FEDERAL REGISTER

Vol. 89 Thursday,
No. 61 March 28, 2024

Pages 21431–22040

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 89 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register

Vol. 89, No. 61

Thursday, March 28, 2024

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

SMALL BUSINESS ADMINISTRATION

13 CFR Part 125

RIN 3245–AH70

Ownership and Control and Contractual Assistance Requirement for the 8(a) Business Development Program; Correction

AGENCY: Small Business Administration.

ACTION: Correcting amendment.

SUMMARY: This document corrects a technical error in the definition of substantial bundling that appeared in the **Federal Register** on April 27, 2023, a final rule entitled, ''Ownership and Control and Contractual Assistance Requirements for the 8(a) Business Development Program.'' The definition of substantial bundling, as it relates to Blanket Purchase Agreements (BPAs), improperly limited substantial bundling to BPAs entered against a U.S. General Services Administration (GSA) Schedule Contract. This notice removes that limitation so that the definition of substantial bundling applies to all BPAs and not only BPAs entered against GSA Schedule Contracts.

DATES: Effective March 28, 2024.

FOR FURTHER INFORMATION CONTACT: Sam Le at (202) 619–1789 or *sam.le@sba.gov.*

SUPPLEMENTARY INFORMATION:

I. Summary of Errors

This technical correction amends the definition of substantial bundling in the U.S. Small Business Administration's (SBA's) regulations at 13 Code of Federal Regulations (CFR) 125.1. The definition of substantial bundling, as previously published on page 26210 of FR Doc. 2023–07855, mistakenly limited the scope of substantial bundling, with respect to BPAs, to apply only to BPAs entered against GSA Schedule Contracts, as authorized by Federal Acquisition Regulations (FAR) subpart 8.4. BPAs, however, may be entered in other contexts aside from GSA Schedule Contracts, including as authorized by simplified acquisition procedures at section 13.303 of the FAR.

The SBA did not intend to limit the application of the substantial bundling definition only to BPAs entered against GSA Schedule Contracts. This is clear from the preamble to SBA's final rule, published at pages 26188–26189 of 88 FR 26164, which reads, ''SBA agrees that the consolidation and bundling requirements should apply to BPAs established with more than one supplier or a single firm and to both BPAs established under FAR Part 8 or Part 13 procedures.'' Furthermore, the definition of bundling, as defined in the same final rule that is at issue, applies to BPAs without any specification for whether those BPAs are issued against a GSA Schedule contract or in accordance with simplified acquisition procedures. Based on the clear intent in the preamble and the already established definition of bundling, SBA amends the definition of substantial bundling to remove the reference to GSA Schedule contracts for BPAs impacted by substantial bundling.

II. Waiver of Proposed Rulemaking and Waiver of the Delay in Effective Date

Under the Administrative Procedure Act (APA) (5 U.S.C. 551, *et seq.*), while a notice of proposed rulemaking and an opportunity for public comment is generally required before the promulgation of regulations, this is not required when an agency, for good cause, finds that notice and public comment are impracticable, unnecessary, or contrary to the public interest and incorporates a statement of the reasons for that finding in the document. The APA also generally requires that a final rule be effective no sooner than 30 days after the date of publication in the **Federal Register**, though an agency may also waive this requirement for good cause found.

Sections 553(b)(B) and 553(d)(3) of the APA provide the exceptions from the APA notice and comment and delay in effective date requirements. Section 553(b)(B) of the APA authorizes an agency to dispense with normal notice and comment rulemaking procedures when the agency finds, for good cause, that the notice and comment process is impracticable, unnecessary, or contrary to the public interest. Additionally, the agency must state that conclusion and the supporting rationale in the rule. Similarly, section 553(d)(3) of the APA allows the agency to waive the 30-day delay in effective date where good cause is found and the agency includes that conclusion and the supporting rationale in the rule.

The SBA is publishing this technical correction without advance notice or an opportunity for comment because it falls under the ''good cause'' exception of the APA, 5 U.S.C. 553(b)(B). This document corrects technical errors made in the final rule, which was published in accordance with the APA after the SBA proposed the rule and provided the public with an opportunity to comment on the proposal. The correction contained in this document does not make any substantive changes to the policies adopted in the final rule and explained in the preamble. This document makes a technical correction within the regulation text to align the definition of substantial bundling with the already published definition of bundling and for consistency with the policy discussion of the substantial bundling definition in the preamble to the final rule. The policy discussion explained that the substantial bundling definition would apply to all BPAs and not just those awarded against GSA Schedule Contracts, as supported by the public comments received. Therefore, the SBA finds good cause to conclude that it is impracticable, unnecessary, and contrary to the public interest to undertake further notice and comment procedures to incorporate this correction.

The SBA is also waiving the 30-day delay in effective date for this correction. It is in the public interest to ensure that the final rules setting forth the definition of substantial bundling be accurate so that agencies and small businesses are aware of when a procurement action falls within that definition such that the agency prepares the necessary justification and completes the required analyses and assessments to maximize small business participation to the extent possible. If the definition of substantial bundling remains improperly limited in its application due to the technical oversight in the definition, there is potential for small businesses to lose the opportunity to protest procurement actions that were not properly documented to support substantial

bundling. The SBA finds that delaying the effective date of this correction would be contrary to the public interest. In doing so, the SBA finds good cause to waive the 30-day delay in the effective date.

List of Subjects in 13 CFR Part 125

Government contracts, Government procurement, Reporting and recordkeeping requirements, Small businesses, Technical assistance, Veterans.

For the reasons stated above, 13 CFR part 125 is corrected by making the following correcting amendments:

PART 125—GOVERNMENT CONTRACTING PROGRAMS

■ 1. The authority citation for part 125 continues to read as follows:

Authority: 15 U.S.C. 632(p), (q), 634(b)(6), 637, 644, 657(b), 657(f), 657r, and 657s.

■ 2. Amend § 125.1 by revising the definition of ''Substantial bundling'' to read as follows:

§ 125.1 What definitions are important to SBA's Government Contracting Programs?

* * * * *

Substantial bundling means any bundling that meets or exceeds the following dollar amounts (if the acquisition strategy contemplates multiple award contracts, orders placed under unrestricted multiple award contracts, or a Blanket Purchase Agreement or a task or delivery order contract awarded by another agency, these thresholds apply to the cumulative estimated value of the Multiple Award Contracts, orders, or Blanket Purchase Agreement, including options):

(1) $8.0 million or more for the Department of Defense;

(2) $6.0 million or more for the National Aeronautics and Space Administration, the General Services Administration, and the Department of Energy; and

(3) $2.5 million or more for all other agencies.

Larry Stubblefield,

Deputy Associate Administrator, Office of Government Contracting and Business Development.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2023–1805; Project Identifier AD–2023–00019–T; Amendment 39–22695; AD 2024–05–04]

RIN 2120–AA64

Airworthiness Directives; Gulfstream Aerospace Corporation Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2020–23–04, which applied to certain Gulfstream Aerospace Corporation Model GVII–G500 and GVII–G600 airplanes. AD 2020–23–04 required revising the existing airplane flight manual (AFM) and airplane maintenance manual (AMM) to include information pertaining to the fuel boost pump. This AD was prompted by a report of misassembled impellers on the shaft of the fuel boost pump during production. This AD retains the requirements of AD 2020–23–04 and requires inspecting affected fuel boost pumps for proper installation of the impeller shaft key, marking affected fuel boost pumps that pass that inspection, and replacing fuel boost pumps that fail. This AD also limits the installation of affected fuel boost pumps. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective May 2, 2024.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of May 2, 2024.

The Director of the Federal Register approved the incorporation by reference of certain other publications listed in this AD as of November 24, 2020 (85 FR 71232, November 9, 2020).

ADDRESSES:

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2023–1805; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

For information on the availability of this material at the FAA, call 206–231–3195. It is also available at *regulations.gov* under Docket No. FAA–2023–1805.

FOR FURTHER INFORMATION CONTACT:
Jared Meyer, Aviation Safety Engineer, FAA, 1701 Columbia Avenue, College Park, GA 30337; phone: 404–474–5534; email: *9-ASO-ATLACO-ADs@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2020–23–04, Amendment 39–21320 (85 FR 71232, November 9, 2020) (AD 2020–23–04). AD 2020–23–04 applied to certain Gulfstream Aerospace Corporation Model GVII–G500 and GVII–G600 airplanes. The NPRM published in the **Federal Register** on September 5, 2023 (88 FR 60606). The NPRM was prompted by a report of misassembled impellers on the shaft of the fuel boost pump during production. In the NPRM, the FAA proposed to continue to require revising the existing AFM and AMM to include information pertaining to the fuel boost pump. The NPRM also proposed to require inspecting affected fuel boost pumps for proper installation of the impeller shaft key, marking affected fuel boost pumps that pass that inspection, and replacing fuel boost pumps that fail. The NPRM also proposed to limit installation of affected fuel boost pumps. The FAA is issuing this AD to prevent the ignition of flammable vapors in the fuel tank as a result of frictional heating or sparks caused by a missing, misplaced, or dislodged impeller shaft key inside the fuel boost pump. The unsafe condition, if not addressed, could result in a potential source of ignition in the fuel tank and consequent fire or explosion.

Discussion of Final Airworthiness Directive

Comments

The FAA received a comment from an anonymous commenter who supported the NPRM without change.

The FAA received additional comments from Gulfstream Aerospace Corporation (Gulfstream). The following

presents the comments received on the NPRM and the FAA's response to each comment.

Request To Change the Maintenance Manual Version

Gulfstream requested that the FAA change the maintenance manual revision dates specified in paragraph (g) of the proposed AD to refer to subsequent dates. Gulfstream stated that GVII–G600 Maintenance Manual 28–26–04 Fuel Boost Pump-Removal/Installation Procedure, dated August 31, 2020, was revised March 31, 2023, to include non-technical changes (including the use of puller tool to reduce risk of damage to Fuel Boost Pump (FBP) during removal with a caution note to avoid excess force when removing FBP and a step to record FBP serial number to determine serviceability). Gulfstream also stated that GVII–G500 Maintenance Manual 12–13–01 Defueling Procedure-Defuel, dated August 31, 2020, and GVII–G600 Maintenance Manual 12–13–01 Defueling Procedure-Defuel, dated August 31, 2020, were revised on September 30, 2023, due to an administrative error.

The FAA agrees with the request. The revised defueling procedure requested by Gulfstream is acceptable because it instructs fuel boost pump maintenance to be performed in a way that addresses the unsafe condition and it prevents damage to the parts being removed/installed. The FAA has revised paragraphs (g)(1)(i), (ii), (iii), and (v) of this AD accordingly.

Request To Change Paragraph (i) of the Proposed AD

Gulfstream requested that the compliance time in paragraph (i) of the proposed AD be revised from ''replacing the pump before further flight'' to ''replacing the pump following the completion of the CB [customer bulletin] before further flight.'' Gulfstream reported the statement ''this AD requires replacing the pump before further flight in accordance with the requirements of paragraph (h) of this AD'' in paragraph (i) of the proposed AD could be misleading. Gulfstream stated it believes this statement could be misunderstood by operators to mean that the AD immediately grounds their aircraft.

The FAA agrees with the commenter that paragraph (i) of this AD should be revised to clarify the intent of this AD. Operators have 24 months to comply with all applicable actions required by paragraph (h) of this AD. The FAA has revised paragraph (i) of this AD by removing the reference to ''before further flight'' and specifying that where the service information says to return a pump, this AD requires that the pump must be replaced.

Request for Removing GVII–G500 AFM

Gulfstream requested removing reference to ''Gulfstream Aerospace GVII–G500 Airplane Flight Manual Supplement No. GVII–G500–2020–06, dated September 8, 2020,'' from paragraph (g)(2)(ii) of the proposed AD; Gulfstream stated there are no GVII–G500 airplanes in this configuration, all aircraft have been updated to GVII Block 1 software configuration, therefore this reference to the airplane flight manual supplement is not applicable.

The FAA has confirmed with Gulfstream that Gulfstream Aerospace GVII–G500 Airplane Flight Manual Supplement No. GVII–G500–2020–06, dated September 8, 2020, is no longer applicable to the existing fleet. However, Gulfstream Aerospace GVII–G500 Airplane Flight Manual Supplement No. GVII–G500–2020–06, dated September 8, 2020, is retained in this AD. Operators may have previously complied with paragraph (g)(2)(ii) of AD 2020–23–04 using GVII–G500 Airplane Flight Manual Supplement No. GVII–G500–2020–06, dated September 8, 2020. Therefore, to provide credit to operators who have already complied with the service information and reduce the need for alternative method of compliance (AMOC) requests, the FAA has determined that this AD should include reference to GVII–G500 Airplane Flight Manual Supplement No. GVII–G500–2020–06, dated September 8, 2020. No changes have been made to this AD in this regard.

Conclusion

The FAA reviewed the relevant data, considered any comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. Except for minor editorial changes, and any other changes described previously, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Related Service Information Under 1 CFR Part 51

The FAA reviewed Gulfstream GVII–G500 Customer Bulletin No. 069 and Gulfstream GVII–G600 Customer Bulletin No. 037, both Revision A, both dated February 2, 2023. This service information specifies procedures for inspecting affected fuel boost pumps for proper installation of the impeller shaft key, marking affected fuel boost pumps that pass that inspection, and replacing fuel boost pumps that fail. These documents are distinct since they apply to different airplane models.

The FAA also reviewed the following AMM documents, which contain revised maintenance procedures pertaining to the fuel boost pump. These documents are distinct since they apply to different airplane models.

- 12–13–01 Defueling Procedure-Defuel, 12–13 Fueling and Defueling Operations Replenishing, Chapter 12—Servicing, Gulfstream Aerospace GVII–G500 Aircraft Maintenance Manual, Document Number GAC–AC–GVII–G500–AMM–0001, Revision 16, dated November 30, 2023.
- 12–13–01 Defueling Procedure-Defuel, 12–13 Fueling and Defueling Operations Replenishing, Chapter 12—Servicing, Gulfstream Aerospace GVII–G600 Aircraft Maintenance Manual, Document Number GAC–AC–GVII–G600–AMM–0001, Revision 12, dated November 30, 2023.
- 28–26–04 Fuel Boost Pump-Prime, 28–26 Engine and APU Fuel Delivery, Chapter 28—Fuel, Gulfstream Aerospace GVII–G500 Aircraft Maintenance Manual, Document Number GAC–AC–GVII–G500–AMM–0001, Revision 16, dated November 30, 2023.
- 28–26–04 Fuel Boost Pump-Removal/Installation, 28–26 Engine and APU Fuel Delivery, Chapter 28—Fuel, Gulfstream Aerospace GVII–G600 Aircraft Maintenance Manual, Document Number GAC–AC–GVII–G600–AMM–0001, Revision 12, dated November 30, 2023.

This AD also requires the following Gulfstream service information, which the Director of the Federal Register approved for incorporation by reference as of November 24, 2020 (85 FR 71232, November 8, 2020). (Although the maintenance manual documents have the watermarked words ''advance copy'' on each page of the document, these are not advance draft copies but final versions of temporary revisions to the AMM, pending incorporation into the AMM at the next revision.)

- Gulfstream Aerospace GVII–G500 Airplane Flight Manual Supplement No. GVII–G500 (Issue 1)—2020–05, dated September 8, 2020.
- Gulfstream Aerospace GVII–G500 Airplane Flight Manual Supplement No. GVII–G500–2020–06, dated September 8, 2020.
- Gulfstream Aerospace GVII–G600 Airplane Flight Manual Supplement No. GVII–G600–2020–06 dated September 8, 2020.

• GVII–G500 Maintenance Manual 12–13–01 Defueling Procedure-Defuel, dated August 31, 2020.

• GVII–G500 Maintenance Manual 28–26–04 Fuel Boost Pump-Prime, dated August 31, 2020.

• GVII–G600 Maintenance Manual 12–13–01 Defueling Procedure-Defuel, dated August 31, 2020.

• GVII–G600 Maintenance Manual 28–26–04 Fuel Boost Pump-Prime, dated August 31, 2020.

• GVII–G600 Maintenance Manual 28–26–04 Fuel Boost Pump-Removal/Installation, dated August 31, 2020.

• GVII–G600 Maintenance Manual 28–26–05 Fuel Boost Pump Canister-Removal/Installation, dated August 31, 2020.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in **ADDRESSES**.

Costs of Compliance

The FAA estimates that this AD affects 89 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Incorporate information into AMM and AFM (retained actions from AD 2020–23–04).	2 work-hours × $85 per hour = $170	$0	$170	$15,130
Impeller shaft key inspection (new action)	36 work-hours × $85 per hour = $3,060.	0	3,060	272,340

The FAA estimates the following costs to do any necessary part marking and fuel boost pump replacements that would be required based on the results of the inspection for proper installation. The FAA has no way of determining the number of aircraft that might need these actions:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Part marking	0.5 work-hour × $85 per hour = $42.50	$10	$52.50
Fuel pump replacement (per fuel boost pump)	10 work-hours × $85 per hour = $850	106,706	107,556

The FAA has included all known costs in its cost estimate. According to the manufacturer, however, some or all of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected operators.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a "significant regulatory action" under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2020–23–04, Amendment 39–21320 (85 FR 71232, November 9, 2020); and

■ b. Adding the following new AD:

2024–05–04 Gulfstream Aerospace Corporation: Amendment 39–22695; Docket No. FAA–2023–1805; Project Identifier AD–2023–00019–T.

(a) Effective Date

This airworthiness directive (AD) is effective May 2, 2024.

(b) Affected ADs

This AD replaces AD 2020–23–04, Amendment 39–21320 (85 FR 71232, November 9, 2020) (AD 2020–23–04).

(c) Applicability

This AD applies to the Gulfstream Aerospace Corporation airplanes, certificated in any category, identified in paragraphs (c)(1) and (2) of this AD.

(1) Model GVII–G500 airplanes, serial numbers (S/Ns) 72001 and subsequent.

(2) Model GVII–G600 airplanes, S/Ns 73001 and subsequent.

(d) Subject

Air Transport Association (ATA) of America Code 2822, Fuel Boost Pump.

(e) Unsafe Condition

This AD was prompted by a report of misassembled impellers onto the shaft of the fuel boost pump during production. The FAA is issuing this AD to prevent the ignition of flammable vapors in the fuel tank as a result of frictional heating or sparks caused by a missing, misplaced, or dislodged impeller shaft key inside the fuel boost pump. The unsafe condition, if not addressed, could result in a potential source of ignition in the fuel tank and consequent fire or explosion.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Manual Updates, With Updated Service Information

This paragraph restates the requirements of paragraph (g) of AD 2020–23–04, with updated service information. For Model GVII–G500 airplane S/Ns 72001 and 72007 through 72062 inclusive; and Model GVII–G600 airplane S/Ns 73002, 73004, 73006 through 73040 inclusive, 73042, and 73043: Within 14 days after November 24, 2020 (the effective date of AD 2020–23–04), do the actions in paragraphs (g)(1) through (3) of this AD, as applicable.

(1) Revise your existing airplane maintenance manual (AMM) by replacing the procedures listed in paragraphs (g)(1)(i) through (vi) of this AD, as applicable for your model airplane.

(i) GVII–G500 Maintenance Manual 12–13–01 Defueling Procedure-Defuel, dated August 31, 2020; or 12–13–01 Defueling Procedure-Defuel, 12–13 Fueling and Defueling Operations Replenishing, Chapter 12—Servicing, Gulfstream Aerospace GVII–G500 Aircraft Maintenance Manual, Document Number GAC–AC–GVII–G500–AMM–0001, Revision 16, dated November 30, 2023.

(ii) GVII–G500 Maintenance Manual 28–26–04 Fuel Boost Pump-Prime, dated August 31, 2020; or 28–26–04 Fuel Boost Pump-Prime, 28–26 Engine and APU Fuel Delivery, Chapter 28—Fuel, Gulfstream Aerospace GVII–G500 Aircraft Maintenance Manual, Document Number GAC–AC–GVII–G500–AMM–0001, Revision 16, dated November 30, 2023.

(iii) GVII–G600 Maintenance Manual 12–13–01 Defueling Procedure-Defuel, dated August 31, 2020; or 12–13–01 Defueling Procedure-Defuel, 12–13 Fueling and Defueling Operations Replenishing, Chapter 12—Servicing, Gulfstream Aerospace GVII–G600 Aircraft Maintenance Manual, Document Number GAC–AC–GVII–G600–AMM–0001, Revision 12, dated November 30, 2023.

(iv) GVII–G600 Maintenance Manual 28–26–04 Fuel Boost Pump-Prime, dated August 31, 2020.

(v) GVII–G600 Maintenance Manual 28–26–04 Fuel Boost Pump-Removal/Installation, dated August 31, 2020; or 28–26–04 Fuel Boost Pump-Removal/Installation, 28–26 Engine and APU Fuel Delivery, Chapter 28—Fuel, Gulfstream Aerospace GVII–G600 Aircraft Maintenance Manual, Document Number GAC–AC–GVII–G600–AMM–0001, Revision 12, dated November 30, 2023.

(vi) GVII–G600 Maintenance Manual 28–26–05 Fuel Boost Pump Canister-Removal/Installation, dated August 31, 2020.

(2) Revise your existing airplane flight manual (AFM) by including in the AFM the airplane flight manual supplement (AFMS) listed in paragraph (g)(2)(i), (ii), or (iii) of this AD that is applicable to your model airplane. Using a later AFM revision with information identical to that contained in the AFMS specified for your airplane is acceptable for compliance with the requirement of this paragraph.

(i) Gulfstream Aerospace GVII–G500 Airplane Flight Manual Supplement No. GVII–G500 (Issue 1)—2020–05, dated September 8, 2020; or

(ii) Gulfstream Aerospace GVII–G500 Airplane Flight Manual Supplement No. GVII–G500–2020–06, dated September 8, 2020; or

(iii) Gulfstream Aerospace GVII–G600 Airplane Flight Manual Supplement No. GVII–G600–2020–06, dated September 8, 2020.

(3) The action required by paragraph (g)(2) of this AD may be performed by the owner/operator (pilot) holding at least a private pilot certificate and must be entered into the aircraft records showing compliance with this AD in accordance with 14 CFR 43.9(a)(1) through (4), and 14 CFR 91.417(a)(2)(v). The record must be maintained as required by 14 CFR 91.417, 121.380, or 135.439.

(h) New Requirements

For Model GVII–G500 airplane S/Ns 72001 and 72007 through 72062 inclusive; and Model GVII–G600 airplane S/Ns 73002, 73004, 73006 through 73040 inclusive, 73042, and 73043: Except as specified in paragraph (i) of this AD, within 24 months after the effective date of this AD, do all actions specified in paragraph III.D. and all applicable actions identified as ''RC'' (required for compliance) in, and in accordance with, the Accomplishment Instructions of Gulfstream GVII–G500 Customer Bulletin No. 069 or Gulfstream GVII–G600 Customer Bulletin No. 037, both Revision A, both dated February 2, 2023, as applicable.

Note 1 to paragraph (h): The serial number on the aft exterior of the pump is not the pump serial number.

Note 2 to paragraph (h): Guidance on pump removal and installation procedures can be found in Gulfstream Aerospace GVII–G500 Aircraft Maintenance Manual, Document Number GAC–AC–GVII–G500–AMM–0001, Revision 12, dated June 15, 2022; and Gulfstream Aerospace GVII–G600 Aircraft Maintenance Manual, Document Number GAC–AC–GVII–G600–AMM–0001, Revision 8, dated June 15, 2022.

(i) Service Information Exception

Where Gulfstream GVII–G500 Customer Bulletin No. 069 and Gulfstream GVII–G600 Customer Bulletin No. 037, both Revision A, both dated February 2, 2023, specify to return any pump for repair, this AD requires replacing the pump in accordance with the applicable service information identified in paragraph (h) of this AD.

(j) Terminating Action for Paragraph (g) of This AD

The requirements of paragraph (g) of this AD are terminated if all applicable actions required by paragraph (h) of this AD have been accomplished.

(k) Parts Installation Limitation

As of the effective date of the AD, no person may install on any airplane a fuel boost pump having a part and serial number specified in Table 1 of Gulfstream GVII–G500 Customer Bulletin No. 069 or Gulfstream GVII–G600 Customer Bulletin No. 037, both Revision A, both dated February 2, 2023, as applicable, unless that pump is marked with the letter ''C'' to the right of the ''INSP'' legend on the pump data area.

(l) Credit for Previous Actions

This paragraph provides credit for the actions specified in paragraph (h) of this AD, if those actions were performed before the effective date of this AD using the service information identified in paragraphs (l)(1) and (2) of this AD, as applicable. This service information is not incorporated by reference in this AD.

(1) Gulfstream GVII–G500 Customer Bulletin No. 069, dated October 19, 2022.

(2) Gulfstream GVII–G600 Customer Bulletin No. 037, dated October 19, 2022.

(m) Alternative Methods of Compliance (AMOCs)

(1) The Manager, East Certification Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (n)(1) of this AD.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) AMOCs approved for AD 2020–23–04 are approved as AMOCs for the corresponding provisions of this AD.

(4) For service information that contains steps that are labeled as Required for Compliance (RC), the provisions of paragraphs (m)(4)(i) and (ii) of this AD apply.

(i) The steps labeled as RC, including substeps under an RC step and any figures identified in an RC step, must be done to comply with the AD. An AMOC is required for any deviations to RC steps, including substeps and identified figures.

(ii) Steps not labeled as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the RC steps, including substeps and identified figures, can

still be done as specified, and the airplane can be put back in an airworthy condition.

(n) Related Information

(1) For more information about this AD, contact Jared Meyer, Aviation Safety Engineer, FAA, 1701 Columbia Avenue, College Park, GA 30337; phone: 404–474–5534; email: *9-ASO-ATLACO-ADs@faa.gov.*

(2) Service information identified in this AD that is not incorporated by reference is available at the address specified in paragraph (o)(5) of this AD.

(o) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(3) The following service information was approved for IBR on May 2, 2024.

(i) Gulfstream GVII–G500 Customer Bulletin No. 069, Revision A, dated February 2, 2023.

(ii) Gulfstream GVII–G600 Customer Bulletin No. 037, Revision A, dated February 2, 2023.

AGENCY: National Archives and Records Administration (NARA).

ACTION: Direct final rule.

SUMMARY: The National Archives and Records Administration (NARA) is removing provisions in established regulations that cover special concerns for digital photographs. This revision is necessary because recent amendments create new and more specific requirements for digitizing permanent photographic prints. The recent amendments do not address digitized negatives and slides, therefore requirements for managing these formats have been revised and retained in the existing regulations.

DATES: This rule is effective May 28, 2024 without further action, unless adverse comment is received by April 29, 2024. If adverse comment is received, NARA will publish a timely withdrawal of the rule in the **Federal Register**.

The incorporation by reference of certain material listed in the rule was approved by the Director of the Federal Register as of November 2, 2009.

ADDRESSES: You may submit comments on this rule, identified by RIN 3095–AC17, by any of the following methods:

Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

Email: Regulation_comments@nara.gov. Include RIN 3095–AC17 in the subject line of the message.

Mail (for paper, disk, or CD–ROM submissions): Send comments to Regulation Comments Desk (External Policy Program, Strategy & Performance Division (MP)); Suite 4100; National Archives and Records Administration; 8601 Adelphi Road, College Park, MD 20740–6001.

Hand Delivery or Courier: Deliver comments to the front desk at 8601 Adelphi Road, College Park, MD, addressed to: Regulations Comments Desk, External Policy Program; Suite 4100.

FOR FURTHER INFORMATION CONTACT: Edward Germino, Strategy and Performance Division, by email at *regulation_comments@nara.gov,* or by telephone at 301–837–3758. Contact *rmstandards@nara.gov* with any questions on records management standards and policy.

SUPPLEMENTARY INFORMATION:

Background

Digital photographs play a vital role in modern recordkeeping and NARA has been actively involved in creating guidelines for their preservation. The changes we made in May 2023 to 36 CFR part 1236 subpart E (88 FR 28410, May 4, 2023) supersede the requirements for digitizing permanent photographic prints in § 1237.28(d).

Therefore, NARA is removing the provisions of § 1237.28(d) relating to scanned digital images of photographic prints. Section 1237.28(d) now refers to part 1236 subpart E for digitizing photographic prints. Because NARA does not yet have standards for digitizing negatives and slides, we have retained § 1237.28(d) and limited its scope to apply only to records in these formats.

Once our revision of § 1237.28(d) is complete, agencies and contractors must follow the provisions outlined in part 1236 subpart E and the instructions in other relevant sections of part 1236 for digitizing photographic prints. These provisions cover various aspects such as scheduling and transfer, selection of image management software and hardware, digital image storage strategies, quality control for scanned digital images, inspection and preservation of born-digital images, record set designation, organization of digital images, documentation requirements, and creation of finding aids. Agencies and contractors are encouraged to consult the appropriate NARA guidance and resources for detailed instructions and help in implementing these management practices.

Regulatory Analysis

Executive Order 12866, Regulatory Planning and Review, and Executive Order 13563, Improving Regulation and Regulation Review

The Office of Management and Budget (OMB) has reviewed this rulemaking and determined it is not ''significant'' under section 3(f) of Executive Order 12866. It is not significant because it applies only to Federal agencies, updates the regulations due to a statutory requirement, only clarifies requirements that agencies already have to follow, and does not establish a new program. The requirements are necessary to comply with statute and to ensure agencies are appropriately preserving records.

Regulatory Flexibility Act (5 U.S.C. 601, et seq.)

This review requires an agency to prepare an initial regulatory flexibility analysis and publish it when the agency publishes the proposed rule. This requirement does not apply if the agency certifies that the rulemaking will not, if promulgated, have a significant economic impact on a substantial number of small entities (5 U.S.C. 603). We certify, after review and analysis, that this rulemaking will not have a significant adverse economic impact on small entities.

Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.)

The Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501, *et seq.*) requires that agencies consider the impact of paperwork and other information collection burdens imposed on the public and, under the provisions of PRA section 3507(d), obtain approval from OMB for each collection of information we conduct, sponsor, or require through regulations. This rulemaking does not impose additional information collection requirements on the public that are subject to the Paperwork Reduction Act.

Executive Order 13132, Federalism

Executive Order 13132 requires agencies to ensure State and local officials have the opportunity for meaningful and timely input when developing regulatory policies that may have a substantial, direct effect on the states, on the relationship between the Federal Government and the states, or on the distribution of power and responsibilities among the various levels of government. If the effects of the rule on State and local governments are substantial, the agency must prepare a Federal assessment to assist senior policymakers. This rulemaking will not have any effects on State and local governments within the meaning of the E.O. Therefore, no federalism assessment is required.

Unfunded Mandates Reform Act (Sec. 202, Pub. L. 104–4; 2 U.S.C. 1532)

The Unfunded Mandates Reform Act requires that agencies determine whether any Federal mandate in the rulemaking may result in State, local, and Tribal governments, in the aggregate, or the private sector, expending $100 million in any one year. NARA certifies that this rulemaking does not contain a Federal mandate that may result in such an expenditure.

Materials Incorporated by Reference

The following standards appear in the amendatory text of this document and were previously approved for the locations in which they appear: ANSI/AIIM TR34; ISO 2859–1.

List of Subjects in 36 CFR 1237

Archives and records, Digital photographs, Digital records, Incorporation by reference, Records management.

For the reasons discussed in the preamble, NARA amends 36 CFR part 1237 as follows:

PART 1237—AUDIOVISUAL, CARTOGRAPHIC, AND RELATED RECORDS MANAGEMENT

■ 1. The authority citation for part 1237 continues to read as follows:

Authority: 44 U.S.C. 2904 and 3101.

§ 1237.3 [Amended]

■ 2. Amend § 1237.3 by removing and reserving paragraph (e)(1).

■ 3. Amend § 1237.28 by revising paragraph (d) to read as follows:

§ 1237.28 What special concerns apply to digital photographs?

* * * * *

(d)(1) When digitizing permanent or unscheduled slides and negatives, agencies must document the quality control inspection process used during the digitization process.

(i) Conduct a visual inspection of a sample of the scanned images to identify any defects. Additionally, evaluate the accuracy of finding aids, and verify the integrity of file header information and file names.

(ii) The sample size must be large enough to yield statistically valid results. To determine the appropriate sample size, use one of the quality sampling methods outlined in ANSI/AIIM TR34 (incorporated by reference, see § 1237.3). Agencies may consult ISO 2859–1:1996 for further guidance (contact NARA's textual research room or NARA's Regulation Comments Desk, see § 1237.3(a), for availability).

(2) When digitizing permanent or unscheduled photographic prints, refer to the requirements specified in part 1236 subpart E of this subchapter.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R04–OAR–2023–0096; FRL–11663–02–R4]

Air Plan Approval; Revisions to the Florida State Implementation Plan Conformity Rule

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving a State Implementation Plan (SIP) revision

submitted by the Florida Department of Environmental Protection (FDEP) through a letter dated August 12, 2022. The revision updates the general conformity portion of the conformity rule in Florida's SIP. EPA is approving these changes because they are consistent with the Clean Air Act (CAA or Act).

DATES: This rule is effective April 29, 2024.

ADDRESSES: EPA has established a docket for this action under Docket Identification No. EPA–R04–OAR–2023–0096. All documents in the docket are listed on the *www.regulations.gov* website. Although listed in the index, some information may not be publicly available, *i.e.,* Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through *www.regulations.gov* or in hard copy at the Air Regulatory Management Section, Air Planning and Implementation Branch, Air and Radiation Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960. EPA requests you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday 8:30 a.m. to 4:30 p.m., excluding Federal holidays.

FOR FURTHER INFORMATION CONTACT: Josue Ortiz Borrero, Air Regulatory Management Section, Air Planning and Implementation Branch, Air and Radiation Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960. Mr. Ortiz can be reached via phone number (404) 562–8085 or via electronic mail at *ortizborrero.josue@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

General conformity is a requirement of CAA section 176(c). General conformity prohibits Federal actions within nonattainment and maintenance areas unless the emissions from the actions conform to the applicable SIP, Tribal Implementation Plan (TIP), or Federal Implementation Plan (FIP) for the area.[1] Conformity to an implementation plan means conformity to an implementation plan's purpose of eliminating or reducing the severity and number of violations of the national ambient air quality standards (NAAQS or standards) and achieving expeditious attainment of such standards. *See* section 176(c)(1). Under general conformity, Federal actions cannot: (1) Cause or contribute to any new violation of any standard in any area; (2) increase the frequency or severity of any existing violation of any air quality standard in any area; or (3) delay timely attainment of any standard, any required interim emission reductions, or any other milestones, in any area. *Id.*

EPA promulgated two sets of conformity regulations in November 1993 to implement section 176(c) of the CAA. First, EPA promulgated transportation conformity regulations, which apply to highways and mass transit, on November 24, 1993. *See* 58 FR 62188. These regulations establish the criteria and procedures for determining whether transportation plans, programs, and projects funded under 23 U.S.C. or the Federal Transit Act (40 U.S.C. chapter 53) conform with implementation plans. EPA subsequently revised the transportation conformity regulations several times. *See* 69 FR 40004 (July 1, 2004); 70 FR 24280 (May 6, 2005); 71 FR 12468 (March 10, 2006); and 73 FR 4420 (January 24, 2008). Second, on November 30, 1993, EPA promulgated the general conformity regulations at 40 CFR part 51, subpart W and 40 CFR part 93, subpart B, which applied to all other Federal actions to ensure they conformed with implementation plans. *See* 58 FR 63214. EPA has revised its general conformity regulations twice. *See* 71 FR 40420 (July 17, 2006) and 75 FR 17254 (April 5, 2010). As part of the 2010 revisions, EPA revised its general conformity regulations to remove rules from 40 CFR part 51, subpart W that were duplicative of those in 40 CFR part 93, subpart B. *See* 75 FR 17254 (April 5, 2010).[2]

Florida Rule 62–204.500, Florida Administrative Code (F.A.C.), *Conformity,* addresses general conformity in paragraph (1). EPA incorporated Rule 62–204.500 into the Florida SIP in a direct final rule on August 11, 2003. *See* 68 FR 47468. Since then, Florida has amended Rule 62–204.500, and those changes are the subject of this rulemaking.[3]

Through a notice of proposed rulemaking (NPRM), published on February 1, 2024 (89 FR 6475), EPA proposed to approve Florida's August 12, 2022, SIP revision to Rule 62–204.500. The details of the submission, as well as EPA's rationale for changing this rule, are described in more detail in EPA's February 1, 2024, NPRM. Comments on the February 1, 2024, NPRM were due on or before March 4, 2024. EPA did not receive any comments on the February 1, 2024, NPRM.

II. Incorporation by Reference

In this document, EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, and as discussed in Section I of this preamble, EPA is finalizing the incorporation by reference of Rule 62–204.500, F.A.C., *Conformity,* state effective on October 23, 2016, except for paragraphs 62–204.500(1)(a), 62–204.500(1)(b), 62–204.500(1)(c), and 62–204.500(1)(d).[4] EPA has made, and will continue to make, these materials generally available through *www.regulations.gov* and at the EPA Region 4 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information). Therefore, these materials have been approved by EPA for inclusion in the State implementation plan, have been incorporated by reference by EPA into that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of EPA's approval, and will be incorporated by reference in the next update to the SIP compilation.[5]

III. Final Action

EPA is finalizing approval, with the exceptions noted, the changes to Rule

[1] "Federal action" is defined at 40 CFR 93.152 as "any activity engaged in by a department, agency, or instrumentality of the Federal government, or any activity that a department, agency or instrumentality of the Federal government supports in any way, provides financial assistance for, licenses, permits, or approves, other than activities related to transportation plans, programs, and projects developed, funded, or approved under title 23 U.S.C. or the Federal Transit Act (49 U.S.C. 1601 *et seq.*). Where the Federal action is a permit, license, or other approval for some aspect of a non-Federal undertaking, the relevant activity is the part, portion, or phase of the non-Federal undertaking that requires the Federal permit, license, or approval."

[2] For more information on general conformity, see *https://www.epa.gov/general-conformity.*

[3] The August 12, 2022, submittal transmits several changes to other Florida SIP-approved rules. These changes are not addressed in this rulemaking and will be considered by EPA in separate rulemakings. In addition, EPA is not acting on paragraphs 62–204.500(1)(a)–(1)(d), F.A.C., because they were withdrawn from EPA consideration in a letter dated January 5, 2024, which is in the docket for this rulemaking.

[4] EPA is also correcting the explanation associated with the entry for Rule 62–204.500 at 40 CFR 52.520(c) by removing the language "Except for the incorporation by reference of 40 CFR 93.104(e) of the Transportation Conformity Rule" because it is erroneous as no reference to 40 CFR 93.104(e) exists in Rule 62–204.500.

[5] 62 FR 27968 (May 22, 1997).

62–204.500, *Conformity,* into the Florida SIP. EPA is approving these changes because they are consistent with the CAA.

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. See 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve State choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves State law as meeting Federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 14094 (88 FR 21879, April 11, 2023);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it approves a State program;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

Executive Order 12898 (Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629, February 16, 1994) directs Federal agencies to identify and address ''disproportionately high and adverse human health or environmental effects'' of their actions on minority populations and low-income populations to the greatest extent practicable and permitted by law. EPA defines environmental justice (EJ) as ''the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.'' EPA further defines the term fair treatment to mean that ''no group of people should bear a disproportionate burden of environmental harms and risks, including those resulting from the negative environmental consequences of industrial, governmental, and commercial operations or programs and policies.''

FDEP did not evaluate EJ considerations as part of its SIP submittal; the CAA and applicable implementing regulations neither prohibit nor require such an evaluation. EPA did not perform an EJ analysis and did not consider EJ in this action. Due to the nature of the action being taken here, this action is expected to have a neutral to positive impact on the air quality of the affected area. Consideration of EJ is not required as part of this action, and there is no information in the record inconsistent with the stated goal of E.O. 12898 of achieving EJ for people of color, low-income populations, and Indigenous peoples.

This action is subject to the Congressional Review Act, and EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 28, 2024. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides.

Dated: March 21, 2024.

Jeaneanne Gettle,

Acting Regional Administrator, Region 4.

For the reasons stated in the preamble, the EPA amends 40 CFR part 52 as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart K—Florida

■ 2. In § 52.520(c), amend the table by revising the entry for ''62–204.500'' to read as follows:

§ 52.520 Identification of plan.

Proposed Rules

Federal Register

Vol. 89, No. 61

Thursday, March 28, 2024

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 932

[Doc. No. AMS–SC–23–0087]

Olives Grown in California; Decreased Assessment Rate

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would implement a recommendation from the California Olive Committee (Committee) to decrease the assessment rate established for the 2024 fiscal year and subsequent fiscal years. The proposed assessment rate would remain in effect indefinitely unless modified, suspended, or terminated.

DATES: Comments must be received by April 29, 2024.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposed rule. Comments must be sent to the Docket Clerk electronically by Email: *MarketingOrderComment@usda.gov* or internet: *https://www.regulations.gov.* Comments should reference the document number and the date and page number of this issue of the **Federal Register** and can be viewed at: *https://www.regulations.gov.* All comments submitted in response to this proposed rule will be included in the record and will be made available to the public. Please be advised that the identity of the individuals or entities submitting the comments will be made public on the internet at the address provided above.

FOR FURTHER INFORMATION CONTACT: Jeremy Sasselli, Marketing Specialist, or Barry Broadbent, Acting Chief, West Region Branch, Market Development Division, Specialty Crops Program, AMS, USDA; Telephone: (559) 487–5901, or Email: *Jeremy.Sasselli@usda.gov* or *Barry.Broadbent@usda.gov.*

Small businesses may request information on complying with this regulation by contacting Richard Lower, Market Development Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW, STOP 0237, Washington, DC 20250–0237; Telephone: (202) 720–8085, or Email: *Richard.Lower@usda.gov.*

SUPPLEMENTARY INFORMATION: This action, pursuant to 5 U.S.C. 553, proposes to amend regulations issued to carry out a marketing order as defined in 7 CFR 900.2(j). This proposed rule is issued under Marketing Agreement No. 148 and Order No. 932, both as amended (7 CFR part 932), regulating the handling of olives grown in California. Part 932 (referred to as the ''Order'') is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the ''Act.'' The Committee locally administers the Order and is comprised of producers and handlers of olives operating within the area of production, and one public member.

The Agricultural Marketing Service (AMS) is issuing this proposed rule in conformance with Executive Orders 12866, 13563, and 14094. Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. Executive Order 14094 directs agencies to conduct proactive outreach to engage interested and affected parties through a variety of means, such as through field offices, and alternative platforms and media. This action falls within a category of regulatory actions that the Office of Management and Budget (OMB) exempted from Executive Order 12866 review.

This proposed rule has been reviewed under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, which requires agencies to consider whether their rulemaking actions would have tribal implications. AMS has determined that this proposed rule is unlikely to have substantial direct effects on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes.

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. This proposed rule is not intended to have retroactive effect. Under the Order now in effect, California olive handlers are subject to assessments. Funds to administer the Order are derived from such assessments. It is intended that the proposed assessment rate would be applicable to all assessable olives beginning on January 1, 2024, and continue until amended, suspended, or terminated.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the U.S. Department of Agriculture (USDA) a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and requesting a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing, USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review USDA's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

Section 932.38 of the Order authorizes the Committee, with the approval of USDA, to formulate an annual budget of expenses and collect assessments from handlers to administer the program. The members are familiar with the Committee's needs and with the costs of goods and services in their local area and are thus in a position to formulate an appropriate budget and assessment rate. The assessment rate is formulated and discussed in a public meeting. Thus, all directly affected persons have an opportunity to participate and provide input.

This proposed rule would decrease the assessment rate from $35 per ton of assessed olives, the rate that was

established for the 2023 fiscal year and subsequent fiscal years, to $28 per ton of assessed olives for the 2024 fiscal year and subsequent fiscal years. The proposed lower rate is the result of the significantly higher crop size in 2023 (fruit that is marketed over the course of the 2024 fiscal year), and the need to maintain the Committee's financial reserve at a responsible level.

The Committee met on December 12, 2023, and unanimously recommended 2024 expenditures of $1,100,151 and an assessment rate of $28 per ton of assessed olives. In comparison, last year's budgeted expenditures were $1,154,412. The proposed assessment rate of $28 is $7 lower than the rate currently in effect. Producer receipts show total production of approximately 34,000 tons of olives from the 2023 crop year that will be assessable during the 2024 fiscal year. This amount is substantially higher than the quantity of olives that was harvested in 2022.

Olives harvested in 2023 will be marketed over the course of the 2024 fiscal year, which begins on January 1, 2024, as the harvested olives are stored in brining tanks and processed over the subsequent year. The 34,000 tons of assessable olives from the 2023 crop would generate $952,000 in assessment revenue over the 2024 fiscal year at the proposed assessment rate. The balance of funds needed to cover budgeted expenditures would come from interest income and the Committee's financial reserve. The 2024 fiscal year assessment rate decrease is appropriate to ensure the Committee has sufficient revenue to fund the recommended 2024 fiscal year budgeted expenditures while also ensuring that funds in the reserve do not exceed approximately one fiscal year's expenses, the maximum reserve amount permitted by § 932.40.

The Order has a fiscal year and a crop year that are independent of each other. The crop year is a 12-month period that begins on August 1 of each year and ends on July 31 of the following year. The fiscal year is the 12-month period that begins on January 1 and ends on December 31 of each year. Olives are an alternate-bearing crop, with a small crop (2022) followed by a large crop (2023). For this assessment rate proposed rule, the Committee utilized the estimated 2023 crop year receipts to determine the recommended assessment rate for the 2024 fiscal year.

The major expenditures recommended by the Committee for the 2024 fiscal year include $350,250 for program administration, $164,650 for export programs, $197,500 for marketing activities, $302,751 for research, and $85,000 for inspection. Budgeted expenses for these items during the 2023 fiscal year were $399,700, $148,000, $193,000, $325,712, and $88,000, respectively.

The assessment rate recommended by the Committee resulted from consideration of anticipated fiscal year expenses, estimated olive tonnage received by handlers during the 2023 crop year, and the amount in the Committee's financial reserve. Income derived from handler assessments and other revenue sources is expected to be adequate to cover budgeted expenses. The assessment rate proposed in this rule would continue in effect indefinitely unless modified, suspended, or terminated by USDA upon recommendation and information submitted by the Committee or other available information.

Although this assessment rate would be in effect for an indefinite period, the Committee would continue to meet prior to or during each fiscal year to recommend a budget of expenses and consider recommendations for modification of the assessment rate. The dates and times of Committee meetings are available from the Committee or USDA. Committee meetings are open to the public and interested persons may express their views at these meetings. USDA would evaluate Committee recommendations and other available information to determine whether modification of the assessment rate is needed. Further rulemaking would be undertaken as necessary. The Committee's budget for subsequent fiscal years would be reviewed and, as appropriate, approved by USDA.

Initial Regulatory Flexibility Analysis

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA) (5 U.S.C. 601–612), AMS has considered the economic impact of this proposed rule on small entities. Accordingly, AMS has prepared this initial regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of businesses subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and the rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf.

There are approximately 800 producers of olives in the production area and 2 handlers subject to regulation under the Order. Small agricultural producers are defined by the Small Business Administration (SBA) as those having annual receipts equal to or less than $3.5 million (NAICS code 111339, Other Noncitrus Fruit Farming) and small agricultural service firms are defined as those whose annual receipts are equal to or less than $34.0 million (NAICS code 115114, Postharvest Crop Activities) (13 CFR 121.201).

Because of the large year-to-year variation in California olive production, it is helpful to use a two-year average of the seasonal average producer price when undertaking calculations relating to average producer revenue. The National Agricultural Statistics Service (NASS) reported season average producer prices of olives utilized for canning for 2021 and 2022 of $851 and $913 per ton, respectively, with a two-year average price of $882. NASS had not reported the 2023 season average producer price at the time this proposed rule was published.

The appropriate quantities to consider are the annual assessable olive quantities, which were 43,336 tons in 2021 and 19,912 tons in 2022, with the two-year average production being 31,624 tons. Multiplying 31,624 tons by the two-year average producer price of $882 yields a two-year average crop value of $27,892,368. Dividing the crop value by the number of olive producers (800) yields calculated annual average producer revenue of $34,865, much less than SBA's size standard of $3.5 million. Thus, the majority of olive producers may be classified as small entities.

Dividing the $27,892,368 average crop value by 2 (the number of handlers) equals $13,946,184, which is the annual average producer crop value processed by each of the 2 handlers over the two-year period. Dividing the $34.0 million annual sales SBA size threshold for a large handler by the $13,946,184 crop value per handler yields an estimate of a 125 percent manufacturing margin for the 2 handlers, on average, to be considered large handlers. A key question is whether 125 percent is a reasonable estimate of a manufacturing margin for the olive canning process.

A review of economic literature on canned food manufacturing margins found no recent published estimates. A series of Economic Research Service reports on cost components of farm to retail price spreads, published in the late 1970s and early 1980s, found that margins above crop value for a canned vegetable product were in the range of 76 to 85 percent. Although the studies are not recent, canning technology has not changed significantly since that time period. Therefore, with the 125 percent margin estimate for the 2 olive handlers, the data indicates that they could be on the threshold of being large handlers

($34.0 million in annual sales), using two-year average data, and assuming that the 2 handlers are about the same size. In a large crop year, one or both handlers could be considered large handlers, depending on the proportion of the crop that each of the handlers processed.

This proposal would decrease the assessment rate collected from handlers for the 2024 fiscal year and subsequent fiscal years from $35 to $28 per ton of assessable olives. The Committee unanimously recommended 2024 expenditures of $1,100,151 and an assessment rate of $28 per ton. The recommended assessment rate of $28 is $7 lower than the 2023 assessment rate. The quantity of assessable olives harvested in the 2023 crop year is estimated to be 34,000 tons, compared to 19,912 tons in 2022. Olives are an alternate-bearing crop, with a small crop (2022) followed by a large crop (2023). Income derived from the $28 per ton assessment rate, along with interest income and funds from the authorized reserve, would be adequate to meet this fiscal year's budgeted expenditures.

The major expenditures recommended by the Committee for the 2024 fiscal year include $350,250 for program administration, $164,650 for export programs, $197,500 for marketing activities, $302,751 for research, and $85,000 for inspection. Budgeted expenses for these items during the 2023 fiscal year were $399,700, $148,000, $193,000, $325,712, and $88,000, respectively.

The Committee deliberated on many of the expenses, weighed the relative value of various programs or projects, and decreased their expenses for inspection and research activities while increasing marketing activities. Overall, the 2024 budget of $1,100,151 is $54,261 less than the $1,154,412 budgeted for the 2023 fiscal year.

Prior to arriving at this budget and assessment rate, the Committee considered information from various sources including the Committee's Executive, Marketing, Inspection, and Research Subcommittees. Alternate expenditure levels were discussed by these groups, based upon the relative value of various projects to the olive industry and the increased olive production. The assessment rate of $28 per ton of assessable olives was derived by considering anticipated expenses, the high volume of assessable olives, the current balance in the monetary reserve, and additional pertinent factors.

A review of information from NASS indicates that the average producer price for the 2022 crop year (the most recent year for which information is available) was $913 per ton. Therefore, utilizing the recommended assessment rate of $28 per ton, assessment revenue for the 2024 fiscal year as a percentage of total producer revenue would be approximately 3.1 percent ($28 divided by $913 times 100).

This proposed action would decrease the assessment obligation imposed on handlers. Assessments are applied uniformly on all handlers. Some of the assessment costs to handlers may be passed on to producers. Decreasing the assessment rate would reduce the burden on handlers and may also, therefore, reduce the burden on producers.

The Committee's meetings are widely publicized throughout the production area. The olive industry and all interested persons are invited to attend the meetings and participate in Committee deliberations on all issues. Like all Committee meetings, the December 12, 2023, meeting was a public meeting and all entities, both large and small, were able to express views on this issue. In addition, interested persons are invited to submit comments on this proposed rule, including the regulatory and information collection impacts of this action on small businesses.

In accordance with the Paperwork Reduction Act of 1995, (44 U.S.C. Chapter 35), the Order's information collection requirements have been previously approved by OMB and assigned OMB No. 0581–0178 Vegetable and Specialty Crops. No changes in those requirements as a result of this action are necessary. Should any changes become necessary, they would be submitted to OMB for approval.

This proposed rule would not impose any additional reporting or recordkeeping requirements on either small or large California olive handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies.

AMS is committed to complying with the E-Government Act to promote the use of the internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

USDA has not identified any relevant Federal rules that duplicate, overlap, or conflict with this action.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: *https://www.ams.usda.gov/rules-regulations/moa/small-businesses.* Any questions about the compliance guide should be sent to Richard Lower at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

After consideration of all relevant material presented, including the information and recommendations submitted by the Committee and other available information, USDA has determined that this proposed rule is consistent with, and would effectuate the purposes of, the Act.

A 30-day comment period is provided to allow interested persons to respond to this proposed rule. All written comments timely received will be considered before a final determination is made on this rule.

List of Subjects in 7 CFR Part 932

Marketing agreements, Olives, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, the Agricultural Marketing Service proposes to amend 7 CFR part 932 as follows:

PART 932—OLIVES GROWN IN CALIFORNIA

■ 1. The authority citation for 7 CFR part 932 continues to read as follows:

Authority: 7 U.S.C. 601–674.

■ 2. Section 932.230 is revised to read as follows:

§ 932.230 Assessment rate.

On and after January 1, 2024, an assessment rate of $28 per ton is established for California olives.

Erin Morris,
Associate Administrator, Agricultural Marketing Service.

BILLING CODE P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2024–0767; Project Identifier MCAI–2023–00723–T]

RIN 2120–AA64

Airworthiness Directives; Bombardier, Inc., Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for

certain Bombardier, Inc., Model BD–700–2A12 airplanes. This proposed AD was prompted by reports that the baggage bay discharge push-button annunciator (PBA) switch was making contact but was not fully engaged, and the tabs were not fully locked. This proposed AD would require a verification of the baggage bay discharge PBA functionality and tab installation. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by May 13, 2024.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2024–0767; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For Bombardier service information identified in this NPRM, contact Bombardier Business Aircraft Customer Response Center, 400 Côte-Vertu Road West, Dorval, Québec H4S 1Y9, Canada; telephone 514–855–2999; email *ac.yul@aero.bombardier.com;* website *bombardier.com*.
- You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

FOR FURTHER INFORMATION CONTACT: William Reisenauer, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 516–228–7300; email: *9-avs-nyaco-cos@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2024–0767; Project Identifier MCAI–2023–00723–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend the proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov*, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to William Reisenauer, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 516–228–7300; email: *9-avs-nyaco-cos@faa.gov.* Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

Transport Canada, which is the aviation authority for Canada, has issued Transport Canada AD CF–2023–36, dated May 29, 2023 (Transport Canada AD CF–2023–36) (also referred to after this as the MCAI), to correct an unsafe condition on certain Bombardier, Inc., Model BD–700–2A12 airplanes. The MCAI states that during the execution of a functional test procedure (FTP) during production, the baggage bay discharge PBA switch was partially engaged and failed to make electrical contact. Further investigation showed that in some instances, the baggage bay discharge PBA switch was making contact but was not fully engaged and the tabs were not fully locked, so while the PBA may pass the FTP, vibration could eventually lead to a loss of electrical contact and subsequent loss of baggage bay discharge PBA switch functionality.

The FAA is issuing this AD to address the possible inability to discharge halon into the baggage compartment in case of a fire. The unsafe condition, if not addressed, could result in the inability to control a baggage compartment fire.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2024–0767.

Related Service Information Under 1 CFR Part 51

The FAA reviewed Bombardier Service Bulletin 700–26–7505, dated February 10, 2023. This service information specifies procedures for doing a general visual inspection of the baggage bay discharge PBA switch for proper installation and a functional operation test. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI and service information referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would require accomplishing the actions specified in the service information already described.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 42 airplanes of U.S. registry. The FAA

estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
2 work-hours × $85 per hour = $170	$0	$170	$7,140

The FAA has included all known costs in its cost estimate. According to the manufacturer, however, some or all of the costs of this proposed AD may be covered under warranty, thereby reducing the cost impact on affected operators.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a "significant regulatory action" under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

Bombardier, Inc.: Docket No. FAA–2024–0767; Project Identifier MCAI–2023–00723–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by May 13, 2024.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Bombardier, Inc., Model BD–700–2A12 airplanes, certificated in any category, serial numbers 70006 through 70099 inclusive.

(d) Subject

Air Transport Association (ATA) of America Code 26, Fire protection.

(e) Unsafe Condition

This AD was prompted by reports that the baggage bay discharge push-button annunciator (PBA) switch was making contact but was not fully engaged, and the tabs were not fully locked. The FAA is issuing this AD to address the possible inability to discharge halon into the baggage compartment in case of a fire. The unsafe condition, if not addressed, could result in the inability to control a baggage compartment fire.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Within 36 months after the effective date of this AD: Perform the inspection and testing of the baggage bay discharge PBA switch, in accordance with the Accomplishment Instructions of Bombardier Service Bulletin 700–26–7505, dated February 10, 2023.

(h) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the International Validation Branch, mail it to the address identified in paragraph (i)(2) of this AD. Information may be emailed to: *9-AVS-AIR-730-AMOC@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or Transport Canada; or Bombardier, Inc.'s Transport Canada Design Approval Organization (DAO). If approved by the DAO, the approval must include the DAO-authorized signature.

(i) Additional Information

(1) Refer to Transport Canada AD CF–2023–36, dated May 29, 2023 (Transport Canada AD CF–2023–36) for related information. This Transport Canada AD may be found in the AD docket at *regulations.gov* under Docket No. FAA–2024–0767.

(2) For more information about this AD, contact William Reisenauer, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 516–228–7300; email: *9-avs-nyaco-cos@faa.gov.*

(j) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Bombardier Service Bulletin 700–26–7505, dated February 10, 2023.

(ii) [Reserved]

(3) For service information identified in this AD, contact Bombardier Business Aircraft Customer Response Center, 400 Côte-Vertu Road West, Dorval, Québec H4S 1Y9, Canada; telephone 514–855–2999; email *ac.yul@aero.bombardier.com;* website *bombardier.com.*

(4) You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations,* or email *fr.inspection@nara.gov.*

Issued on March 21, 2024.

Victor Wicklund,

Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

[Docket No. FAA–2024–0769; Project Identifier AD–2023–00556–T]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for certain The Boeing Company Model 777 airplanes. This proposed AD was prompted by a report indicating multiple findings of cracks in the fuselage skin common to the underwing longeron (UWL). This proposed AD would require external or internal (depending on configuration) inspections for any cracking of the left and right side fuselage skin common to the UWL, and applicable on-condition actions. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by May 13, 2024.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2024–0769; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For service information identified in this NPRM, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; website *myboeingfleet.com.*

For information on the availability of this material at the FAA, call 206–231–3195. It is also available at *regulations.gov* by searching for and locating Docket No. FAA–2024–0769.

FOR FURTHER INFORMATION CONTACT: Luis Cortez-Muniz, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; phone: 206–231–3958; email: *luis.a.cortez-muniz@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2024–0769; Project Identifier AD–2023–00556–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov*, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Luis Cortez-Muniz Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; phone: 206–231–3958; email: *luis.a.cortez-muniz@faa.gov.* Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA has received reports indicating multiple findings of cracks in the fuselage skin common to the UWL on all series of Boeing Model 777 airplanes. The crack findings were made during UWL replacement or accomplishing Boeing Service Bulletins 777–53–0084 or 777–53–0087, or Boeing Requirements Bulletin 777–57A0122 RB. In many of the fuselage skin crack reports, the UWL was reported not damaged. The found fuselage skin cracks were hidden externally by the UWL, and internally by fuselage frames and stringers. The fuselage skin cracks were found on airplanes with as few as 2,000 total flight cycles and 18,000 total flight hours. These fuselage skin cracks were determined to be caused by cold work surface upset that is not removed from the mating parts and high joint load transfer or significant local bending stresses at critical fastener locations. These conditions, if not addressed, could result in an inability of a principal structural element (PSE) to sustain limit load, leading to reduced structural integrity of the airplane and possible loss of control of the airplane.

Boeing has issued Boeing Alert Requirements Bulletin 777–53A0100

RB, dated March 16, 2023, to address the identified unsafe condition.

Other Relevant Rulemaking

AD 2023–17–14, Amendment 39–22541 (88 FR 60111, August 31, 2023) (AD 2023–17–14) requires repetitive inspections for cracking of the left and right side ring chords, repair angles, front spar lower chords, and front spar webs (depending on configuration) common to the UWL located at station (STA) 1035; modification of the front spar lower chord for some airplanes; repetitive post-modification inspections; and applicable on-condition actions, as specified in Boeing Alert Requirements Bulletin 777–57A0122 RB, dated October 8, 2021; and requires a maintenance records review of previously modified airplanes for the procedures used during that modification, and applicable corrective actions. Boeing Alert Requirements Bulletin 777–53A0100 RB, dated March 16, 2023, specifies that the modification in Boeing Alert Requirements Bulletin 777–57A0122 RB should be done before further flight if cracking is found during certain inspections. Therefore, this proposed AD, which mandates Boeing Alert Requirements Bulletin 777–53A0100 RB, dated March 16, 2023, might require that the modification be done prior to the compliance time for that modification as specified in AD 2023–17–14. For airplanes on which a front spar lower chord modification specified in Boeing Alert Requirements Bulletin 777–57A0122 RB is done as part of the requirements of paragraph (g) of this proposed AD, the modification requirements of paragraph (g) of AD 2023–17–14 are terminated for the applicable side (left or right) on which the modification was done.

AD 2019–11–02, Amendment 39–19648 (84 FR 28722, June 20, 2019) (AD 2019–11–02) requires repetitive inspections of the left and right side UWLs and applicable on-condition actions as specified in Boeing Alert Service Bulletin 777–53A0081, Revision 2, dated March 29, 2019. The accomplishment of the longeron modification specified in Boeing Service Bulletin 777–53–0084, Revision 2, dated December 9, 2020, or Boeing Service Bulletin 777–53–0087, Revision 1, dated March 4, 2020; or the front spar lower chord modification specified in Boeing Alert Requirements Bulletin 777–57A0122 RB, dated October 8, 2021; which must be done if cracking is found during certain inspections specified in Boeing Alert Requirements Bulletin 777–53A0100 RB, dated March 16, 2023, terminates the inspection requirements of paragraph (g) of AD 2019–11–02 for the applicable side (left or right) on which the modification was done.

FAA's Determination

The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Related Service Information Under 1 CFR Part 51

The FAA reviewed Boeing Alert Requirements Bulletin 777–53A0100 RB, dated March 16, 2023. This service information specifies procedures for external or internal (depending on configuration) detailed and ultrasonic or surface high frequency eddy current (HFEC) inspections for any cracking of the left and right side fuselage skin common to the UWL, and applicable on-condition actions. On-condition actions include, among other things, modification of the fuselage skin, and post-modification inspections and applicable corrective actions (repairs of cracking). Compliance times for on-condition actions depend on inspection type, inspection findings, and modification status. Initial compliance times for post-modification inspections range from within 10,000 flight cycles or 50,000 flight hours, whichever occurs first after the modification; and within 30,000 flight cycles, 90,000 flight hours, or before the result of a certain total flight cycle and total flight hour equation, whichever occurs first after the modification. The repetitive intervals range from 8,000 flight cycles or 25,000 flight hours, whichever occurs first, to 11,000 flight cycles or 56,000 flight hours, whichever occurs first. Repairs of cracking found during post-modification inspections are to be accomplished before further flight.

The FAA also reviewed Boeing Multi Operator Message MOM–MOM–24–0054–01B, dated January 26, 2024. This service information specifies corrections for Boeing Alert Requirements Bulletin 777–57A0122 RB, dated October 8, 2021, that address a non-destructive test manual (NDTM) error, fastener callout errors, inadequate cap seal instructions, figure orientation errors, minimum gap errors, missing fasteners on certain figures, affected groups missing from certain figures, and typographical errors.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in **ADDRESSES**.

Proposed AD Requirements in This NPRM

This proposed AD would require accomplishing the actions specified in the service information already described and except for any differences identified as exceptions in the regulatory text of this proposed AD. For information on the procedures and compliance times, see this service information at *regulations.gov* under Docket No. FAA–2024–0769.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 272 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
External or internal inspections	Up to 21 work-hours × $85 per hour = $1,785 per inspection cycle.	$0	$1,785 per inspection cycle.	$485,520 per inspection cycle.

The FAA estimates the following costs to do any necessary on-condition actions that would be required based on the results of the proposed inspection. The agency has no way of determining the number of aircraft that might need these actions:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Modification	420 work-hours × $85 per hour = $35,700.	$40,620	$76,320.
Post-modification inspections	46 work-hours × $85 per hour = $3,910 per inspection cycle.	0	3,910 per inspection cycle.

The FAA has received no definitive data on which to base the cost estimates for the on-condition repairs specified in this proposed AD.

The FAA has included all known costs in its cost estimate. According to the manufacturer, however, some or all of the costs of this proposed AD may be covered under warranty, thereby reducing the cost impact on affected operators.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

The Boeing Company: Docket No. FAA–2024–0769; Project Identifier AD–2023–00556–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by May 13, 2024.

(b) Affected ADs

This AD affects AD 2023–17–14, Amendment 39–22541 (88 FR 60111, August 31, 2023) (AD 2023–17–14).

(c) Applicability

This AD applies to The Boeing Company Model 777–200, –200LR, –300, –300ER, and 777F series airplanes, certificated in any category, as identified in Boeing Alert Requirements Bulletin 777–53A0100 RB, dated March 16, 2023.

(d) Subject

Air Transport Association (ATA) of America Code 53, Fuselage.

(e) Unsafe Condition

This AD was prompted by a report indicating multiple findings of cracks in the fuselage skin common to the underwing longeron (UWL). The FAA is issuing this AD to address fuselage skin cracking caused by cold work surface upset that is not removed from the mating parts and high joint load transfer or significant local bending stresses at critical fastener locations. The unsafe condition, if not addressed, could result in an inability of a principal structural element (PSE) to sustain limit load, leading to reduced structural integrity of the airplane and possible loss of control of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Except as specified by paragraph (h) of this AD: At the applicable times specified in the ''Compliance'' paragraph of Boeing Alert Requirements Bulletin 777–53A0100 RB, dated March 16, 2023, do all applicable actions identified in, and in accordance with, the Accomplishment Instructions of Boeing Alert Requirements Bulletin 777–53A0100 RB, dated March 16, 2023.

Note 1 to paragraph (g): Guidance for accomplishing the actions required by this AD can be found in Boeing Alert Service Bulletin 777–53A0100, dated March 16, 2023, which is referred to in Boeing Alert Requirements Bulletin 777–53A0100 RB, dated March 16, 2023.

Note 2 to paragraph (g): Guidance for accomplishing certain on-condition actions required by paragraph (g) of this AD can be found Boeing Service Bulletin 777–53–0084 Revision 2, dated December 9, 2020; Boeing Service Bulletin 777–53–0087 Revision 1, dated March 4, 2020; and Boeing Alert Requirements Bulletin 777–57A0122 RB, dated October 8, 2021.

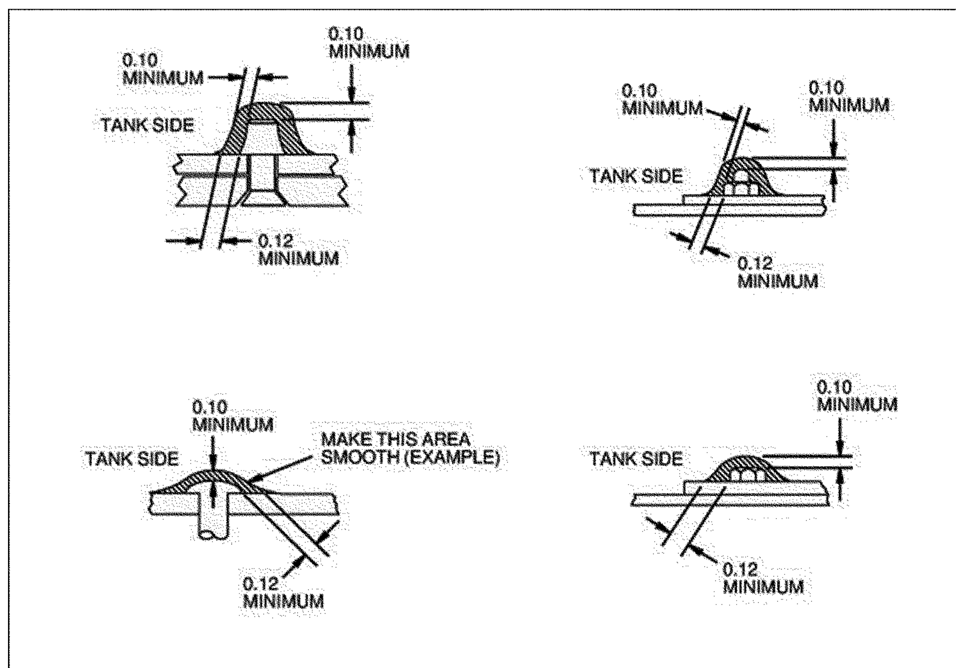
(h) Exceptions to Service Information Specifications

(1) Where the Compliance Time columns of the tables in the ''Compliance'' paragraph of Boeing Alert Requirements Bulletin 777–53A0100 RB, dated March 16, 2023, use the phrase ''the original issue date of Requirements Bulletin 777–53A0100 RB,'' this AD requires using the effective date of this AD.

(2) Where Boeing Alert Requirements Bulletin 777–53A0100 RB, dated March 16, 2023, and any service information referenced in Boeing Alert Requirements Bulletin 777–53A0100 RB, dated March 16, 2023, specifies contacting Boeing for repair instructions: This AD requires doing the repair using a method approved in accordance with the procedures specified in paragraph (j) of this AD.

(3) Where any service information referenced in Boeing Alert Requirements Bulletin 777–53A0100 RB, dated March 16, 2023, specifies applying a cap seal (sealant) to a fastener, fastener head, and fastener threads and collars, for this AD, during application of any cap seal to a fastener, fastener head, or fastener threads and collars, the cap seal must be applied using a cap sealing procedure with thickness greater than or equal to the dimensions given in Figure 1 to paragraph (h)(3) of this AD.

Figure 1 to Paragraph (h)(3)—Cap Sealing Dimensions (all Dimensions are in Inches)



(4) Where Boeing Alert Requirements Bulletin 777–53A0100 RB, dated March 16, 2023, specifies doing actions ''in accordance with Revision 2 of Boeing Service Bulletin 777–53–0084,'' for this AD, where flagnote (f) of Figure 7 and Figure 22 of that referenced service information (''Revision 2 of Boeing Service Bulletin 777–53–0084'') includes a sealant callout of Boeing Material Specification (BMS) 5–45 or an optional BMS 5–95, only BMS 5–45 is allowed.

(5) Where Boeing Alert Requirements Bulletin 777–53A0100 RB, dated March 16, 2023, specifies doing actions ''in accordance with Revision 1 of Boeing Service Bulletin 777–53–0087,'' for this AD, where flagnote (f) of Figure 13 and Figure 49 of that referenced service information (''Revision 1 of Boeing Service Bulletin 777–53–0087'') includes a sealant callout of BMS 5–45 or an optional BMS 5–95, only BMS 5–45 is allowed.

(6) Where Boeing Alert Requirements Bulletin 777–53A0100 RB, dated March 16, 2023, specifies doing actions ''in accordance with the original issue of Boeing Alert Requirements Bulletin 777–57A0122 RB,'' for this AD, the exceptions specified in paragraph (h)(6)(i) through (v) of this AD apply to that referenced service information (''the original issue of Boeing Alert Requirements Bulletin 777–57A0122 RB'') and the corrections identified in Boeing Multi Operator Message MOM–MOM–24–0054–01B, dated January 26, 2024, apply to that referenced service information.

(i) Where the ''Compliance'' paragraph of the referenced service information identifies ''Tables 1 through 50,'' the correct number of tables is Tables 1 through 54.

(ii) The referenced service information does not specify the application of cap seals to underwing longeron fasteners, fastener heads, and fastener threads and collars for the airplane groups and configurations identified in paragraphs (h)(6)(ii)(A) through (D) of this AD. For those airplane groups and configurations, the application of a cap seal to the underwing longeron fasteners at the locations identified in Figures 81 and 144 is required during installation of the underwing longeron and must be applied using a cap sealing procedure with thickness greater than or equal to the dimensions given in Figure 1 to paragraph (h)(3) of this AD.

(A) Groups 7 and 8, Configurations 5 through 8, on the left side.

(B) Group 9, Configurations 1 and 2, on the left side.

(C) Groups 7 and 8, Configurations 2, 6, 10, and 14, on the right side.

(D) Group 9, Configurations 1 and 3, on the right side.

(iii) For any inspection that may require the removal of fastener cap seals, if the cap seal is removed, a cap seal of BMS 5–45 sealant must be reapplied using a cap sealing procedure with a thickness equal to or greater than the dimensions specified in Figure 1 to paragraph (h)(3) of this AD before further flight after completion of the inspection.

(iv) The referenced service information does not require the restoration of any sealant removed to accomplish high frequency eddy current and ultrasonic inspections external to the fuel tank in Figures 1, 7, 11, and 17. Following completion of any inspection required by those figures, replacement of the sealant described in paragraph (h)(6)(iv)(A) and repair of the sealant described in paragraph (h)(6)(iv)(B) of this AD, as applicable, is required.

(A) Where any sealant was removed from the heads of fasteners, before further flight, cover and fillet seal the fasteners using BMS 5–45 or BMS 5–95 sealant.

Note 3 to paragraph (h)(6)(iv)(A): Guidance for accomplishing the actions required by paragraph (h)(6)(iv)(A) of this AD can be found in the Boeing Standard Overhaul Practices Manual (SOPM) section 20–50–19.

(B) Following any sealant replacement required by paragraph (h)(6)(iv)(A) of this AD, where any secondary fuel barrier coating was removed, before further flight, repair the secondary fuel barrier using BMS 5–81 sealant.

Note 4 to paragraph (h)(6)(iv)(B): Guidance for accomplishing the actions required by paragraph (h)(6)(iv)(B) of this AD can be found in Boeing Model 777 Aircraft Maintenance Manual (AMM) section 28–11–00.

(v) The Effectivity of the referenced service information does not include Boeing Model 777F series airplanes having line numbers 1713, 1717, 1720, and 1724 through 1742 inclusive. For those airplanes the applicable actions for Group 6 must be done.

(i) Terminating Action for AD 2023–17–14

For airplanes on which a front spar lower chord modification specified in Boeing Alert Requirements Bulletin 777–57A0122 RB is done as part of the requirements of paragraphs (g) and (h)(6) of this AD, the modification requirements of paragraph (g) of AD 2023–17–14 are terminated for the applicable side (left or right) on which the modification was done.

(j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, AIR–520, Continued Operational Safety Branch, FAA, has the

authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the Continued Operational Safety Branch, send it to the attention of the person identified in paragraph (k)(1) of this AD. Information may be emailed to: *AMOC@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by The Boeing Company Organization Designation Authorization (ODA) that has been authorized by the Manager, AIR–520, Continued Operational Safety Branch, FAA, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(k) Related Information

(1) For more information about this AD, contact Luis Cortez-Muniz, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; phone: 206–231–3958; email: *luis.a.cortez-muniz@faa.gov.*

(2) Service information identified in this AD that is not incorporated by reference is available at the addresses specified in paragraph (l)(3) of this AD.

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Boeing Alert Requirements Bulletin 777–53A0100 RB, dated March 16, 2023.

(ii) Boeing Multi Operator Message MOM–MOM–24–0054–01B, dated January 26, 2024.

(3) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; website *myboeingfleet.com.*

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on March 22, 2024.

Victor Wicklund,

Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2024–0766; Project Identifier MCAI–2023–00711–T]

RIN 2120–AA64

Airworthiness Directives; Airbus SAS Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede Airworthiness Directive (AD) 2023–11–08, which applies to all Airbus SAS Model A330–841 and –941 airplanes. AD 2023–11–08 requires maintenance actions, including a high-pressure valve (HPV) seal integrity test, repetitive replacement of the HPV clips, revision of the existing airplane flight manual (AFM), and implementation of updates to the FAA-approved operator's minimum equipment list (MEL). Since the FAA issued AD 2023–11–08, the agency determined that the replacement intervals required by AD 2023–11–08 must be reduced in order to address the unsafe condition. This proposed AD would continue to require the actions in AD 2023–11–08 and would reduce the HPV clip replacement intervals, and would require, for certain airplanes, an additional revision of the existing AFM. This proposed AD would also limit the installation of HPV clips, as specified in a European Union Aviation Safety Agency (EASA AD), which is proposed for incorporation by reference (IBR). The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by May 13, 2024.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2024–0766; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For the EASA ADs identified in this NPRM, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* website *easa.europa.eu.* You may find this material on the EASA website at *ad.easa.europa.eu.* It is also available at *regulations.gov* under Docket No. FAA–2024–0766.
- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

FOR FURTHER INFORMATION CONTACT: Vladimir Ulyanov, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 206–231–3229; email: *vladimir.ulyanov@faa.gov*.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2024–0766; Project Identifier MCAI–2023–00711–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov*, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Vladimir Ulyanov, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 206–231–3229; email: *vladimir.ulyanov@faa.gov.* Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued AD 2023–11–08, Amendment 39–22454 (88 FR 38384, June 13, 2023) (AD 2023–11–08), for all Airbus SAS Model A330–841 and –941 airplanes. AD 2023–11–08 was prompted by an MCAI originated by EASA, which is the Technical Agent for the Member States of the European Union. EASA issued AD 2022–0227, dated November 24, 2022 (EASA AD 2022–0227), to correct an unsafe condition. EASA AD 2022–0227 superseded EASA AD 2022–0181, dated August 29, 2022 (which prompted FAA AD 2022–19–05, Amendment 39–22174 (87 FR 54870, September 8, 2022)).

AD 2023–11–08 requires maintenance actions, including an HPV seal integrity test, repetitive replacement of the HPV clips, revision of the existing AFM, and implementation of updates to the FAA-approved operator's MEL. The FAA issued AD 2023–11–08 to address a leaking HPV, which may expose the pressure regulating valve (PRV), which is installed downstream from the HPV, to high pressure, possibly damaging the PRV itself and preventing its closure. The unsafe condition, if not addressed, could result in high pressure and temperatures in the duct downstream from the PRV, with possible duct burst, damage to several systems, and consequent loss of control of the airplane.

Actions Since AD 2023–11–08 Was Issued

Since the FAA issued AD 2023–11–08, EASA superseded AD 2022–0227 and issued EASA AD 2023–0111, dated May 26, 2023 (EASA AD 2023–0111) (referred to after this as the MCAI), to correct an unsafe condition for all Airbus SAS Model A330–841 and –941 airplanes. The MCAI states that it has been determined that the interval for the HPV clip replacement must be based also on flight cycles accumulated by the HPV clip (*i.e.,* the interval must be reduced), and additional instructions applicable depending on BMC software configuration, have been identified (*i.e.,* an additional revision of the existing AFM is necessary for certain airplanes).

The FAA is proposing this AD to address the unsafe condition on these products. You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2024–0766.

Explanation of Retained Requirements

Although this proposed AD does not explicitly restate the requirements of AD 2023–11–08, this proposed AD would retain certain requirements of AD 2023–11–08. Those requirements are referenced in EASA AD 2023–0111, which, in turn, is referenced in paragraph (g) of this proposed AD.

Related Service Information Under 1 CFR Part 51

EASA AD 2023–0111 specifies procedures for the following actions:

- Revision of the Limitations section of the existing AFM and removal of the previously required limitations.
- Implementation of the instructions of the MMEL update on the basis of which the operator's MEL must be amended with new provisions and procedures for the following items: Air Conditioning Pack, Engine Bleed Air Supply System, Engine Bleed IP (Intermediate Pressure) Check Valve, and Engine Bleed HP Valve and cancel the dispatch restrictions. Amending the applicable AFM of an airplane by incorporating the AFM Temporary Revision (TR) TR813 does not allow removal of the MMEL update as required by paragraph (7) of this [EASA] AD for that airplane.
- A seal integrity test of each HPV, and corrective actions (including replacement of the HPV, and a detailed inspection of the wing bellow on engine 1(2) and replacement of any damaged or deformed wing bellow). Also, accomplishing a Seal Integrity Test of each HPV in accordance with the instructions of the AOT.

EASA AD 2023–0111 also describes the following maintenance instructions for group 1 and group 2, among other actions, to be accomplished following certain faults or failures:

- HPV troubleshooting procedure and additional maintenance actions after any Class 1 maintenance message associated to an HPV fault, and corrective actions (including replacement of the HPV or wing bellow).
- HPV seal integrity test and the additional maintenance actions after any Class 1 or Class 2 maintenance message associated to a PRV fault, and corrective actions (including replacement of the HPV and PRV, and a detailed inspection of the wing bellow on engine 1(2) and replacement of any damaged or deformed wing bellow).
- A visual (borescope) inspection of the engine bleed air system (EBAS) to detect signs of foreign object debris (FOD), including metallic debris in the butterfly valve and dents or damage of the flaps of the intermediate pressure check valve (IPCV), and dents and missing segments in the PRV, the header of the high pressure/intermediate pressure (HP/IP) duct, the y-duct, and the pylon ducts after any failure of an HPV clip and/or any of the HPV butterfly sealing rings, and corrective actions (including removing FOD and replacing the IPCV or PRV).
- A seal integrity test of each HPV after any take-off or go-around accomplished with ''packs OFF'' or ''APU bleed ON'' or ''engine bleed OFF,'' and corrective actions (including replacement of the HPV, and a detailed inspection of the wing bellow on engine 1(2) and replacement of any damaged or deformed wing bellow).
- Additional actions to be performed for any Class 1 maintenance message associated with an HPV fault.
- Initial and repetitive replacement of each HPV clip with a new HPV clip.
- Reporting to Airbus of any failure detected during the accomplishment of any maintenance action, seal integrity test, or visual inspection specified in EASA AD 2022–0181.

EASA AD 2023–0111 also specifies that HPV clips may be installed provided they are new and serviceable, and replaced in accordance with paragraph (17) Table 1.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

This product has been approved by the aviation authority of another country and is approved for operation in the United States. Pursuant to the FAA's

bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would retain certain requirements of AD 2023–11–08. This proposed AD would require accomplishing the actions specified in EASA AD 2023–0111 described previously, except for any differences identified as exceptions in the regulatory text of this proposed AD and except as discussed under ''Differences Between this Proposed AD and the MCAI.''

Compliance With AFM and MEL Revisions

EASA AD 2023–0111 requires operators to ''inform all flight crews'' of revisions to the existing AFM and MEL, and thereafter to ''operate the airplane accordingly.'' However, this AD does not specifically require those actions, as those actions are already required by FAA regulations.

FAA regulations require operators to furnish to pilots any changes to the AFM (for example, 14 CFR 121.137), and to ensure the pilots are familiar with the AFM (for example, 14 CFR 91.505). As with any other flightcrew training requirement, training on the updated AFM content is tracked by the operators and recorded in each pilot's training record, which is available for the FAA to review. FAA regulations also require pilots to follow the procedures in the AFM including all updates. 14 CFR 91.9 requires that any person operating a civil aircraft must comply with the operating limitations specified in the AFM.

FAA regulations (14 CFR 121.628(a)(2)) require operators to provide pilots with access to all of the information contained in the operator's MEL. Furthermore, 14 CFR 121.628(a)(5) requires airplanes to be operated under all applicable conditions and limitations contained in the operator's MEL.

Therefore, including a requirement in this proposed AD to operate the airplane according to the revised AFM and MEL would be redundant and unnecessary.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, the FAA proposes to incorporate EASA AD 2023–0111 by reference in the FAA final rule. This proposed AD would, therefore, require compliance with EASA AD 2023–0111 in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Using common terms that are the same as the heading of a particular section in EASA AD 2023–0111 does not mean that operators need comply only with that section. For example, where the AD requirement refers to ''all required actions and compliance times,'' compliance with this AD requirement is not limited to the section titled ''Required Action(s) and Compliance Time(s)'' in EASA AD 2023–0111. Service information required by EASA AD 2023–0111 for compliance will be available at *regulations.gov* under Docket No. FAA–2024–0766 after the FAA final rule is published.

Interim Action

The FAA considers that this proposed AD would be an interim action. The FAA anticipates that further AD action will follow.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 27 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Retained actions from AD 2023–11–08.	14 work-hours × $85 per hour = $1,190.	Up to $28	Up to $1,218	Up to $32,886.
New proposed actions	1 work-hour × $85 per hour = $85.	$85	$85	$2,295.

The FAA estimates the following costs to do any necessary on-condition actions that would be required based on the results of any required actions. The FAA has no way of determining the number of aircraft that might need these on-condition actions:

ESTIMATED COSTS OF ON-CONDITION ACTIONS

Labor cost	Parts cost	Cost per product
Up to 19 work-hours × $85 per hour = Up to $1,615	Up to $114,742	Up to $116,357.

The FAA has received no definitive data on which to base the cost estimates for the maintenance actions specified in this proposed AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce.

This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) AD 2023–11–08, Amendment 39–22454 (88 FR 38384, June 13, 2023); and

■ b. Adding the following new AD:

Airbus SAS: Docket No. FAA–2024–0766; Project Identifier MCAI–2023–00711–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by May 13, 2024.

(b) Affected ADs

This AD replaces AD 2023–11–08, Amendment 39–22454 (88 FR 38384, June 13, 2023) (AD 2023–11–08).

(c) Applicability

This AD applies to all Airbus SAS Model A330–841 and –941 airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 36, Pneumatic.

(e) Unsafe Condition

This AD was prompted by reports of leaking bleed system high pressure valves (HPVs), likely due to HPV clip failure and sealing ring damage, and by the determination that the replacement intervals required by AD 2023–11–08 must be reduced to address the unsafe condition. The FAA is issuing this AD to address a leaking HPV, which may expose the pressure regulating valve (PRV), which is installed downstream from the HPV, to high pressure, possibly damaging the PRV itself and preventing its closure. The unsafe condition, if not addressed, could result in could result in high pressure and temperatures in the duct downstream from the PRV, with possible duct burst, damage to several systems, and consequent loss of control of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2023–0111, dated May 26, 2023 (EASA AD 2023–0111).

(h) Exceptions to EASA AD 2023–0111

(1) Where EASA AD 2023–0111 refers to ''05 September 2022 (the effective date of EASA AD 2022–0181),'' this AD requires using September 15, 2022 (the effective date of AD 2022–19–05, Amendment 39–22174, (87 FR 54870, September 8, 2022)).

(2) Where paragraph (19) of EASA AD 2023–0111 refers to ''08 December 2022 (the effective date of EASA AD 2022–0227),'' this AD requires using the effective date of this AD.

(3) Where paragraph (21) of EASA AD 2023–0111 refers to ''08 December 2022 (the effective date of EASA AD 2022–0227),'' this AD requires using July 18, 2023 (the effective date of AD 2023–11–08).

(4) Where EASA AD 2023–0111 refers to its effective date, this AD requires using the effective date of this AD.

(5) Where paragraphs (1), (2), (3), and (7) of EASA AD 2023–0111 specify to inform all flight crews of airplane flight manual (AFM) revisions and dispatch limitations, and thereafter to operate the airplane accordingly, this AD does not require those actions, as those actions are already required by existing FAA regulations (see 14 CFR 91.9, 91.505, and 121.137).

(6) This AD does not adopt the reporting requirements of paragraph (23) of EASA AD 2023–0111.

(7) This AD does not adopt the ''Remarks'' section of EASA AD 2023–0111.

(i) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the International Validation Branch, mail it to the address identified in paragraph (j) of this AD. Information may be emailed to: *9-AVS-NYACO-COS@faa.gov.*

(i) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(ii) AMOCs approved previously for AD 2023–11–08 are approved as AMOCs for the corresponding provisions of EASA AD 2023–0111 that are required by paragraph (g) of this AD.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or EASA; or Airbus SAS's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Required for Compliance (RC):* Except as required by paragraph (i)(2) of this AD, if any service information referenced in EASA AD 2023–0111 contains paragraphs that are labeled as RC, the instructions in RC paragraphs, including subparagraphs under an RC paragraph, must be done to comply with this AD; any paragraphs, including subparagraphs under those paragraphs, that are not identified as RC are recommended. The instructions in paragraphs, including subparagraphs under those paragraphs, not identified as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the instructions identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to instructions identified as RC require approval of an AMOC.

(j) Additional Information

For more information about this AD, contact Vladimir Ulyanov, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 206–231 3229; email: *vladimir.ulyanov@faa.gov.*

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2023–0111, dated May 26, 2023.

(ii) [Reserved]

(3) For EASA AD 2023–0111, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* website *easa.europa.eu.* You may find this EASA AD on the EASA website at *ad.easa.europa.eu.*

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations,* or email *fr.inspection@nara.gov.*

Issued on March 21, 2024.

Victor Wicklund,

Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 35

[Docket No. RM22–2–000]

Compensation for Reactive Power Within the Standard Power Factor Range

AGENCY: Federal Energy Regulatory Commission, Department of Energy.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Regulatory Commission (Commission) proposes to revise Schedule 2 of its *pro forma* open-access transmission tariff (*pro forma* OATT), section 9.6.3 of its *pro forma* large generator interconnection agreement (LGIA), and section 1.8.2 of its *pro forma* small generator interconnection agreement (SGIA) to prohibit the inclusion in transmission rates of unjust and unreasonable charges related to the provision of reactive power within the standard power factor range by generating facilities. The Commission invites all interested persons to submit comments on the proposed reforms and in response to specific questions.

DATES: Comments are due May 28, 2024. Reply comments are due June 26, 2024.

ADDRESSES: Comments, identified by docket number, may be filed in the following ways. Electronic filing through *https://www.ferc.gov* is preferred.

- *Electronic Filing:* Documents must be filed in acceptable native applications and print-to-PDF, but not in scanned or picture format.
- For those unable to file electronically, comments may be filed by USPS mail or by hand (including courier) delivery.
  - *Mail via U.S. Postal Service Only:* Addressed to: Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE, Washington, DC 20426.
  - *Hand (including courier) delivery:* Deliver to: Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

The Comment Procedures section of this document contains more detailed filing procedures.

I. Introduction

1. The Commission is proposing to revise Schedule 2 of its *pro forma* OATT to prohibit transmission providers from including in their transmission rates any charges associated with the supply of reactive power within the standard power factor range [1] from generating facilities. We further propose to remove from the *pro forma* LGIA and *pro forma* SGIA the requirement that a transmission provider pay an interconnection customer for reactive power within the standard power factor range if the transmission provider pays its own or affiliated generators for the same service. Accordingly, transmission providers would be required to pay an interconnection customer for reactive

[1] Operating "inside the standard power factor range" refers to a generating facility providing reactive power within the power factor range set forth in the generating facility's interconnection agreement when the unit is online and synchronized to the transmission system.

power only when the transmission provider asks the interconnection customer to operate its facility outside the standard power factor range set forth in its interconnection agreement.

2. The Commission's policy on reactive power compensation has evolved since issuing Order No. 888 in 1996.[2] In Order No. 888, the Commission required that reactive supply and voltage control from generating facilities be offered as a discrete ancillary service by transmission providers and, to the extent feasible, charged for on the basis of the amount required. The Commission explained that there are two ways of supplying reactive power and controlling voltage. One is to install facilities as part of the transmission system, the cost of which is part of the cost of basic transmission service. The second is to use generating facilities to supply reactive power and voltage control, which must be unbundled from basic transmission service.

3. With respect to compensation, the Commission stated that the transmission provider's "rates for ancillary services should be cost-based." [3] The Commission expected, however, that transmission customers would be in a position to change the amount of reactive power service they required. The Commission also identified the possibility that reactive power could potentially someday be supplied by "a competitive market for such service" if "technology or industry changes" made such a market possible.

4. Then, in Order No. 2003, the Commission specifically addressed the circumstances and manner in which a transmission provider must pay for reactive power, inside and outside the standard power factor range (sometimes referred to as the "deadband").[4] In Order No. 2003, the Commission adopted a standard agreement for the interconnection of large generating facilities (the *pro forma* LGIA), which included the requirement that interconnection customers maintain a composite power delivery at continuous rated power output at the point of interconnection at a power factor within the range of 0.95 leading to 0.95 lagging [5] when synchronized to the transmission system, unless the transmission provider has established a different power factor range. Order No. 2003 required that a transmission provider compensate an interconnection customer for the provision of reactive power when the transmission provider requests the interconnection customer to operate its generating facility outside the established power factor range. With respect to reactive power within the established power factor range, the Commission initially concluded that the interconnection customer should not be compensated for reactive power when operating within the range established in the interconnection agreement because doing so "is only meeting [the generating facility's] obligation." [6] But in Order No. 2003–A, the Commission clarified that "if the Transmission Provider pays its own or its affiliated generators for reactive power within the established range, it must also pay the Interconnection Customer." [7] This standard is generally referred to as the comparability standard.

5. In sum, "Order Nos. 2003 and 2003–A establish a reactive power compensation policy that, in the first instance, treats the provision of reactive power inside the [standard power factor range] as an obligation of good utility practice rather than as a compensable service and permits compensation inside the [standard power factor range] only as a function of comparability." [8] The Commission took this approach because, where the generating facility is operating within the standard power factor range, it is doing no more than meeting its obligation as a generator, as specified in its interconnection agreement, to maintain the appropriate power factor required to maintain voltage levels for electric power injected into the transmission system during normal operations.[9] By comparison, reactive power provided outside of the standard power factor range is considered an ancillary service for transmitting power across the transmission system to serve load,[10] and thus, the Commission has required compensation for such service.

6. The Commission has also recognized that there is little to no incremental capital expenditure associated with the equipment necessary for the production of reactive power within the standard power factor range. That is because, for both synchronous and non-synchronous generating facilities,[11] the same equipment is used for the production of real power and reactive power.[12] In

Servs., Inc.*, 80 FERC ¶ 61,318, at 62,091 (1997) (noting also that the primary function of a generating plant is to produce real power; thus, if costs were allocated based on the "predominant" function of the equipment, "all of the costs of generation would thus be assigned to real power production and there would be no basis for any separate reactive power charge"); *BPA*, 120 FERC ¶ 61,211 at P 21 (finding that the

Continued

addition, the Commission has noted that any purported costs associated with such provision of reactive power can be recovered in other ways—such as through energy or capacity sales.[13]

7. Consistent with Order Nos. 2003 and 2003–A, multiple regional transmission organizations (RTO), independent system operators (ISOs), and non RTO/ISO transmission providers have elected not to compensate generating facilities for the provision of reactive power within the standard power factor range under Schedule 2 of the OATT.[14] Within these regions, there is no evidence that this lack of compensation has led to an insufficient supply of reactive power or that generating facilities in these regions have been unable to recover any costs associated with the production of reactive power. Additionally, the experiences of these regions where reactive power within the standard power factor range is not separately compensated indicate that investors are able to, and in fact do, develop generating facilities that can satisfy the obligations in their interconnection agreements without separate reactive power compensation.

8. Based on our review of the comments submitted in response to the Commission's Notice of Inquiry [15] in the instant docket, as well as the Commission's experience in the years since the issuance of Order No. 2003–A, we preliminarily find that allowing transmission providers to compensate generating facilities, affiliated and unaffiliated, for providing reactive power within the standard power factor range has resulted in unjust and unreasonable transmission rates. This is because generating facilities providing reactive power within the standard power factor range are only meeting their obligations under their interconnection agreements and in accordance with good utility practice, and in doing so, incur no additional costs or *de minimis* costs beyond that which they already incur to provide real power.[16] Accordingly, we propose to prohibit transmission providers from including in their transmission rates any charges associated with the supply of reactive power within the standard power factor range from a generating facility, including those owned by the transmission owner or its affiliates.

9. First, we propose to add the following sentence to the end of Schedule 2 of the *pro forma* OATT: [17] ''However, such rates shall not include compensation to generating facilities for the supply of reactive power within the power factor range specified in its interconnection agreement.'' Second, we propose to remove the following clause from the *pro forma* LGIA: [18] ''provided that if Transmission Provider pays its own or affiliated generators for reactive power service within the specified range, it must also pay Interconnection Customer.'' Third, we propose to remove the following sentence from the *pro forma* SGIA: [19] ''In addition, if the Transmission Provider pays its own or affiliated generators for reactive power service within the specified range, it must also pay the Interconnection Customer.''

II. Background

A. What is reactive power?

10. Almost all bulk electric power is generated, transported, and consumed in alternating current (AC) networks. Reactive power, which is measured in megavolt-amperes reactive (MVAr),[20] is a critical component of operating an AC electricity system and is required to control system voltage within appropriate ranges for efficient and reliable operation of the transmission system. Reactive power supports the voltages that must be controlled to provide for delivery of real power and for system reliability. Reactive power can be produced or absorbed [21] by generating facilities, power electronic equipment such as flexible AC transmission system devices, transmission lines and equipment, and load. As relevant here, generating facilities must either produce or absorb reactive power for the transmission system to maintain voltage levels required to reliably supply real power from generation to load.

11. The power factor is the ratio of a generating facility's real power to its apparent power.[22] Power factors can range from 1.0 to 0.0, with 1.0 representing only real power and 0.0 representing only reactive power. Most generating facilities have interconnection agreements that specify a standard power factor range within which the generating facility must be able to operate while producing its full real power capacity.

B. How has reactive power been compensated?

12. As noted above, the Commission's policy on reactive power compensation has evolved since issuing Order No. 888, which included provisions regarding reactive power from generating facilities as an ancillary service in Schedule 2 of the *pro forma* OATT.[23] As relevant here, in Order No. 2003, the Commission adopted a standard agreement for the interconnection of large generating facilities (the *pro forma* LGIA). This standard agreement included the requirement that interconnection customers maintain a composite power delivery at continuous rate of power output at the generating facility's point of interconnection at a power factor within the range of 0.95 leading to 0.95 lagging when synchronized to the transmission system, unless the transmission provider has established a different power factor range. Order No. 2003 required that a transmission provider compensate an interconnection customer for reactive power when the transmission provider requests that the interconnection customer operate its generating facility outside the established power factor range. With respect to reactive power within the established power factor range, the Commission initially concluded that the interconnection customer should not be compensated for reactive power when operating within the range established in the interconnection agreement because doing so ''is only meeting [the generating facility's] obligation.'' [24] But, in Order No. 2003–A, the Commission clarified that ''if the Transmission Provider pays its own or its affiliated generators for reactive power within the established range, it must also pay the Interconnection Customer.'' [25] Order No. 2003–A also exempted wind generating

incremental cost of reactive power service within the standard power factor range is minimal); *METC,* 97 FERC at 61,852–53 (''[R]eactive power provided, not as an ancillary service, but rather as a 'no cost' service within reactive design limitations, may therefore, be provided without compensation.'').

facilities from maintaining the established power factor range.[26]

13. The Commission treats the provision of reactive power within the standard power factor range differently from that outside the standard power factor range. Where reactive power is provided outside of the standard power factor range, it is considered ''an ancillary service for *transmitting power across the grid* to serve load.'' [27] By contrast, where the generating facility is operating within the standard power factor range, ''it is meeting its obligation as a generator to maintain the appropriate power factor in order to maintain voltage levels for energy *entering the grid* during normal operations.'' [28] ''Put differently, reactive support by generating facilities operating within the standard power factor range ensures that when these facilities inject real power—the product that their facilities exist to create and sell—onto the grid under normal conditions, they can do their part to maintain adequate voltages and to not threaten reliability.'' [29]

14. In Order No. 2006,[30] the Commission adopted identical power factor and compensation requirements for small generating facilities (facilities that have a capacity of no more than 20 MW) but exempted small wind generating facilities from the reactive power requirement. Subsequently, in Order No. 827,[31] the Commission eliminated the exemptions for both small and large wind generating facilities, thus requiring those facilities to provide reactive power. As a result, all newly interconnecting non-synchronous generating facilities were required to provide reactive power within the range of 0.95 leading to 0.95 lagging at the high-side [32] of the generator substation transformer as a condition of interconnection. With respect to compensation, the Commission applied the existing policies on compensation for reactive power as articulated in Order Nos. 2003 and 2003–A and reflected in the *pro forma* LGIA and SGIA. The Commission, however, stated that the record did not contain a sufficient basis for determining a method for calculating compensation for non-synchronous generating facilities and therefore stated that any non-synchronous generating facility seeking reactive power compensation would need to propose a method for calculating that compensation as part of its filing.[33]

15. Consistent with Order Nos. 2003 and 2003–A, the Commission has permitted transmission providers to eliminate separate compensation for generating facilities providing reactive power within the standard power factor range.[34] In these cases, the Commission affirmed its determination that the provision of reactive power within the standard power factor range is not compensable except as a matter of comparability. For example, in *BPA,* the Commission granted a complaint filed by Bonneville Power Administration (BPA) arguing that the rate schedules of certain independent power producers (IPP) for reactive power were no longer just and reasonable given BPA's decision to no longer pay its own or affiliated generators.[35] The Commission found that ''Commission policy clearly allows BPA to discontinue paying all its merchants for inside the deadband reactive power service.'' [36] The Commission also found that a transmission provider's decision to end compensation for reactive power within the standard power factor range did not compromise an IPP's ability to recover costs that they may incur in producing reactive power within such range.[37] The Commission stated that such generating facilities ''may be able to recover such costs in other ways—such as through higher power sales rates of their own.'' [38] To the extent that it could be argued that such recovery was not feasible for IPPs, the Commission found that such arguments lacked plausibility ''since the incremental cost of reactive power service within the deadband is minimal.'' [39] The Commission explained that ''[t]he purpose for which generation assets are built (including reactive power capability to maintain voltage levels for generation entering the grid) is to make sales of real power.'' [40]

16. The Commission made similar findings in *MISO,* wherein it accepted an FPA section 205 application by Midcontinent Independent System Operator, Inc. (MISO) transmission owners to end generator compensation for the provision of reactive power within the standard power factor range.[41] In accepting MISO transmission owners' proposal, the Commission reiterated its longstanding policy ''that the provision of reactive power within the standard power factor range is, in the first instance, an obligation of the interconnecting generator and good utility practice,'' such that ''MISO transmission owners do not have an obligation to continue to compensate an independent generator for reactive power within the standard power factor range when its own or affiliated generators are no longer being compensated.'' [42] The Commission also rejected any reliance arguments, reasoning in part that the provision of reactive power within the standard power factor range required little or no incremental investment.[43] In addition, the Commission found that generating facilities have other opportunities, beyond Schedule 2, through which they have the opportunity to seek to recover

their costs of providing reactive power.[44]

17. Of the six Commission-jurisdictional RTOs/ISOs, only three currently compensate generating facilities for reactive power provided within the standard power factor range. Generating facilities in PJM Interconnection, L.L.C. (PJM) generally use the cost-based AEP Methodology to calculate cost-of-service rates for the production of reactive power.[45] Because the same generation equipment contributes to the production of both real power and reactive power, the AEP Methodology attempts to functionalize each piece of equipment as between its contribution to real power and reactive power. Then, using allocators calculated based on the facility's output, the AEP Methodology allocates the cost of each piece of equipment based on its relative contribution to each function.

18. Generating facilities in ISO New England Inc. (ISO–NE) and New York Independent System Operator, Inc. (NYISO) are compensated for reactive power under flat rate designs that are adjusted for inflation.[46] California Independent System Operator Corporation (CAISO),[47] Southwest Power Pool, Inc. (SPP),[48] and MISO[49] do not pay separately for reactive power within the standard power factor range.

19. Outside the RTOs/ISOs, transmission providers that pay for the provision of reactive power within the standard power factor range generally compensate generating facilities using the AEP Methodology to set reactive power compensation on an individual generating facility basis. Many non-RTO/ISO transmission providers do not pay separately for reactive power provided within the standard power factor range.[50]

C. Notice of Inquiry

20. On November 18, 2021, the Commission issued an NOI[51] in the instant docket seeking comment on various issues regarding reactive power compensation and market design as a result of the significant changes that have taken place in the electric industry in the last two decades, including changes in the generation resource mix and a general shift away from cost-of-service rates for generating facilities selling into Commission-jurisdictional markets. Generally, the Commission sought to ''examine whether the current regime for reactive power capability compensation requires revisions to ensure that payments for reactive power capability accurately reflect the costs associated with reactive power capability.''[52] Specifically, the Commission sought comment on various constructs used by transmission providers to allow for reactive power cost recovery, including issues related to the application of the AEP Methodology as well as on issues regarding recovery of reactive power costs through existing energy and/or capacity markets.

21. The Commission received 37 initial comments and 10 reply comments in response to the NOI. The commenters to the NOI are listed and group members are identified in Appendix A. Groups representing transmission customers, such as Joint Customers, the Electricity Consumers Resource Council (ELCON), and the National Rural Electric Cooperative Association (NRECA), believe that the AEP Methodology results in unjust and unreasonable rates and recommend that the Commission establish a new rate methodology.[53] In particular, Joint Customers argue that ''reactive capability alone should not be the basis for compensation.''[54] By contrast, resource developers, power generation industry groups, and commenters who support the increased use of renewable energy argue in favor of retaining and modifying the AEP Methodology to address the issues discussed in the NOI.[55]

22. The Independent Market Monitor for PJM (PJM IMM) contends that cost-of-service compensation for the provision of reactive power within the standard power factor range is an ''atavistic regulatory paradigm'' that predates the introduction of wholesale power markets and, therefore, is unnecessary in light of potential compensation through the PJM markets.[56] ELCON states that it supports the PJM IMM's position and encourages the Commission to rely on ''competitive markets for the procurement of essential grid services such as reactive power—rather than reliance on traditional cost-of-service rates'' in order to ''ensure that electricity consumers pay the lowest price possible for reliable service.''[57]

23. RTOs/ISOs generally limit their comments to describing the rate designs in their respective regions, but PJM and CAISO did provide some commentary

[44] *Id.* P 41.

[45] The AEP Methodology derives its name from Opinion No. 440, where the Commission approved AEP's, a vertically integrated utility, method for calculating the costs of synchronous generation equipment associated with the production of reactive power. *See Am. Elec. Power Serv. Corp.,* Opinion No. 440, 88 FERC ¶ 61,141 (1999), *order on reh'g,* 92 FERC ¶ 61,001 (2000). In *WPS Westwood,* the Commission recommended that all generating facilities that have actual cost data and support documentation use the AEP Methodology. *See WPS Westwood Generation, LLC,* 101 FERC ¶ 61,290, at P 14 (2002).

[57] ELCON Initial Comments at 4–5.

on the merits. While PJM does not advocate for a particular solution in this proceeding, PJM highlights several issues with its current reactive power rate scheme.[58] Specifically, PJM asserts that ''enormous'' amounts of time and resources must be expended to file, litigate, and perform testing for each individual generating facility's cost-of-service rate case,[59] which PJM notes often results in a rate product that is ''of exceptionally poor quality for an important ancillary service.'' [60] CAISO states that despite the fact that it does not compensate for reactive power within the standard power factor range, it ''has seen no evidence to this point that resources cannot comply with reactive power dispatch instructions because they have insufficient funds for the equipment to meet the reactive power dispatch.'' [61]

III. Discussion

A. Need for Reform

24. Since Order No. 2003–A, the Commission has permitted transmission providers to compensate resources for providing reactive power within the standard power factor range provided that, to ensure comparability, the transmission provider pays both affiliated and unaffiliated resources. But, as explained in more detail below, providing reactive power within the standard power factor range is a ''no cost'' [62] or *de minimis* cost service in addition to being a resource's obligation under its interconnection agreement and good utility practice. Further, the record indicates that to the extent that generating facilities have any purported costs associated with providing reactive power within the standard power factor range, these costs can be recovered through energy or capacity sales and do not require separate compensation.

25. We thus preliminarily find that where transmission providers require transmission customers to pay for the provision of reactive power within the standard power factor range, transmission rates may be unjust and unreasonable, as they include costs without a sufficient economic basis or justification.

26. The Commission's experience since Order No. 2003–A and the comments submitted into this record demonstrate that where transmission providers provide compensation, the costs to transmission customers have increased substantially without any commensurate increase in benefits. For example, in many regions today, resources are sited without regard to where there is a geographic need for reactive power, which is significant given that (unlike real power) reactive power cannot be efficiently transmitted long distances. Where such resources are compensated for reactive power that is not needed or necessarily deliverable to areas of the transmission system where reactive power may be needed, customers may be paying for a perceived reliability benefit that they are not receiving.

27. Additionally, implementing the Commission-approved AEP Methodology has become increasingly administratively burdensome to transmission providers, transmission customers, other stakeholders, and the Commission due to the resource- and time-intensity involved in determining individualized, cost-of-service reactive power rates for generation facilities through hearing and settlement judge procedures.[63] It also often results in inconsistent rate treatment across facilities.

1. Compensation for Providing Reactive Power Within the Standard Power Factor Range May Be Unjust and Unreasonable

28. We preliminarily find that providing compensation for the provision of reactive power within the standard power factor range is unjust and unreasonable because the generating facility already provides reactive power within the standard power factor range at no cost or *de minimis* cost, because such compensation may result in undue compensation or other market distortions, and because providing reactive power within the standard power factor range is an obligation of the generating facility as an interconnection customer and consistent with good utility practice.

29. We begin by explaining why providing reactive power within the standard power factor range imposes no cost or *de minimis* cost to producers. Both synchronous and non-synchronous resources provide real and reactive power as joint products,[64] with joint costs.[65] For synchronous generating facilities, ''the same equipment is used to provide real and reactive power.'' [66] Non-synchronous generating facilities use a different physical process to produce reactive power, but ''the most critical element in VAR production, the inverter,'' [67] is also necessary for non-synchronous generating facilities to produce real power that can be injected into AC systems.[68] In other words, for both synchronous and non-synchronous generating facilities, ''[t]here are few if any identifiable costs incurred by generators in order to provide reactive power'' [69] beyond the investments in equipment already necessary to generate and supply real power to the transmission system.[70]

---

[58] PJM Initial Comments at 1–2.

[59] *Id.* at 2–3, 5–7. PJM notes that ''many other parties beyond the generator are drawn into the proceeding, including PJM, FERC Trial Staff, zonal transmission customers, transmission owners, and/or the Independent Market Monitor for PJM, among others. These parties must in turn expend time and resources of their own in discovery and analysis of the generator's specific cost characteristics and claims, in order to formulate their own position in the proceeding and form a basis for negotiations or litigation.''

Pub. Serv. Co.,* 94 FERC ¶ 61,027, at 61,080 (2001) (rejecting generators' arguments for reactive power compensation for operating within standard power factor range because the generators failed to demonstrate that ''such a requirement will limit the real power output of a generating unit and therefore will not result in any lost opportunity costs'' or that operating a generating unit within the proposed

Continued

30. Moreover, because real and reactive power are provided as joint products with joint costs, any allocation of joint fixed costs between real and reactive power could be viewed as inherently arbitrary.[71] When separate reactive power payments were first established, utilities typically provided both generation and transmission as vertically integrated utilities under a cost-of-service regime. In such a construct, the allocation of costs between generation and transmission facilities had little significance because it affected only the allocation of costs between transmission and generation rates. In other words, prior to the advent of IPPs (which operate only generation facilities), market-based rates for energy, and the development of RTOs/ISOs and bilateral markets, the allocation of fixed costs between real and reactive power did not have a major effect on the overall revenues of a combined vertically integrated utility.[72] However, for reactive power cost recovery, the introduction of RTO/ISO markets and bilateral transactions in non-RTO/ISO regions has provided more efficient and transparent means of compensating resources than the cost-of-service model. For example, RTO/ISO markets provide generating facilities with a means to recover the costs they incur to provide various services, such as real power sales, that rely on the same equipment used for reactive power supply.[73] Additionally, generating facilities in non-RTO/ISO regions (*e.g.,* IPP) can compete in bilateral markets to recover their investment, production, and operating costs.

31. We recognize that the production of reactive power within the standard power factor range can result in certain incremental variable costs such as fuel, maintenance, and potentially other costs. That said, the Commission has repeatedly found,[74] and commenters agree, that ''[v]ariable costs of generating reactive power are *de minimis.*'' [75] Indeed, as SPP notes, variable costs ''are generally limited to changes in losses within the generating facility which are part of the overall efficiency of the resource and, as such, are typically captured in the resource offers.'' [76] Similarly, Joint Customers state that, in CAISO, SPP, and other regions that do not separately compensate for reactive power within the standard power factor range, ''perhaps generators are adequately recovering their costs through some other means.'' [77]

32. By contrast, but outside the scope of this rulemaking, the production of reactive power *outside* of the standard power factor range, for which transmission providers are required to provide compensation, may result in increased costs, including opportunity costs to the generating facility.[78] As such, if the transmission provider requires a generating facility to provide reactive power outside of the standard power factor range, the generating facility may have to ''reduce its MW output in order to comply with such an instruction[,]'' which could limit the generating facility's opportunity to receive compensation for real power sales.[79]

33. Lastly, consistent with Order No. 2003 and multiple subsequent Commission orders since then, generating facilities must produce reactive power in order to be allowed to interconnect to the transmission system, and the industry has recognized that regulating voltage among interconnected generating facilities is a necessary component of good utility practice in an interconnected transmission system. For example, CAISO states that ''[t]he rationale for the CAISO's existing approach to reactive power compensation is that the reactive power ranges called for in each interconnection agreement represent a reasonable range of what a generator is expected to provide the CAISO without additional compensation in accordance with good utility practice and as a condition of being part of the CAISO markets and CAISO grid.'' [80] The Commission, therefore, has required generating facilities to provide reactive power within the standard power factor range under their interconnection agreements and good utility practice.[81]

standard power factor range will ''affect the generation output of a unit'').

[71] *See* PJM IMM Initial Comments at 2 (''There is no reason to include complex rules that arbitrarily segregate a portion of a resource's capital costs as related to reactive power and that require recovery of that arbitrary portion through guaranteed revenue requirement payments based on burdensome cost of service rate proceedings.''); *id.* at 3, 5, 21, 24; *In re Permian Basin Area Rate Cases,* 390 U.S. at 804 (''There is ample support for the Commission's judgment that the apportionment of actual costs between two jointly produced commodities, only one of which is regulated by the Commission, is intrinsically unreliable.''); Richard A. Posner, *Natural Monopoly and Its Regulation,* 21 Stan. L. Rev. 548, 595 (1969) (''[W]here services involve joint or common costs a rational allocation is impossible even in theory. How much of the cost of a telephone handset is assignable to local and how much to interstate telephone service?''); *see also A.A. Poultry Farms, Inc.* v. *Rose Acre Farms, Inc.,* 881 F.2d 1396, 1400 (7th Cir. 1989) (''How does one allocate the cost of activities that have joint products? Agencies engaged in ratemaking struggle with these problems for years, even decades, without producing clear answers.'').

[72] *See N. States Power Co.,* 64 FERC ¶ 61,324, at 63,379 (1993) (''In general, so long as a utility was selling generation and transmission services on a bundled basis (*i.e.,* full requirements service), the functionalization of costs between generation and transmission was not critical. The historical functionalization of costs, or bright line approach, was administratively simple, it had little or no impact on the overall (*i.e.,* bundled) rate for requirements service, and problems involving cross-subsidization between the generation and transmission functions were minimal. However, strict application of the traditional bright line approach may need to be reexamined in light of changes taking place in the electric industry—particularly the increase in transmission-only service.'').

[73] *See, e.g.,* PJM IMM Initial Comments at 2 (''The current process is an inefficient waste of time because it relies on an atavistic regulatory paradigm that is not relevant in the PJM market framework. The AEP Method[ology] was created, before the creation of the PJM markets, by a regulated utility that had regulatory and financial reasons to want to define some generation costs as transmission costs.''); ELCON Initial Comments at 5 (''The AEP Methodology was established as a workable heuristic during a period in which organized markets were in their infancy and nearly all new resources were synchronous.'').

[74] MISO Rehearing Order, 184 FERC ¶ 61,022 at PP 29–31 (finding that providing reactive service requires ''little or no incremental investment'' by both synchronous and non-synchronous resources); *PJM Interconnection, L.L.C.,* 151 FERC ¶ 61,097, at PP 7, 28 (2015) (finding that non-synchronous generating facilities are comparable to traditional synchronous generating facilities, in that there are for both types of generating facilities very little if any incremental costs incurred to provide reactive power); *Panda Stonewall, LLC,* 176 FERC ¶ 61,072, at P 6 n.9 (2021) (stating that Panda Stonewall's annual revenue requirement of $2,051,894 reflected a heating losses component of $10,018). We note that the heating losses component reflects the incremental cost of providing reactive power.

[76] SPP Initial Comments at 2–3.

[77] Joint Customers Initial Comments at 9; *see also* PJM IMM Initial Comments at 1–4; CAISO Initial Comments at 3–4; Dominion Initial Comments at 12; *MISO,* 182 FERC ¶ 61,033 at P 58 (''[J]ust as the MISO [transmission owners'] generators may try to recover their lost revenue through higher power sales rates, so too may independent power producers try to recover their lost revenue through their own higher power sales rates.''); *BPA,* 120 FERC ¶ 61,211 at P 21; *Sw. Power Pool, Inc.,* 119 FERC ¶ 61,199 at P 39 (stating that IPPs ''are free to negotiate rates that they charge their customers for real power that are sufficient to compensate them for any costs that they may incur in producing reactive power within their deadbands, just as affiliated generators may seek to negotiate rates that they charge their customers that are sufficient to compensate them for the costs of any reactive power that they provide within their deadbands.'').

[78] *See, e.g.,* SPP Initial Comments at 2 (''SPP's current Schedule 2 rate per MVArh was calculated to represent the cost of reactive power production from recently constructed generators so as to reflect the upper end of such costs. This rate is applied to compensate qualifying generators located throughout the SPP region that provide reactive power support *outside a power factor dead band.*'' (emphasis added) (citations omitted)).

[79] CAISO Initial Comments at 4.

[80] CAISO Initial Comments at 3.

[81] *See, e.g., MISO,* 182 FERC ¶ 61,033 at P 53 (''Bearing in mind that the provision of reactive power within the standard power factor range is, in the first instance, an obligation of the interconnecting generator and good utility practice, MISO [transmission owners] do not have an obligation to continue to compensate an independent generator for reactive power within

Thus, the obligation for generating facilities to provide reactive power within the standard power factor range pursuant to their interconnection agreements is separate from any compensation for reactive power. In turn, because providing reactive power within the standard power factor range is already obligated (a no cost or *de minimis* cost service), compensating for providing such reactive power could result in undue compensation to generating facilities [82] at the expense of transmission customers.

2. Adverse Impacts of the Commission's Current Reactive Power Compensation Policy

34. In the years since the issuance of Order No. 2003–A, numerous issues have arisen in regions that provide compensation to generators for the provision of reactive power within the standard power factor range.

35. First, compensation for reactive power within the standard power factor range is not tied to whether there is a particular geographic need for reactive power. As noted above, reactive power cannot be transferred over long distances across the transmission system and, as a result, the reliability benefits of a generating facility's reactive power depend, in part, on its location.[83] But, compensation in a region for reactive power within the standard power factor range does not vary based on location, meaning that some generating facilities are compensated for reactive power that is not needed at the generating facilities' location on the transmission system. As the MISO transmission owners argue, ''[t]he current framework is . . . unjust and unreasonable because resources are being paid for reactive power capability in geographic areas where not all of the available reactive power is necessary. There are service areas with concentrations of generation but very little load, creating an exporting region where load pays for reactive capability that is unneeded.'' [84] Joint Customers add that, with the vastly increased amount of generation and increase in the number of generators seeking reactive compensation, the Commission ''should reconsider whether unbounded payment for reactive power capability is appropriate, or, to the contrary, whether transmission customers are paying for capability for which they do not receive commensurate benefits.'' [85] It appears that under the current framework, generating facilities are eligible to receive cost-based reactive power payments that do not reflect the reliability benefits of the reactive power at each facility's location (*i.e.,* the extent to which the generating facility supports the voltage of the transmission system), and that the reliability benefit may be zero for certain generating facilities.

36. Second, many commenters explain that in regions that allow generating facilities to file individualized cost-of-service reactive power rates, the process for determining those rates has proven to be resource-intensive, time-intensive, and administratively burdensome for ratepayers, transmission providers, and market participants.[86] Moreover, commenters explain that in addition to being burdensome, the resulting black box settlements produce a ''rate product'' that is ''of exceptionally poor quality for an important ancillary service.'' [87]

37. As noted in the NOI, most of the filings at the Commission seeking to establish rates for reactive power compensation are made by generating facilities (both synchronous and non-synchronous) that have received waivers of the Commission's requirement to maintain their accounts under the USofA rules and to file FERC Form No. 1.[88] Due, in part, to the lack

the standard power factor range when its own or affiliated generators are no longer being compensated.'' (citations omitted)); *id.* P 54 (''We find unpersuasive protesters arguments that it is not just and reasonable to eliminate compensation for Reactive Service within the standard power factor range because generators have come to rely on the compensation for Reactive Service in order for the generators to remain financially viable. The Commission has previously rejected such arguments, finding that all newly interconnecting generators are required to provide reactive power within the power factor range of 0.95 leading to 0.95 lagging as a condition of interconnection.'' (citations omitted)); *PNM,* 178 FERC ¶ 61,088 at P 29 (rejecting generator's arguments that it is ''just and reasonable for it to be compensated for investments made'' to provide reactive support consistent with interconnection requirements even though transmission provider elected to no longer pay its own or affiliate generators for such reactive power); *Nev. Power Co.,* 179 FERC ¶ 61,103 at P 22 (finding that the generating companies' argument, ''that it is not just and reasonable to eliminate their compensation for reactive service because they made investments in their generating facilities based on the expectation that they would receive compensation for reactive service,'' unpersuasive because all newly interconnecting generators are required to provide reactive power within the standard power factor range as a condition of interconnection); Order No. 2003, 104 FERC ¶ 61,103 at P 546.

[82] *See Belmont Mun. Light Dep't* v. *FERC,* 38 F.4th 173, 179, 186 (D.C. Cir. 2022) (finding that the Commission's approval of a portion of ISO–NE's Inventoried Energy Program ''was not reasoned decision making'' and ''thwart[ed] the [Commission's] own 'longstanding policy that rate incentives must be prospective and that there must be a connection between the incentive and the conduct meant to be induced' '' because it would compensate market participants for conduct they already engage in as part of standard business operations). Compensating for reactive power that is already required for interconnection purposes could create a ''windfall'' as suggested by the D.C. Circuit in *Belmont. Id.* at 186 (citing *San Diego Gas & Elec. Co.* v. *FERC,* 913 F.3d 127, 137 (D.C. Cir. 2019)). *But see* Order No. 2003–C, 111 FERC ¶ 61,401 at P 42 (finding that because providing reactive power within the established range is an ''important service,'' payment for such service does not constitute a ''windfall.'').

[84] MISO Transmission Owners Initial Comments at 7–8; *see also* Joint Customers Initial Comments at 8–9; Alliant Initial Comments at 4; NYISO, *Reliability and Market Considerations for a Grid in Transition,* at 105 (2019), *https://www.nyiso.com/documents/20142/2224547/Reliability-and-Market-Considerations-for-a-Grid-in-Transition-20191220%20Final.pdf/61a69b2e-0ca3-f18c-cc39-88a793469d50* (''Moreover, because voltage support needs are local, the NYISO will need voltage support within specific narrow regions, not necessarily at the locations at which resources able to provide reactive power without incurring substantial commitment costs may be located.'').

[85] Joint Customers Initial Comments at 8–9.

[86] *Id.* at 4–5, 12–13 (''[T]he case-by-case approach to reactive capability rates based on the AEP methodology makes it very difficult for proceedings to be resolved in an efficient manner.''); PJM IMM Initial Comments at 2, 4 (noting that ''[a]pplying cost of service rules is costly and burdensome and unnecessary'' and asserting that ''[r]emoving cost of service rules would avoid the significant waste of resources incurred to develop unneeded cost of service rates''); PJM Initial Comments at 10 (''[T]he current construct for reactive power capability compensation in PJM imposes a significant administrative burden on PJM and its resource owners, both in terms of settlements and testing.''); Dominion Initial Comments at 2–3 (noting that settlement proceedings are time consuming and not transparent); *see also* Clean Energy Coalition Reply Comments at 5; ELCON Initial Comments at 6–7; Renewable Generation Reply Comments at 25; EDFR Initial Comments at 4–5; Pine Gate Renewables Initial Comments at 6–7; PJM Power Providers Group Initial Comments at 4–5; American Electric Power Service Corporation Initial Comments at 2–3; EPSA Initial Comments at 2; Nuclear Energy Institute Initial Comments at 6–7; PJM IMM Initial Comments at 2 (''Most reactive proceedings for generators in PJM are resolved in black box settlements that fail to address the merits of the cost support provided, result from an unsupported split the difference approach, and that, not surprisingly, produce a wide, unreasonable and discriminatory disparity among the rates per paid per MW-year.'').

[87] PJM Initial Comments at 3; *see also* PJM IMM Initial Comments at 2.

[88] The Commission's accounting and reporting requirements are particularly important to the evaluation and monitoring of cost-based rates. *See, e.g., Alcoa Power Generating Inc.,* 172 FERC ¶ 61,052, at P 29 (2020); *Third-Party Provision of Ancillary Servs.; Acct. & Fin. Reporting for New Elec. Storage Technologies,* Order No. 784, 78 FR 46178 (July 30, 2013), 144 FERC ¶ 61,056 (2013) (accounting and reporting requirements ''support the rate oversight needs of both this Commission and State Commissions'' and are ''important in developing and monitoring rates, making policy decisions, compliance and enforcement initiatives, and informing the Commission and the public about the activities of entities that are subject to these accounting and reporting requirements.''); *Carville Energy LLC,* 104 FERC ¶ 61,252, at 61,833 n.13 (2003) (''For example, non-exempt public utilities keep financial records, required by this

Continued

of availability of this cost-of-service information, many of these filings are set for hearing and settlement judge procedures.[89] Many commenters, including Joint Customers, note that these settlement proceedings ''require a significant expenditure of resources that include legal and technical consultants,'' and while many of the cases settle on a ''black box'' basis, ''significant effort is undertaken by the Joint Customers [and other participants] in order to obtain information necessary to perform an *AEP*-like calculation and develop settlement proposals.'' [90] The PJM IMM notes that, in its experience, ''[m]ost reactive proceedings for generators in PJM are resolved in black box settlements that fail to address the merits of the cost support provided, result from an unsupported split the difference approach, and that, not surprisingly, produce a wide, unreasonable and discriminatory disparity among the rates paid per MW-year.'' [91] Joint Customers also note that the time-consuming process for resolving individual reactive service rate proceedings may leave customers without adequate refund protection.[92]

38. Third, the process for testing and verification under the AEP Methodology is unduly burdensome. Under that process, resources must coordinate with the transmission provider to test and verify capability to produce reactive power under certain conditions, which often requires multiple tests over a series of months and that yields inconsistent results across resources. PJM notes that this has caused a ''significant influx of resources that are not [otherwise] required to test under PJM Manual 14–D . . . seeking to test solely for purposes of filing and/or litigating reactive power capability cases.'' [93] PJM notes that ''under the current regulatory structure, rather than PJM spending time and resources testing units based on *PJM's* operational needs as the Transmission Provider, PJM is now often spending time and resources testing units based on the *resource owner's* need to file and litigate its individual cost-of-service rate case.'' [94]

39. Fourth, as discussed above, in regions where resources recover their costs by participating in organized competitive wholesale markets, providing separate compensation for the provision of reactive power within the standard power factor range risks overcompensation and market distortion in ways that did not exist prior to the existence of organized markets.[95] As noted above, the AEP Methodology originated in an era of vertically integrated utilities, when most utilities (including AEP) filed FERC Form No. 1s, used the USofA to classify their costs, and recovered those costs entirely through cost-based rates.[96] It was thus intended to be a cost-of-service allocation method for assigning joint costs between the generation and transmission functions, but, as the PJM IMM argues, ''[t]he false precision of the AEP Method is entirely based on arbitrary assumptions.'' [97] The PJM IMM argues that even proponents of the AEP Methodology do not claim that the methodology's goal is to recover only the specific costs associated with the production of reactive power, which the PJM IMM claims is not possible in most cases. The PJM IMM further argues that the AEP Methodology was not intended to define such costs. The imprecision associated with the AEP Methodology was less problematic when the total amount that a utility recovered was largely unchanged by the allocation of fixed costs between a generation and transmission function. But, as commenters point out, today most generating facilities recover their costs through competitive markets in both RTO/ISO and non-RTO/ISO regions. The AEP Methodology's imprecision therefore becomes more significant because it can lead to arbitrary increases in the utility's total recovery when cost-based reactive power payments are added to any market recoveries.[98] That is especially true when markets fail to account for separate, cost-based reactive power revenues by using standard rate making techniques (*i.e.,* revenue crediting).[99] For example, in PJM, the

Commission, which, among other things, *are designed to aid in the development of the cost-based rates.*'' (emphasis added)).

[89] Indeed, as the Commission has explained, Parts 41, 101, and 141 of its regulations are critical to its statutory obligation under sections 205 and 206 of the FPA to ensure that rates are just, reasonable, and not unduly discriminatory or preferential. *See PSEG Fossil, LLC,* 97 FERC ¶ 61,211, at 61,920–21 (2001) (*PSEG*), *reh'g denied,* 98 FERC ¶ 61,169 (2002). Moreover, the Commission has stated that customers subject to cost-based rates have a right to cost data so that they may evaluate the ongoing reasonableness of their rates. *See also PSEG,* 97 FERC at 61,920–21.

[90] Joint Customers Initial Comments at 5. When the cases do not settle, Joint Customers note that even more resources must be expended to litigate the individual revenue requirement proposal. For example, Joint Customers note that the Panda Stonewall proceeding lasted four years from the effective date of Panda's reactive service rate to the Commission's order establishing the just and reasonable rate. *Id.* (citing *Panda Stonewall, LLC,* Opinion No. 574, 174 FERC ¶ 61,266, *reh'g denied,* 175 FERC ¶ 62,132 (2023)). During this time, Joint Customers note that they and others paid the approximately $6.2 million annual revenue requirement filed by Panda. Joint Customers state that the Commission's Order on Initial Decision established an approximately $2 million annual revenue requirement. Joint Customers note that this difference resulted in ''approximately $17 million in overcollection and delayed refunds due to customers.'' *Id.*

[91] PJM IMM Initial Comments at 2. Many other commenters express concern over the lack of transparency associated with how these rates are calculated. *See, e.g.,* American Electric Power Service Corporation Initial Comments at 2; Renewable Generation Companies Initial Comments at 22–23; ELCON Initial Comments at 6–7; Joint Customers Initial Comments at 6; PJM Initial Comments at 3–4, 11; Nuclear Energy Institute Initial Comments at 6–7; PSE&G Initial Comments at 10.

[92] *See, e.g.,* Joint Customers Initial Comments at 13, 26; *see also id.* at 28–29 (''The 15-month statutory limitation on refunds [in FPA section 206 proceedings] creates an incentive for the applicant to delay the proceeding in order to profit from their delay by running out the clock to enter a period where the applicant continues to collect the rate as filed (likely to later be determined unjust and unreasonable) without any ongoing refund obligation. While the statute provides for further refunds upon a showing of dilatory behavior by the applicant, it would be difficult to demonstrate such dilatory behavior when the delay in resolution is due to settlement proceedings, or the procedural schedule in a litigated proceeding. Therefore, customers are left in the position of either foregoing or prematurely ending settlement discussions in order to try to achieve a litigated outcome within the 15-month refund period.'').

[93] PJM Initial Comments at 6–7.

[94] *Id.* at 7 (emphasis in original); *see also* Vistra Reply Comments at 8 (''The time and resources that PJM must expend to conduct testing for the purposes of supporting individual rate cases is an anathema to the core purpose of the tests, which is system reliability.'').

[95] *See* ELCON Initial Comments at 5; PJM IMM Initial Comments at 22–23.

[96] *See, e.g.,* Joint Customers Reply Comments at 6–7; ELCON Initial Comments at 5.

[97] PJM IMM Initial Comments at 5. As a point of comparison, black start compensation also requires some cost allocation of joint costs, but this is arguably distinct from allocation for reactive power because incremental costs incurred to provide black start service can be separately identified (*e.g.,* unlike most generators, which require power from the transmission system during start-up, black start-capable generators may have small, on-site diesel generation units, or equivalent equipment, to independently support their station power needs and other electricity-using activities during start-up). *See, e.g.,* PJM Interconnection, L.L.C., Intra-PJM Tariffs, OATT Schedule 6A (12.2.0). Payment is not related only to identifiable costs. Such black start resources will also generally have a different interconnection arrangement which allows for black start service. The determination of whether a particular unit is a black start unit is ultimately defined in the applicable tariff and relates to capability rather than the presence of specific equipment.

[98] PJM IMM Initial Comments at 9–10; PJM IMM Reply Comments at 4 (''[T]he AEP Method allocates a portion (X percent) of the cost of the plant to MVAR production and the balance (1 − X percent) to MW production. In a pure cost of service world, the allocators add to 100% and there can be no over recovery, regardless of the value of X. But that is not true when the units operate in a competitive wholesale power market.'').

[99] *See* PJM IMM Reply Comments at 3 (''The Commission has recognized the relevance of the issue associated with a 'resource receiving cost-

capacity market rules currently account for reactive power payments to resources by assuming average reactive power compensation of $2,546 per MW-year.[100] But reactive power revenue requirements in PJM, many of which result from ''black-box'' settlements, range from roughly $1,000 per MW-year to $13,000 per MW-year.[101] As the PJM IMM explains, this wide range of actual compensation, which is both above and below the amount of assumed reactive power compensation in the capacity market rules, can lead to market distortions.[102]

40. The challenges experienced under the Commission's current reactive power compensation policy are exacerbated by the increasing volume of filings for reactive power compensation. Since Order No. 2003–A, and particularly in recent years, the number of reactive power filings has significantly increased.[103] In turn, the amount of reactive power compensation paid to generating facilities by transmission providers and collected from transmission customers has likewise increased.[104] We are concerned that transmission customers may not be receiving a roughly commensurate increase in reliability benefit.[105]

B. Proposed Reform

41. Having preliminarily found that allowing transmission providers to include charges associated with the supply of reactive power within the standard power factor range from generating facilities results in transmission rates that may be unjust and unreasonable, we propose, pursuant to FPA section 206,[106] that a just and reasonable replacement rate is to prohibit transmission providers from including in their transmission rates any charges associated with the supply of reactive power within the standard power factor range from a generating facility.

42. Eliminating such charges ensures that transmission customers do not pay transmission rates that include costs without an economic basis or justification. Moreover, eliminating compensation is consistent with the Commission's original statement in Order No. 2003 (as modified in Order No. 2003–A) and in subsequent cases on the non-compensability of providing reactive power within the standard power factor range. Eliminating compensation also addresses the undue discrimination concerns articulated by the Commission in Order No. 2003–A regarding the disparate treatment of affiliated and non-affiliated generating facilities, which led to the Commission's comparability policy. By requiring the same approach to compensation for all generating facilities, which necessarily includes both affiliates and non-affiliates, we address the potential for undue discrimination by the transmission provider by providing that comparability would no longer be a justification for payment. To the extent that there are incremental costs to provide reactive power within a generating facility's standard power factor range, we see no reason why such costs should not be reflected through energy or capacity offers made in organized and bilateral markets.[107]

1. Eliminating Separate Compensation Will Not Affect Reliability

43. We preliminarily find that prohibiting transmission providers from including in their transmission rates any charges associated with the supply of reactive power within the standard power factor range from a generating facility is just and reasonable because compensation for providing reactive power within the standard power factor range is unnecessary to maintain reliability.[108] Several commenters argue that separate reactive power compensation is necessary to maintain reliability. For example, Vistra, among others, argues that separate compensation for reactive power is necessary because without it, regions seeing increasing shares of non-synchronous generating facilities in their generation mixes may not have sufficient reactive power.[109] We preliminarily disagree with this argument because we preliminarily find that requiring transmission providers to continue paying for reactive power already required by a generating facility's interconnection agreement is not necessary to ensure that generating facilities provide reactive power when required.[110] As explained in *MISO,* new

based rate recovery while concurrently receiving compensation for market-based rate services involves potential double recovery of costs borne by the relevant cost-based ratepayers.' '' (quoting *Utilization of Elec. Storage Res. for Multiple Servs. When Receiving Cost-Based Rate Recovery,* 158 FERC ¶ 61,051, at P 15 (2017)); ELCON Initial Comments at 5 (''[R]ecouping costs through organized markets while separately recouping the same costs through a cost-of-service rate—would result in double recovery, imposing additional and unnecessary costs on consumers.'').

[100] *See PJM Interconnection, L.L.C.,* 182 FERC ¶ 61,073, at P 135 (2023).

[101] PJM IMM Initial Comments at 21–22; *see also* PJM Initial Comments at 4 (''There is a wide range of revenue requirements that may ultimately be agreed to by the parties to a given proceeding, and the willingness of parties to agree or not agree to a particular number may be influenced by factors completely exogenous to the actual cost and service characteristics of the unit (*e.g.*[,] the legal fees associated with continuing the litigation).'').

[102] PJM IMM Initial Comments at 21–22 (''For example, a marginal resource with reactive revenue of $5,000 per MW-year reflected in their net ACR offer would suppress the capacity market clearing price. Conversely, a marginal resource with a reactive revenue of $1,000 per MW-year reflected in their net ACR offer would inflate the capacity market clearing price.'').

[103] *See, e.g.,* Joint Customers Initial Comments at 4–5 (''In PJM's Dominion zone, there has been a significant increase in the number of reactive revenue requirements filings as well as a drastic increase in the proposed revenue requirements for Reactive Service.''); Vistra Initial Comments at 10 (noting the ''sheer volume of reactive power hearing and settlement proceedings in recent years''); PJM IMM Initial Comments at 13 (explaining that as of February 2022, there were ''over two dozen active proceedings'' and that since 2016, there have been ''more than 100'' reactive power proceedings).

[104] For example, as of December 2023, the total RTO-wide reactive power compensation paid to generating facilities in PJM was approximately $384 million. *See* PJM, Reactive Supply and Voltage Control Revenue Requirements 2023, *https://www.pjm.com/markets-and-operations/billing-settlements-and-credit.aspx* (cell D296 in the .xls file for December 2023).

[107] *See, e.g.,* SPP Initial Comments at 2–3 (''Variable costs of generating reactive power are de minimis and are generally limited to changes in losses within the generating facility which are part of the overall efficiency of the resource and, as such, are typically captured in the resource offers submitted to the SPP Integrated Marketplace.''); PJM IMM Initial Comments at 2–3 (''Payments based on cost of service approaches result in distortionary impacts on PJM markets. Elimination of the reactive revenue requirement and the recognition that capital costs are not distinguishable by function would increase prices in the capacity market. . . . The simplest way to address this distortion would be to recognize that all capacity costs are recoverable in the PJM markets.'').

[108] *See* CAISO Initial Comments at 5–6; Joint Customers Reply Comments at 5–6 (''Despite unsubstantiated claims to the contrary, there has been no demonstration that there is any dearth of reactive power sufficient to maintain reliability in regions where reactive compensation is not based on the AEP methodology.''); MISO Initial Comments at 6 (explaining that the ''method of compensation is incidental to reliability'' because generating facilities' obligation to provide reactive power within the standard power factor range ''ensures that reactive power will be provided to support the Transmission System.'').

[109] Vistra Comments at 4 (citing NYISO, *Reliability and Market Considerations for a Grid in Transition,* 25–26, 104–06 (2019), *https://www.nyiso.com/documents/20142/2224547/Reliability-and-Market-Considerations-for-a-Grid-in-Transition-20191220%20Final.pdf/61a69b2e-0ca3-f18c-cc39-88a793469d50* and CAISO, *Reactive Power Requirements—Automatic Voltage Regulator Systems,* Docket No. ER17–490–000 (filed Dec. 5, 2016)). *But see* Joint Customers Reply Comments at 6 (urging ''the Commission to maintain a focus on reliability as the basis for compensating for Reactive Service, but also to be wary of attempts by others to use 'reliability' to justify over-compensation for Reactive Service or to preserve outdated methodologies.'').

[110] *See Essential Reliability Servs. & the Evolving Bulk-Power Frequency Response,* Order No. 842, 83

Continued

and existing generating facilities will still be required to provide reactive power within the standard power factor range as a condition of obtaining and maintaining interconnection.[111] Additionally, as CAISO notes, its current approach to not compensate for reactive power provided within the standard power factor range has not resulted in major issues of concern with the level of reactive power.[112]

44. We seek comment on the reliability impact of prohibiting transmission providers from including in their transmission rates any charges associated with the supply of reactive power within the standard power factor range from a generating facility in regions where generating facilities currently receive such compensation.

2. Eliminating Separate Compensation Does Not Preclude Generating Facilities From Recovering Their Costs

45. We preliminarily find that separate compensation for providing reactive power within the standard power factor range is not necessary for resources to be able to recover their costs. Some commenters argue that cost-of-service payment for reactive power is important for obtaining financing. Although the prospect of receiving separate, fixed reactive power payments may be beneficial for developing certain generating facilities, resource developers continue to develop new generating facilities in regions without such payments.[113] Furthermore, the basis for these payments has always been comparability. Therefore, these arguments do not demonstrate why allowing for separate reactive power payments at the transmission provider's discretion is just and reasonable.

