low latency (''ULL'') fiber connection for Members [3] and non-Members; and (2) amend the monthly port fee for additional Limited Service MIAX Express Interface (''MEI'') Ports [4] available to Market Makers.[5] The Exchange and its affiliate, MIAX PEARL, LLC (''MIAX Pearl'') operated 10Gb ULL connectivity (for MIAX Pearl's options market) on a single shared network that provided access to both exchanges via a single 10Gb ULL connection. The Exchange last increased fees for 10Gb ULL connections from $9,300 to $10,000 per month on January 1, 2021.[6] At the same time, MIAX Pearl also increased its 10Gb ULL connectivity fee from $9,300 to $10,000 per month.[7] The Exchange and MIAX Pearl shared a combined cost analysis in those filings due to the single shared 10Gb ULL connectivity network for both exchanges. In those filings, the Exchange and MIAX Pearl allocated a combined total of $17.9 million in expenses to providing 10Gb ULL connectivity.[8]

Beginning in late January 2023, the Exchange determined a substantial operational need to no longer operate 10Gb ULL connectivity on a single shared network with MIAX Pearl. The Exchange bifurcated 10Gb ULL connectivity due to ever-increasing capacity constraints and to enable it to continue to satisfy the anticipated access needs for Members and other market participants.[9] Since the time of the 2021 increase discussed above, the Exchange experienced ongoing increases in expenses, particularly internal expenses.[10] As discussed more fully below, the Exchange recently calculated increased annual aggregate costs of $14,410,793 for providing 10Gb ULL connectivity on a single unshared network (an overall increase over its prior cost to provide 10Gb ULL connectivity on a shared network with MIAX Pearl) and $2,399,192 for providing Limited Service MEI Ports.

Much of the cost relates to monitoring and analysis of data and performance of the network via the subscriber's connection with nanosecond granularity, and continuous improvements in network performance with the goal of improving the subscriber's experience. The costs associated with maintaining and enhancing a state-of-the-art network is a significant expense for the Exchange, and thus the Exchange believes that it is reasonable and appropriate to help offset those increased costs by amending fees for connectivity services. Subscribers expect the Exchange to provide this level of support so they continue to receive the performance they expect. This differentiates the Exchange from its competitors.

The Exchange now proposes to amend the Fee Schedule to amend the fees for 10Gb ULL connectivity and Limited Service MEI Ports in order to recoup cost related to bifurcating 10Gb connectivity to the Exchange and MIAX Pearl as well as the ongoing costs and increase in expenses set forth below in the Exchange's cost analysis.[11] The Exchange proposes to implement the changes to the Fee Schedule pursuant to this proposal immediately. The Exchange initially filed the proposal on December 30, 2022 (SR–MIAX–2022–50) (the ''Initial Proposal'').[12] On February 23, 2023, the Exchange withdrew the Initial Proposal and replaced it with a revised proposal (SR–MIAX–2023–08) (the ''Second Proposal'').[13] On April 20, 2023, the Exchange withdrew the Second Proposal and replaced it with a revised proposal (SR–MIAX–2023–18) (the ''Third Proposal'').[14] On June 16, 2023, the Exchange withdrew the Third Proposal and replaced it with a revised proposal (SR–MIAX–2023–25) (the ''Fourth Proposal'').[15] On August 8, 2023, the Exchange withdrew the Fourth Proposal and replaced it with a

[3] The term ''Member'' means an individual or organization approved to exercise the trading rights associated with a Trading Permit. Members are deemed ''members'' under the Exchange Act. *See* Exchange Rule 100.

[4] The MIAX Express Interface (''MEI'') is a connection to MIAX systems that enables Market Makers to submit simple and complex electronic quotes to MIAX. *See* Fee Schedule, note 26.

[5] The term ''Market Makers'' refers to Lead Market Makers (''LMMs''), Primary Lead Market Makers (''PLMMs''), and Registered Market Makers (''RMMs'') collectively. *See* Exchange Rule 100. For purposes of Limit Service MEI Ports, Market Makers also include firms that engage in other types of liquidity activity, such as seeking to remove resting liquidity from the Exchange's Book.

[6] *See* Securities Exchange Act Release No. 90980 (January 25, 2021), 86 FR 7602 (January 29, 2021) (SR–MIAX–2021–02).

[7] *See* Securities Exchange Act Release No. 90981 (January 25, 2021), 86 FR 7582 (January 29, 2021) (SR–PEARL–2021–01).

[8] *See id.*

[9] *See MIAX Options and MIAX Pearl Options—Announce planned network changes related to shared 10G ULL extranet,* issued August 12, 2022, *available at https://www.miaxglobal.com/alert/2022/08/12/miax-options-and-miax-pearl-options-announce-planned-network-changes-0.* The Exchange will continue to provide access to both the Exchange and MIAX Pearl over a single shared 1Gb connection. *See* Securities Exchange Act Release Nos. 96553 (December 20, 2022), 87 FR 79379 (December 27, 2022) (SR–PEARL–2022–60); 96545 (December 20, 2022) 87 FR 79393 (December 27, 2022) (SR–MIAX–2022–48).

[10] For example, the New York Stock Exchange, Inc.'s (''NYSE'') Secure Financial Transaction Infrastructure (''SFTI'') network, which contributes to the Exchange's connectivity cost, increased its fees by approximately 9% since 2021. Similarly, since 2021, the Exchange, and its affiliates, experienced an increase in data center costs of approximately 17% and an increase in hardware and software costs of approximately 19%. These percentages are based on the Exchange's actual 2021 and 2023 expenses.

[11] The Exchange notes that MIAX Pearl Options will make a similar filing to increase its 10Gb ULL connectivity fees.

[12] *See* Securities Exchange Act Release No. 96629 (January 10, 2023), 88 FR 2729 (January 17, 2023) (SR–MIAX–2022–50).

[13] *See* Securities Exchange Act Release No. 97081 (March 8, 2023), 88 FR 15782 (March 14, 2023) (SR–MIAX–2023–08).

[14] *See* Securities Exchange Act Release No. 97419 (May 2, 2023), 88 FR 29777 (May 8, 2023) (SR–MIAX–2023–18).

[15] The Exchange met with Commission Staff to discuss the Third Proposal during which the Commission Staff provided feedback and requested additional information, including, most recently, information about total costs related to certain third party vendors. Such vendor cost information is subject to confidentiality restrictions. The Exchange provided this information to Commission Staff under separate cover with a request for confidentiality. While the Exchange will continue to be responsive to Commission Staff's information requests, the Exchange believes that the Commission should, at this point, issue substantially more detailed guidance for exchanges to follow in the process of pursuing a cost-based approach to fee filings, and that, for the purposes of fair competition, detailed disclosures by exchanges, such as those that the Exchange is providing now, should be consistent across all exchanges, including for those that have resisted a cost-based approach to fee filings, in the interests of fair and even disclosure and fair competition. *See* Securities Exchange Act Release No. 97814 (June 27, 2023), 88 FR 42844 (July 3, 2023) (SR–MIAX–2023–25).

revised proposal (SR–MIAX–2023–30) (the ''Fifth Proposal'').[16] Since a U.S. government shutdown was avoided, on October 2, 2023, the Exchange withdrew the Fifth Proposal and replaced it with a revised proposal (SR–MIAX–2023–39) (the ''Sixth Proposal'').[17] On November 27, the Exchange withdrew the Sixth Proposal and replaced it with a revised proposal (SR–MIAX–2023–48) (the ''Seventh Proposal'').[18] On January 25, 2024, the Exchange withdrew the Seventh Proposal and replaced it with a further revised proposal (SR–MIAX–2024–XX) (the ''Eighth Proposal'').

The Exchange previously included a cost analysis in the Initial, Second, Third, Fourth, Fifth, Sixth, and Seventh Proposals. As described more fully below, the Exchange provides an updated cost analysis that includes, among other things, additional descriptions of how the Exchange allocated costs among it and its affiliated exchanges (MIAX Pearl (separately among MIAX Pearl Options and MIAX Pearl Equities) and MIAX Emerald[19] (together with MIAX Pearl Options and MIAX Pearl Equities, the ''affiliated markets'')) to ensure no cost was allocated more than once, as well as additional detail supporting its cost allocation processes and explanations as to why a cost allocation in this proposal may differ from the same cost allocation in a similar proposal submitted by one of its affiliated markets. The Exchange continues to propose fees that are intended to cover the Exchange's cost of providing 10Gb ULL connectivity and Limited Service MEI Ports with a reasonable mark-up over those costs.

The cost analysis included in prior filings was based on the Exchange's 2023 fiscal year of operations and projected expenses. In its Initial Proposal filed on December 30, 2022, the Exchange committed to conduct an annual review after implementation of these fees. The Exchange recently completed its 2024 fiscal year budget process, which included its annual review of these fees and the projected costs to provide these services, based on its approved 2024 expense budget. Therefore, the Cost Analysis included in this proposal is based on the Exchange's 2024 fiscal year of operations and projected expenses. The Exchange believes it reasonable to now use costs from its 2024 fiscal year budget because they reflect the Exchange's current cost base. The Exchange also notes that expenses included in its 2024 fiscal year budget and this proposal are generally higher than its 2023 fiscal year budget and Cost Analysis included in prior filings. As more fully described below and throughout this filing, this is due to a number of factors, such as, critical vendors and suppliers increasing costs they charge the Exchange, significant exchange staff headcount increases, increased data center costs from the Exchange's data center providers in multiple locations and facilities, higher technology and communications costs, planned hardware refreshes, and system capacity upgrades that increase depreciation expense. Specifically, with regard to employee compensation, the 2024 fiscal year budget includes additional expenses related to increased headcount and new hires that are needed to support the Exchange as it continues to grow (the Exchange and its affiliated companies are projected to hire over 60 additional staff in 2024). Hardware and software expenses have also increased primarily due to price increases from critical vendors and equipment suppliers. Further, the Exchange budgeted for additional hardware and software needs to support the Exchange's continued growth and expansion. Depreciation and amortization have likewise increased due to recent and planned refreshes in Exchange hardware and software. This new equipment and software then becomes depreciable, as described below. Data center costs have also increased due the following: the Exchange expanding its footprint within its data center; and the data center vendor increasing the costs it charges the Exchange. Lastly, allocated shared expenses have increased due to the overall budgeted increase in costs from 2023 to 2024 necessary to operate and support the Exchange as described below.

Consequently, these increased costs included in the 2024 budget result in lower projected profit margins for 10Gb ULL connectivity and Limited Service MEI Ports, versus the profit margins included in prior filings that proposed the same fee levels for 10Gb ULL connectivity and Limited Service MEI Ports based on 2023 costs. The Exchange believes it is reasonable and appropriate to now use expenses from its 2024 budget because those expenses amounts are the most current and more accurately reflect the Exchange's current expense base and projected revenues for the 2024 fiscal year. Continuing to use 2023 budget numbers would result in the Exchange's Cost Analysis to be based on stale data which would not reflect the Exchanges most recent cost estimates and projected margins.

* * * * *

Starting in 2017, following the United States Court of Appeals for the District of Columbia's *Susquehanna Decision*[20] and various other developments, the Commission began to undertake a heightened review of exchange filings, including non-transaction fee filings that was substantially and materially different from it prior review process (hereinafter referred to as the ''Revised Review Process''). In the *Susquehanna Decision,* the D.C. Circuit Court stated that the Commission could not maintain a practice of ''unquestioning reliance'' on claims made by a self-regulatory organization (''SRO'') in the course of filing a rule or fee change with the Commission.[21] Then, on October 16, 2018, the Commission issued an opinion in *Securities Industry and Financial Markets Association* finding that exchanges failed both to establish that the challenged fees were constrained by significant competitive forces and that these fees were consistent with the Act.[22] On that same day, the Commission issued an order remanding to various exchanges and national market system (''NMS'') plans challenges to over 400 rule changes and plan amendments that were asserted in 57 applications for review (the ''Remand Order'').[23] The Remand Order directed the exchanges to ''develop a record,'' and to ''explain their conclusions, based on that record, in a written decision that is sufficient to enable us to perform our review.''[24] The Commission denied requests by various exchanges and plan participants for reconsideration of the Remand Order.[25] However, the

[24] *Id.* at page 2.

[25] *Sec. Indus. & Fin. Mkts. Ass'n,* Securities Exchange Act Release No. 85802, 2019 WL 2022819 (May 7, 2019) (the ''Order Denying Reconsideration'').

Commission did extend the deadlines in the Remand Order ''so that they d[id] not begin to run until the resolution of the appeal of the SIFMA Decision in the D.C. Circuit and the issuance of the court's mandate.'' [26] Both the Remand Order and the Order Denying Reconsideration were appealed to the D.C. Circuit.

While the above appeal to the D.C. Circuit was pending, on March 29, 2019, the Commission issued an order disapproving a proposed fee change by BOX Exchange LLC (''BOX'') to establish connectivity fees (the ''BOX Order''), which significantly increased the level of information needed for the Commission to believe that an exchange's filing satisfied its obligations under the Act with respect to changing a fee.[27] Despite approving hundreds of access fee filings in the years prior to the BOX Order (described further below) utilizing a ''market-based'' test, the Commission changed course and disapproved BOX's proposal to begin charging connectivity at one-fourth the rate of competing exchanges' pricing.

Also while the above appeal was pending, on May 21, 2019, the Commission Staff issued guidance ''to assist the national securities exchanges and FINRA . . . in preparing Fee Filings that meet their burden to demonstrate that proposed fees are consistent with the requirements of the Securities Exchange Act.'' [28] In the Staff Guidance, the Commission Staff states that, ''[a]s an initial step in assessing the reasonableness of a fee, staff considers whether the fee is constrained by significant competitive forces.'' [29] The Staff Guidance also states that, ''. . . even where an SRO cannot demonstrate, or does not assert, that significant competitive forces constrain the fee at issue, a cost-based discussion may be an alternative basis upon which to show consistency with the Exchange Act.'' [30]

Following the BOX Order and Staff Guidance, on August 6, 2020, the D.C. Circuit vacated the Commission's SIFMA Decision in *NASDAQ Stock Market, LLC* v. *SEC* [31] and remanded for further proceedings consistent with its opinion.[32] That same day, the D.C. Circuit issued an order remanding the Remand Order to the Commission for reconsideration in light of *NASDAQ.* The court noted that the Remand Order required the exchanges and NMS plan participants to consider the challenges that the Commission had remanded in light of the SIFMA Decision. The D.C. Circuit concluded that because the SIFMA Decision ''has now been vacated, the basis for the [Remand Order] has evaporated.'' [33] Accordingly, on August 7, 2020, the Commission vacated the Remand Order and ordered the parties to file briefs addressing whether the holding in *NASDAQ* v. *SEC* that Exchange Act Section 19(d) does not permit challenges to generally applicable fee rules requiring dismissal of the challenges the Commission previously remanded.[34] The Commission further invited ''the parties to submit briefing stating whether the challenges asserted in the applications for review . . . should be dismissed, and specifically identifying any challenge that they contend should not be dismissed pursuant to the holding of *Nasdaq* v. *SEC.*'' [35] Without resolving the above issues, on October 5, 2020, the Commission issued an order granting SIFMA and Bloomberg's request to withdraw their applications for review and dismissed the proceedings.[36]

As a result of the Commission's loss of the *NASDAQ* vs. *SEC* case noted above, the Commission never followed through with its intention to subject the over 400 fee filings to ''develop a record,'' and to ''explain their conclusions, based on that record, in a written decision that is sufficient to enable us to perform our review.'' [37] As such, all of those fees remained in place and amounted to a baseline set of fees for those exchanges that had the benefit of getting their fees in place before the Commission Staff's fee review process materially changed. The net result of this history and lack of resolution in the D.C. Circuit Court resulted in an uneven competitive landscape where the Commission subjects all new non-transaction fee filings to the new Revised Review Process, while allowing the previously challenged fee filings, mostly submitted by incumbent exchanges prior to 2019, to remain in effect and not subject to the ''record'' or ''review'' earlier intended by the Commission.

While the Exchange appreciates that the Staff Guidance articulates an important policy goal of improving disclosures and requiring exchanges to justify that their market data and access fee proposals are fair and reasonable, the practical effect of the Revised Review Process, Staff Guidance, and the Commission's related practice of continuous suspension of new fee filings, is anti-competitive, discriminatory, and has put in place an un-level playing field, which has negatively impacted smaller, nascent, non-legacy exchanges (''non-legacy exchanges''), while favoring larger, incumbent, entrenched, legacy exchanges (''legacy exchanges'').[38] The legacy exchanges all established a significantly higher baseline for access and market data fees prior to the Revised Review Process. From 2011 until the issuance of the Staff Guidance in 2019, national securities exchanges filed, and the Commission Staff did not abrogate or suspend (allowing such fees

[38] Commission Chair Gary Gensler recently reiterated the Commission's mandate to ensure competition in the equities markets. *See* ''Statement on Minimum Price Increments, Access Fee Caps, Round Lots, and Odd-Lots'', by Chair Gary Gensler, dated December 14, 2022 (stating ''[i]n 1975, Congress tasked the Securities and Exchange Commission with responsibility to facilitate the establishment of the national market system and *enhance competition in the securities markets, including the equity markets*'' (*emphasis added*)). In that same statement, Chair Gary Gensler cited the five objectives laid out by Congress in 11A of the Exchange Act (15 U.S.C. 78k–1), including ensuring ''fair competition among brokers and dealers, among exchange markets, and *between exchange markets* and markets other than exchange markets . . .'' (*emphasis added*). *Id.* at note 1. *See also* Securities Acts Amendments of 1975, *available at https://www.govtrack.us/congress/bills/94/s249.*

to become effective), at least 92 filings [39] to amend exchange connectivity or port fees (or similar access fees). The support for each of those filings was a simple statement by the relevant exchange that the fees were constrained by competitive forces.[40] These fees remain in effect today.

The net result is that the non-legacy exchanges are effectively now blocked by the Commission Staff from adopting or increasing fees to amounts comparable to the legacy exchanges (which were not subject to the Revised Review Process and Staff Guidance), despite providing enhanced disclosures and rationale to support their proposed fee changes that far exceed any such support provided by legacy exchanges. Simply put, legacy exchanges were able to increase their non-transaction fees during an extended period in which the Commission applied a ''market-based'' test that only relied upon the assumed presence of significant competitive forces, while exchanges today are subject to a cost-based test requiring extensive cost and revenue disclosures, a process that is complex, inconsistently applied, and rarely results in a successful outcome, *i.e.,* non-suspension. The Revised Review Process and Staff Guidance changed decades-long Commission Staff standards for review, resulting in unfair discrimination and placing an undue burden on inter-market competition between legacy exchanges and non-legacy exchanges.

Commission Staff now require exchange filings, including from non-legacy exchanges such as the Exchange, to provide detailed cost-based analysis in place of competition-based arguments to support such changes. However, even with the added detailed cost and expense disclosures, the Commission Staff continues to either suspend such filings and institute disapproval proceedings, or put the exchanges in the unenviable position of having to repeatedly withdraw and re-file with additional detail in order to continue to charge those fees.[41] By impeding any path forward for non-legacy exchanges to establish commensurate non-transaction fees, or by failing to provide any alternative means for smaller markets to establish ''fee parity'' with legacy exchanges, the Commission is stifling competition: non-legacy exchanges are, in effect, being deprived of the revenue necessary to compete on a level playing field with legacy exchanges. This is particularly harmful, given that the costs to maintain exchange systems and operations continue to increase. The Commission Staff's change in position impedes the ability of non-legacy exchanges to raise revenue to invest in their systems to compete with the legacy exchanges who already enjoy disproportionate non-transaction fee based revenue. For example, the Cboe Exchange, Inc. (''Cboe'') reported ''access and capacity fee'' revenue of $70,893,000 for 2020 [42] and $80,383,000 for 2021.[43] Cboe C2 Exchange, Inc. (''C2'') reported ''access and capacity fee'' revenue of $19,016,000 for 2020 [44] and $22,843,000 for 2021.[45] Cboe BZX Exchange, Inc. (''BZX'') reported ''access and capacity fee'' revenue of $38,387,000 for 2020 [46] and $44,800,000 for 2021.[47] Cboe EDGX Exchange, Inc. (''EDGX'') reported ''access and capacity fee'' revenue of $26,126,000 for 2020 [48] and $30,687,000 for 2021.[49] For 2021, the affiliated Cboe, C2, BZX, and EDGX (the four largest exchanges of the Cboe exchange group) reported $178,712,000 in ''access and capacity fees'' in 2021. NASDAQ Phlx, LLC (''NASDAQ Phlx'') reported ''Trade Management Services'' revenue of $20,817,000 for 2019.[50] The Exchange notes it is unable to compare ''access fee'' revenues with NASDAQ Phlx (or other affiliated NASDAQ exchanges) because after 2019, the ''Trade Management Services'' line item was bundled into a much larger line item in PHLX's Form 1, simply titled ''Market services.'' [51]

The much higher non-transaction fees charged by the legacy exchanges provides them with two significant competitive advantages. First, legacy exchanges are able to use their additional non-transaction revenue for investments in infrastructure, vast marketing and advertising on major media outlets,[52] new products and other innovations. Second, higher non-transaction fees provide the legacy exchanges with greater flexibility to lower their transaction fees (or use the revenue from the higher non-transaction fees to subsidize transaction fee rates),[53] which are more immediately impactful in competition for order flow and market share, given the variable nature of this cost on member firms. The prohibition of a reasonable path forward denies the Exchange (and other non-legacy exchanges) this flexibility, eliminates the ability to remain

[39] This timeframe also includes challenges to over 400 rule filings by SIFMA and Bloomberg discussed above. *Sec. Indus. & Fin. Mkts. Ass'n,* Securities Exchange Act Release No. 84433, 2018 WL 5023230 (Oct. 16, 2018). Those filings were left to stand, while at the same time, blocking newer exchanges from the ability to establish competitive access and market data fees. *See The Nasdaq Stock Market, LLC* v. *SEC,* Case No. 18–1292 (D.C. Cir. June 5, 2020). The expectation at the time of the litigation was that the 400 rule flings challenged by SIFMA and Bloomberg would need to be justified under revised review standards.

[40] *See, e.g.,* Securities Exchange Act Release Nos. 74417 (March 3, 2015), 80 FR 12534 (March 9, 2015) (SR–ISE–2015–06); 83016 (April 9, 2018), 83 FR 16157 (April 13, 2018) (SR–PHLX–2018–26); 70285 (August 29, 2013), 78 FR 54697 (September 5, 2013) (SR–NYSEMKT–2013–71); 76373 (November 5, 2015), 80 FR 70024 (November 12, 2015) (SR–NYSEMKT–2015–90); 79729 (January 4, 2017), 82 FR 3061 (January 10, 2017) (SR–NYSEARCA–2016–172).

[41] The Exchange has filed, and subsequently withdrawn, various forms of this proposed fee change numerous times since August 2021 with each proposal containing hundreds of cost and revenue disclosures never previously disclosed by legacy exchanges in their access and market data fee filings prior to 2019.

[42] According to Cboe's 2021 Form 1 Amendment, access and capacity fees represent fees assessed for the opportunity to trade, including fees for trading-related functionality. *See* Cboe 2021 Form 1 Amendment, *available at https://www.sec.gov/Archives/edgar/vprr/2100/21000465.pdf.*

competitive on transaction fees, and hinders the ability to compete for order flow and market share with legacy exchanges. There is little doubt that subjecting one exchange to a materially different standard than that historically applied to legacy exchanges for non-transaction fees leaves that exchange at a disadvantage in its ability to compete with its pricing of transaction fees.

While the Commission has clearly noted that the Staff Guidance is merely guidance and ''is not a rule, regulation or statement of the . . . Commission . . . the Commission has neither approved nor disapproved its content . . .'',[54] this is not the reality experienced by exchanges such as MIAX. As such, non-legacy exchanges are forced to rely on an opaque cost-based justification standard. However, because the Staff Guidance is devoid of detail on what must be contained in cost-based justification, this standard is nearly impossible to meet despite repeated good-faith efforts by the Exchange to provide substantial amount of cost-related details. For example, the Exchange has attempted to increase fees using a cost-based justification numerous times, having submitted over six filings.[55] However, despite providing 100+ page filings describing in extensive detail its costs associated with providing the services described in the filings, Commission Staff continues to suspend such filings, with the rationale that the Exchange has not provided sufficient detail of its costs and without ever being precise about what additional data points are required. The Commission Staff appears to be interpreting the reasonableness standard set forth in Section 6(b)(4) of the Act [56] in a manner that is not possible to achieve. This essentially nullifies the cost-based approach for exchanges as a legitimate alternative as laid out in the Staff Guidance. By refusing to accept a reasonable cost-based argument to justify non-transaction fees (in addition to refusing to accept a competition-based argument as described above), or by failing to provide the detail required to achieve that standard, the Commission Staff is effectively preventing non-legacy exchanges from making any non-transaction fee changes, which benefits the legacy exchanges and is anticompetitive to the non-legacy exchanges. This does not meet the fairness standard under the Act and is discriminatory.

Because of the un-level playing field created by the Revised Review Process and Staff Guidance, the Exchange believes that the Commission Staff, at this point, should either (a) provide sufficient clarity on how its cost-based standard can be met, including a clear and exhaustive articulation of required data and its views on acceptable margins,[57] to the extent that this is pertinent; (b) establish a framework to provide for commensurate non-transaction based fees among competing exchanges to ensure fee parity; [58] or (c) accept that certain competition-based arguments are applicable given the linkage between non-transaction fees and transaction fees, especially where non-transaction fees among exchanges are based upon disparate standards of review, lack parity, and impede fair competition. Considering the absence of any such framework or clarity, the Exchange believes that the Commission does not have a reasonable basis to deny the Exchange this change in fees, where the proposed change would result in fees meaningfully lower than comparable fees at competing exchanges and where the associated non-transaction revenue is meaningfully lower than competing exchanges.

In light of the above, disapproval of this would not meet the fairness standard under the Act, would be discriminatory and places a substantial burden on competition. The Exchange would be uniquely disadvantaged by not being able to increase its access fees to comparable levels (or lower levels than current market rates) to those of other options exchanges for connectivity. If the Commission Staff were to disapprove this proposal, that action, and not market forces, would substantially affect whether the Exchange can be successful in its competition with other options exchanges. Disapproval of this filing could also be viewed as an arbitrary and capricious decision should the Commission Staff continue to ignore its past treatment of non-transaction fee filings before implementation of the Revised Review Process and Staff Guidance and refuse to allow such filings to be approved despite significantly enhanced arguments and cost disclosures.[59]

* * * * *

10Gb ULL Connectivity Fee Change

The Exchange filed a proposal to no longer operate 10Gb connectivity to the Exchange on a single shared network with its affiliate, MIAX Pearl Options. This change is an operational necessity due to ever-increasing capacity constraints and to accommodate anticipated access needs for Members and other market participants.[60] This proposal: (i) sets forth the applicable fees for the bifurcated 10Gb ULL network; (ii) removes provisions in the Fee Schedule that provide for a shared 10Gb ULL network; and (iii) specifies that market participants may continue to connect to both the Exchange and MIAX Pearl Options via the 1Gb network.

The Exchange bifurcated the Exchange and MIAX Pearl Options 10Gb ULL networks on January 23, 2023. The Exchange issued an alert on August 12, 2022 publicly announcing the planned network change and implementation plan and dates to provide market participants adequate time to prepare.[61] Upon bifurcation of the 10Gb ULL network, subscribers need to purchase separate connections to the Exchange and MIAX Pearl Options at the applicable rate. The Exchange's

[54] *See supra* note 28, at note 1.

[55] *See* Securities Exchange Act Release Nos. 94890 (May 11, 2022), 87 FR 29945 (May 17, 2022) (SR–MIAX–2022–20); 94720 (April 14, 2022), 87 FR 23586 (April 20, 2022) (SR–MIAX–2022–16); 94719 (April 14, 2022), 87 FR 23600 (April 20, 2022) (SR–MIAX–2022–14); 94259 (February 15, 2022), 87 FR 9747 (February 22, 2022) (SR–MIAX–2022–08); 94256 (February 15, 2022), 87 FR9711 (February 22, 2022) (SR–MIAX–2022–07); 93771 (December 14, 2021), 86 FR 71940 (December 20, 2021) (SR–MIAX–2021–60); 93775 (December 14, 2021), 86 FR 71996 (December 20, 2021) (SR–MIAX–2021–59); 93185 (September 29, 2021), 86 FR 55093 (October 5, 2021) (SR–MIAX–2021–43); 93165 (September 28, 2021), 86 FR 54750 (October 4, 2021) (SR–MIAX–2021–41); 92661 (August 13, 2021), 86 FR 46737 (August 19, 2021) (SR–MIAX–2021–37); 92643 (August 11, 2021), 86 FR 46034 (August 17, 2021) (SR–MIAX–2021–35).

[56] 15 U.S.C. 78f(b)(4).

[57] To the extent that the cost-based standard includes Commission Staff making determinations as to the appropriateness of certain profit margins, the Exchange believes that Staff should be clear as to what they determine is an appropriate profit margin.

[58] In light of the arguments above regarding disparate standards of review for historical legacy non-transaction fees and current non-transaction fees for non-legacy exchanges, a fee parity alternative would be one possible way to avoid the current unfair and discriminatory effect of the Staff Guidance and Revised Review Process. *See, e.g., CSA Staff Consultation Paper 21–401, Real-Time Market Data Fees, available at https://www.bcsc.bc.ca/-/media/PWS/Resources/Securities_Law/Policies/Policy2/21401_Market_Data_Fee_CSA_Staff_Consulation_Paper.pdf.*

[59] The Exchange's costs have clearly increased and continue to increase, particularly regarding capital expenditures, as well as employee benefits provided by third parties (*e.g.,* healthcare and insurance). Yet, practically no fee change proposed by the Exchange to cover its ever-increasing costs has been acceptable to the Commission Staff since 2021. The only other fair and reasonable alternative would be to require the numerous fee filings unquestioningly approved before the Staff Guidance and Revised Review Process to ''develop a record,'' and to ''explain their conclusions, based on that record, in a written decision that is sufficient to enable us to perform our review,'' and to ensure a comparable review process with the Exchange's filing.

[60] *See supra* note 9.

[61] *Id.*

proposed amended rate for 10Gb ULL connectivity is described below. Prior to the bifurcation of the 10Gb ULL networks, subscribers to 10Gb ULL connectivity would be able to connect to both the Exchange and MIAX Pearl Options at the applicable rate set forth below.

The Exchange, therefore, proposes to amend the Fee Schedule to increase the fees for Members and non-Members to access the Exchange's system networks[62] via a 10Gb ULL fiber connection and to specify that this fee is for a dedicated connection to the Exchange and no longer provides access to MIAX Pearl Options. Specifically, the Exchange proposes to amend Sections 5)a)–b) of the Fee Schedule to increase the 10Gb ULL connectivity fee for Members and non-Members from $10,000 per month to $13,500 per month (''10Gb ULL Fee'').[63] The Exchange also proposes to amend the Fee Schedule to reflect the bifurcation of the 10Gb ULL network and specify that only the 1Gb network provides access to both the Exchange and MIAX Pearl Options.

The Exchange proposes to make the following changes to reflect the bifurcated 10Gb ULL network for the Exchange and MIAX Pearl Options. The Exchange proposes to amend the explanatory paragraphs below the network connectivity fee tables in Sections 5)a)–b) of the Fee Schedule to specify that, with the bifurcated 10Gb ULL network, Members (and non-Members) utilizing the MENI to connect to the trading platforms, market data systems, test systems, and disaster recovery facilities of the Exchange and MIAX Pearl Options via a single, can only do so via a shared 1Gb connection.

The Exchange will continue to assess monthly Member and non-Member network connectivity fees for connectivity to the primary and secondary facilities in any month the Member or non-Member is credentialed to use any of the Exchange APIs or market data feeds in the production environment. The Exchange will continue to pro-rate the fees when a Member or non-Member makes a change to the connectivity (by adding or deleting connections) with such pro-rated fees based on the number of trading days that the Member or non-Member has been credentialed to utilize any of the Exchange APIs or market data feeds in the production environment through such connection, divided by the total number of trading days in such month multiplied by the applicable monthly rate.

Limited Service MEI Ports

Background

The Exchange also proposes to amend Section 5)d) of the Fee Schedule to amend the monthly port fee for Limited Service MEI Ports available to Market Makers.[64] The Exchange currently allocates two (2) Full Service MEI Ports[65] and two (2) Limited Service MEI Ports[66] per matching engine[67] to which each Market Maker connects. Market Makers may also request additional Limited Service MEI Ports for each matching engine to which they connect. The Full Service MEI Ports and Limited Service MEI Ports all include access to the Exchange's primary and secondary data centers and its disaster recovery center. Market Makers may request additional Limited Service MEI Ports. Market Makers were previously assessed a $100 monthly fee for each Limited Service MEI Port for each matching engine above the first two Limited Service MEI Ports that are included for free. This fee was unchanged since 2016 (before the proposals to adopt a tiered fee structure).[68]

Limited Service MEI Port Fee Changes

The Exchange now proposes to amend the monthly fee per Limited Service MEI Port and increase the number of free Limited Service MEI Ports per matching engine from two (2) to four (4). Specifically, the Exchange will now provide the first, second, third, and fourth Limited Service MEI Ports for each matching engine free of charge. For additional Limited Service MEI Ports after the first four ports per matching engine that are provided for free (*i.e.,* beginning with the fifth Limited Service MEI Port), the Exchange proposes to increase the monthly fee from $100 to $275 per Limited Service MEI Port per matching engine.

Market Makers that elect to purchase more than the number of Limited Service Ports that are provide for free do so due to the nature of their business and their perceived need for numerous ports to access the Exchange. Meanwhile, Market Makers who utilize the free Limited Service MEI Ports do so based on their business needs.

The Exchange notes that it last proposed to increase its monthly Limited Service MEI Port fees in 2016 (other than the prior proposals to adopt a tiered fee structure for Limited Service MEI Ports),[69] and such increase proposed herein is designed to recover a portion of the ever increasing costs associated with directly accessing the Exchange.

[62] The Exchange's system networks consist of the Exchange's extranet, internal network, and external network.

[63] Market participants that purchase additional 10Gb ULL connections as a result of this change will not be subject to the Exchange's Member Network Connectivity Testing and Certification Fee under Section 4)c) of the Fee Schedule. *See* Fee Schedule, Section 4)c), *available at https://www.miaxglobal.com/markets/us-options/miax-options/fees* (providing that ''Network Connectivity Testing and Certification Fees will not be assessed in situations where the Exchange initiates a mandatory change to the Exchange's system that requires testing and certification. Member Network Connectivity Testing and Certification Fees will not be assessed for testing and certification of connectivity to the Exchange's Disaster Recovery Facility.'').

[64] The Exchange notes that in its prior filings (the Initial, Second, Third, Fourth and Fifth Proposals), the Exchange proposed to adopt a tiered-pricing structure for Limited Service MEI Ports.

[65] Full Service MEI Ports provide Market Makers with the ability to send Market Maker quotes, eQuotes, and quote purge messages to the MIAX System. Full Service MEI Ports are also capable of receiving administrative information. Market Makers are limited to two Full Service MEI Ports per matching engine. *See* Fee Schedule, Section 5)d)ii), note 27.

[66] Limited Service MEI Ports provide Market Makers with the ability to send eQuotes and quote purge messages only, but not Market Maker Quotes, to the MIAX System. Limited Service MEI Ports are also capable of receiving administrative information. Market Makers initially receive two Limited Service MEI Ports per matching engine. *See* Fee Schedule, Section 5)d)ii), note 28.

[67] A ''matching engine'' is a part of the MIAX electronic system that processes options quotes and trades on a symbol-by-symbol basis. Some matching engines will process option classes with multiple root symbols, and other matching engines will be dedicated to one single option root symbol (for example, options on SPY will be processed by one single matching engine that is dedicated only to SPY). A particular root symbol may only be assigned to a single designated matching engine. A particular root symbol may not be assigned to multiple matching engines. *See* Fee Schedule, Section 5)d)ii), note 29.

[68] *See* Securities Exchange Act Release No. 79666 (December 22, 2016), 81 FR 96133 (December 29, 2016) (SR–MIAX–2016–47).

[69] *See* Securities Exchange Act Release No. 79666 (December 22, 2016), 81 FR 96133 (December 29, 2016) (SR–MIAX–2016–47).

Implementation

The proposed fee changes are immediately effective.

2. Statutory Basis

The Exchange believes that the proposed fees are consistent with Section 6(b) of the Act [70] in general, and furthers the objectives of Section 6(b)(4) of the Act [71] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among Members and other persons using any facility or system which the Exchange operates or controls. The Exchange also believes the proposed fees further the objectives of Section 6(b)(5) of the Act [72] in that they are designed to promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general protect investors and the public interest and are not designed to permit unfair discrimination between customers, issuers, brokers and dealers.

The Exchange believes that the information provided to justify the proposed fees meets or exceeds the amount of detail required in respect of proposed fee changes under the Revised Review Process and as set forth in recent Staff Guidance. Based on both the BOX Order [73] and the Staff Guidance,[74] the Exchange believes that the proposed fees are consistent with the Act because they are: (i) reasonable, equitably allocated, not unfairly discriminatory, and not an undue burden on competition; (ii) comply with the BOX Order and the Staff Guidance; and (iii) supported by evidence (including comprehensive revenue and cost data and analysis) that they are fair and reasonable and will not result in excessive pricing or supra-competitive profit.

The Exchange believes that exchanges, in setting fees of all types, should meet high standards of transparency to demonstrate why each new fee or fee amendment meets the requirements of the Act that fees be reasonable, equitably allocated, not unfairly discriminatory, and not create an undue burden on competition among market participants. The Exchange believes this high standard is especially important when an exchange imposes various fees for market participants to access an exchange's marketplace.

In the Staff Guidance, the Commission Staff states that, ''[a]s an initial step in assessing the reasonableness of a fee, staff considers whether the fee is constrained by significant competitive forces.'' [75] The Staff Guidance further states that, ''. . . even where an SRO cannot demonstrate, or does not assert, that significant competitive forces constrain the fee at issue, a cost-based discussion may be an alternative basis upon which to show consistency with the Exchange Act.'' [76] In the Staff Guidance, the Commission Staff further states that, ''[i]f an SRO seeks to support its claims that a proposed fee is fair and reasonable because it will permit recovery of the SRO's costs, . . . , specific information, including quantitative information, should be provided to support that argument.'' [77]

The proposed fees are reasonable because they promote parity among exchange pricing for access, which promotes competition, including in the Exchanges' ability to competitively price transaction fees, invest in infrastructure, new products and other innovations, all while allowing the Exchange to recover its costs to provide dedicated access via 10Gb ULL connectivity (driven by the bifurcation of the 10Gb ULL network) and Limited Service MEI Ports. As discussed above, the Revised Review Process and Staff Guidance have created an uneven playing field between legacy and non-legacy exchanges by severely restricting non-legacy exchanges from being able to increase non-transaction related fees to provide them with additional necessary revenue to better compete with legacy exchanges, which largely set fees prior to the Revised Review Process. The much higher non-transaction fees charged by the legacy exchanges provides them with two significant competitive advantages: (i) additional non-transaction revenue that may be used to fund areas other than the non-transaction service related to the fee, such as investments in infrastructure, advertising, new products and other innovations; and (ii) greater flexibility to lower their transaction fees by using the revenue from the higher non-transaction fees to subsidize transaction fee rates. The latter is more immediately impactful in competition for order flow and market share, given the variable nature of this cost on Member firms. The absence of a reasonable path forward to increase non-transaction fees to comparable (or lower rates) limits the Exchange's flexibility to, among other things, make additional investments in infrastructure and advertising, diminishes the ability to remain competitive on transaction fees, and hinders the ability to compete for order flow and market share. Again, there is little doubt that subjecting one exchange to a materially different standard than that applied to other exchanges for non-transaction fees leaves that exchange at a disadvantage in its ability to compete with its pricing of transaction fees.

The Proposed Fees Ensure Parity Among Exchange Access Fees, Which Promotes Competition

The Exchange commenced operations in 2012 and adopted its initial fee schedule, with all connectivity and port fees set at $0.00 (the Exchange originally had a non-ULL 10Gb connectivity option, which it has since removed).[78] As a new exchange entrant, the Exchange chose to offer connectivity and ports free of charge to encourage market participants to trade on the Exchange and experience, among things, the quality of the Exchange's technology and trading functionality. This practice is not uncommon. New exchanges often do not charge fees or charge lower fees for certain services such as memberships/trading permits to attract order flow to an exchange, and later amend their fees to reflect the true value of those services, absorbing all costs to provide those services in the meantime. Allowing new exchange entrants time to build and sustain market share through various pricing incentives before increasing non-transaction fees encourages market entry and fee parity, which promotes competition among exchanges. It also enables new exchanges to mature their markets and allow market participants to trade on the new exchanges without fees serving as a potential barrier to attracting memberships and order flow.[79]

MEMX's market share has increased and recently proposed to adopt numerous non-transaction fees, including fees for membership, market data, and connectivity. *See* Securities

Continued

Later in 2013, as the Exchange's market share increased,[80] the Exchange adopted a nominal $10 fee for each additional Limited Service MEI Port.[81] The Exchange last increased the fees for its 10Gb ULL fiber connections from $9,300 to $10,000 per month on January 1, 2021.[82] The Exchange balanced business and competitive concerns with the need to financially compete with the larger incumbent exchanges that charge higher fees for similar connectivity and use that revenue to invest in their technology and other service offerings.

The proposed changes to the Fee Schedule are reasonable in several respects. As a threshold matter, the Exchange is subject to significant competitive forces, which constrains its pricing determinations for transaction fees as well as non-transaction fees. The fact that the market for order flow is competitive has long been recognized by the courts. In *NetCoalition* v. *Securities and Exchange Commission,* the D.C. Circuit stated, ''[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'. . . .'' [83]

The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention to determine prices, products, and services in the securities markets. In Regulation NMS, while adopting a series of steps to improve the current market model, the Commission highlighted the importance of market forces in determining prices and SRO revenues, and also recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [84]

Congress directed the Commission to ''rely on 'competition, whenever possible, in meeting its regulatory responsibilities for overseeing the SROs and the national market system.' '' [85] As a result, and as evidenced above, the Commission has historically relied on competitive forces to determine whether a fee proposal is equitable, fair, reasonable, and not unreasonably or unfairly discriminatory. ''If competitive forces are operative, the self-interest of the exchanges themselves will work powerfully to constrain unreasonable or unfair behavior.'' [86] Accordingly, ''the existence of significant competition provides a substantial basis for finding that the terms of an exchange's fee proposal are equitable, fair, reasonable, and not unreasonably or unfairly discriminatory.'' [87] In the Revised Review Process and Staff Guidance, Commission Staff indicated that they would look at factors beyond the competitive environment, such as cost, only if a ''proposal lacks persuasive evidence that the proposed fee is constrained by significant competitive forces.'' [88]

The Exchange believes the competing exchanges' 10Gb connectivity and port fees are useful examples of alternative approaches to providing and charging for access and demonstrating how such fees are competitively set and constrained. To that end, the Exchange believes the proposed fees are competitive and reasonable because the proposed fees are similar to or less than fees charged for similar connectivity and port access provided by other options exchanges with comparable market shares. As such, the Exchange believes that denying its ability to institute fees that allow the Exchange to recoup its costs with a reasonable margin in a manner that is closer to parity with legacy exchanges, in effect, impedes its ability to compete, including in its pricing of transaction fees and ability to invest in competitive infrastructure and other offerings.

The following table shows how the Exchange's proposed fees remain similar to or less than fees charged for similar connectivity and port access provided by other options exchanges with similar market share. Each of the connectivity or port rates in place at competing options exchanges were filed with the Commission for immediate effectiveness and remain in place today.

Exchange	Type of connection or port	Monthly fee (per connection or per port)
MIAX (as proposed) (equity options market share of 6.30% for the month of December 2023) [a].	10Gb ULL connection	$13,500.
	Limited Service MEI Ports	1–4 ports: FREE; 5 or more ports: $275 each.
NASDAQ [b] (equity options market share of 5.58% for the month of December 2023) [c].	10Gb Ultra fiber connection	$15,000 per connection.
	SQF Port [d]	1–5 ports: $1,500 per port; 6–20 ports: $1,000 per port; 21 or more ports: $500 per port.
NASDAQ ISE LLC (''ISE'') [e] (equity options market share of 6.39% for the month of December 2023) [f].	10Gb Ultra fiber connection	$15,000 per connection.
	SQF Port	$1,100 per port.
NYSE American LLC (''NYSE American'') [g] (equity options market share of 7.49% for the month of December 2023) [h].	10Gb LX LCN connection	$22,000 per connection.
	Order/Quote Entry Port	1–40 ports: $450 per port; 41 or more ports: $150 per port.

[j] *See supra* note a.

There is no requirement, regulatory or otherwise, that any broker-dealer connect to and access any (or all of) the available options exchanges. Market participants may choose to become a member of one or more options exchanges based on the market participant's assessment of the business opportunity relative to the costs of the Exchange. With this, there is elasticity of demand for exchange membership. As an example, the Exchange's affiliate, MIAX Pearl Options, experienced a decrease in membership as the result of similar fees proposed herein. One MIAX Pearl Options Market Maker terminated their MIAX Pearl Options membership effective January 1, 2023, as a direct result of the proposed connectivity and port fee changes proposed by MIAX Pearl Options.

It is not a requirement for market participants to become members of all options exchanges; in fact, certain market participants conduct an options business as a member of only one options market.[89] A very small number of market participants choose to become a member of all sixteen options exchanges. Most firms that actively trade on options markets are not currently Members of the Exchange and do not purchase connectivity or port services at the Exchange. Connectivity and ports are only available to Members or service bureaus, and only a Member may utilize a port.[90]

One other exchange recently noted in a proposal to amend their own trading permit fees that of the 62 market making firms that are registered as Market Makers across Cboe, MIAX, and BOX, 42 firms access only one of the three exchanges.[91] The Exchange and its affiliated options markets, MIAX Pearl Options and MIAX Emerald, have a total of 46 members. Of those 46 total members, 37 are members of all three affiliated options markets, two are members of only two affiliated options markets, and seven are members of only one affiliated options market. The Exchange also notes that no firm is a Member of the Exchange only. The above data evidences that a broker-dealer need not have direct connectivity to all options exchanges, let alone the Exchange and its two affiliates, and broker-dealers may elect to do so based on their own business decisions and need to directly access each exchange's liquidity pool.

Not only is there not an actual regulatory requirement to connect to every options exchange, the Exchange believes there is also no ''de facto'' or practical requirement as well, as further evidenced by the broker-dealer membership analysis of the options exchanges discussed above. As noted above, this is evidenced by the fact that one MIAX Pearl Options Market Maker terminated their MIAX Pearl Options membership effective January 1, 2023 as a direct result of the proposed connectivity and port fee changes on MIAX Pearl Options (which are similar to the changes proposed herein). Indeed, broker-dealers choose if and how to access a particular exchange and because it is a choice, the Exchange must set reasonable pricing, otherwise prospective members would not connect and existing members would disconnect from the Exchange. The decision to become a member of an exchange, particularly for registered market makers, is complex, and not solely based on the non-transactional costs assessed by an exchange. As noted herein, specific factors include, but are not limited to: (i) an exchange's available liquidity in options series; (ii) trading functionality offered on a particular market; (iii) product offerings; (iv) customer service on an exchange; and (v) transactional pricing. Becoming a member of the exchange does not ''lock'' a potential member into a market or diminish the overall competition for exchange services.

In lieu of becoming a member at each options exchange, a market participant may join one exchange and elect to have their orders routed in the event that a better price is available on an away market. Nothing in the Order Protection Rule requires a firm to become a Member at—or establish connectivity to—the Exchange.[92] If the Exchange is not at the national best bid or offer (''NBBO'') [93], the Exchange will route an

[89] BOX recently adopted an electronic market maker trading permit fee. *See* Securities Exchange Release No. 94894 (May 11, 2022), 87 FR 29987 (May 17, 2022) (SR–BOX–2022–17). In that proposal, BOX stated that, ''. . . it is not aware of any reason why Market Makers could not simply drop their access to an exchange (or not initially access an exchange) if an exchange were to establish prices for its non-transaction fees that, in the determination of such Market Maker, did not make business or economic sense for such Market Maker to access such exchange. [BOX] again notes that no market makers are required by rule, regulation, or competitive forces to be a Market Maker on [BOX].'' Also in 2022, MEMX established a monthly membership fee. *See* Securities Exchange Act Release No. 93927 (January 7, 2022), 87 FR 2191 (January 13, 2022) (SR–MEMX–2021–19). In that proposal, MEMX reasoned that that there is value in becoming a member of the exchange and stated that it believed that the proposed membership fee ''is not unfairly discriminatory because no broker-dealer is required to become a member of the Exchange'' and that ''neither the trade-through requirements under Regulation NMS nor broker-dealers' best execution obligations require a broker-dealer to become a member of every exchange.''

[90] Service Bureaus may obtain ports on behalf of Members.

[91] *See* Securities Exchange Act Release No. 94894 (May 11, 2022), 87 FR 29987 (May 17, 2022) (SR–BOX–2022–17) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to Amend the Fee Schedule on the BOX Options Market LLC Facility To Adopt Electronic Market Maker Trading Permit Fees). The Exchange believes that BOX's observation demonstrates that market making firms can, and do, select which exchanges they wish to access, and, accordingly, options exchanges must take competitive considerations into account when setting fees for such access.

[92] *See* Options Order Protection and Locked/Crossed Market Plan (August 14, 2009), *available at https://www.theocc.com/getmedia/7fc629d9-4e54-4b99-9f11-c0e4db1a2266/options_order_protection_plan.pdf.*

[93] *See* Exchange Rule 100.

order to any away market that is at the NBBO to ensure that the order was executed at a superior price and prevent a trade-through.[94]

With respect to the submission of orders, Members may also choose not to purchase any connection from the Exchange, and instead rely on the port of a third party to submit an order. For example, a third-party broker-dealer Member of the Exchange may be utilized by a retail investor to submit orders into an exchange. An institutional investor may utilize a broker-dealer, a service bureau,[95] or request sponsored access [96] through a member of an exchange in order to submit a trade directly to an options exchange.[97] A market participant may either pay the costs associated with becoming a member of an exchange or, in the alternative, a market participant may elect to pay commissions to a broker-dealer, pay fees to a service bureau to submit trades, or pay a member to sponsor the market participant in order to submit trades directly to an exchange.

Non-Member third-parties, such as service bureaus and extranets, resell the Exchange's connectivity. This indirect connectivity is another viable alternative for market participants to trade on the Exchange without connecting directly to the Exchange (and thus not pay the Exchange's connectivity fees), which alternative is already being used by non-Members and further constrains the price that the Exchange is able to charge for connectivity and other access fees to its market. The Exchange notes that it could, but chooses not to, preclude market participants from reselling its connectivity. Unlike other exchanges, the Exchange also does not currently assess fees on third-party resellers on a per customer basis (*i.e.,* fees based on the number of firms that connect to the Exchange indirectly via the third-party).[98] Indeed, the Exchange does not receive any connectivity revenue when connectivity is resold by a third-party, which often is resold to multiple customers, some of whom are agency broker-dealers that have numerous customers of their own.[99] Particularly, in the event that a market participant views the Exchange's direct connectivity and access fees as more or less attractive than competing markets, that market participant can choose to connect to the Exchange indirectly or may choose not to connect to the Exchange and connect instead to one or more of the other 16 options markets. Accordingly, the Exchange believes that the proposed fees are fair and reasonable and constrained by competitive forces.

The Exchange is obligated to regulate its Members and secure access to its environment. In order to properly regulate its Members and secure the trading environment, the Exchange takes measures to ensure access is monitored and maintained with various controls. Connectivity and ports are methods utilized by the Exchange to grant Members secure access to communicate with the Exchange and exercise trading rights. When a market participant elects to be a Member, and is approved for membership by the Exchange, the Member is granted trading rights to enter orders and/or quotes into Exchange through secure connections.

Again, there is no legal or regulatory requirement that a market participant become a Member of the Exchange. This is again evidenced by the fact that one MIAX Pearl Options Market Maker terminated their MIAX Pearl Options membership effective January 1, 2023 as a direct result of the proposed connectivity and port fee changes on MIAX Pearl Options. If a market participant chooses to become a Member, they may then choose to purchase connectivity beyond the one connection that is necessary to quote or submit orders on the Exchange. Members may freely choose to rely on one or many connections, depending on their business model.

Bifurcation of 10Gb ULL Connectivity and Related Fees

The Exchange began to operate on a single shared network with MIAX Pearl Options when MIAX Pearl commenced operations as a national securities exchange on February 7, 2017.[100] The Exchange and MIAX Pearl Options operated on a single shared network to provide Members with a single convenient set of access points for both exchanges. Both the Exchange and MIAX Pearl Options offer two methods of connectivity, 1Gb and 10Gb ULL connections. The 1Gb connection services are supported by a discrete set of switches providing 1Gb access ports to Members. The 10Gb ULL connection services are supported by a second and mutually exclusive set of switches providing 10Gb ULL access ports to Members. Previously, both the 1Gb and 10Gb ULL shared extranet ports allowed Members to use one connection to access both exchanges, namely their trading platforms, market data systems, test systems, and disaster recovery facilities.

The Exchange stresses that bifurcating the 10Gb ULL connectivity between the Exchange and MIAX Pearl Options was not designed with the objective to generate an overall increase in access fee revenue. Rather, the proposed change was necessitated by 10Gb ULL connectivity experiencing a significant decrease in port availability mostly driven by connectivity demands of latency sensitive Members that seek to maintain multiple 10Gb ULL connections on every switch in the network. Operating two separate national securities exchanges on a single shared network provided certain benefits, such as streamlined connectivity to multiple exchanges, and simplified exchange infrastructure. However, doing so was no longer sustainable due to ever-increasing capacity constraints and current system limitations. The network is not an unlimited resource. As described more fully in the proposal to bifurcate the 10Gb ULL network,[101] the connectivity

[94] Members may elect to not route their orders by utilizing the Do Not Route order type. *See* Exchange Rule 516(g).

[95] Service Bureaus provide access to market participants to submit and execute orders on an exchange. On the Exchange, a Service Bureau may be a Member. Some Members utilize a Service Bureau for connectivity and that Service Bureau may not be a Member. Some market participants utilize a Service Bureau who is a Member to submit orders.

[96] Sponsored Access is an arrangement whereby a Member permits its customers to enter orders into an exchange's system that bypass the Member's trading system and are routed directly to the Exchange, including routing through a service bureau or other third-party technology provider.

[97] This may include utilizing a floor broker and submitting the trade to one of the five options trading floors.

[98] *See, e.g.,* Nasdaq Price List—U.S. Direct Connection and Extranet Fees, *available at* US Direct-Extranet Connection (nasdaqtrader.com); *and* Securities Exchange Act Release Nos. 74077 (January 16, 2022), 80 FR 3683 (January 23, 2022) (SR–NASDAQ–2015–002); *and* 82037 (November 8, 2022), 82 FR 52953 (November 15, 2022) (SR–NASDAQ–2017–114).

[99] The Exchange notes that resellers, such as SFTI, are not required to publicize, let alone justify or file with the Commission their fees, and as such could charge the market participant any fees it deems appropriate (including connectivity fees higher than the Exchange's connectivity fees), even if such fees would otherwise be considered potentially unreasonable or uncompetitive fees.

[100] *See* Securities Exchange Act Release No. 80061 (February 17, 2017), 82 FR 11676 (February 24, 2017) (establishing MIAX Pearl Fee Schedule and establishing that the MENI can also be configured to provide network connectivity to the trading platforms, market data systems, test systems, and disaster recovery facility of MIAX Pearl's affiliate, MIAX, via a single, shared connection).

[101] *See* Securities Exchange Act Release Nos. 96553 (December 20, 2022), 87 FR 79379 (December 27, 2022) (SR–PEARL–2022–60); 96545 (December

needs of Members and market participants has increased every year since the launch of MIAX Pearl Options and the operations of the Exchange and MIAX Pearl Options on a single shared 10Gb ULL network is no longer feasible. This required constant System [102] expansion to meet Member demand for additional ports and 10Gb ULL connections has resulted in limited available System headroom, which eventually became operationally problematic for both the Exchange and its customers.

As stated above, the shared network is not an unlimited resource and its expansion was constrained by MIAX's and MIAX Pearl Options' ability to provide fair and equitable access to all market participants of both markets. Due to the ever-increasing connectivity demands, the Exchange found it necessary to bifurcate 10Gb ULL connectivity to the Exchange's and MIAX Pearl Options' Systems and networks to be able to continue to meet ongoing and future 10Gb ULL connectivity and access demands.[103]

Unlike the switches that provide 1Gb connectivity, the availability for additional 10Gb ULL connections on each switch had significantly decreased. This was mostly driven by the connectivity demands of latency sensitive Members (*e.g.,* Market Makers and liquidity removers) that sought to maintain connectivity across multiple 10Gb ULL switches. Based on the Exchange's experience, such Members did not typically use a shared 10Gb ULL connection to reach both the Exchange and MIAX Pearl Options due to related latency concerns. Instead, those Members maintain dedicated separate 10Gb ULL connections for the Exchange and separate dedicated 10Gb ULL connections for MIAX Pearl Options. This resulted in a much higher 10Gb ULL usage per switch by those Members on the shared 10Gb ULL network than would otherwise be needed if the Exchange and MIAX Pearl Options had their own dedicated 10Gb ULL networks. Separation of the Exchange and MIAX Pearl Options 10Gb ULL networks naturally lends itself to reduced 10Gb ULL port consumption on each switch and, therefore, increased 10Gb ULL port availability for current Members and new Members.

Prior to bifurcating the 10Gb ULL network, the Exchange and MIAX Pearl Options continued to add switches to meet ongoing demand for 10Gb ULL connectivity. That was no longer sustainable because simply adding additional switches to expand the current shared 10Gb ULL network would not adequately alleviate the issue of limited available port connectivity. While it would have resulted in a gain in overall port availability, the existing switches on the shared 10Gb ULL network in use would have continued to suffer from lack of port headroom given many latency sensitive Members' needs for a presence on each switch to reach both the Exchange and MIAX Pearl Options. This was because those latency sensitive Members sought to have a presence on each switch to maximize the probability of experiencing the best network performance. Those Members routinely decide to rebalance orders and/or messages over their various connections to ensure each connection is operating with maximum efficiency. Simply adding switches to the extranet would not have resolved the port availability needs on the shared 10Gb ULL network since many of the latency sensitive Members were unwilling to relocate their connections to a new switch due to the potential detrimental performance impact. As such, the impact of adding new switches and rebalancing ports would not have been effective or responsive to customer needs. The Exchange has found that ongoing and continued rebalancing once additional switches are added has had, and would have continued to have had, a diminishing return on increasing available 10Gb ULL connectivity.

Based on its experience and expertise, the Exchange found the most practical way to increase connectivity availability on its switches was to bifurcate the existing 10Gb ULL networks for the Exchange and MIAX Pearl Options by migrating the exchanges' connections from the shared network onto their own set of switches. Such changes accordingly necessitated a review of the Exchange's previous 10Gb ULL connectivity fees and related costs. The proposed fees are necessary to allow the Exchange to cover ongoing costs related to providing and maintaining such connectivity, described more fully below. The ever increasing connectivity demands that necessitated this change further support that the proposed fees are reasonable because this demand reflects that Members and non-Members believe they are getting value from the 10Gb ULL connections they purchase.

The Exchange announced on August 12, 2022 the planned network change and the January 23, 2023 implementation date to provide market participants adequate time to prepare.[104] Beginning August 12, 2022, the Exchange worked with the then-current 10Gb ULL subscribers to address their connectivity needs ahead of the January 23, 2023 date. Based on those interactions and subscriber feedback, the Exchange experienced a minimal net increase of six (6) overall 10Gb ULL connectivity subscriptions across the Exchange and MIAX Pearl Options when the 10Gb ULL network was bifurcated. This immaterial increase in overall connections reflects a minimal fee impact for all types of subscribers and reflects that subscribers elected to reallocate existing 10Gb ULL connectivity directly to the Exchange or MIAX Pearl Options, or choose to decrease or cease connectivity as a result of the change.

Should the Commission Staff disapprove such fees, it would effectively dictate how an exchange manages its technology and would hamper the Exchange's ability to continue to invest in and fund access services in a manner that allows it to meet existing and anticipated access demands of market participants. Disapproval could also have the adverse effect of discouraging an exchange from optimizing its operations and deploying innovative technology to the benefit of market participants if it believes the Commission would later prevent that exchange from covering its costs and monetizing operational enhancements, thus adversely impacting competition. Also, as noted above, the economic consequences of not being able to better establish fee parity with other exchanges for non-transaction fees hampers the Exchange's ability to compete on transaction fees.

Cost Analysis

In general, the Exchange believes that exchanges, in setting fees of all types, should meet very high standards of transparency to demonstrate why each new fee or fee increase meets the Exchange Act requirements that fees be reasonable, equitably allocated, not unfairly discriminatory, and not create an undue burden on competition among members and markets. In particular, the Exchange believes that each exchange should take extra care to be able to demonstrate that these fees are based on its costs and reasonable business needs.

In proposing to charge fees for connectivity and port services, the

20, 2022) 87 FR 79393 (December 27, 2022) (SR–MIAX–2022–48).

[102] The term ''System'' means the automated trading system used by the Exchange for the trading of securities. *See* Exchange Rule 100.

[103] Currently, the Exchange maintains sufficient headroom to meet ongoing and future requests for 1Gb connectivity. Therefore, the Exchange did not propose to alter 1Gb connectivity and continues to provide 1Gb connectivity over a shared network.

[104] *See supra* note 9.

Exchange is especially diligent in assessing those fees in a transparent way against its own aggregate costs of providing the related service, and in carefully and transparently assessing the impact on Members—both generally and in relation to other Members, *i.e.,* to assure the fee will not create a financial burden on any participant and will not have an undue impact in particular on smaller Members and competition among Members in general. The Exchange believes that this level of diligence and transparency is called for by the requirements of Section 19(b)(1) under the Act,[105] and Rule 19b–4 thereunder,[106] with respect to the types of information exchanges should provide when filing fee changes, and Section 6(b) of the Act,[107] which requires, among other things, that exchange fees be reasonable and equitably allocated,[108] not designed to permit unfair discrimination,[109] and that they not impose a burden on competition not necessary or appropriate in furtherance of the purposes of the Act.[110] This rule change proposal addresses those requirements, and the analysis and data in each of the sections that follow are designed to clearly and comprehensively show how they are met.[111] The Exchange reiterates that the legacy exchanges with whom the Exchange vigorously competes for order flow and market share, were not subject to any such diligence or transparency in setting their baseline non-transaction fees, most of which were put in place before the Revised Review Process and Staff Guidance.

As detailed below, the Exchange recently calculated its aggregate annual costs for providing physical 10Gb ULL connectivity to the Exchange at $14,410,793 (or approximately $1,200,900 per month, rounded to the nearest dollar when dividing the annual cost by 12 months) and its aggregate annual costs for providing Limited Service MEI Ports at $2,399,193 (or approximately $199,933 per month, rounded to the nearest dollar when dividing the annual cost by 12 months). In order to cover the aggregate costs of providing connectivity to its users (both Members and non-Members [112]) going forward and to make a modest profit, as described below, the Exchange proposes to modify its Fee Schedule to charge a fee of $13,500 per month for each physical 10Gb ULL connection and to remove language providing for a shared 10Gb ULL network between the Exchange and MIAX Pearl Options. The Exchange also proposes to modify its Fee Schedule to amend the monthly fee for additional Limited Service MEI Ports and provide two additional ports free of charge for a total of four free Limited Service MEI Ports per matching engine to which each Member connects.

In 2019, the Exchange completed a study of its aggregate costs to produce market data and connectivity (the ''Cost Analysis'').[113] The Cost Analysis required a detailed analysis of the Exchange's aggregate baseline costs, including a determination and allocation of costs for core services provided by the Exchange—transaction execution, market data, membership services, physical connectivity, and port access (which provide order entry, cancellation and modification functionality, risk functionality, the ability to receive drop copies, and other functionality). The Exchange separately divided its costs between those costs necessary to deliver each of these core services, including infrastructure, software, human resources (*i.e.,* personnel), and certain general and administrative expenses (''cost drivers'').

As an initial step, the Exchange determined the total cost for the Exchange and the affiliated markets for each cost driver as part of its 2024 budget review process. The 2024 budget review is a company-wide process that occurs over the course of many months, includes meetings among senior management, department heads, and the Finance Team. Each department head is required to send a ''bottom up'' budget to the Finance Team allocating costs at the profit and loss account and vendor levels for the Exchange and its affiliated markets based on a number of factors, including server counts, additional hardware and software utilization, current or anticipated functional or non-functional development projects, capacity needs, end-of-life or end-of-service intervals, number of members, market model (*e.g.,* price time or pro-rata, simple only or simple and complex markets, auction functionality, etc.), which may impact message traffic, individual system architectures that impact platform size,[114] storage needs, dedicated infrastructure versus shared infrastructure allocated per platform based on the resources required to support each platform, number of available connections, and employees allocated time. All of these factors result in different allocation percentages among the Exchange and its affiliated markets, *i.e.,* the different percentages of the overall cost driver allocated to the Exchange and its affiliated markets will cause the dollar amount of the overall cost allocated among the Exchange and its affiliated markets to also differ. Because the Exchange's parent company currently owns and operates four separate and distinct marketplaces, the Exchange must determine the costs associated with each actual market—as opposed to the Exchange's parent company simply concluding that all costs drivers are the same at each individual marketplace and dividing total cost by four (4) (evenly for each marketplace). Rather, the Exchange's parent company determines an accurate cost for each marketplace, which results in different allocations and amounts across exchanges for the same cost drivers, due to the unique factors of each marketplace as described above. This allocation methodology also ensures that no cost would be allocated twice or double-counted between the Exchange and its affiliated markets. The Finance Team then consolidates the budget and sends it to senior management, including the Chief Financial Officer and Chief Executive Officer, for review and approval. Next, the budget is presented to the Board of Directors and the Finance and Audit Committees for each exchange for their approval. The above steps encompass the first step of the cost allocation process.

The next step involves determining what portion of the cost allocated to the Exchange pursuant to the above methodology is to be allocated to each core service, *e.g.,* connectivity and ports, market data, and transaction services. The Exchange and its affiliated markets adopted an allocation methodology with thoughtful and consistently applied principles to guide how much of a particular cost amount

[111] *See supra* note 28.

[112] Types of market participants that obtain connectivity services from the Exchange but are not Members include service bureaus and extranets. Service bureaus offer technology-based services to other companies for a fee, including order entry services, and thus, may access Limited Service MEI Ports on behalf of one or more Members. Extranets offer physical connectivity services to Members and non-Members.

[113] The Exchange frequently updates it Cost Analysis as strategic initiatives change, costs increase or decrease, and market participant needs and trading activity changes. The Exchange's most recent Cost Analysis was conducted ahead of this filing.

[114] For example, the Exchange maintains 24 matching engines, MIAX Pearl Options maintains 12 matching engines, MIAX Pearl Equities maintains 24 matching engines, and MIAX Emerald maintains 12 matching engines.

allocated to the Exchange should be allocated within the Exchange to each core service. This is the final step in the cost allocation process and is applied to each of the cost drivers set forth below. For instance, fixed costs that are not driven by client activity (*e.g.,* message rates), such as data center costs, were allocated more heavily to the provision of physical connectivity (59% of total expense amount allocated to 10Gb ULL connectivity), with smaller allocations to additional Limited Service MEI Ports (5.5%), and the remainder to the provision of other connectivity, other ports, transaction execution, membership services and market data services (35.5%). This next level of the allocation methodology at the individual exchange level also took into account factors similar to those set forth under the first step of the allocation methodology process described above, to determine the appropriate allocation to connectivity or market data versus allocations for other services. This allocation methodology was developed through an assessment of costs with senior management intimately familiar with each area of the Exchange's operations. After adopting this allocation methodology, the Exchange then applied an allocation of each cost driver to each core service, resulting in the cost allocations described below. Each of the below cost allocations is unique to the Exchange and represents a percentage of overall cost that was allocated to the Exchange pursuant to the initial allocation described above.

By allocating segmented costs to each core service, the Exchange was able to estimate by core service the potential margin it might earn based on different fee models. The Exchange notes that as a non-listing venue it has five primary sources of revenue that it can potentially use to fund its operations: transaction fees, fees for connectivity and port services, membership fees, regulatory fees, and market data fees. Accordingly, the Exchange must cover its expenses from these five primary sources of revenue. The Exchange also notes that as a general matter each of these sources of revenue is based on services that are interdependent. For instance, the Exchange's system for executing transactions is dependent on physical hardware and connectivity; only Members and parties that they sponsor to participate directly on the Exchange may submit orders to the Exchange; many Members (but not all) consume market data from the Exchange in order to trade on the Exchange; and, the Exchange consumes market data from external sources in order to comply with regulatory obligations. Accordingly, given this interdependence, the allocation of costs to each service or revenue source required judgment of the Exchange and was weighted based on estimates of the Exchange that the Exchange believes are reasonable, as set forth below. While there is no standardized and generally accepted methodology for the allocation of an exchange's costs, the Exchange's methodology is the result of an extensive review and analysis and will be consistently applied going forward for any other potential fee proposals. In the absence of the Commission attempting to specify a methodology for the allocation of exchanges' interdependent costs, the Exchange will continue to be left with its best efforts to attempt to conduct such an allocation in a thoughtful and reasonable manner.