46. Instead, in the context of RTO/ISO markets, we preliminarily find that it is both more efficient and less administratively burdensome for generating facilities to recover any identified reactive power costs, to the extent they exist, through energy and capacity sales,[114] since competition between generating facilities may incentivize efficiency.[115] Another benefit of any such market-based compensation in RTOs/ISOs is that any costs of providing reactive power within the standard power factor range would be more transparent to market participants because they would be included in RTO/ISO energy and/or capacity prices as opposed to generating facility-specific out-of-market cost-of-service agreements.

47. The Commission has repeatedly rejected arguments that generating facilities need separate reactive power payments ''since the incremental cost of reactive power service within the deadband is minimal.'' [116] Therefore, consistent with those findings, for IPPs operating in non-RTO regions, we preliminarily find that cessation of payments for reactive power within the standard power factor range set forth in the Commission's *pro forma* LGIA and SGIA does not compromise an IPP's ability to recover costs that it may incur in producing reactive power within such range because generating facilities have the opportunity to recover such costs in other ways, ''such as through higher power sales rates of their own.'' [117]

48. Both experience in CAISO, SPP, MISO and certain non-RTO regions where generating facilities do not receive compensation for the provision of reactive power within the standard power factor range,[118] and the evidence in the record to date supports these findings. Specifically, experience and evidence demonstrate that: (1) eliminating compensation has not led to an insufficient supply of reactive power in those regions; and that (2) generating facilities in these regions have been able to recover any purported costs associated with the production of reactive power. For example, CAISO notes that it ''has seen no evidence to this point that resources cannot comply with reactive power dispatch instructions because they have insufficient funds for the equipment to meet the reactive power dispatch.'' [119] As Leeward Renewable Energy, LLC, and Union of Concerned Scientists (LRE/UCS) notes, ''the lack of separate reactive power compensation in CAISO or SPP means that all costs have to be recovered through the applicable PPA, which also means that those PPA prices are higher, all other variables being equal, than they would otherwise be.'' [120]

FR 639 (Mar. 6, 2018), 162 FERC ¶ 61,128, at P 121, *order on reh'g and clarification,* 164 FERC ¶ 61,135 (2018) (''While the Commission has approved specific compensation for discrete services that require substantial identifiable costs, such as for frequency regulation and operating reserves, the Commission has not required specific compensation for all reliability-related costs. We agree with those commenters who observe that minimal reliability-related costs such as those incurred to provide primary frequency response, are reasonably considered to be part of the general cost of doing business, and are not specifically compensated.'').

[111] *MISO,* 182 FERC ¶ 61,033 at P 55.

[112] CAISO Initial Comments at 5.

[113] For example, as of February 21, 2024, there were 453 total generating facilities in the CAISO interconnection queue, 440 of which were non-synchronous generating facilities. This corresponds to 122,885 MW of capacity, 120,043 MW of which comes from the non-synchronous generating facilities in the queue. *See* CAISO, *Formatted Generator Interconnection Queue Report, https://rimspub.caiso.com/rimsui/logon.do* (last visited Feb. 21, 2024). Similarly, as of February 21, 2024, there were 947 total generating facilities in the SPP interconnection queue, 770 of which were non-synchronous generating facilities. This corresponds to 175,243 MW of capacity, 141,879 MW of which comes from the non-synchronous generating facilities in the queue. *See* SPP, *Generator Interconnection Active Requests, https://opsportal.spp.org/Studies/GIActive* (last visited Feb. 21, 2024).

[114] *See* MISO Rehearing Order, 184 FERC ¶ 61,022 at P 42 (dismissing Vistra's claim that they would be unable to recover any costs attributable to providing reactive service through mechanisms other that Schedule 2, such as in energy offers and capacity offers. The Commission noted that ''[a]s to capacity offers, among the 'going forward' costs that can be recovered are 'mandatory capital expenditures necessary to comply with federal . . . reliability requirements,' which would appear to include any (hypothetical) capital investments and expenditures associated with Reactive Service. As to energy offers, Vistra does not explain the basis for its assertion that the Tariff bars including any incremental costs associated with Reactive Service (*e.g.,* fuel costs, short-term variable operations and maintenance) in such offers.'').

[115] For example, in PJM, capital costs are included in the Net Cost of New Entry (Net CONE) parameter of the Variable Resource Requirement (VRR) curve in the capacity market and the Net CONE parameter directly affects clearing prices by affecting both the maximum capacity price and the location of the downward sloping part of the VRR. As a result, if the Commission were to eliminate reactive power compensation within the standard power factor range, the only change that would be required would be to exclude the reactive power revenues from the Net CONE parameter and to exclude any reactive power revenues from the energy and ancillary services offset from the offer caps for resources that provide reactive power. *See* PJM IMM Initial Comments at 21–22, 25.

[116] *BPA,* 120 FERC ¶ 61,211 at P 21 (citing *Sw. Power Pool, Inc.,* 119 FERC ¶ 61,199 at P 39).

[117] *Id.*

[118] *See Cal. Indep. Sys. Operator Corp.,* 160 FERC ¶ 61,035 at P 19. In 2017, the Commission considered the CAISO's approach and found ''a separate payment for the provision of reactive power capability inside the standard power factor range is not required, and we see no reason to require a separate cost recovery mechanism for reactive power capability based on the record here.'' The Commission later affirmed this approach when it was proposed by different transmission providers. *See PNM,* 178 FERC ¶ 61,088 at P 29 (''Consistent with Commission precedent, a transmission provider may decide to eliminate compensation for having the capability of providing reactive service within the standard power factor range.''); *MISO,* 182 FERC ¶ 61,033 at P 55 (''As stated by MISO [transmission owners] and supporting commenters, new and existing generators in MISO will still be required to provide reactive power within the standard power factor range as a condition of obtaining and maintaining an interconnection. MISO [transmission owners] do not propose to change MISO's ability to manually redispatch individual generators for voltage control and generators will continue to be compensated under a separate Tariff mechanism if MISO directs a generation resource to provide reactive power outside of the standard power factor range.'' (citations omitted)); *see also* Order No. 842, 162 FERC ¶ 61,128 at P 120 (explaining that ''there are interconnection requirements for generating facilities in which the recovery of capital costs and operating expenses are not necessarily ensured.'').

[119] CAISO Initial Comments at 5–6.

[120] LRE/UCS Initial Comments at 16.

49. The record from the Notice of Inquiry contains comments arguing that removal of all reactive power compensation under the standard power factor range without a transition period or other similar mechanism has the potential to disrupt business and investment decisions for generating entities in certain markets in the near term.[121] We seek comment on whether and, if so, how the elimination of separate reactive power payments will affect generating facilities' ability to recover their costs in the markets that currently provide reactive power compensation within the standard power factor range. We also seek comment on whether, and if so how, eliminating separate reactive power compensation within the standard power factor range may affect investment decisions to build, or finish building, generation facilities, and whether, and if so how, the elimination could otherwise affect generators' business decisions in those markets.

C. Proposed Revisions for Eliminating Compensation for Reactive Power Supply Within the Standard Power Factor Range

50. To effectuate the changes discussed herein, we propose three revisions discussed further below. Our preliminary findings and these proposed revisions are consistent with the Commission's previous initial statements in Order No. 2003 (which was subsequently revised in Order No. 2003–A) and in subsequent cases on the non-compensability of providing reactive power within the standard power factor range. They also address the undue discrimination concerns articulated by the Commission in Order No. 2003–A, which led to the Commission's comparability policy.[122] By requiring the same approach to compensation for all resources, which necessarily includes both affiliates and non-affiliates, there is no potential for undue discrimination by the transmission provider and comparability would no longer be a justification for payment.

1. Revise Schedule 2 of the Pro Forma OATT

51. We propose to revise Schedule 2 of the *pro forma* OATT to add the following sentence at the end of Schedule 2: ''*However, such rates shall not include any charges associated with the compensation to a generating facility for the supply of reactive power within the power factor range specified in its interconnection agreement.*'' This proposed revision would prohibit separate compensation for the provision of reactive power within the standard power factor range specified in an interconnection agreement.

2. Revise Section 9.6.3 of the Pro Forma Large Generator Interconnection Agreement

52. We propose to revise section 9.6.3 of the *pro forma* LGIA to remove the proviso: ''provided that if Transmission Provider pays its own or affiliated generators for reactive power service within the specified range, it must also pay Interconnection Customer.'' Accordingly, under our proposal here, section 9.6.3 of the *pro forma* LGIA would read as follows: ''Payment for Reactive Power. Transmission Provider is required to pay Interconnection Customer for reactive power that Interconnection Customer provides or absorbs from the Large Generating Facility when Transmission Provider requests Interconnection Customer to operate its Large Generating Facility outside the range specified in Article 9.6.1. Payments shall be pursuant to Article 11.6 or such other agreement to which the Parties have otherwise agreed.'' Along with the other proposed revisions, this proposed revision would prohibit a transmission provider from including in its transmission rates any charges associated with the supply of reactive power within the specified power factor range from a generating facility. Accordingly, transmission providers would be required to pay an interconnection customer for reactive power only when the transmission provider requests the interconnection customer to operate its facility outside the power factor range set forth in its interconnection agreement.

3. Revise Section 1.8.2 of the Pro Forma Small Generator Interconnection Agreement

53. We propose to revise section 1.8.2 of the *pro forma* SGIA to remove the following sentence: ''In addition, if the Transmission Provider pays its own or affiliated generators for reactive power service within the specified range, it must also pay the Interconnection Customer.'' Accordingly, under our proposal here, section 1.8.2 of the *pro forma* SGIA would read as follows: ''The Transmission Provider is required to pay the Interconnection Customer for reactive power that the Interconnection Customer provides or absorbs from the Small Generating Facility when the Transmission Provider requests the Interconnection Customer to operate its Small Generating Facility outside the range specified in article 1.8.1.'' Along with the other proposed revisions, this proposed revision would prohibit a transmission provider from including in its transmission rates any charges associated with the supply of reactive power within the specified power factor range from a generating facility. Accordingly, as above, transmission providers would be required to pay an interconnection customer for reactive power only when the transmission provider requests the interconnection customer to operate its facility outside the power factor range set forth in its interconnection agreement.

IV. Proposed Compliance Procedures

54. We propose to require each transmission provider to submit a compliance filing within 60 days of the effective date of the final rule in this proceeding revising its OATT, *pro forma* LGIA, and *pro forma* SGIA, as necessary, to comply with the requirements set forth in any final rule issued in this proceeding. In addition, we propose to allow 90 days from the date of the compliance filing for implementation of the proposed reforms to become effective.

55. To the extent that any transmission provider believes that it already complies with the reforms adopted in any final rule in this proceeding, the transmission provider would be required to demonstrate how it complies in the compliance filing required 60 days after the effective date of any final rule in this proceeding. In reviewing compliance filings, the Commission will apply the ''consistent with or superior to'' standard to deviations from the adopted *pro forma* language proposed by non-RTO/ISO transmission providers. In evaluating compliance filings made by RTOs/ISOs, the Commission will apply the ''consistent with or superior to'' standard to deviations from the adopted *pro forma* Schedule 2 and the ''independent entity variation standard'' to deviations from the *pro forma* LGIA and *pro forma* SGIA.

56. We seek comment on whether the proposed compliance and

[121] *See, e.g.,* EDF Renewables Initial Comments at 11–12 (''Since independent power producers . . . rely on project financing to finance their project development, predictability of the revenue stream is very important to this industry segment.); Joint Customers Reply Comments at 17 (noting that ''resource developers or owners may have made the decision to invest in resources under the Commission's currently approved methods for determining reactive compensation,'' while also cautioning against allowing unjust reactive power rates to ''remain effective indefinitely.''); Duke Energy Comments at 4 (''Developers have . . . obtained financing based on [the AEP] methodology being in place.'').

[122] *See supra* notes 7–9 and associated text.

implementation timeline would allow sufficient time for changes to be implemented in response to a final rule or whether a limited transition period (beyond the 90-day implementation period proposed in this NOPR) may be necessary. Specifically, we seek comment on the following questions:

- Is a transition period necessary? Please provide discussion supporting any opinion.
- What factors, if any, such as potential business or investment impacts, should be considered in determining whether any transition period is appropriate, how any transition period for reactive power compensation may be structured to minimize impacts, and for what duration any transition period should last? Absent a transition period, would the final rule disrupt business and investment decisions or not? If so, what transition mechanisms other than delaying the implementation date of the final rule would minimize such disruptions and be just and reasonable?
- For regions that have an established capacity market, should transmission providers be allowed to make the implementation date of their compliance filing align with the region's capacity market timelines in order to allow costs associated with reactive power production, if any, to be incorporated into capacity market bids? Would a different transition mechanism, if any, be necessary for regions without a capacity market? Would it be unduly discriminatory or preferential to set different implementation dates for the final rule in different markets and regions?
- If the Commission allows existing generation resources that have previously received compensation for reactive power supply to continue to receive compensation for a limited period while prohibiting new generation resources from receiving reactive power compensation, how should it determine eligibility for continued compensation in a manner that is just and reasonable and not unduly discriminatory or preferential?

V. Information Collection Statement

57. The Office of Management and Budget's (OMB) regulations require approval of certain information collection requirements imposed by agency rules. Upon approval of a collection(s) of information, OMB will assign an OMB control number and an expiration date. Respondents subject to the filing requirements of a rule will not be penalized for failing to respond to these collections of information unless the collections of information display a valid OMB control number.

58. This notice of proposed rulemaking proposes to amend the Commission's regulations pursuant to section 206 of the Federal Power Act, to eliminate compensation to generating facilities for the provision of reactive power within the standard power factor range set forth in each generating facility's individual interconnection agreement. To accomplish this, the Commission proposes to require each transmission provider to amend the standard large interconnection agreement and the standard small generator interconnection agreement in its open access transmission tariff to implement the reforms proposed in this NOPR. Such filings should be made under Part 35 of the Commission's regulations. Subsequently, the proposed rule would revise the following currently approved information collections: *FERC 516H (OMB control. No. 1902–0303): Pro Forma Open Access Transmission Tariff, FERC 516 (OMB control No. 1902–0096): Electric Tariff Filings, and FERC 516A (OMB control No. 1902–0203): Standardization of Small Generator Interconnection Agreements and Procedures [SGIA and SGIP].*

59. The Commission is submitting these reporting requirements to OMB for its review and approval under section 3507(d) of the Paperwork Reduction Act. Comments are solicited on whether the information will have practical utility, the accuracy of provided burden estimates, ways to enhance the quality, utility, and clarity of the information to be collected, and any suggested methods for minimizing the respondent's burden, including the use of automated information techniques.

60. Please send comments concerning the collection of information and the associated burden estimates to: Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503, Attention: Desk Officer for the Federal Energy Regulatory Commission. Due to security concerns, comments should be sent electronically to the following email address: *oira_submission@omb.eop.gov.* Comments submitted to OMB should refer to OMB Control No. 1902–0303, 1902–0096, or 1902–0203.

61. Please submit a copy of your comments on the information collection to the Commission via the eFiling link on the Commission's website at *https://www.ferc.gov.* If you are not able to file comments electronically, please send a copy of your comments to: Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE, Washington, DC 20426. Comments on the information collection that are sent to FERC should refer to Docket No. RM22–2–000.

62. *Title:* FERC 516H: Pro Forma Open Access Transmission Tariff, FERC 516: Electric Tariff Filings, and FERC 516A: Standardization of Small Generator Interconnection Agreements and Procedures [SGIA and SGIP].

63. *Action:* Proposed revision of the information collection in accordance with RM22–2–000.

64. *OMB Control No.:* 1902–0303, 1902–0096, 1902–0203.

65. *Respondents for This Rulemaking:* Public utility transmission providers, including RTOs/ISOs.

66. *Frequency of Information Collection:* One-time compliance filing.

67. *Necessity of Information:* The proposed rule will require that transmission providers submit to the Commission a one-time compliance filing proposing tariff revisions.

68. *Internal Review:* The Commission has reviewed the changes and has determined that such changes are necessary. These requirements conform to the Commission's need for efficient information collection, communication, and management within the energy industry in support of the Commission's ensuring just and reasonable rates. The Commission has specific, objective support for the burden estimates associated with the information collection requirements.

69. *Public Reporting Burden:* The Commission's estimate consists of our estimated effort related to updating the proposed revisions to the Pro Forma Open Access Transmission Tariff, and subsequent revisions to the Large Generator Interconnection Agreements and Small Generator Interconnection agreements and the effort related to submitting a one-time compliance filing.

70. The Commission estimates burden [123] and cost [124] as follows:

A. Collection	B. Number of respondents	C. Annual number of responses per respondent	D. Total number of responses (Column B × Column C)	E. Average burden hours & cost per response	F. Total annual hour burdens & total annual cost (Column D × Column E)	G. Cost per respondent (Column F ÷ Column B)
FERC 516H: Pro Forma Open Access Transmission Tariff						
Transmission Providers (one-time compliance filing)	40	1	40	4 hrs.; $400	160 hrs.; $16,000	$400
FERC 516: Electric Tariff Filings						
Transmission Providers (one-time compliance filing)	43	1	43	4 hrs.; $400	172 hrs.; $17,200	400
FERC 516A: Standardization of Small Generator Interconnection Agreements and Procedures						
Transmission Providers (one-time compliance filing)	43	1	43	4 hrs.; $400	172 hrs.; $17,200	400
Totals					504 hrs.; $50,400	

VI. Environmental Analysis

71. The Commission is required to prepare an Environmental Assessment or an Environmental Impact Statement for any action that may have a significant adverse effect on the human environment.[125] We conclude that neither an Environmental Assessment nor an Environmental Impact Statement is required for this NOPR under § 380.4(a)(15) of the Commission's regulations, which provides a categorical exemption for approval of actions under sections 205 and 206 of the FPA relating to the filing of schedules containing all rates and charges for the transmission or sale of electric energy subject to the Commission's jurisdiction, plus the classification, practices, contracts, and regulations that affect rates, charges, classification, and services.[126]

VII. Regulatory Flexibility Act Certification

72. The Regulatory Flexibility Act of 1980 (RFA) [127] generally requires a description and analysis of proposed rules that will have significant economic impact on a substantial number of small entities. The Small Business Administration (SBA) sets the threshold for what constitutes a small business. Under SBA's size standards,[128] transmission providers under the category of Electric Bulk Power Transmission and Control (NAICS code 221121), have a size threshold of 950 employees (including the entity and its associates).[129]

73. We estimate that there are 43 transmission providers that are affected by the reforms proposed in this NOPR, based on the NERC Active Compliance Registry Matrix as of January 11, 2024.[130] The Commission used a combination of sources to determine the number of employees within each entity using open-source data and information from Dunn & Bradstreet. We estimate that 6 of the 43 transmission providers, approximately 14% (rounded), are small entities.

74. We estimate that one-time costs (in Year 1) associated with the reforms proposed in this NOPR for one transmission provider (as shown in the table above) would be $400. Following Year 1, the Commission estimates no ongoing costs associated with this proposed rule.

75. According to SBA guidance, the determination of significance of impact "should be seen as relative to the size of the business, the size of the competitor's business, and the impact the regulation has on larger competitors." [131] We do not consider the estimated cost of $400 to be a significant economic impact for any of the entities that would be impacted by this NOPR. As a result, we certify that the reforms proposed in this NOPR would not have a significant economic impact on a substantial number of small entities.

VIII. Comment Procedures

76. The Commission invites interested persons to submit comments on the matters and issues proposed in this document to be adopted, including any related matters or alternative proposals that commenters may wish to discuss. Comments are due May 28, 2024. Also, reply comments are due June 26, 2024. Comments must refer to Docket No. RM22–2–000, and must include the commenter's name, the organization they represent, if applicable, and their address in their comments. All comments will be placed in the Commission's public files and may be viewed, printed, or downloaded remotely as described in the Document Availability section below. Commenters on this proposal are not required to serve copies of their comments on other commenters.

77. The Commission encourages comments to be filed electronically via the eFiling link on the Commission's website at *https://www.ferc.gov.* The Commission accepts most standard word processing formats. Documents created electronically using word

[123] "Burden" is the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the estimated burden, refer to 5 CFR 1320.3.

[124] Commission staff estimates that the respondents' skill set (and wages and benefits) for Docket No. RM22–13–000 are comparable to those of Commission employees. Based on the Commission's Fiscal Year 2024 average cost of $207,786/year (for wages plus benefits, for one full-time employee), $100/hour is used.

BILLING CODE 6717–01–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1910

[Docket No. OSHA–2007–0073]

RIN 1218–AC91

Emergency Response Standard

AGENCY: Occupational Safety and Health Administration (OSHA), DOL.

ACTION: Notice of proposed rulemaking (NPRM); extension of comment period.

SUMMARY: OSHA is extending the period for submitting comments by 45 days to allow stakeholders interested in the NPRM on Emergency Response additional time to review the NPRM and collect information and data necessary for comment.

DATES: The comment period for the NPRM that was published at 89 FR 7774 on February 5, 2024, is extended. Comments on any aspect of the NPRM must be submitted by June 21, 2024.

ADDRESSES:

Written comments: You may submit comments and attachments, identified by Docket No. OSHA–2007–0073, electronically at *www.regulations.gov,* which is the Federal e-Rulemaking Portal. Follow the online instructions for making electronic submissions. The Federal e-Rulemaking Portal at *www.regulations.gov* is the only way to submit comments on this NPRM.

Instructions: All submissions must include the agency's name and the docket number for this rulemaking (Docket No. OSHA–2007–0073). All comments, including any personal information you provide, are placed in the public docket without change and may be made available online at *www.regulations.gov.* Therefore, OSHA cautions commenters about submitting information they do not want made available to the public or submitting materials that contain personal information (either about themselves or others), such as Social Security Numbers and birthdates.

Docket: To read or download comments or other material in the docket, go to Docket No. OSHA–2007–0073 at *www.regulations.gov.* All comments and submissions are listed in the *www.regulations.gov* index;

however, some information (*e.g.,* copyrighted material) is not publicly available to read or download through that website. All comments and submissions, including copyrighted material, are available for inspection through the OSHA Docket Office. Documents submitted to the docket by OSHA or stakeholders are assigned document identification numbers (Document ID) for easy identification and retrieval. The full Document ID is the docket number plus a unique four-digit code. OSHA is identifying supporting information in this NPRM by author name and publication year, when appropriate. This information can be used to search for a supporting document in the docket at *www.regulations.gov.* Contact the OSHA Docket Office at 202–693–2350 (TTY number: 877–889–5627) for assistance in locating docket submissions.

FOR FURTHER INFORMATION CONTACT:

Press inquiries: Contact Frank Meilinger, Director, Office of Communications, U.S. Department of Labor; telephone: (202) 693–1999; email: *meilinger.francis2@dol.gov.*

General and technical information: Contact Mark Hagemann, Director, Office of Safety Systems, Directorate of Standards and Guidance, Occupational Safety and Health Administration, U.S. Department of Labor; telephone (202) 693–2222; email: *hagemann.mark@dol.gov.*

SUPPLEMENTARY INFORMATION:

On February 5, 2024, OSHA issued an NPRM to initiate rulemaking to update the existing Fire Brigades standard. The proposed rule would expand the scope of OSHA's standard to include a broad range of hazards emergency responders encounter during emergency response activities and would bring the standard in line with the Federal Emergency Management Agency's (FEMA) National Response Framework. It would also modernize the standard to align with the current industry consensus standards issued by the National Fire Protection Association (NFPA) on the safe conduct of emergency response activities.

The public comment period for the NPRM was to close on May 6, 2024, 90 days after publication of the NPRM. However, OSHA received requests from stakeholders to extend the comment period by an additional 30 days (Document ID 0419); 60 days (see, *e.g.,* Document ID 0426, 0428, 0439, 0440); and 90 days (see, *e.g.,* Document ID 0420, 0434, 0437, 0453). Stakeholders explained that they need additional time to carefully review the questions in the NPRM and gather data.

OSHA agrees to an extension of the public comment period and believes a 45-day extension is sufficient and appropriate in order to balance the agency's need for stakeholder input with the agency's desire to proceed with the rulemaking in a timely manner. Therefore, OSHA is extending the public comment period until June 21, 2024.

Additionally, several commenters submitted requests for a public hearing on the NPRM (see, *e.g.,* Document ID 0435, 0444, 0456, 0459, 0463). OSHA plans to hold a virtual public hearing after the close of the comment period to allow stakeholders from all over the country to participate. OSHA will publish a separate notice at a future date to announce the details of the public hearing.

Authority and Signature

Douglas L. Parker, Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, 200 Constitution Avenue NW, Washington, DC 20210, authorized the preparation of this document pursuant to the following authorities: Sections 4, 6, and 8 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 653, 655, 657); Secretary of Labor's Order 8–2020 (85 FR 58393 (Sept. 18, 2020)); 29 CFR part 1911; and 5 U.S.C. 553.

Signed at Washington, DC.

Douglas L. Parker,

Assistant Secretary of Labor for Occupational Safety and Health.

DEPARTMENT OF EDUCATION

34 CFR Chapter III

[Docket ID ED–2024–OSERS–0012]

State Personnel Development Grants

AGENCY: Office of Special Education and Rehabilitative Services, Department of Education.

ACTION: Proposed priorities and requirements.

SUMMARY: The Department of Education (Department) proposes priorities and requirements under the State Personnel Development Grants (SPDG) program, Assistance Listing Number 84.323A. The Department may use these priorities and requirements for competitions in fiscal year (FY) 2024 and later years. We take this action to focus attention on assisting States in reforming and improving their systems for personnel preparation and personnel development in order to improve results for children with disabilities.

DATES: We must receive your comments on or before April 29, 2024.

ADDRESSES: Comments must be submitted via the Federal eRulemaking Portal at *www.regulations.gov.* However, if you require an accommodation or cannot otherwise submit your comments via *www.regulations.gov,* please contact the program contact person listed under **FOR FURTHER INFORMATION CONTACT**. The Department will not accept comments submitted by fax or by email, or comments submitted after the comment period closes. To ensure the Department does not receive duplicate copies, please submit your comments only once. In addition, please include the Docket ID at the top of your comments.

Federal eRulemaking Portal: Go to *www.regulations.gov* to submit your comments electronically. Information on using *Regulations.gov*, including instructions for accessing agency documents, submitting comments, and viewing the docket, is available on the site under ''FAQ.''

Note: The Department's policy is generally to make comments received from members of the public available for public viewing in their entirety on the Federal eRulemaking Portal at *www.regulations.gov.* Therefore, commenters should be careful to include in their comments only information that they wish to make publicly available.

FOR FURTHER INFORMATION CONTACT: Jennifer Coffey, U.S. Department of Education, 400 Maryland Avenue SW, Room 4A10, Washington, DC 20202. Telephone: (202) 987–0150. Email: *Jennifer.Coffey@ed.gov.*

If you are deaf, hard of hearing, or have a speech disability and wish to access telecommunications relay services, please dial 7–1–1.

SUPPLEMENTARY INFORMATION:

Invitation to Comment: We invite you to submit comments regarding the proposed priorities and requirements. To ensure that your comments have maximum effect in developing the final priorities and requirements, we urge you to clearly identify the specific section of the proposed priorities and requirements that each comment addresses.

We are particularly interested in comments about whether the proposed priorities or any of the proposed requirements would be challenging for new applicants to meet and, if so, how the proposed priorities or requirements could be revised to address potential challenges. The Department is also

particularly interested in comments in response to the following questions.

Directed Questions:

1. What are the common challenges or barriers experienced by State educational agencies (SEAs) in developing and implementing career pathways for those interested in becoming fully certified special education teachers, including paraprofessionals, through residency, grow your own (GYO), and registered apprenticeships programs?

2. What supports would help SEAs to develop and implement career pathways for those interested in becoming fully certified special education teachers, including paraprofessionals, through residency, GYO, and registered apprenticeships programs?

3. What are the common challenges or barriers experienced by SEAs in developing and implementing a system to address the professional learning and certification needs of personnel with an emergency certification who work with children with disabilities?

4. What supports would help SEAs to develop and implement a system to address the professional learning and certification needs of personnel with an emergency certification who work with children with disabilities?

5. Which stakeholders should SEAs collaborate with to develop and implement a system to address the professional learning and certification needs of personnel with an emergency certification who work with children with disabilities?

We invite you to assist us in complying with the specific requirements of Executive Orders 12866, 13563, and 14094 and their overall requirement of reducing regulatory burden that might result from these proposed priorities and requirements. Please let us know of any further ways we could reduce potential costs or increase potential benefits while preserving the effective and efficient administration of the program.

During and after the comment period, you may inspect public comments about the proposed priorities and requirements by accessing *Regulations.gov*. To inspect comments in person, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Assistance to Individuals with Disabilities in Reviewing the Rulemaking Record: On request we will provide an appropriate accommodation or auxiliary aid to an individual with a disability who needs assistance to review the comments or other documents in the public rulemaking record for these proposed priorities and requirements. If you want to schedule an appointment for this type of accommodation or auxiliary aid, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Purpose of Program: The purpose of the SPDG program is to assist SEAs in reforming and improving their systems for personnel preparation and professional development of individuals providing early intervention, educational, and transition services to improve results for children with disabilities.

''Raise the Bar: Lead the World'' (RTB) is the Department's call to action to transform prekindergarten through postsecondary learning and unite around what truly works by promoting academic excellence, boldly improving learning conditions, and preparing our Nation's students for global competitiveness (*www.ed.gov/raisethebar/*). A robust and sustainable educator workforce available to educate and support all children and youth, including children and youth with disabilities, is essential to this call to action. These proposed priorities and requirements support the Department's RTB goals. Specifically, we are proposing priorities designed to:

• Mitigate the barriers to improved educational outcomes and functional results for children with disabilities by increasing the number of well-qualified, fully certified special education teachers, including paraprofessionals;

• Increase collaborative and effective instruction and services for children with disabilities;

• Expand the ability of principals to serve as instructional leaders who create an equity-based, cooperative, and inclusive environment; and

• Provide pre-service and in-service personnel with the knowledge, attitudes, skills, and aspiration to engage effectively with families.

The SPDG program, as a pre-service and in-service professional development program, is uniquely positioned to support the Department's RTB goals by helping to ensure that children with disabilities have access to well-qualified educators and by growing the number of teachers and administrators who can use data to develop and implement standards-based individualized education programs (IEPs) and provide effective instruction in inclusive environments. The proposed priorities specified in this notice are designed to support pathways and professional development for personnel to improve outcomes for children with disabilities.

We intend for these proposed priorities to supplement Absolute Priorities 1 and 2 published in the **Federal Register** on December 19, 2022 (87 FR 77566),[1] as well as other relevant statutory and regulatory priorities established by the Department. Specifically, as part of any SPDG competition, all applicants would be required to meet the statutory requirements in sections 651 through 655 of the Individuals with Disabilities Education Act (IDEA), 20 U.S.C. 1451–1455.

Program Authority: 20 U.S.C. 1451–1455.

Proposed Priorities

This document contains five proposed priorities. Proposed Priorities 1 through 5 are based on allowable activities in sections 651 through 655 of IDEA. These proposed priorities would be applicable to all eligible applicants. We may apply one or more of these priorities in any year in which this program is in effect.

Proposed Priority 1: Providing Career Pathways for Those Interested in Becoming Fully Certified Special Education Teachers, Including Paraprofessionals, Through Residency, GYO, and Registered Apprenticeships Programs

Background:

The purpose of this proposed priority is to assist SEAs in developing and implementing or enhancing existing teacher residency, grow your own (GYO), and registered apprenticeships programs that provide additional pathways to becoming a special education teacher.

According to the October 2022 results of the National Center for Education Statistics (NCES) School Pulse Panel on Staffing, 21 percent of responding public schools reported that they were not fully staffed in the area of special education for the 2022–2023 school year (U.S. Department of Education, 2023). Ensuring all students have access to a well-qualified, fully certified teacher must continue to be a priority for all States. By reducing the cost of earning a license and offering flexible scheduling, teacher residency, GYO, and registered apprenticeships programs are designed to bring more people into the profession. Teacher residency, GYO, and registered apprenticeships programs may open doors to the profession for those who may otherwise face barriers to entrance, including multilingual, racially and ethnically diverse individuals, individuals who have disabilities, and paraprofessionals who may already have decades of classroom

[1] See *www.federalregister.gov/documents/2022/12/19/2022-27367/applications-for-new-awards-state-personnel-development-grants.*

experience, but for numerous reasons, including cost, could not pursue a teaching degree.

The Department has partnered with the Department of Labor and leading education organizations to advance high-quality and affordable teacher preparation through the expansion of registered apprenticeship programs for K–12 teachers, which can be used to scale and strengthen evidence-based teacher residency and GYO programs (see *www.whitehouse.gov/briefing-room/statements-releases/2022/08/31/fact-sheet-biden-harris-administration-announces-public-and-private-sector-actions-to-strengthen-teaching-profession-and-help-schools-fill-vacancies/* and *www.ed.gov/news/press-releases/education-labor-departments-announce-new-efforts-to-advance-teacher-preparation-programs-and-expand-registered-apprenticeships-educators*).

Research shows that high-quality residency models can expand the pool of well-prepared applicants entering the teaching profession, promoting diversity of the workforce and bringing a wide range of experiences into the classroom to support students. A 2014 implementation study published by the Institute of Education Sciences shows that residents are more likely than nonresidents to report feeling prepared to enter the classroom and that after program completion, more than 90 percent of residents stayed in their school district for three years (Silva et al., 2014).

When aligned to high-quality, evidence-based practices for education preparation, such as those drafted by the Pathways Alliance and approved by the Department of Labor, registered apprenticeship programs have the potential to be an effective, high-quality ''earn and learn'' model that allow candidates to earn their teaching credential while earning a salary by combining coursework with structured, paid on-the-job learning experiences with a mentor teacher (Pathways Alliance, 2023). Registered apprenticeship programs for K–12 teachers can be used to establish, scale, and build on existing high-quality pathways into teaching that emphasize classroom-based experience, such as teacher residencies.

GYO is an approach to developing a pipeline of educator candidates to meet specific workforce needs that seeks to eliminate any barriers that may prevent local candidates from entering or remaining in the field. GYO programs are distinguished from other pipelines by whom they target, focusing on recruitment of high school students, career changers, paraprofessionals, non-teaching-school faculty, and community members (Espinoza et al., 2018). Offering financial aid (*e.g.,* loan forgiveness and scholarships) to candidates completing GYO programs, targeting communication to specific populations, and establishing systems for candidates to receive continuous coaching and mentoring from entrance into the GYO program through early service can all aid in the success of these programs (Carver-Thomas, 2018; Professional Educator Standards Board, 2018; Texas Comprehensive Center, 2018). GYO programs can help address shortages in high-need areas and subjects, such as in rural schools and in special education (Jessen et al., 2020); it can also result in improved recruitment and retention of teachers of color (Gist et al., 2019).

Proposed Priority 1:

Projects designed to increase the number of certified special education teachers by establishing a new, or enhancing an existing, teacher residency, GYO, or registered apprenticeship program that minimizes or eliminates the cost of certification for special education teacher candidates and provides opportunities for candidates to be paid, including being provided with a stipend (which, for programs that include paid experience for the duration of the certification program, can be met through paragraph (i), below), to cover the time spent gaining classroom experience during their certification program.

A project implementing a new or enhanced teacher residency, GYO, or registered apprenticeship program must—

(a) Use data-driven strategies and evidence-based approaches to increase recruitment, successful completion, and retention of the special education teachers supported by the project;

(b) Provide standards for participants to enter into and complete the program;

(c) Be aligned to evidence-based (as defined in 34 CFR 77.1) practices for effective educator preparation;

(d) Have little to no financial burden for program participants, or provide for loan forgiveness;

(e) Provide opportunities for candidates to be paid, including being provided with a stipend, to cover time spent in clinical experience during their certification program;

(f) Develop a plan to monitor program quality;

(g) Require completion of a bachelor's degree either before entering or as a result of the residency, GYO, or apprenticeship program;

(h) Result in the satisfaction of all requirements for full State teacher licensure or certification, excluding emergency, temporary, provisional, or other sub-standard licensure or certification;

(i) Provide increasing levels of responsibility for the resident/GYO participant/apprentice during at least one year of paid on-the-job learning/clinical experience, during which a mentor teacher is the teacher of record; and

(j) Develop a plan to ensure the program has funding after the end of the project period.

In their applications, States must describe how their projects will meet these program requirements. In addition to these requirements, to be considered for funding under this priority, applicants must meet the application and administrative requirements under *Common Elements.*

Proposed Priority 2: Supporting Emergency Certified Special Education Teachers To Become Fully Certified

Background:

Citing a Department of Education report, Wilkerson and colleagues (2022) note that all States and the District of Columbia have reported a shortage of special education teachers in at least one academic year between 2014–2018. In fact, 48 States have authorized alternative routes to fill special education positions (Myers et al., 2020).

For decades, school districts have relied on unlicensed special education teachers to fill these vacancies, leaving students with disabilities to receive educational services from insufficiently trained individuals and resulting in inequitable educational opportunities (Wilkerson et al., 2022). Under IDEA, teachers who are not fully certified may provide special education instruction under an emergency certification as long as they are participating in a program that provides an alternate route to full special education teacher certification and that certain additional criteria are met.[2] Numerous States across the country have filled teaching positions through such emergency certifications

[2] IDEA section 612(a)(14)(C), as amended by ESSA, eliminates the definition of ''highly qualified'' and specifies Federal requirements for the employment of special education teachers. Under Assurance 14, special education teachers must: have obtained full certification by completing traditional or alternate preparation, or by passing the State special education licensing examination; have not had special education certification or licensure requirements waived on an emergency, temporary, or provisional basis; and hold at least a bachelor's degree.

due to shortages of fully certified special education teachers.

National test scores suggest students with disabilities are losing ground in reading and are not improving in mathematics (Annie E. Casey Foundation, 2023; U.S. Department of Education, 2022). It is critical that special educators serving under an emergency certification become fully certified via high-quality programs. A high-quality pathway to certification can provide special education teachers with the knowledge and skills to collaboratively develop, implement, and monitor the progress of IEPs that lead to student success, while planning and providing instruction alongside general education teachers. They require the skills to effectively collaborate with administrators, related service providers, and families to optimize instruction, services, and supports for students with disabilities.

Proposed Priority 2:

Projects designed to increase the number of fully certified special education teachers by implementing plans that address the emergency certification needs of personnel who work with children with disabilities. The plans must—

(a) Identify the barriers and challenges to full certification that are experienced by special education personnel on emergency certifications;

(b) Include evidence-based (as defined in 34 CFR 77.1) strategies to address those barriers and challenges and assist special education personnel on emergency certifications to obtain full certification, consistent with State-approved or State-recognized requirements, within three years;

(c) Include training and coaching on, at a minimum—

(1) The skills needed to collaboratively develop, implement, and monitor standards-based IEPs;

(2) High-leverage and evidence-based instructional and classroom management practices; and

(3) The provision of wrap-around services (*e.g.,* social, emotional, and mental health supports), special education services, and other supports for children with disabilities; and

(d) Provide participating special education personnel on emergency certifications with opportunities to apply the evidence-based skills and practices described in paragraph (c) in the classroom.

In their applications, States must describe how their projects will meet these program requirements. In addition to these requirements, to be considered for funding under this priority, applicants must meet the application and administrative requirements under *Common Elements.*

Proposed Priority 3: Person-Centered IEPs That Support Instructional Progress

Background:

A cornerstone of special education under IDEA is a free appropriate public education (FAPE) in the least restrictive environment (LRE). It is through high-quality person-centered [3] individualized education programs (IEPs) that local educational agencies (LEAs) and schools plan and deliver evidence-based instruction, supports, and services to students with disabilities to provide FAPE in the LRE. However, States, LEAs, and schools continue to face significant challenges with providing FAPE, including person-centered, rigorous, and specially designed instruction and service delivery. Recent research indicates that the majority of IEPs are incomplete and lack substantive sufficiency of the statement of present levels of performance, which is the crucial initial component of a person-centered IEP (*e.g.,* Hott et al., 2021; Lequia et al., 2023).

Effective preparation and support can increase the opportunities for, and ability of, leaders, educators, and families to participate in the development, implementation, and progress monitoring of academically meaningful and legally sound person-centered IEPs (Yell et al., 2020). Under IDEA, an IEP team for a child with a disability must include the child's parent(s), at least one general education teacher, the child's special education teacher or, where appropriate, the child's special education provider, a local educational agency representative, the child, whenever appropriate, and others who have knowledge or special expertise regarding the child. The multidisciplinary nature of the IEP team presents collaborative opportunities and challenges, especially between school professionals and parents (Goldman & Mason, 2018; Mueller & Vick, 2019). Parents play a critical role in the child's life. Parental input helps identify the child's strengths and needs and aids the team identifying appropriate services. This parental input adds significant value to the IEP and can lead to improved educational results and functional outcomes. To best support students, school and district personnel on IEP teams need the skills to choose and use evidence-based practices for core instruction and supplemental supports and services, such as those designed to foster self-efficacy, as well as to increase the child's learning opportunities with general education peers.

Proposed Priority 3:

Projects designed to provide pre-service and in-service training to school and district personnel, including IEP team members (*e.g.,* special education and general education teachers, related service personnel who work with children with disabilities) and administrators, to improve their skills in developing and implementing person-centered IEPs that support instructional progress and improve functional outcomes [4] for children with disabilities. Projects must—

(a) Provide training and coaching to administrators and IEP team members to increase their ability to develop, implement, and monitor person-centered IEPs that support instructional progress so that they can—

(1) Use appropriate data to determine the child's instructional and functional strengths and needs;

(2) Increase the child's learning time and opportunities with general education peers, as appropriate, based on research;

(3) Choose and use evidence-based (as defined in 34 CFR 77.1) practices for core instruction; and

(4) Supplement core instruction with special education services.

In their applications, States must describe how their projects will meet these program requirements. In addition to these requirements, to be considered for funding under this priority, applicants must meet the application and administrative requirements under *Common Elements.*

Proposed Priority 4: Principals as Instructional Leaders Who Support Collaborative Service Provision

Background:

When principals are strong instructional leaders who help create an inclusive school environment and district leaders support those principals, all students, including students with disabilities, can thrive. School building administrators, including principals,

[3] Some States and organizations have defined "person-centered," as used in this notice, to reference when students and their families are actively sought to participate in their schooling, including IEP development and implementation, the course of study, and related and transition services, however this term is still developing in the field. The discussions and decisions leading to a person-centered program are founded upon the unique school, extracurricular, and postsecondary strengths, interests, and goals of the student and their family.

[4] An IEP that supports instructional progress is an IEP that focuses on the academic, vocational, developmental, and social needs of the child and allows the child to benefit from instruction.

vice principals, and teacher leaders, are responsible for IDEA implementation and ensuring children with disabilities are provided the services and supports that they are eligible for under IDEA. School building administrators help set high expectations for performance in schools and ensure that the unique, individual needs of each child with a disability are met, consistent with their IEP, and district administrators give them the tools, training, and support they need to do so.

Given that school building leaders have complex roles, it is not surprising that administrators who receive high-quality training handle the multi-faceted demands of the role better and stay in their jobs longer (Herman et al., 2022). When that is the case, principals can be instrumental in supporting teacher and provider practices, motivating school staff, maintaining a positive school program climate, and ensuring inclusive settings are offered. Access to professional learning opportunities influences administrators' job satisfaction and retention (Boyce & Bowers, 2016). In addition to covering essential, research-based content on topics such as instructional leadership, data-based decision making, and systems improvement, the structure of continued professional development for administrators also matters (Darling-Hammond et al., 2022). Especially important to building the capacity of administrators is access to coordinated, continued professional development with structured learning opportunities, such as through a cohort model, mentoring, one-on-one coaching, networking to build a professional community, applied learning opportunities, and problem-solving related to the needs of individual children.

Proposed Priority 4:

Projects designed to provide professional development to improve the instructional leadership provided by principals, district leaders, and teacher leaders (administrators) to promote educational equity for children with disabilities. Projects must provide training and coaching to assist administrators to—

(a) Create and support equitable school schedules and other operations that enable collaborative services from general and special education staff;

(b) Support schoolwide inclusionary practices within a multi-tiered systems of support (MTSS) framework;

(c) Support evidence-based (as defined in 34 CFR 77.1) professional development for their staff related to—

(1) Effective content instruction;

(2) Data for decision-making and continuous progress monitoring;

(3) IEP development and implementation; and

(4) Wrap-around services;

(d) Actively engage families and school communities to identify and address concerns regarding, and barriers to, accessibility, equity, and inclusiveness, using frameworks such as universal design; and

(e) Provide administrators structured learning opportunities, such as through a cohort model, mentoring, one-on-one coaching, networking to build a professional community, and applied learning opportunities, such as problem-solving related to the needs of individual children.

In their applications, States must describe how their projects will meet these program requirements. In addition to these requirements, to be considered for funding under this priority, applicants must meet the application and administrative requirements under *Common Elements.*

Proposed Priority 5: Improving Engagement Between Schools and Families

Background:

Family engagement is one of the most powerful predictors of a child's development, educational attainment, and success in school and life (Weiss et al., 2018). Research shows that increased family involvement is related to improved child development and student achievement, attendance, behavior, graduation rates, advanced course enrollment, and college enrollment (Henderson & Mapp, 2002; Robinson et al., 2018; Young et al., 2023). The perspective of family members at the table is needed to create and advocate for the kinds of student-centered learning experiences that will allow all students to: master academic content aligned with the standards; gain future-ready knowledge, skills, and dispositions; and succeed in postsecondary learning and careers (Weiss et al., 2018). Research suggests that collaboration between schools and families is an important support for students with learning and behavioral challenges, including students with disabilities (Sheridan & Wheeler, 2017). Further, children learn anywhere, anytime, and not just in school. Families play a central role in supporting learning and building learning pathways.

To bring families to the table and engender learning in the home and community, commitments and support that foster mutual trust and shared responsibility are necessary (Ogg et al., 2021). Educators who understand how culture and community shape family engagement practices can better work from families' strengths and create high-quality IEPs that will lead to success in school, college, and career.

Family engagement is central to IDEA, which states that families are equal members of the IEP team who must be provided the opportunity to fully participate in all decisions concerning a child's evaluation, placement, and services. When families contribute to IEP decisions, educators may be more successful in planning and delivering productive interventions and supports (Turnbull et al., 2018). Furthermore, involving families in data-based decision making allows them to take a more active role in supporting their children's learning and behavior at home (Weingarten et al., 2020). Families can reinforce school routines, expectations, and language, thereby creating alignment between home and school that may, in turn, contribute to improved student outcomes (Garbacz et al., 2016). Family-professional partnerships and caregiver involvement are impacted by how educators value caregivers' input, and school-home communication can have positive effects on child behavioral outcomes (Li & Burke, 2023).

Proposed Priority 5:

Projects designed to develop the capacity of administrators and educators to develop systems and use strategies that build trust and engagement with families, while further strengthening the role families play in their child's development and learning. Projects must—

(a) Provide training and coaching to assist administrators to—

(1) Develop and implement policies and programs that recognize families' funds of knowledge, connect family engagement to student learning, and create welcoming, inviting cultures; and

(2) Create systems that support staff and families in meaningful engagement (*i.e.,* Leading by Convening and the Dual-Capacity Framework. For more information visit *www.dualcapcity.org* and *www.ncsi.wested.org/resources/leading-by-convening*);

(b) Provide training and coaching to assist educators and early intervention providers to—

(1) Build their knowledge, attitudes, beliefs, aspirations, and behaviors about effective strategies to engage families in their child's learning;

(2) Work with families to make collaborative, data-based decisions in the development and implementation of the child's IEP; and

(3) Provide information and resources to families that enable them to support their children's learning and behavior at home; and

(c) Provide training and coaching to families so they can—

(1) Meaningfully participate in the development and implementation of their child's IEP;

(2) Participate in data-based decision making related to their child's education; and

(3) Further their child's learning at home.

In their applications, States must describe how their projects will meet these program requirements. In addition to these requirements, to be considered for funding under this priority, applicants must meet the application and administrative requirements under *Common Elements.*

Common Elements:

In addition to the requirements contained in the proposed priorities, to be considered for funding, applicants must meet the following application and administrative requirements:

(a) Demonstrate, in the narrative section of the application under ''Significance,'' how the proposed project will—

(1) Align with and integrate other State initiatives and programs, as well as district and local improvement plans, to leverage existing professional development and data systems;

(2) Develop and implement plans to sustain the grant program after the grant funding has ended; and

(3) Integrate family engagement into all project efforts by supporting capacity building for personnel and families.

(b) Demonstrate, in the narrative section of the application under ''Quality of Project Services,'' how the proposed project will—

(1) Ensure equal access and treatment for members of groups that have traditionally been underrepresented based on race, color, national origin, gender, age, or disability. To meet this requirement, the applicant must describe how it will—

(i) Develop the knowledge and ability of personnel to be culturally responsive and engage children and families with a strengths-based approach;

(ii) Engage students, families, and community members to assess the appropriateness and impact of the intervention, program, or strategies; and

(iii) Review program procedures and resources to ensure a diversity of perspectives are brought into the project; and

(2) Achieve the project's goals and objectives. To meet this requirement, the applicant must provide—

(i) Either a logic model (as defined in 34 CFR 77.1) or theory of action (to be provided in Appendix A), which demonstrates how the proposed project will achieve intended measurable outcomes;

(ii) A description of proposed in-State and national partners that the project will work with to achieve the goals and objectives of the grant and how the impact of these partnerships will be measured; and

(iii) A description of how the project will be based on current research and make use of evidence-based (as defined in 34 CFR 77.1) practices. To meet this requirement, the applicant must describe—

(A) The current research base for the chosen interventions;

(B) The evidence-based model or practices to be used in the project's professional development activities; and

(C) How implementation science will be used to support full and sustained use of evidence-based practices and result in sustained systems of implementation support.

(c) In the narrative section of the application under ''Quality of the project evaluation,'' include an evaluation plan for the project developed in consultation with and implemented by a third-party [5] evaluator. The evaluation plan must—

(1) Articulate formative and summative evaluation questions, including important process and outcome evaluation questions. These questions should be related to the project's proposed logic model or theory of action required under paragraph (b)(2)(i) of these requirements;

(2) Describe how progress in and fidelity of implementation, as well as project outcomes, will be measured to answer the evaluation questions. Specify the measures and associated instruments or sources for data appropriate to the evaluation questions. Include information regarding reliability and validity of measures where appropriate;

(3) Describe strategies for analyzing data and how data collected as part of this plan will be used to inform and improve service delivery over the course of the project and to refine the proposed logic model or theory of action and evaluation plan, including subsequent data collection;

(4) Provide a timeline for conducting the evaluation and include staff assignments for completing the plan. The timeline must indicate that the data will be available annually for the annual performance report to the Department; and

(5) Dedicate sufficient funds in each budget year to cover the costs of developing or refining the evaluation plan in consultation with a third-party evaluator, as well as the costs associated with the implementation of the evaluation plan by the third-party evaluator.

(d) Demonstrate, in the narrative section of the application under ''Adequacy of resources,'' how—

(1) The proposed project will encourage applications for employment from persons who are members of groups that have traditionally been underrepresented based on race, color, national origin, gender, age, or disability, as appropriate;

(2) The proposed key project personnel, consultants, and subcontractors have the qualifications and experience to carry out the proposed activities and achieve the project's intended outcomes;

(3) The applicant and any key partners have adequate resources to carry out the proposed activities; and

(4) The proposed costs are reasonable in relation to the anticipated results and benefits and funds will be spent in a way that increases their efficiency and cost-effectiveness, including by reducing waste or achieving better outcomes.

(e) Demonstrate, in the narrative section of the application under ''Quality of the management plan,'' how the proposed management plan will ensure that the project's intended outcomes will be achieved on time and within budget. To address this requirement, the applicant must describe—

(1) Clearly defined responsibilities for key project personnel, consultants, and subcontractors, as applicable;

(2) Timelines and milestones for accomplishing the project tasks;

(3) How key project personnel and any consultants and subcontractors will be allocated to the project and how these allocations are appropriate and adequate to achieve the project's intended outcomes; and

(4) How the proposed project will benefit from a diversity of perspectives, including those of families, educators, technical assistance providers, researchers, and policy makers, among others, in its development and operation.

[5] A ''third-party'' evaluator is an independent and impartial program evaluator who is contracted by the grantee to conduct an objective evaluation of the project. This evaluator must not have participated in the development or implementation of any project activities, except for the evaluation activities, nor have any financial interest in the outcome of the evaluation.

(f) Address the following application requirements. The applicant must—

(1) Include, in Appendix A, personnel-loading charts and timelines, as applicable, to illustrate the management plan described in the narrative;

(2) Provide an assurance that any project website will include relevant information and documents in a form that meets a government or industry-recognized standard for accessibility;

(3) Include, in the budget, attendance at the following:

(i) An annual one and one-half day SPDG National Meeting in the Washington, DC area during each year of the project period; and

(ii) A three-day project directors' conference in Washington, DC, during each year of the project period, provided that, if the conference is conducted virtually, the project must reallocate unused travel funds no later than the end of the third quarter of each budget period; and

(4) Budget $6,000 annually for support of the SPDG program network and website currently administered by the University of Oregon (*www.signetwork.org*).

Types of Priorities:

When inviting applications for a competition using one or more priorities, we designate the type of each priority as absolute, competitive preference, or invitational through a notice in the **Federal Register**. The effect of each type of priority follows:

Absolute priority: Under an absolute priority, we consider only applications that meet the priority (34 CFR 75.105(c)(3)).

Competitive preference priority: Under a competitive preference priority, we give competitive preference to an application by (1) awarding additional points, depending on the extent to which the application meets the priority (34 CFR 75.105(c)(2)(i)); or (2) selecting an application that meets the priority over an application of comparable merit that does not meet the priority (34 CFR 75.105(c)(2)(ii)).

Invitational priority: Under an invitational priority, we are particularly interested in applications that meet the priority. However, we do not give an application that meets the priority a preference over other applications (34 CFR 75.105(c)(1)).

Final Priorities and Requirements:

We will announce the final priorities and requirements in a document in the **Federal Register**. We will determine the final priorities and requirements after considering public comments on the proposed priorities and requirements and other information available to the Department. This document does not preclude us from proposing additional priorities, requirements, definitions, or selection criteria, subject to meeting applicable rulemaking requirements.

Note: This document does *not* solicit applications. In any year in which we choose to use one or more of these proposed priorities and these requirements, we invite applications through a notice in the **Federal Register**.

Executive Orders 12866, 13563, and 14094

Regulatory Impact Analysis

Under Executive Order 12866, the Office of Management and Budget (OMB) determines whether this regulatory action is ''significant'' and, therefore, subject to the requirements of the Executive order and subject to review by OMB. Section 3(f) of Executive Order 12866, as amended by Executive Order 14094, defines a ''significant regulatory action'' as an action likely to result in a rule that may—

(1) Have an annual effect on the economy of $200 million or more (adjusted every three years by the Administrator of Office of Information and Regulatory Affairs (OIRA) for changes in gross domestic product); or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, territorial, or Tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues for which centralized review would meaningfully further the President's priorities, or the principles set forth in this Executive order, as specifically authorized in a timely manner by the Administrator of OIRA in each case.

This proposed regulatory action is not a significant regulatory action subject to review by OMB under section 3(f) of Executive Order 12866, as amended by Executive Order 14094.

We have also reviewed this proposed regulatory action under Executive Order 13563, which supplements and explicitly reaffirms the principles, structures, and definitions governing regulatory review established in Executive Order 12866, as amended by Executive Order 14094. To the extent permitted by law, Executive Order 13563 requires that an agency—

(1) Propose or adopt regulations only upon a reasoned determination that their benefits justify their costs (recognizing that some benefits and costs are difficult to quantify);

(2) Tailor its regulations to impose the least burden on society, consistent with obtaining regulatory objectives and taking into account—among other things and to the extent practicable—the costs of cumulative regulations;

(3) In choosing among alternative regulatory approaches, select those approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity);

(4) To the extent feasible, specify performance objectives, rather than the behavior or manner of compliance a regulated entity must adopt; and

(5) Identify and assess available alternatives to direct regulation, including economic incentives—such as user fees or marketable permits—to encourage the desired behavior, or provide information that enables the public to make choices.

Executive Order 13563 also requires an agency ''to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible.'' OIRA has emphasized that these techniques may include ''identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes.''

We are issuing these proposed priorities and requirements only on a reasoned determination that their benefits would justify their costs. In choosing among alternative regulatory approaches, we selected those approaches that would maximize net benefits. Based on the analysis that follows, the Department believes that this regulatory action is consistent with the principles in Executive Order 13563.

We also have determined that this regulatory action would not unduly interfere with State, local, and Tribal governments in the exercise of their governmental functions.

In accordance with these Executive orders, the Department has assessed the potential costs and benefits, both quantitative and qualitative, of this regulatory action. The potential costs are those resulting from statutory requirements and those we have determined as necessary for administering the Department's programs and activities.

Clarity of the Regulations

Executive Order 12866 and the Presidential memorandum ''Plain Language in Government Writing'' require each agency to write regulations that are easy to understand.

The Secretary invites comments on how to make these proposed priorities and requirements easier to understand,

including answers to questions such as the following:

- Are the requirements in the proposed priorities and requirements clearly stated?
- Do the proposed priorities and requirements contain technical terms or other wording that interferes with their clarity?
- Does the format of the proposed priorities and requirements (grouping and order of sections, use of headings, paragraphing, etc.) aid or reduce their clarity?
- Would the proposed priorities and requirements be easier to understand if we divided them into more (but shorter) sections?
- Could the description of the proposed priorities and requirements in the **SUPPLEMENTARY INFORMATION** section of this preamble be more helpful in making the proposed priorities and requirements easier to understand? If so, how?
- What else could we do to make the proposed priorities and requirements easier to understand?

To send any comments about how the Department could make these proposed priorities and requirements easier to understand, see the instructions in the **ADDRESSES** section.

Intergovernmental Review: This program is subject to Executive Order 12372 and the regulations in 34 CFR part 79. One of the objectives of the Executive order is to foster an intergovernmental partnership and a strengthened federalism. The Executive order relies on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

This document provides early notification of our specific plans and actions for this program.

Regulatory Flexibility Act Certification: The Secretary certifies that these proposed priorities and requirements would not have a significant economic impact on a substantial number of small entities. Participation in the SPDG program is voluntary. In addition, the only eligible entities for this program are SEAs, which do not meet the definition of a small entity. For these reasons, the proposed priorities and requirements would not impose any additional burden on small entities. We expect that in determining whether to apply for SPDG program funds, an eligible entity would evaluate the requirements of preparing an application and any associated costs and weigh them against the benefits likely to be achieved by receiving an SPDG program grant. An eligible entity probably would apply only if it determines that the likely benefits exceed the costs of preparing an application.

We believe that these proposed priorities and requirements would not impose any additional burden on a small entity applying for a grant than the entity would face in the absence of the proposed action. That is, the length of the applications those entities would submit in the absence of the proposed regulatory action and the time needed to prepare an application would likely be the same.

This proposed regulatory action would not have a significant economic impact on a small entity once it receives a grant because it would be able to meet the costs of compliance using the funds provided under this program. We invite comments from eligible small entities as to whether they believe this proposed regulatory action would have a significant economic impact on them and, if so, request evidence to support that belief.

Paperwork Reduction Act of 1995

These proposed priorities and requirements contain information collection requirements that are approved by OMB under OMB control number 1820–0028. The proposed priorities and requirements do not affect the currently approved data collection.

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *www.govinfo.gov.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Glenna Wright-Gallo,

Assistant Secretary for Special Education and Rehabilitative Services.

[FR Doc. 2024–06656 Filed 3–27–24; 8:45 am]

BILLING CODE 4000–01–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 24–278; MB Docket No. 24–83; FR ID 210721]

Radio Broadcasting Services; Mattoon, Illinois

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on the proposal to substitute Channel 245B1 for vacant Channel 245B at Mattoon, Illinois. The existing vacant Channel 245B at Mattoon is not in compliance with the minimum distance separation requirements of the Federal Communications Commission's (Commission) rules. A staff engineering analysis indicates that Channel 245B1 can be allotted to Mattoon, Illinois, consistent with the minimum distance separation requirements of the Commission's rules, with a site restriction of 12.2 kilometers (7.6 miles) southeast of the community. The reference coordinates are 39–23–17 NL and 88–17–21 WL.

DATES: Comments must be filed on or before May 13, 2024, and reply comments on or before May 28, 2024.

ADDRESSES: Secretary, Federal Communications Commission, 45 L Street NE, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Rolanda F. Smith, Media Bureau, (202) 418–2054, *Rolanda-Faye.Smith@fcc.gov.*

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MB Docket No. 24–83, adopted March 19, 2024, and released March 20, 2024. The full text of this Commission decision is available online at *https://apps.fcc.gov/ecfs.* The full text of this document can also be downloaded in Word or Portable Document Format (PDF) at *https://www.fcc.gov/edocs.* This document does not contain proposed information collection requirements subject to the Paperwork Reduction Act of 1995, Public Law 104–13. In addition, therefore, it does not contain any proposed information collection burden

''for small business concerns with fewer than 25 employees,'' pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, *see* 44 U.S.C. 3506(c)(4). The Commission will publish the required summary of this Notice of Proposed Rulemaking on *https://www.fcc.gov/proposed-rulemakings,* pursuant to The Providing Accountability Through Transparency Act, *see* 5 U.S.C. 553(b)(4).

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. *See* 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, *see* 47 CFR 1.415 and 1.420.

List of Subjects in 47 CFR Part 73

Radio, Radio broadcasting.

Federal Communications Commission.

Nazifa Sawez,

Assistant Chief, Audio Division, Media Bureau.

Proposed Rules

For the reasons discussed in the preamble, the Federal Communications Commission proposes to amend 47 CFR part 73 as follows:

PART 73—RADIO BROADCAST SERVICES

■ 1. The authority citation for part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 155, 301, 303, 307, 309, 310, 334, 336, 339.

■ 2. In § 73.202, in paragraph (b), amend the Table of FM Allotments under Illinois by adding in alphabetical an entry for ''Mattoon'' to read as follows:

§ 73.202 Table of Allotments.

* * * * *

(b) * * *

TABLE 1 TO PARAGRAPH (b)

[U.S. States]	Channel No.
* * * * *	
Illinois	
* * * * *	
Mattoon	245B1
* * * * *	

* * * * *

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 76

[MB Docket No. 98–204; FCC 24–18; FR ID 207778]

Review of the Commission's Broadcast and Cable Equal Employment Opportunity Rules and Policies

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: In this document, the Federal Communications Commission (Commission) refreshes the existing record regarding the statutorily mandated collection of workforce composition data for multichannel video programming distributors (MVPDs) on FCC Form 395–A.

DATES: Comments due on or before April 29, 2024; reply comments due on or before May 13, 2024.

ADDRESSES: You may submit comments, identified by MB Docket No. 98–204, by any of the following methods:

- *Electronic Filers:* Comments may be filed electronically using the internet by accessing the ECFS: *http://apps.fcc.gov/ecfs/.*
- *Paper Filers:* Parties who choose to file by paper must file an original and one copy of each filing.

Filings can be sent by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.

- Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9050 Junction Drive, Annapolis Junction, MD 20701.
- U.S. Postal Service first-class, Express, and Priority mail must be addressed to 45 L Street NE, Washington, DC 20554.
- Effective March 19, 2020, and until further notice, the Commission no longer accepts any hand or messenger delivered filings. This is a temporary measure taken to help protect the health and safety of individuals, and to mitigate the transmission of COVID–19. See FCC Announces Closure of FCC Headquarters Open Window and Change in Hand-Delivery Policy, Public Notice, DA 20–304 (March 19, 2020). *https://www.fcc.gov/document/fcc-closes-headquarters-open-window-and-changes-hand-delivery-policy.*

People with Disabilities: To request materials in accessible formats for people with disabilities (braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov* (mail to: *fcc504@fcc.gov*) or call the FCC's Consumer and Governmental Affairs Bureau at (202) 418–0530 (voice), (202) 418–0432 (TTY).

FOR FURTHER INFORMATION CONTACT: For additional information on this proceeding, please contact Christopher Sova of the Media Bureau, Industry Analysis Division, *christopher.sova@fcc.gov.*

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Second Further Notice of Proposed Rulemaking (*Second FNPRM*) FCC 24–18, in MB Docket No. 98–204, adopted on February 7, 2024, and released on February 22, 2024. The complete text of this document is available electronically via the search function on the FCC's website at *https://docs.fcc.gov/public/attachments/FCC-24-18A1.pdf.*

Synopsis

1. Having addressed the issues concerning the reinstatement of the Form 395–B data collection, we now seek, by this Second Further Notice of Proposed Rulemaking (*Second FNPRM*), to refresh the existing record regarding the statutorily mandated collection of Form 395–A data pursuant to 47 U.S.C. 554(d)(3)(A)–(B). Since 1984 the Commission has required MVPDs with six or more full-time employees to file the FCC Form 395–A. Similar to the Form 395–B collected from broadcasters, Form 395–A seeks to gather workforce composition data from multichannel video programming distributors (MVPDs) on an annual basis. The Commission suspended the filing of Form 395–A in 2001 in the wake of the decision by the U.S. Circuit Court of Appeals for the *District of Columbia Circuit in MD/DC/DE Broadcasters Associations* v. *FCC (MD/DC/DE Broadcasters),* which vacated certain aspects of the Commission's EEO requirements for broadcasters. While the similar requirements for MVPDs have never been challenged, the Commission suspended the collection of both Forms 395–A and B, along with various EEO

requirements, in order to analyze the impact of the *MD/DC/DE* Broadcasters decision. In the Third Report and Order and Fourth Notice of Proposed Rulemaking (*Third Report and Order and Fourth NPRM*), the Commission reinstated Forms 395–A and B pending resolution of questions about confidential collection and use. As the Commission had not resolved those questions until its adoption of the Fourth Report and Order in MB Docket No. 98–204 (*Fourth R&O*), the collection of the Form 395–A remained suspended along with the Form 395–B. Despite that suspension, the Commission continued to seek OMB approval for the information collection, and during that time, OMB approved both Forms 395–A and B, subject to the Commission's resolution of confidentiality issues regarding the forms' collection and use. Although the filing of the Form 395–A has been suspended since 2001, OMB has most recently approved the information collection through January 31, 2026.

Discussion

2. We now seek by this *Second FNPRM* to refresh the record stemming from the *Third Report and Order and Fourth NPRM* regarding the collection of MVPD workforce composition data. Consistent with the analysis provided in the *Fourth R&O* for making Form 395–B data public, we tentatively conclude that the collection of Form 395–A also should be reinstated and made available for public review. We seek comment as to whether Congress's directive that MVPD operators make Form 395–A available for public inspection at their own facilities would be consistent with our amending our rules to require that MVPD operators instead make Form 395–A publicly available through the Commission-hosted Online Public Inspection File (OPIF). While section 634(d)(3)(B) of the Act states that an MVPD should make Form 395–A available for public inspection at the MVPD's central office and at every office where five or more full-time employees are regularly assigned to work, section 634(d)(4) of the Act permits the Commission to amend the requirements associated with Form 395–A as needed. We tentatively conclude that requiring the Form 395–A to be placed in the OPIF would be more efficient for the public that wishes to review such reports, as OPIF provides one online site for such review. We also tentatively conclude that hosting the reports in OPIF will reduce the burdens placed on MVPDs, as this will relieve the MVPDs of maintaining such reports at individual central offices, including providing sufficient staffing for such offices. We also tentatively conclude that our proposal to change the location of where the Form 395–A data will be housed from the MVPD's central office to the OPIF website is consistent with the basic intent of section 634(d)(3)(B) of the Act, which is to ensure that the public has access to the Form 395–A data. We seek comment on these tentative conclusions. Alternatively, if section 634(d)(3)(B) of the Act were to be read to compel availability of Form 395–A at MVPD offices, would it be within our authority and consistent with sound policy to additionally require availability through OPIF?

3. In the *Order on Reconsideration,* we modified § 73.3612 of our rules to specifically state that the Form 395–B data will not be used in assessing any aspect of an individual broadcast licensee's or permittee's compliance with both the nondiscrimination and equal employment opportunity requirements of § 73.2080. Despite the slight variation in the underlying statutory authority for the collection of the workforce employment data from MVPDs versus broadcasters, the Commission traditionally has treated both data collections in a similar manner. In this regard, the Commission has imposed the same restrictions on the use of workforce composition data stemming from both Forms 395–A and B. Consequently, we tentatively conclude that § 76.1802 of our rules concerning the MVPD annual employment report should be modified so as to align with the modifications made to § 73.3612 of our rules for broadcasters in the *Order on Reconsideration.* In the *Order on Reconsideration,* we incorporated what appears as a Note to § 73.3612 into the rule itself to conform to the publishing conventions of the National Archives and Records Administration's Office of the Federal Register. We seek comment on our tentative conclusion to do the same with regard to the language that currently appears as a Note to § 76.1802, to read as follows:

Each employment unit with six or more full-time employees shall file an annual employment report on the FCC Form 395–A with the Commission on or before September 30 of each year. Data concerning the gender, race and ethnicity of an employment unit's workforce collected in the annual employment report will be used only for purposes of analyzing industry trends and making reports to Congress. Such data will not be used for the purpose of assessing any aspect of an individual employment unit's compliance with our nondiscrimination or EEO rules for multi-channel video program distributors.

4. As stated in the *Fourth R&O,* the Form 395–B will include a mechanism to provide further specificity about broadcaster employees' gender identities. We seek comment on whether we should adopt a similar mechanism for the Form 395–A.

5. We also seek comment on the attendant costs and benefits of any proposals advanced in response to this item.

6. *Digital Equity and Inclusion.* Finally, the Commission, as part of its continuing effort to advance digital equity for all under 47 U.S.C. 151, including people of color, persons with disabilities, persons who live in rural or Tribal areas, and others who are or have been historically underserved, marginalized, or adversely affected by persistent poverty or inequality, invites comment on any equity-related considerations and benefits (if any) that may be associated with the proposals and issues discussed herein. Specifically, we seek comment on how our proposals may promote or inhibit advances in diversity, equity, inclusion, and accessibility, as well the scope of the Commission's relevant legal authority.

Procedural Matters

7. *Ex Parte Rules—Permit-But-Disclose.* With respect to the *Second FNPRM,* this proceeding shall be treated as a ''permit-but-disclose'' proceeding in accordance with the Commission's *ex parte* rules at 47 CFR 1.1200 *et seq.* Persons making *ex parte* presentations must file a copy of any written presentation or a memorandum summarizing any oral presentation within two business days after the presentation (unless a different deadline applicable to the Sunshine period applies). Persons making oral *ex parte* presentations are reminded that memoranda summarizing the presentation must (1) list all persons attending or otherwise participating in the meeting at which the *ex parte* presentation was made, and (2) summarize all data presented and arguments made during the presentation. If the presentation consisted in whole or in part of the presentation of data or arguments already reflected in the presenter's written comments, memoranda, or other filings in the proceeding, the presenter may provide citations to such data or arguments in his or her prior comments, memoranda, or other filings (specifying the relevant page and/or paragraph numbers where such data or arguments can be found) in lieu of summarizing

them in the memorandum. Documents shown or given to Commission staff during *ex parte* meetings are deemed to be written *ex parte* presentations and must be filed consistent with rule 1.1206(b). In proceedings governed by rule 1.49(f) or for which the Commission has made available a method of electronic filing, written *ex parte* presentations and memoranda summarizing oral *ex parte* presentations, and all attachments thereto, must be filed through the electronic comment filing system available for that proceeding, and must be filed in their native format (*e.g.,* .doc, .xml, .ppt, searchable .pdf). Participants in this proceeding should familiarize themselves with the Commission's *ex parte* rules.

8. *Filing Requirements—Comments and Replies.* Pursuant to §§ 1.415 and 1.419 of the Commission's rules, 47 CFR 1.145 and 1.419, interested parties may file comments and reply comments on or before the dates indicated on the first page of this document. Comments may be filed using the Commission's Electronic Comment Filing System (ECFS). *See Electronic Filing of Documents in Rulemaking Proceedings,* (63 FR 24121).

9. *Regulatory Flexibility Act.* The Regulatory Flexibility Act of 1980, as amended (RFA) requires that an agency prepare a regulatory flexibility analysis for notice and comment rulemakings, unless the agency certifies that ''the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.'' Accordingly, we have prepared an Initial Regulatory Flexibility Analysis (IRFA) concerning the potential impact of rule and policy change proposals on small entities in the *Second Further Notice of Proposed Rulemaking.*

10. *Initial Paperwork Reduction Act Analysis for Second Further Notice of Proposed Rulemaking in MB Docket No. 98–204.* This *Second FNPRM* may contain proposed new or modified information collection requirements. The Commission, as part of its continuing effort to reduce paperwork burdens, invites the general public and the Office of Management and Budget (OMB) to comment on these information collection requirements, as required by the Paperwork Reduction Act of 1995, Public Law 104–13. In addition, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), we seek specific comment on how we might further reduce the information collection burden for small business concerns with fewer than 25 employees.

11. *Providing Accountability Through Transparency Act.* The Providing Accountability Through Transparency Act of 2023 requires each agency, in providing notice of a rulemaking, to post online a brief plain-language summary of the proposed rule. Accordingly, the Commission will publish the required summary of this *Second Further Notice of Proposed Rulemaking* on *https://www.fcc.gov/proposed-rulemakings.*

Initial Regulatory Flexibility Act Analysis

12. As required by the Regulatory Flexibility Act of 1980, as amended (RFA), the Commission has prepared this Initial Regulatory Flexibility Analysis (IRFA) concerning the possible significant economic impact on small entities of the policies and rules proposed in this Second Further Notice of Proposed Rulemaking (*Second FNPRM*). The Commission requests written public comments on this IRFA. Comments must be identified as responses to the IRFA and must be filed by the deadlines for comments specified in the *Second FNPRM.* The Commission will send a copy of the *Second FNPRM,* including this IRFA, to the Chief Counsel for Advocacy of the Small Business Administration (SBA). In addition, the *Second FNPRM* and IRFA (or summaries thereof) will be published in the **Federal Register**.

A. Need for, and Objectives of, the Proposed Rules

13. The *Second FNPRM* seeks to refresh the record regarding the Commission's annual collection of broadcaster multichannel video programming distributor (MVPD) composition data by race and gender on FCC Form 395–A. In 2001, the Commission suspended the filing of Form 395–A after a federal court decision vacated certain aspects of the Commission's equal employment opportunity (EEO) requirements for broadcasters. Although the similar requirements for MVPDs have never been challenged, the Commission suspended the collection of both the broadcasters' Form 395–B and the MVPDs' Form 395–A, along with various EEO requirements, in order to analyze the impact of the federal court decision. In 2004, the Commission reinstated Forms 395–A and B pending resolution of questions about confidential collection and use of the forms' data. Today, having resolved the issues related to the confidentiality of the Form 395–B data in the *Fourth Report and Order,* the Commission now seeks public comment on the legal issues pertaining to availability and confidentiality of Form 395–A data.

14. Consistent with the decision in the *Fourth Report and Order* to make Form 395–B data public, the Commission tentatively concludes in the *Second FNPRM* that the collection of Form 395–A should also be reinstated in the same manner as it was previously with regard to public availability. The Communications Act requires an MVPD to make its Form 395–A available for public inspection at the MVPD's central office and at every office where five or more full-time employees are regularly assigned to work. The Commission has traditionally treated Form 395–A and B data in the same manner with regard to confidentiality. Consequently, the *Second FNPRM* seeks comment on whether instead of (or in addition to) maintaining the Form 395–A at a MVPD's central office, the form should now be maintained on the Commission's website similar to the requirement now established in the *Fourth Report and Order* for broadcasters' Form 395–B. Other than a proposal to include a mechanism in the Form 395–A that would enable MVPDs to account for those employees who identify as gender non-binary, the proposed reinstatement of this collection does not change the form's reporting requirements. We predict that inclusion of this mechanism, which would allow for accurate data gathering, would incur only a minimal economic impact on a substantial number of small entities.

B. Legal Basis

15. The proposed action is authorized under sections 1, 2(a), 4(i), 4(j), 4(k), 303, 403, and 634(d) of the Communications Act of 1934, as amended 47 U.S.C. 151, 152(a), 154(i), 154(k), 303, 403, and 554(d).

C. Description and Estimate of the Number of Small Entities to Which the Proposed Rules Will Apply

16. The RFA directs agencies to provide a description of, and where feasible, an estimate of the number of small entities that may be affected by the proposed revisions, if adopted. The RFA generally defines the term ''small entity'' as having the same meaning as the terms ''small business,'' ''small organization,'' and ''small governmental jurisdiction.'' In addition, the term ''small business'' has the same meaning as the term ''small business concern'' under the Small Business Act (SBA). A small business concern is one which: (1) is independently owned and operated; (2) is not dominant in its field of operations; and (3) satisfies any

additional criteria established by the SBA. Below, we provide a description of such small entities, as well as an estimate of the number of such small entities, where feasible.

17. Cable Companies and Systems (Rate Regulation). The Commission has developed its own small business size standard for the purpose of cable rate regulation. Under the Commission's rules, a ''small cable company'' is one serving 400,000 or fewer subscribers nationwide. Based on industry data, there are about 420 cable companies in the U.S. Of these, only seven have more than 400,000 subscribers. In addition, under the Commission's rules, a ''small system'' is a cable system serving 15,000 or fewer subscribers. Based on industry data, there are about 4,139 cable systems (headends) in the U.S. Of these, about 639 have more than 15,000 subscribers. Accordingly, the Commission estimates that the majority of cable companies and cable systems are small.

18. Cable System Operators (Telecom Act Standard). The Communications Act of 1934, as amended, contains a size standard for a ''small cable operator,'' which is ''a cable operator that, directly or through an affiliate, serves in the aggregate fewer than one percent of all subscribers in the United States and is not affiliated with any entity or entities whose gross annual revenues in the aggregate exceed $250,000,000.'' For purposes of the Telecom Act Standard, the Commission determined that a cable system operator that serves fewer than 498,000 subscribers, either directly or through affiliates, will meet the definition of a small cable operator. Based on industry data, only six cable system operators have more than 498,000 subscribers. Accordingly, the Commission estimates that the majority of cable system operators are small under this size standard. We note however, that the Commission neither requests nor collects information on whether cable system operators are affiliated with entities whose gross annual revenues exceed $250 million. Therefore, we are unable at this time to estimate with greater precision the number of cable system operators that would qualify as small cable operators under the definition in the Communications Act.

19. Open Video Systems. The open video system (OVS) framework was established in 1996 and is one of four statutorily recognized options for the provision of video programming services by local exchange carriers. The OVS framework provides opportunities for the distribution of video programming other than through cable systems. OVS operators provide subscription services and therefore fall within the SBA small business size standard for the cable services industry, which is ''Wired Telecommunications Carriers.'' The SBA small business size standard for this industry classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms in this industry that operated for the entire year. Of this total, 2,964 firms operated with fewer than 250 employees. Thus, under the SBA size standard the majority of firms in this industry can be considered small. Additionally, we note that the Commission has certified some OVS operators who are now providing service and broadband service providers (BSPs) are currently the only significant holders of OVS certifications or local OVS franchises. The Commission does not have financial or employment information for the entities authorized to provide OVS however, the Commission believes some of the OVS operators may qualify as small entities.

20. Satellite Master Antenna Television (SMATV) Systems, also known as Private Cable Operators (PCOs). SMATV systems or PCOs are video distribution facilities that use closed transmission paths without using any public right-of-way. They acquire video programming and distribute it via terrestrial wiring in urban and suburban multiple dwelling units such as apartments and condominiums, and commercial multiple tenant units such as hotels and office buildings. SMATV systems or PCOs are included in the Wired Telecommunications Carriers' industry which includes wireline telecommunications businesses. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that there were 3,054 firms in this industry that operated for the entire year. Of this total, 2,964 firms operated with fewer than 250 employees. Thus under the SBA size standard, the majority of firms in this industry can be considered small.

21. Direct Broadcast Satellite (DBS) Service. DBS service is a nationally distributed subscription service that delivers video and audio programming via satellite to a small parabolic ''dish'' antenna at the subscriber's location. DBS is included in the Wired Telecommunications Carriers industry which comprises establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired telecommunications networks. Transmission facilities may be based on a single technology or combination of technologies. Establishments in this industry use the wired telecommunications network facilities that they operate to provide a variety of services, such as wired telephony services, including VoIP services, wired (cable) audio and video programming distribution; and wired broadband internet services. By exception, establishments providing satellite television distribution services using facilities and infrastructure that they operate are included in this industry.

22. The SBA small business size standard for Wired Telecommunications Carriers classifies firms having 1,500 or fewer employees as small. U.S. Census Bureau data for 2017 show that 3,054 firms operated in this industry for the entire year. Of this number, 2,964 firms operated with fewer than 250 employees. Based on this data, the majority of firms in this industry can be considered small under the SBA small business size standard. According to Commission data however, only two entities provide DBS service—DIRECTV (owned by AT&T) and DISH Network, which require a great deal of capital for operation. DIRECTV and DISH Network both exceed the SBA size standard for classification as a small business. Therefore, we must conclude based on internally developed Commission data, in general DBS service is provided only by large firms.

D. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements

23. In this section, we identify the reporting, recordkeeping, and other compliance requirements contained in the Second FNPRM and consider whether small entities are affected disproportionately by any such requirements. To a large degree, the Second FNPRM only seeks to reinstitute the previous reporting, recordkeeping, or compliance requirements for collection of MVPD workforce composition data on Form 395–A, as this collection was previously suspended in 2001. The Second FNPRM, does, however, seek comment on whether to replace the existing requirement that a MVPD maintain a copy of the Form 395–A at its central office with a requirement that a MVPD instead upload a copy of its Form 395–A to the Commission's website. Alternatively, if the statute were read to compel availability of Form 395–A at MVPD offices, the Second FNPRM seeks comment on whether it is within our authority and consistent with sound

policy to additionally require availability through the OPIF. So as to harmonize the MVPD requirements with those imposed on broadcasters, the Second FNPRM also seeks comment on whether to modify the Commission's rules so as to include a statement that the Commission will not use the Form 395–A data when assessing compliance with both the nondiscrimination and EEO requirements of its rules. Currently, the prohibition contained in the Commission's rules only references a restriction on the use of the Form 395–A data for assessing compliance with the EEO rules. Because the only proposed modification in the Second FNPRM with regard to reporting or recordkeeping obligations is merely a change in the location of where the Form 395–A will be housed (*i.e.,* on the Commission's website rather than (or in addition to) the MVPDs' central office), we do not anticipate a significant change in the compliance burden for small entities. Additionally, MVPD employment units with less than six full-time employees are exempt from filing the statistical data requested on the form. Hence, the Commission concludes that small entities will not be disproportionately affected by the Second FNPRM.

E. Steps Taken To Minimize Significant Economic Impact on Small Entities, and Significant Alternatives Considered

24. The RFA requires an agency to describe any significant alternatives that it has considered in reaching its proposed approach, which may include the following four alternatives (among others): (1) the establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for small entities.

25. The Second FNPRM seeks to refresh the record regarding the Commission's annual collection of MVPD workforce composition data by race and gender on Form 395–A. It would lead to a resumption of this data collection and would propose only to modify one of the locations where the Form 395–A should be retained, by seeking comment on whether an MVPD should retain a copy on the Commission's website in lieu of (or in addition to) at the MVPDs' central office. To the extent MVPDs were maintaining hard copies of the Form 395–A at their central offices, we anticipate that storing an electronic copy on the Commission's website will minimize the economic burdens on MVPDs. Where maintenance of a hard copy necessitates the use of MVPD staff time to monitor public access to the Form 395–A, retention of an electronic copy on the Commission's website presents itself as a simple and straightforward process, requiring only a minimal degree of navigating the Commission's database system to upload the information. Further, as detailed in the Second FNPRM, the collection of MVPD workforce composition data and providing the data for public inspection are required by section 634(d) of the Act.

F. Federal Rules That May Duplicate, Overlap, or Conflict With the Second FNPRM

26. None.

List of Subjects in 47 CFR Part 76

Radio; Reporting and recordkeeping requirements; Television.

Federal Communications Commission.

Marlene Dortch,

Secretary.

Proposed Rules

For the reasons discussed in the preamble, the Federal Communications Commission proposes to amend 47 CFR part 76 as follows:

PART 76—MULTICHANNEL VIDEO AND CABLE TELEVISION SERVICE

■ 1. The authority citation for part 76 continues to read as follows:

Authority: 47 U.S.C. 151, 152, 153, 154, 301, 302, 302a, 303, 303a, 307, 308, 309, 312, 315, 317, 325, 338, 339, 340, 341, 503, 521, 522, 531, 532, 534, 535, 536, 537, 543, 544, 544a, 545, 548, 549, 552, 554, 556, 558, 560, 561, 571, 572, 573.

■ 2. Revise § 76.1802 to read as follows:

§ 76.1802 Annual employment report.

Each employment unit with six or more full-time employees shall file an annual employment report on the FCC Form 395–A with the Commission on or before September 30 of each year. Data concerning the gender, race and ethnicity of an employment unit's workforce collected in the annual employment report will be used only for purposes of analyzing industry trends and making reports to Congress. Such data will not be used for the purpose of assessing any aspect of an individual employment unit's compliance with our nondiscrimination or EEO rules for multi-channel video program distributors.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[Doc. No. AMS–SC–24–0009]

Notice of Request for Extension and Revision of a Currently Approved Information Collection for Pistachios Grown in California, Arizona, and New Mexico

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act, this notice announces the Agricultural Marketing Service's (AMS) intent to request an extension for and revision to a currently approved information collection for Pistachios Grown in California, Arizona, and New Mexico, pursuant to Federal Marketing Order No. 983.

DATES: Comments on this notice must be received by May 28, 2024 to be assured of consideration.

ADDRESSES: Interested persons are invited to submit written comments concerning this notice to the Docket Clerk, Market Development Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW, STOP 0237, Washington, DC 20250–0237; Fax: (202) 720–8938; or online at *https://www.regulations.gov.* All comments submitted in response to this notice will be included in the record and will be made available to the public. Please be advised that the identity of individuals or entities submitting the comments will be made available to the public on the internet at the address provided above.

FOR FURTHER INFORMATION CONTACT: Thomas Nalepa, Marketing Specialist, and Matthew Pavone, Chief, Rulemaking Services Branch, Market Development Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW, Stop 0237, Washington, DC 20250–0237; Telephone: (202) 720–8085; Fax: (202) 720–8938; or Email: *thomas.nalepa@usda.gov* and *matthew.pavone@usda.gov.*

Small businesses may request information on this notice by contacting Richard Lower, Market Development Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW, STOP 0237, Washington, DC 20250–0237; Telephone (202) 720–8085; Fax: (202) 720–8938; or Email: *Richard.Lower@usda.gov.*

SUPPLEMENTARY INFORMATION:

Title: Pistachios Grown in California, Arizona, and New Mexico, Marketing Order No. 983.

OMB Number: 0581–0215.

Expiration Date of Approval: June 30, 2024.

Type of Request: Extension and revision of a currently approved information collection.

Abstract: Under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the ''Act,'' authorizes the Secretary of Agriculture to issue marketing orders that regulate the handling of any agricultural commodity specified in the Act, and to consider recommendations submitted by the administrative committees that manage the operations of such marketing orders. The individuals serving on an administrative committee are nominated by each commodity industry, are familiar with the handling of such commodity in their local area and are thus in a position to make recommendations to the Secretary.

This notice pertains to the Federal marketing order regulating the handling of pistachios grown in California, Arizona, and New Mexico (7 CFR part 983), hereinafter referred to as the ''Order.'' The Order authorizes grade and size requirements, as well as a requirement for aflatoxin testing on domestic shipments only.

The Administrative Committee for Pistachios (Committee) locally administers the Order that requires handlers to submit certain information to the Committee to effectively implement program requirements, fulfill the intent of the Act, and assist the industry in carrying out marketing decisions. Only authorized employees of the Committee, and authorized representatives of the USDA have access to information provided on the forms.

Requesting public comments on the forms described below is part of the process to obtain approval through the Office of Management and Budget (OMB).

The forms needing OMB approval are contained in OMB No. 0581–0215 and include Committee nominations and ballots for producers (SC–245 and SC–246) and handlers (SC–245A and SC–244); background statements for Committee nominees (SC–243); marketing agreement (SC–242); and referendum (SC–240A) and continuance ballots (SC–240).

There are also forms to report assessment receipts (ACP–1), notify for failed lot dispositions (ACP–2), apply for exemption from handling requirements (ACP–3), request for minimal testing for aflatoxins (ACP–4), report inter-handler transfers (ACP–5), provide monthly inventory and shipment data (ACP–6), and submit lists of producers and deliveries (ACP–7).

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 0.27 hours per response.

Respondents: Pistachio producers, handlers, and testing laboratories.

Estimated Number of Respondents: 1,220.

Estimated Number of Responses: 1,968.37.

Estimated Number of Responses per Respondent: 1.61.

Estimated Total Annual Burden on Respondents: 541.19 hours.

Comments: Comments are invited on: (1) Whether the proposed collection of the information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All responses to this notice will be summarized and included in the request

for OMB approval. All comments will also become a matter of public record.

Erin Morris,

Associate Administrator, Agricultural Marketing Service.

BILLING CODE P

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[Doc. No. AMS–FTPP–22–0080]

National Bioengineered Food Disclosure Standard; Annual Review of the List of Bioengineered Foods

ACTION: Notice; request for information.

SUMMARY: The Agricultural Marketing Service (AMS) of the Department of Agriculture (USDA) is soliciting information about potential additions to or subtractions from the List of Bioengineered Foods (List) as it pertains to the National Bioengineered Food Disclosure Standard (Standard).

DATES: Comments must be received by April 29, 2024 to be assured of consideration.

ADDRESSES: Interested parties are invited to submit written comments via the internet at *https://www.regulations.gov.* Enter ''AMS–FTPP–22–0080'' in the Search field. Select the Documents tab, then select the 'Comment' button in the list of documents. Comments may also be filed by mail or by fax with the Docket Clerk, 1400 Independence Ave. SW, Room 2069—South, Washington, DC 20250; Fax: (202) 260–8369. All comments submitted in response to this notice, including the identity of individuals or entities submitting comments, will be made available to the public on the internet via *https://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Kenneth Becker, Research and Rulemaking Branch Chief, Food Disclosure and Labeling Division, Fair Trade Practices Program, Agricultural Marketing Service, U.S. Department of Agriculture, Telephone (202) 570–3661, Email *kenneth.becker@usda.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

On July 29, 2016, Public Law 114–216 amended the Agricultural Marketing Act of 1946 (7 U.S.C. 1621 *et. seq.*) (amended Act) to require USDA to establish a national, mandatory standard for disclosing any food that is or may be bioengineered. In accordance with the amended Act, USDA published final regulations (2018 final rule) to implement the Standard on December 21, 2018 (83 FR 65814). The regulations became effective on February 19, 2019, with a mandatory compliance date of January 1, 2022. Under 7 CFR 66.1, a bioengineered food is a food that—subject to certain factors, conditions, and limitations—contains detectable genetic material that has been modified through *in vitro* recombinant deoxyribonucleic acid (rDNA) techniques and for which the modification could not otherwise be obtained through conventional breeding or found in nature.

The regulations, at 7 CFR 66.6, provides the List, which currently includes: alfalfa, apple (Arctic™ varieties), canola, corn, cotton, eggplant (BARI Bt Begun varieties), papaya (ringspot virus-resistant varieties), pineapple (pink flesh varieties), potato, salmon (AquAdvantage®), soybean, squash (summer, coat-protein mediated virus-resistant), sugarbeet, and sugarcane (Bt insect-resistant). Where practical, the List includes specific information about individual crops and foods, such as variety descriptions or trade names, to help distinguish bioengineered versions of those foods from their non-bioengineered counterparts.

The List attempts to capture bioengineered crops and food that meet the statutory definition of ''bioengineering,'' based on existing technology, and that could potentially be offered for sale in the United States (83 FR 65839). AMS has developed the List to identify the crops and food that are available in a bioengineered form, and to aid regulated entities considering whether they may need to make a bioengineered disclosure (83 FR 65839). Food has a broad definition under 7 CFR 66.1 and includes raw agricultural commodities, such as crops and animals; incidental additives; and processed foods. Raw agricultural commodities, including crops and animals, are candidates for inclusion on the List. Microbes, such as enzymes, yeasts, and other similar foods produced in controlled environments, are excluded from the List, as explained in the preamble to the 2018 Final Rule, and therefore are not considered for addition to the List (83 FR 65839). Similarly, ''processed foods'', as defined at 7 CFR 66.1, are excluded from the List (*See* 83 FR 65819).

As stated in the preamble to the 2018 final rule, at 83 FR 65852, the List ''establishes a presumption about what foods might require disclosure under the Standard but does not absolve regulated entities from the requirement to disclose the bioengineered status of food and food ingredients produced with foods not on the List when the regulated entities have actual knowledge that such foods or food ingredients are bioengineered.'' As a result, if a regulated entity is using a food or ingredient produced from an item on the List, they must make a bioengineered food disclosure unless they have records demonstrating that the food or ingredient they are using is not bioengineered. Similarly, even if a food is not on the List, a regulated entity must make a bioengineered food disclosure if they have actual knowledge a food or ingredient that they are using is a bioengineered food or a bioengineered food ingredient.

The regulations at 7 CFR 66.7(a) require AMS to review and consider updates to the List on an annual basis and solicit comments regarding recommended updates to the List through notification in the **Federal Register** and on the AMS website.

The regulations at 7 CFR 66.7(a) further provide that:

(1) Recommendations regarding additions to and subtractions from the List may be submitted to AMS at any time or as part of the annual review process.

(2) Recommendations should be accompanied by data and other information to support the recommended action.

(3) AMS will post public recommendations on its website, along with information about other revisions to the List that the agency may be considering, including input based on consultation with the government agencies responsible for oversight of the products of biotechnology: USDA's Animal and Plant Health Inspection Service (USDA–APHIS); the U.S. Environmental Protection Agency (EPA); the Department of Health and Human Services' Food and Drug Administration (FDA)' and appropriate members of the Coordinated Framework for the Regulation of Biotechnology or a similar successor.

(4) AMS will consider whether foods for inclusion on the List have been authorized for commercial production somewhere in the world and whether the food is currently in legal commercial production for human food somewhere in the world.

As stated at 7 CFR 66.7(b), regulated entities will have 18 months following the effective date of the updated List to revise food labels to reflect changes to the List in accordance with the disclosure requirements of 7 CFR part 66.

II. Request for Information

When considering whether crops and food available in a bioengineered form should be added to the List, AMS will consider two criteria: (1) whether the food has been authorized for commercial production somewhere in the world; and (2) whether the food is currently in legal commercial production for human food somewhere in the world. AMS uses resources such as GAIN Agricultural Biotechnology Annual Reports, information from food manufacturers, and international governmental information to track such authorizations and the status of commercial production.

AMS is soliciting comments including data, recommendations, and other information on the inclusion of several specific crops and foods it has determined are likely to meet the criteria to be added to the List. AMS also seeks information from the public on any additional crops or foods that may meet the criteria to be added to the List, any crops or foods that no longer meet the criteria and should be subtracted from the List, and any trade names, varieties or modifiers that should be considered for addition to or subtraction from the items currently appearing on the List. After reviewing the recommendations and information submitted in response to this notice, AMS will use that information, as well as input based on consultation with other government agencies responsible for oversight of the products of biotechnology, to determine whether it should initiate rulemaking to update the List. Any comments not directly related to updates to the List will not be considered, nor will recommendations that are not accompanied by data and other information to support the recommended action. AMS is providing 30 days for the submission of relevant information. Any changes to the List would be reflected in an amendment to 7 CFR part 66.

1. Should Dry Edible Beans (Event—EMB–PVØ51) [1] [2] be added to the List? If so, would you suggest that AMS use a modifier, trade name, variety, etc.?

2. Should Cowpea (Event—AAT709A) [3] [4] be added to the List? If so, would you suggest that AMS use a modifier, trade name, variety, etc.?

3. Should Wheat (Event—HB4) [5] [6] be added to the list? If so, would you suggest that AMS use a modifier, trade name, variety, etc.?

4. Should Rice (Event—GR2E, Production of provitamin A carotenoids), [7] [8] also known as Golden Rice, be added to the List? If so, would you suggest that AMS use a modifier, trade name, variety, etc.?

5. Should Purple Tomato (Event—Del/Ros1–N) [9] be added to the List? If so, would you suggest that AMS use a modifier, trade name, variety, etc.?

6. Should Plums (Honeysweet, Event—ARS–PLMC5–6) [10] be added to the List? If so, would you suggest that AMS use a modifier, trade name, variety, etc.?

7. Are there any other crops or foods that should be considered for inclusion on the List?

8. Are there any crops or foods currently on the List that should be considered for subtraction from the List?

9. Should any modifiers be added or changed for any of the crops or foods already on the List?

Authority: 7 U.S.C. 1621 *et seq.*

DEPARTMENT OF AGRICULTURE

Economic Research Service

Agency Information Collection Activities: Comment Request

AGENCY: Economic Research Service (ERS), Department of Agriculture (USDA).

ACTION: Notice of information collection; request to comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ERS is proposing a new information collection to study consumer's willingness to pay to prevent health effects of foodborne illness, ''Foodborne Illness Prevention Valuation Survey.''

DATES: Written comments on this notice must be received by May 28, 2024 to be assured of consideration. Comments received after that date will be considered to the extent practicable. Send comments to the address below.

ADDRESSES: Address all comments concerning this notice to *julie.parker3@usda.gov* and *ers.pra@usda.gov* identified by docket number 0536–NEW.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of this information collection should be directed to Julie Parker at *ers.pra@usda.gov* or 202–868–7945.

SUPPLEMENTARY INFORMATION:

Title of collection: Foodborne Illness Prevention Valuation Survey.

OMB Control Number: 0536–NEW.

Type of Request: A new information collection.

Abstract:

Collection of Information for Foodborne Illness Prevention Valuation Survey

The proposed data collection will survey U.S. consumers to study the value consumers place on preventing pain and suffering from foodborne illnesses and their long-term outcomes. The survey sample will be drawn from a panel of individuals recruited to be representative of the U.S. public. USDA Food Safety and Inspection Service uses these estimates in cost-benefit analysis of proposed food safety regulations. They also use information on the value consumers place on avoiding a range of foodborne illnesses to help inform food safety program priorities.

This stated preference survey will enhance understanding of the value the public places on preventing foodborne illness. Like other cost of illness research, current cost of foodborne illness estimates includes cost of medical treatment, the value of lost time, and willingness to pay to reduce risk of death, but do not include the value consumers place on preventing the physical, emotional and social burden experienced from these illnesses. Economic theory supports the utility of measuring consumer willingness to pay for these non-monetary benefits of health protection, as demonstrated by recent survey

research in the United Kingdom and Australia. The proposed survey project will build upon these efforts.

Participation in the survey will be voluntary. Respondents will be recruited online and will respond to an online survey. Data will be analyzed using discrete choice models to estimate consumers' willingness to pay to prevent pain and suffering from foodborne illnesses and their long-term outcomes. Results from the survey will provide the first U.S. estimates of consumer willingness to pay to prevent pain and suffering from foodborne illnesses. Results will be published in academic journals and Federal research reports. This will help ensure stakeholder and public access to results regarding the benefits of food safety programs. This work will also inform future studies on valuing prevention of foodborne illness.

Authority: These data will be collected under the authority of US Code (U.S.C.) 7 U.S.C. 2204(a) General duties of Secretary, advisory functions, research and development and 7 U.S.C 6971, Under Secretary of Agriculture for Research, Education, and Economics, as implemented under the Code of Federal Regulations (CFR) 7 CFR 2.21 which delegates to the Under Secretary, as Chief Scientist, the responsibility for agricultural systems and technology, including emerging agricultural research, education, and extension needs. This Notice is submitted in accordance with the Paperwork Reduction Act of 1995 (at 44 U.S.C. 3501, *et seq.*) and Office of Management and Budget regulations at 5 CFR part 1320. 5 CFR part 1320.

Confidentiality: All ERS employees and ERS contractors must also fully comply with all provisions of the Confidential Information Protection and Statistical Efficiency Act (CIPSEA) of 2018, Title III of Public Law 115–435, codified in 44 U.S.C. ch. 35.

Estimate of Burden: The burden for this collection of information is estimated to average approximately 30 minutes per respondent completing the survey.

Respondents: The respondents will be consumers across the United States.

Estimated Number of Respondents: Up to 3,000 respondents completing the survey. This is based on a 30% response rate from a total of 10,000 sampled consumers.

Estimated Total Annual Burden on Respondents: Up to 2,000 hours (inclusive of completed responses and contacts).

Comments: Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of ERS, including whether the information will have practical utility; (b) the accuracy of ERS's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, use, and clarity of the information for respondents, including through the use of automated collection techniques or other forms of information technology; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Spiro Stefanou,

Administrator, Economic Research Service, United States Department of Agriculture.

BILLING CODE 3410–18–P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Texas Advisory Committee

AGENCY: Commission on Civil Rights.

ACTION: Announcement of virtual business meetings.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act (FACA) that the Texas Advisory Committee (Committee) to the U.S. Commission on Civil Rights will hold a series virtual business meeting via ZoomGov on the following dates listed below. These virtual business meetings are for the purpose of selecting and refining their next project topic.

DATES: These meetings will take place on:

- Wednesday, April 24, 2024, from 12:00 p.m.–1:00 p.m. CT
- Wednesday, June 5, 2024, from 12:00 p.m.–1:00 p.m. CT
- Tuesday, June 18, 2024, from 12:00 p.m.–1:00 p.m. CT

- Wednesday, April 24 *https://www.zoomgov.com/webinar/register/WN_Z2vPBVG4TU2q6sJEdLqlMw*
- Wednesday, June 5 *https://www.zoomgov.com/webinar/register/WN_X94mfqEwQGCsRs8k-umsSQ*
- Tuesday, June 18 *https://www.zoomgov.com/webinar/register/WN_OUBydKsbRk6y2Zk-bZQX3g*

FOR FURTHER INFORMATION CONTACT: Brooke Peery, Designated Federal Officer (DFO) at *bpeery@usccr.gov* or by phone at (202) 701–1376.

SUPPLEMENTARY INFORMATION: Committee meetings are available to the public through the videoconference link above. Any interested member of the public may listen to the meeting. An open comment period will be provided to allow members of the public to make a statement as time allows. Per the Federal Advisory Committee Act, public minutes of the meeting will include a list of persons who are present at the meeting. If joining via phone, callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Closed captioning will be available for individuals who are deaf, hard of hearing, or who have certain cognitive or learning impairments. To request additional accommodations, please email Angelica Trevino, Support Services Specialist, *atrevino@usccr.gov* at least 10 business days prior to the meeting.

Members of the public are entitled to make comments during the open period at the end of the meeting. Members of the public may also submit written comments; the comments must be received in the Regional Programs Unit within 30 days following the meeting. Written comments can be sent via email to Brooke Peery (DFO) at *bpeery@usccr.gov.*

Records generated from this meeting may be inspected and reproduced at the Regional Programs Coordination Unit Office, as they become available, both before and after the meeting. Records of the meetings will be available via *www.facadatabase.gov* under the Commission on Civil Rights, Texas Advisory Committee link. Persons interested in the work of this Committee are directed to the Commission's website, *http://www.usccr.gov,* or may contact the Regional Programs Coordination Unit at *atrevino@usccr.gov.*

Agenda

I. Welcome & Roll Call

II. Approval of Minutes

III. Committee Discussion

IV. Public Comment

V. Adjournment

Dated: March 23, 2024.

David Mussatt,

Supervisory Chief, Regional Programs Unit.

BILLING CODE P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–570–071, C–570–072]

Sodium Gluconate, Gluconic Acid, and Derivative Products From the People's Republic of China Continuation of Antidumping and Countervailing Duty Orders

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: As a result of the determinations by the U.S. Department of Commerce (Commerce) and the U.S. International Trade Commission (ITC) that revocation of the antidumping duty (AD) and countervailing duty (CVD) orders on sodium gluconate, gluconic acid, and derivative products from the People's Republic of China would likely lead to the continuation or recurrence of dumping and countervailable subsidies, and material injury to an industry in the United States, Commerce is publishing a notice of continuation of these AD and CVD orders.

DATES: Applicable March 20, 2024.

FOR FURTHER INFORMATION CONTACT: Stephanie Trejo, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4390

SUPPLEMENTARY INFORMATION:

Background

On November 13, 2018, Commerce published in the **Federal Register** the AD and CVD orders on sodium gluconate, gluconic acid, and derivative products from the People's Republic of China.[1] On October 2, 2023, the ITC instituted,[2] and Commerce initiated,[3] the first sunset review of the *Orders,* pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act). As a result of its reviews, Commerce determined that revocation of the *Orders,* would likely lead to the continuation or recurrence of dumping and countervailable subsidies, and therefore, notified the ITC of the magnitude of the margins of dumping

[1] *See Sodium Gluconate, Gluconic Acid, and Derivative Products From the People's Republic of China: Antidumping Duty and Countervailing Duty Orders,* 83 FR 56299 (November 13, 2018) (*Orders*).

[2] *See Sodium Gluconate, Gluconic Acid, and Derivative Products From China; Institution of Five-Year Reviews,* 88 FR 67807 (October 2, 2023).

[3] *See Initiation of Five-Year (Sunset) Reviews,* 88 FR 67729 (October 2, 2023).

and subsidy rates likely to prevail should the *Orders* be revoked.[4]

On March 20, 2024, the ITC published its determination, pursuant to sections 751(c) and 752(a) of the Act, that revocation of the *Orders*) would likely lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.[5]

Scope of the Orders

The scope of the orders covers all grades of sodium gluconate, gluconic acid, liquid gluconate, and glucono delta lactone (GDL) (collectively GNA Products), regardless of physical form (including, but not limited to substrates; solutions; dry granular form or powders, regardless of particle size; or as a slurry). The scope also includes GNA Products that have been blended or are in solution with other product(s) where the resulting mix contains 35 percent or more of sodium gluconate, gluconic acid, liquid gluconate, and/or GDL by dry weight. Sodium gluconate has a molecular formula of $NaC_6H_{11}O_7$. Sodium gluconate has a Chemical Abstract Service (CAS) registry number of 527–07–1, and can also be called ''sodium salt of gluconic acid'' and/or sodium 2, 3, 4, 5, 6 pentahydroxyhexanoate. Gluconic acid has a molecular formula of $C_6H_{12}O_7$. Gluconic acid has a CAS registry number of 526–95–4, and can also be called 2, 3, 4, 5, 6 pentahydroxycaproic acid. Liquid gluconate is a blend consisting only of gluconic acid and sodium gluconate in an aqueous solution. Liquid gluconate has CAS registry numbers of 527–07–1, 526–95–4, and 7732–18–5, and can also be called 2, 3, 4, 5, 6-pentahydroxycaproic acid-hexanoate. GDL has a molecular formula of $C_6H_{10}O_6$. GDL has a CAS registry number of 90–80–2, and can also be called d-glucono-1,5-lactone.

The merchandise covered by the scope of the orders is currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under subheadings 2918.16.1000, 2918.16.5010, and 2932.20.5020. Merchandise covered by the scope may also enter under HTSUS subheadings 2918.16.5050, 3824.99.2900, and 3824.99.9397. Although the HTSUS subheadings and CAS registry numbers are provided for convenience and customs purposes, the written description of the merchandise is dispositive.

Continuation of the Orders

As a result of the determinations by Commerce and the ITC that revocation of the *Orders* would likely lead to continuation or recurrence of dumping, countervailable subsidies, and material injury to an industry in the United States, pursuant to section 751(d)(2) of the Act, Commerce hereby orders the continuation of the *Orders.* U.S. Customs and Border Protection will continue to collect AD and CVD cash deposits at the rates in effect at the time of entry for all imports of subject merchandise.

The effective date of the continuation of the *Orders* is March 20, 2024.[6] Pursuant to section 751(c)(2) of the Act and 19 CFR 351.218(c)(2), Commerce intends to initiate the next five-year reviews of the *Orders* not later than 30 days prior to fifth anniversary of the date of the last determination by the ITC.

Administrative Protective Order (APO)

This notice also serves as a final reminder to parties subject to an APO of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

These five-year (sunset) reviews and this notice are in accordance with sections 751(c) and 751(d)(2) of the Act and published in accordance with section 777(i) of the Act, and 19 CFR 351.218(f)(4).

Dated: March 22, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

[Docket No. ITA–2024–0002]

X–RIN 0625–A–001

Indo-Pacific Economic Framework for Prosperity Clean Economy Investor Forum Solicitation of Applications for Participation

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Notice and request for applications.

SUMMARY: The International Trade Administration (ITA) seeks applications for the Department to consider recommending to the Government of Singapore (Singapore) for participation in the Indo-Pacific Economic Framework for Prosperity (IPEF) Clean Economy Investor Forum (Forum) hosted by Singapore on June 5–6, 2024. The Forum was announced on November 16, 2023, in the Joint Statement following an IPEF Ministerial meeting. The Forum participants will help advance the climate objectives of the proposed IPEF Clean Economy Agreement by helping facilitate investments in climate-related projects in the Indo-Pacific region. ITA is seeking applications from the U.S. private sector for ITA to consider recommending to Singapore.

DATES: The IPEF Clean Economy Investor Forum will take place on Thursday and Friday, June 5–6, 2024.

FOR FURTHER INFORMATION CONTACT: Ava Jamerson, Policy Advisor, Office of the Under Secretary of Commerce for International Trade, 1401 Constitution Avenue NW, Washington, DC 20230; email: *ava.jamerson@trade.gov;* telephone: 202.823.0686. For additional information about IPEF, please visit: *https://www.commerce.gov/ipef.* You can find the latest information about the Clean Economy Pillar at: *https://www.commerce.gov/ipef/pillar-iii* and at *https://www.commerce.gov/sites/default/files/2023-11/US-Factsheet-SF-Pillar-III.pdf.*

SUPPLEMENTARY INFORMATION:

Table of Content

I. Background
II. Criteria
III. Request for Nominations

I. Background

In May 2022, the United States launched the Indo-Pacific Economic Framework for Prosperity. IPEF is part of the Biden Administration's

commitment to strengthening ties with allies and partners and tackling 21st Century economic challenges in the Indo-Pacific region.

IPEF seeks to advance resilience, sustainability, inclusiveness, economic growth, fairness, and competitiveness for the 14 IPEF partner economies—Australia, Brunei Darussalam, Fiji, India, Indonesia, Japan, Republic of Korea, Malaysia, New Zealand, the Philippines, Singapore, Thailand, the United States, and Vietnam. IPEF also will provide tangible benefits that fuel economic activity and investment, promote sustainable and inclusive economic growth, and benefit workers and consumers across the region.

The IPEF partners are launching the inaugural IPEF Clean Economy Investor Forum to catalyze investment for sustainable infrastructure and climate technology across IPEF economies to advance the goals of the proposed Clean Economy Agreement, which includes increasing investment flows and financing for climate-related infrastructure, technologies, and projects in the region. The proposed Clean Economy Agreement outlines collaboration through a convening of private and institutional investors to facilitate business matching and investments, as well as sharing expertise and good practices on scaling up clean technology and infrastructure investments.

The Forum is being hosted by Singapore on June 5–6, 2024, and will be attended by Secretary Raimondo and her counterparts from the 13 other IPEF partner countries. Its purpose is to convene a diverse set of stakeholders from across the United States and the Indo-Pacific region to gain market insights, make industry and government contacts, solidify business strategies, and identify funding for specific projects to advance the goals of the proposed Clean Economy Agreement.

The Forum will focus on the markets of the 14 partner economies that are actively engaging in the proposed Clean Economy Agreement, with a particular focus on emerging economies. The scope of climate issues in which the Forum seeks to facilitate trade and investment will be informed by issues covered in the proposed Clean Economy Agreement, including efforts towards energy security and transition, climate resilience and adaptation, and greenhouse gas emissions mitigation.

The International Trade Administration seeks applications from the U.S. private sector to be recommended as participants in the Forum, including but not limited to investors, companies, and non-profits. Each country will be asked to put forward individuals from their countries' private sectors to participate in the Forum for consideration by Singapore. Singapore will ultimately select who to invite to the Forum.

II. Criteria

Singapore expects to invite approximately 20–50 participants from the U.S. private sector, at its discretion. ITA is seeking applications from the U.S. private sector, which it will consider based on the below criteria. Through this process, ITA will prepare recommendations for final approval by the Department and then share with Singapore for Singapore's consideration and decision. ITA is primarily focused on senior executives from organizations including investors, companies, and/or non-profits.

Interested companies should submit their applications for immediate consideration to the International Trade Administration at *IPEFInvestorForum@trade.gov* by or before 5:00 p.m. EST on April 9, 2024. The following criteria will be used to identify prospective participants. These participants will be considered through a holistic analysis and are not required to meet each element listed below:

(1) Level of executive representation;

(2) Consistency of the applicant's goals and objectives with the stated scope of the Forum;

(3) Alignment with the proposed Clean Economy Agreement objectives;

(4) Focus on IPEF markets, such as experience or demonstrated interest in investing in the region in the next 18 months in one or more IPEF markets;

(5) Ability to fulfill and support the objectives of the Forum (*e.g.,* significant funds and/or assets to support the types of projects envisioned); and

(6) Headquarters in the United States.

The Department may consider other information as it deems relevant.

Please do not send company or organization brochures.

Applications received after April 9, 2024, will be considered only if space and scheduling constraints permit and if Singapore continues to accept recommendations.

Applicants selected to be recommended to Singapore will be notified.

III. Request for Applications

To be considered, all applications should include the following information, as applicable:

(1) Organization Name;

(2) U.S. State of Incorporation;

(3) Corporate Headquarters;

(4) Principal Place of Business;

(5) Main Address (Street Address, City, State, and Zip Code);

(6) List of Subsidiary or Affiliate Offices in Asia;

(7) Industry Area(s);

(8) Main Products and/or Services;

(9) A brief (up to one page) Statement of Interest explaining (1) your organization's goals and qualifications for attending the Forum, and (2) how your organization's work can support the clean energy transition, climate resilience and adaptation, and greenhouse gas emissions mitigation;

(10) Name, title, work email, phone number, and biography of your Chief Executive Officer, President, Chief Investment Officer, or other senior executive who would represent the organization at the Forum;

(11) Name, title, work email, and phone number of the main working-level point of contact that will facilitate the senior executive's participation in the Forum; and

(12) Name, title, work email, and phone number of one optional accompanying staff person.

Privacy Act Statement

The collection, maintenance, and disclosure of this information is governed by the Privacy Act of 1974 (5 U.S.C. 552a). The Department of Commerce is authorized to collect this information pursuant to authorities that include but are not limited to: 15 U.S.C. 1512. The principal purposes for which the Department will use the information is to assist in selecting the U.S. representatives to recommend to Singapore to participate in the Forum. Information received will be maintained in COMMERCE/DEPT–23, Information Collected Electronically in Connection with Department of Commerce Activities and Programs. One of the routine uses for this information includes providing it to other registrants, including the Government of Singapore, to facilitate company/organization matchmaking (Routine Use 1). A complete set of routine disclosures is included in the system of records notice, published both in the **Federal Register** and on the Department's website at: *https://www.commerce.gov/opog/privacy/system-records-notice.* Disclosing this information to the Department of Commerce is voluntary. However, if you do not provide this information, or only provide part of the information requested, you may not be considered for selection as U.S. representatives to the Forum.

Authority: 15 U.S.C. 1512.

Dated: March 22, 2024.

Diane Farrell,

Deputy Under Secretary for International Trade.

Certain Cold-Rolled Steel Flat Products From the Republic of Korea: Amended Final Results of Antidumping Duty Administrative Review; 2021–2022

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) is amending the final results of the administrative review of the antidumping duty order on certain cold-rolled steel flat products (cold-rolled steel) from the Republic of Korea (Korea) to correct a ministerial error. The period of review (POR) is September 1, 2021, through August 31, 2022.

DATES: Applicable March 28, 2024.

FOR FURTHER INFORMATION CONTACT: Caroline Carroll, AD/CVD Operations, Office IX, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4948.

SUPPLEMENTARY INFORMATION:

Background

On February 23, 2024, Commerce published the *Final Results* of this review in the **Federal Register**.[1] On February 23, 2024, we received a timely ministerial error allegation from Steel Dynamics, Inc. (SDI), the petitioner.[2] No other party made a ministerial error allegation or rebutted the petitioner's ministerial error allegation. We are amending the *Final Results* to correct the ministerial error raised by SDI.

Legal Framework

Section 751(h) of the Tariff Act of 1930, as amended (the Act), defines a ''ministerial error'' as including ''errors in addition, subtraction, or other arithmetic function, clerical errors resulting from inaccurate copying, duplication, or the like, and any other unintentional error which the administering authority considers ministerial.'' With respect to final results of administrative reviews, 19 CFR 351.224(e) provides that Commerce ''will analyze any comments received and, if appropriate, correct any ministerial error by amending . . . the final results of review . . .''

Ministerial Error

In the *Final Results,* we made a countervailing duty export subsidy offset in our calculations for Hyundai Steel Company (Hyundai).[3] In its Ministerial Error Allegation, the petitioner noted that while Commerce intended to adjust Hyundai's U.S. price by a 0.04 percent export subsidy offset rate, it instead adjusted U.S. price by a four percent rate.[4] We agree that we made this ministerial error in the *Final Results* and we are amending the *Final Results* to correct this ministerial error, pursuant to section 751(h) of the Act and 19 CFR 351.224(e). Correcting this error changes Hyundai's weighted-average dumping margin from 0.88 percent to 1.35 percent. As a result of these changes, the rate for the company not selected for individual examination, KG Dongbu Steel Co., Ltd. (KG Dongbu), also changes from 2.13 percent to 2.28 percent.

For a detailed discussion of the ministerial error, as well as Commerce's analysis, *see* Ministerial Error Memorandum.[5] The Ministerial Error Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.*

Amended Final Results

As a result of correcting the ministerial error described above, we determine that the following estimated weighted-average dumping margins exists for the period September 1, 2021, through August 31, 2022:

Exporter or producer	Weighted-average dumping margin (percent)
Hyundai Steel Company	1.35
KG Dongbu Steel Co., Ltd	2.28

Disclosure

We intend to disclose the calculations performed in connection with these amended final results of review to parties in this review within five days of the date of publication of this notice in the **Federal Register**, in accordance with 19 CFR 351.224(b).

Assessment Rates

Pursuant to section 751(a)(2)(C) of the Act and 19 CFR 351.212(b)(1), Commerce has determined, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries of subject merchandise in accordance with these amended final results of review.

In accordance with 19 CFR 351.212(b)(1), for Hyundai, we calculated importer-specific *ad valorem* antidumping duty assessment rates based on the ratio of the total amount of dumping calculated for the examined sales for each importer to the total entered value of the sales for each importer.[6] Where an importer-specific antidumping duty assessment rate is zero or *de minimis,* within the meaning of 19 CFR 351.106(c)(1), Commerce will instruct CBP to liquidate the appropriate entries without regard to antidumping duties.

Commerce's ''automatic assessment'' will apply to entries of subject merchandise made during the period of review produced by Hyundai for which the examined company did not know that the merchandise that it sold to the intermediary company (*e.g.,* a reseller, trading company, or exporter) was destined for the United States. In such instances, we will instruct CBP to liquidate such entries at the all-others rate if there is no rate for the intermediate company(ies) involved in the transaction.

For the company not selected for individual examination, KG Dongbu, we will instruct CBP to assess antidumping duties at an *ad valorem* assessment rate based on the weighted average of the cash deposit rates calculated for Hyundai and POSCO.

Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of

[1] *See Certain Cold-Rolled Steel Flat Products from the Republic of Korea: Final Results of Antidumping Duty Administrative Review; 2021–2022,* 89 FR 13689 (February 23, 2024) (*Final Results*), and accompanying Issues and Decision Memorandum.

[2] *See* Petitioner's Letter, ''Ministerial Error Comments on Final Dumping Margin of Hyundai Steel Company,'' dated February 23, 2024 (Ministerial Error Allegation).

[3] *See* Memorandum, ''Amended Final Results Margin Calculation for Hyundai Steel Company,'' dated concurrently with this notice (Hyundai Steel Amended Final Calculation Memo).

[4] *See* Ministerial Error Allegation.

[5] See Memorandum, ''Ministerial Error Allegation in the Final Results,'' dated concurrently with this notice (Ministerial Error Memorandum); *see also* Hyundai Steel Amended Final Calculation Memo.

[6] We note that POSCO/POSCO International's (POSCO's) dumping margin did not change in these amended final results.

publication of the amended final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Requirements

The following amended cash deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after February 23, 2024, the publication date of the *Final Results,* as provided by section 751(a)(2)(C) of the Act: (1) the amended cash deposit rate for the companies listed above will be equal to the weighted-average dumping margin established in these amended final results of review; (2) for merchandise exported by producers or exporters not covered in this review but covered in a prior completed segment of the proceeding, the cash deposit rate will continue to be the company-specific rate published in the completed segment for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the less-than-fair-value (LTFV) investigation but the producer has been covered in a prior completed segment of this proceeding, then the cash deposit rate will be the rate established in the completed segment for the most recent period for the producer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will continue to be 20.33 percent, the all-others rate established in the LTFV investigation.[7] These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Administrative Protective Order

This notice also serves as a reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

Notification to Interested Parties

We are issuing and publishing these amended final results in accordance with sections 751(h) and 777(i)(1) of the Act and 19 CFR 351.224(e).

Dated: March 18, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

National Oceanic and Atmospheric Administration

[RTID 0648–XD828]

Atlantic Coastal Fisheries Cooperative Management Act Provisions; General Provisions for Domestic Fisheries; Application for Exempted Fishing Permit

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for comments.

SUMMARY: The Assistant Regional Administrator for Sustainable Fisheries, Greater Atlantic Region, NMFS, has made a preliminary determination that an exempted fishing permit renewal application from the Massachusetts Division of Marine Fisheries (MA DMF) contains all of the required information and warrants further consideration. The exempted fishing permit (EFP) would allow federally permitted fishing vessels to fish outside fishery regulations in support of exempted fishing activities proposed by the applicant. Regulations under the Magnuson-Stevens Fishery Conservation and Management Act and the Atlantic Coastal Fisheries Cooperative Management Act require publication of this notification to provide interested parties the opportunity to comment on applications for proposed exempted fishing permits.

DATES: Comments must be received on or before April 12, 2024.

ADDRESSES: You may submit written comments by the following method:

- *Email: nmfs.gar.efp@noaa.gov.* Include in the subject line ''MA DMF Ventless Trap EFP.''

FOR FURTHER INFORMATION CONTACT: Christine Ford, Fishery Management Specialist, *Christine.Ford@noaa.gov,* (978) 281–9185.

SUPPLEMENTARY INFORMATION: The MA DMF submitted a complete application for an EFP to conduct commercial fishing activities that the regulations would otherwise restrict. This EFP would exempt the participating vessels from the following Federal regulations:

TABLE 1—REQUESTED EXEMPTIONS

CFR citation	Regulation	Need for exemption
50 Part 697.21(c)(1) and (2)	Gear specification requirements for Lobster Management Areas 1 and 2.	To allow for the use of traps without escape vents.
§ 697.19(a) and (b)	Trap limit requirements for Areas 1 and 2	To allow for trap limits to be exceeded.
§ 697.19(i)	Trap tag requirements	To allow for alternatively tagged traps.
§§ 697.20(a)(2), 697.20(b)(2), 697.20(a)(3), and 697.20(b)(3).	Minimum and maximum carapace length requirements for Areas 1 and 2.	To allow sub-legal and over-sized lobsters to be landed for research purposes.

[7] *See Certain Cold Rolled Steel Flat Products from Brazil, India, the Republic of Korea, and the United Kingdom: Amended Final Affirmative Antidumping Determinations for Brazil and the United Kingdom and Antidumping Duty Orders,* 81 FR 64432, 64434 (September 20, 2016).

TABLE 1—REQUESTED EXEMPTIONS—Continued

§ 697.20(g)(1) and (3)	V-notch possession requirement for Areas 1 and 2.	To allow landing of female lobsters for research purposes.
§ 697.20(d)(1) and (3)	Berried female possession requirements	To allow landing of egg-bearing female lobsters for research purposes.
§ 697.20(h)(1)	Minimum carapace width requirements	To allow sub-legal Jonah crabs to be landed for research purposes.
§§ 697.20(h)(2)(i) and (ii)	Berried female possession requirement	To allow landing of egg-bearing female Jonah crabs for research purposes.

TABLE 2—PROJECT SUMMARY

Project title	2024 MA DMF Ventless Trap Survey.
Project Start	05/01/2024.
Project End	10/31/2024.
Project objectives.	To provide fishery-independent data on lobster and Jonah crab growth and abundance within Massachusetts State waters.
Project location.	Statistical Areas 514 and 538.
Number of vessels.	Up to 6.
Number of trips.	Approximately 70.
Trip duration (days).	1.
Total number of days.	Approximately 70.
Gear type(s)	Lobster traps.
Number of tows or sets.	16 per trip.
Duration of tows or sets.	3 day soak time.

Project Narrative

The purpose of this survey is to provide fishery-independent data on lobster and Jonah crab growth and abundance within Massachusetts State waters of statistical areas 514 and 538. MA DMF funds this lobster abundance survey through their commercial and recreational lobster license fees. This survey has occurred annually since 2006. At least one MA DMF scientist would be on board for the sampling trips. MA DMF personnel would not be on board when traps are baited and deployed. Exemptions would not substantively change vessel operations. All catch during sampling trips would be retained temporarily to collect biological data. MA DMF staff may collect lobster and/or Jonah crab, including undersized, oversized, v-notched, and egg-bearing lobsters. Collected samples would be used for research projects on growth and maturity. No catch from the experimental traps would be landed for sale. All gear would be Atlantic Large Whale Take Reduction Plan compliant. Survey traps will be separate from each vessel's commercial lobster traps and would be tagged as, ''MA DMF Research Traps.''

If approved, the applicant may request minor modifications and extensions to the EFP throughout the year. EFP modifications and extensions may be granted without further notice if they are deemed essential to facilitate the completion of the proposed research and have minimal impacts that do not change the scope or impact of the initially approved EFP request. Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.

All comments received are a part of the public record and may be posted for public viewing without change. All personal identifying information (*e.g.,* name, address), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter ''anonymous'' as the signature if you wish to remain anonymous).

South Atlantic Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meetings.

SUMMARY: The South Atlantic Fishery Management Council (Council) will hold a meeting of the Socio-Economic Panel (SEP) on April 15 and 16, 2024. The Scientific and Statistical Committee (SSC) will meet on April 16–18, 2024.

DATES: The SEP meeting will be held from 1:30 p.m. until 5 p.m., EDT on April 15; and from 8:30 a.m. until 12 p.m. on April 16, 2024. The SSC meeting will be held from 1:30 p.m. until 5 p.m., EDT on April 16; from 8:30 a.m. until 5 p.m. on April 17; and from 8:30 a.m. until 12 p.m. on April 18, 2024.

ADDRESSES:

Meeting address: The meetings will be held at the Crowne Plaza, 4831 Tanger Outlet Blvd., North Charleston, SC 29418; phone: (843) 744–4422.

The meetings will also be available via webinar. Registration is required. Webinar registration, an online public comment form, and briefing book materials will be available two weeks prior to the meetings at: *https://safmc.net/scientific-and-statistical-committee-meeting/.*

Council address: South Atlantic Fishery Management Council, 4055 Faber Place Drive, Suite 201, N. Charleston, SC 29405.

FOR FURTHER INFORMATION CONTACT: Dr. Judd Curtis, Quantitative Fishery Scientist, SAFMC; phone: (843) 302–8441 or toll free: (866) SAFMC–10; fax: (843) 769–4520; email: *judd.curtis@safmc.net.*

SUPPLEMENTARY INFORMATION:

SSC Socio-Economic Panel

The SEP meeting agenda includes updates on Council active amendments, the Council's Citizen Science program, and the Best Fishing Practices Outreach and Evaluation Workshop. The SEP will provide feedback on upcoming stakeholder engagement meetings, social and economic metrics used in Stock Assessment and Fisheries Evaluation (SAFE) reports, and social and economic information to include in the Snapper Grouper Management Strategy Evaluation (MSE). They will also discuss improving incorporation of Equity and Environmental Justice concerns into Council initiatives, the National Academy of Sciences report on Assessing Equity in the Distribution of

Fisheries Management Benefits, and other business as necessary.

Scientific and Statistical Committee

The SSC meeting agenda includes updates on the Florida State Reef Fish Survey, South Atlantic Red Snapper Research Program, and Southeast Reef Fish Survey Trends Report. It will also include updates from the Southeast Fishery Science Center (SEFSC) Minimizing Red Snapper Discards Publication, Low Recruitment Workgroup, Commercial Discard Logbook Data, and Precision Threshold Workgroup. The SSC will review Terms of Reference and Scopes of Work for upcoming Southeast Data, Assessment, and Review (SEDAR) projects, and discuss other business as necessary.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for auxiliary aids should be directed to the Council office (see **ADDRESSES**) 5 days prior to the meeting.

Note: The times and sequence specified in this agenda are subject to change.

Authority: 16 U.S.C. 1801 *et seq.*

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; NOAA Financial Assistance Performance Progress Reports

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. This notice pertains to a revision and extension of the approved collection of information for NOAA Financial Assistance Performance Progress Reports. Public comments were previously requested via the **Federal Register** on December 27, 2023 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic & Atmospheric Administration (NOAA), Commerce.

Title: NOAA Financial Assistance Performance Progress Reports.

OMB Control Number: 0648–0718.

Form Number(s): None.

Type of Request: Regular submission. Revision and extension of a currently approved information collection.

Number of Respondents: 645.

Average Hours per Response: Marine Debris Program (MDP) Performance Progress Report: 8 hours; MDP Performance Progress Report Table: 0.25 hours; MDP Companion Tracker: 1 hour; MDP Additional Metrics Trackers: 3 hours; Coral Reef Conservation Program (CRCP) Semi-Annual Reports: 10 hours; Restoration Center (RC) Progress Report: Initial—9.5 hours; Semi-Annual—5.5 hours; and Final—9.75 hours; RC Administrative Progress Reports: Initial—6 hours; Semi-Annual—2.75 hours; and Final—5.5 hours.

Total Annual Burden Hours: 4,800.

Needs and Uses: This is a request for revision and extension to an approved collection of information under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.,* and implementing regulations at 5 CFR. Part 1320. This previously-approved information collection assists NOAA in the administration and evaluation of financial assistance awards made by the NOAA Marine Debris Program (MDP), NOAA Coral Reef Conservation Program (CRCP), and the NOAA Restoration Center (RC).

This revision, which is described in more detail below, is only applicable for the NOAA MDP financial assistance awards, and previous information collections for NOAA Coral Reef Conservation Program (CRCP) and NOAA Restoration Center (RC) remain unchanged. There are no changes to the NOAA CRCP or NOAA RC forms that were previously approved, including the RC Progress Reports (Initial, Semi-Annual, and Final), RC Administrative Progress Reports (Initial, Semi-Annual, and Final), and CRCP Semi-Annual Reports. However, the extension applies to the entire previously-approved information collection.

Every year, the NOAA MDP, the NOAA CRCP, and the NOAA RC each support a variety of initiatives specific to their individual authorizations and programmatic mandates. This support is made substantially through grants and cooperative agreements, the terms and conditions of which require regular progress reporting and communication of project accomplishments to the agency. This information collection identifies what is to be provided in these reports, and aims to assist recipients in fulfilling their responsibilities in meeting interim and final progress report requirements. This information is also necessary for NOAA to effectively oversee the expenditure of public funds awarded through these programs, to ensure both cost-effectiveness and programmatic goals are met.

The NOAA RC provides technical and financial assistance to identify, develop, implement, and evaluate community-driven habitat restoration projects. Awards are made as grants or cooperative agreements under the authority of the Magnuson-Stevens Fishery Conservation and Management Act of 2006, 16 U.S.C. 1891a and the Fish and Wildlife Coordination Act, 16 U.S.C. 661, as amended by the Reorganization Plan No. 4 of 1970.

The NOAA CRCP operates under authorization from the Coral Reef Conservation Act (CRCA) of 2000, 16 U.S.C. 6401 *et seq.* This act authorizes the NOAA CRCP to conserve, and restore the condition of United States coral reef ecosystems; to promote the science-based management and sustainable use of coral reef ecosystems to benefit local communities and the Nation; to develop sound scientific information on the condition of coral reef ecosystems and the threats to such ecosystems; to assist in the preservation of coral reefs by supporting science-based, consensus-driven, and community-based coral reef management; to provide financial resources, technical assistance, and scientific expertise to establish a formal mechanism for the collecting and allocating of monetary donations from the private sector to be used for coral reef conservation projects; to support rapid response to exigent circumstances that pose immediate and long-term threats to coral reefs; and to serve as a model for advancing international efforts to monitor, conserve, and restoral coral.

The NOAA MDP supports national and international efforts to research, prevent, and reduce the impacts of marine debris. The NOAA MDP is a centralized office within NOAA that coordinates and supports activities, both within the bureau and with other federal agencies that address marine debris and its impacts. In addition to inter-agency coordination, NOAA MDP uses partnerships with state and local agencies, tribes, non-governmental

organizations, academia, and industry to investigate and solve the problems that stem from marine debris through removal, research, prevention, and reduction activities, in order to protect and conserve our nation's marine environment and coastal economies, and to ensure navigation safety. In large part, these partnerships are made through grants, cooperative agreements, contracts, MOUs, or are simply informal technical assistance arrangements.

The Marine Debris Research, Prevention, and Reduction Act authorizes NOAA MDP to enter into cooperative agreements and contracts and provide financial assistance in the form of grants to carry out the purposes of the Act—namely to identify, determine sources of, assess, reduce, and prevent marine debris and its adverse impacts on the marine environment and navigation safety. 33 U.S.C. 1951, 1952. To date, both competitive and non-competitive funding opportunities have been implemented by NOAA MDP to provide federal funding to non-federal applicants for activities to carry out the purposes of the Act.

The terms and conditions of MDP grants and cooperative agreements require regular progress reporting and communication of project accomplishments to the agency. Grant reporting is necessary for NOAA to effectively oversee the expenditure of public funds, and to ensure both the cost-effectiveness of funded projects and that programmatic goals are met.

This information collection revision clarifies agency reporting requirements, and aims to assist recipients in fulfilling their federal grant responsibilities. NOAA MDP proposes to revise and clarify grant performance progress report (PPR) instructions and add a table to the PPR that will be used for recipients whose activities span multiple states. NOAA MDP proposes to add the collection of performance measure information in a spreadsheet that captures required project metrics at a finer geographic resolution than would otherwise be possible using the PPR. NOAA MDP also proposes collection of additional metrics related to certain activities from large marine debris removals and pre- and post-removal habitat monitoring for grantees who perform these activities as part of their NOAA MDP award. The additional collection of project-level data, including project-level location and implementation data, aligns with the guidance provided in Memorandum M–22–12, Advancing Effective Stewardship of Taxpayer Resources and Outcomes in the Implementation of the Infrastructure Investment and Jobs Act (IIJA) in order to ensure robust and transparent reporting of IIJA investments.

Affected Public: Individuals or households; Business or other for-profit organizations; Not-for-profit institutions; State, Local, or Tribal government.

Frequency: Variable (quarterly to semi-annually).

Respondent's Obligation: Required to Obtain or Retain Benefits.

Legal Authority: The Marine Debris Research, Prevention, and Reduction Act (33 U.S.C. 1951 *et seq.*) as amended by the Marine Debris Act Amendments of 2012 (Pub. L. 112–213, Title VI, Sec. 603, 126 Stat. 1576, December 20, 2012), Save Our Seas Act of 2018 (Pub. L. 115–265), and Save Our Seas 2.0 Act of 2020 (Pub. L. 116–224); Magnuson-Stevens Fishery Conservation and Management Act of 2006, 16 U.S.C. 1891a and the Fish and Wildlife Coordination Act, 16 U.S.C. 661, as amended by the Reorganization Plan No. 4 of 1970; Coral Reef Conservation Act of 2000 (16 U.S.C. 6401 *et seq.*)

This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the collection or the OMB Control Number 0648–0718. Do not submit Confidential Business Information or otherwise sensitive or protected information.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

BILLING CODE 3510–JS–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XD788]

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public online meeting.

SUMMARY: The Coastal Pelagic Species (CPS) Subcommittee of the Pacific Fishery Management Council's (Pacific Council's) Scientific and Statistical Committee (SSC) will hold an online meeting to review and update the Terms of Reference (TOR) for the CPS Stock Assessment Review Process for 2025 and 2026 and Accepted Practices Guidelines for CPS Stock Assessments document. The meeting is open to the public.

DATES: The SSC CPS Subcommittee online meeting will be held Wednesday, April 17, 2024 beginning at 9 a.m. and continuing until 1 p.m. Pacific Time or until business for the day has been completed.

ADDRESSES: The SSC CPS Subcommittee meeting will be an online meeting. Specific meeting information, including directions on how to join the meeting and system requirements, will be provided in the meeting announcement on the Pacific Council's website (see *www.pcouncil.org*). You may send an email to Mr. Kris Kleinschmidt (*kris.kleinschmidt@noaa.gov*) or contact him at (503) 820–2412 for technical assistance.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220.

FOR FURTHER INFORMATION CONTACT: Mr. Kerry Griffin, Staff Officer, Pacific Fishery Management Council; telephone: (503) 820–2409.

SUPPLEMENTARY INFORMATION: The purpose of the SSC CPS Subcommittee meeting is to: (a) is to review proposed changes to the Terms of Reference for CPS Stock Assessment Reviews that will inform the process of conducting and reviewing CPS assessments in 2025 and 2026 and (b) update best practices for conducting CPS stock assessments. Members of the Pacific Council's CPS advisory bodies are encouraged to attend.

No management actions will be decided by the SSC CPS Subcommittee. The SSC CPS Subcommittee members' role will be development of recommendations and reports for consideration by the SSC and Pacific Council at the June meeting in San Diego, California.

Although nonemergency issues not contained in the meeting agendas may be discussed, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically listed in this

notice and any issues arising after publication of this notice that require emergency action under Section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent of the SSC CPS Subcommittee to take final action to address the emergency.

Special Accommodations

Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Kris Kleinschmidt (*kris.kleinschmidt@noaa.gov;* (503) 820–2412) at least 10 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: March 25, 2024.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

Patent and Trademark Office

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Initial Patent Applications

The United States Patent and Trademark Office (USPTO) will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. The USPTO invites comments on this information collection renewal, which helps the USPTO assess the impact of its information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on January 10, 2024 during a 60-day comment period (89 FR 1557). This notice allows for an additional 30 days for public comment.

Agency: United States Patent and Trademark Office, Department of Commerce.

Title: Initial Patent Applications.

OMB Control Number: 0651–0032.

Needs and Uses: The United States Patent and Trademark Office (USPTO) is required by Title 35 of the United States Code, including 35 U.S.C. 131, to examine applications for patents. The USPTO administers the patent statutes relating to examination through various rules in Chapter 37 of the Code of Federal Regulations (CFR), such as, for example, 37 CFR 1.16 through 1.84. Each patent applicant must provide sufficient information to allow the USPTO to properly examine the application to determine whether it meets the criteria set forth in the patent statutes and regulations for issuance as a patent. The patent statutes and regulations require that an application for patent include the following information:

(1) A specification containing a description of the invention and at least one claim defining the property right sought by the applicant;

(2) A drawing(s) or photograph(s), where necessary for an understanding of the invention;

(3) An oath or declaration signed by the applicant (under 35 U.S.C. 115(f), the time for filing the oath or declaration is no later than the date on which the issue fee for the patent is paid); and

(4) A filing fee.

Various types of patent applications are covered under this information collection:

• Noncontinuing, nonprovisional utility, plant and design applications,

• Provisional applications,

• Continuation/divisional applications of international applications,

• Continued prosecution applications (design), and

• Continuation/divisional and continuation-in-part applications of utility, plant, and design applications.

In addition, this information collection covers certain other papers filed by applicants, such as, for example, petitions to accept an unintentionally delayed priority or benefit claim, petitions to accept a filing by other than all of the inventors or a person not the inventor, and petitions requesting that applications filed under 37 CFR 1.495(b) be accorded a receipt date.

Furthermore, this information collection incorporates the lone item in 0651–0073 (Patent Law Treaty): petitions to restore the right of priority to a foreign application under 37 CFR 1.55(c) or the benefit of a prior-filed provisional application under 37 CFR 1.78(b). The petitions are used to extend the 12-month periods set forth in 35 U.S.C. 119(a) and (e) by an additional 2 months where there is an unintentional delay in filing an application claiming priority to a foreign application or the benefit of a provisional application. Once this information collection is renewed, and the petitions are added, 0651–0073 will be discontinued. For this 30-day notice, the non-hourly cost burdens have been adjusted due to an increase in the postage rate since the 60-day notice was published.

- PTO/SB/458 (Petition to Accept an Unintentionally Delayed Claim under 35 U.S.C. 119(a)-(d) or (f), 365(a) or (b), or 386(a) or (b) for the Right of Priority to a Prior-Filed Foreign Application (37 CFR 1.55(e))
- PTO/SB/459 (Petition to Restore the Benefit of a Provisional Application (37 CFR 1.78(b)) or to Restore the Priority to a Foreign Application (37 CFR 1.55(c))

Type of Review: Extension and revision of a currently approved information collection.

Affected Public: Private sector.

Respondent's Obligation: Required to obtain or retain benefits.

Frequency: On occasion.

Estimated Number of Annual Respondents: 588,255 respondents.

Estimated Number of Annual Responses: 588,255 responses.

Estimated Time per Response: The USPTO estimates that the responses in this information collection will take the public approximately between 45 minutes (0.75 hours) and 40 hours to complete. This includes the time to gather the necessary information, create the document, and submit the completed request to the USPTO.

Estimated Total Annual Respondent Burden Hours: 12,543,215 hours.

Estimated Total Annual Respondent Non-Hourly Cost Burden: $1,156,505,487.

This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view Department of Commerce, USPTO information collections currently under review by OMB.

Written comments and recommendations for this information collection should be submitted within 30 days of the publication of this notice on the following website, *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the information collection or the OMB Control Number, 0651–0032.

Further information can be obtained by:

• *Email: InformationCollection@uspto.gov.* Include ''0651–0032 information request'' in the subject line of the message.

• *Mail:* Justin Isaac, Office of the Chief Administrative Officer, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450.

Justin Isaac,

Information Collections Officer, Office of the Chief Administrative Officer, United States Patent and Trademark Office.

BILLING CODE 3510–16–P

CONSUMER PRODUCT SAFETY COMMISSION

[Docket No. CPSC–2013–0025]

Notice of Availability and Request for Comment: Revision to the Voluntary Standard for Infant and Cradle Swings

AGENCY: Consumer Product Safety Commission.

ACTION: Notice of availability and request for comment.

SUMMARY: The U.S. Consumer Product Safety Commission's (Commission or CPSC) mandatory rule, Safety Standard for Infant Swings, incorporates by reference ASTM F2088–20, Standard Consumer Safety Specification for Infant and Cradle Swings. ASTM notified the Commission that it has revised this incorporated voluntary standard. CPSC seeks comment on whether the revision improves the safety of infant and cradle swings.

DATES: Comments must be received by April 11, 2024.

ADDRESSES: Submit comments, identified by Docket No. CPSC–2013–0025, by any of the following methods:

Electronic Submissions: Submit electronic comments to the Federal eRulemaking Portal at: *https://www.regulations.gov.* Follow the instructions for submitting comments. Do not submit through this website: confidential business information, trade secret information, or other sensitive or protected information that you do not want to be available to the public. CPSC typically does not accept comments submitted by email, except as described below.

Mail/Hand Delivery/Courier/Confidential Written Submissions: CPSC encourages you to submit electronic comments by using the Federal eRulemaking Portal. You may, however, submit comments by mail, hand delivery, or courier to: Office of the Secretary, Consumer Product Safety Commission, 4330 East West Highway, Bethesda, MD 20814; telephone: (301) 504–7479. If you wish to submit confidential business information, trade secret information, or other sensitive or protected information that you do not want available to the public, you may submit such comments by mail, hand delivery, courier, or you may email them to *cpsc-os@cpsc.gov.*

Instructions: All submissions must include the agency name and docket number. CPSC may post all comments without change, including any personal identifiers, contact information, or other personal information provided, to *https://www.regulations.gov.* Do not submit to this website: confidential business information, trade secret information, or other sensitive or protected information that you do not want to be available to the public. If you wish to submit such information, please submit it according to the instructions for mail/hand delivery/courier/confidential written submissions.

Docket: For access to the docket to read background documents or comments received, go to: *https://www.regulations.gov,* and insert the docket number, CPSC–2013–0025, into the ''Search'' box, and follow the prompts.

FOR FURTHER INFORMATION CONTACT: Carlos Torres, Directorate for Engineering Sciences, U.S. Consumer Product Safety Commission, 5 Research Place, Rockville, MD 20850; telephone: (301) 987–2504; email: *Ctorres@cpsc.gov.*

SUPPLEMENTARY INFORMATION: Section 104(b) of the Consumer Product Safety Improvement Act of 2008 (CPSIA) requires the Commission to adopt mandatory standards for durable infant or toddler products. 15 U.S.C. 2056a(b)(1). Mandatory standards must be ''substantially the same as'' voluntary standards, or they may be ''more stringent'' than the applicable voluntary standards, if the Commission determines that more stringent requirements would further reduce the risk of injury associated with the products. *Id.* Mandatory standards may be based, in whole or in part, on a voluntary standard.

Section 104(b)(4)(B) of the CPSIA specifies the process for when a voluntary standards organization revises a standard that the Commission incorporated by reference under section 104(b)(1). First, the voluntary standards organization must notify the Commission of the revision. Once the Commission receives this notification, the Commission may reject or accept the revised standard. To reject a revised standard, the Commission must notify the voluntary standards organization within 90 days of receiving the notice that it has determined that the revised standard does not improve the safety of the consumer product and that it is retaining the existing standard. If the Commission does not take this action, the revised voluntary standard will be considered a consumer product safety standard issued under section 9 of the Consumer Product Safety Act (15 U.S.C. 2058), effective 180 days after the Commission received notification of the revision (or a later date specified by the Commission in the **Federal Register**). 15 U.S.C. 2056a(b)(4)(B).

In 2012, the Commission adopted a mandatory rule for infant swings under section 104(b)(1) of the CPSIA, which was codified in 16 CFR part 1223. The rule incorporated by reference ASTM F2088–12a, *Standard Consumer Safety Specification for Infant Swings,* with modifications to the labeling and test method requirements.[1] 77 FR 66703 (Nov. 7, 2012). At the time the Commission published the final rule, ASTM F2088–12a was the current version of the voluntary standard. ASTM subsequently revised the voluntary standard six times. ASTM F2088–22 is the current mandatory standard incorporated by reference in 16 CFR part 1223. ASTM F2088 applies to infant and cradle swings, which it describes as products with powered mechanisms that provide swinging or gliding seats for children who cannot climb out of the products. The ASTM standard includes performance requirements, test methods, and requirements for warning labels and instructional literature to address hazards to infants associated with infant and cradle swings.

In April 2013, ASTM notified CPSC that it had issued a revised standard for infant swings, ASTM F2088–13. In accordance with the procedures set out in section 104(b)(4)(B) of the CPSIA, the revised standard became the new mandatory standard for infant swings. The Commission published a direct final rule to update 16 CFR part 1223, incorporating by reference ASTM F2088–13, without modification. 78 FR 37706 (June 24, 2013).

After the Commission issued the revised mandatory standard in 2013, ASTM approved two more revisions: ASTM F2088–15 and ASTM F2088–19. However, ASTM did not notify CPSC of these revisions under CPSIA section 104(b)(4)(B). Consequently, these revised standards did not become the mandatory standards by operation of law, and the Commission did not update the mandatory standard to incorporate by reference these revised ASTM standards. On October 5, 2020, ASTM notified CPSC that it had revised the voluntary standard for infant swings, issuing ASTM F2088–20. In accordance with the procedures set out in section 104(b)(4)(B) of the CPSIA, the revised standard became the new mandatory standard for infant swings. The Commission published a direct final rule to update 16 CFR part 1223, incorporating by reference ASTM F2088–20, without modification. 86 FR 4961 (Jan. 19, 2021).

[1] The modifications included changes to the required warning label content and a revised test method to address an omission in the voluntary standard for toy mobiles attached to swings.

On October 2, 2021, ASTM notified CPSC that it had revised the voluntary standard for infant swings, issuing ASTM F2088–21. In accordance with the procedures set out in section 104(b)(4)(B) of the CPSIA, the revised standard became the new mandatory standard for infant swings. The Commission published a direct final rule to update 16 CFR part 1223, incorporating by reference ASTM F2088–21, without modification. 86 FR 59609 (Oct. 28, 2021).

On July 5, 2022, ASTM notified CPSC that it had revised the voluntary standard for infant swings, issuing ASTM F2088–22. In accordance with the procedures set out in section 104(b)(4)(B) of the CPSIA, the revised standard became the new mandatory standard for infant swings. The Commission published a direct final rule to update 16 CFR part 1223, incorporating by reference ASTM F2088–22, without modification. 87 FR 57390 (Sep. 20, 2022).

On March 18, 2024, ASTM notified CPSC that it had approved and published ASTM F2088–24. CPSC staff is assessing the revised voluntary standard to determine, consistent with section 104(b)(4)(B) of the CPSIA, its effect on the safety of consumer products covered by the standard. The Commission invites public comment on that question, to inform staff's assessment and any subsequent Commission consideration of the revisions in ASTM F2088–24.[2]

The currently incorporated voluntary standard (ASTM F2088–22) and the revised voluntary standard (ASTM F2088–24) are available for review in several ways. A read-only copy of the existing, incorporated standard (ASTM F2088–22) is available for viewing, at no cost, on the ASTM website at: *https://www.astm.org/READINGLIBRARY/.* A read-only copy of the revised standard (ASTM F2088–2024), including red-lined versions that identify the changes from the 2022 version to the 2024 version, are available, at no cost, on ASTM's website at: *https://www.astm.org/CPSC.htm.* Interested parties can also download copies of the standards by purchasing them from ASTM International, 100 Barr Harbor Drive, P.O. Box C700, West Conshohocken, PA 19428–2959; phone: 610–832–9585; *https://www.astm.org.* Alternatively, interested parties can schedule an appointment to inspect copies of the standards at CPSC's Office of the Secretary, U.S. Consumer Product Safety Commission, 4330 East West Highway, Bethesda, MD 20814, telephone: 301–504–7479.

[2] The Commission voted 4–0 to approve this notice.

Comments must be received by April 11, 2024. Because of the short statutory time frame Congress established for the Commission to consider revised voluntary standards under section 104(b)(4) of the CPSIA, CPSC will not consider comments received after this date.

Alberta E. Mills,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355–01–P

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Privacy Act of 1974; System of Records

AGENCY: Corporation for National and Community Service.

ACTION: Notice of new systems of records.

SUMMARY: In accordance with the Privacy Act of 1974, as amended, the Corporation for National and Community Service (operating as AmeriCorps) proposes to establish a new system of records entitled ''CNCS–20–COO–ERC Emergency Response Communication System of Records.'' This system of records allows AmeriCorps to maintain information to administer operational response to critical events.

DATES: You may submit comments on or before April 29, 2024. Unless timely comments are received that would require a revision, this new system of records will become effective on April 29, 2024.

ADDRESSES: You may submit comments identified by system name and number by any of the following methods:

1. Electronically through *regulations.gov.* Once you access *regulations.gov,* find the web page for this SORN by searching for CNCS–20–COO–ERC.

2. By email at *privacy@americorps.gov.*

3. By mail: AmeriCorps, Attn: Bilal Razzaq, Chief Privacy Officer, OIT, 250 E Street SW, Washington, DC 20525.

4. By hand delivery or courier to AmeriCorps at the address for mail between 9:00 a.m. and 4:00 p.m. Eastern Standard Time, Monday through Friday, except for Federal holidays.

Please note that all submissions received may be posted without change

to *regulations.gov,* including any personal information. Commenters should be careful to include in their comments only information that they wish to make publicly available.

FOR FURTHER INFORMATION CONTACT: If you have general questions about the system of records, please contact ZhuoHong Liu at *zliu@americorps.gov,* by phone at 202–938–7868, or mail them to the address in the **ADDRESSES** section above. Please include the system of records' name and number.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, AmeriCorps' Office of Facilities and Support Services proposes to establish a new agency-wide system of records titled ''CNCS–20–COO–ERC Emergency Response Communication System of Records.'' This system will enhance AmeriCorps' flexibility to execute pre-defined communication processes in emergency situations and improve its capacity to administer its operational response to critical events to maintain business continuity and to keep its personnel safe.

II. Privacy Act

The Privacy Act codifies fair information practice principles in a statutory framework governing the means by which federal government agencies collect, maintain, use, and disseminate individuals' records. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency from which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass U.S. citizens and lawful permanent residents. In accordance with 5 U.S.C. 552a(r), AmeriCorps has provided a report of this system of records to the Office of Management and Budget and to Congress.

Below is the description of CNCS–20–COO–ERC Emergency Response Communication System of Records.

SYSTEM NAME AND NUMBER:

CNCS–20–COO–ERC Emergency Response Communication System of Records.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

This system of record is maintained by the Office of Facilities and Support Services, Office of the Chief Operating Officer, AmeriCorps. 250 E Street SW, Washington, DC 20525. The system is run by a cloud service provider certified by the Federal Risk and Authorization Management Program.

SYSTEM MANAGER(S):

Director, Office of Facilities and Support Services, Office of the Chief Operating Officer, AmeriCorps. 250 E Street SW, Washington, DC 20525.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Federal Continuity Directive 1, Federal Executive Branch National Continuity Program and Requirements, January 17, 2017; Federal Property Management Regulation 101–20.103–4, Occupant Emergency Program; Homeland Security Presidential Directive 20, National Continuity Policy, May 4, 2007.

PURPOSE(S) OF THE SYSTEM:

AmeriCorps uses this system to collect and maintain the contact information of its personnel to whom the system will send emergency notifications. AmeriCorps uses this system to execute pre-defined communication processes in emergency situations and to administer its operational response to critical events to maintain business continuity and to keep its personnel safe.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

The federal employees and contractors of AmeriCorps.

CATEGORIES OF RECORDS IN THE SYSTEM:

The full names of AmeriCorps personnel; AmeriCorps-assigned office email addresses; AmeriCorps-assigned office phone numbers; the office mobile phone numbers that AmeriCorps issues to its employees; personal email addresses that AmeriCorps personnel provide at their own choice; personal home or mobile phone numbers that AmeriCorps personnel provide at their own choice; office locations of AmeriCorps personnel (city and state).

RECORD SOURCE CATEGORIES:

The office contact information in the records is obtained from the official staff directory maintained in the Microsoft Active Directory of AmeriCorps. The personal home and mobile phone numbers and personal email addresses are collected directly from AmeriCorps personnel.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b), all or a portion of the records or information contained in this system of records may be disclosed as a routine use pursuant to 5 U.S.C. 552a(b)(3) under the circumstances or for the purposes described below, to the extent such disclosures are compatible with the purposes for which the information was collected:

1. To the Department of Justice (DOJ), including the U.S. Attorneys Offices, or other federal agency conducting litigation or proceedings before any court, adjudicative, or administrative body, when it is relevant or necessary to the litigation or proceeding and one of the following is a party to the litigation or has an interest in such litigation:

a. AmeriCorps;

b. Any employee or former employee of AmeriCorps in his/her official capacity;

c. Any employee or former employee of AmeriCorps in his/her individual capacity, only when DOJ or AmeriCorps has agreed to represent the employee; or

d. The United States or any agency thereof.

2. To a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of the individual to whom the record pertains.

3. To the National Archives and Records Administration (NARA) or General Services Administration pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

4. To an agency or organization for the purpose of performing audit or oversight operations as authorized by law, but only such information as is necessary and relevant to such audit or oversight function.

5. To the Executive Office of the President in response to an inquiry from that office made at the request of the subject of a record or a third party on that person's behalf, or for a purpose compatible with the reason for which the records are collected or maintained.

6. To an official of another federal agency to provide information needed in the performance of official duties related to reconciling or reconstructing data files or to enable that agency to respond to an inquiry by the individual to whom the record pertains.

7. To state, territorial and local governments and tribal organizations to provide information needed in response to court order and/or discovery purposes related to litigation, when the

disclosure is compatible with the purpose for which the records were compiled.

8. To an expert, consultant, grantee, or contractor (including employees of the contractor) of AmeriCorps that performs services requiring access to these records on AmeriCorps' behalf to carry out the purposes of the system.

9. To appropriate agencies, entities, and persons when

a. AmeriCorps suspects or has confirmed that there has been a breach of the system of records;

b. AmeriCorps has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, AmeriCorps (including its information systems, programs, and operations), the federal government, or national security; and

c. the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with AmeriCorps' efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

10. To another federal agency or federal entity, when AmeriCorps determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in

a. responding to a suspected or confirmed breach or

b. preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

11. To an appropriate federal, state, tribal, local, international, or foreign law enforcement agency or other appropriate authority charged with investigating or prosecuting a violation or enforcing or implementing a law, rule, regulation, or order, when a record, either on its face or in conjunction with other information, indicates a violation or potential violation of law, which includes criminal, civil, or regulatory violations and such disclosure is proper and consistent with the official duties of the person making the disclosure.

12. To a court, magistrate, or administrative tribunal in the course of presenting evidence, including disclosures to opposing counsel or witnesses in the course of civil discovery, litigation, or settlement negotiations or in connection with criminal law proceedings, when it is relevant and necessary to the litigation or proceeding.

13. To contractors and their agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for AmeriCorps, when necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same requirements and limitations on disclosure as are applicable to AmeriCorps officers and employees.

14. To appropriate third parties contracted by AmeriCorps to investigate a complaint or appeal filed by an employee or applicant, or to facilitate and conduct mediation or other alternative dispute resolution (ADR) procedures or programs.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

AmeriCorps stores records in this system electronically.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records may be retrieved by name.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

The records maintained in this system of records are subject to National Archives and Records Administration General Records Schedule 5.3, item 20. The Disposition Authority is DAA–GRS2016–0004–0002. The disposition is temporary. The records will be destroyed when superseded or obsolete, or upon separation or transfer of an employee.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

AmeriCorps safeguards records in this system according to applicable laws, rules, and policies, including all applicable AmeriCorps automated systems security and access policies. AmeriCorps has strict controls in place to minimize the risk of compromising the information that is being stored. Access to the computer system containing the records in this system is limited to those individuals who have a need to know the information for the performance of their official duties and who have appropriate clearances or permissions.

RECORD ACCESS PROCEDURES:

In accordance with 45 CFR part 2508—Implementation of the Privacy Act of 1974, as amended, individuals wishing to access their own records that are stored within the system of records may contact the FOIA Officer/Privacy Act Officer by sending (1) an email to *FOIA@americorps.gov* or (2) a letter addressed to the System Manager, attention Privacy Inquiry. Individuals who make a request must include enough identifying information (*i.e.,* full name, current address, date, and signature) to locate their records, indicate that they want to access their records, and be prepared to confirm their identity as required by 45 CFR part 2508.

CONTESTING RECORD PROCEDURES:

All requests to contest or amend information maintained in the system will be directed to the FOIA Officer/Privacy Act Officer. Individuals who make a request must include enough identifying information to locate their records, in the manner described above in the Record Access Procedures section. Requests should state clearly and concisely what information is being contested, the reasons for contesting it, and the proposed amendment to the information.

NOTIFICATION PROCEDURES:

Any individual desiring to contest or amend information not subject to exemption may contact the FOIA Officer/Privacy Act Officer via the contact information in the Record Access Procedures section. Individuals who make a request must include enough identifying information to locate their records, indicate that they want to be notified whether their records are included in the system, and be prepared to confirm their identity as required by 45 CFR part 2508.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

None.

Prabhjot Bajwa,

Senior Agency Official for Privacy and Chief Information Officer.

BILLING CODE 6050–28–P

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Disaster Response Cooperative Agreements

AGENCY: Corporation for National and Community Service.

ACTION: Notice of information collection; request for comment.

SUMMARY: The Corporation for National and Community Service, operating as

AmeriCorps, has submitted a public information collection request (ICR) entitled Disaster Response Cooperative Agreements for review and approval in accordance with the Paperwork Reduction Act.

DATES: Written comments must be submitted to the individual and office listed in the **ADDRESSES** section by April 29, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Copies of this ICR, with applicable supporting documentation, may be obtained by calling AmeriCorps, Rita Pratte, 202–815–5719, or by email at *rpratte@americorps.gov.*

SUPPLEMENTARY INFORMATION: The OMB is particularly interested in comments which:

• Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of CNCS, including whether the information will have practical utility;

• Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions;

• Propose ways to enhance the quality, utility, and clarity of the information to be collected; and

• Propose ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments

A 60-day Notice requesting public comment was published in the **Federal Register** on November 30, 2023 at 88 FR 83536. The comment period ended January 29, 2024. No public comments were received from this Notice.

Title of Collection: Disaster Response Cooperative Agreements.

OMB Control Number: 3045–0133.

Type of Review: Revision.

Respondents/Affected Public: Businesses and Organizations.

Total Estimated Number of Annual Responses: 500.

Total Estimated Number of Annual Burden Hours: 500.

Abstract: AmeriCorps seeks renewal of the current information collection. AmeriCorps uses the information collected through Disaster Response Cooperative Agreements (DCRAs) to more effectively use its deployable resources to meet the needs of disaster-affected communities. An understanding of the participating programs allows AmeriCorps to match the capabilities of the programs to the needs of the communities and will allow better asset mapping and resource typing. This information collection helps AmeriCorps identify and deploy programs effectively and efficiently, and ensures interested programs meet the appropriate programmatic and fiscal requirements to successfully execute disaster response activities. Additionally, the collected information will allow AmeriCorps to conduct better outreach to interested programs by providing them with more information about the agency's disaster procedures, reimbursement requirements, and support services offered. The forms under the DRCA help the agency efficiently collect information during a disaster event as well as assess the capacity of all DRCA programs throughout the year. Forms are completed electronically and emailed to AmeriCorps. A revision to this information collection is requested to include a new reporting form for non-mission assignment disaster response. The current application is due to expire on March 31, 2024.

Alexander Garcia,

Deputy Director, AmeriCorps NCCC.

DEPARTMENT OF DEFENSE

Department of the Air Force

Air University Board of Visitors Meeting

AGENCY: Department of the Air Force.

ACTION: Meeting notice.

SUMMARY: The Department of Defense (DoD) is publishing this notice to announce the following Federal Advisory Committee meeting of the Board of Visitors (BoV) of the Air University.

DATES: Tuesday, April 2, 2024, from 8 a.m. to 5 p.m. and Wednesday, April 3, 2024, from 8 a.m. to 3 p.m. (Central Time).

ADDRESSES: Air University Commander's Conference Room, Building 800, Maxwell Air Force Base, Alabama 36112–6335.

FOR FURTHER INFORMATION CONTACT: Dr. Shawn P. O'Mailia, Designated Federal Officer, Air University Headquarters, 55 LeMay Plaza South, Maxwell Air Force Base, Alabama 36112–6335; telephone (334) 953–4547; *au.bov1@us.af.mil.*

SUPPLEMENTARY INFORMATION: This meeting is held under the provisions of the Federal Advisory Committee Act (FACA) of 1972 (5 U.S.C., Appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and 41 CFR 102–3.140 and 102–3.150.

Purpose of the Meeting: The purpose of this meeting is to provide independent advice and recommendations on matters pertaining to the educational, doctrinal, and research policies and activities of Air University. The agenda will include topics relating to the Air University Commander and President's priorities and Air University's reorganization, the Community College of the Air Force Subcommittee report, a Community College of the Air Force Taskforce update, The International Officer School overview and honor roll, an Air University financial overview, a Fifth-Year Interim Report and Quality Enhancement Plan update for SACSCOC, a Great Power Competition and Air Command and Staff College's Agile Learning discussion, a Student Life-cycle Management update and an Air University Honorary Degree Nominee presentation.

Meeting Accessibility: Open to the public. Any member of the public wishing to attend this meeting should contact the Designated Federal Officer listed below at least ten calendar days prior to the meeting for information on base entry procedures.

Written Statements: Any member of the public wishing to provide input to the Air University Board of Visitors in accordance with 41 CFR 102–3.140(c) and section 10(a)(3) of the Federal Advisory Committee Act should submit a written statement to the Designated Federal Officer at the address detailed below. Statements submitted in response to the agenda mentioned in this notice must be received by the Designated Federal Officer at the address listed below at least ten calendar days prior to the meeting that is the subject of this notice. Written statements received after this date may not be provided to or considered by the Air University Board of Visitors until its next meeting. The Designated Federal Officer will review all timely

submissions with the Air University Board of Visitors' Board Chairperson and ensure they are provided to members of the Board before the meeting that is the subject of this notice.

Tommy W. Lee,

Acting Air Force Federal Register Liaison Officer.

[ARL–240222A–AA]

Notice of Intent To Assign Foreign Patent Rights Patent

AGENCY: Department of the Air Force, Department of Defense.

ACTION: Notice of intent.

SUMMARY: Pursuant to the Bayh-Dole Act and implementing regulations, the Department of the Air Force hereby gives notice of its intent to assign foreign patent rights to the patent applications listed below to the Government of Japan as represented by the Commissioner of Acquisition Tech and Logistics, 5–1, Ichigayahonmuracho, Shinjuku-ku, Tokyo, JP 162–8870. The Department of the Air Force will retain all rights, title, and interest in U.S. Application Serial No. 17/779,954, entitled FIBER REINFORCED POLYMER COMPOSITE STRUCTURES AND ELECTROMAGNETIC INDUCTION PROCESS FOR MAKING SAME, and filed on 19 November 2020.

DATES: Written objections must be filed no later than fifteen (15) calendar days after the date of publication of this Notice.

ADDRESSES: Submit written objections to Department of the Air Force T3 Program Office, 1864 4th Street, Building 15, Wright-Patterson AFB, OH 45433; Phone: 937–607–8230; or Email: *afrl.sb.t3officeacount@us.af.mil.* Include Docket No. ARL–240222A–AA in the subject line of the message.

FOR FURTHER INFORMATION CONTACT: Department of the Air Force T3 Program Office, 1864 4th Street, Building 15, Wright-Patterson AFB, OH 45433; Phone: 937–607–8230; or Email: *afrl.sb.t3officeacount@us.af.mil.*

Abstract of patent application(s):

The present invention relates to resin compositions, fiber reinforced polymeric structures and electromagnetic induction processes for making same. Such magnetic induction processes are pulsed processes that can be optionally coupled with cooling steps between pulses. The aforementioned fiber reinforced polymeric structures can take forms that include, but are not limited to, pipes; pressure vessels, including rocket motor cases and fire extinguishers; golf club shafts; tennis and badminton racquets; skis; snowboards; hockey sticks; fishing rods; bicycle frames; boat masts; oars; paddles; baseball bats; and softball bats. In addition, such fiber reinforced polymeric structures can be supplemented with other materials, such as a rocket propellant, to form articles, for example, a rocket motor.

Intellectual property:

EP Application No. 20892987, entitled FIBER REINFORCED POLYMER COMPOSITE STRUCTURES AND ELECTROMAGNETIC INDUCTION PROCESS FOR MAKING SAME, and filed on 19 November 2020.

JP Application No. 2022530177A, entitled FIBER REINFORCED POLYMER COMPOSITE STRUCTURES AND ELECTROMAGNETIC INDUCTION PROCESS FOR MAKING SAME, and filed on 19 November 2020.

The Department of the Air Force may assign these foreign patent rights unless a timely objection is received that sufficiently shows that such assignment would be inconsistent with the Bayh-Dole Act or implementing regulations. A competing application for a patent license agreement, completed in compliance with 37 CFR 404.8 and received by the Air Force within the period for timely objections, will be treated as an objection and may be considered as an alternative to the proposed license.

Authority: 35 U.S.C. 209; 37 CFR 404.

Tommy W. Lee,

Acting Air Force Federal Register Liaison Officer.

Record of Decision for the KC–46A Sixth Main Operating Base Beddown

AGENCY: Department of the Air Force, Department of Defense.

ACTION: Notice of availability of a record of decision.

SUMMARY: The United States Air Force signed the Record of Decision for the KC–46A Sixth Main Operating Base (MOB 6) on March 14, 2024.

ADDRESSES: For further information contact: Mr. Austin Narranjo, AFCEC/CIE, 2261 Hughes Ave, Ste 155, JBSA Lackland, TX 78236, ph: (210) 563–0190.

SUPPLEMENTARY INFORMATION: The Record of Decision reflects the Air Force decision to beddown 24 KC–46A Primary Aeropsace Vehichles Aurthorized (PAA) at MacDill Air Force Base in Tampa, Florida.

The decision was based on matters discussed in the KC–46A Sixth Main Operating Base Beddown Final Environmental Impact Statement, contributions from the public and regulatory agencies, and other relevant factors. The Final Environmental Impact Statement was made available to the public on November 24, 2023 through a Notice of Availability published in the **Federal Register** (Volume 88, Number 225, page 82350) with a 30-day wait period that ended on December 24, 2023.

Authority: This Notice of Availability is published pursuant to the regulations (40 CFR part 1506.6) implementing the provisions of the National Environmental Policy Act of 1969 (42 U.S.C.. 4321, *et seq.*) and the Air Force's Environmental Impact Analysis Process (32 CFR parts 989.21(b) and 989.24(b)(7)).

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. PL24–1–000]

Project-Area Wage Standards in the Labor Cost Component of Cost-of-Service Rates

AGENCY: Federal Energy Regulatory Commission, Department of Energy.

ACTION: Policy statement.

SUMMARY: The Federal Energy Regulatory Commission (Commission) clarifies how the Commission will treat the use of project-area wage standards in calculating the labor cost component of jurisdictional cost-of-service rates.

DATES: This policy statement is effective June 26, 2024.

FOR FURTHER INFORMATION CONTACT:
Heidi Nielsen (Legal Information), Office of the General Counsel, (202) 502–8435, *heidi.nielsen@ferc.gov*
Adam Pollock (Technical Information), Office of Energy Market Regulation, (202) 502–8458, *adam.pollock@ferc.gov*
James Sarikas (Technical Information), Office of Energy Market Regulation, (202) 502–6831, *james.sarikas@ferc.gov*

SUPPLEMENTARY INFORMATION: 1. On October 19, 2023, the Commission issued a proposed policy statement,[1] proposing to clarify how it will treat the use of project-area wage standards in calculating the labor cost component of cost-of-service rates, including under Natural Gas Act (NGA) sections 4, 5, and 7, 15 U.S.C. 717c–d, 717f; the Interstate Commerce Act (ICA), 49 U.S.C. app. 1(5)(a); and Federal Power Act (FPA) sections 205 and 206, 16 U.S.C. 824d–e.[2] In this Policy Statement, we adopt the proposals in the Proposed Policy Statement, as discussed below.

I. Background

A. Current Commission Precedent

2. Project-area wage standards are the prevailing wages set by labor markets in the locale where the associated project work (*e.g.,* construction, capital repairs, decommissioning) is performed. Those prevailing wages can be found in data sources that indicate the basic hourly wage rates and fringe benefit rates for labor, direct employees, and/or contract personnel that prevail in a particular geographic area. For example, under the Davis-Bacon Act, the U.S. Department of Labor issues prevailing wage determinations based on periodic surveys of union and non-union wages paid in a particular location. These determinations serve as the minimum wage that must be paid by contractors and subcontractors performing under certain federally funded or assisted construction contracts.[3] A number of states have enacted their own prevailing wage laws, sometimes referred to as ''Little Davis-Bacon'' laws.[4]

3. The Commission addressed the treatment of project-area wages in natural gas pipeline cost-of-service rates in Opinion Nos. 510 and 524.[5] In

Continued

Opinion No. 510, the Commission rejected a pipeline operator's proposal to use union-only wage rates from a single proxy location to estimate the labor cost of decommissioning its pipeline that spanned four states,[6] finding that the pipeline operator had not carried its burden under NGA section 4 to show that it would use union labor and that, based on the evidence in that proceeding, it was accordingly reasonable to estimate labor costs using a ''blended'' mix of average union and non-union wage rates in the general private construction industry in the states where the pipeline was located, ''weighted'' by the length of pipe in each state.[7] The Commission subsequently applied the same approach in Opinion No. 524, finding that the same operator had again failed to present sufficient supporting evidence for its proposal to use union-only wage rates in its estimate of decommissioning labor costs.[8]

B. Proposed Policy Statement

4. In the Proposed Policy Statement, the Commission proposed to clarify that Opinion Nos. 510 and 524 were based on the record evidence before the Commission in those proceedings and do not reflect a heightened standard of review with respect to project-area wage rates.[9] The Commission proposed that jurisdictional entities should be able to include wages consistent with project-area wage standards in cost-of-service rates filed with the Commission where the record supports that outcome.

5. Specifically, the Commission proposed that, when a Commission-jurisdictional entity presents evidence that it: (1) pays project-area wage standards; (2) is contractually obligated to pay project-area wage standards; or (3) commits via affidavit filed in the rate proceeding that it will pay project-area wage standards, the Commission will presume, absent contrary evidence, that such project-area wage standards are just and reasonable for the relevant labor-cost component.[10] Furthermore, the Commission proposed that it will reject the inclusion of labor wages consistent with project-area wage standards in cost-of-service rates when the evidence demonstrates that the jurisdictional entity has not paid or will not be paying labor wages consistent with project-area wage standards.

6. The Commission proposed to accept as evidence of project-area wage standards: (1) Davis-Bacon Act local prevailing wage determinations; (2) state prevailing wage determinations; (3) applicable collective-bargaining agreements or Project Labor Agreements; or (4) other evidence demonstrating the prevailing wages paid in the relevant locale(s), such as an industry-accepted database used in construction cost estimates.[11] The Commission sought comment on the appropriateness of the four proposed sources of project-area wage standards. In particular, the Commission sought comment on the appropriateness of using industry databases with construction cost estimates as a source of project-area wage standards as well as whether any project-area wage standards might not be captured in the first three listed categories.

7. The Commission further proposed that jurisdictional entities seeking to include project-area wage standards in cost-of-service rates should maintain and preserve records, including books of account or records for work performed by employees, contractors or subcontractors, sufficient to demonstrate that claimed project-area wages were actually paid.[12]

II. Comments

8. Comments were filed by: CenterPoint Energy Minnesota Resources Corp dba CenterPoint Energy Minnesota Gas (CenterPoint); Charps, LLC; Enbridge (U.S.) Inc. (Enbridge); Illinois Commerce Commissioners Doug P. Scott, Michael T. Carrigan, and Conrad R. Reddick (Illinois Commerce Commissioners); International Union of Operating Engineers; Interstate Natural Gas Association of America (INGAA); Laborers' International Union of North America (LIUNA); Pe Ben USA, Inc.; Minnesota Public Utilities Commission (Minnesota Commission); Pennsylvania Public Utility Commissioner Kathryn Zerfuss (Pennsylvania Commissioner Zerfuss); Pipe Line Contractors Association; Pipeliners Union 798 United Association; Price Gregory International; R.L. Coolsaet Construction Company; Southern Star Central Gas Pipeline, Inc. (Southern Star); and Teamsters National Pipeline Labor Management Cooperation Trust.

9. Commenters broadly support the issuance of a policy statement that clarifies how the Commission will treat the use of project-area wage standards in calculating the labor cost component of jurisdictional cost-of-service rates.[13] Commenters disagree, however, on whether jurisdictional entities should be able to use sources other than collective bargaining agreements for the project-area wage standard.

10. Labor unions (including International Union of Operating Engineers, LIUNA, Pipeline Local Union 798, Pipe Line Contractors Association, and Teamsters National Pipeline Labor Management Cooperation Trust); Charps, LLC; PE Ben USA, Inc.; Price Gregory International; and R.L. Coolsaet Construction Company argue that collective bargaining rates should be the only metric for project-area wages when an operator certifies the employment of union labor.[14] LIUNA and Pipe Line Contractors Association explain that collectively bargained rates not only reflect actual wage and fringe benefit rates paid to the project workforce, including per diem rates but also are legally binding and can be verified by the Commission.[15] CenterPoint states that collectively bargained rates via the union or project agreement accurately reflect the actual labor cost, especially for unexpected infrastructure work where time is critical, and ensures that work is done quickly while maintaining high quality and safety.[16]

11. International Union of Operating Engineers argues that the Commission should only use Davis-Bacon and state prevailing wages if they have been updated recently and reflect actual wages received (*e.g.,* collectively bargained rates), not a metric unused by any other public agency or construction estimator.[17]

12. International Union of Operating Engineers cautions against the use of a

150 FERC ¶ 61,106 (2015); *Portland Nat. Gas Transmission Sys.,* Opinion No. 524, 142 FERC ¶ 61,197 (2013), *reh'g denied,* 150 FERC ¶ 61,107 (2015). Among other things, these proceedings involved estimating the expected costs for future pipeline retirements, specifically, determining the labor component for decommissioning costs to be recovered by a pipeline operator, Portland Natural Gas Transmission System.

[16] CenterPoint Comments at 2.

[17] International Union of Operating Engineers Comments at 2.

''blended wage rate'' (*i.e.,* the average of union and non-union wages in the general private construction industry within the states where the pipeline is located) to reimburse pipeline operator costs for several reasons: (1) it distorts the actual wages paid to workers; (2) it relies upon the Bureau of Labor and Statistics' Occupational Employment Statistics that do not segment the industry into industry groups (*e.g.,* heavy, highway, building, residential); (3) it includes the residential construction industry, which requires different skill sets than industrial work; (4) it fails to incorporate fringe benefits; and (5) it disincentivizes the use of union contractors because they are not able to recover labor costs and gives a false impression that union labor is more expensive.[18]

13. Pipe Line Contractors Association state that, in the absence of a union commitment, it may be appropriate for the Commission to consider other sources after verifying that the source's labor rates reasonably reflect actual wages and fringe benefit rates that would need to be paid to recruit and retain a qualified workforce.[19] However, Pipe Line Contractors Association opposes the inclusion of ''other industry-accepted wage sources'' and asks the Commission to rely solely on the other three sources. It urges the Commission to limit the use of costing databases because such databases are usually based on national averages or averages for the entire construction industry and exclude vital compensation components such as fringe benefit and per diem rates (*e.g.,* crew costs in RSMeans, a construction costing application, only include the hourly wage rate and contractor overhead costs, not compensation sources). It also urges the Commission not to use costing databases with wage rates from the Bureau of Labor Statistics because: (1) its occupational wage rates are based on a rolling three-year cycle that constitute historical wages and lag behind current market trends; (2) its wage data does not capture sectoral differences, which is important because pipeline construction requires higher skills and operator qualification; and (3) it excludes fringe benefit contribution rates, per diem rates, and training investments, which are critical compensation inputs for the pipeline industry.

14. CenterPoint contends that the database would be useful if it is specific to the local affected community, stating that national databases are less useful, especially in the current labor market with labor rates varying widely across the country.[20] Enbridge and Southern Star argue that, as long as the source for compensation levels reflects actual market conditions necessary to attract a highly skilled workforce, and the operator can certify that those rates were paid or will be paid, the Commission should defer these labor decisions to the operator and find these costs to be just and reasonable.[21] Southern Star states that there are several legitimate business reasons for employing a workforce with a higher labor rate.[22] Southern Star notes, for example, that a pipeline often requires a specialized workforce with advanced skills, experience, and training which may offer alternative cost savings other than the baseline labor rate, or other advantages such as in the area of safety.

15. INGAA states that it is appropriate to accept and evaluate submitted evidence from industry databases and other evidence to demonstrate prevailing wages paid in the relevant locale(s), adding that the Commission strikes an appropriate balance between offering definitive guidance on how to demonstrate wage standards and retaining the flexibility that has been the hallmark of rate cases before the Commission.[23]

III. Commission Determination

16. As explained in the Proposed Policy Statement, Opinion Nos. 510 and 524 were based on the record evidence before the Commission in those proceedings and do not reflect a heightened standard of review with respect to project-area wage rates.[24] We adopt the proposals in the Proposed Policy Statement to allow jurisdictional entities to include wages consistent with project-area wage standards in cost-of-service rates filed with the Commission where the record supports that outcome. Specifically, when a Commission-jurisdictional entity presents evidence that it: (1) pays project-area wage standards; (2) is contractually obligated to pay project-area wage standards; or (3) commits via affidavit [25] filed in the rate proceeding that it will pay project-area wage standards, the Commission will presume, absent contrary evidence, that such project-area wage standards are just and reasonable for the relevant labor-cost component.[26] Furthermore, the Commission will reject the inclusion of labor wages consistent with project-area wage standards in cost-of-service rates when the evidence demonstrates that the jurisdictional entity has not paid or will not be paying labor wages consistent with project-area wage standards.

17. We adopt the Proposed Policy Statement's proposal regarding the sources of project-area wage standards, as clarified below. Pursuant to the framework discussed below, we find that appropriate sources of project-area wage standards may include: (1) applicable collective-bargaining agreements or Project Labor Agreements; [27] (2) Davis-Bacon Act local prevailing wage determinations; [28] (3) state prevailing wage determinations; [29] or (4) other evidence demonstrating the prevailing wages paid in the relevant locale(s), such as an industry-accepted database used in construction cost estimates.[30]

[18] *Id.* at 1–2.

[19] Pipe Line Contractors Association Comments at 2.

[20] CenterPoint Comments at 2.

[21] Enbridge Comments at 3–4; Southern Star Comments at 4.

[22] Southern Star Comments at 3.

[23] INGAA Comments at 2.

[24] Proposed Policy Statement, 185 FERC ¶ 61,049 at P 4.

[25] We remind filers that all information submitted in cost-of-service filings must be truthful and accurate, *see* 18 CFR 35.13(d)(6) (''A utility shall include in its filing an attestation . . . that . . . the cost of service statements and supporting data submitted . . . are true, accurate, and current representations of the utility's books, budgets, or other corporate documents.''), 154.308 (''The filing must include a statement . . . representing that the cost statements, supporting data, and workpapers, that purport to reflect the books of the company do, in fact, set forth the results shown by such books.''), 341.1(b)(1) (''The signature on a filing constitutes a certification that the contents are true to the best knowledge and belief of the signer . . . .''), and that failure to meet this requirement may result in a referral to the Office of Enforcement for further investigation and action, as appropriate.

[26] Consistent with 48 CFR 22.401, this policy statement applies to employee or contract labor whose duties are primarily manual or physical in nature, as distinguished from mental or managerial, and did not apply to employees or contractors whose duties are primarily executive, supervisory, administrative, or clerical. For purposes of this policy statement, ''wages'' mean the basic hourly pay rate including fringe benefits, as more fully defined in 48 CFR 22.401.

[27] Project Labor Agreements are agreements between building trade unions and contractors. They govern terms and conditions of employment (including wage-related issues) on a construction project for all craft workers—union and nonunion. Dep't of Labor, *Project Labor Agreement Res. Guide, Project Labor, Cmty. Workforce, & Cmty. Benefits Agreements Res. Guide,* ¶ 1, *https://www.dol.gov/general/good-jobs/project-labor-agreement-resource-guide.*

[28] Pursuant to the Davis-Bacon Act, as amended and codified at 40 U.S.C. 3141(2), the term ''prevailing wages'' includes the basic hourly rate of pay and fringe benefits, as determined by the Department of Labor. *See* Final Rule, 88 FR at 57526 (citing 40 U.S.C. 3142, 3145), 57531, 57546, 57699, 57722–724.

[29] The applicable state prevailing wage determination should meet or exceed the Davis-Bacon Act local prevailing wage determinations.

[30] Proposed Policy Statement, 185 FERC ¶ 61,049 at P 6.

18. In considering these sources of project-area wage standards, we clarify that the Commission will look to applicable collective-bargaining agreements or Project Labor Agreements as an appropriate default source of project-area wage standards. We find that it is appropriate to identify these agreements as the default source of project-area wage standards because collectively bargained wages reflect actual wage and fringe benefit rates paid to the project workforce, including per diem rates. Moreover, such wages are legally binding and can be verified by the Commission. By comparison, labor costs based upon Davis-Bacon Act data are estimates of future costs based on average local wages, which may differ from the actual wages paid by a jurisdictional entity.

19. We find, however, that there could be circumstances when a jurisdictional entity uses collectively bargained wages for only part of its workforce or that collective bargained wage data is otherwise not representative of the jurisdictional entity's future labor costs. For example, as Southern Star points out, jurisdictional entities may need to hire higher-wage specialized workers, which could justify the use of sources other than collective-bargaining agreements or Project Labor Agreements. For these reasons, a jurisdictional entity may use the other three data sources enumerated in the Proposed Policy Statement [31] if the jurisdictional entity provides a detailed explanation of why these sources: (1) better reflect actual wages than relying on collective-bargaining agreements or Project Labor Agreements; and (2) accurately reflect wage information during the project period, including demonstrating that it is based on up-to-date data.

20. Finally, we adopt the Proposed Policy Statement proposal that jurisdictional entities seeking to include project-area wage standards in cost-of-service rates should maintain and preserve records, including books of account or records for work performed by employees, contractors or subcontractors, sufficient to demonstrate that claimed project-area wages were actually paid.[32]

IV. Information Collection Statement

21. The Paperwork Reduction Act and the implementing regulations of the Office of Management and Budget (OMB) require approval of certain information collection requirements imposed by an agency. Upon approval of a collection of information, OMB will assign an OMB Control Number and an expiration date. Respondents subject to the filing requirements will not be penalized for failing to respond to the collection of information unless the collection of information displays a valid OMB control number.

22. This Policy Statement clarifies how the Commission will treat the use of project-area wage standards in calculating the labor cost component of jurisdictional cost-of-service rates filed by a natural-gas company, interstate oil pipeline, or public utility, pursuant to NGA sections 4, 5 and 7, 15 U.S.C. 717c–d, 717f; ICA, 49 U.S.C. app. 1(5)(a); and FPA sections 205 and 206, 16 U.S.C. 824d-e, respectively.

23. The Commission is submitting these reporting requirements to OMB for its review and approval under section 3507(d) of the Paperwork Reduction Act. Comments are solicited on whether the information will have practical utility, the accuracy of provided burden estimates, ways to enhance the quality, utility, and clarity of the information to be collected, and any suggested methods for minimizing the respondent's burden, including the use of automated information techniques.

24. Send written comments on the revisions to the information collections in Docket No. PL24–1–000 to OMB through *www.reinfo.gov/public/do/PRAMain.* Attention: Federal Energy Regulatory Commission Desk Officer. Please identify the OMB Control Number (identified in paragraph 25 below) in the subject line of your comments. Comments should be sent within 30 days of publication of this docket to *www.reginfo.gov/public/do/PRAMain.* Additionally, please submit copies of your comments (identified by Docket No. PL24–1–000) by either of the following methods: (1) eFiling at Commission's website: *http://www.ferc.gov/docs-filing/efiling.asp* or (2) Mail/Hand Delivery/Courier: Federal Energy Regulatory Commission, Secretary of the Commission, at Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852. All submissions must be formatted and filed in accordance with submission guidelines at: *http://www.ferc.gov/help/submission-guide.asp.* For user assistance, contact FERC Online Support by email at *ferconlinesupport@ferc.gov,* or by phone at: (866) 208–3676 (toll-free).

25. *Collection Nos., Titles and OMB Control Nos.:* FERC–516J (Labor Wage Policy Statement, OMB Control No. 1902–TBD); FERC–537 (Gas Pipeline Certificates: Construction, Acquisition and Abandonment; OMB Control No. 1902–0060); FERC–538 (Gas Pipeline Certificates: Section 7(a) Mandatory Initial Service, OMB Control No. 1902–0061); FERC–545 (Gas Pipeline Rates: Rate Change (Non-formal), OMB Control No. 1902–0154); FERC–546 (Certificated Rate Filings: Gas Pipeline Rates, OMB Control No. 1902–0155); FERC–550 (Oil Pipeline Rates—Tariff Filings and Depreciation Studies, OMB Control No. 1902–0089); FERC–555 (Preservation of Records for Public Utilities and Licensees, Natural Gas and Oil Pipeline Companies, OMB Control No. 1902–0098).

26. *Action:* Revisions to the collections of information in accordance with the Policy Statement.

27. *Respondents:* The estimate of the number of respondents that may elect to use project-area wage standards in calculating the labor cost component of cost-of-service rates is based upon the existing burden inventory currently approved by OMB for filing rates cases, depreciation studies and certificate filings, include initial rates or seeking approval to charge existing rates for natural gas companies, public utilities and oil pipelines. This burden estimate is based upon one-third of the filings electing to include an additional burden by the filer to incorporate labor costs based upon paying wages that at minimum meet project-area wage standards.

28. *Frequency of Information Collection:* Jurisdictional entities, when including elements in rates reflecting future capital costs, may elect to make the above showings in support of wages that are at or above project-area wage standards. Such proceedings may include but are not limited to certificates for new natural gas pipelines, general natural gas pipeline and electric utility rate cases, proposed new or modified depreciation rates, and proposed inclusion of asset retirement obligation in rates. In total, jurisdictional entities may make such a showing one time per year.

29. *Necessity of Information:* The information would be necessary for the jurisdictional entity to receive the presumption that wages for capital projects that are at or above project-area wage standards are not just and reasonable.

30. *Internal Review:* The Commission has reviewed the changes and has determined that such changes are necessary. These requirements conform to the Commission's need for efficient information collection, communication, and management within the energy industry in support of the Commission's ensuring just and reasonable rates. The

[31] *See supra* P 6.

[32] Proposed Policy Statement, 185 FERC ¶ 61,049 at P 7.

Commission has specific, objective support for the burden estimates associated with the information collection requirements. However, we request comments with supporting background information on the estimates for burden and cost.

31. The Commission estimates the effect of the Policy Statement on burden[33] and cost[34] as follows:

32.

ESTIMATES OF THE EFFECTS DUE TO THE POLICY STATEMENT IN DOCKET NO. PL24–1–000

A. Information collection	B. Number of respondents	C. Annual number of responses per respondent	D. Total number of responses (column B × column C)	E. Average burden hours and cost per response	F. Total annual hour burdens & total annual cost (column D × column E)	G. Cost per respondent (column F ÷ column B)

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER24–1576–000]

Maple Flats Solar Energy Center LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of Maple Flats Solar Energy Center LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is April 11, 2024.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to

[33] "Burden" is the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the estimated burden, refer to 5 CFR 1320.3.

[34] Commission staff estimates that the respondents' skill set (and wages and benefits) for this docket are comparable to those of Commission employees. Based on the Commission's Fiscal Year 2023 average cost of $207,786/year (for wages plus benefits, for one full-time employee), $100.00/hour is used.

[35] The FERC–516J is a new temporary collection number that includes the burden changes due to this Policy Statement. This temporary number will be used for the burden related to the FERC–516 (OMB# 1902–0096) information collection (IC).

Note: In the Proposed Policy Statement, the Commission referenced the FERC–1006 temporary collection, which will no longer be used because most of the information collection requests have been approved by OMB since the publication of the Proposed Policy Statement.

[36] Since the issuance of the Proposed Policy Statement, OMB has approved data collections FERC–545, –555, –537.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER24–1587–000]

AlbertaEx, L.P.; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of AlbertaEx, L.P.'s application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is April 11, 2024.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 5737–032]

Santa Clara Valley Water District; Notice of Application for Surrender of Exemption Accepted for Filing, Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Application Type:* Surrender of Exemption.

b. *Project No.:* 5737–032.

c. *Date Filed:* February 20, 2024.

d. *Applicant:* Santa Clara Valley Water District.

e. *Name of Project:* Anderson Dam Hydroelectric Project.

f. *Location:* The project is located on Coyote Creek in Santa Clara County, California. The project does not occupy any federal lands.

g. *Filed Pursuant to:* Public Utility Regulatory Policies Act of 1978, 16 U.S.C. 2705, 2708.

h. *Applicant Contact:* Ryan McCarter, Santa Clara Valley Water District, 5750 Almaden Expressway, San Jose, CA 95118, *rmccarter@valleywater.org,* (408) 630–2983.

i. *FERC Contact:* Jennifer Ambler, (202) 502–8586, *jennifer.ambler@ferc.gov*.

j. *Cooperating agencies:* With this notice, the Commission is inviting federal, state, local, and Tribal agencies with jurisdiction and/or special expertise with respect to environmental issues affected by the proposal, that wish to cooperate in the preparation of any environmental document, if applicable, to follow the instructions for filing such requests described in item l below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of any environmental document cannot also intervene. *See* 94 FERC ¶ 61,076 (2001).

k. *Water Quality Certification:* The applicant must file no later than 60 days following the date of issuance of this notice: (1) a copy of the water quality

certification; (2) a copy of the request for certification, including proof of the date on which the certifying agency received the request; or (3) evidence of waiver of water quality certification.

l. *Deadline for filing comments, motions to intervene, and protests:* April 22, 2024.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. The first page of any filing should include the docket number P–5737–032. Comments emailed to Commission staff are not considered part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

m. *Description of Request:* Santa Clara Valley Water District (Valley Water), exemptee for the Anderson Dam Hydroelectric Project located on Coyote Creek in Santa Clara County, California, proposes to: (1) drawdown the Anderson reservoir to perform a seismic retrofit of the dam which would include removing Anderson Dam in stages and rebuilding the dam and spillway to meet Federal Energy Regulatory Commission and California Department of Water Resources Division of Safety of Dams public safety requirements, (2) decommission the hydroelectric facility, (3) implement conservation measures downstream of the dam on Coyote Creek, and (4) surrender the hydroelectric project exemption. Valley Water anticipates construction to retrofit the dam would take approximately seven years to complete and proposes to start construction in 2026. Valley Water also proposes various environmental monitoring plans, site restoration activities, and mitigation measures including improvements to Ogier Ponds and enhancements to the fish passage facilities at the Coyote Percolation Dam located downstream and outside of the Anderson Dam Hydroelectric Project on Coyote Creek that would take additional time to complete. In the application, Valley Water discusses how the project exemption, and therefore the Commission's jurisdiction over the project, would remain until the Commission finds the seismic retrofit construction complete and all conditions of any surrender order are met. Valley Water would continue to maintain Anderson Reservoir and the rebuilt dam after exemption surrender and proposes to implement Phase 1 flow releases from the Fish and Aquatic Habitat Collaborative Effort Agreement.

n. *Locations of the Application:* This filing may be viewed on the Commission's website at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 1–866–208–3676 or email *FERCOnlinesupport@ferc.gov,* for TTY, call (202) 502–8659. Agencies may obtain copies of the application directly from the applicant.

o. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

p. *Comments, Protests, or Motions to Intervene:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214, respectively. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

q. *Filing and Service of Documents:* Any filing must (1) bear in all capital letters the title ''COMMENTS'', ''PROTEST'', or ''MOTION TO INTERVENE'' as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person commenting, protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis. Any filing made by an intervenor must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 385.2010.

r. The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP24–37–000]

Columbia Gulf Transmission, LLC; Notice of Schedule for the Preparation of an Environmental Assessment for the Proposed Amoco South Pecan Lake Abandonment Project

On January 16, 2024, Columbia Gulf Transmission, LLC (Columbia Gulf) filed an application in Docket No. CP24–37–000 requesting an Authorization pursuant to Section 7(b) of the Natural Gas Act involving abandonment of approximately 21 miles of pipeline and related appurtenances in Cameron Parish, Louisiana.

On January 26, 2024, the Federal Energy Regulatory Commission (Commission or FERC) issued its Notice

of Application for the Project. Among other things, that notice alerted agencies issuing federal authorizations of the requirement to complete all necessary reviews and to reach a final decision on a request for a federal authorization within 90 days of the date of issuance of the Commission staff's environmental document for the Project.

This notice identifies Commission staff's intention to prepare an environmental assessment (EA) for the Project and the planned schedule for the completion of the environmental review.[1]

Schedule for Environmental Review

Issuance of EA June 20, 2024
90-day Federal Authorization Decision Deadline[2] September 18, 2024

If a schedule change becomes necessary, additional notice will be provided so that the relevant agencies are kept informed of the Project's progress.

Project Description

Columbia Gulf proposes to abandon in place and abandon by removal approximately 21 miles of pipeline and related appurtenances, located in Cameron Parish, Louisiana. According to Columbia Gulf, abandonment will eliminate the need for future operating and maintenance expenditures on outdated facilities that are no longer needed to satisfy current firm service obligations. Abandonment of these facilities will not change the certificated capacity of Columbia Gulf's system and will not result in the termination or reduction of service to existing customers of Columbia Gulf.

The Project would consist of the following activities:

- Abandon in place and by removal approximately 16 miles of its 16-inch-diameter South Pecan Lake Pipeline;
- Abandon by removal approximately 1 mile of its 12-inch-diameter Amoco/South Pecan Lake Pipeline;
- Abandon by removal approximately 4 miles of its 6-inch-diameter Go Around Bayou Pipeline;
- Abandon by removal all of the facilities at the South Pecan Lake metering and regulating station (M&R) No. 505 and Goodrich M&R No. 4144; and
- Abandon by removal other related appurtenances.

Background

On February 7, 2024, the Commission issued a *Notice of Scoping Period Requesting Comments on Environmental Issues for the Proposed Amoco South Pecan Lake Abandonment Project* (Notice of Scoping). The Notice of Scoping was sent to affected landowners; federal, state, and local government agencies; elected officials; environmental and public interest groups; Native American tribes; other interested parties; and local libraries and newspapers. In response to the Notice of Scoping, we received comments by a landowner, James Guinn; the Mississippi Band of the Choctaw Indians; and U.S. Fish and Wildlife Service. The primary issues raised were abandonment in place procedures and addressing unanticipated discoveries of cultural resources. All substantive comments will be addressed in the EA.

Additional Information

In order to receive notification of the issuance of the EA and to keep track of formal issuances and submittals in specific dockets, the Commission offers a free service called eSubscription. This service provides automatic notification of filings made to subscribed dockets, document summaries, and direct links to the documents. Go to *https://www.ferc.gov/ferc-online/overview* to register for eSubscription.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Additional information about the Project is available from the Commission's Office of External Affairs at (866) 208–FERC or on the FERC website (*www.ferc.gov*). Using the ''eLibrary'' link, select ''General Search'' from the eLibrary menu, enter the selected date range and ''Docket Number'' excluding the last three digits (*i.e.,* CP24–37), and follow the instructions. For assistance with access to eLibrary, the helpline can be reached at (866) 208–3676, TTY (202) 502–8659, or at *FERCOnlineSupport@ferc.gov.* The eLibrary link on the FERC website also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rule makings.

Dated: March 21, 2024.

Debbie-Anne A. Reese,

Acting Secretary.

[Project No. 2561–057]

Notice of Intent To Prepare an Environmental Assessment; Sho-Me Electric Power Cooperative

On June 29, 2023, Sho-Me Electric Power Cooperative (licensee) filed an application to surrender its license for the Niangua Hydroelectric Project No. 2561. The project is located on the Nianqua River in Camden County, Missouri. The project does not occupy federal lands.

The licensee has determined it no longer wants to pursue relicensing of the project. The licensee intends to surrender its license and to leave the facilities in place, including the project dam, power tunnel, powerhouse, and associated facilities. The power canal would be drained and sealed at both ends and the project would be disconnected from the power grid. No ground disturbing activities are proposed with surrender of the project license. A Notice of Application Accepted for Filing and Soliciting Comments, Motions to Intervene, and Protest was issued on August 1, 2023.

This notice identifies Commission staff's intention to prepare an environmental assessment (EA) for the proposed action. The planned schedule for the completion of the EA is September 30, 2024.[1] Revisions to the schedule may be made as appropriate. The EA will be issued and made available for review by all interested parties. All comments filed on the EA will be reviewed by staff and considered in the Commission's final decision on the proceeding.

With this notice, the Commission is inviting federal, state, local, and Tribal agencies with jurisdiction and/or special expertise with respect to environmental issues affected by the proposal to cooperate in the preparation

[1] 42 U.S.C. 4336a(g)(1)(B) requires lead federal agencies to complete EAs within 1 year of the agency's decision to prepare an EA.

of the EA planned to be issued July 2024. Agencies wishing to cooperate, or further discuss the benefits, responsibilities, and obligations of the cooperating agency role, should contact staff listed at the bottom of this notice by April 11, 2024. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of any environmental document cannot also intervene. *See* 94 FERC ¶ 61,076 (2001).

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members, and others to access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Any questions regarding this notice may be directed to Rebecca Martin at 202–502–6012 or *Rebecca.martin@ferc.gov.*

[Project No. 2876–005]

California Department of Water Resources; Notice of Intent To File License Application, Filing of Pre-Application Document, and Approving Use of the Traditional Licensing Process

a. *Type of Filing:* Notice of Intent to File License Application and Request to Use the Traditional Licensing Process.

b. *Project No.:* 2876–005.

c. *Date Filed:* February 1, 2024.

d. *Submitted By:* California Department of Water Resources (DWR).

e. *Name of Project:* Pine Flat Transmission Line.

f. *Location:* Near the Kings River in Fresno County, California.

g. *Filed Pursuant to:* 18 CFR 5.3 of the Commission's regulations.

h. *Potential Applicant Contact:* Jeremiah McNeil, Manager, California Department of Water Resources, Hydropower License Planning and Compliance Office, P.O. Box 942836, Sacramento CA 94236–0001; (916) 699–8414; email: *Jeremiah.McNeil@water.ca.gov.*

i. *FERC Contact:* Shannon Archuleta at (202) 552–2739 or email at *shannon.archuleta@ferc.gov.*

j. DWR filed its request to use the Traditional Licensing Process on February 1, 2024. DWR provided public notice of its request on February 15, 2024. In a letter dated March 22, 2024, the Acting Director of the Division of Hydropower Licensing approved DWR's request to use the Traditional Licensing Process.

k. With this notice, we are initiating informal consultation with the U.S. Fish and Wildlife Service under section 7 of the Endangered Species Act and the joint agency regulations thereunder at 50 CFR part 402. We are also initiating consultation with the California State Historic Preservation Officer, as required by section 106, National Historical Preservation Act, and the implementing regulations of the Advisory Council on Historic Preservation at 36 CFR 800.2.

l. With this notice, we are designating DWR as the Commission's non-federal representative for carrying out informal consultation, pursuant to section 7 of the Endangered Species Act and section 106 of the National Historic Preservation Act.

m. DWR filed a Pre-Application Document (PAD; including a proposed process plan and schedule) with the Commission, pursuant to 18 CFR 5.6 of the Commission's regulations.

n. A copy of the PAD may be viewed and/or printed on the Commission's website *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number, excluding the last three digits in the docket number field to access the document. Docket Numbers: ER24–1588–000.
Applicants: Double Black Diamond Solar Power, LLC.
Description: Baseline eTariff Filing: Petition for Blanket MBR Authorization with Waivers & Expedited Treatment to be effective 3/25/2024.
Filed Date: 3/21/24.
Accession Number: 20240321–5180.
Comment Date: 5 p.m. ET 4/11/24.

Docket Numbers: ER24–1589–000.
Applicants: AEP Texas Inc.
Description: § 205(d) Rate Filing: AEPTX-Lighthouse Electric Cooperative TSA to be effective 3/4/2024.
Filed Date: 3/21/24.
Accession Number: 20240321–5211.
Comment Date: 5 p.m. ET 4/11/24.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Dated: March 21, 2024.

Combined Notice of Filings

Take notice that the Commission has received the following Natural Gas Pipeline Rate and Refund Report filings:

Filings Instituting Proceedings

Docket Numbers: RP24–545–000.
Applicants: Elba Express Company, L.L.C.
Description: Compliance filing: Annual Interruptible Revenue Crediting Report 2024 to be effective N/A.
Filed Date: 3/20/24.
Accession Number: 20240320–5173.
Comment Date: 5 p.m. ET 4/1/24.

Docket Numbers: RP24–546–000.
Applicants: Empire Pipeline, Inc.
Description: § 4(d) Rate Filing: Fuel Tracker (Empire Tracking Supply Interim Settlement Rates 2024) to be effective 2/1/2024.
Filed Date: 3/20/24.
Accession Number: 20240320–5184.
Comment Date: 5 p.m. ET 4/1/24.

Docket Numbers: RP24–547–000.
Applicants: Iroquois Gas Transmission System, L.P.
Description: § 4(d) Rate Filing: 3.21.24 Negotiated Rates—Hartree Partners, LP R–7090–12 to be effective 4/1/2024.
Filed Date: 3/21/24.
Accession Number: 20240321–5104.
Comment Date: 5 p.m. ET 4/2/24.

Docket Numbers: RP24–548–000.
Applicants: Iroquois Gas Transmission System, L.P.
Description: § 4(d) Rate Filing: 3.21.24 Negotiated Rates—Hartree Partners, LP R–7090–13 to be effective 4/1/2024.
Filed Date: 3/21/24.
Accession Number: 20240321–5115.
Comment Date: 5 p.m. ET 4/2/24.

Docket Numbers: RP24–550–000.
Applicants: Iroquois Gas Transmission System, L.P.
Description: § 4(d) Rate Filing: 3.21.24 Negotiated Rates—Macquarie Energy LLC R–4090–30 to be effective 4/1/2024.
Filed Date: 3/21/24.
Accession Number: 20240321–5117.
Comment Date: 5 p.m. ET 4/2/24.

Docket Numbers: RP24–551–000.
Applicants: Transwestern Pipeline Company, LLC.
Description: § 4(d) Rate Filing: Negotiated Rate Filing—Tenaska to be effective 4/1/2024.
Filed Date: 3/21/24.
Accession Number: 20240321–5131.
Comment Date: 5 p.m. ET 4/2/24.

Docket Numbers: RP24–552–000.
Applicants: ETC Tiger Pipeline, LLC.
Description: § 4(d) Rate Filing: NRA Amendment No 3—Chesapeake to be effective 4/1/2024.
Filed Date: 3/21/24.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 5089–027]

Fall River Rural Electric Cooperative, Inc.; Notice of Scoping Meetings and Soliciting Scoping Comments

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* New Major License.

b. *Project No.:* 5089–027.

c. *Date filed:* August 31, 2021.

d. *Applicant:* Fall River Rural Electric Cooperative, Inc.

e. *Name of Project:* Felt Hydroelectric Project (Felt Project or project).

f. *Location:* On the Teton River, near the town of Tetonia, in Teton County, Idaho. The project occupies 114.4 acres of federal land administered by the Bureau of Land Management.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Nicholas Josten, 2742 Saint Charles Ave., Idaho Falls, Idaho 83404; (208) 528–6152.

i. *FERC Contact:* John Matkowski at (202) 502–8576; or email at *john.matkowski@ferc.gov.*

j. *Deadline for filing scoping comments:* May 21, 2024.

The Commission strongly encourages electronic filing. Please file scoping comments using the Commission's eFiling system at *https://ferconline.ferc.gov/FERCOnline.aspx.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *https://ferconline.ferc.gov/QuickComment.aspx.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, please send a paper copy via U.S. Postal Service to: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. All filings must clearly identify the project name and docket number on the first page: Felt Hydroelectric Project (P–5089–027).

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. This application is not ready for environmental analysis at this time.

l. *The Felt Project includes:* (1) a 122.5-foot-long, 12-foot-high concrete dam that includes the following sections: (a) 25-foot-long sluiceway section with a 4-foot-wide fish ladder and a 14-foot-wide corrugated steel radial gate and (b) a 96-foot-long uncontrolled overflow spillway with a crest elevation of 5,530-feet mean sea level (msl); (2) a 7-acre impoundment with a storage capacity of 28 acre-feet at a normal water surface elevation of 5,530-feet msl; (3) a 178-foot-long, 8.5-foot-deep fish screen structure equipped with a bar rack with 3/8-inch clear bar spacing and diamond mesh screen; (4) three intake openings located behind the fish screen each equipped with 10-foot-wide intake gates and 10-foot-wide trash racks with 3-inch clear bar spacing; (5) three, 8-foot-square unlined rock tunnels connecting the intakes to penstocks and consisting of: (a) a 179-foot-long Tunnel No. 1 connecting to a 280-foot-long, 78-inch-diameter steel penstock that bifurcates into two, 180-foot-long, 60-inch-diameter steel penstocks that connect to Powerhouse No. 1; and (b) a 177-foot-long Tunnel No. 2 and a 196-foot-long Tunnel No. 3 each connecting to a 1,750-foot-long, 96-inch-diameter steel penstock that connects to Powerhouse No. 2; (6) an 83-foot-long, 26-foot-wide, 13-foot-high reinforced concrete Powerhouse No. 1 containing two horizontal Francis turbine-generator units with a combined generating capacity of 1,950 kilowatts (kW); (7) a 36-foot-long, 36-foot-wide, 25-foot-high reinforced concrete Powerhouse No. 2 containing two vertical Francis turbine-generator units with a combined generating capacity of 5,500 kW; (8) two tailrace channels discharging to the Teton River from Powerhouses No. 1 and No. 2; (9) a 1,500-foot-long, 4.16 kilovolt (kV) overhead transmission line connecting Powerhouse No. 1 to a transformer

located next to Powerhouse No. 2; (10) a 2,000-foot-long, 24.9 kV overhead transmission line leading from the transformer to the interconnection point; and (11) appurtenant facilities.

The project operates in a run-of-river mode such that outflow from the project approximates inflow. The project has a maximum hydraulic capacity of 900 cubic feet per second (cfs) when all four turbine generator units in Powerhouse No. 1 (upper powerhouse) and Powerhouse No. 2 (lower powerhouse) are operating. The project is required to discharge a minimum flow into the 1,950-foot-long bypassed reach of 20 cfs from July 1 to March 14 and 50 cfs from March 15 to June 30. The project generates an average of 33,100 megawatt-hours per year.

m. Copies of the application can be viewed on the Commission's website at *https://www.ferc.gov,* using the ''eLibrary'' link. Enter the project's docket number, excluding the last three digits in the docket number field, to access the document. For assistance, contact FERC Online Support.

You may also register at *https://ferconline.ferc.gov/FERCOnline.aspx* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov.*

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595, or at *OPP@ferc.gov.*

n. *Scoping Process:*

Pursuant to the National Environmental Policy Act (NEPA), Commission staff intends to prepare either an environmental assessment (EA) or an environmental impact statement (EIS) (collectively referred to as the ''NEPA document'') that describes and evaluates the probable effects, including an assessment of the site-specific and cumulative effects, if any, of the proposed action and alternatives. The Commission's scoping process will help determine the required level of analysis and satisfy the NEPA scoping requirements, irrespective of whether the Commission issues an EA or an EIS.

Scoping Meetings

Commission staff will hold two public scoping meetings to receive input on the scope of the NEPA document. An evening meeting will focus on receiving input from the public and a daytime meeting will focus on the concerns of resource agencies, non-governmental organizations (NGOs), and Indian Tribes. We invite all interested agencies, Indian Tribes, NGOs, and individuals to attend one or both meetings. The times and locations of these meetings are as follows:

Daytime Scoping Meeting

Date: Tuesday, April 23, 2024
Time: 1:00 p.m. MT
Place: AmericInn Lodge
Address: 1098 Golden Beauty Dr, Rexburg, Idaho 83440

Evening Scoping Meeting

Date: Tuesday, April 23, 2024
Time: 6:00 p.m. MT
Place: AmericInn Lodge
Address: 1098 Golden Beauty Dr, Rexburg, Idaho 83440

Copies of the Scoping Document (SD1) outlining the subject areas to be addressed in the NEPA document were distributed to the parties on the Commission's mailing list. Copies of the SD1 will be available at the scoping meeting or may be viewed on the web at *http://www.ferc.gov* using the ''eLibrary'' link (see item m above).

An environmental site review is typically held in conjunction with the scoping meeting. However, access to the project site is likely to be limited by winter weather and/or poor vehicular access conditions when scoping for this project will occur. For these reasons, an environmental site review will not be conducted at this time.

Objectives

At the scoping meetings, Commission staff will: (1) summarize the environmental issues tentatively identified for analysis in the NEPA document; (2) solicit from the meeting participants all available information, especially quantifiable data, on the resources at issue; (3) encourage statements from experts and the public on issues that should be analyzed in the NEPA document, including viewpoints in opposition to, or in support of, the staff's preliminary views; (4) determine the resource issues to be addressed in the NEPA document; and (5) identify those issues that require a detailed analysis, as well as those issues that do not require a detailed analysis.

Procedures

The meetings are recorded by a stenographer and become part of the formal record of the Commission proceeding on the project. Individuals, NGOs, Indian Tribes, and agencies with environmental expertise and concerns are encouraged to attend the meeting and to assist the staff in defining and clarifying the issues to be addressed in the NEPA document.

Dated: March 22, 2024.

Debbie-Anne A. Reese,

Acting Secretary.

a. *Type of Filing:* Notice of Intent to File License Application and Request to Use the Traditional Licensing Process.

b. *Project No.:* 2741–039

c. Date Filed: February 1, 2024.

d. *Submitted By:* Kings River Conservation District (KRCD).

e. *Name of Project:* Jeff L. Taylor Pine Flat Power Plant.

f. *Location:* On the Kings River in Fresno County, California.

g. *Filed Pursuant to:* 18 CFR 5.3 of the Commission's regulations.

h. *Potential Applicant Contact:* David Merritt, General Manager, Kings River Conservation District, 4886 E. Jensen Ave., Fresno, CA 93725; (559) 237–5567; email: *powerplantferc@krcd.org.*

i. *FERC Contact:* Shannon Archuleta at (202) 552–2739 or email at *shannon.archuleta@ferc.gov.*

j. KRCD filed its request to use the Traditional Licensing Process on February 1, 2024. KRCD provided public notice of its request on February 15, 2024. In a letter dated March 22, 2024, the Acting Director of the Division of Hydropower Licensing approved KRCD's request to use the Traditional Licensing Process.

k. With this notice, we are initiating informal consultation with the U.S. Fish and Wildlife Service under section 7 of the Endangered Species Act and the joint agency regulations thereunder at 50 CFR part 402. We are also initiating consultation with the California State Historic Preservation Officer, as required by section 106, National Historical Preservation Act, and the implementing regulations of the Advisory Council on Historic Preservation at 36 CFR 800.2.

l. With this notice, we are designating KRCD as the Commission's non-federal representative for carrying out informal consultation, pursuant to section 7 of the Endangered Species Act and section 106 of the National Historic Preservation Act.

m. KRCD filed a Pre-Application Document (PAD; including a proposed process plan and schedule) with the Commission, pursuant to 18 CFR 5.6 of the Commission's regulations.

n. A copy of the PAD may be viewed and/or printed on the Commission's website *http://www.ferc.gov* using the "eLibrary" link. Enter the docket number, excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll free, (886) 208–3676 or TTY (202) 502–8659.

You may register online at *https://ferconline.ferc.gov/FERCOnline.aspx* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

o. The licensee states its unequivocal intent to submit an application for a subsequent license for Project No. 2741. Pursuant to 18 CFR 16.20 each application for a subsequent license and any competing license applications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by August 31, 2027.

q. The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Dated: March 22, 2024.

Debbie-Anne A. Reese,

Acting Secretary.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OAR–2022–0883; FRL11863–01–OMS]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Greenhouse Gas Reporting Program (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), Greenhouse Gas Reporting Program (EPA ICR Number 2300.20, OMB Control Number 2060–0629) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through March 31, 2024. Public comments were previously requested via the **Federal Register** on May 4, 2023, during a 60-day comment period. This notice allows for an additional 30 days for public comments.

DATES: Comments must be submitted on or before April 29, 2024.

ADDRESSES: Submit your comments, referencing Docket ID No. EPA–HQ–OAR–2022–0883, to EPA online using *http://www.regulations.gov* (our preferred method), by email to *a-and-r-docket@epa.gov,* or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

FOR FURTHER INFORMATION CONTACT: Joe Ford, Climate Change Division, Office of Atmospheric Protection, Office of Air and Radiation (Mail Code 6207A), Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: 202–564–7659; fax number: 202–343–2342; email address: *ford.joe@epa.gov.*

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through March 31, 2024. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on May 4, 2023, during a 60-day comment period (88 FR 28546). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this

ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit *http://www.epa.gov/dockets.*

Abstract: In response to the FY2008 Consolidated Appropriations Act (H.R. 2764; Pub. L. 110–161) and under authority of the Clean Air Act, the EPA finalized the Mandatory Reporting of Greenhouse Gases Rule (GHG Reporting Rule) (74 FR 56260; October 30, 2009). The GHG Reporting Rule, which became effective on December 29, 2009, establishes reporting requirements for certain large facilities and suppliers. It does not require control of greenhouse gases. Instead, it requires that sources emitting greenhouse gases, supplying certain products that contain greenhouse gases, or injecting carbon dioxide (CO_2) underground in quantities above certain threshold levels, to monitor and report annual emissions in amounts of carbon dioxide equivalent (CO_2e).

Subsequent rules have promulgated requirements for additional facilities, suppliers, and mobile sources; provided clarification and corrections to existing requirements; finalized CBI determinations; amended recordkeeping requirements; and implemented an alternative verification approach. Collectively, the GHG Reporting Rule and its associated rulemakings are referred to as the Greenhouse Gas Reporting Program (GHGRP).

The purpose for this ICR is to renew and revise the GHG Reporting Rule ICR to update and consolidate the burdens and costs imposed by the current ICR under the GHGRP.

Form Numbers: None.

Respondents/affected entities: Facilities emitting GHGs, supplying certain products that contain GHGs, or injecting CO_2 underground in quantities above certain threshold levels of CO_2e.

Respondent's obligation to respond: Mandatory (42 U.S.C. 7401–7671q).

Estimated number of respondents (annual average): 12,434.

Frequency of response: Annually.

Total estimated burden: 705,554 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: $95,175,521 (per year), which includes $33,282,257 annualized capital or operation & maintenance costs.

Changes in Estimates: There is a decrease of 34,458 hours in the total estimated respondent burden compared with that identified in the last ICR renewal. Furthermore, the annual public reporting and recordkeeping burden for this collection of information is estimated to average 0.07 hours per response. The last ICR estimated an average burden of 0.08 hours per response. This change in burden reflects an adjustment in the number of respondents from projected to actual and an adjustment of labor rates, capital, and operation and maintenance (O&M) costs to reflect 2021 dollars. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose, or provide information to or for a Federal Agency. This includes the time needed to review instructions, develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information; processing and maintaining information; and disclosing and providing information; adjusting the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; training personnel to be able to respond to a collection of information; searching data sources; completing and reviewing the collection of information; and transmitting or otherwise disclosing the information.

Courtney Kerwin,

Director, Information Engagement Division.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OLEM–2018–0534, FRL–11861–01–OMS]

Agency Information Collection Activities; Submission to the Office of Management and Budget; Comment Request; Identification, Listing, and Rulemaking Petitions (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), Identification, Listing and Rulemaking Petitions (Renewal), EPA ICR Number 1189.32, OMB Control Number 2050–0053 to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through March 31, 2024. Public comments were previously requested via the **Federal Register** on July 28, 2023 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

DATES: Comments may be submitted on or before April 29, 2024.

ADDRESSES: Submit your comments, referencing Docket ID No. EPA–HQ–OLEM–2018–0534, to EPA online using *www.regulations.gov* (our preferred method) or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

FOR FURTHER INFORMATION CONTACT: Peggy Vyas, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: 202–566–0453; *vyas.peggy@epa.gov.*

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through March 31, 2024. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on July 28, 2023 during a 60-day comment period (88 FR 48845). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit *http://www.epa.gov/dockets.*

Abstract: Under the authority of the Resource Conservation and Recovery Act of 1976 (RCRA), as amended,

Congress directed the Environmental Protection Agency (EPA) to implement a comprehensive program for the safe management of hazardous waste. In addition, Congress wrote that ''[a]ny person may petition the Administrator for the promulgation, amendment or repeal of any regulation'' under RCRA (section 7004(a)). 40 CFR parts 260 and 261 contain provisions that allow regulated entities to apply for petitions, variances, exclusions, and exemptions from various RCRA requirements.

The following are some examples of information required from petitioners under 40 CFR part 260. Under 40 CFR 260.20(b), all rulemaking petitioners must submit basic information with their demonstrations, including name, address, and statement of interest in the proposed action. When a petition is submitted, the Agency reviews materials, deliberates, publishes its tentative decision in the **Federal Register**, and requests public comment. The EPA also may hold informal public hearings (if requested by an interested person or at the discretion of the Administrator) to hear oral comments on its tentative decision. After evaluating all comments, the EPA publishes its final decision in the **Federal Register**.

With this renewal, this ICR will no longer include the burden associated with the disposal of coal combustion residuals (CCR) from electric utilities as solid waste under Subtitle D of RCRA, found at 40 CFR part 257, subpart D. That burden is covered by OMB Control Number 2050–0223.

Form Numbers: None.

Respondents/affected entities: Entities potentially affected by this action are the private sector, as well as State, Local, or Tribal Governments.

Respondent's obligation to respond: Required to obtain or retain a benefit (RCRA Sections 1008, 4004, 4005(a)).

Estimated number of respondents: 2,603.

Frequency of response: On occasion.

Total estimated burden: 62,778 hours. Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: $11,679,180, which includes $8,860,784 in annualized capital and O&M costs.

Changes in the estimates: There is total decrease of 240,430 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. There is a decrease of 175,319 hours as the hours associated with the information collection requirements for the disposal of CCR from this ICR were transferred to 2050–0223 in order to better align the collection requirements as they relate to RCRA and the disposal of CCR; specifically, as they relate to 40 CFR part 257. In addition, there was a decrease of $7,538,452 in capital/O&M costs to 2050–0223 as part of this realignment.

The remaining decrease of approximately 65,111 hours and $1,775,173 is an adjustment to the existing estimates based on data gathered through consultations with EPA Regional and State Offices and the regulated community, not due to program changes.

Courtney Kerwin,

Director, Regulatory Support Division.

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; NSPS for Metal Coil Surface Coating (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NSPS for Metal Coil Surface Coating (EPA ICR Number 0660.14, OMB Control Number 2060–0107) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through March 31, 2024. Public comments were previously requested, via the **Federal Register** on May 18, 2023, during a 60-day comment period. This notice allows for an additional 30 days for public comments.

DATES: Comments may be submitted on or before April 29, 2024.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OAR–2023–0110, to EPA online using *www.regulations.gov/* (our preferred method), by email to *a-and-r-docket@epa.gov,* or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. The EPA's policy is that all comments received will be included in the public docket without change, including any personal information for the proposed provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Muntasir Ali, Sector Policies and Program Division (D243–05), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711; telephone number: (919) 541–0833; email address: *ali.muntasir@epa.gov.*

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through March 31, 2024. An agency may neither conduct nor sponsor, and a person is not required to respond to a collection of information unless it displays a currently-valid OMB control number.

Public comments were previously requested, via the **Federal Register** on May 18, 2023, during a 60-day comment period (88 FR 31748). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov,* or in person at the EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit *http://www.epa.gov/dockets.*

Abstract: The New Source Performance Standards (NSPS) for the regulations published at 40 CFR part 60, subpart TT were proposed on January 5, 1981, promulgated on November 1, 1982, and most recently amended on October 17, 2000. These regulations apply to existing and new metal coil surface coating facilities with the following surface coating lines: each prime coat operation; each finish coat operation; and each prime and finish coat operation cured simultaneously, where the finish coat is applied wet-on-wet over the prime coat. New facilities include those that commenced construction, modification, or reconstruction after the date of proposal.

This information is being collected to assure compliance with 40 CFR part 60, subpart TT.

Form Numbers: None.

Respondents/affected entities: Metal coil surface coating facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart TT).

Estimated number of respondents: 158 (total).

Frequency of response: Initially, quarterly, occasionally, semiannually, and annually.

Total estimated burden: 16,200 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $2,200,000 (per year), which includes $151,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is no change in burden from the most-recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations: (1) the regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Although there are no changes in the regulatory requirements and there is no significant industry growth, there is a decrease in the operation and maintenance (O&M) costs due to a calculation correction to the number of respondents using temperature monitoring systems.

Courtney Kerwin,

Director, Regulatory Support Division.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–R08–SFUND–2024–0009; FRL–11812–01–R8]

Proposed CERCLA Administrative Settlement Agreement and Order on Consent for Remedial Investigation Addendum/Focused Feasibility Study

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed settlement; request for public comment.

SUMMARY: In accordance with the requirements of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended (''CERLCA''), notice is hereby given that a Proposed Administrative Settlement Agreement and Order on Consent for Remedial Investigation Addendum/Focused Feasibility Study (''Proposed Agreement'') associated with the Smeltertown Site near Salida, Chaffee County, Colorado (''Site'') was executed by the U.S. Environmental Protection Agency (''EPA''), Region 8 and is now subject to public comment, after which EPA may modify or withdraw its consent if comments received disclose facts or considerations that indicate that the Proposed Agreement is inappropriate, improper, or inadequate.

DATES: Comments must be submitted on or before April 29, 2024.

ADDRESSES: The Proposed Agreement and additional background information relating to the agreement will be available upon request. Any comments or requests or for a copy of the Proposed Agreement should be addressed to Julie Nicholson, Enforcement Specialist, Superfund and Emergency Management Division, Environmental Protection Agency-Region 8, Mail Code 8SEM–PAC, 1595 Wynkoop Street, Denver, Colorado 80202, telephone number: (401) 714–6143, email address: *nicholson.julie@epa.gov* and should reference the Smeltertown Site.

You may also send comments, identified by Docket ID No. EPA–R08–SFUND–2024–0009 to 40. Follow the online instructions for submitting comments.

FOR FURTHER INFORMATION CONTACT: Kayleen Castelli, Senior Assistant Regional Counsel, Office of Regional Counsel, Environmental Protection Agency, Region 8, Mail Code 8ORC–LEC, 1595 Wynkoop, Denver, Colorado 80202, telephone number:(303) 312–6174, email address: *castelli.kayleen@epa.gov.*

SUPPLEMENTARY INFORMATION: The Proposed Agreement would resolve potential EPA claims under section 107(a) of CERCLA, against Butala Construction Co. (''Settling Party'')for the performance of a remedial investigation addendum and focused feasibility study (RIA/FFS) for Operable Unit 2 (OU2) and a portion of the Vista Del Rio Subdivision (the ''Property''), which is associated with the Smeltertown Site. The RIA/FFS will evaluate the possible impacts and potential remedies for the actual and/or threaten ''release'' of any hazardous substance resulting from Settling Party's activities and will analyze the remedy selected in the OU2 Record of Decision issued by the EPA in 1998 as it relates to those activities. This Settlement separately contemplates the soil and groundwater sampling programs for the Vista Del Rio subdivision by the Settling Party. The Vista Del Rio Subdivision is the subdivision of the 18-acres along the western edge of the Site. The Proposed Settlement also provides for the payment of certain response costs incurred by the United States at or in connection with the Site and the Vista Del Rio Subdivision and provides a covenant not to sue or to take administrative action from the United States to the Settling Party pursuant to sections 106 and 107(a) of CERCLA, 42 U.S.C. 9606 and 9607(a) with regard to the Property.

For thirty (30) days following the date of publication of this document, EPA will receive electronic comments relating to the Proposed Agreement. EPA's response to any comments received will be available for public inspection by request. Please see the **ADDRESSES** section of this document for instructions.

Ben Bienlenberg,

Acting Division Director, Superfund and Emergency Management Division, Region 8.

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–XXXX and 3060–0928; FR ID 211190]

Information Collections Being Submitted for Review and Approval to Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Pursuant to the Small Business Paperwork Relief Act of 2002, the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

DATES: Written comments and recommendations for the proposed information collection should be submitted on or before April 29, 2024.

ADDRESSES: Comments should be sent to *www.reginfo.gov/public/do/PRAMain.* Find this particular information

collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Your comment must be submitted into *www.reginfo.gov* per the above instructions for it to be considered. In addition to submitting in *www.reginfo.gov* also send a copy of your comment on the proposed information collection to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.* Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Cathy Williams at (202) 418–2918. To view a copy of this information collection request (ICR) submitted to OMB: (1) go to the web page *http://www.reginfo.gov/public/do/PRAMain,* (2) look for the section of the web page called ''Currently Under Review,'' (3) click on the downward-pointing arrow in the ''Select Agency'' box below the ''Currently Under Review'' heading, (4) select ''Federal Communications Commission'' from the list of agencies presented in the ''Select Agency'' box, (5) click the ''Submit'' button to the right of the ''Select Agency'' box, (6) when the list of FCC ICRs currently under review appears, look for the Title of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION: The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

OMB Control Number: 3060–XXXX.

Title: Class A Television Stations—Low Power Protection Act.

Type of Review: New collection.

Respondents: Business or other for-profit entities, not-for-profit institutions, and state, local or tribal governments.

Number of Respondents and Responses: 50 respondents and 250 responses.

Estimated Time per Response: 1 hour.

Frequency of Response: One-time reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection 47 U.S.C. 151, 152, 154(i), 154(j), 303, 307, 309, 311, 336(f), and the Low Power Protection Act, Public Law 117–344, 136 Stat. 6193 (2023).

Total Annual Burden: 250 hours.

Total Annual Cost: No cost.

Needs and Uses: The Commission will use the information collected under this information collection to determine whether applicants can convert to Class A status pursuant to the Low Power Protection Act.

On December 11, 2023, the Commission adopted a Report and Order, FCC 23–112, to implement the Low Power Protection Act (LPPA or Act), which was enacted on January 5, 2023. The LPPA provides certain low power television (LPTV) stations with a limited window of opportunity to apply for primary spectrum use status as Class A television stations. The Report and Order establishes the period during which eligible stations may file applications for Class A status, eligibility and interference requirements, and the process for submitting applications.

The Report and Order adopts new rules 47 CFR 73.6030(c) and (d) which contain information collections. Section 73.6030(c) provides that applications for conversion to Class A status must be submitted using FCC Form 2100, Schedule F within one year beginning on the date on which the Commission issues notice that the rules implementing the Low Power Protection Act take effect. The licensee will be required to submit, as part of its application, a statement concerning the station's operating schedule during the 90 days preceding January 5, 2023 and a list of locally produced programs aired during that time period. The applicant may also submit other documentation, or may be requested by Commission staff to submit other documentation, to support its certification that the licensee meets the eligibility requirements for a Class A license under the Low Power Protection Act. Section 73.6030(d) provides that A Class A television broadcast license will only be issued under the Low Power Protection Act to a low power television licensee that files an application for a Class A Television license (FCC Form 2100, Schedule F), which is granted by the Commission.

Under this new information collection, the Commission will collect the information, disclosures, and certifications required by sections 73.6030(c) and (d) of the Commission's rules from each applicant seeking to convert to Class A status and will use the information, disclosures, and certifications to determine whether an applicant is qualified to convert to a Class A station. Without the information collected, the Commission will not be able to determine if an applicant is qualified to become a Class A station under the LPPA.

OMB Control No.: 3060–0928.

Title: FCC Form 2100, Application for Media Bureau Audio and Video Service Authorization, Schedule F (Formerly FCC 302–CA); 47 CFR 73.6028; Section 73.3700(b)(3); Section 73.3700(h)(2) and Section 73.3572(h).

Form No.: FCC Form 2100, Schedule F.

Type of Review: Revision of a currently approved information collection.

Respondents: Business or other for-profit entities; Not for profit institutions; State, local or Tribal Government.

Number of Respondents and Responses: 115 respondents and 165 responses.

Estimated Time per Response: 2 hours.

Frequency of Response: On occasion reporting requirement and One time reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority is contained in Statutory authority for the collection of information associated with the LPPA is contained in Sections 1, 2, 4(i), 4(j), 303, 307, 309, 311, and 336(f) of the Communications Act of 1934, as amended, 47 U.S.C. 151, 152, 154(i), 154(j), 303, 307, 309, 311, 336(f) of the Communications Act of 1934, as amended, and the Low Power Protection Act, Public Law 117–344, 136 Stat. 6193 (2023).

Statutory authority for the collection of information associated with the CBPA is contained in Sections 154(i), 307, 308, 309, and 319 of the Communications Act of 1934, as amended, the Community Broadcasters Protection Act of 1999, and the Middle Class Tax Relief and Job Creation Act of 2012.

Total Annual Burden: 460 hours.

Annual Cost Burden: $41,725.

Needs and Uses: The FCC Form 2100, Schedule F is used by Low Power TV (LPTV) stations that seek to convert to Class A status; existing Class A stations seeking a license to cover their authorized construction permit facilities; and Class A stations entering into a channel sharing agreement. The FCC Form 2100, Schedule F requires a series of certifications by the Class A applicant as prescribed by the Community Broadcasters Protection Act of 1999 (CBPA). Licensees will be required to provide weekly announcements to their listeners: (1) informing them that the applicant has applied for a Class A license and (2) announcing the public's opportunity to comment on the application prior to Commission action.

On December 11, 2023, the Commission adopted a Report and Order, FCC 23–112, to implement the Low Power Protection Act (LPPA or Act), which was enacted on January 5, 2023. The LPPA provides certain low power television (LPTV) stations with a limited window of opportunity to apply for primary spectrum use status as Class A television stations. The Report and Order establishes the period during which eligible stations may file applications for Class A status, eligibility and interference requirements, and the process for submitting applications. The Report and Order provides that applications to convert to Class A status under the Low Power Protection Act must be filed using FCC Form 2100, Schedule F. The application form requires certifications by the applicant as prescribed by the LPPA. This submission is being made to OMB for approval of the modified FCC Form 2100, Schedule F. In addition, LPTV stations that file an application to convert to Class A status must provide local public notice of the filing of the application pursuant to 47 CFR 73.3580(c). Specifically, the station must both broadcast on-air announcements and give online notice. This submission also reflects the burden associated with that information collection and is also being made to request Office of Management and Budget (OMB) approval of that collection.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Healthcare Research and Quality

Supplemental Evidence and Data Request on Fiber Intake and Laxation Outcomes

AGENCY: Agency for Healthcare Research and Quality (AHRQ), HHS.

ACTION: Request for supplemental evidence and data submission.

SUMMARY: The Agency for Healthcare Research and Quality (AHRQ) is seeking scientific information submissions from the public. Scientific information is being solicited to inform our review on *Fiber Intake and Laxation Outcomes,* which is currently being conducted by the AHRQ's Evidence-based Practice Centers (EPC) Program. Access to published and unpublished pertinent scientific information will improve the quality of this review.

DATES: *Submission Deadline* on or before April 29, 2024.

ADDRESSES:

Email submissions: epc@ahrq.hhs.gov.

Print submissions:

Mailing Address: Center for Evidence and Practice Improvement, Agency for Healthcare Research and Quality, ATTN: EPC SEADs Coordinator, 5600 Fishers Lane, Mail Stop 06E53A, Rockville, MD 20857

Shipping Address (FedEx, UPS, etc.): Center for Evidence and Practice Improvement, Agency for Healthcare Research and Quality, ATTN: EPC SEADs Coordinator, 5600 Fishers Lane, Mail Stop 06E77D, Rockville, MD 20857

FOR FURTHER INFORMATION CONTACT: Kelly Carper, Telephone: 301–427–1656 or Email: *epc@ahrq.hhs.gov.*

SUPPLEMENTARY INFORMATION: The Agency for Healthcare Research and Quality has commissioned the Evidence-based Practice Centers (EPC) Program to complete a review of the evidence for *Fiber Intake and Laxation Outcomes.* AHRQ is conducting this review pursuant to Section 902 of the Public Health Service Act, 42 U.S.C. 299a.

The EPC Program is dedicated to identifying as many studies as possible that are relevant to the questions for each of its reviews. In order to do so, we are supplementing the usual manual and electronic database searches of the literature by requesting information from the public (*e.g.,* details of studies conducted). We are looking for studies that report on *Fiber Intake and Laxation Outcomes.* The entire research protocol is available online at: *https://effectivehealthcare.ahrq.gov/products/fiber-intake/protocol.*

This is to notify the public that the EPC Program would find the following information on *Fiber Intake and Laxation Outcomes* helpful:

- A list of completed studies that your organization has sponsored for this topic. In the list, please *indicate whether results are available on ClinicalTrials.gov along with the ClinicalTrials.gov trial number.*
- *For completed studies that do not have results on ClinicalTrials.gov,* a summary, including the following elements, if relevant: study number, study period, design, methodology, indication and diagnosis, proper use instructions, inclusion and exclusion criteria, primary and secondary outcomes, baseline characteristics, number of patients screened/eligible/enrolled/lost to follow-up/withdrawn/analyzed, effectiveness/efficacy, and safety results.
- *A list of ongoing studies that your organization has sponsored for this topic.* In the list, please provide the *ClinicalTrials.gov* trial number or, if the trial is not registered, the protocol for the study including, if relevant, a study number, the study period, design, methodology, indication and diagnosis, proper use instructions, inclusion and exclusion criteria, and primary and secondary outcomes.
- Description of whether the above studies constitute *ALL Phase II and above clinical trials* sponsored by your organization for this topic and an index outlining the relevant information in each submitted file.

Your contribution is very beneficial to the Program. Materials submitted must be publicly available or able to be made public. Materials that are considered confidential; marketing materials; study types not included in the review; or information on topics not included in the review cannot be used by the EPC Program. This is a voluntary request for information, and all costs for complying with this request must be borne by the submitter.

The draft of this review will be posted on AHRQ's EPC Program website and available for public comment for a period of 4 weeks. If you would like to be notified when the draft is posted,

please sign up for the email list at: *https://effectivehealthcare.ahrq.gov/email-updates.*

The review will answer the following questions. This information is provided as background. AHRQ is not requesting that the public provide answers to these questions.

Key Question (KQ)

KQ 1: What is the association between fiber intake and laxation/gut motility in apparently healthy individuals?

KQ 1a: How does the association vary among people in different life stages?

PICOTS (Populations, Interventions, Comparators, Outcomes, Timing, and Setting)

STUDY ELIGIBILITY CRITERIA BASED ON POPULATION, INTERVENTION, COMPARATOR, OUTCOME (PICO), AND OTHER ELEMENTS

Element	Inclusion criteria	Exclusion criteria
Population	• Individuals of any age, including pregnant or lactating women. • General population, including individuals with overweight/obese and those at elevated cardiometabolic disease risk. ○ Overweight/obese. ○ Hyperglycemia and related conditions, including type 2 diabetes. ○ Dyslipidemia. ○ Hypertension/high blood pressure.	• Those with diseases/health-related conditions or taking medications that could impact gut motility/laxation (*e.g.,* irritable bowel syndrome; chronic constipation; lactose intolerance; use of medications that stimulate laxation or cause constipation). • Those with chronic constipation (100% of study population), including functional constipation. • Study eligibility criteria includes "abnormal laxation" as defined by either a minimum or maximum number of defecations per week (or equivalent). • Those with other gastrointestinal-related conditions, symptoms, diagnoses; ○ Including diverticulosis. • Those with diseases/health-related conditions or taking medications that could alter the gut microbiota composition/diversity (*e.g.,* antibiotics). • Those with cancer, gastrointestinal disease, undernutrition, or who have had gut resection or bariatric surgery. • Those with acute illness or injury. • Pre-term babies (gestational age <37 weeks), babies with low birth weight (<2,500 g) or small for gestational age (per study criteria). • Enteral/tube fed. • Animal, *in vitro,* or other non-human studies.
Interventions	• Fiber intake, including different types and sources of fiber. • Fiber naturally occurring in food, enriched in food, dietary supplements, and diets that can be defined on the basis of fiber content. ○ Must specify quantity of fiber intake.	• Diets (or other interventions or exposures) where the fiber intake has not been quantified or explicitly specified. • Combinations of fiber (from food or dietary supplements) and other entities with a purported effect on motility, digestion, or microbiota (*e.g.,* psyllium + probiotic). • Combinations of fiber supplements and other entities (*e.g.,* minerals, vitamins).
Comparators	• Different levels (dosages) of fiber. • No added fiber or placebo. • Different types or sources of fiber. • Different formulations of fiber.	• Other entities with a purported effect on motility, digestion, or microbiota (*e.g.,* probiotic). • Alternative food group diets (*e.g.,* red meat, fish, high protein).
Interventions vs. Comparators.	• Fiber (supplement) vs. no fiber (supplement). • Higher fiber (diet) vs. lower fiber (diet). • Fiber vs. alternative fiber. • Fiber vs. alternative fiber dose. • Fiber vs. alternative fiber formulation.	• Fiber + probiotic (etc.) vs. no intervention or placebo. • Fiber + probiotic (etc.) vs. same probiotic (etc.). • Fiber vs. probiotic (etc.). • High-fiber diet vs. red meat diet (etc.).
Outcomes	• Laxation (*i.e.,* gut motility). ○ Fecal frequency (*e.g.,* number of defecations per week). ○ Gastrointestinal transit time. ▪ Bristol stool scale (stool consistency). ▪ Dye, marker studies. ○ Fecal output, weight/bulk (g/day). ○ Ease of defecation (*e.g.,* constipation).	• Other disease or health outcomes. • Flatulence, eructation, bloating, etc.
Subgroups of interest	• Specific life stages: ○ Infants. ○ Children and adolescents. ○ Adults (19–64). ○ Older adults (≥65). ○ Pregnant or postpartum. ○ Sex (male, female).	None.
Design	• Randomized controlled trials. ○ Parallel or cross-over. • N ≥10/group.	• Observational studies. • All other study designs.

STUDY ELIGIBILITY CRITERIA BASED ON POPULATION, INTERVENTION, COMPARATOR, OUTCOME (PICO), AND OTHER ELEMENTS—Continued

Element	Inclusion criteria	Exclusion criteria
Timing	• Minimum duration of intervention: 2 weeks. • In cross-over studies, any change in outcome measure must exclude data from the first week after end of any prior treatments. This may be accomplished by a washout period of at least 1 week.	None.
Setting	• General population.	• Hospital or other acute care settings.
Publication	• English language. • Published in peer-reviewed journals.	• Non-English language text. • Conference abstracts and other non-peer-reviewed data.

Dated: March 18, 2024.

Marquita Cullom,

Associate Director.

BILLING CODE 4160–90–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifiers: CMS–R–38 and CMS–10400]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by May 28, 2024.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to *http://www.regulations.gov.* Follow the instructions for ''Comment or Submission'' or ''More Search Options'' to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number: ____, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, please access the CMS PRA website by copying and pasting the following web address into your web browser: *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.*

FOR FURTHER INFORMATION CONTACT: William N. Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS–R–38 Conditions for Certification for Rural Health Clinics and Conditions for Coverage for Federally Qualified Health Centers in 42 CFR 491

CMS–10400 Establishment of Qualified Health Plans and American Health Benefit Exchanges

Under the PRA (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collection

1. *Type of Information Collection Request:* Reinstatement of a previously approved collection; *Title of Information Collection:* Conditions for Certification for Rural Health Clinics and Conditions for Coverage for Federally Qualified Health Centers in 42 CFR 491; *Use:* The Conditions for Medicare Certification (CfCs) for Rural Health Clinics (RHCs) are based on criteria prescribed in law and designed to ensure that each RHC has properly trained staff to provide appropriate care and to assure a safe physical environment for patients. The information collection requirements described herein are needed to implement the Medicare and Medicaid CfCs for a total of 5,349 RHCs. These requirements are similar in intent to standards developed by industry organizations such as the Joint Commission on Accreditation of Hospitals, and the National League of Nursing/American Public Association, and merely reflect accepted standards of management and care to which rural health clinics must adhere.

Federally Qualified Health Centers (FQHCs) are also subject to Conditions for Certification to participate in the Medicare and Medicaid programs. These health and safety standards are the foundation for improving quality and protecting the health and safety of Medicare and Medicaid beneficiaries. The information collection requirements described herein affect approximately 11,252 FQHCs. The current information collection requirements at 42 CFR 491.9(b) and 491.11 are applicable to both RHCs and FQHCs. *Form Number:* CMS–R–38 (OMB control number: 0938–0334); *Frequency:* Recordkeeping and Reporting—Annually; *Affected Public:* Business or other for-profits; *Number of Respondents:* 17,663; *Total Annual Responses:* 17,663; *Total Annual Hours:* 104,245. (For policy questions regarding this collection contact Claudia Molinar at 410–786–8445.)

2. *Type of Information Collection Request:* Revision of a currently approved collection; *Title of Information Collection:* Establishment of Qualified Health Plans and American Health Benefit Exchanges; *Use:* On March 23, 2010, the Patient Protection and Affordable Care Act (PPACA; Pub. L. 111–148) was signed into law, and on March 30, 2010, the Health Care and Education Reconciliation Act of 2010 (Pub. L. 111–152) was signed into law. The two laws implement various health insurance policies. Section 1303 of the PPACA, as implemented in 45 CFR 156.280, specifies standards for issuers of qualified health plans (QHPs) through the Exchanges that cover abortion services for which public funding is prohibited (also referred to as non-Hyde abortion services or non-excepted abortion services). In the Patient Protection and Affordable Care Act; Establishment of Exchanges and Qualified Health Plans; Exchange Standards for Employers (2012 Exchange Establishment Rule) (77 FR 18310), we codified the statutory provisions of section 1303 of the PPACA in regulation at 45 CFR 156.280. Under 45 CFR 156.280(e)(5)(ii), each QHP issuer that offers coverage of abortion services for which public funding is prohibited must submit to the State Insurance Commissioner a segregation plan describing how the QHP issuer establishes and maintains separate allocation accounts for any QHP covering abortion services for which public funding is prohibited, and pursuant to § 156.280(e)(5)(iii), each QHP issuer must annually attest to compliance with PPACA section 1303 and applicable regulations. This segregation plan is used to verify that the QHP issuer's financial and other systems fully conform to the segregation requirements required by the PPACA.

The Centers for Medicare and Medicaid Services (CMS) is renewing this information collection request (ICR) in connection with the segregation plan requirement under 45 CFR 156.280(e)(5)(ii). The burden estimates for this collection of information renewal reflect the time and effort for QHP issuers to submit a segregation plan that demonstrates how the QHP issuer segregates QHP funds in accordance with applicable provisions of generally accepted accounting requirements, circulars on funds management of the Office of Management and Budget (OMB) and guidance on accounting of the Government Accountability Office. CMS is also renewing the ICR in connection with the annual attestation requirement under 45 CFR 156.280(e)(5)(iii). The burden estimate for this ICR reflects the time and effort associated with QHP issuers submitting an annual attestation to the State Insurance Commissioner attesting to compliance with section 1303 of the PPACA. *Form Number:* CMS–10400 (OMB control number: 0938–1156); *Frequency:* Annually); *Affected Public:* Private Sector (business or other for-profits, not-for-profits institutions); *Number of Respondents:* 1,617; *Number of Responses:* 1,617; *Total Annual Hours:* 5,508.75. (For questions regarding this collection, contact Agata Pelka at 667–290–9979).

William N. Parham, III,

Director, Division of Information Collections and Regulatory Impacts, Office of Strategic Operations and Regulatory Affairs.

[FR Doc. 2024–06645 Filed 3–27–24; 8:45 am]

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier: CMS–10593]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments on the collection(s) of information must be received by the OMB desk officer by April 29, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain*. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, please access the CMS PRA website by copying and pasting the following web address into your web browser: *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.*

FOR FURTHER INFORMATION CONTACT: William Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or

reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Establishment of an Exchange by a State and Qualified Health Plans; *Use:* Section 1311(d) of the Affordable Care Act requires an Exchange to be a governmental agency or nonprofit entity established by a State; requires an Exchange make Qualified Health Plans (QHPs) available to eligible individuals and employers; and identifies the minimum functions an Exchange must perform. CMS and other federal partners will use the data collected from states operating SBEs to determine Exchange compliance with federal standards for operating the Exchange. The data that health insurance issuers, Exchanges, and other entities that Exchanges contract within performing Exchange functions collect will help to inform CMS, Exchanges, and health insurance issuers on the participation of individuals, employers, and employees in the individual Exchange and SHOP. *Form Number:* CMS–10593 (OMB control number: 0938–1312); *Frequency:* Annually; *Affected Public:* Private Sector, Business or other for-profits and Not-for-profits institutions; *Number of Respondents:* 20; *Total Annual Responses:* 20; *Total Annual Hours:* 55,026. (For policy questions regarding this collection contact Tiffany Y. Animashaun at *Tiffany.Animashaun@cms.hhs.gov*).

William N. Parham, III,

Director, Division of Information Collections and Regulatory Impacts, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Submission for OMB Review; Runaway and Homeless Youth—Homeless Management Information System (RHY–HMIS; Office of Management and Budget# 0970–0573)

AGENCY: Family and Youth Services Bureau, Administration for Children and Families, Department of Health and Human Services.

ACTION: Request for public comments.

SUMMARY: The Family and Youth Services Bureau's Runaway and Homeless Youth (RHY) Program is requesting a 3-year extension of the Runaway and Homeless Youth—Homeless Management Information System (RHY–HMIS) data collection efforts (OMB #0970–0573, expiration 07/31/2024). There are no changes requested to the data elements.

DATES: *Comments due within 30 days of publication.* OMB must decide about the collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. You can also obtain copies of the proposed collection of information by emailing *infocollection@acf.hhs.gov.* Identify all emailed requests by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description: The RHY Program has a requirement to collect information from all youth who receive shelter and supportive services with RHY funding. In April 2015, the Administration on Children, Youth and Families, through a formal Memorandum of Understanding, integrated the RHY data collection with the U.S. Department of Housing and Urban Development's (HUD) HMIS and HUD's data standards along with other federal partners. HUD has OMB approval for HUD's data standards and ACF has approval under a separate OMB number for the RHY data elements. The data collection effort includes universal data elements that are collected by all federal partners and RHY program specific elements, which are tailored to the RHY Program using HUD's HMIS.

Respondents: Youth who receive emergency and longer-term shelter and supportive services under RHY funding.

ANNUAL BURDEN ESTIMATES

Instrument	Total number of respondents	Total number of responses per respondent	Average burden hours per response	Total burden hours	Annual burden hours
RHY–HMIS: Basic Center Program (Intake)	123,000	1	0.38	46,740	15,580
RHY–HMIS: Basic Center Program (Exit)	123,000	1	0.33	40,590	13,530
RHY–HMIS: Transitional Living Program (including Maternity Group Home program and TLP Demonstration Programs; Intake)	24,000	1	0.38	9,120	3,040
RHY–HMIS: Transitional Living Program (including Maternity Group Home program and TLP Demonstration Programs; Exit)	24,000	1	0.33	7,920	2,640
RHY–HMIS: Street Outreach Program (Contact)	108,000	1	0.5	54,000	18,000
RHY–HMIS: Street Outreach Program (Engagement)	30,000	1	0.28	8,400	2,800
RHY Funded Grantees (data entry)	308,225	2	0.36	221,922	73,974
RHY Funded Grantees (data submission)—FY24	675	2	0.16	216	72
RHY Funded Grantees (data submission)—FY25 & FY26	675	8	0.16	864	288
Estimated Total Annual Burden Hours					129,924

Authority: Reconnecting Homeless Youth Act of 2008 (Pub. L. 110–378) through Fiscal Year (FY) 2013 and reauthorized by the Juvenile Justice Reform Act through FY 2019.

Mary C. Jones,

ACF/OPRE Certifying Officer.

BILLING CODE 4184–04–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute on Drug Abuse; Notice of Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of a meeting of the National Advisory Council on Drug Abuse.

This will be a hybrid meeting held in-person and virtually and will be open to the public, as indicated below, with attendance limited to space available. Individuals who plan to attend in-person or view the virtual meeting and need special assistance such as sign language interpretation or other reasonable accommodations, should notify Dr. Jeanette Marketon via email at *jeanette.marketon@nih.gov* five days in advance of the meeting. The open session of the meeting can be accessed from the NIH Videocast at the following link: *https://videocast.nih.gov/*.

A portion of the meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Advisory Council on Drug Abuse.

Date: May 7, 2024.

Closed: 10:30 a.m. to 11:45 a.m.

Agenda: To review and evaluate grant applications.

Open: 12:45 p.m. to 5:00 p.m.

Agenda: Presentations and other business of the Council.

Place: Neuroscience Center, Conference Room 1155/1145, National Institutes of Health, 6001 Executive Boulevard, Rockville, MD 20852 (Hybrid Meeting).

Contact Person: Susan R.B. Weiss, Ph.D., Director, Division of Extramural Research, Office of the Director, National Institute on Drug Abuse, NIH, Three White Flint North, RM 09D08, 11601 Landsdown Street, Bethesda, MD 20852, 301–443–6480, *sweiss@nida.nih.gov*.

Contact Person: Jeanette Marketon, Ph.D., PMP Director, Office of Extramural Policy. Division of Extramural Research, Office of Extramural Policy, National Institute on Drug Abuse, NIH, Three White Flint North, RM 09C71, 11601 Landsdown Street, Bethesda, MD 20852, 301–443–5239, *jeanette.marketon@nih.gov*.

Any interested person may file written comments with the committee by forwarding the statement to Dr. Jeanette Marketon via email at *jeanette.marketon@nih.gov*. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

In the interest of security, NIH has procedures at *https://www.nih.gov/about-nih/visitor-information/campus-access-security* for entrance into on-campus and off-campus facilities. All visitor vehicles, including taxicabs, hotel, and airport shuttles will be inspected before being allowed on campus. Visitors attending a meeting on campus or at an off-campus federal facility will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of their visit.

Information is also available on the Institute's/Center's home page: *www.drugabuse.gov/NACDA/NACDAHome.html,* where an agenda and any additional information for the meeting will be posted when available.

BILLING CODE 4140–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Cancer Institute; Notice of Closed Meetings

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Cancer Institute Special Emphasis Panel; NCI SPORE (P50) Review SEP–II.

Date: May 15–16, 2024.

Time: 9:30 a.m. to 5:30 p.m.

Agenda: To review and evaluate grant applications.

Place: National Cancer Institute Shady Grove, 9609 Medical Center Drive, Room 7W248, Rockville, Maryland 20850 (Telephone Conference Call).

Contact Person: Anita T. Tandle, Ph.D., Scientific Review Officer, Research Programs Review Branch, Division of Extramural Activities, National Cancer Institute, NIH, 9609 Medical Center Drive, Room 7W248, Rockville, Maryland 20850, 240–276–5085, *tandlea@mail.nih.gov*.

Name of Committee: National Cancer Institute Special Emphasis Panel; SEP–10: NCI Clinical and Translational Cancer Research.

Date: May 15, 2024.

Time: 10:00 a.m. to 3:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Cancer Institute Shady Grove, 9609 Medical Center Drive, Room 7W104, Rockville, Maryland 20850 (Virtual Meeting).

Contact Person: David G. Ransom, Ph.D., Chief, Scientific Review Officer, Special Review Branch, Division of Extramural Activities, National Cancer Institute, NIH, 9609 Medical Center Drive, Room 7W104, Rockville, Maryland 20850, 240–276–6351, *david.ransom@nih.gov*.

Name of Committee: National Cancer Institute Special Emphasis Panel; Comprehensive Partnerships to Advance Cancer Health Equity (CPACHE, U54).

Date: May 16, 2024.

Time: 9:00 a.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Cancer Institute Shady Grove, 9609 Medical Center Drive, Room 7W108, Rockville, Maryland 20850 (Virtual Meeting).

Contact Person: Clifford W. Schweinfest, Ph.D., Scientific Review Officer, Special Review Branch, Division of Extramural Activities, National Cancer Institute, NIH, 9609 Medical Center Drive, Room 7W108, Rockville, Maryland 20850, 240–276–6343, *schweinfestcw@mail.nih.gov*.

Name of Committee: National Cancer Institute Special Emphasis Panel; Diet, Lipid Metabolism, and Cancer.

Date: May 16, 2024.

Time: 9:30 a.m. to 2:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Cancer Institute at Shady Grove, 9609 Medical Center Drive, Room 7W248, Rockville, Maryland 20850 (Virtual Meeting).

Contact Person: Shree Ram Singh, Ph.D., Scientific Review Officer, Special Review Branch, Division of Extramural Activities, National Cancer Institute, NIH, 9609 Medical Center Drive, Room 7W248, Rockville, Maryland 20850, 240–672–6175, *singhshr@mail.nih.gov*.

Name of Committee: National Cancer Institute Special Emphasis Panel; SEP–7: NCI Clinical and Translational Cancer Research.

Date: May 17, 2024.

Time: 10:00 a.m. to 5:30 p.m.

Agenda: To review and evaluate grant applications.

Place: National Cancer Institute at Shady Grove, 9609 Medical Center Drive, Room 7W640, Rockville, Maryland 20850 (Virtual Meeting).

Contact Person: Saejeong J. Kim, Ph.D., Scientific Review Officer, Special Review Branch, Division of Extramural Activities, National Cancer Institute, NIH, 9609 Medical Center Drive, Room 7W640, Rockville, Maryland 20850, 240–276–7684, *saejeong.kim@nih.gov*.

Name of Committee: National Cancer Institute Special Emphasis Panel; SEP–1: NCI Clinical and Translational Cancer Research.

Date: May 23, 2024.

Time: 9:30 a.m. to 3:30 p.m.

Agenda: To review and evaluate grant applications.

Place: National Cancer Institute at Shady Grove, 9609 Medical Center Drive, Room 7W248, Rockville, Maryland 20850 (Virtual Meeting).

Contact Person: Shree Ram Singh, Ph.D., Scientific Review Officer, Special Review Branch, Division of Extramural Activities, National Cancer Institute, NIH, 9609 Medical Center Drive, Room 7W248, Rockville, Maryland 20850, 240–672–6175, *singhshr@mail.nih.gov*.

Name of Committee: National Cancer Institute Special Emphasis Panel SEP–3; NCI Clinical and Translational Cancer Research.

Date: June 5, 2024.

Time: 9:30 a.m. to 5:30 p.m.

Agenda: To review and evaluate grant applications.

Place: National Cancer Institute Shady Grove, 9609 Medical Center Drive, Room 7W612, Rockville, Maryland 20850 (Virtual Meeting).

Contact Person: Prashant Sharma, Ph.D., Scientific Review Officer, Special Review Branch, Division of Extramural Activities, National Cancer Institute, NIH, 9609 Medical Center Drive, Room 7W612, Rockville, Maryland 20850, 240–275–6351, *prashant.sharma@nih.gov*.

BILLING CODE 4140–01–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG–2024–0233]

Information Collection Request to Office of Management and Budget; OMB Control Number: 1625–0011

AGENCY: Coast Guard, DHS.

ACTION: Sixty-Day notice requesting comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, the U.S. Coast Guard intends to submit an Information Collection Request (ICR) to the Office of Management and Budget (OMB), Office of Information and Regulatory Affairs (OIRA), requesting an extension of its approval for the following collection of information: 1625–0011, Applications for Private Aids to Navigation and for Class I Private Aids to Navigation on Artificial Islands and Fixed Structures; without change.

Our ICR describes the information we seek to collect from the public. Before submitting this ICR to OIRA, the Coast Guard is inviting comments as described below.

DATES: Comments must reach the Coast Guard on or before May 28, 2024.

ADDRESSES: You may submit comments identified by Coast Guard docket number [USCG–2024–0233] to the Coast Guard using the Federal eRulemaking Portal at *https://www.regulations.gov.* See the ''Public participation and request for comments'' portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments.

A copy of the ICR is available through the docket on the internet at *https://www.regulations.gov.* Additionally, copies are available from: Commandant (CG–6P), Attn: Paperwork Reduction Act Manager, U.S. Coast Guard, 2703 Martin Luther King Jr. Ave. SE, Stop 7710, Washington, DC 20593–7710.

FOR FURTHER INFORMATION CONTACT: A.L. Craig, Office of Privacy Management, telephone 202–475–3528, fax 202–372–8405, or email *hqs-dg-m-cg-61-pii@uscg.mil* for questions on these documents.

SUPPLEMENTARY INFORMATION:

Public Participation and Request for Comments

This notice relies on the authority of the Paperwork Reduction Act of 1995; 44 U.S.C. 3501 *et seq.,* chapter 35, as amended. An ICR is an application to OIRA seeking the approval, extension, or renewal of a Coast Guard collection of information (Collection). The ICR contains information describing the Collection's purpose, the Collection's likely burden on the affected public, an explanation of the necessity of the Collection, and other important information describing the Collection. There is one ICR for each Collection.

The Coast Guard invites comments on whether this ICR should be granted based on the Collection being necessary for the proper performance of Departmental functions. In particular, the Coast Guard would appreciate comments addressing: (1) the practical utility of the Collection; (2) the accuracy of the estimated burden of the Collection; (3) ways to enhance the quality, utility, and clarity of information subject to the Collection; and (4) ways to minimize the burden of the Collection on respondents, including the use of automated collection techniques or other forms of information technology.

In response to your comments, we may revise this ICR or decide not to seek an extension of approval for the Collection. We will consider all comments and material received during the comment period.

We encourage you to respond to this request by submitting comments and related materials. Comments must contain the OMB Control Number of the ICR and the docket number of this request, USCG–2024–0233, and must be received by May 28, 2024.

Submitting Comments

We encourage you to submit comments through the Federal eRulemaking Portal at *https://www.regulations.gov.* If your material cannot be submitted using *https://www.regulations.gov,* contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions. Documents mentioned in this notice, and all public comments, are in our online docket at *https://www.regulations.gov* and can be viewed by following that website's instructions. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted.

We accept anonymous comments. All comments received will be posted without change to *https://www.regulations.gov* and will include any personal information you have provided. For more about privacy and submissions in response to this document, see DHS's eRulemaking System of Records notice (85 FR 14226, March 11, 2020).

Information Collection Request

Title: Applications for Private Aids to Navigation and for Class I Private Aids to Navigation on Artificial Islands and Fixed Structures.

OMB Control Number: 1625–0011.

Summary: Under the provision of 14 U.S.C. 81, the Coast Guard is authorized to establish aids to navigation. 14 U.S.C. 83 prohibits establishment of aids to navigation without permission of the Coast Guard. 33 CFR 66.01–5 provides a means for private individuals to establish privately maintained aids to navigation. Under 43 U.S.C. 1333(d), the Secretary of Homeland Security has the authority to promulgate and enforce regulations concerning lights and other warning devices relating to the promotion of safety of life and property on artificial islands, installations, and other devices on the outer continental shelf involved in the exploration, development, removal, or transportation of resources there from. The Secretary delegated this authority to the Commandant of the Coast Guard under Department of Homeland Security Delegation No. 00170.1, Revision No. 01.3. Coast Guard's regulations in 33 CFR part 67 prescribe the type of aids to navigation that must be installed on artificial islands and fixed structures. Under the provision of 33 U.S.C. 409, Congress requires owners of vessels to immediately mark sunken craft unless Coast Guard issues a waiver. The Coast Guard's regulations for marking of sunken vessels are set out in 33 CFR part 64.11. The information collected for private aids to navigations and markings can only be obtained from the owners of sunken vessels. The information collection requirements related to these aids to navigation applications are contained in 33 CFR 66.01–5 and 67.35–5.

Need: The information in these private aids to navigation applications (CG–2554 and CG–4143) provides the Coast Guard with vital information about private aids to navigation and is essential for safe marine navigation. These forms are required under 33 CFR parts 66 and 67. The information is reviewed to ensure the private aid is in compliance with current regulations. Additionally, these forms provide the Coast Guard with information which can be distributed to the public to advise of new, or changes to private aids to navigation. In addition, collecting the applicant's contact information is important because it allows the Coast Guard to contact the applicant should there be a discrepancy or mishap involving the permitted private aid to navigation. Certain discrepancies create hazards to navigation and must be responded to and promptly corrected or repaired.

Forms:

• CG–2554, Private Aids to Navigation Application.

• CG–4143, Application for Class I Private Aids to Navigation on Artificial Islands and Fixed Structures.

Respondents: Owners of private aids to navigation.

Frequency: On occasion.

Hour Burden Estimate: The estimated annual burden has decreased from 2,000 hours to 1,709 hours due to a decrease in the number of respondents a year.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended.

Dated: March 22, 2024.

Kathleen Claffie,

Chief, Office of Privacy Management, U.S. Coast Guard.

Title: National Response Resource Inventory.

OMB Control Number: 1625–0102.

Summary: The information is needed to improve the effectiveness of deploying response equipment in the event of an oil spill. It may also be used in the development of contingency plans.

Need: Section 4202 of the Oil Pollution Act of 1990 (Pub. L. 101–380) requires the Coast Guard to compile and maintain a comprehensive list of spill removal equipment in a response resource inventory (RRI). This collection helps fulfill that requirement.

Forms: None.

Respondents: Oil spill removal organizations.

Frequency: On occasion.

Hour Burden Estimate: The estimated burden has increased from 1,378 hours to 1,964 hours a year, primarily due to the addition of the new optional Non-Floating Oils/Dispersants application.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended.

Dated: March 22, 2024.

Kathleen Claffie,

Chief, Office of Privacy Management, U.S. Coast Guard.

[FR Doc. 2024–06543 Filed 3–27–24; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID: FEMA–2023–0031; OMB No. 1660–NW157]

Agency Information Collection Activities: Submission for OMB Review, Comment Request; Generic Clearance for FEMA's Major Disaster, Emergency Response, Emergency Recovery, and Hazard Mitigation Programs

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: 30-Day notice of new collection and request for comments.

SUMMARY: The Federal Emergency Management Agency (FEMA) will submit the information collection abstracted below to the Office of Management and Budget for review and clearance in accordance with the requirements of the Paperwork Reduction Act of 1995. The submission seeks comments concerning a new generic information collection allowing FEMA to individually update instruments needed to provide financial, non-financial, program management, and technical assistance for FEMA's major disaster, emergency response, emergency recovery, and hazard mitigation activities.

DATES: Comments must be submitted on or before April 29, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection should be made to Director, Information Management Division, 500 C Street SW, Washington, DC 20472, email address: *FEMA-Information-Collections-Management@fema.dhs.gov* or Jennie Orenstein, Branch Chief, FEMA's Federal Insurance and Mitigation Administration's Policy, Tools and Training Branch, at *jennie.gallardy@fema.dhs.gov* or (202) 212–4071.

SUPPLEMENTARY INFORMATION: The Robert T. Stafford Disaster Relief and Emergency Assistance Act (Pub. L. 93–288, as amended), 42 U.S.C. 5121–5207

(Stafford Act) provides broad authority to FEMA for disaster and emergency relief operations, reducing risk to people and property from hazards, and related activities and operations. The Stafford Act authorizes FEMA to provide financial and technical assistance to assist state, local, territorial, and Tribal (SLTT) governments and certain private non-profit (PNP) entities with the response to and recovery from Presidentially declared major disasters and emergencies, and the implementation of hazard mitigation measures and related activities that reduce or eliminate long-term risk to people and property from hazards and their effects.

The National Flood Insurance Act of 1968 (''NFIA''), as amended, and the Flood Disaster Protection Act of 1973, as amended (42 U.S.C. 4001, *et seq.*) authorize FEMA's National Flood Insurance Program (NFIP), including a wide range of related activities. For instance, the NFIA authorizes FEMA to provide financial assistance for planning and carrying out projects and activities designed to reduce the risk of flood damage to NFIP-insured structures.

FEMA routinely receives additional guidance from Congress, through new legislation, and the President through Executive Orders (E.O.). Congressional and E.O. mandates often require significant adjustments to previously approved information collections to provide timely assistance to survivors and are often required within weeks. FEMA is proposing moving instruments from currently approved information collections into this new generic information collection to provide the necessary flexibility to update individual existing instruments and create new instruments as new guidance from Congress and the President is received, deliver timely assistance to survivors (both before and after a disaster), and maintain compliance with the Paperwork Reduction Act.

This proposed information collection previously published in the **Federal Register** on December 11, 2023, at 88 FR 85898 with a 60-day public comment period. No comments were received. The purpose of this notice is to notify the public that FEMA will submit the information collection abstracted below to the Office of Management and Budget for review and clearance.

Collection of Information

Title: Generic Clearance for FEMA's Major Disaster, Emergency Response, Emergency Recovery, and Hazard Mitigation Programs.

Type of Information Collection: New information collection.

OMB Number: 1660–NW157.

FEMA Forms: Not Applicable.

Abstract: The Stafford Act authorizes FEMA to provide financial, non-financial, program management and technical assistance to state, local, territorial, and Tribal (SLTT) governments and certain private non-profit (PNP) entities with the response to and recovery from Presidentially declared major disasters and emergencies, and the implementation of hazard mitigation measures and related activities that reduce or eliminate long-term risk to people and property from hazards and their effects. The information collected is required for FEMA's Hazard Mitigation Assistance (HMA) programs, the Revolving Loan Fund capitalization program, and the Public Assistance (PA) Program, for ongoing program implementation and optimization.

Affected Public: State, Local, or Tribal Governments; Private, Non-Profits.

Estimated Number of Respondents: 671,356.

Estimated Number of Responses: 671,356.

Estimated Total Annual Burden Hours: 633,775.

Estimated Total Annual Respondent Cost: $39,908,812.

Estimated Respondents' Operation and Maintenance Costs: $0.

Estimated Respondents' Capital and Start-Up Costs: $0.

Estimated Total Annual Cost to the Federal Government: $21,641,036.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the Agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Millicent Brown Wilson,

Records Management Branch Chief, Office of the Chief Administrative Officer, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID: FEMA–2023–0033; OMB No. 1660–NW171]

Agency Information Collection Activities: Submission for OMB Review, Comment Request; Generic Clearance for FEMA's Collection of Feedback on Customer Satisfaction and Disaster Recovery

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: 30-Day notice of new collection and request for comments.

SUMMARY: The Federal Emergency Management Agency (FEMA) will submit the information collection abstracted below to the Office of Management and Budget for review and clearance in accordance with the requirements of the Paperwork Reduction Act of 1995. FEMA invites the general public to take this opportunity to comment on a new information collection. In accordance with the requirements of the Paperwork Reduction Act of 1995, this notice seeks comments concerning a generic clearance to collect feedback from applicants on service delivery and their subsequent disaster recovery.

DATES: Comments must be submitted on or before April 29, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection should be made to Director, Information Management Division, 500 C Street SW, Washington, DC 20472, email address *FEMA-Information-Collections-*

Management@fema.dhs.gov or Kristin Brooks, Statistician, FEMA's Recovery Reporting and Analytics Division, Customer Survey and Analysis Section, at (202) 826–6291 or *Kristin.Brooks@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: Executive Order 12862, ''Setting Customer Service Standards,'' requires that all Federal Agencies implement customer service standards and provide service to the public that matches or exceeds the best service available in the private sector. To accomplish this, Federal Agencies are required to survey customers to determine the kind and quality of services they want and their level of satisfaction with existing services.

The Government Performance and Results Act (GPRA) of 2010 also requires quarterly performance assessments of Government programs for purposes of assessing agency performance and improvement. One of the primary goals of GPRA is to improve Federal program effectiveness and public accountability by promoting a focus on results, service quality, and customer satisfaction.

The Foundations for Evidence-Based Policymaking Act of 2018 (''Evidence Act'') supports that data collection and analysis are important inputs to be used as evidence for prioritizing agency efforts to support civic engagement, delivering on mission, service, and stewardship objectives, and supporting decision-making.

FEMA seeks Office of Management and Budget (OMB) approval for a generic clearance to collect feedback from applicants on service delivery and their subsequent disaster recovery. The Agency has numerous touchpoints with applicants through several specialized customer-facing programs. The feedback collected from applicants may be quantitative or qualitative in nature depending on the population of interest, specific research questions, and the types of required analysis.

This proposed information collection previously published in the **Federal Register** on December 11, 2023, at 88 FR 85896 with a 60-day public comment period. FEMA received one public comment stating that the creation of this generic collection was counterintuitive to the purpose of the Paperwork Reduction Act of 1995. Executive Order 12862, ''Setting Customer Service Standards,'' requires that all Federal Agencies implement customer service standards and provide service to the public that matches or exceeds the best service available in the private sector. To accomplish this, Federal Agencies are required to survey customers to determine the kind and quality of services they want and their level of satisfaction with existing services. The GPRA also requires quarterly performance assessments of Government programs for purposes of assessing agency performance and improvement.

FEMA currently administers several customer satisfaction surveys to meet government standards. The goal of this submission is to consolidate customer satisfaction surveys under one clearance to streamline the approval process—not to add surveys or increase burden. A generic clearance will allow FEMA to be more flexible in revising surveys when questions become outdated or irrelevant, which will ultimately minimize burden on the end-user. Survey participation is completely voluntary.

The purpose of this notice is to notify the public that FEMA will submit the information collection abstracted below to the Office of Management and Budget for review and clearance.

Collection of Information

Title: Generic Clearance for FEMA's Collection of Feedback on Customer Satisfaction and Disaster Recovery.

Type of Information Collection: New information collection.

OMB Number: 1660–NW171.

FEMA Forms: Not Applicable.

Abstract: Federal Agencies are required to survey their customers to determine the kind and quality of services they want and their level of satisfaction with those services. In order for the Agency to maintain customer service standards, there must be continuous assessment of service delivery throughout all phases of the customer journey. The Agency will collect, analyze, and interpret information gathered from this generic clearance to identify strengths and weaknesses with program delivery.

Affected Public: Individuals and Households; State, Local or Tribal Governments.

Estimated Number of Respondents: 389,770.

Estimated Number of Responses: 389,770.

Estimated Total Annual Burden Hours: 69,135.

Estimated Total Annual Respondent Cost: $3,015,890.

Estimated Respondents' Operation and Maintenance Costs: $0.

Estimated Respondents' Capital and Start-Up Costs: $0.

Estimated Total Annual Cost to the Federal Government: $2,886,676.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the Agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Millicent Brown Wilson,

Records Management Branch Chief, Office of the Chief Administrative Officer, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

[FR Doc. 2024–06623 Filed 3–27–24; 8:45 am]

BILLING CODE 9111–24–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID: FEMA–2023–0032; OMB No. 1660–NW170]

Agency Information Collection Activities: Submission for OMB Review, Comment Request; Generic Clearance for FEMA's Standardized Grants Performance Reporting

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: 30-Day notice of new collection and request for comments.

SUMMARY: The Federal Emergency Management Agency (FEMA) will submit the information collection abstracted below to the Office of Management and Budget for review and clearance in accordance with the requirements of the Paperwork Reduction Act of 1995. FEMA invites the general public to take this opportunity to comment on a new information collection. In accordance with the requirements of the Paperwork Reduction Act of 1995, this notice seeks comments concerning FEMA's grants performance reporting.

DATES: Comments must be submitted on or before April 29, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection should be made to Director, Information Management Division, 500 C Street SW, Washington, DC 20472, email address *FEMA-Information-Collections-Management@fema.dhs.gov* or Cassandra Henry, Ph.D., CGMS, Monitoring and Compliance Branch, Risk Management Division, Grant Programs Directorate, FEMA, at 202–257–2308 or *Cassandra.Henry@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: In accordance with the Code of Federal Regulations (see 2 CFR 200.301 and 200.329), Federal awarding agencies must measure each recipient's performance to show achievement of program goals and objectives, share lessons learned, improve program outcomes, and foster adoption of promising practices. The Foundations for Evidence-Based Policy-Making Act of 2018 (Pub. L. 115–435) (''Evidence Act'') established processes for the Federal Government to modernize and increase impacts of reporting activities. To achieve these aims, the Federal Emergency Management Agency (FEMA) is changing its programmatic reporting to facilitate better and more consistent data collection. FEMA's Grant Programs Directorate (GPD) Risk Management Division (RMD) developed standard performance reporting instruments under this new generic collection for use across FEMA's grant programs. These instruments will replace the current quarterly performance reporting that does not have a standard format.

Grant performance reporting is a Federal requirement; standardized instruments under this generic collection will serve as the minimum performance reporting requirement for all programs. FEMA grants will collect both performance and project effectiveness measures via the required instruments under this new generic collection. Each FEMA grant program will collect only relevant, useful data. FEMA will utilize a standard framework under this generic collection but will not require each program to create the same end-product. Programs will tailor grant performance reporting instruments based on the grant's specific objectives, activities, indicators, targets, and reporting measures most appropriate for each program's funding objectives. Instruments under this generic collection are not intended to replace all existing information collection instruments that are programmatic or statutorily specific (*i.e.,* existing grant specific reporting).

This proposed information collection previously published in the **Federal Register** on December 11, 2023, at 88 FR 85897 with a 60-day public comment period. No comments were received. The purpose of this notice is to notify the public that FEMA will submit the information collection abstracted below to the Office of Management and Budget for review and clearance.

Collection of Information

Title: Generic Clearance for FEMA's Standardized Grants Performance Reporting.

Type of Information Collection: New information collection.

OMB Number: 1660–NW170.

FEMA Forms: Not Applicable.

Abstract: Performance reporting is required for recipients of Federal Emergency Management Agency (FEMA) grants. However, the scope and detail of previous performance reporting varied across different FEMA grant programs. FEMA is changing its programmatic reporting to facilitate better data collection. The instruments under this generic collection will satisfy the minimum performance reporting requirement for all programs while introducing a common performance reporting framework. Individual grant programs will use this framework as a starting point and then develop tailored program-specific instruments based on the program's objectives, activities, indicators, and targets. Each FEMA grant program will collect only relevant, useful data. Performance data is used by FEMA to track recipient progress, monitor project execution, evaluate program outcomes, and respond to requests from Congress.

Affected Public: State, Local, and Tribal Governments; Private Sector.

Estimated Number of Respondents: 6,200.

Estimated Number of Responses: 24,800.

Estimated Total Annual Burden Hours: 744,000.

Estimated Total Annual Respondent Cost: $41,753,280.

Estimated Respondents' Operation and Maintenance Costs: $0.

Estimated Respondents' Capital and Start-Up Costs: $0.

Estimated Total Annual Cost to the Federal Government: $10,163,120.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the Agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Millicent Brown Wilson,

Records Management Branch Chief, Office of the Chief Administrative Officer, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID: FEMA–2023–0034; OMB No. 1660–NW172]

Agency Information Collection Activities: Submission for OMB Review, Comment Request; Generic Clearance for FEMA's Preparedness Grant Programs

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: 30-Day notice of new collection and request for comments.

SUMMARY: The Federal Emergency Management Agency (FEMA) will submit the information collection abstracted below to the Office of Management and Budget for review and clearance in accordance with the requirements of the Paperwork Reduction Act of 1995. FEMA invites the general public to take this opportunity to comment on a new information collection. In accordance

with the requirements of the Paperwork Reduction Act of 1995, this notice seeks comments concerning a new generic collection to oversee FEMA's Office of Grants Administration programmatic and financial stewardship of non-disaster grant awards.

DATES: Comments must be submitted on or before April 29, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain*. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection should be made to Director, Information Management Division, 500 C Street SW, Washington, DC 20472, email address *FEMA-Information-Collections-Management@fema.dhs.gov* or Amy Bulgrien, Senior Advisor, FEMA, Office of Grants Administration at *amy.bulgrien@fema.dhs.gov* and 202–880–7522.

SUPPLEMENTARY INFORMATION: FEMA's Office of Grants Administration (OGA) was created to oversee the programmatic management, financial management and administration of non-disaster grants. These programs help make the country more resilient and support the Nation's needs before, during, and after disasters. Non-disaster grants also help develop and sustain capabilities at the state, local, Tribal, and territorial levels to mitigate, prevent, protect against, respond to, and recover from terrorism or other high-consequence disasters and emergencies. The instruments in this collection are required to apply for FEMA funds and the data collected through these instruments is used by FEMA to evaluate grant applications, assess applicant risk, monitor awards for compliance, and comply with Federal laws and regulations. OGA manages and ensures accountability of FEMA preparedness grant programs under sections 430, 503(b)(2)(G), 504(a)(12), 2021–2023, and 2220–A of the Homeland Security Act of 2002. OGA programmatically manages and financially administers certain non-disaster and preparedness grants and conducts environmental planning and historic preservation activities for these grants, including homeland security and preparedness grants (with statutory authority for certain waivers) pursuant to titles V, XVIII, and XX of the Homeland Security Act of 2002; section 503(b)(2)(B), (G), and (H) of the Homeland Security Act of 2002 (6 U.S.C. 313(b)(2)(B), (G), and (H)); section 1809 of the Homeland Security Act of 2002 (6 U.S.C. 579); titles XIV and XV of the Implementing Recommendations of the 9/11 Commission Act of 2007; 46 U.S.C. 70107; sections 635 and 662 of the Post-Katrina Emergency Management Reform Act of 2006 (6 U.S.C. 723 and 762); title VI of the Stafford Act, as amended; Reorganization Plan No. 3 of 1978, 5 U.S.C. App.; sections 33 and 34 of the Federal Fire Prevention and Control Act of 1974, as amended (15 U.S.C. 2229, 2229a); section 3006 of the Deficit Reduction Act of 2005, as amended; section 204 of the REAL ID Act of 2005; the Coronavirus Aid, Relief, and Economic Security Act, Div. B (Pub. L. 116–136); and grant programs authorized in annual appropriations acts or future preparedness grant program authorities.

FEMA's OGA is submitting this request for a generic collection to streamline integration of stakeholder feedback on instruments. This collection will ensure all Office of Management and Budget (OMB) control number expiration dates are aligned across the OGA portfolio.

This proposed information collection previously published in the **Federal Register** on December 12, 2023, at 88 FR 86141 with a 60-day public comment period. No comments were received. The purpose of this notice is to notify the public that FEMA will submit the information collection abstracted below to the Office of Management and Budget for review and clearance.

Collection of Information

Title: Generic Clearance for FEMA's Preparedness Grant Programs.

Type of Information Collection: New Collection.

OMB Number: 1660–NW172.

FEMA Forms: Not Applicable.

Abstract: FEMA's Office of Grants Administration was created to oversee the programmatic management, financial management, and administration of non-disaster grants. Non-disaster grant programs help make the country more resilient and support the nation's needs before, during, and after disasters. Non-disaster grants help develop and sustain capabilities at the state and local, tribal, and territorial levels to mitigate, prevent, protect against, respond to, and recover from terrorism or other high-consequence disasters and emergencies. Instruments in this collection are required to apply for FEMA funds; data collected via the instruments is used by FEMA to evaluate grant applications, assess applicant risk, monitor awards for compliance, and comply with Federal laws and regulations.