Through the Exchange's extensive updated Cost Analysis, which was again recently further refined, the Exchange analyzed every expense item in the Exchange's general expense ledger to determine whether each such expense relates to the provision of connectivity and port services, and, if such expense did so relate, what portion (or percentage) of such expense actually supports the provision of connectivity and port services, and thus bears a relationship that is, ''in nature and closeness,'' directly related to network connectivity and port services. In turn, the Exchange allocated certain costs more to physical connectivity and others to ports, while certain costs were only allocated to such services at a very low percentage or not at all, using consistent allocation methodologies as described above. Based on this analysis, the Exchange estimates that the aggregate monthly cost to provide 10Gb ULL connectivity and Limited Service MEI Port services, including both physical 10Gb connections and Limited Service MEI Ports, is $1,400,833 (utilizing the rounded numbers when dividing the annual cost for 10Gb ULL connectivity and annual cost for Limited Service MEI Ports by 12 months, then adding both numbers together), as further detailed below.

Costs Related to Offering Physical 10Gb ULL Connectivity

The following chart details the individual line-item costs considered by the Exchange to be related to offering physical dedicated 10Gb ULL connectivity via an unshared network as well as the percentage of the Exchange's overall costs that such costs represent for each cost driver (*e.g.,* as set forth below, the Exchange allocated approximately 22.4% of its overall Human Resources cost to offering 10Gb ULL physical connectivity).

Cost drivers	Allocated annual cost[k]	Allocated monthly cost[l]	Percent of all
Human Resources	$5,097,079	$424,757	22.4
Connectivity (external fees, cabling, switches, etc.)	55,020	4,585	59.0
Internet Services and External Market Data	551,120	45,927	71.3
Data Center	881,177	73,431	59.0
Hardware and Software Maintenance and Licenses	991,378	82,615	48.5
Depreciation	2,573,534	214,461	58.3
Allocated Shared Expenses	4,261,485	355,124	48.1
Total	14,410,793	1,200,900	35.6

[k] The Annual Cost includes figures rounded to the nearest dollar.

[l] The Monthly Cost was determined by dividing the Annual Cost for each line item by twelve (12) months and rounding up or down to the nearest dollar.

Below are additional details regarding each of the line-item costs considered by the Exchange to be related to offering physical 10Gb ULL connectivity. While some costs were attempted to be allocated as equally as possible among the Exchange and its affiliated markets, the Exchange notes that some of its cost allocation percentages for certain cost drivers differ when compared to the same cost drivers for the Exchange's affiliated markets in their similar proposed fee changes for connectivity and ports. This is because the Exchange's cost allocation methodology

utilizes the actual projected costs of the Exchange (which are specific to the Exchange and are independent of the costs projected and utilized by the Exchange's affiliated markets) to determine its actual costs, which may vary across the Exchange and its affiliated markets based on factors that are unique to each marketplace. The Exchange provides additional explanation below (including the reason for the deviation) for the significant differences.

The Exchange also notes that expenses included in its 2024 fiscal year budget and this proposal are generally higher than its 2023 fiscal year budget and Cost Analysis included in prior filings. As more fully described below and throughout this filing, this is due to a number of factors, such as, critical vendors and suppliers increasing costs they charge the Exchange, significant exchange staff headcount increases, increased data center costs from the Exchange's data center providers in multiple locations and facilities, higher technology and communications costs, planned hardware refreshes, and system capacity upgrades that increase depreciation expense. Specifically, with regard to employee compensation, the 2024 fiscal year budget includes additional expenses related to increased headcount and new hires that are needed to support the Exchange as it continues to grow (the Exchange and its affiliated companies are projected to hire over 60 additional staff in 2024). Hardware and software expenses have also increased primarily due to price increases from critical vendors and equipment suppliers. Further, the Exchange budgeted for additional hardware and software needs to support the Exchange's continued growth and expansion. Depreciation and amortization have likewise increased due to recent and planned refreshes in Exchange hardware and software. This new equipment and software then becomes depreciable, as described below. Data center costs have also increased due the following: the Exchange expanding its footprint within its data center; and the data center vendor increasing the costs it charges the Exchange. Lastly, allocated shared expenses have increased due to the overall budgeted increase in costs from 2023 to 2024 necessary to operate and support the Exchange as described below.

The updated Cost Analysis using projected 2024 expenses caused some allocation percentages in this filing to differ slightly (≤3%) from past filings that relied on projected 2023 expenses. This is due to various reasons. For example, the slight differences in allocation percentage for the Human Resources cost driver is due to both changes in headcount in 2024 and also changes to the percentage of employee time allocated to these services based on changing projects and initiatives in 2024 versus 2023. For example, the Exchange recently hired a Head of Data Services whose time is entirely allocated to the market data cost driver. These types of changes in the Human Resources cost driver impact the final percentage amount of total cost allocated towards overall connectivity, including 10Gb ULL connectivity. There are no changes to the overall percentage allocation amounts applied to the product groups (*e.g.,* network connectivity) for each of the non-Human Resources cost drivers in the current filing based on 2024 expense versus the prior 2023 filings. However, within each of those product groups, slight changes to the amount of usage of the individual products within that group (in 2024 versus 2023) will have an impact on the individual product's percentage allocation within that entire product group. For example, a decrease in 1Gb connectivity lines in 2024 versus 2023 will have an impact on the percentage allocation of costs to 1Gb lines in 2024 versus 2023, which will also impact the individual percentage allocation of costs to 10Gb ULL lines, within the entire product group. Despite these minor shifts in product usage and changes in headcount and employee mix which resulted in non-material changes in percentage allocation amounts, the Exchange applied the same rules and principles to its 2024 Cost Analysis versus its 2023 Cost Analysis.

Human Resources

The Exchange notes that it and its affiliated markets anticipate that by year-end 2024, there will be 289 employees (excluding employees at non-options/equities exchange subsidiaries of Miami International Holdings, Inc. (''MIH''), the holding company of the Exchange and its affiliated markets), and each department leader has direct knowledge of the time spent by each employee with respect to the various tasks necessary to operate the Exchange. Specifically, twice a year, and as needed with additional new hires and new project initiatives, in consultation with employees as needed, managers and department heads assign a percentage of time to every employee and then allocate that time amongst the Exchange and its affiliated markets to determine each market's individual Human Resources expense. Then, managers and department heads assign a percentage of each employee's time allocated to the Exchange into buckets including network connectivity, ports, market data, and other exchange services. This process ensures that every employee is 100% allocated, ensuring there is no double counting between the Exchange and its affiliated markets.

For personnel costs (Human Resources), the Exchange calculated an allocation of employee time for employees whose functions include providing and maintaining physical connectivity and performance thereof (primarily the Exchange's network infrastructure team, which spends most of their time performing functions necessary to provide physical connectivity). As described more fully above, the Exchange's parent company allocates costs to the Exchange and its affiliated markets and then a portion of the Human Resources costs allocated to the Exchange is then allocated to connectivity. From that portion allocated to the Exchange that applied to connectivity, the Exchange then allocated a weighted average of 46% of each employee's time from the above group to 10Gb ULL connectivity.

The Exchange also allocated Human Resources costs to provide physical connectivity to a limited subset of personnel with ancillary functions related to establishing and maintaining such connectivity (such as information security, sales, membership, and finance personnel). The Exchange allocated cost on an employee-by-employee basis (*i.e.,* only including those personnel who support functions related to providing physical connectivity) and then applied a smaller allocation to such employees' time to 10Gb ULL connectivity (less than 16%). This other group of personnel with a smaller allocation of Human Resources costs also have a direct nexus to 10Gb ULL connectivity, whether it is a sales person selling a connection, finance personnel billing for connectivity or providing budget analysis, or information security ensuring that such connectivity is secure and adequately defended from an outside intrusion.

The estimates of Human Resources cost were therefore determined by consulting with such department leaders, determining which employees are involved in tasks related to providing physical connectivity, and confirming that the proposed allocations were reasonable based on an understanding of the percentage of time such employees devote to those tasks. This includes personnel from the Exchange departments that are predominately involved in providing 1Gb and 10Gb ULL connectivity:

Business Systems Development, Trading Systems Development, Systems Operations and Network Monitoring, Network and Data Center Operations, Listings, Trading Operations, and Project Management. Again, the Exchange allocated 46% of each of their employee's time assigned to the Exchange for 10Gb ULL connectivity, as stated above. Employees from these departments perform numerous functions to support 10Gb ULL connectivity, such as the installation, re-location, configuration, and maintenance of 10Gb ULL connections and the hardware they access. This hardware includes servers, routers, switches, firewalls, and monitoring devices. These employees also perform software upgrades, vulnerability assessments, remediation and patch installs, equipment configuration and hardening, as well as performance and capacity management. These employees also engage in research and development analysis for equipment and software supporting 10Gb ULL connectivity and design, and support the development and on-going maintenance of internally-developed applications as well as data capture and analysis, and Member and internal Exchange reports related to network and system performance. The above list of employee functions is not exhaustive of all the functions performed by Exchange employees to support 10Gb ULL connectivity, but illustrates the breath of functions those employees perform in support of the above cost and time allocations.

Lastly, the Exchange notes that senior level executives' time was only allocated to the 10Gb ULL connectivity related Human Resources costs to the extent that they are involved in overseeing tasks related to providing physical connectivity. The Human Resources cost was calculated using a blended rate of compensation reflecting salary, equity and bonus compensation, benefits, payroll taxes, and 401(k) matching contributions.

Connectivity (External Fees, Cabling, Switches, etc.)

The Connectivity cost driver includes external fees paid to connect to other exchanges and third parties, cabling and switches required to operate the Exchange. The Connectivity cost driver is more narrowly focused on technology used to complete connections to the Exchange and to connect to external markets. The Exchange notes that its connectivity to external markets is required in order to receive market data to run the Exchange's matching engine and basic operations compliant with existing regulations, primarily Regulation NMS.

The Exchange relies on various connectivity providers for connectivity to the entire U.S. options industry, and infrastructure services for critical components of the network that are necessary to provide and maintain its System Networks and access to its System Networks via 10Gb ULL connectivity. Specifically, the Exchange utilizes connectivity providers to connect to other national securities exchanges and the Options Price Reporting Authority (''OPRA''). The Exchange understands that these service providers provide services to most, if not all, of the other U.S. exchanges and other market participants. Connectivity provided by these service providers is critical to the Exchanges daily operations and performance of its System Networks to which market participants connect to via 10Gb ULL connectivity. Without these services providers, the Exchange would not be able to connect to other national securities exchanges, market data providers or OPRA and, therefore, would not be able to operate and support its System Networks. The Exchange does not employ a separate fee to cover its connectivity provider expense and recoups that expense, in part, by charging for 10Gb ULL connectivity.

Internet Services and External Market Data

The next cost driver consists of internet Services and external market data. Internet services includes third-party service providers that provide the internet, fiber and bandwidth connections between the Exchange's networks, primary and secondary data centers, and office locations in Princeton and Miami.

External market data includes fees paid to third parties, including other exchanges, to receive market data. The Exchange includes external market data fee costs towards the provision of 10Gb ULL connectivity because such market data is necessary for certain services related to connectivity, including pre-trade risk checks and checks for other conditions (*e.g.,* re-pricing of orders to avoid locked or crossed markets and trading collars). Since external market data from other exchanges is consumed at the Exchange's matching engine level, (to which 10Gb ULL connectivity provides access) in order to validate orders before additional orders enter the matching engine or are executed, the Exchange believes it is reasonable to allocate an amount of such costs to 10Gb ULL connectivity.

The Exchange relies on various content service providers for data feeds for the entire U.S. options industry, as well as content for critical components of the network that are necessary to provide and maintain its System Networks and access to its System Networks via 10Gb ULL connectivity. Specifically, the Exchange utilizes content service providers to receive market data from OPRA, other exchanges and market data providers. The Exchange understands that these service providers provide services to most, if not all, of the other U.S. exchanges and other market participants. Market data provided these service providers is critical to the Exchanges daily operations and performance of its System Networks to which market participants connect to via 10Gb ULL connectivity. Without these services providers, the Exchange would not be able to receive market data and, therefore, would not be able to operate and support its System Networks. The Exchange does not employ a separate fee to cover its content service provider expense and recoups that expense, in part, by charging for 10Gb ULL connectivity.

Lastly, the Exchange notes that the actual dollar amounts allocated as part of the second step of the 2024 budget process differ among the Exchange and its affiliated markets for the internet Services and External Market Data cost driver, even though but for MIAX Emerald, the allocation percentages are generally consistent across markets (*e.g.,* MIAX Emerald, MIAX, and MIAX Pearl Options allocated 84.8%, 71.3%, and 74.8%, respectively, to the same cost driver). This is because: (i) a different percentage of the overall internet Services and External Market Data cost driver was allocated to MIAX Emerald and its affiliated markets due to the factors set forth under the first step of the 2024 budget review process described above (unique technical architecture, market structure, and business requirements of each marketplace); and (ii) MIAX Emerald itself allocated a larger portion of this cost driver to 10Gb ULL connectivity because of recent initiatives to improve the latency and determinism of its systems. The Exchange notes while the percentage MIAX Emerald allocated to the internet Services and External Market Data cost driver is greater than the Exchange and its other affiliated markets, the overall dollar amount allocated to the Exchange under the initial step of the 2024 budget process is lower than its affiliated markets. However, the Exchange believes that

this is not, in dollar amounts, a significant difference. This is because the total dollar amount of expense covered by this cost driver is relatively small compared to other cost drivers and is due to nuances in exchange architecture that require different initial allocation amount under the first step of the 2024 budget process described above. Thus, non-significant differences in percentage allocation amounts in a smaller cost driver create the appearance of a significant difference, even though the actual difference in dollar amounts is small. For instance, despite the difference in cost allocation percentages for the internet Services and External Market Data cost driver across MIAX and MIAX Pearl Options, the actual dollar amount difference is approximately only $13,000 per month, a non-significant amount.

Data Center

Data Center costs includes an allocation of the costs the Exchange incurs to provide physical connectivity in the third-party data centers where it maintains its equipment (such as dedicated space, security services, cooling and power). The Exchange notes that it does not own the Primary Data Center or the Secondary Data Center, but instead, leases space in data centers operated by third parties. The Exchange has allocated a high percentage of the Data Center cost (59.0%) to physical 10Gb ULL connectivity because the third-party data centers and the Exchange's physical equipment contained therein is the most direct cost in providing physical access to the Exchange. In other words, for the Exchange to operate in a dedicated space with connectivity by market participants to a physical trading platform, the data centers are a very tangible cost, and in turn, if the Exchange did not maintain such a presence then physical connectivity would be of no value to market participants.

Hardware and Software Maintenance and Licenses

Hardware and Software Licenses includes hardware and software licenses used to operate and monitor physical assets necessary to offer physical connectivity to the Exchange.[115] The Exchange notes that this allocation is less than MIAX Pearl Options by a significant amount, and slightly less than MIAX Emerald, as MIAX Pearl Options allocated 59.8% of its Hardware and Software Maintenance and License expense towards 10Gb ULL connectivity, while MIAX and MIAX Emerald allocated 48.5% and 50.9%, respectively, to the same category of expense. This is because MIAX Pearl Options is in the process of replacing and upgrading various hardware and software used to operate its options trading platform in order to maintain premium network performance. At the time of this filing, MIAX Pearl Options is undergoing a major hardware refresh, replacing older hardware with new hardware. This hardware includes servers, network switches, cables, optics, protocol data units, and cabinets, to maintain a state-of-the-art technology platform. Because of the timing of the hardware refresh with the timing of this filing, the Exchange has materially higher expense than its affiliates.

Depreciation

All physical assets, software, and hardware used to provide 10Gb ULL connectivity, which also includes assets used for testing and monitoring of Exchange infrastructure, were valued at cost, and depreciated or leased over periods ranging from three to five years. Thus, the depreciation cost primarily relates to servers necessary to operate the Exchange, some of which are owned by the Exchange and some of which are leased by the Exchange in order to allow efficient periodic technology refreshes. The Exchange also included in the Depreciation cost driver certain budgeted improvements that the Exchange intends to capitalize and depreciate with respect to 10Gb ULL connectivity in the near-term. As with the other allocated costs in the Exchange's updated Cost Analysis, the Depreciation cost was therefore narrowly tailored to depreciation related to 10Gb ULL connectivity. As noted above, the Exchange allocated 58.3% of its allocated depreciation costs to providing physical 10Gb ULL connectivity.

The Exchange also notes that this allocation differs from its affiliated markets due to a number of factors, such as the age of physical assets and software (*e.g.,* older physical assets and software were previously depreciated and removed from the allocation), or certain system enhancements that required new physical assets and software, thus providing a higher contribution to the depreciated cost. For example, the percentages the Exchange and its affiliate, MIAX Emerald, allocated to the depreciation of hardware and software used to provide 10Gb ULL connectivity are similar. However, the Exchange's dollar amount is greater than that of MIAX Emerald by approximately $35,508 per month due to two factors: first, the Exchange has undergone a technology refresh since the time MIAX Emerald launched in February 2019, leading to it having more hardware that software that is subject to depreciation. Second, the Exchange maintains 24 matching engines while MIAX Emerald maintains only 12 matching engines. This also results in more of the Exchange's hardware and software being subject to depreciation than MIAX Emerald's hardware and software due to the greater amount of equipment and software necessary to support the greater number of matching engines on the Exchange.

Allocated Shared Expenses

Finally, as with other exchange products and services, a portion of general shared expenses was allocated to overall physical connectivity costs. These general shared costs are integral to exchange operations, including its ability to provide physical connectivity. Costs included in general shared expenses include office space and office expenses (*e.g.,* occupancy and overhead expenses), utilities, recruiting and training, marketing and advertising costs, professional fees for legal, tax and accounting services (including external and internal audit expenses), and telecommunications. Similarly, the cost of paying directors to serve on the Exchange's Board of Directors is also included in the Exchange's general shared expense cost driver.[116] These general shared expenses are incurred by the Exchange's parent company, MIH, as a direct result of operating the Exchange and its affiliated markets.

The Exchange employed a process to determine a reasonable percentage to allocate general shared expenses to 10Gb ULL connectivity pursuant to its

[115] This expense may be less than the Exchange's affiliated markets, specifically MIAX Pearl Options because, unlike the Exchange, MIAX Pearl Options maintains an additional gateway to accommodate its member's access and connectivity needs. This added gateway contributes to the difference in allocations between the Exchange and MIAX Pearl Options. This expense also differs in dollar amount among the Exchange, MIAX Pearl Options, and MIAX Emerald because each market may maintain and utilize a different amount of hardware and software based on its market model and infrastructure needs. The Exchange allocated a percentage of the overall cost based on actual amounts of hardware and software utilized by that market, which resulted in different cost allocations and dollar amounts.

[116] The Exchange notes that MEMX allocated a precise amount of 10% of the overall cost for directors to providing physical connectivity. *See* Securities Exchange Act Release No. 95936 (September 27, 2022), 87 FR 59845 (October 3, 2022) (SR–MEMX–2022–26). The Exchange does not calculate is expenses at that granular a level. Instead, director costs are included as part of the overall general allocation.

multi-layered allocation process. First, general expenses were allocated among the Exchange and affiliated markets as described above. Then, the general shared expense assigned to the Exchange was allocated across core services of the Exchange, including connectivity. Then, these costs were further allocated to sub-categories within the final categories, *i.e.,* 10Gb ULL connectivity as a sub-category of connectivity. In determining the percentage of general shared expenses allocated to connectivity that ultimately apply to 10Gb ULL connectivity, the Exchange looked at the percentage allocations of each of the cost drivers and determined a reasonable allocation percentage. The Exchange also held meetings with senior management, department heads, and the Finance Team to determine the proper amount of the shared general expense to allocate to 10Gb ULL connectivity. The Exchange, therefore, believes it is reasonable to assign an allocation, in the range of allocations for other cost drivers, while continuing to ensure that this expense is only allocated once. Again, the general shared expenses are incurred by the Exchange's parent company as a result of operating the Exchange and its affiliated markets and it is therefore reasonable to allocate a percentage of those expenses to the Exchange and ultimately to specific product offerings such as 10Gb ULL connectivity.

Again, a portion of all shared expenses were allocated to the Exchange (and its affiliated markets) which, in turn, allocated a portion of that overall allocation to all physical connectivity on the Exchange. The Exchange then allocated 48.1% of the portion allocated to physical connectivity to 10Gb ULL connectivity. The Exchange believes this allocation percentage is reasonable because, while the overall dollar amount may be higher than other cost drivers, the 48.1% is based on and in line with the percentage allocations of each of the Exchange's other cost drivers. The percentage allocated to 10Gb ULL connectivity also reflects its importance to the Exchange's strategy and necessity towards the nature of the Exchange's overall operations, which is to provide a resilient, highly deterministic trading system that relies on faster 10Gb ULL connectivity than the Exchange's competitors to maintain premium performance. This allocation reflects the Exchange's focus on providing and maintaining high performance network connectivity, of which 10Gb ULL connectivity is a main contributor. The Exchange differentiates itself by offering a ''premium-product'' network experience, as an operator of a high performance, ultra-low latency network with unparalleled system throughput, which system networks can support access to three distinct options markets and multiple competing market-makers having affirmative obligations to continuously quote over 1,100,000 distinct trading products (per exchange), and the capacity to handle approximately 18 million quote messages per second. The ''premium-product'' network experience enables users of 10Gb ULL connections to receive the network monitoring and reporting services for those approximately 1,100,000 distinct trading products. These value add services are part of the Exchange's strategy for offering a high performance trading system, which utilizes 10Gb ULL connectivity.

The Exchange notes that the 48.1% allocation of general shared expenses for physical 10Gb ULL connectivity is higher than that allocated to general shared expenses for Limited Service MEI Ports. This is based on its allocation methodology that weighted costs attributable to each core service. While physical connectivity has several areas where certain tangible costs are heavily weighted towards providing such service (*e.g.,* Data Center, as described above), Limited Service MEI Ports do not require as many broad or indirect resources as other core services.

* * * * *

Approximate Cost per 10Gb ULL Connection per Month

After determining the approximate allocated monthly cost related to 10Gb ULL connectivity, the total monthly cost for 10Gb ULL connectivity of $1,200,900 was divided by the number of physical 10Gb ULL connections the Exchange maintained at the time that proposed pricing was determined (93), to arrive at a cost of approximately $12,913 per month (rounded up to the nearest dollar), per physical 10Gb ULL connection. Due to the nature of this particular cost, this allocation methodology results in an allocation among the Exchange and its affiliated markets based on set quantifiable criteria, *i.e.,* actual number of 10Gb ULL connections.

* * * * *

Costs Related to Offering Limited Service MEI Ports

The following chart details the individual line-item costs considered by the Exchange to be related to offering Limited Service MEI Ports as well as the percentage of the Exchange's overall costs such costs represent for such area (*e.g.,* as set forth below, the Exchange allocated approximately 5.7% of its overall Human Resources cost to offering Limited Service MEI Ports).

Cost drivers	Allocated annual cost[m]	Allocated monthly cost[n]	Percent of all
Human Resources	$1,297,498	$108,125	5.7
Connectivity (external fees, cabling, switches, etc.)	2,730	228	2.9
Internet Services and External Market Data	42,377	3,531	5.5
Data Center	81,963	6,830	5.5
Hardware and Software Maintenance and Licenses	112,103	9,342	5.5
Depreciation	217,699	18,142	4.9
Allocated Shared Expenses	644,822	53,735	7.3
Total	2,399,192	199,933	5.9

[m] *See supra* note k (describing rounding of Annual Costs).
[n] *See supra* note l (describing rounding of Monthly Costs based on Annual Costs).

Below are additional details regarding each of the line-item costs considered by the Exchange to be related to offering Limited Service MEI Ports. While some costs were attempted to be allocated as equally as possible among the Exchange and its affiliated markets, the Exchange notes that some of its cost allocation percentages for certain cost drivers differ when compared to the same cost drivers for the Exchange's affiliated markets in their similar proposed fee changes for connectivity and ports. This is because the Exchange's cost allocation methodology utilizes the

actual projected costs of the Exchange (which are specific to the Exchange, and are independent of the costs projected and utilized by the Exchange's affiliated markets) to determine its actual costs, which may vary across the Exchange and its affiliated markets based on factors that are unique to each marketplace. The Exchange provides additional explanation below (including the reason for the deviation) for the significant differences.

The Exchange also notes that expenses included in its 2024 fiscal year budget and this proposal are generally higher than its 2023 fiscal year budget and Cost Analysis included in prior filings. As more fully described below and throughout this filing, this is due to a number of factors, such as, critical vendors and suppliers increasing costs they charge the Exchange, significant exchange staff headcount increases, increased data center costs from the Exchange's data center providers in multiple locations and facilities, higher technology and communications costs, planned hardware refreshes, and system capacity upgrades that increase depreciation expense. Specifically, with regard to employee compensation, the 2024 fiscal year budget includes additional expenses related to increased headcount and new hires that are needed to support the Exchange as it continues to grow (the Exchange and its affiliated companies are projected to hire over 60 additional staff in 2024). Hardware and software expenses have also increased primarily due to price increases from critical vendors and equipment suppliers. Further, the Exchange budgeted for additional hardware and software needs to support the Exchange's continued growth and expansion. Depreciation and amortization have likewise increased due to recent and planned refreshes in Exchange hardware and software. This new equipment and software then becomes depreciable, as described below. Data center costs have also increased due the following: the Exchange expanding its footprint within its data center; and the data center vendor increasing the costs it charges the Exchange. Lastly, allocated shared expenses have increased due to the overall budgeted increase in costs from 2023 to 2024 necessary to operate and support the Exchange as described below.

The updated Cost Analysis using projected 2024 expenses caused some allocation percentages in this filing to differ slightly (≤3%) from past filings that relied on projected 2023 expenses. This is due to various reasons. For example, the slight differences in allocation percentage for the Human Resources cost driver is due to both changes in headcount in 2024 and also changes to the percentage of employee time allocated to these services based on changing projects and initiatives in 2024 versus 2023. For example, the Exchange recently hired a Head of Data Services whose time is entirely allocated to the market data cost driver. These types of changes in the Human Resources cost driver impact the final percentage amount of total cost allocated towards overall connectivity, including 10Gb ULL connectivity. There are no changes to the overall percentage allocation amounts applied to the product groups (*e.g.,* network connectivity) for each of the non-Human Resources cost drivers in the current filing based on 2024 expense versus the prior 2023 filings. However, within each of those product groups, slight changes to the amount of usage of the individual products within that group (in 2024 versus 2023) will have an impact on the individual product's percentage allocation within that entire product group. For example, a decrease in 1Gb connectivity lines in 2024 versus 2023 will have an impact on the percentage allocation of costs to 1Gb lines in 2024 versus 2023, which will also impact the individual percentage allocation of costs to 10Gb ULL lines, within the entire product group. Despite these minor shifts in product usage and changes in headcount and employee mix which resulted in non-material changes in percentage allocation amounts, the Exchange applied the same rules and principles to its 2024 Cost Analysis versus its 2023 Cost Analysis.

Human Resources

With respect to Limited Service MEI Ports, the Exchange calculated Human Resources cost by taking an allocation of employee time for employees whose functions include providing Limited Service MEI Ports and maintaining performance thereof (including a broader range of employees such as technical operations personnel, market operations personnel, and software engineering personnel) as well as a limited subset of personnel with ancillary functions related to maintaining such connectivity (such as sales, membership, and finance personnel). Just as described above for 10Gb ULL connectivity, the estimates of Human Resources cost were again determined by consulting with department leaders, determining which employees are involved in tasks related to providing Limited Service MEI Ports and maintaining performance thereof, and confirming that the proposed allocations were reasonable based on an understanding of the percentage of their time such employees devote to tasks related to providing Limited Service MEI Ports and maintaining performance thereof. This includes personnel from the following Exchange departments that are predominately involved in providing Limited Service MEI Ports: Business Systems Development, Trading Systems Development, Systems Operations and Network Monitoring, Network and Data Center Operations, Listings, Trading Operations, and Project Management. The Exchange notes that senior level executives were allocated Human Resources costs to the extent they are involved in overseeing tasks specifically related to providing Limited Service MEI Ports. Senior level executives were only allocated Human Resources costs to the extent that they are involved in managing personnel responsible for tasks integral to providing and maintaining Limited Service MEI Ports. The Human Resources cost was again calculated using a blended rate of compensation reflecting salary, equity and bonus compensation, benefits, payroll taxes, and 401(k) matching contributions.

Connectivity (External Fees, Cabling, Switches, etc.)

The Connectivity cost includes external fees paid to connect to other exchanges and cabling and switches, as described above.

Internet Services and External Market Data

The next cost driver consists of internet services and external market data. Internet services includes third-party service providers that provide the internet, fiber and bandwidth connections between the Exchange's networks, primary and secondary data centers, and office locations in Princeton and Miami. For purposes of Limited Service MEI Ports, the Exchange also includes a portion of its costs related to external market data. External market data includes fees paid to third parties, including other exchanges, to receive and consume market data from other markets. The Exchange includes external market data costs towards the provision of Limited Service MEI Ports because such market data is necessary (in addition to physical connectivity) to offer certain services related to such ports, such as validating orders on entry against the NBBO and checking for other conditions (*e.g.,* halted securities).[117] Thus, since

[117] The Exchange notes that MEMX separately allocated 7.5% of its external market data costs to

market data from other exchanges is consumed at the Exchange's Limited Service MEI Port level in order to validate orders, before additional processing occurs with respect to such orders, the Exchange believes it is reasonable to allocate a small amount of such costs to Limited Service MEI Ports.

The Exchange notes that the allocation for the Internet Services and External Market Data cost driver is greater than that of its affiliate, MIAX Pearl Options, as MIAX allocated 5.5% of its Internet Services and External Market Data expense towards Limited Service MEI Ports, while MIAX Pearl Options allocated 1.1% to its Full Service MEO Ports for the same cost driver. The allocation percentages set forth above differ because they directly correspond with the number of applicable ports utilized on each exchange. For December 2023, MIAX Market Makers utilized 1,785 Limited Service MEI ports and MIAX Emerald Market Makers utilized 1,070 Limited Service MEI ports. When compared to Full Service Port (Bulk and Single) usage, for December 2023, MIAX Pearl Options Members utilized only 360 Full Service MEO Ports (Bulk and Single), far fewer than number of Limited Service MEI Ports utilized by Market Makers on MIAX and MIAX Emerald, thus resulting in a smaller cost allocation. There is increased cost associated with supporting a higher number of ports (requiring more hardware and other technical infrastructure and internet Service), thus the Exchange allocates a higher percentage of expense than MIAX Pearl Options, which has a lower port count.

Data Center

Data Center costs includes an allocation of the costs the Exchange incurs to provide Limited Service MEI Ports in the third-party data centers where it maintains its equipment as well as related costs for market data to then enter the Exchange's system via Limited Service MEI Ports (the Exchange does not own the Primary Data Center or the Secondary Data Center, but instead, leases space in data centers operated by third parties).

Hardware and Software Maintenance and Licenses

Hardware and Software Licenses includes hardware and software licenses used to monitor the health of the order entry services provided by the Exchange, as described above.

The Exchange notes that this allocation is greater than its affiliate, MIAX Pearl Options, as MIAX allocated 5.5% of its Hardware and Software Maintenance and License expense towards Limited Service MEI Ports, while MIAX Pearl Options allocated 1.1% to its Full Service MEO Ports (Bulk and Single) for the same category of expense. The allocation percentages set forth above differ because they correspond with the number of applicable ports utilized on each exchange. For December 2023, MIAX Market Makers utilized 1,785 Limited Service MEI ports and MIAX Emerald Market Makers utilized 1,070 Limited Service MEI Ports. When compared to Full Service Port (Bulk and Single) usage, for December 2023, MIAX Pearl Options Members utilized only 360 Full Service MEO Ports (Bulk and Single), far fewer than number of Limited Service MEI Ports utilized by Market Makers on MIAX and MIAX Emerald, thus resulting in a smaller cost allocation. There is increased cost associated with supporting a higher number of ports (requiring more hardware and other technical infrastructure), thus the Exchange allocates a higher percentage of expense than MIAX Pearl Options, which has a lower port count.

Depreciation

The vast majority of the software the Exchange uses to provide Limited Service MEI Ports has been developed in-house and the cost of such development, which takes place over an extended period of time and includes not just development work, but also quality assurance and testing to ensure the software works as intended, is depreciated over time once the software is activated in the production environment. Hardware used to provide Limited Service MEI Ports includes equipment used for testing and monitoring of order entry infrastructure and other physical equipment the Exchange purchased and is also depreciated over time.

All hardware and software, which also includes assets used for testing and monitoring of order entry infrastructure, were valued at cost, depreciated or leased over periods ranging from three to five years. Thus, the depreciation cost primarily relates to servers necessary to operate the Exchange, some of which is owned by the Exchange and some of which is leased by the Exchange in order to allow efficient periodic technology refreshes. The Exchange allocated 4.9% of all depreciation costs to providing Limited Service MEI Ports. The Exchange allocated depreciation costs for depreciated software necessary to operate the Exchange because such software is related to the provision of Limited Service MEI Ports. As with the other allocated costs in the Exchange's updated Cost Analysis, the Depreciation cost driver was therefore narrowly tailored to depreciation related to Limited Service MEI Ports.

The Exchange notes that this allocation differs from its affiliated markets due to a number of factors, such as the age of physical assets and software (*e.g.,* older physical assets and software were previously depreciated and removed from the allocation), or certain system enhancements that required new physical assets and software, thus providing a higher contribution to the depreciated cost. For example, the Exchange notes that the percentages it and its affiliate, MIAX Emerald, allocated to the depreciation cost driver for Limited Service MEI Ports differ by only 1.7%. However, the Exchange's approximate dollar amount is greater than that of MIAX Emerald by approximately $8,773 per month. This is due to two primary factors. First, the Exchange has under gone a technology refresh since the time MIAX Emerald launched in February 2019, leading to it having more hardware that software that is subject to depreciation. Second, the Exchange maintains 24 matching engines while MIAX Emerald maintains only 12 matching engines. This also results in more of the Exchange's hardware and software being subject to depreciation than MIAX Emerald's hardware and software due to the greater amount of equipment and software necessary to support the greater number of matching engines on the Exchange.

Allocated Shared Expenses

Finally, a portion of general shared expenses was allocated to overall Limited Service MEI Ports costs as without these general shared costs the Exchange would not be able to operate in the manner that it does and provide Limited Service MEI Ports. The costs included in general shared expenses include general expenses of the Exchange, including office space and office expenses (*e.g.,* occupancy and overhead expenses), utilities, recruiting and training, marketing and advertising costs, professional fees for legal, tax and accounting services (including external and internal audit expenses), and telecommunications costs. The Exchange again notes that the cost of paying directors to serve on its Board of Directors is included in the calculation of Allocated Shared Expenses, and thus a portion of such overall cost amounting to less than 10% of the overall cost for

providing physical connectivity. *See* Securities Exchange Act Release No. 95936 (September 27, 2022), 87 FR 59845 (October 3, 2022) (SR–MEMX–2022–26).

directors was allocated to providing Limited Service MEI Ports. The Exchange notes that the 7.3% allocation of general shared expenses for Limited Service MEI Ports is lower than that allocated to general shared expenses for physical connectivity based on its allocation methodology that weighted costs attributable to each Core Service based on an understanding of each area. While Limited Service MEI Ports have several areas where certain tangible costs are heavily weighted towards providing such service (*e.g.,* Data Center, as described above), 10Gb ULL connectivity requires a broader level of support from Exchange personnel in different areas, which in turn leads to a broader general level of cost to the Exchange.

Lastly, the Exchange notes that this allocation is greater than its affiliate, MIAX Pearl Options, as MIAX allocated 7.3% of its Allocated Shared Expense towards Limited Service MEI Ports, while MIAX Pearl Options allocated 3.0% to its Full Service MEO Ports (Bulk and Single) for the same category of expense. The allocation percentages set forth above differ because they correspond with the number of applicable ports utilized on each exchange. For December 2023, MIAX Market Makers utilized 1,785 Limited Service MEI Ports and MIAX Emerald Market Makers utilized 1,070 Limited Service MEI ports. When compared to Full Service Port (Bulk and Single) usage, for December 2023, MIAX Pearl Options Members utilized only 360 Full Service MEO Ports (Bulk and Single), far fewer than number of Limited Service MEI Ports utilized by Market Makers on MIAX, thus resulting in a smaller cost allocation. There is increased cost associated with supporting a higher number of ports (requiring more hardware and other technical infrastructure), thus the Exchange allocates a higher percentage of expense than MIAX Pearl Options which has a lower port count.[118]

* * * * *

Approximate Cost per Limited Service MEI Port per Month

Based on projected 2024 data, the total monthly cost allocated to Limited Service MEI Ports of $199,933 was divided by the total number of Limited Service MEI Ports utilized by Members in December, which was 1,785 (and includes free and charged ports), resulting in an approximate cost of $112 per port per month (when rounding to the nearest dollar). The Exchange used the total number of Limited Service MEI Ports it maintained in August for all Members and included free and charged ports. However, in prior filings, the Exchange did not include the expense of maintaining the two free Limited Service MEI Ports per matching engine that each Member receives when the Exchange discussed the approximate cost per port per month, but did include the two free Limited Service MEI Ports in the total expense amounts. As described herein, the Exchange changed its proposed fee structure since past filings to now offer four free Limited Service MEI Ports per matching engine to which each Member connects. After the first four free Limited Service MEI Ports, the Exchange proposes to charge $275 per Limited Service MEI Port per matching engine, up to a total of twelve (12) Limited Service MEI Ports per matching engine.

For the sake of clarity, if a Member wanted to connect to all 24 of the Exchange's matching engines and utilize the maximum number of Limited Service MEI Ports on each matching engine (*i.e.,* 12), that Member would have a total of 288 Limited Service MEI Ports (24 matching engines multiplied by 12 Limited Service MEI Ports per matching engine). With the proposed increase to now provide four Limited Service MEI Ports for free on each matching engine, that particular Member would receive 96 free Limited Service MEI Ports (4 free Limited Service MEI Ports multiplied by 24 matching engines), and be charged for the remaining 192 Limited Service MEI Ports (288 total Limited Service MEI Ports across all matching engines minus 96 free Limited Service MEI Ports across all matching engines).

As mentioned above, Members utilized a total of 1,785 Limited Service MEI Ports in the month of December 2023 (free and charged ports combined). Using December 2023 data to extrapolate out after the proposed changes herein go into effect, the total number of Limited Service MEI Ports that the Exchange would not charge for as a result of this increase in free ports is 942 (meaning the Exchange would charge for only 843 ports) and amounts to a total expense of $105,504 per month to the Exchange ($112 per port multiplied by 942 free Limited Service MEI Ports).

* * * * *

Cost Analysis—Additional Discussion

In conducting its Cost Analysis, the Exchange did not allocate any of its expenses in full to any core services (including physical connectivity or Limited Service MEI Ports) and did not double-count any expenses. Instead, as described above, the Exchange allocated applicable cost drivers across its core services and used the same Cost Analysis to form the basis of this proposal and the filings the Exchange submitted proposing fees for proprietary data feeds offered by the Exchange. For instance, in calculating the Human Resources expenses to be allocated to physical connections based upon the above described methodology, the Exchange has a team of employees dedicated to network infrastructure and with respect to such employees the Exchange allocated network infrastructure personnel with a high percentage of the cost of such personnel (46%) given their focus on functions necessary to provide 10Gb ULL physical connections. The salaries of those same personnel were allocated only 7.2% to Limited Service MEI Ports and the remaining 52.2% was allocated to 1Gb connectivity, other port services, transaction services, membership services and market data. The Exchange did not allocate any other Human Resources expense for providing physical connections to any other employee group, outside of a smaller allocation of 15% for 10Gb ULL connectivity or 15.8% for the entire network, of the cost associated with certain specified personnel who work closely with and support network infrastructure personnel. In contrast, the Exchange allocated much smaller percentages of costs (4% or less) across a wider range of personnel groups in order to allocate Human Resources costs to providing Limited Service MEI Ports. This is because a much wider range of personnel are involved in functions necessary to offer, monitor and maintain Limited Service MEI Ports but the tasks necessary to do so are not a primary or full-time function.

In total, the Exchange allocated 23.5% of its personnel costs to providing 10Gb ULL and 1Gb ULL connectivity and 5.7% of its personnel costs to providing Limited Service MEI Ports, for a total allocation of 29.2% Human Resources expense to provide these specific connectivity and port services. In turn, the Exchange allocated the remaining 70.8% of its Human Resources expense

[118] The Exchange allocated a slightly lower amount (7.3%) of this cost as compared to MIAX Emerald (8.7%). This is not a significant difference. However, both allocations resulted in a similar cost amount (approximately $0.6 million for MIAX and $0.8 million for MIAX Emerald), despite the Exchange having a higher number of Limited Service MEI Ports. MIAX Emerald was allocated a higher cost per Limited Service MEI Port due to the additional resources and expenditures associated with maintaining its recently enhanced low latency network.

to membership services, transaction services, other port services and market data. Thus, again, the Exchange's allocations of cost across core services were based on real costs of operating the Exchange and were not double-counted across the core services or their associated revenue streams.

As another example, the Exchange allocated depreciation expense to all core services, including physical connections and Limited Service MEI Ports, but in different amounts. The Exchange believes it is reasonable to allocate the identified portion of such expense because such expense includes the actual cost of the computer equipment, such as dedicated servers, computers, laptops, monitors, information security appliances and storage, and network switching infrastructure equipment, including switches and taps that were purchased to operate and support the network. Without this equipment, the Exchange would not be able to operate the network and provide connectivity services to its Members and non-Members and their customers. However, the Exchange did not allocate all of the depreciation and amortization expense toward the cost of providing connectivity services, but instead allocated approximately 63.2% of the Exchange's overall depreciation and amortization expense to connectivity services (58.3% attributed to 10Gb ULL physical connections and 4.9% to Limited Service MEI Ports). The Exchange allocated the remaining depreciation and amortization expense (approximately 36.8%) toward the cost of providing transaction services, membership services, other port services, 1Gb connectivity, and market data.

The Exchange notes that its revenue estimates are based on projections across all potential revenue streams and will only be realized to the extent such revenue streams actually produce the revenue estimated. The Exchange does not yet know whether such expectations will be realized. For instance, in order to generate the revenue expected from connectivity, the Exchange will have to be successful in retaining existing clients that wish to maintain physical connectivity and/or Limited Service MEI Ports or in obtaining new clients that will purchase such services. Similarly, the Exchange will have to be successful in retaining a positive net capture on transaction fees in order to realize the anticipated revenue from transaction pricing.

The Exchange notes that the Cost Analysis is based on the Exchange's 2024 fiscal year of operations and projections. It is possible, however, that actual costs may be higher or lower. To the extent the Exchange sees growth in use of connectivity services it will receive additional revenue to offset future cost increases. However, if use of connectivity services is static or decreases, the Exchange might not realize the revenue that it anticipates or needs in order to cover applicable costs. Accordingly, the Exchange is committing to conduct a one-year review after implementation of these fees. The Exchange expects that it may propose to adjust fees at that time, to increase fees in the event that revenues fail to cover costs and a reasonable mark-up of such costs. Similarly, the Exchange may propose to decrease fees in the event that revenue materially exceeds our current projections. In addition, the Exchange will periodically conduct a review to inform its decision making on whether a fee change is appropriate (*e.g.,* to monitor for costs increasing/decreasing or subscribers increasing/decreasing, etc. in ways that suggest the then-current fees are becoming dislocated from the prior cost-based analysis) and would propose to increase fees in the event that revenues fail to cover its costs and a reasonable mark-up, or decrease fees in the event that revenue or the mark-up materially exceeds our current projections. In the event that the Exchange determines to propose a fee change, the results of a timely review, including an updated cost estimate, will be included in the rule filing proposing the fee change. More generally, the Exchange believes that it is appropriate for an exchange to refresh and update information about its relevant costs and revenues in seeking any future changes to fees, and the Exchange commits to do so.

Projected Revenue [119]

The proposed fees will allow the Exchange to cover certain costs incurred by the Exchange associated with providing and maintaining necessary hardware and other network infrastructure as well as network monitoring and support services; without such hardware, infrastructure, monitoring and support the Exchange would be unable to provide the connectivity and port services. Much of the cost relates to monitoring and analysis of data and performance of the network via the subscriber's connection(s). The above cost, namely those associated with hardware, software, and human capital, enable the Exchange to measure network performance with nanosecond granularity. These same costs are also associated with time and money spent seeking to continuously improve the network performance, improving the subscriber's experience, based on monitoring and analysis activity. The Exchange routinely works to improve the performance of the network's hardware and software. The costs associated with maintaining and enhancing a state-of-the-art exchange network is a significant expense for the Exchange, and thus the Exchange believes that it is reasonable and appropriate to help offset those costs by amending fees for connectivity services. Subscribers, particularly those of 10Gb ULL connectivity, expect the Exchange to provide this level of support to connectivity so they continue to receive the performance they expect. This differentiates the Exchange from its competitors. As detailed above, the Exchange has five primary sources of revenue that it can potentially use to fund its operations: transaction fees, fees for connectivity services, membership and regulatory fees, and market data fees. Accordingly, the Exchange must cover its expenses from these five primary sources of revenue.

The Exchange's Cost Analysis estimates the annual cost to provide 10Gb ULL connectivity services will equal $14,410,793. Based on current 10Gb ULL connectivity services usage, the Exchange would generate annual revenue of approximately $14,518,284. The Exchange believes this represents a modest profit of 0.7% when compared to the cost of providing 10Gb ULL connectivity services.

The Exchange's Cost Analysis estimates the annual cost to provide Limited Service MEI Port services will equal $2,399,193. Based on November 2023 data for Limited Service MEI Port usage and counting for the proposed increase in free Limited Service MEI Ports and proposed increase in the monthly fee from $100 to $275 per port, the Exchange would generate annual revenue of approximately $2,768,700. The Exchange believes this would result in an estimated profit margin of 13.3% after calculating the cost of providing Limited Service MEI Port services. The Exchange notes that the cost to provide Limited Service MEI Ports is higher than the cost for the Exchange's affiliate, MIAX Pearl Options, to provide Full Service MEO Ports due to the substantially higher number of Limited Service MEI Ports used by Exchange Members. For example, utilizing December 2023 data, MIAX Market

[119] For purposes of calculating projected 2024 revenue for 10Gb ULL connectivity, the Exchange used revenues for the most recently completed full month.

Makers utilized 1,785 Limited Service MEI Ports compared to only 360 Full Service MEO Ports (Bulk and Single combined) allocated to MIAX Pearl Options members.

Based on the above discussion, the Exchange believes that even if the Exchange earns the above revenue or incrementally more or less, the proposed fees are fair and reasonable because they will not result in pricing that deviates from that of other exchanges or a supra-competitive profit, when comparing the total expense of the Exchange associated with providing 10Gb ULL connectivity and Limited Service MEI Port services versus the total projected revenue of the Exchange associated with network 10Gb ULL connectivity and Limited Service MEI Port services.

The Exchange also notes that this the resultant profit margin differs slightly from the profit margins set forth in similar fee filings by its affiliated markets. This is not atypical among exchanges and is due to a number of factors that differ between these four markets, including: different market models, market structures, and product offerings (equities, options, price-time, pro-rata, simple, and complex); different pricing models; different number of market participants and connectivity subscribers; different maintenance and operations costs, as described in the cost allocation methodology above; different technical architecture (*e.g.,* the number of matching engines per exchange, *i.e.,* the Exchange maintains 24 matching engines while MIAX Emerald maintains only 12 matching engines); and different maturity phase of the Exchange and its affiliated markets (*i.e.,* start-up versus growth versus more mature). All of these factors contribute to a unique and differing level of profit margin per exchange.

Further, the Exchange proposes to charge rates that are comparable to, or lower than, similar fees for similar products charged by competing exchanges. For example, for 10Gb ULL connectivity, the Exchange proposes a lower fee than the fee charged by Nasdaq for its comparable 10Gb Ultra fiber connection ($13,500 per month for the Exchange vs. $15,000 per month for Nasdaq).[120] NYSE American charges even higher fees for its comparable 10GB LX LCN connection than the Exchange's proposed fees ($13,500 for the Exchange vs. $22,000 per month for NYSE American).[121] Accordingly, the Exchange believes that comparable and competitive pricing are key factors in determining whether a proposed fee meets the requirements of the Act, regardless of whether that same fee across the Exchange's affiliated markets leads to slightly different profit margins due to factors outside of the Exchange's control (*i.e.,* more subscribers to 10Gb ULL connectivity on the Exchange than its affiliated markets or vice versa).

* * * * *

The Exchange has operated at a cumulative net annual loss since it launched operations in 2012.[122] This is due to a number of factors, one of which is choosing to forgo revenue by offering certain products, such as low latency connectivity, at lower rates than other options exchanges to attract order flow and encourage market participants to experience the high determinism, low latency, and resiliency of the Exchange's trading systems. The Exchange does not believe that it should now be penalized for seeking to raise its fees as it now needs to upgrade its technology and absorb increased costs. Therefore, the Exchange believes the proposed fees are reasonable because they are based on both relative costs to the Exchange to provide dedicated 10Gb ULL connectivity and Limited Service MEI Ports, the extent to which the product drives the Exchange's overall costs and the relative value of the product, as well as the Exchange's objective to make access to its Systems broadly available to market participants. The Exchange also believes the proposed fees are reasonable because they are designed to generate annual revenue to recoup the Exchange's costs of providing dedicated 10Gb ULL connectivity and Limited Service MEI Ports.

The Exchange notes that its revenue estimate is based on projections and will only be realized to the extent customer activity produces the revenue estimated. As a competitor in the hyper-competitive exchange environment, and an exchange focused on driving competition, the Exchange does not yet know whether such projections will be realized. For instance, in order to generate the revenue expected from 10Gb ULL connectivity and Limited Service MEI Ports, the Exchange will have to be successful in retaining existing clients that wish to utilize 10Gb ULL connectivity and Limited Service MEI Ports and/or obtaining new clients that will purchase such access. To the extent the Exchange is successful in encouraging new clients to utilize 10Gb ULL connectivity and Limited Service MEI Ports, the Exchange does not believe it should be penalized for such success. To the extent the Exchange has mispriced and experiences a net loss in connectivity clients or in transaction activity, the Exchange could experience a net reduction in revenue. While the Exchange is supportive of transparency around costs and potential margins (applied across all exchanges), as well as periodic review of revenues and applicable costs (as discussed below), the Exchange does not believe that these estimates should form the sole basis of whether or not a proposed fee is reasonable or can be adopted. Instead, the Exchange believes that the information should be used solely to confirm that an Exchange is not earning—or seeking to earn—supra-competitive profits. The Exchange believes the Cost Analysis and related projections in this filing demonstrate this fact.

The Exchange is owned by a holding company that is the parent company of four exchange markets and, therefore, the Exchange and its affiliated markets must allocate shared costs across all of those markets accordingly, pursuant to the above-described allocation methodology. In contrast, the Investors Exchange LLC (''IEX'') and MEMX, which are currently each operating only one exchange, in their recent non-transaction fee filings allocate the entire amount of that same cost to a single exchange. This can result in lower profit margins for the non-transaction fees proposed by IEX and MEMX because the single allocated cost does not experience the efficiencies and synergies that result from sharing costs across multiple exchanges. The Exchange and its affiliated markets often share a single cost, which results in cost efficiencies that can cause a broader gap between the allocated cost amount and projected revenue, even though the fee levels being proposed are lower or competitive with competing markets (as described above). To the extent that the application of a cost-based standard results in Commission Staff making determinations as to the appropriateness of certain profit margins, the Exchange believes that Commission Staff should also consider whether the proposed fee level is comparable to, or competitive with, the same fee charged by

[120] *See* NASDAQ Pricing Schedule, Options 7, Section 3, Ports and Other Services *and* NASDAQ Rules, General 8: Connectivity, Section 1. Co-Location Services.

[121] *See* NYSE American Options Fee Schedule, Section V.A. Port Fees *and* Section V.B. Co-Location Fees.

[122] The Exchange has incurred a cumulative loss of $71 million since its inception in 2012 through full year 2022. *See* Exchange's Form 1/A, Application for Registration or Exemption from Registration as a National Securities Exchange, filed June 26, 2023, *available at https://www.sec.gov/Archives/edgar/vprr/2300/23007741.pdf.*

competing exchanges and how different cost allocation methodologies (such as across multiple markets) may result in different profit margins for comparable fee levels. Further, if Commission Staff is making determinations as to appropriate profit margins in their approval of exchange fees, the Exchange believes that the Commission should be clear to all market participants as to what they have determined is an appropriate profit margin and should apply such determinations consistently and, in the case of certain legacy exchanges, retroactively, if such standards are to avoid having a discriminatory effect.

Further, as is reflected in the proposal, the Exchange continuously and aggressively works to control its costs as a matter of good business practice. A potential profit margin should not be evaluated solely on its size; that assessment should also consider cost management and whether the ultimate fee reflects the value of the services provided. For example, a profit margin on one exchange should not be deemed excessive where that exchange has been successful in controlling its costs, but not excessive on another exchange where that exchange is charging comparable fees but has a lower profit margin due to higher costs. Doing so could have the perverse effect of not incentivizing cost control where higher costs alone could be used to justify fees increases.

The Proposed Pricing Is Not Unfairly Discriminatory and Provides for the Equitable Allocation of Fees, Dues, and Other Charges

The Exchange believes that the proposed fees are reasonable, fair, equitable, and not unfairly discriminatory because they are designed to align fees with services provided and will apply equally to all subscribers.

10Gb ULL Connectivity

The Exchange believes that the proposed fees are equitably allocated among users of the network connectivity and port alternatives, as the users of 10Gb ULL connections consume substantially more bandwidth and network resources than users of 1Gb ULL connection. Specifically, the Exchange notes that 10Gb ULL connection users account for more than 99% of message traffic over the network, driving other costs that are linked to capacity utilization, as described above, while the users of the 1Gb ULL connections account for less than 1% of message traffic over the network. In the Exchange's experience, users of the 1Gb connections do not have the same business needs for the high-performance network as 10Gb ULL users.

The Exchange's high-performance network and supporting infrastructure (including employee support), provides unparalleled system throughput with the network ability to support access to several distinct options markets. To achieve a consistent, premium network performance, the Exchange must build out and maintain a network that has the capacity to handle the message rate requirements of its most heavy network consumers. These billions of messages per day consume the Exchange's resources and significantly contribute to the overall network connectivity expense for storage and network transport capabilities. The Exchange must also purchase additional storage capacity on an ongoing basis to ensure it has sufficient capacity to store these messages to satisfy its record keeping requirements under the Exchange Act.[123] Thus, as the number of messages an entity increases, certain other costs incurred by the Exchange that are correlated to, though not directly affected by, connection costs (*e.g.,* storage costs, surveillance costs, service expenses) also increase. Given this difference in network utilization rate, the Exchange believes that it is reasonable, equitable, and not unfairly discriminatory that the 10Gb ULL users pay for the vast majority of the shared network resources from which all market participants' benefit.

Limited Service MEI Ports

The proposed changes to the monthly fee for Limited Service MEI Ports is not unfairly discriminatory because it would apply to all Market Makers equally. All Market Makers would now be eligible to receive four (4) free Limited Service MEI Ports and those that elect to purchase more would be subject to the same monthly rate regardless of the number of additional Limited Service MEI Ports they purchase. Certain market participants choose to purchase additional Limited Service MEI Ports based on their own particular trading/quoting strategies and feel they need a certain number of connections to the Exchange to execute on those strategies. Other market participants may continue to choose to only utilize the free Limited Service MEI Ports to accommodate their own trading or quoting strategies, or other business models. All market participants elect to receive or purchase the amount of Limited Service MEI Ports they require based on their own business decisions and all market participants would be subject to the same fee structure and flat fee. Every market participant may receive up to four (4) free Limited Service MEI Ports and those that choose to purchase additional Limited Service MEI Ports may elect to do so based on their own business decisions and would continue to be subject to the same flat fee. The Exchange notes that it filed to amend this fee in 2016 and that filing contained the same fee structure, *i.e.,* a certain number of free Limited Service MEI Ports coupled with a flat fee for additional Limited Service MEI Ports.[124] At that time, the Commission did not find the structure to be unfairly discriminatory by virtue of that proposal surviving the 60-day suspension period. Therefore, the proposed changes to the fees for Limited Service MEI Ports is not unfairly discriminatory because it would continue to apply to all market participants equally and provides a fee structure that includes four free Limited Service MEI Ports for one monthly rate that was previously in place and filed with the Commission.

The Exchange believes that its proposed fee for Limited Service MEI Ports is reasonable, fair and equitable, and not unfairly discriminatory because it is designed to align fees with services provided, will apply equally to all Members that are assigned Limited Service MEI Ports (either directly or through a Service Bureau), and will minimize barriers to entry by now providing all Members with four, instead of the prior two, free Limited Service MEI Ports.[125] As a result of the proposed fee structure, a significant majority of Members will not be subject to any fee, and only six Members will potentially be subject to a fee for Limited Service MEI Ports in excess of four per month, based on current usage. In contrast, as described above, other exchanges generally charge in excess of $450 per port without providing any free ports.[126] Even for Members that choose to maintain more than four Limited Service MEI Ports, the Exchange believes that the cost-based

[123] 17 CFR 240.17a–1 (recordkeeping rule for national securities exchanges, national securities associations, registered clearing agencies and the Municipal Securities Rulemaking Board).

[124] *See* Securities Exchange Act Release No. 79666 (December 22, 2016), 81 FR 96133 (December 29, 2016) (SR–MIAX–2016–47).

[125] The following rationale to support providing a certain number of Limited Service MEI Ports for free prior to applying a fee is similar to that used by the Investors Exchange LLC (''IEX'') in 2020 proposal to do the same as proposed herein. *See* Securities Exchange Act Release No. 86626 (August 9, 2019), 84 FR 41793 (August 15, 2019) (SR–IEX–2019–07).

[126] *See supra* notes a–j above.

fee proposed herein is low enough that it will not operate to restrain any Member's ability to maintain the number of Limited Service MEI Ports that it determines are consistent with its business objectives. The small number of Members projected to be subject to the highest fees will still pay considerably less than competing exchanges charge.[127] Further, the number of assigned Limited Service MEI Ports will continue to be based on decisions by each Member, including the ability to reduce fees by discontinuing unused Limited Service MEI Ports.

The Exchange believes that providing four free Limited Service MEI Ports is fair and equitable, and not unfairly discriminatory because it will enable all Members (and more Members than when the Exchange previously provided two free Limited Service MEI Ports) to access the Exchange free of charge, thereby encouraging order flow and liquidity from a diverse set of market participants, facilitating price discovery and the interaction of orders. The Exchange believes that four Limited Service MEI Ports is an appropriate number to provide for free because it aligns with the number of such ports currently maintained by a substantial majority of Members. Based on a review of Limited Service MEI Port usage, 39 of 45 connected Members are not projected to be subject to any Limited Service MEI Port fees under the proposed fee.

The Exchange assessed whether the fee may impact different types or sizes of Members differently. As a threshold matter, the fee does not by design apply differently to different types or sizes of Members. Nonetheless, the Exchange assessed whether there would be any differences in the amount of the projected fee that correlate to the type and/or size of different Members. This assessment revealed that the number of assigned Limited Service MEI Ports, and thus projected fees, correlates closely to a Member's inbound message volume to the Exchange. Specifically, as inbound message volume increases per Member, the number of requested and assigned Limited Service MEI Ports increases. The following table presents data from December 2023 evidencing the correlation between a Member's inbound message volume and the number of Limited Service MEI Port assigned to the Member as of December 31, 2023.

Number of ports	Average daily message traffic	Total message traffic	Overall percentage of all message traffic for month
1–4	3,847,597,203	76,951,944,054	22.99
5 or more	12,891,271,595	257,825,431,896	77.01

Members with relatively higher inbound message volume are projected to pay higher fees because they have requested more Limited Service MEI Ports. For example, the six Members that subscribe to five or more Limited Service MEI Ports and are subject to the proposed monthly fee on average account for 77.01% of December 2023 inbound messages over Limited Service MEI Ports. The 39 Members that, based on their December 2023 Limited Service MEI Port usage are not projected to be subject to any Limited Service MEI Port fees, on average account for only 22.99% of December 2023 inbound messages over Limited Service MEI Port. This includes one Member that previously paid a fee that was not charged in October 2023 under the proposed fee structure.

The Exchange believes that the variance between projected fees and Limited Service MEI Ports usage is not unfairly discriminatory because it is based on objective differences in Limited Service MEI Port usage among different Members. The Exchange notes that the distribution of total inbound message volume is concentrated in relatively few Members, which consume a much larger proportionate share of the Exchange's resources (compared to the majority of Members that send substantially fewer inbound order messages). This distribution of inbound message volume requires the Exchange to maintain sufficient Limited Service MEI Port capacity to accommodate the higher existing and anticipated message volume of higher volume Members. Thus, the Exchange's incremental aggregate costs for all Limited Service MEI Ports are disproportionately related to volume from the highest inbound message volume Members. For these reasons, the Exchange believes it is not unfairly discriminatory for the Members with the highest inbound message volume to pay a higher share of the total Limited Service MEI Ports fees.

While Limited Service MEI Port usage is concentrated in a few relatively larger Members, the number of such ports requested is not based on the size or type of Member but rather correlates to a Member's inbound message volume to the Exchange. Further, Members with relatively higher inbound message volume also request (and are assigned) more Limited Service MEI Ports than other Members, which in turn means they account for a disproportionate share of the Exchange's aggregate costs for providing Limited Service MEI Ports.[128] Therefore, the Exchange believes it is not unfairly discriminatory for the Members with higher inbound message volume to pay a modestly higher proportionate share of the Limited Service MEI Port fees.

To achieve consistent, premium network performance, the Exchange must build and maintain a network that has the capacity to handle the message rate requirements of its heaviest network consumers during anticipated peak market conditions. The resultant need to support billions of messages per day consume the Exchange's resources and significantly contribute to the overall network connectivity expense for storage and network transport capabilities. This need also requires the Exchange to purchase additional storage capacity on an ongoing basis to ensure it has sufficient capacity to store these messages as part of it surveillance program and to satisfy its record keeping requirements under the

[127] Assuming a Member selects five Limited Service MEI Ports based on their business needs, that Member on MIAX would be charged only for the fifth Limited Service MEI Port and pay only the $275 monthly fee, as the first four Limited Service Ports would be free. Meanwhile, a Member that purchases five ports on NYSE Arca Options would pay $450 per port per month, resulting in a total charge of $2,250 per month. On Cboe BZX Options, that same member would pay $750 per port per month, resulting in a total charge of $3,750 per months for five ports. *See* NYSE Arca Options Fees and Charges, dated November 2023, *available at https://www.nyse.com/publicdocs/nyse/markets/arca-options/NYSE_Arca_Options_Fee_Schedule.pdf* and Cboe BZX Options Fee Schedule *available at https://www.cboe.com/us/options/membership/fee_schedule/.*

[128] *See* Securities Exchange Act Release No. 86626 (August 9, 2019), 84 FR 41793 (August 15, 2019) (SR–IEX–2019–07) (justifying providing 5 ports for free and charging a fee for every port purchased in excess of 5 ports based on the higher message traffic of subscribers with increased number of ports).

Exchange Act.[129] Thus, as the number of connections per Market Maker increases, other costs incurred by the Exchange also increase, *e.g.,* storage costs, surveillance costs, service expenses.

Accordingly, the Exchange believes that the fee will be applied consistently with its specific purpose—to partially recover the Exchange's aggregate costs, encourage the efficient use of Limited Service MEI Ports, and align fees with Members' Limited Service MEI Port and system usage.

The Exchange further believes that the proposed fees are reasonable, fair and equitable, and non-discriminatory because they will apply to all Members in the same manner and are not targeted at a specific type or category of market participant engaged in any particular trading strategy. All Members will receive four free Limited Service MEI Ports and pay the same proposed fee per Limited Service MEI Ports for each additional Limited Service MEI Port. Each Limited Service MEI Port is identical, providing connectivity to the Exchange on identical terms. While the proposed fee will result in a different effective ''per unit'' rate for different Members after factoring in the four free Limited Service MEI Ports, the Exchange does not believe that this difference is material given the overall low proposed fee per Limited Service MEI Port. Because the first four Limited Service MEI Ports are free of charge, each entity will have a ''per unit'' rate of less than the proposed fee. Further, the fee is not connected to volume based tiers. All Members will be subject to the same fee schedule, regardless of the volume sent to or executed on the Exchange. The fee also does not depend on any distinctions between Members, customers, broker-dealers, or any other entity. The fee will be assessed solely based on the number of Limited Service MEI Ports an entity selects and not on any other distinction applied by the Exchange. While entities that send relatively more inbound messages to the Exchange may select more Limited Service MEI Ports, thereby resulting in higher fees, that distinction is based on decisions made by each Member and the extent and nature of the Member's business on the Exchange rather than application of the fee by the Exchange. Members can determine how many Limited Service MEI Ports they need to implement their trading strategies effectively. The Exchange proposes to offer additional Limited Service MEI Ports at a low fee to enable all Members to purchase as many Limited Service MEI Ports as their business needs dictate in order to optimize throughput and manage latency across the Exchange.

Notwithstanding that Members with the highest number of Limited Service MEI Ports will pay a greater percentage of the total projected fees than is represented by their Limited Service MEI Port usage, the Exchange does not believe that the proposed fee is unfairly discriminatory. It is not possible to fully synchronize the Exchange's objective to provide four free Limited Service MEI Ports to all Members, thereby minimizing barriers to entry and incentivizing liquidity on the Exchange, with an approach that exactly aligns the projected per Member fee with each Member's number of requested Limited Service MEI Ports. As proposed, the Exchange is providing a reasonable increased number of Limited Service MEI Ports to each Member without charge. In fact, the Exchange proposes to provide more Limited Service MEI Ports for free by increasing the number of available Limited Service MEI Ports that are provided for free from two to four. Any variance between projected fees and Limited Service MEI Port usage is attributable to objective differences among Members in terms of the number of Limited Service MEI Ports they determine are appropriate based on their trading on the Exchange. Further, the Exchange believes that the low amount of the proposed fee (which in the aggregate is projected to only partially recover the Exchange's directly-related costs as described herein) mitigates any disparate impact.

Further, the fee will help to encourage Limited Service MEI Port usage in a way that aligns with the Exchange's regulatory obligations. As a national securities exchange, the Exchange is subject to Regulation Systems Compliance and Integrity (''Reg SCI'').[130] Reg SCI Rule 1001(a) requires that the Exchange establish, maintain, and enforce written policies and procedures reasonably designed to ensure (among other things) that its Reg SCI systems have levels of capacity adequate to maintain the Exchange's operational capability and promote the maintenance of fair and orderly markets.[131] By encouraging Members to be efficient with their Limited Service MEI Ports usage, the proposed fee will support the Exchange's Reg SCI obligations in this regard by ensuring that unused Limited Service MEI Ports are available to be allocated based on individual Members needs and as the Exchange's overall order and trade volumes increase. Additionally, because the Exchange will continue not to charge connectivity testing and certification fees to its Disaster Recovery Facility or where the Exchange requires testing and certification, the proposed fee structure will further support the Exchange's Reg SCI compliance by reducing the potential impact of a disruption should the Exchange be required to switch to its Disaster Recovery Facility and encouraging Members to engage in any necessary system testing without incurring any port fee costs.[132]

Finally, the Exchange believes that the proposed fee is consistent with Section 11A of the Exchange Act in that it is designed to facilitate the economically efficient execution of securities transactions, fair competition among brokers and dealers, exchange markets and markets other than exchange markets, and the practicability of brokers executing investors' orders in the best market. Specifically, the proposed low, cost-based fee will enable a broad range of the Exchange Members to continue to connect to the Exchange, thereby facilitating the economically efficient execution of securities transactions on the Exchange, fair competition between and among such Members, and the practicability of Members that are brokers executing investors' orders on the Exchange when it is the best market.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Intra-Market Competition

The Exchange believes the proposed fees will not result in any burden on intra-market competition that is not necessary or appropriate in furtherance of the purposes of the Act because the proposed fees will allow the Exchange to recoup some of its costs in providing 10Gb ULL connectivity and Limited Service MEI Ports at below market rates to market participants since the Exchange launched operations. As described above, the Exchange has

[129] 17 CFR 240.17a–1 (recordkeeping rule for national securities exchanges, national securities associations, registered clearing agencies and the Municipal Securities Rulemaking Board).

[130] 17 CFR 242.1000–1007.

[131] 17 CFR 242.1001(a).

[132] By comparison, some other exchanges charge less to connect to their disaster recovery facilities, but still charge an amount that could both recoup costs and potentially be a source of profits. *See, e.g.,* Nasdaq Stock Market LLC Equity 7, Section 115 (Ports and other Services).

operated at a cumulative net annual loss since it launched operations in 2012 [133] due to providing a low-cost alternative to attract order flow and encourage market participants to experience the high determinism and resiliency of the Exchange's trading Systems. To do so, the Exchange chose to waive the fees for some non-transaction related services and Exchange products or provide them at a very lower fee, which was not profitable to the Exchange. This resulted in the Exchange forgoing revenue it could have generated from assessing any fees or higher fees. The Exchange could have sought to charge higher fees at the outset, but that could have served to discourage participation on the Exchange. Instead, the Exchange chose to provide a low-cost exchange alternative to the options industry, which resulted in lower initial revenues. Examples of this are 10Gb ULL connectivity and Limited Service MEI Ports, for which the Exchange only now seeks to adopt fees at a level similar to or lower than those of other options exchanges.

Further, the Exchange does not believe that the proposed fee increase for the 10Gb ULL connection change would place certain market participants at the Exchange at a relative disadvantage compared to other market participants or affect the ability of such market participants to compete. As is the case with the current proposed flat fee, the proposed fee would apply uniformly to all market participants regardless of the number of connections they choose to purchase. The proposed fee does not favor certain categories of market participants in a manner that would impose an undue burden on competition.