Affected Public: State, Local or Tribal Government; Businesses or other For-profits; Not-for Profit institutions.

Estimated Number of Respondents: 35,552.

Estimated Number of Responses: 55,244.

Estimated Total Annual Burden Hours: 1,737,291.

Estimated Total Annual Respondent Cost: $100,067,963.

Estimated Respondents' Operation and Maintenance Costs: $0.

Estimated Respondents' Capital and Start-Up Costs: $0.

Estimated Total Annual Cost to the Federal Government: $3,173,288.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the Agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Records Management Branch Chief, Office of the Chief Administrative Officer, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

[FR Doc. 2024–06624 Filed 3–27–24; 8:45 am]

BILLING CODE 9111–78–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID: FEMA–2024–0008; OMB No. 1660–0023]

Agency Information Collection Activities: Proposed Collection; Comment Request; Community Assistance Contact (CAC) Reports, Community Assistance Visit (CAV) Reports, and National Flood Insurance Program (NFIP) Compliance Audit Reports

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: 60-Day notice of revision and request for comments.

SUMMARY: The Federal Emergency Management Agency (FEMA), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public to take this opportunity to comment on a revision of a currently approved information collection. In accordance with the Paperwork Reduction Act of 1995, this notice seeks comments concerning the effectiveness of a community's implementation of the National Flood Insurance Program's Community Assistance Contact (CAC) and Community Assistance Visits (CAV) Reports. FEMA is moving away from CAV and CAC reports to the newly designed process of NFIP Compliance Audits in response to a report issued on May 5, 2020, by the Government Accounting Office (GAO) entitled ''National Flood Insurance Program: FEMA Can Improve Community Oversight and Data Sharing.'' This report gave several recommendations including the following: assess different approaches for ensuring compliance with NFIP requirements and ensure data on community visits are up-to-date and complete. While the new NFIP Compliance Audit process aligns with the old CAV and CAC processes, it is more organized, more consistent, more transparent, allows for better documentation, and more efficiently focuses resources to where they are needed most.

DATES: Comments must be submitted on or before May 28, 2024.

ADDRESSES: To avoid duplicate submissions to the docket, please submit comments at *www.regulations.gov* under Docket ID FEMA–2024–0008. Follow the instructions for submitting comments.

All submissions received must include the agency name and Docket ID. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to read the Privacy and Security Notice that is available via a link on the homepage of *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Sarah Owen, Program Specialist, Floodplain Management Division, Mitigation Directorate, Federal Insurance and Mitigation Administration, FEMA at *Sarah.Owen@fema.dhs.gov* or (510) 409–4818. You may contact the Information Management Division for copies of the proposed collection of information at email address: *FEMA-Information-Collections-Management@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP) codified at 42 U.S.C. 4001, *et seq.* is authorized by Public Law 90–448 (1968) and expanded by Public Law 93–234 (1973). The Department of Homeland Security, Federal Emergency Management Agency (FEMA) administers the NFIP. The NFIP's major objective is to assure that participating communities are achieving the flood loss reduction objectives through adoption and enforcement of adequate land use and control measures. Sections 1315 and 1361 provide the basis for FEMA's process to evaluate how well communities are implementing their floodplain management programs. Title 44 CFR 59.22 directs the respondent to submit evidence of the corrective and preventive measures taken to meet the flood loss reduction objectives.

The two key methods FEMA uses in determining community assistance needs are through the Community Assistance Contact (CAC) and Community Assistance Visit (CAV), which serve to provide a systematic means of monitoring community NFIP compliance. Through the CAC and CAV, FEMA can also determine to what extent communities are achieving the flood loss reduction objectives of the NFIP. By providing assistance to communities, the CAC and CAV also serve to enhance FEMA's goals of reducing future flood losses, thereby achieving the NFIP's cost-containment objective. The burden hours and costs associated with this collection were re-evaluated which led to the main revision in this extension request.

FEMA is moving away from CAV and CAC reports to the newly designed process of NFIP Compliance Audits is in response to a report issued on May 5, 2020, by the Government Accounting Office (GAO) entitled ''National Flood Insurance Program: FEMA Can Improve Community Oversight and Data Sharing.'' This report gave several recommendations including the following: assess different approaches for ensuring compliance with NFIP requirements and ensure data on community visits are up-to-date and complete. While the new NFIP Compliance Audit process aligns with the old CAV and CAC processes, it is more organized, more consistent, more transparent, and allows for better documentation. The main efficiency gained in the new process is that it is a progressive audit which allows for varying depths of investigation based on the community's needs. Another efficiency is a compliance score. These two improvements will allow FEMA to better utilize limited resources to increase community compliance.

FEMA is also adding the collection of information from NFIP-participating communities in order to comply with the Endangered Species Act. The information may include the impact of the proposed development on the natural floodplain functions, the amount of fill, compensatory storage information, the amount of impervious surface, the area in which clearing/grading may occur, the number of trees removed, and other information related to hydraulic connections.

Collection of Information

Title: Community Assistance Contact (CAC) Reports, Community Assistance Visit (CAV) Reports, and National Flood Insurance Program (NFIP) Compliance Audit Reports.

Type of Information Collection: Revision of a currently approved information collection.

OMB Number: 1660–0023.

FEMA Forms: FEMA Form FF–206–FY–21–141 (formerly 086–0–28(E)), Community Assistance Visit (CAV) Report; FEMA Form FF–206–FY–21–142 (formerly 086–0–29(E)), Community Assistance Contact (CAC) Report; and FEMA Form FF–206–FY–24–100, NFIP Compliance Audit Report.

Abstract: FEMA previously used the Community Assistance Contact (CAC) and the Community Assistance Visit (CAV) to make a comprehensive assessment of a community's floodplain management program. Through this assessment, FEMA assisted the community to understand the NFIP's requirements and implement effective

flood loss reductions measures. Communities can achieve cost savings through flood mitigation actions by way of insurance premium discounts and reduced property damage. The CAV and CAC processes have been updated recently to the NFIP Compliance Audit process which aims to do a more efficient, consistent and transparent job of assessing the community's floodplain management program, providing them with the needed technical assistance to improve it, and documenting the results for data analysis.

Affected Public: State, Local or Tribal Governments.

Estimated Number of Respondents: 102.

Estimated Number of Responses: 4,002.

Estimated Total Annual Burden Hours: 48,002.

Estimated Total Annual Respondent Cost: $2,071,766.

Estimated Respondents' Operation and Maintenance Costs: $0.

Estimated Respondents' Capital and Start-Up Costs: $0.

Estimated Total Annual Cost to the Federal Government: $2,216,556.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the Agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

DEPARTMENT OF HOMELAND SECURITY

[Docket No. DHS–2024–0009]

Reestablishment of the Homeland Security Science and Technology Advisory Committee

AGENCY: Science and Technology Directorate, Department of Homeland Security.

ACTION: Committee Management; Notice of Federal advisory committee charter reestablishment.

SUMMARY: The Secretary of Homeland Security has determined that the reestablishment of the Homeland Security Science and Technology Advisory Committee (HSSTAC) is necessary and in the public interest to support the Department of Homeland Security (DHS) Science and Technology Directorate (S&T) in the performance of its duties. This determination follows consultation with the Committee Management Secretariat, General Services Administration.

FOR FURTHER INFORMATION CONTACT: Stanley Cunningham, HSSTAC Designated Federal Official, S&T Department of Homeland Security, *hsstac@hq.dhs.gov,* 202–254–2311.

SUPPLEMENTARY INFORMATION:

Committee Designation: Homeland Security Science and Technology Advisory Committee (HSSTAC).

Purpose and Objective: The charter of the HSSTAC is being reestablished in accordance with the provisions of the Federal Advisory Committee Act (FACA), Title 5 United States Code, Chapter 10. Once approved, a copy of the reestablished charter will be posted in the FACA database here. The HSSTAC is established pursuant to the authority of Title 6 United States Code, Section 451 and provides independent, consensus scientific and technical advice and recommendations to the Under Secretary for Science and Technology, who leads the Department of Homeland Security (DHS) Science and Technology Directorate (S&T). S&T's activities focus on strengthening America's security and resiliency by providing knowledge products and innovative technology solutions for the Homeland Security Enterprise. The HSSTAC supports the priority needs of DHS S&T's Chief Scientist, Director of Strategy and Policy, as well as the functional offices conducting the Directorate's Research, Development, Test and Evaluation (RDT&E) mission. Upon request by the Secretary of Homeland Security, the committee provides scientific and technical advice to the Homeland Security Advisory Council.

Duration: The committee's reestablished charter is effective starting on the date filed with Congress for a duration of two years. The previous charter was effective starting November 23, 2021, and expired November 23, 2023.

Responsible DHS Officials: Adam Cox, HSSTAC Executive Director, and Stanley Cunningham, HSSTAC Designated Federal Official, S&T Department of Homeland Security, *hsstac@hq.dhs.gov.*

Dated: March 22, 2024.

Michael J. Miron,

Committee Management Officer.

30-Day Notice of Proposed Information Collection: Form 50900: Elements for the Annual Moving to Work Plan and Annual Moving to Work Report, OMB Control No.: 2577–0216

AGENCY: Office of Policy Development and Research, Chief Data Officer, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 30 days of public comment.

DATES: *Comments Due Date:* April 29, 2024.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Interested persons are also invited to submit comments regarding this proposal and comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Colette Pollard, Clearance Officer, REE, Department of Housing and Urban Development, 451

7th Street SW, Room 8210, Washington, DC 20410; email *PaperworkReductionActOffice@hud.gov.*

FOR FURTHER INFORMATION CONTACT: Colette Pollard, Reports Management Officer, REE, Department of Housing and Urban Development, 7th Street SW, Room 8210, Washington, DC 20410; email Colette Pollard at *Colette.Pollard@hud.gov* or telephone 202–402–3400. This is not a toll-free number. HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit *https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs*.

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

The **Federal Register** notice that solicited public comment on the information collection for a period of 60 days was published on December 14, 2023 at 87 FR 17099.

A. Overview of Information Collection

Title of Information Collection: Elements for the Annual MTW Plan and Annual MTW Report.

OMB Approval Number: 2577–0216.

Type of Request: Revision of a currently approved collection.

Form Number: 50900.

Description of the need for the information and proposed use: All public housing authorities (PHA) are required to submit a five (5) year plan and annual plans as stated in Section 5A of the 1937 Act, as amended. Moving to Work (MTW) PHAs that are subject to the Standard MTW Agreement submit an Annual MTW Plan and Annual MTW Report (also known as the HUD Form 50900) in lieu of the standard annual and 5 year PHA plans.

The Standard MTW Agreement was developed in 2007 and was transmitted to the existing MTW agencies in January 2008. As additional MTW PHAs were selected they too were provided with the Standard MTW Agreement. 39 MTW PHAs (known as the ''Initial'' MTW PHAs) currently operate under this agreement. In 2016, HUD extended the term of the Standard Agreement to the end of each agency's 2028 Fiscal Year (FY).

The HUD Form 50900 is a required element as part of the Standard MTW Agreement and contains important information regarding the MTW PHA's upcoming FY activities and a retrospective look back at the MTW PHA's preceding FY. HUD collects the information in this form in order to evaluate the impacts of MTW activities, accurately and timely respond to congressional and other inquiries regarding outcome measures, and identify promising practices learned through the MTW demonstration.

Revisions are being made to the HUD Form 50900 to reduce the reporting and administrative burden on MTW PHAs. All standard metrics within the HUD Form 50900 that were previously required for MTW activities will be eliminated, though they will remain optional for MTW PHAs to report. In addition to eliminating previously required standard metrics, MTW PHAs will now have the option to share an annual narrative, self-reported PHA data, and participant success stories. In lieu of the agency-reported standard metrics, HUD will pull data already reported by the agencies through required HUD systems. This will reduce burden on the agencies.

Updates have been made to specify if MTW PHAs are seeking to apply MTW Activities to any of its Special Purpose Voucher (SPV) types. This will reduce burden on MTW PHAs, by streamlining and replacing the current SPV MTW waiver separate approval process for Emergency Housing Vouchers (EHVs), HUD-Veterans Affairs Supportive Housing (HUD–VASH) vouchers and Stability Vouchers (SVs). Also, SPVs are included in an MTW PHA's planned leasing forecast for the upcoming Fiscal Year in order to provide a more comprehensive estimate of planned households served within the MTW PHA's portfolio. Based on public comments received, other changes include aligning planned new public housing bedroom size categories with HUD systems, and an optional narrative to report on unique households served through local, non-traditional rental services programs such as short-term rental assistance, rapid rehousing, emergency housing, etc., and a description section to indicate whether waiting list are site-based or agency-wide for public housing.

Through the Annual MTW Plan and Report, each MTW PHA will continue to inform HUD, its residents and the public of the PHA's mission for serving the needs of low-income and very low-income families, and the PHA's strategy for addressing those needs. The Annual MTW Plan, like the Annual PHA Plan, provides an easily identifiable source by which residents, participants in tenant-based programs, and other members of the public may locate policies, rules, and requirements concerning the PHA's operations, programs, and services.

The appropriations act in 2016 authorized an additional 100 MTW slots and additional slots may be added through future appropriations acts. Eligible applicants interested in obtaining MTW designation are required to submit applications to HUD, as explained in the applicable HUD Notice. The information collection covers the information needed from applicants to determine which applicants should be selected. The information provided demonstrates the applicants' plans to implement a local MTW program and includes related applicant history. The application includes such information as narrative exhibits, certifications, data forms, and supporting documentation. The information will be used by HUD staff to evaluate threshold requirements and review applications.

Respondents (i.e., affected public): The respondents to this PRA are the 39 Public Housing Authorities (PHAs) that had MTW designation as of December 15, 2015 and potential applicants that may be submitting applications to participate in the program.

Estimated Number of Respondents: The estimated number of respondents is 39.

Estimated Number of Responses: There are 78 submissions per year, reflecting the 39 PHAs. Each submission is comprised of 7 sections each requiring a response. All 7 sections are completed with the first annual submission (Plan), and 5 of the 7 sections are completed with the second annual submission (Report). This results in a total of 2 submissions per PHA, across all 39 affected PHAs or 78 total responses, that include 468 sections.

Frequency of Response: MTW PHAs complete requirements associated with this Form twice per year (Plan and Report). In the Plan, the PHA completes each of the 7 sections of the Form. In the Report, the PHA completes only 5 of the 7 sections of the Form.

Average Hours per Response: The estimated average burden is 33 hours per response (or 66 total hours per year).

Total Estimated Burdens: The total estimated burdens are 66, given each PHA completes the form twice per year (Plan and Report).

	Respondents	Annual responses/ respondent	Total responses per year	Burden per year per respondent	Total burden hours	Cost burden

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including annual reporting based on the activities performance as related to the MTW program statutory objectives and through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

(5) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. chapter 35.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7090–N–03]

60-Day Notice of Proposed Information Collection: Relocation Options Study, OMB Control No.: 2528–NEW

AGENCY: Office of Policy Development and Research, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: *Comments Due Date:* May 28, 2024.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Written comments and recommendations for the proposed information collection can be submitted within 60 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting, "Currently under 60-day Review—Open for Public Comments" or by using the search function. Interested persons are also invited to submit comments regarding this proposal by name and/or OMB Control Number and can be sent to: Anna Guido, Reports Management Officer, REE, Department of Housing and Urban Development, 451 7th Street SW, Room 8210, Washington, DC 20410–5000 or email at *PaperworkReductionActOffice@hud.gov.*

FOR FURTHER INFORMATION CONTACT: Anna Guido, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email *Anna.P.Guido@hud.gov;* telephone (202) 402–5535 (this is not a toll-free number). HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit *https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs.*

Copies of available documents submitted to OMB may be obtained from Ms. Guido.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Relocation Options Study.

OMB Approval Number: 2528–NEW.

Type of Request: New data collection.

Form Number: N/A.

Description of the need for the information and proposed use: The Office of Policy Development and Research (PD&R), at the U.S. Department of Housing and Urban Development (HUD), is proposing the collection of information for the Relocation Options study.

Increasing threats of natural hazards due to climate change may necessitate the movement of households or entire communities to mitigate risk to people and properties. This research will conduct analysis of the efficacy of buyouts, relocation, and resettlement in mitigating hazard risk exposure; assess the potential adverse outcomes, inequities, and opportunity of such programs; and determine the needed capacity and coordination of Federal, state, and local levels to enable successful buyout, relocation, and resettlement initiatives. The goal of this research is to improve equity in how disaster recovery and mitigation funds are used for households that participate

in buyout programs in communities that have received Community Development Block Grant-Disaster Recovery (CDBG–DR) grants or Community Development Block Grant Mitigation (CDBG–MIT) grants. Results from this research shall be interpretable to inform a framework for a pilot program and evaluation structure to inform the ongoing federal approach to hazard-related relocation. Currently, a ''buyout'' for CDBG–DR and CDBG–MIT grants means the acquisition of a property located in a floodway, floodplain, or other grantee-designated high-risk area, that is intended to reduce risk from future hazards.

This **Federal Register** Notice provides an opportunity to comment on the information collection for this study titled Relocation Options. The information collection is designed to support the Relocation Options study to better understand outcomes of households and communities that have participated in homeowner buyout programs using CDBG–DR or CDBG–MIT funds. This work will include a qualitative component and generate principles for equitable and responsible buyouts, relocation, and resettlement strategies. The study includes interviews of CDBG–DR grantees and program administrators, other relevant community stakeholders, and homeowners that have gone through a CDBG–DR or CDBG–MIT funded buyout process.

Respondents: CDBG–DR grantee representatives and administrators; other relevant community stakeholders, and homeowners living in CDBG–DR grantee jurisdictions.

Estimated Number of Respondents: Information may be collected from approximately a total of 27 key informants. This includes: (1) 27 qualitative interviews with grantees, CDBG–DR or CDBG–MIT program administrators, other relevant stakeholders, and homeowners that participated in a CDBG–DR or CDBG–MIT buyout program.

Estimated Time per Response: Interviews are expected to take one hour each. The total estimated time is 27 hours.

Frequency of Response: One time for each interview.

Estimated Total Annual Cost: $4,058.20 for all individual document/information solicited for related research activities covered under approval for researchers conducting primary interview data collection and research participants.

The Table below provides the estimated burden hours for interviews. These estimates assume the maximum targeted number of study participants and are calculated as the time needed to complete individual surveys and interviews or to participate in focus groups. The table breaks out time to complete informed consent and time participating in the study by key informant group (Government Stakeholders, Community Stakeholders, and Program Participants).

Calculating the annual total cost burden to respondents, the project team utilized Occupational Employment Statistics from the U.S. Department of Labor's Bureau of Labor Statistics to identify the median hourly wages (as classified by Standard Occupational Classification, SOC, codes) for October 2023 for interview participants.

ANNUAL BURDEN TABLE

Information collection	Number of respondents	Frequency of response	Responses per annum	Burden hour per response	Annual burden hours	Hourly cost per response	Annual cost
Interviews with government stakeholders	27	1	1	1	27	$59.90	$1,617.30
Interviews with community stakeholders	27	1	1	1	27	43.93	1,186.11
Interviews with program participants	15	1	1	1	15	43.93	658.95
Interview Total	69				69		3,462.36
Informed consent to participate in the study—Government Stakeholders	27	1	1	0.17	4.59	59.90	112.02
Informed consent to participate in the study—Community Stakeholders	27	1	1	0.17	4.59	49.93	229.18
Informed consent to participate in the study—Program Participants	15	1	1	0.17	2.55	49.93	127.32
Informed Consent Total	69				11.73		595.84
Grand Total	69				80.73		4,058.20

Respondent's Obligation: Participation is voluntary.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected, and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comments in response to these questions.

C. Authority

BILLING CODE 4210–67–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–6380–N–02]

Tribal Intergovernmental Advisory Committee (TIAC) Spring Meeting

AGENCY: Office of Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Notice.

SUMMARY: This notice announces the next meeting of HUD's TIAC.

DATES: The meeting will be held on Wednesday, May 15, 2024, and Thursday, May 16, 2024. On each day, the session will begin at approximately 9:00 a.m. (ET) and adjourn at approximately 5:00 p.m. (ET).

ADDRESSES: The meeting will take place at the HUD Headquarters Building, 451 7th Street SW, Washington, DC 20410.

FOR FURTHER INFORMATION CONTACT: Heidi Frechette, Deputy Assistant Secretary for Native American Programs, Office of Public and Indian Housing, Department of Housing and Urban Development, 451 Seventh Street SW, Room 4108, Washington, DC 20410, telephone number 202–401–7914 (this is not a toll-free number). HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or communication disabilities. To learn more about how to make an accessible call, please visit *https://www.fcc.gov/consumers/guides/telecomunicationsrelay-service-trs.*

SUPPLEMENTARY INFORMATION:

I. Background

On March 31, 2022, HUD published a notice (87 FR 18807) in the **Federal Register** that announced the final structure of the TIAC and requested the submission of Tribal nominations to the TIAC. On November 29, 2022, HUD published a notice (87 FR 73317) announcing the TIAC membership. Thus, to strengthen HUD's engagement with Tribal Nations, HUD established its first Tribal advisory committee. The first in-person TIAC meeting was held on Wednesday, April 12, 2023, and Thursday, April 13, 2023, in Washington, DC. On September 27, 2023, and September 28, 2023, the second in-person meeting of the TIAC was held in Tucson, Arizona.

II. Upcoming Committee Meeting

The next in-person meeting of the TIAC will be Wednesday, May 15, 2024, and Thursday, May 16, 2024. On each day, the session will begin at approximately 9:00 a.m. (ET) and adjourn at approximately 5:00 p.m. (ET). The meeting will take place at the HUD Headquarters Building, 451 7th Street SW, Washington, DC 20410. The Committee will operate under the Tribal government statutory exemption to the Federal Advisory Committee Act (FACA) found in the Unfunded Mandates Reform Act (UMRA) at 2 U.S.C. 1534(b). Accordingly, participation in the meeting is limited to TIAC members. Members of the public may not formally participate in the meeting or make statements during the meeting.

III. Future Committee Meetings

Decisions with respect to future meetings will be made at the first meeting and from time to time thereafter. Notices of all future meetings will be published in the **Federal Register**. HUD will make every effort to publish such notices at least 30 calendar days prior to each meeting.

Richard Monocchio,

Principal Deputy Assistant Secretary for Public and Indian Housing.

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS–R8–ES–2024–0020; FXES11140800000]

Endangered and Threatened Species; Receipt of an Incidental Take Permit Application and Proposed Habitat Conservation Plan; City of Colton, San Bernardino County, CA; Categorical Exclusion

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), have received an application for an incidental take permit to take the federally listed Santa Ana sucker under the Endangered Species Act (ESA). We request public comment on the application, which includes the applicant's proposed habitat conservation plan (HCP), and the Service's preliminary determination that the proposed permitting action may be eligible for a categorical exclusion pursuant to the Council on Environmental Quality's National Environmental Policy Act (NEPA) regulations, the Department of the Interior's (DOI) NEPA regulations, and the DOI Departmental Manual. To make this preliminary determination, we prepared a draft environmental action statement and low-effect screening form, both of which are also available for public review. We invite comment from the public and local, State, Tribal, and Federal agencies.

DATES: We must receive your written comments on or before April 29, 2024.

ADDRESSES:

Obtaining Documents: You may obtain copies of the documents this notice announces, along with public comments received, online in Docket No. FWS–R8–ES–2024–0020 at *https://www.regulations.gov.*

Submitting Comments: If you wish to submit comments, you may do so in writing by one of the following methods:

- *Online: https://www.regulations.gov.* Follow the instructions for submitting comments on Docket No. FWS–R8–ES–2024–0020.
- *U.S. mail:* Public Comments Processing, Attn: Docket No. FWS–R8–ES–2024–0020; U.S. Fish and Wildlife Service, MS: PRB/3W; 5275 Leesburg Pike; Falls Church, VA 22041–3803.

FOR FURTHER INFORMATION CONTACT: Ms. Karin Cleary-Rose, Division Supervisor, Carlsbad Fish and Wildlife Office, 760–322–2070. Individuals in the United States who are deaf, blind, hard of hearing, or have a speech disability may dial 711 (TTY, TTD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service, received an application from the Colton/San Bernardino Regional Tertiary Treatment and Water Reclamation Authority and San Bernardino Municipal Water Department (applicants) for an incidental take permit under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq*). The requested permit would authorize take of the federally threatened Santa Ana sucker (*Catostomus santaanae*) incidental to the ongoing operation of the rapid infiltration and extraction (RIX) facility along approximately 2 miles of the Santa Ana River, in the city of Colton, San Bernardino County, California.

We request public comment on the application, which includes the applicant's proposed habitat conservation plan (HCP), and on the Service's preliminary determination that this proposed ITP qualifies as low effect, and may qualify for a categorical exclusion pursuant to the Council on

Environmental Quality's National Environmental Policy Act (NEPA) regulations (40 CFR 1501.4), the Department of the Interior's (DOI) NEPA regulations (43 CFR 46), and the DOI's Departmental Manual (516 DM 8.5(C)(2)). To make this preliminary determination, we prepared a draft environmental action statement and low-effect screening form, both of which are also available for public review.

Proposed Project

The project area is located along an approximately 2-mile stretch of the Santa Ana River in the City of Colton in San Bernardino County, California. The applicants request a 50-year incidental take permit for temporary impacts to approximately 2 miles of river occupied by Santa Ana sucker. The RIX facility supplies tertiary treated water to this stretch of the river and contributes to the functional quality of Santa Ana sucker habitat in the affected reach of the river. The applicants propose to avoid, minimize, and mitigate the impacts of RIX facility shutdowns on the 2-mile stretch of river by using supplemental groundwater wells that can supply up to 16 cubic feet per second of replacement water, coordinating with partners to monitor fish during shutdowns, and monitoring effects by conducting studies to assess the impact of the facility operations on Santa Ana sucker populations in this stretch of the river.

Our Preliminary Determination

The Service has made a preliminary determination that the project, including continued operation and maintenance of the RIX facility and the proposed mitigation, would individually and cumulatively have a minor effect on the Santa Ana sucker and the human environment. Therefore, we have preliminarily determined that the proposed ESA section 10(a)(1)(B) permit would be a low-effect ITP that individually or cumulatively would have a minor effect on the Santa Ana sucker and may qualify for application of a categorical exclusion pursuant to the Council on Environmental Quality's NEPA regulations, DOI's NEPA regulations, and the DOI Departmental Manual.

A low-effect ITP is one that would result in:

- Minor nonsignificant effects on species covered in the HCP;
- Nonsignificant effects on the human environment; and
- Impacts that, when added together with the impacts of other past, present, and reasonable foreseeable actions, would not result in significant cumulative effects to the human environment.

Next Steps

We will evaluate the proposed application and any comments received to determine whether to issue the requested permit. We will also conduct an intra-Service consultation pursuant to section 7(a)(2) of the ESA to evaluate the effects of the proposed take. After considering the preceding and other matters, we will determine whether the permit issuance criteria of section 10(a)(1)(B) of the ESA have been met. If met, we will issue the permit to the applicants for incidental take of the Santa Ana sucker.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available to the public. While you may request that we withhold your personal identifying information, we cannot guarantee that we will be able to do so.

Authority

The Service provides this notice under section 10(c) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and its implementing regulations (50 CFR 17.32) and the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*) and its implementing regulations (40 CFR 1500–1508 and 43 CFR 46).

Scott Sobiech,

Field Supervisor, Carlsbad Fish and Wildlife Office, Carlsbad, California.

[FR Doc. 2024–06617 Filed 3–27–24; 8:45 am]

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[BLM_CA_FRN_MO4500178030]

Notice of Public Meetings of the California Desert District Advisory Council

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of public meetings.

SUMMARY: In accordance with the Federal Land Policy and Management Act of 1976, and the Federal Advisory Committee Act of 1972, the U.S. Department of the Interior, Bureau of Land Management (BLM) California Desert District Advisory Council (Council) will meet as indicated below.

DATES: The 2024 schedule of meetings for the Council is as follows: April 27, 2024; August 10, 2024; and December 7, 2024. All three meetings will be held from 9 a.m. to 3 p.m. Pacific Time. A virtual participation option will also be available on the Zoom platform. Field tours may be held from 9 a.m. to 3 p.m. the day before each meeting. If weather or other circumstances arise and an on-site meeting is cancelled, the meeting will be held virtually via Zoom and the field tour will not occur.

ADDRESSES: The April meeting will be held at the El Centro Field Office, 1661 S. 4th Street, El Centro, CA 92243; the August meeting will be held at the Needles Field Office, 1303 S. Highway 95, Needles, CA 92363; and the December meeting will be held at the Barstow Field Office, 2601 Barstow Road, Barstow, CA 92311. The agendas for the public meetings, virtual meeting participation information, and field tours details will be posted on the Council's web page at: *https://www.blm.gov/get-involved/rac/california/california-desert-district,* at least 2 weeks in advance of the meetings. Field tour participants must register to attend 7 days in advance.

Members of the public are welcome on field tours but must provide their own transportation and meals.

FOR FURTHER INFORMATION CONTACT: Kate Miyamoto, BLM California Desert District Office, telephone: 760–883–8528, email: *kmiyamoto@blm.gov*.

Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The Council provides recommendations to the Secretary of the Interior concerning the planning and management of public land resources in the BLM's California Desert District and offers advice on implementing the comprehensive, long-range plan for management, use, development, and protection of the public lands within the California Desert Conservation Area. Agenda topics for the April meeting may include presentations on the Salton Sea, off-highway vehicle recreation and visitation in the El Centro Field Office, and overviews from the district and field offices and fire program. Agenda topics for the August meeting may include presentations on the Mojave Trails National Monument planning

effort, the East Mojave Trail and partnership, and overviews from the district and field offices and fire program. Agenda topics for the December meeting may include a vote on the Barstow Business Plan, proposed recreation fees and plans for the Desert Discovery Center, and overviews from the district and field offices and fire program.

All Council meetings are open to the public. There will be an opportunity for public comment during the meeting. Depending on the number of people who wish to speak and the time available, the time for individual comments may be limited. Written comments for the Council may be sent electronically in advance of the scheduled meetings to Public Affairs Officer Kate Miyamoto at *kmiyamoto@blm.gov* or in writing to BLM California Desert District/Public Affairs, 1201 Bird Center Drive, Palm Springs, CA 92262. Written comments will also be accepted at the time of the public meeting.

While each of the meetings are scheduled from 9 a.m. to 3 p.m., meetings could end prior to 3 p.m. should the Council conclude its business. Members of the public interested in a specific agenda item or discussion should schedule their arrival accordingly.

Before including your address, phone number, email address, or other personal identifying information in your comment, be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Meeting Accessibility/Special Accommodations

Please make requests in advance for sign language interpreter services, assistive listening devices, or other reasonable accommodations. Contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice at least 7 business days prior to the meeting to give the Department of the Interior sufficient time to process your request. All reasonable accommodation requests are managed on a case-by-case basis.

(Authority: 43 CFR 1784.4–2)

Michelle Lynch,

California Desert District Manager.

BILLING CODE 4331–15–P

DEPARTMENT OF LABOR

Agency Information Collection Activities; Submission for OMB Review; International Price Program U.S. Import and Export Price Indexes

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Bureau of Labor Statistics (BLS)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that the agency receives on or before April 29, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Nicole Bouchet by telephone at 202–693–0213, or by email at *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: The price data collected by the International Price Program (IPP) is used to produce indexes which measure, on a monthly basis, changes in transaction prices of goods and services exported from or imported into the U.S. This published data is in turn used to deflate import and export trade statistics, deflate the foreign trade component of the GDP, determine monetary and fiscal policy, negotiate trade agreements, and determine trade and commercial policy. The respondents are establishments conducting import/export trade and receive no compensation for their participation. The IPP survey is a voluntary survey. For additional substantive information about this ICR, see the related notice published in the **Federal Register** January 19, 2024 (89 FRN 3695).

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

Agency: DOL–BLS.

Title of Collection: International Price Program U.S. Import and Export Price Indexes.

OMB Control Number: 1220–0025.

Affected Public: Businesses or other for-profits.

Total Estimated Number of Respondents: 3,350.

Total Estimated Number of Responses: 19,510.

Total Estimated Annual Time Burden: 9,650 hours.

Total Estimated Annual Other Costs Burden: $0.

(Authority: 44 U.S.C. 3507(a)(1)(D))

Nicole Bouchet,

Senior Paperwork Reduction Act Analyst.

BILLING CODE 4510–24–P

MORRIS K. UDALL AND STEWART L. UDALL FOUNDATION

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: John S. McCain III National Center for Environmental Conflict Resolution (National Center), Morris K. Udall and Stewart L. Udall Foundation.

ACTION: Notice of request for public comment and submission to OMB of proposed collection of information.

SUMMARY: The Morris K. Udall and Stewart L. Udall Foundation has submitted the information collections described below to the Office of Management and Budget (OMB) for approval. In accordance with the Paperwork Reduction Act of 1995, the agency is requesting comments on these information collections from all interested individuals and

organizations. The purpose of this notice is to allow 30 days for public comment.

DATES: Interested persons are invited to submit comments on or before April 29, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collections should be submitted within 30 days of publication of this notice to *https://www.reginfo.gov/public/do/PRAMain.* Find the information collections by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: For specific questions or to request additional information about these ICRs, contact Mitch Chrismer at *chrismer@udall.gov,* or by telephone at 520–901–8544. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The Morris K. Udall and Stewart L. Udall Foundation's National Center, in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501 *et seq.*), previously provided the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information during a 60-day period in the **Federal Register**, 88 FR 63630, September 15, 2023. No comments were received and therefore no changes were made based on public comment. However, the Udall Foundation decided to consolidate the six initially proposed Information Collection Request (ICR) renewals into two ICRs. Five of the initially proposed ICRs have been consolidated under a single OMB Control Number with multiple Information Collections (ICs) contained within it. The proposed ICRs are necessary to measure, improve, and report on National Center performance and delivery of its services. They are not expected to have a significant economic impact on respondents or to affect a substantial number of small entities. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Environmental Conflict Resolution Services Participant Questionnaires.

OMB Control Number: 3320–0003.

Respondents/Affected Public: Individuals or households; business or other for-profit; not-for-profit; federal government; and state, local or tribal government.

Total Estimated Number of Annual Responses: 765.

Total Estimated Number of Annual Burden Hours: 100.

Abstract: The ICs used for this program are being consolidated under a single ICR. All will be separate ICs under OMB Control Number 3320–0003. These ICs are:

- National Center for Environmental Conflict Resolution Assessment Evaluation—Requester Questionnaire (former OMB Control Number 3320–0003);
- Mediation Services Participant Questionnaire (Agreement Seeking) (former OMB Control Number 3320–0004);
- Facilitated Meeting/Workshop Services Participant Questionnaire (former OMB Control Number 3320–0007);
- ECR Support Services Evaluation—Requester Questionnaire (former OMB Control Number 3320–0009); and
- National Center for Environmental Conflict Resolution Facilitated Process Evaluation—Participant Questionnaire (former OMB Control Number 3320–0010).

These evaluations support the National Center's program evaluation and have the practical utility of supporting achievement of the National Center's goals and continuous improvement of service delivery. These goals are to assist parties in resolving federal environmental disputes in a timely and constructive manner; to increase the appropriate use of Environmental Collaboration and Conflict Resolution (ECCR), particularly within the federal government; to improve the ability of federal agencies and other interested parties to engage in ECCR effectively; and to promote collaborative problem solving and consensus building during the design and implementation of federal environmental policies to help prevent and reduce the incidence of future environmental disputes. These evaluations are a primary means by which the National Center evaluates its performance in these key areas of agency activity.

Title of Collection: Training Services Participant Questionnaire.

OMB Control Number: 3320–0006.

Respondents/Affected Public: Individuals or households; business or other for-profit; not-for-profit; federal government; and state, local or tribal government.

Total Estimated Number of Annual Responses: 600.

Total Estimated Number of Annual Burden Hours: 55.

Abstract: This survey collects information to evaluate trainings conducted by the National Center. Trainings include any session of three hours or more in the following categories: skill-building workshops requested by agencies for their staff (*e.g.,* interest-based negotiation training for complex intergovernmental conflicts); ECCR project-specific capacity building for stakeholders (*e.g.,* stakeholder orientations related to multiparty negotiation); and all of the Udall Foundation certificate program ECCR trainings. This survey is a primary means by which the National Center evaluates its performance on this critical agency activity.

(20 U.S.C. 5601–5609)

Dated: March 25, 2024.

David P. Brown,

Executive Director, Morris K. Udall and Stewart L. Udall Foundation.

BILLING CODE 6820–FN–P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice: 24–023]

Earth Science Advisory Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, as amended, the National Aeronautics and Space Administration (NASA) announces a meeting of the Earth Science Advisory Committee (ESAC). This Committee functions in an advisory capacity to the Director, Earth Science Division, in the NASA Science Mission Directorate. The meeting will be held for the purpose of soliciting, from the scientific community and other persons, scientific and technical information relevant to program planning.

DATES: Tuesday, April 16, 2024, 8:30 a.m.–5 p.m., and Wednesday, April 17, 2024, 8:30 a.m.–3 p.m., eastern time.

ADDRESSES:

For April 16, 2024, Public attendance will be virtual only. See dial-in and Webex information below.

For April 17, 2024, NASA Headquarters, Room 8R40, 300 E Street SW, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: KarShelia Kinard, Science Mission Directorate, NASA Headquarters, Washington, DC 20546, (202) 358–2355 or *karshelia.kinard@nasa.gov.*

SUPPLEMENTARY INFORMATION: The meeting will be open to the public only on April 17, 2024, up to the capacity of the meeting room. This meeting is also available telephonically and by WebEx for both days. You must use a touch-tone phone to participate in this meeting. Any interested person may call the USA toll number +1–415–527–5035 or USA toll (Chicago) number +1–312–500–3163, Access code: 2824 307 9953, for April 16, 2024, to participate in this meeting by telephone. The WebEx link is *https://nasaenterprise.webex.com/nasaenterprise/j.php?MTID=me2e237d43d1df427dafffc99bfbb220e* the meeting number is 2824 307 9953, webinar password: RKmHhJQ77$2 (75644577 from phones and video systems, case sensitive). For April 17, 2024, the USA toll number +1–415–527–5035 or USA toll (Chicago) number +1–312–500–3163, Access code: 2831 207 4547 to participate in this meeting by phone. The WebEx link is *https://nasaenterprise.webex.com/nasaenterprise/j.php?MTID=me556af95d2a2050ffe666ab0261c53f7,* the meeting number is 2831 207 4547, webinar password is cxAbnbt$838 (29226280 from phones and video systems, case sensitive). The agenda for the meeting includes the following topics:

—Earth Science Division Update
—Earth Science to Action (ES2A) Strategy
—Earth Science Division Program Elements Updates
—Earth Science Observatory (ESO) Integration

The agenda will be posted on the ESAC web page: *https://science.nasa.gov/researchers/nac/science-advisory-committees/esac.*

All attendees are required to register in NASA's Enterprise Visitor Access Management System prior to visit. You will be requested to comply with NASA Headquarters security requirements, including the presentation of a valid picture ID to Security before access to NASA Headquarters in addition to Foreign nationals attending this meeting will be required to provide a copy of their passport and visa in addition to providing the following information no less than 10 days prior to the meeting: full name; gender; date/place of birth; citizenship; passport information (number, country, telephone); visa information (number, type, expiration date); employer/affiliation information (name of institution, address, country, telephone); title/position of attendee. To expedite admittance, attendees with U.S. citizens and Permanent Residents (green card holders) may provide full name, citizenship and email address no less than 3 working days in advance by contacting Ms. KarShelia Kinard via email at *karshelia.kinard@nasa.gov*.

It is imperative that the meeting be held on this date to accommodate the scheduling priorities of the key participants.

Carol J. Hamilton,

Acting Advisory Committee Management Officer, National Aeronautics and Space Administration.

NEIGHBORHOOD REINVESTMENT CORPORATION

Sunshine Act Meetings

TIME AND DATE: 2:00 p.m., Thursday, April 4, 2024.

PLACE: 1255 Union Street NE, Suite 500, Washington, DC 20002.

STATUS: Parts of this meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED: Regular Board of Directors meeting.

The General Counsel of the Corporation has certified that in her opinion, one or more of the exemptions set forth in the Government in the Sunshine Act, 5 U.S.C. 552b(c)(2) and (4) permit closure of the following portion(s) of this meeting:

- Executive (Closed) Session

Agenda

I. Call to Order
II. Discussion Item: FY2023 External Audit Discussion with BDO Auditors
III. Sunshine Act Approval of Executive (Closed) Session
IV. Executive Session: BDO Auditors

V. Executive Session: Special Topic
VI. Executive Session: Report from CEO
VII. Executive Session: Report from CFO
VIII. Executive Session: Report from General Counsel
IX. Executive Session: Report from CIO
X. Action Item: Approval of Meeting Minutes—February 15 Regular Board Meeting
XI. Action Item: FY2023 External Audit
XII. Discussion Item: March 26 Audit Committee Report
XIII. Discussion Item: Capital Corporations Update and Grant Request for June
XIV. Discussion Item: Academic Partner for Achieving Excellence Program
XV. Discussion Item: Office Lease Expirations (Kansas City, Denver, and Boston)
XVI. Discussion Item: IT Support Contract—Additional Service Needed
XVII. Management Program Background and Updates
Other Reports
a. 2024 Board Calendar
b. 2024 Board Agenda Planner
c. CFO Report
i. Financials (through 1/31/24)
ii. Single Invoice Approvals $100K and over
iii. Vendor Payments $350K and over
iv. Exceptions
d. Programs Dashboard
e. Housing Stability Counseling Program (HSCP)
f. Strategic Plan Scorecard—FY2024 Q1

PENSION BENEFIT GUARANTY CORPORATION

Submission of Information Collection for OMB Review; Comment Request; Special Financial Assistance Information

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of request for extension of OMB approval of information collection.

SUMMARY: The Pension Benefit Guaranty Corporation (PBGC) is requesting that the Office of Management and Budget (OMB) extend approval under the Paperwork Reduction Act of a collection of information contained in PBGC's regulation on special financial assistance. The purpose of the information collection is to gather information necessary for PBGC to operate this special financial assistance program. This notice informs the public of PBGC's request and solicits public comment on the collection of information.

DATES: Comments must be submitted on or before April 29, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

All comments received will be posted without change to PBGC's website, *http://www.pbgc.gov,* including any personal information provided. Do not submit comments that include any personally identifiable information or confidential business information.

A copy of the request will be posted on PBGC's website at *https://www.pbgc.gov/prac/laws-and-regulation/federal-register-notices-open-for-comment.* It may also be obtained without charge by writing to the Disclosure Division (*disclosure@pbgc.gov*), Office of the General Counsel of PBGC, 445 12th Street SW, Washington, DC 20024–2101; or, calling 202–229–4040 during normal business hours. If you are deaf or hard of hearing or have a speech disability, please dial 7–1–1 to access telecommunications relay services.

FOR FURTHER INFORMATION CONTACT: Karen Levin (*levin.karen@pbgc.gov*), Attorney, Regulatory Affairs, Office of the General Counsel, Pension Benefit Guaranty Corporation, 445 12th Street SW, Washington, DC 20024–2101; 202–229–3559. If you are deaf or hard of hearing or have a speech disability, please dial 7–1–1 to access telecommunications relay services.

SUPPLEMENTARY INFORMATION: Section 4262 of the Employee Retirement Income Security Act of 1974 (ERISA) requires PBGC to provide special financial assistance (SFA) to certain financially troubled multiemployer plans upon application for assistance. Part 4262 of PBGC's regulations, ''Special Financial Assistance by PBGC,'' provides guidance to multiemployer pension plan sponsors on eligibility, determining the amount of SFA, content of an application for SFA, the process of applying, PBGC's review of applications, restrictions and conditions, and reporting and notice requirements.

To apply for SFA, a plan sponsor must file an application with PBGC and include information about the plan, plan documentation, and actuarial information, as specified in §§ 4262.6 through 4262.9. Also, if the plan is changing certain assumptions for purposes of demonstrating its requested amount of SFA, then the plan sponsor may use PBGC's SFA assumptions guidance. PBGC needs the application information to review a plan's eligibility for SFA and amount of requested SFA. PBGC estimates that over the next 3 years an annual average of 45 plan sponsors will file applications for SFA with an average annual hour burden of 540 (45 × 12) hours and an average annual cost burden of $1,530,000 (45 × $34,000).

Under § 4262.10(g), a plan sponsor may, but is not required to, file a lock-in application as a plan's initial application. The lock-in application contains basic information about the plan and a statement of intent to lock-in base data. PBGC needs the information in the lock-in application to ensure that a plan sponsor intends to lock-in the plan's data. PBGC estimates that over the next 3 years an annual average of 6 plan sponsors will file lock-in applications for SFA with an average annual hour burden of 6 (6 × 1) hours and an average annual cost burden of $4,800 (6 × $800).

Under § 4262.16(i), a plan sponsor of a plan that has received SFA must file an Annual Statement of Compliance with the restrictions and conditions under section 4262 of ERISA and part 4262 once every year through 2051. PBGC needs the information in the Annual Statement of Compliance to ensure that a plan is compliant with the imposed restrictions and conditions. PBGC is providing updated instructions for filers to use when entering the information for the Annual Statement of Compliance in PBGC's e-Filing portal. The instructions include a certification statement that must be manually signed and dated by a trustee who is a current member of the plan's board of trustees and authorized to sign on behalf of the board of trustees, or by another representative of the plan sponsor. PBGC estimates that over the next 3 years an annual average of 150 plan sponsors will file an Annual Statement of Compliance with an average annual hour burden of 300 (150 × 2) hours and

an average annual cost burden of $360,000 (150 × $2,400).

Under § 4262.15(c), a plan sponsor of a plan with benefits that were suspended under sections 305(e)(9) or 4245(a) of ERISA must issue notices of reinstatement to participants and beneficiaries whose benefits were suspended and are being reinstated. Participants and beneficiaries need the notice of reinstatement to better understand the calculation and timing of their reinstated benefits and, if applicable, make-up payments. PBGC estimates that over the next 3 years an average of 2 plans per year will be required to send notices to participants with suspended benefits. PBGC estimates that these notices will impose an average annual hour burden of 4 (2 × 2) hours and average annual cost burden of $4,000 (2 × $2,000).

Finally, under § 4262.16(d), (f), (g) and (h) a plan sponsor must file a request for a determination from PBGC for approval for an exception under certain circumstances for SFA conditions under § 4262.16 relating to reductions in contributions, transfers or mergers, and withdrawal liability. PBGC needs the information required for a request for a determination to evaluate whether to approve an exception from the specified condition of receiving SFA. PBGC estimates that over the next 3 years, PBGC will receive an average of 4.2 requests per year for determinations. PBGC estimates an average annual hour burden of 13.6 hours and average annual cost burden of $33,000 ((0.2 × $25,000) + (2 × $12,000) + (2 × $2,000)).

The estimated aggregate average annual hour burden for the next 3 years for the information collection in part 4262 is 863.6 (540 + 6 + 300 + 4 + 13.6) hours for employer and fund office administrative, clerical, and supervisory time. The estimated aggregate average annual cost burden for the next 3 years for the information collection request in part 4262 is $1,931,800 ($1,530,000 + $4,800 + $360,000 + $4,000 + $33,000) for approximately 4,830 contract hours assuming an average hourly rate of $400 for work done by outside actuaries and attorneys. The actual hour burden and cost burden per plan will vary depending on plan size and other factors.

The existing collection of information under the regulation has been approved by OMB under control number 1212–0074 (expires May 31, 2024). On December 20, 2023, PBGC published in the **Federal Register** (88 FR 88138) a notice informing the public of its intent to request an extension of this collection of information. No comments were received. PBGC is requesting that OMB extend approval of the collection of information for 3 years. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Issued in Washington, DC.

Gregory Katz,

Deputy Assistant General Counsel for Regulatory Affairs, Pension Benefit Guaranty Corporation.

BILLING CODE 7709–02–P

POSTAL REGULATORY COMMISSION

[Docket No. PI2024–2; Order No. 7017]

Public Inquiry on Zone 10 Packages Pursuant to 39 U.S.C. 3642

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is initiating a public inquiry proceeding and appoint a presiding officer to serve as an investigator to explore the appropriate classification of Zone 10 packages pursuant to 39 U.S.C. 3642. This notice informs the public of the filing and takes other administrative steps.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. Background
III. Public Inquiry
IV. Ordering Paragraphs

I. Introduction

In Order No. 7016, the Commission stated that it would initiate a public inquiry proceeding and appoint a presiding officer to serve as an investigator to explore the appropriate classification of Zone 10 packages pursuant to 39 U.S.C. 3642 and whether the implementation of Zone 10 prices raises a material issue of fact concerning whether a violation of 39 U.S.C. 403(c) has occurred if the Postal Service elects to implement the Zone 10 prices.[1] The Commission establishes this docket to facilitate examination of those issues.

II. Background

On November 22, 2023, the Postal Service filed notice with the Commission of its intent to establish a new Zone 10 for Priority Mail Express, Priority Mail, and USPS Ground Advantage and proposed associated Zone 10 rates.[2] The Postal Service states that the changes will take effect no earlier than July 1, 2024, with a specific date to be determined by the Postal Service in the future. Docket No. CP2024–72 Notice at 1.

Currently, Priority Mail Express, Priority Mail, and USPS Ground Advantage packages are charged prices based on weight and zone. For packages mailed within the United States, a package is assigned Zone 1–8 based on the distance the package must travel to reach its destination. The proposed new Zone 10 and associated prices will apply to (1) packages originating in the Lower 48 States and destined to Alaska, Hawaii, or the U.S. Territories (which include Puerto Rico, the U.S. Virgin Islands, and territories in the Pacific, including Guam and American Samoa); (2) packages originating in Alaska and destined to Hawaii or the U.S. Territories; (3) packages originating in Hawaii or a territory in the Pacific Ocean and destined to Alaska, Puerto Rico, or the U.S. Virgin Islands; and (4) packages originating in Puerto Rico or the U.S. Virgin Islands and destined to Alaska, Hawaii, or a territory in the Pacific Ocean. *Id.* at 2–3. The proposed Zone 10 does not apply to packages that originate in Alaska, Hawaii, or the U.S. Territories and are destined to the Lower 48 States. *Id.* at 4.

To explain the rationale for its proposal, the Postal Service states that the new Zone 10 and associated prices ''will better align with the zoning practices of [its] competitors, who currently have separate zones for offshore destinations.'' *Id.* at 3. The Postal Service states that its ''competitors charge significantly more for shipments from the Lower 48 states to offshore locations than for shipments in the reverse direction.''[3] The Postal Service also states that its decision to establish Zone 10 is ''cost-based in

[1] Docket No. CP2024–72, Order Approving Price Adjustments and Classification Changes for Domestic Competitive Products, March 22, 2024, at 3, 28, 29–31 (Order No. 7016).

[2] Docket No. CP2024–72, USPS Notice of Changes in Rates and Classifications of General Applicability for Competitive Products, November 22, 2023 (Docket No. CP2024–72 Notice).

[3] Docket No. CP2024–72, USPS Response to Chairman's Information Request No. 1, With Portions Filed Under Seal, December 20, 2023, question 2.c.

nature'' because ''[t]he cost of transport to offshore locations is higher on average than it is to transport to non-offshore destinations.'' Docket No. CP2024–72 Notice at 3. Specifically, the Postal Service explains that there are more limited transportation options to offshore destinations, and the use of air transportation, the mix of air transportation providers, and the need to use higher cost providers all contribute to higher costs.[4] The Postal Service does not, however, provide specific data and sources demonstrating these cost factors or otherwise demonstrating support for the ''cost-based'' nature of the new Zone 10 prices and has yet to undertake the effort to disaggregate Zone 10 costs and confirm that its cost-based assumption is supported by its available transportation data. *See* Docket No. CP2024–72 Response to CHIR No. 2, question 1.

In Order No. 7016, the Commission acknowledged that its role in reviewing proposed Competitive product rate and classification changes was limited by law. Order No. 7016 at 1–2, 32–33. Because the proposed rate and classification changes complied with 39 U.S.C. 3633(a), 39 CFR part 3035, and Order Nos. 1062 and 6249,[5] the Commission approved the proposed price and classification changes as consistent with applicable law and found that it had no legal basis to reject the proposed changes. Order No. 7016 at 15–22. However, the Commission also identified numerous concerns with the Postal Service's proposal and approach and urged the Postal Service to reconsider whether it is prudent or necessary to implement its proposal. *Id.* at 2, 22–32. The Commission also identified two areas that were particularly suited to further exploration in a separate public inquiry proceeding: (1) the question of whether Zone 10 packages are appropriately classified as Competitive products pursuant to 39 U.S.C. 3642 and (2) the question of whether the implementation of Zone 10 prices raises a material issue of fact concerning whether a violation of 39 U.S.C. 403(c) has occurred if the Postal Service elects to implement the Zone 10 prices. *Id.* at 28, 30–32.

Classification of Zone 10 packages. Postal products are separated into two distinct classifications: Market Dominant and Competitive. 39 U.S.C. 3621, 3631, 3642. Section 3642 of Title 39 governs the addition of products to, removal of products from, or transfer of products (or components of a product) between the Market Dominant and Competitive product lists.[6] The Commission may consider a change to a product's classification upon request of the Postal Service, upon request of users of the mail, or upon its own initiative. 39 U.S.C. 3642(a). There is nothing to prevent transfer of only part of a product between product lists. 39 U.S.C. 3642(c).

The criteria for assigning a product to either the Market Dominant or Competitive product list are described in 39 U.S.C. 3642(b). Section 3642(b)(1) defines a Market Dominant product as a product over which ''the Postal Service exercises sufficient market power that it can effectively set the price of such product substantially above costs, raise prices significantly, decrease quality, or decrease output, without risk of losing a significant level of business to other firms offering similar products.'' 39 U.S.C. 3642(b)(1). Competitive products are defined as ''all other products.'' *Id.* Products covered by the postal monopoly are not subject to transfer from the Market Dominant category. 39 U.S.C. 3642(b)(2). Additional considerations in determining the correct classification of a postal product include the availability and nature of private sector competitors, the views of users of the product, and the likely impact on small businesses. 39 U.S.C. 3642(b)(3).

In Docket No. CP2024–72, several commenters raised concerns relevant to an inquiry pursuant to 39 U.S.C. 3642, and the Commission recognized that the concerns raised by commenters may call into question whether the proposed Zone 10 volumes are correctly classified as Competitive. Order No. 7016 at 28–29. As a result, the Commission determined that this issue would be appropriate to consider in a public inquiry proceeding. *Id.* The Commission stated that it intended to appoint a presiding officer to serve as an investigator in the public inquiry proceeding to further explore the appropriate classification of these packages and to provide analysis and recommendations to the Commission on that issue. *Id.*

Violation of 39 U.S.C. 403(c). 39 U.S.C. 403(c) prohibits the Postal Service from making ''any undue or unreasonable discrimination among users of the mails'' ''in establishing classifications, rates, and fees.'' 39 U.S.C. 403(c). In order to find that undue or unreasonable price discrimination exists in violation of 39 U.S.C. 403(c), the Commission must find that: (1) a mailer has been offered less favorable rates or terms and conditions than one or more other mailers; (2) the mailer is ''similarly situated'' to the mailer or mailers who have been offered the more favorable rates or terms and conditions; and (3) there is no rational or legitimate basis for the Postal Service to deny the more favorable rates or terms and conditions offered to others.[7] The Commission has the authority to take action to bring the Postal Service into compliance with 39 U.S.C. 403(c) if it finds the Postal Service is not operating in conformance with that provision based on a complaint raising such non-conformance. 39 U.S.C. 3662(a), (c). The Commission has the authority to appoint an officer of the Commission representing the interests of the general public to bring a complaint for violation of 39 U.S.C. 403(c) or any other provision enumerated in 39 U.S.C. 3662(a). 39 U.S.C. 3662(a).

In Order No. 7016, the Commission noted that the Postal Service was not required to justify its Zone 10 rates on a cost basis beyond showing compliance with 39 U.S.C. 3633(a). Order No. 7016 at 30–32. However, the Commission also noted that it previously found costs are a relevant consideration under the 39 U.S.C. 403(c) analysis and that costs may be particularly relevant in the case of Zone 10 because one of the Postal Service's rationales for its Zone 10 proposal is that it is ''cost-based in nature.'' *See id.* at 30; Order No. 5491 at 8; Docket No. CP2024–72 Notice at 3.

The Commission stated that the Postal Service's cost-based rationale for its proposal appeared reasonable on its face given the Postal Service's representations regarding transportation costs to offshore areas; however, it also raised concern that the Postal Service failed to undertake the effort to disaggregate Zone 10 costs and confirm that its assumption regarding higher transportation costs for Zone 10 packages was supported by its available transportation data. Order No. 7016 at 31–32. The Commission directed the

[4] Docket No. CP2024–72, USPS Response to Chairman's Information Request No. 2, With Portions Filed Under Seal, January 12, 2024, question 1.a. (Docket No. CP2024–72 Response to CHIR No. 2).

[5] *See* 39 U.S.C. 3633(a); 39 CFR part 3035; Docket No. CP2012–2, Order Approving Changes in Rates of General Applicability for Competitive Products, December 21, 2011 (Order No. 1062); Docket Nos. CP2022–22 and CP2022–62, Order Granting in Part the United States Postal Service's Motions for Clarification of Order Nos. 6071 and 6195, August 15, 2022 (Order No. 6249).

[6] 39 U.S.C. 3642. The implementing regulations for this section appear in 39 CFR part 3040.

[7] Docket No. C2020–2, Order Granting the Postal Service's Motion to Dismiss Complaint with Prejudice, April 28, 2020, at 8 (Order No. 5491) (citing Docket No. C2009–1, Order on Complaint, April 20, 2011, at 28 (Order No. 718)).

Postal Service to file a rulemaking proceeding proposing and supporting the methodological changes necessary to derive separate Zone 10 transportation costs for Priority Mail and USPS Ground Advantage within 90 days of the date of Order No. 7016. *Id.* at 27.

The Commission was concerned that if the Postal Service's actual cost data differed from the Postal Service's assumptions, the Postal Service's cost-based justification for the Zone 10 rates could be invalid and concerns of violation of 39 U.S.C. 403(c) could arise. *Id.* at 30–32. As a result, the Commission stated that it intended to appoint a presiding officer to serve as an investigator to gather information and explore whether the Postal Service would be in violation of 39 U.S.C. 403(c) if the Postal Service elects to implement the new Zone 10 and related prices. *Id.* The Commission also stated that the investigator may also consider whether violation of any other provision enumerated in 39 U.S.C. 3662(a) has occurred. *Id.* at 32. The Commission further stated that after gathering applicable information, the investigator shall issue a public, written report to the Commission as to whether the implementation of Zone 10 raises a material issue of fact concerning whether a violation of 39 U.S.C. 403(c) or any other provision enumerated in 39 U.S.C. 3662(a) has occurred. *Id.*

III. Public Inquiry

The Commission establishes this proceeding to appoint and direct a presiding officer to serve as an investigator to explore the appropriate classification of Zone 10 packages pursuant to 39 U.S.C. 3642 and whether the implementation of Zone 10 prices raises a material issue of fact concerning whether a violation of 39 U.S.C. 403(c) has occurred if the Postal Service elects to implement the Zone 10 prices. Pursuant to 39 CFR 3010.106, the Commission appoints John Avila to serve as presiding officer in this docket. In that role, the Commission expects the presiding officer to serve an investigatory role similar to the one envisioned by 39 CFR 3022.21 to procure applicable information, examine issues, and report back to the Commission with his analysis and recommendations.[8]

In addition to consideration of 39 U.S.C. 403(c) and 3642, the underlying regulations, Commission precedent, the record of Docket No. CP2024–72, and the disaggregated costs the Postal Service has been directed to file within 90 days, the Commission anticipates that the presiding officer may need additional information from the Postal Service prior to conducting analysis and reaching any conclusions and expects him to issue presiding officer information requests as he deems appropriate to gather such information. 39 CFR 3010.106(c).

Once the presiding officer serving as investigator has sufficient information to analyze and assess whether Zone 10 packages should remain classified as Competitive pursuant to 39 U.S.C. 3642, the underlying regulations, and Commission precedent, the presiding officer shall file a public, written report to the Commission in this proceeding detailing his analysis and recommendations to the Commission on that issue. Once the presiding officer serving as investigator has sufficient information to assess whether the implementation of Zone 10 raises a material issue of fact concerning whether a violation of 39 U.S.C. 403(c) has occurred, the presiding officer shall issue a public, written report to the Commission as to whether the implementation of Zone 10 raises a material issue of fact concerning whether a violation of 39 U.S.C. 403(c) has occurred. The investigator may also consider whether violation of any other provision enumerated in 39 U.S.C. 3662(a) has occurred. Upon receipt of these reports, the Commission will consider if further action in this docket or separate proceedings is appropriate.

Materials filed in this proceeding will be available for review on the Commission's website unless the information contained therein is subject to an application for non-public treatment. The Commission's rules on non-public materials (including access to documents filed under seal) appear in 39 CFR part 3011. Additional information may be accessed via the Commission's website at *http://www.prc.gov.*

IV. Ordering Paragraphs

It is ordered:

1. The Commission establishes Docket No. PI2024–2 to review issues related to the appropriate classification of Zone 10 packages pursuant to 39 U.S.C. 3642 and whether the implementation of Zone 10 prices raises a material issue of fact concerning whether a violation of 39 U.S.C. 403(c) has occurred if the Postal Service elects to implement the Zone 10 prices.

2. Pursuant to 39 CFR 3010.106, the Commission appoints John Avila to serve as presiding officer in this docket. The presiding officer shall serve in an investigatory role and make filings in this docket as described in the body of this Order.

3. The Secretary shall arrange for publication of this notice in the **Federal Register**.

By the Commission.

Erica A. Barker,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99838; File No. SR–CBOE–2024–015]

Self-Regulatory Organizations; Cboe Exchange, Inc.; Notice of Filing of a Proposed Rule Change To Amend Exchange Rule 5.33, Complex Orders

March 22, 2024.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on March 19, 2024, Cboe Exchange, Inc. (the ''Exchange'' or ''Cboe Options'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe Exchange, Inc. (the ''Exchange'' or ''Cboe Options'') proposes to amend Rule 5.33. The text of the proposed rule change is provided below.

(additions are *italicized;* deletions are [bracketed])

* * * * *

Rules of Cboe Exchange, Inc.

* * * * *

Rule 5.33. Complex Orders

Trading of complex orders (as defined in Rule 1.1) is subject to all other Rules applicable to the trading of orders, unless otherwise provided in this Rule 5.33.

(a) *Definitions.* For purposes of this Rule 5.33, the following terms have the meanings below. A term defined elsewhere in the Rules has the same meaning with respect to this Rule 5.33, unless otherwise defined below.

* * * * *

Complex Strategy

The term ''complex strategy'' means a particular combination of components and their ratios to one another. New complex strategies can be created *by the Exchange or* as the result of the receipt of a complex instrument creation request or complex order for a complex strategy that is not currently in the System. The Exchange may limit the

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

number of new complex strategies that may be in the System or entered for any EFID (which EFID limit would be the same for all Users) at a particular time.

* * * * *

(b) *Types of Complex Orders.* Complex orders are available in all classes listed for trading on the Exchange. Complex orders may be market or limit orders.

(1) The Exchange determines which Times-in-Force of Day, GTC, GTD, IOC, or OPG as such terms are defined in Rule 5.6(d) are available for complex orders (including for eligibility to enter the COB and initiate a COA).

(2) The Exchange determines which Capacities are eligible for COA or for entry into the COB. Complex orders submitted to the Exchange with Capacities not eligible for COA or entry into the COB route to PAR for manual handling or are cancelled, subject to a User's instructions. [(A)] In a class in which the Exchange determines complex orders with Capacity M or N are not eligible for entry into the COB, the Exchange may determine that a complex order with Capacity M or N may enter the COB:

(A) in complex strategies designated by the Exchange or

(B) if:

(i) the complex order is on the opposite side of (a) a Priority Customer complex order(s) resting in the COB with a price not outside the SNBBO; or (b) orders on the same side of the market in the same complex strategy that initiated a COA(s) if there are ''x'' number of COAs within ''y'' milliseconds, counted on a rolling basis (the Exchange determines the number ''x'' (which must be at least two) and the time period ''y'' (which may be no more than 2,000); and

(ii) the User cancels the complex order, if it remains unexecuted, no later than a specified time (which the Exchange determines and may be no more than five minutes) after the time the COB receives the M or N complex order.

* * * * *

The text of the proposed rule change is also available on the Exchange's website (*http://www.cboe.com/AboutCBOE/CBOELegalRegulatoryHome.aspx*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its rules related to complex orders. Rule 5.33 governs the electronic processing of complex orders on the Exchange, and Rule 5.33(a) sets forth the definition of ''complex strategy.'' Rule 5.33(a) defines complex strategy as a particular combination of components and their ratios to one another. Pursuant to Rule 5.33(a), new complex strategies may be created as the result of the receipt of a complex instrument creation request or complex order for a complex strategy that is not currently in the System. Additionally, Rule 5.33(b)(2) states the Exchange determines which Capacities (*i.e.,* non-broker-dealer public customer, broker-dealers that are not market-makers or specialists on an options exchange, and/or Market-Makers or specialists on an options exchange) are eligible for COA or entry into the Complex Order Book (''COB'').[3] Further, Rule 5.33(b)(2)(A) provides that, in a class in which the Exchange determines complex orders of Market-Makers and away market-makers are not eligible for entry into the COB,[4] the Exchange may determine that Market-Makers and away market-makers may enter complex orders into the COB if (1) their complex orders are on the opposite side of (A) a priority customer complex order(s) resting in the COB with a price not outside the national spread market (''NSM'') [5] or (B) order(s) on the same side of the market in the same strategy that initiated a COA(s) if there are ''x'' number of COAs within ''y'' milliseconds, counted on a rolling basis (the Exchange will determine the number ''x'' (which must be at least two) and time period ''y'' (which may be no more than 2,000)) and (2) they cancel their complex orders, if such orders remain unexecuted, no later than a specified time (which the Exchange determines and may be no more than five minutes) after the time the COB receives the order. To the extent an origin type is not eligible for entry into the COB or does not meet the requirements of Rule 5.33(b)(2)(A), complex orders with that origin type may still be entered into the System as opening-only or immediate-or-cancel, as such orders would not rest in the COB when the Exchange is open for trading.

The Exchange understands from market participants that electronic trading in complex strategies may be limited for a variety of reasons, including fragmentation of liquidity across multiple customer-created complex instruments expressing a similar exposure (*i.e.,* risk) profile and the need to search for a desired complex strategy. To enhance electronic trading of commonly traded complex strategies, the Exchange proposes to amend its Rules to encourage increased, consolidated liquidity in complex strategies on the complex order book (''COB''). Specifically, the Exchange first proposes to amend the definition of complex strategy in Rule 5.33(a) to provide that new complex strategies can be created by the Exchange in addition to, as today, as the result of the receipt of a complex instrument creation request or complex order for a complex strategy that is not currently in the System. The Exchange believes that permitting it to create complex strategies, including commonly traded ones, would allow for the consolidation of liquidity within a single complex strategy that is currently spread across multiple customer-created complex instruments expressing the same or similar exposure profiles. For example, if a market participant wishes to execute a trade in a complex strategy to achieve a certain level of risk exposure, if the Exchange has created a complex strategy that provides that level of risk exposure already, then the market participant may submit an order within that strategy as opposed to creating a separate one with different strikes that would still result in the same level of risk exposure. The Exchange regularly observes consistencies in trading for certain complex strategies, thus highlighting a potential for consolidation of liquidity. Specifically,

[3] Currently, orders entered with any capacity, including Market-Maker (origin code ''M'') and market-maker or specialist on another options exchange (''away market-makers'') (origin code ''N'') orders, are eligible for entry and may rest on the COB in all classes except in S&P 500 Index options (''SPX''). In SPX options, M and N complex orders are not eligible for entry into the COB except as set forth in Rule 5.33(b)(2)(A). *See* US Options Complex Book Process, Section 2.3.3.

[4] As noted above, currently, the only class for which the Exchange has determined that M and N orders are not eligible for entry into the COB is SPX options.

[5] *See* Rule 1.1 (definition of ''National Spread Market'').

the Exchange regularly observes in various common complex strategies that, while market participants may use a large number of strikes to comprise a specific complex strategy, a significant amount of the trading volume within that complex strategy occurs using a small percentage of those strikes. For example, in jelly rolls executed on the Exchange in 2023 in SPX, the Exchange observed that more than 90% of the volume executed using a jelly roll occurred using fewer than 20% of the strikes used for all the jelly rolls executed.[6] The Exchange believes this proposed change may aggregate liquidity of market participants within a single set of strikes for a complex strategy (as opposed to across many varying strikes) looking and willing to take on that level of risk exposure, which may increase execution opportunities at more competitive prices. Under the proposed rule change, customers may continue to create complex instruments as they do today.

Second, the Exchange proposes to amend Rule 5.33(b)(2)(A). As noted above, Rule 5.33(b)(2) states that the Exchange may determine which complex orders are eligible for entry into the COB, based on Capacity. As described above, Rule 5.33(b)(2)(A) provides that, in a class in which the Exchange determines that M and N complex orders are not eligible for entry into the COB,[7] the Exchange may determine that M and N complex orders may rest in the COB in defined circumstances. The Exchange proposes to amend Rule 5.33(b)(2)(A) to provide in a class in which it determines complex orders of Market-Makers and away market-makers are not eligible for entry into the COB, the Exchange may also determine that Market-Makers and away market-makers may enter complex orders into the COB if the complex order is in a complex strategy designated by the Exchange.[8] The Exchange believes that providing it with the ability to designate complex strategies in which M and N complex orders are eligible for entry into the COB may further the consolidation of liquidity within a single complex strategy that is currently spread across multiple customer-created complex instruments expressing the same or similar exposure profiles. The proposed rule change permits the Exchange to designate complex strategies created either by users or by the Exchange in the COB in which M and N complex orders would be eligible to rest. Given that market participants often execute the same complex strategy within a small number of strikes (as demonstrated by the jelly roll example above), if the Exchange designated a single instrument for a common strategy in which M and N orders could rest, the Exchange believes a significant amount of market participants looking to execute that strategy may ultimately do so with that specific instrument, given the existence of liquidity and price competition on the COB. The Exchange believes this aggregation of liquidity of market participants looking and willing to take on that level of risk exposure, which may increase execution opportunities at more competitive prices.

For example, as noted above, the Exchange has determined that M or N complex orders for SPX options are not eligible for entry into the COB. Under the proposed rule, the Exchange may determine to permit M or N complex orders for SPX options to be eligible for entry into the COB in designated complex strategies (either user or Exchange-created) under the proposed rule.[9]

Unlike leg markets, in which market-makers provide liquidity through regularly updated quotes that indicate to customers the price at which liquidity providers are willing to trade against their orders, market-makers do not quote on the COB.[10] As a result, the COB may contain limited resting orders from liquidity providers within a complex strategy to indicate to customers the price at which many liquidity providers are willing to trade that complex strategy. The Exchange believes that providing it with the ability to permit M and N complex orders to rest orders in the COB in designated complex strategies would, as discussed above, potentially consolidate liquidity for complex strategies (particularly commonly traded complex strategies) with similar risk profiles within a single strategy that provides the same exposure. This may result in the COB for these complex strategies (such as those that are commonly traded) providing customers with this information, which may ultimately result in additional price competition and execution opportunities for customers. As previously noted, the Exchange determines which Capacities are eligible for entry into the COB, and currently, in SPX options, M and N complex orders are not eligible for entry into the COB except as set forth in Rule 5.33(b)(2)(A). The Exchange believes that it is more beneficial from a trading and efficiency perspective to designate strategies in which M and N orders are eligible for COB entry, rather than determine that M and N complex orders in all complex strategies (including SPX options) are eligible for COB entry, as Market-Makers may not be willing to rest in the number of large number of complex strategies that exist in the COB.

The proposed changes would allow the Exchange to create complex strategies, in addition to those strategies that are created today by users through receipt of a complex instrument creation request or complex order for a complex strategy that is not currently in the System. The proposed changes have no impact on the current process for complex strategy creation from a user perspective, as users will still be able to create complex strategies; however, the changes may promote trading efficiencies, as the user may (but is not required to) choose to trade in an Exchange-created strategy (rather than create a new, additional strategy), should it reflect the desired complex strategy to be traded. The changes would also provide the Exchange with the ability to designate complex strategies (which may be created by users or, as proposed, created by the Exchange) in which M and N complex orders are eligible for entry into the COB. Trading in strategies the Exchange does not designate as being eligible for M and N orders to rest will continue as it does today. The Exchange will maintain on its publicly available website a list of designated complex strategies. This will allow liquidity providers to easily determine in which complex strategies they are able to rest their orders (if they so choose) and better management their risk. Current rules permit the Exchange to allow M and N orders into the COB for complex strategies in certain circumstances if the Exchange has otherwise determined that M and N orders are not eligible for COB entry; the rule change merely provides the Exchange with flexibility to allow this also in designated complex strategies. Such designated complex

[6] A jelly roll is a trading strategy created by entering into two separate positions simultaneously: one position involves buying a put and selling a call with the same strike price and expiration and the second position involves selling a put and buying a call, with the same strike price, but with a different expiration from the first position. The same delta effect may be achieved by trading different strikes.

[7] As noted above, the Exchange has determined that M and N complex orders are not eligible for entry into the COB only in SPX options.

[8] Symbol reference data for those complex strategies designated by the Exchange will be publicly available on the Exchange's website, and disseminated to subscribers to the Exchange's data feeds that deliver complex order information.

[9] This would be in addition to letting M and N complex orders for SPX options enter the COB as set forth in current Rule 5.33(b)(2)(A).

[10] *See* Interpretation and Policy .01 to Rule 5.33.

strategies may include, for example, those strategies that are or may become commonly traded, based on trading activity and market feedback. As noted, the COB may contain limited resting orders from liquidity providers within a complex strategy to indicate to customers the price at which many liquidity providers are willing to trade that complex strategy. The Exchange believes permitting M and N complex orders to enter the COB for designated complex strategies will create potential execution opportunities for customers in these designated complex strategies.

By way of illustration, consider the following example:

Assume that on January 22, 2024, a trader sells the following box spread for $998.31, expiring on February 2, 2024, for purposes of raising cash.

- Sell 2024–02–02 SPX call with a strike of $4,000
- Buy 2024–02–02 SPX put with a strike of $4,000
- Buy 2024–02–02 SPX call with a strike of $5,000
- Sell 2024–02–02 SPX put with a strike of $5,000

Upon the sale, the trader receives a net premium (equivalent to a short-term loan that is due on the expiration date of February 2) of $99,831. At expiry, the trader will have to pay $100,000, which implies a rate of 5.5309%. However, this box spread trade is not the only trade that can provide this exposure. There are many box spreads with this expiration date that could replicate the same exposure created by the above box spread, such as box spreads with the same expiry date and a strike distance of 1,000, like the following Alternatives 1 and 2:

Alternative 1

- Sell 2024–02–02 SPX call with a strike of $3,000
- Buy 2024–02–02 SPX put with a strike of $3,000
- Buy 2024–02–02 SPX call with a strike of $4,000
- Sell 2024–02–02 SPX put with a strike of $4,000

Alternative 2

- Sell 2024–02–02 SPX call with a strike of $4,100
- Buy 2024–02–02 SPX put with a strike of $4,100
- Buy 2024–02–02 SPX call with a strike of $5,100
- Sell 2024–02–02 SPX put with a strike of $5,100

While alternatives 1 and 2 may not have the same quoted price as the original order, they would offer the same term of risk exposure. However, this demonstrates that liquidity for commonly traded complex strategies with similar risk profiles may be spread across multiple complex strategies. This may limit price competition and execution opportunities for customers. Pursuant to the proposed rule change, the Exchange could permit M and N complex orders to rest in the COB for one of the above complex strategies, which may permit the consolidation of liquidity from liquidity providers willing to assume the risk exposure of the above box spreads.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of section 6(b) of the Act.[11] Specifically, the Exchange believes the proposed rule change is consistent with the section 6(b)(5)[12] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the section 6(b)(5)[13] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the Exchange believes the proposed rule change will remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, protect investors, by potentially consolidating liquidity for complex strategies and increasing execution opportunities for customers. As noted above, the Exchange understands from market participants that electronic trading in complex strategies may be limited, in part due to the fragmentation of liquidity across multiple customer-created complex instruments expressing a similar exposure profile. The Exchange believes that permitting it to create complex strategies, including commonly traded ones, would allow for the consolidation of liquidity within a single complex strategy that is currently spread across multiple customer-created complex instruments expressing the same or similar exposure profiles, which may increase execution opportunities at more competitive prices, to the benefit of investors. Under the proposed change, if market participants wish to execute a trade in a complex strategy to achieve a certain level of risk exposure and the Exchange has created a complex strategy that already provides that level of risk exposure, then market participants could choose to submit an order within that strategy, as opposed to creating a new one. As noted above, customers may continue to create complex instruments as they do today.

Additionally, the Exchange believes the proposed change to allow it to determine, in a class in which it determines complex orders of Market-Makers and away market-makers are not eligible for entry into the COB, that Market-Makers and away market-makers may enter complex orders into the COB if the complex order is in a complex strategy designated by the Exchange, will remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, protect investors. The Exchange believes that providing it with the ability to permit M and N complex orders to rest in the COB in designated complex strategies (in addition to resting in the COB for complex strategies as set forth in current Rule 5.33(b)(2)(A)) would also potentially consolidate liquidity for complex strategies (particularly commonly traded complex strategies) with similar risk profiles within a single strategy that provides the same exposure. As noted above, unlike the leg markets, in which market-makers provide liquidity through quotes, the COB has no market-maker quotes that indicate to customers the price at which liquidity providers are willing to trade against their orders, market-makers do not quote on the COB. As a result, the COB may contain limited resting orders from liquidity providers within a complex strategy to indicate to customers the price at which many liquidity providers are willing to trade that complex strategy. The Exchange believes that permitting it to determine M and N complex orders in designated complex strategies are eligible for entry in the COB (which may be created by users or, as proposed, created by the Exchange) would potentially consolidate liquidity for complex strategies (particularly commonly traded complex strategies) with similar risk profiles within a single

[11] 15 U.S.C. 78f(b).

[12] 15 U.S.C. 78f(b)(5).

[13] *Id.*

strategy that provides the same exposure, which may result in the COB for these complex providing customers with this information, which may ultimately result in additional price competition and execution opportunities for customers. As previously noted, current rules permit the Exchange to allow M and N orders into the COB for complex strategies in certain circumstances if the Exchange has otherwise determined that M and N orders are not eligible for COB entry; the rule change merely provides the Exchange with flexibility to allow this also in designated complex strategies.

Finally, the Exchange believes the proposed changes are equitable and non-discriminatory, as the changes will apply to all market participants uniformly. As noted above, under the proposed rule change, customers may continue to create complex instruments as they do today. When determining which complex strategies to create and in which complex strategies M and N orders are eligible for COB entry, the Exchange represents it intends to make such determinations based on objective, nondiscriminatory factors, including strategy type, orders and executions within a strategy type using close by strikes, and market participant feedback, in order to incentive market participants to trade within these strategies. The Exchange believes determining such strategies for this purpose would increase the likelihood of achieving the purpose of the proposed rule change.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because it will apply in the same manner to all market participants. The Exchange notes that any complex strategy it could create under the proposed rule change could be created today by a user. Further, under current rules, the Exchange may, in a class in which the Exchange determines M and N complex orders are not eligible for entry into the COB, determine that such orders may be entered into the COB in complex strategies in defined circumstances, as described above; the proposed rule change provides the Exchange with additional flexibility to designate complex strategies in which M and N complex orders may be entered into the COB.

The Exchange does not believe that the proposed change will impose an unnecessary or inappropriate burden on intermarket competition, as it relates to complex strategies that may be created for trading on the Exchange and orders that the Exchange permits to rest on the COB. The Exchange notes that it operates in a highly competitive market, with many other options exchanges offering the ability to trade complex orders and at least one other options exchange that has the authority to create complex strategies.[14]

Additionally, current rules permit the Exchange to allow M and N orders to rest in the COB in designated classes (and thus permit the Exchange to not allow M and N orders to rest in the COB in designated classes). The proposed change related to orders that the Exchange permits to rest in the COB merely provides the Exchange with flexibility to expand the defined circumstances in those classes the Exchange does not otherwise permit M and N orders to do so, in addition to the circumstances set forth in Rule 5.33(b)(2)(A). As noted above, Exchange believes that it is more beneficial from a trading and efficiency perspective to designate strategies in which M and N orders are eligible for COB entry, rather than determine that M and N complex orders in all complex strategies (including SPX options) are eligible for COB entry, as Market-Makers may not be willing to rest in the number of large number of complex strategies that exist in the COB.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission will:

A. by order approve or disapprove such proposed rule change, or

B. institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–CBOE–2024–015 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–CBOE–2024–015. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–CBOE–2024–015 and should be submitted on or before April 18, 2024.

[14] *See* MIAX Rule 518(a)(6).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[15]

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99849; File No. SR–NYSEAMER–2024–20]

Self-Regulatory Organizations; NYSE American LLC; Notice of Filing and Immediate Effectiveness of Proposed Change To Amend the Connectivity Fee Schedule

March 22, 2024.

Pursuant to section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on March 14, 2024, NYSE American LLC (''NYSE American'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[15] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Connectivity Fee Schedule regarding colocation services and fees to update the list of included data products. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Connectivity Fee Schedule (''Fee Schedule'') regarding colocation services and fees to update the list of included data products (''Included Data Products'').

Currently, the table of Included Data Products in Colocation Note 4 sets forth the market data feeds that Users[4] can connect to at no additional cost when they purchase a service that includes access to the LCN or IP network.[5]

Each of the Exchange and the Affiliate SROs has filed to establish an ''Aggregated Lite'' market data feed (the ''Aggregated Lite Feeds'').[6] Accordingly, the Exchange proposes to update the table of Included Data Products to include the Aggregated Lite Feeds. To implement the change, the Exchange proposes to update the table of Included Data Products of the NYSE, NYSE American and NYSE Arca as follows (proposed additions underlined):

BILLING CODE 8011–01–P

[4] For purposes of the Exchange's colocation services, a ''User'' means any market participant that requests to receive colocation services directly from the Exchange. *See* Securities Exchange Act Release No. 76009 (September 29, 2015), 80 FR 60213 (October 5, 2015) (SR–NYSEMKT–2015–67). As specified in the Fee Schedule, a User that incurs colocation fees for a particular colocation service pursuant thereto would not be subject to colocation fees for the same colocation service charged by the Exchange's affiliates the New York Stock Exchange LLC (''NYSE''), NYSE Arca, Inc. (''NYSE Arca''), NYSE Chicago, Inc. (''NYSE Chicago''), and NYSE National Inc. (''NYSE National'' and together, the ''Affiliate SROs''). Each Affiliate SRO has submitted substantially the same proposed rule change to propose the changes described herein. *See* SR–NYSE–2024–17, SR–NYSEARCA–2024–28, SR–NYSECHX–2024–13, and SR–NYSENAT–2024–11.

[5] *See* Securities Exchange Act Release No. 79728 (January 4, 2017), 82 FR 3035 (January 10, 2017) (SR–NYSEMKT–2016–126) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change Amending the NYSE MKT Equities Price List and the NYSE Amex Options Fee Schedule Related to Colocation Services To Increase LCN and IP Network Fees and Add a Description of Access To Trading and Execution Services and Connectivity to Included Data Products).

When NYSE Chicago and NYSE National were added to the Included Data Products, the individual market data feeds offered were not broken out.[7] Accordingly, in addition to adding the Aggregated Lite Feeds, the Exchange proposes to break out the NYSE Chicago and NYSE National market data feeds in Included Data Products, as follows (proposed additions underlined):

NYSE Chicago
NYSE Chicago Aggregated Lite
NYSE Chicago BBO
NYSE Chicago Integrated Feed
NYSE Chicago Trades
NYSE National
NYSE National Aggregated Lite
NYSE National BBO
NYSE National Integrated Feed
NYSE National Trades

BILLING CODE 8011–01–C

The Exchange expects that the present filing will become operative immediately upon the filings to establish a fee for the Aggregated Lite Feed becoming operative. The Exchange expects such operative date or dates to be no later than the second quarter of 2024. It will announce the date or dates through a customer notice.

The Exchange does not charge for connectivity to the Included Data Feeds. Accordingly, it would not charge for connectivity to the Aggregated Lite Feeds.

General

The proposed changes would not apply differently to distinct types or sizes of market participants. Rather,

[7] *See* Securities Exchange Act Releases No. 87408 (October 28, 2019), 84 FR 58778 (November 1, 2019) (SR–NYSECHX–2019–12) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Fee Schedule of NYSE Chicago, Inc.), and 83351 (May 31, 2018), 83 FR 26314 (June 6, 2018) (SR–NYSENAT–2018–07) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Adopt Co-Location Services and Fees In Connection With the Re-Launch of Trading on the Exchange and To Amend Its Schedule of Fees and Rebates To Provide for Such Co-Location Services).

they would apply to all Users equally. As is currently the case, the purchase of any colocation service, including connectivity to the Aggregated Lite Feeds, would be completely voluntary and the Fee Schedule would be applied uniformly to all Users. FIDS does not expect that the proposed rule change will result in new Users.

The proposed changes are not otherwise intended to address any other issues relating to co-location services and/or related fees, and the Exchange is not aware of any problems that customers would have in complying with the proposed change.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with section 6(b) of the Act,[8] in general, and furthers the objectives of section 6(b)(5) of the Act,[9] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange further believes that the proposed rule change is consistent with section 6(b)(4) of the Act,[10] because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers, or dealers.

The Proposed Change Is Reasonable

The Exchange believes that the proposed rule change is reasonable and would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest, because adding the Aggregated Lite Feeds would increase the number of Included Data Products available to Users for no additional charge. All Users that voluntarily select to access the LCN or IP network would not be subject to a charge above and beyond the fee paid for the relevant LCN or IP network access. Accordingly, the Exchange believes that the proposed change is reasonable because the change would mean that a User would have the option of adding connectivity to additional market data feeds without paying additional charges.

Adding the proposed additional Included Data Products would allow a User to connect to any of the Aggregated Lite Feeds that it wished, but would not require it to do so. As now, a User would be able to determine which Included Data Products, if any, to which it connects, based on what would best serve its needs, tailoring the service to the requirements of its business operations.

The Exchange believes that the proposed rule change is reasonable because, as with the other Included Data Products, it believes it is not the exclusive method to connect to the Aggregated Lite Feeds. As alternatives to connecting to the Aggregated Lite Feeds as Included Data Products, a User may connect to the market data feeds through another User or through a connection to an Exchange access center outside the data center, third party access center, or third party vendor.

By adding the Aggregated Lite Feeds and setting forth the NYSE Chicago and NYSE National feeds already offered, the proposed change would ensure that the list of Included Data Products was up to date and consistent in the level of detail. Accordingly, the Exchange believes that the proposed rule change is reasonable and would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest, as it would ensure that the description of Included Data Products was complete, ensuring that it is accessible and transparent, and providing market participants with clarity as to what connectivity is included in the purchase of access to the LCN and IP networks.

The Proposed Change Is Equitable and Not Unfairly Discriminatory

The Exchange believes that the proposed change provides for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers, or dealers because adding the Aggregated Lite Feeds would increase the number of Included Data Products available to Users for no additional charge. All Users that voluntarily select to access the LCN or IP network would not be subject to a charge above and beyond the fee paid for the relevant LCN or IP network access. Accordingly, the Exchange believes that the proposed change is equitable and not unfairly discriminatory because the change would mean that a User would have the option of adding connectivity to additional market data feeds without paying additional charges.

Further, the Exchange believes that the proposed change is equitable and not unfairly discriminatory since, as is true now, the proposed change would not apply differently to distinct types or sizes of Users but would apply to all Users equally. Moreover, adding the proposed additional Included Data Products would allow a User to connect to any of the Aggregated Lite Feeds that it wished, but would not require it to do so. As now, a User would be able to determine which Included Data Products, if any, to which it connects, based on what would best serve its needs, tailoring the service to the requirements of its business operations.

By adding the Aggregated Lite Feeds and setting forth the NYSE Chicago and NYSE National feeds already offered, the proposed change would ensure that the list of Included Data Products was up to date and consistent in the level of detail. Accordingly, the Exchange believes that the proposed rule change is equitable and not unfairly discriminatory, as it would ensure that the description of Included Data Products was complete, ensuring that it is accessible and transparent, and providing market participants with clarity as to what connectivity is included in the purchase of access to the LCN and IP networks.

For the reasons above, the proposed changes do not unfairly discriminate between or among market participants that are otherwise capable of satisfying any applicable co-location fees, requirements, terms, and conditions established from time to time by the Exchange.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposal will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of section 6(b)(8) of the Act.[11]

The Exchange believes that the proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act because adding the Aggregated Lite Feeds would

[8] 15 U.S.C. 78f(b).

[9] 15 U.S.C. 78f(b)(5).

[10] 15 U.S.C. 78f(b)(4).

[11] 15 U.S.C. 78f(b)(8).

increase the number of Included Data Products available to Users for no additional charge. All Users that voluntarily select to access the LCN or IP network would not be subject to a charge above and beyond the fee paid for the relevant LCN or IP network access. Accordingly, the change would mean that a User would have the option of adding connectivity to additional market data feeds without paying additional charges.

Adding the proposed additional Included Data Products would allow a User to connect to any of the Aggregated Lite Feeds that it wished, but would not require it to do so. In this way, the proposed changes would enhance competition by, as now, enabling a User to determine to which Included Data Products, if any, it connects, based on what would best serve its needs, tailoring the service to the requirements of its business operations.

The Exchange believes that the proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act because, as with the other Included Data Products, it believes it is not the exclusive method to connect to the Aggregated Lite Feeds. As alternatives to connecting to the Aggregated Lite Feeds as Included Data Products, a User may connect to the market data feeds through another User or through a connection to an Exchange access center outside the data center, third party access center, or third party vendor.

By adding the Aggregated Lite Feeds and setting forth the NYSE Chicago and NYSE National feeds already offered, the proposed change would ensure that the list of Included Data Products was up to date and consistent in the level of detail. Accordingly, the Exchange believes that the proposed additions to the description of Included Data Products would make the description more accessible and transparent. In this manner, the proposed change would provide market participants with clarity as to what connectivity is included in the purchase of access to the LCN and IP networks, thereby enhancing competition by ensuring that all Users have access to the same information regarding the Included Data Products.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to section 19(b)(3)(A)(iii) of the Act [12] and Rule 19b–4(f)(6) thereunder.[13] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[14]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under section 19(b)(2)(B) [15] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

[12] 15 U.S.C. 78s(b)(3)(A)(iii).

[13] 17 CFR 240.19b–4(f)(6).

[14] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires the Exchange to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[15] 15 U.S.C. 78s(b)(2)(B).

Electronic Comments

• Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or

• Send an email to *rule-comments@sec.gov.* Please include file number SR–NYSEAMER–2024–20 on the subject line.

Paper Comments

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSEAMER–2024–20. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSEAMER–2024–20 and should be submitted on or before April 18, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[16]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99843; File No. SR–DTC–2024–002]

Self-Regulatory Organizations; The Depository Trust Company; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the DTC Corporate Actions Distributions Service Guide and the DTC Settlement Service Guide

March 22, 2024.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on March 20, 2024, The Depository Trust Company (''DTC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the clearing agency. DTC filed the proposed rule change pursuant to section 19(b)(3)(A) of the Act [3] and Rule 19b–4(f)(4) thereunder.[4] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of amendments to the DTC Corporate Actions Distributions Service Guide (''Distributions Guide'') [5] and the DTC Settlement Service Guide (''Settlement Guide'') [6] (collectively, ''Guides'') [7] to make technical revisions to the Guides in anticipation of the U.S. market transition to a shortened standard settlement cycle from the current two business days after trade date (''T+2'') to one business day after trade date (''T+1''), as described in greater detail below.[8]

[1] 15 U.S.C. 78s(b)(1).

[7] The Guides are Procedures of DTC. Pursuant to the Rules, the term ''Procedures'' means the Procedures, service guides, and regulations of DTC adopted pursuant to Rule 27, as amended from time to time. *See* Rule 1, Section 1, *infra* note 8. They are binding on DTC and each Participant in the same manner that they are bound by the Rules. *See* Rule 27, *infra* note 8.

[8] Each capitalized term not otherwise defined herein has its respective meaning as set forth the Rules, By-Laws and Organization Certificate of DTC (the ''Rules''), *available at www.dtcc.com/legal/rules-and-procedures.*

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the clearing agency included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The clearing agency has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

(A) Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The proposed rule change would amend the DTC Corporate Actions Distributions Service Guide (''Distributions Guide'') [9] and the DTC Settlement Service Guide (''Settlement Guide'') [10] (collectively, ''Guides'') [11] to make technical revisions to the Guides in anticipation of the U.S. market transition to a shortened standard settlement cycle from the current two business days after trade date (''T+2'') to one business day after trade date (''T+1''), as described below. The proposed rule changes to the Guides would become effective on May 28, 2024.[12]

The standard settlement cycle for certain securities was last changed in 2017, when the Commission adopted the current version of Rule 15c6–1(a) [13] under the Act, which (subject to certain exceptions) prohibits any broker-dealer from entering into a contract for the purchase or sale of a security that provides for payment and delivery later than two business days after the trade date, unless otherwise expressly agreed to by the parties at the time of the transaction.[14] The implementation of this change moved the length of the settlement cycle from three business days after trade date (T+3) to T+2.

To further reduce market and counterparty risk, decrease clearing capital requirements, reduce liquidity demands, and strengthen and modernize securities settlement in the U.S. financial markets, the financial services industry, in coordination with its regulators, has been working on shortening the standard settlement cycle from T+2 to T+1. In connection therewith, the Commission has adopted a rule change to shorten the standard settlement cycle from T+2 to T+1, with a compliance date of May 28, 2024.[15]

[9] *Supra* note 5.

[10] Supra note 6.

[11] *Supra* note 7.

[12] DTC will post a version of the relevant sections of the respective Guides reflecting the changes as they would appear upon the effectiveness of the subsequent proposed rule change mentioned above and will include a note on the cover page of the Guides to advise Participants of these changes.

[13] 17 CFR 240.15c6–1.

[14] *See* Securities Exchange Act Release No. 80295 (Mar. 22, 2017), 82 FR 15564 (Mar. 29, 2017).

Effect on DTC

DTC provides depository and book-entry services pursuant to its Rules and Procedures, including, but not limited to, its service guides and Operational Arrangements.[16] DTC services include custody of securities certificates and other instruments, and settlement and asset services for types of eligible securities including, among others, equities, warrants, rights, corporate debt and notes, municipal bonds, government securities, asset-backed securities, depositary receipts and money market instruments.

DTC, through its nominee, Cede & Co., is the registered holder of securities on the books of the issuer or its transfer agent; that is, DTC is the direct holder of legal title to the securities on the books of the issuer. DTC receives distributions, dividends, and corporate actions from the issuer and passes them to its Participants.

DTC processes transactions for settlement, subject to its risk controls, on the same day it receives them. Distributions on securities held at DTC on behalf of its Participants pass through DTC and are credited to the accounts of Participants on the same day that they are paid to DTC. As a result, DTC's Rules and Procedures are not generally affected by the industry's move to T+1.

However, certain provisions in the Distributions Guide and Settlement Guide relating to distributions on securities held at DTC and settlement timeframes are based on a presumption that transactions settle on a two-day settlement cycle (*i.e.,* T+2). This would change as the securities industry switches to a standard T+1, as noted above. Therefore, DTC proposes to make the below described changes.

Distributions Guide Changes

DTC would modify the Distributions Guide text relating to (i) the DTC interim accounting process and (ii) the impact of the shortened settlement cycle

[15] *See* Securities Exchange Act Release No. 96930 (Feb. 15, 2023), 88 FR 13872 (Mar. 6, 2023) (S7–05–22) (Shortening the Securities Transaction Settlement Cycle).

[16] *Available at www.dtcc.com/legal/rules-and-procedures.*

on the timing of the allocation of stock distributions.

Interim Accounting Process

Interim accounting is an important part of the entitlement and allocation process relating to distributions. During the interim accounting period, DTC facilitates the entitlements and allocation process systematically for both the buyer and seller of a transaction conducted in the marketplace and submitted to NSCC's Continuous Net Settlement service (''CNS'').[17] The interim accounting period is defined as the time period during which a trade settling has income or a due bill attached to it.[18] The interim accounting period (also referred to as the due bill period) is determined in accordance with market rules[19] and currently extends for the time from the record date[20] plus one day up to the ex-date plus one day.[21]

In order to prepare for the migration to T+1 settlement, DTC would modify the interim accounting process to account for the shortened period. In this regard, DTC would revise the Distributions Guide to state that the interim accounting period would reflect the anticipated due bill period that would be recognized by the industry, in light of the T+1 settlement cycle, such that the interim accounting period would extend from the record date plus one day up to the due bill redemption date (typically ex-date for equities and payable date minus one day for debt). Proposed changes to the text of the Distributions Guide relating to the interim accounting period would be reflected in the text of the subsections of the Interim Accounting section of the Distributions Guide.

''Overview'' Subsection

The subsection titled ''Overview'' provides a general description of the Interim Accounting process. The proposed rule change would make a technical change to remove a typo from a sentence that provides a general description for when the interim accounting process relating to a distribution begins and ends. The same sentence would also be revised to reflect a timing change to the interim account period necessitated by the shortening of the settlement cycle.

''Reasons for Interim Accounting'' Subsection

The subsection titled ''Reasons for Interim Accounting'' describes that normally, the registered holder of a security on the close of business on the record date is entitled to the distribution. The subsection provides examples of common reasons when this does not occur. One of these is where an exchange declares a late or irregular ex-date for an equity issue. The Distributions Guide describes that for equity issues, there are times when the listed exchange would declare an ex-date that is not one business day prior to the record date (*e.g.,* an ex-date that equals payable date plus one day). The Distributions Guide also states that at such times, a buyer is entitled to the distribution when the registered holder of an equity issue sells the security prior to the ex-date.

The proposed rule change would amend text in the ''Reasons for Interim Accounting'' section to revise the description of the timing relating to an exchange's declaration of a late or irregular ex-date for an equity issue. In this regard, the text would be revised to describe that there are times for equity issues when the listed exchange would declare an ex-date that is not ''equal to'' the record date, rather than declaring an ex-date that is ''one business day prior to'' the record date, as described above.

''Without DTC's Interim Accounting'' Subsection

The subsection titled ''Without DTC's Interim Accounting'' would be revised to correct a typographical error by removing an errant comma.

''Interim Accounting Usage'' Subsection

Activation of DTC's Interim Accounting process depends on the type of distribution. The ''Interim Accounting Usage'' subsection within the Distributions Guide provides a table that describes the conditions under which interim accounting occurs for types of distributions. The proposed rule change would revise this table to adjust timeframes relating to activation of Interim Accounting for certain types of distributions to account for the shortening of the settlement cycle:

BILLING CODE 8011–01–P

[17] Securities movements for transactions processed through CNS occur free of payment at DTC. *See* DTC Settlement Service Guide, *available at www.dtcc.com/-/media/Files/Downloads/legal/service-guides/Settlement.pdf,* at 15.

[18] In the absence of DTC's interim accounting process, trades scheduled to settle after the record date ''with distribution'' (those that entitle the receiver to the distribution) would have a due bill or income payment attached to detail the entitlement and associated obligations between the seller and buyer relating to the distribution. The distribution entitlement would then need to be handled between the seller and the buyer of the security outside of DTC's Distributions Service.

[19] *E.g.,* New York Stock Exchange (''NYSE'') Rules 255–259, *available at www.nyse.com/publicdocs/nyse/regulation/nyse/NYSE_Rules.pdf.*

[20] The record date is the date when an investor must be on the issuer's books as a shareholder to receive a distribution.

[21] The ex-date is determined in accordance with the applicable market procedures. *E.g.,* NYSE Listed Company Manual, Section 703.03 (part 2) (Stock Split/Stock Rights/Stock Dividend Listing Process), *available at www.nysemanual.nyse.com/lcm/Help/mapContent.asp?sec=lcm-sections&title=sx-ruling-nyse-policymanual_703.02(part2)&id=chp_1_8_3_4.*

For	Interim accounting is used[a]
Cash dividends	When the ex-date is not equal to record date ~~– 1 business days~~, and DTC is aware of the ex-date prior to the payable date. In this case, the interim period runs from record date +1 through close of business on ex-date~~+1~~.
Stock distributions	A stock distribution with an ex-date that is not equal to record date~~–1~~. In this case, the interim period runs from record date +1 through close of business on ex-date ~~+1~~. Note: Stock splits are allocated to your general free and pledged accounts on the business day following the close of the due bill period. Shares allocated to the pledged account automatically become additional collateral for the loan.

For	Interim accounting is used[a]
Rights	When the ex-date is not equal to record date**~~–1~~**, and there is adequate time for you to submit your rights instructions to DTC for presentation to the paying agent prior to the expiration date. In this case, the interim period runs from record date +1 through close of business on ex-date **~~+1~~**. Note: If there is not adequate time for you to submit your rights instructions to DTC for presentation to the paying agent prior to the expiration date, DTC will credit your account based on your record date position. You must settle due bills outside DTC's Distribution event processing service.
***	
Supplemental due bills	For special large cash dividends, when the ex-date is the day after the announced payable date. In this case: The interim period runs from record date +1 through payable date −1 Allocation is made on payable date, and Interim accounting starts again on the payable date and continues on a daily basis through ex-date **~~+1~~**. Allocation is made on the business day following the day of delivery by crediting the money settlement account of the receiver and debiting the money settlement account of the deliverer.

[a] Bold, strike-through text indicates a deletion.

BILLING CODE 2011–01–C

''Interim Accounting for an Ex-Date Change Due to Unscheduled Closing of a Stock Exchange'' Subsection

Occasionally, there is an unscheduled closing of one or more stock exchanges (*e.g.,* a National Day of Mourning, an event causing significant market disruption or regional impact, etc.). During an unscheduled closing, a listed exchange would typically move ex-dates that were scheduled for that date to the next business day that the exchange is open, which is usually the record date. Such a move is necessary because ex-dates must occur on a business day that the listed exchange is open.[22]

When there is an unscheduled closing of a stock exchange and an ex-date is moved, DTC does not apply the interim accounting process described above.[23] This is because it is DTC's general understanding that when there is an unscheduled closure, the intent is for the last day of trading with a due bill to be the business day prior to the unscheduled closure because there should not be any executed trades in the security on the day of closure.[24]

Pursuant to the proposed rule change, DTC would modify the text of the section of the Distributions Guide that describes DTC's process in this regard to reflect the effect of the shortened period on interim accounting (*i.e.,* that it is not applied) between trade date and settlement date by modifying an example included within the text. The text change would revise references to certain dates, including sample calendar dates for a hypothetical ex-date and unscheduled closure date, as well as text describing how the ex-date falls in relation to a hypothetical record date depending on standard practice under the timing set forth in the example, as well as in the event an exchange changes the ex-date due to an unscheduled closure.

''Allocations'' Subsection

DTC would adjust descriptions relating to stock distributions in the section of the Distributions Guide titled Allocations relating to the date on which certain stock distributions, the timing for which are tied to the settlement cycle, are allocated. Specifically, the table would be revised for affected distribution types, as follows to account for the shortening of the settlement cycle:

[22] *See, e.g.,* FINRA Rule 11140—Transactions in Securities ''Ex-Dividend,'' ''Ex-Rights'' or ''Ex-Warrants'' *available at www.finra.org/rules-guidance/rulebooks/finra-rules/11140.*

[23] *See* Securities Exchange Act Release No. 90747 (Dec. 21, 2020), 85 FR 85249 (Dec. 29, 2020) (SR–DTC–2020–019).

[24] *Id.*

For this type of distribution[a]	**Allocation normally occurs**[b]
Stock dividends with a late ex-date	On the payable date or ex-date +~~**2**~~***1***, whichever comes later.
Stock splits, with ex-distribution beginning on the business day following the payable date	For the split shares on ex-date +~~**2**~~***1***.
Stock spinoffs to a DTC-eligible security	On the payable date, or ex-date +~~**2**~~***1***, whichever comes later.

[a] Stock distribution types unaffected by the proposed rule change are not shown.

[b] Bold, strike-through text indicates a deletion. Bold, italicized text indicates an addition.

Settlement Guide Changes

Moving settlement to the end of trade date would compress certain activities and processes required to achieve settlement on T+1. In the current T+2 settlement environment, DTC processes certain transactions for settlement during the day on settlement date and other transactions the night before settlement date (''S–1'') during the so called ''night cycle,'' which begins at 8:30 p.m. on S–1.

Processing transactions during the night cycle allows for earlier settlement of certain transactions that are included in the night cycle, thereby reducing counterparty risk and, with respect to transactions that are cleared through NSCC, enables such transactions to be removed from members' marginable portfolios, which in turn reduces such members' NSCC margin requirements. DTC uses a process called the ''Night Batch Process'' to control the order of processing of transactions in the night cycle. During the Night Batch Process, DTC evaluates each participant's available positions, transaction priority and risk management controls, and identifies the transaction processing order that optimizes the number of transactions processed for settlement. The Night Batch Process allows DTC to run multiple processing scenarios until it identifies an optimal processing scenario.

At approximately 8:30 p.m. on S–1, DTC subjects all transactions eligible for processing to the Night Batch Process, which is run in an ''offline'' batch that is not visible to Participants, allowing DTC to run multiple processing scenarios until the optimal processing scenario is identified. The results of the Night Batch Process are incorporated back into DTC's core processing environment on a transaction-by-transaction basis. Changing from settling on a standard T+2 to a T+1 basis would require DTC and Participants to initiate and complete certain settlement-related processes sooner relative to the time a trade is executed. This would require changes to certain timeframes for settlement activities that occur on S–1.

In this regard, DTC would modify provisions of the Settlement Guide relating to certain settlement processing timeframes to accommodate the move to T+1.

First, cutoffs in the settlement processing schedule relating to authorization and exemption (''ANE'') of institutional transactions would be changed from 6:30 p.m. to 10:45 p.m. The order of where this item appears in the list of settlement processing timeframes would also be adjusted to reflect that it would occur later in the settlement processing schedule than certain items for which timeframes are not changing. This change

accommodates a change to the institutional processing affirmation cutoff by the matching utility, DTCC ITP Matching (US) LLC (''ITP''),[25] to 9 p.m. on T from 11:30 a.m. on T+1. This change would allow time for affirmed trades processed by ITP to be input into DTC for timely settlement processing upon the transition to T+1. A second stated time for the cutoff for ANE for 7:30 p.m. on S–1 would be removed as it relates to certain operational transaction input processes that are no longer used.

The start of the night cycle would be moved to a later time to accommodate the above-mentioned adjustment relating to night cycle processing. This adjustment would allow additional time for input of transactions into DTC's night cycle. As mentioned above, the Night Batch Process starts at approximately 8:30 p.m. ET on the business day prior to settlement date. Pursuant to the proposed rule change, the start of the Night Batch Process would be moved to 11:30 p.m. on S–1.

Considering the proposed time for the start of the Night Batch Process, the final cutoff for submission of Deliveries to the Night Cycle, or Night Deliver Orders would be moved from 8 p.m. to 11 p.m. on S–1.

Second, the section of the Settlement Guide relating to the ID Net Service, which is designed to facilitate more streamlined processing of certain transactions between brokers and custodians, would be modified to change the time a matching utility (such as ITP) must submit affirmed transactions for them to be ID Net eligible. Like the change relating to the processing of ANE described above, this change accommodates a change to the affirmation cutoff by ITP described above. Currently, the Settlement Guide requires such affirmed transactions to be submitted to DTC no later than 11:30 a.m. on S–1. The proposed rule change would modify this deadline to become 9 p.m. on S–1.

Finally, the section of the Settlement Guide relating to the Night Batch Process would be revised to reflect the above-described change on the timing of the start of the Night Batch Process, which would be modified from the current time of 8 p.m. on S–1 to 11:30 p.m. on S–1.

Implementation Date

The proposed rule changes to the Guides would take effect on May 28, 2024.

2. Statutory Basis

Section 17A(b)(3)(F) of the Act[26] requires that the rules of the clearing agency be designed, *inter alia,* to promote the prompt and accurate clearance and settlement of securities transactions. DTC believes that the proposed rule change is consistent with this provision because it would allow settlement transactions and distributions to continue to be processed when the U.S. market standard settlement cycle is shortened. Thus, by allowing processing of transactions in settlement and the Distributions Service in accordance with standard U.S. settlement timeframes (including when the standard settlement cycle is shortened), the proposed rule changes would promote the prompt and accurate clearance and settlement of securities transactions.

(B) Clearing Agency's Statement on Burden on Competition

DTC does not believe that the proposed rule change would have any impact on competition because the proposed rule change consists of conforming and technical changes to the texts of the Guides that would correspond with the industry's transition to a T+1 settlement cycle.

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

DTC has not received or solicited any written comments relating to this proposal. If any written comments are received, they would be publicly filed as an Exhibit 2 to this filing, as required by Form 19b–4 and the General Instructions thereto.

Persons submitting comments are cautioned that, according to Section IV (Solicitation of Comments) of the Exhibit 1A in the General Instructions to Form 19b–4, the Commission does not edit personal identifying information from comment submissions. Commenters should submit only information that they wish to make available publicly, including their name, email address, and any other identifying information.

All prospective commenters should follow the Commission's instructions on how to submit comments, *available at www.sec.gov/regulatory-actions/how-to-submit-comments.* General questions regarding the rule filing process or logistical questions regarding this filing should be directed to the Main Office of the Commission's Division of Trading and Markets at *tradingandmarkets@sec.gov* or 202–551–5777.

DTC reserves the right to not respond to any comments received.

III. Date of Effectiveness of the Proposed Rule Change, and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3)(A)[27] of the Act and paragraph (f)[28] of Rule 19b–4 thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–DTC–2024–002 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

All submissions should refer to file number SR–DTC–2024–002. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and

[25] DTC also processes book-entry transfers for institutional trades of its Participants, affirmed and matched by an applicable settlement matching service, including its affiliate, ITP.

[26] 15 U.S.C. 78q–1(b)(3)(F).

[27] 15 U.S.C. 78s(b)(3)(A).

[28] 17 CFR 240.19b–4(f).

printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of DTC and on DTCC's website (*dtcc.com/legal/sec-rule-filings*). Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to File Number SR–DTC–2024–002 and should be submitted on or before April 18, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[29]

Sherry R. Haywood,

Assistant Secretary.

[FR Doc. 2024–06576 Filed 3–27–24; 8:45 am]

BILLING CODE 8011–01–P

[29] 17 CFR 200.30–3(a)(12).

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–305, OMB Control No. 3235–0346]

Submission for OMB Review; Comment Request; Extension: Rule 34b–1

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (the ''Commission'') has submitted to the Office of Management and Budget a request for extension of the previously approved collection of information discussed below.

Rule 34b–1 under the Investment Company Act (17 CFR 270.34b–1) governs sales material that accompanies or follows the delivery of a statutory prospectus (''sales literature''). Rule 34b–1 deems to be materially misleading any investment company (''fund'') sales literature required to be filed with the Securities and Exchange Commission (''Commission'') by Section 24(b) of the Investment Company Act (15 U.S.C. 80a–24(b)) that includes performance data, unless the sales literature also includes the appropriate uniformly computed data and the legend disclosure required in investment company advertisements by rule 482 under the Securities Act of 1933 (17 CFR 230.482) (''rule 482''). Additionally, rule 34b–1 deems to be materially misleading any fund sales literature intended for distribution to prospective investors that includes fee and expense information, unless that sales literature complies with the disclosure and timeliness requirements of rule 482.[1] These requirements are designed to prevent misleading performance claims by funds and to enable investors to make meaningful comparisons among funds.

The Commission estimates that on average approximately 8,289[2] responses that include the information required by rule 34b–1 each year. The burden resulting from the collection of information requirements of rule 34b–1 is estimated to be 11 hours per response.[3] The total hourly burden for rule 34b–1 is approximately 91,179 hours per year in the aggregate.[4]

The collection of information under rule 34b–1 is mandatory. The information provided under rule 34b–1 is not kept confidential. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

The public may view background documentation for this information collection at the following website: *www.reginfo.gov.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice by April 29, 2024 to (i) *MBX.OMB.OIRA.SEC_desk_officer@omb.eop.gov* and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549, or by sending an email to: *PRA_Mailbox@sec.gov* .

[1] These provisions of rule 34b–1 apply to any registered investment company or business development company advertisement, pamphlet, circular, form letter, or other sales literature addressed to or intended for distribution to prospective investors in connection with a public offering. *See* rule 34b–1(c).

[2] The estimated average number of responses to rule 34b–1 for the two-year period from October 1, 2021, to November 30, 2023, comprises 7,912 filings submitted to FINRA and 377 filings submitted to the Commission.

[3] Previous PRA extensions for rule 34b–1 assumed an estimated annual burden of 6 hours per response in complying with paragraphs a and b of rule 34b–1, 3 hours per response in complying with the fee and expense figure disclosure requirements of paragraph c, and 2 hours for the fee waivers/expense reimbursement arrangements disclosure requirements of paragraph c, while estimating that only 96% of relevant responses would need to comply with all of the paragraph c requirements; for purposes of this extension, we are assuming that 100% of the responsive filings identified will incur burdens for all of the rule's requirements, such that a total of 11 hours per response per year (6 + 3 + 2 = 11); we recognize that this might overstate the total burden.

[4] 8,289 responses × 11 hours per response = 91,179 hours.

Dated: March 25, 2024.

Sherry R. Haywood,

Assistant Secretary.

[FR Doc. 2024–06627 Filed 3–27–24; 8:45 am]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99834; File No. SR–MSRB–2024–02]

Self-Regulatory Organizations; Municipal Securities Rulemaking Board; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Clarify the Calculation of the Annual Fee on Municipal Advisors Under MSRB Rule A–11

March 22, 2024.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'' or ''Exchange Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on March 21, 2024, the Municipal Securities Rulemaking Board (''MSRB'' or ''Board'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the MSRB. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The MSRB filed with the Commission a proposed rule change to amend Supplementary Material .01 to MSRB Rule A–11, on assessments for municipal advisor professionals (''Rule A–11''), to clarify that the calculation of the annual fee on municipal advisors for covered professionals[3] under Rule A–11(b) (the ''Municipal Advisor

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] As defined in Rule A–11(a), the term ''covered professional'' shall mean a person associated with a municipal advisor who is qualified as a municipal advisor representative in accordance with MSRB Rule G–3 and for whom the municipal advisor has on file with the Commission an active Form MA–I as of January 31 of each year.

Professional Fee'') is based on the number of covered professionals as of January 31, 2024, rather than January 31, 2023, for the fees to be assessed in 2024, and as of January 31 of each subsequent year thereafter (the ''proposed rule change''). The MSRB has designated the proposed rule change for immediate effectiveness.[4]

The text of the proposed rule change is available on the MSRB's website at *https://msrb.org/2024-SEC-Filings,* at the MSRB's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the MSRB included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The MSRB has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend Supplementary Material .01, on Annual Rate Card Fee, to Rule A–11 to clarify that the calculation of the Municipal Advisor Professional Fee for 2024 would be based on the number of covered professionals as of January 31, 2024, rather than January 31, 2023, and as of January 31 of each subsequent year thereafter. This amendment makes the calculation of the Municipal Advisor Professional Fee for municipal advisors based on the number of covered professionals for whom the municipal advisor has on file with the Commission an active Form MA–I as of January 31 of each applicable year, consistent with the intent of Rule A–11(a), rather than as of January 31, 2023 without regard to the year for which the fees are to be assessed. Without this amendment, municipal advisors may pay an inaccurately high or low fee for municipal professionals whose status as covered professionals has changed since January 31, 2023.

2. Statutory Basis

The MSRB believes that the proposed rule change is consistent with section 15B(b)(2)(J) of the Exchange Act,[5] which states that the MSRB's rules shall provide that each municipal advisor shall pay to the MSRB such reasonable fees and charges as may be necessary or appropriate to defray the costs and expenses of operating and administering the MSRB. Such rules, among other things, must specify the amount of such fees and charges.[6] The proposed rule change provides clarity regarding the specific amount of such fees and charges to be paid by municipal advisors based on the number of covered professionals in each applicable year. In addition, the MSRB believes that it is more reasonable for each year's fee to be calculated based on the number of covered professionals in that same year, rather than based on the number from a prior year. As a result, the MSRB believes that the proposed rule change satisfies the applicable requirements of section 15B(b)(2)(J) of the Exchange Act.[7]

B. Self-Regulatory Organization's Statement on Burden on Competition

Section 15B(b)(2)(C) of the Exchange Act[8] requires that MSRB rules not be designed to impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Exchange Act. The MSRB has considered the economic impact of the proposed rule change.[9] The MSRB does not believe the proposed rule change imposes any burden on competition, as it applies equitably and non-discriminatorily across all municipal advisors and ensures that municipal advisors pay the correct Municipal Advisor Professional Fee based on an accurate count of covered professionals as of each respective year for which such fees shall be paid, consistent with Rule A–11(a). Additionally, the proposed rule change does not unduly burden any municipal advisor, and in fact it would, in some cases, relieve the burden of overpaying for individuals whose status as a covered professional may have changed since January 31, 2023. Finally, the MSRB believes that the proposed rule change would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Exchange Act.

Section 15B(b)(2)(L)(iv) of the Exchange Act[10] requires that MSRB rules not impose a regulatory burden on small municipal advisors that is not necessary or appropriate in the public interest and for the protection of investors, municipal entities, and obligated persons, provided that there is robust protection of investors against fraud. The MSRB believes that the proposed rule change would not impose an unnecessary or inappropriate regulatory burden on small municipal advisors, as the fees assessed would be proportionate to the actual number of municipal advisors within each firm. The proposed rule change clarifies that the Municipal Advisor Professional Fee, payable by each municipal advisory firm under Rule A–11(b), is based on the number of covered professionals with Forms MA–I filed by a firm on January 31 of each applicable year, rather than January 31, 2023, as currently stated in Supplementary Material .01 to Rule A–11. By providing that the Municipal Advisor Professional Fee each year be based on an accurate covered professional count for the applicable year, the proposed rule change removes regulatory burdens stemming from payment of an inaccurate fee.

For the reasons noted above, the MSRB believes that the proposed rule change would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Exchange Act.[11]

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received on the proposed rule change. The MSRB previously included the amendment reflected in this proposed rule change in its withdrawn proposal to amend MSRB Rules A–11 and A–13 to establish the

[4] The MSRB has designated the proposed rule change as establishing or changing a due, fee, or other charge under section 19(b)(3)(A)(ii) of the Exchange Act (15 U.S.C. 78s(b)(3)(A)(ii)) and Rule 19b–4(f)(2) (17 CFR 240.19b–4(f)(2)) thereunder. While the proposed rule change does not change the rate of the Municipal Advisor Professional Fee, the number of covered professionals is a necessary element of the calculation of the amount of Municipal Advisor Professional Fees assessed.

[5] 15 U.S.C. 78*o*–4(b)(2)(J).

[6] *Id.*

[7] *Id.*

[8] 15 U.S.C. 78*o*–4(b)(2)(C).

[9] *See* Policy on the Use of Economic Analysis in MSRB Rulemaking, available at *https://www.msrb.org/Policy-Use-Economic-Analysis-MSRB-Rulemaking.* In evaluating whether there was any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Exchange Act, the MSRB was guided by its principles that required the MSRB to consider costs and benefits of a rule change, its impact on efficiency, capital formation and competition, and the main reasonable alternative regulatory approaches. For those rule changes which the MSRB files for immediate effectiveness under section 19(b)(3)(A) of the Exchange Act (15 U.S.C. 78s(b)(3)(A)), while not subject to the policy, the MSRB usually focuses its examination exclusively on the burden of competition on regulated entities.

[11] 15 U.S.C. 78*o*–4(b)(2)(C).

2024 rate card fees for dealers and municipal advisors. *See* Exchange Act Release No. 99096 (Dec. 6, 2023), 88 FR 86188 (Dec. 12, 2023), File No. SR–MSRB–2023–06 (the ''2024 Rate Card Filing'').[12] Although the Commission received comment letters from four commenters on other aspects of the 2024 Rate Card Filing, none addressed the amendment reflected in this proposed rule change.[13]

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing proposed rule change has become effective pursuant to section 19(b)(3)(A) of the Act[14] and paragraph (f) of Rule 19b–4 thereunder.[15] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–MSRB–2024–02 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

All submissions should refer to File Number SR–MSRB–2024–02. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the MSRB. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to File Number SR–MSRB–2024–02 and should be submitted on or before April 18, 2024.

For the Commission, pursuant to delegated authority.[16]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99851; File No. SR–NYSECHX–2024–13]

Self-Regulatory Organizations; NYSE Chicago, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Connectivity Fee Schedule

March 22, 2024.

Pursuant to section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on March 15, 2024, the NYSE Chicago, Inc. (''NYSE Chicago'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Connectivity Fee Schedule (''Fee Schedule'') regarding colocation services and fees to update the list of included data products. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Connectivity Fee Schedule (''Fee Schedule'') regarding colocation services and fees to update the list of included data products (''Included Data Products'').

Currently, the table of Included Data Products in Colocation Note 4 sets forth the market data feeds that Users[4] can

---

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] For purposes of the Exchange's colocation services, a ''User'' means any market participant that requests to receive colocation services directly from the Exchange. *See* Securities Exchange Act Release No. 87408 (October 28, 2019), 84 FR 58778 at n.6 (November 1, 2019) (SR–NYSECHX–2019–12). As specified in the Fee Schedule, a User that incurs colocation fees for a particular colocation service pursuant thereto would not be subject to colocation fees for the same colocation service charged by the Exchange's affiliates the New York Stock Exchange LLC (''NYSE''), NYSE American LLC (''NYSE American''), NYSE Arca, Inc. (''NYSE Arca''), and NYSE National Inc. (''NYSE National'' and together, the ''Affiliate SROs''). Each Affiliate SRO has submitted substantially the same proposed rule change to propose the changes described herein. *See* SR–NYSE–2024–17, SR–NYSEAMER–

connect to at no additional cost when they purchase a service that includes access to the LCN or IP network.[5]

Each of the Exchange and the Affiliate SROs has filed to establish an ''Aggregated Lite'' market data feed (the ''Aggregated Lite Feeds'').[6] Accordingly, the Exchange proposes to update the table of Included Data Products to include the Aggregated Lite Feeds. To implement the change, the Exchange proposes to update the table of Included Data Products of the NYSE, NYSE American and NYSE Arca as follows (proposed additions underlined):

NYSE: NYSE Aggregated Lite NYSE Alerts NYSE BBO NYSE Integrated Feed NYSE OpenBook NYSE Order Imbalances NYSE Trades
NYSE American: NYSE American Aggregated Lite NYSE American Alerts NYSE American BBO NYSE American Integrated Feed NYSE American OpenBook NYSE American Order Imbalances NYSE American Trades
NYSE American Options
NYSE Arca: NYSE Arca Aggregated Lite NYSE ArcaBook NYSE Arca BBO NYSE Arca Integrated Feed NYSE Arca Order Imbalances NYSE Arca Trades

When NYSE Chicago and NYSE National were added to the Included Data Products, the individual market data feeds offered were not broken out.[7] Accordingly, in addition to adding the Aggregated Lite Feeds, the Exchange proposes to break out the NYSE Chicago and NYSE National market data feeds in Included Data Products, as follows (proposed additions underlined):

NYSE Chicago NYSE Chicago Aggregated Lite NYSE Chicago BBO NYSE Chicago Integrated Feed NYSE Chicago Trades
NYSE National NYSE National Aggregated Lite NYSE National BBO NYSE National Integrated Feed NYSE National Trades

2024–20, SR–NYSEARCA–2024–28, and SR–NYSENAT–2024–11.

[5] *See* 84 FR 58778, *supra* note 4.

[6] *See* Securities Exchange Act Release No. 99691 (March 7, 2024), 89 FR 18468 (March 13, 2024) (SR–NYSECHX–2024–08).

[7] *See* 84 FR 58778, *supra* note 4, and Securities Exchange Act Release No. 83351 (May 31, 2018), 83 FR 26314 (June 6, 2018) (SR–NYSENAT–2018–07) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Adopt Co-Location Services and Fees In Connection With the Re-Launch of Trading on the Exchange and To Amend Its Schedule of Fees and Rebates To Provide for Such Co-Location Services).

The Exchange expects that the present filing will become operative immediately upon the filings to establish a fee for the Aggregated Lite Feed becoming operative. The Exchange expects such operative date or dates to be no later than the second quarter of 2024. It will announce the date or dates through a customer notice.

The Exchange does not charge for connectivity to the Included Data Feeds. Accordingly, it would not charge for connectivity to the Aggregated Lite Feeds.

General

The proposed changes would not apply differently to distinct types or sizes of market participants. Rather, they would apply to all Users equally. As is currently the case, the purchase of any colocation service, including connectivity to the Aggregated Lite Feeds, would be completely voluntary and the Fee Schedule would be applied uniformly to all Users. FIDS does not expect that the proposed rule change will result in new Users.

The proposed changes are not otherwise intended to address any other issues relating to co-location services and/or related fees, and the Exchange is not aware of any problems that customers would have in complying with the proposed change.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with section 6(b) of the Act,[8] in general, and furthers the objectives of section 6(b)(5) of the Act,[9] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange further believes that the proposed rule change is consistent with section 6(b)(4) of the Act,[10] because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers, or dealers.

The Proposed Change Is Reasonable

The Exchange believes that the proposed rule change is reasonable and would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest, because adding the Aggregated Lite Feeds would increase the number of Included Data Products available to Users for no additional charge. All Users that voluntarily select to access the LCN or IP network would not be subject to a charge above and beyond the fee paid for the relevant LCN or IP network access. Accordingly, the Exchange believes that the proposed change is reasonable because the change would mean that a User would have the option of adding connectivity to additional market data feeds without paying additional charges.

Adding the proposed additional Included Data Products would allow a User to connect to any of the Aggregated Lite Feeds that it wished, but would not require it to do so. As now, a User would be able to determine which Included Data Products, if any, to which it connects, based on what would best serve its needs, tailoring the service to the requirements of its business operations.

The Exchange believes that the proposed rule change is reasonable because, as with the other Included Data Products, it believes it is not the exclusive method to connect to the Aggregated Lite Feeds. As alternatives to connecting to the Aggregated Lite Feeds as Included Data Products, a User may connect to the market data feeds through another User or through a connection to an Exchange access center outside the data center, third party access center, or third party vendor.

By adding the Aggregated Lite Feeds and setting forth the NYSE Chicago and NYSE National feeds already offered, the proposed change would ensure that the list of Included Data Products was up to date and consistent in the level of detail. Accordingly, the Exchange believes that the proposed rule change is reasonable and would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest, as it would ensure that the description of Included Data Products was complete, ensuring that it is accessible and transparent, and providing market participants with clarity as to what connectivity is included in the purchase of access to the LCN and IP networks.

The Proposed Change Is Equitable and Not Unfairly Discriminatory

The Exchange believes that the proposed change provides for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers, or dealers because adding the Aggregated Lite Feeds would increase the number of Included Data Products available to Users for no additional charge. All Users that voluntarily select to access the LCN or IP network would not be subject to a charge above and beyond the fee paid for the relevant LCN or IP network access. Accordingly, the Exchange believes that the proposed change is equitable and not unfairly discriminatory because the change would mean that a User would have the option of adding connectivity to additional market data feeds without paying additional charges.

Further, the Exchange believes that the proposed change is equitable and not unfairly discriminatory since, as is true now, the proposed change would not apply differently to distinct types or sizes of Users but would apply to all Users equally. Moreover, adding the proposed additional Included Data Products would allow a User to connect to any of the Aggregated Lite Feeds that it wished, but would not require it to do so. As now, a User would be able to determine which Included Data Products, if any, to which it connects, based on what would best serve its needs, tailoring the service to the requirements of its business operations.

By adding the Aggregated Lite Feeds and setting forth the NYSE Chicago and NYSE National feeds already offered, the proposed change would ensure that the list of Included Data Products was up to date and consistent in the level of detail. Accordingly, the Exchange believes that the proposed rule change is equitable and not unfairly discriminatory, as it would ensure that the description of Included Data Products was complete, ensuring that it is accessible and transparent, and providing market participants with clarity as to what connectivity is included in the purchase of access to the LCN and IP networks.

For the reasons above, the proposed changes do not unfairly discriminate between or among market participants that are otherwise capable of satisfying any applicable co-location fees, requirements, terms, and conditions established from time to time by the Exchange.

[8] 15 U.S.C. 78f(b).

[9] 15 U.S.C. 78f(b)(5).

[10] 15 U.S.C. 78f(b)(4).

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposal will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of section 6(b)(8) of the Act.[11]

The Exchange believes that the proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act because adding the Aggregated Lite Feeds would increase the number of Included Data Products available to Users for no additional charge. All Users that voluntarily select to access the LCN or IP network would not be subject to a charge above and beyond the fee paid for the relevant LCN or IP network access. Accordingly, the change would mean that a User would have the option of adding connectivity to additional market data feeds without paying additional charges.

Adding the proposed additional Included Data Products would allow a User to connect to any of the Aggregated Lite Feeds that it wished, but would not require it to do so. In this way, the proposed changes would enhance competition by, as now, enabling a User to determine to which Included Data Products, if any, it connects, based on what would best serve its needs, tailoring the service to the requirements of its business operations.

The Exchange believes that the proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act because, as with the other Included Data Products, it believes it is not the exclusive method to connect to the Aggregated Lite Feeds. As alternatives to connecting to the Aggregated Lite Feeds as Included Data Products, a User may connect to the market data feeds through another User or through a connection to an Exchange access center outside the data center, third party access center, or third party vendor.

By adding the Aggregated Lite Feeds and setting forth the NYSE Chicago and NYSE National feeds already offered, the proposed change would ensure that the list of Included Data Products was up to date and consistent in the level of detail. Accordingly, the Exchange believes that the proposed additions to the description of Included Data Products would make the description more accessible and transparent. In this manner, the proposed change would provide market participants with clarity as to what connectivity is included in the purchase of access to the LCN and IP networks, thereby enhancing competition by ensuring that all Users have access to the same information regarding the Included Data Products.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to section 19(b)(3)(A)(iii) of the Act[12] and Rule 19b–4(f)(6) thereunder.[13] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[14]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under section 19(b)(2)(B)[15] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NYSECHX–2024–13 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSECHX–2024–13. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSECHX–2024–13 and should be submitted on or before April 18, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[16]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99852; File No. SR–NYSENAT–2024–11]

Self-Regulatory Organizations; NYSE National, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Connectivity Fee Schedule

March 22, 2024.

Pursuant to section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on March 15, 2024, NYSE National, Inc. (''NYSE National'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Connectivity Fee Schedule (''Fee Schedule'') regarding colocation services and fees to update the list of included data products. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Connectivity Fee Schedule (''Fee Schedule'') regarding colocation services and fees to update the list of included data products (''Included Data Products'').

Currently, the table of Included Data Products in Colocation Note 4 sets forth the market data feeds that Users[4] can connect to at no additional cost when they purchase a service that includes access to the LCN or IP network.[5]

Each of the Exchange and the Affiliate SROs has filed to establish an ''Aggregated Lite'' market data feed (the ''Aggregated Lite Feeds'').[6] Accordingly, the Exchange proposes to update the table of Included Data Products to include the Aggregated Lite Feeds. To implement the change, the Exchange proposes to update the table of Included Data Products of the NYSE, NYSE American and NYSE Arca as follows (proposed additions underlined):

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] For purposes of the Exchange's colocation services, a ''User'' means any market participant that requests to receive colocation services directly from the Exchange. *See* Securities Exchange Act Release No. 83351 (May 31, 2018), 83 FR 26314 at n.9 (June 6, 2018) (SR–NYSENAT–2018–07). As specified in the Fee Schedule, a User that incurs colocation fees for a particular colocation service pursuant thereto would not be subject to colocation fees for the same colocation service charged by the Exchange's affiliates the New York Stock Exchange LLC (''NYSE''), NYSE American LLC (''NYSE American''), NYSE Arca, Inc. (''NYSE Arca''), and NYSE Chicago, Inc. (''NYSE Chicago'' and together, the ''Affiliate SROs''). Each Affiliate SRO has submitted substantially the same proposed rule change to propose the changes described herein. *See* SR–NYSE–2024–17, SR–NYSEAMER–2024–20, SR–NYSEARCA–2024–28, and SR–NYSECHX–2024–13.

[5] *See* 83 FR 26314, *supra* note 4.

[6] *See* Securities Exchange Act Release No. 99715 (March 12, 2024) (SR–NYSENAT–2024–06).

NYSE:
<u>NYSE Aggregated Lite</u> NYSE Alerts NYSE BBO NYSE Integrated Feed NYSE OpenBook NYSE Order Imbalances NYSE Trades
NYSE American:
<u>NYSE American Aggregated Lite</u> NYSE American Alerts NYSE American BBO NYSE American Integrated Feed NYSE American OpenBook NYSE American Order Imbalances NYSE American Trades
NYSE American Options
NYSE Arca:
<u>NYSE Arca Aggregated Lite</u> NYSE ArcaBook NYSE Arca BBO NYSE Arca Integrated Feed NYSE Arca Order Imbalances NYSE Arca Trades

When NYSE Chicago and NYSE National were added to the Included Data Products, the individual market data feeds offered were not broken out.[7] Accordingly, in addition to adding the Aggregated Lite Feeds, the Exchange proposes to break out the NYSE Chicago and NYSE National market data feeds in Included Data Products, as follows (proposed additions underlined):

NYSE Chicago
<u>NYSE Chicago Aggregated Lite</u> <u>NYSE Chicago BBO</u> <u>NYSE Chicago Integrated Feed</u> <u>NYSE Chicago Trades</u>
NYSE National
<u>NYSE National Aggregated Lite</u> <u>NYSE National BBO</u> <u>NYSE National Integrated Feed</u> <u>NYSE National Trades</u>

The Exchange expects that the present filing will become operative immediately upon the filings to establish a fee for the Aggregated Lite Feed becoming operative. The Exchange expects such operative date or dates to be no later than the second quarter of 2024. It will announce the date or dates through a customer notice.

The Exchange does not charge for connectivity to the Included Data Feeds. Accordingly, it would not charge for connectivity to the Aggregated Lite Feeds.

General

The proposed changes would not apply differently to distinct types or sizes of market participants. Rather, they would apply to all Users equally. As is currently the case, the purchase of any colocation service, including connectivity to the Aggregated Lite

[7] *See* Securities Exchange Act Release No. 87408 (October 28, 2019), 84 FR 58778 (November 1, 2019) (SR–NYSECHX–2019–12) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Fee Schedule of NYSE Chicago, Inc.), and 83 FR 26314, *supra* note 4.

Feeds, would be completely voluntary and the Fee Schedule would be applied uniformly to all Users. FIDS does not expect that the proposed rule change will result in new Users.

The proposed changes are not otherwise intended to address any other issues relating to co-location services and/or related fees, and the Exchange is not aware of any problems that customers would have in complying with the proposed change.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with section 6(b) of the Act,[8] in general, and furthers the objectives of section 6(b)(5) of the Act,[9] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange further believes that the proposed rule change is consistent with section 6(b)(4) of the Act,[10] because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers, or dealers.

The Proposed Change is Reasonable

The Exchange believes that the proposed rule change is reasonable and would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest, because adding the Aggregated Lite Feeds would increase the number of Included Data Products available to Users for no additional charge. All Users that voluntarily select to access the LCN or IP network would not be subject to a charge above and beyond the fee paid for the relevant LCN or IP network access. Accordingly, the Exchange believes that the proposed change is reasonable because the change would mean that a User would have the option of adding connectivity to additional market data feeds without paying additional charges.

Adding the proposed additional Included Data Products would allow a User to connect to any of the Aggregated Lite Feeds that it wished, but would not require it to do so. As now, a User would be able to determine which Included Data Products, if any, to which it connects, based on what would best serve its needs, tailoring the service to the requirements of its business operations.

The Exchange believes that the proposed rule change is reasonable because, as with the other Included Data Products, it believes it is not the exclusive method to connect to the Aggregated Lite Feeds. As alternatives to connecting to the Aggregated Lite Feeds as Included Data Products, a User may connect to the market data feeds through another User or through a connection to an Exchange access center outside the data center, third party access center, or third party vendor.

By adding the Aggregated Lite Feeds and setting forth the NYSE Chicago and NYSE National feeds already offered, the proposed change would ensure that the list of Included Data Products was up to date and consistent in the level of detail. Accordingly, the Exchange believes that the proposed rule change is reasonable and would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest, as it would ensure that the description of Included Data Products was complete, ensuring that it is accessible and transparent, and providing market participants with clarity as to what connectivity is included in the purchase of access to the LCN and IP networks.

The Proposed Change Is Equitable and Not Unfairly Discriminatory

The Exchange believes that the proposed change provides for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers, or dealers because adding the Aggregated Lite Feeds would increase the number of Included Data Products available to Users for no additional charge. All Users that voluntarily select to access the LCN or IP network would not be subject to a charge above and beyond the fee paid for the relevant LCN or IP network access. Accordingly, the Exchange believes that the proposed change is equitable and not unfairly discriminatory because the change would mean that a User would have the option of adding connectivity to additional market data feeds without paying additional charges.

Further, the Exchange believes that the proposed change is equitable and not unfairly discriminatory since, as is true now, the proposed change would not apply differently to distinct types or sizes of Users but would apply to all Users equally. Moreover, adding the proposed additional Included Data Products would allow a User to connect to any of the Aggregated Lite Feeds that it wished, but would not require it to do so. As now, a User would be able to determine which Included Data Products, if any, to which it connects, based on what would best serve its needs, tailoring the service to the requirements of its business operations.

By adding the Aggregated Lite Feeds and setting forth the NYSE Chicago and NYSE National feeds already offered, the proposed change would ensure that the list of Included Data Products was up to date and consistent in the level of detail. Accordingly, the Exchange believes that the proposed rule change is equitable and not unfairly discriminatory, as it would ensure that the description of Included Data Products was complete, ensuring that it is accessible and transparent, and providing market participants with clarity as to what connectivity is included in the purchase of access to the LCN and IP networks.

For the reasons above, the proposed changes do not unfairly discriminate between or among market participants that are otherwise capable of satisfying any applicable co-location fees, requirements, terms, and conditions established from time to time by the Exchange.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposal will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of section 6(b)(8) of the Act.[11]

The Exchange believes that the proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act because adding the Aggregated Lite Feeds would increase the number of Included Data Products available to Users for no additional charge. All Users that voluntarily select to access the LCN or

[8] 15 U.S.C. 78f(b).

[9] 15 U.S.C. 78f(b)(5).

[10] 15 U.S.C. 78f(b)(4).

[11] 15 U.S.C. 78f(b)(8).

IP network would not be subject to a charge above and beyond the fee paid for the relevant LCN or IP network access. Accordingly, the change would mean that a User would have the option of adding connectivity to additional market data feeds without paying additional charges.

Adding the proposed additional Included Data Products would allow a User to connect to any of the Aggregated Lite Feeds that it wished, but would not require it to do so. In this way, the proposed changes would enhance competition by, as now, enabling a User to determine to which Included Data Products, if any, it connects, based on what would best serve its needs, tailoring the service to the requirements of its business operations.

The Exchange believes that the proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act because, as with the other Included Data Products, it believes it is not the exclusive method to connect to the Aggregated Lite Feeds. As alternatives to connecting to the Aggregated Lite Feeds as Included Data Products, a User may connect to the market data feeds through another User or through a connection to an Exchange access center outside the data center, third party access center, or third party vendor.

By adding the Aggregated Lite Feeds and setting forth the NYSE Chicago and NYSE National feeds already offered, the proposed change would ensure that the list of Included Data Products was up to date and consistent in the level of detail. Accordingly, the Exchange believes that the proposed additions to the description of Included Data Products would make the description more accessible and transparent. In this manner, the proposed change would provide market participants with clarity as to what connectivity is included in the purchase of access to the LCN and IP networks, thereby enhancing competition by ensuring that all Users have access to the same information regarding the Included Data Products.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to section 19(b)(3)(A)(iii) of the Act [12] and Rule 19b–4(f)(6) thereunder.[13] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[14]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under section 19(b)(2)(B) [15] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

• Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or

• Send an email to *rule-comments@sec.gov.* Please include file number SR–NYSENAT–2024–11 on the subject line.

Paper Comments

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSENAT–2024–11. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSENAT–2024–11 and should be submitted on or before April 18, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[16]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–777, OMB Control No. 3235–0729]

Submission for OMB Review; Comment Request; Extension: Form N–CEN

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (the ''Commission'') has submitted to the Office of Management and Budget a request for extension of the previously

approved collection of information discussed below.