The Exchange does not believe that the proposed rule change would place certain market participants at the Exchange at a relative disadvantage compared to other market participants or affect the ability of such market participants to compete. In particular, Exchange personnel has been informally discussing potential fees for connectivity services with a diverse group of market participants that are connected to the Exchange (including large and small firms, firms with large connectivity service footprints and small connectivity service footprints, as well as extranets and service bureaus) for several months leading up to that time. The Exchange does not believe the proposed fees for connectivity services would negatively impact the ability of Members, non-Members (extranets or service bureaus), third-parties that purchase the Exchange's connectivity and resell it, and customers of those resellers to compete with other market participants or that they are placed at a disadvantage.

The Exchange does anticipate, however, that some market participants may reduce or discontinue use of connectivity services provided directly by the Exchange in response to the proposed fees. In fact, as mentioned above, one MIAX Pearl Options Market Maker terminated their MIAX Pearl Options membership on January 1, 2023 as a direct result of the similar proposed fee changes by MIAX Pearl Options.[134] The Exchange does not believe that the proposed fees for connectivity services place certain market participants at a relative disadvantage to other market participants because the proposed connectivity pricing is associated with relative usage of the Exchange by each market participant and does not impose a barrier to entry to smaller participants. The Exchange believes its proposed pricing is reasonable and, when coupled with the availability of third-party providers that also offer connectivity solutions, that participation on the Exchange is affordable for all market participants, including smaller trading firms. As described above, the connectivity services purchased by market participants typically increase based on their additional message traffic and/or the complexity of their operations. The market participants that utilize more connectivity services typically utilize the most bandwidth, and those are the participants that consume the most resources from the network. Accordingly, the proposed fees for connectivity services do not favor certain categories of market participants in a manner that would impose a burden on competition; rather, the allocation of the proposed connectivity fees reflects the network resources consumed by the various size of market participants and the costs to the Exchange of providing such connectivity services.

Lastly, the Exchange does not believe its proposed changes to the monthly rate for Limited Service MEI Ports will place certain market participants at a relative disadvantage to other market participants. All market participants would be eligible to receive four (4) free Limited Service MEI Ports and those that elect to purchase more would be subject to the same flat fee regardless of the number of additional Limited Service MEI Ports they purchase. All firms purchase the amount of Limited Service MEI Ports they require based on their own business decisions and similarly situated firms are subject to the same fees.

Inter-Market Competition

The Exchange also does not believe that the proposed rule change and price increase will result in any burden on inter-market competition that is not necessary or appropriate in furtherance of the purposes of the Act. As this is a fee increase, arguably if set too high, this fee would make it easier for other exchanges to compete with the Exchange. Only if this were a substantial fee decrease could this be considered a form of predatory pricing. In contrast, the Exchange believes that, without this fee increase, we are potentially at a competitive disadvantage to certain other exchanges that have in place higher fees for similar services. As we have noted, the Exchange believes that connectivity fees can be used to foster more competitive transaction pricing and additional infrastructure investment and there are other options markets of which market participants may connect to trade options at higher rates than the Exchange's. Accordingly, the Exchange does not believe its proposed fee changes impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange also believes that the proposed fees for 10Gb connectivity are appropriate and warranted and would not impose any burden on competition. This is a technology driven change designed to meet customer needs. The proposed fees would assist the Exchange in recovering costs related to providing dedicated 10Gb connectivity to the Exchange while enabling it to continue to meet current and anticipated demands for connectivity by its Members and other market participants. Separating its 10Gb network from MIAX Pearl Options enables the Exchange to better compete with other exchanges by ensuring it can continue to provide adequate connectivity to existing and new

[133] *See supra* note 122.

[134] The Exchange acknowledges that IEX included in its proposal to adopt market data fees after offering market data for free an analysis of what its projected revenue would be if all of its existing customers continued to subscribe versus what its projected revenue would be if a limited number of customers subscribed due to the new fees. *See* Securities Exchange Act Release No. 94630 (April 7, 2022), 87 FR 21945 (April 13, 2022) (SR–IEX–2022–02). MEMX did not include a similar analysis in either of its recent non-transaction fee proposals. *See supra* note 79. The Exchange does not believe a similar analysis would be useful here because it is amending existing fees, not proposing to charge a new fee where existing subscribers may terminate connections because they are no longer enjoying the service at no cost.

Members, which may increase in ability to compete for order flow and deepen its liquidity pool, improving the overall quality of its market. The proposed rates for 10Gb ULL connectivity are structured to enable the Exchange to bifurcate its 10Gb ULL network shared with MIAX Pearl Options so that it can continue to meet current and anticipated connectivity demands of all market participants.

Similarly, and also in connection with a technology change, Cboe amended its access and connectivity fees, including port fees.[135] Specifically, Cboe adopted certain logical ports to allow for the delivery and/or receipt of trading messages—*i.e.,* orders, accepts, cancels, transactions, etc. Cboe established tiered pricing for BOE and FIX logical ports,[136] tiered pricing for BOE Bulk ports, and flat prices for DROP, Purge Ports, GRP Ports and Multicast PITCH/Top Spin Server Ports. Cboe argued in its fee proposal that the proposed pricing more closely aligned its access fees to those of its affiliated exchanges as the affiliated exchanges offer substantially similar connectivity and functionality and are on the same platform that Cboe migrated to.[137] Cboe justified its proposal by stating that, ''. . . the Exchange believes substitutable products and services are in fact available to market participants, including, among other things, other options exchanges a market participant may connect to in lieu of the Exchange, indirect connectivity to the Exchange via a third-party reseller of connectivity and/or trading of any options product, including proprietary products, in the Over-the-Counter (OTC) markets.'' [138] The Exchange concurs with the following statement by CBOE,

> The rule structure for options exchanges are also fundamentally different from those of equities exchanges. In particular, options market participants are not forced to connect to (and purchase market data from) all options exchanges. For example, there are many order types that are available in the equities markets that are not utilized in the options markets, which relate to mid-point pricing and pegged pricing which require connection to the SIPs and each of the equities exchanges in order to properly execute those orders in compliance with best execution obligations. Additionally, in the options markets, the linkage routing and trade through protection are handled by the exchanges, not by the individual members. Thus not connecting to an options exchange or disconnecting from an options exchange does not potentially subject a broker-dealer to violate order protection requirements. Gone are the days when the retail brokerage firms (such as Fidelity, Schwab, and eTrade) were members of the options exchanges—they are not members of the Exchange or its affiliates, they do not purchase connectivity to the Exchange, and they do not purchase market data from the Exchange. Accordingly, not only is there not an actual regulatory requirement to connect to every options exchange, the Exchange believes there is also no ''de facto'' or practical requirement as well, as further evidenced by the recent significant reduction in the number of broker-dealers that are members of all options exchanges.[139]

The Cboe proposal also referenced the National Market System Plan Governing the Consolidated Audit Trail (''CAT NMS Plan''),[140] wherein the Commission discussed the existence of competition in the marketplace generally, and particularly for exchanges with unique business models. The Commission acknowledged that, even if an exchange were to exit the marketplace due to its proposed fee-related change, it would not significantly impact competition in the market for exchange trading services because these markets are served by multiple competitors.[141] Further, the Commission explicitly stated that ''[c]onsequently, demand for these services in the event of the exit of a competitor is likely to be swiftly met by existing competitors.'' [142] Finally, the Commission recognized that while some exchanges may have a unique business model that is not currently offered by competitors, a competitor could create similar business models if demand were adequate, and if a competitor did not do so, the Commission believes it would be likely that new entrants would do so if the exchange with that unique business model was otherwise profitable.[143]

Cboe also filed to establish a monthly fee for Certification Logical Ports of $250 per Certification Logical Port.[144] Cboe reasoned that purchasing additional Certification Logical Ports, beyond the one Certification Logical Port per logical port type offered in the production environment free of charge, is voluntary and not required in order to participate in the production environment, including live production trading on the Exchange.[145]

In its statutory basis, Cboe justified the new port fee by stating that it believed the Certification Logical Port fee were reasonable because while such ports were no longer completely free, TPHs and non-TPHs would continue to be entitled to receive free of charge one Certification Logical Port for each type of logical port that is currently offered in the production environment.[146] Cboe noted that other exchanges assess similar fees and cited to NASDAQ LLC and MIAX.[147] Cboe also noted that the decision to purchase additional ports is optional and no market participant is required or under any regulatory obligation to purchase excess Certification Logical Ports in order to access the Exchange's certification environment.[148] Finally, similar proposals to adopt a Certification Logical Port monthly fee were filed by Cboe BYX Exchange, Inc.,[149] BZX,[150] and Cboe EDGA Exchange, Inc.[151]

The Cboe fee proposals described herein were filed subsequent to the D.C. Circuit decision in *Susquehanna Int'l Grp., LLC* v. *SEC,* 866 F.3d 442 (D.C. Cir. 2017), meaning that such fee filings were subject to the same (and current) standard for SEC review and approval as this proposal. In summary, the Exchange requests the Commission apply the same standard of review to this proposal which was applied to the various Cboe and Cboe affiliated markets' filings with respect to non-transaction fees. If the Commission were to apply a different standard of review

[151] *See* Securities Exchange Act Release No. 94517 (March 25, 2002), 87 FR 18848 (March 31, 2022) (SR–CboeEDGA–2022–004).

to this proposal than it applied to other exchange fee filings it would create a burden on competition such that it would impair the Exchange's ability to make necessary technology driven changes, such as bifurcating its 10Gb ULL network, because it would be unable to monetize or recoup costs related to that change and compete with larger, non-legacy exchanges.

* * * * *

In conclusion, as discussed thoroughly above, the Exchange regrettably believes that the application of the Revised Review Process and Staff Guidance has adversely affected inter-market competition among legacy and non-legacy exchanges by impeding the ability of non-legacy exchanges to adopt or increase fees for their market data and access services (including connectivity and port products and services) that are on parity or commensurate with fee levels previously established by legacy exchanges. Since the adoption of the Revised Review Process and Staff Guidance, and even more so recently, it has become extraordinarily difficult to adopt or increase fees to generate revenue necessary to invest in systems, provide innovative trading products and solutions, and improve competitive standing to the benefit of non-legacy exchanges' market participants. Although the Staff Guidance served an important policy goal of improving disclosures and requiring exchanges to justify that their market data and access fee proposals are fair and reasonable, it has also negatively impacted non-legacy exchanges in particular in their efforts to adopt or increase fees that would enable them to more fairly compete with legacy exchanges, despite providing enhanced disclosures and rationale under both competitive and cost basis approaches provided for by the Revised Review Process and Staff Guidance to support their proposed fee changes.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange received one comment letter on the Initial Proposal, one comment letter on the Second Proposal, one comment letter on the Third Proposal, one comment letter on the Fourth Proposal, one comment letter on the Fifth Proposal, one comment letter on the Sixth Proposal, and one comment letter on the Seventh Proposal all from the same commenter.[152] In their letters, the commenters from SIG seek to incorporate comments submitted on previous Exchange proposals to which the Exchange has previously responded. The Exchange also received comment letters from a separate commenter on the Sixth and Seventh Proposals.[153] The Exchange believes issues raised by each commenters are not germane to this proposal in particular, but rather raise larger issues with the current environment surrounding exchange non-transaction fee proposals that should be addressed by the Commission through rule making, or Congress, more holistically and not through an individual exchange fee filings. Among other things, the commenters are requesting additional data and information that is both opaque and a moving target and would constitute a level of disclosure materially over and above that provided by any competitor exchanges.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act,[154] and Rule 19b–4(f)(2) [155] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–MIAX–2024–06 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–MIAX–2024–06. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–MIAX–2024–06 and should be submitted on or before March 1, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[156]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–429, OMB Control No. 3235–0480]

Proposed Collection; Comment Request; Extension: Rule 9b–1

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (''PRA'') (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') is soliciting comments on the existing collection of information provided for in Rule 9b–1, Options Disclosure Document (17 CFR 240.9b–1), under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*). The Commission plans to submit this existing collection of information to the Office of Management and Budget (''OMB'') for extension and approval.

Rule 9b–1 (17 CFR 240.9b–1) sets forth the categories of information required to be disclosed in an options disclosure document (''ODD'') and requires the options markets to file an ODD with the Commission 60 days prior to the date it is distributed to investors. In addition, Rule 9b–1 provides that the ODD must be amended if the information in the document becomes materially inaccurate or incomplete and that amendments must be filed with the Commission 30 days prior to the distribution to customers. Finally, Rule 9b–1 requires a broker-dealer to furnish to each customer an ODD and any amendments prior to accepting an order to purchase or sell an option on behalf of that customer or when approving a customer's account for options trading.

There are 17 options markets [1] that must comply with Rule 9b–1. These respondents work together to prepare a single ODD covering options traded on each market, as well as amendments to the ODD. These respondents file approximately 3 amendments per year. The staff calculates that the preparation and filing of amendments should take no more than eight hours per options market. Thus, the total time burden for options markets per year is approximately 408 hours (17 options markets × 8 hours per amendment × 3 amendments). The estimated cost for an in-house attorney is $483 per hour,[2] resulting in a total internal cost of compliance for these respondents of approximately $197,064 per year (408 hours at $483 per hour).

In addition, approximately 955 broker-dealers [3] must comply with Rule 9b–1. Each of these respondents will process an average of 3 new customers for options each week and, therefore, will have to furnish approximately 156 ODDs per year. The postal mailing or electronic delivery of the ODD takes respondents no more than 30 seconds to complete for an annual time burden for each of these respondents of approximately 78 minutes or 1.3 hours. Thus, the total time burden per year for broker-dealers is approximately 1,242 hours (955 broker-dealers × 1.3 hours). The estimated cost for a general clerk of a broker-dealer is $81 per hour,[4] resulting in a total internal cost of compliance for these respondents of approximately $100,602 per year (1,242 hours at $81 per hour).

The total time burden for all respondents under this rule (both options markets and broker-dealers) is approximately 1,650 hours per year (408 hours for options markets + 1,242 hours for broker-dealers), and the total internal cost of compliance is approximately $297,666 per year ($197,064 + $100,602).

Written comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's estimates of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted by April 9, 2024.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

Please direct your written comments to: David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549, or send an email to: *PRA_Mailbox@sec.gov.*

Dated: February 6, 2024.

Sherry R. Haywood

Assistant Secretary.

[FR Doc. 2024–02716 Filed 2–8–24; 8:45 am]

BILLING CODE 8011–01–P

[1] The seventeen options markets are as follows: BOX Exchange LLC, Cboe BZX Exchange, Inc., Cboe C2 Exchange, Inc., Cboe EDGX Exchange, Inc., Cboe Exchange, Inc., MEMX, LLC, Miami International Securities Exchange LLC, MIAX Emerald, LLC, MIAX PEARL, LLC, Nasdaq BX, Inc., Nasdaq GEMX, LLC, Nasdaq ISE, LLC, Nasdaq MRX, LLC, Nasdaq PHLX LLC, the Nasdaq Options Market (NOM), NYSE Arca, Inc., and NYSE American LLC.

[2] SIFMA did its last annual survey in 2013 and will not resume the survey process. Accordingly, the $483 figure is based on the 2013 figure ($380) adjusted by the inflation rate calculated using the Bureau of Labor Statistics' CPI Inflation Calculator. The $380 per hour figure for an Attorney is from SIFMA's *Management & Professional Earnings in the Securities Industry 2013,* modified by Commission staff to account for an 1800-hour work-year and multiplied by 5.35 to account for bonuses, firm size, employee benefits and overhead.

[3] The estimate of 955 broker-dealers required to comply with Rule 9b–1 is derived from Item 12 of the Form BD (OMB Control No. 3235–0012). This estimate may be high as it includes broker-dealers that engage in only a proprietary business, and as a result are not required to deliver an ODD, as well as those broker-dealers subject to Rule 9b–1.

[4] The $81 figure is based on the 2013 figure ($57) adjusted for inflation. *See supra* note 2. The $57 per hour figure for a General Clerk is from SIFMA's *Office Salaries in the Securities Industry 2013,* modified by Commission staff to account for an 1800-hour work-year and multiplied by 2.93 to account for bonuses, firm size, employee benefits and overhead. The staff believes that the ODD would be mailed or electronically delivered to customers by a general clerk of the broker-dealer or some other equivalent position.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99475; File No. SR–EMERALD–2024–03]

Self-Regulatory Organizations; MIAX Emerald, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Fee Schedule To Modify Certain Connectivity and Port Fees

February 5, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 25, 2024, MIAX Emerald, LLC (''MIAX Emerald'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the MIAX Emerald Options Exchange Fee Schedule (the ''Fee Schedule'') to

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

amend certain connectivity and port fees.

The text of the proposed rule change is available on the Exchange's website at *https://www.miaxglobal.com/markets/us-options/emerald-options/rule-filings,* at MIAX Emerald's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Fee Schedule as follows: (1) increase the fees for a 10 gigabit (''Gb'') ultra-low latency (''ULL'') fiber connection for Members [3] and non-Members; and (2) amend the monthly port fee for additional Limited Service MIAX Emerald Express Interface (''MEI'') Ports [4] available to Market Makers.[5] The Exchange last increased the fees for both 10Gb ULL fiber connections and Limited Service MEI Ports beginning with a series of filings on October 1, 2020 (with the final filing made on March 24, 2021).[6] Prior to that fee change, the Exchange provided Limited Service MEI Ports for $50 per port, after the first two Limited Service MEI Ports that are provided free of charge, and the Exchange incurred all the costs associated to provide those first two Limited Service MEI Ports since it commenced operations in March 2019. The Exchange then increased the fee by $50 to a modest $100 fee per Limited Service MEI Port and increased the fee for 10Gb ULL fiber connections from $6,000 to $10,000 per month.

Also, in that fee change, the Exchange adopted fees for providing five different types of ports for the first time. These ports were FIX Ports, MEI Ports, Clearing Trade Drop Ports, FIX Drop Copy Ports, and Purge Ports.[7] Again, the Exchange absorbed all costs associated with providing these ports since its launch in March 2019. As explained in that filing, expenditures, as well as research and development (''R&D'') in numerous areas resulted in a material increase in expense to the Exchange and were the primary drivers for that proposed fee change. In that filing, the Exchange allocated a total of $9.3 million in expenses to providing 10Gb ULL fiber connectivity, additional Limited Service MEI Ports, FIX Ports, MEI Ports, Clearing Trade Drop Ports, FIX Drop Copy Ports, and Purge Ports.[8]

Since the time of the 2021 increase discussed above, the Exchange experienced ongoing increases in expenses, particularly internal expenses.[9] As discussed more fully below, the Exchange recently calculated increased annual aggregate costs of $15,469,330 for providing 10Gb ULL connectivity and $2,506,232 for providing Limited Service MEI Ports.

Much of the cost relates to monitoring and analysis of data and performance of the network via the subscriber's connection with nanosecond granularity, and continuous improvements in network performance with the goal of improving the subscriber's experience. The costs associated with maintaining and enhancing a state-of-the-art network is a significant expense for the Exchange, and thus the Exchange believes that it is reasonable and appropriate to help offset those increased costs by amending fees for connectivity services. Subscribers expect the Exchange to provide this level of support so they continue to receive the performance they expect. This differentiates the Exchange from its competitors.

The Exchange now proposes to amend the Fee Schedule to amend the fees for 10Gb ULL connectivity and Limited Service MEI Ports in order to recoup ongoing costs and increase in expenses set forth below in the Exchange's cost analysis. The Exchange initially filed this proposal on December 30, 2022 as SR–EMERALD–2022–38. On January 9, 2023, the Exchange withdrew SR–EMERALD–2022–38 and resubmitted this proposal as SR–EMERALD–2023–01 (the ''Initial Proposal'').[10] On, February 23, 2023, the Exchange withdrew the Initial Proposal and replaced it with a revised proposal (SR–EMERALD–2023–05) (the ''Second Proposal'').[11] On April 20, 2023, the Exchange withdrew the Second Proposal and replaced it with a revised proposal (SR–EMERALD–2023–12) (the ''Third Proposal'').[12] On June 16, 2023, the Exchange withdrew the Third Proposal and replaced it with a revised proposal (SR–EMERALD–2023–14) (the ''Fourth Proposal'').[13] On August 8, 2023, the Exchange withdrew the Fourth Proposal and replaced it with a revised proposal (SR–EMERALD–2023–

[3] The term ''Member'' means an individual or organization approved to exercise the trading rights associated with a Trading Permit. Members are deemed ''members'' under the Exchange Act. *See* Exchange Rule 100.

[4] The MIAX Emerald Express Interface (''MEI'') is a connection to the MIAX Emerald System that enables Market Makers to submit simple and complex electronic quotes to MIAX Emerald. *See* the Definitions Section of the Fee Schedule.

[5] The term ''Market Makers'' refers to Lead Market Makers (''LMMs''), Primary Lead Market Makers (''PLMMs''), and Registered Market Makers (''RMMs'') collectively. *See* the Definitions Section of the Fee Schedule and Exchange Rule 100. For purposes of Limit Service MEI Ports, Market Makers also include firms that engage in other types of liquidity activity, such as seeking to remove resting liquidity from the Exchange's Book.

[6] *See* Securities Exchange Act Release Nos. 91460 (April 1, 2021), 86 FR 18349 (April 8, 2021) (SR–EMERALD–2021–11); 90184 (October 14, 2020), 85 FR 66636 (October 20, 2020) (SR–EMERALD–2020–12); 90600 (December 8, 2020), 85 FR 80831 (December 14, 2020) (SR–EMERALD–2020–17); 91032 (February 1, 2021), 86 FR 8428 (February 5, 2021) (SR–EMERALD–2021–02); *and* 91200 (February 24, 2021), 86 FR 12221 (March 2, 2021) (SR–EMERALD–2021–07).

[7] *See id.* for a description of each of these ports.

[8] *Id.*

[9] For example, the New York Stock Exchange, Inc.'s (''NYSE'') Secure Financial Transaction Infrastructure (''SFTI'') network, which contributes to the Exchange's connectivity cost, increased its fees by approximately 9% since 2021. Similarly, since 2021, the Exchange, and its affiliates, experienced an increase in data center costs of approximately 17% and an increase in hardware and software costs of approximately 19%. These percentages are based on the Exchange's actual 2021 and 2023 expenses.

[10] *See* Securities Exchange Act Release No. 96628 (January 10, 2023), 88 FR 2651 (January 17, 2023) (SR–EMERALD–2023–01).

[11] *See* Securities Exchange Act Release No. 97079 (March 8, 2023), 88 FR 15764 (March 14, 2023) (SR–EMERALD–2023–05).

[12] *See* Securities Exchange Act Release No. 97422 (May 2, 2023), 88 FR 29750 (May 8, 2023) (SR–EMERALD–2023–12).

[13] The Exchange met with Commission Staff to discuss the Third Proposal during which the Commission Staff provided feedback and requested additional information, including, most recently, information about total costs related to certain third party vendors. Such vendor cost information is subject to confidentiality restrictions. The Exchange provided this information to Commission Staff under separate cover with a request for confidentiality. While the Exchange will continue to be responsive to Commission Staff's information requests, the Exchange believes that the Commission should, at this point, issue substantially more detailed guidance for exchanges to follow in the process of pursuing a cost-based approach to fee filings, and that, for the purposes of fair competition, detailed disclosures by exchanges, such as those that the Exchange is providing now, should be consistent across all exchanges, including for those that have resisted a cost-based approach to fee filings, in the interests of fair and even disclosure and fair competition. *See* Securities Exchange Act Release No. 97813 (June 27, 2023), 88 FR 42785 (July 3, 2023) (SR–EMERALD–2023–14).

19) (the ''Fifth Proposal'').[14] Since a U.S. government shutdown was avoided, on October 2, 2023, the Exchange withdrew the Fifth Proposal and replaced it with a further revised proposal (SR–EMERALD–2023–27) (the ''Sixth Proposal'').[15] On November 27, 2023, the Exchange withdrew the Sixth Proposal and replaced it with this further revised proposal (SR–EMERALD–2023–30) (the ''Seventh Proposal'').[16] On January 25, 2024, the Exchange withdrew the Seventh Proposal and replaced it with a further revised proposal (SR–EMERALD–2024–03) (the ''Eighth Proposal'').

The Exchange previously included a cost analysis in the Initial, Second, Third, Fourth, Fifth, Sixth and Seventh Proposals. As described more fully below, the Exchange provides an updated cost analysis that includes, among other things, additional descriptions of how the Exchange allocated costs among it and its affiliated exchanges (MIAX PEARL, LLC (''MIAX Pearl'') (separately among MIAX Pearl Options and MIAX Pearl Equities) and MIAX[17] (together with MIAX Pearl Options and MIAX Pearl Equities, the ''affiliated markets'')) to ensure no cost was allocated more than once, as well as additional detail supporting its cost allocation processes and explanations as to why a cost allocation in this proposal may differ from the same cost allocation in a similar proposal submitted by one of its affiliated markets. The Exchange continues to propose fees that are intended to cover the Exchange's cost of providing 10Gb ULL connectivity and Limited Service MEI Ports with a reasonable mark-up over those costs.

The cost analysis included in prior filings was based on the Exchange's 2023 fiscal year of operations and projected expenses. In its Initial Proposal filed on December 30, 2022, the Exchange committed to conduct an annual review after implementation of these fees. The Exchange recently completed its 2024 fiscal year budget process, which included its annual review of these fees and the projected costs to provide these services, based on its approved 2024 expense budget. Therefore, the Cost Analysis included in this proposal is based on the Exchange's 2024 fiscal year of operations and projected expenses. The Exchange believes it reasonable to now use costs from its 2024 fiscal year budget because they reflect the Exchange's current cost base. The Exchange also notes that expenses included in its 2024 fiscal year budget and this proposal are generally higher than its 2023 fiscal year budget and Cost Analysis included in prior filings. As more fully described below and throughout this filing, this is due to a number of factors, such as, critical vendors and suppliers increasing costs they charge the Exchange, significant exchange staff headcount increases, increased data center costs from the Exchange's data center providers in multiple locations and facilities, higher technology and communications costs, planned hardware refreshes, and system capacity upgrades that increase depreciation expense. Specifically, with regard to employee compensation, the 2024 fiscal year budget includes additional expenses related to increased headcount and new hires that are needed to support the Exchange as it continues to grow (the Exchange and its affiliated companies are projected to hire over 60 additional staff in 2024). Hardware and software expenses have also increased primarily due to price increases from critical vendors and equipment suppliers. Further, the Exchange budgeted for additional hardware and software needs to support the Exchange's continued growth and expansion. Depreciation and amortization have likewise increased due to recent and planned refreshes in Exchange hardware and software. This new equipment and software then becomes depreciable, as described below. Data center costs have also increased due the following: the Exchange expanding its footprint within its data center; and the data center vendor increasing the costs it charges the Exchange. Lastly, allocated shared expenses have increased due to the overall budgeted increase in costs from 2023 to 2024 necessary to operate and support the Exchange as described below.

Consequently, these increased costs included in the 2024 budget result in a lower projected profit margin for 10Gb ULL connectivity and Limited Service MEI Ports than the profit margins included in prior filings that proposed the same fee levels for 10Gb ULL connectivity and Limited Service MEI Ports. The Exchange believes it is reasonable and appropriate to now use expenses from its 2024 budget because those expenses are more recent and more accurately reflect the Exchange's current expenses and projected revenues for the 2024 fiscal year. Continuing to use 2023 budget numbers would result in the Exchange's Cost Analysis to be based on stale data which would not reflect the Exchanges most recent cost estimates and projected margins.

* * * * *

Starting in 2017, following the United States Court of Appeals for the District of Columbia's *Susquehanna Decision*[18] and various other developments, the Commission began to undertake a heightened review of exchange filings, including non-transaction fee filings that was substantially and materially different from it prior review process (hereinafter referred to as the ''Revised Review Process''). In the *Susquehanna Decision,* the D.C. Circuit Court stated that the Commission could not maintain a practice of ''unquestioning reliance'' on claims made by a self-regulatory organization (''SRO'') in the course of filing a rule or fee change with the Commission.[19] Then, on October 16, 2018, the Commission issued an opinion in *Securities Industry and Financial Markets Association* finding that exchanges failed both to establish that the challenged fees were constrained by significant competitive forces and that these fees were consistent with the Act.[20] On that same day, the Commission issued an order remanding to various exchanges and national market system (''NMS'') plans challenges to over 400 rule changes and plan amendments that were asserted in 57 applications for review (the ''Remand Order'').[21] The Remand Order directed the exchanges to ''develop a record,'' and to ''explain their conclusions, based on that record, in a written decision that is sufficient to enable us to perform our review.'' [22] The Commission denied requests by various exchanges and plan participants for reconsideration of the

Remand Order.[23] However, the Commission did extend the deadlines in the Remand Order ''so that they d[id] not begin to run until the resolution of the appeal of the SIFMA Decision in the D.C. Circuit and the issuance of the court's mandate.'' [24] Both the Remand Order and the Order Denying Reconsideration were appealed to the D.C. Circuit.

While the above appeal to the D.C. Circuit was pending, on March 29, 2019, the Commission issued an order disapproving a proposed fee change by BOX Exchange LLC (''BOX'') to establish connectivity fees (the ''BOX Order''), which significantly increased the level of information needed for the Commission to believe that an exchange's filing satisfied its obligations under the Act with respect to changing a fee.[25] Despite approving hundreds of access fee filings in the years prior to the BOX Order (described further below) utilizing a ''market-based'' test, the Commission changed course and disapproved BOX's proposal to begin charging connectivity at one-fourth the rate of competing exchanges' pricing.

Also while the above appeal was pending, on May 21, 2019, the Commission Staff issued guidance ''to assist the national securities exchanges and FINRA . . . in preparing Fee Filings that meet their burden to demonstrate that proposed fees are consistent with the requirements of the Securities Exchange Act.'' [26] In the Staff Guidance, the Commission Staff states that, ''[a]s an initial step in assessing the reasonableness of a fee, staff considers whether the fee is constrained by significant competitive forces.'' [27] The Staff Guidance also states that, ''. . . even where an SRO cannot demonstrate, or does not assert, that significant competitive forces constrain the fee at issue, a cost-based discussion may be an alternative basis upon which to show consistency with the Exchange Act.'' [28]

Following the BOX Order and Staff Guidance, on August 6, 2020, the D.C. Circuit vacated the Commission's SIFMA Decision in *NASDAQ Stock Market, LLC* v. *SEC* [29] and remanded for further proceedings consistent with its opinion.[30] That same day, the D.C. Circuit issued an order remanding the Remand Order to the Commission for reconsideration in light of *NASDAQ.* The court noted that the Remand Order required the exchanges and NMS plan participants to consider the challenges that the Commission had remanded in light of the SIFMA Decision. The D.C. Circuit concluded that because the SIFMA Decision ''has now been vacated, the basis for the [Remand Order] has evaporated.'' [31] Accordingly, on August 7, 2020, the Commission vacated the Remand Order and ordered the parties to file briefs addressing whether the holding in *NASDAQ* v. *SEC* that Exchange Act Section 19(d) does not permit challenges to generally applicable fee rules requiring dismissal of the challenges the Commission previously remanded.[32] The Commission further invited ''the parties to submit briefing stating whether the challenges asserted in the applications for review . . . should be dismissed, and specifically identifying any challenge that they contend should not be dismissed pursuant to the holding of *Nasdaq* v. *SEC.*'' [33] Without resolving the above issues, on October 5, 2020, the Commission issued an order granting SIFMA and Bloomberg's request to withdraw their applications for review and dismissed the proceedings.[34]

As a result of the Commission's loss of the *NASDAQ* v. *SEC* case noted above, the Commission never followed through with its intention to subject the over 400 fee filings to ''develop a record,'' and to ''explain their conclusions, based on that record, in a written decision that is sufficient to enable us to perform our review.'' [35] As such, all of those fees remained in place and amounted to a baseline set of fees for those exchanges that had the benefit of getting their fees in place before the Commission Staff's fee review process materially changed. The net result of this history and lack of resolution in the D.C. Circuit Court resulted in an uneven competitive landscape where the Commission subjects all new non-transaction fee filings to the new Revised Review Process, while allowing the previously challenged fee filings, mostly submitted by incumbent exchanges prior to 2019, to remain in effect and not subject to the ''record'' or ''review'' earlier intended by the Commission.

While the Exchange appreciates that the Staff Guidance articulates an important policy goal of improving disclosures and requiring exchanges to justify that their market data and access fee proposals are fair and reasonable, the practical effect of the Revised Review Process, Staff Guidance, and the Commission's related practice of continuous suspension of new fee filings, is anti-competitive, discriminatory, and has put in place an un-level playing field, which has negatively impacted smaller, nascent, non-legacy exchanges (''non-legacy exchanges''), while favoring larger, incumbent, entrenched, legacy exchanges (''legacy exchanges'').[36] The legacy exchanges all established a significantly higher baseline for access

[36] Commission Chair Gary Gensler recently reiterated the Commission's mandate to ensure competition in the equities markets. *See* ''Statement on Minimum Price Increments, Access Fee Caps, Round Lots, and Odd-Lots'', by Chair Gary Gensler, dated December 14, 2022 (stating ''[i]n 1975, Congress tasked the Securities and Exchange Commission with responsibility to facilitate the establishment of the national market system and *enhance competition in the securities markets, including the equity markets*'' (*emphasis added*)). In that same statement, Chair Gary Gensler cited the five objectives laid out by Congress in 11A of the Exchange Act (15 U.S.C. 78k–1), including ensuring ''fair competition among brokers and dealers, among exchange markets, and *between exchange markets* and markets other than exchange markets . . .'' (*emphasis added*). *Id.* at note 1. *See also* Securities Acts Amendments of 1975, *available at https://www.govtrack.us/congress/bills/94/s249.*

and market data fees prior to the Revised Review Process. From 2011 until the issuance of the Staff Guidance in 2019, national securities exchanges filed, and the Commission Staff did not abrogate or suspend (allowing such fees to become effective), at least 92 filings [37] to amend exchange connectivity or port fees (or similar access fees). The support for each of those filings was a simple statement by the relevant exchange that the fees were constrained by competitive forces.[38] These fees remain in effect today.

The net result is that the non-legacy exchanges are effectively now blocked by the Commission Staff from adopting or increasing fees to amounts comparable to the legacy exchanges (which were not subject to the Revised Review Process and Staff Guidance), despite providing enhanced disclosures and rationale to support their proposed fee changes that far exceed any such support provided by legacy exchanges. Simply put, legacy exchanges were able to increase their non-transaction fees during an extended period in which the Commission applied a ''market-based'' test that only relied upon the assumed presence of significant competitive forces, while exchanges today are subject to a cost-based test requiring extensive cost and revenue disclosures, a process that is complex, inconsistently applied, and rarely results in a successful outcome, *i.e.,* non-suspension. The Revised Review Process and Staff Guidance changed decades-long Commission Staff standards for review, resulting in unfair discrimination and placing an undue burden on inter-market competition between legacy exchanges and non-legacy exchanges.

Commission Staff now require exchange filings, including from non-legacy exchanges such as the Exchange, to provide detailed cost-based analysis in place of competition-based arguments to support such changes. However, even with the added detailed cost and expense disclosures, the Commission Staff continues to either suspend such filings and institute disapproval proceedings, or put the exchanges in the unenviable position of having to repeatedly withdraw and re-file with additional detail in order to continue to charge those fees.[39] By impeding any path forward for non-legacy exchanges to establish commensurate non-transaction fees, or by failing to provide any alternative means for smaller markets to establish ''fee parity'' with legacy exchanges, the Commission is stifling competition: non-legacy exchanges are, in effect, being deprived of the revenue necessary to compete on a level playing field with legacy exchanges. This is particularly harmful, given that the costs to maintain exchange systems and operations continue to increase. The Commission Staff's change in position impedes the ability of non-legacy exchanges to raise revenue to invest in their systems to compete with the legacy exchanges who already enjoy disproportionate non-transaction fee based revenue. For example, the Cboe Exchange, Inc. (''Cboe'') reported ''access and capacity fee'' revenue of $70,893,000 for 2020 [40] and $80,383,000 for 2021.[41] Cboe C2 Exchange, Inc. (''C2'') reported ''access and capacity fee'' revenue of $19,016,000 for 2020 [42] and $22,843,000 for 2021.[43] Cboe BZX Exchange, Inc. (''BZX'') reported ''access and capacity fee'' revenue of $38,387,000 for 2020 [44] and $44,800,000 for 2021.[45] Cboe EDGX Exchange, Inc. (''EDGX'') reported ''access and capacity fee'' revenue of $26,126,000 for 2020 [46] and $30,687,000 for 2021.[47] For 2021, the affiliated Cboe, C2, BZX, and EDGX (the four largest exchanges of the Cboe exchange group) reported $178,712,000 in ''access and capacity fees'' in 2021. NASDAQ Phlx, LLC (''NASDAQ Phlx'') reported ''Trade Management Services'' revenue of $20,817,000 for 2019.[48] The Exchange notes it is unable to compare ''access fee'' revenues with NASDAQ Phlx (or other affiliated NASDAQ exchanges) because after 2019, the ''Trade Management Services'' line item was bundled into a much larger line item in PHLX's Form 1, simply titled ''Market services.'' [49]

The much higher non-transaction fees charged by the legacy exchanges provides them with two significant competitive advantages. First, legacy exchanges are able to use their additional non-transaction revenue for investments in infrastructure, vast marketing and advertising on major media outlets,[50] new products and other innovations. Second, higher non-transaction fees provide the legacy exchanges with greater flexibility to lower their transaction fees (or use the revenue from the higher non-transaction fees to subsidize transaction fee rates),[51] which are more immediately impactful

[37] This timeframe also includes challenges to over 400 rule filings by SIFMA and Bloomberg discussed above. *Sec. Indus. & Fin. Mkts. Ass'n,* Securities Exchange Act Release No. 84433, 2018 WL 5023230 (Oct. 16, 2018). Those filings were left to stand, while at the same time, blocking newer exchanges from the ability to establish competitive access and market data fees. *See The Nasdaq Stock Market, LLC* v. *SEC,* Case No. 18–1292 (D.C. Cir. June 5, 2020). The expectation at the time of the litigation was that the 400 rule flings challenged by SIFMA and Bloomberg would need to be justified under revised review standards.

[38] *See, e.g.,* Securities Exchange Act Release Nos. 74417 (March 3, 2015), 80 FR 12534 (March 9, 2015) (SR–ISE–2015–06); 83016 (April 9, 2018), 83 FR 16157 (April 13, 2018) (SR–PHLX–2018–26); 70285 (August 29, 2013), 78 FR 54697 (September 5, 2013) (SR–NYSEMKT–2013–71); 76373 (November 5, 2015), 80 FR 70024 (November 12, 2015) (SR–NYSEMKT–2015–90); 79729 (January 4, 2017), 82 FR 3061 (January 10, 2017) (SR–NYSEARCA–2016–172).

[39] The Exchange has filed, and subsequently withdrawn, various forms of this proposed fee numerous times since August 2021 with each proposal containing hundreds of cost and revenue disclosures never previously disclosed by legacy exchanges in their access and market data fee filings prior to 2019.

[40] According to Cboe's 2021 Form 1 Amendment, access and capacity fees represent fees assessed for the opportunity to trade, including fees for trading-related functionality. *See* Cboe 2021 Form 1 Amendment, *available at https://www.sec.gov/Archives/edgar/vprr/2100/21000465.pdf.*

in competition for order flow and market share, given the variable nature of this cost on member firms. The prohibition of a reasonable path forward denies the Exchange (and other non-legacy exchanges) this flexibility, eliminates the ability to remain competitive on transaction fees, and hinders the ability to compete for order flow and market share with legacy exchanges. There is little doubt that subjecting one exchange to a materially different standard than that historically applied to legacy exchanges for non-transaction fees leaves that exchange at a disadvantage in its ability to compete with its pricing of transaction fees.

While the Commission has clearly noted that the Staff Guidance is merely guidance and ''is not a rule, regulation or statement of the . . . Commission . . . the Commission has neither approved nor disapproved its content . . .'',[52] this is not the reality experienced by exchanges such as MIAX Emerald. As such, non-legacy exchanges are forced to rely on an opaque cost-based justification standard. However, because the Staff Guidance is devoid of detail on what must be contained in cost-based justification, this standard is nearly impossible to meet despite repeated good-faith efforts by the Exchange to provide substantial amount of cost-related details. For example, the Exchange has attempted to increase fees using a cost-based justification numerous times, having submitted over six filings.[53] However, despite providing 100+ page filings describing in extensive detail its costs associated with providing the services described in the filings, Commission Staff continues to suspend such filings, with the rationale that the Exchange has not provided sufficient detail of its costs and without ever being precise about what additional data points are required. The Commission Staff appears to be interpreting the reasonableness standard set forth in Section 6(b)(4) of the Act[54] in a manner that is not possible to achieve. This essentially nullifies the cost-based approach for exchanges as a legitimate alternative as laid out in the Staff Guidance. By refusing to accept a reasonable cost-based argument to justify non-transaction fees (in addition to refusing to accept a competition-based argument as described above), or by failing to provide the detail required to achieve that standard, the Commission Staff is effectively preventing non-legacy exchanges from making any non-transaction fee changes, which benefits the legacy exchanges and is anticompetitive to the non-legacy exchanges. This does not meet the fairness standard under the Act and is discriminatory.

Because of the un-level playing field created by the Revised Review Process and Staff Guidance, the Exchange believes that the Commission Staff, at this point, should either (a) provide sufficient clarity on how its cost-based standard can be met, including a clear and exhaustive articulation of required data and its views on acceptable margins,[55] to the extent that this is pertinent; (b) establish a framework to provide for commensurate non-transaction based fees among competing exchanges to ensure fee parity; [56] or (c) accept that certain competition-based arguments are applicable given the linkage between non-transaction fees and transaction fees, especially where non-transaction fees among exchanges are based upon disparate standards of review, lack parity, and impede fair competition. Considering the absence of any such framework or clarity, the Exchange believes that the Commission does not have a reasonable basis to deny the Exchange this change in fees, where the proposed change would result in fees meaningfully lower than comparable fees at competing exchanges and where the associated non-transaction revenue is meaningfully lower than competing exchanges.

In light of the above, disapproval of this would not meet the fairness standard under the Act, would be discriminatory and places a substantial burden on competition. The Exchange would be uniquely disadvantaged by not being able to increase its access fees to comparable levels (or lower levels than current market rates) to those of other options exchanges for connectivity. If the Commission Staff were to disapprove this proposal, that action, and not market forces, would substantially affect whether the Exchange can be successful in its competition with other options exchanges. Disapproval of this filing could also be viewed as an arbitrary and capricious decision should the Commission Staff continue to ignore its past treatment of non-transaction fee filings before implementation of the Revised Review Process and Staff Guidance and refuse to allow such filings to be approved despite significantly enhanced arguments and cost disclosures.[57]

* * * * *

10Gb ULL Connectivity Fee Change

The Exchange proposes to amend the Fee Schedule to increase the fees for Members and non-Members to access the Exchange's system networks [58] via a 10Gb ULL fiber connection. Specifically, the Exchange proposes to amend Sections 5)a)–b) of the Fee Schedule to increase the 10Gb ULL connectivity fee for Members and non-Members from $10,000 per month to $13,500 per month (''10Gb ULL Fee'').[59]

[52] *See supra* note 26, at note 1.

[53] *See* Securities Exchange Act Release Nos. 94889 (May 11, 2022), 87 FR 29928 (May 17, 2022) (SR–EMERALD–2022–19); 94718 (April 14, 2022), 87 FR 23633 (April 20, 2022) (SR–EMERALD–2022–15); 94717 (April 14, 2022), 87 FR 23648 (April 20, 2022) (SR–EMERALD–2022–13); 94260 (February 15, 2022), 87 FR 9695 (February 22, 2022) (SR–EMERALD–2022–05); 94257 (February 15, 2022), 87 FR 9678 (February 22, 2022) (SR–EMERALD–2022–04); 93772 (December 14, 2021), 86 FR 71965 (December 20, 2021) (SR–EMERALD–2021–43); 93776 (December 14, 2021), 86 FR 71983 (December 20, 2021) (SR–EMERALD–2021–42); 93188 (September 29, 2021), 86 FR 55052 (October 5, 2021) (SR–EMERALD–2021–31); (SR–EMERALD–2021–30) (withdrawn without being noticed by the Commission); 93166 (September 28, 2021), 86 FR 54760 (October 4, 2021) (SR–EMERALD–2021–29); 92662 (August 13, 2021), 86 FR 46726 (August 19, 2021) (SR–EMERALD–2021–25); 92645 (August 11, 2021), 86 FR 46048 (August 17, 2021) (SR–EMERALD–2021–23).

[54] 15 U.S.C. 78f(b)(4).

[55] To the extent that the cost-based standard includes Commission Staff making determinations as to the appropriateness of certain profit margins, the Exchange believes that Staff should be clear as to what they determine is an appropriate profit margin.

[56] In light of the arguments above regarding disparate standards of review for historical legacy non-transaction fees and current non-transaction fees for non-legacy exchanges, a fee parity alternative would be one possible way to avoid the current unfair and discriminatory effect of the Staff Guidance and Revised Review Process. *See, e.g., CSA Staff Consultation Paper 21–401, Real-Time Market Data Fees, available at https://www.bcsc.bc.ca/-/media/PWS/Resources/Securities_Law/Policies/Policy2/21401_Market_Data_Fee_CSA_Staff_Consulation_Paper.pdf.*

[57] The Exchange's costs have clearly increased and continue to increase, particularly regarding capital expenditures, as well as employee benefits provided by third parties (*e.g.,* healthcare and insurance). Yet, practically no fee change proposed by the Exchange to cover its ever-increasing costs has been acceptable to the Commission Staff since 2021. The only other fair and reasonable alternative would be to require the numerous fee filings unquestioningly approved before the Staff Guidance and Revised Review Process to ''develop a record,'' and to ''explain their conclusions, based on that record, in a written decision that is sufficient to enable us to perform our review,'' and to ensure a comparable review process with the Exchange's filing.

[58] The Exchange's system networks consist of the Exchange's extranet, internal network, and external network.

[59] Market participants that purchase additional 10Gb ULL connections as a result of this change will not be subject to the Exchange's Member Network Connectivity Testing and Certification Fee under Section 4)c) of the Fee Schedule. *See* Fee Schedule, Section 4)c), *available at https://www.miaxglobal.com/markets/us-options/miax-options/fees* (providing that ''Network Connectivity Testing and Certification Fees will not be assessed in situations where the Exchange initiates a

The Exchange will continue to assess monthly Member and non-Member network connectivity fees for connectivity to the primary and secondary facilities in any month the Member or non-Member is credentialed to use any of the Exchange APIs or market data feeds in the production environment. The Exchange will continue to pro-rate the fees when a Member or non-Member makes a change to the connectivity (by adding or deleting connections) with such pro-rated fees based on the number of trading days that the Member or non-Member has been credentialed to utilize any of the Exchange APIs or market data feeds in the production environment through such connection, divided by the total number of trading days in such month multiplied by the applicable monthly rate.

Limited Service MEI Ports

Background

The Exchange also proposes to amend Section 5)d) of the Fee Schedule to amend the monthly port fee for Limited Service MEI Ports available to Market Makers.[60] The Exchange currently allocates two (2) Full Service MEI Ports [61] and two (2) Limited Service MEI Ports [62] per matching engine [63] to which each Market Maker connects. Market Makers may also request additional Limited Service MEI Ports for each matching engine to which they connect. The Full Service MEI Ports and Limited Service MEI Ports all include access to the Exchange's primary and secondary data centers and its disaster recovery center. Market Makers may request additional Limited Service MEI Ports. Market Makers were previously assessed a $100 monthly fee for each Limited Service MEI Port for each matching engine above the first two Limited Service MEI Ports that are included for free (before the proposals to adopt a tiered fee structure).

Limited Service MEI Port Fee Changes

The Exchange now proposes to amend the monthly fee per Limited Service MEI Port and increase the number of free Limited Service MEI Ports per matching engine from two (2) to four (4). Specifically, the Exchange will now provide the first, second, third and fourth Limited Service MEI Ports for each matching engine free of charge. For additional Limited Service MEI Ports after the first four ports per matching engine that are provided for free (*i.e.,* beginning with the fifth Limited Service MEI Port), the Exchange proposes to increase the monthly fee from $100 to $420 per Limited Service MEI Port per matching engine.[64]

Market Makers that elect to purchase more than the number of Limited Service Ports that are provide for free do so due to the nature of their business and their perceived need for numerous ports to access the Exchange. Meanwhile, Market Makers who utilize the free Limited Service MEI Ports do so based on their business needs.

The Exchange notes that it last proposed to increase its monthly Limited Service MEI Port fees in 2020 (other than the prior proposals to adopt a tiered fee structure for Limited Service MEI Ports),[65] and such increase proposed herein is designed to recover a portion of the ever increasing costs associated with directly accessing the Exchange.

The Exchange also proposes to make corresponding changes to the Definitions section of the Fee Schedule and the paragraph describing the cap on the number of Limited Service MEI Ports each Market Maker may receive in Section 5)d)ii) of the Fee Schedule to account for the proposed change to now provide the first four (4) Limited Service MEI Ports for free per matching engine. Accordingly, the Exchange proposes to amend the last sentence of the paragraph describing the fees for Limited Service MEI Ports in Section 5)d)ii) of the Fee Schedule to now state that Market Makers are limited to ten additional Limited Service MEI Ports per matching engine, for a total of fourteen Limited Service MEI Ports per matching engine.

Implementation

The proposed fee changes are immediately effective.

2. Statutory Basis

The Exchange believes that the proposed fees are consistent with Section 6(b) of the Act [66] in general, and furthers the objectives of Section 6(b)(4) of the Act [67] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among Members and other persons using any facility or system which the Exchange operates or controls. The Exchange also believes the proposed fees further the objectives of Section 6(b)(5) of the Act [68] in that they are designed to promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general protect investors and the public interest and are not designed to permit unfair discrimination between customers, issuers, brokers and dealers.

The Exchange believes that the information provided to justify the proposed fees meets or exceeds the amount of detail required in respect of proposed fee changes under the Revised Review Process and as set forth in recent Staff Guidance. Based on both the BOX Order [69] and the Staff Guidance,[70] the Exchange believes that the proposed fees are consistent with the Act because they are: (i) reasonable, equitably allocated, not unfairly discriminatory, and not an undue burden on competition; (ii) comply with the BOX Order and the Staff Guidance; and (iii) supported by evidence (including comprehensive revenue and cost data and analysis) that they are fair and reasonable and will not result in

mandatory change to the Exchange's system that requires testing and certification. Member Network Connectivity Testing and Certification Fees will not be assessed for testing and certification of connectivity to the Exchange's Disaster Recovery Facility.'').

[60] The Exchange notes that in its prior filings (the Initial, Second, Third, Fourth and Fifth Proposals), the Exchange proposed to adopt a tiered-pricing structure for Limited Service MEI Ports.

[61] The term ''Full Service MEI Ports'' means a port which provides Market Makers with the ability to send Market Maker simple and complex quotes, eQuotes, and quote purge messages to the MIAX Emerald System. Full Service MEI Ports are also capable of receiving administrative information. Market Makers are limited to two Full Service MEI Ports per Matching Engine. *See* the Definitions Section of the Fee Schedule.

[62] The term ''Limited Service MEI Ports'' means a port which provides Market Makers with the ability to send simple and complex eQuotes and quote purge messages only, but not Market Maker Quotes, to the MIAX Emerald System. Limited Service MEI Ports are also capable of receiving administrative information. Market Makers initially receive two Limited Service MEI Ports per Matching Engine. *See* the Definitions Section of the Fee Schedule.

[63] The term ''Matching Engine'' means a part of the MIAX Emerald electronic system that processes options orders and trades on a symbol-by-symbol basis. Some Matching Engines will process option classes with multiple root symbols, and other Matching Engines may be dedicated to one single option root symbol (for example, options on SPY may be processed by one single Matching Engine that is dedicated only to SPY). A particular root symbol may only be assigned to a single designated Matching Engine. A particular root symbol may not be assigned to multiple Matching Engines. *See* the Definitions Section of the Fee Schedule.

[64] As noted in the Fee Schedule, Market Makers will continue to be limited to fourteen Limited Service MEI Ports per Matching Engine. The Exchange also proposes to make a ministerial clarifying change to remove the defined term ''Additional Limited Service MEI Ports''. The Exchange proposes to make a related change to add the term ''Limited Service MEI Ports'' after the word ''fourteen'' in the Fee Schedule.

excessive pricing or supra-competitive profit.

The Exchange believes that exchanges, in setting fees of all types, should meet high standards of transparency to demonstrate why each new fee or fee amendment meets the requirements of the Act that fees be reasonable, equitably allocated, not unfairly discriminatory, and not create an undue burden on competition among market participants. The Exchange believes this high standard is especially important when an exchange imposes various fees for market participants to access an exchange's marketplace.

In the Staff Guidance, the Commission Staff states that, ''[a]s an initial step in assessing the reasonableness of a fee, staff considers whether the fee is constrained by significant competitive forces.'' [71] The Staff Guidance further states that, ''. . . even where an SRO cannot demonstrate, or does not assert, that significant competitive forces constrain the fee at issue, a cost-based discussion may be an alternative basis upon which to show consistency with the Exchange Act.'' [72] In the Staff Guidance, the Commission Staff further states that, ''[i]f an SRO seeks to support its claims that a proposed fee is fair and reasonable because it will permit recovery of the SRO's costs, . . . , specific information, including quantitative information, should be provided to support that argument.'' [73]

The proposed fees are reasonable because they promote parity among exchange pricing for access, which promotes competition, including in the Exchanges' ability to competitively price transaction fees, invest in infrastructure, new products and other innovations, all while allowing the Exchange to recover its costs to provide dedicated access via 10Gb ULL connectivity and Limited Service MEI Ports. As discussed above, the Revised Review Process and Staff Guidance have created an uneven playing field between legacy and non-legacy exchanges by severely restricting non-legacy exchanges from being able to increase non-transaction related fees to provide them with additional necessary revenue to better compete with legacy exchanges, which largely set fees prior to the Revised Review Process. The much higher non-transaction fees charged by the legacy exchanges provides them with two significant competitive advantages: (i) additional non-transaction revenue that may be used to fund areas other than the non-transaction service related to the fee, such as investments in infrastructure, advertising, new products and other innovations; and (ii) greater flexibility to lower their transaction fees by using the revenue from the higher non-transaction fees to subsidize transaction fee rates. The latter is more immediately impactful in competition for order flow and market share, given the variable nature of this cost on Member firms. The absence of a reasonable path forward to increase non-transaction fees to comparable (or lower rates) limits the Exchange's flexibility to, among other things, make additional investments in infrastructure and advertising, diminishes the ability to remain competitive on transaction fees, and hinders the ability to compete for order flow and market share. Again, there is little doubt that subjecting one exchange to a materially different standard than that applied to other exchanges for non-transaction fees leaves that exchange at a disadvantage in its ability to compete with its pricing of transaction fees.

The Proposed Fees Ensure Parity Among Exchange Access Fees, Which Promotes Competition

The Exchange initially adopted a fee of $50 per port, after the first two Limited Service MEI Ports that are provided free of charge, and the Exchange incurred all the costs associated to provide those first two Limited Service MEI Ports since it commenced operations in March 2019. At that same time, the Exchange only charged $6,000 per month for each 10Gb ULL connection. As a new exchange entrant, the Exchange chose to offer connectivity and ports at very low fees to encourage market participants to trade on the Exchange and experience, among things, the quality of the Exchange's technology and trading functionality. This practice is not uncommon. New exchanges often do not charge fees or charge lower fees for certain services such as memberships/trading permits to attract order flow to an exchange, and later amend their fees to reflect the true value of those services, absorbing all costs to provide those services in the meantime. Allowing new exchange entrants time to build and sustain market share through various pricing incentives before increasing non-transaction fees encourages market entry and fee parity, which promotes competition among exchanges. It also enables new exchanges to mature their markets and allow market participants to trade on the new exchanges without fees serving as a potential barrier to attracting memberships and order flow.[74]

Later in 2020, as the Exchange's market share increased,[75] the Exchange then increased the fee by $50 to a modest $100 fee per Limited Service MEI Port and increased the fee for 10Gb ULL fiber connections from $6,000 to $10,000 per month.[76] The Exchange balanced business and competitive concerns with the need to financially compete with the larger incumbent exchanges that charge higher fees for similar connectivity and use that revenue to invest in their technology and other service offerings.

The proposed changes to the Fee Schedule are reasonable in several respects. As a threshold matter, the Exchange is subject to significant competitive forces, which constrains its pricing determinations for transaction fees as well as non-transaction fees. The fact that the market for order flow is competitive has long been recognized by the courts. In *NetCoalition* v. *Securities and Exchange Commission,* the D.C. Circuit stated, ''[n]o one disputes that competition for order flow is 'fierce.'

MEMX's market share has increased and recently proposed to adopt numerous non-transaction fees, including fees for membership, market data, and connectivity. *See* Securities Exchange Act Release Nos. 93927 (January 7, 2022), 87 FR 2191 (January 13, 2022) (SR–MEMX–2021–19) (proposing to adopt membership fees); 96430 (December 1, 2022), 87 FR 75083 (December 7, 2022) (SR–MEMX–2022–32) *and* 95936 (September 27, 2022), 87 FR 59845 (October 3, 2022) (SR–MEMX–2022–26) (proposing to adopt fees for connectivity). *See also, e.g.,* Securities Exchange Act Release No. 88211 (February 14, 2020), 85 FR 9847 (February 20, 2020) (SR–NYSENAT–2020–05), *available at https://www.nyse.com/publicdocs/nyse/markets/nyse-national/rule-filings/filings/2020/SR-NYSENat-2020-05.pdf* (initiating market data fees for the NYSE National exchange after initially setting such fees at zero).

[75] The Exchange experienced a monthly average trading volume of 3.43% for the month of October 2020. *See* the ''Market Share'' section of the Exchange's website, *available at https://www.miaxglobal.com/.*

[76] *See* Securities Exchange Act Release Nos. 91460 (April 1, 2021), 86 FR 18349 (April 8, 2021) (SR–EMERALD–2021–11); 90184 (October 14, 2020), 85 FR 66636 (October 20, 2020) (SR–EMERALD–2020–12); 90600 (December 8, 2020), 85 FR 80831 (December 14, 2020) (SR–EMERALD–2020–17); 91032 (February 1, 2021), 86 FR 8428 (February 5, 2021) (SR–EMERALD–2021–02); *and* 91200 (February 24, 2021), 86 FR 12221 (March 2, 2021) (SR–EMERALD–2021–07).

. . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'. . . .'' [77]

The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention to determine prices, products, and services in the securities markets. In Regulation NMS, while adopting a series of steps to improve the current market model, the Commission highlighted the importance of market forces in determining prices and SRO revenues, and also recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [78]

Congress directed the Commission to ''rely on 'competition, whenever possible, in meeting its regulatory responsibilities for overseeing the SROs and the national market system.' '' [79] As a result, and as evidenced above, the Commission has historically relied on competitive forces to determine whether a fee proposal is equitable, fair, reasonable, and not unreasonably or unfairly discriminatory. ''If competitive forces are operative, the self-interest of the exchanges themselves will work powerfully to constrain unreasonable or unfair behavior.'' [80] Accordingly, ''the existence of significant competition provides a substantial basis for finding that the terms of an exchange's fee proposal are equitable, fair, reasonable, and not unreasonably or unfairly discriminatory.'' [81] In the Revised Review Process and Staff Guidance, Commission Staff indicated that they would look at factors beyond the competitive environment, such as cost, only if a ''proposal lacks persuasive evidence that the proposed fee is constrained by significant competitive forces.'' [82]

The Exchange believes the competing exchanges' 10Gb connectivity and port fees are useful examples of alternative approaches to providing and charging for access and demonstrating how such fees are competitively set and constrained. To that end, the Exchange believes the proposed fees are competitive and reasonable because the proposed fees are similar to or less than fees charged for similar connectivity and port access provided by other options exchanges with comparable market shares. As such, the Exchange believes that denying its ability to institute fees that allow the Exchange to recoup its costs with a reasonable margin in a manner that is closer to parity with legacy exchanges, in effect, impedes its ability to compete, including in its pricing of transaction fees and ability to invest in competitive infrastructure and other offerings.

The following table shows how the Exchange's proposed fees remain similar to or less than fees charged for similar connectivity and port access provided by other options exchanges with similar market share. Each of the connectivity or port rates in place at competing options exchanges were filed with the Commission for immediate effectiveness and remain in place today.

Exchange	Type of connection or port	Monthly fee (per connection or per port)
MIAX Emerald (as proposed) (equity options market share of 3.72% for the month of December 2023) [a].	10Gb ULL connection	$13,500.
	Limited Service MEI Ports	1–4 ports: FREE. 5 or more ports: $420 each.
NASDAQ [b] (equity options market share of 5.58% for the month of December 2023) [c].	10Gb Ultra fiber connection	$15,000 per connection.
	SQF Port	1–5 ports: $1,500 per port. 6–20 ports: $1,000 per port. 21 or more ports: $500 per port.
NASDAQ ISE LLC ("ISE") [d] (equity options market share of 6.39% for the month of December 2023) [e].	10Gb Ultra fiber connection	$15,000 per connection.
	SQF Port [f]	$1,100 per port.
NYSE American LLC ("NYSE American") [g] (equity options market share of 7.49% for the month of December 2023)[h].	10Gb LX LCN connection	$22,000 per connection.
	Order/Quote Entry Port	1–40 Ports: $450 per port. 41 or more Ports: $150 per port.
NASDAQ GEMX, LLC ("GEMX") [i] (equity options market share of 2.63% for the month of December 2023) [j].	10Gb Ultra connection	$15,000 per connection.
	SQF Port	$1,250 per port.

exchanges based on the market participant's assessment of the business opportunity relative to the costs of the Exchange. With this, there is elasticity of demand for exchange membership. As an example, the Exchange's affiliate, MIAX Pearl Options, experienced a decrease in membership as the result of similar fees proposed herein. One MIAX Pearl Options Market Maker terminated their MIAX Pearl Options membership effective January 1, 2023, as a direct result of the proposed connectivity and port fee changes proposed by MIAX Pearl Options.

It is not a requirement for market participants to become members of all options exchanges; in fact, certain market participants conduct an options business as a member of only one options market.[83] A very small number of market participants choose to become a member of all sixteen options exchanges. Most firms that actively trade on options markets are not currently Members of the Exchange and do not purchase connectivity or port services at the Exchange. Connectivity and ports are only available to Members or service bureaus, and only a Member may utilize a port.[84]

One other exchange recently noted in a proposal to amend their own trading permit fees that of the 62 market making firms that are registered as Market Makers across Cboe, MIAX, and BOX, 42 firms access only one of the three exchanges.[85] The Exchange and its affiliated options markets, MIAX Pearl Options and MIAX, have a total of 46 members. Of those 46 total members, 37 are members of all three affiliated options markets, two are members of only two affiliated options markets, and seven are members of only one affiliated options market. The Exchange also notes that no firm is a Member of the Exchange only. The above data evidences that a broker-dealer need not have direct connectivity to all options exchanges, let alone the Exchange and its two affiliates, and broker-dealers may elect to do so based on their own business decisions and need to directly access each exchange's liquidity pool.

Not only is there not an actual regulatory requirement to connect to every options exchange, the Exchange believes there is also no ''de facto'' or practical requirement as well, as further evidenced by the broker-dealer membership analysis of the options exchanges discussed above. As noted above, this is evidenced by the fact that one MIAX Pearl Options Market Maker terminated their MIAX Pearl Options membership effective January 1, 2023 as a direct result of the proposed connectivity and port fee changes on MIAX Pearl Options (which are similar to the changes proposed herein). Indeed, broker-dealers choose if and how to access a particular exchange and because it is a choice, the Exchange must set reasonable pricing, otherwise prospective members would not connect and existing members would disconnect from the Exchange. The decision to become a member of an exchange, particularly for registered market makers, is complex, and not solely based on the non-transactional costs assessed by an exchange. As noted herein, specific factors include, but are not limited to: (i) an exchange's available liquidity in options series; (ii) trading functionality offered on a particular market; (iii) product offerings; (iv) customer service on an exchange; and (v) transactional pricing. Becoming a member of the exchange does not ''lock'' a potential member into a market or diminish the overall competition for exchange services.

In lieu of becoming a member at each options exchange, a market participant may join one exchange and elect to have their orders routed in the event that a better price is available on an away market. Nothing in the Order Protection Rule requires a firm to become a Member at—or establish connectivity to—the Exchange.[86] If the Exchange is not at the national best bid or offer (''NBBO''),[87] the Exchange will route an order to any away market that is at the NBBO to ensure that the order was executed at a superior price and prevent a trade-through.[88]

With respect to the submission of orders, Members may also choose not to purchase any connection from the Exchange, and instead rely on the port of a third party to submit an order. For example, a third-party broker-dealer Member of the Exchange may be utilized by a retail investor to submit orders into an exchange. An institutional investor may utilize a broker-dealer, a service bureau,[89] or request sponsored access [90] through a member of an exchange in order to submit a trade directly to an options exchange.[91] A market participant may either pay the costs associated with becoming a member of an exchange or, in the alternative, a market participant may elect to pay commissions to a broker-dealer, pay fees to a service bureau to submit trades, or pay a member to sponsor the market participant in order to submit trades directly to an exchange.

Non-Member third-parties, such as service bureaus and extranets, resell the Exchange's connectivity. This indirect connectivity is another viable alternative for market participants to trade on the Exchange without connecting directly to the Exchange (and thus not pay the Exchange's connectivity fees), which alternative is already being used by non-Members and further constrains the price that the Exchange is able to charge for connectivity and other access fees to its market. The Exchange notes that it could, but chooses not to, preclude

[83] BOX recently adopted an electronic market maker trading permit fee. *See* Securities Exchange Release No. 94894 (May 11, 2022), 87 FR 29987 (May 17, 2022) (SR–BOX–2022–17). In that proposal, BOX stated that, ''. . . it is not aware of any reason why Market Makers could not simply drop their access to an exchange (or not initially access an exchange) if an exchange were to establish prices for its non-transaction fees that, in the determination of such Market Maker, did not make business or economic sense for such Market Maker to access such exchange. [BOX] again notes that no market makers are required by rule, regulation, or competitive forces to be a Market Maker on [BOX].'' Also in 2022, MEMX established a monthly membership fee. *See* Securities Exchange Act Release No. 93927 (January 7, 2022), 87 FR 2191 (January 13, 2022) (SR–MEMX–2021–19). In that proposal, MEMX reasoned that that there is value in becoming a member of the exchange and stated that it believed that the proposed membership fee ''is not unfairly discriminatory because no broker-dealer is required to become a member of the Exchange'' and that ''neither the trade-through requirements under Regulation NMS nor broker-dealers' best execution obligations require a broker-dealer to become a member of every exchange.''

[84] Service Bureaus may obtain ports on behalf of Members.

[85] *See* Securities Exchange Act Release No. 94894 (May 11, 2022), 87 FR 29987 (May 17, 2022) (SR–BOX–2022–17) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to Amend the Fee Schedule on the BOX Options Market LLC Facility To Adopt Electronic Market Maker Trading Permit Fees). The Exchange believes that BOX's observation demonstrates that market making firms can, and do, select which exchanges they wish to access, and, accordingly, options exchanges must take competitive considerations into account when setting fees for such access.

[86] *See* Options Order Protection and Locked/Crossed Market Plan (August 14, 2009), *available at https://www.theocc.com/getmedia/7fc629d9-4e54-4b99-9f11-c0e4db1a2266/options_order_protection_plan.pdf.*

[87] *See* Exchange Rule 100.

[88] Members may elect to not route their orders by utilizing the Do Not Route order type. *See* Exchange Rule 516(g).

[89] Service Bureaus provide access to market participants to submit and execute orders on an exchange. On the Exchange, a Service Bureau may be a Member. Some Members utilize a Service Bureau for connectivity and that Service Bureau may not be a Member. Some market participants utilize a Service Bureau who is a Member to submit orders.

[90] Sponsored Access is an arrangement whereby a Member permits its customers to enter orders into an exchange's system that bypass the Member's trading system and are routed directly to the Exchange, including routing through a service bureau or other third-party technology provider.

[91] This may include utilizing a floor broker and submitting the trade to one of the five options trading floors.

market participants from reselling its connectivity. Unlike other exchanges, the Exchange also does not currently assess fees on third-party resellers on a per customer basis (*i.e.,* fees based on the number of firms that connect to the Exchange indirectly via the third-party).[92] Indeed, the Exchange does not receive any connectivity revenue when connectivity is resold by a third-party, which often is resold to multiple customers, some of whom are agency broker-dealers that have numerous customers of their own.[93] Particularly, in the event that a market participant views the Exchange's direct connectivity and access fees as more or less attractive than competing markets, that market participant can choose to connect to the Exchange indirectly or may choose not to connect to the Exchange and connect instead to one or more of the other 16 options markets. Accordingly, the Exchange believes that the proposed fees are fair and reasonable and constrained by competitive forces.

The Exchange is obligated to regulate its Members and secure access to its environment. In order to properly regulate its Members and secure the trading environment, the Exchange takes measures to ensure access is monitored and maintained with various controls. Connectivity and ports are methods utilized by the Exchange to grant Members secure access to communicate with the Exchange and exercise trading rights. When a market participant elects to be a Member, and is approved for membership by the Exchange, the Member is granted trading rights to enter orders and/or quotes into Exchange through secure connections.

Again, there is no legal or regulatory requirement that a market participant become a Member of the Exchange. This is again evidenced by the fact that one MIAX Pearl Options Market Maker terminated their MIAX Pearl Options membership effective January 1, 2023 as a direct result of the proposed connectivity and port fee changes on MIAX Pearl Options. If a market participant chooses to become a Member, they may then choose to purchase connectivity beyond the one connection that is necessary to quote or submit orders on the Exchange. Members may freely choose to rely on one or many connections, depending on their business model.

Cost Analysis

In general, the Exchange believes that exchanges, in setting fees of all types, should meet very high standards of transparency to demonstrate why each new fee or fee increase meets the Exchange Act requirements that fees be reasonable, equitably allocated, not unfairly discriminatory, and not create an undue burden on competition among members and markets. In particular, the Exchange believes that each exchange should take extra care to be able to demonstrate that these fees are based on its costs and reasonable business needs.