The title for the collection of information is ''Form N–CEN under the Investment Company Act of 1940.'' Form N CEN is used to collect annual, census-type information for registered funds. Filers must submit this report electronically using the Commission's electronic filing system ''(EDGAR'') in Extensible Markup Language (''XML'') format. The purpose of Form N–CEN is to satisfy the filing and disclosure requirements of Section 30 of the Investment Company Act, and of rule 30a–1 thereunder.

We estimate that the average annual hour burden to complete the generally applicable items on Form N–CEN response will be 18 hours per year. We estimate that the aggregate annual hour burden to complete the generally applicable items will be 59,490 hours per year. We therefore estimate that filers would have total average annualized paperwork related expenses related to complete the generally applicable items of $605,520 for reports on Form N–CEN.

The requirements of this collection of information are mandatory. Responses will not be kept confidential. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid control number.

The public may view background documentation for this information collection at the following website: *www.reginfo.gov.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice by April 29, 2024 to (i) *MBX.OMB.OIRA.SEC_desk_officer@omb.eop.gov* and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549, or by sending an email to: *PRA_Mailbox@sec.gov.*

Dated: March 25, 2024.

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 35163; File No. 812–15446]

Coller Secondaries Private Equity Opportunities Fund, et al.

March 22, 2024.

AGENCY: Securities and Exchange Commission (''Commission'' or ''SEC'').

ACTION: Notice.

Notice of application for an order under sections 17(d) and 57(i) of the Investment Company Act of 1940 (the ''Act'') and rule 17d–1 under the Act to permit certain joint transactions otherwise prohibited by sections 17(d) and 57(a)(4) of the Act and rule 17d–1 under the Act.

Summary of Application: Applicants request an order to permit certain business development companies and closed-end management investment companies to co-invest in portfolio companies with each other and with certain affiliated investment entities.

Applicants: Coller Secondaries Private Equity Opportunities Fund; Coller Private Market Secondaries Advisors, LLC; Coller Investment Management Limited; Coller Capital, Inc.; Coller Capital Limited; Coller Credit Secondaries Investment Management Limited; Coller International Partners IX—A, L.P.; Coller International Partners IX—B, L.P.; Coller International Partners IX—C, SLP; Coller LP Secondaries—A, L.P.; Coller LP Secondaries—B, L.P.; Coller LP Secondaries—C, SLP; Coller GP-led and Direct Secondaries—A, L.P.; Coller GP-led and Direct Secondaries—B, L.P; Coller GP-led and Direct Secondaries—C, SLP; Coller International Partners VIII, L.P.; Coller International Partners VIII Parallel Fund, L.P.; Coller International Partners VIII Luxembourg, SLP; Coller Credit Opportunities I—A, L.P.; Coller Credit Opportunities I—B, L.P.; Coller Credit Opportunities I—D, SLP; Coller Credit Opportunities I Annex II, L.P.; Coller Credit Secondaries—Opportunities Fund II—A, L.P.; Coller Credit Secondaries—Opportunities Fund II—B, L.P.; Coller Credit Secondaries—Opportunities Fund II—C, SLP; Coller Credit Secondaries—Opportunities Fund II—Annex I—A, L.P.; Coller Credit Secondaries—Opportunities Fund II—Annex I—B, L.P.; Coller Credit Secondaries—Opportunities Fund II—Annex I—C, SLP; Coller Credit Secondaries—Special Situations Fund I—A, L.P.; Coller Credit Secondaries—Special Situations Fund I—B, L.P.; CIP VIII Strategic Co-Investment Vehicle L.P.; Mondriaan Co-Investments SLP; CKPF SLP; Coller International Partners VII, L.P.; Coller International Partners VII Parallel Fund, L.P.; Coller International Partners VII Luxembourg, SLP; Coller International Partners VI, L.P.; Coller International Partners VI Parallel Fund, L.P.; and Coller International Partners VI Parallel Fund (Latin America), L.P.

Filing Dates: The application was filed on March 24, 2023, and amended on February 12, 2024.

Hearing or Notification of Hearing: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing on any application by emailing the SEC's Secretary at *Secretarys-Office@sec.gov* and serving the Applicants with a copy of the request by email, if an email address is listed for the relevant Applicant below, or personally or by mail, if a physical address is listed for the relevant Applicant below. Hearing requests should be received by the Commission by 5:30 p.m. on, April 16, 2024, and should be accompanied by proof of service on the Applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing the Commission's Secretary at *Secretarys-Office@sec.gov.*

ADDRESSES: The Commission: *Secretarys-Office@sec.gov.* Applicants: Richard Jason Elmhirst, at *cccompliance@collercapital.com;* and Rajib Chanda, Esq., and Nathan Somogie, Esq., Simpson Thacher & Bartlett LLP, at *rajib.chanda@stblaw.com* and *nathan.somogie@stblaw.com.*

FOR FURTHER INFORMATION CONTACT: Kieran G. Brown, Senior Counsel, or Terri Jordan, Branch Chief, at (202) 551–6825 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: For Applicants' representations, legal analysis, and conditions, please refer to Applicants' amended and restated application, dated February 12, 2024, which may be obtained via the Commission's website by searching for the file number at the top of this document, or for an Applicant using the Company name search field, on the SEC's EDGAR system. The SEC's EDGAR system may be searched at *http://www.sec.gov/edgar/searchedgar/*

legacy/companysearch.html. You may also call the SEC's Public Reference Room at (202) 551–8090.

For the Commission, by the Division of Investment Management, under delegated authority.

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–614, OMB Control No. 3235–0682]

Submission for OMB Review; Comment Request; Extension: Rule 13h–1 and Form 13H

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (''PRA'') (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget (''OMB'') a request for approval of extension of the existing collection of information provided for in Rule 13h–1 (17 CFR 240.13h–1) and Form 13H—registration of large traders [1] submitted pursuant to section 13(h) of the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*) (''Exchange Act'').

Rule 13h–1 and Form 13H under section 13(h) of the Exchange Act established a large trader reporting framework.[2] The framework assists the Commission in identifying and obtaining certain baseline information about traders that conduct a substantial amount of trading activity, as measured by volume or market value, in the U.S. securities markets.

The identification, recordkeeping, and reporting framework provides the Commission with a mechanism to identify large traders and obtain additional information on their trading activity. Specifically, the rule requires large traders to identify themselves to the Commission and file certain interim updates with the Commission on Form 13H. Upon receipt of Form 13H, the Commission issues a unique identification number to the large trader, which the large trader then provides to its registered broker-dealers. Certain registered broker-dealers are required to maintain transaction records for each large trader and are required to report that information to the Commission upon request.[3] In addition, certain registered broker-dealers are required to adopt procedures to monitor their customers for activity that would trigger the identification requirements of the rule.

The respondents to the collection of information required by Rule 13h–1 and Form 13H are large traders and registered broker-dealers. The Commission estimates that the total annual time burden associated with Rule 13h–1 and Form 13H is approximately 131,415 hours per year. This burden is comprised of 31,140 hours for initial filings by large traders on Form 13H, 75,300 hours for updates by large traders, 22,200 hours for broker-dealer reporting, and 2,775 hours for broker-dealer monitoring.

Compliance with Rule 13h–1 is mandatory. The information collection under Rule 13h–1 is considered confidential subject to the limited exceptions provided by the Freedom of Information Act.[4]

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

The public may view background documentation for this information collection at the following website: *www.reginfo.gov.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Written comments and recommendations for the proposed information collection should be sent by April 29, 2024 to (i) *www.reginfo.gov/public/do/PRAMain;* and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549, or by sending an email to: *PRA_Mailbox@sec.gov.*

Dated: March 25, 2024.

Sherry R. Haywood,

Assistant Secretary.

[FR Doc. 2024–06631 Filed 3–27–24; 8:45 am]

BILLING CODE 8011–01–P

[1] Rule 13h–1(a)(1) defines ''large trader'' as any person that directly or indirectly, including through other persons controlled by such person, exercises investment discretion over one or more accounts and effects transactions for the purchase or sale of any NMS security for or on behalf of such accounts, by or through one or more registered broker-dealers, in an aggregate amount equal to or greater than the identifying activity level or voluntarily registers as a large trader by filing electronically with the Commission Form 13H.

[2] *See* Securities Exchange Act Release No. 64976 (July 27, 2011), 76 FR 46959 (August 3, 2011).

[3] The Commission, pursuant to Rule 17a–25 (17 CFR 240.17a–25), currently collects transaction data from registered broker-dealers through the Electronic Blue Sheets (''EBS'') system to support its regulatory and enforcement activities. The large trader framework added two new fields, the time of the trade and the identity of the trader, to the EBS system. Additionally, pursuant to Rule 613 (17 CFR 242.613), the Commission requires each national securities exchange and national securities association to collect transaction data from registered broker-dealers through the consolidated audit trail, to which the agency has access, to support regulatory and enforcement activities. This data includes the time of each trade and the LTID number of the person exercising investment discretion over the trade, the latter of which is assigned by the Commission pursuant to Rule 13h–1.

[4] *See* 5 U.S.C. 552 and 15 U.S.C. 78m(h)(7).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99850; File No. SR–NYSEARCA–2024–28]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Connectivity Fee Schedule

March 22, 2024.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on March 14, 2024, NYSE Arca, Inc. (''NYSE Arca'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Connectivity Fee Schedule (''Fee Schedule'') regarding colocation services and fees to update the list of included data products. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Connectivity Fee Schedule (''Fee Schedule'') regarding colocation services and fees to update the list of included data products (''Included Data Products'').

Currently, the table of Included Data Products in Colocation Note 4 sets forth the market data feeds that Users[4] can connect to at no additional cost when they purchase a service that includes access to the LCN or IP network.[5]

Each of the Exchange and the Affiliate SROs has filed to establish an ''Aggregated Lite'' market data feed (the ''Aggregated Lite Feeds'').[6] Accordingly, the Exchange proposes to update the table of Included Data Products to include the Aggregated Lite Feeds. To implement the change, the Exchange proposes to update the table of Included Data Products of the NYSE, NYSE American and NYSE Arca as follows (proposed additions underlined):

BILLING CODE 8011–01–P

NYSE: NYSE Aggregated Lite NYSE Alerts NYSE BBO NYSE Integrated Feed NYSE OpenBook NYSE Order Imbalances NYSE Trades
NYSE American: NYSE American Aggregated Lite NYSE American Alerts NYSE American BBO NYSE American Integrated Feed NYSE American OpenBook NYSE American Order Imbalances NYSE American Trades
NYSE American Options
NYSE Arca: NYSE Arca Aggregated Lite NYSE ArcaBook NYSE Arca BBO NYSE Arca Integrated Feed NYSE Arca Order Imbalances NYSE Arca Trades

When NYSE Chicago and NYSE National were added to the Included Data Products, the individual market data feeds offered were not broken out.[7] Accordingly, in addition to adding the Aggregated Lite Feeds, the Exchange

[4] For purposes of the Exchange's colocation services, a ''User'' means any market participant that requests to receive colocation services directly from the Exchange. *See* Securities Exchange Act Release No. 76010 (September 29, 2015), 80 FR 60197 (October 5, 2015) (SR–NYSEArca–2015–82). As specified in the Fee Schedule, a User that incurs colocation fees for a particular colocation service pursuant thereto would not be subject to colocation fees for the same colocation service charged by the Exchange's affiliates the New York Stock Exchange LLC (''NYSE''), NYSE American LLC (''NYSE American''), NYSE Chicago, Inc. (''NYSE Chicago''), and NYSE National Inc. (''NYSE National'' and together, the ''Affiliate SROs''). Each Affiliate SRO has submitted substantially the same proposed rule change to propose the changes described herein. *See* SR–NYSE–2024–17, SR–NYSEAMER–2023–20, SR–NYSECHX–2024–13, and SR–NYSENAT–2024–11.

[5] *See* Securities Exchange Act Release No. 79729 (January 4, 2017), 82 FR 3061 (January 10, 2017) (SR–NYSEArca–2016–172) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change Amending the NYSE Arca Options Fee Schedule and the NYSE Arca Equities Schedule of Fees and Charges Related to Co-Location Services To Increase LCN and IP Network Fees and Add a Description of Access to Trading and Execution Services and Connectivity to Included Data Products).

[6] *See* Securities Exchange Act Release No. 99713 (March 12, 2024) (SR–NYSEArca–2024–22).

[7] *See* Securities Exchange Act Releases No. 87408 (October 28, 2019), 84 FR 58778 (November 1, 2019) (SR–NYSECHX–2019–12) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Fee Schedule of NYSE Chicago, Inc.), and 83351 (May 31, 2018), 83 FR 26314 (June 6, 2018) (SR–NYSENAT–2018–07) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Adopt Co-Location Services and Fees In Connection With the Re-Launch of Trading on the Exchange and To Amend Its Schedule of Fees and Rebates To Provide for Such Co-Location Services).

proposes to break out the NYSE Chicago and NYSE National market data feeds in Included Data Products, as follows (proposed additions underlined):

NYSE Chicago
NYSE Chicago Aggregated Lite
NYSE Chicago BBO
NYSE Chicago Integrated Feed
NYSE Chicago Trades
NYSE National
NYSE National Aggregated Lite
NYSE National BBO
NYSE National Integrated Feed
NYSE National Trades

BILLING CODE 8011–01–C

The Exchange expects that the present filing will become operative immediately upon the filings to establish a fee for the Aggregated Lite Feed becoming operative. The Exchange expects such operative date or dates to be no later than the second quarter of 2024. It will announce the date or dates through a customer notice.

The Exchange does not charge for connectivity to the Included Data Feeds. Accordingly, it would not charge for connectivity to the Aggregated Lite Feeds.

General

The proposed changes would not apply differently to distinct types or sizes of market participants. Rather, they would apply to all Users equally. As is currently the case, the purchase of any colocation service, including connectivity to the Aggregated Lite Feeds, would be completely voluntary and the Fee Schedule would be applied uniformly to all Users. FIDS does not expect that the proposed rule change will result in new Users.

The proposed changes are not otherwise intended to address any other issues relating to co-location services and/or related fees, and the Exchange is not aware of any problems that customers would have in complying with the proposed change.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[8] in general, and furthers the objectives of Section 6(b)(5) of the Act,[9] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange further believes that the proposed rule change is consistent with Section 6(b)(4) of the Act,[10] because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers, or dealers.

The Proposed Change Is Reasonable

The Exchange believes that the proposed rule change is reasonable and would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest, because adding the Aggregated Lite Feeds would increase the number of Included Data Products available to Users for no additional charge. All Users that voluntarily select to access the LCN or IP network would not be subject to a charge above and beyond the fee paid for the relevant LCN or IP network access. Accordingly, the Exchange believes that the proposed change is reasonable because the change would mean that a User would have the option of adding connectivity to additional market data feeds without paying additional charges.

Adding the proposed additional Included Data Products would allow a User to connect to any of the Aggregated Lite Feeds that it wished, but would not require it to do so. As now, a User would be able to determine which Included Data Products, if any, to which it connects, based on what would best serve its needs, tailoring the service to the requirements of its business operations.

The Exchange believes that the proposed rule change is reasonable because, as with the other Included Data Products, it believes it is not the exclusive method to connect to the Aggregated Lite Feeds. As alternatives to connecting to the Aggregated Lite Feeds as Included Data Products, a User may connect to the market data feeds through another User or through a connection to an Exchange access center outside the data center, third party access center, or third party vendor.

By adding the Aggregated Lite Feeds and setting forth the NYSE Chicago and NYSE National feeds already offered, the proposed change would ensure that the list of Included Data Products was up to date and consistent in the level of detail. Accordingly, the Exchange believes that the proposed rule change is reasonable and would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest, as it would ensure that the description of Included Data Products was complete, ensuring that it is accessible and transparent, and providing market participants with clarity as to what connectivity is included in the purchase of access to the LCN and IP networks.

The Proposed Change Is Equitable and Not Unfairly Discriminatory

The Exchange believes that the proposed change provides for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons

[8] 15 U.S.C. 78f(b).

[9] 15 U.S.C. 78f(b)(5).

[10] 15 U.S.C. 78f(b)(4).

using its facilities and does not unfairly discriminate between customers, issuers, brokers, or dealers because adding the Aggregated Lite Feeds would increase the number of Included Data Products available to Users for no additional charge. All Users that voluntarily select to access the LCN or IP network would not be subject to a charge above and beyond the fee paid for the relevant LCN or IP network access. Accordingly, the Exchange believes that the proposed change is equitable and not unfairly discriminatory because the change would mean that a User would have the option of adding connectivity to additional market data feeds without paying additional charges.

Further, the Exchange believes that the proposed change is equitable and not unfairly discriminatory since, as is true now, the proposed change would not apply differently to distinct types or sizes of Users but would apply to all Users equally. Moreover, adding the proposed additional Included Data Products would allow a User to connect to any of the Aggregated Lite Feeds that it wished, but would not require it to do so. As now, a User would be able to determine which Included Data Products, if any, to which it connects, based on what would best serve its needs, tailoring the service to the requirements of its business operations.

By adding the Aggregated Lite Feeds and setting forth the NYSE Chicago and NYSE National feeds already offered, the proposed change would ensure that the list of Included Data Products was up to date and consistent in the level of detail. Accordingly, the Exchange believes that the proposed rule change is equitable and not unfairly discriminatory, as it would ensure that the description of Included Data Products was complete, ensuring that it is accessible and transparent, and providing market participants with clarity as to what connectivity is included in the purchase of access to the LCN and IP networks.

For the reasons above, the proposed changes do not unfairly discriminate between or among market participants that are otherwise capable of satisfying any applicable co-location fees, requirements, terms, and conditions established from time to time by the Exchange.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposal will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of Section 6(b)(8) of the Act.[11]

The Exchange believes that the proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act because adding the Aggregated Lite Feeds would increase the number of Included Data Products available to Users for no additional charge. All Users that voluntarily select to access the LCN or IP network would not be subject to a charge above and beyond the fee paid for the relevant LCN or IP network access. Accordingly, the change would mean that a User would have the option of adding connectivity to additional market data feeds without paying additional charges.

Adding the proposed additional Included Data Products would allow a User to connect to any of the Aggregated Lite Feeds that it wished, but would not require it to do so. In this way, the proposed changes would enhance competition by, as now, enabling a User to determine to which Included Data Products, if any, it connects, based on what would best serve its needs, tailoring the service to the requirements of its business operations.

The Exchange believes that the proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act because, as with the other Included Data Products, it believes it is not the exclusive method to connect to the Aggregated Lite Feeds. As alternatives to connecting to the Aggregated Lite Feeds as Included Data Products, a User may connect to the market data feeds through another User or through a connection to an Exchange access center outside the data center, third party access center, or third party vendor.

By adding the Aggregated Lite Feeds and setting forth the NYSE Chicago and NYSE National feeds already offered, the proposed change would ensure that the list of Included Data Products was up to date and consistent in the level of detail. Accordingly, the Exchange believes that the proposed additions to the description of Included Data Products would make the description more accessible and transparent. In this manner, the proposed change would provide market participants with clarity as to what connectivity is included in the purchase of access to the LCN and IP networks, thereby enhancing competition by ensuring that all Users have access to the same information regarding the Included Data Products.

[11] 15 U.S.C. 78f(b)(8).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[12] and Rule 19b–4(f)(6) thereunder.[13] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[14]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[15] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

[12] 15 U.S.C. 78s(b)(3)(A)(iii).

[13] 17 CFR 240.19b–4(f)(6).

[14] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires the Exchange to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[15] 15 U.S.C. 78s(b)(2)(B).

Electronic Comments

• Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or

• Send an email to *rule-comments@sec.gov.* Please include file number SR–NYSEARCA–2024–28 on the subject line.

Paper Comments

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSEARCA–2024–28. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSEARCA–2024–28 and should be submitted on or before April 18, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[16]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99847; File No. SR–LCH SA–2024–002]

Self-Regulatory Organizations; LCH SA; Notice of Filing of Proposed Rule Change Relating to the CDSClear Select Membership Model

March 22, 2024.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on March 13, 2024, Banque Centrale de Compensation, which conducts business under the name LCH SA (''LCH SA''), filed with the Securities and Exchange Commission (''Commission'') the proposed rule change described in Items I, II and III below, which Items have been primarily prepared by LCH SA. The Commission is publishing this notice to solicit comments on the Proposed Rule Change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

LCH SA is proposing to amend its CDS Clearing Rule Book (''Rule Book'') and CDS Clearing Procedures (''Procedures'') to incorporate new terms and to make conforming, clarifying and clean-up changes to implement the new model of CDSClear select membership (the ''Proposed Rule Change'').

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, LCH SA included statements concerning the purpose of and basis for the Proposed Rule Change and discussed any comments it received on the Proposed Rule Change. The text of these statements may be examined at the places specified in Item IV below. LCH SA has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

In accordance with the current Rule Book, Select Members can provide clearing services in respect of credit default swaps (''CDS'') and options on CDS (collectively, the ''CDSClear Clearing Services'') to Affiliates only. LCH SA is proposing to extend the possibility for Select Members to provide CDSClear Clearing Services to any client, including Affiliates (the ''New Select Membership'') to allow some prospective clearing members that wish to provide clearing services to non-affiliated clients without becoming General Members. General Members must participate in Competitive Bidding for Auction Packages and submit prices to LCH SA, and thus the New Select Membership would allow some clearing members to provide clearing services to non-affiliated clients even if they do not have the capacity to participate in competitive bidding or to submit prices to LCH SA.

Pursuant to the New Select Membership, LCH SA is proposing to remove the requirement for Select Members to participate in Competitive Bidding for Auction Packages, including trades belonging to the Product Families they have elected to clear with LCH SA. Indeed, as part of the competitive auction process applicable in the context of the default management process implemented in respect of the default of a Clearing Member, each non-defaulting Clearing Member is required to submit bids in respect of any portfolio of trades reflecting the Cleared Transactions of the Defaulting Clearing Member, subject to exceptions provided for in the Rule Book; among them, a non-defaulting Clearing Member which is a Select Member shall submit bids only in respect of a portfolio of trades that does not include any trade which does not belong to the relevant Select Member's Products Families, currently defined as the categories of credit default swaps (''CDS'') and options on CDS in respect of which LCH SA provides clearing services and that may be selected by a Select Member in the relevant form (the ''Product Family Form''). Instead, LCH SA is proposing to add the option for Select Members to elect to participate in Competitive Bidding for Auction Packages at their own discretion, in addition to participating in the CDS Default Management Group and CDS Default Management Committee. Unlike Clearing Members admitted as General Members, Select Members will not benefit from the possibility to subscribe to the unlimited tariff allowing them to clear an unlimited number of trades for their own account for an annual fixed fee set out in the CDSClear fee grid.[3]

Pursuant to the New Select Membership, LCH SA also is proposing to change the method by which Select

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] The CDSClear fee grid is available on LCH SA's website at the following link: *https://www.lch.com/services/cdsclear/fees.*

Members submit prices to LCH SA. Currently, Select Members shall submit prices to LCH SA in respect of its open positions belonging to the Product Families elected by the relevant Select Member. Select Members would be able to choose whether to submit prices under the New Select Membership in respect of the relevant Trading Cities they have selected in the new ''Select Member Form,'' as discussed below.

At this time, LCH SA is not proposing to amend the Risk Management Framework or its free grid as a result of providing the New Select Membership. General Members will continue to have an unlimited fee tariff option, unlike Select Members, and General Members on variable tariff pay will have both lower fixed fee and lower variable fees than Select Members. General Members who clear for clients may also be able to give their clients the same liquidity margin as other General Members, unlike Select Members, who may incur a higher liquidity margin, including a liquidity concentration charge, for large positions, including large client positions.

In order to implement the Proposed Rule Change, LCH SA is proposing to amend the Rule Book and Section 1 and Section 5 of the Procedures to reflect the amended terms and conditions of the New Select Membership model.

Proposed Revisions to the Rule Book and Procedures

(i) CDSClear Client Clearing Services

LCH SA is proposing to extend the possibility for Select Members to provide CDSClear clearing services to any client, in addition to Affiliates.

LCH SA is proposing to delete the defined term, ''Affiliated Firm'' since it was used only in respect of the current Select Member model pursuant to which a Select Member may provide client clearing services to Affiliated Firms, which include their Affiliates and any entity that is otherwise a member to the same institutional protection scheme as the Clearing Member. Since Select Members will be permitted to provide clearing services to any client, regardless of whether it is an Affiliated Firm, there is no need to keep such defined term and therefore any reference to ''Affiliated Firm(s)'' or to the provision of client clearing services to Affiliated Firm(s) is proposed to be deleted from the definitions of ''CCM'', ''FCM/BD Clearing Member'' and ''Select Member'', as well as from Article 2.2.1.1(iv) and (v), Article 2.2.2.1(iv), Article 4.2.7.2(ii), and Article 5.1.1.1. Indent (i) of Articles 5.1.1.2 and 6.1.1.2 of the Rule Book will be also removed since such indent is currently providing for the condition pursuant to which a Select Member may provide client clearing services to an Affiliated Firm only.

As a result of the removal of the condition that a Select Member may provide client clearing services to Affiliated Firms only, the term ''Affiliated Firm'' will be revised to ''Affiliate'' (as that term is defined in the Rule Book) in the definition of the following defined terms: ''CCM Indirect Gross Segregated Account Client'', ''CCM Indirect Net Segregated Account Client'', ''CCM Individual Segregated Account Client'' and ''FCM/BD Client'' and in Article 6.1.1.2.

The definition of ''Select Member'' would also be revised to clarify that Select Members may offer CDSClear Clearing Services to any client, including Affiliates.

LCH SA is proposing to revise Article 4.2.7.2(ii) by deleting reference to ''General Member'' and ''Select Member'' as well as ''Affiliated Firms'', as this distinction would no longer be relevant with Select Members having the option to be a Price Contribution Participant and providing CDS Client Clearing Services to any client.

(ii) Deletion of Obligation To Participate in Competitive Bidding

LCH SA is proposing to delete the defined terms, ''Product Family'' and ''Product Family Form'', as these defined terms are only applicable when participation in Competitive Bidding is mandatory for all Select Members in respect of the Product Families they have selected in the Product Family Form. Because of the new options Select Members will have, there is no longer a need to use the Product Family Form.

As a result, LCH SA is proposing to delete any reference to ''Product Family Form'' and ''Product Family'' in Section 1.1.1, Article 2.2.0.4, Article 3.1.6.2(ii), Article 3.1.6.5, and Clause 5.4.1(ii) and Clause 6.1 of Appendix 1 (*CDS Default Management Process*), and replace these terms with the new defined term of ''Select Member Form'' (as further explained in sub-paragraph (iii) below), where relevant (*e.g.,* in the definition of ''CDS Clearing Documentation'').

LCH SA is also proposing to delete Article 3.1.6.8 related to ''Product Family Form'' in its entirety as it is no longer relevant as a result of the changes made pursuant to this subparagraph (ii).

Finally, any reference to a General Member or a Select Member will be removed from current Clause 6.1.2(ii)(a) of Appendix 1 (*CDS Default Management Process*) because of the removal of the ''Product Family Form''. Specifically, there is no longer a need to make a distinction between both memberships for the purposes of the registration process for the Index Swaption service in the context of the transfer of positions resulting from the auction process.

(iii) Select Member Form

LCH SA is proposing to add a new defined term, ''Select Member Form'', in Section 1.1.1 of the Rule Book, to define the form by which the Select Member could make the elections (including the option to participate in Competitive Bidding)—as further elaborated in renumbered Article 2.2.0.4 of the Rule Book and Section 1 and Section 5 of the Procedures.

LCH SA is proposing to revise Section 1.1 (*Application Procedure*), indent (c), entitled ''*CDSClear Application Form*'' in the Procedures to replace the term ''Product Family Form'', which is no longer relevant, by the term ''Select Member Form''. LCH SA is also proposing to clarify that the Select Member Form will be made available by LCH SA's CDSClear Business Development & Relationship Management team.

This Select Member Form would be used by Select Members to elect to participate in Competitive Bidding for selected Trading Cities. The election to participate in Competitive Bidding would have to be received within 1 hour of the declaration of an Event of Default by LCH SA—as noted in revised Clause 5.4.1(ii) of Appendix 1 of the Rule Book. In addition, Clause 5.4.1(ii) of Appendix 1 would provide that the Select Member would have to comply with the criteria referenced in Article 2.2.1.1(xi) of the Rule Book.

LCH SA is proposing to revise renumbered Article 2.2.0.4 of the Rule Book to add the possibility for Select Members to elect to participate in Competitive Bidding subject to the conditions set forth in Article 2.2.1.1 of the Rule Book (*Membership Requirements*).

Article 2.2.1.1 of the Rule Book sets forth the conditions that any Applicant wishing to be admitted as a Clearing Member by LCH SA must satisfy. As such conditions apply to both General Members and Select Members, LCH SA is proposing to remove reference to ''Select Member'' and ''General Member'' from Article 2.2.1.1(iv) and (v) and Article 2.2.2.1(iv) of the Rule Book. In addition, LCH SA is proposing to specify in Article 2.2.1.1(xi) that Select Members wishing to elect to participate in Competitive Bidding would have to demonstrate being able to successfully participate in the implementation of the

CDS Default Management Process and in regular fire drills run by LCH SA in accordance with the Rule Book.

Provided that Select Members comply with the conditions referenced in Article 2.2.1.1 of the Rule Book, LCH SA is proposing to revise Article 2.2.0.5 (now renumbered as Article 2.2.0.4) of the Rule Book to include the possibility for Select Members to:

(i) be a Price Contribution Participant in respect of one or more Trading City(ies); if a Select Member has elected to be a Price Contribution Participant, and therefore to receive the Price Requirements Files in respect of the relevant Trading Cities, it will be bound by all obligations of any Price Contribution Participant as set out in the Rule Book and Section 5 of the Procedures. Under current Article 2.2.05, the Select Member has the possibility to contribute to prices by submitting Market Data (and therefore to be a Price Contribution Participant) in accordance with Section 5 of the Procedures but is under no obligation to do so, which would be no longer the case under the New Select Membership model; indeed, once a Select Member will elect to be a Price Contribution Participant for one or more Trading Cities, it will be subject to the obligation to provide the Market Data for the Trading Cities in respect of which it has Open Positions;

(ii) participate in Competitive Bidding as further detailed in Clause 5 of the CDS Default Management Process, subject to Article 2.2.1.1(xi); it will be also clarified that a Select Member which has elected to participate in Competitive Bidding will be subject to the provisions of the clearing rules which apply to any non-defaulting Clearing Member which is required to participate in Competitive Bidding for each Auction Package;

(iii) nominate DMG Representatives in accordance with Clause 11.2.2 of the CDS Default Management Process, whereas, in accordance with the current version of Clause 11.2.2 of the CDS Default Management Process, each Clearing Member, including any Select Member, shall nominate DMG Representatives. Since the participation to the Competitive Bidding process will be no longer required in respect of Product Families for a Select Member, the obligation to participate in the CDS Default Management Group will become optional for consistency purposes. LCH SA would expect that Select Members that have elected to participate in Competitive Bidding will be interested in participating in the CDS Default Management Group and therefore nominate DMG Representatives for that purpose; and/or

(iv) nominate representatives to be appointed as members of the CDS Default Management Committee in accordance with Clause 10.2 of the CDS Default Management Process. Similarly to the nomination of DMG Representatives as described in previous indent (iii), each Clearing Member, including any Select Member, shall nominate representatives to be appointed as members of the CDS Default Management Committee in accordance with current Clause 10.2 of the CDS Default Management Process and for the same reasons, this will become only an option for the Select Member which might be interested in participating in the CDS Default Management Committee if they were to select the possibility to participate in Competitive Bidding.

Since a Select Member will need to make the above listed elections under the New Select Membership model, the possibility to change its election in respect of its contribution to prices as currently provided for in Article 2.2.0.5 has been extended to all the new elections to be made as well; hence, the Select Member will be able to change any of its elections by providing LCH SA with a copy of a duly signed updated Select Member Form, in accordance with the conditions set out in Section 5 of the Procedures pursuant to the revised Article 2.2.0.5 (now renumbered as Article 2.2.0.4).

In addition, LCH SA is proposing to revise the definition of ''Price Contribution Participant'' in Section 1.1.1 of the Rule Book to clarify that it includes Select Members that have opted for submitting Market Data in accordance with Article 2.2.0.4, rather than Section 5 of the Procedures.

In addition, LCH SA is proposing to revise Section 5.18.1 (*Market Data submission*) of the Procedures to delete a paragraph that notes that a Select Member may decide to receive or stop receiving Price Requirement Files and provides instructions for how a such Select Member can choose to receive or stop receiving Price Requirement Files. Indeed, the election to be a Price Contribution Participant will be made by the Select Member by using the new Select Member Form and this election can be updated by updating such form in the conditions set out in amended paragraph (c) of Section 5.11 of the Procedures.

Furthermore, Clauses 10.2.1 and 11.2.2 of Appendix 1 (*CDS Default Management Process*) would be revised to include representatives nominated by Select Members to the CDS Default Management Group and CDS Default Management Committee since the Select Members will be permitted to opt for the possibility to participate in the CDS Default Management Group and/or the CDS Default Management Committee in accordance with amended Article 2.2.0.4 (currently Article 2.2.0.5) as further explained in page 11 above.

LCH SA is also proposing to amend indent (d) entitled ''*Due diligence and review process*'' of Section 1.1 (*Application Procedure*) of the Procedures to include the obligation for Select Members to successful carry out tests as referenced in Article 2.2.1.1 (xi) of the Rule Book.

Finally, LCH SA is proposing to revise Section 5.11(c) (*Update of the Select Member Form*) of the Procedures to also specify that the Select Member, having elected to participate in Competitive Bidding, will be required to participate in Competitive Bidding for each Auction Package.

(iv) Updated Select Member Form

LCH SA is proposing to revise Article 2.2.0.5 to enable Select Members to elect to opt out of Competitive Bidding and all other elections in sub-paragraphs (i) to (iv) of Article 2.2.0.5, under conditions set forth in Section 5 of the Procedures as this is currently the case but in respect of the contribution to prices only. The Select Member Form will allow the Select Member to notify its elections to LCH SA and also to update it should it wish to change any of its elections, in accordance with the amended provisions of Section 5.11 of the Procedures, as further described below.

LCH SA would revise Section 5.11(c), ''*Update of the Select Member Form*'', (formerly, ''*Update of the Product Family Form*'') of the Procedures to cover the update process of the Select Member Form, as the Product Family Form, and any reference thereto, is no longer relevant. Any update to the Select Member Form may be subject to passing requisite tests prescribed by LCH SA and if the update pertains to the Select Member no longer participating in the Competitive Bidding Process, such update will be effective on the eighth Clearing Day following the Clearing Day on which the updated Select Member Form is received, in order to ensure that the Select Member will still be required to participate in Competitive Bidding if an Event of Default is declared in respect of another Clearing Member at the same time the updated Select Member Form of such Select Member is received by LCH SA.

LCH SA is also proposing to specify that Select Members should be able to

change any of its election(s) via provision of an updated Select Member Form to the CDSClear Business Development & Relationship Management team via email.

(v) Additional Amendments

LCH SA also proposes to make other revisions to the Rule Book and Section 1 and Section 5 of the Procedures to correct certain cross-references, grammar and/or typographical errors, and to provide additional clarification. For example, Article 1.2.2.4 of the Rule Book will be amended to clarify that the reference to ''days'' means ''calendar days'' for the avoidance of doubt.

2. Statutory Basis

LCH SA believes the Proposed Rule Change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered clearing agencies, including with section 17A(b)(3)(B) [4] and section 17A(b)(3)(F) of the Act.[5] section 17A(b)(3)(B) of the Act requires, *inter alia,* that the rules of a clearing agency provide that any registered broker or dealer, bank or other person or class of persons may become a participant in such clearing agency.[6] Section 17A(b)(3)(F) of the Act requires, *inter alia,* that a clearing agency's rules are designed to promote the prompt and accurate clearance and settlement of securities transactions, to assure the safeguarding of securities and funds in the custody or control of LCH SA, and are not designed to permit the unfair discrimination in the admission of participants or among participants in the use of the clearing agency.[7]

Per LCH SA's current CDSClear Rule Book, a Clearing Member may either be designated as a General Member or a Select Member.[8] A General Member is either a CCM [9] or an FCM/BD Clearing Member [10] that has been admitted by LCH SA as a General Member in accordance with Section 1 of the Procedures.[11] A Select Member is either a CCM or an FCM/BD Clearing Member that: (a) does not provide CDS Client Clearing Services to Clients other than Affiliated Firms; and (b) has been admitted by LCH SA as a Select Member in accordance with Section 1 of the Procedures.[12] LCH SA is proposing to amend the definition of a Select Member to allow Select Members to offer client clearing to any client, including Affiliates. In doing so, LCH SA is proposing to remove the obligation that Select Members participate in Competitive Bidding for Auction Packages including trades belonging to the Product Families they actively trade. Instead, Select Members would have the ability to elect to participate in Competitive Bidding for Auction Packages at their own discretion. Furthermore, Select Members may elect to contribute end of day prices and participate in the Default Management Process and Default Management Committee. This will enhance LCH SA's ability to contain losses and manage a clearing member default. Select Members would also be incentivized to become General Members for purposes of participating in default auctions as their client clearing activity grows. By expanding its membership for Select Members to include any client, including Affiliates and thus expand participation in clearing, LCH SA believes such changes are consistent with section 17A(b)(3)(B) [13] and section 17A(b)(3)(F) [14] of the Act such that its rules are designed to promote the prompt and accurate clearance and settlement of securities transactions, to assure the safeguarding of securities and funds in the custody or control of LCH SA, and are not designed to permit the unfair discrimination in the admission of participants or among participants in the use of the clearing agency.

LCH SA also believes the Proposed Rule Change is consistent with Rule 17Ad–22(e)(1) of the Act which requires, *inter alia,* that a covered clearing agency establish, implement, maintain and enforce written policies and procedures reasonably designed to provide for a well-founded, clear, transparent, and enforceable legal basis for each aspect of its activities in all relevant jurisdictions.[15] LCH SA believes the changes to its Rule Book and Procedures are clear, understandable, and consistent with the relevant laws and regulations applicable to LCH SA. In addition, LCH SA believes changes to the Rule Book and Procedures regarding the extension of the possibility for Select Members to provide CDSClear clearing services to any client, including Affiliates and publishing such changes on its public website provides greater transparency to Clearing Members and their customers, and to the general public. Therefore, LCH SA believes that the Proposed Rule Change is consistent with Rule 17Ad–22(e)(1).[16]

LCH SA also believes that the Proposed Rule Change is consistent with Rule 17Ad–22(e)(13) [17] of the Act which requires, *inter alia,* that a covered clearing agency establish, implement, maintain and enforce written policies and procedures reasonably designed to ensure the covered clearing agency has the authority and operational capacity to take timely action to contain losses and liquidity demands and continue to meet its obligations.[18] Select Members were previously required to bid during default management auctions if the auction package contained products in the product family they subscribed to, regardless of whether the Select Member actively traded the product. The requirement to participate in such default auctions presents challenges for certain Select Members that don't actively trade in the products being auctioned, and thus may serve as an obstacle to clearing agency membership. Select Members also may not have the operational capacity to participate in default auctions as General Members. This is evidenced by LCH SA's experience facilitating fire drill exercises requiring participation by Select Members.[19] LCH SA's proposed changes to the mandatory obligation to bid in default auctions for Select Members will address this issue. Furthermore, LCH SA believes the existing pool of General Members required to bid, in addition to the Select

[9] A ''CCM'' is defined in the current CDS Clearing Rule Book as any legal entity admitted as a clearing member in accordance with the CDS Clearing Rules and party to the CDS Admission Agreement, provided that if such entity wishes to provide CDS CCM Client Clearing Services described in TITLE V, it shall either (i) be a General Member or (ii) provide such CDS CCM Client Clearing Services to its Affiliated Firms only. If such entity is an FCM/BD, it must satisfy LCH SA that it is able to provide the CDS Client Clearing Services in accordance with Title V prior to offering such services.

[10] A ''FCM/BD Clearing Member'' is defined in the current CDS Clearing Rule Book as any FCM, BD or a legal entity that is both FCM and BD that has been admitted as a clearing member in accordance with the CDS Clearing Rules and is a party to the CDS Admission Agreement and which has not elected to become a CCM, provided that if such FCM/BD Clearing Member wishes to provide CDS Client Clearing Services described in TITLE VI, it shall either (i) be a General Member or (ii) provide such CDS Client Clearing Services to its Affiliated Firms only.

[19] For example, Select Members have historically required assistance managing default files and have routinely requested assistance addressing questions during fire drill exercises.

Members that opt in to bidding on default auction portfolios provides sufficient participation for purposes of ensuring LCH SA can take timely action to contain losses and liquidity demands and continue to meet its obligations. Therefore, LCH SA believes that the Proposed Rule Change is consistent with Rule 17Ad–22(e)(13).[20]

Finally, LCH SA believes that the Proposed Rule Change is consistent with Rule 17Ad–22(e)(18) [21] under the Act. Rule 17Ad–22(e)(18) under the Act requires, *inter alia,* that a covered clearing agency establish, implement, maintain and enforce written policies and procedures reasonably designed to establish objective, risk-based, and publicly disclosed criteria for participation, which permit fair and open access by direct and, where relevant, indirect participants and other financial market utilities, require participants to have sufficient financial resources and robust operational capacity to meet obligations arising from participation in the clearing agency, and monitor compliance with such participation requirements on an ongoing basis.[22] LCH SA is proposing to expand its membership criteria for Select Members by allowing Select Members to clear for any clients, including Affiliates. LCH SA is proposing to remove the obligation that Select Members participate in Competitive Bidding for Auction Packages including trades belonging to the Product Families they actively trade. Instead, Select Members would have the ability to elect to participate in Competitive Bidding for Auction Packages at their own discretion. LCH SA believes this proposed change more accurately captures the risk profile of Select Members as it pertains to their size and operational capabilities. Specifically, Select Members are typically non-CDS market-making banks (price takers) and thus, smaller Clearing Members. In addition, Select Members may not have the operational capacity to bid on products they don't actively trade during a default management auction. As such, LCH SA believes that the Proposed Rule Change is consistent with Rule 17Ad–22(e)(18) under the Act.[23]

B. Clearing Agency's Statement on Burden on Competition

Section 17A(b)(3)(I) of the Act requires that the rules of a clearing agency not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.[24]

LCH SA does not believe the Proposed Rule Change would impose burdens on competition that are not necessary or appropriate in furtherance of the purposes of the Act. Specifically, the Proposed Rule Change will contribute to offer access to clearing services to any client of Select Members expanding the client clearing activity. The Proposed Rule Change will also remove the burden of Select Members from having the obligation to bid on products they don't actively trade in default management auctions. LCH SA further believes the Proposed Rule Change is equitable for both General Members and Select Members, as clearing members will continue to have discretion in electing to be either General Members or Select Members under the new membership model. Furthermore, existing General Members will not be prevented from switching to become Select Members under the Proposed Rule Change. The increased access to clearing services under the Proposed Rule Change may result in increased liquidity in the service as membership grows. Therefore, LCH SA does not believe that the Proposed Rule Change would impose burdens on competition that are not necessary or appropriate in furtherance of the purposes of the Act.

C. Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments relating to the Proposed Rule Change have not been solicited or received. LCH SA will notify the Commission of any written comments received by LCH SA.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will: (A) by order approve or disapprove such proposed rule change, or (B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*) or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–LCH SA–2024–002 on the subject line.

Paper Comments

- Send paper comments in triplicate to Vanessa A. Countryman, Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–LCH SA–2024–002. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filings will also be available for inspection and copying at the principal office of LCH SA and on LCH SA's website at *http://www.lch.com/resources/rules-and-regulations/proposed-rule-changes-0.*

Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–LCH SA–2024–002 and should be submitted on or before April 18, 2024.

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 35162; File No. 812–15473]

Oaktree Fund Advisors, LLC and Oaktree Diversified Income Fund Inc.

March 22, 2024

AGENCY: Securities and Exchange Commission (''Commission'' or ''SEC'').

ACTION: Notice.

Notice of application for an order under sections 6(c) and 23(c)(3) of the Investment Company Act of 1940 (the ''Act'') for an exemption from rule 23c–3 under the Act.

Summary of Application: Applicants request an order under sections 6(c) and 23(c)(3) of the Act for an exemption from certain provisions of rule 23c–3 to permit certain registered closed-end investment companies to make repurchase offers on a monthly basis.

Applicants: Oaktree Fund Advisors, LLC and Oaktree Diversified Income Fund Inc.

Filing Dates: The application was filed on June 2, 2023, and amended on December 28, 2023.

Hearing or Notification of Hearing: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing on any application by emailing the SEC's Secretary at *Secretarys-Office@sec.gov* and serving the Applicants with a copy of the request by email, if an email address is listed for the relevant Applicant below, or personally or by mail, if a physical address is listed for the relevant Applicant below. Hearing requests should be received by the Commission by 5:30 p.m. on April 16, 2024, and should be accompanied by proof of service on the Applicants, in the form of an affidavit, or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing the Commission's Secretary.

ADDRESSES: The Commission: *Secretarys-Office@sec.gov.* Applicants: Brian F. Hurley, Esq., Oaktree Diversified Income Fund Inc., Brookfield Place, 250 Vesey Street, 15th Floor, New York, NY 10281–1023, with copies to Michael R. Rosella, Esq. and Thomas D. Peeney, Esq., Paul Hastings LLP, 200 Park Avenue, New York, NY 10166.

FOR FURTHER INFORMATION CONTACT: Kieran G. Brown, Senior Counsel, or Terri Jordan, Branch Chief, at (202) 551–6825 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: For Applicants' representations, legal analysis, and conditions, please refer to Applicants' first amended and restated application, dated December 28, 2023, which may be obtained via the Commission's website by searching for the file number at the top of this document, or for an Applicant using the Company name search field on the SEC's EDGAR system. The SEC's EDGAR system may be searched at *https://www.sec.gov/edgar/searchedgar/legacy/companysearch.html.* You may also call the SEC's Public Reference Room at (202) 551–8090.

For the Commission, by the Division of Investment Management, under delegated authority.

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99842; File No. SR–NYSEARCA–2023–63]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Designation of a Longer Period for Commission Action on Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change To List and Trade Shares of the Grayscale Ethereum Futures Trust (ETH) ETF Under NYSE Arca Rule 8.200–E, Commentary .02 (Trust Issued Receipts)

March 22, 2024.

On September 19, 2023, NYSE Arca, Inc. (''NYSE Arca'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change to list and trade shares (''Shares'') of the Grayscale Ethereum Futures Trust (ETH) ETF (''Trust'') under NYSE Arca Rule 8.200–E, Commentary .02 (Trust Issued Receipts). The proposed rule change was published for comment in the **Federal Register** on October 3, 2023.[3]

On November 15, 2023, pursuant to section 19(b)(2) of the Act,[4] the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change.[5] On December 18, 2023, the Commission instituted proceedings under section 19(b)(2)(B) of the Act[6] to determine whether to approve or disapprove the proposed rule change.[7]

Section 19(b)(2) of the Act[8] provides that, after initiating proceedings, the Commission shall issue an order approving or disapproving the proposed rule change not later than 180 days after the date of publication of notice of filing of the proposed rule change. The Commission may extend the period for issuing an order approving or disapproving the proposed rule change, however, by not more than 60 days if the Commission determines that a longer period is appropriate and publishes the reasons for such determination. The proposed rule change was published for comment in the **Federal Register** on October 3, 2023.[9] The 180th day after publication of the proposed rule change is March 31, 2024. The Commission is extending the time period for approving or disapproving the proposed rule change for an additional 60 days.

The Commission finds that it is appropriate to designate a longer period within which to issue an order approving or disapproving the proposed rule change so that it has sufficient time to consider the proposed rule change and the issues raised therein. Accordingly, the Commission, pursuant to section 19(b)(2) of the Act,[10] designates May 30, 2024, as the date by which the Commission shall either approve or disapprove the proposed

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–821, OMB Control No. 3235–0776]

Submission for OMB Review; Comment Request; Extension: Rule 18f–4

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (the ''Commission'') has submitted to the Office of Management and Budget (''OMB'') a request for extension of the previously approved collection of information discussed below.

Rule 18f–4 (17 CFR 270.18f–4) under the Investment Company Act of 1940 (15 U.S.C. 80a–1 *et seq.*) (the ''Investment Company Act'') permits a fund to enter into derivatives transactions, notwithstanding the prohibitions and restrictions on the issuance of senior securities under section 18 of the Investment Company Act. A fund that relies on rule 18f–4 to enter into derivatives transactions generally is required to: adopt a derivatives risk management program; have its board of directors approve the fund's designation of a derivatives risk manager and receive direct reports from the derivatives risk manager about the derivatives risk management program; and comply with a VaR-based test designed to limit a fund's leverage risk consistent with the investor protection purposes underlying section 18 of the Investment Company Act. Rule 18f–4 includes an exception from the derivatives risk management program requirement and limit on fund leverage risk if a fund limits its derivatives exposure to 10% of its net assets (the fund may exclude from this calculation derivatives transactions that it uses to hedge certain currency and interest rate risks). A fund relying on this exception will be required to adopt policies and procedures that are reasonably designed to manage its derivatives risks.

Rule 18f–4 also includes an exception from the VaR-based limit on leverage risk for a leveraged/inverse fund that cannot comply with rule 18f–4's limit on fund leverage risk and that, as of October 28, 2020, is: (1) in operation, (2) has outstanding shares issued in one or more public offerings to investors, and (3) discloses in its prospectus that it has a leverage multiple or inverse multiple that exceeds 200% of the performance or the inverse of the performance of the underlying index (for purposes of this Supporting Statement, such a fund is an ''over-200% leveraged/inverse fund''). A fund relying on this exception must disclose in its prospectus that it is not subject to rule 18f–4's limit on fund leverage risk.

Finally, rule 18f–4 permits funds to enter into reverse repurchase agreements (and similar financing transactions) and ''unfunded commitments'' to make certain loans or investments, and to invest in securities on a when-issued or forward-settling basis, or with a non-standard settlement cycle, subject to conditions tailored to these transactions.

The respondents to rule 18f–4 are registered open- and closed-end management investment companies and BDCs. Compliance with rule 18f–4 is mandatory for all funds that seek to engage, in reliance on the rule, in derivatives transactions and certain other transactions that the rule addresses, which would otherwise be subject to the restrictions of section 18 of the Investment Company Act.

The information collection requirements of rule 18f–4 are designed to ensure that funds maintain the required written derivatives risk management programs that promote compliance with the federal securities laws and protect investors, and otherwise comply with the requirements of the rule. The information collections also assist the Commission's examination staff in assessing the adequacy of funds' derivatives risk management programs and their compliance with the other requirements of the rule, and identifying weaknesses in a fund's derivatives risk management if violations occur or are uncorrected.

The respondents to rule 18f–4 are registered open- and closed-end management investment companies and BDCs. Compliance with rule 18f–4 is mandatory for all funds that seek to engage, in reliance on the rule, in derivatives transactions and certain other transactions that the rule addresses, which would otherwise be subject to the restrictions of section 18 of the Investment Company Act. To the extent that records required to be created and maintained by funds under the rule are provided to the Commission in connection with examinations or investigations, such information will be kept confidential subject to the provisions of applicable law.

The public may view background documentation for this information collection at the following website: *www.reginfo.gov.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice by April 29, 2024 to (i) *MBX.OMB.OIRA.SEC_desk_officer@omb.eop.gov* and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549, or by sending an email to: *PRA_Mailbox@sec.gov.*

Dated: March 25, 2024.

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–636, OMB Control No. 3235–0679]

Submission for OMB Review; Comment Request; Extension: Form PF & Rule 204(b)–1

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget a request for extension of the previously approved collection of information discussed below.

Rule 204(b)–1 (17 CFR 275.204(b)–1) under the Investment Advisers Act of 1940 (15 U.S.C. 80b–1 *et seq.*) implements sections 404 and 406 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the ''Dodd-Frank Act'') by requiring private fund advisers that have at least $150 million in private fund assets under management to report certain

information regarding the private funds they advise on Form PF. These advisers are the respondents to the collection of information.

Form PF is designed to facilitate the Financial Stability Oversight Council's (''FSOC'') monitoring of systemic risk in the private fund industry and to assist FSOC in determining whether and how to deploy its regulatory tools with respect to nonbank financial companies. The Commission and the Commodity Futures Trading Commission may also use information collected on Form PF in their regulatory programs, including examinations, investigations and investor protection efforts relating to private fund advisers.

Form PF divides respondents into two broad groups, Large Private Fund Advisers and smaller private fund advisers. ''Large Private Fund Advisers'' are advisers with at least $1.5 billion in assets under management attributable to hedge funds (''large hedge fund advisers''), advisers that manage ''liquidity funds'' and have at least $1 billion in combined assets under management attributable to liquidity funds and registered money market funds (''large liquidity fund advisers''), and advisers with at least $2 billion in assets under management attributable to private equity funds (''large private equity fund advisers''). All other respondents are considered smaller private fund advisers.

The Commission estimates that most filers of Form PF have already made their first filing, and so the burden hours applicable to those filers will reflect only ongoing burdens, and not start-up burdens. Accordingly, the Commission estimates the total annual reporting and recordkeeping burden of the collection of information for each respondent is as follows:

(a) For smaller private fund advisers making their first Form PF filing, an estimated amortized average annual burden of 13 hours for each of the first three years;

(b) for smaller private fund advisers that already make Form PF filings, an estimated amortized average annual burden of 15 hours for each of the next three years;

(c) for smaller private fund advisers, an estimated average annual burden of 5 hours for event reporting for smaller private equity fund advisers for each of the next three years;

(d) for large hedge fund advisers making their first Form PF filing, an estimated amortized average annual burden of 108 hours for each of the first three years;

(e) for large hedge fund advisers that already make Form PF filings, an estimated amortized average annual burden of 600 hours for each of the next three years;

(f) for large hedge fund advisers, an estimated average annual burden of 10 hours for current reporting for each of the next three years;

(g) for large liquidity fund advisers making their first Form PF filing, an estimated amortized average annual burden of 67 hours for each of the first three years;

(h) for large liquidity fund advisers that already make Form PF filings, an estimated amortized average annual burden of 284 hours for each of the next three years;

(i) for large private equity fund advisers making their first Form PF filing, an estimated amortized average annual burden of 84 hours for each of the first three years;

(j) for large private equity fund advisers that already make Form PF filings, an estimated amortized average annual burden of 128 hours for each of the next three years; and

(k) for large private equity fund advisers, an estimated average annual burden of 5 hours for event reporting for each of the next three years.

With respect to annual internal costs, the Commission estimates the collection of information will result in approximately 122.89 burden hours per year on average for each respondent. With respect to external cost burdens, the Commission estimates a range from $0 to $50,000 per adviser. Estimates of average burden hours and costs are made solely for the purposes of the Paperwork Reduction Act and are not derived from a comprehensive or even representative survey or study of the costs of Commission rules and forms. The changes in burden hours are due to the staff's estimates of the time costs and external costs that result from the adopted amendments, the use of updated data, and the use of different methodologies to calculate certain estimates. Compliance with the collection of information requirements of Form PF is mandatory for advisers that satisfy the criteria described in Instruction 1 to the Form. Responses to the collection of information will be kept confidential to the extent permitted by law. The Commission does not intend to make public information reported on Form PF that is identifiable to any particular adviser or private fund, although the Commission may use Form PF information in an enforcement action. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The public may view background documentation for this information collection at the following website: *www.reginfo.gov.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice by April 29, 2024 to (i) *MBX.OMB.OIRA.SEC_desk_officer@omb.eop.gov* and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549, or by sending an email to: *PRA_Mailbox@sec.gov.*

Dated: March 25, 2024.

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99845; File No. SR–FICC–2024–802]

Self-Regulatory Organizations; Fixed Income Clearing Corporation; Notice of Filing and Extension of Review Period of Advance Notice To Modify the GSD Rules (i) Regarding the Separate Calculation, Collection and Holding of Margin for Proprietary Transactions and That for Indirect Participant Transactions, and (ii) To Address the Conditions of Note H to Rule 15c3–3a

March 22, 2024.

Pursuant to section 806(e)(1) of Title VIII of the Dodd-Frank Wall Street Reform and Consumer Protection Act entitled the Payment, Clearing, and Settlement Supervision Act of 2010 (''Clearing Supervision Act'') [1] and Rule 19b–4(n)(1)(i) under the Securities Exchange Act of 1934 (''Act''),[2] notice is hereby given that on March 14, 2024, Fixed Income Clearing Corporation (''FICC'') filed with the Securities and Exchange Commission (''Commission'') the advance notice as described in Items I, II and III below, which Items have been prepared by the clearing agency.[3] The Commission is publishing this notice to solicit comments on the

[1] 12 U.S.C. 5465(e)(1).

[2] 17 CFR 240.19b–4(n)(1)(i).

[3] On March 14, 2024, FICC filed this advance notice as a proposed rule change (SR–FICC–2024–007) with the Commission pursuant to Section 19(b)(1) of the Act, 15 U.S.C. 78s(b)(1), and Rule 19b–4 thereunder, 17 CFR 240.19b–4. A copy of the proposed rule change is *available at dtcc.com/legal/sec-rule-filings.*

advance notice from interested persons and to extend the review period of the Advance Notice.

I. Clearing Agency's Statement of the Terms of Substance of the Advance Notice

This advance notice consists of modifications to FICC's Government Securities Division (''GSD'') Rulebook (''Rules'') [4] to (1) provide for FICC to calculate, collect, and hold margin for the proprietary transactions of a Netting Member separately and independently from the margin for transactions that the Netting Member submits to FICC on behalf of indirect participants; (2) simplify and revise the account types through which Members may record transactions at FICC and adopt a new Rule 2B to provide clearer public disclosures through the Rules regarding the GSD account structure; (3) allow Netting Members to elect for margin for indirect participant transactions to be calculated on a gross basis (*i.e.,* an indirect participant-by-indirect participant basis) and legally segregated from the margin for the Netting Member's proprietary transactions (as well as those of other indirect participants); (4) align FICC's margin calculation methodology with the expanded account types and enhance public disclosure through the Rules of that calculation methodology; and (5) simplify the requirements for brokered transactions so that they only apply to transactions executed by an Inter-Dealer Broker Netting Member on the trading platform offered by that Inter-Dealer Broker Netting Member.

These proposed rule changes are primarily designed to ensure that FICC has appropriate rules regarding the separate and independent calculation, collection, and holding of margin for proprietary transactions and that for indirect participant transactions in accordance with the requirements of Rule 17Ad–22(e)(6)(i) under the Act, and that FICC has appropriate rules to satisfy the conditions of Note H to Rule 15c3–3a under the Act for a broker-dealer to record a debit in the customer and broker-dealer proprietary account reserve formulas.[5]

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Advance Notice

In its filing with the Commission, the clearing agency included statements concerning the purpose of and basis for the advance notice and discussed any comments it received on the advance notice. The text of these statements may be examined at the places specified in Item IV below. The clearing agency has prepared summaries, set forth in sections A and B below, of the most significant aspects of such statements.

(A) Clearing Agency's Statement on Comments on the Advance Notice Received From Members, Participants, or Others

FICC has not received or solicited any written comments relating to this proposal. If any written comments are received, they will be publicly filed as an Exhibit 2 to this filing, as required by Form 19b–4 and the General Instructions thereto.

Persons submitting comments are cautioned that, according to Section IV (Solicitation of Comments) of the Exhibit 1A in the General Instructions to Form 19b–4, the Commission does not edit personal identifying information from comment submissions. Commenters should submit only information that they wish to make available publicly, including their name, email address, and any other identifying information.

All prospective commenters should follow the Commission's instructions on how to submit comments, available at *www.sec.gov/regulatory-actions/how-to-submit-comments.* General questions regarding the rule filing process or logistical questions regarding this filing should be directed to the Main Office of the SEC's Division of Trading and Markets at *tradingandmarkets@sec.gov* or 202–551–5777.

FICC reserves the right not to respond to any comments received.

(B) Advance Notice Filed Pursuant to Section 806(e) of the Clearing Supervision Act

Executive Summary of Proposed Changes

On December 13, 2023, the Commission adopted amendments to the covered clearing agency standards that apply to covered clearing agencies that clear transactions in U.S. Treasury securities (each a ''Treasury CCA''), including FICC.[6] These amendments require, among other things, that FICC ''calculates, collects, and holds margin amounts from a direct participant for its proprietary positions in U.S. Treasury securities separately and independently from margin calculated and collected from that direct participant in connection with U.S. Treasury securities transactions by an indirect participant that relies on the services provided by the direct participant to access the covered clearing agency's payment, clearing, or settlement facilities.'' [7] As described below, the proposed rules are designed to comply with these requirements.

Additionally, in the Treasury Clearing Rules, the Commission amended its broker-dealer customer protection rule (''Rule 15c3–3'') [8] and the reserve formulas thereunder (''Rule 15c3–3a'') [9] to permit broker-dealers to include margin required and on deposit at a Treasury CCA as a debit item in the reserve formulas under certain conditions.[10] The proposed rules are also designed to satisfy these conditions and, therefore, would permit broker-dealer Netting Members of FICC to include margin collected from their customers and on deposit at a Treasury CCA as a debit item in the reserve formulas.

First, the proposed changes would provide for the separate and independent calculation, collection, and holding of (i) margin deposited by a Netting Member to support its proprietary transactions and (ii) margin deposited by a Netting Member to support the transactions of an indirect participant. Specifically, FICC would provide in a new Rule 2B that FICC can establish proprietary Accounts to record the transactions that the Netting Member enters into for its own benefit and separately establish indirect participant Accounts to record transactions that the Netting Member submits to FICC for clearance and settlement on behalf of an indirect participant. Under this proposed Rule 2B, only proprietary transactions may be recorded in a proprietary Account, and only indirect participant transactions may be recorded in an indirect participant Account. FICC is also proposing revisions in Rule 4 to identify what types of transactions may be included together in a Margin Portfolio that FICC utilizes to determine a Netting Member's margin requirement. Specifically, FICC would revise the Margin Portfolio definition to make clear that a Margin Portfolio cannot include both proprietary and indirect

[10] *See supra* note 5.

participant Accounts. Because proposed Rule 2B would not permit transactions of indirect participants to be recorded in the same Account as a Netting Member's proprietary transactions, a Margin Portfolio would only be able to consist of the same type of proprietary or indirect participant transactions, not both. As a result, the transactions a Netting Member submits to FICC on behalf of an indirect participant would no longer be netted against a Netting Member's proprietary transactions for purposes of calculating a Netting Member's margin requirements. In addition, to ensure separate collection and holding of margin deposited for proprietary and indirect participant transactions, FICC is specifying its practice in Rule 4 that a Netting Member must identify the different Account types for which a deposit is made on its wire instructions.

In order to facilitate these proposed changes, the rule changes would clarify the types of accounts in which Netting Members may record transactions. FICC's "Accounts" are not custodial accounts in which FICC holds assets, but rather a mechanism for FICC to record and group transactions. These records are utilized by FICC in connection with its calculation of a Netting Member's margining, settlement, and other obligations. The proposed rule changes would provide greater clarity regarding the purpose and use of these accounts through the public disclosures in the Rules. The proposed rules would do this by revising the definition of "Account" in Rule 1 and changing the names of certain Accounts to better reflect their function. The proposed rule changes would also create in a new Rule 2B a roadmap of the types of Accounts FICC maintains and what is recorded in those Accounts.

Second, the proposed rule changes would allow for the segregation of certain customer margin in a manner that satisfies the conditions for a broker-dealer to record a debit in the customer or PAB reserve formula under recently added Note H to Rule 15c3–3a.[11] As noted above, the Commission amended Rule 15c3–3a to permit broker-dealers to include margin required and on deposit at a Treasury CCA as a debit item in the reserve formulas under certain conditions, including that the margin be collected in accordance with the rules of the Treasury CCA that impose the certain requirements.[12]

Such requirements are set forth in the Treasury Clearing Rules and Section (b)(2) of Note H to Rule 15c3–3a, and include, among other things, (1) the margin must be calculated separately for each customer and the broker-dealer must deliver that amount of margin for each customer on a gross basis; (2) the margin must be held in an account of the broker-dealer at the Treasury CCA that is segregated from any other account of the broker-dealer at the Treasury CCA and that is, among other things, used exclusively to clear, settle, novate, and margin U.S. Treasury securities transactions of the customers of the broker-dealer; and (3) the Treasury CCA has systems, controls, policies, and procedures to return the assets to the broker-dealer that are no longer needed to meet current margin requirements resulting from positions in U.S. Treasury securities of the customers of the broker-dealer.[13] The proposed changes are designed to comply with these requirements.

Specifically, FICC is proposing to permit a Netting Member, including a non-broker-dealer Netting Member, to designate any of its indirect participants Accounts for segregation. For any Account so designated, FICC would calculate the margin requirements applicable to the Account on a gross basis, meaning that FICC would not net the transactions of one indirect participant against the transactions of another indirect participant. In addition, FICC would segregate the margin deposited to support the transactions in the Account from any margin securing a Netting Member's proprietary positions, both on FICC's own books and records and at FICC's custodians. FICC would only be able to use such segregated margin to satisfy the obligations of the customer for whom such margin is held. FICC would not be able to apply such margin to the proprietary obligations of the Netting Member that deposited it with FICC or to the obligations of any other Netting Member or participant. FICC would also set forth specific procedures to allow Netting Members to obtain the return of excess segregated margin. The aim of these changes is both to allow broker-dealer Netting Members to collect margin from customers and deposit it with FICC and to provide all customers, including those that access FICC through non-broker-dealers, to be able to segregate margin they deposit.

Third, the proposed rules would align the description of FICC's margin methodology with the revised Account types, consolidate the terms relating to margin calculation in a single, easily identifiable schedule, and make certain changes to the methodology to increase precision and predictability. To achieve these goals, the proposed rules would move the margin calculation methodology, including the relevant defined terms currently located in various Rules, into a new Margin Component Schedule. The proposed rules would also revise Rule 4 to make clear that a Netting Member's margin requirement is the sum of the margin amounts calculated for each type of Account in which transactions are recorded for the Netting Member. Further, the proposed rules would set forth a method for allocating net unsettled positions to individual indirect participants for purposes of calculating margin requirements. In addition, the proposed rules would revise and clarify the calculation of the excess capital premium component of the Clearing Fund, to cap such amount at two times the amount by which a Netting Member's VaR Charge exceeds its Netting Member Capital, clarify the capital amounts that are used in the calculation of such amount, limit FICC's discretion to waive the amount, and provide that FICC may calculate the premium based on updated available information. The proposed changes would also take steps to ensure that the excess capital premium does not result in differential treatment of indirect participants simply because of the particular capital level of the Netting Member providing access to FICC's clearance and settlement systems.

Lastly, the proposed rule changes would modify the terms relating to brokered transactions to require that only transactions that an Inter-Dealer Broker Netting Member executes on the Inter-Dealer Broker Netting Member's own trading platform benefit from favorable loss allocation treatment.[14] FICC believes that making these changes would improve FICC's risk management and promote access by ensuring that its differential treatment of different parties and transactions has a sound risk management justification.

Background

FICC, through GSD, serves as a central counterparty and provider of clearance and settlement services for the U.S. government securities markets. Margin is a key tool that FICC uses to manage its credit exposures to its members. The aggregated amount of all GSD members'

[11] 17 CFR 240.15c3–3a.

[12] *See supra* note 5.

[13] *See* 17 CFR 240.15c3–3a. *Supra* note 5.

[14] *See* Rule 4, Section 7 ("Notwithstanding the foregoing, however, an Inter-Dealer Broker Netting Member, or a Non-IDB Repo Broker with respect to activity in its Segregated Repo Account, shall not be subject to an aggregate loss allocation in an amount greater than $5 million pursuant to this Section 7 for losses and liabilities resulting from an Event Period."), *supra* note 4.

margin constitutes the GSD Clearing Fund (referred to herein as the ''Clearing Fund''). The objective of the Clearing Fund is to mitigate potential losses to FICC associated with liquidating a member's portfolio in the event FICC ceases to act for that member (hereinafter referred to as a ''default'').[15]

Under Rule 4 (Clearing Fund and Loss Allocation), Netting Members are required to make deposits to the Clearing Fund in an amount (''Required Fund Deposit'') determined by reference to certain components. In determining a Netting Member's Required Fund Deposit, FICC may consider not only the Netting Member's proprietary transactions, but also the transactions that the Netting Member submits on behalf of indirect participants. However, the treatment of the indirect participant transactions for purposes of calculating the Required Fund Deposit can vary depending on whether those transactions are cleared under the Sponsored Service or prime brokerage/correspondent clearing services. Netting Members are required to instruct FICC to record those transactions in one of the position-keeping accounts (each, an ''Account'') that FICC establishes and maintains for the Netting Member. The Account in which a transaction is recorded is relevant for determining the margin requirement associated with that transaction under the Rules. Currently, a Netting Member may instruct FICC to record in the same Account, currently known as a ''Netting Member Account,'' both the proprietary transactions of the Netting Member and transactions that the Netting Member carries for indirect participants through the prime brokerage/correspondent clearing services. Sponsored Member Trades, discussed in greater detail below, must be recorded in a separate Account.

Under Rule 4, a Netting Member's Clearing Fund requirement, other than that arising from Sponsored Member Trades, is calculated on a net basis across all transactions recorded in the same Account of the Netting Member (or, if the Netting Member has elected to have multiple Accounts form part of the same ''Margin Portfolio,'' all transactions recorded in all such Accounts).[16]

The Sponsored Service permits Netting Members that are approved to be ''Sponsoring Members,'' to sponsor certain institutional firms, referred to as ''Sponsored Members,'' into GSD membership.[17] FICC establishes and maintains a ''Sponsoring Member Omnibus Account'' on its books in which it records the transactions of the Sponsoring Member's Sponsored Members (''Sponsored Member Trades'').[18] To determine a Sponsoring Member's Clearing Fund requirement in relation to Sponsored Member Trades recorded in the Sponsoring Member's Sponsoring Member Omnibus Account, FICC calculates the ''VaR Charge'' [19] and the ''MLA Charge'' [20] component for each Sponsored Member such that it does not net the Sponsored Member Trades of one Sponsored Member against the Sponsored Member Trades of another Sponsored Member, even though those Sponsored Member Trades are recorded in the same Sponsoring Member Omnibus Account.[21] For all of the other components, FICC calculates the components by reference to the Sponsoring Member Omnibus Account as a whole (*i.e.,* without regard to which Sponsored Member entered into which Sponsored Member Trade). In no instance does FICC net transactions recorded in a Sponsoring Member's Sponsoring Member Omnibus Account against other transactions of the Sponsoring Member for purposes of calculating the Sponsoring Member's Required Fund Deposit.

As an alternative to the Sponsored Service, a Netting Member (in such capacity, a ''Submitting Member'') may submit to FICC eligible transactions on behalf of the Submitting Member's customers (each, in such capacity, an ''Executing Firm'') through FICC's existing prime broker/correspondent clearing services.[22] As noted above, under the current Rules, a Submitting Member may instruct FICC to record such a transaction in the same Account at FICC as the Submitting Member's proprietary transactions. Accordingly, if transactions a Submitting Member submits on behalf of Executing Firms through the prime broker/correspondent clearing services are recorded in the same Account as the Netting Member's proprietary transactions (or in an Account that forms part of the same Margin Portfolio as an Account in which a Netting Member's proprietary transactions are recorded), FICC nets such transactions against one another in calculating the Netting Member's Required Fund Deposit.[23]

As noted above, the proposed rules would implement the amendments to Rule 17Ad–22(e)(6)(i) that require FICC to calculate, collect, and hold margin from a direct participant for its proprietary transactions in U.S. Treasury securities separately and independently from the margin calculated and collected for the U.S. Treasury transactions of an indirect participant that relies on the services provided by the direct participant to access FICC's payment, clearing, or settlement facilities.[24] The proposed rules would also clarify and simplify FICC's account structure and improve the transparency of FICC's public disclosures of its margining methodology.

The proposed rules are also designed to allow broker-dealer Netting Members of FICC to collect margin from their customers and deposit that margin with FICC. As stated above, a Netting Member is responsible for the Clearing Fund obligations arising from the activity of indirect participant customers (*i.e.,* Sponsored Members and Executing Firms). FICC understands from engagement with broker-dealer Netting Members and their indirect participant customers that, due to the requirements of Rule 15c3–3 [25] and Rule 15c3–3a,[26] broker-dealer Netting Members are effectively unable to deposit with FICC any margin collected from indirect participants to support those indirect participants' transactions and must instead use proprietary resources.

The Treasury Clearing Rules' recent amendments to Rule 15c3–3a permit

[15] The Rules identify when FICC may cease to act for a member and the types of actions FICC may take. For example, FICC may suspend a firm's membership with FICC or prohibit or limit a member's access to FICC's services in the event that member defaults on a financial or other obligation to FICC. *See* Rule 21 (Restrictions on Access to Services), *supra* note 4.

[16] *See* Rule 4, *supra* note 4.

[17] *See* Rule 3A, *supra* note 4.

[18] *See* Rule 1 (definition of ''Sponsored Member Trades''), *supra* note 4.

[19] *See* Rule 1 (definition of ''VaR Charge''), *supra* note 4.

[20] *See* Rule 1 (definition of ''MLA Charge''), *supra* note 4.

[21] *See* Rule 3A, Section 10 (describing how the Required Fund Deposit for Sponsored Member Trades is calculated), *supra* note 4.

[22] *See* Rule 8, *supra* note 4.

[23] Contemporaneously with this proposed rule change, FICC has submitted a separate proposed rule change (File No. SR–FICC–2024–005) under which FICC is proposing to rename its primer broker/correspondent clearing services the ''Agent Clearing Service,'' ''Submitting Members'' as ''Agent Clearing Members'', and ''Executing Firms'' as ''Executing Firm Customers.'' This separate proposed rule change would require that a Netting Member using the Agent Clearing Service submit transactions for Executing Firm Customers through an Agent Clearing Member Omnibus Account, to be recorded separately from its other clearing activity, including its proprietary activity. It would also add a definition for transactions eligible to be submitted by an Agent Clearing Member on behalf of its Executing Firm Customers (''Agent Clearing Transactions''). These proposed terms are used throughout this filing. These proposed changes are pending regulatory approval. A copy of this proposed rule change is *available at www.dtcc.com/legal/sec-rule-filings.*

[24] 17 CFR 240.17Ad–22(e)(6)(i). *See supra* note 5.

[25] 17 CFR 240.15c3–3.

[26] 17 CFR 240.15c3–3a.

broker-dealers to include margin required and on deposit at a Treasury CCA as a debit item in the reserve formulas under certain conditions.[27] As described in more detail below, the proposed changes would address those conditions. Therefore, the proposal would allow broker-dealer Netting Members to collect margin from customers and deposit it with FICC and to permit all customers, including those that access FICC through non-broker-dealers, to segregate margin they deposit.

Finally, the proposed rule changes would address the treatment of transactions submitted to FICC by Inter-Dealer Broker Netting Members and certain Netting Members that operate similarly to Inter-Dealer Broker Netting Members (''Non-IDB Repo Brokers''). The Rules currently cap the amount of loss allocation that may applied to an Inter-Dealer Broker Netting Member or Non-IDB Repo Broker in respect of transactions submitted by such Netting Members to FICC for clearance and settlement (''Brokered Transactions''). This treatment is based on the more limited risk that Brokered Transactions present relative to other transactions.

Description of Proposed Rule Changes

1. Segregate Indirect Participant Margin Requirements and Amend the GSD Account Structure

The proposed rule changes would provide for the separate calculation, collection, and holding of margin supporting a Netting Member's Proprietary Transactions and the margin supporting the transactions a Netting Member submits on behalf of indirect participants, in accordance with the requirements of Rule 17Ad–22(e)(6)(i), adopted under the Treasury Clearing Rules.[28] In connection with these changes, the proposal would also clarify the types of accounts in which Netting Members may record transactions and adopt a roadmap to its account structure in a new Rule 2B.

A. Separately Calculate, Collect and Hold Indirect Participant and Proprietary Margin Requirements

i. Limit Margin Portfolios to Accounts of the Same Type

The separate calculation of proprietary and customer margin would be accomplished by clarifying that each Margin Portfolio may only include Accounts of the same Type (*i.e.,* Dealer Accounts, Broker Accounts, Agent Clearing Member Omnibus Account, and Sponsoring Member Omnibus Accounts).

FICC would make this clarification by amending the definition of ''Margin Portfolio'' in Rule 1 and revising Rule 4, Section 1a, which would be renumbered Section 1b in light of changes described below, to provide that each Margin Portfolio may not contain more than one Type of Account (even if such Accounts are both Segregated Indirect Participants Accounts).

By virtue of these changes, transactions recorded in different Types of Accounts could not be netted against each other when calculating Required Fund Deposit or Segregated Customer Margin Requirements. Since Proprietary Transactions and transactions submitted for indirect participants could not (by virtue of the changes described below) be recorded in the same Type of Account, the changes relating to Margin Portfolios would result in margin for a Netting Member's Proprietary Transactions being calculated separately and independently from margin calculated for the transactions that the Netting Member submits on behalf of indirect participants. As conforming changes, paragraphs (b) and (c) of Section 1b, which currently provide for such separate margin calculations in certain contexts, would no longer be needed since the Margin Portfolio definition and other changes described above would achieve such separate calculations.

ii. Required Fund Deposit Portions and Segregated Customer Margin Requirements

To further clarify how FICC would calculate and collect a Netting Member's margin requirements, the proposed rule changes would make other revisions to Rule 4. Specifically, Rule 4, Section 2, which currently describes a Netting Member's Required Fund Deposit requirement, would be revised to provide that a Netting Member's Required Fund Deposit consists of the sum of amounts (each, a ''Required Fund Deposit Portion'') calculated for each Type of Account, other than Segregated Indirect Participants Accounts. For Segregated Indirect Participants Accounts, there would, as mentioned below, be a Segregated Customer Margin Requirement, which would be the sum of the amounts calculated for the Netting Member's (i) Sponsoring Member Omnibus Accounts designated as Segregated Indirect Participants Accounts and (ii) Agent Clearing Member Omnibus Accounts designated as Segregated Indirect Participants Accounts.

In connection with these changes, FICC would add a corresponding definition of ''Required Fund Deposit Portion'' to Rule 1. FICC would also adopt a defined term referring to the Required Fund Deposit Portion for a Netting Member's Agent Clearing Member Omnibus Account (''Agent Clearing Member Omnibus Account Required Fund Deposit'') and amend the defined term for the Required Fund Deposit Portion for a Netting Member's Sponsoring Member Omnibus Account (the Sponsoring Member Omnibus Account Required Fund Deposit). In addition, conforming changes would be made to the separately proposed Rule 8, Section 7(g) that would describe the requirement of an Agent Clearing Member to make and maintain an Agent Clearing Member Omnibus Account Required Deposit and that the calculation of such requirement would be performed separately from the calculation for Margin Portfolios consisting of the Agent Clearing Member's Proprietary Transactions. Similar conforming changes would be made to Rule 3A, Section 10 relating to a Sponsoring Member's Sponsoring Member Omnibus Account Required Fund Deposit.

iii. Separate Deposit IDs To Facilitate Separate Collection and Holding of Margin

To ensure that margin for Proprietary Transactions is not only calculated separately and independently but also collected and held separately and independently of margin for indirect participant transactions, a new Rule 4, Section 2a would be added to the Rules. This section would require each Required Fund Deposit Portion to be made to FICC using a separate Deposit ID, which is an existing operational mechanism used by Netting Members to identify the type of Account for which a Required Fund Deposit is being made.

A new Rule 4, Section 2b would impose a similar requirement in respect of Segregated Customer Margin Requirements. The use of these separate Deposit IDs would result in margin for each Type of Account being separately transferred to FICC and FICC recording on its books the separate margin amounts for each Type of Account. FICC would also adopt a definition of ''Deposit ID'' in Rule 1.

Rule 4, Sections 2a and 2b would also require FICC to report a Netting Member's Required Fund Deposit and Segregated Customer Margin Requirement twice daily, which is the same timing interval on which FICC currently reports a Netting Member's margin requirement. The report would

[27] *See supra* note 5.

[28] 17 CFR 240.17Ad–22(e)(6)(i).

also specify the amount of margin attributable to each Required Fund Deposit Portion or Segregated Indirect Participants Account, as applicable, so that the Netting Member can transfer the different margin amounts separately.

iv. Eliminate Permitted Margin Affiliates

In connection with these proposed rule changes, the proposal would eliminate the concept of Permitted Margin Affiliates, which allows a Member to elect to include its Accounts in the same Margin Portfolio with the Accounts of an affiliate that is also a Member, in accordance with the Rules.[29] In this way, a Member and its affiliate can net their transactions for purposes of calculating their margin requirements.

In order to support the proposed change described above, which are designed to provide for the separate calculation, collection, and holding of margin, FICC believes that retaining the option for Members to designate Permitted Margin Affiliates would create unnecessary complexity. No Netting Member currently has a Permitted Margin Affiliate, and FICC would need to examine how such a cross-affiliate margining arrangement would function within the context of the proposed revisions to the account structure and margin methodology in order to determine what steps would be needed to implement such an arrangement consistently with the standards applicable to covered clearing agencies. Therefore, FICC is proposing to eliminate the Permitted Margin Affiliate concept at this time.

In order to implement this change, the proposal would remove the definition of ''Permitted Margin Affiliate'' from Rule 1, and remove references to Permitted Margin Affiliates from Rule 4, Section 1a (to be renamed Section 1b, as noted above); Rule 4, Section 1b (which would be removed and replaced by disclosures in the proposed Margin Component Schedule, as discussed below); Rule 4, Sections 4 and 6; Rule 21, Section 1; Rule 22, Section 2; and Rule 29, Section (a).

B. Proposed Roadmap to Account Structure Through New Rule 2B and Revision to Account Structure

FICC is proposing to adopt a new Rule 2B that would describe the types of Accounts FICC is able to maintain for Netting Members, identify the activity that would be recorded in each type of Account, and generally provide a roadmap to market participants of FICC's account structure.

i. Section 1—Establishment of Proprietary Accounts

Rule 2B, Section 1 would provide that FICC can establish and maintain certain ''Proprietary Accounts'' to record transactions that a Netting Member enters into for its own benefit (''Proprietary Transactions''), rather than for the benefit of indirect participants. Proprietary transactions would not include transactions that a Netting Member enters into on behalf of an affiliate.

The Proprietary Accounts available for recording Proprietary Transactions would include ''Dealer Accounts,'' which would be available for all Netting Members, and ''Cash Broker Accounts'' and ''Repo Broker Accounts,'' which would only be available for Inter-Dealer Broker Netting Members. Dealer Accounts would be for purposes of recording a Netting Member's Proprietary Transactions (other than, in the case of an Inter-Dealer Broker Netting Member, its Brokered Transactions), while Cash Broker Accounts would be for purposes of recording an Inter-Dealer Broker Netting Member's Brokered Transactions (other than Brokered Repo Transactions), and Repo Broker Accounts would be for purposes of recording an Inter-Dealer Broker Netting Member's Brokered Repo Transactions. Rule 2B, Section 1 would make clear that, as under FICC's existing Rules, FICC can establish multiple Proprietary Accounts of the same Type for the Netting Member.

In connection with these changes, FICC is proposing to adopt new, corresponding definitions of Proprietary Transactions, Proprietary Accounts, and Cash Broker Accounts in Rule 1, and to make corresponding amendments to the definitions of Dealer Account and Repo Broker Account. FICC is also proposing to remove from Rule 1 the defined term ''Netting Member Account'' and replace references to such Account with references to Dealer Account.

ii. Section 2—Establishment of Non-Proprietary Accounts

Rule 2B, Section 2 would provide that FICC can establish and maintain certain ''Indirect Participants Accounts'' to record transactions that a Netting Member submits to FICC on behalf of Sponsored Members and Executing Firm Customers. These Indirect Participants Accounts would include, in the case of a Sponsoring Member, Sponsoring Member Omnibus Accounts for purposes of recording Sponsored Member Trades, and, in the case of an Agent Clearing Member, Agent Clearing Member Omnibus Accounts for purposes of recording Agent Clearing Transactions of its Executing Firm Customers. Rule 2B, Section 2 would also make clear that FICC can establish multiple Indirect Participants Accounts of the same Type for the Netting Member.

In connection with these changes, FICC is proposing to add to Rule 1 a new definition of Indirect Participants Account, which would include Agent Clearing Member Omnibus Accounts and Sponsoring Member Omnibus Accounts, and to correspondingly amend the definition of Sponsoring Member Omnibus Accounts.

iii. Section 3—Segregation Designations for Indirect Participants Accounts

Rule 2B, Section 3 would permit a Sponsoring Member or Agent Clearing Member to designate any of its Indirect Participants Accounts as a segregated customer account (a ''Segregated Indirect Participants Account''). The purpose of such a designation, as further described below, would be to give Netting Members a mechanism to direct FICC to calculate and segregate margin deposited in connection with the Account in accordance with the conditions described in Note H to Rule 15c3–3a (''Note H''), as further described below.[30]

In connection with this revision, a new definition for ''Segregated Indirect Participant'' would be added to Rule 1 to mean a Sponsored Member or an Executing Firm Customer whose transactions are recorded in a Segregated Indirect Participants Account.

Rule 2B, Section 3 would provide that the designation of an Account as a Segregated Indirect Participants Account constitutes a representation to FICC by the Netting Member that the Netting Member intends to meet all margin requirements with respect to such Account using assets deposited by the Segregated Indirect Participants with the Netting Member, with the exception of temporary ''prefunding'' by the Netting Member while a margin call to the Segregated Indirect Participant is outstanding. The purpose of this representation is to ensure that only margin deposited by customers, not the Netting Member's proprietary assets, is eligible for segregation.

Rule 2B, Section 3 would further provide that the margin requirement (''Segregated Customer Margin

[29] *See* Rule 1 (defining ''Permitted Margin Affiliates'') and Rule 4, Section 1a(a) and (b) (permitting Members to include Accounts of their Permitted Margin Affiliates in their Margin Portfolio). *Supra* note 4.

[30] 17 CFR 240.15c3–3a.

Requirement'') calculated for a Segregated Indirect Participants Account would equal the sum of the margin requirements that apply to each Segregated Indirect Participant whose transactions are recorded in the Account, as though each such Segregated Indirect Participant were a Netting Member. By virtue of this change and as further described below, in calculating the Segregated Customer Margin Requirement for a Segregated Indirect Participants Account, FICC would not net the transactions of multiple Segregated Indirect Participants against one another. A corresponding definition of ''Segregated Customer Margin Requirement'' would be added to Rule 1 to mean the amount of cash and securities that a Netting Member is required to deposit with FICC to support the obligations arising under transactions recorded in its Segregated Indirect Participants Accounts. As described in greater detail below, such amounts would be further described and addressed in Rule 4, Section 2(a)(v) and (vi).

iv. Section 4—Designation of Account When Submitting Transactions

Lastly, Rule 2B, Section 4 would require a Netting Member, at the time it submits a Transaction to FICC for clearance and settlement, to designate the Account in which the particular transaction should be recorded. Any such designation would constitute a representation to FICC that the transaction is of a type that may be recorded in that Account in accordance with the Rules. The purpose of such representation would be to ensure that Netting Members record only their Proprietary Transactions in Proprietary Accounts, which separate recordation is necessary for the separate and independent calculation, collection, and holding of margin for direct participant and indirect participant transactions.

In addition, Rule 2B, Section 4 would provide that, when submitting a transaction on behalf of a Sponsored Member or Executing Firm Customer, a Netting Member must include an identifier for the applicable Sponsored Member or Executing Firm Customer. This requirement is consistent with an existing requirement in the Schedule of Required Data Submission Items in the Rules and ensures that FICC continues to have the ability to accurately calculate the Required Fund Deposit and Segregated Customer Margin Requirements appropriately. This requirement also facilitates FICC's ability to engage in risk management and market surveillance in accordance with the covered clearing agency standards.

In connection with these changes, FICC also proposes to remove from Rule 1 the term ''Netting Member Account,'' as such defined term would no longer be used. References to Netting Member Accounts throughout the Rules would be revised to ''Dealer Accounts'', which would more clearly distinguish these Accounts from Broker Accounts, the other type of Proprietary Accounts. FICC would also remove Section 11 of Rule 3, which currently concern the types of Accounts that Netting Members may open. Rule 2B would now describe the Types of Accounts Netting Members may request as well as the transactions that may be recorded in such Accounts.

The foregoing changes are designed to ensure that proprietary and indirect participant transactions are recorded in separate Accounts. This would assist FICC in tracking and managing the risks associated with a Netting Member's proprietary and indirect participant transactions. It would also facilitate compliance with the revised covered clearing agency standards regarding the separate calculation, collection, and holding of indirect participant and proprietary margin, which is described in further detail below.

v. Simplification and Revision of Account Structure

To support the foregoing changes, FICC is proposing to provide further clarity on what an Account is for purposes of the Rules. Under the Rules, ''Accounts'' at FICC are not cash, securities, or other kinds of custodial accounts through which FICC holds assets for a Netting Member. Instead, FICC Accounts are a recordkeeping mechanism by which FICC records certain transactions submitted by Netting Members to FICC for clearance and settlement. This recordkeeping mechanism allows FICC to determine which transactions should be netted against one another in determining various obligations of the Netting Member, including its funds-only settlement amount and securities settlement obligations and its Required Fund Deposit. As discussed above, generally speaking, all transactions recorded in the same Account are netted for purposes of determining these obligations (though certain components of the Required Fund Deposit arising from Sponsored Member Trades are calculated on a gross basis, as described above). FICC is proposing to amend the definition of ''Account'' in Rule 1 to make clear that an ''Account'' means an account maintained by FICC to record transactions. In addition, FICC is proposing to adopt a new defined term, ''Type of Account'' or ''Type,'' to refer to the different kinds of Accounts described above.

FICC is also proposing to eliminate the concept of a Market Professional Cross-Margining Account, which refers to an Account carried by FICC for a Netting Member that is limited to Eligible Positions of Market Professionals or an Account that is carried by a Netting Member for Market Professionals that are party to a Market-Professional Agreement for Cross-Margining. FICC does not currently have in place a cross-margining arrangement for market professional indirect participants and would need to examine how such an arrangement would function within the context of the proposed revisions to the Account structure and margin methodology in order to determine what steps would be needed to implement such an arrangement consistently with the standards applicable to covered clearing agencies. Therefore, FICC is proposing to eliminate the Market Professional Cross-Margining Account concept at this time.

In order to implement this change, the proposal would remove the definition of ''Market Professional Cross-Margining Account'' from Rule 1 and remove provisions concerning Market Professional Cross-Margining Accounts from Rule 1, Rule 4 and Rule 29.

2. Proposed Rule Changes Relating to Note H of Rule 15c3–3a

As described above, FICC would permit Netting Members to designate certain Indirect Participants Accounts as Segregated Indirect Participants Accounts. Such a designation would have the effect of causing FICC to calculate, collect, and hold the required margin for transactions recorded in such Accounts in accordance with the conditions for recording a debit in the customer reserve formula set forth in Note H of Rule 15c3–3a.[31]

A. Gross Calculation of Segregated Customer Margin Requirements

In order to satisfy the requirement of Section (b)(2)(i) of Note H to Rule 15c3–3a that the margin requirement be calculated on a gross basis,[32] new Rule 2B would, as noted above, provide that when calculating the Segregated Customer Margin Requirement, FICC would not net the transactions of multiple Segregated Indirect Participants, but would net the transactions of a single Segregated

[31] 17 CFR 240.15c3–3a.

[32] *Id.*

Indirect Participant that are recorded in the same Account.

In addition, the revised Rule 4, Section 1b would require FICC to calculate a Netting Member's Segregated Customer Margin Requirement with respect to a particular Segregated Indirect Participants Account as the sum of the margin requirements applicable to each Segregated Indirect Participant whose transactions are recorded in such Account, as though each Segregated Indirect Participant were a separate Netting Member with a single Margin Portfolio consisting of such transactions. These provisions would result in FICC calculating separate margin amounts for each Segregated Indirect Participant and for such amounts to be collected on a gross basis.

FICC would also include language in the new Margin Component Schedule to achieve gross margining of Segregated Indirect Participants Accounts. Specifically, in Section 1 of the new Margin Component Schedule discussed below, new language would require each Netting Member for which FICC maintains a Segregated Indirect Participants Account to deposit with FICC Segregated Customer Margin equal to the sum of the Segregated Customer Margin Requirements for all such Accounts. Such language would further provide that each Segregated Customer Margin Requirement will be calculated twice daily and equal the sum of the amounts calculated pursuant to Section 3 of the Margin Component Schedule for each Segregated Indirect Participant whose transactions are recorded in the relevant Segregated Indirect Participants Account.

Section 3 of the new Margin Component Schedule, in turn, would set out the methodology for calculating such margin amounts. That section would provide for FICC to perform substantially the same calculation it currently performs when determining a Netting Member's Required Fund Deposit, except (i) such calculation would be performed on a Segregated Indirect Participant-by-Segregated Indirect Participant basis as though each Segregated Indirect Participant represented a separate Margin Portfolio and (ii) FICC would not impose an Excess Capital Premium.

With regard to the latter, FICC does not believe it would be appropriate to require an indirect participant to deposit with FICC additional margin on account of the capital position of its Netting Member. The Excess Capital Premium is designed to address the risk that a Netting Member with low capital relative to its VaR Charge will not be able to perform its obligations. However, Segregated Customer Margin cannot be applied to a Netting Member's obligations (other than to perform on behalf of the individual indirect participant for whom the Segregated Customer Margin is held). Accordingly, requiring indirect participants to deposit an additional Excess Capital Premium would not serve a risk management purpose. Further, requiring indirect participants who access FICC's clearance and settlement systems through a Netting Member with low capital to deposit more margin than indirect participants who access FICC's clearance and settlement system through other Netting Members would treat similarly situated indirect participants differently without an appropriate basis to do so. Moreover, it could lead to concentration among Netting Members, as indirect participants would be disincentivized to access clearing through smaller Netting Members, since smaller Netting Members typically have lower net capital.

For similar reasons, FICC would not add Segregated Customer Margin to Section 4 of the Margin Component Schedule, which describes FICC's ability to impose increased Required Fund Deposits under certain circumstances. However, when determining whether to increase the Required Fund Deposit of a Netting Member under the circumstances described in Section 4, FICC may consider the risk presented by a Netting Member in view of all activity it submits to FICC, including activity of indirect participants.

As a conforming change, FICC would revise the definitions of most of the components utilized for calculating a Netting Member's Segregated Customer Margin Requirement as well as associated definitions to provide that these apply to Segregated Indirect Participants on a Segregated Indirect Participant-by-Segregated Indirect Participant basis. These definitions include the Backtesting Charge, the Holiday Charge, the Intraday Supplemental Fund Deposit, the Margin Liquidity Adjustment or MLA Charge, the Margin Proxy, the Minimum Margin Amount,[33] the Portfolio Differential Charge, the Unadjusted GSD Margin Portfolio Amount, and the VaR Charge.

B. Segregation of Customer Margin Deposits

In order to satisfy the segregation requirements of Section (b)(2)(iii) of Note H to Rule 15c3–3a,[34] FICC is proposing a number of changes to the Rules. First, FICC is proposing to adopt a new definition of ''Segregated Customer Margin'' in Rule 1, which definition would refer to ''all securities and funds deposited by a Sponsoring Member or an Agent Clearing Member with the Corporation to satisfy its Segregated Customer Margin Requirement.'' FICC would also adopt a new Rule 4, Section 1a. That provision would require a Netting Member to deposit Segregated Customer Margin with FICC equal to the Netting Member's Segregated Customer Margin Requirement in accordance with the timing provisions generally applicable to Required Fund Deposits.

i. Establishment of Segregated Accounts

In order to satisfy the requirements of Section (b)(2)(iii) of Note H that margin ''be held in an account of the broker or dealer at the qualified clearing agency that is segregated from any other account of the broker or dealer at the qualified clearing agency,''[35] Rule 4, Section 1a would provide for FICC to establish on its books and records for each Netting Member that deposits Segregated Customer Margin a ''Segregated Customer Margin Custody Account'' corresponding to each Segregated Indirect Participants Account of such Netting Member. Segregated Customer Margin Custody Account would be defined in Rule 1 as ''a securities account within the meaning of the NYUCC maintained by the Corporation, in its capacity as securities intermediary as such term is used in the NYUCC, for an Agent Clearing Member or Sponsoring Member for the benefit of such Member's Segregated Indirect Participants.'' In other words, in contrast to the other FICC Accounts, which, as discussed above, are position record-keeping accounts rather than custodial accounts, each Segregated Customer Margin Custody Account would be a ''securities account'' within the meaning of the NYUCC.

As noted above, FICC is also proposing to amend the definition of ''Account'' in Rule 1 to make clear that such term refers only to an account maintained by FICC for a Netting Member to record transactions submitted by that Netting Member. FICC believes this change would help to

[33] FICC has filed a proposed rule change and related advance notice to adopt a Minimum Margin Amount at GSD (File Nos. SR–FICC–2024–003 and SR–FICC–2024–801). This proposal is pending regulatory approval, and the filings are *available at www.dtcc.com/legal/sec-rule-filings.*

[34] 17 CFR 240.15c3–3a.

[35] *Id.*

distinguish ''Accounts,'' which are simply a transaction recordation mechanism, from the ''Segregated Customer Margin Custody Account,'' which is a traditional custodial account to which FICC would credit cash and securities.

Rule 4, Section 1a would further provide that any assets credited to the Segregated Customer Margin Custody Account would be treated as financial assets within the meaning of the NYUCC. These changes would have the effect of making FICC the ''securities intermediary'' in respect of each Segregated Customer Margin Custody Account and the Netting Member, on behalf of its Segregated Indirect Participants, the ''entitlement holder'' under the NYUCC.[36] By virtue of these designations, the Segregated Customer Margin held by FICC would be reserved for the Netting Member (on behalf of its Segregated Indirect Participants), including in an FICC insolvency.[37]

Rule 4, Section 1a would further provide that all Segregated Customer Margin deposited with FICC to support the obligations arising under the transactions recorded in a given Segregated Indirect Participants Account be credited to the corresponding Segregated Customer Margin Custody Account. In other words, rather than treat Segregated Customer Margin as general Clearing Fund, FICC would record such margin in a specific Segregated Customer Margin Custody Account maintained by FICC on its books and records for the Netting Member that deposited such Segregated Customer Margin, which Account would be separate from any other Accounts maintained by FICC for the Netting Member, including fellow Segregated Customer Margin Custody Accounts. In furtherance of the goal of segregation, FICC would also amend Rule 4, Section 3a to provide that any interest on Segregated Customer Margin consisting of cash be paid to Netting Members.[38]

[36] UCC § 8–102(7) ('''Entitlement holder' means a person identified in the records of a securities intermediary as the person having a security entitlement against the securities intermediary. . . .'').

[37] *See* UCC § 8–503.

[38] Rule 4, Section 1a would also specify New York as the ''securities intermediary's jurisdiction'' for purposes of the NYUCC and specify that New York law would govern all issues specified in Article 2(1) of the Convention on the Law Applicable to Certain Rights in Respect of Securities Held with an Intermediary, July 5, 2006, 17 U.S.T. 401, 46 I.L.M. 649 (entered into force Apr. 1, 2017) (the ''Hague Securities Convention''). These changes are designed to ensure that New York law governs each Segregated Customer Margin Custody Account.

ii. Exclusive Use, Account Designation, and Exclusive Benefit

To satisfy the requirements of Section (b)(2)(iii)(A) of Note H that customer margin be ''used exclusively to clear, settle, novate, and margin U.S. Treasury securities transactions of the customers of the broker or dealer;'' [39] FICC would provide in Rule 4, Section 1a that the Segregated Customer Margin credited to a Segregated Customer Margin Custody Account would be used exclusively to settle and margin transactions in U.S. Treasury securities recorded in the corresponding Segregated Indirect Participants Account.

Rule 4, Section 1a would also provide that the Segregated Customer Margin Custody Account would be designated on FICC's books and records as a ''Special Clearing Account for the Exclusive Benefits of the Customers of [the relevant Sponsoring Member or Agent Clearing Member].'' This is in accordance with the designation requirements of Section (b)(2)(iii)(B) of Note H.[40]

Section (b)(2)(iii)(C) of Note H requires that the account at the clearing agency to which customer margin is credited be subject to a written notice from the clearing agency to the broker-dealer stating that the margin credited to the account is being held ''for the exclusive benefit of the customers of the broker or dealer in accordance with the regulations of the Commission and [is] being kept separate from any other accounts maintained by the broker or dealer or any other clearing member at the qualified clearing agency.'' [41] Rule 4, Section 1a would provide for FICC to provide this notice to any Netting Member that is a Registered Broker or Registered Dealer and has designated an account as a Segregated Indirect Participants Account.

iii. Limitation on Permitted Liens and Use of Margin Deposits

FICC is also proposing changes to the Rules to satisfy the condition of Section (b)(2)(iii)(D) of Note H that the account established pursuant to Section (b)(2)(iii), *i.e.,* each Segregated Customer Margin Custody Account, be subject to a written contract providing that the customer margin in the account, *i.e.,* the Segregated Customer Margin, not be available to cover claims arising from the broker-dealer or any other clearing member defaulting on an obligation to the Treasury CCA, or be subject to any other right, charge, security interest, lien, or claim of any kind in favor of the qualified clearing agency or any person claiming through the qualified clearing agency, except a right, charge, security interest, lien, or claim resulting from a cleared U.S. Treasury securities transaction of a customer of the broker-dealer effected in the account.[42]

[39] 17 CFR 240.15c3–3a.

[40] *Id.*

[41] *Id.*

Specifically, FICC is proposing to amend the security interest each Netting Member provides to FICC under Rule 4, Section 4. That security interest, which is binding on the Netting Member and FICC through the incorporation of the Rules into the membership agreement between FICC and such Netting Member, currently applies to all cash and securities deposited by a Netting Member with FICC pursuant to Rule 4 and Rule 13 (defined in the Rules as the ''Actual Deposit'') and secures all obligations of the Netting Member to FICC. FICC is proposing to amend Rule 4, Section 4 to exclude Segregated Customer Margin from the scope of the Actual Deposit. Such Segregated Customer Margin would instead be subject to a separate security interest pursuant to which the Segregated Customer Margin would secure only obligations arising out of Segregated Indirect Participants Accounts. FICC would also make a conforming change to Rule 3A, Section 10(f) to make clear that the security interest described therein only applies to the security interest granted in the Actual Deposit.

In addition, the bulk of the provisions of the Rules concerning Clearing Fund, including those relating to FICC's ability to use Clearing Fund, would not apply to Segregated Customer Margin since such margin would not form part of the Clearing Fund. The only exceptions are the language in Rule 3A, Section 10(f) stating that margin obligations are secured by the Actual Deposit; the language in Rule 3A, Section 10(g) concerning fines applicable to a failure to meet margin requirements; the language in Rule 4, Section 3a concerning the requirement that cash margin deposits be made in immediately available funds; the language in Rule 4, Section 3b regarding the haircutting, delivery, qualification, and substitution requirements for securities margin; and the language in Rule 4, Section 9 relating to the requirement of Netting Members to deliver margin. These changes would ensure that FICC's broad use rights in respect of Clearing Fund, *e.g.,* for loss mutualization, do not apply to Segregated Customer Margin.

In addition, FICC is proposing to amend Rule 4, Section 5 to provide that, on each Business Day, FICC would

[42] *Id.*

calculate the portion of Segregated Customer Margin that supports each Segregated Indirect Participant's transactions. FICC may only use such portion to secure or settle the performance of the obligations of that Segregated Indirect Participant (or its Sponsoring Member or Agent Clearing Member with respect to the Segregated Indirect Participant) or for permitted investment purposes described below. It would further provide that FICC would not be permitted to use Segregated Customer Margin supporting one Segregated Indirect Participant's transaction to secure or settle any other person's transactions, including those of a fellow Segregated Indirect Participant.

These changes would thus not only prohibit FICC from using Segregated Customer Margin to cover the obligations of the broker-dealer Netting Member in respect of its Proprietary Transactions or those of any other Netting Member in accordance with the requirements of Section (b)(2)(iii)(D) of Note H, but they would also limit ''fellow customer risk'' for Segregated Indirect Participants (*i.e.,* the risk that one customer incurs a loss on account of a default of another customer because the clearing organization applies margin deposited by the first customer to the second customer's obligations).[43] FICC believes these changes would facilitate greater access to its clearance and settlement services.

FICC is proposing to require that the Segregated Margin Requirement be no lower than $1 million per Segregated Indirect Participant, and that the same form of deposit requirements set forth in Rule 4, Section 3 apply to Segregated Customer Margin such that no less than $1 million per Segregated Indirect Participant consist of cash. These changes would be accomplished through a new subsection (c) of Rule 4, Section 3 and reflected in the Margin Component Schedule.

First, this minimum requirement is consistent with the $1 million minimum cash requirement applicable to each Margin Portfolio of a Netting Member. FICC believes it is appropriate to apply the same minimum cash requirement to each Segregated Indirect Participant that it currently applies to each Margin Portfolio because, as described above, FICC would be required to calculate the margin requirements for these participants on a gross basis, as if each Segregated Indirect Participant were a separate Margin Portfolio, and would be restricted from using these funds to address any losses other than losses resulting from the participant for whom the funds are held.

Second, because FICC would be restricted from using these funds to address any losses other than losses resulting from the indirect participant for whom these funds are deposited, FICC believes this minimum requirement is appropriate to mitigate the risk exposures presented by this limitation. FICC's daily backtesting of the sufficiency of Clearing Fund deposits has revealed a heightened likelihood of backtesting deficiencies for those Members with lower deposits that are not sufficient to mitigate any abrupt intraday change in their exposures.[44] Based on the analysis and impact studies FICC conducted in connection with a recent increase to minimum Required Fund Deposit for Netting Members,[45] FICC has determined that a $1 million minimum requirement is the appropriate minimum amount to optimize the balance between financial impact of the requirement to Members and FICC's ability to continue to meet its regulatory obligation to maintain a backtesting performance coverage ratio above its 99 percent coverage target.

FICC is not able to predict how many indirect participants may elect to submit activity to FICC through a Segregated Indirect Participants Account, or the size and volume of that activity. However, because the margin requirements for each Segregated Indirect Participant would be calculated in the same manner as the requirements for each Margin Portfolio, it believes that these studies provide it with an appropriate approximation of the risks it may face if margin deposits for these Accounts are not subject to a minimum requirement.

C. Holding Segregated Customer Margin Deposits in Bank and FRBNY Accounts

To satisfy the eligible custodian conditions set forth in Section (b)(2)(iv) of Note H,[46] FICC is proposing to amend Rule 4, Section 1a to provide that all Segregated Customer Margin be held in an account of FICC at a bank within the meaning of the Act that is insured by the Federal Deposit Insurance Corporation, or at the Federal Reserve Bank of New York. Rule 4, Section 1a would also provide that such account would be segregated from any other account of FICC and would be used exclusively to hold Segregated Customer Margin, in accordance with Section (b)(2)(iv)(A) of Note H to Rule 15c3–3a.[47] To satisfy the requirements of Sections (b)(2)(iv)(B) and (C) of Note H,[48] Rule 4, Section 1a would further provide that each such account would be subject to (i) a written notice of the bank or Federal Reserve Bank provided to and retained by FICC that the account is being held by the bank or Federal Reserve Bank pursuant to Rule 15c3–3 and is being kept separate from any other accounts maintained by FICC or any other person at the bank or Federal Reserve Bank and (ii) a written contract between FICC and the bank or Federal Reserve Bank which provides that the Segregated Customer Margin in the account is subject to no right, charge, security interest, lien, or claim of any kind in favor of the bank or Federal Reserve Bank or any person claiming through the bank or Federal Reserve Bank.

D. Investment Restrictions on Segregated Customer Margin Cash

In accordance with Section (b)(2)(ii) of Note H,[49] Rule 4, Section 1a would be amended to require FICC to only invest Segregated Customer Margin consisting of cash in U.S. Treasury securities with a maturity of one year or less. FICC will propose changes to the Clearing Agency Investment Policy by a separate proposed rule change filing to address the separate holding and investment of Segregated Customer Margin cash, consistent with the disclosures proposed to be added to Rule 4. Pursuant to those changes, FICC would only hold Segregated Customer Margin consisting of cash in a cash deposit account at the Federal Reserve Bank of New York or, pending the opening of such account, another FDIC-insured bank and does not intend to make any other investment of these funds.

E. Return of Segregated Customer Margin

Lastly, in order to satisfy the condition in section (b)(2)(v) of Note H

[43] In the event of the insolvency, resolution, or liquidation of a Netting Member, a Segregated Indirect Participant's ability to recover any funds or securities it has posted to its Netting Member in connection with an FICC-cleared transaction or that the Netting Member receives from FICC in connection with such a transaction will depend on the relevant insolvency, resolution, or liquidation regime. FICC would not, except as directed by the relevant insolvency, resolution, or liquidation officials in accordance with applicable law, make any payments or transfer any assets directly to an indirect participant.

[44] As a covered clearing agency, FICC is required under Rule 17Ad–22(e)(6)(vi) to conduct backtests of its margin model at least once a day. 17 CFR 240.17Ad–22(e)(6)(vi). FICC's backtesting performance target is 99 percent.

[45] *See* Securities Exchange Act Release No. 96136 (Oct. 24, 2022), 87 FR 65268 (Oct. 28, 2022) (SR–FICC–2022–006).

[46] 17 CFR 240.15c3–3a.

[47] *Id.*

[48] *Id.*

[49] *Id.*

that a Treasury CCA adopt rules requiring systems, controls, policies, and procedures to return excess customer margin to a broker-dealer,[50] FICC is proposing to adopt certain amendments to Rule 4, Section 10. Under the proposed rule changes, Rule 4, Section 10 would be revised to require FICC to calculate twice each Business Day the excess of a Netting Member's Segregated Customer Margin over the Segregated Customer Margin Requirement (such amount, the ''Excess Segregated Customer Margin'').[51] In addition, FICC would adopt a new Rule 4, Section 10(b) that would require FICC to return a Netting Member's Excess Segregated Customer Margin at the Netting Member's request. In order to manage the risk of a Segregated Indirect Participant's transactions in accordance with the requirements of Rule 17Ad–22(e)(6) under the Act,[52] FICC would retain the discretion to retain such Excess Segregated Customer Margin if the Netting Member has any outstanding payment or margin obligation with respect to the transactions of any Segregated Indirect Participant.

However, proposed Section 10(b) of Rule 4 would provide that, unlike in the case with Clearing Fund, FICC would not be able to retain Excess Segregated Customer Margin due to any obligation of the Netting Member that is unrelated to the Segregated Indirect Participants Account, unless FICC is either required to do so by applicable law or is authorized to do so by the Commission.

3. Align Margin Methodology With Proposed Account Structure and Enhance Public Disclosures of Margin Components and Clearing Fund Methodology

FICC is proposing changes to the Rules to reorganize, clarify, and refine its margin calculation methodology. FICC is not changing the method by which it calculates the various margin components.

A. Consolidate Margin Components and Clearing Fund Calculation Methodology in Proposed Margin Component Schedule

In order to improve the clarity and transparency of its margin components and Clearing Fund calculation methodology, FICC is proposing to move the calculation methodology from Rule 4, Sections 1b, and 2a, Rule 3, Section 14, and Rule 3A, Section 10, as well as the associated definitions of the margin components and associated terms, including Backtesting Charge, Blackout Period Exposure Adjustment, Excess Capital Differential, Excess Capital Ratio, Excess Capital Premium, Holiday Charge, Intraday Supplemental Fund Deposit, Margin Liquidity Adjustment Charge or MLA Charge, Margin Proxy, Minimum Margin Amount,[53] Portfolio Differential Charge, Unadjusted GSD Margin Portfolio Amount, VaR Charge, VaR Floor and VaR Floor Percentage Amount to a new Margin Component Schedule. As noted above, this methodology would not change, and would continue to be substantively the same as that which currently exists under Rule 4 and Rule 3A, Section 10.

The Margin Component Schedule would include existing and refined descriptions of the manner and method by which FICC would calculate a Netting Member's Required Fund Deposit and Segregated Customer Margin Requirement. FICC believes that describing its margin calculation methodology in a single schedule would facilitate access to its clearing and settlement services by making it easier for market participants to identify and review that methodology. FICC would also make conforming changes to provisions of the Rules that reference the margin calculation methodology of Rule 4 so that such provisions reference the Schedule of Margin Components.

Section 1 of the Margin Component Schedule would provide that both a Netting Member's Required Fund Deposit and its Segregated Customer Margin Requirement would be calculated twice each Business Day and that the Netting Member would be required to meet such requirements. This is the same time interval in which FICC currently calculates and collects a Netting Member's margin requirements. Section 2 of the Margin Component Schedule would set forth the methodology for calculating a Netting Member's Required Fund Deposit. As discussed above, Section 3 of the Margin Component Schedule would set forth the methodology for calculating a Netting Member's Segregated Customer Margin Requirement. Section 4 of the Margin Component Schedule would set forth the terms under which FICC may impose increased Required Fund Deposits. These terms would be substantively the same as those currently in Rule 4 and Rule 3A, Section 10.

Section 5 of the Margin Component Schedule would contain the relevant definitions for the margin methodology calculation. These would be substantively the same as the existing definitions in Rule 1, with certain changes. As noted above, the definitions of Backtesting Charge, Blackout Period Exposure Adjustment, Excess Capital Differential, Excess Capital Ratio, Excess Capital Premium, Holiday Charge, Intraday Supplemental Fund Deposit, Margin Liquidity Adjustment or MLA Charge, Margin Proxy, Minimum Margin Amount,[54] Portfolio Differential Charge, Unadjusted GSD Margin Portfolio Amount, VaR Charge, VaR Floor and VaR Floor Percentage Amount would be revised to provide for such charges to be calculated for purposes of Segregated Customer Margin Requirements on a Segregated Indirect Participant-by-Segregated Indirect Participant basis. In addition, the MLA Charge definition would be amended to provide that, if a Segregated Indirect Participant clears through multiple Accounts (including Accounts of different Netting Members), then the MLA Charge applicable to its transactions carried in a given Segregated Indirect Participants Account would equal the greater of (i) an amount calculated only with regard to the transactions maintained in that Account (*i.e.,* without regard to the other Accounts in which the Segregated Indirect Participant's transactions are recorded) and (ii) an amount calculated on a consolidated portfolio basis (*i.e.,* taking into account the transactions carried in each of the Accounts). This is currently the same methodology that is used for Sponsored Members that clear through multiple Accounts.

B. Revise Definition of ''Current Net Settlement Positions''

In order to refine its margin calculation methodology, FICC is also proposing to amend the definition in Rule 1 of Current Net Settlement Positions to provide for Current Net Settlement Positions in a Sponsoring Member Omnibus Account or Segregated Indirect Participants Account that are not clearly allocable to an individual Sponsored Member or Segregated Indirect Participant to be allocated, for purposes of calculating margin requirements, pro rata to the Sponsored Members or Segregated Indirect Participants that had, as of the end of the preceding Business Day, positions in the same direction and CUSIP as the un-allocable Current Net Unsettled Positions. This situation could arise if, for example, a transaction

[50] *Id.*

[51] The twice each Business Day interval would also apply to the calculation of a Netting Member's excess Required Fund Deposit, since that is the interval on which FICC currently performs such calculation.

[52] 17 CFR 240.17Ad–22(e)(6).

[53] *Supra* note 33.

[54] *Supra* note 33.

recorded in a Sponsoring Member Omnibus Account or Segregated Indirect Participants Account fails to settle. FICC believes this methodology facilitates a reasonable and fair allocation for purposes of calculating gross margin requirements.

FICC would make a corresponding deletion to the language of Rule 3A, Section 7 that addresses the treatment of such positions in Sponsoring Member Omnibus Accounts. Currently Rule 3A, Section 7(a)(i) provides that Net Settlement Positions per CUSIP shall be calculated for each Sponsored Member in the same manner set forth in Rule 11 for Netting Members. The proposed changes to the definition of Current Net Settlement Positions would, however, result in a different calculation of the Net Settlement Positions per CUSIP for Sponsored Members whose positions are recorded in a Sponsoring Member Omnibus Account than for Netting Members. Therefore, the statement in Rule 3A, Section 7 would no longer be correct and would be removed from the Rules.

C. Enhance the Methodology for Calculating the Excess Capital Premium

FICC is also proposing to amend the terms related to the Excess Capital Premium, one of the components of the Required Fund Deposit calculation, in order to make such calculation more precise and predictable. Currently, the Excess Capital Premium applicable to a Netting Member equals the Netting Member's ''Excess Capital Ratio'' (*i.e.,* its VaR Charge divided by its Netting Member Capital) multiplied by its ''Excess Capital Differential'' (*i.e.,* the amount by which a Netting Member's VaR Charge exceeds its Netting Member Capital). However, FICC currently reserves the right to collect less than this amount or to return some or all of this amount.

FICC is proposing to make the Excess Capital Premium more precise and predictable by revising the definition to (i) cap such amount at two times a Netting Member's Excess Capital Differential, (ii) provide that FICC would use the Netting Member Capital amounts set forth in the Netting Member's most recent Form X–17–A–5 (Financial and Operational Combined Uniform Single (''FOCUS'') Report or Consolidated Report of Condition and Income (''Call Report''), as applicable, (iii) permit FICC in its discretion to accept updated amounts provided by a Netting Member prior to the issuance of the Netting Member's next financial report, and (iv) set forth a specific procedure through which FICC may waive the Excess Capital Premium. With regard to (iv), the proposed rule changes would provide that only a Managing Director in FICC's Group Chief Risk Office could grant waiver of an Excess Capital Premium and only in exigent circumstances if FICC observed extreme market conditions or other unexpected changes in factors, based on all relevant facts and circumstances, including the degree to which a Netting Member's capital position and trading activity compare or correlate to the prevailing exigent circumstances and whether FICC can effectively address the risk exposure presented by a Netting Member without the collection of the Excess Capital Premium from that Netting Member. Any such waiver would need to be documented in a written report made available to the relevant Netting Member. FICC believes that these changes, which are substantially similar to changes recently adopted by the National Securities Clearing Corporation, would enhance the ability of Netting Members to identify what their Excess Capital Premium will be and to ensure such amount is accurately calibrated.[55]

FICC would also amend the defined term ''Netting Member Capital'' in Rule 1 to refer to a Netting Member's Net Capital, Net Assets, or Equity Capital, as applicable based on the Netting Member's type of regulation. The definition of ''Net Capital,'' in turn, would be revised to refer specifically to the net capital of a Netting Member as reported on its most recent FOCUS Report or, if a Netting Member is not required to file a FOCUS Report, on its most recent financial statements or equivalent reporting. ''Equity Capital'' would be defined in Rule 1 to mean the equity capital of a Netting Member as reported on its most recent Call Report, or if a Netting Member is not required to file a Call Report, on its most recent financial statements or equivalent reporting. FICC believes these changes would increase predictability and understanding of how FICC calculates the Excess Capital Premium.

FICC would also remove obsolete references to margin requirements for pending transactions since FICC does not apply margin requirements to such transactions.

D. Exclude Segregated Customer Margin From Calculation of Excess Capital Premium Charge

FICC is also proposing to revise the definitions of Excess Capital Ratio and Excess Capital Differential in the Margin Component Schedule to exclude the VaR Charge calculated with respect to Segregated Indirect Participants.

The VaR Charge assessed for each Segregated Indirect Participant would be satisfied by the Segregated Indirect Participant, and not by the Netting Member. As noted above, the Excess Capital Premium is designed to address the risk that a Netting Member with low capital relative to value-at-risk is not able to perform its obligations. However, Segregated Customer Margin cannot be applied to satisfy a Netting Member's obligations (other than to perform on behalf of the individual indirect participant for whom the Segregated Customer Margin is held). Therefore, including the VaR Charge that is calculated for a Segregated Indirect Participant and is satisfied by the capital of that Segregated Indirect Participant in the calculation of the Netting Member's Excess Capital Premium could result in assessing an Excess Capital Premium for that Netting Member that is greater than the amount required to mitigate the risk that the Excess Capital Premium is designed to address.

The proposed change is also designed to ensure that the Excess Capital Premium does not result in differential treatment of Netting Members that act as intermediaries for Segregated Indirect Participants.

E. Other Clarifications and Conforming Changes

In connection with the changes described above, FICC would make other clarifications and conforming changes to the Rules. First, FICC would move the definition of ''Legal Risk'' from Rule 4 to the definitions in Rule 1. This term refers to the risk that FICC may be unable to either access Required Fund Deposits or take action following the insolvency or bankruptcy of a Netting Member as the result of a law, rule or regulation applicable to the Netting Member.[56] Because this term is used in multiple places in the Rules, including in the new Margin Component Schedule, moving the definition to Rule 1 would make it easier for a reader to find that definition.

FICC would also delete the definition of the term ''Minimum Charge'' from Rule 1 and move the use of this term from Rule 4 to Sections 2(c) and 3(c) of the Margin Component Schedule. While FICC would continue to apply a requirement that Netting Members maintain a minimum amount for each Margin Portfolio or Segregated Margin Requirement, as discussed above, FICC

[55] *See* Securities Exchange Act Release No. 96786 (Feb. 1, 2023), 88 FR 8013 (Feb. 7, 2023) (SR–NSCC–2022–005).

[56] *See* Rule 4, Section 2(d), *supra* note 4.

believes using a defined term for this concept is not necessary and could cause confusion about the requirement. The proposed change to remove the defined term and instead just explain the requirement in these sections of the Margin Component Guide would simplify and, therefore, clarify, the Rules in this regard.

4. Clarifications to Treatment of Brokered Transactions

FICC is proposing to refine the definition of Brokered Transactions and remove conditions that Inter-Dealer Broker Netting Members and Non-IDB Repo Brokers must meet in order to receive favorable loss allocation treatment.

Currently, Inter-Dealer Broker Netting Members and Non-IDB Repo Brokers must meet a set of conditions described in Section 8 of Rule 3 to be subject to a cap on the application of FICC's loss allocation procedure of no greater than $5 million.[57] FICC believes this favorable loss allocation treatment is appropriate because the Netting Member is not undertaking a directional position with respect to the transactions. Instead, each transaction has a counterparty other than the Netting Member that will ultimately deliver the securities or pay the cash.

FICC is proposing to revise the Rules related to Brokered Transactions so that the favorable loss allocation treatment applies only to the transactions that present this limited risk. In particular, FICC is proposing to revise the definition of Brokered Transactions to only encompasses transactions entered into by an Inter-Dealer Broker Netting Member on the Inter-Dealer Broker Netting Member's own trading platform. This rule change would limit the definition of these transactions to transactions for which an Inter-Dealer Broker is standing in between two counterparties and is thus completely flat.

In connection with this change, FICC would eliminate the conditions that Inter-Dealer Broker Netting Members and Non-IDB Repo Brokers must meet in order to be subject to such favorable treatment. As noted above, the proposed Rule 2B would clarify that only Inter-Dealer Broker Netting Members are able to maintain Cash Broker Accounts or Repo Broker Accounts, and that only Brokered Transactions may be submitted through such Accounts, as appropriate. Therefore, FICC believes the revised definition of Brokered Transactions and the revisions to the Account structure would collectively serve the risk-mitigation function that the conditions in Rule 3, Section 8 achieve, but in a much more effective manner and in a manner that is easier for FICC to monitor. As such, those conditions would be removed from the Rules.

Finally, FICC would remove the category of Non-IDB Repo Brokers from the Rules. Non-IDB Repo Brokers are currently defined as Netting Members other than Inter-Dealer Broker Netting Members that operate in the same manner as a Broker and have agreed to meet the same requirements imposed on Inter-Dealer Broker Netting Members.[58] As described above, FICC believes the favorable loss allocation treatment is appropriate only for Inter-Dealer Broker Netting Members that submit Brokered Transactions, as such term would be defined. Therefore, FICC would delete the references to such parties and associated terms. In connection with these changes, the proposal would delete the defined term for ''Non-IDB Repo Broker'' as that term would no longer be used in the Rules.

Implementation Timeframe

Subject to the completion of all regulatory actions required with respect to this proposal,[59] FICC expects to implement the proposal by no later than March 31, 2025, and would announce the effective date of the proposed changes by an Important Notice posted to FICC's website.

Expected Effect on Management of Risk

FICC believes that the proposed rule changes to separately and independently calculate, collect, and hold the margin for a Netting Member's proprietary transactions from the margin for the transactions of indirect participants, to limit Brokered Transactions to those entered into by an Inter-Dealer Broker Netting Member on its own trading platform, to set forth a segregation arrangement for certain indirect participant margin, and to clarify FICC's account structure and consolidate its margin methodology in a single accessible Margin Component Schedule would enhance FICC's and its Netting Members' risk management.

The separate calculation of margin for a Netting Member's proprietary and indirect participant transactions would ensure that the quantum of margin that FICC collects from a Netting Member more precisely reflects the separate risk profiles of the Netting Member's proprietary portfolio of transactions and the portfolio of transactions that the Netting Member submits to FICC on behalf of indirect participants. This approach would also provide FICC with a more detailed understanding of potential risks arising from the various types of transactions that it clears.

The revisions to the Brokered Transactions definition would also help facilitate a more precise identification and calibration of potential risks attendant to different transaction types. In this context, the revisions would ensure that only those transactions that present the limited risk for which FICC's Brokered Transactions provisions are designed benefit from a more favorable loss allocation treatment. And they would ensure that other types of transactions are maintained in Dealer Accounts, alongside other regular market activity.

FICC further believes that the proposed changes to clarify FICC's account structure and consolidate its margin methodology in a single accessible Margin Component Schedule would enhance risk management by furthering public awareness of how FICC assesses margin requirements. Such greater awareness would allow Netting Members and indirect participants to make more informed choices about how the various types of portfolios they present for clearing would be risk managed by FICC, which in turn should allow such parties to better anticipate and provision for any financial resourcing and liquidity needs that might arise from margin calls for those portfolios.

FICC additionally believes that the proposed margin segregation arrangement would reduce risk by enhancing the ability of Netting Members to collect margin from indirect participants and deposit that margin with FICC. Currently, broker-dealer Netting Members must finance the margin obligations of their indirect participants' transactions because they cannot record a debit in the Rule 15c3–3a formulas for margin deposited with FICC. In addition, non-broker-dealer Netting Members may often need to finance the margin obligations of their indirect participants' transactions because the absence of a segregation arrangement makes it impossible or undesirable for indirect participants to use their own assets to satisfy such

[57] *See* Rule 3, Section 8 (such conditions require that an Inter-Dealer Broker Netting Member ''(A) limit its business to acting exclusively as a Broker; (B) conduct all of its business in Repo Transactions with Netting Members; and (C) conduct at least 90 percent of its business in transactions that are not Repo Transactions, measured based on its overall dollar volume of submitted sides over the prior month, with Netting Members'') and Rule 4, Section 7, *supra* note 4.

[58] Currently, only one Netting Member is a Non-IDB Repo Broker.

[59] *Supra* note 3.

margin obligations. Such financing can expose Netting Members to the risk of an indirect participant default. FICC's proposed segregation arrangement would serve to reduce the need for Netting Members to provide financing by allowing Netting Members to collect margin from indirect participants and deposit that margin with FICC. Such collection and depositing would reduce the risk to a Netting Member of an indirect participant default because the Netting Member can look to the margin for credit support. As a result, collecting and depositing the indirect participant's margin in a segregated account at FICC would limit the likelihood that a default of an indirect participant gives rise to distress at the Netting Member that could limit its ability to perform to FICC. By the same token, the segregated account structure FICC is proposing to hold indirect participant margin should help those indirect participants manage their risks to their Netting Member, fellow Netting Member customers, and even FICC itself because the account structure would ensure that such margin is only available to cover losses arising from a default by the indirect participant's position.

Consistency With Section 805 of the Clearing Supervision Act

FICC believes the proposed rule changes are consistent with the Clearing Supervision Act.[60] Specifically, FICC believes these changes are consistent with the risk management objectives and principles of Section 805.[61]

1. Consistency With Section 805(b) of the Clearing Supervision Act

Section 805(b) provides that ''[t]he objectives and principles for the risk management standards prescribed under subsection (a) shall be to (1) promote robust risk management; (2) promote safety and soundness; (3) reduce systemic risks; and (4) support the stability of the broader financial system.'' [62] As described in greater detail below, the proposed rule changes to clarify FICC's account structure and margin calculation methodology would improve public understanding of FICC's margining and recordkeeping processes and thereby facilitate greater access to the systemic risk-reducing benefits of FICC's central clearing services. The proposed changes would do this by revising the definition of ''Account'' to make clear that FICC Accounts are for purposes of recording transactions, providing a roadmap in Rule 2B identifying the types of Accounts FICC maintains for Netting Members and which transactions may be recorded in such Accounts, amending Rule 4 to clarify the types of transactions that may be included in a Margin Portfolio, and consolidating the components of FICC's margin calculation methodology currently in Rules 1 and 4 into an accessible Margin Component Schedule and refining the description of FICC's margin calculation methodology. The proposed change to eliminate the Permitted Margin Affiliates from the Rules would also lead to clearer Rules and, therefore, improved public understanding of FICC's margining practices by removing a concept that is not being used by Netting Members.

The collective impact of these changes would be to enhance the ability of Netting Members and indirect participants to make more informed choices about how the various types of portfolios they present for clearing would be risk managed by FICC, which in turn should allow such parties to better anticipate and provision for any financial resourcing and liquidity needs that might arise from margin calls for those portfolios. Enhanced understanding and decision-making by market participants of FICC's risk-reducing central clearing services would promote easier and more diverse access to such services. This expanded access, in turn, would promote robust risk management across the U.S. Treasury market since expanded access also result in expanded application of FICC's risk management measures, including margin requirements. With this expanded application also comes clearer understanding by market participants of the potential financial resource and liquidity needs necessary to satisfy FICC's margin requirements, and therefore the ability of market participants to anticipate and manage those needs on a more organized and orderly basis. Thus, expanded and more transparent application of these risk management measures would promote safety and soundness across the diversity of participants in the U.S. Treasury markets, thereby also reducing systemic risk and supporting stability of the broader financial system.

The proposed changes to create a segregation arrangement for certain indirect participant margin would also facilitate broader access to the risk-reducing benefits of FICC's central clearing services. As noted above, broker-dealer and other Netting Members must often finance the margin obligations of their indirect participants. In addition to increasing a Netting Member's risk exposure to indirect participants, such financing increases the costs to the Netting Member of providing access to central clearing. The proposed rules would facilitate greater access to FICC's clearance and settlement systems by creating a segregation arrangement that would allow broker-dealer and other Netting Members to collect margin from their indirect participants and deposit that margin with FICC. Such collection and depositing would reduce the costs and attendant liquidity needs to such Netting Members of providing access to FICC's clearance and settlement services via margin payments, thereby increasing the diversity and scope of market participants able to access central clearing while also ensuring that expanded access to central clearing does not increase funding and liquidity risk for the Netting Members. By improving the position of the Netting Members in this regard, the proposed changes can reduce systemic risk that can be triggered by a large Netting Member liquidity stress event or where an indirect participant default also causes a Netting Member to default. For the same reasons, the outcome of these proposed changes promotes safety and soundness and the stability of the broader financial system.

By the same token, the segregated account structure FICC is proposing to hold indirect participant margin should help indirect participants who access central clearing to manage more effectively their risks to their Netting Member, fellow Netting Member customers, and even FICC itself because the account structure would ensure that such margin is only available to cover losses arising from a default by the indirect participant's position. Thus, the proposed changes would promote robust risk management at indirect participants and, by reducing the risk that indirect participants may not be able to access their margin upon the default of another party, also reduce the risk that the indirect participant will suffer a related default or market stress event. For this reason, the proposals further promote safety and soundness, reduce systemic risk, and support the stability of the broader financial system.

The proposed rule changes to separately and independently calculate the margin for a Netting Member's proprietary transactions from the margin for the transactions of indirect participants, adopt a method for allocating net unsettled positions to individual indirect participants for purposes of calculating margin requirements, and to limit the scope of Brokered Transactions to those executed by an Inter-Dealer Broker Netting

[60] 12 U.S.C. 5461 *et seq.*

[61] 12 U.S.C. 5464.

[62] 12 U.S.C. 5464(b).

Member on its own trading platform would also promote robust risk management, and safety and soundness at FICC by reducing the potential risk to FICC arising from indirect participant transactions and provide FICC with a better understanding of the source of potential risk arising from the transactions that it clears.[63] They would also ensure that only those transactions that present the limited risk for which FICC's Brokered Transactions provisions are designed benefit from the favorable loss allocation treatment, which further promotes robust risk management at FICC. The proposed changes would also incentivize Netting Members and indirect participants to make more informed choices about how the various types of portfolios they present for clearing would be risk managed by FICC, which in turn should allow such parties to better anticipate and provision for any financial resourcing and liquidity needs that might arise from margin calls for those portfolios. As already explained above, these outcomes applied across the various actors in the U.S. Treasury market would, in turn, reduce systemic risks and support the stability of the broader financial system.

As a result, FICC believes the proposed changes will collectively advance Section 805(b)'s objectives and principles of promoting robust risk management, promoting safety and soundness, reducing systemic risks, and supporting the stability of the broader financial system.[64]

2. Consistency With Section 805(a)(2) of the Clearing Supervision Act

Section 805(a)(2) of the Clearing Supervision Act authorizes the Commission to prescribe risk management standards for the payment, clearing, and settlement activities of designated clearing entities, like FICC. Accordingly, the Commission has adopted risk management standards under this section and under section 17A of the Act.[65] The Section 17A standards require registered clearing agencies to establish, implement, maintain, and enforce written policies and procedures that are reasonably designed to meet certain minimum requirements for their operations and risk management practices on an ongoing basis.[66] FICC believes that the proposed changes are consistent with Rules 17Ad–22(e)(4)(i), (e)(6)(i), (e)(18)(ii), (e)(18)(iii), (e)(18)(iv)(C), (e)(19), and (e)(23)(ii), each promulgated under the Act.[67]

Rule 17Ad–22(e)(4)(i) under the Act requires that FICC establish, implement, maintain, and enforce written policies and procedures reasonably designed to effectively identify, measure, monitor, and manage its credit exposures to participants and those arising from its payment, clearing, and settlement processes by maintaining sufficient financial resources to cover its credit exposure to each participant fully with a high degree of confidence.[68] The proposed rule changes to separately and independently calculate, collect, and hold the margin for a Netting Member's proprietary transactions from the margin for the transactions of indirect participants, to limit Brokered Transactions to those entered into by an Inter-Dealer Broker Netting Member on its own trading platform, and to increase the precision of the Excess Capital Premium would enhance FICC's risk management. These changes would ensure that the quantum of margin that FICC collects from a Netting Member reflects the separate risk profiles of the Netting Member's portfolio of Proprietary Transactions and portfolio transactions that the Netting Member submits to FICC on behalf of indirect participants, ensure that only those transactions that present the limited risk for which FICC's Brokered Transactions provisions are designed benefit from favorable loss allocation treatment, and calibrate the Excess Capital Premium based on the most readily available information.

Collectively, these changes would enhance the ability of FICC to manage the risk of the transactions it clears and settles and cover its credit exposure to its participants with a high degree of confidence.

The proposed change to require a minimum cash requirement of $1 million per Segregated Indirect Participant would mitigate the greater risk exposure presented to FICC by the limitations on its use of these deposits. As discussed above, FICC's daily backtesting of the sufficiency of Clearing Fund deposits has revealed a heightened likelihood of backtesting deficiencies for those Members with lower deposits that are not sufficient to mitigate any abrupt intraday change in their exposures, and a $1 million minimum requirement was appropriate to mitigate the risks of backtesting deficiencies while balancing the financial impact of this requirement on Members.[69] Because FICC is required to calculate the margin requirements for Segregated Indirect Participants on a gross basis, as if each Segregated Indirect Participant were a separate Margin Portfolio, it believes it is also appropriate to apply the same minimum requirement that it applies to each Margin Portfolio. By maintaining sufficient resources to cover its credit exposures fully with a high degree of confidence, the proposed change supports FICC's ability to identify, measure, monitor, and, through the collection of Segregated Customer Margin, manage its credit exposures to these indirect participants. Therefore, FICC believes adopting this minimum requirement is consistent with the requirements of Rule 17Ad–22(e)(4)(i) under the Act.[70]

Rule 17Ad–22(e)(6)(i) under the Act requires FICC to establish written policies and procedures reasonably designed to calculate, collect, and hold margin amounts from a direct participant for its proprietary positions in Treasury securities separately and independently from margin calculated and collected from that direct participant in connection with U.S. Treasury securities transactions by an indirect participant that relies on the services provided by the direct participant to access FICC's payment, clearing, or settlement facilities.[71] The proposed rule changes would require that each Margin Portfolio only consist of activity from the same Type of Account, ensuring that proprietary transactions and transactions submitted to FICC on behalf of indirect participants are margined separately, and to require Netting Members to use separate Deposit IDs for different transaction types. As noted above, the proposed changes to Rule 2B, Section 3 would require FICC to calculate the Segregated Customer Margin Requirement for a particular Segregated Indirect Participants Account as the sum of the requirements applicable to each Segregated Indirect Participant whose transactions are recorded in such Account, as though each Segregated Indirect Participant were a separate Netting Member with a single Margin Portfolio consisting of such transactions. These provisions would result in FICC calculating separate margin amounts for each Segregated Indirect Participant and for such amounts to be collected on a gross basis. Finally, the proposed changes to Rule 4, Section 1a would

[63] *See* Adopting Release, *supra* note 2, at 144.

[68] 17 CFR 240.17Ad–22(e)(4)(i).

[69] *Supra* note 45.

[70] 17 CFR 240.17Ad–22(e)(4)(i).

[71] 17 CFR 240.17Ad–22(e)(6).

provide for FICC to establish on its books and records for each Netting Member that deposits Segregated Customer Margin a ''Segregated Customer Margin Custody Account'' corresponding to each Segregated Indirect Participants Account of such Netting Member. Collectively, these proposed changes would ensure that a Netting Member's proprietary transactions are not netted with indirect participant transactions for purposes of margin calculation and that margin for indirect participant transactions is collected and held separately and independently from margin for a Netting Member's proprietary transactions.

Rule 17Ad–22(e)(18)(ii) under the Act requires FICC to establish objective, risk-based, and publicly disclosed criteria for participation, which require participants to have sufficient financial resources and robust operational capacity to meet obligations arising from participation in FICC.[72] The proposed changes to consolidate FICC's margin methodology in a Margin Component Schedule, to identify the particular Required Fund Deposit Portions and Segregated Customer Margin Requirements, and to elaborate on the calculation of the Excess Capital Premium and the circumstances in which FICC would waive the application of such premium would improve public disclosure of FICC's margin methodology and the obligations that Netting Members and their indirect participants would have as a result of their participation in FICC's clearance and settlement system. In particular, the proposed changes would provide Netting Members and their indirect participants with a single, standalone schedule that they can review in order to understand how FICC would calculate margin obligations for their transactions. The proposed changes would also improve public disclosure by allowing Netting Members and their indirect participants to see how the various Accounts and Margin Portfolios give rise to separate inputs into the total margin calculation and how and when a Netting Member may face an increase in margin on account of the Excess Capital Premium.

Rule 17Ad–22(e)(18)(iii) under the Act requires that FICC establish written policies and procedures reasonably designed to monitor compliance with its participant requirements on an ongoing basis.[73] The proposed changes to require Netting Members to designate the Account in which a transaction is to be recorded and to identify the Sponsored Member or Executing Firm Customer for whom the transaction is submitted on that transaction record would help facilitate FICC's ability to monitor which transactions are being entered into by which entities. This enhanced monitoring of participant activity would thus allow FICC to better monitor participants' compliance with FICC's various requirements in accordance with Rule 17Ad–22(e)(18)(iii).[74]

Rule 17Ad–22(e)(18)(iv)(C) under the Act requires, among other things, that FICC, as a covered clearing agency that provides central counterparty services for transactions in U.S. Treasury securities, ensure that it has appropriate means to facilitate access to clearance and settlement services of all eligible secondary market transactions in U.S. Treasury securities, including those of indirect participants.[75] FICC believes that the proposed changes giving Netting Members the ability to elect for margin deposited by indirect participants and deposited with FICC to be segregated would facilitate access to FICC's clearance and settlement systems by giving indirect participants greater optionality. The proposed rule changes would allow a Netting Member and its indirect participant to choose whether (i) the indirect participant will post margin under a customer protection framework that is similar to that which exists in other cleared contexts,[76] (ii) the Netting Member will finance the margin for the indirect participant's transactions, or (iii) the indirect participant will deposit margin but without the protection (or higher margin requirements) associated with a segregation arrangement. FICC believes that such optionality would facilitate access in accordance with Rule 17Ad–22(e)(18)(iv)(C) by allowing Netting Members and their indirect participants to adopt a margining arrangement that is most consistent with their business objectives and applicable regulatory, operational, and practical constraints.