In proposing to charge fees for connectivity and port services, the Exchange is especially diligent in assessing those fees in a transparent way against its own aggregate costs of providing the related service, and in carefully and transparently assessing the impact on Members—both generally and in relation to other Members, *i.e.,* to assure the fee will not create a financial burden on any participant and will not have an undue impact in particular on smaller Members and competition among Members in general. The Exchange believes that this level of diligence and transparency is called for by the requirements of Section 19(b)(1) under the Act,[94] and Rule 19b–4 thereunder,[95] with respect to the types of information exchanges should provide when filing fee changes, and Section 6(b) of the Act,[96] which requires, among other things, that exchange fees be reasonable and equitably allocated,[97] not designed to permit unfair discrimination,[98] and that they not impose a burden on competition not necessary or appropriate in furtherance of the purposes of the Act.[99] This rule change proposal addresses those requirements, and the analysis and data in each of the sections that follow are designed to clearly and comprehensively show how they are met.[100] The Exchange reiterates that the legacy exchanges with whom the Exchange vigorously competes for order flow and market share, were not subject to any such diligence or transparency in setting their baseline non-transaction fees, most of which were put in place before the Revised Review Process and Staff Guidance.

As detailed below, the Exchange recently calculated its aggregate annual costs for providing physical 10Gb ULL connectivity to the Exchange at $15,469,330 (or approximately $1,289,111 per month, rounded to the nearest dollar when dividing the annual cost by 12 months) and its aggregate annual costs for providing Limited Service MEI Ports at $2,506,232 (or approximately $208,853 per month, rounded to the nearest dollar when dividing the annual cost by 12 months). In order to cover the aggregate costs of providing connectivity to its users (both Members and non-Members [101]) going forward and to make a modest profit, as described below, the Exchange proposes to modify its Fee Schedule to charge a fee of $13,500 per month for each physical 10Gb ULL connection. The Exchange also proposes to modify its Fee Schedule to amend the monthly fee for additional Limited Service MEI Ports and provide two additional ports free of charge for a total of four free Limited Service MEI Ports per matching engine to which each Member connects.

In 2020, the Exchange completed a study of its aggregate costs to produce market data and connectivity (the ''Cost Analysis'').[102] The Cost Analysis required a detailed analysis of the Exchange's aggregate baseline costs, including a determination and allocation of costs for core services provided by the Exchange—transaction execution, market data, membership services, physical connectivity, and port access (which provide order entry, cancellation and modification functionality, risk functionality, the ability to receive drop copies, and other functionality). The Exchange separately divided its costs between those costs necessary to deliver each of these core services, including infrastructure, software, human resources (*i.e.,* personnel), and certain general and

[101] Types of market participants that obtain connectivity services from the Exchange but are not Members include service bureaus and extranets. Service bureaus offer technology-based services to other companies for a fee, including order entry services, and thus, may access Limited Service MEI Ports on behalf of one or more Members. Extranets offer physical connectivity services to Members and non-Members.

[102] The Exchange frequently updates it Cost Analysis as strategic initiatives change, costs increase or decrease, and market participant needs and trading activity changes. The Exchange's most recent Cost Analysis was conducted ahead of this filing.

administrative expenses (''cost drivers'').

As an initial step, the Exchange determined the total cost for the Exchange and the affiliated markets for each cost driver as part of its 2024 budget review process. The 2024 budget review is a company-wide process that occurs over the course of many months, includes meetings among senior management, department heads, and the Finance Team. Each department head is required to send a ''bottom up'' budget to the Finance Team allocating costs at the profit and loss account and vendor levels for the Exchange and its affiliated markets based on a number of factors, including server counts, additional hardware and software utilization, current or anticipated functional or non-functional development projects, capacity needs, end-of-life or end-of-service intervals, number of members, market model (*e.g.,* price time or pro-rata, simple only or simple and complex markets, auction functionality, etc.), which may impact message traffic, individual system architectures that impact platform size,[103] storage needs, dedicated infrastructure versus shared infrastructure allocated per platform based on the resources required to support each platform, number of available connections, and employees allocated time.

All of these factors result in different allocation percentages among the Exchange and its affiliated markets, *i.e.,* the different percentages of the overall cost driver allocated to the Exchange and its affiliated markets will cause the dollar amount of the overall cost allocated among the Exchange and its affiliated markets to also differ. Because the Exchange's parent company currently owns and operates four separate and distinct marketplaces, the Exchange must determine the costs associated with each actual market—as opposed to the Exchange's parent company simply concluding that all costs drivers are the same at each individual marketplace and dividing total cost by four (4) (evenly for each marketplace). Rather, the Exchange's parent company determines an accurate cost for each marketplace, which results in different allocations and amounts across exchanges for the same cost drivers, due to the unique factors of each marketplace as described above. This allocation methodology also ensures that no cost would be allocated twice or double-counted between the Exchange and its affiliated markets. The Finance Team then consolidates the budget and sends it to senior management, including the Chief Financial Officer and Chief Executive Officer, for review and approval. Next, the budget is presented to the Board of Directors and the Finance and Audit Committees for each exchange for their approval. The above steps encompass the first step of the cost allocation process.

The next step involves determining what portion of the cost allocated to the Exchange pursuant to the above methodology is to be allocated to each core service, *e.g.,* connectivity and ports, market data, and transaction services. The Exchange and its affiliated markets adopted an allocation methodology with thoughtful and consistently applied principles to guide how much of a particular cost amount allocated to the Exchange should be allocated within the Exchange to each core service. This is the final step in the cost allocation process and is applied to each of the cost drivers set forth below. For instance, fixed costs that are not driven by client activity (*e.g.,* message rates), such as data center costs, were allocated more heavily to the provision of physical connectivity (61.9% of total expense amount allocated to 10Gb ULL connectivity), with smaller allocations to additional Limited Service MEI Ports (4.0%), and the remainder to the provision of other connectivity, other ports, transaction execution, membership services and market data services (34.1%). This next level of the allocation methodology at the individual exchange level also took into account factors similar to those set forth under the first step of the allocation methodology process described above, to determine the appropriate allocation to connectivity or market data versus allocations for other services. This allocation methodology was developed through an assessment of costs with senior management intimately familiar with each area of the Exchange's operations. After adopting this allocation methodology, the Exchange then applied an allocation of each cost driver to each core service, resulting in the cost allocations described below. Each of the below cost allocations is unique to the Exchange and represents a percentage of overall cost that was allocated to the Exchange pursuant to the initial allocation described above.

By allocating segmented costs to each core service, the Exchange was able to estimate by core service the potential margin it might earn based on different fee models. The Exchange notes that as a non-listing venue it has five primary sources of revenue that it can potentially use to fund its operations: transaction fees, fees for connectivity and port services, membership fees, regulatory fees, and market data fees. Accordingly, the Exchange must cover its expenses from these five primary sources of revenue. The Exchange also notes that as a general matter each of these sources of revenue is based on services that are interdependent. For instance, the Exchange's system for executing transactions is dependent on physical hardware and connectivity; only Members and parties that they sponsor to participate directly on the Exchange may submit orders to the Exchange; many Members (but not all) consume market data from the Exchange in order to trade on the Exchange; and the Exchange consumes market data from external sources in order to comply with regulatory obligations. Accordingly, given this interdependence, the allocation of costs to each service or revenue source required judgment of the Exchange and was weighted based on estimates of the Exchange that the Exchange believes are reasonable, as set forth below. While there is no standardized and generally accepted methodology for the allocation of an exchange's costs, the Exchange's methodology is the result of an extensive review and analysis and will be consistently applied going forward for any other potential fee proposals. In the absence of the Commission attempting to specify a methodology for the allocation of exchanges' interdependent costs, the Exchange will continue to be left with its best efforts to attempt to conduct such an allocation in a thoughtful and reasonable manner.

Through the Exchange's extensive updated Cost Analysis, which was again recently further refined, the Exchange analyzed every expense item in the Exchange's general expense ledger to determine whether each such expense relates to the provision of connectivity and port services, and, if such expense did so relate, what portion (or percentage) of such expense actually supports the provision of connectivity and port services, and thus bears a relationship that is, ''in nature and closeness,'' directly related to network connectivity and port services. In turn, the Exchange allocated certain costs more to physical connectivity and others to ports, while certain costs were only allocated to such services at a very low percentage or not at all, using consistent allocation methodologies as described above. Based on this analysis, the Exchange estimates that the aggregate monthly cost to provide 10Gb

[103] For example, the Exchange maintains 12 matching engines, MIAX Pearl Options maintains 12 matching engines, MIAX Pearl Equities maintains 24 matching engines, and MIAX maintains 24 matching engines.

ULL connectivity and Limited Service MEI Port services, including both physical 10Gb connections and Limited Service MEI Ports, is $1,497,964 (utilizing the rounded numbers when dividing the annual cost for 10Gb ULL connectivity and annual cost for Limited Service MEI Ports by 12 months, then adding both numbers together), as further detailed below.

Costs Related to Offering Physical 10Gb ULL Connectivity

The following chart details the individual line-item costs considered by the Exchange to be related to offering physical dedicated 10Gb ULL connectivity via an unshared network as well as the percentage of the Exchange's overall costs that such costs represent for each cost driver (*e.g.,* as set forth below, the Exchange allocated approximately 28.9% of its overall Human Resources cost to offering 10Gb ULL physical connectivity).

Cost drivers	Allocated annual cost [k]	Allocated monthly cost [l]	% of all
Human Resources	$6,440,638	$536,720	28.9
Connectivity (external fees, cabling, switches, etc.)	57,736	4,811	61.9
Internet Services and External Market Data	448,208	37,351	84.8
Data Center	949,073	79,089	61.9
Hardware and Software Maintenance and Licenses	890,310	74,193	50.9
Depreciation	2,147,438	178,953	61.0
Allocated Shared Expenses	4,535,927	377,994	51.5
Total	15,469,330	1,289,111	40.2

[k]. The Annual Cost includes figures rounded to the nearest dollar.
[l]. The Monthly Cost was determined by dividing the Annual Cost for each line item by twelve (12) months and rounding up or down to the nearest dollar.

Below are additional details regarding each of the line-item costs considered by the Exchange to be related to offering physical 10Gb ULL connectivity. While some costs were attempted to be allocated as equally as possible among the Exchange and its affiliated markets, the Exchange notes that some of its cost allocation percentages for certain cost drivers differ when compared to the same cost drivers for the Exchange's affiliated markets in their similar proposed fee changes for connectivity and ports. This is because the Exchange's cost allocation methodology utilizes the actual projected costs of the Exchange (which are specific to the Exchange, and are independent of the costs projected and utilized by the Exchange's affiliated markets) to determine its actual costs, which may vary across the Exchange and its affiliated markets based on factors that are unique to each marketplace. The Exchange provides additional explanation below (including the reason for the deviation) for the significant differences.

The Exchange also notes that expenses included in its 2024 fiscal year budget and this proposal are generally higher than its 2023 fiscal year budget and Cost Analysis included in prior filings. As more fully described below and throughout this filing, this is due to a number of factors, such as, critical vendors and suppliers increasing costs they charge the Exchange, significant exchange staff headcount increases, increased data center costs from the Exchange's data center providers in multiple locations and facilities, higher technology and communications costs, planned hardware refreshes, and system capacity upgrades that increase depreciation expense. Specifically, with regard to employee compensation, the 2024 fiscal year budget includes additional expenses related to increased headcount and new hires that are needed to support the Exchange as it continues to grow (the Exchange and its affiliated companies are projected to hire over 60 additional staff in 2024). Hardware and software expenses have also increased primarily due to price increases from critical vendors and equipment suppliers. Further, the Exchange budgeted for additional hardware and software needs to support the Exchange's continued growth and expansion. Depreciation and amortization have likewise increased due to recent and planned refreshes in Exchange hardware and software. This new equipment and software then becomes depreciable, as described below. Data center costs have also increased due the following: the Exchange expanding its footprint within its data center; and the data center vendor increasing the costs it charges the Exchange. Lastly, allocated shared expenses have increased due to the overall budgeted increase in costs from 2023 to 2024 necessary to operate and support the Exchange as described below.

The updated Cost Analysis using projected 2024 expenses caused some allocation percentages in this filing to differ slightly (≤3%) from past filings that relied on projected 2023 expenses. This is due to various reasons. For example, the slight differences in allocation percentage for the Human Resources cost driver is due to both changes in headcount in 2024 and also changes to the percentage of employee time allocated to these services based on changing projects and initiatives in 2024 versus 2023. For example, the Exchange recently hired a Head of Data Services whose time is entirely allocated to the market data cost driver. These types of changes in the Human Resources cost driver impact the final percentage amount of total cost allocated towards overall connectivity, including 10Gb ULL connectivity. There are no changes to the overall percentage allocation amounts applied to the product groups (*e.g.,* network connectivity) for each of the non-Human Resources cost drivers in the current filing based on 2024 expense versus the prior 2023 filings. However, within each of those product groups, slight changes to the amount of usage of the individual products within that group (in 2024 versus 2023) will have an impact on the individual product's percentage allocation within that entire product group. For example, a decrease in 1Gb connectivity lines in 2024 versus 2023 will have an impact on the percentage allocation of costs to 1Gb lines in 2024 versus 2023, which will also impact the individual percentage allocation of costs to 10Gb ULL lines, within the entire product group. Despite these minor shifts in product usage and changes in headcount and employee mix which resulted in non-material changes in percentage allocation amounts, the Exchange applied the same rules and principles to its 2024 Cost Analysis versus its 2023 Cost Analysis.

Human Resources

The Exchange notes that it and its affiliated markets anticipate that by year-end 2024, there will be 289 employees (excluding employees at non-options/equities exchange subsidiaries of Miami International Holdings, Inc. (''MIH''), the holding company of the Exchange and its affiliated markets), and each department leader has direct knowledge of the time spent by each employee with respect to the various tasks necessary to operate the Exchange. Specifically, twice a year, and as needed with additional new hires and new project initiatives, in consultation with employees as needed, managers and department heads assign a percentage of time to every employee and then allocate that time amongst the Exchange and its affiliated markets to determine each market's individual Human Resources expense. Then, managers and department heads assign a percentage of each employee's time allocated to the Exchange into buckets including network connectivity, ports, market data, and other exchange services. This process ensures that every employee is 100% allocated, ensuring there is no double counting between the Exchange and its affiliated markets.

For personnel costs (Human Resources), the Exchange calculated an allocation of employee time for employees whose functions include providing and maintaining physical connectivity and performance thereof (primarily the Exchange's network infrastructure team, which spends most of their time performing functions necessary to provide physical connectivity). As described more fully above, the Exchange's parent company allocates costs to the Exchange and its affiliated markets and then a portion of the Human Resources costs allocated to the Exchange is then allocated to connectivity. From that portion allocated to the Exchange that applied to connectivity, the Exchange then allocated a weighted average of 48% of each employee's time from the above group to 10Gb ULL connectivity.

The Exchange also allocated Human Resources costs to provide physical connectivity to a limited subset of personnel with ancillary functions related to establishing and maintaining such connectivity (such as information security, sales, membership, and finance personnel). The Exchange allocated cost on an employee-by-employee basis (*i.e.,* only including those personnel who support functions related to providing physical connectivity) and then applied a smaller allocation to such employees' time to 10Gb ULL connectivity (less than 18%). This other group of personnel with a smaller allocation of Human Resources costs also have a direct nexus to 10Gb ULL connectivity, whether it is a sales person selling a connection, finance personnel billing for connectivity or providing budget analysis, or information security ensuring that such connectivity is secure and adequately defended from an outside intrusion.

The estimates of Human Resources cost were therefore determined by consulting with such department leaders, determining which employees are involved in tasks related to providing physical connectivity, and confirming that the proposed allocations were reasonable based on an understanding of the percentage of time such employees devote to those tasks. This includes personnel from the Exchange departments that are predominately involved in providing 1Gb and 10Gb ULL connectivity: Business Systems Development, Trading Systems Development, Systems Operations and Network Monitoring, Network and Data Center Operations, Listings, Trading Operations, and Project Management. Again, the Exchange allocated 48% of each of their employee's time assigned to the Exchange for 10Gb ULL connectivity, as stated above. Employees from these departments perform numerous functions to support 10Gb ULL connectivity, such as the installation, re-location, configuration, and maintenance of 10Gb ULL connections and the hardware they access. This hardware includes servers, routers, switches, firewalls, and monitoring devices. These employees also perform software upgrades, vulnerability assessments, remediation and patch installs, equipment configuration and hardening, as well as performance and capacity management. These employees also engage in research and development analysis for equipment and software supporting 10Gb ULL connectivity and design, and support the development and on-going maintenance of internally-developed applications as well as data capture and analysis, and Member and internal Exchange reports related to network and system performance. The above list of employee functions is not exhaustive of all the functions performed by Exchange employees to support 10Gb ULL connectivity, but illustrates the breath of functions those employees perform in support of the above cost and time allocations.

Lastly, the Exchange notes that senior level executives' time was only allocated to the 10Gb ULL connectivity related Human Resources costs to the extent that they are involved in overseeing tasks related to providing physical connectivity. The Human Resources cost was calculated using a blended rate of compensation reflecting salary, equity and bonus compensation, benefits, payroll taxes, and 401(k) matching contributions.

Connectivity (External Fees, Cabling, Switches, Etc.)

The Connectivity cost driver includes external fees paid to connect to other exchanges and third parties, cabling and switches required to operate the Exchange. The Connectivity cost driver is more narrowly focused on technology used to complete connections to the Exchange and to connect to external markets. The Exchange notes that its connectivity to external markets is required in order to receive market data to run the Exchange's matching engine and basic operations compliant with existing regulations, primarily Regulation NMS.

The Exchange relies on various connectivity providers for connectivity to the entire U.S. options industry, and infrastructure services for critical components of the network that are necessary to provide and maintain its System Networks and access to its System Networks via 10Gb ULL connectivity. Specifically, the Exchange utilizes connectivity providers to connect to other national securities exchanges and the Options Price Reporting Authority (''OPRA''). The Exchange understands that these service providers provide services to most, if not all, of the other U.S. exchanges and other market participants. Connectivity provided by these service providers is critical to the Exchanges daily operations and performance of its System Networks to which market participants connect to via 10Gb ULL connectivity. Without these services providers, the Exchange would not be able to connect to other national securities exchanges, market data providers or OPRA and, therefore, would not be able to operate and support its System Networks. The Exchange does not employ a separate fee to cover its connectivity provider expense and recoups that expense, in part, by charging for 10Gb ULL connectivity.

Internet Services and External Market Data

The next cost driver consists of internet Services and external market data. The internet services cost driver includes third-party service providers that provide the internet, fiber and

bandwidth connections between the Exchange's networks, primary and secondary data centers, and office locations in Princeton and Miami.

External market data includes fees paid to third parties, including other exchanges, to receive market data. The Exchange includes external market data fee costs towards the provision of 10Gb ULL connectivity because such market data is necessary for certain services related to connectivity, including pre-trade risk checks and checks for other conditions (*e.g.,* re-pricing of orders to avoid locked or crossed markets and trading collars). Since external market data from other exchanges is consumed at the Exchange's matching engine level, (to which 10Gb ULL connectivity provides access) in order to validate orders before additional orders enter the matching engine or are executed, the Exchange believes it is reasonable to allocate an amount of such costs to 10Gb ULL connectivity.

The Exchange relies on various content service providers for data feeds for the entire U.S. options industry, as well as content for critical components of the network that are necessary to provide and maintain its System Networks and access to its System Networks via 10Gb ULL connectivity. Specifically, the Exchange utilizes content service providers to receive market data from OPRA, other exchanges and market data providers. The Exchange understands that these service providers provide services to most, if not all, of the other U.S. exchanges and other market participants. Market data provided these service providers is critical to the Exchanges daily operations and performance of its System Networks to which market participants connect to via 10Gb ULL connectivity. Without these services providers, the Exchange would not be able to receive market data and, therefore, would not be able to operate and support its System Networks. The Exchange does not employ a separate fee to cover its content service provider expense and recoups that expense, in part, by charging for 10Gb ULL connectivity.

Lastly, the Exchange notes that the actual dollar amounts allocated as part of the second step of the 2024 budget process differ among the Exchange and its affiliated markets for the internet Services and External Market Data cost driver, even though, but for the Exchange, the allocation percentages are generally consistent across markets (*e.g.,* MIAX Emerald, MIAX, and MIAX Pearl Options allocated 84.8%, 71.3%, and 74.8, respectively, to the same cost driver). This is because: (i) a different percentage of the overall internet Services and External Market Data cost driver was allocated to the Exchange and its affiliated markets due to the factors set forth under the first step of the 2024 budget review process described above (unique technical architecture, market structure, and business requirements of each marketplace); and (ii) the Exchange itself allocated a larger portion of this cost driver to 10Gb ULL connectivity because of recent initiatives to improve the latency and determinism of its systems. The Exchange notes while the percentage it allocated to the internet Services and External Market Data cost driver is greater than its affiliated markets, the overall dollar amount allocated to the Exchange under the initial step of the 2024 budget process is lower than its affiliated markets. However, the Exchange believes that this is not, in dollar amounts, a significant difference. This is because the total dollar amount of expense covered by this cost driver is relatively small compared to other cost drivers and is due to nuances in exchange architecture that require different initial allocation amount under the first step of the 2024 budget process described above. Thus, non-significant differences in percentage allocation amounts in a smaller cost driver create the appearance of a significant difference, even though the actual difference in dollar amounts is small. For instance, despite the difference in cost allocation percentages for the internet Services and External Market Data cost driver across the Exchange and MIAX, the actual dollar amount difference is approximately only $8,576 per month, a non-significant amount.

Data Center

Data Center costs includes an allocation of the costs the Exchange incurs to provide physical connectivity in the third-party data centers where it maintains its equipment (such as dedicated space, security services, cooling and power). The Exchange notes that it does not own the Primary Data Center or the Secondary Data Center, but instead, leases space in data centers operated by third parties. The Exchange has allocated a high percentage of the Data Center cost (61.9%) to physical 10Gb ULL connectivity because the third-party data centers and the Exchange's physical equipment contained therein is the most direct cost in providing physical access to the Exchange. In other words, for the Exchange to operate in a dedicated space with connectivity by market participants to a physical trading platform, the data centers are a very tangible cost, and in turn, if the Exchange did not maintain such a presence then physical connectivity would be of no value to market participants.

Hardware and Software Maintenance and Licenses

Hardware and Software Licenses includes hardware and software licenses used to operate and monitor physical assets necessary to offer physical connectivity to the Exchange.[104] The Exchange notes that this allocation is less than MIAX Pearl Options by a significant amount, but slightly more than MIAX, as MIAX Pearl Options allocated 59.8% of its Hardware and Software Maintenance and License expense towards 10Gb ULL connectivity, while MIAX and MIAX Emerald allocated 48.5% and 50.9%, respectively, to the same category of expense. This is because MIAX Pearl Options is in the process of replacing and upgrading various hardware and software used to operate its options trading platform in order to maintain premium network performance. At the time of this filing, MIAX Pearl Options is undergoing a major hardware refresh, replacing older hardware with new hardware. This hardware includes servers, network switches, cables, optics, protocol data units, and cabinets, to maintain a state-of-the-art technology platform. Because of the timing of the hardware refresh with the timing of this filing, the Exchange has materially higher expense than its affiliates.

Depreciation

All physical assets, software, and hardware used to provide 10Gb ULL connectivity, which also includes assets used for testing and monitoring of Exchange infrastructure, were valued at cost, and depreciated or leased over periods ranging from three to five years. Thus, the depreciation cost primarily relates to servers necessary to operate the Exchange, some of which are owned by the Exchange and some of which are leased by the Exchange in order to allow

[104] This expense may be less than the Exchange's affiliated markets, specifically MIAX Pearl Options because, unlike the Exchange, MIAX Pearl Options maintains an additional gateway to accommodate its member's access and connectivity needs. This added gateway contributes to the difference in allocations between the Exchange and MIAX Pearl Options. This expense also differs in dollar amount among the Exchange, MIAX Pearl Options, and MIAX because each market may maintain and utilize a different amount of hardware and software based on its market model and infrastructure needs. The Exchange allocated a percentage of the overall cost based on actual amounts of hardware and software utilized by that market, which resulted in different cost allocations and dollar amounts.

efficient periodic technology refreshes. The Exchange also included in the Depreciation cost driver certain budgeted improvements that the Exchange intends to capitalize and depreciate with respect to 10Gb ULL connectivity in the near-term. As with the other allocated costs in the Exchange's updated Cost Analysis, the Depreciation cost was therefore narrowly tailored to depreciation related to 10Gb ULL connectivity. As noted above, the Exchange allocated 61.0% of its allocated depreciation costs to providing physical 10Gb ULL connectivity.

The Exchange also notes that this allocation differs from its affiliated markets due to a number of factors, such as the age of physical assets and software (*e.g.,* older physical assets and software were previously depreciated and removed from the allocation), or certain system enhancements that required new physical assets and software, thus providing a higher contribution to the depreciated cost. For example, the percentages the Exchange and its affiliate, MIAX, allocated to the depreciation of hardware and software used to provide 10Gb ULL connectivity are similar. However, the Exchange's dollar amount is lower than that of MIAX by approximately $35,508 per month due to two factors: first, MIAX has undergone a technology refresh since the time MIAX Emerald launched in February 2019, leading MIAX to have more hardware that software that is subject to depreciation. Second, MIAX maintains 24 matching engines while MIAX Emerald maintains only 12 matching engines. This also results in more of MIAX's hardware and software being subject to depreciation than MIAX Emerald's hardware and software due to the greater amount of equipment and software necessary to support the greater number of matching engines on MIAX.

Allocated Shared Expenses

Finally, as with other exchange products and services, a portion of general shared expenses was allocated to overall physical connectivity costs. These general shared costs are integral to exchange operations, including its ability to provide physical connectivity. Costs included in general shared expenses include office space and office expenses (*e.g.,* occupancy and overhead expenses), utilities, recruiting and training, marketing and advertising costs, professional fees for legal, tax and accounting services (including external and internal audit expenses), and telecommunications. Similarly, the cost of paying directors to serve on the Exchange's Board of Directors is also included in the Exchange's general shared expense cost driver.[105] These general shared expenses are incurred by the Exchange's parent company, MIH, as a direct result of operating the Exchange and its affiliated markets.

The Exchange employed a process to determine a reasonable percentage to allocate general shared expenses to 10Gb ULL connectivity pursuant to its multi-layered allocation process. First, general expenses were allocated among the Exchange and affiliated markets as described above. Then, the general shared expense assigned to the Exchange was allocated across core services of the Exchange, including connectivity. Then, these costs were further allocated to sub-categories within the final categories, *i.e.,* 10Gb ULL connectivity as a sub-category of connectivity. In determining the percentage of general shared expenses allocated to connectivity that ultimately apply to 10Gb ULL connectivity, the Exchange looked at the percentage allocations of each of the cost drivers and determined a reasonable allocation percentage. The Exchange also held meetings with senior management, department heads, and the Finance Team to determine the proper amount of the shared general expense to allocate to 10GBb ULL connectivity. The Exchange, therefore, believes it is reasonable to assign an allocation, in the range of allocations for other cost drivers, while continuing to ensure that this expense is only allocated once. Again, the general shared expenses are incurred by the Exchange's parent company as a result of operating the Exchange and its affiliated markets and it is therefore reasonable to allocate a percentage of those expenses to the Exchange and ultimately to specific product offerings such as 10Gb ULL connectivity.

Again, a portion of all shared expenses were allocated to the Exchange (and its affiliated markets) which, in turn, allocated a portion of that overall allocation to all physical connectivity on the Exchange. The Exchange then allocated 51.5% of the portion allocated to physical connectivity to 10Gb ULL connectivity. The Exchange believes this allocation percentage is reasonable because, while the overall dollar amount may be higher than other cost drivers, the 51.5% is based on and in line with the percentage allocations of each of the Exchange's other cost drivers. The percentage allocated to 10Gb ULL connectivity also reflects its importance to the Exchange's strategy and necessity towards the nature of the Exchange's overall operations, which is to provide a resilient, highly deterministic trading system that relies on faster 10Gb ULL connectivity than the Exchange's competitors to maintain premium performance. This allocation reflects the Exchange's focus on providing and maintaining high performance network connectivity, of which 10Gb ULL connectivity is a main contributor. The Exchange differentiates itself by offering a ''premium-product'' network experience, as an operator of a high performance, ultra-low latency network with unparalleled system throughput, which system networks can support access to three distinct options markets and multiple competing market-makers having affirmative obligations to continuously quote over 1,100,000 distinct trading products (per exchange), and the capacity to handle approximately 18 million quote messages per second. The ''premium-product'' network experience enables users of 10Gb ULL connections to receive the network monitoring and reporting services for those approximately 1,100,000 distinct trading products. These value add services are part of the Exchange's strategy for offering a high performance trading system, which utilizes 10Gb ULL connectivity.

The Exchange notes that the 51.5% allocation of general shared expenses for physical 10Gb ULL connectivity is higher than that allocated to general shared expenses for Limited Service MEI Ports. This is based on its allocation methodology that weighted costs attributable to each core service. While physical connectivity has several areas where certain tangible costs are heavily weighted towards providing such service (*e.g.,* Data Center, as described above), Limited Service MEI Ports do not require as many broad or indirect resources as other core services.

* * * * *

Approximate Cost per 10Gb ULL Connection per Month

After determining the approximate allocated monthly cost related to 10Gb connectivity, the total monthly cost for 10Gb ULL connectivity of $1,289,111 was divided by the number of physical 10Gb ULL connections the Exchange maintained at the time that proposed pricing was determined (102), to arrive

[105] The Exchange notes that MEMX allocated a precise amount of 10% of the overall cost for directors to providing physical connectivity. *See* Securities Exchange Act Release No. 95936 (September 27, 2022), 87 FR 59845 (October 3, 2022) (SR–MEMX–2022–26). The Exchange does not calculate is expenses at that granular a level. Instead, director costs are included as part of the overall general allocation.

at a cost of approximately $12,638 per month, per physical 10Gb ULL connection. Due to the nature of this particular cost, this allocation methodology results in an allocation among the Exchange and its affiliated markets based on set quantifiable criteria, *i.e.,* actual number of 10Gb ULL connections.

* * * * *

Costs Related to Offering Limited Service MEI Ports

The following chart details the individual line-item costs considered by the Exchange to be related to offering Limited Service MEI Ports as well as the percentage of the Exchange's overall costs such costs represent for such area (*e.g.,* as set forth below, the Exchange allocated approximately 6.7% of its overall Human Resources cost to offering Limited Service MEI Ports).

Cost drivers	Allocated annual cost [m]	Allocated monthly cost [n]	% of all
Human Resources	$1,495,643	$124,637	6.7
Connectivity (external fees, cabling, switches, etc.)	2,643	220	2.8
Internet Services and External Market Data	14,965	1,247	2.8
Data Center	62,061	5,172	4.0
Hardware and Software Maintenance and Licenses	49,543	4,129	2.8
Depreciation	112,425	9,369	3.2
Allocated Shared Expenses	768,952	64,079	8.7
Total	2,506,232	208,853	6.5

[m] *See supra* note k (describing rounding of Annual Costs).
[n] *See supra* note l (describing rounding of Monthly Costs based on Annual Costs).

Below are additional details regarding each of the line-item costs considered by the Exchange to be related to offering Limited Service MEI Ports. While some costs were attempted to be allocated as equally as possible among the Exchange and its affiliated markets, the Exchange notes that some of its cost allocation percentages for certain cost drivers differ when compared to the same cost drivers described by the Exchange's affiliated markets in their similar proposed fee changes for connectivity and ports. This is because the Exchange's cost allocation methodology utilizes the actual projected costs of the Exchange (which are specific to the Exchange, and are independent of the costs projected and utilized by the Exchange's affiliated markets) to determine its actual costs, which may vary across the Exchange and its affiliated markets based on factors that are unique to each marketplace. The Exchange provides additional explanation below (including the reason for the deviation) for the significant differences.

The Exchange also notes that expenses included in its 2024 fiscal year budget and this proposal are generally higher than its 2023 fiscal year budget and Cost Analysis included in prior filings. As more fully described below and throughout this filing, this is due to a number of factors, such as, critical vendors and suppliers increasing costs they charge the Exchange, significant exchange staff headcount increases, increased data center costs from the Exchange's data center providers in multiple locations and facilities, higher technology and communications costs, planned hardware refreshes, and system capacity upgrades that increase depreciation expense. Specifically, with regard to employee compensation, the 2024 fiscal year budget includes additional expenses related to increased headcount and new hires that are needed to support the Exchange as it continues to grow (the Exchange and its affiliated companies are projected to hire over 60 additional staff in 2024). Hardware and software expenses have also increased primarily due to price increases from critical vendors and equipment suppliers. Further, the Exchange budgeted for additional hardware and software needs to support the Exchange's continued growth and expansion. Depreciation and amortization have likewise increased due to recent and planned refreshes in Exchange hardware and software. This new equipment and software then becomes depreciable, as described below. Data center costs have also increased due the following: the Exchange expanding its footprint within its data center; and the data center vendor increasing the costs it charges the Exchange. Lastly, allocated shared expenses have increased due to the overall budgeted increase in costs from 2023 to 2024 necessary to operate and support the Exchange as described below.

The updated Cost Analysis using projected 2024 expenses caused some allocation percentages in this filing to differ slightly (≤3%) from past filings that relied on projected 2023 expenses. This is due to various reasons. For example, the slight differences in allocation percentage for the Human Resources cost driver is due to both changes in headcount in 2024 and also changes to the percentage of employee time allocated to these services based on changing projects and initiatives in 2024 versus 2023. For example, the Exchange recently hired a Head of Data Services whose time is entirely allocated to the market data cost driver. These types of changes in the Human Resources cost driver impact the final percentage amount of total cost allocated towards overall connectivity, including 10Gb ULL connectivity. There are no changes to the overall percentage allocation amounts applied to the product groups (*e.g.,* network connectivity) for each of the non-Human Resources cost drivers in the current filing based on 2024 expense versus the prior 2023 filings. However, within each of those product groups, slight changes to the amount of usage of the individual products within that group (in 2024 versus 2023) will have an impact on the individual product's percentage allocation within that entire product group. For example, a decrease in 1Gb connectivity lines in 2024 versus 2023 will have an impact on the percentage allocation of costs to 1Gb lines in 2024 versus 2023, which will also impact the individual percentage allocation of costs to 10Gb ULL lines, within the entire product group. Despite these minor shifts in product usage and changes in headcount and employee mix which resulted in non-material changes in percentage allocation amounts, the Exchange applied the same rules and principles to its 2024 Cost Analysis versus its 2023 Cost Analysis.

Human Resources

With respect to Limited Service MEI Ports, the Exchange calculated Human Resources cost by taking an allocation of employee time for employees whose functions include providing Limited

Service MEI Ports and maintaining performance thereof (including a broader range of employees such as technical operations personnel, market operations personnel, and software engineering personnel) as well as a limited subset of personnel with ancillary functions related to maintaining such connectivity (such as sales, membership, and finance personnel). Just as described above for 10Gb ULL connectivity, the estimates of Human Resources cost were again determined by consulting with department leaders, determining which employees are involved in tasks related to providing Limited Service MEI Ports and maintaining performance thereof, and confirming that the proposed allocations were reasonable based on an understanding of the percentage of their time such employees devote to tasks related to providing Limited Service MEI Ports and maintaining performance thereof. This includes personnel from the following Exchange departments that are predominately involved in providing Limited Service MEI Ports: Business Systems Development, Trading Systems Development, Systems Operations and Network Monitoring, Network and Data Center Operations, Listings, Trading Operations, and Project Management. The Exchange notes that senior level executives were allocated Human Resources costs to the extent they are involved in overseeing tasks specifically related to providing Limited Service MEI Ports. Senior level executives were only allocated Human Resources costs to the extent that they are involved in managing personnel responsible for tasks integral to providing and maintaining Limited Service MEI Ports. The Human Resources cost was again calculated using a blended rate of compensation reflecting salary, equity and bonus compensation, benefits, payroll taxes, and 401(k) matching contributions.

Connectivity (External Fees, Cabling, Switches, etc.)

The Connectivity cost includes external fees paid to connect to other exchanges and cabling and switches, as described above.

Internet Services and External Market Data

The next cost driver consists of internet services and external market data. Internet services includes third-party service providers that provide the internet, fiber and bandwidth connections between the Exchange's networks, primary and secondary data centers, and office locations in Princeton and Miami. For purposes of Limited Service MEI Ports, the Exchange also includes a portion of its costs related to external market data. External market data includes fees paid to third parties, including other exchanges, to receive and consume market data from other markets. The Exchange includes external market data costs towards the provision of Limited Service MEI Ports because such market data is necessary (in addition to physical connectivity) to offer certain services related to such ports, such as validating orders on entry against the NBBO and checking for other conditions (*e.g.,* halted securities).[106] Thus, since market data from other exchanges is consumed at the Exchange's Limited Service MEI Port level in order to validate orders, before additional processing occurs with respect to such orders, the Exchange believes it is reasonable to allocate a small amount of such costs to Limited Service MEI Ports.

The Exchange notes that the allocation for the internet Services and External Market Data cost driver is greater than that of its affiliate, MIAX Pearl Options, as MIAX Emerald allocated 2.8% of its internet Services and External Market Data expense towards Limited Service MEI Ports, while MIAX Pearl Options allocated 1.1% to its Full Service MEO Ports for the same cost driver. The allocation percentages set forth above differ because they directly correspond with the number of applicable ports utilized on each exchange. For December 2023, MIAX Emerald Market Makers utilized 1,070 Limited Service MEI ports and MIAX Market Makers utilized 1,785 Limited Service MEI ports. When compared to Full Service Port (Bulk and Single) usage, for December 2023, MIAX Pearl Options Members utilized only 360 Full Service MEO Ports (Bulk and Single), far fewer than number of Limited Service MEI Ports utilized by Market Makers on MIAX and MIAX Emerald, thus resulting in a smaller cost allocation. There is increased cost associated with supporting a higher number of ports (requiring more hardware and other technical infrastructure and internet Service), thus the Exchange allocates a higher percentage of expense than MIAX Pearl Options, which has a lower port count.

Data Center

Data Center costs includes an allocation of the costs the Exchange incurs to provide Limited Service MEI Ports in the third-party data centers where it maintains its equipment as well as related costs for market data to then enter the Exchange's system via Limited Service MEI Ports (the Exchange does not own the Primary Data Center or the Secondary Data Center, but instead, leases space in data centers operated by third parties).

Hardware and Software Maintenance and Licenses

Hardware and Software Licenses includes hardware and software licenses used to monitor the health of the order entry services provided by the Exchange, as described above.

The Exchange notes that this allocation is greater than its affiliate, MIAX Pearl Options, as MIAX Emerald allocated 2.8% of its Hardware and Software Maintenance and License expense towards Limited Service MEI Ports, while MIAX Pearl Options allocated 1.1% to its Full Service MEO Ports (Bulk and Single) for the same category of expense. The allocation percentages set forth above differ because they correspond with the number of applicable ports utilized on each exchange. For December 2023, MIAX Market Makers utilized 1,785Limited Service MEI ports and MIAX Emerald Market Makers utilized 1,070 Limited Service MEI Ports. When compared to Full Service Port (Bulk and Single) usage, for December 2023, MIAX Pearl Options Members utilized only 260 Full Service MEO Ports (Bulk and Single), far fewer than number of Limited Service MEI Ports utilized by Market Makers on MIAX and MIAX Emerald, thus resulting in a smaller cost allocation. There is increased cost associated with supporting a higher number of ports (requiring more hardware and other technical infrastructure), thus the Exchange allocates a higher percentage of expense than MIAX Pearl Options, which has a lower port count.

Depreciation

The vast majority of the software the Exchange uses to provide Limited Service MEI Ports has been developed in-house and the cost of such development, which takes place over an extended period of time and includes not just development work, but also quality assurance and testing to ensure the software works as intended, is depreciated over time once the software is activated in the production environment. Hardware used to provide Limited Service MEI Ports includes equipment used for testing and monitoring of order entry infrastructure

[106] The Exchange notes that MEMX separately allocated 7.5% of its external market data costs to providing physical connectivity. *See* Securities Exchange Act Release No. 95936 (September 27, 2022), 87 FR 59845 (October 3, 2022) (SR–MEMX–2022–26).

and other physical equipment the Exchange purchased and is also depreciated over time.

All hardware and software, which also includes assets used for testing and monitoring of order entry infrastructure, were valued at cost, depreciated or leased over periods ranging from three to five years. Thus, the depreciation cost primarily relates to servers necessary to operate the Exchange, some of which is owned by the Exchange and some of which is leased by the Exchange in order to allow efficient periodic technology refreshes. The Exchange allocated 3.2% of all depreciation costs to providing Limited Service MEI Ports. The Exchange allocated depreciation costs for depreciated software necessary to operate the Exchange because such software is related to the provision of Limited Service MEI Ports. As with the other allocated costs in the Exchange's updated Cost Analysis, the Depreciation cost driver was therefore narrowly tailored to depreciation related to Limited Service MEI Ports.

The Exchange notes that this allocation differs from its affiliated markets due to a number of factors, such as the age of physical assets and software (*e.g.,* older physical assets and software were previously depreciated and removed from the allocation), or certain system enhancements that required new physical assets and software, thus providing a higher contribution to the depreciated cost. For example, the Exchange notes that the percentages it and its affiliate, MIAX, allocated to the depreciation cost driver for Limited Service MEI Ports differ by only 1.7%. However, MIAX's approximate dollar amount is greater than that of MIAX Emerald by approximately $8,773er month. This is due to two primary factors. First, MIAX has under gone a technology refresh since the time MIAX Emerald launched in February 2019, leading to it having more hardware that software that is subject to depreciation. Second, MIAX maintains 24 matching engines while MIAX Emerald maintains only 12 matching engines. This also results in more of MIAX's hardware and software being subject to depreciation than MIAX Emerald's hardware and software due to the greater amount of equipment and software necessary to support the greater number of matching engines on the Exchange.

Allocated Shared Expenses

Finally, a portion of general shared expenses was allocated to overall Limited Service MEI Ports costs as without these general shared costs the Exchange would not be able to operate in the manner that it does and provide Limited Service MEI Ports. The costs included in general shared expenses include general expenses of the Exchange, including office space and office expenses (*e.g.,* occupancy and overhead expenses), utilities, recruiting and training, marketing and advertising costs, professional fees for legal, tax and accounting services (including external and internal audit expenses), and telecommunications costs. The Exchange again notes that the cost of paying directors to serve on its Board of Directors is included in the calculation of Allocated Shared Expenses, and thus a portion of such overall cost amounting to less than 9% of the overall cost for directors was allocated to providing Limited Service MEI Ports. The Exchange notes that the 8.7% allocation of general shared expenses for Limited Service MEI Ports is lower than that allocated to general shared expenses for physical connectivity based on its allocation methodology that weighted costs attributable to each Core Service based on an understanding of each area. While Limited Service MEI Ports have several areas where certain tangible costs are heavily weighted towards providing such service (*e.g.,* Data Center, as described above), 10Gb ULL connectivity requires a broader level of support from Exchange personnel in different areas, which in turn leads to a broader general level of cost to the Exchange.

Lastly, the Exchange notes that this allocation is greater than its affiliate, MIAX Pearl Options, as MIAX Emerald allocated 8.7% of its Allocated Shared Expense towards Limited Service MEI Ports, while MIAX Pearl Options allocated 3.0% to its Full Service MEO Ports (Bulk and Single) for the same category of expense. The allocation percentages set forth above differ because they correspond with the number of applicable ports utilized on each exchange. For December 2023, MIAX Market Makers utilized 1,785 Limited Service MEI ports and MIAX Emerald Market Makers utilized 1,070 Limited Service MEI Ports. When compared to Full Service Port (Bulk and Single) usage, for December 2023, MIAX Pearl Options Members utilized only 360 Full Service MEO Ports (Bulk and Single), far fewer than number of Limited Service MEI Ports utilized by Market Makers on MIAX Emerald, thus resulting in a smaller cost allocation. There is increased cost associated with supporting a higher number of ports (requiring more hardware and other technical infrastructure), thus the Exchange allocates a higher percentage of expense than MIAX Pearl Options which has a lower port count.[107]

* * * * *

Approximate Cost per Limited Service MEI Port per Month

Based on projected 2024 data, the total monthly cost allocated to Limited Service MEI Ports of $208,853 was divided by the total number of Limited Service MEI Ports utilized by Members in December, which was 1,070 (and includes free and charged ports), resulting in an approximate cost of $195 per port per month (when rounding to the nearest dollar). The Exchange used the total number of Limited Service MEI Ports it maintained in August for all Members and included free and charged ports. However, in prior filings, the Exchange did not include the expense of maintaining the two free Limited Service MEI Ports per matching engine that each Member receives when the Exchange discussed the approximate cost per port per month, but did include the two free Limited Service MEI Ports in the total expense amounts. As described herein, the Exchange changed its proposed fee structure since past filings to now offer four free Limited Service MEI Ports per matching engine to which each Member connects. After the first four free Limited Service MEI Ports, the Exchange proposes to charge $420 per Limited Service MEI Port per matching engine, up to a total of fourteen (14) Limited Service MEI Ports per matching engine.

For the sake of clarity, if a Member wanted to connect to all 12 of the Exchange's matching engines and utilize the maximum number of Limited Service MEI Ports on each matching engine (*i.e.,* 14), that Member would have a total of 168 Limited Service MEI Ports (12 matching engines multiplied by 14 Limited Service MEI Ports per matching engine). With the proposed increase to now provide four Limited Service MEI Ports for free on each matching engine, that particular Member would receive 48 free Limited Service MEI Ports (4 free Limited Service MEI Ports multiplied by 12 matching engines), and be charged for the remaining 120 Limited Service MEI Ports (168 total Limited Service MEI

[107] MIAX allocated a slightly lower amount (7.3%) of this cost as compared to MIAX Emerald (8.7%). This is not a significant difference. However, both allocations resulted in a similar cost amount (approximately $0.6 million for MIAX and $0.8 million for MIAX Emerald), despite MIAX having a higher number of Limited Service MEI Ports. MIAX Emerald was allocated a higher cost per Limited Service MEI Port due to the additional resources and expenditures associated with maintaining its recently enhanced low latency network.

Ports across all matching engines minus 48 free Limited Service MEI Ports across all matching engines).

As mentioned above, Members utilized a total of 1,070 Limited Service MEI Ports in the month of December 2023 (free and charged ports combined). Using December 2023 data to extrapolate out after the proposed changes herein go into effect, the total number of Limited Service MEI Ports that the Exchange would not charge for as a result of this increase in free ports is 494 (meaning the Exchange would charge for only 576 ports) and amounts to a total expense of $96,330 per month to the Exchange ($195 per port multiplied by 494 free Limited Service MEI Ports).

* * * * *

Cost Analysis—Additional Discussion

In conducting its Cost Analysis, the Exchange did not allocate any of its expenses in full to any core services (including physical connectivity or Limited Service MEI Ports) and did not double-count any expenses. Instead, as described above, the Exchange allocated applicable cost drivers across its core services and used the same Cost Analysis to form the basis of this proposal and the filings the Exchange submitted proposing fees for proprietary data feeds offered by the Exchange. For instance, in calculating the Human Resources expenses to be allocated to physical connections based upon the above described methodology, the Exchange has a team of employees dedicated to network infrastructure and with respect to such employees the Exchange allocated network infrastructure personnel with a high percentage of the cost of such personnel (48.1%) given their focus on functions necessary to provide 10Gb ULL physical connections. The salaries of those same personnel were allocated only 7.8% to Limited Service MEI Ports and the remaining 44.1% was allocated to 1Gb connectivity, other port services, transaction services, membership services and market data. The Exchange did not allocate any other Human Resources expense for providing physical connections to any other employee group, outside of a smaller allocation of 17.7% for 10Gb ULL connectivity or 17.7% for the entire network, of the cost associated with certain specified personnel who work closely with and support network infrastructure personnel. In contrast, the Exchange allocated much smaller percentages of costs (4% or less) across a wider range of personnel groups in order to allocate Human Resources costs to providing Limited Service MEI Ports. This is because a much wider range of personnel are involved in functions necessary to offer, monitor and maintain Limited Service MEI Ports but the tasks necessary to do so are not a primary or full-time function.

In total, the Exchange allocated 29% of its personnel costs to providing 10Gb ULL and 1Gb connectivity and 6.7% of its personnel costs to providing Limited Service MEI Ports, for a total allocation of 35.7% Human Resources expense to provide these specific connectivity and port services. In turn, the Exchange allocated the remaining 64.3% of its Human Resources expense to membership services, transaction services, other port services and market data. Thus, again, the Exchange's allocations of cost across core services were based on real costs of operating the Exchange and were not double-counted across the core services or their associated revenue streams.

As another example, the Exchange allocated depreciation expense to all core services, including physical connections and Limited Service MEI Ports, but in different amounts. The Exchange believes it is reasonable to allocate the identified portion of such expense because such expense includes the actual cost of the computer equipment, such as dedicated servers, computers, laptops, monitors, information security appliances and storage, and network switching infrastructure equipment, including switches and taps that were purchased to operate and support the network. Without this equipment, the Exchange would not be able to operate the network and provide connectivity services to its Members and non-Members and their customers. However, the Exchange did not allocate all of the depreciation and amortization expense toward the cost of providing connectivity services, but instead allocated approximately 64.2% of the Exchange's overall depreciation and amortization expense to connectivity services (61% attributed to 10Gb ULL physical connections and 3.2% to Limited Service MEI Ports). The Exchange allocated the remaining depreciation and amortization expense (approximately 35.8%) toward the cost of providing transaction services, membership services, other port services, 1Gb connectivity, and market data

The Exchange notes that its revenue estimates are based on projections across all potential revenue streams and will only be realized to the extent such revenue streams actually produce the revenue estimated. The Exchange does not yet know whether such expectations will be realized. For instance, in order to generate the revenue expected from connectivity, the Exchange will have to be successful in retaining existing clients that wish to maintain physical connectivity and/or Limited Service MEI Ports or in obtaining new clients that will purchase such services. Similarly, the Exchange will have to be successful in retaining a positive net capture on transaction fees in order to realize the anticipated revenue from transaction pricing.

The Exchange notes that the Cost Analysis is based on the Exchange's 2024 fiscal year of operations and projections. It is possible, however, that actual costs may be higher or lower. To the extent the Exchange sees growth in use of connectivity services it will receive additional revenue to offset future cost increases.

However, if use of connectivity services is static or decreases, the Exchange might not realize the revenue that it anticipates or needs in order to cover applicable costs. Accordingly, the Exchange is committing to conduct a one-year review after implementation of these fees. The Exchange expects that it may propose to adjust fees at that time, to increase fees in the event that revenues fail to cover costs and a reasonable mark-up of such costs. Similarly, the Exchange may propose to decrease fees in the event that revenue materially exceeds our current projections. In addition, the Exchange will periodically conduct a review to inform its decision making on whether a fee change is appropriate (*e.g.,* to monitor for costs increasing/decreasing or subscribers increasing/decreasing, etc. in ways that suggest the then-current fees are becoming dislocated from the prior cost-based analysis) and would propose to increase fees in the event that revenues fail to cover its costs and a reasonable mark-up, or decrease fees in the event that revenue or the mark-up materially exceeds our current projections. In the event that the Exchange determines to propose a fee change, the results of a timely review, including an updated cost estimate, will be included in the rule filing proposing the fee change. More generally, the Exchange believes that it is appropriate for an exchange to refresh and update information about its relevant costs and revenues in seeking any future changes to fees, and the Exchange commits to do so.

Projected Revenue [108]

The proposed fees will allow the Exchange to cover certain costs incurred by the Exchange associated with providing and maintaining necessary hardware and other network infrastructure as well as network monitoring and support services; without such hardware, infrastructure, monitoring and support the Exchange would be unable to provide the connectivity and port services. Much of the cost relates to monitoring and analysis of data and performance of the network via the subscriber's connection(s). The above cost, namely those associated with hardware, software, and human capital, enable the Exchange to measure network performance with nanosecond granularity. These same costs are also associated with time and money spent seeking to continuously improve the network performance, improving the subscriber's experience, based on monitoring and analysis activity. The Exchange routinely works to improve the performance of the network's hardware and software. The costs associated with maintaining and enhancing a state-of-the-art exchange network is a significant expense for the Exchange, and thus the Exchange believes that it is reasonable and appropriate to help offset those costs by amending fees for connectivity services. Subscribers, particularly those of 10Gb ULL connectivity, expect the Exchange to provide this level of support to connectivity so they continue to receive the performance they expect. This differentiates the Exchange from its competitors. As detailed above, the Exchange has five primary sources of revenue that it can potentially use to fund its operations: transaction fees, fees for connectivity services, membership and regulatory fees, and market data fees. Accordingly, the Exchange must cover its expenses from these five primary sources of revenue.

The Exchange's Cost Analysis estimates the annual cost to provide 10Gb ULL connectivity services will equal $15,469,330. Based on current 10Gb ULL connectivity services usage, the Exchange would generate annual revenue of approximately $18,020,568. The Exchange believes this represents a modest profit of 14.2% when compared to the cost of providing 10Gb ULL connectivity services.

The Exchange's Cost Analysis estimates the annual cost to provide Limited Service MEI Port services will equal $2,506,232. Based on December 2023 data for Limited Service MEI Port usage and counting for the proposed increase in free Limited Service MEI Ports and proposed increase in the monthly fee from $100 to $420 per port, the Exchange would generate annual revenue of approximately $2,903,040. The Exchange believes this would result in an estimated profit margin of 13.7% after calculating the cost of providing Limited Service MEI Port services. The Exchange notes that the cost to provide Limited Service MEI Ports is higher than the cost for the Exchange's affiliate, MIAX Pearl Options, to provide Full Service MEO Ports due to the substantially higher number of Limited Service MEI Ports used by Exchange Members. For example, utilizing December 2023 data, MIAX Emerald Market Makers utilized 1,070 Limited Service MEI Ports compared to only 360 Full Service MEO Ports (Bulk and Single combined) allocated to MIAX Pearl Options members.

Based on the above discussion, the Exchange believes that even if the Exchange earns the above revenue or incrementally more or less, the proposed fees are fair and reasonable because they will not result in pricing that deviates from that of other exchanges or a supra-competitive profit, when comparing the total expense of the Exchange associated with providing 10Gb ULL connectivity and Limited Service MEI Port services versus the total projected revenue of the Exchange associated with network 10Gb ULL connectivity and Limited Service MEI Port services.

The Exchange also notes that this the resultant profit margin differs slightly from the profit margins set forth in similar fee filings by its affiliated markets. This is not atypical among exchanges and is due to a number of factors that differ between these four markets, including: different market models, market structures, and product offerings (equities, options, price-time, pro-rata, simple, and complex); different pricing models; different number of market participants and connectivity subscribers; different maintenance and operations costs, as described in the cost allocation methodology above; different technical architecture (*e.g.,* the number of matching engines per exchange, *i.e.,* the Exchange maintains only 12 matching engines while MIAX maintains 24 matching engines); and different maturity phase of the Exchange and its affiliated markets (*i.e.,* start-up versus growth versus more mature). All of these factors contribute to a unique and differing level of profit margin per exchange.

Further, the Exchange proposes to charge rates that are comparable to, or lower than, similar fees for similar products charged by competing exchanges. For example, for 10Gb ULL connectivity, the Exchange proposes a lower fee than the fee charged by Nasdaq for its comparable 10Gb Ultra fiber connection ($13,500 per month for the Exchange vs. $15,000 per month for Nasdaq).[109] NYSE American charges even higher fees for its comparable 10GB LX LCN connection than the Exchange's proposed fees ($13,500 per month for the Exchange vs. $22,000 per month for NYSE American).[110] Accordingly, the Exchange believes that comparable and competitive pricing are key factors in determining whether a proposed fee meets the requirements of the Act, regardless of whether that same fee across the Exchange's affiliated markets leads to slightly different profit margins due to factors outside of the Exchange's control (*i.e.,* more subscribers to 10Gb ULL connectivity on the Exchange than its affiliated markets or vice versa).

* * * * *

The Exchange operated at a cumulative net annual loss from the time it launched operations in 2019 through fiscal year 2021.[111] This was due to a number of factors, one of which was choosing to forgo revenue by offering certain products, such as low latency connectivity, at lower rates than other options exchanges to attract order flow and encourage market participants to experience the high determinism, low latency, and resiliency of the Exchange's trading systems. The Exchange does not believe that it should now be penalized for seeking to raise its fees as it now needs to upgrade its technology and absorb increased costs. Therefore, the Exchange believes the proposed fees are reasonable because they are based on both relative costs to the Exchange to provide dedicated 10Gb ULL connectivity and Limited Service MEI Ports, the extent to which the product drives the Exchange's overall costs and the relative value of the product, as well

[108] For purposes of calculating projected 2024 revenue for 10Gb ULL connectivity, the Exchange used revenues for the most recently completed full month.

[109] *See* NASDAQ Pricing Schedule, Options 7, Section 3, Ports and Other Services *and* NASDAQ Rules, General 8: Connectivity, Section 1. Co-Location Services.

[110] *See* NYSE American Options Fee Schedule, Section V.A. Port Fees *and* Section V.B. Co-Location Fees.

[111] Beginning with fiscal year 2022, the Exchange incurred a net gain of approximately $14 million. *See* Exchange's Form 1/A, Application for Registration or Exemption from Registration as a National Securities Exchange, filed June 26, 2023, *available at https://www.sec.gov/Archives/edgar/vprr/2300/23007742.pdf.*

as the Exchange's objective to make access to its Systems broadly available to market participants. The Exchange also believes the proposed fees are reasonable because they are designed to generate annual revenue to recoup the Exchange's costs of providing dedicated 10Gb ULL connectivity and Limited Service MEI Ports.

The Exchange notes that its revenue estimate is based on projections and will only be realized to the extent customer activity produces the revenue estimated. As a competitor in the hyper-competitive exchange environment, and an exchange focused on driving competition, the Exchange does not yet know whether such projections will be realized. For instance, in order to generate the revenue expected from 10Gb ULL connectivity and Limited Service MEI Ports, the Exchange will have to be successful in retaining existing clients that wish to utilize 10Gb ULL connectivity and Limited Service MEI Ports and/or obtaining new clients that will purchase such access. To the extent the Exchange is successful in encouraging new clients to utilize 10Gb ULL connectivity and Limited Service MEI Ports, the Exchange does not believe it should be penalized for such success. To the extent the Exchange has mispriced and experiences a net loss in connectivity clients or in transaction activity, the Exchange could experience a net reduction in revenue. While the Exchange is supportive of transparency around costs and potential margins (applied across all exchanges), as well as periodic review of revenues and applicable costs (as discussed below), the Exchange does not believe that these estimates should form the sole basis of whether or not a proposed fee is reasonable or can be adopted. Instead, the Exchange believes that the information should be used solely to confirm that an Exchange is not earning—or seeking to earn—supra-competitive profits. The Exchange believes the Cost Analysis and related projections in this filing demonstrate this fact.

The Exchange is owned by a holding company that is the parent company of four exchange markets and, therefore, the Exchange and its affiliated markets must allocate shared costs across all of those markets accordingly, pursuant to the above-described allocation methodology. In contrast, the Investors Exchange LLC (''IEX'') and MEMX, which are currently each operating only one exchange, in their recent non-transaction fee filings allocate the entire amount of that same cost to a single exchange. This can result in lower profit margins for the non-transaction fees proposed by IEX and MEMX because the single allocated cost does not experience the efficiencies and synergies that result from sharing costs across multiple exchanges. The Exchange and its affiliated markets often share a single cost, which results in cost efficiencies that can cause a broader gap between the allocated cost amount and projected revenue, even though the fee levels being proposed are lower or competitive with competing markets (as described above). To the extent that the application of a cost-based standard results in Commission Staff making determinations as to the appropriateness of certain profit margins, the Exchange believes that Commission Staff should also consider whether the proposed fee level is comparable to, or competitive with, the same fee charged by competing exchanges and how different cost allocation methodologies (such as across multiple markets) may result in different profit margins for comparable fee levels. Further, if Commission Staff is making determinations as to appropriate profit margins in their approval of exchange fees, the Exchange believes that the Commission should be clear to all market participants as to what they have determined is an appropriate profit margin and should apply such determinations consistently and, in the case of certain legacy exchanges, retroactively, if such standards are to avoid having a discriminatory effect.

Further, as is reflected in the proposal, the Exchange continuously and aggressively works to control its costs as a matter of good business practice. A potential profit margin should not be evaluated solely on its size; that assessment should also consider cost management and whether the ultimate fee reflects the value of the services provided. For example, a profit margin on one exchange should not be deemed excessive where that exchange has been successful in controlling its costs, but not excessive on another exchange where that exchange is charging comparable fees but has a lower profit margin due to higher costs. Doing so could have the perverse effect of not incentivizing cost control where higher costs alone could be used to justify fees increases.

The Proposed Pricing Is Not Unfairly Discriminatory and Provides for the Equitable Allocation of Fees, Dues, and Other Charges

The Exchange believes that the proposed fees are reasonable, fair, equitable, and not unfairly discriminatory because they are designed to align fees with services provided and will apply equally to all subscribers.

10Gb ULL Connectivity

The Exchange believes that the proposed fees are equitably allocated among users of the network connectivity and port alternatives, as the users of 10Gb ULL connections consume substantially more bandwidth and network resources than users of 1Gb ULL connection. Specifically, the Exchange notes that 10Gb ULL connection users account for more than 99% of message traffic over the network, driving other costs that are linked to capacity utilization, as described above, while the users of the 1Gb ULL connections account for less than 1% of message traffic over the network. In the Exchange's experience, users of the 1Gb connections do not have the same business needs for the high-performance network as 10Gb ULL users.

The Exchange's high-performance network and supporting infrastructure (including employee support), provides unparalleled system throughput with the network ability to support access to several distinct options markets. To achieve a consistent, premium network performance, the Exchange must build out and maintain a network that has the capacity to handle the message rate requirements of its most heavy network consumers. These billions of messages per day consume the Exchange's resources and significantly contribute to the overall network connectivity expense for storage and network transport capabilities. The Exchange must also purchase additional storage capacity on an ongoing basis to ensure it has sufficient capacity to store these messages to satisfy its record keeping requirements under the Exchange Act.[112] Thus, as the number of messages an entity increases, certain other costs incurred by the Exchange that are correlated to, though not directly affected by, connection costs (*e.g.,* storage costs, surveillance costs, service expenses) also increase. Given this difference in network utilization rate, the Exchange believes that it is reasonable, equitable, and not unfairly discriminatory that the 10Gb ULL users pay for the vast majority of the shared network resources from which all market participants' benefit.

Limited Service MEI Ports

The proposed changes to the monthly fee for Limited Service MEI Ports is not unfairly discriminatory because it

[112] 17 CFR 240.17a–1 (recordkeeping rule for national securities exchanges, national securities associations, registered clearing agencies and the Municipal Securities Rulemaking Board).

would apply to all Market Makers equally. All Market Makers would now be eligible to receive four (4) free Limited Service MEI Ports and those that elect to purchase more would be subject to the same monthly rate regardless of the number of additional Limited Service MEI Ports they purchase. Certain market participants choose to purchase additional Limited Service MEI Ports based on their own particular trading/quoting strategies and feel they need a certain number of connections to the Exchange to execute on those strategies. Other market participants may continue to choose to only utilize the free Limited Service MEI Ports to accommodate their own trading or quoting strategies, or other business models. All market participants elect to receive or purchase the amount of Limited Service MEI Ports they require based on their own business decisions and all market participants would be subject to the same fee structure and flat fee. Every market participant may receive up to four (4) free Limited Service MEI Ports and those that choose to purchase additional Limited Service MEI Ports may elect to do so based on their own business decisions and would continue to be subject to the same flat fee. The Exchange notes that it filed to amend this fee in 2020 and that filing contained the same fee structure, *i.e.,* a certain number of free Limited Service MEI Ports coupled with a flat fee for additional Limited Service MEI Ports.[113] At that time, the Commission did not find the structure to be unfairly discriminatory by virtue of that proposal surviving the 60-day suspension period. Therefore, the proposed changes to the fees for Limited Service MEI Ports is not unfairly discriminatory because it would continue to apply to all market participants equally and provides a fee structure that includes four free Limited Service MEI Ports for one monthly rate that was previously in place and filed with the Commission.

The Exchange believes that its proposed fee for Limited Service MEI Ports is reasonable, fair and equitable, and not unfairly discriminatory because it is designed to align fees with services provided, will apply equally to all Members that are assigned Limited Service MEI Ports (either directly or through a Service Bureau), and will minimize barriers to entry by now providing all Members with four, instead of the prior two, free Limited Service MEI Ports.[114] As a result of the proposed fee structure, a significant majority of Members will not be subject to any fee, and only seven Members will potentially be subject to a fee for Limited Service MEI Ports in excess of four per month, based on current usage. In contrast, as described above, other exchanges generally charge in excess of $450 per port without providing any free ports.[115] Even for Members that choose to maintain more than four Limited Service MEI Ports, the Exchange believes that the cost-based fee proposed herein is low enough that it will not operate to restrain any Member's ability to maintain the number of Limited Service MEI Ports that it determines are consistent with its business objectives. The small number of Members projected to be subject to the highest fees will still pay considerably less than competing exchanges charge.[116] Further, the number of assigned Limited Service MEI Ports will continue to be based on decisions by each Member, including the ability to reduce fees by discontinuing unused Limited Service MEI Ports.

The Exchange believes that providing four free Limited Service MEI Ports is fair and equitable, and not unfairly discriminatory because it will enable all Members (and more Members than when the Exchange previously provided two free Limited Service MEI Ports) to access the Exchange free of charge, thereby encouraging order flow and liquidity from a diverse set of market participants, facilitating price discovery and the interaction of orders. The Exchange believes that four Limited Service MEI Ports is an appropriate number to provide for free because it aligns with the number of such ports currently maintained by a substantial majority of Members. Based on a review of Limited Service MEI Port usage, 28 of 35 connected Members are not projected to be subject to any Limited Service MEI Port fees under the proposed fee.

The Exchange assessed whether the fee may impact different types or sizes of Members differently. As a threshold matter, the fee does not by design apply differently to different types or sizes of Members. Nonetheless, the Exchange assessed whether there would be any differences in the amount of the projected fee that correlate to the type and/or size of different Members. This assessment revealed that the number of assigned Limited Service MEI Ports, and thus projected fees, correlates closely to a Member's inbound message volume to the Exchange. Specifically, as inbound message volume increases per Member, the number of requested and assigned Limited Service MEI Ports increases. The following table presents data from December 2023 evidencing the correlation between a Member's inbound message volume and the number of Limited Service MEI Port assigned to the Member as of December 31, 2023.

Number of ports	Average daily message traffic	Total message traffic	Overall percentage of all message traffic for month
1–4	2,096,585,967	41,931,719,332	19.67
5 or more	8,559,796,282	171,195,925,646	80.33

Members with relatively higher inbound message volume are projected to pay higher fees because they have requested more Limited Service MEI Ports. For example, the seven Members that subscribe to five or more Limited

[113] *See supra* note 6.

[114] The following rationale to support providing a certain number of Limited Service MEI Ports for free prior to applying a fee is similar to that used by the Investors Exchange LLC (''IEX'') in 2020 proposal to do the same as proposed herein. *See* Securities Exchange Act Release No. 86626 (August 9, 2019), 84 FR 41793 (August 15, 2019) (SR–IEX–2019–07).

[115] *See supra* notes a–j above.

[116] Assuming a Member selects five Limited Service MEI Ports based on their business needs, that Member on MIAX Emerald would be charged only for the fifth Limited Service MEI Port and pay only the $420 monthly fee, as the first four Limited Service Ports would be free. Meanwhile, a Member that purchases five ports on NYSE Arca Options would pay $450 per port per month, resulting in a total charge of $2,250 per month. On Cboe BZX Options, that same member would pay $750 per port per month, resulting in a total charge of $3,750 per months for five ports. *See* NYSE Arca Options Fees and Charges, dated November 2023, *available at https://www.nyse.com/publicdocs/nyse/markets/arca-options/NYSE_Arca_Options_Fee_Schedule.pdf* and Cboe BZX Options Fee Schedule *available at https://www.cboe.com/us/options/membership/fee_schedule/.*

Service MEI Ports and are subject to the proposed monthly fee on average account for 80.33% of December 2023 inbound messages over Limited Service MEI Ports. The 28 Members that, based on their December 2023 Limited Service MEI Port usage are not projected to be subject to any Limited Service MEI Port fees, on average account for only 19.67% of December 2023 inbound messages over Limited Service MEI Port. This includes two Members that previously paid a fee that were not charged in December 2023 under the proposed fee structure.

The Exchange believes that the variance between projected fees and Limited Service MEI Ports usage is not unfairly discriminatory because it is based on objective differences in Limited Service MEI Port usage among different Members. The Exchange notes that the distribution of total inbound message volume is concentrated in relatively few Members, which consume a much larger proportionate share of the Exchange's resources (compared to the majority of Members that send substantially fewer inbound order messages). This distribution of inbound message volume requires the Exchange to maintain sufficient Limited Service MEI Port capacity to accommodate the higher existing and anticipated message volume of higher volume Members. Thus, the Exchange's incremental aggregate costs for all Limited Service MEI Ports are disproportionately related to volume from the highest inbound message volume Members. For these reasons, the Exchange believes it is not unfairly discriminatory for the Members with the highest inbound message volume to pay a higher share of the total Limited Service MEI Ports fees.

While Limited Service MEI Port usage is concentrated in a few relatively larger Members, the number of such ports requested is not based on the size or type of Member but rather correlates to a Member's inbound message volume to the Exchange. Further, Members with relatively higher inbound message volume also request (and are assigned) more Limited Service MEI Ports than other Members, which in turn means they account for a disproportionate share of the Exchange's aggregate costs for providing Limited Service MEI Ports.[117] Therefore, the Exchange believes it is not unfairly discriminatory for the Members with higher inbound message volume to pay a modestly higher proportionate share of the Limited Service MEI Port fees.

To achieve consistent, premium network performance, the Exchange must build and maintain a network that has the capacity to handle the message rate requirements of its heaviest network consumers during anticipated peak market conditions. The resultant need to support billions of messages per day consume the Exchange's resources and significantly contribute to the overall network connectivity expense for storage and network transport capabilities. This need also requires the Exchange to purchase additional storage capacity on an ongoing basis to ensure it has sufficient capacity to store these messages as part of it surveillance program and to satisfy its record keeping requirements under the Exchange Act.[118] Thus, as the number of connections per Market Maker increases, other costs incurred by the Exchange also increase, *e.g.,* storage costs, surveillance costs, service expenses.

Accordingly, the Exchange believes that the fee will be applied consistently with its specific purpose—to partially recover the Exchange's aggregate costs, encourage the efficient use of Limited Service MEI Ports, and align fees with Members' Limited Service MEI Port and system usage.

The Exchange further believes that the proposed fees are reasonable, fair and equitable, and non-discriminatory because they will apply to all Members in the same manner and are not targeted at a specific type or category of market participant engaged in any particular trading strategy. All Members will receive four free Limited Service MEI Ports and pay the same proposed fee per Limited Service MEI Ports for each additional Limited Service MEI Port. Each Limited Service MEI Port is identical, providing connectivity to the Exchange on identical terms. While the proposed fee will result in a different effective ''per unit'' rate for different Members after factoring in the four free Limited Service MEI Ports, the Exchange does not believe that this difference is material given the overall low proposed fee per Limited Service MEI Port. Because the first four Limited Service MEI Ports are free of charge, each entity will have a ''per unit'' rate of less than the proposed fee. Further, the fee is not connected to volume based tiers. All Members will be subject to the same fee schedule, regardless of the volume sent to or executed on the Exchange. The fee also does not depend on any distinctions between Members, customers, broker-dealers, or any other entity. The fee will be assessed solely based on the number of Limited Service MEI Ports an entity selects and not on any other distinction applied by the Exchange. While entities that send relatively more inbound messages to the Exchange may select more Limited Service MEI Ports, thereby resulting in higher fees, that distinction is based on decisions made by each Member and the extent and nature of the Member's business on the Exchange rather than application of the fee by the Exchange. Members can determine how many Limited Service MEI Ports they need to implement their trading strategies effectively. The Exchange proposes to offer additional Limited Service MEI Ports at a low fee to enable all Members to purchase as many Limited Service MEI Ports as their business needs dictate in order to optimize throughput and manage latency across the Exchange.

Notwithstanding that Members with the highest number of Limited Service MEI Ports will pay a greater percentage of the total projected fees than is represented by their Limited Service MEI Port usage, the Exchange does not believe that the proposed fee is unfairly discriminatory. It is not possible to fully synchronize the Exchange's objective to provide four free Limited Service MEI Ports to all Members, thereby minimizing barriers to entry and incentivizing liquidity on the Exchange, with an approach that exactly aligns the projected per Member fee with each Member's number of requested Limited Service MEI Ports. As proposed, the Exchange is providing a reasonable increased number of Limited Service MEI Ports to each Member without charge. In fact, the Exchange proposes to provide more Limited Service MEI Ports for free by increasing the number of available Limited Service MEI Ports that are provided for free from two to four. Any variance between projected fees and Limited Service MEI Port usage is attributable to objective differences among Members in terms of the number of Limited Service MEI Ports they determine are appropriate based on their trading on the Exchange. Further, the Exchange believes that the low amount of the proposed fee (which in the aggregate is projected to only partially recover the Exchange's directly-related costs as described herein) mitigates any disparate impact.

Further, the fee will help to encourage Limited Service MEI Port usage in a way

[117] *See* Securities Exchange Act Release No. 86626 (August 9, 2019), 84 FR 41793 (August 15, 2019) (SR–IEX–2019–07) (justifying providing 5 ports for free and charging a fee for every port purchased in excess of 5 ports based on the higher message traffic of subscribers with increased number of ports).

[118] 17 CFR 240.17a–1 (recordkeeping rule for national securities exchanges, national securities associations, registered clearing agencies and the Municipal Securities Rulemaking Board).

that aligns with the Exchange's regulatory obligations. As a national securities exchange, the Exchange is subject to Regulation Systems Compliance and Integrity (''Reg SCI'').[119] Reg SCI Rule 1001(a) requires that the Exchange establish, maintain, and enforce written policies and procedures reasonably designed to ensure (among other things) that its Reg SCI systems have levels of capacity adequate to maintain the Exchange's operational capability and promote the maintenance of fair and orderly markets.[120] By encouraging Members to be efficient with their Limited Service MEI Ports usage, the proposed fee will support the Exchange's Reg SCI obligations in this regard by ensuring that unused Limited Service MEI Ports are available to be allocated based on individual Members needs and as the Exchange's overall order and trade volumes increase. Additionally, because the Exchange will continue not to charge connectivity testing and certification fees to its Disaster Recovery Facility or where the Exchange requires testing and certification, the proposed fee structure will further support the Exchange's Reg SCI compliance by reducing the potential impact of a disruption should the Exchange be required to switch to its Disaster Recovery Facility and encouraging Members to engage in any necessary system testing without incurring any port fee costs.[121]

Finally, the Exchange believes that the proposed fee is consistent with Section 11A of the Exchange Act in that it is designed to facilitate the economically efficient execution of securities transactions, fair competition among brokers and dealers, exchange markets and markets other than exchange markets, and the practicability of brokers executing investors' orders in the best market. Specifically, the proposed low, cost-based fee will enable a broad range of the Exchange Members to continue to connect to the Exchange, thereby facilitating the economically efficient execution of securities transactions on the Exchange, fair competition between and among such Members, and the practicability of Members that are brokers executing investors' orders on the Exchange when it is the best market.

[119] 17 CFR 242.1000–1007.

[120] 17 CFR 242.1001(a).

[121] By comparison, some other exchanges charge less to connect to their disaster recovery facilities, but still charge an amount that could both recoup costs and potentially be a source of profits. See, *e.g.,* Nasdaq Stock Market LLC Equity 7, Section 115 (Ports and other Services).

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Intra-Market Competition

The Exchange believes the proposed fees will not result in any burden on intra-market competition that is not necessary or appropriate in furtherance of the purposes of the Act because the proposed fees will allow the Exchange to recoup some of its costs in providing 10Gb ULL connectivity and Limited Service MEI Ports at below market rates to market participants since the Exchange launched operations. As described above, the Exchange operated at a cumulative net annual loss since its launch in 2019 through 2021 [122] due to providing a low-cost alternative to attract order flow and encourage market participants to experience the high determinism and resiliency of the Exchange's trading Systems. To do so, the Exchange chose to waive the fees for some non-transaction related services and Exchange products or provide them at a very lower fee, which was not profitable to the Exchange. This resulted in the Exchange forgoing revenue it could have generated from assessing any fees or higher fees. The Exchange could have sought to charge higher fees at the outset, but that could have served to discourage participation on the Exchange. Instead, the Exchange chose to provide a low-cost exchange alternative to the options industry, which resulted in lower initial revenues. Examples of this are 10Gb ULL connectivity and Limited Service MEI Ports, for which the Exchange only now seeks to adopt fees at a level similar to or lower than those of other options exchanges.

Further, the Exchange does not believe that the proposed fee increase for the 10Gb ULL connection change would place certain market participants at the Exchange at a relative disadvantage compared to other market participants or affect the ability of such market participants to compete. As is the case with the current proposed flat fee, the proposed fee would apply uniformly to all market participants regardless of the number of connections they choose to purchase. The proposed fee does not favor certain categories of market participants in a manner that would impose an undue burden on competition.

The Exchange does not believe that the proposed rule change would place certain market participants at the Exchange at a relative disadvantage compared to other market participants or affect the ability of such market participants to compete. In particular, Exchange personnel has been informally discussing potential fees for connectivity services with a diverse group of market participants that are connected to the Exchange (including large and small firms, firms with large connectivity service footprints and small connectivity service footprints, as well as extranets and service bureaus) for several months leading up to that time. The Exchange does not believe the proposed fees for connectivity services would negatively impact the ability of Members, non-Members (extranets or service bureaus), third-parties that purchase the Exchange's connectivity and resell it, and customers of those resellers to compete with other market participants or that they are placed at a disadvantage.

The Exchange does anticipate, however, that some market participants may reduce or discontinue use of connectivity services provided directly by the Exchange in response to the proposed fees. In fact, as mentioned above, one MIAX Pearl Options Market Maker terminated their MIAX Pearl Options membership on January 1, 2023 as a direct result of the similar proposed fee changes by MIAX Pearl Options.[123] The Exchange does not believe that the proposed fees for connectivity services place certain market participants at a relative disadvantage to other market participants because the proposed connectivity pricing is associated with relative usage of the Exchange by each market participant and does not impose a barrier to entry to smaller participants. The Exchange believes its proposed pricing is reasonable and, when coupled with the availability of third-party

[122] The Exchange incurred a cumulative loss of $9 million from its inception in 2019 through 2021. *See* Exchange's Form 1/A, Application for Registration or Exemption from Registration as a National Securities Exchange, filed June 29, 2022, *available at https://www.sec.gov/Archives/edgar/vprr/2200/22001164.pdf.*

[123] The Exchange acknowledges that IEX included in its proposal to adopt market data fees after offering market data for free an analysis of what its projected revenue would be if all of its existing customers continued to subscribe versus what its projected revenue would be if a limited number of customers subscribed due to the new fees. *See* Securities Exchange Act Release No. 94630 (April 7, 2022), 87 FR 21945 (April 13, 2022) (SR–IEX–2022–02). MEMX did not include a similar analysis in either of its recent non-transaction fee proposals. *See, e.g., supra* note 74. The Exchange does not believe a similar analysis would be useful here because it is amending existing fees, not proposing to charge a new fee where existing subscribers may terminate connections because they are no longer enjoying the service at no cost.

providers that also offer connectivity solutions, that participation on the Exchange is affordable for all market participants, including smaller trading firms. As described above, the connectivity services purchased by market participants typically increase based on their additional message traffic and/or the complexity of their operations. The market participants that utilize more connectivity services typically utilize the most bandwidth, and those are the participants that consume the most resources from the network. Accordingly, the proposed fees for connectivity services do not favor certain categories of market participants in a manner that would impose a burden on competition; rather, the allocation of the proposed connectivity fees reflects the network resources consumed by the various size of market participants and the costs to the Exchange of providing such connectivity services.

Lastly, the Exchange does not believe its proposed changes to the monthly rate for Limited Service MEI Ports will place certain market participants at a relative disadvantage to other market participants. All market participants would be eligible to receive four (4) free Limited Service MEI Ports and those that elect to purchase more would be subject to the same flat fee regardless of the number of additional Limited Service MEI Ports they purchase. All firms purchase the amount of Limited Service MEI Ports they require based on their own business decisions and similarly situated firms are subject to the same fees.

Inter-Market Competition

The Exchange also does not believe that the proposed rule change and price increase will result in any burden on inter-market competition that is not necessary or appropriate in furtherance of the purposes of the Act. As this is a fee increase, arguably if set too high, this fee would make it easier for other exchanges to compete with the Exchange. Only if this were a substantial fee decrease could this be considered a form of predatory pricing. In contrast, the Exchange believes that, without this fee increase, we are potentially at a competitive disadvantage to certain other exchanges that have in place higher fees for similar services. As we have noted, the Exchange believes that connectivity fees can be used to foster more competitive transaction pricing and additional infrastructure investment and there are other options markets of which market participants may connect to trade options at higher rates than the Exchange's. Accordingly, the Exchange does not believe its proposed fee changes impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

* * * * *

In conclusion, as discussed thoroughly above, the Exchange regrettably believes that the application of the Revised Review Process and Staff Guidance has adversely affected inter-market competition among legacy and non-legacy exchanges by impeding the ability of non-legacy exchanges to adopt or increase fees for their market data and access services (including connectivity and port products and services) that are on parity or commensurate with fee levels previously established by legacy exchanges. Since the adoption of the Revised Review Process and Staff Guidance, and even more so recently, it has become extraordinarily difficult to adopt or increase fees to generate revenue necessary to invest in systems, provide innovative trading products and solutions, and improve competitive standing to the benefit of non-legacy exchanges' market participants. Although the Staff Guidance served an important policy goal of improving disclosures and requiring exchanges to justify that their market data and access fee proposals are fair and reasonable, it has also negatively impacted non-legacy exchanges in particular in their efforts to adopt or increase fees that would enable them to more fairly compete with legacy exchanges, despite providing enhanced disclosures and rationale under both competitive and cost basis approaches provided for by the Revised Review Process and Staff Guidance to support their proposed fee changes.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange received one comment letter on the Initial Proposal, one comment letter on the Second Proposal, one comment letter on the Third Proposal, one comment letter on the Fourth Proposal, one comment letter on the Fifth Proposal, one comment letter on the Sixth Proposal, and one comment letter on the Seventh Proposal all from the same commenter.[124] In their letters, the commenters from SIG seek to incorporate comments submitted on previous Exchange proposals to which the Exchange has previously responded. The Exchange also received comment letters from a separate commenter on the Sixth and Seventh Proposals.[125] The Exchange believes issues raised by each commenters are not germane to this proposal in particular, but rather raise larger issues with the current environment surrounding exchange non-transaction fee proposals that should be addressed by the Commission through rule making, or Congress, more holistically and not through an individual exchange fee filings. Among other things, the commenters are requesting additional data and information that is both opaque and a moving target and would constitute a level of disclosure materially over and above that provided by any competitor exchanges.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act,[126] and Rule 19b–4(f)(2)[127] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99474; File No. SR–PEARL–2024–05]

Self-Regulatory Organizations; MIAX PEARL, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the MIAX Pearl Options Exchange Fee Schedule To Modify Certain Connectivity and Port Fees

February 5, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 25, 2024, MIAX PEARL, LLC (''MIAX Pearl'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to amend the MIAX Pearl Options Exchange Fee Schedule (the ''Fee Schedule'') to amend certain connectivity and port fees.[3]

The text of the proposed rule change is available on the Exchange's website at *https://www.miaxoptions.com/rule-filings,* at MIAX Pearl's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] All references to the ''Exchange'' in this filing mean MIAX Pearl Options. Any references to the equities trading facility of MIAX PEARL, LLC, will specifically be referred to as ''MIAX Pearl Equities.''

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Fee Schedule as follows: (1) increase the fees for a 10 gigabit (''Gb'') ultra-low latency (''ULL'') fiber connection for Members[4] and non-Members; (2) amend the calculation of fees for MIAX Express Network Full Service (''MEO'')[5] Ports (Bulk and Single); and (3) amend the fees for Full Service MEO Ports (Bulk and Single). The Exchange and its affiliate, Miami International Securities Exchange, LLC (''MIAX'') operated 10Gb ULL connectivity on a single shared network that provided access to both exchanges via a single 10Gb ULL connection. The Exchange last increased fees for 10Gb ULL connections from $9,300 to $10,000 per month on January 1, 2021.[6] At the same time, MIAX also increased its 10Gb ULL connectivity fee from $9,300 to $10,000 per month.[7] The Exchange and MIAX shared a combined cost analysis in those filings due to the single shared 10Gb ULL connectivity network for both exchanges. In those filings, the Exchange and MIAX allocated a combined total of $17.9 million in expenses to providing 10Gb ULL connectivity.[8]

Beginning in late January 2023, the Exchange determined a substantial operational need to no longer operate 10Gb ULL connectivity on a single shared network with MIAX. The Exchange bifurcated 10Gb ULL connectivity due to ever-increasing capacity constraints and to enable it to continue to satisfy the anticipated access needs for Members and other market participants.[9] Since the time of

[4] The term ''Member'' means an individual or organization approved to exercise the trading rights associated with a Trading Permit. Members are deemed ''members'' under the Exchange Act. *See* Exchange Rule 100.

[5] The term ''MEO Interface'' or ''MEO'' means a binary order interface for certain order types as set forth in Rule 516 into the MIAX Pearl System. *See* the Definitions Section of the Fee Schedule and Exchange Rule 100.

[9] *See MIAX Options and MIAX Pearl Options—Announce planned network changes related to shared 10G ULL extranet,* issued August 12, 2022, *available at https://www.miaxglobal.com/alert/2022/08/12/miax-options-and-miax-pearl-options-announce-planned-network-changes-0.* The Exchange will continue to provide access to both the Exchange and MIAX over a single shared 1Gb

Continued

the 2021 increase discussed above,[10] the Exchange experienced ongoing increases in expenses, particularly internal expenses.[11] As discussed more fully below, the Exchange recently calculated increased annual aggregate costs of $15,593,990for providing 10Gb ULL connectivity on a single unshared network (an overall increase over its prior cost to provide 10Gb ULL connectivity on a shared network with MIAX) and $1,989,497 for providing Full Service MEO Ports.[12]

Much of the cost relates to monitoring and analysis of data and performance of the network via the subscriber's connection with nanosecond granularity, and continuous improvements in network performance with the goal of improving the subscriber's experience. The costs associated with maintaining and enhancing a state-of-the-art network is a significant expense for the Exchange, and thus the Exchange believes that it is reasonable and appropriate to help offset those increased costs by amending fees for connectivity services. Subscribers expect the Exchange to provide this level of support so they continue to receive the performance they expect. This differentiates the Exchange from its competitors.

The Exchange now proposes to amend the Fee Schedule to amend the fees for 10Gb ULL connectivity and Full Service MEO Ports (Bulk and Single) in order to recoup cost related to bifurcating 10Gb connectivity to the Exchange and MIAX as well as the ongoing costs and increase in expenses set forth below in the Exchange's cost analysis.[13] The Exchange proposes to implement the changes to the Fee Schedule pursuant to this proposal immediately. The Exchange initially filed the proposal on December 30, 2022 (SR–PEARL–2022–62) (the ''Initial Proposal'').[14] On February 23, 2023, the Exchange withdrew the Initial Proposal and replaced it with a revised proposal (SR–PEARL–2023–08) (the ''Second Proposal'').[15] On April 20, 2023, the Exchange withdrew the Second Proposal and replaced it with a revised proposal (SR–PEARL–2023–19) (the ''Third Proposal'').[16] On June 16, 2023, the Exchange withdrew the Third Proposal and replaced it with a revised proposal (SR–PEARL–2023–27) (the ''Fourth Proposal'').[17] On August 8, 2023, the Exchange withdrew the Fourth Proposal and replaced it with a revised proposal (SR–PEARL–2023–35) (the ''Fifth Proposal'').[18] Since a U.S. government shutdown was avoided, on October 2, 2023, the Exchange withdrew the Fifth Proposal and replaced it with a further revised proposal (SR–PEARL–2023–55) (the ''Sixth Proposal'').[19] On November 27, 2023, the Exchange withdrew the Sixth Proposal and replaced it with a revised proposal (SR–PEARL–2023–64) (the ''Seventh Proposal'').[20] On January 25, 2024, the Exchange withdrew the Seventh Proposal and replaced it with a further revised proposal (SR–PEARL–2024–05) (the ''Eighth Proposal'').

The Exchange previously included a cost analysis in the Initial, Second, Third, Fourth, Fifth, Sixth, and Seventh Proposals. As described more fully below, the Exchange provides an updated cost analysis that includes, among other things, additional descriptions of how the Exchange allocated costs among it and its affiliated exchanges (separately among MIAX Pearl Options and MIAX Pearl Equities, MIAX and MIAX Emerald[21] (together with MIAX and MIAX Pearl Equities, the ''affiliated markets'')) to ensure no cost was allocated more than once, as well as additional detail supporting its cost allocation processes and explanations as to why a cost allocation in this proposal may differ from the same cost allocation in a similar proposal submitted by one of its affiliated markets. Although the baseline cost analysis used to justify the proposed fees was made in the Initial, Second, Third, Fourth, Fifth, Sixth and Seventh Proposals, the fees themselves have not changed since the Initial, Second, Third, Fourth, Fifth, Sixth or Seventh Proposals and the Exchange still proposes fees that are intended to cover the Exchange's cost of providing 10Gb ULL connectivity and Full Service MEO Ports with a reasonable mark-up over those costs.

The cost analysis included in prior filings was based on the Exchange's 2023 fiscal year of operations and projected expenses. In its Initial Proposal filed on December 30, 2022, the Exchange committed to conduct an annual review after implementation of these fees. The Exchange recently completed its 2024 fiscal year budget process, which included its annual review of these fees and the projected costs to provide these services, based on its approved 2024 expense budget. Therefore, the Cost Analysis included in this proposal is based on the Exchange's 2024 fiscal year of operations and projected expenses. The Exchange believes it reasonable to now use costs from its 2024 fiscal year budget because they reflect the Exchange's current cost

connection. *See* Securities Exchange Act Release Nos. 96553 (December 20, 2022), 87 FR 79379 (December 27, 2022) (SR–PEARL–2022–60); 96545 (December 20, 2022) 87 FR 79393 (December 27, 2022) (SR–MIAX–2022–48).

[10] The Exchange notes it last filed to amend the fees for Full Service MEO Ports in 2018 (excluding filings made in July 2021 through early 2022), prior to which the Exchange provided Full Service MEO Ports free of charge since the it launched operations in 2017 and absorbed all costs since that time. *See* Securities Exchange Act Release No. 82867 (March 13, 2018), 83 FR 12044 (March 19, 2018) (SR–PEARL–2018–07).

[11] For example, the New York Stock Exchange, Inc.'s (''NYSE'') Secure Financial Transaction Infrastructure (''SFTI'') network, which contributes to the Exchange's connectivity cost, increased its fees by approximately 9% since 2021. Similarly, since 2021, the Exchange, and its affiliates, experienced an increase in data center costs of approximately 17% and an increase in hardware and software costs of approximately 19%. These percentages are based on the Exchange's actual 2021 and 2023 expenses.

[12] For the avoidance of doubt, all references to costs in this filing, including the cost categories discussed below, refer to costs incurred by MIAX Pearl Options only and not MIAX Pearl Equities, the equities trading facility.

[13] The Exchange notes that MIAX will make a similar filing to increase its 10Gb ULL connectivity fees.

[14] *See* Securities Exchange Act Release No. 96632 (January 10, 2023), 88 FR 2707 (January 17, 2023) (SR–PEARL–2022–62).

[15] *See* Securities Exchange Act Release No. 97082 (March 8, 2023), 88 FR 15825 (March 14, 2023) (SR–PEARL–2023–05).

[16] *See* Securities Exchange Act Release No. 97420 (May 2, 2023), 88 FR 29701 (May 8, 2023) (SR–PEARL–2023–19).

[17] The Exchange met with Commission Staff to discuss the Third Proposal during which the Commission Staff provided feedback and requested additional information, including, most recently, information about total costs related to certain third party vendors. Such vendor cost information is subject to confidentiality restrictions. The Exchange provided this information to Commission Staff under separate cover with a request for confidentiality. While the Exchange will continue to be responsive to Commission Staff's information requests, the Exchange believes that the Commission should, at this point, issue substantially more detailed guidance for exchanges to follow in the process of pursuing a cost-based approach to fee filings, and that, for the purposes of fair competition, detailed disclosures by exchanges, such as those that the Exchange is providing now, should be consistent across all exchanges, including for those that have resisted a cost-based approach to fee filings, in the interests of fair and even disclosure and fair competition. *See* Securities Exchange Act Release No. 97815 (June 27, 2023), 88 FR 42759 (July 3, 2023) (SR–PEARL–2023–27).

[18] *See* Securities Exchange Act Release No. 98180 (August 21, 2023), 88 FR 58404 (August 25, 2023) (SR–PEARL–2023–35). Due to the prospect of a U.S. government shutdown, the Commission suspended the Fifth Proposal on September 29, 2023. *See* Securities Exchange Act Release No. 98658 (September 29, 2023) (SR–PEARL–2023–35).

[19] *See* Securities Exchange Act Release No. 98753 (October 13, 2023), 88 FR 72142 (October 19, 2023) (SR–PEARL–2023).

[20] *See* Securities Exchange Act Release No. 99140 (December 11, 2023), 88 FR 86951 (December 15, 2023) (SR–PEARL–2023–64).

[21] The term ''MIAX Emerald'' means MIAX Emerald, LLC. *See* Exchange Rule 100.

base. The Exchange also notes that expenses included in its 2024 fiscal year budget and this proposal are generally higher than its 2023 fiscal year budget and Cost Analysis included in prior filings. As more fully described below and throughout this filing, this is due to a number of factors, such as, critical vendors and suppliers increasing costs they charge the Exchange, significant exchange staff headcount increases, increased data center costs from the Exchange's data center providers in multiple locations and facilities, higher technology and communications costs, planned hardware refreshes, and system capacity upgrades that increase depreciation expense. Specifically, with regard to employee compensation, the 2024 fiscal year budget includes additional expenses related to increased headcount and new hires that are needed to support the Exchange as it continues to grow (the Exchange and its affiliated companies are projected to hire over 60 additional staff in 2024). Hardware and software expenses have also increased primarily due to price increases from critical vendors and equipment suppliers. Further, the Exchange budgeted for additional hardware and software needs to support the Exchange's continued growth and expansion. Depreciation and amortization have likewise increased due to recent and planned refreshes in Exchange hardware and software. This new equipment and software then becomes depreciable, as described below. Data center costs have also increased due the following: the Exchange expanding its footprint within its data center; and the data center vendor increasing the costs it charges the Exchange. Lastly, allocated shared expenses have increased due to the overall budgeted increase in costs from 2023 to 2024 necessary to operate and support the Exchange as described below.

Consequently, these increased costs included in the 2024 budget result in a lower projected profit margin for 10Gb ULL connectivity and Full Service MEO Ports than the profit margins included in prior filings that proposed the same fee levels for 10Gb ULL connectivity and Full Service MEO Ports. The Exchange believes it is reasonable and appropriate to now use expenses from its 2024 budget because those expenses are more recent and more accurately reflect the Exchange's current expenses and projected revenues for the 2024 fiscal year. Continuing to use 2023 budget numbers would result in the Exchange's Cost Analysis to be based on stale data which would not reflect the Exchanges most recent cost estimates and projected margins.

* * * * *

Starting in 2017, following the United States Court of Appeals for the District of Columbia's *Susquehanna Decision* [22] and various other developments, the Commission began to undertake a heightened review of exchange filings, including non-transaction fee filings that was substantially and materially different from it prior review process (hereinafter referred to as the ''Revised Review Process''). In the *Susquehanna Decision,* the D.C. Circuit Court stated that the Commission could not maintain a practice of ''unquestioning reliance'' on claims made by a self-regulatory organization (''SRO'') in the course of filing a rule or fee change with the Commission.[23] Then, on October 16, 2018, the Commission issued an opinion in *Securities Industry and Financial Markets Association* finding that exchanges failed both to establish that the challenged fees were constrained by significant competitive forces and that these fees were consistent with the Act.[24] On that same day, the Commission issued an order remanding to various exchanges and national market system (''NMS'') plans challenges to over 400 rule changes and plan amendments that were asserted in 57 applications for review (the ''Remand Order'').[25] The Remand Order directed the exchanges to ''develop a record,'' and to ''explain their conclusions, based on that record, in a written decision that is sufficient to enable us to perform our review.'' [26] The Commission denied requests by various exchanges and plan participants for reconsideration of the Remand Order.[27] However, the Commission did extend the deadlines in the Remand Order ''so that they d[id] not begin to run until the resolution of the appeal of the SIFMA Decision in the D.C. Circuit and the issuance of the court's mandate.'' [28] Both the Remand Order and the Order Denying Reconsideration were appealed to the D.C. Circuit.

While the above appeal to the D.C. Circuit was pending, on March 29, 2019, the Commission issued an order disapproving a proposed fee change by BOX Exchange LLC (''BOX'') to establish connectivity fees (the ''BOX Order''), which significantly increased the level of information needed for the Commission to believe that an exchange's filing satisfied its obligations under the Act with respect to changing a fee.[29] Despite approving hundreds of access fee filings in the years prior to the BOX Order (described further below) utilizing a ''market-based'' test, the Commission changed course and disapproved BOX's proposal to begin charging connectivity at one-fourth the rate of competing exchanges' pricing.

Also while the above appeal was pending, on May 21, 2019, the Commission Staff issued guidance ''to assist the national securities exchanges and FINRA . . . in preparing Fee Filings that meet their burden to demonstrate that proposed fees are consistent with the requirements of the Securities Exchange Act.'' [30] In the Staff Guidance, the Commission Staff states that, ''[a]s an initial step in assessing the reasonableness of a fee, staff considers whether the fee is constrained by significant competitive forces.'' [31] The Staff Guidance also states that, ''. . . even where an SRO cannot demonstrate, or does not assert, that significant competitive forces constrain the fee at issue, a cost-based discussion may be an alternative basis upon which to show consistency with the Exchange Act.'' [32]

Following the BOX Order and Staff Guidance, on August 6, 2020, the D.C. Circuit vacated the Commission's SIFMA Decision in *NASDAQ Stock*

Market, LLC v. *SEC*[33] and remanded for further proceedings consistent with its opinion.[34] That same day, the D.C. Circuit issued an order remanding the Remand Order to the Commission for reconsideration in light of *NASDAQ.* The court noted that the Remand Order required the exchanges and NMS plan participants to consider the challenges that the Commission had remanded in light of the SIFMA Decision. The D.C. Circuit concluded that because the SIFMA Decision ''has now been vacated, the basis for the [Remand Order] has evaporated.''[35] Accordingly, on August 7, 2020, the Commission vacated the Remand Order and ordered the parties to file briefs addressing whether the holding in *NASDAQ* v. *SEC* that Exchange Act Section 19(d) does not permit challenges to generally applicable fee rules requiring dismissal of the challenges the Commission previously remanded.[36] The Commission further invited ''the parties to submit briefing stating whether the challenges asserted in the applications for review . . . should be dismissed, and specifically identifying any challenge that they contend should not be dismissed pursuant to the holding of *Nasdaq* v. *SEC.*''[37] Without resolving the above issues, on October 5, 2020, the Commission issued an order granting SIFMA and Bloomberg's request to withdraw their applications for review and dismissed the proceedings.[38]

As a result of the Commission's loss of the *NASDAQ vs. SEC* case noted above, the Commission never followed through with its intention to subject the over 400 fee filings to ''develop a record,'' and to ''explain their conclusions, based on that record, in a written decision that is sufficient to enable us to perform our review.''[39] As such, all of those fees remained in place and amounted to a baseline set of fees for those exchanges that had the benefit of getting their fees in place before the Commission Staff's fee review process materially changed. The net result of this history and lack of resolution in the D.C. Circuit Court resulted in an uneven competitive landscape where the Commission subjects all new non-transaction fee filings to the new Revised Review Process, while allowing the previously challenged fee filings, mostly submitted by incumbent exchanges prior to 2019, to remain in effect and not subject to the ''record'' or ''review'' earlier intended by the Commission.

While the Exchange appreciates that the Staff Guidance articulates an important policy goal of improving disclosures and requiring exchanges to justify that their market data and access fee proposals are fair and reasonable, the practical effect of the Revised Review Process, Staff Guidance, and the Commission's related practice of continuous suspension of new fee filings, is anti-competitive, discriminatory, and has put in place an un-level playing field, which has negatively impacted smaller, nascent, non-legacy exchanges (''non-legacy exchanges''), while favoring larger, incumbent, entrenched, legacy exchanges (''legacy exchanges'').[40] The legacy exchanges all established a significantly higher baseline for access and market data fees prior to the Revised Review Process. From 2011 until the issuance of the Staff Guidance in 2019, national securities exchanges filed, and the Commission Staff did not abrogate or suspend (allowing such fees to become effective), at least 92 filings[41] to amend exchange connectivity or port fees (or similar access fees). The support for each of those filings was a simple statement by the relevant exchange that the fees were constrained by competitive forces.[42] These fees remain in effect today.

The net result is that the non-legacy exchanges are effectively now blocked by the Commission Staff from adopting or increasing fees to amounts comparable to the legacy exchanges (which were not subject to the Revised Review Process and Staff Guidance), despite providing enhanced disclosures and rationale to support their proposed fee changes that far exceed any such support provided by legacy exchanges. Simply put, legacy exchanges were able to increase their non-transaction fees during an extended period in which the Commission applied a ''market-based'' test that only relied upon the assumed presence of significant competitive forces, while exchanges today are subject to a cost-based test requiring extensive cost and revenue disclosures, a process that is complex, inconsistently applied, and rarely results in a successful outcome, *i.e.,* non-suspension. The Revised Review Process and Staff Guidance changed decades-long Commission Staff standards for review, resulting in unfair discrimination and placing an undue burden on inter-market competition between legacy exchanges and non-legacy exchanges.

Commission Staff now require exchange filings, including from non-legacy exchanges such as MIAX Pearl, to provide detailed cost-based analysis in place of competition-based arguments to support such changes. However, even with the added detailed cost and expense disclosures, the Commission Staff continues to either suspend such filings and institute disapproval proceedings, or put the exchanges in the unenviable position of having to repeatedly withdraw and re-file with additional detail in order to continue to charge those fees.[43] By impeding any

[33] *NASDAQ Stock Mkt., LLC v. SEC,* No 18–1324,----Fed. App'x----, 2020 WL 3406123 (D.C. Cir. June 5, 2020). The court's mandate was issued on August 6, 2020.

[34] *Nasdaq v. SEC,* 961 F.3d 421, at 424, 431 (D.C. Cir. 2020). The court's mandate issued on August 6, 2020. The D.C. Circuit held that Exchange Act ''Section 19(d) is not available as a means to challenge the reasonableness of generally-applicable fee rules.'' *Id.* The court held that ''for a fee rule to be challengeable under Section 19(d), it must, at a minimum, be targeted at specific individuals or entities.'' *Id.* Thus, the court held that ''Section 19(d) is not an available means to challenge the fees at issue'' in the SIFMA Decision. *Id.*

[40] Commission Chair Gary Gensler recently reiterated the Commission's mandate to ensure competition in the equities markets. *See* ''Statement on Minimum Price Increments, Access Fee Caps, Round Lots, and Odd-Lots'', by Chair Gary Gensler, dated December 14, 2022 (stating ''[i]n 1975, Congress tasked the Securities and Exchange Commission with responsibility to facilitate the establishment of the national market system and *enhance competition in the securities markets, including the equity markets*'' (*emphasis added*)). In that same statement, Chair Gary Gensler cited the five objectives laid out by Congress in 11A of the Exchange Act (15 U.S.C. 78k–1), including ensuring ''fair competition among brokers and dealers, among exchange markets, and *between exchange markets* and markets other than exchange markets . . .'' (*emphasis added*). *Id.* at note 1. *See also* Securities Acts Amendments of 1975, *available at https://www.govtrack.us/congress/bills/94/s249.*

[41] This timeframe also includes challenges to over 400 rule filings by SIFMA and Bloomberg discussed above. *Sec. Indus. & Fin. Mkts. Ass'n,* Securities Exchange Act Release No. 84433, 2018 WL 5023230 (Oct. 16, 2018). Those filings were left to stand, while at the same time, blocking newer exchanges from the ability to establish competitive access and market data fees. *See The Nasdaq Stock Market, LLC* v. *SEC,* Case No. 18–1292 (D.C. Cir. June 5, 2020). The expectation at the time of the litigation was that the 400 rule flings challenged by SIFMA and Bloomberg would need to be justified under revised review standards.

[42] *See, e.g.,* Securities Exchange Act Release Nos. 74417 (March 3, 2015), 80 FR 12534 (March 9, 2015) (SR–ISE–2015–06); 83016 (April 9, 2018), 83 FR 16157 (April 13, 2018) (SR–PHLX–2018–26); 70285 (August 29, 2013), 78 FR 54697 (September 5, 2013) (SR–NYSEMKT–2013–71); 76373 (November 5, 2015), 80 FR 70024 (November 12, 2015) (SR–NYSEMKT–2015–90); 79729 (January 4, 2017), 82 FR 3061 (January 10, 2017) (SR–NYSEARCA–2016–172).

[43] The Exchange has filed, and subsequently withdrew, various forms of this proposed fee change numerous times since August 2021 with

path forward for non-legacy exchanges to establish commensurate non-transaction fees, or by failing to provide any alternative means for smaller markets to establish ''fee parity'' with legacy exchanges, the Commission is stifling competition: non-legacy exchanges are, in effect, being deprived of the revenue necessary to compete on a level playing field with legacy exchanges. This is particularly harmful, given that the costs to maintain exchange systems and operations continue to increase. The Commission Staff's change in position impedes the ability of non-legacy exchanges to raise revenue to invest in their systems to compete with the legacy exchanges who already enjoy disproportionate non-transaction fee based revenue. For example, the Cboe Exchange, Inc. (''Cboe'') reported ''access and capacity fee'' revenue of $70,893,000 for 2020[44] and $80,383,000 for 2021.[45] Cboe C2 Exchange, Inc. (''C2'') reported ''access and capacity fee'' revenue of $19,016,000 for 2020[46] and $22,843,000 for 2021.[47] Cboe BZX Exchange, Inc. (''BZX'') reported ''access and capacity fee'' revenue of $38,387,000 for 2020[48] and $44,800,000 for 2021.[49] Cboe EDGX Exchange, Inc. (''EDGX'') reported ''access and capacity fee'' revenue of $26,126,000 for 2020[50] and $30,687,000 for 2021.[51] For 2021, the affiliated Cboe, C2, BZX, and EDGX (the four largest exchanges of the Cboe exchange group) reported $178,712,000 in ''access and capacity fees'' in 2021. NASDAQ Phlx, LLC (''NASDAQ Phlx'') reported ''Trade Management Services'' revenue of $20,817,000 for 2019.[52] The Exchange notes it is unable to compare ''access fee'' revenues with NASDAQ Phlx (or other affiliated NASDAQ exchanges) because after 2019, the ''Trade Management Services'' line item was bundled into a much larger line item in PHLX's Form 1, simply titled ''Market services.''[53]

The much higher non-transaction fees charged by the legacy exchanges provides them with two significant competitive advantages. First, legacy exchanges are able to use their additional non-transaction revenue for investments in infrastructure, vast marketing and advertising on major media outlets,[54] new products and other innovations. Second, higher non-transaction fees provide the legacy exchanges with greater flexibility to lower their transaction fees (or use the revenue from the higher non-transaction fees to subsidize transaction fee rates),[55] which are more immediately impactful in competition for order flow and market share, given the variable nature of this cost on member firms. The prohibition of a reasonable path forward denies the Exchange (and other non-legacy exchanges) this flexibility, eliminates the ability to remain competitive on transaction fees, and hinders the ability to compete for order flow and market share with legacy exchanges. There is little doubt that subjecting one exchange to a materially different standard than that historically applied to legacy exchanges for non-transaction fees leaves that exchange at a disadvantage in its ability to compete with its pricing of transaction fees.

While the Commission has clearly noted that the Staff Guidance is merely guidance and ''is not a rule, regulation or statement of the . . . Commission . . . the Commission has neither approved nor disapproved its content . . .'',[56] this is not the reality experienced by exchanges such as MIAX Pearl. As such, non-legacy exchanges are forced to rely on an opaque cost-based justification standard. However, because the Staff Guidance is devoid of detail on what must be contained in cost-based justification, this standard is nearly impossible to meet despite repeated good-faith efforts by the Exchange to provide substantial amount of cost-related details. For example, the Exchange has attempted to increase fees using a cost-based justification numerous times, having submitted over six filings.[57] However, despite providing 100+ page filings describing in extensive detail its costs associated with providing the services described in the filings, Commission Staff continues to suspend such filings, with the rationale that the Exchange has not provided sufficient detail of its costs and without ever being precise about what additional data points are required. The Commission Staff appears to be interpreting the reasonableness standard set forth in Section 6(b)(4) of the Act[58] in a manner that is not possible to achieve. This essentially nullifies the cost-based approach for exchanges as a legitimate alternative as laid out in the Staff Guidance. By refusing to accept a reasonable cost-based argument to justify non-transaction fees (in addition to refusing to accept a competition-based argument as described above), or by failing to provide the detail required to achieve that standard, the Commission Staff is

each proposal containing hundreds of cost and revenue disclosures never previously disclosed by legacy exchanges in their access and market data fee filings prior to 2019.

[44] According to Cboe's 2021 Form 1 Amendment, access and capacity fees represent fees assessed for the opportunity to trade, including fees for trading-related functionality. *See* Cboe 2021 Form 1 Amendment, *available at https://www.sec.gov/Archives/edgar/vprr/2100/21000465.pdf.*

[58] 15 U.S.C. 78f(b)(4).

effectively preventing non-legacy exchanges from making any non-transaction fee changes, which benefits the legacy exchanges and is anticompetitive to the non-legacy exchanges. This does not meet the fairness standard under the Act and is discriminatory.

Because of the un-level playing field created by the Revised Review Process and Staff Guidance, the Exchange believes that the Commission Staff, at this point, should either (a) provide sufficient clarity on how its cost-based standard can be met, including a clear and exhaustive articulation of required data and its views on acceptable margins,[59] to the extent that this is pertinent; (b) establish a framework to provide for commensurate non-transaction based fees among competing exchanges to ensure fee parity; [60] or (c) accept that certain competition-based arguments are applicable given the linkage between non-transaction fees and transaction fees, especially where non-transaction fees among exchanges are based upon disparate standards of review, lack parity, and impede fair competition. Considering the absence of any such framework or clarity, the Exchange believes that the Commission does not have a reasonable basis to deny the Exchange this change in fees, where the proposed change would result in fees meaningfully lower than comparable fees at competing exchanges and where the associated non-transaction revenue is meaningfully lower than competing exchanges.

In light of the above, disapproval of this would not meet the fairness standard under the Act, would be discriminatory and place a substantial burden on competition. The Exchange would be uniquely disadvantaged by not being able to increase its access fees to comparable levels (or lower levels than current market rates) to those of other options exchanges for connectivity. If the Commission Staff were to disapprove this proposal, that action, and not market forces, would substantially affect whether the Exchange can be successful in its competition with other options exchanges. Disapproval of this filing could also be viewed as an arbitrary and capricious decision should the Commission Staff continue to ignore its past treatment of non-transaction fee filings before implementation of the Revised Review Process and Staff Guidance and refuse to allow such filings to be approved despite significantly enhanced arguments and cost disclosures.[61]

* * * * *

10Gb ULL Connectivity Fee Change

MIAX Pearl Options filed a proposal to no longer operate 10Gb connectivity to MIAX Pearl Options on a single shared network with its affiliate, MIAX. This change is an operational necessity due to ever-increasing capacity constraints and to accommodate anticipated access needs for Members and other market participants.[62] This proposal: (i) sets forth the applicable fees for the bifurcated 10Gb ULL network; (ii) removes provisions in the Fee Schedule that provide for a shared 10Gb ULL network; and (iii) specifies that market participants may continue to connect to both MIAX Pearl Options and MIAX via the 1Gb network.

MIAX Pearl Options bifurcated the MIAX Pearl Options and MIAX 10Gb ULL networks in the first quarter of 2023, which change became effective on January 23, 2023. The Exchange issued an alert on August 12, 2022 publicly announcing the planned network change and implementation plan and dates to provide market participants adequate time to prepare.[63] Upon bifurcation of the 10Gb ULL network, subscribers need to purchase separate connections to MIAX Pearl Options and MIAX at the applicable rate. The Exchange's proposed amended rate for 10Gb ULL connectivity is described below. Prior to the bifurcation of the 10Gb ULL networks, subscribers to 10Gb ULL connectivity were able to connect to both MIAX Pearl Options and MIAX at the applicable rate set forth below.

The Exchange, therefore, proposes to amend the Fee Schedule to increase the fees for Members and non-Members to access the Exchange's system networks [64] via a 10Gb ULL fiber connection and to specify that this fee is for a dedicated connection to MIAX Pearl Options and no longer provides access to MIAX. Specifically, MIAX Pearl Options proposes to amend Sections 5)a)-b) of the Fee Schedule to increase the 10Gb ULL connectivity fee for Members and non-Members from $10,000 per month to $13,500 per month (''10Gb ULL Fee'').[65] The Exchange also proposes to amend the Fee Schedule to reflect the bifurcation of the 10Gb ULL network and specify that only the 1Gb network provides access to both MIAX Pearl Options and MIAX.

The Exchange proposes to make the following changes to reflect the bifurcated 10Gb ULL network for the Exchange and MIAX. First, in the Definitions section of the Fee Schedule, the Exchange proposes to amend the last sentence in the definition of ''MENI'' to specify that the MENI can be configured to provide network connectivity to the trading platforms, market data systems, test systems, and disaster recovery facilities of the Exchange's affiliate, MIAX, via a single, shared 1Gb connection. Next, the Exchange proposes to amend the explanatory paragraphs below the network connectivity fee tables in Sections 5)a)-b) of the Fee Schedule to specify that, with the bifurcated 10Gb ULL network, Members (and non-Members) utilizing the MENI to connect to the trading platforms, market data systems, test systems, and disaster recovery facilities of the Exchange and MIAX via a single, can only do so via a shared 1Gb connection.

The Exchange will continue to assess monthly Member and non-Member

[59] To the extent that the cost-based standard includes Commission Staff making determinations as to the appropriateness of certain profit margins, the Exchange believes that Staff should be clear as to what they determine is an appropriate profit margin.

[60] In light of the arguments above regarding disparate standards of review for historical legacy non-transaction fees and current non-transaction fees for non-legacy exchanges, a fee parity alternative would be one possible way to avoid the current unfair and discriminatory effect of the Staff Guidance and Revised Review Process. *See, e.g., CSA Staff Consultation Paper 21–401, Real-Time Market Data Fees, available at https://www.bcsc.bc.ca/-/media/PWS/Resources/Securities_Law/Policies/Policy2/21401_Market_Data_Fee_CSA_Staff_Consulation_Paper.pdf.*

[61] The Exchange's costs have clearly increased and continue to increase, particularly regarding capital expenditures, as well as employee benefits provided by third parties (*e.g.,* healthcare and insurance). Yet, practically no fee change proposed by the Exchange to cover its ever increasing costs has been acceptable to the Commission Staff since 2021. The only other fair and reasonable alternative would be to require the numerous fee filings unquestioningly approved before the Staff Guidance and Revised Review Process to ''develop a record,'' and to ''explain their conclusions, based on that record, in a written decision that is sufficient to enable us to perform our review,'' and to ensure a comparable review process with the Exchange's filing.

[62] *See supra* note 9.

[63] *Id.*

[64] The Exchange's system networks consist of the Exchange's extranet, internal network, and external network.

[65] Market participants that purchase additional 10Gb ULL connections as a result of this change will not be subject to the Exchange's Member Network Connectivity Testing and Certification Fee under Section 4)c) of the Fee Schedule. *See* Fee Schedule, Section 4)c), *available at https://www.miaxglobal.com/markets/us-options/pearl-options/fees* (providing that ''Network Connectivity Testing and Certification Fees will not be assessed in situations where the Exchange initiates a mandatory change to the Exchange's system that requires testing and certification. Member Network Connectivity Testing and Certification Fees will not be assessed for testing and certification of connectivity to the Exchange's Disaster Recovery Facility.'').

network connectivity fees for connectivity to the primary and secondary facilities in any month the Member or non-Member is credentialed to use any of the Exchange APIs or market data feeds in the production environment. The Exchange will continue to pro-rate the fees when a Member or non-Member makes a change to the connectivity (by adding or deleting connections) with such pro-rated fees based on the number of trading days that the Member or non-Member has been credentialed to utilize any of the Exchange APIs or market data feeds in the production environment through such connection, divided by the total number of trading days in such month multiplied by the applicable monthly rate.

Full Service MEO Ports—Bulk and Single

Background

The Exchange also proposes to amend Section 5)d) of the Fee Schedule to amend the calculation and amount of fees for Full Service MEO Ports. The Exchange currently offers different types of MEO Ports depending on the services required by the Member, including a Full Service MEO Port-Bulk,[66] a Full Service MEO Port-Single,[67] and a Limited Service MEO Port.[68] For one monthly price, a Member may be allocated two (2) Full-Service MEO Ports of either type per matching engine[69] and may request Limited Service MEO Ports for which MIAX Pearl will assess Members Limited Service MEO Port fees based on a sliding scale for the number of Limited Service MEO Ports utilized each month. The two (2) Full-Service MEO Ports that may be allocated per matching engine to a Member may consist of: (a) two (2) Full Service MEO Ports—Bulk; (b) two (2) Full Service MEO Ports—Single; or (c) one (1) Full Service MEO Port—Bulk and one (1) Full Service MEO Port—Single.

Currently, the Exchange assesses Members Full Service MEO Port Fees, either for a Full Service MEO Port—Bulk and/or for a Full Service MEO Port—Single, based upon the monthly total volume executed by a Member and its Affiliates[70] on the Exchange, across all origin types, not including Excluded Contracts,[71] as compared to the Total Consolidated Volume (''TCV''),[72] in all MIAX Pearl-listed options. The Exchange adopted a tier-based fee structure based upon the volume-based tiers detailed in the definition of ''Non-Transaction Fees Volume-Based Tiers'' described in the Definitions section of the Fee Schedule. The Exchange assesses these and other monthly Port fees to Members in each month the market participant is credentialed to use a Port in the production environment.

Full Service MEO Port (Bulk) Fee Changes

Current Full Service MEO Port (Bulk) Fees. The Exchange currently assesses all Members (Market Makers[73] and Electronic Exchange Members[74] (''EEMs'')) monthly Full Service MEO Port—Bulk fees as follows:

(i) if its volume falls within the parameters of Tier 1 of the Non-Transaction Fees Volume-Based Tiers, or volume up to 0.30%, $3,000;

(ii) if its volume falls within the parameters of Tier 2 of the Non-Transaction Fees Volume-Based Tiers, or volume above 0.30% up to 0.60%, $4,500; and

(iii) if its volume falls within the parameters of Tier 3 of the Non-Transaction Fees Volume-Based Tiers, or volume above 0.60%, $5,000.

Proposed Full Service MEO Port (Bulk) Fees. The Exchange proposes to amend the calculation and amount of Full Service MEO Port (Bulk) fees for EEMs and Market Makers. In particular, for EEMs, the Exchange proposes to move away from the above-described volume tier-based fee structure and instead charge all EEMs that utilize Full Service MEO Ports (Bulk) a flat monthly fee of $7,500. For this flat monthly fee, EEMs will continue to be entitled to two (2) Full Service MEO Ports (Bulk) for each Matching Engine for the single monthly fee of $7,500. The Exchange now proposes to amend the calculation and amount of Full Service MEO Port (Bulk) fees for Market Makers by moving away from the above-described volume tier-based fee structure to harmonize the Full Service MEO Port (Bulk) fee structure for Market Makers with that of the Exchange's affiliates, MIAX and MIAX Emerald.[75] The Exchange proposes that the amount of the monthly Full Service MEO Port (Bulk) fees for Market Makers would be based on the lesser of either the per class traded or percentage of total national average daily volume (''ADV'') measurement based on classes traded by volume. The amount of monthly Market Maker Full Service MEO Port (Bulk) fee would be based upon the number of classes in which the Market Maker was registered to quote on any given day within the calendar month, or upon the class volume percentages. This change in how Full Service MEO Port (Bulk) fees are calculated is identical to how the Exchange assesses Market Makers Trading Permit fees, which is in line with how numerous exchanges charge similar membership fees.

Specifically, the Exchange proposes to adopt the following Full Service MEO Port (Bulk) fees for Market Makers: (i) $5,000 for Market Maker registrations in up to 10 option classes or up to 20% of option classes by national ADV; (ii) $7,500 for Market Maker registrations in up to 40 option classes or up to 35% of option classes by ADV; (iii) $10,000 for Market Maker registrations in up to 100 option classes or up to 50% of option classes by ADV; and (iv) $12,000 for Market Maker registrations in over 100 option classes or over 50% of option classes by ADV up to all option classes listed on MIAX Pearl. For example, if Market Maker 1 elects to quote the top 40 option classes which consist of 58%

[66] ''Full Service MEO Port—Bulk'' means an MEO port that supports all MEO input message types and binary bulk order entry. *See* the Definitions Section of the Fee Schedule.

[67] ''Full Service MEO Port—Single'' means an MEO port that supports all MEO input message types and binary order entry on a single order-by-order basis, but not bulk orders. *See* the Definitions Section of the Fee Schedule.

[68] ''Limited Service MEO Port'' means an MEO port that supports all MEO input message types, but does not support bulk order entry and only supports limited order types, as specified by the Exchange via Regulatory Circular. *See* the Definitions Section of the Fee Schedule.

[69] A ''Matching Engine'' is a part of the Exchange's electronic system that processes options orders and trades on a symbol-by-symbol basis. *See* the Definitions Section of the Fee Schedule.

[70] ''Affiliate'' means (i) an affiliate of a Member of at least 75% common ownership between the firms as reflected on each firm's Form BD, Schedule A, or (ii) the Appointed Market Maker of an Appointed EEM (or, conversely, the Appointed EEM of an Appointed Market Maker). *See* the Definitions Section of the Fee Schedule.

[71] ''Excluded Contracts'' means any contracts routed to an away market for execution. *See* the Definitions Section of the Fee Schedule.

[72] ''TCV'' means total consolidated volume calculated as the total national volume in those classes listed on MIAX Pearl for the month for which the fees apply, excluding consolidated volume executed during the period of time in which the Exchange experiences an Exchange System Disruption (solely in the option classes of the affected Matching Engine). *See* the Definitions Section of the Fee Schedule.

[73] The term ''Market Maker'' means a Member registered with the Exchange for the purpose of making markets in options contracts traded on the Exchange and that is vested with the rights and responsibilities specified in Chapter VI of Exchange Rules. *See* the Definitions Section of the Fee Schedule and Exchange Rule 100.

[74] The term ''Electronic Exchange Member'' or ''EEM'' means the holder of a Trading Permit who is a Member representing as agent Public Customer Orders or Non-Customer Orders on the Exchange and those non-Market Maker Members conducting proprietary trading. Electronic Exchange Members are deemed ''members'' under the Exchange Act. *See* the Definitions Section of the Fee Schedule and Exchange Rule 100.

[75] *See* MIAX Fee Schedule, Section 5)d)ii) and MIAX Emerald Fee Schedule, Section 5)d)ii).

of the total national average daily volume in the prior calendar quarter, the Exchange would assess $7,500 to Market Maker 1 for the month which is the lesser of 'up to 40 classes' and 'over 50% of classes by volume up to all classes listed on MIAX Pearl'. If Market Maker 2 elects to quote the bottom 1000 option classes which consist of 10% of the total national average daily volume in the prior quarter, the Exchange would assess $5,000 to Market Maker 2 for the month which is the lesser of 'over 100 classes' and 'up to 20% of classes by volume. The Exchange notes that the proposed tiers (ranging from $5,000 to $12,000) are lower than the tiers that the Exchange's affiliates charge for their comparable ports (ranging from $5,000 to $20,500) for similar per class tier thresholds.[76]

With the proposed changes, a Market Maker would be determined to be registered in a class if that Market Maker has been registered in one or more series in that class.[77] The Exchange will assess MIAX Pearl Options Market Makers the monthly Market Maker Full Service MEO Port (Bulk) fee based on the greatest number of classes listed on MIAX Pearl Options that the MIAX Pearl Options Market Maker registered to quote in on any given day within a calendar month. Therefore, with the proposed changes to the calculation of Market Maker Full Service MEO Port (Bulk) fees, the Exchange's Market Makers would be encouraged to quote in more series in each class they are registered in because each additional series in that class would not count against their total classes for purposes of the Full Service MEO Port (Bulk) fee tiers. The class volume percentage is based on the total national ADV in classes listed on MIAX Pearl Options in the prior calendar quarter. Newly listed option classes are excluded from the calculation of the monthly Market Maker Full Service MEO Port (Bulk) fee until the calendar quarter following their listing, at which time the newly listed option classes will be included in both the per class count and the percentage of total national ADV.

The Exchange also proposes to adopt an alternative lower Full Service MEO Port (Bulk) fee for Market Makers who fall within the 2nd, 3rd and 4th levels of the proposed Market Maker Full Service MEO Port (Bulk) fee table: (i) Market Maker registrations in up to 40 option classes or up to 35% of option classes by volume; (ii) Market Maker registrations in up to 100 option classes or up to 50% of option classes by volume; and (iii) Market Maker registrations in over 100 option classes or over 50% of option classes by volume up to all option classes listed on MIAX Pearl Options. In particular, the Exchange proposes to adopt footnote ''**'' following the Market Maker Full Service MEO Port (Bulk) fee table for these Monthly Full Service MEO Port (Bulk) tier levels. New proposed footnote ''**'' will provide that if the Market Maker's total monthly executed volume during the relevant month is less than 0.040% of the total monthly TCV for MIAX Pearl–listed option classes for that month, then the fee will be $6,000 instead of the fee otherwise applicable to such level.

The purpose of the alternative lower fee designated in proposed footnote ''**'' is to provide a lower fixed fee to those Market Makers who are willing to quote the entire Exchange market (or substantial amount of the Exchange market), as objectively measured by either number of classes assigned or national ADV, but who do not otherwise execute a significant amount of volume on the Exchange. The Exchange believes that, by offering lower fixed fees to Market Makers that execute less volume, the Exchange will retain and attract smaller-scale Market Makers, which are an integral component of the option marketplace, but have been decreasing in number in recent years, due to industry consolidation. Since these smaller-scale Market Makers utilize less Exchange capacity due to lower overall volume executed, the Exchange believes it is reasonable and equitable to offer such Market Makers a lower fixed fee. The Exchange notes that the Exchange's affiliates, MIAX and MIAX Emerald, also provide lower MIAX Express Interface (''MEI'') Port fees (the comparable ports on those exchanges) for Market Makers who quote the entire MIAX and MIAX Emerald markets (or substantial amount of those markets), as objectively measured by either number of classes assigned or national ADV, but who do not otherwise execute a significant amount of volume on MIAX or MIAX Emerald.[78] The proposed changes to the Full Service MEO Port (Bulk) fees for Market Makers who fall within the 2nd, 3rd and 4th levels of the fee table are based upon a business determination of current Market Maker assignments and trading volume.

Unlike other options exchanges that provide similar port functionality and charge fees on a per port basis,[79] the Exchange offers Full Service MEO Ports as a package and provides Members with the option to receive up to two Full Service MEO Ports (described above) per matching engine to which that Member connects. The Exchange currently has twelve (12) matching engines, which means Market Makers may receive up to twenty-four (24) Full Service MEO Ports for a single monthly fee, that can vary based on the lesser of either the per class traded or percentage of total national ADV measurement based on classes traded by volume, as described above. For illustrative purposes, the Exchange currently assesses a fee of $5,000 per month for Market Makers that reach the highest Full Service MEO Port (Bulk) tier, regardless of the number of Full Service MEO Ports allocated to the Market Maker. For example, assuming a Market Maker connects to all twelve (12) matching engines during a month, with two Full Service MEO Ports (Bulk) per matching engine, this results in an effective fee of $208.33 per Full Service MEO Port ($5,000 divided by 24) for the month, as compared to other exchanges that charge over $1,000 per port and require multiple ports to connect to all of their matching engines.[80] This fee had been unchanged since the Exchange

[76] *See id.*

[77] Pursuant to Exchange Rule 602(a), a Member that has qualified as a Market Maker may register to make markets in individual series of options.

(September 2020) (providing a link to an Excel file detailing the number of matching engines per options exchange). *See* NASDAQ Fee Schedule, NASDAQ Options 7 Pricing Schedule, Section 3, Nasdaq Options Market—Ports and Other Services (each port charged on a per matching engine basis, with Nasdaq having multiple matching engines). *See* NASDAQ Specialized Quote Interface (SQF) Specification, Version 6.5b (updated February 13, 2020), Section 2, Architecture, *available at https://www.nasdaq.com/docs/2020/02/18/Specialized-Quote-Interface-SQI-6.5b.pdf* (the ''NASDAQ SQF Interface Specification''). The NASDAQ SQF Interface Specification also provides that NASDAQ's affiliates, NASDAQ Phlx and NASDAQ BX, Inc. (''BX''), have trading infrastructures that may consist of multiple matching engines with each matching engine trading only a range of option classes. Further, the NASDAQ SQF Interface Specification provides that the SQF infrastructure is such that the firms connect to one or more servers residing directly on the matching engine infrastructure. Since there may be multiple matching engines, firms will need to connect to each engine's infrastructure in order to establish the ability to quote the symbols handled by that engine.

[80] *Id. See also infra* table on page 37 and accompanying text.

adopted Full Service MEO Port fees in 2018.[81] The Exchange proposes to increase Full Service MEO Port fees, with the highest monthly fee of $12,000 for the Full Service MEO Ports (Bulk). Market Makers will continue to receive two (2) Full Service MEO Ports to each matching engine to which they connect for the single flat monthly fee. Assuming a Market Maker connects to all twelve (12) matching engines during the month, with two Full Service MEO Ports per matching engine, this would result in an effective fee of $500 per Full Service MEO Port ($12,000 divided by 24).

FULL SERVICE MEO PORTS (BULK)

	Number of match engines	Total number of ports for market maker to connect to all match engines	Total fee (monthly)	Effective per port Fee
Pricing Based on Market Maker Being Charged the Highest Tier (Current)	12	24	$5,000	$208.33
Pricing Based on Market Maker Being Charged the Highest Tier (as proposed)	12	24	12,000	500

Full Service MEO Port (Single) Fee Changes

Current Full Service MEO Port (Single) Fees. The Exchange currently assesses all Members (Market Makers and EEMs) monthly Full Service MEO Port (Single) fees as follows:

(i) if its volume falls within the parameters of Tier 1 of the Non-Transaction Fees Volume-Based Tiers, or volume up to 0.30%, $2,000;

(ii) if its volume falls within the parameters of Tier 2 of the Non-Transaction Fees Volume-Based Tiers, or volume above 0.30% up to 0.60%, $3,375; and

(iii) if its volume falls within the parameters of Tier 3 of the Non-Transaction Fees Volume-Based Tiers, or volume above 0.60%, $3,750.

Proposed Full Service MEO Port (Single) Fees. The Exchange proposes to amend the calculation and amount of Full Service MEO Port (Single) fees for EEMs and Market Makers. In particular, the Exchange proposes to move away from the above-described volume tier-based fee structure and instead charge all Members that utilize Full Service MEO Ports (Single) a flat monthly fee of $4,000. For this flat monthly fee, all Members will continue to be entitled to two (2) Full Service MEO Ports (Single) for each Matching Engine for the single monthly fee of $4,000.

The Exchange offers various types of ports with differing prices because each port accomplishes different tasks, are suited to different types of Members, and consume varying capacity amounts of the network. For instance, MEO ports allow for a higher throughput and can handle much higher quote/order rates than FIX ports. Members that are Market Makers or high frequency trading firms utilize these ports (typically coupled with 10Gb ULL connectivity) because they transact in significantly higher amounts of messages being sent to and from the Exchange, versus FIX port users, who are traditionally customers sending only orders to the Exchange (typically coupled with 1Gb connectivity). The different types of ports cater to the different types of Exchange Memberships and different capabilities of the various Exchange Members. Certain Members need ports and connections that can handle using far more of the network's capacity for message throughput, risk protections, and the amount of information that the System has to assess. Those Members account for the vast majority of network capacity utilization and volume executed on the Exchange, as discussed throughout. For example, three (3) Members account for 64% of all 10Gb ULL connections and Full Service MEO Ports purchased.

The Exchange proposes to increase its monthly Full Service MEO Port fees since it has not done so since the fees were adopted in 2018,[82] which are designed to recover a portion of the costs associated with directly accessing the Exchange. As described above, the Exchange's affiliates, MIAX and MIAX Emerald, also charge fees for their high throughput, low latency ports in a similar fashion as the Exchange proposes to charge for its MEO Ports—generally, the more active user the Member (*i.e.,* the greater number/greater national ADV of classes assigned to quote on MIAX and MIAX Emerald), the higher the MEI Port fee.[83] This concept is, therefore, not new or novel.

Implementation

The proposed fee changes are immediately effective.

2. Statutory Basis

The Exchange believes that the proposed fees are consistent with Section 6(b) of the Act[84] in general, and furthers the objectives of Section 6(b)(4) of the Act[85] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among Members and other persons using any facility or system which the Exchange operates or controls. The Exchange also believes the proposed fees further the objectives of Section 6(b)(5) of the Act[86] in that they are designed to promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general protect investors and the public interest and are not designed to permit unfair discrimination between customers, issuers, brokers and dealers.

The Exchange believes that the information provided to justify the proposed fees meets or exceeds the amount of detail required in respect of proposed fee changes under the Revised Review Process and as set forth in recent Staff Guidance. Based on both the BOX Order[87] and the Staff Guidance,[88] the Exchange believes that the proposed fees are consistent with the Act because they are: (i) reasonable, equitably allocated, not unfairly discriminatory, and not an undue burden on competition; (ii) comply with the BOX Order and the Staff Guidance; and (iii) supported by evidence (including comprehensive revenue and cost data

[81] *See* Securities Exchange Act Release No. 82867 (March 13, 2018), 83 FR 12044 (March 19, 2018) (SR–PEARL–2018–07).

[84] 15 U.S.C. 78f(b).

[85] 15 U.S.C. 78f(b)(4).

[86] 15 U.S.C. 78f(b)(5).

[87] *See supra* note 29.

[88] *See supra* note 30.

and analysis) that they are fair and reasonable and will not result in excessive pricing or supra-competitive profit.

The Exchange believes that exchanges, in setting fees of all types, should meet high standards of transparency to demonstrate why each new fee or fee amendment meets the requirements of the Act that fees be reasonable, equitably allocated, not unfairly discriminatory, and not create an undue burden on competition among market participants. The Exchange believes this high standard is especially important when an exchange imposes various fees for market participants to access an exchange's marketplace.

In the Staff Guidance, the Commission Staff states that, ''[a]s an initial step in assessing the reasonableness of a fee, staff considers whether the fee is constrained by significant competitive forces.'' [89] The Staff Guidance further states that, ''. . . even where an SRO cannot demonstrate, or does not assert, that significant competitive forces constrain the fee at issue, a cost-based discussion may be an alternative basis upon which to show consistency with the Exchange Act.'' [90] In the Staff Guidance, the Commission Staff further states that, ''[i]f an SRO seeks to support its claims that a proposed fee is fair and reasonable because it will permit recovery of the SRO's costs, . . . , specific information, including quantitative information, should be provided to support that argument.'' [91]

The proposed fees are reasonable because they promote parity among exchange pricing for access, which promotes competition, including in the Exchanges' ability to competitively price transaction fees, invest in infrastructure, new products and other innovations, all while allowing the Exchange to recover its costs to provide dedicated access via 10Gb ULL connectivity (driven by the bifurcation of the 10Gb ULL network) and Full Service MEO Ports. As discussed above, the Revised Review Process and Staff Guidance have created an uneven playing field between legacy and non-legacy exchanges by severely restricting non-legacy exchanges from being able to increase non-transaction related fees to provide them with additional necessary revenue to better compete with legacy exchanges, which largely set fees prior to the Revised Review Process. The much higher non-transaction fees charged by the legacy exchanges provides them with two significant competitive advantages: (i) additional non-transaction revenue that may be used to fund areas other than the non-transaction service related to the fee, such as investments in infrastructure, advertising, new products and other innovations; and (ii) greater flexibility to lower their transaction fees by using the revenue from the higher non-transaction fees to subsidize transaction fee rates. The latter is more immediately impactful in competition for order flow and market share, given the variable nature of this cost on Member firms. The absence of a reasonable path forward to increase non-transaction fees to comparable (or lower rates) limits the Exchange's flexibility to, among other things, make additional investments in infrastructure and advertising, diminishes the ability to remain competitive on transaction fees, and hinders the ability to compete for order flow and market share. Again, there is little doubt that subjecting one exchange to a materially different standard than that applied to other exchanges for non-transaction fees leaves that exchange at a disadvantage in its ability to compete with its pricing of transaction fees.

The Proposed Fees Ensure Parity Among Exchange Access Fees, Which Promotes Competition

The Exchange commenced operations in February 2017 [92] and adopted its initial fee schedule, with 10Gb ULL connectivity fees set at $8,500 (the Exchange originally had a non-ULL 10Gb connectivity option, which it has since removed) and a fee waiver for all Full Service MEO Port fees.[93] As a new exchange entrant, the Exchange chose to offer Full Service MEO Ports free of charge to encourage market participants to trade on the Exchange and experience, among things, the quality of the Exchange's technology and trading functionality. This practice is not uncommon. New exchanges often do not charge fees or charge lower fees for certain services such as memberships/trading permits to attract order flow to an exchange, and later amend their fees to reflect the true value of those services, absorbing all costs to provide those services in the meantime. Allowing new exchange entrants time to build and sustain market share through various pricing incentives before increasing non-transaction fees encourages market entry and fee parity, which promotes competition among exchanges. It also enables new exchanges to mature their markets and allow market participants to trade on the new exchanges without fees serving as a potential barrier to attracting memberships and order flow.[94]

Later in 2018, as the Exchange's market share increased,[95] the Exchange adopted nominal fees for Full Service MEO Ports.[96] The Exchange last increased the fees for its 10Gb ULL fiber connections from $9,300 to $10,000 per month on January 1, 2021.[97] The Exchange balanced business and competitive concerns with the need to financially compete with the larger incumbent exchanges that charge higher fees for similar connectivity and use that revenue to invest in their technology and other service offerings.