Rule 17Ad–22(e)(19) under the Act requires that FICC identify, monitor, and manage the material risks to the covered clearing agency arising from arrangements in which firms that are indirect participants in FICC rely on the services provided by direct participants to access FICC's clearance and settlement facilities.[77] The proposed changes to separately and independently calculate margin for proprietary and indirect participant transactions, adopt a method for allocating net unsettled positions to individual indirect participants for purposes of calculating margin requirements and require a Netting Member to represent that margin deposited in relation to a Segregated Indirect Participants Account is generally margin collected from an indirect participant would reduce the potential risk to FICC arising from indirect participant transactions.

These changes would ensure that the margin FICC collects from a Netting Member reflects the separate risk profiles of the Netting Member's proprietary portfolio and the portfolio of transactions it submits to FICC on behalf of indirect participants. They would also provide FICC with a better understanding of the source of potential risk arising from the transactions that it clears and incentivize Netting Members to maintain more balanced proprietary portfolios, since such portfolios would lead to lower margin requirements. In addition, the proposed representation by Netting Members that they generally intend to satisfy Segregated Customer Margin Requirements with assets collected from indirect participants rather than proprietary assets would reduce the risk of FICC's proposed margin segregation arrangement by limiting such arrangement to indirect participant assets and ensuring that proprietary assets a Netting Member deposits with FICC are available for loss mutualization purposes.

Rule 17Ad–22(e)(23)(ii) under the Act requires FICC to establish written

[72] 17 CFR 240.17Ad–22(e)(18)(ii).

[73] 17 CFR 240.17Ad–22(e)(18)(iii).

[74] *Id.*

[75] 17 CFR 240.17Ad–22(e)(18)(iv)(C). Contemporaneously with this proposed rule change, FICC and its affiliates, National Securities Clearing Corporation and The Depository Trust Company, have submitted separate proposed rule changes (File Nos. SR–FICC–2024–006, SR–NSCC–2024–003 and SR–DTC–2024–003) under which they are proposing to amend the Clearing Agency Risk Management Framework to address the requirement under Rule 17Ad–22(e)(18)(iv)(C) that FICC's Board review its policies and procedures related to compliance with that rule on an annual basis. These proposed changes are pending regulatory approval. Copies of the proposed rule changes are *available at www.dtcc.com/legal/sec-rule-filings.*

[76] Both the Options Clearing Corporation and the U.S. derivatives clearing organizations allow for, or require, the segregation of customer margin and/or positions. *See generally* OCC By-Laws Sections 3, 27 (outlining the various accounts that OCC may maintain for a clearing member and the extent to which the positions and margin recorded to such accounts may applied to other obligations); 7 U.S.C. 6d (outlining the segregation rules applicable to commodity futures and cleared swap transactions); Order Granting Conditional Exemptions under the Securities Exchange Act of 1934 in Connection with the Portfolio Margining of Cleared Swaps and Security-Based Swaps that are Credit Default Swaps, Securities Exchange Release No. 93501 (Nov. 1, 2021), 86 FR 61357 (Nov. 5, 2021) (S7–13–12) (providing that certain cleared security-based swaps may be portfolio margined in a cleared swaps account subject to the rules generally applicable to cleared swaps).

[77] 17 CFR 240.17Ad–22(e)(19).

policies and procedures providing sufficient information to enable participants to identify and evaluate the risks, fees, and other material costs they incur by participating in FICC.[78] The proposed rule changes to consolidate and clarify FICC's margin calculation methodology in the proposed Margin Component Schedule, adopt a method for allocating net unsettled positions to individual indirect participants for purposes of calculating margin requirements and to clarify the calculation of the Excess Capital Premium would make it easier for both Netting Members and indirect participants to identify and price the potential margining costs associated with how one chooses to submit transactions to FICC for clearance and settlement.

III. Date of Effectiveness of the Advance Notice, and Timing for Commission Action

The proposed change may be implemented if the Commission does not object to the proposed change within 60 days of the later of (i) the date that the proposed change was filed with the Commission or (ii) the date that any additional information requested by the Commission is received. The clearing agency shall not implement the proposed change if the Commission has any objection to the proposed change.

The Commission may extend the period for review by an additional 60 days if the proposed change raises novel or complex issues, subject to the Commission providing the clearing agency with prompt written notice of the extension. A proposed change may be implemented in less than 60 days from the date the advance notice is filed, or the date further information requested by the Commission is received, if the Commission notifies the clearing agency in writing that it does not object to the proposed change and authorizes the clearing agency to implement the proposed change on an earlier date, subject to any conditions imposed by the Commission.

The clearing agency shall post notice on its website of proposed changes that are implemented.

The proposal shall not take effect until all regulatory actions required with respect to the proposal are completed.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the advance notice is consistent with the Clearing Supervision Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–FICC–2024–802 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

All submissions should refer to file number SR–FICC–2024–802. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the advance notice that are filed with the Commission, and all written communications relating to the advance notice between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of FICC and on DTCC's website (*https://dtcc.com/legal/sec-rule-filings.aspx*). Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–FICC–2024–802 and should be submitted on or before April 18, 2024.

V. Date and Timing for Commission Action

Section 806(e)(1)(G) of the Clearing Supervision Act provides that FICC may implement the changes if it has not received an objection to the proposed changes within 60 days of the later of (i) the date that the Commission receives an advance notice or (ii) the date that any additional information requested by the Commission is received,[79] unless extended as described below.

Pursuant to section 806(e)(1)(H) of the Clearing Supervision Act, the Commission may extend the review period of an advance notice for an additional 60 days, if the changes proposed in the advance notice raise novel or complex issues, subject to the Commission providing the clearing agency with prompt written notice of the extension.[80]

Here, as the Commission has not requested any additional information, the date that is 60 days after FICC filed the advance notice with the Commission is May 13, 2024. However, the Commission is extending the review period of the Advance Notice for an additional 60 days under section 806(e)(1)(H) of the Clearing Supervision Act [81] because the Commission finds the Advance Notice is both novel and complex, as discussed below.

The Commission believes that the changes proposed in the Advance Notice raise novel and complex issues. The Advance Notice concerns a matter of first impression for the Commission, as it concerns recently adopted margin collection and account segregation requirements for Treasury CCAs.[82] The Commission has not yet considered such a proposal pursuant to Rule 17Ad–22(e)(6)(i) and the amendments to Rule 15c3–3 under the Act [83] and the material aspects of the proposal are detailed, substantial, and interrelated with other risk management practices at FICC.

Accordingly, the Commission, pursuant to section 806(e)(1)(H) of the Clearing Supervision Act,[84] extends the review period for an additional 60 days so that the Commission shall have until July 12, 2024 to issue an objection or non-objection to advance notice SR–FICC–2024–802.

All submissions should refer to File Number SR–FICC–2024–802 and should be submitted on or before April 18, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[85]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99844; File No. SR–FICC–2024–007]

Self-Regulatory Organizations; Fixed Income Clearing Corporation; Notice of Filing of Proposed Rule Change To Modify the GSD Rules (i) Regarding the Separate Calculation, Collection and Holding of Margin for Proprietary Transactions and That for Indirect Participant Transactions, and (ii) To Address the Conditions of Note H to Rule 15c3–3a

March 22, 2024.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on March 14, 2024, Fixed Income Clearing Corporation (''FICC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the clearing agency.[3] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of modifications to FICC's Government Securities Division (''GSD'') Rulebook (''Rules'') [4] to (1) provide for FICC to calculate, collect, and hold margin for the proprietary transactions of a Netting Member separately and independently from the margin for transactions that the Netting Member submits to FICC on behalf of indirect participants; (2) simplify and revise the account types through which Members may record transactions at FICC and adopt a new Rule 2B to provide clearer public disclosures through the Rules regarding the GSD account structure; (3) allow Netting Members to elect for margin for indirect participant transactions to be calculated on a gross basis (*i.e.,* an indirect participant-by-indirect participant basis) and legally segregated from the margin for the Netting Member's proprietary transactions (as well as those of other indirect participants); (4) align FICC's margin calculation methodology with the expanded account types and enhance public disclosure through the Rules of that calculation methodology; and (5) simplify the requirements for brokered transactions so that they only apply to transactions executed by an Inter-Dealer Broker Netting Member on the trading platform offered by that Inter-Dealer Broker Netting Member.

These proposed rule changes are primarily designed to ensure that FICC has appropriate rules regarding the separate and independent calculation, collection, and holding of margin for proprietary transactions and that for indirect participant transactions in accordance with the requirements of Rule 17Ad–22(e)(6)(i) under the Act, and that FICC has appropriate rules to satisfy the conditions of Note H to Rule 15c3–3a under the Act for a broker-dealer to record a debit in the customer and broker-dealer proprietary account reserve formulas.[5]

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the clearing agency included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The clearing agency has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

(A) Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Executive Summary of Proposed Changes

On December 13, 2023, the Commission adopted amendments to the covered clearing agency standards that apply to covered clearing agencies that clear transactions in U.S. Treasury securities (each a ''Treasury CCA''), including FICC.[6] These amendments require, among other things, that FICC ''calculates, collects, and holds margin amounts from a direct participant for its proprietary positions in U.S. Treasury securities separately and independently from margin calculated and collected from that direct participant in connection with U.S. Treasury securities transactions by an indirect participant that relies on the services provided by the direct participant to access the covered clearing agency's payment, clearing, or settlement facilities.'' [7] As described below, the proposed rules are designed to comply with these requirements.

Additionally, in the Treasury Clearing Rules, the Commission amended its broker-dealer customer protection rule (''Rule 15c3–3'') [8] and the reserve formulas thereunder (''Rule 15c3–3a'') [9] to permit broker-dealers to include margin required and on deposit at a Treasury CCA as a debit item in the reserve formulas under certain conditions.[10] The proposed rules are also designed to satisfy these conditions and, therefore, would permit broker-dealer Netting Members of FICC to include margin collected from their customers and on deposit at a Treasury CCA as a debit item in the reserve formulas.

First, the proposed changes would provide for the separate and independent calculation, collection, and holding of (i) margin deposited by a Netting Member to support its proprietary transactions and (ii) margin deposited by a Netting Member to support the transactions of an indirect participant. Specifically, FICC would provide in a new Rule 2B that FICC can establish proprietary Accounts to record the transactions that the Netting Member enters into for its own benefit and separately establish indirect participant Accounts to record transactions that the Netting Member submits to FICC for clearance and settlement on behalf of an indirect participant. Under this proposed Rule 2B, only proprietary transactions may be recorded in a proprietary Account, and only indirect participant transactions may be recorded in an indirect participant Account. FICC is also proposing revisions in Rule 4 to identify what types of transactions may be included together in a Margin Portfolio that FICC utilizes to determine a Netting Member's margin requirement. Specifically, FICC would revise the Margin Portfolio definition to make clear that a Margin Portfolio cannot include both proprietary and indirect

[2] 17 CFR 240.19b–4.

[3] FICC filed this proposed rule change as an advance notice (SR–FICC–2024–802) with the Commission pursuant to Section 806(e)(1) of Title VIII of the Dodd-Frank Wall Street Reform and Consumer Protection Act entitled the Payment, Clearing, and Settlement Supervision Act of 2010, 12 U.S.C. 5465(e)(1), and Rule 19b–4(n)(1)(i) under the Act, 17 CFR 240.19b–4(n)(1)(i). participant Accounts. Because proposed Rule 2B would not permit transactions of indirect participants to be recorded in the same Account as a Netting Member's proprietary transactions, a Margin Portfolio would only be able to consist of the same type of proprietary or indirect participant transactions, not both. As a result, the transactions a Netting Member submits to FICC on behalf of an indirect participant would no longer be netted against a Netting Member's proprietary transactions for purposes of calculating a Netting Member's margin requirements. In addition, to ensure separate collection and holding of margin deposited for proprietary and indirect participant transactions, FICC is specifying its practice in Rule 4 that a Netting Member must identify the different Account types for which a deposit is made on its wire instructions.

In order to facilitate these proposed changes, the rule changes would clarify the types of accounts in which Netting Members may record transactions. FICC's ''Accounts'' are not custodial accounts in which FICC holds assets, but rather a mechanism for FICC to record and group transactions. These records are utilized by FICC in connection with its calculation of a Netting Member's margining, settlement, and other obligations. The proposed rule changes would provide greater clarity regarding the purpose and use of these accounts through the public disclosures in the Rules. The proposed rules would do this by revising the definition of ''Account'' in Rule 1 and changing the names of certain Accounts to better reflect their function. The proposed rule changes would also create in a new Rule 2B a roadmap of the types of Accounts FICC maintains and what is recorded in those Accounts.

Second, the proposed rule changes would allow for the segregation of certain customer margin in a manner that satisfies the conditions for a broker-dealer to record a debit in the customer or PAB reserve formula under recently added Note H to Rule 15c3–3a.[11] As noted above, the Commission amended Rule 15c3–3a to permit broker-dealers to include margin required and on deposit at a Treasury CCA as a debit item in the reserve formulas under certain conditions, including that the margin be collected in accordance with the rules of the Treasury CCA that impose the certain requirements.[12]

Such requirements are set forth in the Treasury Clearing Rules and Section (b)(2) of Note H to Rule 15c3–3a, and include, among other things, (1) the margin must be calculated separately for each customer and the broker-dealer must deliver that amount of margin for each customer on a gross basis; (2) the margin must be held in an account of the broker-dealer at the Treasury CCA that is segregated from any other account of the broker-dealer at the Treasury CCA and that is, among other things, used exclusively to clear, settle, novate, and margin U.S. Treasury securities transactions of the customers of the broker-dealer; and (3) the Treasury CCA has systems, controls, policies, and procedures to return the assets to the broker-dealer that are no longer needed to meet current margin requirements resulting from positions in U.S. Treasury securities of the customers of the broker-dealer.[13] The proposed changes are designed to comply with these requirements.

Specifically, FICC is proposing to permit a Netting Member, including a non-broker-dealer Netting Member, to designate any of its indirect participants Accounts for segregation. For any Account so designated, FICC would calculate the margin requirements applicable to the Account on a gross basis, meaning that FICC would not net the transactions of one indirect participant against the transactions of another indirect participant. In addition, FICC would segregate the margin deposited to support the transactions in the Account from any margin securing a Netting Member's proprietary positions, both on FICC's own books and records and at FICC's custodians. FICC would only be able to use such segregated margin to satisfy the obligations of the customer for whom such margin is held. FICC would not be able to apply such margin to the proprietary obligations of the Netting Member that deposited it with FICC or to the obligations of any other Netting Member or participant. FICC would also set forth specific procedures to allow Netting Members to obtain the return of excess segregated margin. The aim of these changes is both to allow broker-dealer Netting Members to collect margin from customers and deposit it with FICC and to provide all customers, including those that access FICC through non-broker-dealers, to be able to segregate margin they deposit.

Third, the proposed rules would align the description of FICC's margin methodology with the revised Account types, consolidate the terms relating to margin calculation in a single, easily identifiable schedule, and make certain changes to the methodology to increase precision and predictability. To achieve these goals, the proposed rules would move the margin calculation methodology, including the relevant defined terms currently located in various Rules, into a new Margin Component Schedule. The proposed rules would also revise Rule 4 to make clear that a Netting Member's margin requirement is the sum of the margin amounts calculated for each type of Account in which transactions are recorded for the Netting Member. Further, the proposed rules would set forth a method for allocating net unsettled positions to individual indirect participants for purposes of calculating margin requirements. In addition, the proposed rules would revise and clarify the calculation of the excess capital premium component of the Clearing Fund, to cap such amount at two times the amount by which a Netting Member's VaR Charge exceeds its Netting Member Capital, clarify the capital amounts that are used in the calculation of such amount, limit FICC's discretion to waive the amount, and provide that FICC may calculate the premium based on updated available information. The proposed changes would also take steps to ensure that the excess capital premium does not result in differential treatment of indirect participants simply because of the particular capital level of the Netting Member providing access to FICC's clearance and settlement systems.

Lastly, the proposed rule changes would modify the terms relating to brokered transactions to require that only transactions that an Inter-Dealer Broker Netting Member executes on the Inter-Dealer Broker Netting Member's own trading platform benefit from favorable loss allocation treatment.[14] FICC believes that making these changes would improve FICC's risk management and promote access by ensuring that its differential treatment of different parties and transactions has a sound risk management justification.

Background

FICC, through GSD, serves as a central counterparty and provider of clearance and settlement services for the U.S. government securities markets. Margin is a key tool that FICC uses to manage its credit exposures to its members. The aggregated amount of all GSD members'

[11] 17 CFR 240.15c3–3a.

[12] *See supra* note 5.

[13] *See* 17 CFR 240.15c3–3a. *Supra* note 5.

[14] *See* Rule 4, Section 7 (''Notwithstanding the foregoing, however, an Inter-Dealer Broker Netting Member, or a Non-IDB Repo Broker with respect to activity in its Segregated Repo Account, shall not be subject to an aggregate loss allocation in an amount greater than $5 million pursuant to this Section 7 for losses and liabilities resulting from an Event Period.''), *supra* note 4.

margin constitutes the GSD Clearing Fund (referred to herein as the ''Clearing Fund''). The objective of the Clearing Fund is to mitigate potential losses to FICC associated with liquidating a member's portfolio in the event FICC ceases to act for that member (hereinafter referred to as a ''default'').[15]

Under Rule 4 (Clearing Fund and Loss Allocation), Netting Members are required to make deposits to the Clearing Fund in an amount (''Required Fund Deposit'') determined by reference to certain components. In determining a Netting Member's Required Fund Deposit, FICC may consider not only the Netting Member's proprietary transactions, but also the transactions that the Netting Member submits on behalf of indirect participants. However, the treatment of the indirect participant transactions for purposes of calculating the Required Fund Deposit can vary depending on whether those transactions are cleared under the Sponsored Service or prime brokerage/correspondent clearing services. Netting Members are required to instruct FICC to record those transactions in one of the position-keeping accounts (each, an ''Account'') that FICC establishes and maintains for the Netting Member. The Account in which a transaction is recorded is relevant for determining the margin requirement associated with that transaction under the Rules. Currently, a Netting Member may instruct FICC to record in the same Account, currently known as a ''Netting Member Account,'' both the proprietary transactions of the Netting Member and transactions that the Netting Member carries for indirect participants through the prime brokerage/correspondent clearing services. Sponsored Member Trades, discussed in greater detail below, must be recorded in a separate Account.

Under Rule 4, a Netting Member's Clearing Fund requirement, other than that arising from Sponsored Member Trades, is calculated on a net basis across all transactions recorded in the same Account of the Netting Member (or, if the Netting Member has elected to have multiple Accounts form part of the same ''Margin Portfolio,'' all transactions recorded in all such Accounts).[16]

The Sponsored Service permits Netting Members that are approved to be ''Sponsoring Members,'' to sponsor certain institutional firms, referred to as ''Sponsored Members,'' into GSD membership.[17] FICC establishes and maintains a ''Sponsoring Member Omnibus Account'' on its books in which it records the transactions of the Sponsoring Member's Sponsored Members (''Sponsored Member Trades'').[18] To determine a Sponsoring Member's Clearing Fund requirement in relation to Sponsored Member Trades recorded in the Sponsoring Member's Sponsoring Member Omnibus Account, FICC calculates the ''VaR Charge'' [19] and the ''MLA Charge'' [20] component for each Sponsored Member such that it does not net the Sponsored Member Trades of one Sponsored Member against the Sponsored Member Trades of another Sponsored Member, even though those Sponsored Member Trades are recorded in the same Sponsoring Member Omnibus Account.[21] For all of the other components, FICC calculates the components by reference to the Sponsoring Member Omnibus Account as a whole (*i.e.,* without regard to which Sponsored Member entered into which Sponsored Member Trade). In no instance does FICC net transactions recorded in a Sponsoring Member's Sponsoring Member Omnibus Account against other transactions of the Sponsoring Member for purposes of calculating the Sponsoring Member's Required Fund Deposit.

As an alternative to the Sponsored Service, a Netting Member (in such capacity, a ''Submitting Member'') may submit to FICC eligible transactions on behalf of the Submitting Member's customers (each, in such capacity, an ''Executing Firm'') through FICC's existing prime broker/correspondent clearing services.[22] As noted above, under the current Rules, a Submitting Member may instruct FICC to record such a transaction in the same Account at FICC as the Submitting Member's proprietary transactions. Accordingly, if transactions a Submitting Member submits on behalf of Executing Firms through the prime broker/correspondent clearing services are recorded in the same Account as the Netting Member's proprietary transactions (or in an Account that forms part of the same Margin Portfolio as an Account in which a Netting Member's proprietary transactions are recorded), FICC nets such transactions against one another in calculating the Netting Member's Required Fund Deposit.[23]

As noted above, the proposed rules would implement the amendments to Rule 17Ad–22(e)(6)(i) that require FICC to calculate, collect, and hold margin from a direct participant for its proprietary transactions in U.S. Treasury securities separately and independently from the margin calculated and collected for the U.S. Treasury transactions of an indirect participant that relies on the services provided by the direct participant to access FICC's payment, clearing, or settlement facilities.[24] The proposed rules would also clarify and simplify FICC's account structure and improve the transparency of FICC's public disclosures of its margining methodology.

The proposed rules are also designed to allow broker-dealer Netting Members of FICC to collect margin from their customers and deposit that margin with FICC. As stated above, a Netting Member is responsible for the Clearing Fund obligations arising from the activity of indirect participant customers (*i.e.,* Sponsored Members and Executing Firms). FICC understands from engagement with broker-dealer Netting Members and their indirect participant customers that, due to the requirements of Rule 15c3–3 [25] and Rule 15c3–3a,[26] broker-dealer Netting Members are effectively unable to deposit with FICC any margin collected from indirect participants to support those indirect participants' transactions and must instead use proprietary resources.

The Treasury Clearing Rules' recent amendments to Rule 15c3–3a permit

[15] The Rules identify when FICC may cease to act for a member and the types of actions FICC may take. For example, FICC may suspend a firm's membership with FICC or prohibit or limit a member's access to FICC's services in the event that member defaults on a financial or other obligation to FICC. *See* Rule 21 (Restrictions on Access to Services), *supra* note 4.

[16] *See* Rule 4, *supra* note 4.

[17] *See* Rule 3A, *supra* note 4.

[18] *See* Rule 1 (definition of ''Sponsored Member Trades''), *supra* note 4.

[19] *See* Rule 1 (definition of ''VaR Charge''), *supra* note 4.

[20] *See* Rule 1 (definition of ''MLA Charge''), *supra* note 4.

[21] *See* Rule 3A, Section 10 (describing how the Required Fund Deposit for Sponsored Member Trades is calculated), *supra* note 4.

[22] *See* Rule 8, *supra* note 4.

[23] Contemporaneously with this proposed rule change, FICC has submitted a separate proposed rule change (File No. SR–FICC–2024–005) under which FICC is proposing to rename its primer broker/correspondent clearing services the ''Agent Clearing Service,'' ''Submitting Members'' as ''Agent Clearing Members'', and ''Executing Firms'' as ''Executing Firm Customers.'' This separate proposed rule change would require that a Netting Member using the Agent Clearing Service submit transactions for Executing Firm Customers through an Agent Clearing Member Omnibus Account, to be recorded separately from its other clearing activity, including its proprietary activity. It would also add a definition for transactions eligible to be submitted by an Agent Clearing Member on behalf of its Executing Firm Customers (''Agent Clearing Transactions''). These proposed terms are used throughout this filing. These proposed changes are pending regulatory approval. A copy of this proposed rule change is *available at www.dtcc.com/legal/sec-rule-filings.*

[24] 17 CFR 240.17Ad–22(e)(6)(i). *See supra* note 5.

[25] 17 CFR 240.15c3–3.

[26] 17 CFR 240.15c3–3a.

broker-dealers to include margin required and on deposit at a Treasury CCA as a debit item in the reserve formulas under certain conditions.[27] As described in more detail below, the proposed changes would address those conditions. Therefore, the proposal would allow broker-dealer Netting Members to collect margin from customers and deposit it with FICC and to permit all customers, including those that access FICC through non-broker-dealers, to segregate margin they deposit.

Finally, the proposed rule changes would address the treatment of transactions submitted to FICC by Inter-Dealer Broker Netting Members and certain Netting Members that operate similarly to Inter-Dealer Broker Netting Members (''Non-IDB Repo Brokers''). The Rules currently cap the amount of loss allocation that may applied to an Inter-Dealer Broker Netting Member or Non-IDB Repo Broker in respect of transactions submitted by such Netting Members to FICC for clearance and settlement (''Brokered Transactions''). This treatment is based on the more limited risk that Brokered Transactions present relative to other transactions.

Description of Proposed Rule Changes

1. Segregate Indirect Participant Margin Requirements and Amend the GSD Account Structure

The proposed rule changes would provide for the separate calculation, collection, and holding of margin supporting a Netting Member's Proprietary Transactions and the margin supporting the transactions a Netting Member submits on behalf of indirect participants, in accordance with the requirements of Rule 17Ad–22(e)(6)(i), adopted under the Treasury Clearing Rules.[28] In connection with these changes, the proposal would also clarify the types of accounts in which Netting Members may record transactions and adopt a roadmap to its account structure in a new Rule 2B.

A. Separately Calculate, Collect and Hold Indirect Participant and Proprietary Margin Requirements

i. Limit Margin Portfolios to Accounts of the Same Type

The separate calculation of proprietary and customer margin would be accomplished by clarifying that each Margin Portfolio may only include Accounts of the same Type (*i.e.,* Dealer Accounts, Broker Accounts, Agent Clearing Member Omnibus Account, and Sponsoring Member Omnibus Accounts).

FICC would make this clarification by amending the definition of ''Margin Portfolio'' in Rule 1 and revising Rule 4, Section 1a, which would be renumbered Section 1b in light of changes described below, to provide that each Margin Portfolio may not contain more than one Type of Account (even if such Accounts are both Segregated Indirect Participants Accounts).

By virtue of these changes, transactions recorded in different Types of Accounts could not be netted against each other when calculating Required Fund Deposit or Segregated Customer Margin Requirements. Since Proprietary Transactions and transactions submitted for indirect participants could not (by virtue of the changes described below) be recorded in the same Type of Account, the changes relating to Margin Portfolios would result in margin for a Netting Member's Proprietary Transactions being calculated separately and independently from margin calculated for the transactions that the Netting Member submits on behalf of indirect participants. As conforming changes, paragraphs (b) and (c) of Section 1b, which currently provide for such separate margin calculations in certain contexts, would no longer be needed since the Margin Portfolio definition and other changes described above would achieve such separate calculations.

ii. Required Fund Deposit Portions and Segregated Customer Margin Requirements

To further clarify how FICC would calculate and collect a Netting Member's margin requirements, the proposed rule changes would make other revisions to Rule 4. Specifically, Rule 4, Section 2, which currently describes a Netting Member's Required Fund Deposit requirement, would be revised to provide that a Netting Member's Required Fund Deposit consists of the sum of amounts (each, a ''Required Fund Deposit Portion'') calculated for each Type of Account, other than Segregated Indirect Participants Accounts. For Segregated Indirect Participants Accounts, there would, as mentioned below, be a Segregated Customer Margin Requirement, which would be the sum of the amounts calculated for the Netting Member's (i) Sponsoring Member Omnibus Accounts designated as Segregated Indirect Participants Accounts and (ii) Agent Clearing Member Omnibus Accounts designated as Segregated Indirect Participants Accounts.

In connection with these changes, FICC would add a corresponding definition of ''Required Fund Deposit Portion'' to Rule 1. FICC would also adopt a defined term referring to the Required Fund Deposit Portion for a Netting Member's Agent Clearing Member Omnibus Account (''Agent Clearing Member Omnibus Account Required Fund Deposit'') and amend the defined term for the Required Fund Deposit Portion for a Netting Member's Sponsoring Member Omnibus Account (the Sponsoring Member Omnibus Account Required Fund Deposit). In addition, conforming changes would be made to the separately proposed Rule 8, Section 7(g) that would describe the requirement of an Agent Clearing Member to make and maintain an Agent Clearing Member Omnibus Account Required Deposit and that the calculation of such requirement would be performed separately from the calculation for Margin Portfolios consisting of the Agent Clearing Member's Proprietary Transactions. Similar conforming changes would be made to Rule 3A, Section 10 relating to a Sponsoring Member's Sponsoring Member Omnibus Account Required Fund Deposit.

iii. Separate Deposit IDs To Facilitate Separate Collection and Holding of Margin

To ensure that margin for Proprietary Transactions is not only calculated separately and independently but also collected and held separately and independently of margin for indirect participant transactions, a new Rule 4, Section 2a would be added to the Rules. This section would require each Required Fund Deposit Portion to be made to FICC using a separate Deposit ID, which is an existing operational mechanism used by Netting Members to identify the type of Account for which a Required Fund Deposit is being made.

A new Rule 4, Section 2b would impose a similar requirement in respect of Segregated Customer Margin Requirements. The use of these separate Deposit IDs would result in margin for each Type of Account being separately transferred to FICC and FICC recording on its books the separate margin amounts for each Type of Account. FICC would also adopt a definition of ''Deposit ID'' in Rule 1.

Rule 4, Sections 2a and 2b would also require FICC to report a Netting Member's Required Fund Deposit and Segregated Customer Margin Requirement twice daily, which is the same timing interval on which FICC currently reports a Netting Member's margin requirement. The report would

[27] *See supra* note 5.

[28] 17 CFR 240.17Ad–22(e)(6)(i).

also specify the amount of margin attributable to each Required Fund Deposit Portion or Segregated Indirect Participants Account, as applicable, so that the Netting Member can transfer the different margin amounts separately.

iv. Eliminate Permitted Margin Affiliates

In connection with these proposed rule changes, the proposal would eliminate the concept of Permitted Margin Affiliates, which allows a Member to elect to include its Accounts in the same Margin Portfolio with the Accounts of an affiliate that is also a Member, in accordance with the Rules.[29] In this way, a Member and its affiliate can net their transactions for purposes of calculating their margin requirements.

In order to support the proposed change described above, which are designed to provide for the separate calculation, collection, and holding of margin, FICC believes that retaining the option for Members to designate Permitted Margin Affiliates would create unnecessary complexity. No Netting Member currently has a Permitted Margin Affiliate, and FICC would need to examine how such a cross-affiliate margining arrangement would function within the context of the proposed revisions to the account structure and margin methodology in order to determine what steps would be needed to implement such an arrangement consistently with the standards applicable to covered clearing agencies. Therefore, FICC is proposing to eliminate the Permitted Margin Affiliate concept at this time.

In order to implement this change, the proposal would remove the definition of ''Permitted Margin Affiliate'' from Rule 1, and remove references to Permitted Margin Affiliates from Rule 4, Section 1a (to be renamed Section 1b, as noted above); Rule 4, Section 1b (which would be removed and replaced by disclosures in the proposed Margin Component Schedule, as discussed below); Rule 4, Sections 4 and 6; Rule 21, Section 1; Rule 22, Section 2; and Rule 29, Section (a).

B. Proposed Roadmap To Account Structure Through New Rule 2B and Revision To Account Structure

FICC is proposing to adopt a new Rule 2B that would describe the types of Accounts FICC is able to maintain for Netting Members, identify the activity that would be recorded in each type of Account, and generally provide a roadmap to market participants of FICC's account structure.

i. Section 1—Establishment of Proprietary Accounts

Rule 2B, Section 1 would provide that FICC can establish and maintain certain ''Proprietary Accounts'' to record transactions that a Netting Member enters into for its own benefit (''Proprietary Transactions''), rather than for the benefit of indirect participants. Proprietary transactions would not include transactions that a Netting Member enters into on behalf of an affiliate.

The Proprietary Accounts available for recording Proprietary Transactions would include ''Dealer Accounts,'' which would be available for all Netting Members, and ''Cash Broker Accounts'' and ''Repo Broker Accounts,'' which would only be available for Inter-Dealer Broker Netting Members. Dealer Accounts would be for purposes of recording a Netting Member's Proprietary Transactions (other than, in the case of an Inter-Dealer Broker Netting Member, its Brokered Transactions), while Cash Broker Accounts would be for purposes of recording an Inter-Dealer Broker Netting Member's Brokered Transactions (other than Brokered Repo Transactions), and Repo Broker Accounts would be for purposes of recording an Inter-Dealer Broker Netting Member's Brokered Repo Transactions. Rule 2B, Section 1 would make clear that, as under FICC's existing Rules, FICC can establish multiple Proprietary Accounts of the same Type for the Netting Member.

In connection with these changes, FICC is proposing to adopt new, corresponding definitions of Proprietary Transactions, Proprietary Accounts, and Cash Broker Accounts in Rule 1, and to make corresponding amendments to the definitions of Dealer Account and Repo Broker Account. FICC is also proposing to remove from Rule 1 the defined term ''Netting Member Account'' and replace references to such Account with references to Dealer Account.

ii. Section 2—Establishment of Non-Proprietary Accounts

Rule 2B, Section 2 would provide that FICC can establish and maintain certain ''Indirect Participants Accounts'' to record transactions that a Netting Member submits to FICC on behalf of Sponsored Members and Executing Firm Customers. These Indirect Participants Accounts would include, in the case of a Sponsoring Member, Sponsoring Member Omnibus Accounts for purposes of recording Sponsored Member Trades, and, in the case of an Agent Clearing Member, Agent Clearing Member Omnibus Accounts for purposes of recording Agent Clearing Transactions of its Executing Firm Customers. Rule 2B, Section 2 would also make clear that FICC can establish multiple Indirect Participants Accounts of the same Type for the Netting Member.

In connection with these changes, FICC is proposing to add to Rule 1 a new definition of Indirect Participants Account, which would include Agent Clearing Member Omnibus Accounts and Sponsoring Member Omnibus Accounts, and to correspondingly amend the definition of Sponsoring Member Omnibus Accounts.

iii. Section 3—Segregation Designations for Indirect Participants Accounts

Rule 2B, Section 3 would permit a Sponsoring Member or Agent Clearing Member to designate any of its Indirect Participants Accounts as a segregated customer account (a ''Segregated Indirect Participants Account''). The purpose of such a designation, as further described below, would be to give Netting Members a mechanism to direct FICC to calculate and segregate margin deposited in connection with the Account in accordance with the conditions described in Note H to Rule 15c3–3a (''Note H''), as further described below.[30]

In connection with this revision, a new definition for ''Segregated Indirect Participant'' would be added to Rule 1 to mean a Sponsored Member or an Executing Firm Customer whose transactions are recorded in a Segregated Indirect Participants Account.

Rule 2B, Section 3 would provide that the designation of an Account as a Segregated Indirect Participants Account constitutes a representation to FICC by the Netting Member that the Netting Member intends to meet all margin requirements with respect to such Account using assets deposited by the Segregated Indirect Participants with the Netting Member, with the exception of temporary ''prefunding'' by the Netting Member while a margin call to the Segregated Indirect Participant is outstanding. The purpose of this representation is to ensure that only margin deposited by customers, not the Netting Member's proprietary assets, is eligible for segregation.

Rule 2B, Section 3 would further provide that the margin requirement (''Segregated Customer Margin

[29] *See* Rule 1 (defining ''Permitted Margin Affiliates'') and Rule 4, Section 1a(a) and (b) (permitting Members to include Accounts of their Permitted Margin Affiliates in their Margin Portfolio). *Supra* note 4.

[30] 17 CFR 240.15c3–3a.

Requirement'') calculated for a Segregated Indirect Participants Account would equal the sum of the margin requirements that apply to each Segregated Indirect Participant whose transactions are recorded in the Account, as though each such Segregated Indirect Participant were a Netting Member. By virtue of this change and as further described below, in calculating the Segregated Customer Margin Requirement for a Segregated Indirect Participants Account, FICC would not net the transactions of multiple Segregated Indirect Participants against one another. A corresponding definition of ''Segregated Customer Margin Requirement'' would be added to Rule 1 to mean the amount of cash and securities that a Netting Member is required to deposit with FICC to support the obligations arising under transactions recorded in its Segregated Indirect Participants Accounts. As described in greater detail below, such amounts would be further described and addressed in Rule 4, Section 2(a)(v) and (vi).

iv. Section 4—Designation of Account When Submitting Transactions

Lastly, Rule 2B, Section 4 would require a Netting Member, at the time it submits a Transaction to FICC for clearance and settlement, to designate the Account in which the particular transaction should be recorded. Any such designation would constitute a representation to FICC that the transaction is of a type that may be recorded in that Account in accordance with the Rules. The purpose of such representation would be to ensure that Netting Members record only their Proprietary Transactions in Proprietary Accounts, which separate recordation is necessary for the separate and independent calculation, collection, and holding of margin for direct participant and indirect participant transactions.

In addition, Rule 2B, Section 4 would provide that, when submitting a transaction on behalf of a Sponsored Member or Executing Firm Customer, a Netting Member must include an identifier for the applicable Sponsored Member or Executing Firm Customer. This requirement is consistent with an existing requirement in the Schedule of Required Data Submission Items in the Rules and ensures that FICC continues to have the ability to accurately calculate the Required Fund Deposit and Segregated Customer Margin Requirements appropriately. This requirement also facilitates FICC's ability to engage in risk management and market surveillance in accordance with the covered clearing agency standards.

In connection with these changes, FICC also proposes to remove from Rule 1 the term ''Netting Member Account,'' as such defined term would no longer be used. References to Netting Member Accounts throughout the Rules would be revised to ''Dealer Accounts'', which would more clearly distinguish these Accounts from Broker Accounts, the other type of Proprietary Accounts. FICC would also remove Section 11 of Rule 3, which currently concern the types of Accounts that Netting Members may open. Rule 2B would now describe the Types of Accounts Netting Members may request as well as the transactions that may be recorded in such Accounts.

The foregoing changes are designed to ensure that proprietary and indirect participant transactions are recorded in separate Accounts. This would assist FICC in tracking and managing the risks associated with a Netting Member's proprietary and indirect participant transactions. It would also facilitate compliance with the revised covered clearing agency standards regarding the separate calculation, collection, and holding of indirect participant and proprietary margin, which is described in further detail below.

v. Simplification and Revision of Account Structure

To support the foregoing changes, FICC is proposing to provide further clarity on what an Account is for purposes of the Rules. Under the Rules, ''Accounts'' at FICC are not cash, securities, or other kinds of custodial accounts through which FICC holds assets for a Netting Member. Instead, FICC Accounts are a recordkeeping mechanism by which FICC records certain transactions submitted by Netting Members to FICC for clearance and settlement. This recordkeeping mechanism allows FICC to determine which transactions should be netted against one another in determining various obligations of the Netting Member, including its funds-only settlement amount and securities settlement obligations and its Required Fund Deposit. As discussed above, generally speaking, all transactions recorded in the same Account are netted for purposes of determining these obligations (though certain components of the Required Fund Deposit arising from Sponsored Member Trades are calculated on a gross basis, as described above). FICC is proposing to amend the definition of ''Account'' in Rule 1 to make clear that an ''Account'' means an account maintained by FICC to record transactions. In addition, FICC is proposing to adopt a new defined term, ''Type of Account'' or ''Type,'' to refer to the different kinds of Accounts described above.

FICC is also proposing to eliminate the concept of a Market Professional Cross-Margining Account, which refers to an Account carried by FICC for a Netting Member that is limited to Eligible Positions of Market Professionals or an Account that is carried by a Netting Member for Market Professionals that are party to a Market-Professional Agreement for Cross-Margining. FICC does not currently have in place a cross-margining arrangement for market professional indirect participants and would need to examine how such an arrangement would function within the context of the proposed revisions to the Account structure and margin methodology in order to determine what steps would be needed to implement such an arrangement consistently with the standards applicable to covered clearing agencies. Therefore, FICC is proposing to eliminate the Market Professional Cross-Margining Account concept at this time.

In order to implement this change, the proposal would remove the definition of ''Market Professional Cross-Margining Account'' from Rule 1 and remove provisions concerning Market Professional Cross-Margining Accounts from Rule 1, Rule 4 and Rule 29.

2. Proposed Rule Changes Relating to Note H of Rule 15c3–3a

As described above, FICC would permit Netting Members to designate certain Indirect Participants Accounts as Segregated Indirect Participants Accounts. Such a designation would have the effect of causing FICC to calculate, collect, and hold the required margin for transactions recorded in such Accounts in accordance with the conditions for recording a debit in the customer reserve formula set forth in Note H of Rule 15c3–3a.[31]

A. Gross Calculation of Segregated Customer Margin Requirements

In order to satisfy the requirement of Section (b)(2)(i) of Note H to Rule 15c3–3a that the margin requirement be calculated on a gross basis,[32] new Rule 2B would, as noted above, provide that when calculating the Segregated Customer Margin Requirement, FICC would not net the transactions of multiple Segregated Indirect Participants, but would net the transactions of a single Segregated

[31] 17 CFR 240.15c3–3a.

[32] *Id.*

Indirect Participant that are recorded in the same Account.

In addition, the revised Rule 4, Section 1b would require FICC to calculate a Netting Member's Segregated Customer Margin Requirement with respect to a particular Segregated Indirect Participants Account as the sum of the margin requirements applicable to each Segregated Indirect Participant whose transactions are recorded in such Account, as though each Segregated Indirect Participant were a separate Netting Member with a single Margin Portfolio consisting of such transactions. These provisions would result in FICC calculating separate margin amounts for each Segregated Indirect Participant and for such amounts to be collected on a gross basis.

FICC would also include language in the new Margin Component Schedule to achieve gross margining of Segregated Indirect Participants Accounts. Specifically, in Section 1 of the new Margin Component Schedule discussed below, new language would require each Netting Member for which FICC maintains a Segregated Indirect Participants Account to deposit with FICC Segregated Customer Margin equal to the sum of the Segregated Customer Margin Requirements for all such Accounts. Such language would further provide that each Segregated Customer Margin Requirement will be calculated twice daily and equal the sum of the amounts calculated pursuant to Section 3 of the Margin Component Schedule for each Segregated Indirect Participant whose transactions are recorded in the relevant Segregated Indirect Participants Account.

Section 3 of the new Margin Component Schedule, in turn, would set out the methodology for calculating such margin amounts. That section would provide for FICC to perform substantially the same calculation it currently performs when determining a Netting Member's Required Fund Deposit, except (i) such calculation would be performed on a Segregated Indirect Participant-by-Segregated Indirect Participant basis as though each Segregated Indirect Participant represented a separate Margin Portfolio and (ii) FICC would not impose an Excess Capital Premium.

With regard to the latter, FICC does not believe it would be appropriate to require an indirect participant to deposit with FICC additional margin on account of the capital position of its Netting Member. The Excess Capital Premium is designed to address the risk that a Netting Member with low capital relative to its VaR Charge will not be able to perform its obligations. However, Segregated Customer Margin cannot be applied to a Netting Member's obligations (other than to perform on behalf of the individual indirect participant for whom the Segregated Customer Margin is held). Accordingly, requiring indirect participants to deposit an additional Excess Capital Premium would not serve a risk management purpose. Further, requiring indirect participants who access FICC's clearance and settlement systems through a Netting Member with low capital to deposit more margin than indirect participants who access FICC's clearance and settlement system through other Netting Members would treat similarly situated indirect participants differently without an appropriate basis to do so. Moreover, it could lead to concentration among Netting Members, as indirect participants would be disincentivized to access clearing through smaller Netting Members, since smaller Netting Members typically have lower net capital.

For similar reasons, FICC would not add Segregated Customer Margin to Section 4 of the Margin Component Schedule, which describes FICC's ability to impose increased Required Fund Deposits under certain circumstances. However, when determining whether to increase the Required Fund Deposit of a Netting Member under the circumstances described in Section 4, FICC may consider the risk presented by a Netting Member in view of all activity it submits to FICC, including activity of indirect participants.

As a conforming change, FICC would revise the definitions of most of the components utilized for calculating a Netting Member's Segregated Customer Margin Requirement as well as associated definitions to provide that these apply to Segregated Indirect Participants on a Segregated Indirect Participant-by-Segregated Indirect Participant basis. These definitions include the Backtesting Charge, the Holiday Charge, the Intraday Supplemental Fund Deposit, the Margin Liquidity Adjustment or MLA Charge, the Margin Proxy, the Minimum Margin Amount,[33] the Portfolio Differential Charge, the Unadjusted GSD Margin Portfolio Amount, and the VaR Charge.

B. Segregation of Customer Margin Deposits

In order to satisfy the segregation requirements of Section (b)(2)(iii) of Note H to Rule 15c3–3a,[34] FICC is proposing a number of changes to the Rules. First, FICC is proposing to adopt a new definition of ''Segregated Customer Margin'' in Rule 1, which definition would refer to ''all securities and funds deposited by a Sponsoring Member or an Agent Clearing Member with the Corporation to satisfy its Segregated Customer Margin Requirement.'' FICC would also adopt a new Rule 4, Section 1a. That provision would require a Netting Member to deposit Segregated Customer Margin with FICC equal to the Netting Member's Segregated Customer Margin Requirement in accordance with the timing provisions generally applicable to Required Fund Deposits.

i. Establishment of Segregated Accounts

In order to satisfy the requirements of Section (b)(2)(iii) of Note H that margin ''be held in an account of the broker or dealer at the qualified clearing agency that is segregated from any other account of the broker or dealer at the qualified clearing agency,''[35] Rule 4, Section 1a would provide for FICC to establish on its books and records for each Netting Member that deposits Segregated Customer Margin a ''Segregated Customer Margin Custody Account'' corresponding to each Segregated Indirect Participants Account of such Netting Member. Segregated Customer Margin Custody Account would be defined in Rule 1 as ''a securities account within the meaning of the NYUCC maintained by the Corporation, in its capacity as securities intermediary as such term is used in the NYUCC, for an Agent Clearing Member or Sponsoring Member for the benefit of such Member's Segregated Indirect Participants.'' In other words, in contrast to the other FICC Accounts, which, as discussed above, are position record-keeping accounts rather than custodial accounts, each Segregated Customer Margin Custody Account would be a ''securities account'' within the meaning of the NYUCC.

As noted above, FICC is also proposing to amend the definition of ''Account'' in Rule 1 to make clear that such term refers only to an account maintained by FICC for a Netting Member to record transactions submitted by that Netting Member. FICC believes this change would help to

[33] FICC has filed a proposed rule change and related advance notice to adopt a Minimum Margin Amount at GSD (File Nos. SR–FICC–2024–003 and SR–FICC–2024–801). This proposal is pending regulatory approval, and the filings are *available at www.dtcc.com/legal/sec-rule-filings.*

[34] 17 CFR 240.15c3–3a.

[35] *Id.*

distinguish "Accounts," which are simply a transaction recordation mechanism, from the "Segregated Customer Margin Custody Account," which is a traditional custodial account to which FICC would credit cash and securities.

Rule 4, Section 1a would further provide that any assets credited to the Segregated Customer Margin Custody Account would be treated as financial assets within the meaning of the NYUCC. These changes would have the effect of making FICC the "securities intermediary" in respect of each Segregated Customer Margin Custody Account and the Netting Member, on behalf of its Segregated Indirect Participants, the "entitlement holder" under the NYUCC.[36] By virtue of these designations, the Segregated Customer Margin held by FICC would be reserved for the Netting Member (on behalf of its Segregated Indirect Participants), including in an FICC insolvency.[37]

Rule 4, Section 1a would further provide that all Segregated Customer Margin deposited with FICC to support the obligations arising under the transactions recorded in a given Segregated Indirect Participants Account be credited to the corresponding Segregated Customer Margin Custody Account. In other words, rather than treat Segregated Customer Margin as general Clearing Fund, FICC would record such margin in a specific Segregated Customer Margin Custody Account maintained by FICC on its books and records for the Netting Member that deposited such Segregated Customer Margin, which Account would be separate from any other Accounts maintained by FICC for the Netting Member, including fellow Segregated Customer Margin Custody Accounts. In furtherance of the goal of segregation, FICC would also amend Rule 4, Section 3a to provide that any interest on Segregated Customer Margin consisting of cash be paid to Netting Members.[38]

[36] UCC § 8–102(7) ("'Entitlement holder' means a person identified in the records of a securities intermediary as the person having a security entitlement against the securities intermediary. . . .").

[37] *See* UCC § 8–503.

[38] Rule 4, Section 1a would also specify New York as the "securities intermediary's jurisdiction" for purposes of the NYUCC and specify that New York law would govern all issues specified in Article 2(1) of the Convention on the Law Applicable to Certain Rights in Respect of Securities Held with an Intermediary, July 5, 2006, 17 U.S.T. 401, 46 I.L.M. 649 (entered into force Apr. 1, 2017) (the "Hague Securities Convention"). These changes are designed to ensure that New York law governs each Segregated Customer Margin Custody Account.

ii. Exclusive Use, Account Designation, and Exclusive Benefit

To satisfy the requirements of Section (b)(2)(iii)(A) of Note H that customer margin be "used exclusively to clear, settle, novate, and margin U.S. Treasury securities transactions of the customers of the broker or dealer;" [39] FICC would provide in Rule 4, Section 1a that the Segregated Customer Margin credited to a Segregated Customer Margin Custody Account would be used exclusively to settle and margin transactions in U.S. Treasury securities recorded in the corresponding Segregated Indirect Participants Account.

Rule 4, Section 1a would also provide that the Segregated Customer Margin Custody Account would be designated on FICC's books and records as a "Special Clearing Account for the Exclusive Benefits of the Customers of [the relevant Sponsoring Member or Agent Clearing Member]." This is in accordance with the designation requirements of Section (b)(2)(iii)(B) of Note H.[40]

Section (b)(2)(iii)(C) of Note H requires that the account at the clearing agency to which customer margin is credited be subject to a written notice from the clearing agency to the broker-dealer stating that the margin credited to the account is being held "for the exclusive benefit of the customers of the broker or dealer in accordance with the regulations of the Commission and [is] being kept separate from any other accounts maintained by the broker or dealer or any other clearing member at the qualified clearing agency." [41] Rule 4, Section 1a would provide for FICC to provide this notice to any Netting Member that is a Registered Broker or Registered Dealer and has designated an account as a Segregated Indirect Participants Account.

iii. Limitation on Permitted Liens and Use of Margin Deposits

FICC is also proposing changes to the Rules to satisfy the condition of Section (b)(2)(iii)(D) of Note H that the account established pursuant to Section (b)(2)(iii), *i.e.,* each Segregated Customer Margin Custody Account, be subject to a written contract providing that the customer margin in the account, *i.e.,* the Segregated Customer Margin, not be available to cover claims arising from the broker-dealer or any other clearing member defaulting on an obligation to the Treasury CCA, or be subject to any other right, charge, security interest, lien, or claim of any kind in favor of the qualified clearing agency or any person claiming through the qualified clearing agency, except a right, charge, security interest, lien, or claim resulting from a cleared U.S. Treasury securities transaction of a customer of the broker-dealer effected in the account.[42]

[39] 17 CFR 240.15c3–3a.

[40] *Id.*

[41] *Id.*

Specifically, FICC is proposing to amend the security interest each Netting Member provides to FICC under Rule 4, Section 4. That security interest, which is binding on the Netting Member and FICC through the incorporation of the Rules into the membership agreement between FICC and such Netting Member, currently applies to all cash and securities deposited by a Netting Member with FICC pursuant to Rule 4 and Rule 13 (defined in the Rules as the "Actual Deposit") and secures all obligations of the Netting Member to FICC. FICC is proposing to amend Rule 4, Section 4 to exclude Segregated Customer Margin from the scope of the Actual Deposit. Such Segregated Customer Margin would instead be subject to a separate security interest pursuant to which the Segregated Customer Margin would secure only obligations arising out of Segregated Indirect Participants Accounts. FICC would also make a conforming change to Rule 3A, Section 10(f) to make clear that the security interest described therein only applies to the security interest granted in the Actual Deposit.

In addition, the bulk of the provisions of the Rules concerning Clearing Fund, including those relating to FICC's ability to use Clearing Fund, would not apply to Segregated Customer Margin since such margin would not form part of the Clearing Fund. The only exceptions are the language in Rule 3A, Section 10(f) stating that margin obligations are secured by the Actual Deposit; the language in Rule 3A, Section 10(g) concerning fines applicable to a failure to meet margin requirements; the language in Rule 4, Section 3a concerning the requirement that cash margin deposits be made in immediately available funds; the language in Rule 4, Section 3b regarding the haircutting, delivery, qualification, and substitution requirements for securities margin; and the language in Rule 4, Section 9 relating to the requirement of Netting Members to deliver margin. These changes would ensure that FICC's broad use rights in respect of Clearing Fund, *e.g.,* for loss mutualization, do not apply to Segregated Customer Margin.

In addition, FICC is proposing to amend Rule 4, Section 5 to provide that, on each Business Day, FICC would

[42] *Id.*

calculate the portion of Segregated Customer Margin that supports each Segregated Indirect Participant's transactions. FICC may only use such portion to secure or settle the performance of the obligations of that Segregated Indirect Participant (or its Sponsoring Member or Agent Clearing Member with respect to the Segregated Indirect Participant) or for permitted investment purposes described below. It would further provide that FICC would not be permitted to use Segregated Customer Margin supporting one Segregated Indirect Participant's transaction to secure or settle any other person's transactions, including those of a fellow Segregated Indirect Participant.

These changes would thus not only prohibit FICC from using Segregated Customer Margin to cover the obligations of the broker-dealer Netting Member in respect of its Proprietary Transactions or those of any other Netting Member in accordance with the requirements of Section (b)(2)(iii)(D) of Note H, but they would also limit "fellow customer risk" for Segregated Indirect Participants (*i.e.,* the risk that one customer incurs a loss on account of a default of another customer because the clearing organization applies margin deposited by the first customer to the second customer's obligations).[43] FICC believes these changes would facilitate greater access to its clearance and settlement services.

FICC is proposing to require that the Segregated Margin Requirement be no lower than $1 million per Segregated Indirect Participant, and that the same form of deposit requirements set forth in Rule 4, Section 3 apply to Segregated Customer Margin such that no less than $1 million per Segregated Indirect Participant consist of cash. These changes would be accomplished through a new subsection (c) of Rule 4, Section 3 and reflected in the Margin Component Schedule.

First, this minimum requirement is consistent with the $1 million minimum cash requirement applicable to each Margin Portfolio of a Netting Member. FICC believes it is appropriate to apply the same minimum cash requirement to each Segregated Indirect Participant that it currently applies to each Margin Portfolio because, as described above, FICC would be required to calculate the margin requirements for these participants on a gross basis, as if each Segregated Indirect Participant were a separate Margin Portfolio, and would be restricted from using these funds to address any losses other than losses resulting from the participant for whom the funds are held.

Second, because FICC would be restricted from using these funds to address any losses other than losses resulting from the indirect participant for whom these funds are deposited, FICC believes this minimum requirement is appropriate to mitigate the risk exposures presented by this limitation. FICC's daily backtesting of the sufficiency of Clearing Fund deposits has revealed a heightened likelihood of backtesting deficiencies for those Members with lower deposits that are not sufficient to mitigate any abrupt intraday change in their exposures.[44] Based on the analysis and impact studies FICC conducted in connection with a recent increase to minimum Required Fund Deposit for Netting Members,[45] FICC has determined that a $1 million minimum requirement is the appropriate minimum amount to optimize the balance between financial impact of the requirement to Members and FICC's ability to continue to meet its regulatory obligation to maintain a backtesting performance coverage ratio above its 99 percent coverage target.

FICC is not able to predict how many indirect participants may elect to submit activity to FICC through a Segregated Indirect Participants Account, or the size and volume of that activity. However, because the margin requirements for each Segregated Indirect Participant would be calculated in the same manner as the requirements for each Margin Portfolio, it believes that these studies provide it with an appropriate approximation of the risks it may face if margin deposits for these Accounts are not subject to a minimum requirement.

C. Holding Segregated Customer Margin Deposits in Bank and FRBNY Accounts

To satisfy the eligible custodian conditions set forth in Section (b)(2)(iv) of Note H,[46] FICC is proposing to amend Rule 4, Section 1a to provide that all Segregated Customer Margin be held in an account of FICC at a bank within the meaning of the Act that is insured by the Federal Deposit Insurance Corporation, or at the Federal Reserve Bank of New York. Rule 4, Section 1a would also provide that such account would be segregated from any other account of FICC and would be used exclusively to hold Segregated Customer Margin, in accordance with Section (b)(2)(iv)(A) of Note H to Rule 15c3–3a.[47] To satisfy the requirements of Sections (b)(2)(iv)(B) and (C) of Note H,[48] Rule 4, Section 1a would further provide that each such account would be subject to (i) a written notice of the bank or Federal Reserve Bank provided to and retained by FICC that the account is being held by the bank or Federal Reserve Bank pursuant to Rule 15c3–3 and is being kept separate from any other accounts maintained by FICC or any other person at the bank or Federal Reserve Bank and (ii) a written contract between FICC and the bank or Federal Reserve Bank which provides that the Segregated Customer Margin in the account is subject to no right, charge, security interest, lien, or claim of any kind in favor of the bank or Federal Reserve Bank or any person claiming through the bank or Federal Reserve Bank.

D. Investment Restrictions on Segregated Customer Margin Cash

In accordance with Section (b)(2)(ii) of Note H,[49] Rule 4, Section 1a would be amended to require FICC to only invest Segregated Customer Margin consisting of cash in U.S. Treasury securities with a maturity of one year or less. FICC will propose changes to the Clearing Agency Investment Policy by a separate proposed rule change filing to address the separate holding and investment of Segregated Customer Margin cash, consistent with the disclosures proposed to be added to Rule 4. Pursuant to those changes, FICC would only hold Segregated Customer Margin consisting of cash in a cash deposit account at the Federal Reserve Bank of New York or, pending the opening of such account, another FDIC-insured bank and does not intend to make any other investment of these funds.

E. Return of Segregated Customer Margin

Lastly, in order to satisfy the condition in section (b)(2)(v) of Note H

[43] In the event of the insolvency, resolution, or liquidation of a Netting Member, a Segregated Indirect Participant's ability to recover any funds or securities it has posted to its Netting Member in connection with an FICC-cleared transaction or that the Netting Member receives from FICC in connection with such a transaction will depend on the relevant insolvency, resolution, or liquidation regime. FICC would not, except as directed by the relevant insolvency, resolution, or liquidation officials in accordance with applicable law, make any payments or transfer any assets directly to an indirect participant.

[44] As a covered clearing agency, FICC is required under Rule 17Ad–22(e)(6)(vi) to conduct backtests of its margin model at least once a day. 17 CFR 240.17Ad–22(e)(6)(vi). FICC's backtesting performance target is 99 percent.

[45] *See* Securities Exchange Act Release No. 96136 (Oct. 24, 2022), 87 FR 65268 (Oct. 28, 2022) (SR–FICC–2022–006).

[49] *Id.*

that a Treasury CCA adopt rules requiring systems, controls, policies, and procedures to return excess customer margin to a broker-dealer,[50] FICC is proposing to adopt certain amendments to Rule 4, Section 10. Under the proposed rule changes, Rule 4, Section 10 would be revised to require FICC to calculate twice each Business Day the excess of a Netting Member's Segregated Customer Margin over the Segregated Customer Margin Requirement (such amount, the ''Excess Segregated Customer Margin'').[51] In addition, FICC would adopt a new Rule 4, Section 10(b) that would require FICC to return a Netting Member's Excess Segregated Customer Margin at the Netting Member's request. In order to manage the risk of a Segregated Indirect Participant's transactions in accordance with the requirements of Rule 17Ad–22(e)(6) under the Act,[52] FICC would retain the discretion to retain such Excess Segregated Customer Margin if the Netting Member has any outstanding payment or margin obligation with respect to the transactions of any Segregated Indirect Participant.

However, proposed Section 10(b) of Rule 4 would provide that, unlike in the case with Clearing Fund, FICC would not be able to retain Excess Segregated Customer Margin due to any obligation of the Netting Member that is unrelated to the Segregated Indirect Participants Account, unless FICC is either required to do so by applicable law or is authorized to do so by the Commission.

3. Align Margin Methodology With Proposed Account Structure and Enhance Public Disclosures of Margin Components and Clearing Fund Methodology

FICC is proposing changes to the Rules to reorganize, clarify, and refine its margin calculation methodology. FICC is not changing the method by which it calculates the various margin components.

A. Consolidate Margin Components and Clearing Fund Calculation Methodology in Proposed Margin Component Schedule

In order to improve the clarity and transparency of its margin components and Clearing Fund calculation methodology, FICC is proposing to move the calculation methodology from Rule 4, Sections 1b, and 2a, Rule 3, Section 14, and Rule 3A, Section 10, as well as the associated definitions of the margin components and associated terms, including Backtesting Charge, Blackout Period Exposure Adjustment, Excess Capital Differential, Excess Capital Ratio, Excess Capital Premium, Holiday Charge, Intraday Supplemental Fund Deposit, Margin Liquidity Adjustment Charge or MLA Charge, Margin Proxy, Minimum Margin Amount,[53] Portfolio Differential Charge, Unadjusted GSD Margin Portfolio Amount, VaR Charge, VaR Floor and VaR Floor Percentage Amount to a new Margin Component Schedule. As noted above, this methodology would not change, and would continue to be substantively the same as that which currently exists under Rule 4 and Rule 3A, Section 10.

The Margin Component Schedule would include existing and refined descriptions of the manner and method by which FICC would calculate a Netting Member's Required Fund Deposit and Segregated Customer Margin Requirement. FICC believes that describing its margin calculation methodology in a single schedule would facilitate access to its clearing and settlement services by making it easier for market participants to identify and review that methodology. FICC would also make conforming changes to provisions of the Rules that reference the margin calculation methodology of Rule 4 so that such provisions reference the Schedule of Margin Components.

Section 1 of the Margin Component Schedule would provide that both a Netting Member's Required Fund Deposit and its Segregated Customer Margin Requirement would be calculated twice each Business Day and that the Netting Member would be required to meet such requirements. This is the same time interval in which FICC currently calculates and collects a Netting Member's margin requirements. Section 2 of the Margin Component Schedule would set forth the methodology for calculating a Netting Member's Required Fund Deposit. As discussed above, Section 3 of the Margin Component Schedule would set forth the methodology for calculating a Netting Member's Segregated Customer Margin Requirement. Section 4 of the Margin Component Schedule would set forth the terms under which FICC may impose increased Required Fund Deposits. These terms would be substantively the same as those currently in Rule 4 and Rule 3A, Section 10.

Section 5 of the Margin Component Schedule would contain the relevant definitions for the margin methodology calculation. These would be substantively the same as the existing definitions in Rule 1, with certain changes. As noted above, the definitions of Backtesting Charge, Blackout Period Exposure Adjustment, Excess Capital Differential, Excess Capital Ratio, Excess Capital Premium, Holiday Charge, Intraday Supplemental Fund Deposit, Margin Liquidity Adjustment or MLA Charge, Margin Proxy, Minimum Margin Amount,[54] Portfolio Differential Charge, Unadjusted GSD Margin Portfolio Amount, VaR Charge, VaR Floor and VaR Floor Percentage Amount would be revised to provide for such charges to be calculated for purposes of Segregated Customer Margin Requirements on a Segregated Indirect Participant-by-Segregated Indirect Participant basis. In addition, the MLA Charge definition would be amended to provide that, if a Segregated Indirect Participant clears through multiple Accounts (including Accounts of different Netting Members), then the MLA Charge applicable to its transactions carried in a given Segregated Indirect Participants Account would equal the greater of (i) an amount calculated only with regard to the transactions maintained in that Account (*i.e.,* without regard to the other Accounts in which the Segregated Indirect Participant's transactions are recorded) and (ii) an amount calculated on a consolidated portfolio basis (*i.e.,* taking into account the transactions carried in each of the Accounts). This is currently the same methodology that is used for Sponsored Members that clear through multiple Accounts.

B. Revise Definition of ''Current Net Settlement Positions''

In order to refine its margin calculation methodology, FICC is also proposing to amend the definition in Rule 1 of Current Net Settlement Positions to provide for Current Net Settlement Positions in a Sponsoring Member Omnibus Account or Segregated Indirect Participants Account that are not clearly allocable to an individual Sponsored Member or Segregated Indirect Participant to be allocated, for purposes of calculating margin requirements, pro rata to the Sponsored Members or Segregated Indirect Participants that had, as of the end of the preceding Business Day, positions in the same direction and CUSIP as the un-allocable Current Net Unsettled Positions. This situation could arise if, for example, a transaction

[50] *Id.*

[51] The twice each Business Day interval would also apply to the calculation of a Netting Member's excess Required Fund Deposit, since that is the interval on which FICC currently performs such calculation.

[52] 17 CFR 240.17Ad–22(e)(6).

[53] *Supra* note 33.

[54] *Supra* note 33.

recorded in a Sponsoring Member Omnibus Account or Segregated Indirect Participants Account fails to settle. FICC believes this methodology facilitates a reasonable and fair allocation for purposes of calculating gross margin requirements.

FICC would make a corresponding deletion to the language of Rule 3A, Section 7 that addresses the treatment of such positions in Sponsoring Member Omnibus Accounts. Currently Rule 3A, Section 7(a)(i) provides that Net Settlement Positions per CUSIP shall be calculated for each Sponsored Member in the same manner set forth in Rule 11 for Netting Members. The proposed changes to the definition of Current Net Settlement Positions would, however, result in a different calculation of the Net Settlement Positions per CUSIP for Sponsored Members whose positions are recorded in a Sponsoring Member Omnibus Account than for Netting Members. Therefore, the statement in Rule 3A, Section 7 would no longer be correct and would be removed from the Rules.

C. Enhance the Methodology for Calculating the Excess Capital Premium

FICC is also proposing to amend the terms related to the Excess Capital Premium, one of the components of the Required Fund Deposit calculation, in order to make such calculation more precise and predictable. Currently, the Excess Capital Premium applicable to a Netting Member equals the Netting Member's ''Excess Capital Ratio'' (*i.e.,* its VaR Charge divided by its Netting Member Capital) multiplied by its ''Excess Capital Differential'' (*i.e.,* the amount by which a Netting Member's VaR Charge exceeds its Netting Member Capital). However, FICC currently reserves the right to collect less than this amount or to return some or all of this amount.

FICC is proposing to make the Excess Capital Premium more precise and predictable by revising the definition to (i) cap such amount at two times a Netting Member's Excess Capital Differential, (ii) provide that FICC would use the Netting Member Capital amounts set forth in the Netting Member's most recent Form X–17–A–5 (Financial and Operational Combined Uniform Single (''FOCUS'') Report or Consolidated Report of Condition and Income (''Call Report''), as applicable, (iii) permit FICC in its discretion to accept updated amounts provided by a Netting Member prior to the issuance of the Netting Member's next financial report, and (iv) set forth a specific procedure through which FICC may waive the Excess Capital Premium. With regard to (iv), the proposed rule changes would provide that only a Managing Director in FICC's Group Chief Risk Office could grant waiver of an Excess Capital Premium and only in exigent circumstances if FICC observed extreme market conditions or other unexpected changes in factors, based on all relevant facts and circumstances, including the degree to which a Netting Member's capital position and trading activity compare or correlate to the prevailing exigent circumstances and whether FICC can effectively address the risk exposure presented by a Netting Member without the collection of the Excess Capital Premium from that Netting Member. Any such waiver would need to be documented in a written report made available to the relevant Netting Member. FICC believes that these changes, which are substantially similar to changes recently adopted by the National Securities Clearing Corporation, would enhance the ability of Netting Members to identify what their Excess Capital Premium will be and to ensure such amount is accurately calibrated.[55]

FICC would also amend the defined term ''Netting Member Capital'' in Rule 1 to refer to a Netting Member's Net Capital, Net Assets, or Equity Capital, as applicable based on the Netting Member's type of regulation. The definition of ''Net Capital,'' in turn, would be revised to refer specifically to the net capital of a Netting Member as reported on its most recent FOCUS Report or, if a Netting Member is not required to file a FOCUS Report, on its most recent financial statements or equivalent reporting. ''Equity Capital'' would be defined in Rule 1 to mean the equity capital of a Netting Member as reported on its most recent Call Report, or if a Netting Member is not required to file a Call Report, on its most recent financial statements or equivalent reporting. FICC believes these changes would increase predictability and understanding of how FICC calculates the Excess Capital Premium.

FICC would also remove obsolete references to margin requirements for pending transactions since FICC does not apply margin requirements to such transactions.

D. Exclude Segregated Customer Margin From Calculation of Excess Capital Premium Charge

FICC is also proposing to revise the definitions of Excess Capital Ratio and Excess Capital Differential in the Margin Component Schedule to exclude the VaR Charge calculated with respect to Segregated Indirect Participants.

The VaR Charge assessed for each Segregated Indirect Participant would be satisfied by the Segregated Indirect Participant, and not by the Netting Member. As noted above, the Excess Capital Premium is designed to address the risk that a Netting Member with low capital relative to value-at-risk is not able to perform its obligations. However, Segregated Customer Margin cannot be applied to satisfy a Netting Member's obligations (other than to perform on behalf of the individual indirect participant for whom the Segregated Customer Margin is held). Therefore, including the VaR Charge that is calculated for a Segregated Indirect Participant and is satisfied by the capital of that Segregated Indirect Participant in the calculation of the Netting Member's Excess Capital Premium could result in assessing an Excess Capital Premium for that Netting Member that is greater than the amount required to mitigate the risk that the Excess Capital Premium is designed to address.

The proposed change is also designed to ensure that the Excess Capital Premium does not result in differential treatment of Netting Members that act as intermediaries for Segregated Indirect Participants.

E. Other Clarifications and Conforming Changes

In connection with the changes described above, FICC would make other clarifications and conforming changes to the Rules. First, FICC would move the definition of ''Legal Risk'' from Rule 4 to the definitions in Rule 1. This term refers to the risk that FICC may be unable to either access Required Fund Deposits or take action following the insolvency or bankruptcy of a Netting Member as the result of a law, rule or regulation applicable to the Netting Member.[56] Because this term is used in multiple places in the Rules, including in the new Margin Component Schedule, moving the definition to Rule 1 would make it easier for a reader to find that definition.

FICC would also delete the definition of the term ''Minimum Charge'' from Rule 1 and move the use of this term from Rule 4 to Sections 2(c) and 3(c) of the Margin Component Schedule. While FICC would continue to apply a requirement that Netting Members maintain a minimum amount for each Margin Portfolio or Segregated Margin Requirement, as discussed above, FICC

[55] *See* Securities Exchange Act Release No. 96786 (Feb. 1, 2023), 88 FR 8013 (Feb. 7, 2023) (SR–NSCC–2022–005).

[56] *See* Rule 4, Section 2(d), *supra* note 4.

believes using a defined term for this concept is not necessary and could cause confusion about the requirement. The proposed change to remove the defined term and instead just explain the requirement in these sections of the Margin Component Guide would simplify and, therefore, clarify, the Rules in this regard.

4. Clarifications to Treatment of Brokered Transactions

FICC is proposing to refine the definition of Brokered Transactions and remove conditions that Inter-Dealer Broker Netting Members and Non-IDB Repo Brokers must meet in order to receive favorable loss allocation treatment.

Currently, Inter-Dealer Broker Netting Members and Non-IDB Repo Brokers must meet a set of conditions described in Section 8 of Rule 3 to be subject to a cap on the application of FICC's loss allocation procedure of no greater than $5 million.[57] FICC believes this favorable loss allocation treatment is appropriate because the Netting Member is not undertaking a directional position with respect to the transactions. Instead, each transaction has a counterparty other than the Netting Member that will ultimately deliver the securities or pay the cash.

FICC is proposing to revise the Rules related to Brokered Transactions so that the favorable loss allocation treatment applies only to the transactions that present this limited risk. In particular, FICC is proposing to revise the definition of Brokered Transactions to only encompasses transactions entered into by an Inter-Dealer Broker Netting Member on the Inter-Dealer Broker Netting Member's own trading platform. This rule change would limit the definition of these transactions to transactions for which an Inter-Dealer Broker is standing in between two counterparties and is thus completely flat.

In connection with this change, FICC would eliminate the conditions that Inter-Dealer Broker Netting Members and Non-IDB Repo Brokers must meet in order to be subject to such favorable treatment. As noted above, the proposed Rule 2B would clarify that only Inter-Dealer Broker Netting Members are able to maintain Cash Broker Accounts or Repo Broker Accounts, and that only Brokered Transactions may be submitted through such Accounts, as appropriate. Therefore, FICC believes the revised definition of Brokered Transactions and the revisions to the Account structure would collectively serve the risk-mitigation function that the conditions in Rule 3, Section 8 achieve, but in a much more effective manner and in a manner that is easier for FICC to monitor. As such, those conditions would be removed from the Rules.

Finally, FICC would remove the category of Non-IDB Repo Brokers from the Rules. Non-IDB Repo Brokers are currently defined as Netting Members other than Inter-Dealer Broker Netting Members that operate in the same manner as a Broker and have agreed to meet the same requirements imposed on Inter-Dealer Broker Netting Members.[58] As described above, FICC believes the favorable loss allocation treatment is appropriate only for Inter-Dealer Broker Netting Members that submit Brokered Transactions, as such term would be defined. Therefore, FICC would delete the references to such parties and associated terms. In connection with these changes, the proposal would delete the defined term for ''Non-IDB Repo Broker'' as that term would no longer be used in the Rules.

Implementation Timeframe

Subject to the completion of all regulatory actions required with respect to this proposal,[59] FICC expects to implement the proposal by no later than March 31, 2025, and would announce the effective date of the proposed changes by an Important Notice posted to FICC's website.

2. Statutory Basis

FICC believes the proposed changes are consistent with the requirements of the Act and the rules and regulations thereunder applicable to a registered clearing agency. In particular, FICC believes the proposed rule changes are consistent with section 17A(b)(3)(F) of the Act,[60] and Rules 17Ad–22(e)(4)(i), (e)(6)(i), (e)(18)(ii), (e)(18)(iii), (e)(18)(iv)(C), (e)(19), and (e)(23)(ii), each promulgated under the Act,[61] for the reasons described below.

Section 17A(b)(3)(F) of the Act requires that the rules of FICC be designed, among other things, to promote, and remove impediments to, the prompt and accurate clearance and settlement of securities transactions and to foster cooperation and coordination with persons engaged in the clearance and settlement of securities transactions.[62] As described in greater detail below, the proposed rule changes to clarify FICC's Account structure and margin calculation methodology would improve public understanding of FICC's margining and recordkeeping processes and thereby facilitate greater cooperation between Netting Members and indirect participants and improve access to FICC's clearance and settlement systems. The proposed changes would do this by revising the definition of ''Account'' to make clear that FICC Accounts are for purposes of recording transactions, providing a roadmap in Rule 2B identifying the types of Accounts FICC maintains for Netting Members and which transactions may be recorded in such Accounts, amending Rule 4 to clarify the types of transactions that may be included in a Margin Portfolio, and consolidating the components of FICC's margin calculation methodology currently in Rules 1 and 4 into an accessible Margin Component Schedule and refining the description of FICC's margin calculation methodology. The proposed change to eliminate the Permitted Margin Affiliates from the Rules would also lead to clearer Rules and, therefore, improved public understanding of FICC's margining practices by removing a concept that is not being used by Netting Members.

The collective impact of these changes would be to enhance the ability of Netting Members and indirect participants to calculate the costs of submitting various transactions and portfolios to FICC for clearance and settlement. This greater understanding would make it easier for market participants to price accessing FICC's clearance and settlement systems and negotiate the terms of clearing arrangements. More efficient pricing and greater understanding would eliminate barriers and make it easier for a wider and more diverse array of market participants, to access clearing.

The proposed changes to create a segregation arrangement for certain indirect participant margin would also facilitate broader access to FICC's clearance and settlement systems. Currently, broker-dealer Netting Members must finance the margin obligations of their indirect participants' transactions because they cannot record a debit in the Rule 15c3–3a formulas for

[57] *See* Rule 3, Section 8 (such conditions require that an Inter-Dealer Broker Netting Member ''(A) limit its business to acting exclusively as a Broker; (B) conduct all of its business in Repo Transactions with Netting Members; and (C) conduct at least 90 percent of its business in transactions that are not Repo Transactions, measured based on its overall dollar volume of submitted sides over the prior month, with Netting Members'') and Rule 4, Section 7, *supra* note 4.

[58] Currently, only one Netting Member is a Non-IDB Repo Broker.

[59] *Supra* note 3.

[60] 15 U.S.C. 78q–1(b)(3)(F).

[61] 17 CFR 240.17Ad–22(e)(4)(i), (e)(6)(i), (e)(18)(ii), (e)(18)(iii), (e)(18)(iv)(C), (e)(19), and (e)(23)(ii).

[62] 15 U.S.C. 78q–1(b)(3)(F).

margin deposited with FICC. From its engagement with market participants, FICC understands that this need to provide financing for margin makes it more expensive for broker-dealer Netting Members to provide indirect participants with access to FICC's clearance and settlement systems than would be the case if the broker-dealer Netting Member were able to collect margin from an indirect participant and deposit that margin with FICC. In addition, non-broker-dealer Netting Members may often need to finance the margin obligations of their indirect participants' transactions because the absence of a segregation arrangement makes it impossible or undesirable for indirect participants to use their own assets to satisfy such margin obligations. The proposed rules would facilitate greater access to FICC's clearance and settlement systems by creating a segregation arrangement that would allow broker-dealer and other Netting Members to collect margin from their indirect participants and deposit that margin with FICC. Such collection and depositing would reduce the costs to such Netting Members of providing access to FICC's clearance and settlement services and thereby facilitate greater cooperation between Netting Members and their indirect participants. Such cooperation would improve access to clearing, which would in turn increase the diversity and scope of market participants able to utilize FICC's central counterparty services. These services can reduce the costs of securities transactions through FICC's multilateral netting, its trade guaranty and centralized default management, and mitigate and manage counterparty risks. Therefore, the proposed changes would support FICC's compliance with section 17A(b)(3)(F) of the Act by fostering cooperation and coordination between FICC's participants and promoting, and eliminating impediments to, the prompt and accurate clearance and settlement of securities.[63]

Section 17A(b)(3)(F) of the Act also requires that the rules of FICC be designed to assure the safeguarding of securities and funds which are in the custody or control of FICC or for which it is responsible.[64] The proposed rule changes to separately and independently calculate the margin for a Netting Member's proprietary transactions from the margin for the transactions of indirect participants, to adopt a method for allocating net unsettled positions to individual indirect participants for purposes of calculating margin requirements and to set forth a segregation arrangement for certain margin collected from indirect participants and deposited with FICC would enhance FICC's risk management and its ability to assure the safe return of funds and securities. Those changes would reduce the potential risk to FICC arising from indirect participant transactions by ensuring that the margin requirements for such transactions are based solely on such transactions and not on the Netting Member's proprietary transactions and that such margin requirements take due and appropriate account of the risk arising from net unsettled positions.[65] The proposed changes would also provide FICC with a better understanding of the source of potential risk arising from the transactions that it clears by allowing FICC to identify separately the VaR Charges and other margin components for indirect participant transactions as compared to proprietary transactions. The proposed changes would also incentivize Netting Members to maintain more balanced proprietary portfolios, since such portfolios would lead to lower margin requirements. Such balanced portfolios, greater visibility, and carefully calibrated margin requirements would limit FICC's risk to a Netting Member default and thereby enhance its ability to return funds and securities to Netting Members. In addition, the proposed segregation arrangement would facilitate the return of margin posted by an indirect participant to its Netting Member and deposited with FICC by limiting FICC's ability to use such margin except to cover the indirect participant's own obligations. These features would support FICC's compliance with Section 17A(b)(3)(F) by further assuring FICC's safeguarding of securities and funds in its control and for which it is responsible.[66]

Rule 17Ad–22(e)(4)(i) under the Act requires that FICC establish, implement, maintain, and enforce written policies and procedures reasonably designed to effectively identify, measure, monitor, and manage its credit exposures to participants and those arising from its payment, clearing, and settlement processes by maintaining sufficient financial resources to cover its credit exposure to each participant fully with a high degree of confidence.[67] The proposed rule changes to separately and independently calculate, collect, and hold the margin for a Netting Member's proprietary transactions from the margin for the transactions of indirect participants, to limit Brokered Transactions to those entered into by an Inter-Dealer Broker Netting Member on its own trading platform, and to increase the precision of the Excess Capital Premium would enhance FICC's risk management. These changes would ensure that the quantum of margin that FICC collects from a Netting Member reflects the separate risk profiles of the Netting Member's portfolio of Proprietary Transactions and portfolio transactions that the Netting Member submits to FICC on behalf of indirect participants, ensure that only those transactions that present the limited risk for which FICC's Brokered Transactions provisions are designed benefit from favorable loss allocation treatment, and calibrate the Excess Capital Premium based on the most readily available information.

Collectively, these changes would enhance the ability of FICC to manage the risk of the transactions it clears and settles and cover its credit exposure to its participants with a high degree of confidence.

The proposed change to require a minimum cash requirement of $1 million per Segregated Indirect Participant would mitigate the greater risk exposure presented to FICC by the limitations on its use of these deposits. As discussed above, FICC's daily backtesting of the sufficiency of Clearing Fund deposits has revealed a heightened likelihood of backtesting deficiencies for those Members with lower deposits that are not sufficient to mitigate any abrupt intraday change in their exposures, and a $1 million minimum requirement was appropriate to mitigate the risks of backtesting deficiencies while balancing the financial impact of this requirement on Members.[68] Because FICC is required to calculate the margin requirements for Segregated Indirect Participants on a gross basis, as if each Segregated Indirect Participant were a separate Margin Portfolio, it believes it is also appropriate to apply the same minimum requirement that it applies to each Margin Portfolio. By maintaining sufficient resources to cover its credit exposures fully with a high degree of confidence, the proposed change supports FICC's ability to identify, measure, monitor, and, through the collection of Segregated Customer Margin, manage its credit exposures to these indirect participants. Therefore, FICC believes adopting this minimum requirement is consistent with the

[63] *Id.*

[64] *Id.*

[66] *Id.*

[67] 17 CFR 240.17Ad–22(e)(4)(i).

[68] *Supra* note 45.

requirements of Rule 17Ad–22(e)(4)(i) under the Act.[69]

Rule 17Ad–22(e)(6)(i) under the Act requires FICC to establish written policies and procedures reasonably designed to calculate, collect, and hold margin amounts from a direct participant for its proprietary positions in Treasury securities separately and independently from margin calculated and collected from that direct participant in connection with U.S. Treasury securities transactions by an indirect participant that relies on the services provided by the direct participant to access FICC's payment, clearing, or settlement facilities.[70] The proposed rule changes would require that each Margin Portfolio only consist of activity from the same Type of Account, ensuring that proprietary transactions and transactions submitted to FICC on behalf of indirect participants are margined separately, and to require Netting Members to use separate Deposit IDs for different transaction types. As noted above, the proposed changes to Rule 2B, Section 3 would require FICC to calculate the Segregated Customer Margin Requirement for a particular Segregated Indirect Participants Account as the sum of the requirements applicable to each Segregated Indirect Participant whose transactions are recorded in such Account, as though each Segregated Indirect Participant were a separate Netting Member with a single Margin Portfolio consisting of such transactions. These provisions would result in FICC calculating separate margin amounts for each Segregated Indirect Participant and for such amounts to be collected on a gross basis. Finally, the proposed changes to Rule 4, Section 1a would provide for FICC to establish on its books and records for each Netting Member that deposits Segregated Customer Margin a ''Segregated Customer Margin Custody Account'' corresponding to each Segregated Indirect Participants Account of such Netting Member. Collectively, these proposed changes would ensure that a Netting Member's proprietary transactions are not netted with indirect participant transactions for purposes of margin calculation and that margin for indirect participant transactions is collected and held separately and independently from margin for a Netting Member's proprietary transactions.

Rule 17Ad–22(e)(18)(ii) under the Act requires FICC to establish objective, risk-based, and publicly disclosed criteria for participation, which require participants to have sufficient financial resources and robust operational capacity to meet obligations arising from participation in FICC.[71] The proposed changes to consolidate FICC's margin methodology in a Margin Component Schedule, to identify the particular Required Fund Deposit Portions and Segregated Customer Margin Requirements, and to elaborate on the calculation of the Excess Capital Premium and the circumstances in which FICC would waive the application of such premium would improve public disclosure of FICC's margin methodology and the obligations that Netting Members and their indirect participants would have as a result of their participation in FICC's clearance and settlement system. In particular, the proposed changes would provide Netting Members and their indirect participants with a single, standalone schedule that they can review in order to understand how FICC would calculate margin obligations for their transactions. The proposed changes would also improve public disclosure by allowing Netting Members and their indirect participants to see how the various Accounts and Margin Portfolios give rise to separate inputs into the total margin calculation and how and when a Netting Member may face an increase in margin on account of the Excess Capital Premium.

Rule 17Ad–22(e)(18)(iii) under the Act requires that FICC establish written policies and procedures reasonably designed to monitor compliance with its participant requirements on an ongoing basis.[72] The proposed changes to require Netting Members to designate the Account in which a transaction is to be recorded and to identify the Sponsored Member or Executing Firm Customer for whom the transaction is submitted on that transaction record would help facilitate FICC's ability to monitor which transactions are being entered into by which entities. This enhanced monitoring of participant activity would thus allow FICC to better monitor participants' compliance with FICC's various requirements in accordance with Rule 17Ad–22(e)(18)(iii).[73]

Rule 17Ad–22(e)(18)(iv)(C) under the Act requires, among other things, that FICC, as a covered clearing agency that provides central counterparty services for transactions in U.S. Treasury securities, ensure that it has appropriate means to facilitate access to clearance and settlement services of all eligible secondary market transactions in U.S. Treasury securities, including those of indirect participants.[74] FICC believes that the proposed changes giving Netting Members the ability to elect for margin deposited by indirect participants and deposited with FICC to be segregated would facilitate access to FICC's clearance and settlement systems by giving indirect participants greater optionality. The proposed rule changes would allow a Netting Member and its indirect participant to choose whether (i) the indirect participant will post margin under a customer protection framework that is similar to that which exists in other cleared contexts,[75] (ii) the Netting Member will finance the margin for the indirect participant's transactions, or (iii) the indirect participant will deposit margin but without the protection (or higher margin requirements) associated with a segregation arrangement. FICC believes that such optionality would facilitate access in accordance with Rule 17Ad–22(e)(18)(iv)(C) by allowing Netting Members and their indirect participants to adopt a margining arrangement that is most consistent with their business objectives and applicable regulatory, operational, and practical constraints.

Rule 17Ad–22(e)(19) under the Act requires that FICC identify, monitor, and manage the material risks to the covered clearing agency arising from arrangements in which firms that are indirect participants in FICC rely on the services provided by direct participants

[74] 17 CFR 240.17Ad–22(e)(18)(iv)(C). Contemporaneously with this proposed rule change, FICC and its affiliates, National Securities Clearing Corporation and The Depository Trust Company, have submitted separate proposed rule changes (File Nos. SR–FICC–2024–006, SR–NSCC–2024–003 and SR–DTC–2024–003) under which they are proposing to amend the Clearing Agency Risk Management Framework to address the requirement under Rule 17Ad–22(e)(18)(iv)(C) that FICC's Board review its policies and procedures related to compliance with that rule on an annual basis. These proposed changes are pending regulatory approval. Copies of the proposed rule changes are *available at www.dtcc.com/legal/sec-rule-filings.*

[75] Both the Options Clearing Corporation and the U.S. derivatives clearing organizations allow for, or require, the segregation of customer margin and/or positions. *See generally* OCC By-Laws Sections 3, 27 (outlining the various accounts that OCC may maintain for a clearing member and the extent to which the positions and margin recorded to such accounts may applied to other obligations); 7 U.S.C. 6d (outlining the segregation rules applicable to commodity futures and cleared swap transactions); Order Granting Conditional Exemptions under the Securities Exchange Act of 1934 in Connection with the Portfolio Margining of Cleared Swaps and Security-Based Swaps that are Credit Default Swaps, Securities Exchange Release No. 93501 (Nov. 1, 2021), 86 FR 61357 (Nov. 5, 2021) (S7–13–12) (providing that certain cleared security-based swaps may be portfolio margined in a cleared swaps account subject to the rules generally applicable to cleared swaps).

to access FICC's clearance and settlement facilities.[76] The proposed changes to separately and independently calculate margin for proprietary and indirect participant transactions, adopt a method for allocating net unsettled positions to individual indirect participants for purposes of calculating margin requirements and require a Netting Member to represent that margin deposited in relation to a Segregated Indirect Participants Account is generally margin collected from an indirect participant would reduce the potential risk to FICC arising from indirect participant transactions.

These changes would ensure that the margin FICC collects from a Netting Member reflects the separate risk profiles of the Netting Member's proprietary portfolio and the portfolio of transactions it submits to FICC on behalf of indirect participants. They would also provide FICC with a better understanding of the source of potential risk arising from the transactions that it clears and incentivize Netting Members to maintain more balanced proprietary portfolios, since such portfolios would lead to lower margin requirements. In addition, the proposed representation by Netting Members that they generally intend to satisfy Segregated Customer Margin Requirements with assets collected from indirect participants rather than proprietary assets would reduce the risk of FICC's proposed margin segregation arrangement by limiting such arrangement to indirect participant assets and ensuring that proprietary assets a Netting Member deposits with FICC are available for loss mutualization purposes.

Rule 17Ad–22(e)(23)(ii) under the Act requires FICC to establish written policies and procedures providing sufficient information to enable participants to identify and evaluate the risks, fees, and other material costs they incur by participating in FICC.[77] The proposed rule changes to consolidate and clarify FICC's margin calculation methodology in the proposed Margin Component Schedule, adopt a method for allocating net unsettled positions to individual indirect participants for purposes of calculating margin requirements and to clarify the calculation of the Excess Capital Premium would make it easier for both Netting Members and indirect participants to identify and price the potential margining costs associated with how one chooses to submit transactions to FICC for clearance and settlement.

(B) Clearing Agency's Statement on Burden on Competition

FICC believes that the proposed rule changes described in this filing would promote competition by improving market participants' understanding of FICC's account structure and margin calculation methodology. By providing Members and other market participants with clearer definitions and consolidated margining and Account terms, the proposed changes would make it easier for existing Netting Members to offer competitive prices. The proposal additionally would make it easier for potential future Netting Member applicants to calibrate the resources they would need to provide intermediation services to indirect participants. These two forces should not only increase the number of Netting Members available to provide indirect participants with access to FICC's clearance and settlement services, but may also reduce some of the costs to indirect participants of accessing such services. In addition, such greater understanding and transparency would make it easier for indirect participants to negotiate terms of clearing arrangements since they would be able to calibrate what the margin requirements would be for their positions.

The proposed change to require a minimum cash margin deposit of $1 million for each Segregated Indirect Participant could impose a burden on competition if it results in a larger cash requirement for those Segregated Indirect Participants and the Netting Members who provide intermediation services to those participants. However, FICC believes that any burden on competition imposed by this proposed change would be necessary and appropriate in furtherance of FICC's efforts to mitigate risks and maintain compliance with its regulatory risk obligations under the Act.

FICC understands some indirect participants may not elect to submit activity through a Segregated Indirect Participants Account due to the size of that activity relative to this minimum requirement. Such participants may, instead, submit activity through a Sponsoring Member Omnibus Account or Agent Clearing Member Omnibus Account that is not segregated and is not required to be calculated on a gross basis, subject to the applicable limitations.

As described above, FICC's daily backtesting of the sufficiency of its Clearing Fund revealed a heightened likelihood of backtesting deficiencies for those Members with lower deposits that are not sufficient to mitigate any abrupt intraday change in their exposures.[78] FICC recently increased the minimum Required Deposit for Netting Members to the current $1 million cash deposit following this discovery and after analyzing impact study data that indicated a $1 million minimum requirement is the appropriate minimum amount to optimize the balance between financial impact of the requirement to Members and FICC's ability to continue to meet its regulatory obligation to maintain a backtesting performance coverage ratio above its 99 percent coverage target.

The proposed minimum requirement that would apply to Segregated Indirect Participants is the same minimum requirement that FICC currently applies to each Margin Portfolio.[79] Because FICC is required to calculate the margin requirements for these participants on a gross basis, as if each Segregated Indirect Participant were a separate Margin Portfolio, and would be restricted from using these funds to address any losses other than losses resulting from the indirect participant for whom the funds are held, FICC believes it is also appropriate to apply the same minimum requirement.

FICC believes that the proposed margin segregation arrangement would promote competition because it would allow Netting Members to offer greater varieties of possible clearing arrangements to indirect participants. Netting Members could offer arrangements under which they finance the margin or under which the indirect participant satisfies the margin requirement. Such greater offerings would improve competition by enhancing the available ways to access clearing. In addition, the arrangement would place broker-dealer Netting Members on a more level playing field with other Netting Members. Currently, only non-broker-dealer Netting Members may collect margin from indirect participants and deposit it with FICC. By virtue of the proposed changes, broker-dealer Netting Members would likewise be able to collect margin and deposit such margin with FICC.

FICC further believes that the proposed changes to separately and independently calculate, collect, and hold margin for proprietary transactions from margin for indirect participant

[76] 17 CFR 240.17Ad–22(e)(19).

[77] 17 CFR 240.17Ad–22(e)(23)(ii).

[78] *Supra* note 45.

[79] As noted above, FICC recently increased this minimum requirement as applied to Netting Members following Commission approval of a proposed rule change. *Supra* note 45.

transactions would not place a burden on competition. These proposed changes work together with the proposed margin segregation changes discussed above, and FICC believes that the combination of these proposed changes would allow Netting Members to offer greater varieties of possible clearing arrangements to indirect participants. With respect to the specific changes around separately and independently calculating, collecting, and holding margin for proprietary and indirect transactions, FICC further believes that such changes would serve to ensure that a Netting Member's margin requirement separately accounts for the risk profiles of its proprietary portfolio of transactions and the transactions it submits to FICC on behalf of indirect participants. These changes should not give particular Netting Members an advantage over one another or disadvantage indirect participants relative to one another. Instead, they would simply serve to limit the risk to FICC of such transactions and provide FICC with a better understanding of the source of potential risk arising from the transactions that it clears.

Lastly, FICC believes that the proposed changes to redefine Brokered Transactions as those entered into by an Inter-Dealer Broker Netting Member on its own trading platform would promote competition by limiting the scope of transactions eligible for uniquely favorable loss allocation treatment. Such limitations would ensure that similarly situated Netting Members are subject to similar requirements with regard to similar transactions and that only transactions that present relatively lower levels of risk are eligible for appropriately differential treatment.

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

FICC has not received or solicited any written comments relating to this proposal. If any written comments are received, they will be publicly filed as an Exhibit 2 to this filing, as required by Form 19b–4 and the General Instructions thereto.

Persons submitting comments are cautioned that, according to Section IV (Solicitation of Comments) of the Exhibit 1A in the General Instructions to Form 19b–4, the Commission does not edit personal identifying information from comment submissions. Commenters should submit only information that they wish to make available publicly, including their name, email address, and any other identifying information.

All prospective commenters should follow the Commission's instructions on how to submit comments, available at *www.sec.gov/regulatory-actions/how-to-submit-comments.* General questions regarding the rule filing process or logistical questions regarding this filing should be directed to the Main Office of the SEC's Division of Trading and Markets at *tradingandmarkets@sec.gov* or 202–551–5777.

FICC reserves the right not to respond to any comments received.

III. Date of Effectiveness of the Proposed Rule Change, and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) by order approve or disapprove such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

The proposal shall not take effect until all regulatory actions required with respect to the proposal are completed.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–FICC–2024–007 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

All submissions should refer to file number SR–FICC–2024–007. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of FICC and on DTCC's website (*https://dtcc.com/legal/sec-rule-filings.aspx*). Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–FICC–2024–007 and should be submitted on or before April 18, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[80]

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99840; File No. SR–BX–2024–011]

Self-Regulatory Organizations; Nasdaq BX, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Adopt an OTTO Protocol

March 22, 2024.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on March 19, 2024, Nasdaq BX, Inc. (''BX'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to

[80] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to adopt a new protocol, ''Ouch to Trade Options'' or ''OTTO'' and establish pricing for this new protocol.[3]

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/nasdaq/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

BX proposes to offer a new order entry protocol called OTTO. Today, BX Participants may enter orders into the Exchange through the ''Financial Information eXchange'' or ''FIX.''[4] The proposed new OTTO protocol is identical to the OTTO protocol offered today on 3 Nasdaq affiliated exchanges, Nasdaq ISE, LLC (''ISE''), Nasdaq GEMX, LLC (''GEMX'') and Nasdaq MRX, LLC (''MRX'').

The OTTO protocol is a proprietary protocol of Nasdaq, Inc. The Exchange continues to innovate and modernize technology so that it may continue to compete among options markets. The ability to continue to innovate with technology and offer new products to market participants allows BX to remain competitive in the options space which currently has seventeen options markets and potential new entrants.

OTTO Protocol

As proposed, OTTO would allow Participants and their Sponsored Customers[5] to connect, send, and receive messages related to orders, auction orders, and auction responses to the Exchange. OTTO features would include the following: (1) options symbol directory messages (*e.g.,* underlying and complex instruments); (2) System[6] event messages (*e.g.,* start of trading hours messages and start of opening); (3) trading action messages (*e.g.,* halts and resumes); (4) execution messages; (5) order messages; (6) risk protection triggers and cancel notifications; (7) auction notifications; (8) auction responses; and (9) post trade allocation messages. The Exchange notes that unlike FIX, which offers routing capability, OTTO does not permit routing. The Exchange proposes to include this description of OTTO in new Options 3, Section 7(e)(1)(B) and re-letter current ''B'' as ''C''.

Only one order protocol is required for a BX Participant to submit orders into BX. Only BX Participants may utilize ports on BX. Any market participant that sends orders to a BX Participant would not need to utilize a port. The BX Participant may send all orders, proprietary and agency, through one port to BX. Participants may elect to obtain multiple ports to organize their business,[7] however only one port is necessary for a Participant to enter orders on BX.

Participants may elect to enter their orders through FIX, OTTO, or both protocols, although both protocols are not necessary. Participants may prefer one protocol as compared to another protocol, for example, the ability to route may cause a Participant to utilize FIX and a Participant that desires to execute an order locally may prefer OTTO. Also, the OTTO Port offers lower latency as compared to the FIX Port, which may be attractive to Participants depending on their trading behavior. Nasdaq believes that the addition of OTTO will provide BX Participants with additional choice when submitting orders to BX.

While the Exchange has no way of predicting with certainty the amount or type of OTTO Ports market participants will in fact purchase, the Exchange anticipates that some Participants will subscribe to multiple OTTO Ports in combination with FIX Ports. The Exchange notes that Options Participants may use varying number of OTTO ports based on their business needs.

Other Amendments

In connection with offering OTTO, the Exchange proposes to amend other rules within Options 3. Each amendment is described below.

Options 3, Section 7

BX proposes to amend Options 3, Section 7, Types of Orders and Quote Protocols. Specifically, BX proposes to amend Options 3, Section 7 (b)(2) that describes the Immediate-or-Cancel'' or ''IOC'' order. Today, Options 3, Section 7(b)(2)(B) notes that an IOC order may be entered through FIX or SQF, provided that an IOC Order entered by a Market Maker through SQF is not subject to the Order Price Protection, the Market Order Spread Protection, or Size Limitation in Options 3, Section 15(a)(1), (a)(2), and (b)(2), respectively. The Exchange proposes to add ''OTTO'' to the list of protocols to note that an IOC order may also be entered through OTTO.

BX also proposes to amend the ''DAY'' order in Options 3, Section 7(b)(3) that currently provides that a Day order may be entered through FIX.

[3] The Exchange will withdraw SR–BX–2024–006, which contains pricing for BX OTTO, on March 19, 2024 and replace it with this rule change.

[4] FIX is an interface that allows Participants and their Sponsored Customers to connect, send, and receive messages related to orders and auction orders and responses to and from the Exchange. Features include the following: (1) execution messages; (2) order messages; and (3) risk protection triggers and cancel notifications. In addition, a BX Participant may elect to utilize FIX to send a message and PRISM Order, as defined within Options 3, Section 13, to all BX Participants that opt in to receive Requests for PRISM requesting that it submit the sender's PRISM Order with responder's Initiating Order, as defined within Options 3, Section 13, into the Price Improvement Auction (''PRISM'') mechanism, pursuant to Options 3, Section 13 (''Request for PRISM''). *See* Options 3, Section 7(e)(1)(A).

[5] General 2, Section 22 describes Sponsored Access arrangements.

[6] The term ''System'' or ''Trading System'' means the automated system for order execution and trade reporting owned and operated by BX as the BX Options market. The BX Options market comprises: (A) an order execution service that enables Participants to automatically execute transactions in option series; and provides Participants with sufficient monitoring and updating capability to participate in an automated execution environment; (B) a trade reporting service that submits ''locked-in'' trades for clearing to a registered clearing agency for clearance and settlement; transmits last-sale reports of transactions automatically to the Options Price Reporting Authority for dissemination to the public and industry; and provides participants with monitoring and risk management capabilities to facilitate participation in a ''locked-in'' trading environment; and (C) the data feeds described in Options 3, Section 23. *See* BX Options 1, Section 1(a)(59).

[7] For example, a Participant may desire to utilize multiple FIX or OTTO Ports for accounting purposes, to measure performance, for regulatory reasons, segregating order flow among different trading desks, or other determinations that are specific to that Participant. A market participant may utilize multiple ports in some cases to send multiple orders through different ports to avoid any latency or queuing of orders. The Exchange notes that to the extent that different OTTO Ports are used to send multiple orders as compared to sending multiple orders through one OTTO Port the difference from a latency standpoint would be in nanoseconds.

With the addition of OTTO, a Day order may also be entered through OTTO.

BX also proposes to amend the ''Good Til Cancelled'' or ''GTC'' order which currently does not specify that a GTC order may be entered through FIX. GTC orders would only be able to be entered through FIX and not OTTO. The Exchange proposes to amend Options 3, Section 7(b)(4) to add a sentence to note that GTC orders may be entered through FIX.

Options 3, Section 8

BX proposes to amend Options 3, Section 8, Options Opening Process. BX proposes to amend Options 3, Section 8(l) that describes the Opening Process Cancel Timer. The Opening Process Cancel Timer represents a period of time since the underlying market has opened. If an option series has not opened before the conclusion of the Opening Process Cancel Timer, a Participant may elect to have orders returned by providing written notification to the Exchange. Today, these orders include all non-Good Til Cancelled Orders received over the FIX protocol. The Exchange proposes to add the OTTO protocol as well to the rule text language in that paragraph.

Options 3, Section 12

The Exchange proposes to amend the Options 3, Section 12, Crossing Orders. Specifically, the Exchange proposes to amend Customer Crossing Orders in Options 3, Section 12(a) that currently provides Public Customer-to-Public Customer Cross Orders are automatically executed upon entry provided that the execution is at or between the best bid and offer on the Exchange and (i) is not at the same price as a Public Customer Order on the Exchange's limit order book and (ii) will not trade through the NBBO. Public Customer-to-Public Customer Cross Orders must be entered through FIX. The Exchange proposes to remove the sentence that provides that Public Customer-to-Public Customer Cross Orders must be entered through FIX because they will be able to be entered through both FIX and OTTO.

Options 3, Section 17

The Exchange proposes to amend the Kill Switch at Options 3, Section 17. The Kill Switch provides Participants with an optional risk management tool to promptly cancel and restrict orders. With the introduction of OTTO, the Exchange proposes to align its Kill Switch rule text with MRX's Kill Switch.[8] The Exchange proposes to note in Options 3, Section 17(a) that BX Participants may initiate a message(s) to the System to promptly cancel and restrict their order activity on the Exchange, as is the case today, as described in section (a)(1). This amendment simply rewords the rule text without a substantive amendment to the rule text.

The Exchange proposes to renumber Options 3, Section 17(a)(i) and (ii) as (a)(1) and (2). Current Options 3, Section 17(a)(i) states, ''If orders are cancelled by the BX Participant utilizing the Kill Switch, it will result in the cancellation of all orders requested for the Identifier(s). The BX Participant will be unable to enter additional orders for the affected Identifier(s) until re-entry has been enabled pursuant to section (a)(ii).'' The Exchange proposes to instead provide, ''A BX Participant may submit a request to the System through FIX or OTTO to cancel all existing orders and restrict entry of additional orders for the requested Identifier(s) on a user level on the Exchange.'' With the addition of OTTO, the Exchange notes that both FIX and OTTO orders may be cancelled. Further, today, BX Participants utilize an interface to send a message to the Exchange to initiate a Kill Switch.[9] The Exchange notes that in lieu of the interface, BX Participants will only be able to initiate a cancellation of their orders by sending a mass purge request through FIX or OTTO. This change will align the Kill Switch functionality to that of ISE, GEMX and MRX Options 3, Section 17 and will enable BX Participants to initiate the Kill Switch more seamlessly without the need to utilize a separate interface. When initiating a cancellation of their orders by sending a mass purge request through FIX or OTTO, Participants will be able to submit a Kill Switch request on a user level only. This is a change from the ability to cancel orders on either a user or group level[10] with the interface. The Exchange proposes to amend Options 3, Section 17(a) to note this change by removing the words ''or group'' and the following sentence that applies to a group.[11]

Finally, the Exchange proposes to amend proposed Options 3, Section 17(a)(2) to align to MRX's rule text by providing ''Once a BX Participant initiates a Kill Switch pursuant to (a)(1) above. . .'' in the first sentence. This amendment simply rewords the rule text without a substantive amendment to the rule text.

Options 3, Section 18

The Exchange proposes to amend Options 3, Section 18, Detection of Loss of Communication. The Exchange proposes to add OTTO to Options 3, Section 18 as OTTO would also be subject to this rule. Today, when the SQF Port or the FIX Port detects the loss of communication with a Participant's Client Application because the Exchange's server does not receive a Heartbeat message for a certain time period, the Exchange will automatically logoff the Participant's affected Client Application and automatically cancel all of the Participant's open quotes through SQF and open orders through FIX. Quotes and orders are cancelled across all Client Applications that are associated with the same BX Options Market Maker ID and underlying issues.

At this time, the Exchange proposes to permit orders entered through OTTO to be cancelled similar to FIX orders when the Exchange's server does not receive a Heartbeat message for a certain time period. The Exchange is proposing to amend Options 3, Section 18 to also rearrange the rule text to add the word ''Definitions'' next to ''a'' and move the rule text in current ''a'' to ''b'' and re-letter the other paragraphs accordingly. Also, the Exchange proposes to define ''Session of Connectivity'' for purposes of this rule to mean each time the Participant connects to the Exchange's System. Further, each new connection, intra-day or otherwise, is a new Session of Connectivity. The Exchange proposes to use the new definition throughout Options 3, Section 18.

Similar to FIX, when the OTTO Port detects the loss of communication with a Participant's Client Application because the Exchange's server does not receive a Heartbeat message for a certain time period, the Exchange will automatically logoff the Participant's affected Client Application and automatically cancel all of the Participant's open orders through OTTO. Orders would be cancelled across all Client Applications that are associated with the same BX Options Market Maker ID and underlying issues. The Exchange proposes to update Options 3, Section 18 to provide in proposed Options 3, Section 18(a)(3) that the OTTO Port is the Exchange's

[8] *See* MRX Options 3, Section 17.

[9] *See* Securities Exchange Act Release No. 76116 (October 8, 2015), 80 FR 62147 (October 15, 2015) (SR–BX–2015–050) (Order Approving Proposed Rule Change To Adopt a Kill Switch).

[10] A permissible group could include all badges associated with a Market Maker. Today, a Participant is able to set up these groups in the interface to include all or some of the Identifiers associated with the Participant firm so that a GUI Kill Switch request could apply to this pre-defined group.

[11] The Exchange proposes to remove this sentence, ''Permissible groups must reside within a single broker-dealer'' as the group option would no longer exist.

proprietary System component through which Participants communicate their orders from the Client Application. Further, the Exchange would note in proposed Options 3, Section 18(c) that when the OTTO Port detects the loss of communication with a Participant's Client Application because the Exchange's server does not receive a Heartbeat message for a certain time period (''nn'' seconds), the Exchange will automatically logoff the Participant's affected Client Application and if the Participant has elected to have its orders cancelled pursuant to proposed Section 18(f), automatically cancel all orders. Proposed Options 3, Section 18(f) would provide that the default period of ''nn'' seconds for OTTO Ports would be fifteen (15) seconds for the disconnect and, if elected, the removal of orders. A Participant may determine another time period of ''nn'' seconds of no technical connectivity, as required in proposed paragraph (c), to trigger the disconnect and, if so elected, the removal of orders and communicate that time to the Exchange. The period of ''nn'' seconds may be modified to a number between one hundred (100) milliseconds and 99,999 milliseconds for OTTO Ports prior to each Session of Connectivity to the Exchange. This feature may be disabled for the removal of orders, however the Participant will be disconnected.

Proposed Options 3, Section 18(f)(1) would provide that if the Participant changes the default number of ''nn'' seconds, that new setting shall be in effect throughout the current Session of Connectivity and will then default back to fifteen seconds. The Participant may change the default setting prior to each Session of Connectivity. Finally, as proposed in Options 3, Section 18(f)(2), if the time period is communicated to the Exchange by calling Exchange operations, the number of ''nn'' seconds selected by the Participant will persist for each subsequent Session of Connectivity until the Participant either contacts Exchange operations by phone and changes the setting or the Participant selects another time period through the Client Application prior to the next Session of Connectivity. The trigger for OTTO Ports is event and Client Application specific. The automatic cancellation of the BX Options Market Maker's open orders for OTTO Ports entered into the respective OTTO Ports via a particular Client Application will neither impact nor determine the treatment of orders of the same or other Participants entered into the OTTO Ports via a separate and distinct Client Application. The proposed amendments for OTTO mirror the manner in which FIX Ports are treated when the Exchange's server does not receive a Heartbeat message for a certain time period for a FIX Port.[12]

Pricing

BX proposes to amend its Pricing Schedule at Options 7, Section 3, BX Options Market—Ports and other Services, to add pricing for the new OTTO protocol. Specifically, BX proposes to offer Participants the first OTTO Port at no cost. The one OTTO Port would permit BX Participants to submit orders into BX. Today, only one account number [13] is necessary to transact an options business on BX and account numbers are available to Participants at no cost. The Exchange proposes to note in the Pricing Schedule at Options 7, Section 3 that BX does not assess a fee for an account number to provide greater transparency to Participants.

The Exchange proposes to assess an OTTO Port Fee of $650 per port, per month, per account number for each subsequent port beyond the first port. This is the same fee assessed for OTTO Ports on MRX and GEMX.[14] Additional OTTO Ports beyond the first OTTO Port would be optional for Participants to utilize as the Exchange is offering the first OTTO order protocol, per Participant, at no cost and only one port is necessary to enter orders into BX.[15]

Implementation

The Exchange will implement this rule change on or before December 20, 2025. The Exchange will announce the operative date to Participants in an Options Trader Alert.

2. Statutory Basis

The Exchange believes that its proposal is consistent with section 6(b) of the Act,[16] in general, and furthers the objectives of section 6(b)(5) of the Act,[17] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest. Additionally, the Exchange believes that its proposal furthers the objectives of sections 6(b)(4) and 6(b)(5) of the Act,[18] in particular, in that it provides for the equitable allocation of reasonable dues, fees, and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

OTTO Protocol

The Exchange's proposal to adopt OTTO is consistent with the Act because OTTO would provide BX Participants with an alternative protocol to submit orders to the Exchange. As proposed, BX would offer the first OTTO Port at no cost to submit orders into BX, which would remove impediments to and perfect the mechanism of a free and open market. While BX Participants may elect to obtain multiple ports to organize their business,[19] only one order port is necessary for a Participant to enter orders on BX. A BX Participant may send all orders, proprietary and agency, through one port to BX without incurring any cost with this proposal. In the alternative, BX Participants may elect to obtain multiple ports to organize their business.[20]

With the addition of OTTO, a BX Participant may elect to enter their orders through FIX, OTTO, or both protocols, although both protocols are not necessary. Each BX Participant would receive one OTTO Port at no cost, thereby promoting just and equitable principles of trade. The Exchange notes that Participants may prefer one order protocol as compared to another order protocol, for example, the ability to route an order may cause a Participant to utilize FIX and a Participant that desires to execute an order locally may utilize OTTO. Also, the OTTO Port offers lower latency as compared to the FIX Port, which may be attractive to Participants depending on their trading behavior. With this proposal, BX Participant may organize

[12] The Exchange proposes to update internal cross-references to accommodate relocated text.

[13] An ''account number'' means a number assigned to a Participant. Participants may have more than one account number. *See* Options 1, Section 1(a)(2).

[14] *See* MRX Options 7, Section 6 and GEMX Options 7, Section 6, C. MRX and GEMX do not offer an OTTO Port at no cost. MRX offers the first FIX Port at no cost. The Exchange notes that OTTO Ports on GEMX and MRX are subject to a monthly cap. On GEMX and MRX, OTTO Ports, CTI Ports, FIX Ports, FIX Drop Ports and Disaster Recovery Ports are capped at $7,500 a month.

[15] The Exchange proposes to renumber the SQF Port Fee and SQF Purge Port Fee in Options 7, Section 3(i).

[16] 15 U.S.C. 78f(b).

[17] 15 U.S.C. 78f(b)(5).

[18] *See* 15 U.S.C. 78f(b)(4) and (5).

[19] For example, a Participant may desire to utilize multiple FIX or OTTO Ports for accounting purposes, to measure performance, for regulatory reasons or other determinations that are specific to that Participant.

[20] For example, a Participant may desire to utilize multiple FIX or OTTO Ports for accounting purposes, to measure performance, for regulatory reasons or other determinations that are specific to that Participant.

their business as they chose with the ability to send orders to BX at no cost. The proposed new OTTO protocol is identical to the OTTO protocol offered today on ISE, GEMX, MRX.

Other Amendments

In connection with offering OTTO, the Exchange proposes to amend other rules within Options 3 to make clear where the FIX and OTTO protocols may be utilized. IOC Orders may be entered through FIX, OTTO or SQF. A Day order may be entered through FIX or OTTO. A GTC order may only be entered through FIX. A Public Customer-to-Public Customer Cross Order may be entered through FIX or OTTO. Other processes such the Opening Cancel Timer would impact FIX and OTTO equally.

The Exchange's proposal to amend the Kill Switch at Options 3, Section 17 to align its rule text in proposed Options 3, Section 17(a) and (a)(2) with MRX's Options 3, Section 17 is consistent with the Act because it does not substantively amend the functionality beyond removing the group level cancel capability. The Exchange's proposal to amend proposed Options 3, Section 17(a)(2) to specify that FIX and OTTO orders may be cancelled is consistent with the Act as it will make clear that all orders entered on BX may be purged through the Kill Switch. Finally, allowing BX Participants to send a mass purge request through FIX or OTTO, in lieu of an interface, is consistent with Act and the protection of investors and the general public because it will enable BX Participants to initiate the Kill Switch more seamlessly without the need to utilize a separate interface. Further, utilizing the order protocols directly, in lieu of the interface, will align the Kill Switch functionality to that of ISE, GEMX and MRX. When initiating a cancellation of their orders by sending a mass purge request through FIX or OTTO, Participants will be able to submit a Kill Switch request on a user level only because the purge will be specific to a FIX or OTTO user for these ports.

Finally, the Detection of Loss of Communication would apply equally to FIX and OTTO. The Exchange believes that its proposal is consistent with the Act and protects investors as the Exchange is making clear what types of order types and other mechanisms may utilize OTTO. Today, BX Participants utilize FIX to enter their orders. Despite the fact that OTTO would not be available for the GTC Time-In-Force modifier, the Exchange notes that one OTTO Port is being provided to Participants at no cost. Today, FIX is the only manner in which to enter orders into BX.

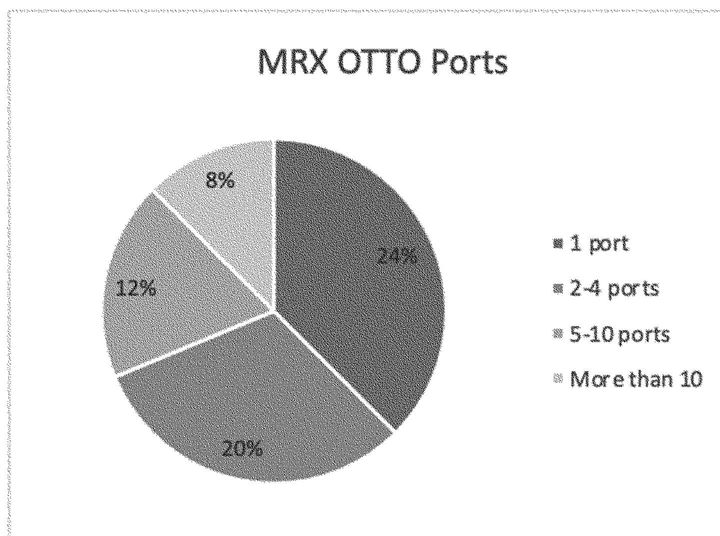
Pricing

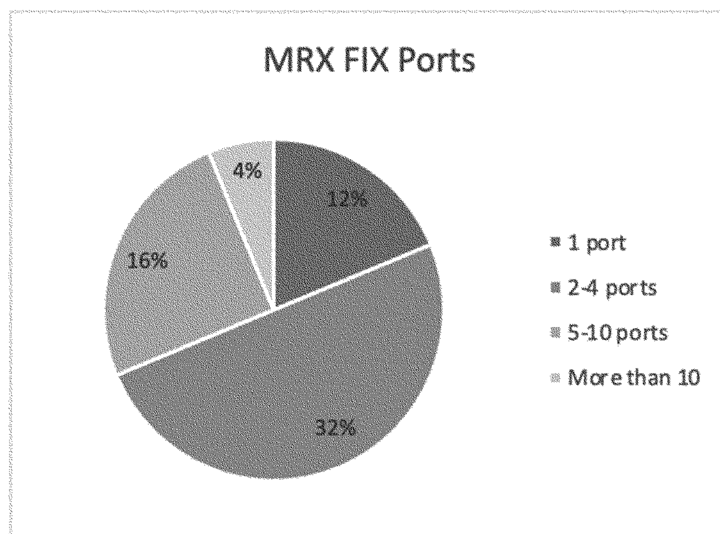
BX's proposal to amend its Pricing Schedule at Options 7, Section 3 will offer BX Participants the first OTTO Port at no cost to submit orders into BX. Only BX Participants may utilize ports on BX. A Participant can send all orders, proprietary and agency, through one port to BX. Only one order entry protocol is required for BX Participants to submit orders into BX to meet its regulatory requirements.[21] Additional ports beyond one port are not required for a BX Participant to meet its regulatory obligations. Participants may elect to obtain multiple account numbers to organize their business, however only one account number is necessary to transact options business on BX and account numbers are available to Participants at no cost.

The Exchange's proposal is reasonable, equitable and not unfairly discriminatory as BX is providing Participants the first OTTO Port to submit orders at no cost. One OTTO Port would allow a BX Participant to meet its regulatory requirements. Additional OTTO Ports, beyond the first port which is being offered at no cost, are not required for a BX Participant to meet its regulatory obligations. For the foregoing reasons, the Exchange believes that it is reasonable to assess no fee for the first OTTO Port obtained by a BX Participant as a BX Participant is able to meet its regulatory requirements with one OTTO Port. Additionally, the OTTO protocol is a proprietary protocol of Nasdaq, Inc. The Exchange continues to innovate and modernize technology so that it may continue to compete among options markets. The ability to continue to innovate with technology and offer new products to market participants allows BX to remain competitive in the options space which currently has seventeen options markets and potential new entrants.

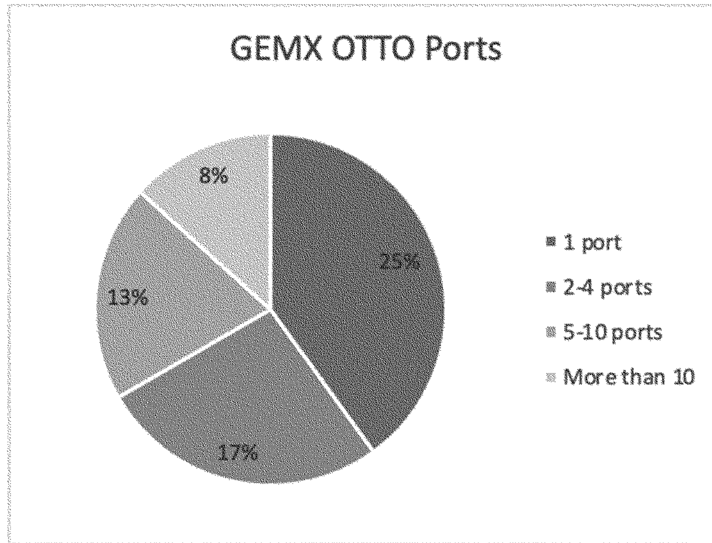
Today, a Member on ISE, GEMX, or MRX may utilize either a FIX or an OTTO Port to submit orders to the respective exchange. In analyzing the data provided below for ISE, GEMX and MRX, it is important to note that 30% of members on ISE subscribe to 1 OTTO Port and 24% of members subscribe to 1 FIX Port. ISE had a market share of 5.90% in 2023. Below are charts which display the number of members that subscribe to OTTO and FIX Ports on MRX.

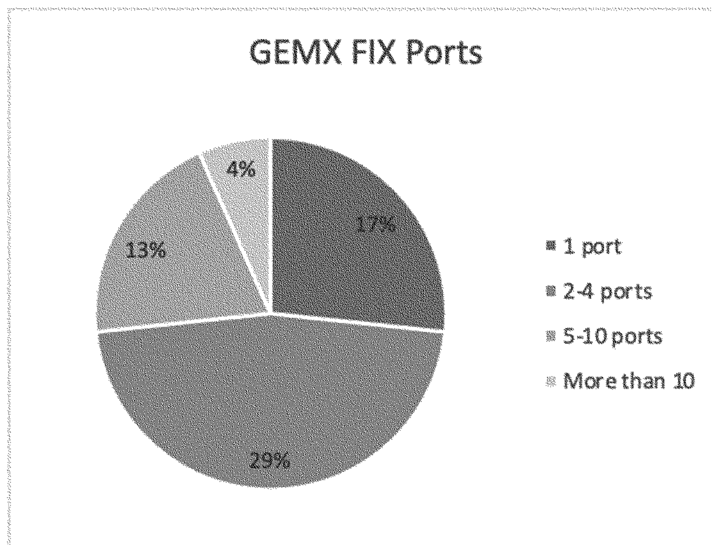
[21] BX Participants have trade-through requirements under Regulation NMS as well as broker-dealers' best execution obligations. *See* Rule 611 of Regulation NMS; 17 CFR 242.611 and FINRA Rule 5310.



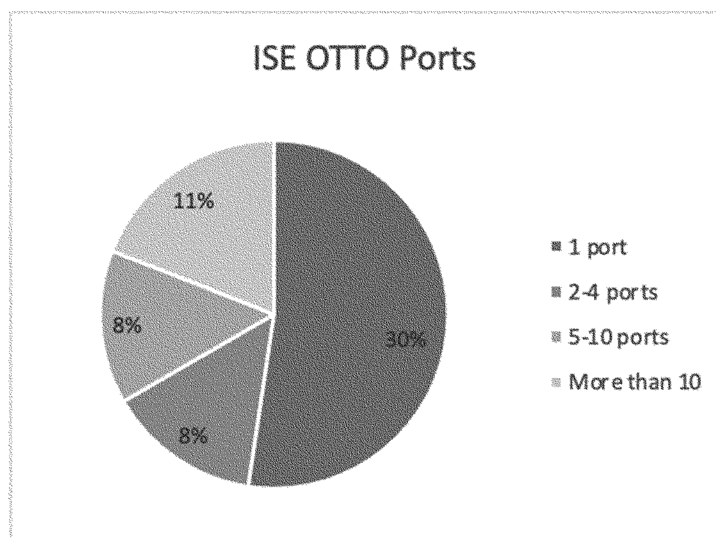


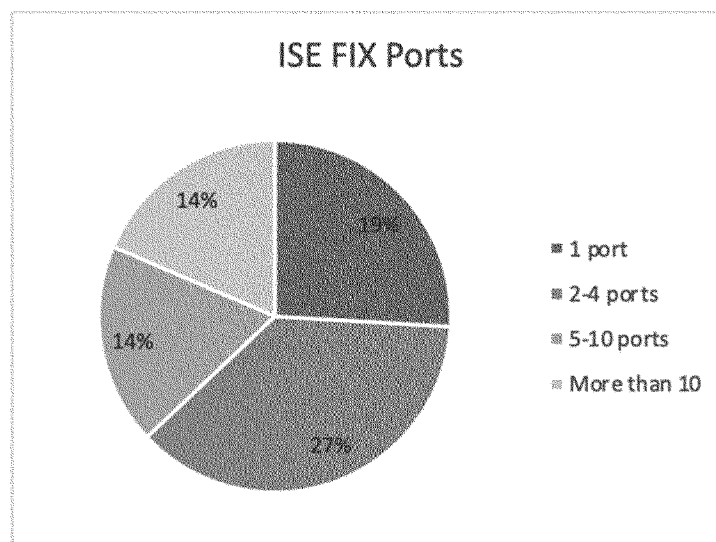
Below are charts which display the number of members that subscribe to OTTO and FIX Ports on GEMX.





Below are charts which display the number of members that subscribe to OTTO and FIX Ports on ISE.





Further it is equitable and not unfairly discriminatory to assess no fee for the first OTTO Port to a BX Participant as all BX Participants would be entitled to the first OTTO Port at no cost. With this proposal, BX Participants may organize their business in such a way as to submit orders to BX at no cost.

The Exchange's proposal to assess BX Participants $650 per port, per month, per account number for OTTO Ports beyond the first port is reasonable because these ports are not required for a member to meet its regulatory requirements. BX Participants only require one order entry port to submit orders to BX. The Exchange is offering Participants one free OTTO Port. Participants that subscribe to FIX could utilize their FIX Port to submit orders and would not need to utilize an OTTO Port. Participants electing to subscribe to more than one OTTO Port are choosing the additional ports to accommodate their business model. For example, a Participant may purchase one or more OTTO Ports for its market making business, and then purchase separate OTTO Ports for proprietary trading or customer facing businesses, allowing the firm to send multiple messages into the Exchange's System in parallel rather than sequentially. Some Participants that provide direct market access to their customers may also choose to purchase separate ports for different clients. While a smaller Participant may choose to subscribe to two OTTO Ports, a larger market participant with a substantial and diversified U.S. options business may opt to purchase multiple OTTO Ports to support both the volume and types of activity that they conduct on the Exchange. While the Exchange has no way of predicting with certainty the amount of OTTO Ports market participants will in fact purchase, the Exchange anticipates that some Participants will subscribe to multiple OTTO Ports. The Exchange believes that the proposed OTTO Port fees beyond the first port are reasonable because these ports are not required for a member to meet its regulatory requirements. Additionally, the proposed OTTO Port fee of $650 per port, per month, per account number is the same fee charged for OTTO Ports on MRX and GEMX.[22] Unlike BX, GEMX and MRX cap their OTTO Port.[23] The Exchange believes that it is reasonable to not cap OTTO Ports because unlike

[22] *See* MRX Options 7, Section 6 and GEMX Options 7, Section 6, C. MRX and GEMX do not offer an OTTO Port at no cost. MRX offers the first FIX Port at no cost.

[23] On GEMX and MRX, OTTO Ports, CTI Ports, FIX Ports, FIX Drop Ports and Disaster Recovery Ports are capped at $7,500 a month.

MRX and GEMX where the OTTO Ports have existed on those exchanges for a number of years, the OTTO Port is new to BX. The Exchange is offering Participants an alternative to the current FIX Port with this new proprietary port. Unlike BX's FIX Port, the Exchange is offering the first OTTO port at no cost. At this time, BX is not capping the port fee for OTTO, similar to other options exchanges.[24] If Participants elect to acquire a number of OTTO Ports, the Exchange may consider capping OTTO Ports at a later date.

The Exchange's proposal to assess BX Participants $650 per port, per month, per account number for OTTO Ports beyond the first port is equitable and not unfairly discriminatory because any BX Participant may elect to subscribe to additional OTTO Ports, however BX Participants only require one order entry port to submit orders to BX. The Exchange is offering Participants one free OTTO Port. Participants that subscribe to FIX could utilize their FIX Port to submit orders and would not need to utilize an OTTO Port. As noted herein, all BX Participants would be subject to the same fees for OTTO Ports. Also, as noted herein, account numbers are available on BX at no cost. The Exchange believes that it is equitable and not unfairly discriminatory to not cap OTTO Ports because the Exchange is offering the first OTTO Port at no cost and, currently, FIX Ports, CTI Ports, FIX DROP Ports, BX Depth Ports and BX TOP Ports are capped at $7,500 a month.

Unlike ISE, GEMX and MRX, BX only offers its Participants a FIX Port to submit orders to BX. As noted herein, the proposed OTTO Port Fee for additional ports is comparable to GEMX and MRX, which markets assess an OTTO Port Fee of $650 per port, per month, per account number.[25] GEMX and MRX do not offer the first OTTO Port at no cost, however MRX offers the first FIX Port at no cost.[26] Additionally, MRX and GEMX cap their OTTO Ports.[27] Cboe offers more than one order entry port. Cboe port fees [28] are within the range of the proposed fees. Cboe does not offer a free order entry port and tiers its BOE and FIX Logical ports so that each subsequent port fee is higher than BX's port fees. Additionally, Cboe limits usage on each port and assesses fees for incremental usage [29] thereby increasing the expense for ports if the usage is exceeded and potentially requiring market participants to acquire additional ports to avoid additional costs. BOX port fees [30] are within the range of the proposed fees. While BOX does not offer an order entry port at no cost, it tiers its FIX and SAIL port fees and each subsequent port fee is lower. MIAX port fees [31] are within the range of the proposed fees. MIAX Port users are allocated two (2) Full Service MEI Ports and two (2) Limited Service MEI Ports per matching engine to which they connect.[32] NYSE Arca port fees [33] are within the range of the proposed fees. For each order/quote entry port utilized, NYSE Arca Market Makers may utilize, free of charge, one port dedicated to quote cancellation or ''quote takedown,'' which port(s) will not be included in the count of order/quote entry ports utilized.[34]

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

The OTTO protocol is a proprietary protocol of Nasdaq, Inc. The Exchange continues to innovate and modernize technology so that it may continue to compete among options markets. The ability to continue to innovate with technology and offer new products to market participants allows BX to remain competitive in the options space which currently has seventeen options markets and potential new entrants. If BX were unable to offer and price new protocols, it would result in an undue burden on competition as BX would not have the ability to innovate and modernize its technology to compete effectively in the options space. BX's ability to offer OTTO will enable it to compete with other options markets that provide its market participants a choice as to the type of order entry protocols that may be utilized. BX's ability to offer and price new and innovative products and continue to modernize its technology, similar to other options markets, supports intermarket competition.

OTTO Protocol

The Exchange's proposal to adopt an OTTO Protocol does not impose an undue burden on intramarket competition. Today, all BX Participants utilize FIX to send orders to BX. The Exchange would offer each BX Participant the first OTTO Port at no cost with this proposal. With the addition of OTTO Ports, a BX Participant may elect to enter their orders through FIX, OTTO, or both protocols, although both protocols are not necessary. The Exchange's proposal to adopt an OTTO Protocol does not impose an undue burden on intermarket competition as other options exchanges offer multiple protocols today such as ISE, GEMX and MRX.

Other Amendments

The Exchange's proposal to amend other rules within Options 3 to make clear where the FIX and OTTO protocols may be utilized does not impose an undue burden on intramarket competition as these rules will apply in

[24] *See* note 27 below. Other options exchanges tier their ports but do not cap them. *See* notes 29, 30 and 32 below.

[25] *See* GEMX Options 7, Section 6.C and MRX Options 7, Section 6.

[26] *See* GEMX Options 7, Section 6.C and MRX Options 7, Section 6.

[27] On GEMX and MRX, OTTO Ports, CTI Ports, FIX Ports, FIX Drop Ports and Disaster Recovery Ports are capped at $7,500 a month.

[28] Cboe assesses a fee of $750 per port up to 5 BOE/FIX Logical Ports, and $800 per port for over 5 BOE/FIX Logical Ports. Cboe does not cap its ports. *See* Cboe's Fees Schedule.

[29] Each Cboe BOE or FIX Logical Port incur the logical port fee indicated when used to enter up to 70,000 orders per trading day per logical port as measured on average in a single month. For each incremental usage of up to 70,000 per day per logical port will incur an additional logical port fee of $800 per month. *See* Cboe's Fees Schedule.

[30] BOX assesses tiered FIX Port Fees as follows: $500 per port per month for the first FIX Port, $250 per port per month for FIX Ports 2–5 and $150 per port per month for over 5 FIX Ports. BOX assesses $1000 per month for all SAIL Ports for Market Making and $500 per month per port up to 5 ports for order entry and $150 per month for each additional port. *See* BOX's Fee Schedule.

[31] MIAX tiers its FIX Port fees as follows: $550 per month for the 1st FIX Port, $350 per month per port for the FIX Ports 2 through 5 and $150 per month for over 5 FIX Ports. MIAX tiers its MEI Port Fees and assesses fees per number of classes and as a percentage of National Average Daily Volume. MEI Port fees range from $5,000 to $20,500 per month. The applicable fee rate is the lesser of either the per class basis or percentage of total national average daily volume measurement. However, if the Market Maker's total monthly executed volume during the relevant month is less than 0.060% of the total monthly executed volume reported by The Options Clearing Corporation in the market maker account type for MIAX-listed option classes for that month, then the fee will be $14,500 instead of the fee otherwise applicable. MIAX will assess monthly MEI Port Fees on Market Makers in each month the Member has been credentialed to use the MEI Port in the production environment and has been assigned to quote in at least one class. *See* MIAX's Fee Schedule.

[32] MEI Port Fees include MEI Ports at the Primary, Secondary and Disaster Recovery data centers. MIAX Market Makers may request additional Limited Service MEI Ports for which MIAX will assess MIAX Market Makers $100 per month per additional Limited Service MEI Port for each engine. *See* MIAX's Fee Schedule.

[33] NYSE Arca assesses a tiered order/quote entry port fee of $450 for the first 40 ports and $150 per port per month for the 41 ports or greater. For purpose of calculating the number of order/quote entry ports and quote takedown ports, NYSE Arca aggregates the ports of affiliates. *See* NYSE Arca Options Fees and Charges.

[34] Any quote takedown port utilized by a NYSE Arca Market Maker that is in excess of the number of order/quote entry ports utilized will be counted and charged as an order/quote entry port. *See* NYSE Arca Options Fees and Charges.

the same manner to all Participants. The Exchange's proposal to amend other rules within Options 3 to make clear where the FIX and OTTO protocols may be utilized does not impose an undue burden on intermarket competition as other options exchanges may elect to utilize their order entry protocols in different ways.

Pricing

Nothing in the proposal burdens intermarket competition because BX's proposal to offer the first OTTO Port for free permits BX to set fees, similar to other options markets, while continuing to allow BX Participants to meet their regulatory obligations. BX's proposal would permit BX Participants the ability to submit orders to BX at no cost through OTTO. Additional OTTO Ports are not required for BX Participants to meet their regulatory obligations. The proposed port fees are similar to port fees assessed by other options markets as noted in this proposal. Further, the Exchange does not believe that the proposed rule change would place certain market participants at the Exchange at a relative disadvantage compared to other market participants or affect the ability of such market participants to compete. The Exchange notes that while the manner in which an order is sent to the Exchange may have an impact on latency, the difference from a latency standpoint would be in nanoseconds, and it would depend on the manner in which the order is being sent to the Exchange. A market participant sending 30 sequential orders through an OTTO Port may experience a slight latency of certain nanoseconds (less than a few nanoseconds) to permit serialized processing in the port and the match engine per order in certain cases. This is compared to a BX participant who submits 30 orders through multiple OTTO Ports at the same time. This distinction exists today on other options exchanges that offer market participants the ability to submit order flow in bulk,[35] which results in a larger number of orders being sent to the exchange's match engine in a quicker timeframe as compared to market participants that utilize a port that does not support bulk orders. Also, as noted herein, OTTO Orders do not route and therefore have a lower latency as compared to orders sent via a FIX Port. The Exchange notes that other factors may also contribute to the time it takes for an order to be executed. For example, on an exchange that offers complex orders, such orders with a stock component, may take additional time to execute as compared to a market order. In short, while latency may play a very small factor in the quantity of ports that are being utilized to send an order to the Exchange, all market participants may elect how their order is sent to an exchange. The Exchange notes that there is no correlation between the number of orders executed on the Exchange by a Participant and the number of ports subscribed to by a Participant. There are Participants that subscribe to a larger number of ports that have lower executed volumes on BX than those with half of the number of ports. Also, not all ports subscribed to by a Participant are active. Further, all Participants are entitled to obtain additional OTTO Ports or a mix of OTTO and FIX Ports. The Exchange is providing each Participant the first OTTO Port at no cost. To the extent Participants elect to utilize different technologies and connections to the Exchange, including different numbers and combinations of ports, the Exchange believes that the combinations may result in varying latencies as is the case on all other options exchanges today. Finally, the Exchange's proposal to not cap OTTO Ports does not create an undue burden on competition because the Exchange is offering the first OTTO Port at no cost and, currently, FIX Ports, CTI Ports, FIX DROP Ports, BX Depth Ports and BX TOP Ports are capped at $7,500 a month.

Nothing in the proposal burdens intra-market competition because the Exchange would uniformly assess the OTTO Port fees to all BX Participants, as applicable. Further, other exchanges have increased or added port fees in recent years. As recently as 2020, Cboe amended its port fees.[36] Specifically, Cboe adopted certain logical ports to allow for the delivery and/or receipt of trading messages—*i.e.,* orders, accepts, cancels, transactions, etc. Cboe established tiered pricing for BOE and FIX logical ports, tiered pricing for BOE Bulk ports, and flat prices for DROP, Purge Ports, GRP Ports and Multicast PITCH/Top Spin Server Ports. Cboe argued in its fee proposal that the proposed pricing more closely aligned its access fees to those of its affiliated exchanges, and reasonably so, as the affiliated exchanges offer substantially similar connectivity and functionality and are on the same platform that Cboe migrated to as part of its migration. Cboe also justified its pricing by stating that, ''. . . the Exchange believes substitutable products and services are in fact available to market participants, including, among other things, other options exchanges a market participant may connect to in lieu of the Exchange, indirect connectivity to the Exchange via a third-party reseller of connectivity and/or trading of any options product, including proprietary products, in the Over-the-Counter (OTC) markets.''[37] Cboe stated in its proposal that,

> The rule structure for options exchanges are also fundamentally different from those of equities exchanges. In particular, options market participants are not forced to connect to (and purchase market data from) all options exchanges. For example, there are many order types that are available in the equities markets that are not utilized in the options markets, which relate to mid-point pricing and pegged pricing which require connection to the SIPs and each of the equities exchanges in order to properly execute those orders in compliance with best execution obligations. Additionally, in the options markets, the linkage routing and trade through protection are handled by the exchanges, not by the individual members. Thus not connecting to an options exchange or disconnecting from an options exchange does not potentially subject a broker-dealer to violate order protection requirements. Gone are the days when the retail brokerage firms (such as Fidelity, Schwab, and eTrade) were members of the options exchanges—they are not members of the Exchange or its affiliates, they do not purchase connectivity to the Exchange, and they do not purchase market data from the Exchange. Accordingly, not only is there not an actual regulatory requirement to connect to every options exchange, the Exchange believes there is also no ''de facto'' or practical requirement as well, as further evidenced by the recent significant reduction in the number of broker-dealers that are members of all options exchanges.[38]

The proposal also referenced the National Market System Plan Governing the Consolidated Audit Trail (''CAT NMS Plan''),[39] wherein the Commission discussed the existence of competition in the marketplace generally, and particularly for exchanges with unique business models. The Commission

[35] Cboe offers BOE Bulk Logical Ports. *See* Cboe's Fee Schedule. *See* Securities Exchange Act Release No. 90333 (November 4, 2020), 85 FR 71666 (November 10, 2020) (SR–CBOE–2020–105). Cboe amended access and connectivity fees, including port fees. Specifically, Cboe adopted certain logical ports to allow for the delivery and/or receipt of trading messages—*i.e.,* orders, accepts, cancels, transactions, etc. Cboe established tiered pricing for BOE/FIX Logical Ports, with the lowest tier starting at $750 per port, per month for 1 to 5 ports, and for BOE Bulk Logical Ports with separate tiered pricing starting at $1,5000 per port, per month for 1 to 5 ports. Cboe also established flat prices for DROP, Purge Ports, GRP Ports and Multicast PITCH/Top Spin Server Ports.

[36] *See* Securities Exchange Act Release No. 90333 (November 4, 2020), 85 FR 71666 (November 10, 2020) (SR–CBOE–2020–105).

[37] *Id.* at 71676.

[38] *Id.* at 71677.