The proposed changes to the Fee Schedule are reasonable in several respects. As a threshold matter, the Exchange is subject to significant competitive forces, which constrains its pricing determinations for transaction fees as well as non-transaction fees. The fact that the market for order flow is competitive has long been recognized by

the courts. In *NetCoalition* v. *Securities and Exchange Commission,* the D.C. Circuit stated, ''[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'. . ..'' [98]

The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention to determine prices, products, and services in the securities markets. In Regulation NMS, while adopting a series of steps to improve the current market model, the Commission highlighted the importance of market forces in determining prices and SRO revenues, and also recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [99]

Congress directed the Commission to ''rely on 'competition, whenever possible, in meeting its regulatory responsibilities for overseeing the SROs and the national market system.' '' [100] As a result, and as evidenced above, the Commission has historically relied on competitive forces to determine whether a fee proposal is equitable, fair, reasonable, and not unreasonably or unfairly discriminatory. ''If competitive forces are operative, the self-interest of the exchanges themselves will work powerfully to constrain unreasonable or unfair behavior.'' [101] Accordingly, ''the existence of significant competition provides a substantial basis for finding that the terms of an exchange's fee proposal are equitable, fair, reasonable, and not unreasonably or unfairly discriminatory.'' [102] In the Revised Review Process and Staff Guidance, Commission Staff indicated that they would look at factors beyond the competitive environment, such as cost, only if a ''proposal lacks persuasive evidence that the proposed fee is constrained by significant competitive forces.'' [103]

The Exchange believes the competing exchanges' 10Gb connectivity and port fees are useful examples of alternative approaches to providing and charging for access and demonstrating how such fees are competitively set and constrained. To that end, the Exchange believes the proposed fees are competitive and reasonable because the proposed fees are similar to or less than fees charged for similar connectivity and port access provided by other options exchanges with comparable market shares. As such, the Exchange believes that denying its ability to institute fees that allow the Exchange to recoup its costs with a reasonable margin in a manner that is closer to parity with legacy exchanges, in effect, impedes its ability to compete, including in its pricing of transaction fees and ability to invest in competitive infrastructure and other offerings.

The following table shows how the Exchange's proposed fees remain similar to or less than fees charged for similar connectivity and port access provided by other options exchanges with similar market share. Each of the connectivity and port rates in place at competing options exchanges were filed with the Commission for immediate effectiveness and remain in place today.

Exchange	Type of connection or port	Monthly fee (per connection or per port)
MIAX Pearl Options (as proposed) ..... (equity options market share of 5.68% for the month of December 2023) [a].	10Gb ULL connection	$13,500.
	Full Service MEO Port (Bulk) for Market Makers.	Lesser of either the per class basis or percentage of total national ADV by the Market Maker, as follows: $5,000—up to 10 classes or up to 20% of classes by volume. $7,500**—up to 40 classes or up to 35% of classes by volume. $10,000**—up to 100 classes or up to 50% of classes by volume. $12,000**—over 100 classes or over 50% of all classes by volume up to all classes (or $500 per port per matching engine). **A lower rate of $6,000 will apply to these tiers if the Market Maker's total monthly executed volume is less than 0.040% of total monthly TCV for MIAX Pearl options.
	Full Service MEO Port (Bulk) for EEMs.	$7,500 (or $312.50 per port per matching engine.
	Full Service MEO Port (Single) for Market Makers and EEMs.	$4,000 (or $166.66 per port per matching engine).
NASDAQ [b] (equity options market share of 5.58% for the month of December 2023) [c].	10Gb Ultra fiber connection	$15,000 per connection.
	SQF Port [d]	1–5 ports: $1,500 per port. 6–20 ports: $1,000 per port. 21 or more ports: $500 per port.
NASDAQ ISE LLC (''ISE'') [e] (equity options market share of 6.39% for the month of December 2023) [f].	10Gb Ultra fiber connection	$15,000 per connection.
	SQF Port.	$1,100 per port.

[j] *See supra* note a.

The Exchange acknowledges that, without additional contextual information, the above table may lead someone to believe that the Exchange’s proposed fees for Full Service MEO Ports is higher than other exchanges when in fact, that is not true. The Exchange provides each Member or non-Member access to two (2) ports on all twelve (12) matching engines for a single fee and a vast majority choose to connect to all twelve (12) matching engines and utilize both ports for a total of 24 ports. Other exchanges charge on a per port basis and require firms to connect to multiple matching engines, thereby multiplying the cost to access their full market.[104] On the Exchange, this is not the case. The Exchange provides each Member or non-Member access, but does not require they connect to, all twelve (12) matching engines.

There is no requirement, regulatory or otherwise, that any broker-dealer connect to and access any (or all of) the available options exchanges. Market participants may choose to become a member of one or more options exchanges based on the market participant’s assessment of the business opportunity relative to the costs of the Exchange. With this, there is elasticity of demand for exchange membership. As an example, one Market Maker terminated their MIAX Pearl Options membership effective January 1, 2023 as a direct result of the proposed connectivity and port fee changes proposed by MIAX Pearl Options.

It is not a requirement for market participants to become members of all options exchanges; in fact, certain market participants conduct an options business as a member of only one options market.[105] A very small number of market participants choose to become a member of all sixteen options exchanges. Most firms that actively trade on options markets are not currently Members of the Exchange and do not purchase connectivity or port services at the Exchange. Connectivity and ports are only available to Members or service bureaus, and only a Member may utilize a port.[106]

One other exchange recently noted in a proposal to amend their own trading permit fees that of the 62 market making firms that are registered as Market Makers across Cboe, MIAX, and BOX, 42 firms access only one of the three exchanges.[107] The Exchange and its affiliated options markets, MIAX and MIAX Emerald, have a total of 46 members. Of those 46 total members, 37 are members of all three affiliated options markets, two are members of only two affiliated options markets, and seven are members of only one affiliated options market. The Exchange also notes that no firm is a Member of the Exchange only. The above data evidences that a broker-dealer need not have direct connectivity to all options exchanges, let alone the Exchange and its two affiliates, and broker-dealers may elect to do so based on their own business decisions and need to directly access each exchange’s liquidity pool.

Not only is there not an actual regulatory requirement to connect to every options exchange, the Exchange believes there is also no ‘‘de facto’’ or practical requirement as well, as further evidenced by the broker-dealer membership analysis of the options exchanges discussed above. As noted above, this is evidenced by the fact that one MIAX Pearl Options Market Maker terminated their MIAX Pearl Options membership effective January 1, 2023 as a direct result of the proposed connectivity and port fee changes on MIAX Pearl Options. Indeed, broker-dealers choose if and how to access a

[104] *See* Specialized Quote Interface Specification, Nasdaq PHLX, Nasdaq Options Market, Nasdaq BX Options, Version 6.5a, Section 2, Architecture (revised August 16, 2019), *available at http://www.nasdaqtrader.com/content/technicalsupport/specifications/TradingProducts/SQF6.5a-2019-Aug.pdf.* The Exchange notes that it is unclear whether the NASDAQ exchanges include connectivity to each matching engine for the single fee or charge per connection, per matching engine. *See also* NYSE Technology FAQ and Best Practices: Options, Section 5.1 (How many matching engines are used by each exchange?) (September 2020). The Exchange notes that NYSE provides a link to an Excel file detailing the number of matching engines per options exchange, with Arca and Amex having 19 and 17 matching engines, respectively.

[105] BOX recently adopted an electronic market maker trading permit fee. *See* Securities Exchange Release No. 94894 (May 11, 2022), 87 FR 29987 (May 17, 2022) (SR–BOX–2022–17). In that proposal, BOX stated that, ‘‘. . . it is not aware of any reason why Market Makers could not simply drop their access to an exchange (or not initially access an exchange) if an exchange were to establish prices for its non-transaction fees that, in the determination of such Market Maker, did not make business or economic sense for such Market Maker to access such exchange. [BOX] again notes that no market makers are required by rule, regulation, or competitive forces to be a Market Maker on [BOX].’’ Also in 2022, MEMX established a monthly membership fee. *See* Securities Exchange Act Release No. 93927 (January 7, 2022), 87 FR 2191 (January 13, 2022) (SR–MEMX–2021–19). In that proposal, MEMX reasoned that that there is value in becoming a member of the exchange and stated that it believed that the proposed membership fee ‘‘is not unfairly discriminatory because no broker-dealer is required to become a member of the Exchange’’ and that ‘‘neither the trade-through requirements under Regulation NMS nor broker-dealers’ best execution obligations require a broker-dealer to become a member of every exchange.’’

[106] Service Bureaus may obtain ports on behalf of Members.

[107] *See* Securities Exchange Act Release No. 94894 (May 11, 2022), 87 FR 29987 (May 17, 2022) (SR–BOX–2022–17) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to Amend the Fee Schedule on the BOX Options Market LLC Facility To Adopt Electronic Market Maker Trading Permit Fees). The Exchange believes that BOX’s observation demonstrates that market making firms can, and do, select which exchanges they wish to access, and, accordingly, options exchanges must take competitive considerations into account when setting fees for such access.

particular exchange and because it is a choice, the Exchange must set reasonable pricing, otherwise prospective members would not connect and existing members would disconnect from the Exchange. The decision to become a member of an exchange, particularly for registered market makers, is complex, and not solely based on the non-transactional costs assessed by an exchange. As noted herein, specific factors include, but are not limited to: (i) an exchange's available liquidity in options series; (ii) trading functionality offered on a particular market; (iii) product offerings; (iv) customer service on an exchange; and (v) transactional pricing. Becoming a member of the exchange does not ''lock'' a potential member into a market or diminish the overall competition for exchange services.

In lieu of becoming a member at each options exchange, a market participant may join one exchange and elect to have their orders routed in the event that a better price is available on an away market. Nothing in the Order Protection Rule requires a firm to become a Member at—or establish connectivity to—the Exchange.[108] If the Exchange is not at the national best bid or offer (''NBBO''),[109] the Exchange will route an order to any away market that is at the NBBO to ensure that the order was executed at a superior price and prevent a trade-through.[110]

With respect to the submission of orders, Members may also choose not to purchase any connection from the Exchange, and instead rely on the port of a third party to submit an order. For example, a third-party broker-dealer Member of the Exchange may be utilized by a retail investor to submit orders into an exchange. An institutional investor may utilize a broker-dealer, a service bureau,[111] or request sponsored access [112] through a member of an exchange in order to submit a trade directly to an options exchange.[113] A market participant may either pay the costs associated with becoming a member of an exchange or, in the alternative, a market participant may elect to pay commissions to a broker-dealer, pay fees to a service bureau to submit trades, or pay a member to sponsor the market participant in order to submit trades directly to an exchange.

Non-Member third-parties, such as service bureaus and extranets, resell the Exchange's connectivity. This indirect connectivity is another viable alternative for market participants to trade on the Exchange without connecting directly to the Exchange (and thus not pay the Exchange's connectivity fees), which alternative is already being used by non-Members and further constrains the price that the Exchange is able to charge for connectivity and other access fees to its market. The Exchange notes that it could, but chooses not to, preclude market participants from reselling its connectivity. Unlike other exchanges, the Exchange also does not currently assess fees on third-party resellers on a per customer basis (*i.e.,* fees based on the number of firms that connect to the Exchange indirectly via the third-party).[114] Indeed, the Exchange does not receive any connectivity revenue when connectivity is resold by a third-party, which often is resold to multiple customers, some of whom are agency broker-dealers that have numerous customers of their own.[115] Particularly, in the event that a market participant views the Exchange's direct connectivity and access fees as more or less attractive than competing markets, that market participant can choose to connect to the Exchange indirectly or may choose not to connect to the Exchange and connect instead to one or more of the other 16 options markets. Accordingly, the Exchange believes that the proposed fees are fair and reasonable and constrained by competitive forces.

The Exchange is obligated to regulate its Members and secure access to its environment. In order to properly regulate its Members and secure the trading environment, the Exchange takes measures to ensure access is monitored and maintained with various controls. Connectivity and ports are methods utilized by the Exchange to grant Members secure access to communicate with the Exchange and exercise trading rights. When a market participant elects to be a Member, and is approved for membership by the Exchange, the Member is granted trading rights to enter orders and/or quotes into Exchange through secure connections.

Again, there is no legal or regulatory requirement that a market participant become a Member of the Exchange. This is again evidenced by the fact that one MIAX Pearl Options Market Maker terminated their MIAX Pearl Options membership effective January 1, 2023 as a direct result of the proposed connectivity and port fee changes on MIAX Pearl Options. If a market participant chooses to become a Member, they may then choose to purchase connectivity beyond the one connection that is necessary to quote or submit orders on the Exchange. Members may freely choose to rely on one or many connections, depending on their business model.

Bifurcation of 10Gb ULL Connectivity and Related Fees

The Exchange began to operate on a single shared network with MIAX when MIAX Pearl Options commenced operations as a national securities exchange on February 7, 2017.[116] The Exchange and MIAX operated on a single shared network to provide Members with a single convenient set of access points for both exchanges. Both the Exchange and MIAX offer two methods of connectivity, 1Gb and 10Gb ULL connections. The 1Gb connection services are supported by a discrete set of switches providing 1Gb access ports to Members. The 10Gb ULL connection services are supported by a second and mutually exclusive set of switches providing 10Gb ULL access ports to Members. Previously, both the 1Gb and

[108] *See* Options Order Protection and Locked/Crossed Market Plan (August 14, 2009), *available at https://www.theocc.com/getmedia/7fc629d9-4e54-4b99-9f11-c0e4db1a2266/options_order_protection_plan.pdf.*

[109] *See* Exchange Rule 100.

[110] Members may elect to not route their orders by utilizing the Do Not Route order type. *See* Exchange Rule 516(g).

[111] Service Bureaus provide access to market participants to submit and execute orders on an exchange. On the Exchange, a Service Bureau may be a Member. Some Members utilize a Service Bureau for connectivity and that Service Bureau may not be a Member. Some market participants utilize a Service Bureau who is a Member to submit orders.

[112] Sponsored Access is an arrangement whereby a Member permits its customers to enter orders into an exchange's system that bypass the Member's trading system and are routed directly to the Exchange, including routing through a service bureau or other third-party technology provider.

[113] This may include utilizing a floor broker and submitting the trade to one of the five options trading floors.

[114] *See, e.g.,* Nasdaq Price List—U.S. Direct Connection and Extranet Fees, *available at,* US Direct-Extranet Connection (nasdaqtrader.com); *and* Securities Exchange Act Release Nos. 74077 (January 16, 2022), 80 FR 3683 (January 23, 2022) (SR–NASDAQ–2015–002); *and* 82037 (November 8, 2022), 82 FR 52953 (November 15, 2022) (SR–NASDAQ–2017–114).

[115] The Exchange notes that resellers, such as SFTI, are not required to publicize, let alone justify or file with the Commission their fees, and as such could charge the market participant any fees it deems appropriate (including connectivity fees higher than the Exchange's connectivity fees), even if such fees would otherwise be considered potentially unreasonable or uncompetitive fees.

[116] *See* Securities Exchange Act Release No. 80061 (February 17, 2017), 82 FR 11676 (February 24, 2017) (establishing MIAX Pearl Options Fee Schedule and establishing that the MENI can also be configured to provide network connectivity to the trading platforms, market data systems, test systems, and disaster recovery facility of MIAX Pearl Options' affiliate, MIAX, via a single, shared connection).

10Gb ULL shared extranet ports allowed Members to use one connection to access both exchanges, namely their trading platforms, market data systems, test systems, and disaster recovery facilities.

The Exchange stresses that bifurcating the 10Gb ULL connectivity between the Exchange and MIAX was not designed with the objective to generate an overall increase in access fee revenue. Rather, the proposed change was necessitated by 10Gb ULL connectivity experiencing a significant decrease in port availability mostly driven by connectivity demands of latency sensitive Members that seek to maintain multiple 10Gb ULL connections on every switch in the network. Operating two separate national securities exchanges on a single shared network provided certain benefits, such as streamlined connectivity to multiple exchanges, and simplified exchange infrastructure. However, doing so was no longer sustainable due to ever-increasing capacity constraints and current system limitations. The network is not an unlimited resource. As described more fully in the proposal to bifurcate the 10Gb ULL network,[117] the connectivity needs of Members and market participants has increased every year since the launch of MIAX Pearl Options and the operations of the Exchange and MIAX on a single shared 10Gb ULL network is no longer feasible. This required constant System expansion to meet Member demand for additional ports and 10Gb ULL connections has resulted in limited available System headroom, which eventually became operationally problematic for both the Exchange and its customers.

As stated above, the shared network is not an unlimited resource and its expansion was constrained by MIAX's and MIAX Pearl Options' ability to provide fair and equitable access to all market participants of both markets. Due to the ever-increasing connectivity demands, the Exchange found it necessary to bifurcate 10Gb ULL connectivity to the Exchange's and MIAX's Systems and networks to be able to continue to meet ongoing and future 10Gb ULL connectivity and access demands.[118]

Unlike the switches that provide 1Gb connectivity, the availability for additional 10Gb ULL connections on each switch had significantly decreased. This was mostly driven by the connectivity demands of latency sensitive Members (*e.g.,* Market Makers and liquidity removers) that sought to maintain connectivity across multiple 10Gb ULL switches. Based on the Exchange's experience, such Members did not typically use a shared 10Gb ULL connection to reach both the Exchange and MIAX due to related latency concerns. Instead, those Members maintain dedicated separate 10Gb ULL connections for the Exchange and separate dedicated 10Gb ULL connections for MIAX. This resulted in a much higher 10Gb ULL usage per switch by those Members on the shared 10Gb ULL network than would otherwise be needed if the Exchange and MIAX had their own dedicated 10Gb ULL networks. Separation of the Exchange and MIAX 10Gb ULL networks naturally lends itself to reduced 10Gb ULL port consumption on each switch and, therefore, increased 10Gb ULL port availability for current Members and new Members.

Prior to bifurcating the 10Gb ULL network, the Exchange and MIAX continued to add switches to meet ongoing demand for 10Gb ULL connectivity. That was no longer sustainable because simply adding additional switches to expand the current shared 10Gb ULL network would not adequately alleviate the issue of limited available port connectivity. While it would have resulted in a gain in overall port availability, the existing switches on the shared 10Gb ULL network in use would have continued to suffer from lack of port headroom given many latency sensitive Members' needs for a presence on each switch to reach both the Exchange and MIAX. This was because those latency sensitive Members sought to have a presence on each switch to maximize the probability of experiencing the best network performance. Those Members routinely decide to rebalance orders and/or messages over their various connections to ensure each connection is operating with maximum efficiency. Simply adding switches to the extranet would not have resolved the port availability needs on the shared 10Gb ULL network since many of the latency sensitive Members were unwilling to relocate their connections to a new switch due to the potential detrimental performance impact. As such, the impact of adding new switches and rebalancing ports would not have been effective or responsive to customer needs. The Exchange has found that ongoing and continued rebalancing once additional switches are added has had, and would have continued to have had, a diminishing return on increasing available 10Gb ULL connectivity.

Based on its experience and expertise, the Exchange found the most practical way to increase connectivity availability on its switches was to bifurcate the existing 10Gb ULL networks for the Exchange and MIAX by migrating the exchanges' connections from the shared network onto their own set of switches. Such changes accordingly necessitated a review of the Exchange's previous 10Gb ULL connectivity fees and related costs. The proposed fees necessary to allow the Exchange to cover ongoing costs related to providing and maintaining such connectivity, described more fully below. The ever increasing connectivity demands that necessitated this change further support that the proposed fees are reasonable because this demand reflects that Members and non-Members believe they are getting value from the 10Gb ULL connections they purchase.

The Exchange announced on August 12, 2022 the planned network change and January 23, 2023 implementation date to provide market participants adequate time to prepare.[119] Beginning August 12, 2022, the Exchange worked with the then-current 10Gb ULL subscribers to address their connectivity needs ahead of the January 23, 2023 date. Based on those interactions and subscriber feedback, the Exchange experienced a minimal net increase of six (6) overall 10Gb ULL connectivity subscriptions across MIAX Pearl Options and MIAX when the 10Gb ULL network was bifurcated. This immaterial increase in overall connections reflects a minimal fee impact for all types of subscribers and reflects that subscribers elected to reallocate existing 10Gb ULL connectivity directly to the Exchange or MIAX, or chose to decrease or cease connectivity as a result of the change.

Should the Commission Staff disapprove such fees, it would effectively dictate how an exchange manages its technology and would hamper the Exchange's ability to continue to invest in and fund access services in a manner that allows it to meet existing and anticipated access demands of market participants. Disapproval could also have the adverse effect of discouraging an exchange from optimizing its operations and deploying innovative technology to the benefit of market participants if it believes the Commission would later prevent that exchange from covering its costs and monetizing its operational

[117] *See* Securities Exchange Act Release Nos. 96553 (December 20, 2022), 87 FR 79379 (December 27, 2022) (SR–PEARL–2022–60); 96545 (December 20, 2022) 87 FR 79393 (December 27, 2022) (SR–MIAX–2022–48).

[118] Currently, the Exchange maintains sufficient headroom to meet ongoing and future requests for 1Gb connectivity. Therefore, the Exchange did not propose to alter 1Gb connectivity and continues to provide 1Gb connectivity over a shared network.

[119] *See supra* note 9.

enhancements, thus adversely impacting competition. Also, as noted above, the economic consequences of not being able to better establish fee parity with other exchanges for non-transaction fees hampers the Exchange's ability to compete on transaction fees.

Cost Analysis

In general, the Exchange believes that exchanges, in setting fees of all types, should meet very high standards of transparency to demonstrate why each new fee or fee increase meets the Exchange Act requirements that fees be reasonable, equitably allocated, not unfairly discriminatory, and not create an undue burden on competition among members and markets. In particular, the Exchange believes that each exchange should take extra care to be able to demonstrate that these fees are based on its costs and reasonable business needs.

In proposing to charge fees for connectivity and port services, the Exchange is especially diligent in assessing those fees in a transparent way against its own aggregate costs of providing the related service, and in carefully and transparently assessing the impact on Members—both generally and in relation to other Members, *i.e.,* to assure the fee will not create a financial burden on any participant and will not have an undue impact in particular on smaller Members and competition among Members in general. The Exchange believes that this level of diligence and transparency is called for by the requirements of Section 19(b)(1) under the Act,[120] and Rule 19b–4 thereunder,[121] with respect to the types of information exchanges should provide when filing fee changes, and Section 6(b) of the Act,[122] which requires, among other things, that exchange fees be reasonable and equitably allocated,[123] not designed to permit unfair discrimination,[124] and that they not impose a burden on competition not necessary or appropriate in furtherance of the purposes of the Act.[125] This rule change proposal addresses those requirements, and the analysis and data in each of the sections that follow are designed to clearly and comprehensively show how they are met.[126] The Exchange reiterates that the legacy exchanges with whom the Exchange vigorously competes for order flow and market share, were not subject to any such diligence or transparency in setting their baseline non-transaction fees, most of which were put in place before the Revised Review Process and Staff Guidance.

As detailed below, the Exchange recently calculated its aggregate annual costs for providing physical 10Gb ULL connectivity to the Exchange at $15,593,990 (or approximately $1,299,500 per month, rounded to the nearest dollar when dividing the annual cost by 12 months) and its aggregate annual costs for providing Full Service MEO Ports at $1,989,497 (or approximately $165,791 per month, rounded to the nearest dollar when dividing the annual cost by 12 months). In order to cover the aggregate costs of providing connectivity to its users (both Members and non-Members [127]) going forward and to make a modest profit, as described below, the Exchange proposes to modify its Fee Schedule to charge a fee of $13,500 per month for each physical 10Gb ULL connection and to remove language providing for a shared 10Gb ULL network between the Exchange and MIAX. The Exchange also proposes to modify its Fee Schedule to charge tiered rates for Full Service MEO Ports (Bulk) depending on the number of classes assigned or the percentage of national ADV, which is in line with how the Exchange's affiliates, MIAX and MIAX Emerald, assess fees for their comparable MEI Ports.

In 2019, the Exchange completed a study of its aggregate costs to produce market data and connectivity (the ''Cost Analysis'').[128] The Cost Analysis required a detailed analysis of the Exchange's aggregate baseline costs, including a determination and allocation of costs for core services provided by the Exchange—transaction execution, market data, membership services, physical connectivity, and port access (which provide order entry, cancellation and modification functionality, risk functionality, the ability to receive drop copies, and other functionality). The Exchange separately divided its costs between those costs necessary to deliver each of these core services, including infrastructure, software, human resources (*i.e.,* personnel), and certain general and administrative expenses (''cost drivers'').

As an initial step, the Exchange determined the total cost for the Exchange and the affiliated markets for each cost driver as part of its 2024 budget review process. The 2024 budget review is a company-wide process that occurs over the course of many months, includes meetings among senior management, department heads, and the Finance Team. Each department head is required to send a ''bottom up'' budget to the Finance Team allocating costs at the profit and loss account and vendor levels for the Exchange and its affiliated markets based on a number of factors, including server counts, additional hardware and software utilization, current or anticipated functional or non-functional development projects, capacity needs, end-of-life or end-of-service intervals, number of members, market model (*e.g.,* price time or pro-rata, simple only or simple and complex markets, auction functionality, etc.), which may impact message traffic, individual system architectures that impact platform size,[129] storage needs, dedicated infrastructure versus shared infrastructure allocated per platform based on the resources required to support each platform, number of available connections, and employees allocated time. All of these factors result in different allocation percentages among the Exchange and its affiliated markets, *i.e.,* the different percentages of the overall cost driver allocated to the Exchange and its affiliated markets will cause the dollar amount of the overall cost allocated among the Exchange and its affiliated markets to also differ. Because the Exchange's parent company currently owns and operates four separate and distinct marketplaces, the Exchange must determine the costs associated with each actual market—as opposed to the Exchange's parent company simply concluding that all costs drivers are the same at each individual marketplace and dividing total cost by four (4) (evenly for each marketplace). Rather, the Exchange's parent company determines an accurate cost for each marketplace, which results in different allocations and amounts across exchanges for the same cost drivers, due to the unique factors of each marketplace as described above.

[123] 15 U.S.C. 78f(b)(4).

[124] 15 U.S.C. 78f(b)(5).

[125] 15 U.S.C. 78f(b)(8).

[126] *See* Staff Guidance, *supra* note 30.

[127] Types of market participants that obtain connectivity services from the Exchange but are not Members include service bureaus and extranets. Service bureaus offer technology-based services to other companies for a fee, including order entry services, and thus, may access application sessions on behalf of one or more Members. Extranets offer physical connectivity services to Members and non-Members.

[128] The Exchange frequently updates it Cost Analysis as strategic initiatives change, costs increase or decrease, and market participant needs and trading activity changes. The Exchange's most recent Cost Analysis was conducted ahead of this filing.

[129] For example, MIAX Pearl Options maintains 12 matching engines, MIAX Pearl Equities maintains 24 matching engines, MIAX maintains 24 matching engines and MIAX Emerald maintains 12 matching engines.

This allocation methodology also ensures that no cost would be allocated twice or double-counted between the Exchange and its affiliated markets. The Finance Team then consolidates the budget and sends it to senior management, including the Chief Financial Officer and Chief Executive Officer, for review and approval. Next, the budget is presented to the Board of Directors and the Finance and Audit Committees for each exchange for their approval. The above steps encompass the first step of the cost allocation process.

The next step involves determining what portion of the cost allocated to the Exchange pursuant to the above methodology is to be allocated to each core service, *e.g.,* connectivity and ports, market data, and transaction services. The Exchange and its affiliated markets adopted an allocation methodology with thoughtful and consistently applied principles to guide how much of a particular cost amount allocated to the Exchange should be allocated within the Exchange to each core service. This is the final step in the cost allocation process and is applied to each of the cost drivers set forth below. For instance, fixed costs that are not driven by client activity (*e.g.,* message rates), such as data center costs, were allocated more heavily to the provision of physical connectivity (61.8% of total expense amount allocated to 10Gb ULL connectivity), with smaller allocations to Full Service MEO Ports (2.7%), and the remainder to the provision of other connectivity, other ports, transaction execution, membership services and market data services (35.5%). This next level of the allocation methodology at the individual exchange level also took into account factors similar to those set forth under the first step of the allocation methodology process described above, to determine the appropriate allocation to connectivity or market data versus allocations for other services. This allocation methodology was developed through an assessment of costs with senior management intimately familiar with each area of the Exchange's operations. After adopting this allocation methodology, the Exchange then applied an allocation of each cost driver to each core service, resulting in the cost allocations described below. Each of the below cost allocations is unique to the Exchange and represents a percentage of overall cost that was allocated to the Exchange pursuant to the initial allocation described above.

By allocating segmented costs to each core service, the Exchange was able to estimate by core service the potential margin it might earn based on different fee models. The Exchange notes that as a non-listing venue it has five primary sources of revenue that it can potentially use to fund its operations: transaction fees, fees for connectivity and port services, membership fees, regulatory fees, and market data fees. Accordingly, the Exchange must cover its expenses from these five primary sources of revenue. The Exchange also notes that as a general matter each of these sources of revenue is based on services that are interdependent. For instance, the Exchange's system for executing transactions is dependent on physical hardware and connectivity; only Members and parties that they sponsor to participate directly on the Exchange may submit orders to the Exchange; many Members (but not all) consume market data from the Exchange in order to trade on the Exchange; and the Exchange consumes market data from external sources in order to comply with regulatory obligations. Accordingly, given this interdependence, the allocation of costs to each service or revenue source required judgment of the Exchange and was weighted based on estimates of the Exchange that the Exchange believes are reasonable, as set forth below. While there is no standardized and generally accepted methodology for the allocation of an exchange's costs, the Exchange's methodology is the result of an extensive review and analysis and will be consistently applied going forward for any other potential fee proposals. In the absence of the Commission attempting to specify a methodology for the allocation of exchanges' interdependent costs, the Exchange will continue to be left with its best efforts to attempt to conduct such an allocation in a thoughtful and reasonable manner.

Through the Exchange's extensive updated Cost Analysis, which was again recently further refined, the Exchange analyzed every expense item in the Exchange's general expense ledger to determine whether each such expense relates to the provision of connectivity and port services, and, if such expense did so relate, what portion (or percentage) of such expense actually supports the provision of connectivity and port services, and thus bears a relationship that is, ''in nature and closeness,'' directly related to network connectivity and port services. In turn, the Exchange allocated certain costs more to physical connectivity and others to ports, while certain costs were only allocated to such services at a very low percentage or not at all, using consistent allocation methodologies as described above. Based on this analysis, the Exchange estimates that the aggregate monthly cost to provide 10Gb ULL connectivity and Full Service MEO Port services, is $1,465,293 (utilizing the rounded numbers when dividing the annual cost for 10Gb ULL connectivity and annual cost for Full Service MEO Ports by 12 months, then adding both numbers together), as further detailed below.

Lastly, the Exchange notes that, based on: (i) the total expense amounts contained in this filing (which are 2024 projected expenses), and (ii) the total expense amounts contained in the 2023 similar MIAX Pearl Equities filing (utilizing 2023 expenses), MIAX PEARL, LLC's total costs have increased at a greater rate over the last three years than the total costs of MIAX PEARL, LLC's affiliated exchanges, MIAX and MIAX Emerald. This is also reflected in the total costs reported in MIAX PEARL, LLC's Form 1 filings over the last three years, when comparing MIAX PEARL, LLC to MIAX PEARL, LLC's affiliated exchanges, MIAX and MIAX Emerald. This is primarily because that MIAX PEARL, LLC operates two markets, one for options and one for equities, while MIAX and MIAX Emerald each operate only one market. This is also due to higher current expense for MIAX PEARL, LLC for 2022, 2023 and 2024, due to a hardware refresh (*i.e.,* replacing old hardware with new equipment) for MIAX Pearl Options, as well as higher costs associated with MIAX Pearl Equities due to greater development efforts to grow that newer marketplace.[130] The Exchange confirms

[130] *See, e.g.,* Securities Exchange Act Release Nos. 94301 (February 23, 2022), 87 FR 11739 (March 2, 2022) (SR–PEARL–2022–06) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Rule 2617(b) To Adopt Two New Routing Options, and To Make Related Changes and Clarifications to Rules 2614(a)(2)(B) and 2617(b)(2)); 94851 (May 4, 2022), 87 FR 28077 (May 10, 2022) (SR–PEARL–2022–15) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Adopt Exchange Rule 532, Order Price Protection Mechanisms and Risk Controls); 95298 (July 15, 2022), 87 FR 43579 (July 21, 2022) (SR–PEARL–2022–29) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change by MIAX PEARL, LLC To Amend the Route to Primary Auction Routing Option Under Exchange Rule 2617(b)(5)(B)); 95679 (September 6, 2022), 87 FR 55866 (September 12, 2022) (SR–PEARL–2022–34) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 2614, Orders and Order Instructions, To Adopt the Primary Peg Order Type); 96205 (November 1, 2022), 87 FR 67080 (November 7, 2022) (SR–PEARL–2022–43) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Rule 2614, Orders and Order Instructions and Rule 2618, Risk Settings and Trading Risk Metrics To Enhance Existing Risk Controls); 96905 (February 13, 2023), 88 FR 10391 (February 17, 2023) (SR–PEARL–2023–03) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend

that there is no double counting of expenses between the options and equities platform of MIAX Pearl; the greater expense amounts of the MIAX PEARL, LLC (relative to its affiliated exchanges, MIAX and MIAX Emerald) is solely attributed to the unique factors of MIAX Pearl discussed above.

Costs Related To Offering Physical 10Gb ULL Connectivity

The following chart details the individual line-item costs considered by the Exchange to be related to offering physical dedicated 10Gb ULL connectivity via an unshared network as well as the percentage of the Exchange's overall costs that such costs represent for each cost driver (*e.g.,* as set forth below, the Exchange allocated approximately 27.3% of its overall Human Resources cost to offering physical 10Gb ULL connectivity).

Cost drivers	Allocated annual cost[k]	Allocated monthly cost[l]	% of all
Human Resources	6,058,041	504,837	27.3
Connectivity (external fees, cabling, switches, etc.)	57,696	4,808	61.8
Internet Services and External Market Data	395,204	32,934	74.8
Data Center	946,590	78,883	61.8
Hardware and Software Maintenance and Licenses	1,186,815	98,901	59.8
Depreciation	2,446,896	203,908	61.3
Allocated Shared Expenses	4,502,748	375,229	50.8
Total	15,593,990	1,299,500	39.8

[k] The Annual Cost includes figures rounded to the nearest dollar.
[l] The Monthly Cost was determined by dividing the Annual Cost for each line item by twelve (12) months and rounding up or down to the nearest dollar.

Below are additional details regarding each of the line-item costs considered by the Exchange to be related to offering physical 10Gb ULL connectivity. While some costs were attempted to be allocated as equally as possible among the Exchange and its affiliated markets, the Exchange notes that some of its cost allocation percentages for certain cost drivers differ when compared to the same cost drivers for the Exchange's affiliated markets in their similar proposed fee changes for connectivity and ports. This is because MIAX Pearl Options' cost allocation methodology utilizes the actual projected costs of MIAX Pearl Options (which are specific to MIAX Pearl Options, and are independent of the costs projected and utilized by MIAX Pearl Options' affiliated markets) to determine its actual costs, which may vary across the Exchange and its affiliated markets based on factors that are unique to each marketplace. MIAX Pearl Options provides additional explanation below (including the reason for the deviation) for the significant differences.

The Exchange also notes that expenses included in its 2024 fiscal year budget and this proposal are generally higher than its 2023 fiscal year budget and Cost Analysis included in prior filings. As more fully described below and throughout this filing, this is due to a number of factors, such as, critical vendors and suppliers increasing costs they charge the Exchange, significant exchange staff headcount increases, increased data center costs from the Exchange's data center providers in multiple locations and facilities, higher technology and communications costs, planned hardware refreshes, and system capacity upgrades that increase depreciation expense. Specifically, with regard to employee compensation, the 2024 fiscal year budget includes additional expenses related to increased headcount and new hires that are needed to support the Exchange as it continues to grow (the Exchange and its affiliated companies are projected to hire over 60 additional staff in 2024). Hardware and software expenses have also increased primarily due to price increases from critical vendors and equipment suppliers. Further, the Exchange budgeted for additional hardware and software needs to support the Exchange's continued growth and expansion. Depreciation and amortization have likewise increased due to recent and planned refreshes in Exchange hardware and software. This new equipment and software then becomes depreciable, as described below. Data center costs have also increased due the following: the Exchange expanding its footprint within its data center; and the data center vendor increasing the costs it charges the Exchange. Lastly, allocated shared expenses have increased due to the overall budgeted increase in costs from 2023 to 2024 necessary to operate and support the Exchange as described below.

The updated Cost Analysis using projected 2024 expenses caused some allocation percentages in this filing to differ slightly (≤3%) from past filings that relied on projected 2023 expenses. This is due to various reasons. For example, the slight differences in allocation percentage for the Human Resources cost driver is due to both changes in headcount in 2024 and also changes to the percentage of employee time allocated to these services based on changing projects and initiatives in 2024 versus 2023. For example, the Exchange recently hired a Head of Data Services whose time is entirely allocated to the market data cost driver. These types of changes in the Human Resources cost driver impact the final percentage amount of total cost allocated towards overall connectivity, including 10Gb ULL connectivity. There are no changes to the overall percentage allocation amounts applied to the product groups (*e.g.,* network connectivity) for each of the non-Human Resources cost drivers in the current filing based on 2024 expense versus the prior 2023 filings. However, within each of those product groups, slight changes to the amount of usage of the individual products within that group (in 2024 versus 2023) will have an impact on the individual product's percentage allocation within that entire product group. For example, a decrease in 1Gb connectivity lines in 2024 versus 2023 will have an impact on the percentage allocation of costs to 1Gb lines in 2024 versus 2023, which will also impact the individual percentage allocation of costs to 10Gb ULL lines, within the entire product group. Despite these minor shifts in product usage and changes in headcount and employee mix which

Exchange Rule 2618 To Add Optional Risk Control Settings); 97236 (March 31, 2023), 88 FR 20597 (April 6, 2023) (SR–PEARL–2023–15) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rules 2617 and 2626 Regarding Retail Orders Routed Pursuant to the Route to Primary Auction Routing Option).

resulted in non-material changes in percentage allocation amounts, the Exchange applied the same rules and principles to its 2024 Cost Analysis versus its 2023 Cost Analysis.

Human Resources

The Exchange notes that it and its affiliated markets anticipate that by year-end 2024, there will be 289 employees (excluding employees at non-options/equities exchange subsidiaries of Miami International Holdings, Inc. (''MIH''), the holding company of the Exchange and its affiliated markets), and each department leader has direct knowledge of the time spent by each employee with respect to the various tasks necessary to operate the Exchange. Specifically, twice a year, and as needed with additional new hires and new project initiatives, in consultation with employees as needed, managers and department heads assign a percentage of time to every employee and then allocate that time amongst the Exchange and its affiliated markets to determine each market's individual Human Resources expense. Then, managers and department heads assign a percentage of each employee's time allocated to the Exchange into buckets including network connectivity, ports, market data, and other exchange services. This process ensures that every employee is 100% allocated, ensuring there is no double counting between the Exchange and its affiliated markets.

For personnel costs (Human Resources), the Exchange calculated an allocation of employee time for employees whose functions include providing and maintaining physical connectivity and performance thereof (primarily the Exchange's network infrastructure team, which spends most of their time performing functions necessary to provide physical connectivity). As described more fully above, the Exchange's parent company allocates costs to the Exchange and its affiliated markets and then a portion of the Human Resources costs allocated to the Exchange is then allocated to connectivity. From that portion allocated to the Exchange that applied to connectivity, the Exchange then allocated a weighted average of 48.5% of each employee's time from the above group to 10Gb ULL connectivity. The Exchange also allocated Human Resources costs to provide physical connectivity to a limited subset of personnel with ancillary functions related to establishing and maintaining such connectivity (such as information security, sales, membership, and finance personnel). The Exchange allocated cost on an employee-by-employee basis (*i.e.,* only including those personnel who support functions related to providing physical connectivity) and then applied a smaller allocation to such employees' time to 10Gb ULL connectivity (less than 17%). This other group of personnel with a smaller allocation of Human Resources costs also have a direct nexus to 10Gb ULL connectivity, whether it is a sales person selling a connection, finance personnel billing for connectivity or providing budget analysis, or information security ensuring that such connectivity is secure and adequately defended from an outside intrusion.

The estimates of Human Resources cost were therefore determined by consulting with such department leaders, determining which employees are involved in tasks related to providing physical connectivity, and confirming that the proposed allocations were reasonable based on an understanding of the percentage of time such employees devote to those tasks. This includes personnel from the Exchange departments that are predominately involved in providing 1Gb and 10Gb ULL connectivity: Business Systems Development, Trading Systems Development, Systems Operations and Network Monitoring, Network and Data Center Operations, Listings, Trading Operations, and Project Management. Again, the Exchange allocated 48.5% of each of their employee's time assigned to the Exchange for 10Gb ULL connectivity, as stated above. Employees from these departments perform numerous functions to support 10Gb ULL connectivity, such as the installation, re-location, configuration, and maintenance of 10Gb ULL connections and the hardware they access. This hardware includes servers, routers, switches, firewalls, and monitoring devices. These employees also perform software upgrades, vulnerability assessments, remediation and patch installs, equipment configuration and hardening, as well as performance and capacity management. These employees also engage in research and development analysis for equipment and software supporting 10Gb ULL connectivity and design, and support the development and on-going maintenance of internally-developed applications as well as data capture and analysis, and Member and internal Exchange reports related to network and system performance. The above list of employee functions is not exhaustive of all the functions performed by Exchange employees to support 10Gb ULL connectivity, but illustrates the breath of functions those employees perform in support of the above cost and time allocations.

Lastly, the Exchange notes that senior level executives' time was only allocated to the 10Gb ULL connectivity related Human Resources costs to the extent that they are involved in overseeing tasks related to providing physical connectivity. The Human Resources cost was calculated using a blended rate of compensation reflecting salary, equity and bonus compensation, benefits, payroll taxes, and 401(k) matching contributions.

Connectivity (External Fees, Cabling, Switches, etc.)

The Connectivity cost driver includes external fees paid to connect to other exchanges and third parties, cabling and switches required to operate the Exchange. The Connectivity cost driver is more narrowly focused on technology used to complete connections to the Exchange and to connect to external markets. The Exchange notes that its connectivity to external markets is required in order to receive market data to run the Exchange's matching engine and basic operations compliant with existing regulations, primarily Regulation NMS.

The Exchange relies on various connectivity providers for connectivity to the entire U.S. options industry, and infrastructure services for critical components of the network that are necessary to provide and maintain its System Networks and access to its System Networks via 10Gb ULL connectivity. Specifically, the Exchange utilizes connectivity providers to connect to other national securities exchanges and the Options Price Reporting Authority (''OPRA''). The Exchange understands that these service providers provide services to most, if not all, of the other U.S. exchanges and other market participants. Connectivity provided by these service providers is critical to the Exchanges daily operations and performance of its System Networks to which market participants connect to via 10Gb ULL connectivity. Without these services providers, the Exchange would not be able to connect to other national securities exchanges, market data providers or OPRA and, therefore, would not be able to operate and support its System Networks. The Exchange does not employ a separate fee to cover its connectivity expense and recoups that expense, in part, by charging for 10Gb ULL connectivity.

Internet Services and External Market Data

The next cost driver consists of internet Services and external market data. Internet services includes third-party service providers that provide the internet, fiber and bandwidth connections between the Exchange's networks, primary and secondary data centers, and office locations in Princeton and Miami.

External market data includes fees paid to third parties, including other exchanges, to receive market data. The Exchange includes external market data fee costs towards the provision of 10Gb ULL connectivity because such market data is necessary for certain services related to connectivity, including pre-trade risk checks and checks for other conditions (*e.g.,* re-pricing of orders to avoid locked or crossed markets and trading collars). Since external market data from other exchanges is consumed at the Exchange's matching engine level, (to which 10Gb ULL connectivity provides access) in order to validate orders before additional orders enter the matching engine or are executed, the Exchange believes it is reasonable to allocate an amount of such costs to 10Gb ULL connectivity.

The Exchange relies on content service providers for data feeds for the entire U.S. options industry, as well as content for critical components of the network that are necessary to provide and maintain its System Networks and access to its System Networks via 10Gb ULL connectivity. Specifically, the Exchange utilizes content service providers to receive market data from OPRA, other exchanges and market data providers. The Exchange understands that these service providers provide services to most, if not all, of the other U.S. exchanges and other market participants. Market data provided these service providers is critical to the Exchanges daily operations and performance of its System Networks to which market participants connect to via 10Gb ULL connectivity. Without these services providers, the Exchange would not be able to receive market data and, therefore, would not be able to operate and support its System Networks. The Exchange does not employ a separate fee to cover its content service provider expense and recoups that expense, in part, by charging for 10Gb ULL connectivity.

Lastly, the Exchange notes that the actual dollar amounts allocated as part of the second step of the 2024 budget process differ among the Exchange and its affiliated markets for the internet Services and External Market Data cost driver, even though, but for MIAX Emerald, the allocation percentages are generally consistent across markets (*e.g.,* MIAX Emerald, MIAX, and MIAX Pearl Options allocated 84.8%, 71.3%, and 74.8%, respectively, to the same cost driver). This is because: (i) a different percentage of the overall internet Services and External Market Data cost driver was allocated to MIAX Emerald and its affiliated markets due to the factors set forth under the first step of the 2024 budget review process described above (unique technical architecture, market structure, and business requirements of each marketplace); and (ii) MIAX Emerald itself allocated a larger portion of this cost driver to 10Gb ULL connectivity because of recent initiatives to improve the latency and determinism of its systems. The Exchange notes while the percentage MIAX Emerald allocated to the internet Services and External Market Data cost driver is greater than the Exchange and its other affiliated markets, the overall dollar amount allocated to the Exchange under the initial step of the 2024 budget process is lower than its affiliated markets. However, the Exchange believes that this is not, in dollar amounts, a significant difference. This is because the total dollar amount of expense covered by this cost driver is relatively small compared to other cost drivers and is due to nuances in exchange architecture that require different initial allocation amount under the first step of the 2024 budget process described above. Thus, non-significant differences in percentage allocation amounts in a smaller cost driver create the appearance of a significant difference, even though the actual difference in dollar amounts is small. For instance, despite the difference in cost allocation percentages for the internet Services and External Market Data cost driver across MIAX and MIAX Pearl Options, the actual dollar amount difference is approximately only $13,000 per month, a non-significant amount.

Data Center

Data Center costs includes an allocation of the costs the Exchange incurs to provide physical connectivity in the third-party data centers where it maintains its equipment (such as dedicated space, security services, cooling and power). The Exchange notes that it does not own the Primary Data Center or the Secondary Data Center, but instead, leases space in data centers operated by third parties. The Exchange has allocated a high percentage of the Data Center cost (61.8%) to physical 10Gb ULL connectivity because the third-party data centers and the Exchange's physical equipment contained therein is the most direct cost in providing physical access to the Exchange. In other words, for the Exchange to operate in a dedicated space with connectivity by market participants to a physical trading platform, the data centers are a very tangible cost, and in turn, if the Exchange did not maintain such a presence then physical connectivity would be of no value to market participants.

Hardware and Software Maintenance and Licenses

Hardware and Software Licenses includes hardware and software licenses used to operate and monitor physical assets necessary to offer physical connectivity to the Exchange.[131] The Exchange notes that this allocation is greater than MIAX and MIAX Emerald options exchanges by a significant amount as MIAX Pearl Options allocated 59.8% of its Hardware and Software Maintenance and License expense towards 10Gb ULL connectivity, while MIAX and MIAX Emerald allocated 48.5% and 50.9%, respectively, to the same category of expense. This is because MIAX Pearl Options is in the process of replacing and upgrading various hardware and software used to operate its options trading platform in order to maintain premium network performance. At the time of this filing, the Exchange is undergoing a major hardware refresh, replacing older hardware with new hardware. This hardware includes servers, network switches, cables, optics, protocol data units, and cabinets, to maintain a state-of-the-art technology platform. Because of the timing of the hardware refresh with the timing of this filing, the Exchange has materially higher expense than its affiliates.

Depreciation

All physical assets, software and hardware used to provide 10Gb ULL

[131] This expense may be greater than the Exchange's affiliated markets, specifically MIAX and MIAX Emerald, because, unlike the MIAX and MIAX Emerald, MIAX Pearl Options maintains an additional gateway to accommodate its Members' and Equity Members' access and connectivity needs. This added gateway contributes to the difference in allocations between MIAX Pearl Options, MIAX and MIAX Emerald. This expense also differs in dollar amount among the MIAX Pearl Options, MIAX, and MIAX Emerald because each market may maintain and utilize a different amount of hardware and software based on its market model and infrastructure needs. The Exchange allocated a percentage of the overall cost based on actual amounts of hardware and software utilized by that market, which resulted in different cost allocations and dollar amounts.

connectivity, which also includes assets used for testing and monitoring of Exchange infrastructure, were valued at cost, and depreciated or leased over periods ranging from three to five years. Thus, the depreciation cost primarily relates to servers necessary to operate the Exchange, some of which are owned by the Exchange and some of which are leased by the Exchange in order to allow efficient periodic technology refreshes. The Exchange also included in the Depreciation cost driver certain budgeted improvements that the Exchange intends to capitalize and depreciate with respect to 10Gb ULL connectivity in the near-term. As with the other allocated costs in the Exchange's updated Cost Analysis, the Depreciation cost was therefore narrowly tailored to depreciation related to 10Gb ULL connectivity. As noted above, the Exchange allocated 61.3% of its allocated depreciation costs to providing physical 10Gb ULL connectivity.

The Exchange also notes that this allocation differs from its affiliated markets due to a number of factors, such as the age of physical assets and software (*e.g.,* older physical assets and software were previously depreciated and removed from the allocation), or certain system enhancements that required new physical assets and software, thus providing a higher contribution to the depreciated cost. For example, the percentages the Exchange and its affiliate, MIAX, allocated to the depreciation of hardware and software used to provide 10Gb ULL connectivity are similar. However, the Exchange's dollar amount is less than that of MIAX by approximately $10,553 per month due to two factors: first, MIAX has undergone a technology refresh since the time MIAX Pearl Options launched in 2017, leading to it having more hardware that software that is subject to depreciation. Second, MIAX maintains 24 matching engines while MIAX Pearl Options maintains only 12 matching engines. This also results in more of MIAX's hardware and software being subject to depreciation than MIAX Pearl Options' hardware and software due to the greater amount of equipment and software necessary to support the greater number of matching engines on MIAX.

Allocated Shared Expenses

Finally, as with other exchange products and services, a portion of general shared expenses was allocated to overall physical connectivity costs. These general shared costs are integral to exchange operations, including its ability to provide physical connectivity. Costs included in general shared expenses include office space and office expenses (*e.g.,* occupancy and overhead expenses), utilities, recruiting and training, marketing and advertising costs, professional fees for legal, tax and accounting services (including external and internal audit expenses), and telecommunications. Similarly, the cost of paying directors to serve on the Exchange's Board of Directors is also included in the Exchange's general shared expense cost driver.[132] These general shared expenses are incurred by the Exchange's parent company, MIH, as a direct result of operating the Exchange and its affiliated markets.

The Exchange employed a process to determine a reasonable percentage to allocate general shared expenses to 10Gb ULL connectivity pursuant to its multi-layered allocation process. First, general expenses were allocated among the Exchange and affiliated markets as described above. Then, the general shared expense assigned to the Exchange was allocated across core services of the Exchange, including connectivity. Then, these costs were further allocated to sub-categories within the final categories, *i.e.,* 10Gb ULL connectivity as a sub-category of connectivity. In determining the percentage of general shared expenses allocated to connectivity that ultimately apply to 10Gb ULL connectivity, the Exchange looked at the percentage allocations of each of the cost drivers and determined a reasonable allocation percentage. The Exchange also held meetings with senior management, department heads, and the Finance Team to determine the proper amount of the shared general expense to allocate to 10Gb ULL connectivity. The Exchange, therefore, believes it is reasonable to assign an allocation, in the range of allocations for other cost drivers, while continuing to ensure that this expense is only allocated once. Again, the general shared expenses are incurred by the Exchange's parent company as a result of operating the Exchange and its affiliated markets and it is therefore reasonable to allocate a percentage of those expenses to the Exchange and ultimately to specific product offerings such as 10Gb ULL connectivity.

Again, a portion of all shared expenses were allocated to the Exchange (and its affiliated markets) which, in turn, allocated a portion of that overall allocation to all physical connectivity on the Exchange. The Exchange then allocated 50.8% of the portion allocated to physical connectivity to 10Gb ULL connectivity. The Exchange believes this allocation percentage is reasonable because, while the overall dollar amount may be higher than other cost drivers, the 50.8% is based on and in line with the percentage allocations of each of the Exchange's other cost drivers. The percentage allocated to 10Gb ULL connectivity also reflects its importance to the Exchange's strategy and necessity towards the nature of the Exchange's overall operations, which is to provide a resilient, highly deterministic trading system that relies on faster 10Gb ULL connectivity than the Exchange's competitors to maintain premium performance. This allocation reflects the Exchange's focus on providing and maintaining high performance network connectivity, of which 10Gb ULL connectivity is a main contributor. The Exchange differentiates itself by offering a ''premium-product'' network experience, as an operator of a high performance, ultra-low latency network with unparalleled system throughput, which system networks can support access to three distinct options markets and multiple competing market-makers having affirmative obligations to continuously quote over 1,100,000 distinct trading products (per exchange), and the capacity to handle approximately 38 million quote messages per second. The ''premium-product'' network experience enables users of 10Gb ULL connections to receive the network monitoring and reporting services for those approximately 1,100,000 distinct trading products. These value add services are part of the Exchange's strategy for offering a high performance trading system, which utilizes 10Gb ULL connectivity.

The Exchange notes that the 50.8% allocation of general shared expenses for physical 10Gb ULL connectivity is higher than that allocated to general shared expenses for Full Service MEO Ports. This is based on its allocation methodology that weighted costs attributable to each core service. While physical connectivity has several areas where certain tangible costs are heavily weighted towards providing such service (*e.g.,* Data Center, as described above), Full Service MEO Ports do not require as many broad or indirect resources as other core services.

* * * * *

[132] The Exchange notes that MEMX allocated a precise amount of 10% of the overall cost for directors to providing physical connectivity. *See* Securities Exchange Act Release No. 95936 (September 27, 2022), 87 FR 59845 (October 3, 2022) (SR–MEMX–2022–26). The Exchange does not calculate is expenses at that granular a level. Instead, director costs are included as part of the overall general allocation.

Approximate Cost Per 10Gb Connection Per Month

After determining the approximate allocated monthly cost related to 10Gb connectivity, the total monthly cost for 10Gb ULL connectivity of $1,299,500 was divided by the number of physical 10Gb ULL connections the Exchange maintained at the time that proposed pricing was determined (108), to arrive at a cost of approximately $12,032 per month (rounded to the nearest dollar), per physical 10Gb ULL connection. Due to the nature of this particular cost, this allocation methodology results in an allocation among the Exchange and its affiliated markets based on set quantifiable criteria, *i.e.,* actual number of 10Gb ULL connections.

* * * * *

Costs Related To Offering Full Service MEO Ports

The following chart details the individual line-item costs considered by the Exchange to be related to offering Full Service MEO Ports as well as the percentage of the Exchange's overall costs such costs represent for such area (*e.g.,* as set forth below, the Exchange allocated approximately 6.9% of its overall Human Resources cost to offering Full Service MEO Ports).

Cost drivers	Allocated annual cost [m]	Allocated monthly cost [n]	% of all
Human Resources	1,518,357	126,530	6.9
Connectivity (external fees, cabling, switches, etc.)	1,018	85	1.1
Internet Services and External Market Data	5,766	481	1.1
Data Center	41,762	3,480	2.7
Hardware and Software Maintenance and Licenses	21,643	1,804	1.1
Depreciation	132,334	11,028	3.3
Allocated Shared Expenses	268,617	22,385	3.0
Total	1,989,497	165,793	5.1

[m] *See supra* note k (describing rounding of Annual Costs).
[n] *See supra* note l (describing rounding of Monthly Costs based on Annual Costs).

Below are additional details regarding each of the line-item costs considered by the Exchange to be related to offering Full Service MEO Ports. While some costs were attempted to be allocated as equally as possible among the Exchange and its affiliated markets, the Exchange notes that some of its cost allocation percentages for certain cost drivers differ when compared to the same cost drivers for the Exchange's affiliated markets in their similar proposed fee changes for connectivity and ports. This is because the Exchange's cost allocation methodology utilizes the actual projected costs of the Exchange (which are specific to the Exchange, and are independent of the costs projected and utilized by the Exchange's affiliated markets) to determine its actual costs, which may vary across the Exchange and its affiliated markets based on factors that are unique to each marketplace. The Exchange provides additional explanation below (including the reason for the deviation) for the significant differences.

The Exchange also notes that expenses included in its 2024 fiscal year budget and this proposal are generally higher than its 2023 fiscal year budget and Cost Analysis included in prior filings. As more fully described below and throughout this filing, this is due to a number of factors, such as, critical vendors and suppliers increasing costs they charge the Exchange, significant exchange staff headcount increases, increased data center costs from the Exchange's data center providers in multiple locations and facilities, higher technology and communications costs, planned hardware refreshes, and system capacity upgrades that increase depreciation expense. Specifically, with regard to employee compensation, the 2024 fiscal year budget includes additional expenses related to increased headcount and new hires that are needed to support the Exchange as it continues to grow (the Exchange and its affiliated companies are projected to hire over 60 additional staff in 2024). Hardware and software expenses have also increased primarily due to price increases from critical vendors and equipment suppliers. Further, the Exchange budgeted for additional hardware and software needs to support the Exchange's continued growth and expansion. Depreciation and amortization have likewise increased due to recent and planned refreshes in Exchange hardware and software. This new equipment and software then becomes depreciable, as described below. Data center costs have also increased due the following: the Exchange expanding its footprint within its data center; and the data center vendor increasing the costs it charges the Exchange. Lastly, allocated shared expenses have increased due to the overall budgeted increase in costs from 2023 to 2024 necessary to operate and support the Exchange as described below.

The updated Cost Analysis using projected 2024 expenses caused some allocation percentages in this filing to differ slightly (≤3%) from past filings that relied on projected 2023 expenses. This is due to various reasons. For example, the slight differences in allocation percentage for the Human Resources cost driver is due to both changes in headcount in 2024 and also changes to the percentage of employee time allocated to these services based on changing projects and initiatives in 2024 versus 2023. For example, the Exchange recently hired a Head of Data Services whose time is entirely allocated to the market data cost driver. These types of changes in the Human Resources cost driver impact the final percentage amount of total cost allocated towards overall connectivity, including 10Gb ULL connectivity. There are no changes to the overall percentage allocation amounts applied to the product groups (*e.g.,* network connectivity) for each of the non-Human Resources cost drivers in the current filing based on 2024 expense versus the prior 2023 filings. However, within each of those product groups, slight changes to the amount of usage of the individual products within that group (in 2024 versus 2023) will have an impact on the individual product's percentage allocation within that entire product group. For example, a decrease in 1Gb connectivity lines in 2024 versus 2023 will have an impact on the percentage allocation of costs to 1Gb lines in 2024 versus 2023, which will also impact the individual percentage allocation of costs to 10Gb ULL lines, within the entire product group. Despite these minor shifts in product usage and changes in headcount and employee mix which resulted in non-material changes in

percentage allocation amounts, the Exchange applied the same rules and principles to its 2024 Cost Analysis versus its 2023 Cost Analysis.

Human Resources

With respect to Full Service MEO Ports, the Exchange calculated Human Resources cost by taking an allocation of employee time for employees whose functions include providing Full Service MEO Ports and maintaining performance thereof (including a broader range of employees such as technical operations personnel, market operations personnel, and software engineering personnel) as well as a limited subset of personnel with ancillary functions related to maintaining such connectivity (such as sales, membership, and finance personnel). Just as described above for 10Gb ULL connectivity, the estimates of Human Resources cost were again determined by consulting with department leaders, determining which employees are involved in tasks related to providing Full Service MEO Ports and maintaining performance thereof, and confirming that the proposed allocations were reasonable based on an understanding of the percentage of their time such employees devote to tasks related to providing Full Service MEO Ports and maintaining performance thereof. This includes personnel from the following Exchange departments that are predominately involved in providing Full Service MEO Ports: Business Systems Development, Trading Systems Development, Systems Operations and Network Monitoring, Network and Data Center Operations, Listings, Trading Operations, and Project Management. The Exchange notes that senior level executives were allocated Human Resources costs to the extent they are involved in overseeing tasks specifically related to providing Full Service MEO Ports. Senior level executives were only allocated Human Resources costs to the extent that they are involved in managing personnel responsible for tasks integral to providing Full Service MEO Ports. The Human Resources cost was again calculated using a blended rate of compensation reflecting salary, equity and bonus compensation, benefits, payroll taxes, and 401(k) matching contributions.

Connectivity (External Fees, Cabling, Switches, etc.)

The Connectivity cost includes external fees paid to connect to other exchanges and cabling and switches, as described above.

Internet Services and External Market Data

The next cost driver consists of internet services and external market data. Internet services includes third-party service providers that provide the internet, fiber and bandwidth connections between the Exchange's networks, primary and secondary data centers, and office locations in Princeton and Miami. For purposes of Full Service MEO Ports, the Exchange also includes a portion of its costs related to external market data. External market data includes fees paid to third parties, including other exchanges, to receive and consume market data from other markets. The Exchange includes external market data costs towards the provision of Full Service MEO Ports because such market data is necessary (in addition to physical connectivity) to offer certain services related to such ports, such as validating orders on entry against the NBBO and checking for other conditions (*e.g.,* halted securities).[133] Thus, since market data from other exchanges is consumed at the Exchange's Full Service MEO Port level in order to validate orders, before additional processing occurs with respect to such orders, the Exchange believes it is reasonable to allocate a small amount of such costs to Full Service MEO Ports.

The Exchange notes that the allocation for the internet Services and External Market Data cost driver is lower than that of its affiliate, MIAX, as MIAX allocated 5.5% of its internet Services and External Market Data expense towards Limited Service MEI Ports, while MIAX Pearl Options allocated 1.1% to its Full Service MEO Ports for the same cost driver. The allocation percentages set forth above differ because they directly correspond with the number of applicable ports utilized on each exchange. For December 2023, MIAX Market Makers utilized 1,785 Limited Service MEI ports and MIAX Emerald Market Makers utilized 1,070 Limited Service MEI Ports. When compared to Full Service Port (Bulk and Single) usage, for December 2023, MIAX Pearl Options Members utilized only 360 Full Service MEO Ports (Bulk and Single), far fewer than number of Limited Service MEI Ports utilized by Market Makers on MIAX and MIAX Emerald, thus resulting in a smaller cost allocation. There is increased cost associated with supporting a higher number of ports (requiring more hardware and other technical infrastructure and internet Service), thus the Exchange allocates a higher percentage of expense than MIAX Pearl Options, which has a lower port count.

Data Center

Data Center costs includes an allocation of the costs the Exchange incurs to provide Full Service MEO Ports in the third-party data centers where it maintains its equipment as well as related costs for market data to then enter the Exchange's system via Full Service MEO Ports (the Exchange does not own the Primary Data Center or the Secondary Data Center, but instead, leases space in data centers operated by third parties).

Hardware and Software Maintenance and Licenses

Hardware and Software Licenses includes hardware and software licenses used to monitor the health of the order entry services provided by the Exchange, as described above.

The Exchange notes that this allocation is less than its affiliate, MIAX, as MIAX allocated 5.5% of its Hardware and Software Maintenance and License expense towards Limited Service MEI Ports, while MIAX Pearl Options allocated 1.1% to its Full Service MEO Ports (Bulk and Single) for the same category of expense. The allocation percentages set forth above differ because they correspond with the number of applicable ports utilized on each exchange. For December 2023, MIAX Market Makers utilized 1,785 Limited Service MEI ports and MIAX Emerald Market Makers utilized 1,070 Limited Service MEI Ports. When compared to Full Service Port (Bulk and Single) usage, for December 2023, MIAX Pearl Options Members utilized only 360 Full Service MEO Ports (Bulk and Single), far fewer than number of Limited Service MEI Ports utilized by Market Makers on MIAX and MIAX Emerald, thus resulting in a smaller cost allocation. There is increased cost associated with supporting a higher number of ports (requiring more hardware and other technical infrastructure), thus the Exchange allocates a higher percentage of expense than MIAX Pearl Options, which has a lower port count.

Depreciation

The vast majority of the software the Exchange uses to provide Full Service MEO Ports has been developed in-house and the cost of such development,

[133] The Exchange notes that MEMX separately allocated 7.5% of its external market data costs to providing physical connectivity. *See* Securities Exchange Act Release No. 95936 (September 27, 2022), 87 FR 59845 (October 3, 2022) (SR–MEMX–2022–26).

which takes place over an extended period of time and includes not just development work, but also quality assurance and testing to ensure the software works as intended, is depreciated over time once the software is activated in the production environment. Hardware used to provide Full Service MEO Ports includes equipment used for testing and monitoring of order entry infrastructure and other physical equipment the Exchange purchased and is also depreciated over time.

All hardware and software, which also includes assets used for testing and monitoring of order entry infrastructure, were valued at cost, depreciated or leased over periods ranging from three to five years. Thus, the depreciation cost primarily relates to servers necessary to operate the Exchange, some of which is owned by the Exchange and some of which is leased by the Exchange in order to allow efficient periodic technology refreshes. The Exchange allocated 3.3% of all depreciation costs to providing Full Service MEO Ports. The Exchange allocated depreciation costs for depreciated software necessary to operate the Exchange to Full Service MEO Ports because such software is related to the provision of Full Service MEO Ports. As with the other allocated costs in the Exchange's updated Cost Analysis, the Depreciation cost driver was therefore narrowly tailored to depreciation related to Full Service MEO Ports.

The Exchange notes that this allocation differs from its affiliated markets due to a number of factors, such as the age of physical assets and software (*e.g.,* older physical assets and software were previously depreciated and removed from the allocation), or certain system enhancements that required new physical assets and software, thus providing a higher contribution to the depreciated cost.

For example, the Exchange notes that the percentage it allocated to the depreciation cost driver for Full Service MEO Ports and the percentage its affiliate, MIAX, allocated to the depreciation cost driver for MIAX's Limited Service MEI Ports, differ by only 1.6%. However, MIAX's approximate dollar amount is greater than that of MIAX Pearl Options by approximately $7,000 per month. This is due to two primary factors. First, MIAX has under gone a technology refresh since the time MIAX Pearl Options launched in 2017, leading to it having more hardware that software that is subject to depreciation. Second, MIAX maintains 24 matching engines while MIAX Pearl Options maintains only 12 matching engines. This also results in more of MIAX's hardware and software being subject to depreciation than MIAX Pearl Options' hardware and software due to the greater amount of equipment and software necessary to support the greater number of matching engines on MIAX.

Allocated Shared Expenses

Finally, a portion of general shared expenses was allocated to overall Full Service MEO Ports costs as without these general shared costs the Exchange would not be able to operate in the manner that it does and provide application sessions. The costs included in general shared expenses include general expenses of the Exchange, including office space and office expenses (*e.g.,* occupancy and overhead expenses), utilities, recruiting and training, marketing and advertising costs, professional fees for legal, tax and accounting services (including external and internal audit expenses), and telecommunications costs. The Exchange again notes that the cost of paying directors to serve on its Board of Directors is included in the calculation of Allocated Shared Expenses, and thus a portion of such overall cost amounting to less than 4.0% of the overall cost for directors was allocated to providing Full Service MEO Ports. The Exchange notes that the 3.0% allocation of general shared expenses for Full Service MEO Ports is lower than that allocated to general shared expenses for physical connectivity based on its allocation methodology that weighted costs attributable to each Core Service based on an understanding of each area. While Full Service MEO Ports have several areas where certain tangible costs are heavily weighted towards providing such service (*e.g.,* Data Centers, as described above), 10Gb ULL connectivity requires a broader level of support from Exchange personnel in different areas, which in turn leads to a broader general level of cost to the Exchange.

Lastly, the Exchange notes that this allocation is less than its affiliate, MIAX, as MIAX allocated 7.3% of its Allocated Shared Expense towards Limited Service MEI Ports, while MIAX Pearl Options allocated 3.0% to its Full Service MEO Ports (Bulk and Single) for the same category of expense. The allocation percentages set forth above differ because they correspond with the number of applicable ports utilized on each exchange. For December 2023, MIAX Market Makers utilized 1,785 Limited Service MEI Ports and MIAX Emerald Market Makers utilized 1,070 Limited Service MEI ports. When compared to Full Service Port (Bulk and Single) usage, for December 2023, MIAX Pearl Options Members utilized only 360 Full Service MEO Ports (Bulk and Single), far fewer than number of Limited Service MEI Ports utilized by Market Makers on MIAX, thus resulting in a smaller cost allocation. There is increased cost associated with supporting a higher number of ports (requiring more hardware and other technical infrastructure), thus the Exchange allocates a higher percentage of expense than MIAX Pearl Options which has a lower port count.

* * * * *

Approximate Cost Per Full Service MEO Port Per Month

Based on projected 2024 data, the total monthly cost allocated to Full Service MEO Ports of $165,793 was divided by the number of chargeable Full Service MEO Ports the Exchange maintained at the time that proposed pricing was determined (25 total; 25 Full Service MEO Port, Bulk, and 0 Full Service MEO Port, Single), to arrive at a cost of approximately $6,632per month, per charged Full Service MEO Port.

* * * * *

Cost Analysis—Additional Discussion

In conducting its Cost Analysis, the Exchange did not allocate any of its expenses in full to any core services (including physical connectivity or Full Service MEO Ports) and did not double-count any expenses. Instead, as described above, the Exchange allocated applicable cost drivers across its core services and used the same Cost Analysis to form the basis of this proposal and the filings the Exchange submitted proposing fees for proprietary data feeds offered by the Exchange. For instance, in calculating the Human Resources expenses to be allocated to 10Gb ULL physical connections based upon the above described methodology, the Exchange has a team of employees dedicated to network infrastructure and with respect to such employees the Exchange allocated network infrastructure personnel with a high percentage of the cost of such personnel (48.5%) given their focus on functions necessary to provide physical connections. The salaries of those same personnel were allocated only 5.4% to Full Service MEO Ports and the remaining 46.1% was allocated to 1Gb connectivity, other port services, transaction services, membership services and market data. The Exchange did not allocate any other Human Resources expense for providing

physical connections to any other employee group, outside of a smaller allocation of 16.2% for 10Gb ULL connectivity or 16.3% for the entire network, of the cost associated with certain specified personnel who work closely with and support network infrastructure personnel. In contrast, the Exchange allocated much smaller percentages of costs (6.0% or less) across a wider range of personnel groups in order to allocate Human Resources costs to providing Full Service MEO Ports. This is because a much wider range of personnel are involved in functions necessary to offer, monitor and maintain Full Service MEO Ports but the tasks necessary to do so are not a primary or full-time function.

In total, the Exchange allocated 27.3% of its personnel costs to providing 10Gb ULL connectivity and 6.9% of its personnel costs to providing Full Service MEO Ports, for a total allocation of 34.2% Human Resources expense to provide these specific connectivity and port services. In turn, the Exchange allocated the remaining 65.8% of its Human Resources expense to membership services, transaction services, other port services and market data. Thus, again, the Exchange's allocations of cost across core services were based on real costs of operating the Exchange and were not double-counted across the core services or their associated revenue streams.

As another example, the Exchange allocated depreciation expense to all core services, including physical connections and Full Service MEO Ports, but in different amounts. The Exchange believes it is reasonable to allocate the identified portion of such expense because such expense includes the actual cost of the computer equipment, such as dedicated servers, computers, laptops, monitors, information security appliances and storage, and network switching infrastructure equipment, including switches and taps that were purchased to operate and support the network. Without this equipment, the Exchange would not be able to operate the network and provide connectivity services to its Members and non-Members and their customers. However, the Exchange did not allocate all of the depreciation and amortization expense toward the cost of providing connectivity services, but instead allocated approximately 64.6% of the Exchange's overall depreciation and amortization expense to connectivity services (61.3% attributed to 10Gb ULL physical connections and 3.3% to Full Service MEO Ports). The Exchange allocated the remaining depreciation and amortization expense (approximately 35.4%) toward the cost of providing transaction services, membership services, other port services and market data.

The Exchange notes that its revenue estimates are based on projections across all potential revenue streams and will only be realized to the extent such revenue streams actually produce the revenue estimated. The Exchange does not yet know whether such expectations will be realized. For instance, in order to generate the revenue expected from connectivity, the Exchange will have to be successful in retaining existing clients that wish to maintain physical connectivity and/or Full Service MEO Ports or in obtaining new clients that will purchase such services. Similarly, the Exchange will have to be successful in retaining a positive net capture on transaction fees in order to realize the anticipated revenue from transaction pricing.

The Exchange notes that the Cost Analysis is based on the Exchange's 2024 fiscal year of operations and projections. It is possible, however, that actual costs may be higher or lower. To the extent the Exchange sees growth in use of connectivity services it will receive additional revenue to offset future cost increases.

However, if use of connectivity services is static or decreases, the Exchange might not realize the revenue that it anticipates or needs in order to cover applicable costs. Accordingly, the Exchange is committing to conduct a one-year review after implementation of these fees. The Exchange expects that it may propose to adjust fees at that time, to increase fees in the event that revenues fail to cover costs and a reasonable mark-up of such costs. Similarly, the Exchange may propose to decrease fees in the event that revenue materially exceeds our current projections. In addition, the Exchange will periodically conduct a review to inform its decision making on whether a fee change is appropriate (*e.g.,* to monitor for costs increasing/decreasing or subscribers increasing/decreasing, etc. in ways that suggest the then-current fees are becoming dislocated from the prior cost-based analysis) and would propose to increase fees in the event that revenues fail to cover its costs and a reasonable mark-up, or decrease fees in the event that revenue or the mark-up materially exceeds our current projections. In the event that the Exchange determines to propose a fee change, the results of a timely review, including an updated cost estimate, will be included in the rule filing proposing the fee change. More generally, we believe that it is appropriate for an exchange to refresh and update information about its relevant costs and revenues in seeking any future changes to fees, and the Exchange commits to do so.

Projected Revenue [134]

The proposed fees will allow the Exchange to cover certain costs incurred by the Exchange associated with providing and maintaining necessary hardware and other network infrastructure as well as network monitoring and support services; without such hardware, infrastructure, monitoring and support the Exchange would be unable to provide the connectivity and port services. Much of the cost relates to monitoring and analysis of data and performance of the network via the subscriber's connection(s). The above cost, namely those associated with hardware, software, and human capital, enable the Exchange to measure network performance with nanosecond granularity. These same costs are also associated with time and money spent seeking to continuously improve the network performance, improving the subscriber's experience, based on monitoring and analysis activity. The Exchange routinely works to improve the performance of the network's hardware and software. The costs associated with maintaining and enhancing a state-of-the-art exchange network is a significant expense for the Exchange, and thus the Exchange believes that it is reasonable and appropriate to help offset those costs by amending fees for connectivity services. Subscribers, particularly those of 10Gb ULL connectivity, expect the Exchange to provide this level of support to connectivity so they continue to receive the performance they expect. This differentiates the Exchange from its competitors. As detailed above, the Exchange has five primary sources of revenue that it can potentially use to fund its operations: transaction fees, fees for connectivity services, membership and regulatory fees, and market data fees. Accordingly, the Exchange must cover its expenses from these five primary sources of revenue.

The Exchange's Cost Analysis estimates the annual cost to provide 10Gb ULL connectivity services will equal $15,593,990. Based on current 10Gb ULL connectivity services usage, the Exchange would generate annual

[134] For purposes of calculating projected 2024 revenue for 10Gb ULL connectivity, the Exchange used revenues for the most recently completed full month.

revenue of approximately $15,714,000. The Exchange believes this represents a modest profit of 0.8% when compared to the cost of providing 10Gb ULL connectivity services.

The Exchange's Cost Analysis estimates the annual cost to provide Full Service MEO Port services will equal $1,989,497. Based on current Full Service MEO Port services usage, the Exchange would generate annual revenue of approximately $2,016,000. The Exchange believes this would result in a small margin of 1.3% after calculating the cost of providing Full Service MEO Port services.

Based on the above discussion, even if the Exchange earns the above revenue or incrementally more or less, the proposed fees are fair and reasonable because they will not result in excessive pricing that deviates from that of other exchanges or a supra-competitive profit, when comparing the total expense of the Exchange associated with providing 10Gb ULL connectivity and Full Service MEO Port services versus the total projected revenue of the Exchange associated with network 10Gb ULL connectivity and Full Service MEO Port services.

The Exchange also notes that this the resultant profit margin differs slightly from the profit margins set forth in similar fee filings by its affiliated markets. This is not atypical among exchanges and is due to a number of factors that differ between these four markets, including: different market models, market structures, and product offerings (equities, options, price-time, pro-rata, simple, and complex); different pricing models; different number of market participants and connectivity subscribers; different maintenance and operations costs, as described in the cost allocation methodology above; different technical architecture (*e.g.,* the number of matching engines per exchange, *i.e.,* the Exchange maintains 12 matching engines while MIAX maintains 24 matching engines); and different maturity phase of the Exchange and its affiliated markets (*i.e.,* start-up versus growth versus more mature). All of these factors contribute to a unique and differing level of profit margin per exchange.

Further, the Exchange proposes to charge rates that are comparable to, or lower than, similar fees for similar products charged by competing exchanges. For example, for 10Gb ULL connectivity, the Exchange proposes a lower fee than the fee charged by Nasdaq for its comparable 10Gb Ultra fiber connection ($13,500 per month for the Exchange vs. $15,000 per month for Nasdaq).[135] NYSE American charges even higher fees for its comparable 10GB LX LCN connection than the Exchange's proposed fees ($13,500 for the Exchange vs. $22,000 per month for NYSE American).[136] Accordingly, the Exchange believes that comparable and competitive pricing are key factors in determining whether a proposed fee meets the requirements of the Act, regardless of whether that same fee across the Exchange's affiliated markets leads to slightly different profit margins due to factors outside of the Exchange's control (*i.e.,* more subscribers to 10Gb ULL connectivity on the Exchange than its affiliated markets or vice versa).

* * * * *

The Exchange has operated at a cumulative net annual loss since it launched operations in 2017.[137] This is due to a number of factors, one of which is choosing to forgo revenue by offering certain products, such as low latency connectivity, at lower rates than other options exchanges to attract order flow and encourage market participants to experience the high determinism, low latency, and resiliency of the Exchange's trading systems. The Exchange does not believe it should now be penalized for seeking to raise its fees as it now needs to upgrade its technology and absorb increased costs. Therefore, the Exchange believes the proposed fees are reasonable because they are based on both relative costs to the Exchange to provide dedicated 10Gb ULL connectivity and Full Service MEO Ports, the extent to which the product drives the Exchange's overall costs and the relative value of the product, as well as the Exchange's objective to make access to its Systems broadly available to market participants. The Exchange also believes the proposed fees are reasonable because they are designed to generate annual revenue to recoup the Exchange's costs of providing dedicated 10Gb ULL connectivity and Full Service MEO Ports.

The Exchange notes that its revenue estimate is based on projections and will only be realized to the extent customer activity produces the revenue estimated. As a competitor in the hyper-competitive exchange environment, and an exchange focused on driving competition, the Exchange does not yet know whether such projections will be realized. For instance, in order to generate the revenue expected from 10Gb ULL connectivity and Full Service MEO Ports, the Exchange will have to be successful in retaining existing clients that wish to utilize 10Gb ULL connectivity and Full Service MEO Ports and/or obtaining new clients that will purchase such access. To the extent the Exchange is successful in encouraging new clients to utilize 10Gb ULL connectivity and Full Service MEO Ports, the Exchange does not believe it should be penalized for such success. To the extent the Exchange has mispriced and experiences a net loss in connectivity clients or in transaction activity, the Exchange could experience a net reduction in revenue. While the Exchange is supportive of transparency around costs and potential margins (applied across all exchanges), as well as periodic review of revenues and applicable costs (as discussed below), the Exchange does not believe that these estimates should form the sole basis of whether or not a proposed fee is reasonable or can be adopted. Instead, the Exchange believes that the information should be used solely to confirm that an Exchange is not earning—or seeking to earn—supra-competitive profits. The Exchange believes the Cost Analysis and related projections in this filing demonstrate this fact.

The Exchange is owned by a holding company that is the parent company of four exchange markets and, therefore, the Exchange and its affiliated markets must allocate shared costs across all of those markets accordingly, pursuant to the above-described allocation methodology. In contrast, the Investors Exchange LLC (''IEX'') and MEMX, which are currently each operating only one exchange, in their recent non-transaction fee filings allocate the entire amount of that same cost to a single exchange. This can result in lower profit margins for the non-transaction fees proposed by IEX and MEMX because the single allocated cost does not experience the efficiencies and synergies that result from sharing costs across multiple exchanges. The Exchange and its affiliated markets often share a single cost, which results in cost efficiencies that can cause a broader gap between the allocated cost amount and projected revenue, even though the fee levels being proposed are lower or competitive with competing markets (as described above). To the extent that the

[136] *See* NYSE American Options Fee Schedule, Section V.A. Port Fees *and* Section V.B. Co-Location Fees.

[137] The Exchange has incurred a cumulative loss of $83 million since its inception in 2017 through full year 2022. *See* Exchange's Form 1/A, Application for Registration or Exemption from Registration as a National Securities Exchange, filed June 26, 2023, *available at https://www.sec.gov/Archives/edgar/vprr/2300/23007743.pdf.*

application of a cost-based standard results in Commission Staff making determinations as to the appropriateness of certain profit margins, the Exchange believes that Commission Staff should also consider whether the proposed fee level is comparable to, or competitive with, the same fee charged by competing exchanges and how different cost allocation methodologies (such as across multiple markets) may result in different profit margins for comparable fee levels. Further, if Commission Staff is making determinations as to appropriate profit margins in their approval of exchange fees, the Exchange believes that the Commission should be clear to all market participants as to what they have determined is an appropriate profit margin and should apply such determinations consistently and, in the case of certain legacy exchanges, retroactively, if such standards are to avoid having a discriminatory effect.

Further, as is reflected in the proposal, the Exchange continuously and aggressively works to control its costs as a matter of good business practice. A potential profit margin should not be evaluated solely on its size; that assessment should also consider cost management and whether the ultimate fee reflects the value of the services provided. For example, a profit margin on one exchange should not be deemed excessive where that exchange has been successful in controlling its costs, but not excessive on another exchange where that exchange is charging comparable fees but has a lower profit margin due to higher costs. Doing so could have the perverse effect of not incentivizing cost control where higher costs alone could be used to justify fees increases.

The Proposed Pricing is not Unfairly Discriminatory and Provides for the Equitable Allocation of Fees, Dues, and Other Charges

The Exchange believes that the proposed fees are reasonable, fair, equitable, and not unfairly discriminatory because they are designed to align fees with services provided and will apply equally to all subscribers.

10Gb ULL Connectivity

The Exchange believes that the proposed fees are equitably allocated among users of the network connectivity and port alternatives, as the users of 10Gb ULL connections consume substantially more bandwidth and network resources than users of 1Gb ULL connection. Specifically, the Exchange notes that 10Gb ULL connection users account for more than 99% of message traffic over the network, driving other costs that are linked to capacity utilization, as described above, while the users of the 1Gb ULL connections account for less than 1% of message traffic over the network. In the Exchange's experience, users of the 1Gb connections do not have the same business needs for the high-performance network as 10Gb ULL users.

The Exchange's high-performance network and supporting infrastructure (including employee support), provides unparalleled system throughput with the network ability to support access to several distinct options markets. To achieve a consistent, premium network performance, the Exchange must build out and maintain a network that has the capacity to handle the message rate requirements of its most heavy network consumers. These billions of messages per day consume the Exchange's resources and significantly contribute to the overall network connectivity expense for storage and network transport capabilities. The Exchange must also purchase additional storage capacity on an ongoing basis to ensure it has sufficient capacity to store these messages to satisfy its record keeping requirements under the Exchange Act.[138] Thus, as the number of messages an entity increases, certain other costs incurred by the Exchange that are correlated to, though not directly affected by, connection costs (*e.g.,* storage costs, surveillance costs, service expenses) also increase. Given this difference in network utilization rate, the Exchange believes that it is reasonable, equitable, and not unfairly discriminatory that the 10Gb ULL users pay for the vast majority of the shared network resources from which all market participants' benefit.

Full Service MEO Ports

The tiered pricing structure for Full Service MEO Ports has been in effect since 2018.[139] The Exchange now proposes a pricing structure that is used by the Exchange's affiliates, MIAX and MIAX Emerald, except with lower pricing for each tier for Full Service MEO Ports (Bulk) and a flat fee for Full Service MEO Ports (Single). Members that are frequently in the highest tier for Full Service MEO Ports consume the most bandwidth and resources of the network. Specifically, as noted above for 10Gb ULL connectivity, Market Makers who reach the highest tier for Full Service MEO Ports (Bulk) account for greater than 84% of ADV on the Exchange, while Market Makers that are typically in the lowest Tier for Full Service MEO Ports, account for less than 14% of ADV on the Exchange. The remaining 1% is accounted for by Market Makers who are frequently in the middle Tier for Full Service MEO Ports (Bulk).

To achieve a consistent, premium network performance, the Exchange must build out and maintain a network that has the capacity to handle the message rate requirements of its most heavy network consumers during anticipated peak market conditions. The need to support billions of messages per day consume the Exchange's resources and significantly contribute to the overall network connectivity expense for storage and network transport capabilities. The Exchange must also purchase additional storage capacity on an ongoing basis to ensure it has sufficient capacity to store these messages as part of it surveillance program and to satisfy its record keeping requirements under the Exchange Act.[140] Thus, as the number of connections a Market Maker has increases, the related pull on Exchange resources also increases. The Exchange sought to design the proposed tiered-pricing structure to set the amount of the fees to relate to the number of connections a firm purchases. The more connections purchased by a Market Maker likely results in greater expenditure of Exchange resources and increased cost to the Exchange.

The Exchange further believes that the proposed fees are reasonable, equitably allocated and not unfairly discriminatory because, for the flat fee, the Exchange provides each Member two (2) Full Service MEO Ports for each matching engine to which that Member is connected. Unlike other options exchanges that provide similar port functionality and charge fees on a per port basis,[141] the Exchange offers Full Service MEO Ports as a package and provides Members with the option to receive up to two Full Service MEO Ports per matching engine to which it connects. The Exchange currently has twelve (12) matching engines, which means Members may receive up to twenty-four (24) Full Service MEO Ports for a single monthly fee, that can vary

[138] 17 CFR 240.17a–1 (recordkeeping rule for national securities exchanges, national securities associations, registered clearing agencies and the Municipal Securities Rulemaking Board).

[139] *See* Securities Exchange Act Release No. 82867 (March 13, 2018), 83 FR 12044 (March 19, 2018) (SR–PEARL–2018–07).

[140] 17 CFR 240.17a–1 (recordkeeping rule for national securities exchanges, national securities associations, registered clearing agencies and the Municipal Securities Rulemaking Board).

[141] *See supra* table on page 28 and accompanying text.

based on certain volume percentages. The Exchange currently assesses Members a fee of $5,000 per month in the highest Full Service MEO Port—Bulk Tier, regardless of the number of Full Service MEO Ports allocated to the Member. Assuming a Member connects to all twelve (12) matching engines during a month, with two Full Service MEO Ports per matching engine, this results in a cost of $208.33 per Full Service MEO Port—Bulk ($5,000 divided by 24) for the month. This fee has been unchanged since the Exchange adopted Full Service MEO Port fees in 2018.[142] Members will continue to receive two (2) Full Service MEO Ports to each matching engine to which they are connected for the single flat monthly fee. Assuming a Member connects to all twelve (12) matching engines during the month, and achieves the highest Tier for that month, with two Full Service MEO Ports (Bulk) per matching engine, this would result in a cost of $500 per Full Service MEO Port ($12,000 divided by 24).

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Intra-Market Competition

The Exchange believes the proposed fees will not result in any burden on intra-market competition that is not necessary or appropriate in furtherance of the purposes of the Act because the proposed fees will allow the Exchange to recoup some of its costs in providing 10Gb ULL connectivity and Full Service MEO Ports at below market rates to market participants since the Exchange launched operations. As described above, the Exchange has operated at a cumulative net annual loss since it launched operations in 2017 [143] due to providing a low-cost alternative to attract order flow and encourage market participants to experience the high determinism and resiliency of the Exchange's trading Systems. To do so, the Exchange chose to waive the fees for some non-transaction related services and Exchange products or provide them at a very lower fee, which was not profitable to the Exchange. This resulted in the Exchange forgoing revenue it could have generated from assessing any fees or higher fees. The Exchange could have sought to charge higher fees at the outset, but that could have served to discourage participation on the Exchange. Instead, the Exchange chose to provide a low-cost exchange alternative to the options industry, which resulted in lower initial revenues. Examples of this are 10Gb ULL connectivity and Full Service MEO Ports, for which the Exchange only now seeks to adopt fees at a level similar to or lower than those of other options exchanges.

Further, the Exchange does not believe that the proposed fee increase for the 10Gb ULL connection change would place certain market participants at the Exchange at a relative disadvantage compared to other market participants or affect the ability of such market participants to compete. As is the case with the current proposed flat fee, the proposed fee would apply uniformly to all market participants regardless of the number of connections they choose to purchase. The proposed fee does not favor certain categories of market participants in a manner that would impose an undue burden on competition.

The Exchange does not believe that the proposed rule change would place certain market participants at the Exchange at a relative disadvantage compared to other market participants or affect the ability of such market participants to compete. In particular, Exchange personnel has been informally discussing potential fees for connectivity services with a diverse group of market participants that are connected to the Exchange (including large and small firms, firms with large connectivity service footprints and small connectivity service footprints, as well as extranets and service bureaus) for several months leading up to that time. The Exchange does not believe the proposed fees for connectivity services would negatively impact the ability of Members, non-Members (extranets or service bureaus), third-parties that purchase the Exchange's connectivity and resell it, and customers of those resellers to compete with other market participants or that they are placed at a disadvantage.

The Exchange does anticipate, however, that some market participants may reduce or discontinue use of connectivity services provided directly by the Exchange in response to the proposed fees. In fact, as mentioned above, one MIAX Pearl Options Market Maker terminated their membership on January 1, 2023 as a direct result of the proposed fee changes.[144] The Exchange does not believe that the proposed fees for connectivity services place certain market participants at a relative disadvantage to other market participants because the proposed connectivity pricing is associated with relative usage of the Exchange by each market participant and does not impose a barrier to entry to smaller participants. The Exchange believes its proposed pricing is reasonable and, when coupled with the availability of third-party providers that also offer connectivity solutions, that participation on the Exchange is affordable for all market participants, including smaller trading firms. As described above, the connectivity services purchased by market participants typically increase based on their additional message traffic and/or the complexity of their operations. The market participants that utilize more connectivity services typically utilize the most bandwidth, and those are the participants that consume the most resources from the network. Accordingly, the proposed fees for connectivity services do not favor certain categories of market participants in a manner that would impose a burden on competition; rather, the allocation of the proposed connectivity fees reflects the network resources consumed by the various size of market participants and the costs to the Exchange of providing such connectivity services.

Inter-Market Competition

The Exchange also does not believe that the proposed rule change and price increase will result in any burden on inter-market competition that is not necessary or appropriate in furtherance of the purposes of the Act. As this is a fee increase, arguably if set too high, this fee would make it easier for other exchanges to compete with the Exchange. Only if this were a substantial fee decrease could this be considered a form of predatory pricing. In contrast, the Exchange believes that, without this fee increase, we are

[142] *See* Securities Exchange Act Release No. 82867 (March 13, 2018), 83 FR 12044 (March 19, 2018) (SR–PEARL–2018–07).

[143] *See supra* note 137.

[144] The Exchange acknowledges that IEX included in its proposal to adopt market data fees after offering market data for free an analysis of what its projected revenue would be if all of its existing customers continued to subscribe versus what its projected revenue would be if a limited number of customers subscribed due to the new fees. *See* Securities Exchange Act Release No. 94630 (April 7, 2022), 87 FR 21945 (April 13, 2022) (SR–IEX–2022–02). MEMX did not include a similar analysis in either of its recent non-transaction fee proposals. *See, e.g., supra* note 133. The Exchange does not believe a similar analysis would be useful here because it is amending existing fees, not proposing to charge a new fee where existing subscribers may terminate connections because they are no longer enjoying the service at no cost.

potentially at a competitive disadvantage to certain other exchanges that have in place higher fees for similar services. As we have noted, the Exchange believes that connectivity fees can be used to foster more competitive transaction pricing and additional infrastructure investment and there are other options markets of which market participants may connect to trade options at higher rates than the Exchange's. Accordingly, the Exchange does not believe its proposed fee changes impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange also believes that the proposed fees for 10Gb connectivity are appropriate and warranted and would not impose any burden on competition. This is a technology driven change designed to meet customer needs. The proposed fees would assist the Exchange in recovering costs related to providing dedicated 10Gb connectivity to the Exchange while enabling it to continue to meet current and anticipated demands for connectivity by its Members and other market participants. Separating its 10Gb network from MIAX enables the Exchange to better compete with other exchanges by ensuring it can continue to provide adequate connectivity to existing and new Members, which may increase in ability to compete for order flow and deepen its liquidity pool, improving the overall quality of its market. The proposed rates for 10Gb ULL connectivity are structured to enable the Exchange to bifurcate its 10Gb ULL network shared with MIAX so that it can continue to meet current and anticipated connectivity demands of all market participants.

Similarly, and also in connection with a technology change, Cboe Exchange, Inc. (''Cboe'') amended its access and connectivity fees, including port fees.[145] Specifically, Cboe adopted certain logical ports to allow for the delivery and/or receipt of trading messages—*i.e.,* orders, accepts, cancels, transactions, etc. Cboe established tiered pricing for BOE and FIX logical ports,[146] tiered pricing for BOE Bulk ports, and flat prices for DROP, Purge Ports, GRP Ports and Multicast PITCH/Top Spin Server Ports. Cboe argued in its fee proposal that the proposed pricing more closely aligned its access fees to those of its affiliated exchanges as the affiliated exchanges offer substantially similar connectivity and functionality and are on the same platform that Cboe migrated to.[147] Cboe justified its proposal by stating that, ''. . . the Exchange believes substitutable products and services are in fact available to market participants, including, among other things, other options exchanges a market participant may connect to in lieu of the Exchange, indirect connectivity to the Exchange via a third-party reseller of connectivity and/or trading of any options product, including proprietary products, in the Over-the-Counter (OTC) markets.'' [148] The Exchange concurs with the following statement by Cboe,

> The rule structure for options exchanges are also fundamentally different from those of equities exchanges. In particular, options market participants are not forced to connect to (and purchase market data from) all options exchanges. For example, there are many order types that are available in the equities markets that are not utilized in the options markets, which relate to mid-point pricing and pegged pricing which require connection to the SIPs and each of the equities exchanges in order to properly execute those orders in compliance with best execution obligations. Additionally, in the options markets, the linkage routing and trade through protection are handled by the exchanges, not by the individual members. Thus not connecting to an options exchange or disconnecting from an options exchange does not potentially subject a broker-dealer to violate order protection requirements. Gone are the days when the retail brokerage firms (such as Fidelity, Schwab, and eTrade) were members of the options exchanges—they are not members of the Exchange or its affiliates, they do not purchase connectivity to the Exchange, and they do not purchase market data from the Exchange. Accordingly, not only is there not an actual regulatory requirement to connect to every options exchange, the Exchange believes there is also no ''de facto'' or practical requirement as well, as further evidenced by the recent significant reduction in the number of broker-dealers that are members of all options exchanges.[149]

The Cboe proposal also referenced the National Market System Plan Governing the Consolidated Audit Trail (''CAT NMS Plan''),[150] wherein the Commission discussed the existence of competition in the marketplace generally, and particularly for exchanges with unique business models. The Commission acknowledged that, even if an exchange were to exit the marketplace due to its proposed fee-related change, it would not significantly impact competition in the market for exchange trading services because these markets are served by multiple competitors.[151] Further, the Commission explicitly stated that ''[c]onsequently, demand for these services in the event of the exit of a competitor is likely to be swiftly met by existing competitors.'' [152] Finally, the Commission recognized that while some exchanges may have a unique business model that is not currently offered by competitors, a competitor could create similar business models if demand were adequate, and if a competitor did not do so, the Commission believes it would be likely that new entrants would do so if the exchange with that unique business model was otherwise profitable.[153]

Cboe also filed to establish a monthly fee for Certification Logical Ports of $250 per Certification Logical Port.[154] Cboe reasoned that purchasing additional Certification Logical Ports, beyond the one Certification Logical Port per logical port type offered in the production environment free of charge, is voluntary and not required in order to participate in the production environment, including live production trading on the Exchange.[155]

In its statutory basis, Cboe justified the new port fee by stating that it believed the Certification Logical Port fee were reasonable because while such ports were no longer completely free, TPHs and non-TPHs would continue to be entitled to receive free of charge one Certification Logical Port for each type of logical port that is currently offered in the production environment.[156] Cboe noted that other exchanges assess similar fees and cited to NASDAQ LLC

[154] *See* Securities Exchange Act Release No. 94512 (March 24, 2002), 87 FR 18425 (March 30, 2022) (SR–Cboe–2022–011). Cboe offers BOE and FIX Logical Ports, BOE Bulk Logical Ports, DROP Logical Ports, Purge Ports, GRP Ports and Multicast PITCH/Top Spin Server Ports. For each type of the aforementioned logical ports that are used in the production environment, the Exchange also offers corresponding ports which provide Trading Permit Holders and non-TPHs access to the Exchange's certification environment to test proprietary systems and applications (*i.e.,* ''Certification Logical Ports'').

[155] *See* Securities Exchange Act Release No. 94512 (March 24, 2002), 87 FR 18425 (March 30, 2022) (SR–Cboe–2022–011).

[156] *Id.* at 18426.

and MIAX.[157] Cboe also noted that the decision to purchase additional ports is optional and no market participant is required or under any regulatory obligation to purchase excess Certification Logical Ports in order to access the Exchange's certification environment.[158] Finally, similar proposals to adopt a Certification Logical Port monthly fee were filed by Cboe BYX Exchange, Inc.,[159] BZX,[160] and Cboe EDGA Exchange, Inc.[161]

The Cboe fee proposals described herein were filed subsequent to the D.C. Circuit decision in *Susquehanna Int'l Grp., LLC* v. *SEC,* 866 F.3d 442 (D.C. Cir. 2017), meaning that such fee filings were subject to the same (and current) standard for SEC review and approval as this proposal. In summary, the Exchange requests the Commission apply the same standard of review to this proposal which was applied to the various Cboe and Cboe affiliated markets' filings with respect to non-transaction fees. If the Commission were to apply a different standard of review to this proposal than it applied to other exchange fee filings it would create a burden on competition such that it would impair the Exchange's ability to make necessary technology driven changes, such as bifurcating its 10Gb ULL network, because it would be unable to monetize or recoup costs related to that change and compete with larger, non-legacy exchanges.

* * * * *

In conclusion, as discussed thoroughly above, the Exchange regrettably believes that the application of the Revised Review Process and Staff Guidance has adversely affected inter-market competition among legacy and non-legacy exchanges by impeding the ability of non-legacy exchanges to adopt or increase fees for their market data and access services (including connectivity and port products and services) that are on parity or commensurate with fee levels previously established by legacy exchanges. Since the adoption of the Revised Review Process and Staff Guidance, and even more so recently, it has become extraordinarily difficult to adopt or increase fees to generate revenue necessary to invest in systems, provide innovative trading products and solutions, and improve competitive standing to the benefit of non-legacy exchanges' market participants. Although the Staff Guidance served an important policy goal of improving disclosures and requiring exchanges to justify that their market data and access fee proposals are fair and reasonable, it has also negatively impacted non-legacy exchanges in particular in their efforts to adopt or increase fees that would enable them to more fairly compete with legacy exchanges, despite providing enhanced disclosures and rationale under both competitive and cost basis approaches provided for by the Revised Review Process and Staff Guidance to support their proposed fee changes.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange received one comment letter on the Initial Proposal, one comment letter on the Second Proposal, one comment letter on the Third Proposal, one comment letter on the Fourth Proposal, one comment letter on the Fifth Proposal, one comment letter on the Sixth Proposal, and one comment letter on the Seventh Proposal, all from the same commenter.[162] In their letters, the commenter letters from SIG seek to incorporate comments submitted on previous Exchange proposals to which the Exchange has previously responded. The Exchange also received comment letters from a separate commenter on the Sixth and Seventh Proposals.[163] The Exchange believes issues raised by each commenters are not germane to this proposal in particular, but rather raise larger issues with the current environment surrounding exchange non-transaction fee proposals that should be addressed by the Commission through rule making, or Congress, more holistically and not through an individual exchange fee filings. Among other things, the commenters are requesting additional data and information that is both opaque and a moving target and would constitute a level of disclosure materially over and above that provided by any competitor exchanges.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act,[164] and Rule 19b–4(f)(2) [165] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include file number SR–PEARL–2024–05 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–PEARL–2024–05. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99472; File No. SR–EMERALD–2024–02]

Self-Regulatory Organizations; MIAX Emerald, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Update Citations to Rule 600(b) of Regulation National Market System

February 5, 2024.

Pursuant to the provisions of Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 24, 2024, MIAX Emerald, LLC (''MIAX Emerald'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to update citations to Rule 600(b) of Regulation National Market System (''Regulation NMS'') in Exchange Rule 518, Complex Orders and Rule 530, Limit Up-Limit Down.

The text of the proposed rule change is available on the Exchange's website at *https://www.miaxglobal.com/markets/us-options/emerald-options/rule-filings,* at MIAX Emerald's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to update citations to Rule 600(b) of Regulation NMS in Exchange Rule 518, Complex Orders and Rule 530, Limit Up-Limit Down.

In 2021, the Securities and Exchange Commission (the ''Commission'') amended Regulation NMS under the Act in connection with the adoption of the Market Data Infrastructure Rules.[3] As part of that initiative, the Commission adopted new definitions in Rule 600(b) of Regulation NMS and renumbered the remaining definitions, including the definitions of Trading Center (formerly Rule 600(b)(78)), NMS Stock (formerly Rule 600(b)(47)), and Regular Trading Hours (formerly Rule 600(b)(64)).

The Exchange accordingly proposes to update the relevant citations to Rule 600(b) in its rules as follows:

- The citation to the definition of NMS Stock in Rule 518 would be changed to Rule 600(b)(55).
- The citation to the definition of Trading Center in Rule 518 would be changed to Rule 600(b)(95).
- The citation to the definition of Regular Trading Hours in Rule 530, Limit Up-Limit Down, would be changed to Rule 600(b)(77).

2. Statutory Basis

The Exchange believes the proposed rules changes are consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[4] Specifically, the Exchange believes the proposed rules changes are consistent with Section 6(b)(5)[5] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The Exchange believes that the proposed changes to its rules to correct citations to Rule 600(b) of Regulation NMS would remove impediments to and perfect the mechanism of a free and open market and a national market system because the proposed change is designed to update an external rule reference. The Exchange believes that Members[6] would benefit from the increased clarity, thereby reducing potential confusion and ensuring that those subject to the Exchange's jurisdiction, regulators, and the investing public can more easily navigate and understand the Exchange's rules. The Exchange further believes that the proposed changes would not be inconsistent with the public interest and the protection of investors because investors will not be harmed and in fact would benefit from increased clarity, thereby reducing potential confusion.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposed rules changes would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rules changes is not intended to address competitive issues but rather would modify Exchange rules to update citations to Rule 600(b) of Regulation NMS. Since the proposal

[4] 15 U.S.C. 78f(b).

[5] 15 U.S.C. 78f(b)(5).

[6] The term ''Member'' means an individual or organization approved to exercise the trading rights associated with a Trading Permit. Members are deemed ''members'' under the Exchange Act. *See* Exchange Rule 100.

does not substantively modify System [7] functionality or processes on the Exchange, the proposed changes will not impose any burden on competition nor are they meant to affect competition among the exchanges.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [8] and subparagraph (f)(6) of Rule 19b-4 thereunder.[9]

A proposed rule change filed pursuant to Rule 19b–4(f)(6) under the Act normally does not become operative for 30 days after the date of its filing. However, Rule 19b–4(f)(6)(iii) [10] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The proposed change modifies the Exchange's rules to correct citations to Rule 600(b) of Regulation NMS, which should help prevent confusion and add clarity to the Exchange's rules. For these reasons, and because the proposal raises no novel legal or regulatory issues, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change operative upon filing.[11]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–EMERALD–2024–02 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–EMERALD–2024–02. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–EMERALD–2024–02 and should be submitted on or before March 1, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[12]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99473; File No. SR–MIAX–2024–04]

Self-Regulatory Organizations; Miami International Securities Exchange, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Update Citations to Rule 600(b) of Regulation National Market System

February 5, 2024.

Pursuant to the provisions of Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 24, 2024, Miami International Securities Exchange, LLC (''MIAX'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to update citations to Rule 600(b) of Regulation National Market System (''Regulation NMS'') in Exchange Rule 518, Complex Orders, Rule 530, Limit Up-Limit Down, and Rule 1701,

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

Consolidated Audit Trail Compliance Rule—Definitions.

The text of the proposed rule change is available on the Exchange's website at *https://www.miaxglobal.com/markets/us-options/miax-options/rule-filings,* at MIAX's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to update citations to Rule 600(b) of Regulation NMS in Exchange Rule 518, Complex Orders, Rule 530, Limit Up-Limit Down, and Rule 1701, Consolidated Audit Trail Compliance Rule—Definitions.

In 2021, the Securities and Exchange Commission (the ''Commission'') amended Regulation NMS under the Act in connection with the adoption of the Market Data Infrastructure Rules.[3] As part of that initiative, the Commission adopted new definitions in Rule 600(b) of Regulation NMS and renumbered the remaining definitions, including the definitions of Trading Center (formerly Rule 600(b)(78)), NMS Stock (formerly Rule 600(b)(47)), Regular Trading Hours (formerly Rule 600(b)(64)), and Listed Option or Option ((formerly Rule 600(b)(35)).

The Exchange accordingly proposes to update the relevant citations to Rule 600(b) in its rules as follows:

- The citation to the definition of NMS Stock in Rule 518 would be changed to Rule 600(b)(55).
- The citation to the definition of Trading Center in Rule 518 would be changed to Rule 600(b)(95).
- The citation to the definition of Regular Trading Hours in Rule 530, Limit Up-Limit Down, would be changed to Rule 600(b)(77).
- The citation to the definition of Listed Option or Option in Rule 1701, Consolidated Audit Trail Compliance Rule—Definitions, would be changed to Rule 600(b)(43).
- The citation to the definition of NMS Stock in Rule 1701, Consolidated Audit Trail Compliance Rule—Definitions, would be changed to Rule 600(b)(55).

2. Statutory Basis

The Exchange believes the proposed rules changes are consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[4] Specifically, the Exchange believes the proposed rules changes are consistent with Section 6(b)(5)[5] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The Exchange believes that the proposed changes to its rules to correct citations to Rule 600(b) of Regulation NMS would remove impediments to and perfect the mechanism of a free and open market and a national market system because the proposed change is designed to update an external rule reference. The Exchange believes that Members[6] would benefit from the increased clarity, thereby reducing potential confusion and ensuring that those subject to the Exchange's jurisdiction, regulators, and the investing public can more easily navigate and understand the Exchange's rules. The Exchange further believes that the proposed changes would not be inconsistent with the public interest and the protection of investors because investors will not be harmed and in fact would benefit from increased clarity, thereby reducing potential confusion.

In addition, the Exchange proposes to correct a grammatical error in the definition of ''Listed Options'' or ''Option'' in Exchange Rule 1701 to conform to the other definitions in the Rule.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposed rules changes would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rules changes is not intended to address competitive issues but rather would modify Exchange rules to update citations to Rule 600(b) of Regulation NMS. Since the proposal does not substantively modify System[7] functionality or processes on the Exchange, the proposed changes will not impose any burden on competition nor are they meant to affect competition among the exchanges.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[8] and subparagraph (f)(6) of Rule 19b–4 thereunder.[9]

A proposed rule change filed pursuant to Rule 19b–4(f)(6) under the Act normally does not become operative for 30 days after the date of its filing. However, Rule 19b–4(f)(6)(iii)[10] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon

[4] 15 U.S.C. 78f(b).

[5] 15 U.S.C. 78f(b)(5).

[6] The term ''Member'' means an individual or organization approved to exercise the trading rights associated with a Trading Permit. Members are deemed ''members'' under the Exchange Act. *See* Exchange Rule 100.

[7] The term ''System'' means the automated trading system used by the Exchange for the trading of securities. *See* Exchange Rule 100.

[8] 15 U.S.C. 78s(b)(3)(A).

[9] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[10] 17 CFR 240.19b–4(f)(6)(iii).

filing. The proposed change modifies the Exchange's rules to correct citations to Rule 600(b) of Regulation NMS and make a grammatical correction, which should help prevent confusion and add clarity to the Exchange's rules. For these reasons, and because the proposal raises no novel legal or regulatory issues, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change operative upon filing.[11]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–MIAX–2024–04 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–MIAX–2024–04. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–MIAX–2024–04 and should be submitted on or before March 1, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[12]

Sherry R. Haywood,

Assistant Secretary.

SMALL BUSINESS ADMINISTRATION

Data Collection Available for Public Comments

ACTION: 60-Day notice and request for comments.

SUMMARY: The Small Business Administration (SBA) plans to seek approval from the Office of Management and Budget (OMB) to conduct the data collection activities described below. The Paperwork Reduction Act requires federal agencies to publish a notice in the **Federal Register** concerning each proposed collection of information to OMB, and to allow 60 days for the public to comment in response to the notice. This notice complies with such requirements and announces the SBA's proposal to conduct a survey of cluster administrators, small businesses, and partner organizations including Entrepreneurial Support Organizations (ESO) who participated in the SBA's Regional Innovation Cluster (RIC) Initiative.

DATES: Submit comments on or before April 7, 2024.

ADDRESSES: Send all comments to Alison Evans, Office of Investment and Innovation, 409 3rd Street SW, Suite 6300, Washington DC 20416, with the subject line: ''Regional Innovation Cluster Program Evaluation''

FOR FURTHER INFORMATION CONTACT: Alison Evans, Office of Investment and Innovation (*Alison.Evans@sba.gov*), or Curtis B. Rich, Management Analyst, 202–205–7030, *curtis.rich@sba.gov.*

SUPPLEMENTARY INFORMATION: This is a request for the extension with changes to a currently approved collection (previous OMB number: 3245–0392). Through the RIC Initiative, the SBA is investing in regional clusters—geographic concentrations of interconnected companies, specialized suppliers, academic institutions, service providers, and associated organizations with a specific industry focus—throughout the United States that span a variety of industries. The three primary goals of the initiative are to (1) increase opportunities for small business participation within clusters, (2) promote innovation in the industries on which the clusters are focused, and (3) enhance economic development and growth in cluster regions. To achieve these goals, the clusters provide a host of services to the target population of small and emerging businesses within their regional and industry focuses. Services include direct business advising and support and sponsoring events, such as networking opportunities with investors, partner organizations, ESOs, and other stakeholders in the regions. This information collection is necessary for the SBA to understand the progress of the RIC Initiative towards achieving its goals.

The evaluation consists of two key components: an implementation evaluation and an outcome evaluation. The implementation evaluation focuses on how the Initiative is implemented across the fourteen clusters and on the services that each cluster provides to its small businesses. The outcome evaluation focuses on short and intermediate-term outcomes linked directly to the cluster services, as well as on long-term business outcomes that can be reasonably expected to result from the short- and intermediate-term outcomes. The short-term outcomes include the satisfaction and the perceived effectiveness of the program for business management and growth. The intermediate-term outcomes include development of new products, commercialization of new technologies,

marketing and export services, improved access to capital, and industry integration. Long-term outcomes include increased revenue and employment. Over the previous years, evaluation results have helped to track the program performance outcomes and provide suggestions for program improvements to better facilitate innovation and small business growth. Furthermore, the evaluation survey data helped the SBA to better focus cluster activities on local contexts, particularly for rural and agricultural small businesses. This data will not be used to evaluate the effectiveness of an individual cluster.

The data collection effort involves three types of RIC Initiative stakeholders: small businesses, partner organizations, and cluster administrators. Small businesses participating in the cluster will be sent an online survey to provide data about their cluster participation experiences, satisfaction with the program and its components, the performance of their firms with respect to a variety of outcomes, and the role of cluster participation in the achievement of these outcomes. Similarly, partner organizations will be asked to complete an online survey to provide data about their experiences with the RIC Initiative. The questions include reasons for the RIC participation, collaboration with and support for small businesses, and the role of cluster participation on key organizational outcomes associated with the RIC Initiative participation. Small businesses and partner organizations will also be interviewed once a year to obtain information on barriers, facilitators, and other local influences on cluster and ecosystem engagement, best practices to facilitate innovation, and suggestions for potential cluster improvements (among other topics). The cluster administrators will be asked to provide participant rosters, which provide the framework for the surveys that the small businesses and partner organizations are sent. The administrator survey requests information about the services they provided to these two groups of stakeholders, and their operations in general. Cluster administrators will also be interviewed once a year to obtain information about how their operations have evolved, the adjustments they made, best practices, issues encountered, and the lessons learned.

Small Business Web Survey. Estimated Number of Respondents: 180. Frequency of Response: Once per year. Estimated Average Minutes per Respondent: 114.7. Estimated Total Annual Hour Burden: 344. *Small Business Interview.* Estimated Total Number of Respondents: 12. Frequency of Response: Once per year. Estimated Average Minutes per Response: 43. Estimated Total Annual Hour Burden: 8.6. *Partner Organization Web Survey.* Estimated Number of Respondents: 150. Frequency of Response: Once per year. Estimated Average Minutes per Respondent: 71. Estimated Annual Hour Burden: 177.5. *Partner organization Interview.* Estimated Total Number of Respondents: 12. Frequency of Response: Once per year. Estimated Average Minutes per Response: 37. Estimated Total Annual Hour Burden: 7.4. *Cluster Administrator Interview.* Estimated Number of Respondents: 20. Frequency of Response: Once per year. Estimated Average Minutes per Response: 87. Estimated Annual Hour Burden: 29. *Cluster Administrator Web Survey.* Estimated Number of Respondents: 20. Frequency of Response: Once per year. Estimated Average Minutes per Response: 35.3. Estimated Annual Hour Burden: 11.8 (including the time needed for administrators to prepare their rosters). *Administrative data request.* Estimated Number of Respondents: 20. Frequency of Response: Once per year. Estimated Average Minutes per Response: 30. Estimated Annual Hour Burden: 10.

Solicitation of Public Comments: The SBA requests comments on (a) whether the collection of information is necessary for the agency to properly perform its functions; (b) whether the burden estimates are accurate; (c) whether there are ways to minimize the burden, including through the use of automated techniques or other forms of information technology; and (d) whether there are ways to enhance the quality, utility, and clarity of the information collected. Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Summary of Information Collection

PRA Number: 3245–0392.

(1) *Title:* Evaluation of the Regional Innovation Cluster (RIC) Initiative.

Description of Respondents: Smal businesses concerns and partner organizations involved in Regional Innovation Clusters and cluster administrators.

Form Number: N/A.

Total Estimated Annual Responses: 350.

Total Estimated Annual Hour Burden: 531.5.

Curtis B. Rich,

Agency Clearance Officer.

BILLING CODE 8026–09–P

DEPARTMENT OF STATE

[Public Notice: 12323]

Notice of Determinations; Culturally Significant Objects Being Imported for Exhibition—Determinations: ''Korean Couture: Generations of Revolution'' Exhibition

SUMMARY: Notice is hereby given of the following determinations: I hereby determine that certain objects being imported from abroad pursuant to agreements with their foreign owners or custodians for temporary display in the exhibition ''Korean Couture: Generations of Revolution'' at the Cleveland Museum of Art, Cleveland, Ohio, and at possible additional exhibitions or venues yet to be determined, are of cultural significance, and, further, that their temporary exhibition or display within the United States as aforementioned is in the national interest. I have ordered that Public Notice of these determinations be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Reed Liriano, Program Coordinator, Office of the Legal Adviser, U.S. Department of State (telephone: 202–632–6471; email: *section2459@state.gov*). The mailing address is U.S. Department of State, L/PD, 2200 C Street, NW (SA–5), Suite 5H03, Washington, DC 20522–0505.

SUPPLEMENTARY INFORMATION: The foregoing determinations were made pursuant to the authority vested in me by the Act of October 19, 1965 (79 Stat. 985; 22 U.S.C. 2459), Executive Order 12047 of March 27, 1978, the Foreign Affairs Reform and Restructuring Act of 1998 (112 Stat. 2681, *et seq.;* 22 U.S.C. 6501 note, *et seq.*), Delegation of Authority No. 234 of October 1, 1999, Delegation of Authority No. 236–3 of August 28, 2000, and Delegation of Authority No. 523 of December 22, 2021.

Nicole L. Elkon,

Deputy Assistant Secretary for Professional and Cultural Exchanges, Bureau of Educational and Cultural Affairs, Department of State.

BILLING CODE 4710–05–P

SURFACE TRANSPORTATION BOARD

[Docket No. FD 36496]

Application of the National Railroad Passenger Corporation Under 49 U.S.C. 24308(e)—CSX Transportation, Inc., and Norfolk Southern Railway Company

AGENCY: Surface Transportation Board.

ACTION: Notice of hearing.

SUMMARY: The Board will hold a hearing involving the National Railroad Passenger Corporation (Amtrak), CSX Transportation, Inc. (CSXT), Norfolk Southern Railway Company (NSR), the Alabama State Port Authority and its rail carrier division, the Terminal Railway Alabama State Docks (collectively, the ''Port''; and with Amtrak, CSXT, and NSR, the ''Parties''), and the City of Mobile, Ala. (Mobile), if Mobile chooses to participate. The hearing will take place on February 14, 2024, at 11 a.m. EST in the hearing room of the Board's headquarters. The hearing will also be available for public viewing on YouTube.

DATES: The hearing will take place on February 14, 2024, at 11 a.m. EST.

ADDRESSES: The hearing will take place in the hearing room of the Board's headquarters, located at 395 E Street SW, Washington, DC 20423–0001.

FOR FURTHER INFORMATION CONTACT: Jonathon Binet at (202) 245–0368. If you require an accommodation under the Americans with Disabilities Act, please call (202) 245–0245.

SUPPLEMENTARY INFORMATION: On March 16, 2021, Amtrak filed an application with the Board, pursuant to 49 U.S.C. 24308(e), seeking an order requiring CSXT and NSR to allow Amtrak to operate additional intercity passenger trains, consisting of two round-trips per day, over the rail lines of CSXT and NSR between New Orleans, La., and Mobile, Ala. Following 11 days of evidentiary hearings in April and May of 2022, the Parties notified the Board on November 21, 2022, that they had reached a settlement and asked the Board to hold the proceeding in abeyance, which the Board did the next day. Subsequently, the Board twice continued to hold the proceeding in abeyance at the Parties' request as they worked to implement their settlement agreement. The Parties were scheduled to file a status report by February 1, 2024 (February Status Report).

By decision served January 19, 2024, the Board directed the Parties to provide, in the February Status Report, detailed information regarding the status of the implementation of the settlement agreement and, in particular, to describe any issues that remain outstanding. *See Appl. of the Nat'l R.R. Passenger Corp. Under 49 U.S.C. 24308(e)—CSX Transp., Inc.,* FD 36496, slip op. at 2 (STB served Jan. 19, 2024). The Board also scheduled a hearing with the Parties on February 14, 2024, for the Parties to report more fully on the settlement status and invited Mobile to participate in the hearing. *Id.* The Board noted that additional details on the hearing would be provided in the hearing notice published in the **Federal Register**.

The Parties jointly filed the February Status Report on February 1, 2024. The Board will conduct a hearing to obtain information about the status of the implementation of the settlement agreement.

The hearing will take place on February 14, 2024, at 11 a.m. EST, in the hearing room of the Board's headquarters, located at 395 E Street SW, Washington, DC 20423–0001. Participation will be limited to the Parties' counsel and a representative from Mobile, if Mobile chooses to participate. The hearing will be available for public viewing on YouTube. If at any point it is necessary to discuss confidential and/or highly confidential information, all those not authorized to view the confidential and/or highly confidential information will be excused from the hearing room.

Instructions for Attendance at Hearing

All persons attending the hearing must use the main entrance to the Board's headquarters, located at 395 E Street, SW There will be no reserved seating. There is public parking in the building. The two closest Metro stops are Federal Center SW (3rd and D Streets SW, serving the Blue, Orange, and Silver Lines) and L'Enfant Plaza (6th and D Streets SW, serving the Yellow, Green, Blue, Orange, and Silver Lines). Upon arrival, check in at the security desk in the main lobby. Be prepared to produce valid photographic identification (driver's license or local, state, or federal government identification); sign in at the security desk; submit to an inspection of all briefcases, handbags, etc.; and pass through a metal detector. Persons who exit the building during the hearing will be subject to these security procedures again if they choose to re-enter the building.

Laptops and recorders may be used in the hearing room, and Wi-Fi will be available.[1] Cell phones may be used quietly in the corridor outside the hearing room or in the building's main lobby.

Members of the media should contact Michael Booth in the Office of Public Assistance, Governmental Affairs, and Compliance at (202) 245–1760 if they plan to attend the hearing.

The hearing room complies with the Americans with Disabilities Act, and persons needing such accommodations should call (202) 245–0245 by the close of business on February 12, 2024.

The hearing will be available for public viewing at *www.youtube.com/channel/UCgd2FPpKSpQZ57p771aafNg/live.* A link to the hearing can also be accessed through the Board's website at *www.stb.gov,* under ''Quick Links'' on the homepage, by clicking on ''WATCH LIVE HEARINGS HERE.'' If confidential or highly confidential materials are to be presented, all attendees who are not authorized to view the confidential or highly confidential information will be asked to leave the hearing room during the presentation of such information and the YouTube stream of the hearing will be interrupted.

Board Releases and Transcript Availability: Decisions and notices of the Board, including this notice, are available on the Board's website at *www.stb.gov.* A recording of the hearing and a transcript will be posted on the Board's website when they become available.

It is ordered:

1. A hearing is scheduled for February 14, 2024, at 11:00 a.m. EST, in the hearing room of the Board's headquarters.

2. This decision is effective on its service date.

3. This decision will be published in the **Federal Register**.

Decided: February 6, 2024.

By the Board, Mai T. Dinh, Director, Office of Proceedings.

Jeffrey Herzig,

Clearance Clerk.

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Performance Review Board Membership

AGENCY: Office of the United States Trade Representative.

ACTION: Notice.

SUMMARY: This notice announces the Office of the United States Trade

Representative (USTR) staff members selected to serve on the Senior Executive Service (SES) and Senior Level (SL) Performance Review Board (PRB). This notice supersedes all previous PRB membership notices.

DATES: The staff members in this notice will begin serving as PRB members on February 9, 2024.

FOR FURTHER INFORMATION CONTACT: Cassie Ender, Human Capital Specialist, Office of Human Capital and Services, at (202) 881–7782 or *Cassie.L.Ender@ustr.eop.gov.*

SUPPLEMENTARY INFORMATION: USTR is required (*see* 5 U.S.C. 4314(c)) to establish a PRB to review and make recommendations to the U.S. Trade Representative for final approval of the performance rating, performance-based pay adjustment, and performance award for each incumbent SES and SL. The following staff members have been selected to serve on USTR's PRB:

Chair: Rachel Howe, Assistant U.S. Trade Representative for ICTIME.

Member: Daniel Lee, Assistant U.S. Trade Representative for Innovation and Intellectual Property.

Member: Daniel Watson, Assistant U.S. Trade Representative for Western Hemisphere Affairs.

Member: Julie Callahan, Assistant U.S. Trade Representative for Agricultural Affairs.

Member: Juan Millan, Assistant U.S. Trade Representative for Monitoring and Investment.

Fred Ames,

Assistant U.S. Trade Representative for Administration, Office of the United States Trade Representative.

BILLING CODE 3390–F4–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Noise Compatibility Program for Dane County Regional Airport/Truax Field, Dane County, Wisconsin

AGENCY: Federal Aviation Administration, DOT.

ACTION: Acceptance of Dane County Regional Airport/Truax Field noise exposure map.

SUMMARY: The Federal Aviation Administration (FAA) announces its determination that the noise exposure map submitted by Dane County for Dane County Regional Airport/Truax Field is in compliance with applicable statutory and regulatory requirements.

DATES: The effective date of the FAA's determination on the noise exposure map is December 21, 2023.

FOR FURTHER INFORMATION CONTACT: Bobb Beauchamp, 2300 Devon Avenue, Suite 312, Des Plaines, Illinois 60018. 847–294–7364.

SUPPLEMENTARY INFORMATION: The FAA determined the noise exposure map submitted by Dane County for Dane County Regional Airport/Truax Field, is in compliance with applicable statutory and regulatory requirements, effective December 21, 2023. Under title 49, United States Code (U.S.C.) section 47503, an airport operator may submit to the FAA, noise exposure maps depicting non-compatible uses as of the date such map is submitted, a description of estimated aircraft operations during a forecast period that is at least five years in the future and how those operations will affect the map. A noise exposure map must be prepared in accordance with title 14, Code of Federal Regulations (CFR) part 150, the regulations promulgated pursuant to 49 U.S.C. 47502 and developed in consultation with public agencies and planning authorities in the area surrounding the airport, State and Federal agencies, interested and affected parties in the local community, and aeronautical users of the airport. In addition, an airport operator that submitted a noise exposure map, which the FAA determined is compliant with statutory and regulatory requirements, may submit a noise compatibility program for FAA approval that sets forth measures the operator has taken or proposes to take to reduce existing non-compatible uses and prevent the introduction of additional non-compatible uses.

The FAA completed its review of the noise exposure map and supporting documentation submitted by Dane County and determined the noise exposure map and accompanying documentation are in compliance with applicable requirements. The documentation that constitutes the Noise Exposure Map includes: Table ES–1–1 Existing (2022) and Forecast (2027) Land Use Compatibility; Table ES–1–2 Existing (2022) and Forecast (2027) Noise Sensitive Sites; Figure ES–1 Existing Condition (2022) Noise Exposure Map; Figure ES–2 Future Conditions (2027) Noise Exposure Map; Figure 3–1 Existing Land Use; Table 5–1 Runway Specifications; Table 5–2 Operation Counts by Tower Category; Table 5–3 Modeled 2022 Annual Itinerant Operations; Table 5–4 Modeled 2022 Annual Local Operations; Table 5–5 Modeled 2027 Annual Itinerant Operations; Table 5–6 Modeled 2027 Annual Local Operations; Figure 5–2 AEDT Runway Use; Figure 5–3 NMAP Runway Use; Table 5–7 Runway Utilization for Fixed-Wing Aircraft; Table 5–8 AEDT-Modeled Itinerant Jet Model Track Utilization; Table 5–9 Military NMAP-Modeled Itinerant Fixed-Wing Model Track Utilization; Table 5–10 AEDT-Modeled Itinerant Non-Jet Fixed-Wing Model Track Utilization; Table 5–11 AEDT-Modeled Local Fixed-Wing Model Track Utilization; Table 5–12 NMAP-Modeled Local Military Model Track Utilization; Table 5–13 AEDT-Modeled Itinerant Civilian Helicopter Model Track Utilization; Table 5–14 NMAP-Modeled Military Itinerant Helicopter Model Track Utilization; Figure 5–4 AEDT-Modeled Fixed-Wing Arrival Flight Tracks; Figure 5–5 AEDT-Modeled Fixed-Wing Departure Flight Tracks; Figure 5–6 AEDT-Modeled Fixed-Wing Circuit Flight Tracks; Figure 5–7 NMAP-Modeled Fixed-Wing Arrival Flight Tracks; Figure 5–8 NMAP-Modeled Fixed-Wing Departure Flight Tracks; Figure 5–9 NMAP-Modeled Fixed-Wing Circuit Flight Tracks; Figure 5–10 AEDT-Modeled Helicopter Arrival Flight Tracks; Figure 5–11 AEDT-Modeled Helicopter Departure Flight Tracks; Figure 5–12 NMAP-Modeled Helicopter Arrival Flight Tracks; Figure 5–13 NMAP-Modeled Helicopter Departure Flight Tracks; Figure 5–14 NMAP-Modeled Helicopter Circuit Flight Tracks; Table 5–15 Modeled Engine Runup Activity for the Wisconsin Air and Army National Guard; Figure 5–15 Modeled Engine Runup Locations for the Wisconsin Air and Army National Guard; Figure 6–1 Existing Condition (2022) Noise Exposure Map; Figure 6–2 Future Condition (2027) Noise Exposure Map; Figure 6–3 Comparison of Existing Condition (2022) and Future Condition (2027) Noise Exposure Map; Table 6–1 Existing 2022 and Forecast 2027 Land Use Compatibility; Table 6–2 Existing 2022 and Forecast 2027 Noise Sensitive Sites; Figure 6–4 Comparison of Existing Condition (2022) and Future Condition (2027) Enlarged Insets of Figure 6–3 required by 14 CFR 150.101 and 49 U.S.C 47503 and 47506. This determination is effective on December 21, 2023. FAA's determination on an airport's noise exposure map is limited to a finding that the noise exposure map was developed in accordance with the 49 U.S.C 47503 and 47506 and procedures contained in 14 CFR part 150, appendix A. FAA's acceptance of an NEM does not constitute approval of the applicant's data, information or plans, or a commitment to approve a noise compatibility program or to fund the implementation of that program. If

questions arise concerning the precise relationship of specific properties within noise exposure contours depicted on a noise exposure map, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours or in interpreting the noise exposure maps to resolve questions concerning, for example, which properties should be covered by the provisions of 49 U.S.C. 47506. These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under 14 CFR part 150 or through FAA review and acceptance of a noise exposure map. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the map depicting properties on the surface rests exclusively with the airport operator that submitted a noise exposure map or with those public and planning agencies with which consultation is required under 49 U.S.C. 47503. The FAA relied on the certification by the airport operator, under of 14 CFR 150.21 that the required consultations and opportunity for public review has been accomplished during the development of the noise exposure maps. Copies of the noise exposure map and supporting documentation and the FAA's evaluation of the noise exposure maps are available for examination at the following locations: Federal Aviation Administration Chicago Airports District Office, 2300 Devon Avenue, Suite 312, Des Plaines, IL 60018, and Dane County Regional Airport/Truax Field and Dane County at 4000 International Lane, Madison, WI 53704. Questions may be directed to the individual listed in the FOR **FURTHER INFORMATION CONTACT** section of this notice.

Issued in Des Plaines, Illinois, on February 5, 2024.

Debra L Bartell,

Manager, Chicago Airports District Office, FAA Great Lakes Region.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

[Docket No. FHWA–2024–0010]

Agency Information Collection Activities: Notice of Request for Reinstatement of a Previously Approved Information Collection

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of request for reinstatement of a previously approved information collection.

SUMMARY: The FHWA invites public comments about our intention to request the Office of Management and Budget's (OMB) approval for renewal of an existing information collection that is summarized below under **SUPPLEMENTARY INFORMATION**. We are required to publish this notice in the **Federal Register** by the Paperwork Reduction Act of 1995.

DATES: Please submit comments by April 9, 2024.

ADDRESSES: You may submit comments identified by DOT Docket ID Number 0010 by any of the following methods:

Website: For access to the docket to read background documents or comments received go to the Federal eRulemaking Portal: Go to *http://www.regulations.gov*. Follow the online instructions for submitting comments.

Fax: 1–202–493–2251.

Mail: Docket Management Facility, U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590–0001.

Hand Delivery or Courier: U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Wendy McAbee, 202–366–5658, Office of Bridges and Structures, Federal Highway Administration, Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590, Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Title: National Tunnel Inspection Program.

OMB Control No.: 2125–0640.

Background: This collection is necessary to meet legislative requirements of 23 U.S.C. 144 and 23 CFR part 650, subpart E—National Tunnel Inspection Standards which require States, Federal agencies, and Tribal governments to: (1) perform, and report inventory and element data from, initial, routine, damage, in-depth, and special inspections as appropriate for all highway tunnels on public roads, and (2) report critical findings on highway tunnels. The critical findings information is periodically provided to the FHWA. The tunnel information is used for multiple purposes, including: (1) the determination of the condition of the Nation's tunnels; (2) for various reports to Congress on Tunnel Safety; (3) for conducting oversight of the National Tunnel Inspection Program at the State, Federal agency, and Tribal level; and (4) for strategic national defense needs.

Respondents: 42 States, the District of Columbia, Puerto Rico and 4 Federal agencies. The number of inspection per respondent varies in accordance with the National Tunnel Inspection Standards.

Estimated Average Burden per Response: The estimated average burden for each tunnel inspection is 40 hours. The estimated average burden for reporting critical findings is 40 hours.

Estimated Total Annual Burden Hours: The annual burden hours associated with this renewal is 15,880 hours. This estimated figure is based on annual instances for tunnel inspections multiplied by 40 hours (13,960 hours); plus 40 hours for follow up on critical findings multiplied by 48 respondents (1,920 hours) for a combined annual burden of 15,880 hours.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the FHWA's performance; (2) the accuracy of the estimated burdens; (3) ways for the FHWA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized, including the use of electronic technology, without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended; and 49 CFR 1.48.

Issued on: February 6, 2024.

Jazmyne Lewis,

Information Collection Officer.

BILLING CODE 4910–RY–P

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

[Docket No. DOT–OST–2024–0016]

Agency Information Collection Activities: Approval of Information Collection

AGENCY: Office of the Secretary (OST), DOT.

ACTION: 30-Day notice and request for comments.

SUMMARY: Under the Paperwork Reduction Act of 1995 (PRA), this notice announces that the Department of Transportation (DOT) is forwarding the Information Collection Request (ICR) abstracted below to the Office of Management and Budget (OMB) for review and comment. The ICR describes the information collection and its expected burden. On September 6, 2023, DOT published a notice providing a 60-day period for public comment on the ICR. DOT received no comments on this notice. This collection is necessary for administration of the Reconnecting Communities (RCP) and Neighborhood Access and Equity (NAE) Discretionary Grant Programs and funding opportunities. Together, these programs are known as ''Reconnecting Communities and Neighborhoods (RCN)'' in the combined NOFO. RCN provides federal financial assistance for surface transportation infrastructure projects. Through RCP, this includes removing, retrofitting, or mitigating transportation facilities such as highways and rail lines that create barriers to community connectivity including to mobility, access, or economic development. Through NAE, this includes the RCP eligibilities and expands eligibility to activities that reduce the burdens to communities of existing transportation infrastructure, including air quality impacts and greenhouse gas emissions, urban heat islands, gaps in tree canopy coverage, and other natural environment concerns.

DATES: Written comments should be submitted by March 11, 2024.

ADDRESSES: To ensure that you do not duplicate your docket submissions, please submit them by only one of the following means:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov* and follow the online instructions for submitting comments.
- *Mail:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Ave. SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery:* West Building Ground Floor, Room W–12–140 1200, New Jersey Ave. SE, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The telephone number is 202–366–9329.

Instructions: To ensure proper docketing of your comment, please include the agency name and docket number [DOT–OST–2024–0016] at the beginning of your comments. All comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided.

FOR FURTHER INFORMATION CONTACT: For further information regarding this notice, please contact the Office of the Secretary via email at *ReconnectingCommunities@dot.gov* or contact Andrew Emanuele at *andrew.emanuele@dot.gov.* A TDD is available for individuals who are deaf or hard of hearing at 202–366–3993.

SUPPLEMENTARY INFORMATION: New Collection. OMB number will be issued after the collection is approved.

Title: Reconnecting Communities Pilot Program and Neighborhood Access and Equity Program (Reconnecting Communities and Neighborhoods [RCN] Program) Discretionary Grants.

Form Numbers: None.

Type of Review: New Information Collection Request (ICR).

Background: The Office of the Secretary (OST) within the Department of Transportation (DOT) provides financial assistance for surface transportation infrastructure projects, including removing, retrofitting, or mitigating transportation facilities such as highways and rail lines that create barriers to community connectivity including to mobility, access, or economic development. The Infrastructure Investment and Jobs Act (Pub. L. 117–58, November 15, 2021) (Bipartisan Infrastructure Law, or BIL) provided funds to DOT to invest in planning and capital construction grants to reduce transportation barriers: the Reconnecting Communities Pilot Program, found under section 11509 of division A. The Inflation Reduction Act (Pub. L. 117–169, August 16, 2022) (IRA) provided funds to DOT for the NAE to invest in planning and construction grants to improve walkability and safety and provide affordable access: the Neighborhood Access and Equity grant program, found at 23 U.S.C. 177. To help streamline the process for applicants, DOT has combined the applications for the RCP and NAE programs into the RCN common application.

DOT combined these two programs into one single Notice of Funding Opportunity (NOFO) to provide a more efficient application process for project sponsors. While they remain separate programs for the purposes of award, the programs share many common characteristics. Because of these shared characteristics, it is possible for many projects to be eligible and considered for multiple programs using a single application.

This notice seeks comments on the proposed information collection, which will collect information necessary to support the ongoing oversight and administration of previous awards, a Letter of Intent screening tool, the evaluation and selection of new applications, the funding agreement negotiation stage for new awards, and the evaluation of the programs. The reporting requirements for the program is as follows:

Prior to applying, a project sponsor may fill out a ''Letter of Intent'' screening tool to help determine eligibility for one or both programs within the RCN NOFO or help direct them to a more appropriate grant program.

To be considered to receive an RCN grant, a project sponsor must submit an application to DOT containing standard forms, a key information table, a project narrative, and budget description, as detailed in the NOFO. These materials should include the information necessary for DOT to determine that the project satisfies eligibility requirements as warranted by law.

Following the announcement of a funding award, the recipient and DOT will negotiate and sign a funding agreement with awardees. In the agreement, the recipient must describe the project that DOT agreed to fund, which is the project that was described in the RCN application or a reduced-scope version of that project. The agreement also includes project schedule milestones, a budget, and project-related climate change, equity, and workforce planning and policies.

To fulfill evaluation requirements, DOT will conduct interviews with stakeholders associated with each awarded capital construction grant. These interviews will be used to inform case studies that will be developed for each funded capital construction project.

During the project monitoring stage, grantees will submit reports on the financial condition of the project and the project's progress. Grantees will submit progress and monitoring reports to DOT on a quarterly basis until completion of the project. The progress reports will include an SF–425, Federal Financial Report, and other information

determined by the administering DOT Operating Administration. This information will be used to monitor grantees' use of Federal funds, ensuring accountability and financial transparency in the RCN programs.

For Post Construction Reporting, the DOT will evaluate the program for recipients of capital construction grants and include the outcomes and impacts of the completed projects. The reporting will document any changes in the overall level of mobility, congestion, access, and safety in the project areas, and environmental impacts and economic development opportunities in project areas. Performance reporting continues for five years after project construction is completed, during which DOT will not provide grant funding specifically for performance reporting.

DOT received 682 applications in Fiscal Year (FY) 2023. For the purposes of estimating the information collection burden below for new applicants and awardees, DOT expects to receive 600 applications in FY 2024 and 435 applications in FY 2025, with the expected depletion of NAE funds. DOT is negotiating 45 funding agreements in FY 2023 and estimates that for FY 2024 and FY 2025, it will negotiate 100 funding agreements per year. Quarterly project monitoring will occur for the 45 RCP projects awarded in FY 2022 and in the following year, for both FY 2022 and 2023 awards. DOT will conduct interviews with 30 stakeholders (five for each of the six capital construction grants awarded in the FY 2022 round) in FY 2024 and 175 stakeholders (five for each of the estimated 35 capital construction grants awarded in the FY 2023 round) in FY 2025. DOT estimates that 600 respondents will use the Letter of Intent tool in FY 2024 and 250 respondents will use it in FY 2025. For a detailed breakdown of burden hours, please see Table 1.