[39] *See* Securities Exchange Act Release No. 86901 (September 9, 2019), 84 FR 48458 (September 13, 2019) (File No. S7–13–19).

acknowledged that, even if an exchange were to exit the marketplace due to its proposed fee-related change, it would not significantly impact competition in the market for exchange trading services because these markets are served by multiple competitors.[40] Further, the Commission explicitly stated that ''[c]onsequently, demand for these services in the event of the exit of a competitor is likely to be swiftly met by existing competitors.'' [41] Finally, the Commission recognized that while some exchanges may have a unique business model that is not currently offered by competitors, a competitor could create similar business models if demand were adequate, and if a competitor did not do so, the Commission believes it would be likely that new entrants would do so if the exchange with that unique business model was otherwise profitable.[42] Cboe concluded that the Exchange is subject to significant substitution-based competitive forces in pricing its connectivity and access fees.[43] Cboe stressed that the proof of competitive constraints does not depend on showing that members walked away, or threatened to walk away, from a product due to a pricing change. Rather, the very absence of such negative feedback (in and of itself, and particularly when coupled with positive feedback) is indicative that the proposed fees are, in fact, reasonable and consistent with the Exchange being subject to competitive forces in setting fees.[44]

MRX recently filed to establish port fees.[45] In SR–MRX–2023–05, MRX proposed to assess no fee for the first FIX Port obtained by an MRX Member and established fees for additional FIX Ports of $650 per port, per month for each subsequent port beyond the first port. MRX noted in SR–MRX–2023–05 that:

> Only MRX Members may utilize ports on MRX. Any market participant that sends orders to a Member would not need to utilize a port. The Member can send all orders, proprietary and agency, through one port to MRX. Members may elect to obtain multiple account numbers to organize their business, however only one account number and one port for orders and one port for quotes is necessary for a Member to trade on MRX. All other ports offered by MRX are not required for an MRX Member to meet its regulatory obligations.

MRX also established fees for OTTO Ports, which ports are identical to the ports being offered on BX, and priced them the same as the proposed OTTO fees for BX. MRX assesses an OTTO Port Fee of $650 per port, per month, per account number but does not offer the first OTTO Port at no cost because it was offering one FIX Port at no cost for order entry. Unlike BX, MRX caps its OTTO Port.[46] Unlike MRX, where the OTTO Port has existed on MRX for a number of years, the OTTO Port is new to BX. The Exchange is offering Participants an alternative to the current FIX Port with this new proprietary port. Unlike BX's FIX Port, the Exchange is offering the first OTTO port at no cost. At this time, BX is not capping the port fee for OTTO, similar to other options exchanges.[47] If Participants elect to acquire a number of OTTO Ports, the Exchange may consider capping OTTO Ports at a later date.

If the Commission were to apply a different standard of review to this proposal than it applied to other exchange fee filings, such as the Cboe or MRX fee filings,[48] it would create a burden on competition such that it would impair BX's ability to innovate new products, modernize its technology, and compete with other options markets.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to section 19(b)(3)(A)(iii) of the Act [49] and subparagraph (f)(6) of Rule 19b–4 thereunder.[50]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–BX–2024–011 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–BX–2024–011. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99846; File No. SR–NASDAQ–2023–022]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing of Amendment No. 3 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment Nos. 2 and 3, To Create a New, Non-Trading Limited Underwriter Membership Class and Impose Related Requirements for Principal Underwriting Activity

March 22, 2024.

I. Introduction

On July 12, 2023, The Nasdaq Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to create a new, non-trading limited underwriter membership class and impose related requirements for principal underwriting activity in connection with a company applying for initial listing on the exchange with a transaction involving an underwriter. The proposed rule change was published for comment in the **Federal Register** on July 31, 2023.[3]

On September 12, 2023, pursuant to section 19(b)(2) of the Act,[4] the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change.[5] On September 29, 2023, the Commission instituted proceedings under section 19(b)(2)(B) of the Act [6] to determine whether to approve or disapprove the proposed rule change.[7] On September 29, 2023, the Exchange filed Amendment No. 1 to the proposed rule change, which amended and replaced the proposed rule change in its entirety.[8] On January 22, 2024, the Exchange filed Amendment No. 2 to the proposed rule change which amended and replaced the proposed rule change, as modified by Amendment No. 1, in its entirety.[9] On January 26, 2024, the Commission extended the time period for approving or disapproving the proposal to March 27, 2024.[10] The proposed rule change, as modified by Amendment No. 2, was published for comment in the **Federal Register** on February 23, 2024.[11] On March 18, 2024, the Exchange filed Amendment No. 3 to the proposed rule change.[12] The Commission has received no comment letters on the proposed rule change. The Commission is publishing this notice to solicit comments on Amendment No. 3 from interested persons and is approving the proposed rule change, as modified by Amendment Nos. 2 and 3, on an accelerated basis.

II. Description of the Proposed Rule Change, as Modified by Amendment Nos. 2 and 3

The Exchange is proposing to amend its rules to create a new limited membership class for underwriters that are FINRA members seeking only to serve as a principal underwriter for a company applying to list on the Exchange (and not seeking access to transact on the Exchange) and require a company applying for initial listing in connection with a transaction involving an underwriter to have a principal underwriter that is a Member [13] or a broker or dealer admitted to limited underwriting membership in the Exchange (''Limited Underwriting Member'').[14] The Exchange states that

[4] 15 U.S.C. 78s(b)(2).

[5] *See* Securities Exchange Act Release No. 98366, 88 FR 63999 (Sept. 18, 2023). The Commission designated October 29, 2023, as the date by which the Commission shall approve or disapprove, or institute proceedings to determine whether to approve or disapprove, the proposed rule change.

[6] 15 U.S.C. 78s(b)(2)(B).

[7] *See* Securities Exchange Act Release No. 98606, 88 FR 68894 (Oct. 4, 2023).

[8] Amendment No. 1 is available at *https://www.sec.goc/comments/sr-nasdaq-2023-022/srnasdaq2023022-267740-644342.pdf* (''Amendment No. 1''). In Amendment No. 1, the Exchange, among other things: (i) removed a proposed exemption from registration for certain investment banking representatives associated solely with Limited Underwriting Members; (ii) removed proposed rule language from proposed General 3, Section 1032(a), which provided that any person shall be eligible to become associated persons of a Limited Underwriting Member; (iii) removed General 4 from the list of rules applicable to Limited Underwriting Members in proposed General 3, Section 1031(c)(1); and (iv) revised proposed General 3, Section 1031(c)(2) to clarify that associated persons of Limited Underwriting Members shall at all times be properly qualified and registered under the Financial Industry Regulatory Authority (''FINRA'') rules. Further, the Exchange provided additional reasons it is not proposing to apply certain existing rules to Limited Underwriting Members.

[9] Amendment No. 2 is available at *https://www.sec.goc/comments/sr-nasdaq-2023-022/srnasdaq2023022-414859-982462.pdf.* In Amendment No. 2, the Exchange, among other things: (i) updated the numbering in Listing Rule 5210 to account for recently added rule language and a related reference to Listing Rule 5210 in proposed General 3, Section 1031(b); (ii) excluded General 3, Section 1032 from the rules the Exchange proposes to apply to Limited Underwriting Members (*see infra* note 14 and accompanying text) under proposed General 3, Section 1031(c)(1); (iii) added General 9, Section 21 to the rules the Exchange proposes to apply to Limited Underwriting Members under proposed General 3, Section 1031(c)(1); (iv) updated Equity 7, Section 10 to reflect a recent change in the membership fee; and (v) added a statutory basis for the imposition of fees. Amendment No. 2 superseded Amendment No. 1, so the changes made in Amendment No. 1, unless otherwise amended, are incorporated into Amendment No. 2. *See supra* note 8.

[10] *See* Securities Exchange Act Release No. 99433, 89 FR 6559 (Feb. 1, 2024).

[11] *See* Securities Exchange Act Release No. 99557 (Feb. 16, 2024), 89 FR 13779 (''Amendment No. 2'').

[12] Amendment No. 3 is available at *https://www.sec.gov/comments/sr-nasdaq-2023-022/srnasdaq2023022-447779-1145462.pdf* (''Amendment No. 3''). In Amendment No. 3, the Exchange modified the proposal by: (i) adding back proposed rule language from the original proposal to General 3, Section 1031(a)(2) about eligibility to become an associated person and modifying the title of General 3, Section 1031(a) to reflect that change; (ii) adding back language from the original proposal to include General 4 (Registration Requirements), which includes registration, qualification, and continuing education requirements, to the list of rules applicable to Limited Underwriting Members in General 3, Section 1031(c)(1); and (iii) excluding General 5, Rule 9400 from the list of rules applicable to Limited Underwriting Members in General 3, Section 1031(c)(1) for the reasons described below. Amendment No. 3 also updated the purpose section to reflect the changes described above, made other clarifying changes, and added a statutory basis explanation for consistency with section 6(b)(2) of the Act.

[13] The Exchange defines the term ''member'' or ''Nasdaq Member'' (hereinafter referred to as ''Member'') to mean any registered broker or dealer that has been admitted to membership in the Exchange. *See* Nasdaq General 1, Section 1(b)(11). *See also* Nasdaq Listing Rule 5005(a)(24) (defining ''Member'' to mean a broker or dealer admitted to membership in Nasdaq).

[14] *See infra* note 23. The Exchange states that ''principal underwriter'' will have the same definition used in Rule 405 promulgated under the Securities Act of 1933 (''Securities Act''), which is an underwriter in privity of contract with the issuer of the securities as to which he is underwriter, and that such definition provides that the term ''issuer'' in the definition of ''principal underwriter'' has the meaning given in Sections 2(4) and 2(11) of the Securities Act. 17 CFR 230.405. The Exchange

Continued

underwriters play a critical role as gatekeepers to the capital markets in connection with the trading of newly issued securities and that it relies on underwriters to select the selling syndicate and ensure that the shares are placed in a way that is reasonably designed to allow liquid trading, consistent with Nasdaq's listing requirements, and the successful introduction of the company to the market place.[15] According to the Exchange, notwithstanding the important role of underwriters, it does not currently require underwriters of companies that are going public on the Exchange to be Members of the Exchange, and as such, does not have authority to require responses to investigative inquiries or to enforce its rules directly against non-Member underwriters.[16] The Exchange states that this proposal would provide the Exchange with authority to directly obtain information from Limited Underwriting Members,[17] whether pre- or post-initial public offering.[18] The Exchange states that by creating a new, limited underwriting membership class, it will provide firms seeking only to perform principal underwriting activity on the Exchange (and not seeking access to trade via the Nasdaq Market Center) [19] with the option of selecting a membership that is less burdensome (*i.e.,* to become a Limited Underwriting Member rather than a Member).[20]

The Exchange proposes to amend several of its rules in conjunction with the adoption of the new limited underwriting membership class. First, the Exchange proposes to amend its Listing Rule 5210 (Prerequisites for Applying to List on the Nasdaq Stock Market) to impose a requirement that each company applying for initial listing in connection with a transaction involving an underwriter have a principal underwriter that is a Member or Limited Underwriting Member.[21] In proposed Listing Rule 5210(m), the Exchange will also specify that ''principal underwriter'' shall have the same definition used in Rule 405 promulgated under the Securities Act.[22] Second, the Exchange proposes to add a definition of ''Limited Underwriting Member'' to General 1 (General Provisions), Section 1 to mean a broker or dealer admitted to limited underwriting membership in Nasdaq.[23] Third, as discussed in more detail below, the Exchange also proposes to add a new, limited underwriting membership rule, proposed Section 1031 to General 3 (Membership and Access), within which, the Exchange proposes to set forth the rules that will be applicable to Limited Underwriting Members and their associated persons, the requirements for persons eligible to become Limited Underwriting Members, and rules on Limited Underwriting Member access to the Exchange.[24] Finally, the Exchange proposes to amend Equity 7, Section 10 to exempt Limited Underwriting Members from being assessed a trading rights fee.[25] The Exchange states that Limited Underwriting Members would not be eligible to trade on the Exchange, and accordingly, the Exchange proposes to add language to Equity 7, Section 10(a) to specify that Limited Underwriting Members would not be charged the monthly trading rights fee.[26] Under the proposal, Limited Underwriting Members would be subject to a $2,000 application fee (per Equity 7, Section 10(b)) and a $4,000 yearly membership fee (per Equity 7, Section 10(a)).[27]

Specifically, as to proposed General 3, Section 1031 requirements on eligibility for membership, the Exchange proposes to state in General 3, Section 1031(a)(1) that any registered broker or dealer shall be eligible for limited underwriting membership in the Exchange, except such registered brokers or dealers as are excluded under General 3, Rule 1002(b) and in General 3, Section 1031(a)(2) that any person shall be eligible to become an associated persons of a Limited Underwriting Member, except such persons as are excluded under General 3, Rule 1002(b).[28] The Exchange states that proposed General 3, Section 1031(a) is consistent with the existing rules for persons eligible to become Members and associated persons of Members in General 3, Rule 1002(a).[29] Further, under the proposal to be eligible for membership, Limited Underwriting

states it proposes to apply the proposed requirements to a principal underwriter because the definition of principal underwriter points to the lead underwriter, who is generally responsible for organizing the offering, including tasks such as determining allocation of shares and the offering price, in conjunction with the issuer. Although offerings may require more than one underwriter, or a group of underwriters known as an underwriting syndicate, the Exchange proposes to focus on the lead underwriters given the substantial role they typically play in the offering process. *See* Amendment No. 2, *supra* note 11, at 13780 n.11.

[15] *See* Amendment No. 2, *supra* note 11, at 13780. The Exchange states that it highlighted the important role of underwriters as gatekeepers in the initial public offering (''IPO'') process and the applicability of market rules and the federal securities laws in its recent Equity Regulatory Alert (''Nasdaq Alert''), available at *https://www.nasdaqtrader.com/MicroNews.aspx?id=ERA2022-9.* In the Nasdaq Alert, among other things, the Exchange highlighted that ''Nasdaq members, as well as members of other self-regulatory organizations, that underwrite IPOs, and that play other roles in the offering process, should expect heightened focus when an IPO experiences unusual price movements.'' *See also https://www.nyse.com/publicdocs/nyse/markets/nyse/rule-interpretations/2022/NYSER_Reg_Memo_-_Regulatory_Scrutiny_in_Connection_with_IPOs_(2022.11.17_final).pdf; https://www.finra.org/rules-guidance/notices/22-25* (similar regulatory alerts issued by the New York Stock Exchange and FINRA, respectively).

[16] *See* Amendment No. 2, *supra* note 11, at 13781. The Exchange states, however, that it has broad discretionary authority over the initial and continued listing of securities in the Exchange and over its Members in order to maintain the quality of and public confidence in its market, to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and to protect investors and the public interest. According to the Exchange, it may request information from companies that are going public on the Exchange and from Members who are permitted to trade on the Exchange, who are required to respond to those requests. The Exchange also states it may request information from non-Members, including non-Member underwriters, but they are not required to respond to these requests. *See id.* at 13781 n.17.

[17] *See infra* note 23 and accompanying text.

[18] *See* Amendment No. 2, *supra* note 11, at 13781 n.17. The Exchange explains in its proposal that in the fall of 2022 it observed, immediately following the pricing of certain IPOs on the Exchange, instances of unusually high price spikes immediately followed by dramatic price declines to at or below the offering price. This occurred mostly with respect to small cap companies with offerings of less than $25 million. According to the Exchange, these extreme spikes may occur ''in the opening trade on an exchange or in continuous trading on the day of, or days immediately following the listing.'' *Id.* at 13780.

[19] The Exchange defines ''Nasdaq Market Center'' to mean the automated system for order execution and trade reporting owned and operated by Nasdaq. *See* Nasdaq Equity 1, Section 1(a)(3).

[20] The Exchange submitted a revised Membership Application as Exhibit 3, in which the Exchange proposes to add a category for Limited Underwriting Members and clarify that Limited Underwriting Members are not subject to the requirement to provide an NSCC account number.

[21] *See* Amendment No. 2, *supra* note 11, at 13781. The Exchange states that this rule would cross reference the definition of ''Limited Underwriting Member'' in General 1, Section 1. The Exchange further states that this proposed rule change primarily impacts membership rules and other non-listing rules, which would apply to the underwriters themselves. *See id.*

[22] *See id.*

[23] *See id.* at 13781–82.

[24] *See id.*

[25] *See id.* at 13782–83. Specifically, the Exchange proposes to exempt Limited Underwriting Members from the trading rights fee of $1,250 per month that is charged to Members. *See id.*

[26] *See id.*

[27] *See id.* These are the application and yearly membership fees that currently apply to Members.

[28] *See id.;* Amendment No. 3, *supra* note 12, at 3–4 and 7–8. According to the Exchange, General 3, Rule 1002(b) provides, in relevant part, that subject to certain exceptions, no registered broker or dealer shall be admitted to membership, and no Member shall be continued in membership, if such broker, dealer, or Member fails or ceases to satisfy the qualification requirements established by the Exchange rules, or if such broker, dealer, or Member is or becomes subject to a statutory disqualification, or if such broker, dealer, or Member fails to file such forms as may be required in accordance with such process as the Exchange may prescribe. *See id.* at 13781 n.20; Amendment No. 3, *supra* note 12, at 3–4 and 7–8.

[29] *See* Amendment No. 3, *supra* note 12, at 8.

Members shall at all times be members of FINRA and associated persons of Limited Underwriting Members shall at all times be properly qualified and registered under FINRA rules.[30]

Proposed General 3, Section 1031(b) will also provide that (i) a limited underwriting membership provides no rights to transact on the Exchange and (ii) a limited underwriting membership is solely to allow a firm that is not otherwise a Member to serve as a principal underwriter for a company seeking to list on the Exchange, as set forth in proposed Listing Rule 5210(m).[31] Proposed General 3, Section 1031(c)(1) also states that, for purposes of interpreting and applying the rules applicable to Limited Underwriting Members (as described below), references to ''Member,'' ''Members,'' or ''membership'' shall be functionally equivalent to ''Limited Underwriting Member,'' ''Limited Underwriting Members,'' or ''limited underwriting membership,'' respectively.[32]

The Exchange proposes to apply a limited ruleset to its newly proposed limited underwriting membership class.[33] Specifically, the Exchange proposes to provide in new General 3, Section 1031(c)(1) that Limited Underwriting Members and their associated persons are subject only to the following rules: [34] General 1 (General Provisions); General 2 (Organization and Administration), with the exception of Sections 6(a) and 22; General 3 (Membership and Access), with the exception of Section 1032; General 4 (Registration Requirements); General 5 (Discipline), with the exception of Rules 8211, 9400, and 9557; General 9 (Regulation), Sections 1, 20, and 21; and Equity 7, Section 10 (Pricing Schedule, Membership Fees).[35] The Exchange states that it proposes to apply only those rules it deems appropriate to a firm serving as a principal underwriter, including those rules it deems critical to such firms.[36] The Exchange further states that a firm registering as a Limited Underwriting Member on the Exchange would remain subject to all applicable rules of the Commission and any other self-regulatory organization (''SRO'') of which it is a member, including the FINRA.[37]

In its proposal, the Exchange set forth its reasons for including the specified rules in General 3, Section 1031(c)(1) that apply to Limited Underwriting Members. As to its proposal to apply General 1 to Limited Underwriting Members and their associated persons,[38] the Exchange states that General 1 provides defined terms that would be applicable to Limited Underwriting Members and will also add a definition of ''Limited Underwriting Member'' to General 1.[39] The Exchange also proposes to apply General 2 (with the exception of Sections 6(a) and 22) to Limited Underwriting Members and their associated persons.[40] The Exchange states that the rules in General 2 relate to organization and administration including requirements surrounding fees, limitations on affiliations, and a requirement for an executive representative, among other obligations.[41] The Exchange proposes to specifically exclude General 2, Sections 6(a) and Section 22, as General 2, Section 6(a) states that General Equity and Options Rules and Equity Rules shall apply to all members and persons associated with a member, which, according to the Exchange, is not accurate in the case of Limited Underwriting Members, and General 2, Section 22 relates to sponsored participants [42] and client access to the Nasdaq Market Center via a Member, which, according to the Exchange, is not applicable to underwriting activity.[43]

The Exchange also proposes to subject Limited Underwriting Members and their associated persons to General 3 with the exception of Section 1032.[44] The Exchange states that General 3 contains membership rules, including an obligation to follow specified procedures for applying to be a member, making changes to membership, or terminating membership.[45] In addition, the Exchange states that General 4 specifies registration, qualification, and continuing education requirements, including requirements for persons engaged in the securities business of a Member, and proposed to apply General 4 to Limited Underwriting Members and their associated persons.[46] The Exchange states these requirements apply in the same manner as such registration, qualification, and continuing education requirements that apply to current Members.[47] Limited Underwriting Members and their associated persons would also be subject to FINRA's registration and qualification rules, including, for example, requirements regarding relevant examinations for underwriting (Series 79, Investment Banking, IB) and supervision of underwriting (Series 79 plus Series 24, Investment Banking Principal).[48]

Limited Underwriting Members and their associated persons would also have to comply with General 5 (with the exception of Rules 8211, 9400, and 9557), which, according to the Exchange, is critical to subject Limited Underwriting Members to, as it contains the Exchange's disciplinary rules.[49] In particular, the Exchange notes General 5, Rule 8210 that provides the Exchange with authority to require information

[30] *See* Amendment No. 2, *supra* note 11, at 13782. According to the Exchange, Limited Underwriting Members would be eligible to waive-in to Exchange membership, as provided for in General 3, Section 1013(b). Prospective Limited Underwriting Members would need to submit a membership application in which they would select ''Waive-In Membership'' for the application type and ''Limited Underwriting Member of NQX'' for the nature of intended activity. For ''waive-in'' applicants, the Exchange states it relies substantially upon FINRA's determination to approve the applicant for FINRA membership when the Exchange evaluates the applicant for Exchange membership. *See id.* at 13782 n.23.

[31] *See id.* Proposed Listing Rule 5210(m) applies to companies seeking to initially list on the Exchange in connection with a transaction involving an underwriter. *See also supra* notes 21–22 and accompanying text.

[32] *See* Amendment No. 2, *supra* note 11, at 13782.

[33] *See id.* at 13781. The Exchange states that Members, unlike Limited Underwriting Members, are subject to all of the Exchange's rules (which includes the limited ruleset applicable to the newly proposed limited underwriting membership class). *See id.* at 13781 n.21.

[34] There are multiple sections and rules under the various ''General Rules'' numerical provisions. References to ''rules'' herein generally include all the sections and rules within the applicable General numerical provisions that would apply to Limited Underwriter Members with the exceptions noted.

[35] *See id.* at 13781; Amendment No. 3, *supra* note 12, at 4–5.

[36] *See* Amendment No. 2, *supra* note 11, at 13781.

[37] *See id.*

[38] *See id.* at 13782.

[39] *See id.*

[40] *See id.*

[41] *See id.*

[42] *See* Nasdaq General 2, Section 22.

[43] *See* Amendment No. 2, *supra* note 11, at 13782.

[44] The proposed rule change would also add new Section 1031 to General 3, as described above, that is applicable to limited underwriting memberships. *See supra* note 24 and accompanying text. The Exchange states that it proposes to specifically exclude General 3, Section 1032 because such section includes requirements related to Nasdaq Market Center Participant registration, which, according to the Exchange, is inapplicable to Limited Underwriting Members because they are not permitted to transact on the Nasdaq Market Center. *See* Amendment No. 2, *supra* note 11, at 13782.

[45] *See* Amendment No. 2, *supra* note 11, at 13781.

[46] *See* Amendment No. 3, *supra* note 12, at 4–5 and 9–10.

[47] *See id.* at 10.

[48] *See* Amendment No. 2, *supra* note 11, at 13783. *See also* FINRA Rules 1210 (Registration Requirements) and 1220 (Registration Categories).

[49] *See* Amendment No. 2, *supra* note 11, at 13783. According to the Exchange, General 5, Rule 8001 provides that the Exchange and FINRA are parties to the FINRA Regulatory Contract (often referred to as a Regulatory Services Agreement (''RSA'')) pursuant to which FINRA has agreed to perform certain functions described in the Exchange's rules on behalf of the Exchange. The Exchange does not anticipate that the proposed rule change would have any material impact on the current RSA. *See id.* at 13782 n.22.

from its Members.[50] The Exchange is proposing to specifically exclude General 5, Rules 8211, 9400, and 9557, which the Exchange represents are not relevant to underwriting activity because these rules relate, respectively, to trading data, expedited client suspension proceedings for violations of General 9, Section 53 (concerning disruptive quoting and trading), and FINRA carrying or clearing members.[51] The Exchange also states that the excluded rules from General 5 are inapplicable to Limited Underwriting Members because such members are not permitted to transact on the Exchange.[52]

Further, the Exchange proposes to subject Limited Underwriting Members and their associated persons to General 9, Sections 1, 20, and 21.[53] The Exchange states that it believes it is important to subject Limited Underwriting Members to General 9, Section 1, which includes general standards by which Members must abide, including the requirement to observe just and equitable principles of trade.[54] The Exchange further states that General 9, Sections 20 and 21 require Members to establish and maintain a system to supervise the activities of each registered representative and associated person that is reasonably designed to achieve compliance with applicable securities laws and regulations and with applicable Nasdaq rules, to identify principals who must establish, maintain, and enforce a system of supervisory control policies and procedures that, among other things, test that the member's supervisory procedures are reasonably designed with respect to the activities of the member and its associated persons, and to achieve compliance with applicable securities laws and regulations, and with applicable Nasdaq rules.[55] The Exchange states its belief that it is important to apply these provisions on supervision, as it would provide the Exchange with authority to assess whether a Limited Underwriting Member has an adequate supervisory system and written supervisory procedures in place.[56] The Exchange states that it does not propose to apply other sections of General 9, except for Sections 1, 20, and 21, to Limited Underwriting Members at this time.[57] The Exchange states that although it acknowledges certain other sections of General 9 could be applied to underwriters, it is targeting limited inclusion of rules that it deems critical.[58] Finally, the Exchange proposes to include Equity 7, Section 10 in General 3, Section 1031(c)(1).[59] The Exchange states that Equity 7, Section 10 includes the membership and application fees applicable to Limited Underwriting Members.[60]

The Exchange states that it proposes to avoid applying all those Exchange rules not specified in proposed General 3, Section 1031(c)(1) to Limited Underwriting Members in an effort to impose minimal burden on Limited Underwriting Members, while still allowing the Exchange to have regulatory authority over such Members.[61] The Exchange states that the Exchange rules that Limited Underwriting Members would not be subject to under the proposal primarily relate to trading activity and are, therefore, not relevant to the activities of Limited Underwriting Members.[62] The Exchange states that it proposes to apply a limited ruleset, primarily to provide the Exchange with the authority to require information directly from the Limited Underwriting Members and enhance its tools for oversight with respect to the role the underwriter plays in connection with a company listing on the Exchange.[63]

The Exchange, in addition to the excluded rules described above, has not proposed to apply the following rules to Limited Underwriting Members at this time: General 6; General 7; General 8; Equity Rules (with the exception of Equity 7, Section 10); and Options Rules.[64] Specifically, the Exchange states that General 6 relates generally to FINRA arbitration rules to which the Limited Underwriting Members would be subject to directly by virtue of their FINRA membership and that the Exchange does not propose to apply General 7 to Limited Underwriting Members because it governs consolidated audit trail compliance and would not apply to underwriting activity.[65] The Exchange also states that General 8 governs connectivity to the Exchange and would not be relevant to Limited Underwriting Members given their lack of access to trade on the Exchange, and similarly, the Equities Rules and the Options Rules are generally not relevant to the activities of Limited Underwriting Members due to their lack of access to trade on the Exchange.[66]

Finally, the Exchange is proposing to make the proposed rule change described herein operative 60 days after publication of the Commission's approval order of SR–NASDAQ–2023–022 in the **Federal Register**, as this delay will allow time for firms involved with upcoming IPOs to become Limited Underwriting Members, if they choose, and for companies planning IPOs to select alternative underwriters if their current firm is not, and does not intend to become, a Member or Limited Underwriting Member.[67]

III. Discussion and Commission Findings

After careful review, the Commission finds that the proposed rule change, as modified by Amendment Nos. 2 and 3, is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange.[68] Specifically, the Commission finds that the proposed rule change, as modified by Amendment Nos. 2 and 3, is consistent with section 6 of the Act. In particular, the Commission finds that the proposal, as modified by Amendment Nos. 2 and 3, is consistent with section 6(b)(5) [69] of the Act, which requires, among other

[50] *See id.* at 13782. Nasdaq General 5, Rule 8210 states information must be provided by a member or persons associated with a member or subject to Nasdaq's jurisdiction ''[f]or the purpose of an investigation, complaint, examination or proceeding authorized by the Nasdaq By-Laws or Rules, Nasdaq Regulation Department, including FINRA staff.'' Nasdaq General 5, Rule 8210(a).

[52] *See* Amendment No. 3, *supra* note 12, at 11.

[53] *See* Amendment No. 2, *supra* note 11, at 13782.

[54] *See id.*

[55] *See id.*

[56] *See id.*

[57] *See id.*

[58] *See id.* The Exchange further states that many of the standards in General 9 are FINRA rules that are incorporated by reference into the Exchange's rules; therefore, Limited Underwriting Members would be subject to such FINRA rules by virtue of their FINRA membership. *See id. See, e.g.,* Nasdaq General 9, Section 30 (incorporating by reference FINRA Rule 4511).

[59] *See* Amendment No. 2, *supra* note 11, at 13782.

[60] *See id.* The Exchange acknowledges that there are additional, existing rules that it could propose to apply to Limited Underwriting Members but it is proposing to apply only a narrow ruleset, as it does not intend to create comprehensive rules to regulate underwriting activity. *See id.* at 13781–82.

[61] *See id.* at 13782.

[62] *See id.*

[63] *See id.* at 13781. The Exchange represents that it will consider whether additional existing rules that are not proposed in the limited ruleset for Limited Underwriting Members or new rules are warranted as the Exchange gains more experience in applying the rules proposed. *See id.* at 13781–82.

[64] *See id.* at 13783.

[65] *See id.*

[66] *See id.* The Exchange states that although Limited Underwriting Members could access the Exchange via other means, such as trading through another Member, Limited Underwriting Members would have no direct access to trade on the Exchange. *See id.*

[67] *See id.*

[68] In approving this proposed rule change, as modified by Amendment Nos. 2 and 3, the Commission has considered the proposed rule change's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

[69] 15 U.S.C. 78f(b)(5).

things, that the Exchange's rules be designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest; and are not designed to permit unfair discrimination between customers, issuers and brokers, or dealers.[70] Further, the Commission finds that the proposed rule change, as amended, is consistent with (i) section 6(b)(1) of the Act,[71] which requires, among other things, that a national securities exchange be able to comply and enforce compliance by its members and persons associated with its members, with the provisions of the Act, the rules and regulation thereunder, and the rules of the exchange, (ii) section 6(b)(2) of the Act [72] which requires that exchange rules provide that any registered broker or dealer or natural person associated with a registered broker or dealer may become a member of such exchange and any person may become associated with a member thereof, and (iii) sections 6(b)(6) [73] and 6(b)(7) [74] of the Act, which require, among other things, that a national securities exchange provide appropriate discipline for violations of the Act, rules and regulations thereunder and exchange rules and fair procedures for the disciplining of members and persons associated with its members and the prohibition or limitation by the exchange of any person with respect to access to services offered by the exchange or a member thereof.[75]

The proposal, as modified by Amendment Nos. 2 and 3, amends the rules of the Exchange to provide for a new limited underwriting membership class and would require companies applying to initially list on the Exchange in connection with a transaction involving an underwriter to use a principal underwriter that is either a Member or Limited Underwriting Member of the Exchange.[76] The Exchange has proposed to add Section 1031 to General 3 (Membership and Access) that sets forth the requirements applicable to Limited Underwriting Members including certain limitations on Limited Underwriting Members.[77] In particular, a limited underwriting membership provides no rights to trade on the Exchange and such limited underwriting membership is solely for the purpose of allowing a firm that is not otherwise a Member to serve as a principal underwriter for a company seeking to initially list on the Exchange.[78] A Limited Underwriting Member is defined to mean a broker or dealer admitted to limiting underwriting membership in the Exchange.[79] As described above, similar to the existing eligibility requirements for Members and their associated persons, General 3, Section 1031(a) provides that any registered broker or dealer is eligible for a limited underwriting membership and any person shall be eligible to become an associated person of a Limited Underwriting Member, except for those registered broker or dealers or persons that are excluded under General 3, Rule 1002(b).[80] These provisions on eligibility are consistent with the Act, including section 6(b)(2) of the Act, which requires the rules of an exchange to provide that any registered broker or dealer or natural person associated with a broker or dealer may become a member of such exchange or associated with a member thereof subject to the provisions of section 6(c) of the Act.[81]

In its proposal, as modified by Amendment Nos. 2 and 3, the Exchange seeks to apply certain of its rules as set forth in General 1 through General 9 to Limited Underwriting Members while excluding the application of others.[82] The Exchange seeks to apply only specific rules to Limited Underwriter Members that fall under areas related to general provision definitions and standards, organization and administration, membership and access, registration requirements, discipline, regulation, and membership fees.[83] As stated by the Exchange, it proposes to apply only those rules it believes are appropriate to a firm serving as a principal underwriter, and will, among other things, provide the Exchange with authority to require information from such underwriters thereby aiding in its oversight of its market and helping to ensure fair and orderly markets.[84] The Exchange has also stated that firms registering as a Limited Underwriting Members would still be subject to all applicable rules of the Commission and any other SRO of which it is a member, including FINRA.[85]

Specifically, among others, the Exchange has proposed to apply General 1 to Limited Underwriting Members because it contains defined terms and standards that currently apply to Members that are equally applicable to Limited Underwriting Members as well.[86] The Exchange also proposes to subject Limited Underwriting Members to General 2 (with the exception of sections 6(a) and 22) because it relates to organization and administration including, among others, limitations on affiliations [87] and requirements to have an exchange representative.[88] The Exchange is applying General 3 (with the exception of Section 1032 that applies to members who trade on Nasdaq's Market Center) because

[70] *See id.* In addition, the Commission finds that the proposed rule change as to the applicable fees is consistent with section 6(b)(4) of the Act that requires the Exchange's rules to provide for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities. 15 U.S.C. 78f(b)(4).

[71] 15 U.S.C. 78f(b)(1).

[72] 15 U.S.C. 78f(b)(2).

[73] 15 U.S.C. 78f(b)(6).

[74] 15 U.S.C. 78f(b)(7).

[75] The Commission previously found that the provisions on Nasdaq Member voting for the Exchange Board of Directors ''including that twenty percent of the directors be 'Member Representative Directors' and the means by which they are elected by members provides for the fair representation of members in the selection of directors and the administration of the Exchange consistent with the requirement of section 6(b)(3) of the Act.'' *See* Securities Exchange Act Release No. 53128 (Jan. 13, 2006), 71 FR 3550, 3553 (Jan. 23, 2006) (Commission order approving Nasdaq for registration as a national securities exchange) (''Nasdaq Exchange Registration Order''). The By-Laws of Nasdaq apply to Limited Underwriting Members as they do to current Members. *See, e.g.,* Nasdaq By-Laws Article 1(t) (defining ''Nasdaq Member'' as ''any registered broker or dealer that has been admitted to membership in the national security exchange operated by the Company''). Limited Underwriting Members would therefore also have the right to nominate, and vote for, candidates for election as Member Representative Directors under the By-Laws, as do current Members. *See id.* Article II (Annual Election of Member Representative Directors and Other Actions by Nasdaq Members). Given that the existing By-Law provisions apply equally to Limited Underwriting Members, the proposal is similarly consistent with section 6(b)(3) of the Act.

[76] *See supra* notes 13 and 14 and accompanying text.

[77] *See supra* note 24.

[78] *See supra* note 31.

[79] *See supra* note 23.

[80] *See supra* note 28.

[81] 15 U.S.C. 78f(b)(2) and 15 U.S.C. 78f(c).

[82] *See* proposed Nasdaq General 3, Section 1031(c)(1).

[83] *See supra* notes 33–35.

[84] *See supra* note 63.

[85] *See supra* note 37. Proposed General 3, Section 1031(c)(2) would require a Limited Underwriting Member to, at all times, be a member of FINRA. *See supra* note 30.

[86] *See supra* notes 38–39 and accompanying text.

[87] General 2, Section 4 states that no member or person associated with a member shall be the beneficial owner of greater than twenty percent (20%) of the then-outstanding voting securities of the Nasdaq Stock Market, Inc. The Commission previously has stated that ownership and voting restrictions are consistent with the Act and that these ownership limitations should minimize the potential that a person could improperly interfere with or restrict the ability of the Commission or the Exchange to effectively carry out their regulatory oversight responsibilities under the Act. *See* Nasdaq Exchange Registration Order, *supra* note 75, at 3551–52. For the same reasons, the Commission believes it is appropriate to apply General 2, Section 4 to the limited underwriting membership class.

[88] *See supra* notes 40–41 and accompanying text.

General 3 contains membership rules, including an obligation to follow specified procedures for applying to be a member, making changes to membership, or terminating membership.[89]

General 4, which includes registration, qualification, and continuing education requirements for Members and persons engaged in the securities business of a Member, would also apply to Limited Underwriting Members and their associated persons.[90] General 4 would apply in the same manner as it applies to current Members and their associated persons.[91] Under the proposal, Limited Underwriting Members must at all times be members of FINRA and their associated persons shall at all times be properly qualified and registered under FINRA rules.[92] Associated persons of Limited Underwriting Members would therefore also be subject to FINRA's registration and qualification requirements that includes examination requirements for persons involved in underwriting and supervision of underwriting as well as FINRA continuing education requirements.[93]

The Exchange has additionally proposed to subject Limited Underwriting Members to General 5 which contains the Exchange's disciplinary rules,[94] with the exception of Rules 8211 (submission of trading data), 9400 (expedited client suspension proceedings for violations of General 9, Section 53 concerning disruptive quoting and trading activity), and 9557 (procedures for regulating activities on FINRA carrying and clearing members).[95] General 5, Rule 8210 provides, among other things, the Exchange with authority to require information from Exchange Members, persons associated with Exchange Members, and persons subject to the Exchange's jurisdiction for ''the purpose of an investigation, complaint, examination or proceeding authorized by the Nasdaq By-Laws or Rules, Nasdaq Regulation Department including FINRA staff.'' [96] General 5, Rule 9000 Series also provides, among other things, the process and procedural requirements for review of disciplinary matters including the opportunity for a hearing.

The disciplinary rules that will be applicable to Limited Underwriting Members and their associated persons (with the exception of Rules 8211, 9400, and 9557 that are not relevant to the new membership type as described above) [97] are the same as those that apply to existing Members of the Exchange and associated persons of such Members. The Commission previously found that the Exchange's disciplinary rules are consistent with the requirements of sections 6(b)(6) and 6(b)(7) of the Act in that they provide a fair procedure for the disciplining of members and persons associated with members.[98] For similar reasons, the Commission believes that, consistent with the requirements of sections 6(b)(6) and 6(b)(7),[99] the Exchange's disciplinary rules and procedures should provide a fair procedure for the disciplining of Limited Underwriting Members and persons associated with such members, and for prohibiting or limiting access with respect to services offered by the Exchange. The Commission also believes for similar reasons as previously found, consistent with the requirements of section 6(b)(1) of the Act,[100] that the proposed rules should provide the Exchange with the ability to enforce compliance as to Limited Underwriting Members and their associated persons with the provisions of the Act, the rules and regulations thereunder, and the rules of the Exchange.[101]

The Exchange has also proposed to subject Limited Underwriting Members to General 9, Sections 1, 20, and 21. General 9, Section 1 includes general standards by which Members must abide, such as requiring Members to observe high standards of commercial honor and just and equitable principles of trade. General 9, Section 20 requires Members to establish and maintain a system to supervise the activities of each registered representative and associated person. General 9, Section 21 requires, among other things, for Members to test that their supervisory procedures are reasonably designed to achieve compliance with applicable securities laws and regulations and applicable Exchange rules and requires an annual certification as to those procedures and processes.[102] As the Exchange states, applying provisions related to supervision would provide the Exchange with authority to assess whether a Limited Underwriting Member has an adequate supervisory system and written supervisory procedures in place as to its activities.[103] Further, applying standards of just and equitable principles of trade to Limited Underwriting Members is consistent with the requirements in section 6(b)(5) of the Act which states rules of the exchange must be designed to promote such principles.[104]

The Exchange has also proposed to exclude certain rules in addition to the ones discussed above.[105] As the Exchange described in its proposal and above, many of the excluded rules are not relevant to underwriting activities of Limited Underwriting Members because these rules apply to those Members that have trading rights on the Exchange in Nasdaq's Market Center [106] and Limited Underwriting Members would have no rights to directly transact on the Exchange.[107] As to the exclusion of General 6, as the Exchanges states, these rules generally relate to FINRA arbitration rules and Limited Underwriting Member activities would be subject to such arbitration rules by virtue of being FINRA members.[108]

The Exchange states it is proposing a limited ruleset to apply the rules it believes are most critical, including providing the Exchange authority to require information directly from

[89] *See supra* notes 44–45.

[90] *See supra* note 46.

[91] *See* Amendment No. 3, *supra* note 12, at 10.

[92] *See* proposed General 3, Section 1031(c).

[93] *See supra* note 48 and accompanying text.

[94] *See supra* notes 49–52.

[95] *See supra* note 51.

[96] *See supra* note 50. In its filing, the Exchange states that while it may request information from non-Members, including non-Member underwriters, they are not required to respond to these requests unlike companies going public on the Exchange and Members. *See supra* note 16 and accompanying text.

[97] *See supra* notes 49–52 and accompanying text.

[98] *See* Nasdaq Exchange Registration Order, *supra* note 75, at 3558. Any changes to the disciplinary rules since the original approval would have had to be submitted to the Commission under section 19(b) of the Act and be consistent with the Act, in particular with Section 6.

[99] *See* 15 U.S.C. 78(b)(6) and (7).

[100] *See* 15 U.S.C. 78(b)(1).

[101] *See* Nasdaq Exchange Registration Order, *supra* note 75, at 3558.

[102] *See supra* note 55. The Exchange's General 9, Sections 20 and 21 incorporate by reference several FINRA rules on these matters. Although the Exchange acknowledges that certain other sections of General 9 could apply to underwriters, the Exchange states it has excluded the other rules in General 9 because it is targeting limited inclusion of the rules it deems critical. The Exchange further noted that many of the standards in General 9 are FINRA rules that are incorporated by reference into the Exchanges rules and therefore Limited Underwriting Members would be subject to such FINRA rules as a result of their FINRA membership. *See supra* note 58.

[103] *See supra* note 56.

[104] 15 U.S.C. 78f(b)(5).

[105] *See supra* note 66 and accompanying text.

[106] *See* Nasdaq General 7 and General 8 (governing consolidated audit trail and connectivity requirements, respectively); Equity Rules and Options Rules (with the exception of Equity 7, Section 10). *See also supra* notes 64–66 and accompanying text.

[107] *See supra* note 62. *See also* Amendment No. 2, *supra* note 11, at 13784. Limited Underwriting Members could access the Exchange via other means, such as trading through another Member but have no direct access to trade on the Exchange. *See supra* note 66.

[108] *See supra* note 65.

Limited Underwriting Members, to enhance its oversight and deter potential violative conduct.[109] The Commission believes that the application of only specific Exchange rules to Limited Underwriting Members and the exclusion of certain other rules, as proposed by the Exchange, are reasonable and strikes the appropriate balance between regulating Limited Underwriting Members and not imposing a burden on competition not necessary or appropriate in furtherance of the purposes of the Act.[110] The limited ruleset is consistent with the purpose of a limited underwriting membership that does not confer any access to trading on the Exchange and only permits such member to act as a principal underwriter for a company applying to initially list on the Exchange.[111]

Further, as described above, in conjunction with the new limited underwriting membership class, proposed Listing Rule 5210(m) will require a company to use, as a prerequisite for applying for initial listing on the Exchange with an underwriter, a principal underwriter that is either a Member or Limited Underwriting Member. The Commission has previously stated that listing standards provide the means for an exchange to screen issuers that seek to become listed, and to provide listed status only to those that are bona fide companies with sufficient public float, investor base, and trading interest to provide the depth and liquidity necessary to promote fair and orderly markets.[112] As the Exchange states, it relies on underwriters to ensure shares are placed in a way that is reasonably designed to allow liquid trading,[113] and the proposal will allow it to require responses from underwriters that currently are not Members of the Exchange in response to investigative inquires.[114] The requirement in Listing Rule 5210(m) can help to support the Exchange in determining a company's suitability for listing in order to, among other things, prevent fraudulent and manipulative acts and practices and maintain fair and orderly markets.

As described above, the proposal should provide greater transparency and certainty with respect to the ability of, and the manner in which, the Exchange is able to obtain information necessary to meet its regulatory obligations and ensure fair and orderly markets in connection with the listing of securities of a company applying for initial listing on the Exchange with a transaction involving an underwriter. Based on the above, the Commission finds that the proposed rule change is reasonably designed, consistent with section 6(b)(5) of the Act, among others, to prevent fraudulent and manipulative and practices, promote just and equitable principles of trade, and, in general, protect investors and the public interest.[115]

Finally, as is described above, the Exchange has proposed to apply Equity 7, Section 10 to Limited Underwriting Members, as this section includes the membership and application fees applicable to Limited Underwriting Members.[116] The Exchange has proposed to exempt Limited Underwriting Members from the trading rights fee of $1,250 per month that is normally charged to Members because such Limited Underwriting Members have no direct trading rights on the Exchange.[117] Limited Underwriting Members would be subject to same $2,000 application fee (per Equity 7, Section 10(b)) and $4,000 yearly membership fee (per Equity 7, Section 10(a)) as other Members are currently charged.[118] The Commission believes that the proposed fees applicable to Limited Underwriting Members, in addition to the exclusion of the member trading fee, is consistent with Section 6(b)(4) in that it provides for the equitable allocation of reasonable dues, fees, and other charges among its members.[119]

For the forgoing reasons, the Commission finds that the proposed rule change, as modified by Amendment Nos. 2 and 3, is consistent with the Act.

IV. Solicitation of Comments on Amendment No. 3 to the Proposed Rule Change

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether Amendment No. 3 to the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NASDAQ–2023–022 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2023–022. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE,

[109] *See supra* note 63. *See also* Amendment No. 2, *supra* note 11, at 13783. The Exchange represented that as it adopts new rules over time, it also would consider whether to apply such rules to Limited Underwriting Members. *See supra* note 63.

[110] 15 U.S.C. 78f(b)(8).

[111] *See* proposed General 3, Section 1031(b). The Exchange has represented that it would consider whether additional existing rules that are not proposed in the limited ruleset for Limited Underwriting Members or new rules are warranted as the Exchange gains more experience in applying the rules proposed. The Exchange acknowledged that there are other existing rules that it could propose to apply to the new class of limited underwriting membership, but stated it is only proposing a narrow rule set to enhance its oversight with respect to the role the underwriter plays in connection with a company listing on the Exchange. *See supra* note 63.

[112] *See, e.g.,* Securities Exchange Act Release Nos. 95220 (July 7, 2022), 87 FR 41780, 41785 (July 13, 2022) (SR–NASDAQ–2022–027) (order approving direct listing with a capital raise); 86314 (July 5, 2019), 84 FR 33102, 33110 (July 11, 2019) (SR–NASDAQ–2019–009) (order approving revisions to initial listing standard calculations related to liquidity).

[113] *See supra* note 15. *See also* Securities Exchange Act Release No. 86314 (July 5, 2019) 84 FR 33102, 33111 (July 11, 2019) (stating that the proposal "should allow the Exchange to more accurately determine whether a security has adequate distribution and liquidity and is thus suitable for listing and trading on the Exchange").

[114] *See supra* notes 16–18.

[115] 15 U.S.C. 78f(b)(5).

[116] *See supra* note 25.

[117] *See supra* notes 25–26.

[118] *See supra* note 27.

[119] 15 U.S.C. 78f(b)(4). The Exchange has also proposed to delay implementation of its proposal until sixty days after publication of the Commission's approval order of the filing discussed herein. *See supra* note 67. This appears to be reasonable to allow underwriters representing companies that have applied, or about to apply, to list to become a Limited Underwriting Member or Member if not already a Member or in the alternative allow a company to select an alternative underwriter if such underwriter firm chooses not to become a Limited Underwriting Member or Member.

Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NASDAQ–2023–022 and should be submitted on or before April 18, 2024.

V. Accelerated Approval of the Proposed Rule Change, as Modified by Amendment Nos. 2 and 3

The Commission finds good cause to approve the proposed rule change, as modified by Amendment Nos. 2 and 3, prior to the thirtieth day after the date of publication of notice of the filing of Amendment Nos. 2 and 3 in the **Federal Register**. In Amendment No. 2, the Exchange amended the proposal to, among other things, (i) exclude Section 1032 of General 3, a new provision, from the rules the Exchange proposes to apply to Limited Underwriting Members under General 3, Section 1031(c); (ii) add General 9, Section 21 to the rules the Exchange proposes to apply to Limited Underwriting Members under General 3, Section 1031(c); (iii) update existing rule language in Equity 7, Section 10 to reflect changes in current text; (iv) remove a proposed exemption from registration for certain banking representatives associated with Limited Underwriting Members; and (v) add language to General 3, Section 1031(c)(2) to clarify that associated persons of Limited Underwriting Members shall at all times be properly qualified and registered under FINRA rules.[120] Amendment No. 2 also made some numbering updates, provided additional rationale for the inclusion and exclusion of certain rules, and provided additional language in the statutory basis.[121] Amendment No. 2 was published for comment in the **Federal Register** and no comments were received.[122]

In its Amendment No. 3, the Exchange added back proposed rule language to General 3, Section 1032(a)(2) that was in the original proposal about the eligibility of any person to become an associated person of a Limited Underwriting Member, except such persons as are excluded under General 3, Rule 1002(b).[123] In Amendment No. 3, the Exchange also provided additional language on the consistency of General 3, Section 1032(a)(1) and (a)(2) with the requirements of section 6(b)(2) of the Act.[124] In Amendment No. 3, the Exchange also amended the proposal to add General 4 (Registration Requirements) back into the list of rules that a Limited Underwriting Member and their associated persons must comply with, as originally proposed.[125] The proposed rule language changes to the proposal, as described above, are identical to provisions that were in the original proposal and published for comment.[126] No comments were received in response to that Notice. Amendment No. 3 also excluded General 5, Rule 9400 from the list of rules that Limited Underwriting Members must comply with because that rule relates to expedited procedures for certain trading activity and Limited Underwriting Members have no trading rights on the Exchange.[127] Amendment No. 3 also provided updates and other clarifying changes to, and justification for, the proposed rule change in addition to adding the provisions described above.[128]

The Commission believes Amendment Nos. 2 and 3 will help to strengthen the Exchange proposal and support its consistency with the Act. Amendment Nos. 2 and 3 assist the Commission in evaluating the Exchange's proposal and in determining that it is consistent with the Act. Amendment Nos. 2 and 3 also have raised no new or novel issues. Accordingly, the Commission finds good cause, pursuant to section 19(b)(2) of the Act,[129] to approve the proposed rule change, as modified by Amendment Nos. 2 and 3, on an accelerated basis.

VI. Conclusion

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[130] that the proposed rule change (SR–NASDAQ–2023–022), as modified by Amendment Nos. 2 and 3, be, and hereby is, approved on an accelerated basis.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[131]

Sherry R. Haywood,

Assistant Secretary.

[FR Doc. 2024–06579 Filed 3–27–24; 8:45 am]

BILLING CODE 8011–01–P

[120] *See supra* note 9.

[121] *See id.* Amendment No. 2 also removed proposed rule language from proposed General 3, Section 1032(a), which provided that any person shall be eligible to become an associated persons of a Limited Underwriting Member, and removed General 4 from the list of rules applicable to Limited Underwriting Members in proposed General 3, General 1031(c)(1). As discussed below, these provisions were put back into the proposal in Amendment No. 3. Additionally, some of the changes described in Amendment No. 2 were originally proposed in Amendment No. 1 but included in Amendment No. 2 since Amendment No. 2 superseded Amendment No. 1. *See supra* notes 8 and 11.

[122] *See supra* note 11. The Commission notes that the full 21-day comment period has already ended.

[123] *See supra* note 28.

[124] *See* Amendment No. 3, *supra* note 12, at 12–13.

[125] *See supra* notes 35 and 46.

[126] *See* Notice, *supra* note 3. As noted above, these provisions were removed from the proposal in Amendment No. 2. *See* Amendment No. 2, *supra* note 11.

[127] *See supra* note 51.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99848; File No. SR–NYSE–2024–17]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Connectivity Fee Schedule

March 22, 2024.

Pursuant to section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on March 15, 2024, New York Stock Exchange LLC (''NYSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Connectivity Fee Schedule (''Fee Schedule'') regarding colocation services and fees to update the list of included data products. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Connectivity Fee Schedule (''Fee Schedule'') regarding colocation services and fees to update the list of included data products (''Included Data Products'').

Currently, the table of Included Data Products in Colocation Note 4 sets forth the market data feeds that Users [4] can connect to at no additional cost when they purchase a service that includes access to the LCN or IP network.[5]

Each of the Exchange and the Affiliate SROs has filed to establish an ''Aggregated Lite'' market data feed (the ''Aggregated Lite Feeds'').[6] Accordingly, the Exchange proposes to update the table of Included Data Products to include the Aggregated Lite Feeds. To implement the change, the Exchange proposes to update the table of Included Data Products of the NYSE, NYSE American and NYSE Arca as follows (proposed additions underlined):

NYSE:
NYSE Aggregated Lite NYSE Alerts NYSE BBO NYSE Integrated Feed NYSE OpenBook NYSE Order Imbalances NYSE Trades
NYSE American:
NYSE American Aggregated Lite NYSE American Alerts NYSE American BBO NYSE American Integrated Feed NYSE American OpenBook NYSE American Order Imbalances NYSE American Trades
NYSE American Options
NYSE Arca:
NYSE Arca Aggregated Lite NYSE ArcaBook NYSE Arca BBO NYSE Arca Integrated Feed NYSE Arca Order Imbalances NYSE Arca Trades

When NYSE Chicago and NYSE National were added to the Included Data Products, the individual market data feeds offered were not broken out.[7] Accordingly, in addition to adding the Aggregated Lite Feeds, the Exchange proposes to break out the NYSE Chicago and NYSE National market data feeds in Included Data Products, as follows (proposed additions underlined):

---

[4] For purposes of the Exchange's colocation services, a ''User'' means any market participant that requests to receive colocation services directly from the Exchange. *See* Securities Exchange Act Release No. 76008 (September 29, 2015), 80 FR 60190 (October 5, 2015) (SR–NYSE–2015–40). As specified in the Fee Schedule, a User that incurs colocation fees for a particular colocation service pursuant thereto would not be subject to colocation fees for the same colocation service charged by the Exchange's affiliates NYSE American LLC (''NYSE American''), NYSE Arca, Inc. (''NYSE Arca''), NYSE Chicago, Inc. (''NYSE Chicago''), and NYSE National, Inc. (''NYSE National'' and together, the ''Affiliate SROs''). Each Affiliate SRO has submitted substantially the same proposed rule change to propose the changes described herein. *See* SR–NYSEAMER–2024–20, SR–NYSEARCA–2024–28, SR–NYSECHX–2024–13, and SR–NYSENAT–2024–11.

The Exchange expects that the present filing will become operative immediately upon the filings to establish a fee for the Aggregated Lite Feed becoming operative. The Exchange expects such operative date or dates to be no later than the second quarter of 2024. It will announce the date or dates through a customer notice.

The Exchange does not charge for connectivity to the Included Data Feeds. Accordingly, it would not charge for connectivity to the Aggregated Lite Feeds.

General

The proposed changes would not apply differently to distinct types or sizes of market participants. Rather, they would apply to all Users equally. As is currently the case, the purchase of any colocation service, including connectivity to the Aggregated Lite Feeds, would be completely voluntary and the Fee Schedule would be applied uniformly to all Users. FIDS does not expect that the proposed rule change will result in new Users.

The proposed changes are not otherwise intended to address any other issues relating to co-location services and/or related fees, and the Exchange is not aware of any problems that customers would have in complying with the proposed change.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with section 6(b) of the Act,[8] in general, and furthers the objectives of section 6(b)(5) of the Act,[9] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange further believes that the proposed rule change is consistent with section 6(b)(4) of the Act,[10] because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers, or dealers.

The Proposed Change is Reasonable

The Exchange believes that the proposed rule change is reasonable and would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest, because adding the Aggregated Lite Feeds would increase the number of Included Data Products available to Users for no additional charge. All Users that voluntarily select to access the LCN or IP network would not be subject to a charge above and beyond the fee paid for the relevant LCN or IP network access. Accordingly, the Exchange believes that the proposed change is reasonable because the change would mean that a User would have the option of adding connectivity to additional market data feeds without paying additional charges.

Adding the proposed additional Included Data Products would allow a User to connect to any of the Aggregated Lite Feeds that it wished, but would not require it to do so. As now, a User would be able to determine which Included Data Products, if any, to which it connects, based on what would best serve its needs, tailoring the service to the requirements of its business operations.

The Exchange believes that the proposed rule change is reasonable because, as with the other Included Data Products, it believes it is not the exclusive method to connect to the Aggregated Lite Feeds. As alternatives to connecting to the Aggregated Lite Feeds as Included Data Products, a User may connect to the market data feeds through another User or through a connection to an Exchange access center outside the data center, third party access center, or third party vendor.

By adding the Aggregated Lite Feeds and setting forth the NYSE Chicago and NYSE National feeds already offered, the proposed change would ensure that the list of Included Data Products was up to date and consistent in the level of detail. Accordingly, the Exchange believes that the proposed rule change is reasonable and would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest, as it would ensure that the description of Included Data Products was complete, ensuring that it is accessible and transparent, and providing market participants with clarity as to what connectivity is included in the purchase of access to the LCN and IP networks.

The Proposed Change Is Equitable and Not Unfairly Discriminatory

The Exchange believes that the proposed change provides for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers, or dealers because adding the Aggregated Lite Feeds would increase the number of Included Data Products available to Users for no additional charge. All Users that voluntarily select to access the LCN or IP network would not be subject to a charge above and beyond the fee paid for the relevant LCN or IP network access. Accordingly, the Exchange

[8] 15 U.S.C. 78f(b).

[9] 15 U.S.C. 78f(b)(5).

[10] 15 U.S.C. 78f(b)(4).

believes that the proposed change is equitable and not unfairly discriminatory because the change would mean that a User would have the option of adding connectivity to additional market data feeds without paying additional charges.

Further, the Exchange believes that the proposed change is equitable and not unfairly discriminatory since, as is true now, the proposed change would not apply differently to distinct types or sizes of Users but would apply to all Users equally. Moreover, adding the proposed additional Included Data Products would allow a User to connect to any of the Aggregated Lite Feeds that it wished, but would not require it to do so. As now, a User would be able to determine which Included Data Products, if any, to which it connects, based on what would best serve its needs, tailoring the service to the requirements of its business operations.

By adding the Aggregated Lite Feeds and setting forth the NYSE Chicago and NYSE National feeds already offered, the proposed change would ensure that the list of Included Data Products was up to date and consistent in the level of detail. Accordingly, the Exchange believes that the proposed rule change is equitable and not unfairly discriminatory, as it would ensure that the description of Included Data Products was complete, ensuring that it is accessible and transparent, and providing market participants with clarity as to what connectivity is included in the purchase of access to the LCN and IP networks.

For the reasons above, the proposed changes do not unfairly discriminate between or among market participants that are otherwise capable of satisfying any applicable co-location fees, requirements, terms, and conditions established from time to time by the Exchange.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposal will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of section 6(b)(8) of the Act.[11]

The Exchange believes that the proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act because adding the Aggregated Lite Feeds would increase the number of Included Data Products available to Users for no additional charge. All Users that voluntarily select to access the LCN or IP network would not be subject to a charge above and beyond the fee paid for the relevant LCN or IP network access. Accordingly, the change would mean that a User would have the option of adding connectivity to additional market data feeds without paying additional charges.

Adding the proposed additional Included Data Products would allow a User to connect to any of the Aggregated Lite Feeds that it wished, but would not require it to do so. In this way, the proposed changes would enhance competition by, as now, enabling a User to determine to which Included Data Products, if any, it connects, based on what would best serve its needs, tailoring the service to the requirements of its business operations.

The Exchange believes that the proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act because, as with the other Included Data Products, it believes it is not the exclusive method to connect to the Aggregated Lite Feeds. As alternatives to connecting to the Aggregated Lite Feeds as Included Data Products, a User may connect to the market data feeds through another User or through a connection to an Exchange access center outside the data center, third party access center, or third party vendor.

By adding the Aggregated Lite Feeds and setting forth the NYSE Chicago and NYSE National feeds already offered, the proposed change would ensure that the list of Included Data Products was up to date and consistent in the level of detail. Accordingly, the Exchange believes that the proposed additions to the description of Included Data Products would make the description more accessible and transparent. In this manner, the proposed change would provide market participants with clarity as to what connectivity is included in the purchase of access to the LCN and IP networks, thereby enhancing competition by ensuring that all Users have access to the same information regarding the Included Data Products.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to section 19(b)(3)(A)(iii) of the Act[12] and Rule 19b–4(f)(6) thereunder.[13] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[14]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under section 19(b)(2)(B)[15] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NYSE–2024–17 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange

[12] 15 U.S.C. 78s(b)(3)(A)(iii).

[13] 17 CFR 240.19b–4(f)(6).

[14] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires the Exchange to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[15] 15 U.S.C. 78s(b)(2)(B).

Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSE–2024–17. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSE–2024–17 and should be submitted on or before April 18, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[16]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99839; File No. SR–CBOE–2024–014]

Self-Regulatory Organizations; Cboe Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Update Its Fees Schedule in Connection With the Exchange's Plans To List and Trade Options That Overlie a Reduced Value of the MSCI World Index, the Full Value of the MSCI ACWI Index, and a Reduced Value of the MSCI USA Index

March 22, 2024.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on March 18, 2024, Cboe Exchange, Inc. (the ''Exchange'' or ''Cboe Options'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe Exchange, Inc. (the ''Exchange'' or ''Cboe Options'') proposes to update its Fees Schedule in connection with the Exchange's plans to list and trade options that overlie a reduced value of the MSCI World Index, the full value of the MSCI ACWI Index, and a reduced value of the MSCI USA Index. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is available on the Exchange's website (*http://www.cboe.com/AboutCBOE/CBOELegalRegulatoryHome.aspx*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fees Schedule in connection with its plans to list and trade options that overlie a reduced value of the MSCI World Index (''MXWLD options''), the full value of the MSCI ACWI Index (''MXACW options''), and a reduced value of the MSCI USA Index (''MXUSA options''), effective March 18, 2024.

Background

Each of the MSCI World, ACWI, and USA Indexes is a free float-adjusted market capitalization index designed to measure equity market performance throughout the world (MSCI World and ACWI Indexes) or the United States (MSCI USA Index). The MSCI World, ACWI, and USA Indexes are calculated by MSCI Inc. (''MSCI''), which is a provider of investment support tools.[3] Each of these indexes is calculated in U.S. dollars on a real-time basis from the open of the first market on which the components are traded to the closing of the last market on which the components are traded. The methodology used to calculate each index is similar to the methodology used to calculate the value of other benchmark market-capitalization weighted indexes (including the MSCI MXEA and MXEF Indexes, on which the Exchange may currently list options).[4]

MXACW options are options that are based on the value of the MSCI ACWI Index. The MSCI ACWI Index is a free float-adjusted market capitalization index that is designed to measure the equity performance of developed markets and emerging markets. The MSCI ACWI Index consists of component stocks from 23 developed markets[5] and 24 emerging markets.[6]

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Rule 4.12(c).

[4] *See* Rule 4.10(h); *see also* Securities Exchange Act Release No. 74681 (April 8, 2015), 80 FR 20032 (April 14, 2015) (SR–CBOE–2015–023) (order approving proposed rule change to adopt rules to permit listing and trading of options on the MSCI EAFE Index (''MXEA options'') and the MSCI EM Index) (''MXEF options'').

[5] These developed markets include Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom, and the United States.

[6] These emerging markets include Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece,

The MSCI ACWI Index consists of large- and mid-cap components across these markets, has 2,946 constituents, and covers approximately 85% of the global investable equity opportunity set.[7]

MSWLD options are options that are based on 1/100th of the value of the MSCI World Index. The MSCI World Index is a free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets. The MSCI World Index consists of component stocks from 23 developed markets.[8] The MSCI World Index consists of large- and mid-cap components across these markets, has 1,509 constituents, and covers approximately 85% of the free float-adjusted market capitalization in each country.[9]

MXUSA options are options that are based on 1/100th of the value of the MSCI USA Index. The MSCI USA Index is a free float-adjusted market capitalization index that is designed to measure the performance of the large- and mid-cap segments of the U.S. market. The MSCI USA Index consists of large- and mid-cap components from the United States, has 625 constituents, and covers approximately 85% of the free float-adjusted market capitalization in the United States.[10]

With a smaller index value, MXWLD and MXUSA options may be more accessible to a broad base of customers with diverse investment objectives, ranging from asset owners aiming to track benchmark index exposure, registered investment advisers in search of new sources of yield, or individual investors seeking straightforward exposure to options linked to global benchmark indices. The Exchange believes that MXWLD and MXUSA options, with a smaller index value, will attract a greater source of customer business and may enhance investors' opportunities to hedge, or speculate on, the market risk associated with the stocks comprising the MSCI World Index and MSCI USA Index, respectively. Additionally, the Exchange believes investors will benefit from the availability of MXWLD and MXUSA options, as investors will be able to use this trading vehicle while extending a smaller outlay of capital. The Exchange believes this may attract additional investors, and, in turn, create a more active and liquid trading environment.

The MSCI World Index, MSCI ACWI Index, and MSCI USA Index are calculated using methodology as the MSCI MXEA Index and the MSCI MXEF Index on which the Exchange currently lists options. The Exchange believes offering MXACW, MXWLD, and MXUSA options with similar terms as MXEA and MXEF options will benefit investors, as it will provide market participants with additional investment and hedging strategies consisting of options over each of these indexes.

The Exchange now proposes to amend its Fees Schedule to accommodate the planned listing and trading of MXACW, MXUSA, and MXWLD options. The Exchange notes that because MXEA, MXEF, MXACW, MXUSA, and MXWLD options are intended for the same investor-base, the majority of the proposed changes amend the Fees Schedule in connection with trading in MXACW, MXUSA, and MXWLD options in a manner that is generally consistent with the way in which existing transactions fees and programs currently apply to trading in MXEA and MXEF options, with slight differences to account for the lower spot value of underlying indexes of MXACW, MXUSA, and MXWLD options, as compared to the underlying indexes of MXEA and MXEF options.

Standard Transaction Rates and Surcharges

First, the Exchange proposes to adopt certain standard transaction fees in connection with MXWLD, MXACW, and MXUSA options. Specifically, the proposed rule change adopts certain fees for MXWLD, MXACW, and MXUSA options in the Rate Table for All Products Excluding Underlying Symbol A,[11] as follows:

- Adopts fee code CG, appended to all Customer (capacity ''C'') orders in MXWLD, MXACW, and MXUSA options and assesses a fee of $0.05 per contract; [12]
- Adopts fee code MG, which is appended to all Market-Maker (capacity ''M'') orders in MXWLD, MXACW, and MXUSA options and assesses a fee of $0.10 per contract;
- Adopts fee code FG, appended to all Firm (*i.e.,* Clearing Trading Permit Holders (capacity ''F'')) and Non-Clearing Trading Permit Holder Affiliates (capacity ''L'')) orders in MXWLD, MXACW, and MXUSA options and assesses a fee of $0.15 per contract;
- Adopts fee code BG, appended to all non-Customer, non-Market-Maker, non-Firm (*i.e.,* Broker-Dealers (capacity ''B''), Joint Back-Offices (capacity ''J''), Non-Trading Permit Holder Market-Makers (capacity ''N''), and Professionals (capacity ''U'')) orders in MXWLD, MXACW, and MXUSA options and assesses a fee of $0.20 per contract.

In addition to the above transaction fees, the proposed rule change also adopts certain surcharges to MXWLD and MXACW options transactions within the Rate Table—All Products Excluding Underlying Symbol List A. Currently, the MXEA and MXEF Index License Surcharge Fee assesses a $0.12 charge for transactions in MXEA and MXEF options. The proposed rule change applies the MXEA and MXEF Index License Surcharge Fee to all Firm, Market-Maker and Non-Customer transactions in MXWLD and MXACW options and amends the fee name accordingly. The proposed rule change also adds MXWLD, MXACW, and MXUSA options to the list of options for which the FLEX Surcharge Fee of $0.10 (capped at $250 per trade) applies to electronic FLEX orders executed by all capacity codes, except for Cboe Compression Services (''CCS'') and FLEX Micro transactions.[13]

Fees Programs

The Exchange proposes to exclude MXACW, MXUSA, and MXWLD options from the Liquidity Provider Sliding Scale, which offers credits on Market-Maker orders where a Market-Maker achieves certain volume thresholds based on total national Market-Maker volume in all underlying symbols, excluding Underlying Symbol List A, MRUT, NANOS, XSP, and FLEX Micros during the calendar month.

Hungary, India, Indonesia, Korea, Kuwait, Malaysia, Mexico, Peru, Philippines, Poland, Qatar, Saudi Arabia, South Africa, Taiwan, Thailand, Turkey, and the United Arab Emirates.

[7] *See* MSCI ACWI Index fact sheet (dated November 30, 2023), *available at* MSCI ACWI Index.

[8] These developed markets include Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom, and the United States.

[9] *See* MSCI World Index fact sheet (dated November 30, 2023), *available at* MSCI World Index.

[10] *See* MSCI USA Index fact sheet (dated November 30, 2023), *available at* MSCI USA Index.

[11] Underlying Symbol List A includes OEX, XEO, RUT, RLG, RLV, RUI, UKXM, SPX (includes SPXW), SPESG and VIX. *See* Exchange Fees Schedule, Footnote 34.

[12] Under the proposed changes, the Customer Large Trade Discount Program, set forth in the Exchange Fees Schedule, will apply to Customer orders in MXWLD, MXACW, and MXUSA (included in ''Other Index Options'' under the program). Under the program, a customer large trade discount program in the form of a cap on customer (''C'' capacity code) transaction fees is in effect for the options set forth in the Customer Large Trade Discount table. For MXWLD, MXACW, and MXUSA options, regular customer transaction fees will only be charged for up to 5,000 contracts per order, similar to other index options other than VIX, SPX/SPXW, SPESG, and XSP.

[13] The FLEX Surcharge Fee will only be charged up to the first 2,500 contracts per trade. *See* Exchange Fees Schedule, Footnote 17.

Specifically, the proposed rule change updates the Liquidity Provider Sliding Scale table to provide that volume thresholds are based on total national Market-Maker volume in all underlying symbols excluding Underlying Symbol List A, MRUT, MXACW, MXUSA, MXWLD, NANOS, XSP, and FLEX Micros during the calendar month, and that it applies in all underlying symbols excluding Underlying Symbol List A, MRUT MXACW, MXUSA, MXWLD, NANOS, XSP, and FLEX Micros. The proposed rule change also updates Footnote 10 (appended to the Liquidity Provider Sliding Scale) to provide that the Liquidity Provider Sliding Scale applies to Liquidity Provider (Exchange Market-Maker, DPM and LMM) transaction fees in all products except (1) Underlying Symbol List A, MRUT, MXACW, MXUSA, MXWLD, NANOS, XSP, and FLEX Micros, (2) volume executed in open outcry, and, and (3) volume executed via AIM Responses.

The proposed rule change updates the Volume Incentive Program (''VIP'') table to exclude MXWLD, MXACW, and MXUSA volume from the VIP, which currently offers a per contract credit for certain percentage threshold levels of monthly Customer volume in all underlying symbols, excluding Underlying Symbol List A, Sector Indexes, DJX, MRUT, MXEA, MXEF, NANOS, XSP and FLEX Micros. The proposed rule change also amends Footnote 36 (appended to the VIP table) to reflect the proposed exclusion of MXWLD, MXACW, and MXUSA from the VIP by providing (in relevant part) that: the Exchange shall credit each TPH the per contract amount resulting from each public customer (''C'' capacity code) order transmitted by that TPH which is executed electronically on the Exchange in all underlying symbols excluding Underlying Symbol List A, Sector Indexes, DJX, MRUT, MXACW, MXEA, MXEF, MXUSA, MXWLD, NANOS, XSP, FLEX Micros, QCC trades, public customer to public customer electronic complex order executions, and executions related to contracts that are routed to one or more exchanges in connection with the Options Order Protection and Locked/Crossed Market Plan referenced in Rule 5.67, provided the TPH meets certain percentage thresholds in a month as described in the Volume Incentive Program (VIP) table; the percentage thresholds are calculated based on the percentage of national customer volume in all underlying symbols excluding Underlying Symbol List A, Sector Indexes, MRUT, MXACW, MXEA, MXEF, MXUSA, MXWLD, NANOS, DJX, XSP, and FLEX Micros entered and executed over the course of the month; and in the event of a Cboe Options System outage or other interruption of electronic trading on Cboe Options, the Exchange will adjust the national customer volume in all underlying symbols excluding Underlying Symbol List A, Sector Indexes, MRUT, MXACW, MXEA, MXEF, MXUSA, MXWLD, NANOS, DJX, XSP, and FLEX Micros for the entire trading day.

The proposed rule change excludes MXACW, MXUSA, and MXWLD options from the list of products eligible to receive Break-Up Credits in orders executed in AIM, SAM, FLEX AIM, and FLEX SAM, by amending the Break-Up Credits table to exclude MXACW, MXUSA, and MXWLD along with the products currently excluded—Underlying Symbol List A, Sector Indexes, DJX, MRUT, MXEA, MXEF, NANOS, XSP and FLEX Micros.

The Exchange proposes to exclude MXACW, MXUSA, and MXWLD options from the Marketing Fee Program by updating the Marketing Fee table to provide that the marketing fee will be assessed on transactions of Market-Makers (including DPMs and LMMs), resulting from customer orders at the per contract rate provided above on all classes of equity options, options on ETFs, options on ETNs and index options, except that the marketing fee shall not apply to Sector Indexes, DJX, MRUT, MXEA, MXEF, MXACW, MXUSA, MXWLD, XSP, NANOS, FLEX Micros or Underlying Symbol List A. The Exchange notes that, in this way, MXACW, MXUSA, and MXWLD options will be treated as most of the Exchange's other exclusively listed products that are currently excluded from the Marketing Fee Program. The Exchange does believe that it is necessary at the point of newly listing and trading for MXACW, MXUSA, and MXWLD options to be eligible for the Marketing Fee Program and may determine in the future to submit a fee filing to add MRUT to the Marketing Fee Program if the Exchange believes it would potentially generate more customer order flow in MXACW, MXUSA, and MXWLD options.

The proposed rule change also updates the Select Customer Options Reduction (''SCORe'') program table to include MXWLD, MXACW, and MXUSA volume in the SCORe program, which currently offers a per Retail contract discount for certain percentage threshold levels of monthly Retail,[14] Non-FLEX Customer (''C'' origin code) volume in the following options classes: SPX (including SPXW), VIX, RUT, MXEA, MXEF & XSP (''Qualifying Classes''). The SCORe program is available to any Trading Permit Holder (''TPH'') Originating Clearing Firm or non-TPH Originating Clearing Firm that sign up for the program.[15] The SCORe program utilizes Discount Tiers to determine the Originating Firm's applicable corresponding discounts. To determine the Discount Tier, an Originating Firm's Retail volume in the Qualifying Classes will be divided by total Retail volume in the Qualifying Classes executed on the Exchange. The program then provides a discount per retail contract, based on the determined Discount Tier thereunder. The proposed rule change also amends Footnote 48 (appended to the SCORe program table) to reflect the proposed inclusion of MXWLD, MXACW, and MXUSA in the SCORe program by providing (in relevant part) that: ''Qualifying Classes'' will be defined as SPX (including SPXW), VIX, RUT, MXEA, MXEF, MXWLD, MXACW & MXUSA.

The Exchange proposes to exclude MXACW, MXUSA, and MXWLD options from the Floor Broker Sliding Scale Rebate Program, which offers rebates for Firm Facilitated and non-Firm Facilitated orders that correspond to certain volume tiers and is designed to incentivize order flow in multiply-listed options to the Exchange's trading floor. The Exchange proposes to update the Floor Broker Sliding Scale Rebate Program to provide that the Floor Broker Sliding Scale Rebate Program applies to all products except Underlying Symbol List A, Sector Indexes, DJX, MRUT, MXEA, MXEF, MXACW, MXUSA, MXWLD, NANOS, XSP and FLEX Micros.

The Exchange next proposes to exclude MXWLD, MXACW, and MXUSA options from eligibility for the Order Router Subsidy (''ORS'') and Complex Order Router Subsidy (''CORS'') Programs, in which Participating TPHs or Participating Non-Cboe TPHs may receive a payment from the Exchange for every executed contract routed to the Exchange through their system in certain classes. Specifically, the proposed rule change

[14] For purposes of this program ''Retail'' orders will be defined as Customer orders for which the original order size (in the case of a simple order) or largest leg size (in the case of a complex order) is 100 contracts or less.

[15] For this program, an ''Originating Clearing Firm'' is defined as either (a) the executing clearing Options Clearing Corporation (''OCC'') number on any transaction which does not also include a Clearing Member Trading Agreement (''CMTA'') OCC clearing number or (b) the CMTA in the case of any transaction which does include a CMTA OCC clearing number.

updates the ORS/CORS Program tables to provide that ORS/CORS participants whose total aggregate non-customer ORS and CORS volume is greater than 0.25% of the total national volume (excluding volume in options classes included in Underlying Symbol List A, Sector Indexes, DJX, MRUT, MXACW, MXEA, MXEF, MXUSA, MXWLD, NANOS, XSP or FLEX Micros) will receive an additional payment for all executed contracts exceeding that threshold during a calendar month, and updates Footnotes 29 [16] and 30 (appended to the ORS/CORS Program tables) to accordingly provide that Cboe Options does not make payments under the program with respect to executed contracts in options classes included in Underlying Symbols List A, Sector Indexes, DJX, MRUT, MXACW, MXEA, MXEF, MXUSA, MXWLD, NANOS, XSP or FLEX Micros.

The Exchange also proposes to amend Footnote 6, which states that in the event of an Exchange System outage or other interruption of electronic trading on the Exchange that lasts longer than 60 minutes, the Exchange will adjust the national volume in all underlying symbols excluding Underlying Symbol List A, Sector Indexes, MRUT, MXEA, MXEF, NANOS, DJX, XSP and FLEX Micros for the entire trading day. The Exchange proposes to add MXACW, MXUSA, and MXWLD options to the list of options, similar to MXEA and MXEF options.

LMM Incentive Programs

Finally, the Exchange proposes to adopt financial programs in connection with MXACW, MXUSA, and MXWLD options for LMMs appointed to the programs (collectively, the ''LMM Incentive Programs'').[17] Each LMM Incentive Program provides a rebate to TPHs with LMM appointments to the respective incentive program that meet certain quoting standards in the applicable series in a month. The Exchange notes that meeting or exceeding the quoting standards (as proposed; described in further detail below) in each of the LMM Incentive Program products to receive the applicable rebate (as proposed; described in further detail below) is optional for an LMM appointed to a program. Rather, an LMM appointed to an incentive program is eligible to receive the corresponding rebate if it satisfies the applicable quoting standards, which the Exchange believes encourages the LMM to provide liquidity in the applicable class and trading session. The Exchange may consider other exceptions to the programs' quoting standards based on demonstrated legal or regulatory requirements or other mitigating circumstances. In calculating whether an LMM appointed to an incentive program meets the applicable program's quoting standards each month, the Exchange excludes from the calculation in that month the business day in which the LMM missed meeting or exceeding the quoting standards in the highest number of the applicable series. The heightened quoting requirements offered by each of the LMM Incentive Programs are designed to incentivize LMMs appointed to the LMM Incentive Programs to provide significant liquidity in MXACW, MXUSA, and MXWLD options during the trading day upon their listing and trading on the Exchange, which, in turn, would provide greater trading opportunities, added market transparency and enhanced price discovery for all market participants in MXACW, MXUSA, and MXWLD options.

The Exchange first proposes to adopt a MXACW LMM Incentive Program. As proposed, the MXACW LMM Incentive Program provides that if the LMM appointed to the MXACW LMM Incentive Program provides continuous electronic quotes during Regular Trading Hours that meet or exceed the proposed heightened quoting standards (below) in at least 90% of the series 90% of the time in a given month, the LMM will receive a payment for that month in the amount of $10,000 (or pro-rated amount if an appointment begins after the first trading day of the month or ends prior to the last trading day of the month).

Premium level	Expiring		Near term		Mid term		Long term	
	6 days or less		7 days to 60 days		61 days to 270 days		271 days or greater	
	Width	Size	Width	Size	Width	Size	Width	Size
$0.00–$1.00	$0.35	10	$0.25	20	$0.40	10	$0.50	5
$1.01–$2.00	0.40	10	0.35	15	0.60	7	1.00	5
$2.01–$4.00	0.90	7	0.40	15	1.00	5	2.00	5
$4.01–$8.00	1.00	5	0.80	10	2.00	4	3.00	4
$8.01–$16.00	2.50	3	1.30	5	3.50	3	5.00	3
$16.01–$32.00	5.00	2	2.00	2	4.00	2	6.00	2
Greater than $32.00	10.00	2	8.00	2	10.00	2	12.00	2

The proposed rule change also adopts a performance payment under the MXACW LMM Incentive Program, which provides that, in addition to the above rebate, the LMM with the highest performance in satisfying the above heightened quoting standards in a month will receive a performance payment of $20,000 for that month. In order to be eligible to receive the performance payment in a month, an LMM must meet or exceed the above heightened quoting standards in that month. Highest performance is measured as the cumulative sum of series in which an LMM meets or exceeds the heightened quoting requirements by the total series each day (excluding the day in which an LMM missed meeting or exceeding the heightened quoting standard in the highest number of series).

The Exchange next proposes to adopt a MXUSA LMM Incentive Program. As proposed, the MXUSA LMM Incentive Program provides that if the LMM appointed to the MXUSA LMM Incentive Program provides continuous electronic quotes during Regular Trading Hours that meet or exceed the proposed heightened quoting standards (below) in at least 85% of the series 80% of the time in a given month, the

[16] As part of the proposed rule change, the Exchange proposes a clarifying change to add MRUT and NANOS to the list of excluded options in Footnote 29; such options are listed in the ORS table, but were inadvertently not added to Footnote 29.

[17] *See* Exchange Rule 3.55(a). In advance of the LMM Incentive Program effective date, the Exchange will send a notice to solicit applications from interested TPHs for the LMM role and will, from among those applications, select the program LMMs. Factors to be considered by the Exchange in selecting LMMs include adequacy of capital, experience in trading options, presence in the trading crowd, adherence to Exchange rules and ability to meet the obligations specified in Rule 5.55.

LMM will receive a payment for that month in the amount of $10,000 (or pro-rated amount if an appointment begins after the first trading day of the month or ends prior to the last trading day of the month).

Premium level	Expiring		Near term		Mid term		Long term	
	6 days or less		7 days to 60 days		61 days to 270 days		271 days or greater	
	Width	Size	Width	Size	Width	Size	Width	Size
$0.00–$3.00	$0.50	10	$0.60	10	$0.80	10	$1.00	10
$3.01–$5.00	1.00	10	0.80	10	1.20	5	1.50	5
$5.01–$10.00	1.50	5	1.20	10	2.50	5	2.00	5
$10.01–$20.00	5.00	5	3.50	5	6.00	5	6.00	5
Greater than $20.00	10.00	5	10.00	5	12.00	5	12.00	5

The proposed rule change also adopts a performance payment under the MXUSA LMM Incentive Program, which provides that, in addition to the above rebate, the LMM with the highest performance in satisfying the above heightened quoting standards in a month will receive a performance payment of $15,000 for that month. In order to be eligible to receive the performance payment in a month, an LMM must meet or exceed the above heightened quoting standards in that month. Highest performance is measured as the cumulative sum of series in which an LMM meets or exceeds the heightened quoting requirements by the total series each day (excluding the day in which an LMM missed meeting or exceeding the heightened quoting standard in the highest number of series).

Finally, the Exchange proposes to adopt a MXWLD LMM Incentive Program. As proposed, the MXWLD LMM Incentive Program provides that if the LMM appointed to the MXWLD LMM Incentive Program provides continuous electronic quotes during Regular Trading Hours that meet or exceed the proposed heightened quoting standards (below) in at least 90% of the series 90% of the time in a given month, the LMM will receive a payment for that month in the amount of $15,000 (or pro-rated amount if an appointment begins after the first trading day of the month or ends prior to the last trading day of the month).

Premium level	Expiring		Near term		Mid term		Long term	
	6 days or less		7 days to 60 days		61 days to 270 days		271 days or greater	
	Width	Size	Width	Size	Width	Size	Width	Size
$0.00–$3.00	$0.30	25	$0.25	25	$0.60	15	$0.80	10
$3.01–$5.00	0.60	20	0.50	20	1.00	15	1.20	10
$5.01–$10.00	0.75	10	0.65	10	1.25	10	1.50	10
$10.01–$20.00	2.00	5	1.50	5	3.00	5	4.00	5
Greater than $20.00	5.00	5	3.00	5	5.00	5	7.00	5

The proposed rule change also adopts a performance payment under the MXWLD LMM Incentive Program, which provides that, in addition to the above rebate, the LMM with the highest performance in satisfying the above heightened quoting standards in a month will receive a performance payment of $25,000 for that month. In order to be eligible to receive the performance payment in a month, an LMM must meet or exceed the above heightened quoting standards in that month. Highest performance is measured as the cumulative sum of series in which an LMM meets or exceeds the heightened quoting requirements by the total series each day (excluding the day in which an LMM missed meeting or exceeding the heightened quoting standard in the highest number of series).

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of section 6(b) of the Act.[18] Specifically, the Exchange believes the proposed rule change is consistent with the section 6(b)(5) [19] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the section 6(b)(5) [20] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange also believes the proposed rule change is consistent with section 6(b)(4) of the Act,[21] which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its TPHs and other persons using its facilities.

Standard Transaction Rates and Surcharges

The Exchange believes that the proposed amendments to the Fees Schedule in connection with standard transaction rates and surcharges for MXACW, MXUSA, and MXWLD transactions are reasonable, equitable and not unfairly discriminatory. Specifically, the Exchange believes that it is reasonable to assess fees for Customer, Market-Maker, Firm and non-Market-Maker, non-Customer, non-Firm orders in MXACW, MXUSA, and MXWLD options that are based on, but slightly less than, those fees for transactions in MXEA and MXEF options (all of which overly MSCI benchmark market-capitalization

[18] 15 U.S.C. 78f(b).

[19] 15 U.S.C. 78f(b)(5).

[20] *Id.*

[21] 15 U.S.C. 78f(b)(4).

weighted indexes) because the underlying indexes of MXACW, MXUSA, and MXWLD options have a lower spot value than the underlying indexes of MXEA and MXEF options (and therefore, more contracts would need to be traded to achieve an equivalent notional size position).

Additionally, the Exchange believes it is reasonable to charge different fee amounts to different user types in the manner proposed because the proposed fees are consistent with the price differentiation that exists today for other index products. The Exchange also believes that the proposed fee amounts for MXACW, MXUSA, and MXWLD options orders are reasonable because the proposed fee amounts are within the range of amounts assessed for the Exchange's other index products, excluding Underlying Symbol List A.[22]

Moreover, the Exchange believes it is reasonable to apply the MXEA and MXEF Index License Surcharge Fee to all non-public customer (*i.e.* Cboe Options and non-Trading Permit Holder market-maker, Clearing Trading Permit Holder, JBO participant, and broker-dealer), including professional, transactions in MXWLD and MXACW options because the proposed surcharge helps recoup some of the costs associated with the license for MXWLD and MXACW options. Additionally, the Exchange notes that the surcharge amount will provide consistency between the fees assessed for orders in MXEA and MXEF options, which, like MXWLD and MXACW, all of which overly MSCI benchmark market-capitalization weighted indexes and are designed to offer investors lower cost options to obtain the potential benefits of options on a broad-based index option and intended for a similar investor-base. Given current trading practices, the Exchange believes that MXUSA options may have a smaller initial trading volume (as compared to MXWLD and MXACW options), and as such, wishes to incentivize trading in MXUSA. Therefore, the Exchange believes it is reasonable to not assess an Index License Surcharge fee for MXUSA options, as a way to encourage market participants to trade the newly listed product. The Exchange believes it is reasonable to apply the FLEX Surcharge Fee to MXWLD, MXACW, and MXUSA options, as the FLEX Surcharge Fee assists the Exchange in recouping the cost of developing and maintaining the FLEX system.

The Exchange believes the proposed standard transaction rates and exclusion from certain surcharges are equitable and not unfairly discriminatory because they will apply automatically and uniformly to all capacities as applicable (*i.e.,* Customer, Market-Maker, Firm and non-Market-Maker, non-Customer, non-Firm), in MXWLD, MXACW, and MXUSA options. The Exchange also believes that it is equitable and not unfairly discriminatory to assess lower fees to Customers as compared to other market participants because Customer order flow enhances liquidity on the Exchange for the benefit of all market participants. Specifically, customer liquidity benefits all market participants by providing more trading opportunities, which attracts Market-Makers. An increase in the activity of these market participants in turn facilitates tighter spreads, which may cause an additional corresponding increase in order flow from other market participants. The fees offered to customers are intended to attract more customer trading volume to the Exchange. Moreover, the options industry has a long history of providing preferential pricing to Customers, and the Exchange's current Fees Schedule currently does so in many places, as do the fees structures of many other exchanges. Finally, all fee amounts listed as applying to Customers will be applied equally to all Customers (meaning that all Customers will be assessed the same amount).

The Exchange believes that it is equitable and not unfairly discriminatory to assess lower fees to Market-Makers as compared to other market participants other than Customers because Market-Makers, unlike other market participants, take on a number of obligations, including quoting obligations, that other market participants do not have. Further, these lower fees offered to Market-Makers are intended to incent Market-Makers to quote and trade more on the Exchange, thereby providing more trading opportunities for all market participants. Additionally, the proposed fee for Market-Makers will be applied equally to all Market-Makers (meaning that all Market-Makers will be assessed the same amount). The Exchange also notes that all fee amounts described herein are intended to attract greater order flow to the Exchange in MXWLD, MXACW, and MXUSA options, which should therefore serve to benefit all Exchange market participants. Similarly, it is equitable and not unfairly discriminatory to assess lower fees to Firm orders than those of other market participants (except Customers and Market-Makers) because Firms also have a number of obligations (such as membership with the OCC), significant regulatory burdens, and financial obligations, that other market participants do not need to take on. Finally, the proposed surcharges will be assessed uniformly to all market participants to whom the FLEX Surcharge and Index License Surcharge Fee apply.

Fees Programs

The Exchange believes that the proposed updates to the Fees Schedule in connection with the application of certain fees programs to transactions in MXWLD, MXACW, and MXUSA options are reasonable, equitable and not unfairly discriminatory. The Exchange believes it is reasonable to exclude MXWLD, MXACW, and MXUSA options from the Liquidity Provider Sliding Scale, the VIP, Break-Up Credits applicable to Customer Agency Orders in AIM and SAM, the Marketing Fee, the Floor Broker Sliding Scale Rebate Program, and the ORS/CORS program because other proprietary index products are also excepted from these programs.[23] Moreover, the Exchange notes that the proposed rule change does not alter any of the existing programs, but instead, merely proposes not to include transactions in MXWLD, MXACW, and MXUSA options in those programs. Similarly, the Exchange believes it is reasonable to include transactions in MXWLD, MXACW, and MXUSA options in the SCORe program because other proprietary index products, including MXEA and MXEF options, are also included in this program.[24]

The Exchange believes that excluding MXWLD, MXACW, and MXUSA options transactions from certain fees programs is equitable and not unfairly discriminatory because the programs will equally not apply to, or exclude in the same manner, all market participants' orders in MXWLD, MXACW, and MXUSA options. Similarly, the Exchange believes that including MXWLD, MXACW, and MXUSA options transactions in the SCORe program is equitable and not unfairly discriminatory because the program will equally apply to, or include in the same manner, all market participants' orders in MXWLD, MXACW, and MXUSA options. The

[22] *See* Exchange Fees Schedule, Rate Table—All Products Excluding Underlying Symbol List A.

[23] *See* Exchange Fees Schedule, Liquidity Provider Sliding Scale, Volume Incentive Program, Break-Up Credits, Marketing Fee, Floor Broker Sliding Scale Rebate Program, Order Router Subsidy Program and Complex Order Router Subsidy Program.

[24] *See* Exchange Fees Schedule, Select Customer Options Reduction (''SCORe'') Program.

Exchange notes that the proposed rule change does not alter any of the existing program rates or volume calculations, but instead, merely proposes include (or not to) include transactions in MXWLD, MXACW, and MXUSA options in those programs and volume calculations in the same way that transactions in MXEA and MXEF options are (or are not) currently included.

LMM Incentive Programs

The Exchange believes the proposed LMM Incentive Programs are reasonable, equitable and not unfairly discriminatory. Particularly, the proposed MXWLD, MXACW, and MXUSA LMM Incentive Programs are reasonable financial incentive programs because the proposed heightened quoting standards and rebate amount for meeting the heightened quoting standards in each MXWLD, MXACW, and MXUSA series, as applicable, are reasonably designed to incentivize LMMs appointed to the Programs to meet the proposed heightened quoting standards during RTH for MXWLD, MXACW, and MXUSA, as applicable, thereby providing liquid and active markets, which facilitates tighter spreads, increased trading opportunities, and overall enhanced market quality to the benefit of all market participants, particularly in newly listed and traded products on the Exchange during the trading day.

The Exchange believes that the proposed heightened quoting standards are reasonable because they are similar to the detail and format (corresponding premiums, quote widths, and sizes) of the quoting standards currently in place for LMM Incentive Programs for other proprietary Exchange products.[25] The Exchange also believes that proposed heightened quoting requirements are reasonably tailored to reflect market characteristics of MXWLD, MXACW, and MXUSA. The Exchange believes the generally smaller premium levels and widths appropriately reflect the lower-priced MXWLD, MXACW, and MXUSA product. The Exchange believes the proposed finer premiums, smaller quote widths and smaller sizes (comparatively) in the proposed heightened quoting standards for the MXWLD, MXACW, and MXUSA LMM Incentive Programs reasonably reflect what the Exchanges believes will be typical market characteristics in MXWLD, MXACW, and MXUSA options, given their smaller spot value, their smaller notional value and general anticipated retail base, thus smaller, retail-sized orders. quoting requirements in the future to accommodate expiry categories.

The Exchange further believes that the proposed rebate amounts received for MXACW ($10,000), MXUSA ($10,000), and MXWLD ($15,000) options is reasonable because they are comparable to the rebates offered by other LMM Incentive Programs offered by the Exchange. For example, the LMM Program for MXEA and MXEF options (the ''MSCI LMM Program'') currently offers $15,000 per class, per month to appointed LMMs for MXEA and MXEF options if the heightened quoting standards are met in a given month. The Exchange believes that the proposed rebate amounts are reasonably designed to continue to incentivize an LMM appointed to the respective program to meet the applicable quoting standards for MXACW, MXUSA, and MXWLD options, thereby providing liquid and active markets, which facilitates tighter spreads, increased trading opportunities, and overall enhanced market quality to the benefit of all market participants.

Similarly, the Exchange believes that the proposed performance payments for MXACW ($20,000), MXUSA ($15,000), and MXWLD ($25,000) options provided to the LMM with the highest performance in satisfying the relevant heightened quoting standards for each of the proposed LMM Programs is reasonable and equitable as the LMM Incentive Program for MXEA and MXEF options offers a similar performance payment. All appointed LMMs are eligible for the performance payment, which is designed to incentivize LMMs in these newly listed products to provide liquid and active markets in these products to encourage their growth.

Finally, the Exchange believes it is equitable and not unfairly discriminatory to offer the financial incentive to LMMs appointed to the LMM Incentive Programs, because it will benefit all market participants trading in MXWLD, MXACW, and MXUSA during RTH by encouraging the appointed LMMs to satisfy the heightened quoting standards, which incentivizes continuous increased liquidity and thereby may provide more trading opportunities and tighter spreads. Indeed, the Exchange notes that these LMMs serve a crucial role in providing quotes and the opportunity for market participants to trade MXWLD, MXACW, and MXUSA, which can lead to increased volume, providing for robust markets. The Exchange ultimately proposes to offer the MXWLD, MXACW, and MXUSA LMM Incentive Programs to sufficiently incentivize the appointed LMMs to provide key liquidity and active markets in the newly listed and traded NANOS options during the trading day to encourage liquidity, thereby protecting investors and the public interest. The Exchange also notes that an LMM appointed to the Programs may undertake added costs each month to satisfy that heightened quoting standards (*e.g.,* having to purchase additional logical connectivity). The Exchange believes the proposed programs are equitable and not unfairly discriminatory because similar programs currently exist for LMMs appointed to programs in other proprietary products,[26] and the proposed programs will equally apply to any TPH that is appointed as an LMM to the each of the LMM Incentive Programs, as applicable. Additionally, if an appointed LMM does not satisfy the heightened quoting standards in MXWLD, MXACW, and MXUSA (as applicable) for any given month, then it simply will not receive the offered payment for that month.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because the proposed MXWLD, MXACW, and MXUSA transaction fees for the separate types of market participants will be assessed automatically and uniformly to all such market participants, *i.e.,* all qualifying Customer orders in MXWLD, MXACW, and MXUSA will be assessed the same amount, all Market-Maker orders in MXWLD, MXACW, and MXUSA will be assessed the same amount, all Firm orders in MXWLD, MXACW, and MXUSA will be assessed the same amount, and all non-Customer, non-Market-Maker, non-Firm orders in MXWLD, MXACW, and MXUSA will be assessed the same amount. As discussed above, while different fees are assessed to different market participants in some

[25] *See* Exchange Fees Schedule, ''MRUT LMM Incentive Program'', ''MSCI LMM Incentive Program'', ''NANOS LMM Incentive Program'', ''GTH VIX/VIXW LMM Incentive Program'', ''GTH1 SPX/SPXW LMM Incentive Program'', ''GTH2 SPX/SPXW LMM Incentive Program'', ''RTH XSP LMM Incentive Program'', ''GTH1 XSP LMM Incentive Program'', ''GTH2 XSP LMM Incentive Program'', and ''RTH SPESG LMM Incentive Program''.

[26] *Id.*

circumstances, these different market participants have different obligations and different circumstances as discussed above. For example, Market-Makers have quoting obligations that other market participants do not have. Additionally, the proposed surcharges will be assessed uniformly to all market participants to whom the FLEX Surcharge and Index License Surcharge Fee apply.

Further, the proposed rule change will uniformly exclude all transactions in MXWLD, MXACW, and MXUSA from certain programs (*i.e.,* the VIP and ORS/CORS Programs), as it currently does for MXEA and MXEF options, and as it does for many of the Exchange's other proprietary products. In addition to this, the proposed rule change to include MXWLD, MXACW, and MXUSA in the SCORe program will apply equally to all applicable transactions in MXWLD, MXACW, and MXUSA. Overall, the proposed rule change is designed to increase incentive for customer order flow providers to submit customer order flow in a newly listed and traded product, which, as indicated above, contributes to a more robust market ecosystem to the benefit of all market participants.

The Exchange also does not believe that the proposed LMM Incentive Programs for MXWLD, MXACW, and MXUSA options would impose any burden on intramarket competition because it applies to all LMMs appointed to each of the LMM Incentive Programs in a uniform manner, in the same way similar programs apply to appointed LMMs in other proprietary products today. To the extent appointed LMMs receive a benefit that other market participants do not, these LMMs in their role as Market-Makers on the Exchange have different obligations and are held to different standards. For example, Market-Makers play a crucial role in providing active and liquid markets in their appointed products, especially in the newly developing MXWLD, MXACW, and MXUSA market, thereby providing a robust market which benefits all market participants. Such Market-Makers also have obligations and regulatory requirements that other participants do not have. The Exchange also notes that an LMM appointed to an incentive program may undertake added costs each month to satisfy that heightened quoting standards (*e.g.,* having to purchase additional logical connectivity). The Exchange also notes that the LMM Incentive Programs, like the other LMM Incentive Programs, is designed to attract additional order flow to the Exchange, wherein greater liquidity benefits all market participants by providing more trading opportunities, tighter spreads, and added market transparency and price discovery, and signals to other market participants to direct their order flow to those markets, thereby contributing to robust levels of liquidity.

The Exchange does not believe that the proposed rule change will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because the proposed rule changes apply only to products exclusively listed on the Exchange. Additionally, the Exchange notes it operates in a highly competitive market. In addition to Cboe Options, TPHs have numerous alternative venues that they may participate on and director their order flow, including 16 other options exchanges, as well as off-exchange venues, where competitive products are available for trading. Based on publicly available information, no single options exchange has more than 13% of the market share of executed volume of options trades.[27] Therefore, no exchange possesses significant pricing power in the execution of option order flow. Moreover, the Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [28] The fact that this market is competitive has also long been recognized by the courts. In *NetCoalition* v. *Securities and Exchange Commission,* the D.C. Circuit stated as follows: ''[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'. . . .''.[29] Accordingly, the Exchange does not believe its proposed changes to the incentive programs impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3)(A) of the Act [30] and paragraph (f) of Rule 19b–4 [31] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include file number SR–CBOE–2024–014 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–CBOE–2024–014. This file number should be included on the subject line if email is used. To help the Commission process and review your

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99841; File No. SR–Phlx–2024–15]

Self-Regulatory Organizations; Nasdaq PHLX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Exchange's Fees for Top of PHLX Options (TOPO), PHLX Orders, and TOPO Plus Orders

March 22, 2024.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on March 20, 2024, Nasdaq PHLX LLC (''Phlx'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Exchange's proprietary data fees for Top of PHLX Options (''TOPO''), PHLX Orders, and TOPO Plus Orders at Options 7, Section 10, as described further below.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/phlx/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend the Exchange's proprietary data fees for Top of PHLX Options (''TOPO''),[3] PHLX Orders,[4] and TOPO Plus Orders at Options 7, Section 10.[5]

Top of PHLX Options (''TOPO'')

TOPO is a direct data feed that provides subscribers with PHLX Best Bid and Offer (''BBO'') [6] and last sale information.[7] The data distributed on TOPO is identical to the data simultaneously sent to the Options Price Reporting Authority (''OPRA'').[8] The TOPO feed also provides administrative information to facilitate trading on the Exchange such as, for example, the list of symbols trading on a particular day.[9] TOPO reduces the transmission and processing latencies for top of book information relative to the OPRA feed by avoiding the latencies generated by the latter in consolidating data.

Monthly fees for TOPO are currently $2,000 for Internal Distributors,[10] $2,500 for External Distributors,[11] $1 for a Non-Professional Subscriber,[12] and

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Options 3, Section 23(a)(1) (''Top of PHLX Options ('TOPO') is a direct data feed product that includes the Exchange's best bid and offer price, with aggregate size, based on displayable order and quoting interest on Phlx and last sale information for trades executed on Phlx. The data contained in the TOPO data feed is identical to the data simultaneously sent to the processor for the OPRA and subscribers of the data feed. The data provided for each options series includes the symbols (series and underlying security), put or call indicator, expiration date, the strike price of the series, and whether the option series is available for trading on Phlx and identifies if the series is available for closing transactions only.'').

[4] *See* Options 3, Section 23(a)(1) (''PHLX Orders is a real-time full Limit Order book data feed that provides pricing information for orders on the PHLX Order book for displayed order types as well as market participant capacity. PHLX Orders is currently provided as part of the TOPO Plus Orders data product. PHLX Orders provides real-time information to enable users to keep track of the single and complex order book(s). The data provided for each options series includes the symbols (series and underlying security), put or call indicator, expiration date, the strike price of the series, leg information on complex strategies and whether the option series is available for trading on Phlx and identifies if the series is available for closing transactions only. The feed also provides auction and exposure notifications and order imbalances on opening/reopening (size of matched contracts and size of the imbalance)'').

[5] The proposed changes were initially filed on November 16, 2023, as SR–Phlx–2023–51. On December 5, 2023, SR–Phlx–2023–51 was withdrawn and replaced with SR–Phlx–2023–57. On January 29, 2024, SR–Phlx–2023–57 was withdrawn and replaced with SR–Phlx 2024–03. On March 20, 2024, SR–Phlx–2024–03 was withdrawn and replaced with the instant filing to provide additional detail regarding the proposal.

[6] The Best Bid and Offer includes aggregate size information based on displayable order and quoting interest on the Exchange.

$40 for a Professional Subscriber.[13] None of these fees have changed for over a decade since January 2013.[14]

PHLX Orders

PHLX Orders is a real-time order book feed with pricing information for displayed orders on the PHLX order book.[15] The data provided for each options series includes the symbols (series and underlying security), a put or call indicator, expiration date, and the strike price of the series. It also provides the real-time status of simple and complex orders [16] on the order book, including new orders and changes to orders resting on the PHLX book for all PHLX-listed options.[17] The PHLX Orders feed includes data on the opening imbalance, Price Improvement XL (PIXL),[18] and Complex Order Live Auction (COLA).[19] A notification message is sent for symbols entering an auction.[20] PHLX Orders also furnishes an historical record of all simple and complex order message data from the PHLX Orders data feed. PHLX Orders information is not sent to OPRA.[21]

PHLX Orders is an alternative to PHLX Depth of Market. It is an optimized technical channel designed to lower technology costs, reduce processing time, and facilitate the ingestion of data while still providing customers insight beyond the top of book by viewing active buy and sell orders. PHLX Orders excludes quotations by market makers and other authorized entities that is included in PHLX Depth of Market.[22]

What is the utility of an orders-only data feed? It provides customers with the opportunity to reduce bandwidth (and therefore data processing costs) by several orders of magnitude relative to the full depth of book feed, while retaining a view of market participant orders (setting aside symbols where participants have not placed orders).

The December 2023 bandwidth report shows that the PHLX Depth of Market feed transmitted a maximum of 14.3 billion messages per day during the month of December,[23] while the PHLX Orders feed transmitted a maximum of 53.6 million messages over the same period (41.5 million messages for simple orders, and 12.1 million messages for complex orders). The Exchange's full depth of book feed requires the customer to process over 200 times more messages than the orders feed over the course of a day; replacing a depth of book feed with an orders feed allows a customer to reduce the maximum number of daily messages it receives by 99.6%.

To cite another example, the 1 millisecond bandwidth peak for PHLX Depth of Market was 13.96 million messages; the comparable number of messages for orders was 1.45 million (891 thousand for simple and 561 thousand for complex orders). Replacing depth of book with orders can therefore reduce the number of messages processed at peak at the 1 millisecond bandwidth by nearly 90%.

Approximately 56% of customers who take any data feed at all from the PHLX exchange take an orders feed (either Orders only or TOPO Plus Orders) without depth of book. Another 38% of customers take both orders and depth feeds. The remaining 6% take either top of book or depth of book alone.

What type of customer takes an orders feed in lieu of depth? In general, firms that only need information on actively trading options do so. There are a great number of use cases that fit this broad description, but, for purposes of illustration, the Exchange is aware of at least two such types of customers.

The first is the market participant that does not engage in order routing. These are broker dealers that use third parties to route orders, either because the originating broker-dealer is not a member of the exchange or to save costs. Without the need for additional information to inform routing decisions, such customers often focus on active trading alone, and therefore purchase the orders feed.

A second category of customers are those that use options data to analyze trends in other markets. One example of this type of customer is the equity trader that analyzes equity-based options to gauge market sentiment in the underlying equity. For such customers, there is relatively little utility in the full depth feed, given that market sentiment is best gauged using options that are being actively traded, rather than those that are dormant.

As noted above, there are some customers that purchase both orders and depth. Vendors are one example of this type of customer. They purchase market data solely for resale, not for trading on behalf of themselves or others. Another example is the firm that uses orders for analysis and depth for order routing. As noted above, the orders feed can be useful for assessing sentiment in equity markets, while depth is often used in order routing decisions. Firms that engage in both functions can lower overall processing requirements by using orders for analytics and depth for routing.

qualified in any capacity with the Commission, the Commodities Futures Trading Commission, any state securities agency, any securities exchange or association, or any commodities or futures contract market or association; (ii) engaged as an 'investment adviser' as that term is defined in Section 201(11) of the Investment Advisors Act of 1940 (whether or not registered or qualified under that Act); nor (iii) employed by a bank or other organization exempt from registration under federal or state securities laws to perform functions that would require registration or qualification if such functions were performed for an organization not so exempt. A Non-Professional Subscriber may only use the data provided for personal purposes and not for any commercial purpose.'').

Purchase of PHLX Orders is optional. Customers can obtain all of the data contained in PHLX Orders from PHLX Depth of Market feed, and may purchase the latter if they do not realize the cost savings offered by PHLX Orders.

PHLX Orders is a derivative product designed as a lower-cost alternative to a depth of book feed. It is not a complement to any other product offered by the Exchange or any of its competitors. Customers are free to purchase PHLX Orders or not, and can reject the feed for any reason, including the fee charged.

Current monthly fees for PHLX Orders are $3,000 for Internal Distributors, $3,500 for External Distributors, $1 for a Non-Professional Subscriber, and $40 for a Professional Subscriber. None of these fees have changes for over a decade since January 2013.[24]

TOPO Plus Orders

TOPO Plus is a direct market data product that offers subscribers both TOPO and PHLX Orders for a consolidated fee that is less than the combined fee of the two products.[25]

Monthly fees for TOPO Plus Orders are currently $4,500 for Internal Distributors, $5,000 for External Distributors, $1 for a Non-Professional Subscriber, and $40 for a Professional Subscriber.

Internal Distributor fees for TOPO Plus Orders were modified in January 2018, over five years ago,[26] but the other TOPO Plus Orders fees have not changed since January 2013.[27]

Usage of TOPO, PHLX Orders, and TOPO Plus Orders

Different types of market participants purchase TOPO, PHLX Orders and TOPO Plus Orders, including market makers, vendors, banks, proprietary traders, agency brokers (brokers that route trades on behalf of other market participants), hedge funds, index providers and other firms.

In characterizing market participants, we must be clear that firms use data feeds for multiple tasks. A market maker, for example, may use market data for order routing, or for risk analysis used in quoting in their assigned option series. Banks may use market data for prime brokerage services, proprietary trading, or risk management. Market data vendors do not directly use the data at all, but rather disseminate data to market participants that use the data for a multiplicity of purposes. Other firms purchase options data to assess the value of equity securities.[28]

Characterizing firms based on what we understand to be their primary market activity, and understanding that firms play multiple roles, we estimate that approximately half of the customers that take top of book data in any form, in combination with other products or alone, are market makers, and the remaining half are market data vendors, banks, proprietary traders, agency brokers, hedge funds, index providers, and others. Roughly the same distribution applies to customers that purchase PHLX Orders, whether alone or in combination with other products. Although the distributions are roughly similar, different customers are purchasing different products in different combinations.

As explained above, firms generally purchase PHLX Orders rather than depth of book data to lower technology costs and reduce processing time, while still providing customers insight into open executable orders that could impact the BBO.

A more specific explanation of how TOPO, PHLX Orders and TOPO Plus Orders is used will vary based on use case, with many firms employing multiple use cases. Market makers, banks, hedge funds, and proprietary traders often use top of book and orders feeds for trading, order routing and analysis. Banks may use market data for prime brokerage services, proprietary trading, or risk management. The clients of market data vendors will utilize the data for many different purposes. We do not have sufficient visibility into our customers' businesses and proprietary processes to be able to determine precise data usage by customer category.

Proposed Changes

For TOPO, the Exchange proposes to increase the monthly charge for Internal Distributors from $2,000 to $2,500, and the monthly charge for External Distributors from $2,500 to $3,000. No changes are proposed for Non-Professional and Professional Subscriber fees.

For PHLX Orders, the Exchange proposes to increase the monthly charge for Internal Distributors from $3,000 to $3,500, and the monthly charge for External Distributors from $3,500 to $4,000. No changes are proposed for Non-Professional and Professional Subscriber fees.

For TOPO Plus Orders, the Exchange proposes to increase the monthly charge for Internal Distributors from $4,500 to $5,500, and the monthly charge for External Distributors from $5,000 to $6,000. No changes are proposed for Non-Professional and Professional Subscriber fees.

The proposed changes are designed to update data fees to reflect their current value, rather than their value when these fees were set 5 or 10 years ago.

2. Statutory Basis

The Exchange believes that its proposal is consistent with section 6(b) of the Act,[29] in general, and furthers the objectives of sections 6(b)(4) and 6(b)(5) of the Act,[30] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

This belief is based on several factors.

First, exchange fees are constrained because market participants can choose among seventeen different venues for options trading, and therefore no single venue can charge excessive fees without losing customers and market share.

Second, fees for TOPO are constrained because the identical top of book data is sent to OPRA, and certain market participants may choose to rely exclusively on OPRA rather than purchasing the proprietary data product.

Third, the purchase of PHLX Orders is optional. It is designed as a lower-cost alternative to depth of book, and, as such, is not a complement to any other product offered by the Exchange or any of its competitors. Customers may purchase PHLX Orders or not, and can reject the feed for any reason, including the fee charged.

Fourth, the proposed fees are comparable to, and in some cases less than, those of similarly situated exchanges.

Fifth, the current fees do not properly reflect the value of the underlying product, as fees for the products in question have been static in nominal terms, and therefore falling in real terms (due to inflation), while the amount of

[28] We do not include "High Frequency Trading Firm" as a distinct category because many market participant may engage in low latency trading strategies to some degree, but the Exchange does not have sufficient information to be able to characterize any particular firm as a high frequency trader.

[29] 15 U.S.C. 78f(b).

[30] 15 U.S.C. 78f(b)(4) and (5).

information transmitted in those fees have more than doubled in just the past five years, reflecting a substantial increase in customer value due to the significantly higher levels of liquidity currently available on the Exchange.

Sixth, higher fees for the external distribution of TOPO, PHLX Orders, and TOPO Plus Orders are based on the additional value vendors receive from distributing data to their own customers and typically charging for the service.

Customers Have a Choice in Trading Venue

Customers face many choices in where to trade options. Until recently, sixteen exchanges have offered options trading services,[31] and they are now being joined by a 17th member.[32] Not a single options exchange trades more than 11 percent of the options market by volume.[33] PHLX, the second largest options exchange by volume, only has 9 percent of the options market.[34] Only one of the 17 options exchanges have a market share over 10 percent.[35] This broad dispersion of market share demonstrates that market participants can and do exercise choice in options trading venues. As the number of exchanges continues to grow, competition will become fiercer and customer choice will continue to expand.

Most option contracts on the TOPO, TOPO Plus, and Orders data feeds are traded on multiple exchanges. A sample of trading on March 7, 2024, from The Options Clearing Corporation shows that 5,836 symbols were traded on PHLX's options exchange, of which only 53 symbols were listed on the PHLX options exchange only, and another 33 symbols were listed on multiple Nasdaq-affiliated options exchanges.

In order to remain competitive with other options exchanges, PHLX, like some options exchanges, offers several proprietary options products that are only traded on Nasdaq-affiliated exchanges. These include products based on the Nasdaq 100® Index,[36] such as NDX (Nasdaq 100 Index on PHLX, Nasdaq GEMX, LLC (''GEMX'') and Nasdaq ISE, LLC (''ISE'')), XND (Nasdaq 100 Micro Index on PHLX and ISE), and NQX (Nasdaq 100 Micro Index on ISE), as well as volatility products such as VOLQ (Nasdaq-100® Volatility Index), foreign currency options, and other products.

Some Nasdaq option proprietary products are subject to direct, substitution-based competition from other options exchanges. All are subject to the competition among exchanges for membership and market share. Examples of substitution-based competition include the VOLQ, which can be substituted with the Cboe Volatility Index® (''VIX'').[37] NDX (listed in PHLX, GEMX and ISE), XND (listed on PHLX and ISE) and NQX (listed on ISE) all offer different ways of gaining exposure to the Nasdaq 100® Index, are therefore each serves as a direct substitute for the others.[38] The Nasdaq 100® Index products also have alternatives among other exchanges.[39]

Exchange proprietary products are also subject to competition among exchanges for membership and market share.[40] There are many factors that may cause a market participant to decide to become a member of a particular exchange; among these are product offerings. Introducing new and innovative products to the marketplace designed to meet customer demands may attract market participants to become a member of a particular options venue by allowing market participants greater trading opportunities and new avenues to manage risks. An exchange's proprietary product offering may attract order flow to a particular exchange to trade a particular options product and generally make that exchange a more desirable venue to transaction options, thereby attracting membership to that exchange.

In light of the number of trading venues available to customers, the Exchange must price its products, including TOPO, PHLX Orders, and TOPO Plus Orders (as well as other products), competitively. If not, customers would move to other venues. ''If competitive forces are operative, the self-interest of the exchanges themselves will work powerfully to constrain unreasonable or unfair behavior.'' [41] Accordingly, ''the existence of significant competition provides a substantial basis for finding that the terms of an exchange's fee proposal are equitable, fair, reasonable, and not unreasonably or unfairly discriminatory.'' [42]

The Top of Book Data in TOPO Is Sent to OPRA

The top of book data in TOPO is sent to OPRA; under OPRA rules, proprietary options information is available to customers that have equivalent access to OPRA information, and therefore is supplementary to the OPRA feed.[43] Specifically, Section 5.2(c)(iii) of the OPRA Plan provides that ''[a] Member [of the OPRA Plan] may disseminate its Proprietary Information,'' provided that ''such dissemination is limited to other Members and to persons who also have equivalent access to consolidated Options Information disseminated by OPRA for the same classes or series of options that are included in the Proprietary Information . . . .'' [44] ''Consolidated Options Information'' refers to ''consolidated Last Sale Reports combined with either consolidated

[44] *Id.*

Quotation Information or the BBO furnished by OPRA.'' [45] Access is deemed to be ''equivalent'' ''if both if both kinds of information are equally accessible on the same terminal or work station . . . .'' [46]

Any customer that purchases proprietary options data from the Exchange, including TOPO and TOPO Plus Orders, must also have equivalent access to the OPRA Plan. As noted above, the best bid and offer and last sale information available from TOPO and TOPO Plus Orders fees is identical to the information simultaneously sent to OPRA by the Exchange.[47] OPRA provides NBBO and last sale information on options transactions. TOPO and TOPO Plus Orders provide additional administrative information unique to trading on the Exchange, and also reduce the transmission and processing latencies generated through the process of consolidating data into the OPRA feed.[48] Because top of book and last sale information is available on OPRA as well as TOPO, and customers who purchase TOPO have equivalent access to the OPRA feed, certain customers may choose to rely on the OPRA feed in lieu of purchasing PHLX data, thereby limiting the ability of the Exchange from charging excessive fees for its TOPO and TOPO Plus Orders feeds.

The Purchase of PHLX Orders Is Optional

Purchase of PHLX Orders is optional. As explained above, customers can obtain all of the data contained in PHLX Orders from PHLX Depth of Market feed, and may purchase the latter if they do not realize the cost savings offered by PHLX Orders. PHLX Orders is not a complement to any other product offered by the Exchange or any of its competitors; customers are free to purchase PHLX Orders or not, and can reject the feed for any reason, including the fee charged.

The Proposed Fees Are Comparable to Those of Other Exchanges

The proposed fees are comparable to, and in some cases less than, those of other similarly situated exchange fees. Options market statistics show that PHLX has a market share of approximately 9%. ARCA, with an 11% market share, and CBOE, with a 9% market share, are its closest competitors.[49]

To obtain top of book and depth of book information for internal distribution (including both simple and complex options) from ARCA, a customer would be required to pay an Access Fee of $3,000 per month, a Non-Display fee of at least $5,000 per month for simple options, and a Non-Display fee of $1,000 for Complex Options, for a total of $9,000 per month.[50] To obtain the same information from PHLX under the new proposal, a customer would pay the Internal Distributor fee of $2,500 for TOPO, and an Internal Distributor fee of $4,000 for PHLX Depth Data,[51] for a total of $6,500 per month.

To obtain comparable information for Cboe Options, a customer would be required to pay a combined fee of $9,000 per month.[52] As noted above, a PHLX customer would pay the Internal Distributor fee of $2,500 for TOPO, and an Internal Distributor fee of $4,000 for PHLX Depth Data,[53] for a total of $6,500 per month.

As such, the proposed fees are comparable to fees charged by industry peers, and therefore presumptively reasonable.

Real Exchange Fees Have Fallen While Traffic Has Increased

As explained above, the Internal Distributor fee for TOPO Plus Orders was increased in 2018,[54] while none of the other fees have changed for over a decade, since January 2013.[55] This means that fees for TOPO, PHLX Orders, and TOPO Plus Orders have fallen in real terms due to inflation. Using data generated by the Department of Commerce to estimate inflation in the market for portfolio management and investment services,[56] inflation has increased prices by 63.9% since January 2013, when most of the fees at issue were set, and 15.7% since January 2018, when internal distributor fees for TOPO Plus Orders were last modified. At the same time, the average daily message count of PHLX has more than doubled in just five years, from approximately 3.0 billion messages per day in 2018 to approximately 8.2 billion messages in 2023.[57] PHLX grew in conjunction with options trading overall, which in the aggregate grew at a faster pace than PHLX alone. Between January 2018 and December 2023, options volume on PHLX grew by 31%, while options volume on all exchanges nearly doubled, from 467 million options to 912 million instruments.[58]

Growth in options trading means better value for the consumer. The greater variety of options contracts traded means that customers have more choice. The greater number of buyers and sellers in the market means that there is more liquidity, resulting in tighter spreads and better consumer value on each trade. Greater choice and tighter spreads mean that the consumer obtains more value from options markets overall, which should be reflected in fees for exchange services, including market data. The proposal is therefore reasonable in light of the substantial increase in customer value generate by the higher levels of liquidity

[57] PHLX Data (Average Daily Message Count was 2,979,919,551.32 in 2018, and 8,243,516,029.17 thus far in 2023). The significant increases in data traffic have also required technological upgrades to manage the larger traffic volume and to respond to overall technological change in the industry. *See, e.g.,* Securities Exchange Act Release No. 82495 (January 12, 2018), 83 FR 2839 (January 19, 2018) (SR–Phlx–2018–08) (discussing a number of functional enhancements to both TOPO and PHLX Orders).

[58] Options Clearing Corporation, ''Volume and Open Interest,'' available at *https://www.theocc.com/market-data/market-data-reports/volume-and-open-interest/volume-by-exchange.*

now available on the Exchange, coupled with the fall in real prices due to inflation.

External Distributors Receive Additional Value

External Distributors receive additional value not available to Internal Distributors by disseminating information externally and typically charging for the service. This additional value supports higher fees for external distribution for TOPO, PHLX Orders, and TOPO Plus Orders. Higher fees for external distribution of data are common throughout the industry, and nearly universal among exchanges. The difference in value between internal and external distribution is also reflected in the current fee schedule, which has previously been shown to be consistent with the Exchange Act.

* * * * *

In summary, the proposal represents an equitable allocation of reasonable dues, fees and other charges because: (i) customers have a choice in trading venue, and will exercise that choice and trade at another venue if exchange fees are not set competitively; (ii) the top of book data sent in the TOPO feed are also sent to OPRA, and customers have the option of relying on OPRA data; (iii) the purchase of PHLX Orders is entirely optional as it is a low-cost alternative to the PHLX Depth of Market product; (iv) the proposed fees are comparable to those of other exchanges; (v) exchange fees have fallen in real terms while the amount of liquidity available on the exchange has increased, and (vi) external vendors receive additional value from distributing data to their own customers and typically charging for the service, and therefore charging higher fees for external distribution is fair and reasonable.

No Unfair Discrimination

The Proposal is not unfairly discriminatory. The three market data feeds at issue here—TOPO, PHLX Orders, and TOPO Plus Orders—are used by a variety of market participants for a variety of purposes. Users include regulators, market makers, competing exchanges, media, retail, academics, portfolio managers. Market data feeds will be available to members of all of these groups on a non-discriminatory basis.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

Nothing in the Proposal burdens inter-market competition (the competition among self-regulatory organizations) because approval of the Proposal does not impose any burden on the ability of other options exchanges to compete. PHLX fees are comparable to, and in some cases less than, those of other exchanges, as discussed above.

Nothing in the Proposal burdens intra-market competition (the competition among consumers of exchange data) because PHLX market data is available to any customer under the same fee schedule as any other customer, and any market participant that wishes to purchase PHLX market data can do so on a non-discriminatory basis.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3)(A)(ii) of the Act.[59]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–Phlx–2024–15 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–Phlx–2024–15. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–Phlx–2024–15 and should be submitted on or before April 18, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[60]

Sherry R. Haywood,

Assistant Secretary.

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #20172 and #20173; MAINE Disaster Number ME–20003]

Presidential Declaration of a Major Disaster for the State of Maine

AGENCY: Small Business Administration.

ACTION: Notice.

SUMMARY: This is a Notice of the Presidential declaration of a major disaster for the State of MAINE (FEMA–4764–DR), dated 03/20/2024.

Incident: Severe Storms and Flooding.

Incident Period: 01/09/2024 through 01/13/2024.

DATES: Issued on 03/20/2024.

Physical Loan Application Deadline Date: 05/20/2024.

Economic Injury (EIDL) Loan Application Deadline Date: 12/23/2024.

ADDRESSES: Visit the MySBA Loan Portal at *https://lending.sba.gov* to apply for a disaster assistance loan.

FOR FURTHER INFORMATION CONTACT: Alan Escobar, Office of Disaster Recovery & Resilience, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given that as a result of the President's major disaster declaration on 03/20/2024, applications for disaster loans may be submitted online using the MySBA Loan Portal *https://lending.sba.gov* or other locally announced locations. Please contact the SBA disaster assistance customer service center by email at *disastercustomerservice@sba.gov* or by phone at 1–800–659–2955 for further assistance.

The following areas have been determined to be adversely affected by the disaster:

Primary Counties (Physical Damage and Economic Injury Loans): Cumberland, Hancock, Knox, Lincoln, Sagadahoc, Waldo, Washington, York.

Contiguous Counties (Economic Injury Loans Only):

Maine: Androscoggin, Aroostook, Kennebec, Oxford, Penobscot, Somerset

New Hampshire: Strafford, Rockingham, Carroll

The Interest Rates are:

	Percent
For Physical Damage:	
Homeowners with Credit Available Elsewhere	5.375
Homeowners without Credit Available Elsewhere	2.688
Businesses with Credit Available Elsewhere	8.000
Businesses without Credit Available Elsewhere	4.000
Non-Profit Organizations with Credit Available Elsewhere	3.250
Non-Profit Organizations without Credit Available Elsewhere	3.250
For Economic Injury:	
Business and Small Agricultural Cooperatives without Credit Available Elsewhere	4.000
Non-Profit Organizations without Credit Available Elsewhere	3.250

The number assigned to this disaster for physical damage is 201726 and for economic injury is 201730.

SMALL BUSINESS ADMINISTRATION

SBIC Licensing and Examination Fees Inflation Adjustment

AGENCY: Small Business Administration.

ACTION: Notice of SBIC licensing and examination fee consumer price index increases.

SUMMARY: The U.S. Small Business Administration (SBA) is providing notice of the Licensing Fee schedule and Inflation Adjustment of the Examination Fees charged in the Small Business Investment Company (SBIC) program, required under the SBIC program regulations.

DATES: The adjusted SBIC program Licensing Fees identified in this notice became effective August 17, 2023 and the adjusted Examination Fees are effective as of October 1, 2023.

FOR FURTHER INFORMATION CONTACT: Nathaniel Putnam, Office of Investment and Innovation, at 202–714–1632 or *oii.frontoffice@sba.gov.* If you are deaf, hard of hearing, or have a speech disability, please dial 7–1–1 to access telecommunications relay services.

SUPPLEMENTARY INFORMATION: The SBIC program regulations at 13 CFR 107.300(c)(4), 107.692(b)(2), and 107.692(e) require SBA to annually adjust the Licensing and Examination Fees for SBICs using the Inflation Adjustment defined in 13 CFR 107.50. This document provides notice of that adjustment for Examination Fees payable by SBICs. The current Licensing Fees payable by SBIC Applicants became effective on August 17, 2023 as part of the SBIC Investment Diversification and Growth Final Rule, and will not require further Inflation Adjustment prior to the release of the June 2024 Consumer Price Index for All Urban Consumers, as calculated by the U.S. Bureau of Labor Statistics.

The table below identifies the current Licensing Fees payable by SBIC License Applicants and Examination Fees payable by SBICs:

SBIC fee type	Fund sequence	Fees amounts
Licensing Fees (effective under § 107.300)		(effective August 17, 2023)
Initial Licensing Fee § 107.300(a)	Fund I	$5,000
	Fund II	10,000
	Fund III	15,000
	Fund IV+	20,000
Final Licensing Fee § 107.300(b)	Fund I	10,000
	Fund II	15,000
	Fund III	25,000
	Fund IV+	30,000
Licensing Resubmission Penty Fee § 107.300(c)(3) [1]		10,000
Examination Fees (effective under § 107.692)		(effective October 1, 2023)
Minimum Base Fee (§ 107.692(b)(2))	All Funds	10,700
Maximum Base Fee for non-Leveraged SBICs (§ 107.692(b)(2))	All Funds	35,500
Maximum Base Fee for Leveraged SBICs (§ 107.692(b)(2))	All Funds	52,100
Delay Fee (§ 107.692(e))	All Funds	800

[1] *Resubmission Penalty Fee.* The Resubmission Penalty Fee means a $10,000 penalty fee assessed to an applicant that has previously withdrawn or is otherwise not approved for a license that must be paid *in addition* to the Initial and Final Licensing Fees at the time the applicant resubmits its application.

Authority: 15 U.S.C. 681(e) and 687b(b); 13 CFR 107.300 and 107.692.

Bailey DeVries,

Associate Administrator, U.S. Small Business Administration, Office of Investment and Innovation.

BILLING CODE 8026–09–P

DEPARTMENT OF STATE

[Public Notice: 12362]

Notice of Public Meeting in Preparation for International Maritime Organization 111th Session of the Legal Committee (LEG) Meeting

The Department of State will conduct a public meeting at 1:00 p.m. on Tuesday, April 16, 2024, both in-person at Coast Guard Headquarters in Washington, DC, and via teleconference. The primary purpose of the meeting is to prepare for the 111th session of the International Maritime Organization's (IMO) Legal Committee (LEG 111) to be held at IMO Headquarters in London, United Kingdom from Monday, April 22 to Friday, April 26, 2024.

Members of the public may participate up to the capacity of the teleconference phone line, which can handle 500 participants or up to the seating capacity of the room if attending in person. The meeting location will be the United States Coast Guard Headquarters, Room 2E16–06 and the teleconference line will be provided to those who RSVP. To RSVP, participants should contact the meeting coordinator, Mr. Stephen Hubchen, by email at *Stephen.k.hubchen@uscg.mil*. Mr. Stephen Hubchen will provide access information for in-person and virtual attendance.

The agenda items to be considered at LEG 111 include:

—Adoption of the agenda
—Report of the Secretary-General on credentials
—Facilitation of the entry into force and harmonized interpretation of the 2010 HNS Protocol
—Fair treatment of seafarers:

(a) Provision of financial security in case of abandonment of seafarers, and shipowners' responsibilities in respect of contractual claims for personal injury to, or death of, seafarers, in light of the progress of amendments to the ILO Maritime Labour Convention, 2006

(b) Fair treatment of seafarers in the event of a maritime accident

(c) Fair treatment of seafarers detained on suspicion of committing maritime crimes

(d) Guidelines for port State and flag State authorities on how to deal with seafarer abandonment cases

—Advice and guidance in connection with the implementation of IMO instruments

(a) Impact on shipping and seafarers of the situation in the Black Sea and the Sea of Azov

—Measures to prevent unlawful practices associated with the fraudulent registration and fraudulent registries of ships
—Measures to assess the need to amend liability limits
—Claims Manual for the International Convention on Civil Liability for Bunker Oil Pollution Damage, 2001
—Piracy and armed robbery against ships
—Guidance for the proper implementation and application of IMO liability and compensation conventions
—Measures to address Maritime Autonomous Surface Ships (MASS) in instruments under the purview of LEG
—Work of other IMO bodies
—Technical cooperation activities related to maritime legislation
—Review of the status of conventions and other treaty instruments emanating from the Legal Committee
—Work programme
—Election of officers
—Any other business
—Consideration of the report of the Committee on its 111th session

Please note: The IMO may, on short notice, adjust the LEG 111 agenda to accommodate the constraints associated with the virtual meeting format. Any changes to the agenda will be reported to those who RSVP.

Those who plan to participate may contact the meeting coordinator, Mr. Stephen Hubchen, by email at *Stephen.K.Hubchen@uscg.mil,* by phone at (202) 372–1198, or in writing at United States Coast Guard (CG–LMI–P), ATTN: Mr. Stephen Hubchen, 2703 Martin Luther King Jr. Ave. SE, Stop 7509, Washington, DC 20593–7509, by April 2, 2024. Please note that, due to security considerations, two valid, government issued photo identifications must be presented to gain entrance to the Douglas A. Munro Coast Guard Headquarters Building at St. Elizabeth's. This building is accessible by taxi, public transportation, and privately owned conveyance (upon request). Additionally, members of the public needing reasonable accommodation should advise the meeting coordinator not later than April 2, 2024. Requests made after that date will be considered but might not be possible to fulfill.

Additional information regarding this and other IMO public meetings may be

found at: *https://www.dco.uscg.mil/IMO.*

(Authority: 22 U.S.C. 2656 and 5 U.S.C. 552)

Leslie W. Hunt,

Coast Guard Liaison Officer, Office of Ocean and Polar Affairs, Department of State.

BILLING CODE 4710–09–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Research, Engineering, and Development Advisory Committee; Notice of Public Meeting

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of public meeting.

SUMMARY: This notice announces two meetings of the Research, Engineering, and Development Advisory Committee (REDAC).

DATES: The meetings will be held on April 17, 2024, and October 9, 2024, from 10 a.m.–4:30 p.m. EST.

Requests for accommodations for a disability must be received by April 2, 2024, and September 24, 2024. Individuals requesting to speak during the meeting must submit a written copy of their remarks to DOT by April 2, 2024, and September 24, 2024. Requests to submit written materials to be reviewed during the meeting must be received no later than April 2, 2024, and September 24, 2024.

ADDRESSES: The meetings will be held in a hybrid setting to permit virtual participation. Virtual attendance information will be provided upon registration. The meetings will be held at the Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591. A detailed agenda will be available on the REDAC internet website at *https://www.faa.gov/go/redac* at least one week before the meeting, along with copies of the meeting minutes after the meeting.

FOR FURTHER INFORMATION CONTACT: Chinita Roundtree-Coleman, REDAC PM/Lead, FAA/U.S. Department of Transportation, at *chinita.roundtree-coleman@faa.gov* or (609) 485–7149 or (609) 569–3729. Any committee-related request should be sent to the person listed in this section.

SUPPLEMENTARY INFORMATION:

I. Background

The REDAC was created under the Federal Advisory Committee Act, in accordance with Public Law 100–591 (1988) and Public Law 101–508 (1990), to provide advice and recommendations to the FAA Administrator in support of the Agency's Research and Development (R&D) portfolio.

II. Agenda

At the meeting, the agenda will cover the following topics:

- FAA R&D Strategies, Initiatives, and Planning
- Impacts of emerging technologies, new entrant vehicles, and dynamic operations within the National Airspace System

III. Public Participation

DOT is committed to providing equal access to this meeting for all participants. The meeting will be ''open to the public'' per 41 CFR 102–3.150(a) meeting notice requirements. If you need alternative formats or services because of a disability, such as sign language, interpretation, or other ancillary aids, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

There will be 45 minutes allotted for oral comments from members of the public joining the meeting. To accommodate as many speakers as possible, the time for each commenter may be limited. Individuals wishing to reserve speaking time during the meeting must submit a request at the time of registration, as well as the name, address, and organizational affiliation of the proposed speaker. If the number of registrants requesting to make statements is greater than can be reasonably accommodated during the meeting, the FAA may conduct a lottery to determine the speakers. Speakers are asked to submit a written copy of their prepared remarks for inclusion in the meeting records and for circulation to REDAC members before the deadline listed in the **DATES** section. All prepared remarks submitted on time will be accepted and considered as part of the meeting's record. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, DC.

Chinita Roundtree-Coleman,

REDAC PM/Lead, Federal Aviation Administration.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

[Docket No. FHWA–2024–0024]

Agency Information Collection Activities: Notice of Request for Extension of Currently Approved Information Collection

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of request for extension of currently approved information collection.

SUMMARY: The FHWA has forwarded the information collection request described in this notice to the Office of Management and Budget (OMB) for a renewal of information collection. We published a **Federal Register** Notice with a 60-day public comment period on this information collection on January 22, 2024. We are required to publish this notice in the **Federal Register** per the Paperwork Reduction Act of 1995.

DATES: Please submit comments by April 29, 2024.

ADDRESSES: You may submit comments identified by DOT Docket ID Number 0024 by any of the following methods:

Website: For access to the docket to read background documents or comments received go to the Federal eRulemaking Portal: Go to *http://www.regulations.gov.* Follow the online instructions for submitting comments.

Fax: 1–202–493–2251.

Mail: Docket Management Facility, U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590–0001.

Hand Delivery or Courier: U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Scott Gable, 202–366–2176, Office of Safety, Federal Highway Administration, Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590, between 7:30 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Title: Highway Safety Improvement Program.

OMB Control: 2125–0025.

Background: The Infrastructure Investment and Jobs Act (IIJA) (Pub. L. 117–58, also known as the ''Bipartisan Infrastructure Law'' (BIL)) continues the

Highway Safety Improvement Program (HSIP) as a core federal-aid program with the purpose to achieve a significant reduction in traffic fatalities and serious injuries on all public roads, including non-State-owned public roads and roads on tribal lands. The HSIP requires a data-driven, strategic approach to improving highway safety on all public roads that focuses on performance.

The existing provisions of Title 23 U.S.C. 130, Railway-Highway Crossings Program, as well as implementing regulations in 23 CFR 924, remain in effect. Included in these combined provisions are requirements for State DOTs to annually produce and submit to FHWA by August 31 reports related to the implementation and effectiveness of their HSIPs, that are to include information on: (a) progress being made to implement HSIP projects and the effectiveness of these projects in reducing traffic fatalities and serious injuries [Sections 148(h)]; and (b) progress being made to implement the Railway-Highway Crossings Program and the effectiveness of the projects in that program [Sections 130(g) and 148(h)], which will be used by FRA to produce and submit reports to Congress. To be able to produce these reports, State DOTs must have safety data and analysis systems capable of identifying and determining the relative severity of hazardous highway locations on all public roads, based on both crash experience and crash potential, as well as determining the effectiveness of highway safety improvement projects. FHWA provides an online reporting tool to support the annual HSIP reporting process. Additional information is available on the Office of Safety website at *http://safety.fhwa.dot.gov/hsip/resources/onrpttool/.* Reporting into the online reporting tool meets all report requirements and USDOT website compatibility requirements. The information contained in the annual HSIP reports provides FHWA with a means for monitoring the effectiveness of these programs and may be used by Congress for determining the future HSIP program structure and funding levels.

Respondents: 50 State Transportation Departments, the District of Columbia, and Puerto Rico.

Frequency: Annually.

Estimated Average Burden per Response: 150 hours for the Highway Safety Improvement Program (HSIP) report and 100 Railway-Highway Crossing Program (RHCP) report.

Estimated Total Annual Burden Hours: Total estimated average annual burden is 12,900 hours.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the FHWA's performance; (2) the accuracy of the estimated burdens; (3) ways for the FHWA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized, including the use of electronic technology, without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended; and 49 CFR 1.48.

Issued On: March 25, 2024.

Jazmyne Lewis,

Information Collection Officer.

BILLING CODE 4910–22–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2023–0046; Notice 1]

FCA US LLC, Receipt of Petition for Decision of Inconsequential Noncompliance

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Receipt of petition.

SUMMARY: FCA US LLC (FCA) has determined that certain model year (MY) 2022–2023 Ram ProMaster vehicles do not fully comply with Federal Motor Vehicle Safety Standard (FMVSS) No. 101, *Controls and Displays.* FCA filed a noncompliance report dated April 13, 2023, and subsequently petitioned NHTSA (the ''Agency'') on May 5, 2023, for a decision that the subject noncompliance is inconsequential as it relates to motor vehicle safety. This document announces receipt of FCA's petition.

DATES: Send comments on or before April 29, 2024.

ADDRESSES: Interested persons are invited to submit written data, views, and arguments on this petition. Comments must refer to the docket and notice number cited in the title of this notice and may be submitted by any of the following methods:

- *Mail:* Send comments by mail addressed to the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver comments by hand to the U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590. The Docket Section is open on weekdays from 10 a.m. to 5 p.m. except for Federal Holidays.
- *Electronically:* Submit comments electronically by logging onto the Federal Docket Management System (FDMS) website at *https://www.regulations.gov/.* Follow the online instructions for submitting comments.
- Comments may also be faxed to (202) 493–2251.