TABLE 1

Respondent	Year 1 (2023)			Year 2 (2024)			Year 3 (2025)			Total hrs.
	#	Hrs.	Freq.	#	Hrs.	Freq.	#	Hrs.	Freq.	
Letter of Intent										
Applicants	682	100	1							68,200
Awardee Funding Agreements	45	6	1							270
Quarterly Monitoring										
Letter of Intent				600	0.5	1				300
Applicants				600	100	1				60,000
Awardee Funding Agreements				100	6	1				600
Interviews				30	2	1				60
Quarterly Monitoring (FY 2022)				45	5	4				900
Letter of Intent							250	0.5	1	125
Applicants							435	100	1	43,500
Awardee Funding Agreements							100	6	1	600
Interviews							175	2	1	350
Quarterly Monitoring (FY 2022 and 2023)							145	5	4	2900
Grand Total										177,805

DOT's estimated burden for this information collection is the following:

For Letter of Intent Screening Tool

Expected Number of Respondents: Approximately 600 in Year 2. DOT expects 250 in Year 3 with depletion of NAE funding, reducing those using the tool.

Frequency: Once.

Estimated Average Burden Per Response: 0.5 hours per respondent.

For Applications

Expected Number of Respondents: DOT received 682 applications in Year 1 and expects to receive 600 applications in Year 2 and 435 in Year 3 with the expected depletion of NAE funds.

Frequency: Once.

Estimated Average Burden per Response: 100 hours for each application.

For Funding Agreements

Expected Number of Respondents: DOT awarded 45 grants in Year 1 and expects to award approximately 100 in Years 2 and 3.

Frequency: Once.

Estimated Average Burden per Response: 6 hours for each funding agreement.

For Program Evaluation

Expected Number of Respondents: Estimated 30 in Year 2 (five interviews per capital construction grant awarded) and 175 in Year 3 (five interviews per an estimated 35 capital construction grants awarded.

Frequency: Once.

Estimated Average Burden per Response: 2 hours for each interview.

For Quarterly Monitoring

Expected Number of Respondents: Approximately 45 in Year 2 and 145 in Year 3.

Frequency: Quarterly.

Estimated Average Burden per Response: 5 hours for each Quarterly Monitoring Report.

For Post-Construction Project Monitoring

Because RCN expect no projects to complete construction by 2025, post-construction monitoring hours and cost are not computed in this document.

Estimated Total 3-Year Burden on Respondents: 177,805 Hours

- Letter of Intent [425 hours]
- Applicants [171,700 hours]
- Awardee Funding Agreements [1,470 hours]
- Interviews [410 hours]
- Prior Awardee Quarterly Project Monitoring [3,800 hours]

The following is detailed information and instructions regarding the specific reporting requirements for each report identified above:

Letter of Intent Screening Stage

To help applicants determine their eligibility for the RCN combined grant opportunity, DOT will develop and use the ''Letter of Intent'' tool to help applicants determine eligibility, direct them to a more appropriate grant

program if applicable, and identify application materials they may be missing. The tool will save potential applicants hundreds of hours of application development time if the project has a ''fatal flaw'' that would render it ineligible. The tool will consist of 10–20 questions and takes 0.5 hour to complete.

Application Stage

To be considered for an RCN grant award, a project sponsor must apply to DOT, providing standard forms, a key information table, a project narrative, and budget description, as detailed in the NOFO. These materials should include the information necessary for DOT to determine that the project satisfies eligibility requirements.

Applications must be submitted through *www.valideval.com.* Instructions for submitting planning or capital construction grant applications can be found at *https://usg.valideval.com/teams/rcn_planning/signup* or *https://usg.valideval.com/teams/rcn_capitalconstruction/signup,* respectively. The application must include the Standard Form 424 (Application for Federal Assistance), Standard Form 424a (Budget Information for Non-Construction Programs) or 424c (Budget Information for Construction Programs), Standard Form 424b (Assurances—Non-Construction Programs) or 424d (Assurances—Construction Programs), a Key Information Table, narrative, and budget.

The application should include a table of contents, maps, and graphics, as appropriate, to make the information easier to review. DOT recommends that the application be prepared with standard formatting preferences (*i.e.,* a single-spaced document, using a standard 12-point font such as Times New Roman, with 1-inch margins). The only substantive portions that may exceed the page limit are documents supporting assertions or conclusions made in the project narrative. If possible, website links to supporting documentation should be provided rather than copies of these supporting materials. If supporting documents are submitted, applicants should clearly identify within the project narrative the relevant portion of the project narrative that each supporting document refers to. At the applicant's discretion, relevant materials provided previously to a modal administration in support of a different DOT financial assistance program may be referenced and described as unchanged.

DOT estimates that it takes approximately 100 person-hours to compile an application package for an RCN application.

Funding Agreement Stage

DOT enters into a funding agreement with each grant recipient. In the agreement, the recipient describes the project that DOT agreed to fund, which is typically the project that was described in the RCN application or a reduced-scope version of that project. The agreement also includes a project schedule, budget, and project related climate change and equity planning and policies.

DOT estimates that it takes approximately 6 person-hours to provide the information necessary for funding agreements.

Program Evaluation Stage (Interviews)

To fulfill evaluation requirements, DOT will conduct interviews with stakeholders associated with each awarded capital construction grant. These interviews will be used to inform case studies that will be developed for each funded capital construction project.

Project Monitoring Stage

DOT requires each grant recipient to submit quarterly reports during the project period to ensure the proper and timely expenditure of federal funds under the grant.

The requirements comply with 2 CFR part 200 and are restated in the funding agreement. During the project monitoring stage, the grantee will complete quarterly progress reports to allow DOT to monitor the project budget and schedule.

DOT estimates that it takes approximately 5 person-hours to develop and submit a quarterly progress report.

Post Construction Monitoring Stage

For Post Construction Reporting, DOT will evaluate the program for recipients of capital construction grants and include the outcomes and impacts of the completed projects, The reporting will document any changes in the overall level of mobility, congestion, access, and safety in the project areas, and environmental impacts and economic development opportunities in project areas. Because RCN expect no projects to complete construction by 2025, post-construction monitoring hours and cost are not computed in this document.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended; and 49 CFR 1:48.

Issued in Washington, DC, on February 5, 2024.

John Augustine,

Director of the Office of Infrastructure Finance and Innovation, Office of the Under Secretary for Transportation Policy.

BILLING CODE 4910–9X–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Meeting of the Electronic Tax Administration Advisory Committee

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of meeting.

SUMMARY: The Electronic Tax Administration Advisory Committee (ETAAC) will hold a public meeting via telephone conference line on Wednesday, March 20, 2024.

FOR FURTHER INFORMATION CONTACT: Mr. Alec Johnston, Office of National Public Liaison, at (202) 317–4299, or send an email to *publicliaison@irs.gov*

SUPPLEMENTARY INFORMATION: Notice is hereby given pursuant to 5 U.S.C. 10(a)(2) of the Federal Advisory Committee Act, that a public meeting via conference call of the ETAAC will be held on Wednesday, March 20, 2024, at 12:30 p.m. EDT. The purpose of the ETAAC is to provide continuing advice regarding the development and implementation of the IRS organizational strategy for electronic tax administration. ETAAC is an organized public forum for discussion of electronic tax administration issues such as prevention of identity theft and refund fraud. It supports the overriding goal that paperless filing should be the preferred and most convenient method of filing tax and information returns. ETAAC members convey the public's perceptions of IRS electronic tax administration activities, offer constructive observations about current or proposed policies, programs, and procedures, and suggest improvements. Please call or email Alec Johnston to confirm your attendance. Mr. Johnston can be reached at 202–317–4299 or *PublicLiaison@irs.gov* . Should you wish the ETAAC to consider a written statement, please call 202–317–4299 or email: *PublicLiaison@irs.gov.*

Dated: February 6, 2024.

John A. Lipold,

Designated Federal Official, Office of National Public Liaison, Internal Revenue Service.

BILLING CODE 4830–01–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0715]

Agency Information Collection Activity: Servicer's Staff Appraisal Reviewer (SAR) Application

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: Veterans Benefits Administration (VBA), Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed revision of a currently approved collection, and allow 60 days for public comment in response to the notice.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before April 9, 2024.

ADDRESSES: Submit written comments on the collection of information through Federal Docket Management System (FDMS) at *www.Regulations.gov* or to Nancy J. Kessinger, Veterans Benefits Administration (20M33), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420 or email to *nancy.kessinger@va.gov.* Please refer to ''OMB Control No. 2900–0715'' in any correspondence. During the comment period, comments may be viewed online through FDMS.

FOR FURTHER INFORMATION CONTACT: Maribel Aponte, Office of Enterprise and Integration, Data Governance Analytics (008), 810 Vermont Ave. NW, Washington, DC 20420, (202) 266–4688 or email *maribel.aponte@va.gov.* Please refer to ''OMB Control No. 2900–0715'' in any correspondence.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Authority: Public Law 104–13; 44 U.S.C. 3501–3521.

Title: VA FORM 26–0829 Servicer's Staff Appraisal Reviewer (SAR) Application.

OMB Control Number: 2900–0715.

Type of Review: Revision of a currently approved collection.

Abstract: Title 38 U.S.C. 3702(d) authorizes the Department of Veterans Affairs (VA) to establish standards for servicers making automatically guaranteed loans and 38 U.S.C. 3731(f) authorizes VA to establish, in regulation, standards and procedures to authorize a lender to determine the reasonable value of property. VA has implemented this authority through its Servicer Appraisal Processing Program (SAPP), codified in 38 CFR 36.4348.

Affected Public: Individuals (employees of servicers making applications).

Estimated Annual Burden: 0.8 hours.

Estimated Average Burden per Respondent: 5 minutes.

Frequency of Response: On occasion.

Estimated Number of Respondents: 10 per year.

By direction of the Secretary.

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration/Data Governance Analytics, Department of Veterans Affairs.

Regulatory Information Service Center

Introduction to the Unified Agenda of Federal Regulatory and Deregulatory Actions—Fall 2023

REGULATORY INFORMATION SERVICE CENTER

Introduction to the Unified Agenda of Federal Regulatory and Deregulatory Actions—Fall 2023

AGENCY: Regulatory Information Service Center.

ACTION: Introduction to the Unified Agenda of Federal Regulatory and Deregulatory Actions.

SUMMARY: Publication of the Fall 2023 Unified Agenda of Federal Regulatory and Deregulatory Actions represents a key component of the regulatory planning mechanism prescribed in Executive Order (''E.O.'') 12866, ''Regulatory Planning and Review,'' (58 FR 51735, as amended) and reaffirmed in E.O. 13563, ''Improving Regulation and Regulatory Review,'' (76 FR 3821) and E.O. 14094, ''Modernizing Regulatory Review,'' (88 FR 21879). The Regulatory Flexibility Act requires that agencies publish semiannual regulatory agendas in the **Federal Register** describing regulatory actions they are developing that may have a significant economic impact on a substantial number of small entities (5 U.S.C. 602). The Unified Agenda of Federal Regulatory and Deregulatory Actions (Unified Agenda), published in the fall and spring, helps agencies fulfill all of these requirements. All Federal regulatory agencies have chosen to publish their regulatory agendas as part of this publication. The complete publication of the Fall 2023 Unified Agenda contains the Regulatory Plans of 29 Federal agencies and 69 Federal agency regulatory agendas available to the public at *www.reginfo.gov.*

The Fall 2023 Unified Agenda publication appearing in the **Federal Register** includes the Regulatory Plan and agency Regulatory Flexibility Agendas, in accordance with the publication requirements of the Regulatory Flexibility Act. Agency Regulatory Flexibility Agendas contain only those Agenda entries for rules that are likely to have a significant economic impact on a substantial number of small entities and entries that have been selected for periodic review under section 610 of the Regulatory Flexibility Act.

ADDRESSES: Regulatory Information Service Center (MV), General Services Administration, 1800 F Street NW, Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: For further information about specific regulatory actions, please refer to the agency contact listed for each entry. To provide comment on or to obtain further information about this publication, contact: Boris Arratia, Director, Regulatory Information Service Center (MV), General Services Administration, 1800 F Street NW, Washington, DC 20405, 703–795–0816. You may also send comments to us by email at: *RISC@gsa.gov.*

SUPPLEMENTARY INFORMATION:

Table of Contents

Introduction to the Regulatory Plan and Unified Agenda of Federal Regulatory and Deregulatory Actions

I. What are the Regulatory Plan and the Unified Agenda?

The Regulatory Plan serves as a defining statement of the Administration's regulatory and deregulatory policies and priorities. The Plan is part of the fall edition of the Unified Agenda. Each participating agency's regulatory plan contains: (1) A narrative statement of the agency's regulatory and deregulatory priorities, and, for the most part; and (2) a description of the most important significant regulatory and deregulatory actions that the agency reasonably expects to issue in proposed or final form during the upcoming fiscal year. This edition includes the regulatory plans of 29 agencies.

The Unified Agenda provides information about regulations that the Government is considering or reviewing. The Unified Agenda has appeared in the **Federal Register** twice each year since 1983 and has been available online since 1995. The complete Unified Agenda is available to the public at *www.reginfo.gov.* The online Unified Agenda offers flexible search tools and access to the historic Unified Agenda database dating back to

1995. The complete online edition of the Unified Agenda includes regulatory agendas from 69 Federal agencies. Agencies of the United States Congress are not included.

The Fall 2023 Unified Agenda publication appearing in the **Federal Register** consists of the Regulatory Plan and Regulatory Flexibility Agendas, in accordance with the publication requirements of the Regulatory Flexibility Act. Agency Regulatory Flexibility Agendas contain only those Agenda entries for rules that are likely to have a significant economic impact on a substantial number of small entities and entries that have been selected for periodic review under section 610 of the Regulatory Flexibility Act. Printed entries display only the fields required by the Regulatory Flexibility Act. Complete Unified Agenda information for those entries appears online in a uniform format at *www.reginfo.gov.*

The following agencies have no entries identified for inclusion in the printed Regulatory Flexibility Agenda. An asterisk (*) indicates agencies that appear in The Regulatory Plan. The regulatory agendas of these agencies are available to the public at *www.reginfo.gov.*

The Regulatory Information Service Center compiles the Unified Agenda for the Office of Information and Regulatory Affairs (OIRA), part of the Office of Management and Budget. OIRA is responsible for overseeing the Federal Government's regulatory, paperwork, and information resource management activities, including implementation of Executive Order 12866, as amended (incorporated in Executive Order 13563). The Center also provides information about Federal regulatory activity to the President and his Executive Office, the Congress, agency officials, and the public.

The activities included in the Agenda are, in general, those that will have a regulatory action within the next 12 months. Agencies may choose to include activities that will have a longer timeframe than 12 months. Agency agendas also show actions or reviews completed or withdrawn since the last Unified Agenda. Executive Order 12866, as amended, does not require agencies to include regulations concerning military or foreign affairs functions or regulations related to agency organization, management, or personnel matters.

Agencies prepared entries for this publication to give the public notice of their plans to review, propose, and issue regulations. They have tried to predict their activities over the next 12 months as accurately as possible, but dates and schedules are subject to change. Agencies may withdraw some of the regulations now under development, and they may issue or propose other regulations not included in their agendas. Agency actions in the rulemaking process may occur before or after the dates they have listed. The Unified Agenda does not create a legal obligation on agencies to adhere to schedules in this publication or to confine their regulatory activities to those regulations that appear within it.

II. Why are the Regulatory Plan and the Unified Agenda published?

The Regulatory Plan and the Unified Agenda helps agencies comply with their obligations under the Regulatory Flexibility Act and various Executive orders and other statutes.

Regulatory Flexibility Act

The Regulatory Flexibility Act requires agencies to identify those rules that may have a significant economic impact on a substantial number of small entities (5 U.S.C. 602). Agencies meet that requirement by including the information in their submissions for the Unified Agenda. Agencies may also indicate those regulations that they are reviewing as part of their periodic review of existing rules under the Regulatory Flexibility Act (5 U.S.C. 610). Executive Order 13272, ''Proper Consideration of Small Entities in Agency Rulemaking,'' signed August 13, 2002 (67 FR 53461), provides additional guidance on compliance with the Act.

Executive Order 12866

Executive Order 12866, ''Regulatory Planning and Review,'' September 30, 1993 (58 FR 51735), as amended, requires covered agencies to prepare an agenda of all regulations under development or review. The Order also requires that certain agencies prepare annually a regulatory plan of their ''most important significant regulatory actions,'' which appears as part of the fall Unified Agenda. Executive Order 13497, signed January 30, 2009 (74 FR 6113), revoked the amendments to Executive Order 12866 that were contained in Executive Order 13258 and Executive Order 13422.

Executive Order 14094

Executive Order (E.O.) 14094, ''Modernizing Regulatory Review,'' April 6, 2023 (88 FR 21879) sets forth specific actions for Federal agencies and OIRA designed to modernize the regulatory process in order to advance policies that promote the public interest and address national priorities. E.O. 14094, among other things, amends Section 3(f)(1) of E.O. 12866 (Regulatory Planning and Review) to increase the monetary threshold for significance under that provision, amends Section 3(f)(4) to clarify what is significant under that provision, and encourages greater public participation during all stages of the regulatory process.

Executive Order 13563

Executive Order 13563, ''Improving Regulation and Regulatory Review,'' January 18, 2011 (76 FR 3821) supplements and reaffirms the

principles, structures, and definitions governing contemporary regulatory review that were established in Executive Order 12866, which includes the general principles of regulation and public participation, and orders integration and innovation in coordination across agencies; flexible approaches where relevant, feasible, and consistent with regulatory approaches; scientific integrity in any scientific or technological information and processes used to support the agencies' regulatory actions; and retrospective analysis of existing regulations.

Executive Order 13132

Executive Order 13132, ''Federalism,'' August 4, 1999 (64 FR 43255), directs agencies to have an accountable process to ensure meaningful and timely input by State and local officials in the development of regulatory policies that have ''federalism implications'' as defined in the Order. Under the Order, an agency that is proposing a regulation with federalism implications, which either preempt State law or impose non-statutory unfunded substantial direct compliance costs on State and local governments, must consult with State and local officials early in the process of developing the regulation. In addition, the agency must provide to the Director of the Office of Management and Budget a federalism summary impact statement for such a regulation, which consists of a description of the extent of the agency's prior consultation with State and local officials, a summary of their concerns and the agency's position supporting the need to issue the regulation, and a statement of the extent to which those concerns have been met. As part of this effort, agencies include in their submissions for the Unified Agenda information on whether their regulatory actions may have an effect on the various levels of government and whether those actions have federalism implications.

Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, title II) requires agencies to prepare written assessments of the costs and benefits of significant regulatory actions ''that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more in any 1 year.'' The requirement does not apply to independent regulatory agencies, nor does it apply to certain subject areas excluded by section 4 of the Act. Affected agencies identify in the Unified Agenda those regulatory actions they believe are subject to title II of the Act.

Executive Order 13211

Executive Order 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use,'' May 18, 2001 (66 FR 28355), directs agencies to provide, to the extent possible, information regarding the adverse effects that agency actions may have on the supply, distribution, and use of energy. Under the Order, the agency must prepare and submit a Statement of Energy Effects to the Administrator of the Office of Information and Regulatory Affairs, Office of Management and Budget, for ''those matters identified as significant energy actions.'' As part of this effort, agencies may optionally include in their submissions for the Unified Agenda information on whether they have prepared or plan to prepare a Statement of Energy Effects for their regulatory actions.

Small Business Regulatory Enforcement Fairness Act

The Small Business Regulatory Enforcement Fairness Act (Pub. L. 104–121, title II) established a procedure for congressional review of rules (5 U.S.C. 801 *et seq.*), which defers, unless exempted, the effective date of a ''major'' rule for at least 60 days from the publication of the final rule in the **Federal Register**. The Act specifies that a rule is ''major'' if it has resulted, or is likely to result, in an annual effect on the economy of $100 million or more or meets other criteria specified in that Act. The Act provides that the Administrator of OIRA will make the final determination as to whether a rule is major.

III. How are the Regulatory Plan and the Unified Agenda organized?

The Regulatory Plan appears in part II in a daily edition of the **Federal Register**. The Plan is a single document beginning with an introduction, followed by a table of contents, followed by each agency's section of the Plan. Following the Plan in the **Federal Register**, as separate parts, are the Regulatory Flexibility Agendas for each agency whose agenda includes entries for rules which are likely to have a significant economic impact on a substantial number of small entities or rules that have been selected for periodic review under section 610 of the Regulatory Flexibility Act. Each printed agenda appears as a separate part. The sections of the Plan and the parts of the Unified Agenda are organized alphabetically in four groups: Cabinet departments; other executive agencies; the Federal Acquisition Regulation, a joint authority (Agenda only); and independent regulatory agencies. Agencies may in turn be divided into subagencies. Each printed agency agenda has a table of contents listing the agency's printed entries that follow. Each agency's part of the Agenda contains a preamble providing information specific to that agency. Each printed agency agenda has a table of contents listing the agency's printed entries that follow.

Each agency's section of the Plan contains a narrative statement of regulatory priorities and, for most agencies, a description of the agency's most important significant regulatory and deregulatory actions. Each agency's part of the Agenda contains a preamble providing information specific to that agency plus descriptions of the agency's regulatory and deregulatory actions.

Agency regulatory flexibility agendas are printed in a single daily edition of the **Federal Register**. A regulatory flexibility agenda is printed for each agency whose agenda includes entries for rules which are likely to have a significant economic impact on a substantial number of small entities or rules that have been selected for periodic review under section 610 of the Regulatory Flexibility Act. Each printed agenda appears as a separate part. The parts are organized alphabetically in four groups: Cabinet departments; other executive agencies; the Federal Acquisition Regulation, a joint authority; and independent regulatory agencies. Agencies may in turn be divided into sub-agencies. Each agency's part of the Agenda contains a preamble providing information specific to that agency. Each printed agency agenda has a table of contents listing the agency's printed entries that follow.

The online, complete Unified Agenda contains the preambles of all participating agencies. Unlike the printed edition, the online Agenda has no fixed ordering. In the online Agenda, users can select the particular agencies' agendas they want to see. Users have broad flexibility to specify the characteristics of the entries of interest to them by choosing the desired responses to individual data fields. To see a listing of all of an agency's entries, a user can select the agency without specifying any particular characteristics of entries.

Each entry in the Agenda is associated with one of five rulemaking stages. The rulemaking stages are:

1. Prerule Stage—actions agencies will undertake to determine whether or how to initiate rulemaking. Such actions occur prior to a Notice of Proposed Rulemaking (NPRM) and may include

Advance Notices of Proposed Rulemaking (ANPRMs) and reviews of existing regulations.

2. Proposed Rule Stage—actions for which agencies plan to publish a Notice of Proposed Rulemaking as the next step in their rulemaking process or for which the closing date of the NPRM Comment Period is the next step.

3. Final Rule Stage—actions for which agencies plan to publish a final rule or an interim final rule or to take other final action as the next step.

4. Long-Term Actions—items under development but for which the agency does not expect to have a regulatory action within the 12 months after publication of this edition of the Unified Agenda. Some of the entries in this section may contain abbreviated information.

5. Completed Actions—actions or reviews the agency has completed or withdrawn since publishing its last agenda. This section also includes items the agency began and completed between issues of the Agenda.

Long-Term Actions are rulemakings reported during the publication cycle that are outside of the required 12-month reporting period for which the Agenda was intended. Completed Actions in the publication cycle are rulemakings that are ending their lifecycle either by Withdrawal or completion of the rulemaking process. Therefore, the Long-Term and Completed RINs do not represent the ongoing, forward-looking nature intended for reporting developing rulemakings in the Agenda pursuant to Executive Order 12866, section 4(b) and 4(c). To further differentiate these two stages of rulemaking in the Unified Agenda from active rulemakings, Long-Term and Completed Actions are reported separately from active rulemakings, which can be any of the first three stages of rulemaking listed above. A separate search function is provided on *www.reginfo.gov* to search for Completed and Long-Term Actions apart from each other and active RINs.

A bullet (•) preceding the title of an entry indicates that the entry is appearing in the Unified Agenda for the first time.

In the printed edition, all entries are numbered sequentially from the beginning to the end of the publication. The sequence number preceding the title of each entry identifies the location of the entry in this edition. The sequence number is used as the reference in the printed table of contents. Sequence numbers are not used in the online Unified Agenda because the unique Regulation Identifier Number (RIN) is able to provide this cross-reference capability.

Editions of the Unified Agenda prior to fall 2007 contained several indexes, which identified entries with various characteristics. These included regulatory actions for which agencies believe that the Regulatory Flexibility Act may require a Regulatory Flexibility Analysis, actions selected for periodic review under section 610(c) of the Regulatory Flexibility Act, and actions that may have federalism implications as defined in Executive Order 13132 or other effects on levels of government. These indexes are no longer compiled, because users of the online Unified Agenda have the flexibility to search for entries with any combination of desired characteristics. The online edition retains the Unified Agenda's subject index based on the **Federal Register** Thesaurus of Indexing Terms. In addition, online users have the option of searching Agenda text fields for words or phrases.

IV. What information appears for each entry?

All entries in the online Unified Agenda contain uniform data elements including, at a minimum, the following information:

Title of the Regulation—a brief description of the subject of the regulation. In the printed edition, the notation ''Section 610 Review'' following the title indicates that the agency has selected the rule for its periodic review of existing rules under the Regulatory Flexibility Act (5 U.S.C. 610(c)). Some agencies have indicated completions of section 610 reviews or rulemaking actions resulting from completed section 610 reviews. In the online edition, these notations appear in a separate field.

Priority—an indication of the significance of the regulation. Agencies assign each entry to one of the following five categories of significance.

(1) Economically Significant and Section 3(f)(1) Significant

On April 6, 2023, the President issued E.O. 14904 entitled ''Modernizing Regulatory Review.'' E.O. 14904 amends Section 3(f)(1) of E.O. 12866 to increase the monetary threshold for significance under this provision from $100 million to $200 million in annual effects and directs that it be adjusted for GDP growth every three years. For rulemaking actions that were in development prior to the issuance of E.O. 14904, the Agenda largely uses the previous nomenclature of ''economically significant'' to indicate rulemaking actions expected to have an annual effect on the economy of $100 million or more, the threshold in E.O. 12866 prior to April 6, 2023. For rulemaking actions which were submitted for OIRA review after the issuance of the E.O. 14904 on April 6, 2023 and are expected to have an annual effect on the economy of $200 million or more, the term ''Section 3(f)(1) Significant'' is used and will continue to be used in future Unified Agendas. The amended definition of ''Section 3(f)(1) Significant'' under Executive Order 12866 is a rulemaking action that will ''have an annual effect on the economy of $200 million or more (adjusted every 3 years by the Administrator of OIRA for changes in gross domestic product); or will adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities.''

(2) Other Significant

A rulemaking that is not Economically Significant but is considered Significant by the agency. This category includes rules that the agency anticipates will be reviewed under Executive Order 12866, as amended, or rules that are a priority of the agency head. These rules may or may not be included in the agency's regulatory plan.

(3) Substantive, Nonsignificant

A rulemaking that has substantive impacts, but is neither Significant, nor Routine and Frequent, nor Informational/Administrative/Other.

(4) Routine and Frequent

A rulemaking that is a specific case of a multiple recurring application of a regulatory program in the Code of Federal Regulations and that does not alter the body of the regulation.

(5) Informational/Administrative/Other

A rulemaking that is primarily informational or pertains to agency matters not central to accomplishing the agency's regulatory mandate but that the agency places in the Unified Agenda to inform the public of the activity.

Major—whether the rule is ''major'' under 5 U.S.C. 801 (Pub. L. 104–121) because it has resulted or is likely to result in an annual effect on the economy of $100 million or more or meets other criteria specified in that Act. The Act provides that the Administrator of the Office of Information and Regulatory Affairs will make the final determination as to whether a rule is major.

Unfunded Mandates—whether the rule is covered by section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4). The Act requires that, before issuing an NPRM likely to result in a mandate that may result in expenditures by State, local, and tribal governments, in the aggregate, or by the private sector of more than $100 million in 1 year, agencies, other than independent regulatory agencies, shall prepare a written statement containing an assessment of the anticipated costs and benefits of the Federal mandate.

Legal Authority—the section(s) of the United States Code (U.S.C.) or Public Law (Pub. L.) or the Executive order (E.O.) that authorize(s) the regulatory action. Agencies may provide popular name references to laws in addition to these citations.

CFR Citation—the section(s) of the Code of Federal Regulations that will be affected by the action.

Legal Deadline—whether the action is subject to a statutory or judicial deadline, the date of that deadline, and whether the deadline pertains to an NPRM, a Final Action, or some other action.

Abstract—a brief description of the problem the regulation will address; the need for a Federal solution; to the extent available, alternatives that the agency is considering to address the problem; and potential costs and benefits of the action.

Timetable—the dates and citations (if available) for all past steps and a projected date for at least the next step for the regulatory action. A date displayed in the form 12/00/19 means the agency is predicting the month and year the action will take place but not the day it will occur. In some instances, agencies may indicate what the next action will be, but the date of that action is ''To Be Determined.'' ''Next Action Undetermined'' indicates the agency does not know what action it will take next.

Regulatory Flexibility Analysis Required—whether an analysis is required by the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) because the rulemaking action is likely to have a significant economic impact on a substantial number of small entities as defined by the Act.

Small Entities Affected—the types of small entities (businesses, governmental jurisdictions, or organizations) on which the rulemaking action is likely to have an impact as defined by the Regulatory Flexibility Act. Some agencies have chosen to indicate likely effects on small entities even though they believe that a Regulatory Flexibility Analysis will not be required.

Government Levels Affected—whether the action is expected to affect levels of government and, if so, whether the governments are State, local, tribal, or Federal.

International Impacts—whether the regulation is expected to have international trade and investment effects, or otherwise may be of interest to the Nation's international trading partners.

Federalism—whether the action has ''federalism implications'' as defined in Executive Order 13132. This term refers to actions ''that have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.'' Independent regulatory agencies are not required to supply this information.

Included in the Regulatory Plan—whether the rulemaking was included in the agency's current regulatory plan published in the fall 2022.

Agency Contact—the name and phone number of at least one person in the agency who is knowledgeable about the rulemaking action. The agency may also provide the title, address, fax number, email address, and TDD for each agency contact.

Some agencies have provided the following optional information:

RIN Information URL—the internet address of a site that provides more information about the entry.

Public Comment URL—the internet address of a site that will accept public comments on the entry.

Alternatively, timely public comments may be submitted at the Governmentwide e-rulemaking site, *www.regulations.gov.*

Additional Information—any information an agency wishes to include that does not have a specific corresponding data element.

Compliance Cost to the Public—the estimated gross compliance cost of the action.

Affected Sectors—the industrial sectors that the action may most affect, either directly or indirectly. Affected sectors are identified by North American Industry Classification System (NAICS) codes.

Energy Effects—an indication of whether the agency has prepared or plans to prepare a Statement of Energy Effects for the action, as required by Executive Order 13211 ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use,'' signed May 18, 2001 (66 FR 28355).

Related RINs—one or more past or current RIN(s) associated with activity related to this action, such as merged RINs, split RINs, new activity for previously completed RINs, or duplicate RINs.

Statement of Need—a description of the need for the regulatory action.

Summary of the Legal Basis—a description of the legal basis for the action, including whether any aspect of the action is required by statute or court order.

Alternatives—a description of the alternatives the agency has considered or will consider as required by section 4(c)(1)(B) of Executive Order 12866.

Anticipated Costs and Benefits—a description of preliminary estimates of the anticipated costs and benefits of the action.

Risks—a description of the magnitude of the risk the action addresses, the amount by which the agency expects the action to reduce this risk, and the relation of the risk and this risk reduction effort to other risks and risk reduction efforts within the agency's jurisdiction.

V. Abbreviations

The following abbreviations appear throughout this publication:

ANPRM—An Advance Notice of Proposed Rulemaking is a preliminary notice, published in the **Federal Register**, announcing that an agency is considering a regulatory action. An agency may issue an ANPRM before it develops a detailed proposed rule. An ANPRM describes the general area that may be subject to regulation and usually asks for public comment on the issues and options being discussed. An ANPRM is issued only when an agency believes it needs to gather more information before proceeding to a notice of proposed rulemaking.

CFR—The Code of Federal Regulations is an annual codification of the general and permanent regulations published in the **Federal Register** by the agencies of the Federal Government. The Code is divided into 50 titles, each title covering a broad area subject to Federal regulation. The CFR is keyed to and kept up to date by the daily issues of the **Federal Register**.

E.O.—An Executive order is a directive from the President to Executive agencies, issued under constitutional or statutory authority. Executive orders are published in the **Federal Register** and in title 3 of the Code of Federal Regulations.

FR—The **Federal Register** is a daily Federal Government publication that provides a uniform system for publishing Presidential documents, all proposed and final regulations, notices

of meetings, and other official documents issued by Federal agencies.

FY—The Federal fiscal year runs from October 1 to September 30.

NPRM—A Notice of Proposed Rulemaking is the document an agency issues and publishes in the **Federal Register** that describes and solicits public comments on a proposed regulatory action. Under the Administrative Procedure Act (5 U.S.C. 553), an NPRM must include, at a minimum: A statement of the time, place, and nature of the public rulemaking proceeding;

Legal Authority—A reference to the legal authority under which the rule is proposed; and either the terms or substance of the proposed rule or a description of the subjects and issues involved.

Public Law—A public law is a law passed by Congress and signed by the President or enacted over his veto. It has general applicability, unlike a private law that applies only to those persons or entities specifically designated. Public laws are numbered in sequence throughout the 2-year life of each Congress; for example, Public Law 112–4 is the fourth public law of the 112th Congress.

RFA—A Regulatory Flexibility Analysis is a description and analysis of the impact of a rule on small entities, including small businesses, small governmental jurisdictions, and certain small not-for-profit organizations. The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires each agency to prepare an initial RFA for public comment when it is required to publish an NPRM and to make available a final RFA when the final rule is published, unless the agency head certifies that the rule would not have a significant economic impact on a substantial number of small entities.

RIN—The Regulation Identifier Number is assigned by the Regulatory Information Service Center to identify each regulatory action listed in the Regulatory Plan and the Unified Agenda, as directed by Executive Order 12866 (section 4(b)). Additionally, OMB has asked agencies to include RINs in the headings of their Rule and Proposed Rule documents when publishing them in the **Federal Register**, to make it easier for the public and agency officials to track the publication history of regulatory actions throughout their development.

Seq. No.—The sequence number identifies the location of an entry in the printed edition of the Regulatory Plan and the Unified Agenda. Note that a specific regulatory action will have the same RIN throughout its development but will generally have different sequence numbers if it appears in different printed editions of the Unified Agenda. Sequence numbers are not used in the online Unified Agenda.

U.S.C.—The United States Code is a consolidation and codification of all general and permanent laws of the United States. The U.S.C. is divided into 50 titles, each title covering a broad area of Federal law.

VI. How can users get copies of the Unified Agenda?

Copies of the **Federal Register** issue containing the printed edition of the Unified Agenda (agency regulatory flexibility agendas) are available from the Superintendent of Documents, U.S. Government Publishing Office, P.O. Box 371954, Pittsburgh, PA 15250–7954. Telephone: (202) 512–1800 or 1–866–512–1800 (toll-free). Copies of individual agency materials may be available directly from the agency or may be found on the agency's website. Please contact the particular agency for further information. All editions of The Regulatory Plan and the Unified Agenda of Federal Regulatory and Deregulatory Actions since fall 1995 are available in electronic form at *www.reginfo.gov,* along with flexible search tools. The Government Publishing Office's GPO GovInfo website contains copies of the Agendas and Regulatory Plans that have been printed in the **Federal Register**. These documents are available at *www.govinfo.gov.*

Boris Arratia,

Director.

DEPARTMENT OF AGRICULTURE

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage
1	Unfair Practices, Undue Preferences, and Harm to Competition Under the Packers and Stockyards Act (AMS–FTPP–21–0046).	0581–AE04	Proposed Rule Stage.
2	Inclusive Competition and Market Integrity Under the Packers and Stockyards Act (AMS–FTPP–21–0045).	0581–AE05	Final Rule Stage.
3	Special Supplemental Nutrition Program for Women, Infants and Children (WIC): Revisions in the WIC Food Packages.	0584–AE82	Final Rule Stage.
4	Child Nutrition Programs: Revisions to Meal Patterns Consistent With the 2020 Dietary Guidelines for Americans.	0584–AE88	Final Rule Stage.
5	Special Supplemental Nutrition Program for Women, Infants, and Children (WIC): Implementation of the Access to Baby Formula Act of 2022 and Related Provisions.	0584–AE94	Final Rule Stage.
6	Interim Final Rule—Implementing Provisions From the Consolidated Appropriations Act, 2023: Establishing the Summer EBT Program and Non-Congregate Option in the Summer Food Service Program.	0584–AE96	Final Rule Stage.
7	Labeling of Meat and Poultry Products Made Using Animal Cell Culture Technology.	0583–AD89	Proposed Rule Stage.
8	Salmonella Framework	0583–AD96	Proposed Rule Stage.
9	Revision of the Nutrition Facts Labels for Meat and Poultry Products and Updating Certain Reference Amounts Customarily Consumed.	0583–AD56	Final Rule Stage.
10	Voluntary Labeling of FSIS-Regulated Products With U.S. Origin Claims	0583–AD87	Final Rule Stage.
11	Update and Clarification of the Locatable Minerals Regulations	0596–AD32	Proposed Rule Stage.
12	Higher Blends Infrastructure Incentive Program	0570–AB11	Proposed Rule Stage.

DEPARTMENT OF COMMERCE

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage
13	Illegal, Unreported, and Unregulated Fishing; Fisheries Enforcement; High Seas Driftnet Fishing Moratorium Protection Act.	0648–BG11	Proposed Rule Stage.
14	Amendments to the North Atlantic Right Whale Vessel Strike Reduction Rule	0648–BI88	Final Rule Stage.
15	Endangered and Threatened Wildlife and Plants; Regulations for Listing Species and Designating Critical Habitat.	0648–BK47	Final Rule Stage.
16	Endangered and Threatened Wildlife and Plants; Revision of Regulations for Interagency Cooperation.	0648–BK48	Final Rule Stage.
17	Setting and Adjusting Patent Fees	0651–AD64	Proposed Rule Stage.
18	Setting and Adjusting Trademark Fees	0651–AD65	Proposed Rule Stage.

DEPARTMENT OF DEFENSE

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage
19	Cybersecurity Maturity Model Certification (CMMC) Program	0790–AL49	Proposed Rule Stage.
20	Department of Defense (DoD)-Defense Industrial Base (DIB) Cybersecurity (CS) Activities.	0790–AK86	Final Rule Stage.
21	Definitions of Gold Star Family and Gold Star Survivor	0790–AL56	Final Rule Stage.
22	Nondiscrimination on the Basis of Disability in Programs or Activities Assisted or Conducted by the DoD and in Equal Access to Information and Communication Technology Used by DoD.	0790–AJ04	Long-Term Actions.
23	Assessing Contractor Implementation of Cybersecurity Requirements (DFARS Case 2019–D041).	0750–AK81	Proposed Rule Stage.
24	Modification of Prize Authority For Advanced Technology Achievements (DFARS Case 2022–D014).	0750–AL65	Proposed Rule Stage.
25	Past Performance of Subcontractors and Joint Venture Partners (DFARS Case 2018–D055).	0750–AK16	Final Rule Stage.
26	Small Business Innovation Research Program Data Rights (DFARS Case 2019–D043).	0750–AK84	Final Rule Stage.
27	DFARS Buy American Act Requirements (DFARS Case 2022–D019)	0750–AL74	Final Rule Stage.
28	Policy and Procedures for Processing Requests to Alter U.S. Army Corps of Engineers Civil Works Projects Pursuant to 33 U.S.C. 408.	0710–AB22	Proposed Rule Stage.
29	Flood Control Cost-Sharing Requirements Under the Ability to Pay Provision	0710–AB34	Proposed Rule Stage.
30	USACE Implementing Procedures for Principles, Requirements, and Guidelines Applicable to Actions Involving Investment in Water Resources.	0710–AB41	Proposed Rule Stage.
31	Appendix C Procedures for the Protection of Historic Properties	0710–AB46	Proposed Rule Stage.
32	Natural Disaster Procedures: Preparedness, Response, and Recovery Activities of the Corps of Engineers.	0710–AA78	Final Rule Stage.
33	Credit Assistance for Water Resources Infrastructure Projects	0710–AB31	Completed Actions.
34	Revised Definition of ''Waters of the United States''; Conforming	0710–AB55	Completed Actions.
35	TRICARE Coverage of Clinical Trials and Termination of Expanded Access Treatments.	0720–AB83	Final Rule Stage.
36	Expanding TRICARE Access to Care in Response to the COVID–19 Pandemic	0720–AB85	Final Rule Stage.
37	Collection From Third Party Payers of Reasonable Charges for Healthcare Services; Amendment.	0720–AB87	Final Rule Stage.

DEPARTMENT OF EDUCATION

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage
38	Nondiscrimination on the Basis of Sex in Education Programs or Activities Receiving Federal Financial Assistance.	1870–AA16	Final Rule Stage.
39	Nondiscrimination on the Basis of Sex in Education Programs or Activities Receiving Federal Financial Assistance: Sex-Related Eligibility Criteria For Male and Female Athletic Teams.	1870–AA19	Final Rule Stage.
40	EDGAR Revisions	1875–AA14	Proposed Rule Stage.
41	Family Educational Rights and Privacy Act	1875–AA15	Proposed Rule Stage.
42	Student Loan Relief	1840–AD93	Proposed Rule Stage.
43	Gainful Employment	1840–AD57	Completed Actions.
44	Improving Income Driven Repayment	1840–AD81	Completed Actions.

DEPARTMENT OF ENERGY

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage
45	Clean Energy for New Federal Buildings and Major Renovations of Federal Buildings.	1904–AB96	Final Rule Stage.
46	Energy Conservation Standards for Consumer Water Heaters	1904–AD91	Final Rule Stage.
47	Coordination of Federal Authorizations for Electric Transmission Facilities	1901–AB62	Final Rule Stage.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage
48	Rulemaking on Discrimination on the Basis of Disability in Health and Human Services Programs or Activities.	0945–AA15	Proposed Rule Stage.
49	Proposed Modifications to the HIPAA Security Rule to Strengthen the Cybersecurity of Electronic Protected Health Information.	0945–AA22	Proposed Rule Stage.
50	Confidentiality of Substance Use Disorder Patient Records	0945–AA16	Final Rule Stage.
51	Nondiscrimination in Health Programs and Activities	0945–AA17	Final Rule Stage.
52	Safeguarding the Rights of Conscience as Protected by Federal Statutes	0945–AA18	Final Rule Stage.
53	Health and Human Services Grants Regulation	0945–AA19	Final Rule Stage.
54	Proposed Modifications to the HIPAA Privacy Rule to Support Reproductive Health Care Privacy.	0945–AA20	Final Rule Stage.
55	Establishment of Disincentives for Health Care Providers Who Have Committed Information Blocking.	0955–AA05	Proposed Rule Stage.
56	Control of Communicable Diseases; Foreign Quarantine	0920–AA75	Final Rule Stage.
57	Tobacco Product Standard for Nicotine Level of Certain Tobacco Products	0910–AI76	Proposed Rule Stage.
58	Front-of-Package Nutrition Labeling	0910–AI80	Proposed Rule Stage.
59	Medical Devices; Laboratory Developed Tests	0910–AI85	Proposed Rule Stage.
60	Nonprescription Drug Product With an Additional Condition for Nonprescription Use.	0910–AH62	Final Rule Stage.
61	Nutrient Content Claims, Definition of Term: Healthy	0910–AI13	Final Rule Stage.
62	Tobacco Product Standard for Characterizing Flavors in Cigars	0910–AI28	Final Rule Stage.
63	Standards for the Growing, Harvesting, Packing, and Holding of Produce for Human Consumption Relating to Agricultural Water.	0910–AI49	Final Rule Stage.
64	Tobacco Product Standard for Menthol in Cigarettes	0910–AI60	Final Rule Stage.
65	Countermeasures Injury Compensation Program: COVID–19 Countermeasures Injury Table.	0906–AB31	Proposed Rule Stage.
66	340B Drug Pricing Program; Administrative Dispute Resolution	0906–AB28	Final Rule Stage.
67	Healthcare System Resiliency and Modernization (CMS–3426)	0938–AU91	Proposed Rule Stage.
68	Appeal Rights for Certain Changes in Patient Status (CMS–4204)	0938–AV16	Proposed Rule Stage.
69	Contract Year 2025 Policy and Technical Changes to the Medicare Advantage, Medicare Prescription Drug Benefit, and Medicare Cost Plan Programs, and PACE (CMS–4205).	0938–AV24	Proposed Rule Stage.
70	Minimum Staffing Standards for Long-Term Care Facilities and Medicaid Institutional Payment Transparency Reporting (CMS–3442).	0938–AV25	Proposed Rule Stage.
71	Streamlining the Medicaid, CHIP, and BHP Application, Eligibility Determination, Enrollment, and Renewal Processes (CMS–2421).	0938–AU00	Final Rule Stage.
72	Short-Term, Limited-Duration Insurance; Independent, Noncoordinated Excepted Benefits Coverage; Level-Funded Plan Arrangements; and Tax Treatment of Certain Accident and Health Insurance (CMS–9904).	0938–AU67	Final Rule Stage.
73	Ensuring Access to Medicaid Services (CMS–2442)	0938–AU68	Final Rule Stage.
74	Coverage of Certain Preventive Services Under the Affordable Care Act (CMS–9903).	0938–AU94	Final Rule Stage.
75	Medicaid and Children's Health Insurance Program (CHIP) Managed Care Access, Finance, and Quality (CMS–2439).	0938–AU99	Final Rule Stage.
76	Disclosures of Ownership and Additional Disclosable Parties Information for Skilled Nursing Facilities and Nursing Facilities (CMS–6084).	0938–AU90	Long-Term Actions.
77	Hospital Outpatient Prospective Payment System: Remedy for 340B-Acquired Drugs Purchased in Cost Years 2018–2022 (CMS–1793).	0938–AV18	Completed Actions.
78	Strengthening Temporary Assistance for Needy Families (TANF) as a Safety Net Program.	0970–AC97	Proposed Rule Stage.
79	Employment and Training Services for Noncustodial Parents in the Child Support Services Program.	0970–AD00	Proposed Rule Stage.
80	Supporting the Head Start Workforce and Other Quality Improvements	0970–AD01	Proposed Rule Stage.
81	Safe and Appropriate Foster Care Placement Requirements for Titles IV–E and IV–B.	0970–AD03	Proposed Rule Stage.
82	Improving Child Care Access, Affordability, and Stability in the Child Care and Development Fund (CCDF).	0970–AD02	Final Rule Stage.
83	Separate Licensing Standards for Relative or Kinship Foster Family Homes	0970–AC91	Completed Actions.
84	Adult Protective Services Functions and Grant Programs	0985–AA18	Proposed Rule Stage.

DEPARTMENT OF HOMELAND SECURITY

Sequence No.	Title	Regulation Identifier No.	Rulemaking stage
85	Victims of Qualifying Criminal Activities; Eligibility Requirements for U Nonimmigrant Status and Adjustment of Status.	1615–AA67	Proposed Rule Stage.
86	Improving the Regulations Governing the Adjustment of Status to Lawful Permanent Residence and Related Immigration Benefits.	1615–AC22	Proposed Rule Stage.
87	Asylum Eligibility and Public Health	1615–AC57	Proposed Rule Stage.
88	Clarifying Definitions and Analyses for Fair and Efficient Asylum and Other Protection Determinations.	1615–AC65	Proposed Rule Stage.
89	Procedures for Asylum and Bars to Asylum Eligibility	1615–AC69	Proposed Rule Stage.
90	Modernizing H–1B Requirements and Oversight, Providing Flexibility in the F–1 Program, and Program Improvements Affecting Other Nonimmigrant Workers.	1615–AC70	Proposed Rule Stage.
91	Modernizing H–2 Program Requirements, Oversight, and Worker Protections	1615–AC76	Proposed Rule Stage.
92	Citizenship and Naturalization and Other Related Flexibilities	1615–AC80	Proposed Rule Stage.
93	U.S. Citizenship and Immigration Services Fee Schedule and Changes to Certain Other Immigration Benefit Request Requirements.	1615–AC68	Final Rule Stage.
94	Shipping Safety Fairways Along the Atlantic Coast	1625–AC57	Proposed Rule Stage.
95	Cybersecurity in the Marine Transportation System	1625–AC77	Proposed Rule Stage.

Introduction to the Fall 2023 Regulatory Plan

Executive Order 12866, issued in 1993, requires the annual production of a Unified Regulatory Agenda and Regulatory Plan. It does so in order to promote transparency—or in the words of the Executive Order itself, ''to have an effective regulatory program, to provide for coordination of regulations, to maximize consultation and the resolution of potential conflicts at an early stage, to involve the public and its State, local, and tribal officials in regulatory planning, and to ensure that new or revised regulations promote the President's priorities and the principles set forth in this Executive order.'' Executive Order 13563, issued in 2011, and Executive Order 14094, issued in 2023, reaffirmed and amended the requirements of Executive Order 12866.

We are now providing the Fall 2023 Regulatory Plan. The regulatory plans and agendas submitted by agencies and included here offer a window into how the Administration plans to continue delivering on the President's agenda to advance economic prosperity and equity, tackle the climate crisis, advance public health, and much more to improve the lives of the American people. Agencies will be continuing their work to implement landmark legislation passed during this Administration, including the implementation of the PACT Act, (Pub. L. 117–168); the Inflation Reduction Act, (Pub. L. 117–169); and the CHIPS and Science Act, (Pub. L. 117–167); as well as ongoing efforts to implement the Infrastructure Investment and Jobs Act (Bipartisan Infrastructure Law), Public Law 117–58. Agencies have also highlighted in their plans and agendas how they have engaged with the public in developing regulatory priorities, as well as future opportunities for engagement.

DEPARTMENT OF AGRICULTURE

Statement of Regulatory Priorities

In 2024, the U.S. Department of Agriculture (USDA) plans to prioritize initiatives that promote growth and new market opportunity in Rural America for our farmers, ranchers, small businesses, and communities, particularly among historically underserved communities, while implementing an expected new 5 year Farm Bill reauthorization for our major agricultural and food programs. USDA further anticipates a Farm Bill reauthorization as an opportunity to strengthen and improve our customer service and delivery combined with IT modernization that fosters 21st century innovation. USDA will use available outreach and communication tools to seek input and engagement from our traditional stakeholders as well as those communities whom we may not have been able to reach in the past but who, like our traditional stakeholders, offer critical implementation input and feedback. In short, we want to know what works, and what doesn't work, from everyone.

In 2024, USDA will seek and promote 21st century innovation initiatives like carbon capture and storage, addressing the effects of climate change such as drought and wildfire risks, and other climate-smart agriculture initiatives. As in the past, USDA will continue to tackle food and nutrition insecurity while maintaining a safe food supply and responding to any disaster and emergency threats impacting the American Farm economy, schools, individual households, and our National Forests. Finally, all of USDA's programs, including the priorities contained in this Regulatory Plan, will be structured to advance the cause of equity by removing barriers and opening new opportunities for our customers.

In 2023, the USDA:

Agricultural Marketing Service published the *Strengthening Organic Enforcement* (SOE) final rule (January 19, 2023, 88 FR 3548) that became effective on March 20, 2023. As required by the 2018 Farm Bill, SOE protects organic integrity and bolsters farmer and consumer confidence in the USDA organic seal by supporting strong organic control systems, improving farm to market traceability, increasing import oversight authority, and providing robust enforcement of the organic regulations. Topics addressed in this rulemaking include: National Organic Program Import Certificates; recordkeeping and product traceability; certifying agent personnel qualifications and training; standardized certificates of organic operation; unannounced on-site inspections of certified operations; oversight of certification activities; foreign conformity assessment systems; certification of producer group operations; labeling of nonretail containers; and, calculating organic content of multi-ingredient products.

Forest Service implemented a final rule on *Special Areas; Roadless Area Conservation; National Forest System Lands in Alaska* (January 27, 2023, 88 FR 5252) that repealed a final rule promulgated in 2020 exempting the Tongass National Forest from the 2001 Roadless Area Conservation Rule (2001 Roadless Rule). The 2001 Roadless Rule prohibited timber harvest and road construction or reconstruction within designated inventoried Roadless Areas, with limited exceptions. The rule is consistent with President Biden's Executive Order 13990, Protecting Public Health and the Environment and Restoring Science to Tackle the Climate Crisis.

In late 2023, the Forest Service plans to publish a proposed rule on Carbon Capture, Utilization, and Storage that would allow exclusive or perpetual right of use or occupancy of National Forest System lands that will allow for permanent carbon dioxide sequestration in order to reduce the impacts of climate

change. Furthermore, the Forest Service plans to publish a Financial Assurance for Locatable Minerals Interim Final rule that will allow equities and private investment-rated securities within trust funds as financial assurance for long-term post-closure obligations, which is crucial for the stewardship and restoration of National Forest System lands affected by mining. Finally, the Forest Service is making several updates to its directives that will strengthen its ability to combat climate change and improve access to, and delivery of, public programs and services by reducing administrative burden—including equitable access to recreation, mitigation of adverse impacts, climate resilience, and its Tribal action plan.

In late 2023, Food and Nutrition Service (FNS) plans to publish an interim final rule (December 2023) that codifies flexibility for rural program operators to provide non-congregate meal service in the Summer Food Service Program (SFSP) and establishes a permanent *Summer Electronic Benefits Transfer for Children Program (Summer EBT).* To gather information for this rulemaking, between April–August 2023, FNS hosted more than 100 listening sessions and information meetings with State agencies, advocacy groups, program operators, and industry partners. For more information about this rule, see RIN 0584–AE96.

In December 2023, FNS also plans to publish a final rule codifying the provisions of the *Access to Baby Formula Act of 2022.* Amongst other things, the rule codifies requirements for State agencies to include language in their Women, Infants and Children (WIC) infant formula rebate contracts that describes remedies in the event of an infant formula recall. This rule was informed by lessons learned and feedback received from State and local agencies, advocacy organizations, and Federal research on the response to recent disasters, the COVID–19 pandemic, and a major WIC product recall. For more information about this rule, see RIN 0584–AE94.

Outlined below are some of USDA's most important upcoming regulatory actions for 2024. These include efforts to restore and expand economic opportunity; address the climate crisis; and support agricultural markets that are free, open, and promote competition. This Regulatory Plan also reflects USDA's continued commitments to ensuring a safe and nutritious food supply and animal welfare protections. As always, our Semiannual Regulatory Agenda contains information on a broad-spectrum of USDA's initiatives and planned upcoming regulatory actions.

Foster Sustainable Economic Growth by Promoting Innovation, Building Resilience to Climate Change, and Expanding Renewable Energy

Higher Blends Infrastructure Incentive Program: Rural Business Cooperative Service (RBCS) Higher Blends Infrastructure Incentive Program (HBIIP): HBIIP is a program designed to increase the sales and use of higher blends of ethanol and biodiesel by expanding the infrastructure for renewable fuels derived from U.S. agricultural products. The program is also intended to encourage a more comprehensive approach to market higher blends by sharing the costs related to building out biofuel-related infrastructure. The program should increase availability of domestic biofuels and give Americans additional cleaner fuel options at the pump. RBCS is proposing a rule to codify the policies and procedures for the program in the Code of Federal Regulations, as this program has a significant impact on climate change which is an Administration priority. Public engagement will occur in early fall of 2023. A virtual listening session will be announced in the **Federal Register**. For more information about this rule, see RIN 0570–AB11.

Foster an Equitable and Competitive Marketplace for All Agricultural Producers

Inclusive Competition and Market Integrity Rules Under the Packers and Stockyards Act: USDA plans to supplement a recent revision to regulations under the Packers and Stockyards (P&S) Act to prohibit certain prejudices and disadvantages and unjustly discriminatory conduct against covered producers in the livestock, meat, and poultry markets. The proposal (October 3, 2022, 87 FR 60010) set forth prohibited discrimination on the bases of the producer's personal characteristics and identified as prohibited certain retaliatory practices that interfere with lawful communications, assertion of rights, and participation in associations, among other protected activities. The proposal also identified unlawfully deceptive practices that violate the P&S Act with respect to contract formation, contract performance, contract termination and contract refusal. The purpose of the final rule is to promote inclusive competition and market integrity in the livestock, meats, and poultry markets. For more information about this rule, see RIN 0581–AE05.

Unfair Practices, Undue Preferences, and Harm to Competition under the Packers and Stockyards Act: The proposal would revise regulations under the Packers and Stockyards Act (Act), providing clarity regarding conduct that may violate the Act, including addressing harm to competition. This proposal reflects feedback received from public input generated by previous proposed and interim final rules. On June 22, 2010, USDA published in the **Federal Register** (75 FR 35338–35354) a proposed rule recommending several changes to the regulations issued under the Packers and Stockyards Act, 1921, as amended (P&S Act). On December 20, 2016, USDA published a new ''Scope'' paragraph in the **Federal Register** as an Interim Final Rule ''IFR'' with a request for comments (81 FR 92566–92594). On October 18, 2017, USDA withdrew the IFR (82 FR 48594–01). Though neither of these proposed rules became a final rule, USDA received, reviewed, and considered public comments. For more information about this rule, see RIN 0581–AE04.

Provide All Americans Safe, Nutritious Food

USDA's Food Safety and Inspection Service (FSIS) continues to ensure that meat, poultry, and egg products are safe, wholesome and properly marked, labeled, and packaged, and prohibits the distribution in-commerce of meat, poultry, and egg products that are adulterated or misbranded.

Salmonella Framework: One of FSIS' top priorities is to develop a more comprehensive and effective strategy to reduce Salmonella illnesses associated with poultry products. The agency gathered data and information and solicited stakeholder input on Salmonella in poultry. FSIS proposed in 2023 to declare that not-ready-to- eat breaded stuffed chicken products that contain Salmonella at levels of 1 colony forming unit per gram or higher in the chicken components are adulterated within the meaning of the Poultry Products Inspection Act (April 28, 2023, 82 FR 26249) and will finalize this determination in 2024. FSIS also plans to propose a new regulatory framework targeted at reducing Salmonella illnesses associated with poultry products and moving closer to the national target of a 25 percent reduction in Salmonella illnesses. For more information about the proposed new regulatory framework, see RIN 0583–AD96.

In addition, FSIS intends to publish several rules to improve regulatory certainty, which assure consumers that

meat, poultry, and egg products are safe and truthfully labeled.

Voluntary Labeling of Meat Products With ''Product of USA'' and Similar Statements: FSIS plans to publish a final rule to address concerns that the voluntary ''Product of USA'' label claim may confuse consumers about the origin of FSIS regulated products. FSIS received 3,364 comments on the proposed rule during a 60-day comment period that FSIS extended to 90 days based on requests from stakeholders. In response to the Agency's consumer research and comments received on the proposed rule, FSIS will define voluntary U.S.-origin label claims so that they are more meaningful to consumers. For more information about this rule, see RIN 0583–AD87.

Labeling of Meat or Poultry Products Comprised of or Containing Cultured Animal Cells; and Revision of the Nutrition Facts Panels for Meat and Poultry Products and Updating Certain Reference Amounts Customarily Consumed: FSIS will propose to establish new requirements for the labeling of meat and poultry food products made using animal cell culture technology (*i.e.,* ''cell-cultured'' food products). In advance of the proposed rule, FSIS and FDA held a joint public meeting in October 2018 to discuss the potential hazards, oversight considerations, and labeling of cell-cultured food products derived from livestock and poultry tissue (September 13, 2018, 83 FR 46476). In addition, FSIS published an advanced notice of proposed rulemaking in the **Federal Register**, soliciting public input on the labeling of cell-cultured seafood, meat, and poultry food products (September 3, 2021, 86 FR 49491). FSIS also plans to finalize a labeling rule to update nutrition labeling for meat and poultry products. The two rules would provide additional certainty about what is required for meat and poultry labeling while ensuring that consumers have accurate information about the food they buy. For more information about these rules, see RINs 0583–AD56 and 0583–AD89.

FNS' Child Nutrition Programs: Revisions to Meal Patterns Consistent with the 2020 Guidelines for Americans: The final rule would revise meal patterns in the National School Lunch Program and School Breakfast Program to make school meals healthier and more consistent with the most recent Dietary Guidelines for Americans while reflecting the nutrient needs of children at risk for food insecurity. Throughout 2022, USDA held over 50 listening sessions with State agencies, school food authorities, advocacy organizations, Tribal dietitians and schools, professional associations, food manufacturers, and other Federal agencies to inform the proposed rule (February 7, 2023, 88 FR 8050). USDA also received extensive input through over 136,000 public comments on the proposed rule during a 60-day comment period that USDA extended to 90 days based on requests from stakeholders. Through this stakeholder engagement, USDA gained valuable insights into the successes and challenges that schools experience implementing the school meal nutrition standards and will use this information to develop a practical and durable final rule. For more information about this rule, see RIN 0584–AE88.

FNS' Special Supplemental Nutrition Program for Women, Infants and Children (WIC): Revisions in the WIC Food Packages: Consistent with recommendations from the National Academies of Sciences, Engineering, and Medicine and the latest Dietary Guidelines for Americans, the final rule would provide participants with greater choices in variety and food package sizes and align the WIC food packages with available nutrition science. When developing the proposed rule (November 21, 2022, 87 FR 71090), FNS solicited feedback from WIC participants, state and tribal partners, and other government agencies. FNSpublished the proposed rule with a 90-day comment period and will consider comments received in development of this final rule. For more information about this rule, see RIN 0584–AE82.

National Organic Program; Organic Livestock and Poultry Standards: The final rule would establish standards that support additional practice standards for organic livestock and poultry production. This final action would add provisions to the USDA organic regulations to address and clarify livestock and poultry living conditions (for example, outdoor access, housing environment and stocking densities), health care practices (for example physical alterations, administering medical treatment, euthanasia), and animal handling and transport to and during slaughter. For more information about this rule, see RIN 0581–AE06.

Improve Access to, and Delivery of, Public Programs and Services by Reducing Administrative Burden

Forest Service Amendment to Locatable Minerals: The locatable minerals regulations have remained mostly unchanged since they were first promulgated in 1974. Court cases, government audits, and implementation experience have identified many shortcomings in the current regulations that challenge the agency's ability to efficiently and effectively administer locatable mineral activity on National Forest System lands. The Forest Service is proposing to revise its regulations for administering hard-rock mining activities on National Forest System lands, providing permitting certainty; strong, responsible mining standards; enhanced community and Tribal engagement; and proactive environmental management. To gather public input into this proposed rule, it was preceded by a Locatable Minerals advance notice of proposed rulemaking (ANPR) (September 13, 2018, 83 FR 46451). Following the completion of the comment period for the ANPR, the Forest Service analyzed the comments received and used the information to draft the proposed regulation. For more information about this rule, see RIN: 0596–AD32.

USDA—AGRICULTURAL MARKETING SERVICE (AMS)

Proposed Rule Stage

1. Unfair Practices, Undue Preferences, and Harm to Competition Under the Packers and Stockyards Act (AMS–FTPP–21–0046) [0581–AE04]

Priority: Other Significant.
Legal Authority: 7 U.S.C. 181 to 229c
CFR Citation: 9 CFR 201.
Legal Deadline: None.
Abstract: This action proposes to revise regulations issued under the Packers and Stockyards Act (Act) (7 U.S.C. 181 229c), providing clarity regarding conduct that may violate the Act. Revisions are intended to support market growth, assure fair trade practices and competition, and protect livestock and poultry growers and producers. The action addresses long-standing issues related to competitiveness and showings of harm or likely harm to competition.

Statement of Need: Revisions to regulations pertaining to the Packers and Stockyards Act (Act) clarify the types of conduct by packers, swine contractors, or live poultry dealers that the Agricultural Marketing Service (AMS) considers unfair practices or undue preferences and a violation of sections 202(a) or 202(b) of the Act.

Sections 202(a) and 202(b) of the P&S Act are broadly written to prohibit unjustly practices and undue preferences. Industry members have complained that the regulations effectuating the Act are too vague and do not provide adequate clarity about

the types of conduct or action that are likely to violate theAct. This rule is needed to provide essential clarity about what would be considered violations of the Act.

Revisions to regulations pertaining to the Packers and Stockyards Act (Act) that would also clarify the scope of the Act are needed to establish what conduct or action, depending on their nature and the circumstances, violate the Act without a finding of harm or likely harm to competition or as they may relate to harm or likely harm to competition as such terms were contemplated under the Act. Such revisions reflect the Department of Agriculture's (USDA) longstanding position in this regard.

Summary of Legal Basis: The Packers and Stockyards Act (Act) authorizes AMS to determine if conduct within the poultry and livestock industries constitutes unfair practices or undue preferences and, therefore a violation of the Act.

The Act provides USDA with the authority to assure fair competition and trade practices and to safeguard farmers against receiving less than the true market value of their livestock. Sections 202(c), (d), and (e) of the Act limit the application of those sections to acts or practices that have an adverse effect on competition, such as acts restraining commerce, creating a monopoly, or producing another type of antitrust injury. However, provisions in sections 202(a) and (b) restrict practices that are deceptive, unfair, unjust, undue, and unreasonable; terms that are understood to encompass more than anticompetitive conduct. USDA's position is that Congress did not intend application of sections 202(a) and (b) to be limited to instances in which there is harm to competition.

Alternatives: USDA considered doing nothing. However, courts are not unanimous in their findings. Further, several courts disagree with USDA's position. Lack of clarity hinders the agency's ability to consistently administer and enforce the Act.

Anticipated Cost and Benefits: USDA estimate annual costs related to this rule of $9 million for the first five years, decreasing in subsequent years, for total ten-year costs of $66 million. We believe the primary benefit of the proposed regulation is the increased ability to protect producers and growers through enforcement of the Act for violations of section 202(a) and/or (b) that do not result in harm, or a likelihood of harm, to competition.

Risks: Courts have recognized that the proper analysis of alleged violations of these two sections depends on the facts of each case. However, four courts of appeals have disagreed with USDA's interpretation of the Act and have concluded that plaintiffs could not prove their claims under those sections without proving harm to competition or likely harm to competition. There is a risk if future legal challenge of USDA interpretation of sections 202(c), (d), and (e) of the Act.

USDA—AMS

Final Rule Stage

2. Inclusive Competition and Market Integrity Under the Packers and Stockyards Act (AMS–FTPP–21–0045) [0581–AE05]

Priority: Other Significant.

Legal Authority: 7 U.S.C. 181 to 229c

CFR Citation: 9 CFR 201.

Legal Deadline: None.

Abstract: This final rule would supplement a recent revision to regulations issued under the Packers and Stockyards Act (Act) (7 U.S.C. 181 229c) that provided criteria for the Secretary to consider when determining whether certain conduct or action by packers, swine contractors, or live poultry dealers is unduly or unreasonably or advantageous. Supplemental amendments clarify the conduct the Department considers unfair, preferential, unjustly discriminatory, or deceptive and a violation of sections 202(a) and (b) of the Act. The rule would also clarify the criteria and types of conduct that would be considered unduly or unreasonably preferential, advantageous, prejudicial, or disadvantageous and violations of the Act, including retaliatory practices that interfere with lawful communications, assertion of rights, and associational participation.

Statement of Need: Revisions to regulations pertaining to the Packers and Stockyards Act (Act) clarify the types of conduct by packers, swine contractors, or live poultry dealers that the Agricultural Marketing Service (AMS) considers unfair, unjustly discriminatory, or deceptive and a violation of section 202(a) of the Act, regardless of whether such action harms or is likely to harm competition. The rule also clarifies the criteria and/or types of conduct that would be considered unduly or unreasonably preferential, advantageous, prejudicial, or disadvantageous and a violation of section 202(b) of the Act.

Sections 202(a) and 202(b) of the P&S Act are broadly written to prohibit unjustly discriminatory practices and undue preferences and prejudices. Industry members have complained that the regulations effectuating the Act are too vague and do not provide adequate clarity about the types of conduct or action that are likely to violate the Act. This rule is needed to provide essential clarity about what would be considered violations of the Act, regardless of whether such violations harm or are likely to harm competition.

Summary of Legal Basis: The Packers and Stockyards Act (Act) authorizes AMS to determine if conduct within the poultry and livestock industries are unfair, unjustly discriminatory, or deceptive and, therefore a violation of the Act.

Alternatives: AMS considered taking no further action, allowing 100 years of case law to determine precedent in making determinations about whether certain behaviors violate the Act. AMS also considered revisiting the withdrawn 2016 rulemaking approach that would have identified criteria with which to determine whether certain behaviors violate the Act.

Anticipated Cost and Benefits: USDA estimates first-year costs associated with this rule to be $517 thousand, with decreased costs each year thereafter, resulting in a ten-year total cost of $2.88 million. AMS expects this rule to benefit all segments of the industry, providing greater clarity about what would be considered violations of the Act. AMS expects this rule, coupled with a concurrent rule on the scope of the Act, to strengthen enforcement of the Act, resulting in fairer and more competitive markets for producers and poultry growers.

Risks: Industry is divided about adding lists or examples of specific prohibited conduct to the regulations. Some argue such lists would inhibit freedom to forge contracts that fit individual situations, while others contend greater specificity is required so that affected parties can more readily identify violative behavior. Industry is also split on the question of whether

identified prohibited behaviors must be found to harm or likely harm competition to be considered violations of the Act. AMS expects to resolve some of the controversy by being proactive and transparent with the industry to allow for critical discussions and decisions on the rule.