Comments must be written in the English language, and be no greater than 15 pages in length, although there is no limit to the length of necessary attachments to the comments. If comments are submitted in hard copy form, please ensure that two copies are provided. If you wish to receive confirmation that comments you have submitted by mail were received, please enclose a stamped, self-addressed postcard with the comments. Note that all comments received will be posted without change to *https://www.regulations.gov,* including any personal information provided.

All comments and supporting materials received before the close of business on the closing date indicated above will be filed in the docket and will be considered. All comments and supporting materials received after the closing date will also be filed and will be considered to the fullest extent possible.

When the petition is granted or denied, notice of the decision will also be published in the **Federal Register** pursuant to the authority indicated at the end of this notice.

All comments, background documentation, and supporting materials submitted to the docket may be viewed by anyone at the address and times given above. The documents may also be viewed on the internet at *https://www.regulations.gov* by following the online instructions for accessing the dockets. The docket ID number for this petition is shown in the heading of this notice.

DOT's complete Privacy Act Statement is available for review in a **Federal Register** notice published on April 11, 2000 (65 FR 19477–78).

FOR FURTHER INFORMATION CONTACT: Frederick Smith, General Engineer, NHTSA, Office of Vehicle Safety Compliance, (202) 366–7487.

SUPPLEMENTARY INFORMATION:

I. Overview: FCA determined that certain MY 2022–2023 Ram ProMaster vehicles do not fully comply with paragraph S5.3 of FMVSS No. 101, Controls And Displays (49 CFR 571.101).

FCA filed a noncompliance report dated April 13, 2023, pursuant to 49 CFR part 573, *Defect and Noncompliance Responsibility and Reports.* FCA petitioned NHTSA on May 5, 2023, for an exemption from the notification and remedy requirements of 49 U.S.C. chapter 301 on the basis that this noncompliance is inconsequential as it relates to motor vehicle safety, pursuant to 49 U.S.C. 30118(d) and 30120(h) and 49 CFR part 556, *Exemption for Inconsequential Defect or Noncompliance.*

This notice of receipt of FCA's petition is published under 49 U.S.C. 30118 and 30120 and does not represent any agency decision or another exercise of judgment concerning the merits of the petition.

II. Vehicles Involved: Approximately 9,101 MY 2022–2023 Ram ProMaster vans, manufactured between August 30, 2021, and March 23, 2023, were reported by the manufacturer.

III. Noncompliance: FCA explains that the subject vehicles equipped with a 3.5-inch IPC and adaptive cruise control (''ACC'') may have been built with IPC software that can cause the IPC to go blank for four to five seconds while it resets, and therefore does not comply with paragraph S5.3 of FMVSS No. 101. Specifically, if the ACC is engaged and in ready mode, and if the driver rapidly presses the speed control button (three or more times in one second), the system can incorrectly detect a fault and trigger a cluster reset. During this reset, the cluster display will go blank, and the speedometer indicator will go to zero before resetting.

IV. Rule Requirements: Paragraph S5.3 of FMVSS No. 101 includes the requirements relevant to this petition. Paragraph S5.3.1(a) provides that except as provided in S5.3.1(c), the identifications of controls for which the word ''Yes'' is specified in column 5 of Table 1 must be capable of being illuminated whenever the headlamps are activated. This requirement does not apply to a control located on the floor, floor console, steering wheel, steering column, or in the area of windshield header, or to a control for a heating and air-conditioning system that does not direct air upon the windshield. Paragraph S5.3.1(e) provides that a telltale must not emit light except when identifying the malfunction or vehicle condition it is designed to indicate, or during a bulb check.

V. Summary of FCA's Petition: The following views and arguments presented in this section, ''V. Summary of FCA's Petition,'' are the views and arguments provided by FCA. They have not been evaluated by the Agency and do not reflect the views of the Agency. FCA describes the subject noncompliance and contends that the noncompliance is inconsequential as it relates to motor vehicle safety.

The noncompliant condition can occur regardless of the use of the vehicle's headlamps. Further, the IPC reset effectively includes a bulb check function for all of the IPC Telltales as it comes back on. As mentioned above, the IPC reset occurs when the ACC is engaged, and the driver rapidly and repeatedly presses the steering wheel-mounted button to either increase or decrease the ACC set speed. Other than causing the IPC to reset, no other function of the vehicle is affected, and the vehicle does not shut off. For example, the vehicle will continue to operate with full motive power as prescribed by the ACC engaged speed last selected by the driver. Power assist for both steering and braking are also unaffected by the IPC reset event, as are headlamp and taillamp functionality. The driver will continue to be able to adjust the ACC set speed using the control buttons during and after the reset event.

FCA explains that the subject noncompliance may arise regardless of whether the vehicle's headlamps are in use. FCA adds that the IPC reset includes a bulb check function for all IPC Telltales upon reactivation. The IPC reset occurs when the ACC is activated, and the ''driver rapidly and repeatedly presses the steering wheel-mounted button to either increase or decrease the ACC set speed.'' FCA notes that aside from initiating the IPC reset, no other vehicle function is affected, and the vehicle does not shut off. FCA says the vehicle will continue to function with full motive power based on the ACC engaged speed last chosen by the driver. Further, FCA says that power assist for both steering and braking remains unaffected by the IPC reset event, as do headlamp and taillamp functionalities. According to FCA, throughout and after the reset event, the driver retains the ability to adjust the ACC set speed using the control buttons. FCA asserts that the subject noncompliance is not a significant hazard that diverts the driver's attention from the driving task or results in control selection mistakes (FCA refers to FMVSS No. 101 S2). Therefore, FCA believes that the subject noncompliance should be deemed inconsequential to motor vehicle safety for following reasons:

1. The reset occurs only if the driver ''repeatedly and quickly'' presses a button on the steering wheel to change the ACC set speed, which FCA says would indicate that the driver is ''actively engaged in the driving task.''

2. The reset does not induce any change in vehicle behavior that might prompt the driver to react unsafely.

3. All exterior lighting, including headlamps, taillamps, and turn signals, remains fully functional and unaffected by the reset event.

4. No required controls are affected, and all controls they will remain properly illuminated and functional,

5. FCA refers to paragraph S5.3.1(b) of FMVSS No. 101 which provides that except as provided in S5.3.1(c), the indicators and their identifications for which the word Yes is specified in column 5 of Table 1 must be illuminated whenever the vehicles propulsion system and headlamps are activated.

a. FCA contends that the temporary loss of illumination of the required indicators resulting from the reset event does not pose an unsafe condition for the driver. Further, FCA says that none of the required indicators identifies a condition demanding a response in less than five seconds to avoid an unsafe condition.

b. FCA says that the indicators required by FMVSS No. 101 Table 1 that are affected are: Fuel Level; Engine oil pressure; Engine coolant temperature; Electrical charge; Speedometer; Automatic transmission control position. Regarding the speedometer, FCA asserts that the driver would be aware of the vehicle speed before deciding to activate the ACC set speed change. According to FCA, the reset is triggered by the incremental adjustment of the known set speed, yet the driver remains aware of the speed at the commencement of the set speed change action and promptly after the conclusion of the reset event. Additionally, FCA says that the vehicle will consistently be in Drive for the reset event to take place, ensuring that the automatic transmission control position remains unchanged throughout the reset event.

6. FCA says that the reset event will briefly illuminate all telltales, deviating from the exception allowed by paragraph S5.3.1(e) of FMVSS No. 101. However, FCA contends that the likelihood of this brief illumination posing an unreasonable risk to safety before the reset is complete is extremely low. Further, FCA states that following

the reset event, any telltale required by an underlying condition will become properly illuminated, while all others will be extinguished.

7. FCA refers to the Federal Register Docket No. NHTSA20130134; Notice 2 in which, according to FCA, NHTSA granted a petition for a decision of inconsequential noncompliance for a condition that is substantially similar to the subject noncompliance. Like that petition, FCA says it willing to provide NHTSA with a video of the reset event or provide a vehicle for NHTSA personnel to test in real world driving conditions. The subject noncompliance is substantially similar to the previously granted noncompliance petition.

8. FCA notes that it began vehicle production with compliant IPC software on March 23, 2023, and states that it is not aware of any crashes, injuries, or customer complaints associated with the condition.

FCA concludes by stating its belief that the subject noncompliance is inconsequential as it relates to motor vehicle safety and its petition to be exempted from providing notification of the noncompliance, as required by 49 U.S.C. 30118, and a remedy for the noncompliance, as required by 49 U.S.C. 30120, should be granted.

NHTSA notes that the statutory provisions (49 U.S.C. 30118(d) and 30120(h)) that permit manufacturers to file petitions for a determination of inconsequentiality allow NHTSA to exempt manufacturers only from the duties found in sections 30118 and 30120, respectively, to notify owners, purchasers, and dealers of a defect or noncompliance and to remedy the defect or noncompliance. Therefore, any decision on this petition only applies to the subject vehicles that FCA no longer controlled at the time it determined that the noncompliance existed. However, any decision on this petition does not relieve vehicles distributors and dealers of the prohibitions on the sale, offer for sale, or introduction or delivery for introduction into interstate commerce of the noncompliant vehicles under their control after FCA notified them that the subject noncompliance existed.

(Authority: 49 U.S.C. 30118, 30120: delegations of authority at 49 CFR 1.95 and 501.8)

Otto G. Matheke III,

Director, Office of Vehicle Safety Compliance.

BILLING CODE 4910–59–P

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

Agency Information Collection Activities: Revision of an Approved Information Collection; Submission for OMB Review; Bank Activities and Operations; Investment in Bank Premises

AGENCY: Office of the Comptroller of the Currency (OCC), Treasury.

ACTION: Notice and request for comment.

SUMMARY: The OCC, as part of its continuing effort to reduce paperwork and respondent burden, invites comment on a continuing information collection, as required by the Paperwork Reduction Act of 1995 (PRA). In accordance with the requirements of the PRA, the OCC may not conduct or sponsor, and the respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. The OCC is soliciting comment concerning a revision to its information collection titled, ''Bank Activities and Operations; Investment in Bank Premises.'' The OCC also is giving notice that it has sent the collection to OMB for review.

DATES: Comments must be received by April 29, 2024.

ADDRESSES: Commenters are encouraged to submit comments by email, if possible. You may submit comments by any of the following methods:

- *Email: prainfo@occ.treas.gov.*
- *Mail:* Chief Counsel's Office, Attention: Comment Processing, Office of the Comptroller of the Currency, Attention: 1557–0204, 400 7th Street SW, Suite 3E–218, Washington, DC 20219.
- *Hand Delivery/Courier:* 400 7th Street SW, Suite 3E–218, Washington, DC 20219.
- *Fax:* (571) 293–4835.

Instructions: You must include ''OCC'' as the agency name and ''1557–0204'' in your comment. In general, the OCC will publish comments on *www.reginfo.gov* without change, including any business or personal information provided, such as name and address information, email addresses, or phone numbers. Comments received, including attachments and other supporting materials, are part of the public record and subject to public disclosure. Do not include any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure.

Written comments and recommendations for the proposed information collection should also be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* You can find this information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

You may review comments and other related materials that pertain to this information collection following the close of the 30-day comment period for this notice by the method set forth in the next bullet.

- *Viewing Comments Electronically:* Go to *www.reginfo.gov.* Hover over the ''Information Collection Review'' tab and click on ''Information Collection Review'' from the drop-down menu. From the ''Currently under Review'' drop-down menu, select ''Department of Treasury'' and then click ''submit.'' This information collection can be located by searching OMB control number ''1557–0204'' or ''Bank Activities and Operations; Investment in Bank Premises.'' Upon finding the appropriate information collection, click on the related ''ICR Reference Number.'' On the next screen, select ''View Supporting Statement and Other Documents'' and then click on the link to any comment listed at the bottom of the screen.
- For assistance in navigating *www.reginfo.gov,* please contact the Regulatory Information Service Center at (202) 482–7340.

FOR FURTHER INFORMATION CONTACT: Shaquita Merritt, Clearance Officer, (202) 649–5490, Chief Counsel's Office, Office of the Comptroller of the Currency, 400 7th Street SW, Washington, DC 20219. If you are deaf, hard of hearing, or have a speech disability, please dial 7–1–1 to access telecommunications relay services.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501 *et seq.*), Federal agencies must obtain approval from the OMB for each collection of information that they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) to include agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. The OCC asks the OMB to approve this revised collection.

Title: Bank Activities and Operations; Investment in Bank Premises.

OMB Control No.: 1557–0204.

Type of Review: Regular.

Affected Public: Businesses or other for-profit.

Estimated Frequency of Response: On occasion; Quarterly.

Description: The information collection requirements ensure that institutions conduct their operations in a safe and sound manner and in accordance with applicable Federal banking law and regulations. The collections of information provide needed information for examiners and offer protections for institutions. The collections are necessary for regulatory and examination purposes and for national banks to ensure their compliance with Federal law and regulations.

The information collection requirements are as follows:

• *Investment in national bank or Federal savings association premises*—A national bank or Federal savings association may invest in banking premises and other premises-related investments, loans, or indebtedness by filing an application for prior approval whenever its investment in bank premises will cause it to exceed its capital stock. The application must describe the present and proposed bank premises investment and the business reason for making the investment. A bank with a composite 1 or 2 CAMELS rating entering a transaction that increases its aggregate bank premises investment to not more than 150 percent of its capital and surplus may proceed without prior OCC approval but must provide an after-the-fact notice. 12 CFR 5.37.

• *Sale of money orders at nonbanking outlets*—A national bank may designate bonded agents to sell the bank's money orders at nonbanking outlets. The responsibility of both the bank and its agent should be defined in a written agreement setting forth the duties of both parties and providing for remuneration of the agent. 12 CFR 7.1014.

• *Tax equity finance transactions*—A written request to the OCC is required to secure a waiver to participate in a tax equity finance transaction exceeding the aggregate investment limit. Prior written notification to the OCC is required for each tax equity finance transaction. 12 CFR 7.1025(d).

• *Payment systems*—Thirty (30) days advance written notice is required before joining a payment system that would expose the institution to open-ended liability. An after-the-fact written notice to the OCC must be filed within 30 days of becoming a member of a payment system that does not expose the institution to open-ended liabilities. In both cases, the notice must represent that the national bank or Federal savings association has and will continue to comply with safety and soundness review and notification requirements. 12 CFR 7.1026(c) and (d).

• *Derivatives activities*—Thirty (30) days prior written notice to the examiner-in-charge is required before a national bank may engage in certain derivatives hedging activities, expand the bank's derivatives hedging activities to include a new category of underlying for derivatives transactions, engage in certain customer-driven financial intermediation derivatives activities, or expand the bank's customer-driven financial intermediation derivatives activities to include a new category of underlying specified in the regulation. 12 CFR 7.1030(d).

• *Corporate governance procedures-Other sources of guidance*—A national bank must designate in its bylaws the body of law selected for its corporate governance procedures. 12 CFR 7.2000(b).

• *State corporate governance*—A request for the views of OCC staff on the permissibility of a national bank's adoption of a particular State corporate governance provision must include the name of the national bank, citation to the relevant State statutes or regulations, a discussion of whether a similarly situated State bank is subject to or may adopt the provision, the identification of all Federal banking statutes and regulations on the same subject, and an analysis of how the proposed practice is not inconsistent with applicable Federal statutes or regulations and is not inconsistent with safety and soundness. 12 CFR 7.2000(d).

• *Honorary directors or advisory boards*—Any listing of a national bank's honorary or advisory directors must distinguish between those directors and the bank's board of directors or indicate their advisory status. 12 CFR 7.2004.

• *Indemnification of institution-affiliated parties—Written agreement required for advancement*—A written agreement that an IAP will reimburse the institution for any portion of non-reimbursed indemnification that the IAP is found not entitled to is required before advancing funds to an IAP. 12 CFR 7.2014(c).

• *Issuing stock in certificate form*—When issuing stock in certificate form, national banks must comply with the requirements of 12 U.S.C. 52 and include the name and location of the bank, the name of the holder of record, the number and class of shares the certificate represents, information on rights of shareholders, signatures of the bank president and cashier, and the bank's seal. 12 CFR 7.2016(b).

• *Staggered terms for national bank directors*—Any national bank may adopt bylaws that provide for staggering the terms of its directors. National banks must provide the OCC with copies of any bylaws so amended. 12 CFR 7.2024(a).

• *Size of bank board*—A national bank seeking to increase the number of its directors must notify the OCC any time the proposed size would exceed 25 directors. 12 CFR 7.2024(c).

Burden Estimates:

Estimated Number of Respondents: 1,727.

Estimated Total Annual Burden: 1,138 hours.

Comments: On December 26, 2023, the OCC published a 60-day notice for this information collection, 88 FR 89026. No comments were received.

Comments continue to be invited on:

(a) Whether the collection of information is necessary for the proper performance of the functions of the OCC, including whether the information has practical utility;

(b) The accuracy of the OCC's estimate of the burden of the collection of information;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Patrick T. Tierney,

Assistant Director, Office of the Comptroller of the Currency.

BILLING CODE 4810–33–P

DEPARTMENT OF VETERANS AFFAIRS

Advisory Committee on Cemeteries and Memorials, Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act, 5 U.S.C. ch. 10, that the annual meeting of the Advisory Committee on Cemeteries and Memorials will be held May 8–9, 2024. The meeting sessions will begin and end as follows:

Date(s):	Time(s):	Location(s)	Open to the public
May 8, 2024	9:00 a.m. to 11:00 a.m. Eastern Standard Time (EST)	Andersonville National Cemetery, 496 Cemetery Road, Andersonville, GA 31711.	Yes.
May 8, 2024	2:00 p.m. to 2:45 p.m. EST	Fort Moore Post Cemetery, 64–66 Custer Road, Columbus, GA 31905.	No.
May 8, 2024	3:30 p.m. to 4:30 p.m. EST	Fort Mitchell National Cemetery, 553 Highway 165, Fort Mitchell, AL 36856.	Yes.
May 9, 2024	9:30 a.m. to 4:30 p.m. EST	Marriott Columbus, 800 Front Avenue, Columbus, GA 31901.	Yes.

Sessions are open to the public, except when the Committee is conducting a tour of the Fort Moore Post Cemetery. The Fort Moore Post Cemetery tour has enhanced opportunities for interactions that would implicate privacy and personal information disclosure concerns. Tours of VA facilities are generally closed when it is necessary to protect privacy and personal information. 5 U.S.C. 552b(c)(6). Accordingly this tour is a closed session of the Committee.

The purpose of the Committee is to advise the Secretary of Veterans Affairs on the administration of national cemeteries, soldiers' lots and plots, the selection of new national cemetery sites, the erection of appropriate memorials, and the adequacy of Federal burial benefits. The Committee makes recommendations to the Secretary regarding such activities.

On Wednesday, May 8, 2024, the Committee will convene an open session from 9:00 a.m. to 11:00 a.m. EST with tours to Andersonville National Cemetery and Fort Mitchell National Cemetery. The Committee will convene a closed session from 2:00 p.m. to 2:45 p.m. EST. The Committee will reconvene in an open session from 3:30 p.m. to 4:30 p.m. EST at the Fort Mitchell National Cemetery. Transportation will not be provided for the public.

On Thursday, May 9, 2024, the Committee will convene an open session from 9:30 a.m. to 4:30 p.m. EST. The agenda will include remarks by National Cemetery Administration leadership, and briefings from the Office of Cemetery Operations and Field Programs, Office of Engagement and Memorial Innovation, as well as the status of committee recommendations, public comments, and open discussion.

Any member of the public seeking additional information should contact Ms. Faith Hopkins, Designated Federal Officer, at 202–603–4499. Please leave a voice mail message. The Committee will also accept written comments. Comments may be transmitted electronically to the Committee at *faith.hopkins@va.gov.* In the public's communications with the Committee, the writers must identify themselves and state the organizations, associations, or persons they represent.

Any member of the public who wishes to attend the meeting virtually on May 9, 2024, may use the following Cisco Webex Meeting Link:

Join On Your Computer Or Mobile App: https://veteransaffairs.webex.com/veteransaffairs/j.php?MTID=mfa919558f3ede94e324627e9f21022ec.

Meeting number: 2824 163 0470
Password: GYpUMKK$648
Join by phone: 404–397–1596
Access code: 2824 163 0470

Dated: March 25, 2024.

Jelessa M. Burney,

Federal Advisory Committee Management Officer.

BILLING CODE P

DEPARTMENT OF VETERANS AFFAIRS

Loan Guaranty: Specially Adapted Housing Assistive Technology Grant Program

AGENCY: Department of Veterans Affairs.

ACTION: Notice of funding opportunity.

SUMMARY: The Department of Veterans Affairs (VA) is publishing the announcement of the availability of funds for the Specially Adapted Housing Assistive Technology (SAHAT) Grant Program for fiscal year (FY) 2024. The objective of the grant is to encourage the development of new assistive technologies for Specially Adapted Housing (SAH) grant recipients. This notice is intended to provide applicants with the information necessary to apply for the SAHAT Grant Program. VA strongly recommends referring to the SAHAT Grant Program regulation in conjunction with this notice. The registration process described in this notice applies only to applicants who will register to submit project applications for FY 2024 SAHAT Grant Program funds.

DATES: Applications for the SAHAT Grant Program must be submitted through *www.Grants.gov* by 11:59 p.m. Eastern Standard Time on April 28, 2024. Awards made for the SAHAT Grant Program will fund operations for FY 2024. The SAHAT Grant Program application package for funding opportunity VA–SAHAT–24–09 is available through *www.Grants.gov* and is listed as VA-Specially Adapted Housing Assistive Technology Grant Program. Applications may not be sent by mail, email, or facsimile. All application materials must be in a format compatible with the *www.Grants.gov* application submission tool. Applications must be submitted as a complete package. Materials arriving separately will not be included in the application package for consideration and may result in the application being rejected. Technical assistance with the preparation of an initial SAHAT Grant Program application is available by contacting the program official listed below.

FOR FURTHER INFORMATION CONTACT: Jason Latona, Assistant Director, Specially Adapted Housing, Loan Guaranty Service, Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420, 202–461–9201 or *Jason.Latona@va.gov.* This is not a toll-free telephone number.

SUPPLEMENTARY INFORMATION: This notice is divided into eight sections. Section I provides a summary of and background information on the SAHAT Grant Program as well as the statutory authority, desired outcomes, funding priorities, definitions, and delegation of authority. Section II covers award information, including funding availability and the anticipated start date of the SAHAT Grant Program. Section III provides detailed information on eligibility and the threshold criteria for submitting an application. Section IV provides detailed application and submission information, including how to request an application, application content, and submission dates and times. Section V

describes the review process, scoring criteria, and selection process. Section VI provides award administration information such as award notices and reporting requirements. Section VII lists agency contact information. Section VIII provides additional information related to the SAHAT Grant Program. This notice includes citations from 38 CFR part 36 regarding the Specially Adapted Housing Assistive Technology Grant Program (*https://www.ecfr.gov/current/title-38/chapter-I/part-36/subpart-C/section-36.4412*), and VA Financial Policy, Volume X Grants Management Financial Policy Documents (*https://department.va.gov/financial-policy-documents/?_financial_policy_volumes=volume-x-grants-management*) which applicants and stakeholders are expected to read to increase their knowledge and understanding of the SAHAT Grant Program.

I. Program Description

A. Summary

Pursuant to the Veterans' Benefits Act of 2010 (Pub. L. 111–275, 203), the Secretary of Veterans Affairs, through the Loan Guaranty Service (LGY) of the Veterans Benefits Administration (VBA), is authorized to provide grants of financial assistance to develop new assistive technology. The objective of the SAHAT Grant Program is to encourage the development of new assistive technologies for adapted housing.

B. Background

LGY currently administers the SAH Grant Program. Through this program, LGY provides funds to eligible Veterans and Service members with certain service-connected disabilities to help purchase or construct an adapted home, or modify an existing home, to allow them to live more independently. Please see 38 U.S.C. 2101(a)(2)(B) and (C) and 38 U.S.C. 2101(b)(2) for a list of qualifying service-connected disabilities. Currently, most SAH adaptations involve structural modifications such as ramps; wider hallways and doorways; roll-in showers; and other accessible bathroom features, etc. For more detailed information about the SAH Grant Program, please visit *https://www.va.gov/housing-assistance/disability-housing-grants/.*

VA acknowledges that there are many emerging technologies and improvements in building materials that could improve home adaptions or otherwise enhance a Veteran's or Service member's ability to live independently. Therefore, in 38 CFR 36.4412(b)(2), VA has defined ''new assistive technology'' as an advancement that the Secretary determines could aid or enhance the ability of an eligible individual, as defined in 38 CFR 36.4401, to live in an adapted home. New assistive technology can include advancements in new-to-market technologies, as well as new variations on existing technologies. Examples of the latter might include modifying an existing software application for use with a smart home device; upgrading an existing shower pan design to support wheelchairs; using existing modular construction methods to improve bathroom accessibility; or using existing proximity technology to develop an advanced application tailored to blind users. In addition, the recent passage of the Honoring our Promise to Address Comprehensive Toxics (PACT) Act of 2022 (Pub. L. 117–168) expanded VA health care and benefits for Veterans exposed to burn pits and other toxic substances, including those with disabilities due to inhalation injuries resulting from toxic exposures. New solutions that can potentially help VA meet the needs of SAH-eligible Veterans impacted by these injuries are of interest to the SAHAT Grant Program.

Please Note: SAHAT funding does not support the construction or modification of residential dwellings for accessibility. Veterans and Service members interested in receiving assistance to adapt a home are encouraged to visit the following website to identify home adaptation programs offered by VA: *https://www.va.gov/housing-assistance/disability-housing-grants/.*

C. Statutory Authority

Public Law 111–275, the Veterans' Benefits Act of 2010, was enacted on October 13, 2010. Section 203 of the Act added 38 U.S.C. 2108 to establish the SAHAT Grant Program. The Act authorized VA to provide grants of up to $200,000 per fiscal year, through September 30, 2016, to a ''person or entity'' for the development of SAHATs. For the purpose of this notice, VA refers to such persons or entities as grantees or grant recipients, and the terms are interchangeable.

On September 30, 2022, the Continuing Appropriations and Ukraine Supplemental Appropriations Act, 2023 was enacted (Pub. L. 117–180, 205). Section 205 of Pub. L. 117–180 extended the authority for VA to provide grants in the manner listed above through September 30, 2024 (see 38 U.S.C. 2108 and 38 CFR 36.4412).

D. Desired Outcomes and Funding Priorities

Grantees will be expected to leverage grant funds to develop new assistive technologies for SAH. In 38 CFR 36.4412(f)(2) (*https://www.ecfr.gov/current/title-38/chapter-I/part-36/subpart-C/section-36.4412*), VA set out the scoring criteria and the maximum points allowed for each criterion. As explained in the preambles to both the proposed and final rules, while the scoring framework is set out in the regulation text, each notice will address the scoring priorities for that particular grant cycle (79 FR 53146, 53148, September 8, 2014; 80 FR 55763, 55764, September 17, 2015). For FY 2024, the Secretary has identified the categories of innovation and unmet needs as top priorities. These categories are further described as scoring criteria 1 and 2 in Section V(A) of this notice. Although VA encourages innovation across a wide range of specialties, VA is, in this grant cycle, particularly interested in technologies that could help Veterans with disabilities associated with toxic exposures covered by the Honoring our PACT Act of 2022, such as residuals of an inhalation injury (including, but not limited to, pulmonary fibrosis, asthma, and chronic obstructive pulmonary disease) as they pertain to VA SAH adaptations. VA also has particular interest in applications that either demonstrate innovative approaches in the design and building of adaptive living spaces or would lead to new products and techniques that expedite the modification of existing spaces, to reduce the impact that adaptive projects can have on a Veteran's quality of life during the construction phase. VA notes that applications addressing these categories of special interest are not guaranteed selection, but they would, on initial review, be categorized as meeting the priorities for this grant cycle.

Additional information regarding how these priorities will be scored and considered in the final selection is contained in Section V(A) of this notice.

E. Definitions

Definitions of terms used in the SAHAT Grant Program are found at 38 CFR 36.4412(b).

F. Delegation of Authority

Pursuant to 38 CFR 36.4412(i), certain VA employees appointed to or lawfully fulfilling specific positions within VBA are delegated authority, within the limitations and conditions prescribed by law, to exercise the powers and functions of the Secretary with respect

to the SAHAT Grant Program authorized by 38 U.S.C. 2108.

G. Assistance Listings

The listings include the following: 64.051 Specially Adapted Housing Assistive Technology Grant Program; *SAM.gov,* 64.106 Specially Adapted Housing for Disabled Veterans; *SAM.gov,* and 64.118 Veterans Housing Direct Loans for Certain Disabled Veterans; *SAM.gov*.

II. Federal Award Information

A. Funding Availability

Funding will be provided as an assistance agreement in the form of grants. The number of assistance agreements VA will fund as a result of this notice will be based on the quality of the technology grant applications received and the availability of funding. However, the maximum amount of assistance a technology grant applicant may receive in any fiscal year is limited to $200,000.

B. Additional Funding Information

Funding for these projects is not guaranteed and is subject to the availability of funds and the evaluation of technology grant applications based on the criteria in this announcement. In appropriate circumstances, VA reserves the right to partially fund technology grant applications by funding discrete portions or phases of proposed projects that relate to adapted housing. Award of funding through this competition is not a guarantee of future funding. The SAHAT Grant Program is administered annually and does not guarantee subsequent awards. Renewal grants to provide new assistive technology will not be considered under this announcement.

C. Start Date

As discussed in Section VI(A) of this notice, the SAHAT Grant Program Office expects to announce grant recipients after April 1, 2024. The anticipated start date for funding grants awarded under this announcement is therefore after May 1, 2024.

III. Eligibility Information

A. Eligible Applicants

As authorized by 38 U.S.C. 2108, the Secretary may provide a grant to a ''person or entity'' for the development of specially adapted housing assistive technologies.

B. Cost Sharing or Matching

There is no cost sharing, matching, or cost participation for the SAHAT Grant Program.

C. Threshold Criteria

All technology grant applicants and applications must meet the threshold criteria set forth below. Failure to meet any of the following threshold criteria in the application will result in the automatic disqualification for funding consideration. Ineligible participants will be notified within 30 days of the finding of disqualification for award consideration based on the following threshold criteria:

1. Projects funded under this notice must involve new assistive technologies that the Secretary determines could aid or enhance the ability of a Veteran or Service member to live in an adapted home.

2. Projects funded under this notice must not be used for the completion of work which was to have been completed under a prior grant.

3. Applications in which the technology grant applicant is requesting assistance funds in excess of $200,000 will not be reviewed.

4. Applications that do not comply with the application and submission information requirements provided in Section IV of this notice will be rejected.

5. Applications submitted via mail, email, or facsimile will not be reviewed.

6. Applications must be received through *www.Grants.gov,* as specified in Section IV of this announcement, on or before the application deadline, as specified in the **DATES** section of this announcement. Applications received through *www.Grants.gov* after the application deadline will be considered late and will not be reviewed.

7. Technology grant applicants that have an outstanding obligation that is in arrears to the Federal Government or have an overdue or unsatisfactory response to an audit will be deemed ineligible.

8. Technology grant applicants in default by failing to meet the requirements for any previous Federal assistance will be deemed ineligible.

9. Applications submitted by entities deemed ineligible will not be reviewed.

10. Applications with project dates that extend past July 31, 2025, (this period does not include the 120-day closeout period) will not be reviewed.

All technology grant recipients, including individuals and entities formed as for-profit entities, will be subject to the rules on Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards, as found at 2 CFR 200 (see 2 CFR 200.101(a)). Where the Secretary determines that 2 CFR 200 is not applicable or where the Secretary determines that additional requirements are necessary due to the uniqueness of a situation, the Secretary will apply the same standard applicable to exceptions under 2 CFR 200.102.

IV. Application and Submission Information

A. Address To Request Application Package

Technology grant applicants may download the application package from *www.Grants.gov.* Questions regarding the application process should be referred to the following program official: Oscar Hines (Program Manager), Specially Adapted Housing Program, *Oscar.Hines@va.gov*, 202–461–8316 (not a toll-free number).

B. Content and Form of Application Submission

The SAHAT Grant Program application package provided at *www.Grants.gov* (Funding Opportunity Number: VA–SAHAT–24–09) contains electronic versions of the application forms that are required. Additional attachments to satisfy the required application information may be provided; however, letters of support included with the application will not be reviewed. All technology grant applications must consist of the following:

1. Standard Forms (SF) 424, 424A and 424B. SF–424, SF–424A and SF–424B require general information about the applicant and proposed project. The project budget should be described in SF–424A. Please do not include leveraged resources in SF–424A.

2. VA Form 26–0967: Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion.

3. VA Form 26–0967a: Scoring Criteria for SAHAT Grants.

4. Applications: In addition to the forms listed above, each technology grant application must include the following information:

a. A project description, including the goals and objectives of the project, what the project is expected to achieve, and how the project will benefit Veterans and Service members;

b. An estimated schedule including the length of time (not to extend past July 31, 2025) needed to accomplish tasks and objectives for the project;

c. A description of what the project proposes to demonstrate and how this new technology will aid or enhance the ability of Veterans and Service members to live in an adapted home. The following link has additional information regarding adapted homes: *https://www.va.gov/housing-assistance/disability-housing-grants/;* and

d. Each technology grant applicant is responsible for ensuring that the application addresses each of the scoring criteria listed in Section V(A) of this notice.

C. System for Award Management (SAM)

Each technology grant applicant, unless the applicant is an individual or Federal awarding agency that is excepted from the requirements under 2 CFR 25.110(b) or (c) or has an exception approved by VA under 2 CFR 25.110(d), is required to:

1. Be registered in SAM prior to submitting an application;
2. Provide a valid SAM Unique Entity Identifier number in the application; and
3. Continue to maintain an active SAM registration with current information at all times during which the technology grant applicant has an active Federal award or an application under consideration by VA.

VA will not make an award to an applicant until the applicant has complied with all applicable SAM requirements. If the applicant has not fully complied with the requirements by the time VA is ready to make an award, VA will determine the applicant is not qualified to receive a Federal award.

D. Submission Dates and Times

Applications for the SAHAT Grant Program must be submitted through *www.Grants.gov* to be transmitted to VA by 11:59 p.m. Eastern Standard Time on the application deadline, as specified in the **DATES** section of this announcement. Submissions received after this application deadline will be considered late and will not be reviewed or considered. Submissions by email, mail, or fax will not be accepted.

Applications submitted through *www.Grants.gov* must be submitted by an individual registered with *www.Grants.gov* and authorized to sign applications for Federal assistance. For more information and to complete the registration process, visit *www.Grants.gov.* Technology grant applicants are responsible for ensuring that the registration process does not hinder timely submission of the application.

It is the responsibility of grant applicants to ensure a complete application is submitted via *www.Grants.gov.* Applicants are encouraged to periodically review the ''Version History Tab'' of the funding opportunity announcement in *www.Grants.gov* to identify if any modifications have been made to the funding announcement and/or opportunity package. Upon initial download of the funding opportunity package, applicants will be asked to provide an email address that will allow *www.Grants.gov* to send the applicant an email message in the event this funding opportunity package is changed and/or republished on *www.Grants.gov* prior to the posted closing date.

E. Confidential Business Information

It is recommended that confidential business information (CBI) not be included in the application. However, if CBI is included in an application, applicants should clearly indicate which portion or portions of their application they are claiming as CBI. See 2 CFR 200.334–200.338 (addressing access to a non-Federal entity's records pertinent to a Federal award).

F. Intergovernmental Review

This section is not applicable to the SAHAT Grant Program.

G. Funding Restrictions

The SAHAT Grant Program does not allow reimbursement of pre-award costs.

V. Application Review Information

Each eligible proposal (based on the Section III threshold eligibility review) will be evaluated according to the scoring criteria established by the Secretary and provided below in Section A.

A. Scoring Criteria

The Secretary will score technology grant applications based on the scoring criteria listed below. As indicated in Section I of this notice, the Secretary is placing the greatest emphasis on criteria 1 and 2. This emphasis does not establish new scoring criteria but is designed to assist technology grant applicants in understanding how scores will be weighted and ultimately considered in the final selection process. A technology grant application must receive a minimum aggregate score of 70 to receive further consideration for an award. Instructions for completion of the scoring criteria are listed on VA Form 26–0967a. This form is included in the application package materials on *www.Grants.gov.* The scoring criteria and maximum points are as follows:

1. A description of how the new assistive technology is innovative, to include an explanation of how it involves advancements in new-to-market technologies, new variations on existing technologies, or both (up to 50 points);
2. An explanation of how the new assistive technology will meet a specific, unmet need among eligible individuals, to include whether and how the new assistive technology fits within a category of special emphasis for FY 2024, as explained in Section I(D) of this notice (up to 50 points);
3. An explanation of how the new assistive technology is specifically designed to promote the ability of eligible individuals to live more independently (up to 30 points);
4. A description of the new assistive technology's concept, size and scope (up to 30 points);
5. An implementation plan with major milestones for bringing the new assistive technology into production and to the market. Such milestones must be meaningful and achievable within a specific timeframe (up to 30 points); and
6. An explanation of what uniquely positions the technology grant applicant in the marketplace. This can include a focus on characteristics such as the economic reliability of the technology grant applicant, the technology grant applicant's status as a minority or Veteran-owned business, or other characteristics that the technology grant applicant wants to include to show how it will help protect the interests of, or further the mission of, VA and the program (up to 20 points).

B. Review and Selection Process

Eligible applications will be evaluated by a review panel comprising of five VA employees. The review panel will score applications using the scoring criteria provided in Section V(A) and refer to the selecting official those applications that receive a minimum aggregate score of 70. In determining which applications to approve, the selecting official will take into account the review panel score, the priorities described in this Notice of Funding Opportunity, the governing statute, 38 U.S.C. 2108, the governing regulation, 38 CFR 36.4412 (*https://www.ecfr.gov/current/title-38/chapter-I/part-36/subpart-C/section-36.4412*), and the VA Financial Policy, Volume X Grants Management, Chapter 4 Grants Application Review and Award Process, Financial Policy Documents (*https://department.va.gov/financial-policy-documents/?_financial_policy_volumes=volume-x-grants-management*). VA will review and consider applications for funding pursuant to this notice of funding opportunity in accordance with Office of Management and Budget's (OMB) guidance located at 2 CFR 200, all applicable Federal laws, and relevant Executive guidance, except as noted.

VI. Award Administration Information

A. Award Notices

Although subject to change, the SAHAT Grant Program Office expects to announce grant recipients on or about April 1, 2024. Prior to executing any funding agreement, VA will contact successful applicants to make known the amount of proposed funding and verify the applicant's desire to receive the funding. Any communication between the SAHAT Grant Program Office and successful applicants prior to the issuance of an award notice is not authorization to begin project activities. Once VA verifies that the grant applicant is still seeking funding, VA will issue a signed and dated award notice. This will begin the performance period. VA expects that the performance period should not last longer than 15 months. The award notice will be sent by U.S. mail or electronic means to the organization listed on the Application for Federal Assistance (SF–424). All applicants will be notified by letter or email, sent by U.S. mail or electronic means to the address listed on the SF–424.

B. Administrative and National Policy Requirements

This section is not applicable to the SAHAT Grant Program.

C. Reporting

VA places great emphasis on the responsibility and accountability of grantees. Grantees must agree to cooperate with any Federal evaluation of the program and provide the following:

1. *Quarterly Progress Reports:* These reports will be submitted electronically and outline how grant funds were used, describe program progress, and describe any barriers and measurable outcomes. The format for quarterly reporting will be provided to grantees upon grant award.

2. *Quarterly Financial Reports:* These reports will be submitted electronically using the Federal Financial Report (SF–425).

3. *Grantee Closeout Report:* This final report will be submitted electronically and will detail the assistive technology developed. The grantee's Closeout Report must be submitted to the SAHAT Grant Program Office not later than 120 days after the date the performance period ends.

VII. Agency Contact(s)

For additional general information about this announcement contact the following program official: Oscar Hines (Program Manager), Specially Adapted Housing Program, *Oscar.Hines@va.gov,* 202–461–8316 (not a toll-free number).

Mailed correspondence, which should not include application material, should be sent to the following address: Loan Guaranty Service, VA Central Office, Attn: Oscar Hines (262), 810 Vermont Avenue NW, Washington, DC 20420.

All correspondence with VA concerning this announcement should reference the funding opportunity title, SAHAT Grant Program, and funding opportunity number, VA–SAHAT–24–09. Once the application deadline has passed, VA staff may not discuss this competition with applicants until the application review process has been completed.

VIII. Other Information

Section 2108 authorizes VA to provide grants for the development of new assistive technologies through September 30, 2024. Additional information related to the SAHAT Grant Program administered by LGY is available at: *http://www.benefits.va.gov/homeloans/sahat.asp.*

The SAHAT Grant is not a Veterans' benefit. As such, the decisions of the Secretary are final and not subject to the same appeal rights as decisions related to Veterans' benefits. The Secretary does not have a duty to assist technology grant applicants in obtaining a grant.

Grantees will receive payments electronically through the U.S. Department of Health and Human Services Payment Management System (PMS). All grant recipients should adhere to PMS user policies.

IX. Notices of Funding Opportunity

In accordance with the OMB's guidance located at 2 CFR part 200, and all applicable Federal laws and relevant Executive guidance, the Federal awarding agency will review and consider applications for funding pursuant to this notice of funding opportunity in accordance with the Guidance for Grants and Agreements in title 2 CFR

Signing Authority

Denis McDonough, Secretary of Veterans Affairs, approved and signed this document on March 14, 2024, and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs.

Jeffrey M. Martin,

Assistant Director, Office of Regulation Policy & Management, Office of General Counsel, Department of Veterans Affairs.

The Enhancement and Standardization of Climate-Related Disclosures for Investors; Final Rule

SECURITIES AND EXCHANGE COMMISSION

17 CFR 210, 229, 230, 232, 239, and 249

[Release Nos. 33–11275; 34–99678; File No. S7–10–22]

RIN 3235–AM87

The Enhancement and Standardization of Climate-Related Disclosures for Investors

AGENCY: Securities and Exchange Commission.

ACTION: Final rules.

SUMMARY: The Securities and Exchange Commission (''Commission'') is adopting amendments to its rules under the Securities Act of 1933 (''Securities Act'') and Securities Exchange Act of 1934 (''Exchange Act'') that will require registrants to provide certain climate-related information in their registration statements and annual reports. The final rules will require information about a registrant's climate-related risks that have materially impacted, or are reasonably likely to have a material impact on, its business strategy, results of operations, or financial condition. In addition, under the final rules, certain disclosures related to severe weather events and other natural conditions will be required in a registrant's audited financial statements.

DATES:

Effective date: These final rules are effective on May 28, 2024.

Compliance date: See section II.O. for further information on transitioning to the final rules.

FOR FURTHER INFORMATION CONTACT: Elliot Staffin, Senior Special Counsel, and Kristin Baldwin, Special Counsel, Office of Rulemaking, at (202) 551–3430, in the Division of Corporation Finance; or Erin Nelson, Senior Special Counsel, and Meagan Van Orden, Professional Accounting Fellow, in the Office of the Chief Accountant, at (202) 551–5300, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

SUPPLEMENTARY INFORMATION: We are adopting amendments to or adding the following rules and forms:

	Commission reference	CFR citation (17 CFR)
Regulation S–X	Article 8–01	§ 210.8–01
	Article 14–01	§ 210.14–01
	Article 14–02	§ 210.14–02
Regulation S–K	Items 1500 through 1508	§§ 229.1500 \through 229.1508
	Item 601	§ 229.601

I. Introduction

Climate-related risks, their impacts, and a public company's response to those risks can significantly affect the company's financial performance and position.[3] Accordingly, many investors and those acting on their behalf—including investment advisers and investment management companies—currently seek information to assess how climate-related risks affect a registrant's business and financial condition and thus the price of the registrant's securities. Investors also seek climate-related information to assess a registrant's management and board oversight of climate-related risks so as to inform their investment and voting decisions. In light of these investor needs, the Commission is adopting rules to require registrants to provide certain information about climate-related risks that have materially impacted, or are reasonably likely to have a material impact on, the registrant's business strategy, results of operations, or financial condition; the governance and management of such risks; and the financial statement effects of severe weather events and other natural conditions in their registration statements and annual reports. This information, alongside disclosures on other risks that companies face, will assist investors in making decisions to buy, hold, sell, or vote securities in their portfolio.

Many companies currently provide some information regarding climate-related risks. For example, as discussed in more detail in section IV.A.5 below, some studies show that a third of public companies disclose information about climate-related risks, mostly outside of Commission filings,[4] and nearly 40 percent of all annual reports contain some climate-related discussion.[5] In addition, Commission staff analysis found that approximately 20 percent of public companies provide some information regarding their Scope 1 and 2 greenhouse gas (''GHG'') emissions, often outside of Commission filings, with the highest rate of emissions disclosures found among large accelerated filers.[6] Among companies in the Russell 1000 Index, based on one analysis, these numbers are even higher, with 90 percent publicly disclosing some climate-related information[7] and almost 60 percent providing disclosures regarding their GHG emissions.[8]

The climate-related information that these companies currently provide, however, is inconsistent and often difficult for investors to find and/or compare across companies. As a result, investors have expressed the need for more detailed, reliable, and comparable disclosure of information regarding climate-related risks. The requirements adopted in this release meet that need by providing more complete and decision-useful information about the impacts of climate-related risks on registrants, improving the consistency, comparability, and reliability of climate-related information for investors. As a result, investors will be able to make more informed investment and voting decisions.

As discussed in more detail throughout this release, disclosure of certain climate-related matters is required in a number of Federal, State, and foreign jurisdictions.[9] Companies currently often provide much of this information outside of Commission filings, in varying levels of detail, and in different documents and formats. Additionally, because of the importance of this information to investors, a variety of third parties have developed climate-related reporting frameworks.[10] Use of reporting frameworks is also often voluntary. Companies may disclose certain information under one

[3] *See infra* section I.A. For purposes of this release, we use the terms ''public companies,'' ''companies,'' ''registrants,'' and ''issuers'' interchangeably and, unless explained in the text, the use of different terms in different places is not meant to connote a significant difference.

[6] *See infra* notes 2675–2676 and accompanying text.

[7] *See infra* note 2666 and accompanying text.

[8] *See infra* note 2683 and accompanying text.

[9] *See, e.g., infra* sections I.A (discussing certain international initiatives) and II.A.3 (discussing the Inflation Reduction Act and recent California laws).

[10] *See, e.g.,* Task Force on Climate-related Financial Disclosures, *About,* available at *https://www.fsb-tcfd.org/about/*; CDP Worldwide (''CDP''), *About us,* available at *https://www.cdp.net/en/info/about-us*; Sustainability Accounting Standards Board (''SASB'') Standards, *About us,* available at *https://sasb.org/about/*; and Global Reporting Initiative (''GRI''), *About GRI,* available at *https://www.globalreporting.org/about-gri/. See also infra* notes 148–151.

or more frameworks, may provide only partial disclosures, or may choose not to provide consistent information year over year. As a result, reporting is fragmented and difficult for investors to compare across companies or across reporting periods. As commenters have indicated, this lack of consistency and comparability increases costs to investors in obtaining and analyzing decision-useful information and impairs investors' ability to make investment or voting decisions in line with their risk preferences.[11] Investors have asked for this information in Commission filings, alongside other disclosures on the business, results of operations, and financial condition of a registrant and information on the other risks companies face to their business, finances, and operations. Requiring these additional disclosures in Commission filings will allow investors to evaluate together the range of risks that a company faces, the existing and potential impacts of those risks, and the way that company management assesses and addresses those risks. Providing these disclosures in Commission filings also will subject them to enhanced liability that provides important investor protections by promoting the reliability of the disclosures.

The Commission has required disclosure of certain environmental matters for the past 50 years,[12] most recently issuing guidance in 2010 (''2010 Guidance'') on how existing rules may require disclosure of climate-related risks and their impacts on a registrant's business or financial condition.[13] Since the Commission issued the 2010 Guidance, there has been growing recognition that climate-related risks affect public companies' business, results of operations, and financial condition.[14] Our experience with the 2010 Guidance and current practices regarding disclosure of this information led us to conclude that, although many companies disclose some climate-related information, there was a need to both standardize and enhance the information available to investors about such matters and thus to propose an updated approach.[15] Since the proposal, ongoing regulatory developments and market practices with respect to disclosure of climate-related risks have only underscored the need for enhanced disclosure requirements in this area.[16] Although current disclosure practices elicit some useful information about climate-related risks, there remain significant deficiencies in the consistency and completeness of this information. We have therefore concluded that additional requirements are appropriate to ensure that investors have access to more complete and reliable information that will enable them to make informed investment and voting decisions.[17]

The rules that we are adopting respond to investors' concerns regarding the adequacy of current disclosure practices while taking into account comments received on the proposed rules. In general terms, the final rules will elicit enhanced and more consistent and comparable disclosure about the material risks that companies face and how companies manage those risks by requiring:

- A description of any climate-related risks that have materially impacted or are reasonably likely to have a material impact on the registrant, including on its strategy, results of operations, and financial condition, as well as the actual or potential material impacts of those same risks on its strategy, business model, and outlook;
- Specified disclosures, regarding a registrant's activities, if any, to mitigate or adapt to a material climate-related risk or use of transition plans, scenario analysis or internal carbon prices to manage a material climate-related risk;
- Disclosure about any oversight by the registrant's board of directors of climate-related risks and any role by management in assessing and managing material climate-related risks;
- A description of any processes the registrant uses to assess or manage material climate-related risks; and
- Disclosure about any targets or goals that have materially affected or are reasonably likely to materially affect the registrant's business, results of operations, or financial condition.

In addition, to facilitate investors' assessment of particular types of risk, the final rules require:

- Disclosure of Scope 1 and/or Scope 2 emissions on a phased in basis by certain larger registrants when those emissions are material, and the filing of an attestation report covering the required disclosure of such registrants' Scope 1 and/or Scope 2 emissions, also on a phased in basis; and
- Disclosure of the financial statement effects of severe weather events and other natural conditions including costs and losses.

A further summary of the final rules is presented below.[18]

In crafting the final rules, we benefited from extensive public comments. We received over 4,500 unique comment letters on the proposed climate-related disclosure rules and over 18,000 form letters.[19] Commenters included academics, accounting and audit firms, individuals, industry groups, investor groups, law firms, non-governmental organizations, pension funds, professional climate advisors, professional investment advisers and investment management companies, registrants, standard-setters, state

We discuss investors' need for more consistent, comparable, and decision-useful disclosure about registrants' climate-related risks in Sections I.A and II.A.3 below.

[12] *See infra* notes 202–203 and accompanying text.

[13] *See Commission Guidance Regarding Disclosure Related to Climate Change,* Release No. 33–9106 (Feb. 2, 2010) [75 FR 6290 (Feb. 8, 2010)] (''2010 Guidance''); and discussion *infra* notes 204–205 and accompanying text. *See also infra* section II.B.

[14] *See, e.g.,* letters from AllianceBernstein; Alphabet, Autodesk, Dropbox, eBay, Hewlett Packard Enterprise, HP Inc., Intel, Meta, PayPal, and Workday (June 17, 2022) (''Alphabet *et al.*''); Amazon (June 17, 2022); CalPERS; CalSTRS; Eni SpA (June 16, 2022) (''Eni SpA''); Pacific Investment Management Company (June 17, 2022) (''PIMCO''); PricewaterhouseCoopers (June 17, 2022) (''PwC''); and Wellington Mgmt. *See also infra* note 28 (discussing the Financial Stability Oversight Council's (''FSOC's'') Report on Climate-Related Financial Risk 2021).

[15] *See The Enhancement and Standardization of Climate-Related Disclosures for Investors,* Release No. 33–11042 (Mar. 21, 2022) [87 FR 21334 (Apr. 11, 2022)] (''Proposing Release'').

[16] *See infra* Section II.A.3 for a discussion of recent foreign and state regulatory developments regarding the disclosure of climate-related risks, including the announcement by several countries of their intention to adopt laws or regulations implementing the International Sustainability Standards Board's (''ISSB'') climate reporting standard in whole or part; and certain recent California laws requiring the disclosure of climate-related risks and greenhouse gas emissions by certain large companies.

[17] Even after adoption of the final rules, the 2010 Guidance will still be relevant because it discusses existing Commission rules, such as those pertaining to a registrant's description of its business and certain legal proceedings, which require disclosure regarding, among other things, compliance with environmental laws and regulations that are only tangentially mentioned in this rulemaking. Registrants should continue to consider the 2010 Guidance as they evaluate their disclosure obligations in their Description of Business, Risk Factors, Legal Proceedings, and Management's Discussion and Analysis. These disclosures should be based on the registrant's specific facts and circumstances.

[18] *See infra* section I.B.

[19] These comments are available at *https://www.sec.gov/comments/s7-10-22/s71022.htm.* Unless otherwise noted, comments referenced in this release pertain to these comments.

government officials, and U.S. Senators and Members of the House of Representatives. Many commenters generally supported the proposal to require climate-related disclosure. Others opposed the proposed rules in whole or in part. In addition, the Commission's Investor Advisory Committee offered broad support for the proposal, with recommendations for certain modifications to the proposed rules, as discussed in more detail below.[20] The Commission's Small Business Capital Formation Advisory Committee made several recommendations, including that the Commission exempt emerging growth companies (''EGCs'')[21] and smaller reporting companies (''SRCs'')[22] from the final rules or otherwise adopt scaled climate-related disclosure requirements for EGCs and SRCs.[23] We considered comments that were supportive as well as those that were critical of aspects of the proposed rules, including comments from investors as to the information they need to make informed investment or voting decisions, as well as concerns expressed by registrants, trade associations, and others with regard to compliance burdens, liability risk, and our statutory authority. After considering all comments, we are adopting final rules with modifications from the proposal to better effectuate our goals in requiring these additional disclosures while limiting the final rules' burdens on registrants.[24]

As the Commission explained when proposing the climate disclosure rules,[25] while climate-related issues are subject to various other regulatory schemes, our objective is limited to advancing the Commission's mission to protect investors, maintain fair, orderly, and efficient markets, and promote capital formation by providing disclosure to investors of information important to their investment and voting decisions. We are adopting the final rules to advance these investor protection, market efficiency and capital formation objectives, consistent with our statutory authority, and not to address climate-related issues more generally. The final rules should be read in that context. Thus, for example, in those instances where the rules reference materiality—consistent with our existing disclosure rules and market practices—materiality refers to the importance of information to investment and voting decisions about a particular company, not to the importance of the information to climate-related issues outside of those decisions. The Commission has been and remains agnostic about whether or how registrants consider or manage climate-related risks. Investors have expressed a need for this information on risks in valuing the securities they currently hold or are considering purchasing. While we recognize that the rules will impose burdens on registrants, we note that the degree of that burden will vary depending upon the circumstances facing individual registrants, as not every registrant will be required to provide all disclosures specified under the final rules. Moreover, as discussed further throughout the release, we believe that those burdens are justified by the informational benefits of the disclosures to investors.

A. Need for Enhanced and Standardized Climate-Related Disclosures

The importance of climate-related disclosures for investors has grown as investors,[26] companies, and the markets

[20] *See* U.S. Securities and Exchange Commission Investor Advisory Committee Recommendation Related to Climate-Related Disclosure Rule Proposals (Sept. 21, 2022), available at *https://www.sec.gov/spotlight/investor-advisory-committee-2012/20220921-climate-related-disclosure-recommendation.pdf* ''IAC Recommendation''). Specifically, the Investor Advisory Committee recommended the following changes to the proposed rules, as discussed in more detail in section II below: (1) adding a requirement for ''Management Discussion of Climate-Related Risks & Opportunities''; (2) requiring disclosure of material facility locations; and (3) eliminating the proposed requirement around board expertise. In addition to the IAC Recommendation, in June 2022, the Investor Advisory Committee held a meeting that included a panel discussion regarding climate disclosures. See the minutes for that meeting, including the panelists that participated in the discussion, at *https://www.sec.gov/spotlight/investor-advisory-committee-2012/iac060922-minutes.pdf.* The Investor Advisory Committee was established in Apr. 2012 pursuant to section 911 of the Dodd-Frank Wall Street Reform and Consumer Protection Act [Pub. L. 111–203, sec. 911, 124 Stat. 1376, 1822 (2010)] (''Dodd-Frank Act'') to advise and make recommendations to the Commission on regulatory priorities, the regulation of securities products, trading strategies, fee structures, the effectiveness of disclosure, and initiatives to protect investor interests and to promote investor confidence and the integrity of the securities marketplace.

[21] An EGC is a registrant that had total annual gross revenues of less than $1.235 billion during its most recently completed fiscal year and has not met the specified conditions for no longer being considered an EGC. *See* 17 CFR 230.405; 17 CFR 240.12b–2; 15 U.S.C. 77b(a)(19); 15 U.S.C. 78c(a)(80); and *Inflation Adjustments under Titles I and III of the JOBS Act,* Release No. 33–11098 (Sep. 9, 2022) [87 FR 57394 (Sep. 20, 2022)].

[22] An SRC is an issuer that is not an investment company, an asset-backed issuer (as defined in 17 CFR 229.1101), or a majority-owned subsidiary of a parent that is not an SRC and that: (1) had a public float of less than $250 million; or (2) had annual revenues of less than $100 million and either: (i) no public float; or (ii) a public float of less than $700 million. 17 CFR 229.10 (defining SRC and also providing how and when an issuer determines whether it qualifies as an SRC); 17 CFR 230.405 (same); 17 CFR 240.12–2 (same).

[23] *See* U.S. Securities and Exchange Commission Small Business Capital Formation Advisory Committee Recommendation Regarding the Enhancement and Standardization of Climate-Related Disclosures for Investors (July 13, 2022), available at *https://www.sec.gov/spotlight/sbcfac/sbcfac-climate-related-disclosures-recommendation-050622.pdf* (''SBCFAC Recommendation''). In addition, the Small Business Capital Formation Advisory Committee highlights generally in its parting perspectives letter that ''exemptions, scaling, and phase-ins for new requirements where appropriate, allows smaller companies to build their businesses and balance the needs of companies and investors while promoting strong and effective U.S. public markets.'' *See* Parting Perspectives Letter, U.S. Securities and Exchange Commission Small Business Capital Formation Advisory Committee (Feb. 28, 2023), available at *https://www.sec.gov/files/committee-perspectives-letter-022823.pdf.* Finally, we note that participants in the Commission-hosted Small Business Forum in 2023 recommended that the Commission revise the proposed rules to exempt SRCs, non-accelerated filers, EGCs, and other midsized companies and to consider scaling and delayed compliance (''Small Business Forum Recommendation (2023)''); participants in 2022 and 2021 Small Business Forums similarly recommended the Commission provide exemptions or scaled requirements for small and medium-sized companies in connection with any new ESG disclosure requirements adopted by the Commission. *See* Report on the 42nd Annual Small Business Forum (April 2023), available at *https://www.sec.gov/files/2023_oasb_annual_forum_report_508.pdf*; Report on the 41st Annual Small Business Forum (April 2022), available at *https://www.sec.gov/files/2022-oasb-annual-forum-report.pdf*; and Report on the 40th Annual Small Business Forum (May 2021), available at *https://www.sec.gov/files/2021_OASB_Annual_Forum_Report_FINAL_508.pdf. See also* U.S. Securities and Exchange Commission Office of the Advocate for Small Business Capital Formation, Annual Report Fiscal Year 2023 (''2023 OASB Annual Report''), available at *https://www.sec.gov/files/2023-oasb-annual-report.pdf,* at 84–85 (recommending generally that in engaging in rulemaking that affects small businesses, the Commission tailor the disclosure and reporting framework to the complexity and size of operations of companies, either by scaling obligations or delaying compliance for the smallest of the public companies). The Small Business Capital Formation Advisory Committee was established in Dec. 2016 pursuant to the Small Business Advocate Act of 2016 [Public Law 114–284 (2016)] to advise the Commission on rules, regulations, and policies with regard to the Commission's mission of protecting investors, maintaining fair, orderly, and efficient markets, and facilitating capital formation, as such rules, regulations, and policies relate to: capital raising by emerging, privately held small businesses (''emerging companies'') and publicly traded companies with less than $250,000,000 in public market capitalization (''smaller public companies'') through securities offerings, including private and limited offerings and initial and other public offerings; trading in the securities of emerging companies and smaller public companies; and public reporting and corporate governance requirements of emerging companies and smaller public companies.

[24] *See infra* section I.B for a summary of changes from the proposed rules, including the addition of materiality qualifiers in certain rule provisions and revisions to make the final rules less prescriptive.

[25] *See* Proposing Release, section I.

[26] Throughout this release, we refer to investors to include retail investors, institutional investors, and other market participants (such as financial analysts, investment advisers, and portfolio

Continued

have recognized that climate-related risks [27] can affect a company's business and its current and longer-term financial performance and position in numerous ways.[28] Climate-related natural disasters can damage issuers' assets, disrupt their operations, and increase their costs.[29] Any widespread market-based transition to lower carbon products, practices, and services—triggered, for example, by recent or future changes in consumer preferences [30] or the availability of financing, technology, and other market forces [31]—can lead to material changes in a company's business model or strategy and may have a material impact on a registrant's financial condition or operations.[32]

In addition to these market forces, changes in law, regulation, or policy may prompt companies to transition to lower carbon products, practices, and services. For example, governments including the United States and others throughout the world have made public commitments to transition to a lower carbon economy.[33] Efforts towards meeting GHG reduction goals [34] could have financial effects that materially impact registrants.[35] Recently both the Federal Government and several State governments have adopted or proposed laws and regulations that incentivize companies to reduce their GHG emissions and transition to a lower carbon economy in a variety of ways.[36] How a registrant assesses and plans in response to such legislative and regulatory efforts and going forward complies with such laws and regulations, may have a significant impact on its financial performance and investors' return on their investment in the company.

Further, as reflected in comments received in response to the proposed rules and as discussed throughout this release, investors seek to assess the climate-related risks that registrants face and evaluate how registrants are measuring and responding to those risks.[37] Effective disclosures regarding climate-related risks can help investors better assess how registrants are measuring and responding to those

managers) that use disclosures in Commission filings as part of their analysis and to help investors.

[27] The Commission has a long history of requiring disclosures to investors of information about risks facing registrants. See *infra* notes 184–191 and accompany text for a discussion of that history. In that time, the Commission has described those risks using differently terminology, but has largely focused on the same concepts. *See, e.g.,* 17 CFR 229.105(a) (Where appropriate, provide under the caption ''Risk Factors'' a discussion of the material factors that make an investment in the registrant or offering speculative or risky.); *Disclosure of Accounting Policies for Derivative Financial Instruments and Derivative Commodity Instruments and Disclosure of Quantitative and Qualitative Information About Market Risk Inherent in Derivative Financial Instruments, Other Financial Instruments, and Derivative Commodity Instruments,* Release No. 33–7386 (Jan. 31, 1997) [62 FR 6044 at n.12 (Feb. 10, 1997)] (Requiring disclosure of qualitative and quantitative information about market risk for derivatives and other financial instruments; Market risk is the risk of loss arising from adverse changes in market rates and prices, such as interest rates, foreign currency exchange rates, commodity prices, and other relevant market rate or price changes (*e.g.,* equity prices).); *Guides for Preparation and Filing of Registration Statements,* Release No. 33–4666 (Feb. 7, 1964) [29 FR 2490, 2492 (Feb. 15, 1964)] (In many instances the securities to be offered are of a highly speculative nature. The speculative nature may be due to such factors as an absence of operating history of the registrant, an absence of profitable operations in recent periods, the financial position of the registrant or the nature of the business in which the registrant is engaged or proposes to engage. . . In such instances, and particularly where a lengthy prospectus cannot be avoided, there should be set forth immediately following the cover page of the prospectus a carefully organized series of short, concise paragraphs summarizing the principal factors which make the offering speculative with references to other parts of the prospectus where complete information with respect to such factors is set forth.).

[28] For example, FSOC's Report on Climate-Related Financial Risk 2021 found that investors and businesses may experience direct financial effects from climate-related risks and observed that the costs would likely be broadly felt as they are passed through supply chains and to customers and as they reduce firms' ability to service debt or produce returns for investors. *See* 2021 FSOC Report, Chapter 1: *From Climate-Related Physical Risks to Financial Risks; From Climate-related Transition Risks to Financial Risks.* In 2023 FSOC repeated its concern that climate-related risks are an emerging and increasing threat to U.S. financial stability and stated that climate-related financial risk can manifest as and amplify traditional risks, such as credit, market, liquidity, operational, compliance, reputational, and legal risks. *See* FSOC, Annual Report 2023; *see also* letters from AGs of Cal. *et al.;* Ceres; PIMCO; and Wellington Mgmt; *infra* note 99 and accompanying text.

[29] *See, e.g.,* Greg Ritchie, Bloomberg, *90% of World's Biggest Firms Will Have at Least One Asset Exposed to Climate Risk, Fresh Data Show* (Sept. 15, 2022) (stating that over 90% of the world's largest companies will have at least one asset financially exposed to climate risks such as wildfires or floods by the 2050s, and more than a third of those companies will see at least one asset lose 20% or more of its value as a result of climate-related events).

[30] *See, e.g.,* McKinsey & Company, *How electric vehicles will shape the future* (Apr. 23, 2022), available at *https://www.mckinsey.com/featured-insights/themes/how-electric-vehicles-will-shape-the-future* (predicting that by 2035, the major automotive markets will be fully electric).

[31] *See, e.g.,* Amrith Ramkumar, Wall Street Journal, *JPMorgan Makes One of the Biggest Bets Ever on Carbon Removal* (May 23, 2023), available at *https://www.wsj.com/articles/jpmorgan-makes-one-of-the-biggest-bets-ever-on-carbon-removal-c7d5fe63* (noting that ''JPMorgan Chase has agreed to invest more than $200 million to purchase credits from several companies in the nascent [carbon removal] industry'').

[32] *See, e.g.,* BlackRock, *Managing the net-zero transition* (Feb. 2022), available at *https://www.blackrock.com/corporate/literature/whitepaper/bii-managing-the-net-zero-transition-february-2022.pdf* (''On top of physical climate risks, companies and asset owners must now grapple with the transition [to a net-zero economy]. Economies will be reshaped as carbon emissions are cut. The transition will involve a massive reallocation of resources. Supply and demand will shift, with mismatches along the way. Value will be created and destroyed across companies.'').

[33] *See* United Nations, *Net Zero,* available at *https://www.un.org/en/climatechange/net-zero-coalition* (''More than 140 countries, including the biggest polluters—China, the United States, India and the European Union—have set a net-zero target. . . .'').

[34] *See, e.g.,* Press Statement, Antony J. Blinken, Secretary of State, The United States Officially Rejoins the Paris Agreement (Feb. 19, 2021), available at *https://www.state.gov/the-united-states-officially-rejoins-the-paris-agreement/*. Over 190 countries have signed the Paris Climate Agreement, which aims to limit global temperature rise. Moreover, at the UN Climate Change Conference (COP 26), the United States committed to become net zero by 2050, China by 2060, and India by 2070. Further, over 100 countries including the U.S. formed a coalition to reduce methane emissions by 30% by 2030. *See David Worford,* COP26 Net Zero Commitments will Speed Energy Transition, Increase Pressure on Industries, According to Moody's Report, Environment+Energy Leader (Nov. 17, 2021), available at *https://www.environmentenergyleader.com/2021/11/cop26-net-zero-commitments-will-speed-energy-transition-increase-pressure-on-industries-according-to-moodys-report/* . At COP27, participating countries (which included the U.S.) reaffirmed their commitment to limit global temperature rise and agreed to provide ''loss and damage'' funding for vulnerable countries hit hard by climate disasters. *See* United Nations Climate Change, *COP27 Reaches Breakthrough Agreement on New ''Loss and Damage'' Fund for Vulnerable Countries* (Nov. 20, 2022), available at *https://unfccc.int/news/cop27-reaches-breakthrough-agreement-on-new-loss-and-damage-fund-for-vulnerable-countries.* More recently, at COP 28, participating countries (which included the U.S.) signed an agreement that includes commitments for ''deep emissions cuts and scaled-up finance.'' *See* United Nations Climate Change, *COP28 Agreement Signals ''Beginning of the End'' of the Fossil Fuel Era* (Dec. 13, 2023), available at *https://unfccc.int/news/cop28-agreement-signals-beginning-of-the-end-of-the-fossil-fuel-era.*

[35] *See, e.g.,* letter from Eni SpA (''[C]ompanies should discuss the reference scenario in which they are acting, providing information about any emerging trends, demands, uncertainties, commitments or events that are reasonably likely to have material impacts on the company's future profitability and growth prospects in dependence of likely or possible evolution of the regulatory or competitive environment in response to the global need to achieve the goals of the Paris Agreement.''); *see also infra* note 108 and accompanying text (citing comment letters that stated that, as governments and registrants have increasingly made pledges and enacted laws regarding a transition to a lower carbon economy, more consistent and reliable climate-related disclosure has become particularly important to help investors assess the reasonably likely financial impacts to a registrant's business, results of operations, and financial condition in connection with such governmental pledges or laws and the related financial and operational impacts of a registrant's progress in achieving its publicly announced, climate-related targets and goals).

[36] *See infra* section II.C for examples of Federal law and State regulation that may be sources of climate-related risk, particularly transition risk, for registrants.

[37] *See, e.g., infra* notes 99–106 and accompanying text.

risks. Those assessments can, in turn, inform investment and voting decisions.

We agree with the many commenters that stated that the current state of climate-related disclosure has resulted in inconsistent, difficult to compare, and frequently boilerplate disclosures, and has therefore proven inadequate to meet the growing needs of investors for more detailed, consistent, reliable, and comparable information about climate-related effects on a registrant's business and financial condition to use in making their investment and voting decisions.[38] Since the Commission issued the 2010 Guidance, awareness of climate-related risks to registrants has grown.[39] Retail and institutional investors [40] and investor-led initiatives [41] have increasingly expressed the need for more reliable information about the effects of climate-related risks, as well as information about how registrants have considered and addressed climate-related risks and opportunities when conducting operations and developing business strategy and financial plans.[42] At the same time, many companies have made climate-related commitments to reduce GHG emissions or become ''net zero'' by a particular date.[43] In response, investors have expressed the need for more detailed information to aid their investment and voting decisions, including insight into the potential impacts on registrants associated with fulfilling such commitments.[44]

B. Summary of the Final Rules

Having considered the comments received on the proposal, we are adopting the final amendments described in this release with modifications in response to those comments.[45]

Like the proposed rules, the final rules' reporting framework has structural elements, definitions, concepts, and, in some cases, substantive requirements that are similar to those in the Task Force on Climate-related Financial Disclosure (''TCFD''), an industry-led task force charged with promoting better-informed investment, credit, and insurance underwriting decisions.[46] The TCFD reporting framework was designed to elicit information to help investors better understand a registrant's climate-related risks to make more informed investment decisions.[47] We therefore find that it is an appropriate reference point for the final rules. Indeed, the core categories of the framework, which focus on governance, risk management, strategy, and metrics,[48] align with the type of information called for by existing disclosure requirements within Regulation S–K.[49] Accordingly, where consistent with our objectives, the authority Congress granted, and the comments received, certain provisions in the final rules are similar to the TCFD recommendations.[50] Similarly, we have used concepts developed by the GHG Protocol for aspects of the final rules, as it has become a leading reporting standard for GHG emissions.[51] Because

[38] *See, e.g.,* letters from AllianceBernstein; BlackRock, Inc. (June 17, 2022) (''BlackRock''); CalPERS; CalSTRS; Calvert Research and Management (June 17, 2022) (''Calvert''); Decatur Capital Management (May 29, 2022); Domini Impact; Harvard Management Company (June 6, 2022) (''Harvard Mgmt.''); Impax Asset Management (May 12, 2022) (''Impax Asset Mgmt.''); Trillium; and Wellington Mgmt. *But see, e.g.,* letters from the U.S. Chamber of Commerce (June 16, 2022) (''Chamber'') (June 16, 2022); National Association of Manufacturers (June 6, 2022) (''NAM'') (June 6, 2022); and Society for Corporate Governance (June 17, 2022) (''Soc. Corp. Gov.'').

[39] *See, e.g., supra* notes 28–32.

[40] Although some commenters stated that only institutional investors have demanded that the Commission adopt climate-related disclosure requirements, *see, e.g.,* letters from Chamber and Soc. Corp. Gov., most individual retail investors and firms advising such investors who submitted comments supported the proposed rules. *See, e.g.,* letters from Barry Gillespie (June 8, 2022); Betterment (June 17, 2022); Helene Marsh (June 7, 2022); and Rodney Smith (June 13, 2022); *see also* letter from Investment Company Institute (June 17, 2022) (''ICI'') (supporting ''key components of the proposal'' and noting that its ''members, US regulated funds . . . serv[e] more than 100 million investors'' and ''clearly have a significant interest in how the nature and availability of climate-related risk information provided by public companies evolves'' and ''analyze this, and other, information in formulating their investment decisions on behalf of those millions of long-term individual investors'').

[41] See Proposing Release, section I.C.1 for a discussion of some of these investor-led initiatives. Among other initiatives discussed in the Proposing Release, in 2019, more than 630 investors collectively managing more than $37 trillion signed the Global Investor Statement to Governments on Climate Change urging governments to require climate-related financial reporting. *See* United Nations Climate Change, *631 Institutional Investors Managing More than USD 37 Trillion in Assets Urge Governments to Step up Climate Ambition* (Dec. 9, 2019), available at *https://unfccc.int/news/631-institutional-investors-managing-more-than-usd-37-trillion-in-assets-urge-governments-to-step-up*. This investor initiative continued as the Investor Agenda's 2021 Global Investor Statement to Governments on the Climate Crisis, which was signed by 733 global institutional investors, including some of the largest investors, with more than $52 trillion in assets under management in the aggregate. This statement called for governments to implement a number of measures, including mandating climate risk disclosure. *See* The Investor Agenda, 2021 Global Investor Statement to Governments on the Climate Crisis (Oct. 27, 2021), available at *https://theinvestoragenda.org/wp-content/uploads/2021/09/2021-Global-Investor-Statementto-Governments-on-the-Climate-Crisis.pdf. But see* letter from Lawrence Cunningham for Twenty Professors of Law and Finance, George Washington University (Feb. 29, 2024) (noting that some large institutional asset managers or investors have recently withdrawn membership from certain of the investor-led initiatives described in the Proposing Release).

[42] *See, e.g.,* letters from AllianceBernstein; CalPERS; CalSTRS; Domini Impact; Harvard Mgmt; Impax Asset Mgmt; Trillium; and Wellington Mgmt.

[43] *See* Proposing Release, section I.C.1. *See also* Dieter Holger and Pierre Bertrand, *U.N. Group Recommends Stricter Rules Over Net-Zero Pledges,* The Wall Street Journal (Nov. 8, 2022) (stating that roughly 800 of the world's 2,000 largest public companies by revenue have committed to get to net zero emissions by 2050 or sooner); and United Nations, *Recognizing growing urgency, global leaders call for concrete commitments for clean, affordable energy for all by 2030 and net-zero emissions by 2050* (May 26, 2021).

[44] *See, e.g.,* letters from Calvert; Ceres; Investment Adviser Association (June 17, 2022) (''IAA''); and PIMCO. *See also* Climate Action 100+, As The 2023 Proxy Season Continues, Investors Are Calling On Climate Action 100+ Focus Companies For More Robust Climate Action (May 9, 2023) (stating that in addition to more robust corporate governance on climate, investors are calling for disclosure on key issues including greenhouse gas emissions targets, transition plans (including policies to ensure a just transition for workers and communities), and reporting on methane measurements); Climate Action 100+, Climate Action 100+ Net Zero Company Benchmark Shows Continued Progress On Ambition Contrasted By A Lack Of Detailed Plans Of Action (Oct. 18, 2023); and Dieter Holger, Corporate Climate Plans Fall Well Short of Targets, With a Few Bright Spots, The Wall Street Journal (Feb. 13, 2023).

[45] As stated above, the Commission received a large number of comments on the proposal, and we considered all of those comments. Nevertheless, considering the overlapping content and themes in the comments, and for the sake of clarity, we have not cited each individual comment letter in support of or against a particular position in the discussion below.

[46] *See* TCFD, Recommendations of the Task Force on Climate-related Financial Disclosures (June 2017), available at *https://assets.bbhub.io/company/sites/60/2020/10/FINAL-2017-TCFD-Report-11052018.pdf.* In Apr. 2015, the Group of 20 Finance Ministers directed the Financial Stability Board (''FSB'') to evaluate ways in which the financial sector could address climate-related concerns. The FSB concluded that better information was needed to facilitate informed investment decisions and to help investors and other market participants to better understand and take into account climate-related risks. The FSB established the TCFD. Since then, the framework for climate-related disclosures developed by the TCFD has been refined and garnered global support as a reliable framework for climate-related financial reporting. For background on the TCFD and development of its recommendations, *see* Proposing Release, section I.D.1.

[47] *See* TCFD, *supra* note 46, at ii–iii.

[48] *See* TCFD, *supra* note 4646 (listing governance, strategy, risk management, and metrics and targets as core elements of the TCFD framework).

[49] *See, e.g.,* 17 CFR 229.105 (Risk factors), 17 CFR 229.303 (Management's discussion and analysis of financial condition and results of operation), 17 CFR 229.401 (Directors, executive officers, promoters and control persons), and 17 CFR 229.407 (Corporate governance).

[50] As discussed below, a number of commenters recommended that the Commission incorporate the TCFD recommendations into the final rules. *See infra* notes 115–118 and accompanying text.

[51] *See* World Business Council for Sustainable Development and World Resources Institute, *The Greenhouse Gas Protocol, A Corporate Accounting and Reporting Standard* REVISED EDITION, available at *https://ghgprotocol.org/corporate-standard.* The GHG Protocol was created through a partnership between the World Resources Institute

Continued

many registrants have elected to follow the TCFD recommendations when voluntarily providing climate-related disclosures,[52] and/or have relied on the GHG Protocol when reporting their GHG emissions,[53] building off these reporting frameworks will mitigate those registrants' compliance burdens and help limit costs.[54] Building off the TCFD framework and the GHG Protocol will also benefit those investors seeking to make comparisons between Commission registrants and foreign companies not registered under the Federal securities laws that make disclosures under the TCFD framework and GHG Protocol, mitigating the challenges they experience when making investment and voting decisions.[55] Nevertheless, while the final rules use concepts from both TCFD and the GHG Protocol where appropriate, the rules diverge from both of those frameworks in certain respects where necessary for our markets and registrants and to achieve our specific investor protection and capital formation goals.

1. Content of the Climate-Related Disclosures

The final rules will create a new subpart 1500 of Regulation S–K and Article 14 of Regulation S–X. In particular, the final rules will require a registrant to disclose information about the following items:

- Any climate-related risks identified by the registrant that have had or are reasonably likely to have a material impact on the registrant, including on its strategy, results of operations, or financial condition in the short-term (*i.e.,* the next 12 months) and in the long-term (*i.e.,* beyond the next 12 months); [56]
- The actual and potential material impacts of any identified climate-related risks on the registrant's strategy, business model, and outlook, including, as applicable, any material impacts on a non-exclusive list of items; [57]
- If, as part of its strategy, a registrant has undertaken activities to mitigate or adapt to a material climate-related risk, a quantitative and qualitative description of material expenditures incurred and material impacts on financial estimates and assumptions that, in management's assessment, directly result from such mitigation or adaptation activities; [58]
- If a registrant has adopted a transition plan to manage a material transition risk, a description of the transition plan, and updated disclosures in the subsequent years describing the actions taken during the year under the plan, including how the actions have impacted the registrant's business, results of operations, or financial condition, and quantitative and qualitative disclosure of material expenditures incurred and material impacts on financial estimates and assumptions as a direct result of the disclosed actions; [59]
- If a registrant uses scenario analysis and, in doing so, determines that a climate-related risk is reasonably likely to have a material impact on its business, results of operations, or financial condition, certain disclosures regarding such use of scenario analysis; [60]
- If a registrant's use of an internal carbon price is material to how it evaluates and manages a material climate-related risk, certain disclosures about the internal carbon price; [61]
- Any oversight by the board of directors of climate-related risks and any role by management in assessing and managing the registrant's material climate-related risks; [62]
- Any processes the registrant has for identifying, assessing, and managing material climate-related risks and, if the registrant is managing those risks, whether and how any such processes are integrated into the registrant's overall risk management system or processes; [63]
- If a registrant has set a climate-related target or goal that has materially affected or is reasonably likely to materially affect the registrant's business, results of operations, or financial condition, certain disclosures about such target or goal, including material expenditures and material impacts on financial estimates and assumptions as a direct result of the target or goal or actions taken to make progress toward meeting such target or goal; [64]
- If a registrant is a large accelerated filer (''LAF''),[65] or an accelerated filer (''AF'') [66] that is not otherwise exempted, and its Scope 1 emissions and/or its Scope 2 emissions metrics are material, certain disclosure about those emissions; [67]

---

and the World Business Council for Sustainable Development, which agreed in 1997 to collaborate with businesses and NGOs to create a standardized GHG accounting methodology. *See* Greenhouse Gas Protocol, *About Us,* available at *https://ghgprotocol.org/about-us*. The GHG Protocol, which is subject to updates periodically, has been broadly incorporated into various sustainability reporting frameworks, including the TCFD.

[52] *See, e.g., infra* note 2690 and accompanying text (describing a report finding that 50 percent of sustainability reports from Russell 1000 companies aligned with the TCFD recommendations). In addition, many registrants submit climate disclosures to the CDP, formerly known as the ''Carbon Disclosure Project,'' which is aligned with the TCFD framework. *See* CDP Worldwide (''CDP''), *How CDP is aligned to the TCFD,* available at *https://www.cdp.net/en/guidance/how-cdp-is-aligned-to-the-tcfd* (last visited Feb. 21, 2024); CDP, *How companies can take action*, available at *https://www.cdp.net/en/companies* (noting that ''23,000+ companies representing two thirds of global market capitalization disclosed through CDP in 2023''); *see also* CDP, *About us*, available at *https://www.cdp.net/en/info/about-us* (''CDP is a not-for-profit charity that runs the global disclosure system for investors, companies, cities, states and regions to manage their environmental impacts. . . . CDP was established as the 'Carbon Disclosure Project' in 2000, asking companies to disclose their climate impact.''). In addition, several international climate disclosure initiatives are based on the TCFD recommendations. *See infra* section II.A.3.

[53] *See infra* section II.A; and Proposing Release, section I.D.2; *see also infra* note 2621 (noting that, in the U.S. and other jurisdictions, GHG emissions quantification and reporting are generally based on the GHG Protocol).

[54] *See infra* note 2760 and accompanying text.

[55] *Cf. infra* notes 2568–2570 and accompanying text.

[56] *See infra* section II.D.1.

[57] *See infra* sections II.D.1. That non-exclusive list is comprised of the registrant's: (1) business operations, including the types and locations of its operations, (2) products and services, (3) suppliers, purchasers, or counterparties to material contracts, to the extent known or reasonably available, (4) activities to mitigate or adapt to climate-related risks, including adoption of new technologies or processes, and (5) expenditure for research and development.

[58] *See infra* sections II.D.1.

[59] *See infra* section II.D.2.

[61] *See infra* section II.D.4.

[62] *See infra* section II.E.

[63] *See infra* section II.F.

[64] *See infra* section II.G.

[65] An LAF is an issuer after it first meets the following conditions as of the end of its fiscal year: (i) the issuer had an aggregate worldwide market value of the voting and non-voting common equity held by its non-affiliates of $700 million or more, as of the last business day of the issuer's most recently completed second fiscal quarter; (ii) the issuer has been subject to the requirements of Section 13(a) or 15(d) of the Exchange Act for a period of at least twelve calendar months; (iii) the issuer has filed at least one annual report pursuant to Section 13(a) or 15(d) of the Exchange Act; and (iv) the issuer is not eligible to use the requirements for SRCs under the revenue test in paragraph (2) or (3)(iii)(B) of the SRC definition in Rule 12b–2. 17 CFR 240.12b–2 (defining LAF and providing how and when an issuer determines whether it qualifies as an LAF).

[66] An AF is an issuer after it first meets the following conditions as of the end of its fiscal year: (i) the issuer had an aggregate worldwide market value of the voting and non-voting common equity held by its non-affiliates of $75 million or more, but less than $700 million, as of the last business day of the issuer's most recently completed second fiscal quarter; (ii) the issuer has been subject to the requirements of Section 13(a) or 15(d) of the Exchange Act for a period of at least twelve calendar months; and (iii) the issuer has filed at least one annual report pursuant to Section 13(a) or 15(d) of the Exchange Act; and (iv) the issuer is not eligible to use the requirements for SRCs under the revenue test in paragraph (2) or (3)(iii)(B) of the SRC definition in Rule 12b–2. 17 CFR 240.12b–2 (defining AF and providing how and when an issuer determines whether it qualifies as an AF).

[67] *See infra* section II.H. The final rules define the terms ''Scope 1 emissions'' (direct GHG emissions from operations that are owned or controlled by a

- The capitalized costs, expenditures expensed, charges, and losses incurred as a result of severe weather events and other natural conditions, such as hurricanes, tornadoes, flooding, drought, wildfires, extreme temperatures, and sea level rise, subject to applicable one percent and de minimis disclosure thresholds; [68]
- The capitalized costs, expenditures expensed, and losses related to carbon offsets and renewable energy credits or certificates (''RECs'') if used as a material component of a registrant's plans to achieve its disclosed climate-related targets or goals; and [69]
- If the estimates and assumptions a registrant uses to produce the financial statements were materially impacted by risks and uncertainties associated with severe weather events and other natural conditions, such as hurricanes, tornadoes, flooding, drought, wildfires, extreme temperatures, and sea level rise, or any disclosed climate-related targets or transition plans, a qualitative description of how the development of such estimates and assumptions was impacted.[70]

In addition, under the final rules, a registrant that is required to disclose Scopes 1 and/or 2 emissions and is an LAF or AF must file an attestation report in respect of those emissions subject to phased in compliance dates. An AF must file an attestation report at the limited assurance level beginning the third fiscal year after the compliance date for disclosure of GHG emissions. An LAF must file an attestation report at the limited assurance level beginning the third fiscal year after the compliance date for disclosure of GHG emissions, and then file an attestation report at the reasonable assurance level beginning the seventh fiscal year after the compliance date for disclosure of GHG emissions. The final rules also require a registrant that is not required to disclose its GHG emissions or to include a GHG emissions attestation report pursuant to the final rules to disclose certain information if the registrant voluntarily discloses its GHG emissions in a Commission filing and voluntarily subjects those disclosures to third-party assurance.

The final rules reflect a number of modifications to the proposed rules based on the comments we received. As discussed in more detail below, we have revised the proposed rules in several respects, including by:

- Adopting a less prescriptive approach to certain of the final rules, including, for example, the climate-related risk disclosure, board oversight disclosure, and risk management disclosure requirements; [71]
- Qualifying the requirements to provide certain climate-related disclosures based on materiality, including, for example, disclosures regarding impacts of climate-related risks, use of scenario analysis, and maintained internal carbon price;
- Eliminating the proposed requirement to describe board members' climate expertise;
- Eliminating the proposed requirement for all registrants to disclose Scope 1 and Scope 2 emissions and instead requiring such disclosure only for LAFs and AFs, on a phased in basis, and only when those emissions are material and with the option to provide the disclosure on a delayed basis;
- Exempting SRCs and EGCs from the Scope 1 and Scope 2 emissions disclosure requirement;
- Modifying the proposed assurance requirement covering Scope 1 and Scope 2 emissions for AFs and LAFs by extending the reasonable assurance phase in period for LAFs and requiring only limited assurance for AFs;
- Eliminating the proposed requirement to provide Scope 3 emissions disclosure (which the proposal would have required in certain circumstances);
- Removing the requirement to disclose the impact of severe weather events and other natural conditions and transition activities on each line item of a registrant's consolidated financial statements;
- Focusing the required disclosure of financial statement effects on capitalized costs, expenditures expensed, charges, and losses incurred as a result of severe weather events and other natural conditions in the notes to the financial statements;
- Requiring disclosure of material expenditures directly related to climate-related activities as part of a registrant's strategy, transition plan and/or targets and goals disclosure requirements under subpart 1500 of Regulation S–K rather than under Article 14 of Regulation S–X;
- Extending a safe harbor from private liability for certain disclosures, other than historic facts, pertaining to a registrant's transition plan, scenario analysis, internal carbon pricing, and targets and goals; [72]
- Eliminating the proposal to require a private company that is a party to a business combination transaction, as defined by Securities Act Rule 165(f), registered on Form S–4 or F–4 to provide the subpart 1500 and Article 14 disclosures;
- Eliminating the proposed requirement to disclose any material change to the climate-related disclosures provided in a registration statement or annual report in a Form 10–Q (or, in certain circumstances, Form 6–K for a registrant that is a foreign private issuer that does not report on domestic forms); and
- Extending certain phase in periods.

2. Presentation and Submission of the Climate-Related Disclosures

The final rules provide that a registrant (both domestic and foreign private issuer [73]) must:

- File the climate-related disclosure in its registration statements and Exchange Act annual reports; [74]
- Include the climate-related disclosures required under Regulation S–K, except for any Scopes 1 and/or 2 emissions disclosures, in a separate, appropriately captioned section of its filing or in another appropriate section of the filing, such as Risk Factors, Description of Business, or Management's Discussion and Analysis of Financial Condition and Results of Operations (''MD&A''), or, alternatively, by incorporating such disclosure by reference from another Commission filing as long as the disclosure meets the

registrant) and ''Scope 2 emissions'' (indirect GHG emissions from the generation of purchased or acquired electricity, steam, heat, or cooling that is consumed by operations owned or controlled by a registrant).

[68] *See infra* section II.K.

[69] *See infra* section II.K.

[70] *See infra* section II.K.

[71] See *infra* sections II.C.1.c, II.E.1.c, and II.F.3 for discussions of how we made these disclosure requirements less prescriptive as compared to the proposed rules.

[72] In addition, the existing safe harbors for forward-looking statements under the Securities Act and Exchange Act will be available for other aspects of the climate-related disclosures. *See* Securities Act section 27A [15 U.S.C. 77z–2], Exchange Act section 21E [15 U.S.C. 78u–5], 17 CFR 230.175 (''Securities Act Rule 175'') and 17 CFR 240.3b–6 (''Exchange Act Rule 3b–6'').

[73] As defined by Commission rules, a foreign private issuer is any foreign issuer other than a foreign government except an issuer meeting the following conditions as of the last business day of its most recently completed second fiscal quarter: more than 50% of the outstanding voting securities of such issuer are directly or indirectly owned of record by residents of the United States; and either the majority of its executive officers or directors are United States citizens or residents, more than 50% of the assets of the issuer are located in the United States, or the business of the issuer is administered principally in the United States. *See* 17 CFR 230.405 and 17 CFR 240.3b–4. See *infra* section II.L.3 for a discussion of certain types of registrants (both domestic and foreign private issuer) that are not subject to the final rules.

[74] *See infra* section II.N.3.

electronic tagging requirements of the final rules; [75]

• If required to disclose its Scopes 1 and 2 emissions,[76] provide such disclosure:

○ If a registrant filing on domestic forms, in its annual report on Form 10–K, in its quarterly report on Form 10–Q for the second fiscal quarter in the fiscal year immediately following the year to which the GHG emissions metrics disclosure relates incorporated by reference into its Form 10–K,or in an amendment to its Form 10–K filed no later than the due date for the Form 10–Q for its second fiscal quarter; [77]

○ If a foreign private issuer not filing on domestic forms, in its annual report on Form 20–F, or in an amendment to its annual report on Form 20–F, which shall be due no later than 225 days after the end of the fiscal year to which the GHG emissions metrics disclosure relates; [78] and

○ If filing a Securities Act or Exchange Act registration statement, as of the most recently completed fiscal year that is at least 225 days prior to the date of effectiveness of the registration statement;

• If required to disclose Scopes 1 and 2 emissions, provide such disclosure for the registrant's most recently completed fiscal year and, to the extent previously disclosed, for the historical fiscal year(s) included in the filing; [79]

• If required to provide an attestation report over Scope 1 and Scope 2 emissions, provide such attestation report and any related disclosures in the filing that contains the GHG emissions disclosures to which the attestation report relates; [80]

• Provide the financial statement disclosures required under Regulation S–X for the registrant's most recently completed fiscal year, and to the extent previously disclosed or required to be disclosed, for the historical fiscal year(s) included in the filing, in a note to the registrant's audited financial statements; [81] and

• Electronically tag both narrative and quantitative climate-related disclosures in Inline XBRL.[82]

3. Safe Harbor for Certain Climate-Related Disclosures

The final rules provide a safe harbor for climate-related disclosures pertaining to transition plans, scenario analysis, the use of an internal carbon price, and targets and goals, provided pursuant to Regulation S–K sections 229.1502(e), 229.1502(f), 229.1502(g), and 229.1504. The safe harbor provides that all information required by the specified sections, except for historical facts, is considered a *forward-looking statement* for purposes of the Private Securities Litigation Reform Act (''PSLRA'') [83] safe harbors for forward-looking statements provided in section 27A of the Securities Act [84] and section 21E of the Exchange Act [85] (''PSLRA safe harbors'').[86]

4. Phase in Periods

As discussed in more detail below,[87] the final rules will be phased in for all registrants, with the compliance date dependent upon the status of the registrant as an LAF, an AF, a non-accelerated filer (''NAF''),[88] SRC, or EGC, and the content of the disclosure.

II. Discussion

A. Overview and Purpose of the Climate-Related Disclosure Rules

1. Proposed Rules

a. Consistent, Comparable, and Reliable Disclosures for Investors

The Commission proposed the climate-related disclosure rules in order to elicit more consistent, comparable, and reliable information for investors to enable them to make informed assessments of the impact of climate-related risks on current and potential investments.[89] Accordingly, the Commission proposed to amend Regulation S–K to add a new subpart 1500 that would require a registrant to disclose: any material climate-related impacts on its strategy, business model, and outlook; its governance of climate-related risks; its climate-related risk management; GHG emissions metrics; and climate-related targets and goals, if any.[90]

The Commission also proposed to amend Regulation S–X to add a new article (Article 14), which would have required a registrant to disclose in a note to its financial statements certain disaggregated climate-related financial statement metrics.[91] The proposed rules would have required disclosure falling under the following three categories of information: financial impact metrics; expenditure metrics; and financial estimates and assumptions. The Commission proposed the financial statement metrics requirement to increase transparency about how climate-related risks impact a registrant's financial statements.[92] Under the proposed amendments to both Regulation S–K and Regulation S–X, disclosure of climate-related opportunities would be optional.

As noted above, the proposed rules were modeled on the TCFD disclosure framework.[93] The TCFD framework consists of four core themes that provide a structure for the assessment, management, and disclosure of climate-related financial risks: governance, strategy, risk management, and metrics and targets.[94] The Commission proposed to model its climate-related disclosure rules on the TCFD framework given that many registrants and their investors are already familiar with the framework and are making disclosures voluntarily consistent with the framework. The Commission indicated that this should help to mitigate both the compliance burden for registrants and any burdens faced by investors in analyzing the new disclosures and would facilitate comparability across registrants.[95]

b. Proposed Location of the Disclosure

In proposing to include the climate-related disclosure rules in Regulation S–K and Regulation S–X, the Commission stated its belief that the proposed disclosure would be fundamental to investors' understanding of the nature of a registrant's business and its operating prospects and financial performance and, therefore, should be presented together with other disclosure about the registrant's business and financial condition.[96] The Commission proposed to require a registrant to include the climate-related disclosure in Securities

[75] *See infra* section II.A.3.

[76] *See, e.g., infra* section II.H.3.c (noting that unlike the proposed rules, which would have exempted SRCs from the requirement to disclose Scope 3 emissions, the final rules will exempt SRCs and EGCs from any requirement to disclose its GHG emissions, including its Scopes 1 and 2 emissions).

[77] *See infra* section II.H.3.d.

Act or Exchange Act registration statements and Exchange Act annual reports in a separately captioned ''Climate-Related Disclosure'' section and in the financial statements. The Commission stated that the proposed presentation would facilitate review of the climate-related disclosure by investors alongside other relevant company financial and non-financial information and further the comparability of the disclosure across registrants.[97]

The Commission also proposed to permit a registrant to incorporate by reference disclosure from other parts of the registration statement or annual report (*e.g.,* Risk Factors, MD&A, Description of Business, or the financial statements) or from other filed or submitted reports into the Climate-Related Disclosure section if it would be responsive to the topics specified in the proposed Regulation S–K items and if the registrant satisfied the incorporation by reference requirements under the Commission's rules and forms. As the Commission explained, allowing incorporation by reference for the Regulation S–K climate-related disclosure would be consistent with the treatment of other types of business disclosure under our rules and would provide some flexibility for registrants while reducing redundancy in disclosure.[98]

2. Comments

Many commenters, including both investors and registrants, stated that climate-related risks can have material impacts on companies' financial position or performance.[99] Commenters indicated that when it is available, information about climate-related risks is currently used to assess the future financial performance of public companies and inform investment decision-making.[100] Some commenters provided specific examples of how that type of information helps investors make investment decisions today.[101]

However, many commenters stated that the Commission's current reporting requirements do not yield adequate or sufficient information regarding climate-related risks.[102] Many commenters also expressed the view that the current, largely voluntary reporting of climate-related information under various third-party frameworks, which differ in certain respects, has allowed registrants to selectively choose which climate-related disclosures to provide and has failed to produce complete, consistent, reliable, and comparable information with the level of detail needed by investors to assess the financial impact of climate-related risks on registrants.[103] Commenters stated that, despite the Commission's issuance of the 2010 Guidance, registrants often provided climate-related disclosure that is boilerplate, with some being or bordering on ''greenwashing.''[104] Commenters further indicated that investors, both institutional and retail,[105] were in need of more consistent and comparable climate-related disclosure to enable them to make fully informed decisions and ensure securities are priced to better reflect climate-related risk.[106] Commenters indicated that adoption of mandatory, climate-related disclosure rules would improve the timeliness, quality, and reliability of climate-related information, which would facilitate investors' comparison of climate-related risks and lead to more accurate securities valuations.[107] Commenters also stated that, as governments and registrants have increasingly made pledges and enacted laws regarding a transition to a lower carbon economy, more consistent and reliable climate-related disclosure has become particularly important to help investors assess the reasonably likely financial impacts to a registrant's business, results of operations, and financial condition in connection with such governmental pledges or laws and the related financial and operational impacts of a registrant's progress in achieving its publicly announced, climate-related targets and goals.[108]

[107] *See, e.g.,* letters from CalSTRS (stating that ''[u]sing the TCFD framework as the basis for guiding issuers to more comparable disclosures would help [investors] more easily compare companies' approach to climate risk management in a timelier fashion''); Ceres (stating that ''the proposed rule would promote both allocative and informational efficiency'' and that ''[t]imely, comparable information about each company's climate related risks and opportunities would improve informational efficiency, leading to more accurate valuation''); and PwC (stating that ''[m]andatory disclosure in annual filings—including the notes to the financial statements—would enhance comparability while ensuring that the timeliness, quality, and reliability of climate information is commensurate with that of the financial data'').

[108] *See, e.g.,* letters from Amer. for Fin. Reform (Dec. 1, 2022) (stating that, with passage of the Inflation Reduction Act, investors will need the Commission's proposed climate-related disclosures to determine which companies and sectors are best

Continued

Other commenters, however, opposed adoption of the proposed rules and requested either that the Commission rescind the proposal or make significant revisions in the final rules.[109] Some of these commenters, while opposing specific aspects of the proposed rules, agreed with the overall intent of the proposal or otherwise stated that rules requiring climate-related information were appropriate and would be helpful to investors.[110] As discussed in more detail below, other commenters asserted that the Commission lacks statutory authority to adopt the proposed climate-related disclosure rules.[111] Other commenters asserted that current voluntary reporting practices are sufficient to serve the needs of investors and markets, and so the proposed rules are unnecessary.[112] Similarly, some opposing commenters stated that, because in their view the Commission's current disclosure regime already requires a registrant to disclose climate-related risks if material, adoption of the proposed rules would impose a significant burden on registrants while resulting in little additional benefit for investors.[113] Opposing commenters further stated that, because the proposed rules were overly prescriptive and not bound in every instance by materiality, their adoption would result in the disclosure of a large volume of immaterial information that would be confusing for investors.[114]

Many commenters supported basing the Commission's climate disclosure rules on the TCFD framework.[115] Commenters stated that because the TCFD framework has been widely accepted globally by both issuers and investors, its use as a model for the Commission's rules would help elicit climate-related disclosures that are consistent, comparable, and reliable.[116] Commenters also stated that basing the Commission's climate disclosure rules on the TCFD framework would benefit investors because of their familiarity with the framework and its usefulness in understanding the connection between climate-related risk and financial impact.[117] Commenters also stated that basing the Commission's climate-related disclosure rules on the TCFD framework, with which many registrants are familiar and already using, should help mitigate the compliance burden.[118]

One commenter expressed support for basing the rule proposal on the TCFD framework while also stating that the Commission should consider requiring the use of the International Sustainability Standards Board's (''ISSB'') climate reporting standard.[119] This commenter noted that, like the rule proposal, the ISSB climate reporting standard is based on the TCFD framework. This commenter, among others, stated that requiring the use of, or basing the Commission's climate disclosure rules on, the ISSB climate reporting standard would contribute substantially to the establishment of a global climate disclosure baseline, which would reduce the reporting burden on companies listed in multiple jurisdictions.[120] Some commenters, however, opposed basing the Commission's climate disclosure rules on the TCFD framework. One commenter stated that the Commission should not base its rules on a disclosure framework, such as the TCFD framework, that has not been developed by a U.S. regulatory agency because there is no process in place for domestic companies, such as oil and gas companies, to provide their input into potential changes to the framework.[121] Another commenter stated that the Commission should not base its climate disclosure rules on the TCFD because, in its view, there is currently no third-party framework, including the TCFD, capable of providing reliable and consistent metrics for climate-related risks.[122] A different commenter disputed that U.S. companies have widely adopted the TCFD framework and recommended instead that the Commission base its climate disclosure rules on the EPA's Greenhouse Gas Reporting Program, with which many U.S. registrants are familiar.[123]

Commenters expressed mixed views regarding the proposed location of the climate-related disclosure rules. Many commenters supported the proposed placement of climate-related disclosure rules in a new subpart of Regulation S–K and the placement of the proposed financial metrics in a new article of

positioned and ready to capitalize on the IRA's GHG reduction incentives over the coming decade, and to analyze the progress towards and profitability of companies' transition strategies in this new investment context); CalPERS; and Ceres.

Regulation S–X.[124] Commenters stated that amending Regulation S–K and Regulation S–X to include climate-related disclosure requirements would facilitate the presentation of climate-related business and financial information as part of a registrant's regular business reporting [125] and appropriately reflect the fact that information about climate-related risks is essential to investors' decision-making and fundamental to understanding the nature of a company's operating prospects and financial performance.[126] Commenters further stated that requiring climate-related disclosures in annual filings, including the notes to the financial statements, would enhance the accessibility, comparability, and reliability of such disclosures for investors.[127]

Many other commenters, however, opposed adoption of the proposed financial metrics under Regulation S–X because of various concerns relating to implementation and interpretation of the proposed financial metrics.[128] A number of these commenters recommended instead requiring disclosure of the financial impact of climate-related events as part of a registrant's MD&A pursuant to 17 CFR 229.303 (''Item 303 of Regulation S–K'').[129]

Commenters also had mixed views on the proposed placement of the climate-related disclosures in a separately captioned section of a registration statement or annual report. Several commenters supported the proposed placement because it would facilitate access to and comparability of the climate-related disclosures for investors.[130] Commenters also supported the proposed alternative to permit registrants to incorporate by reference climate-related disclosures from other sections of a filing or from other filings because it would avoid duplication in the filing, would add flexibility regarding the presentation of the disclosures, and would be consistent with the Commission's incorporation by reference rules regarding other types of disclosure.[131] Some of the commenters specifically recommended allowing registrants to include climate-related governance disclosure in their proxy statements, which could then be incorporated by reference into their annual reports.[132]

Some commenters opposed placing climate-related disclosures in a separate section of a filing, asserting that existing sections, such as MD&A and Risk Factors, are more appropriate places to provide the climate-related disclosures and stating that it should be up to each registrant to determine the most suitable place for such disclosure.[133] Some commenters recommended that the Commission require some or all of the climate-related disclosures to be included in a new, separate report to be furnished to the Commission following the filing of the annual report because of concerns about the timing and liability for disclosures related to GHG emissions, financial metrics, and certain other aspects of the climate-related disclosures.[134]

3. Final Rules

As discussed in greater detail below, we are adopting climate-related disclosure rules because, as many commenters have indicated, despite an increase in climate-related information being provided by some companies since the Commission issued its 2010 Guidance, there is a need to improve the consistency, comparability, and reliability of climate-related disclosures for investors.[135] As climate-related risks have become more prevalent,[136] investors have increasingly sought information from registrants about the actual and potential impacts of climate-related risks on their financial performance or position.[137] Both

[135] *See supra* notes 102 and 103 and accompanying text. The Commission also stated in the Proposing Release that, as part of its filing review process, Commission staff had assessed the extent to which registrants currently disclose climate-related risks in their filings. Proposing Release at 21339. The staff noted that, since 2010, disclosures climate-related disclosures have generally increased, but there is considerable variation in the content, detail, and location (*i.e.,* in reports filed with the Commission, in sustainability reports posted on registrant websites, or elsewhere) of climate-related disclosures. *Id.* The staff also observed significant inconsistency in the depth and specificity of disclosures by registrants across industries and within the same industry. *Id.* The staff found significantly more extensive information in registrants' sustainability reports and other locations such as their websites as compared with their reports filed with the Commission. *Id.* In addition, the disclosures in registrants' Forms 10–K frequently contained general, boilerplate discussions that provide limited information as to the registrants' assessment of their climate-related risks or their impact on the companies' business. *Id.*

Continued

institutional[138] and retail investors[139] have stated that they found much of the voluntary climate-related reporting to be lacking in quality and completeness and difficult to compare and as a result have incurred costs and inefficiencies when attempting to assess climate-related risks and their effect on the valuation of a registrant's securities. Moreover, although the 2010 Guidance reflects that climate-related information may be called for by current Commission disclosure requirements, climate-related information has often been provided outside of Commission filings, such as in sustainability reports or other documents posted on registrants' websites, which are not subject to standardized disclosure rules, and, as noted by some commenters, are not necessarily prepared with the informational needs of investors in mind.[140] Such information also may not be prepared with the same level of rigor that results from the disclosure controls and procedures (''DCP'') required for disclosure in Commission filings,[141] and as a result may not be as reliable.[142]

Consistent with and as authorized by our enabling statutes, we are adopting the climate-related disclosure requirements discussed herein, so that investors will have the information they need to make informed investment and voting decisions by evaluating a registrant's exposure to material climate-related risks. We modeled the proposed disclosure requirements in large part on the TCFD framework. As discussed in the Proposing Release and as many commenters noted, that framework has been widely accepted by issuers and investors.[143] The TCFD framework focuses on matters that are material to an investment or voting decision and is grounded in concepts that tie climate-related risk disclosure considerations to matters that may affect the results of operations, financial condition, or business strategy of a registrant. Because the TCFD framework is intended to elicit disclosure of climate-related risks that have materially affected or are reasonably likely to materially affect the business, results of operations, or financial condition of a company, it served as an appropriate model for the Commission's proposed climate-related disclosure rules. We therefore disagree with commenters that stated that the Commission's proposed rules would require disclosure of information that is primarily of general or environmental interest and not of financial interest.[144] The final rules continue to reflect many of the TCFD's recommendations, modified based on the input of commenters, which will enhance the usefulness and comparability of the required climate-related disclosures for investors and better serve their informational needs when making investment and voting decisions.[145]

At the same time, in consideration of some commenters' concerns,[146] we have revised the proposed climate-related disclosure requirements in certain respects to reduce the likelihood that the final rules result in disclosures that could be less useful for investors and costly for registrants to produce and to provide added flexibility for registrants regarding the content and presentation of the disclosure. Modeling the climate-related disclosure requirements on the TCFD framework while also adopting these revisions will help mitigate the compliance burden of the final rules, particularly for registrants that are already providing climate-related disclosures based on the TCFD framework or soon will be doing so pursuant to other laws or regulations.[147]

In this regard, we note certain ongoing developments related to climate-risk reporting:

• The formation of the ISSB by the IFRS Foundation[148] in November 2021, which consolidated several sustainability disclosure organizations into a single organization.[149] In June

(''We also support the SEC's inclusion of a greenhouse gas (GHG) emissions reporting requirement in line with the Greenhouse Gas Protocol because this information is critical to our understanding of the quality of a company's earnings in the face of climate change and the energy transition.''); and Vanguard. *See also* Form Letter AM.

[138] *See, e.g.,* letters from AllianceBernstein; Franklin Templeton; Harvard Mgmt.; Miller/Howard; Trillium; and Wellington Mgmt.

[139] *See, e.g.,* letters from Americans for Financial Reform Education Fund, Public Citizen, Ocean Conservancy, Sierra Club, Evergreen Action and 72 additional undersigned organizations (June 17, 2022) (''Amer. for Fin. Reform, Evergreen Action *et al.*''); Amer. for Fin. Reform and Public Citizen; Americans for Financial Reform, on behalf of 64,357 advocates (June 16, 2022) (''Enclosed are 64,357 petition signatures supporting the [Commission's] proposed rule on climate-related financial disclosures that would provide investors with the long-awaited and necessary information they and their investment advisors need to make informed investment decisions.''); *see also* letter from Betterment (June 17, 2022) (noting that, based on responses of 3,000 retail investors to a survey the commenter conducted, ''a reasonable interpretation . . . would be that 95% of respondents would potentially consider GHG emissions reporting . . . as material to whether they would purchase a security'' and asserting that ''[a] retail investor's exposure to equities via index funds makes the uniform availability of *standardized* climate-related disclosure at the company level that much more critical, and the Proposed Rule would drastically improve the efficiency and robustness of the underlying process that produces such low fee, diversified investing products'' (emphasis in original)). In addition, the Commission received many unique letters from individual investors expressing their support for the proposed rules, with several stating that there was a need for more consistent and comparable disclosure about climate-related risk from registrants. *See, e.g.,* letters from Kim Leslie Shafer (June 16, 2022) (''[A]s an investor and a citizen, I support the SEC prescribing consistent, comparable, reliable and mandatory disclosure of climate-related information.''); Neetin Gulati (June 17, 2022); Sandy Spears (June 16, 2022); R. Palacios.

[140] *See* letter from PwC (expressing concern about permitting registrants to incorporate by reference from their sustainability reports or corporate responsibility reports because such reports ''may be prepared using a basis of presentation designed for a stakeholder group with different information needs than investors and other providers of capital'').

[141] *See* Rule 13a–15 and Rule 15d–15 [17 CFR 240.13a–15 and 17 CFR 240.15d–15]. Pursuant to Exchange Act Rules 13a–15 and 15d–15, a company's principal executive officer and principal financial officer must make certifications regarding the maintenance and effectiveness of disclosure controls and procedures. These rules define ''disclosure controls and procedures'' as those controls and procedures designed to ensure that information required to be disclosed by the company in the reports that it files or submits under the Exchange Act is (1) ''recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms,'' and (2) ''accumulated and communicated to the company's management . . . as appropriate to allow timely decisions regarding required disclosure.''

[142] *See, e.g.,* letter from Ceres; *see also* letter from Calvert (stating that ''we believe the disclosures mandated by the SEC in the proposed rule should be filed in annual reports, as well as quarterly reports where appropriate'' because ''it is supported by disclosure controls, CEO/CFO certification, audit requirements and a level of scrutiny by management appropriate for climate risks'').

[143] *See supra* notes 115 and 116 and accompanying text.

[144] *See supra* note 111 and accompanying text.

[145] *See supra* note 107 and accompanying text.

[146] *See, e.g., supra* note 109 and accompanying text.

[147] *See supra* sections I.B. In this regard, we note that some commenters recommended that the Commission require or allow the use of the ISSB's climate-related disclosure standards as an alternative to the Commission's climate disclosure rules. *See supra* note 120 and accompanying text. While we acknowledge that there are similarities between the ISSB's climate-related disclosure standards and the final rules, and that registrants may operate or be listed in jurisdictions that will adopt or apply the ISSB standards in whole or in part, those jurisdictions have not yet integrated the ISSB standards into their climate-related disclosure rules. Accordingly, at this time we decline to recognize the use of the ISSB standards as an alternative reporting regime.

[148] The *IFRS* Foundation refers to the International Financial Reporting Standards Foundation, whose mission is to develop high-quality IFRS Standards that bring transparency, accountability, and efficiency to financial markets around the world. *See* IFRS—Who we are, available at *https://www.ifrs.org/about-us/who-we-are/*.

[149] *See* IFRS Foundation, IFRS Foundation announces International Sustainability Standards Board, consolidation with CDSB and VRF, and publication of prototype disclosure requirements (Nov. 3, 2021), available at *https://www.ifrs.org/news-and-events/news/2021/11/ifrs-foundation-announces-issb-consolidation-with-cdsb-vrf-publication-of-prototypes/*. *See also* Proposing Release, section I.C.2.

2023, the ISSB issued General Requirements for Disclosure of Sustainability-related Financial Information (''IFRS S1'') and Climate-related Disclosures (''IFRS S2'').[150] Notably, IFRS S1 and S2 integrate the recommendations of the TCFD.[151]

• Several jurisdictions have announced plans to adopt, apply, or otherwise be informed by the ISSB standards, including Australia, Brazil, Canada, Hong Kong, Japan, Malaysia, Nigeria, Singapore, and the United Kingdom (''UK''), although it is not yet clear how specifically the ISSB standards may be incorporated into certain foreign legal frameworks.[152]

• Other jurisdictions were already well advanced in the process of adopting climate disclosure rules when the ISSB standards were announced. For example, in 2022, the European Union (''EU'') adopted the Corporate Sustainability Reporting Directive (''CSRD''),[153] which requires certain large and listed companies and other entities, including non-EU entities, to report on sustainability-related issues in line with the European Sustainability Reporting Standards (''ESRS'').[154]

• California recently adopted the Climate-Related Financial Risk Act (Senate Bill 261), which will require certain public and private U.S. companies that do business in California and have over $500 million in annual revenues to disclose their climate-related financial risks and measures based on the TCFD recommendations or a comparable disclosure regime in a report published biennially on the company's website commencing no later than January 2026.[155]

• In addition, California recently adopted the Climate Corporate Data Accountability Act (Senate Bill 253), which will require certain public and private U.S. companies that do business in California and have over $1 billion in annual revenues to disclose their GHG emissions (Scopes 1 and 2 emissions by 2026 and Scope 3 emissions by 2027).[156]

These laws may reduce the compliance burden of the final rules to the extent they impose similar requirements for registrants that are subject to them. However, the disclosure required by these laws will appear in documents outside of Commission filings and therefore will not be subject to the same liability, DCPs, and other investor protections as the climate-related disclosures required under the final rules. In addition, these laws may serve different purposes than the final rules or apply different materiality or other standards. For example, the California laws were adopted to protect the health and safety of California residents,[157] among other reasons, whereas we are adopting the final rules to enhance disclosures of emergent risks companies face so that investors can have the information they need to make informed investment and voting decisions. Regardless of the extent of overlap with other jurisdictions' reporting requirements and consistent with the Commission's mission, the final rules are tailored to the particular needs of investors and the specific situations of Commission registrants, as documented in the comment file, and are designed to work within the existing framework of U.S. securities laws that call for disclosure about the material risks that companies face. Integrating the required disclosures into the existing framework of U.S. securities laws will provide investors with more complete information about a company, the risks it faces, and its business, finances, and results of operations while affording investors the protections of the securities laws for this information.

We acknowledge the concerns expressed by some commenters about relying on a third-party framework, such as the TCFD, that may not afford affected parties the ability to provide input on potential future changes.[158] While we considered the TCFD framework in both proposing and now adopting the Commission's own climate-related disclosure rules, the final rules do not incorporate the TCFD recommendations or its procedures. Any future updates to the TCFD framework or any successor framework will have no bearing or impact on the

---

[150] *IFRS S1 sets out the general requirements for a company to disclose information about its sustainability related risks and opportunities.* IFRS S2 sets out the requirements for companies to disclose information about their climate-related risks and opportunities, building on the requirements in IFRS S1. *See* IFRS—Project Summary IFRS Sustainability Disclosure Standards, IFRS S1 General Requirements for Disclosure of Sustainability-related Financial Information and IFRS S2 Climate-related Disclosures (June 2023), available at *https://www.ifrs.org/content/dam/ifrs/project/general-sustainability-related-disclosures/project-summary.pdf*.

[151] Concurrent with the release of its 2023 status report, the TCFD fulfilled its remit and transferred to the ISSB its responsibility for tracking company activities on climate-related disclosure. Fin. Stability Bd., *FSB Roadmap for Addressing Financial Risks from Climate Change Progress Report* (July 13, 2023), available at *https://www.fsb.org/wp-content/uploads/P130723.pdf*. As discussed *infra*, the TCFD recommendations are incorporated into the ISSB standards. Although the TCFD has disbanded, in this release we continue to refer to ''TCFD recommendations'' as distinct from ISSB standards, both for clarity and because not all jurisdictions that implemented TCFD-aligned disclosure requirements have implemented the broader and more recent ISSB standards.

[152] For example, the UK has announced that its Sustainability Disclosure Standards (''SDS'') will be based on the ISSB Standards. *See* Dep't of Bus. & Trade, UK Sustainability Disclosure Standards, Gov.UK (Aug. 2, 2023), available at *https://www.gov.uk/guidance/uk-sustainability-disclosure-standards*. Australia recently published draft legislation mandating comprehensive climate-related reporting and assurance for large and medium-sized companies that is aligned with the ISSB Standards. *See* Australian Government-the Treasury, *Climate-related financial disclosure: exposure draft legislation* (Jan. 12, 2024), available at *https://treasury.gov.au/consultation/c2024-466491*.

[153] *See* Directive (EU) 2022/2464 of the European Parliament and of the Council of 14 December 2022 amending Regulation (EU) No 537/2014, Directive 2004/109/EC, Directive 2006/43/EC and Directive 2013/34/EU, as regards corporate sustainability reporting (Text with EEA relevance), available at *https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=uriserv%3AOJ.L_.2022.322.01.0015.01.ENG*. In adopting the CSRD, the EU explained that there exists a widening gap between the sustainability information, including climate-related data, companies report and the needs of the intended users of that information, which may mean that investors are unable to take sufficient account of climate-related risks in their investment decisions.

[154] *See id.* The CSRD requires large companies and listed companies to publish regular reports on the social and environmental risks they face, and how their activities impact people and the environment. In July 2023, the European Commission (''EC'') adopted the delegated act containing the first set of ESRS under the CSRD and the ESRS became effective on Jan. 1, 2024, for companies within scope of the first phase of reporting under the CSRD. *See* EC, *Corporate sustainability reporting,* available at *https://finance.ec.europa.eu/capital-markets-union-and-financial-markets/company-reporting-and-auditing/company-reporting/corporate-sustainability-reporting_en (last visited Feb. 6, 2024). final rules without future action by the Commission. Any consideration of such updates by the Commission will be subject to the Commission's own procedures, and any subsequent rulemaking to reflect those updates will be subject to the Administrative Procedure Act's requirements, including notice and comment, as well as requirements under other relevant laws. The final rules also do not follow every TCFD recommendation. For example, unlike the TCFD, which recommends the disclosure of executive compensation that is linked to climate-related risk management considerations, we have elected not to include such a requirement in the final rules, as discussed below.[159]

Like the proposed rules, the final rules amend Regulation S–K by adding a new section (subpart 1500) composed of the climate-related disclosure rules, other than for the financial statement disclosures, and Regulation S–X by adding a new article (Article 14) to govern the financial statement disclosures. We continue to believe that it is appropriate to amend Regulation S–K and Regulation S–X to require climate-related disclosures in Securities Act or Exchange Act registration statements and Exchange Act reports. Information about climate-related risks and their financial impacts is fundamental in many cases to understanding a company's financial condition and operating results and prospects and therefore should be treated like other business and financial information, including information on risks to the company.[160]

The proposed rules would have required a registrant to include its climate-related disclosures, other than its financial statement disclosures, either in a separately captioned ''Climate-Related Disclosure'' section in the registration statement or Exchange Act annual report or in other parts of the Commission filing that would then be incorporated by reference into the separately captioned section. While some commenters supported this proposal because it would facilitate the comparability of the disclosures among registrants,[161] other commenters stated that existing parts of the registration statement or annual report could be more appropriate for placement of the climate-related disclosures, and indicated that it should be up to each registrant to determine the most suitable place for the disclosures according to the context of the disclosures and structure of the filing.[162]

While enhancing the comparability of climate-related disclosures remains an important objective of the rulemaking, we also recognize the benefits of granting each registrant sufficient flexibility to determine the most appropriate location within a filing for the disclosures based on its particular facts and circumstances. Therefore, the final rules leave the placement of the climate-related disclosures, other than the financial statement disclosures, largely up to each registrant. Further, we are adopting as proposed structured data requirements that will enable automated extraction and analysis of the information required by the final rules, further facilitating investors' ability to identify and compare climate-related disclosures, regardless of where they are presented.[163] A registrant may elect to place most of the subpart 1500 disclosures in a separately captioned ''Climate-Related Disclosure'' section. Alternatively, a registrant may elect to include these climate-related disclosures in applicable, currently existing parts of the registration statement or annual report (*e.g.,* Risk Factors, Description of Business, or MD&A). If it chooses the latter alternative, then the registrant should consider whether cross-referencing the other disclosures in the separately captioned section would enhance the presentation of the climate-related disclosures for investors.

A registrant may also incorporate by reference some of the climate-related disclosures from other filed registration statements or Exchange Act reports if the incorporated disclosure is responsive to the topics specified in the Regulation S–K climate-related disclosure items and if the registrant satisfies the incorporation by reference requirements under the Commission's rules and forms.[164] In addition, any climate-related disclosure that is being incorporated by reference must include electronic tags that meet the final rules' structured data requirement.[165] As commenters noted, allowing incorporation by reference of climate-related disclosures will avoid duplication in the filing, add flexibility regarding the presentation of the disclosures, and be consistent with the Commission's incorporation by reference rules regarding other types of disclosure.[166]

Some commenters recommended that we permit a registrant to include disclosure regarding its climate-related corporate governance in its proxy statement, together with its discussion of other corporate governance matters, which would then be incorporated by reference into the registrant's Form 10–K.[167] Form 10–K currently permits the incorporation by reference pursuant to General Instruction G.3 of certain corporate governance matters from a proxy statement involving the election of directors.[168] While disclosure pursuant to Item 401 of Regulation S–K, which pertains to the identification and business experience of directors and executive officers, is permitted to be incorporated by reference from the proxy statement, disclosure pursuant to Item 407(h) of Regulation S–K, which pertains to the board's leadership structure and its role in risk oversight, is not one of the enumerated matters permitted to be incorporated by reference from the proxy statement. As discussed below, the final rules do not include the proposed provisions that would have most likely elicited disclosure drawn from the information required by Item 401 (*i.e.,* the proposed requirements to identify the board members responsible for the oversight of climate-related risks and to disclose whether any board member has expertise in climate-related risks).[169] Additionally, the retained governance provisions of the final rules require disclosure that is relevant to understanding more generally the board's oversight of climate-related risks and management's role in assessing and managing such risks, and do not necessarily pertain to the election of directors. For these reasons, while the final rules do not preclude incorporation by reference from a registrant's proxy statement to the extent allowed by existing rules,[170] we decline to expressly permit the disclosure to be incorporated by reference from a registrant's proxy statement pursuant to General Instruction G.3 of Form 10–K.

Placement of the new disclosures required by the final rules in Commission filings further serves our

investor protection goals because it will subject these disclosures to DCPs. These controls and procedures will enhance not only the reliability of the climate-related disclosures themselves, including both qualitative climate-related information and quantitative climate-related data, but also their accuracy and consistency.[171]

B. Commission Authority To Adopt Disclosure Rules

Some commenters [172] asserted that the Commission lacks authority to promulgate the proposed rules. We disagree. The rules we are adopting fall within the statutory authority conferred by Congress through the Securities Act and the Exchange Act.

In section 7(a)(1) of the Securities Act,[173] Congress authorized the Commission to require, in a publicly filed registration statement, that issuers offering and selling securities in the U.S. public capital markets include information—such as the general character of the issuer's business, the remuneration paid to its officers and directors, details of its material contracts, and certain financial information—specified in Schedule A to that Act, as well as ''such other information . . . as the Commission may by rules or regulations require as being necessary or appropriate in the public interest or for the protection of investors.'' [174] In addition, under sections 12(b) and (g) of the Exchange Act,[175] issuers of securities traded on a national securities exchange or that otherwise have total assets and shareholders of record that exceed certain thresholds must register those securities with the Commission by filing a registration statement. That registration statement must contain ''[s]uch information, in such detail, as to the issuer'' regarding, among other things, ''the organization, financial structure and nature of the [issuer's] business'' as the Commission by rule or regulation determines to be in the public interest or for the protection of investors.[176] These same issuers must also provide, as the Commission may prescribe ''as necessary or appropriate for the proper protection of investors and to insure fair dealing in the security,'' (1) ''such information and documents . . . as the Commission shall require to keep reasonably current the information and documents required to be included in or filed with [a] . . . registration statement,'' and (2) such annual and quarterly reports as the Commission may prescribe.[177]

As the text of each of these provisions demonstrates, Congress not only specified certain enumerated disclosures, but also authorized the Commission to update and build on that framework by requiring additional disclosures of information that the Commission finds ''necessary or appropriate in the public interest or for the protection of investors.'' [178] When read in the context of these enumerated disclosures and the broader context of the Securities Act and Exchange Act, these provisions authorize the Commission to ensure that public company disclosures provide investors with information important to making informed investment and voting decisions.[179] Such disclosure facilitates the securities laws' core objectives of protecting investors, facilitating capital formation, and promoting market efficiency.[180]

Both courts and the Commission have long recognized as much.[181] The Commission has amended its disclosure requirements dozens of times over the last 90 years based on the determination

[171] *See supra* notes 141–142 and accompanying text. As we have stated before, a company's disclosure controls and procedures should not be limited to disclosure specifically required, but should also ensure timely collection and evaluation of ''information potentially subject to [required] disclosure,'' ''information that is relevant to an assessment of the need to disclose developments and risks that pertain to the [company's] businesses,'' and ''information that must be evaluated in the context of the disclosure requirement of Exchange Act Rule 12b–20.'' *Certification of Disclosure in Companies' Quarterly and Annual Reports,* Release No. 33–8124 (Aug. 28, 2002) [67 FR 57275 (Sept. 9, 2002)].

[172] *See, e.g.,* letter from Soc. Corp. Gov. (stating that the ''subject of the Proposed Rule is clearly of great economic and political significance,'' and that ''[a]bsent express authorization by Congress, we believe that the SEC fundamentally lacks the authority to promulgate the Proposed Rule''); *see also* letters from Bernard S. Sharfman (Feb. 6, 2024) (stating that the SEC ''has exceeded its delegated authority in promulgating its proposed rule on climate-related disclosures by not adhering to the ascertainable standards found in the 33 and 34 Acts: 'for the protection of investors,' promoting 'efficiency, competition, and capital formation,' and 'materiality'''); Lawrence A. Cunningham and 21 other signatories (Apr. 25, 2022) (''Cunningham *et al.*'') (stating that the ''EPA's empowerment over this topic probably preempts any statutory authority the SEC might claim,'' that ''the SEC's mission does not include adopting positions intended to promote particular conceptions of acceptable corporate behavior,'' and that ''[c]limate change is a politically-charged issue'' and the ''Proposal would compel corporations and officials to regularly speak on those issues''); Patrick Morrisey, Attorney General of West Virginia, and the Attorneys General of 23 other states (''Morrissey *et al.*'') (June 15, 2022) (stating that the proposed rule ''sidesteps the materiality requirement,'' ''offends the major questions doctrine,'' would ''upend the balance between federal and state powers in the corporate sphere,'' and that ''if the SEC's understanding of its powers were right, then the statutes providing it that authority would offend the non-delegation doctrine''); and Andrew N. Vollmer (May 9, 2022) (stating that adopting the proposal would ''determine significant national environmental policies without direction from Congress, creating a high risk of proving to be a futile gesture because of the likelihood that a court will overturn final rules''); and Andrew N. Vollmer (Apr. 12, 2022) (stating that ''[c]limate-change information is outside the scope of the subjects Congress has allowed the SEC to cover in disclosure rules, and adopting the Proposal would have a subject and objective different from the disclosure provisions in the federal securities laws''); Jones Day; Chamber; Bernard S. Sharfman & James R. Copland (June 16, 2022) (''Sharfman *et al.*'').

Cir. 1979) (''The SEC . . . was necessarily given very broad discretion to promulgate rules governing corporate disclosure. The degree of discretion accorded the Commission is evident from the language in the various statutory grants of rulemaking authority.''); *id.* at 1045 (''Rather than casting disclosure rules in stone, Congress opted to rely on the discretion and expertise of the SEC for a determination of what types of additional disclosure would be desirable.''); H.R. Rep. No. 73–1383, at 6–7 (1934).

that the required information would be important to investment and voting decisions. And courts have routinely applied and interpreted the Commission's disclosure provisions without suggesting that the Commission lacked the authority to promulgate them.[182] When determining that additional ''information'' is ''necessary or appropriate'' to protect investors, the Commission has responded to marketplace developments, investors' need for information important to their decision-making, and advances in economic, financial, and investment analysis and analytical frameworks, as well of the costs of such disclosures. In addition, the Commission has eliminated existing disclosure requirements, or updated and tailored existing disclosures for similar reasons.[183]

For example, the Commission's predecessor agency,[184] immediately upon enactment of the Securities Act, relied upon Section 7 of that Act as authority to adopt Form A–1, the precursor to today's Form S–1 registration statement, to require disclosure of information important to investor decision-making but not specifically enumerated in Schedule A of the Securities Act. This information included a list of states where the issuer owned property and was qualified to do business, the length of time the registrant had been engaged in its business,[185] and a statement of all litigation that may materially affect the value of the security to be offered.[186]

The Commission has further exercised its statutory authority to require disclosures that provide investors with information on risks facing registrants. These specific disclosure items are consistent with the Commission's longstanding view that understanding the material risks faced by a registrant and how the registrant manages those risks can be just as important to assessing its business operations and financial condition as knowledge about its physical assets or material contracts. These disclosures also reflect investors' increased demand for, and growing ability to use, information regarding the risks faced by registrants through the application of increasingly sophisticated and specialized measurement and analysis frameworks to make investment and voting decisions.[187]

For instance, the Commission in 1982 adopted a rule requiring registrants to disclose ''Risk Factors,'' *i.e.,* a ''discussion of the material factors that make an investment in the registrant or offering speculative or risky.'' [188] Also, in 1997, the Commission first required registrants to disclose quantitative information about market risk.[189] Those rules included requirements to present ''separate quantitative information . . . to the extent material'' for different categories of market risk, such as ''interest rate risk, foreign currency exchange rate risk, commodity price risk, and other relevant market risks, such as equity price risk.'' [190] Under these market risk disclosure requirements, registrants must also disclose various metrics such as ''value at risk'' and ''sensitivity analysis disclosures.'' In addition, registrants must provide certain qualitative disclosures about market risk, to the extent material.[191]

Commission rules have also required disclosures regarding specific elements of the risks facing registrants, such as a registrant's material legal proceedings,[192] as part of its description of business, the material effects that compliance with government regulations, including environmental regulations, may have upon a registrant's capital expenditures, earnings, and competitive position,[193] compensation discussion and analysis,[194] and the extent of the board's role in the risk oversight of the registrant.[195] In addition, the Commission has adopted comprehensive disclosure regimes related to particular industries,[196] offering structures,[197] and types of transactions, when it has determined

that disclosure in those particular areas was justified.[198]

Relatedly, the Commission has exercised its statutory authority to require registrants to include in registration statements and annual reports a narrative explanation of a number of aspects of the issuer's business, most prominently in the MD&A.[199] These requirements are ''intended to give the investor an opportunity to look at the company through the eyes of management by providing both a short and long-term analysis of the business of the company,'' and they reflected increased investor need for this type of information as an important tool to make investment and voting decisions.[200]

Finally, the Commission for the last fifty years has also required disclosure about various environmental matters.[201] In adopting those requirements, the Commission recognized the number of ways that environmental issues can impact a company's business and its financial performance and determined that these requirements would provide information important to investment and voting decisions. Throughout the 1970s and early 1980s, the need for specific rules mandating disclosure of information relating to litigation and other business costs arising out of compliance with Federal, State, and local laws relating to environmental protection were the subject of several rulemaking efforts, extensive litigation, and public hearings.[202] As a result of this process, in 1982, the Commission adopted rules that address disclosure of certain environmental issues.[203]

More recently, the Commission published the 2010 Guidance, explaining how the Commission's existing disclosure rules may require disclosure of the impacts of climate change on a registrant's business or financial condition.[204] And in 2020, the Commission amended its disclosure rules to require, to the extent material to an understanding of the business taken as a whole, disclosure of the material effects that compliance with government regulations, including environmental regulations, may have upon the capital expenditures, earnings, and competitive position of the registrant and its subsidiaries.[205]

Similarly, the Commission is adopting the final rules based on its determination that the required disclosures will elicit information that investors have indicated is important to their investment and voting decisions.[206] As explained throughout this release, climate-related risks can affect a company's business and its financial performance and position in a number of ways. A growing number of investors across a broad swath of the market consider information about climate-related risks to be important to their decision-making. These investors have expressed the need for more reliable information about the effects of climate-related and other severe weather events or other natural conditions on issuers' businesses, as well as information about how registrants have considered and addressed climate-related risks when conducting operations and developing business strategy and financial plans. These rules respond to this need by providing investors more reliable and decision-useful disclosure of strategies and risks that a registrant has determined will likely materially impact its business, results of operations, or financial condition. The disclosure of such information—whether climate-related or otherwise—falls within the authority conferred by Congress in the Securities Act and the Exchange Act.[207]

The Regulation S–X provisions of the final rules are also within the Commission's authority. In addition to the statutory provisions discussed above, the Federal securities laws provide the Commission with extensive and specific authority to prescribe financial statement disclosures, set accounting standards, and establish accounting principles for entities that file financial statements with the Commission.

As noted above, Section 7(a)(1) of the Securities Act specifies that a registration statement shall contain, among other things, the information specified in Schedule A. Schedule A in turn requires disclosure of balance sheet and profit and loss statement (*i.e.,* comprehensive income statement) information ''in such detail and in such form as the Commission shall prescribe.'' [208] In addition, Section 12(b)

[198] *See* 17 CFR Subpart 900 (Roll-Up Transactions); and 17 CFR Subpart 1000 (Mergers and Acquisitions).

[199] *See Amendments to Annual Report Form, Related Forms, Rules, Regulations and Guides; Integration of Securities Acts Disclosure Systems,* Release No. 33–6231 (Sept. 2, 1980) [45 FR 63630 (Sept. 25, 1980)]. Item 303 of Regulation S–K requires a registrant to discuss its financial condition, changes in its financial condition, and results of operations, 17 CFR 229.303(a), other disclosure items, see, *e.g.,* 17 CFR 229.303(b)(1)(i), (1)(ii)(B), and (2)(ii), and requires registrants to ''provide such other information that the registrant believes to be necessary to an understanding of its financial condition, changes in financial condition, and results of operation.'' 17 CFR 229.303(b).

[200] *Concept Release on Management's Discussion and Analysis of Financial Condition and Operations,* Release No. 33–6711 (Apr. 17, 1987) [52 FR 13715 (Apr. 24, 1987)]. The Commission also has stated that it is important that investors understand the extent to which accounting changes and changes in business activity have affected the comparability of year-to-year data and they should be in a position to assess the source and probability of recurrence of net income (or loss). *Id.* (quoting *Guidelines for Registration and Reporting,* Release No. 33–5520 (Aug. 14, 1974) [39 FR 31894 (Sept. 3, 1974)]).

[201] In addition to Commission rules requiring disclosures regarding specific elements of the risks facing registrants that are discussed *supra* notes 192–198 and accompanying text, the Commission has adopted disclosure requirements that are similarly subject to substantive regulation under other statutes and by other agencies, as discussed *infra* note 207.

[202] *See Environmental Disclosure,* Interpretive Release No. 33–6130 (Sept. 27, 1979) [44 FR 56924 (Oct. 3, 1979)] (discussing this history); *Proposed Amendments to Item 5 of Regulation S -K Regarding Disclosure of Certain Environmental Proceedings,* Release No. 33–6315 (May 4, 1981) [46 FR 25638]; *NRDC* v. *SEC,* 606 F.2d 1031, 1036–42 (D.C. Cir. 1979) (same).

[203] *See* 1982 Release (adopting 17 CFR 229.103, which requires a registrant to describe its material pending legal proceedings, other than ordinary routine litigation incidental to the business, and indicating that administrative or judicial proceedings arising under Federal, state, or local law regulating the discharge of materials into the environment or primarily for the purpose of protecting the environment, shall not be deemed ''ordinary routine litigation incidental to the business'' and must be described if meeting certain conditions). The 1982 Release also moved the requirement to disclose information regarding the material effects of compliance with Federal, State and local provisions regulating the discharge of materials into the environment, or otherwise relating to the protection of the environment, on the registrant's capital expenditures, earnings and competitive position, as well as the disclosure of its material estimated capital expenditures for environmental control facilities, to 17 CFR 229.101(c)(1)(xii).

[204] *See* 2010 Guidance. As the Commission discussed in the guidance, the agency reviewed its full disclosure program relating to environmental disclosures in SEC filings in connection with a Government Accountability Office review. Among other things, the 2010 Guidance emphasized that climate change disclosure might, depending on the circumstances, be required in a company's Description of Business, Risk Factors, Legal Proceedings, and MD&A; identified certain climate-related issues that companies may need to consider in making their disclosures; and stated that registrants should consider any financial statement implications of climate change issues in accordance with applicable accounting standards.

[205] *See Modernization of Regulation S–K Items 101, 103, and 105,* Release No. 33–10825 (Aug. 26, 2020) [85 FR 63726 (Oct. 8, 2020)].

[206] *See supra* section I.A.

[207] The final rules are also consistent with other disclosure items that are similarly subject to substantive regulation under other statutes and by other agencies. For example, banks, bank holding companies, savings and loan associations, and savings and loan holding companies are subject to subpart 1400 of Regulation S–K despite the substantive jurisdiction and regulation of other state and Federal prudential regulators. Similarly, here, the importance of climate-related risks to investor decision-making makes them appropriate for disclosure regardless of other regimes that substantively regulate those issues.

[208] *See* Schedule A, paras. 25 and 26. The ''form'' required by the Commission includes both financial statements and notes to those statements. *See* 17

Continued

of the Exchange Act provides the Commission with specific authority to require not only balance sheet and income statement disclosure, but also ''any further financial statements which the Commission may deem necessary or appropriate for the protection of investors.'' [209]

Section 19(a) of the Securities Act also grants the Commission extensive authority to ''make, amend, and rescind such rules and regulations as may be necessary to carry out the provisions of,'' the Securities Act, which includes ''defining accounting, technical, and trade terms used in'' the Securities Act. ''Among other things,'' this section grants the Commission the authority to ''prescribe . . . the items or details to be shown in the balance sheet and earning statement, and the methods to be followed in the preparation of accounts, in the appraisal or valuation of assets and liabilities, in the determination of depreciation and depletion, in the differentiation of recurring and nonrecurring income, in the differentiation of investment and operating income, and in the preparation, where the Commission deems it necessary or desirable, of consolidated balance sheets or income accounts of any person directly or indirectly controlling or controlled by the issuer, or any person under direct or indirect common control with the issuer.'' [210] Sections 13 and 23 of the Exchange Act grant the Commission similar authority with respect to reports filed under that Act.[211]

Relying on these provisions, the Commission has prescribed the form and content of the financial statements to ensure that investors have access to information necessary for investment and voting decisions. The Commission adopted Regulation S–X in 1940, which governs the form and content of the financial statements, pursuant to its authority under, among other provisions, Sections 7 and 19(a) of the Securities Act and Sections 12 and 23(a) of the Exchange Act.[212] Over time, the Commission has amended Regulation S–X to add, modify, and eliminate requirements, as appropriate, with respect to the form and content of the financial statements, taking into consideration the development of accounting practices in the marketplace, investors' need for information important to their decision-making, as well of the costs of such disclosures.

For example, the Commission has on numerous occasions amended Regulation S–X to require the disclosure of particular items of information in the balance sheet or in the income statement.[213] The Commission has similarly amended Regulation S–X to require additional information in the financial statements with respect to particular issuers or types of transactions, when it has determined that action in those specific areas was responsive to the information needs of investors.[214]

Similarly, the Commission is adopting the final rules based on its determination that the required financial statement disclosures will provide investors with information that is important to their investment and voting decisions. Specifically, the Commission is exercising its authority to prescribe the content and form of the financial statements to require registrants to disclose certain information about costs and expenditures related to: (1) severe weather events and other natural conditions; and (2) in connection with the purchase and use of carbon offsets and RECs, as well as certain information about financial estimates and assumptions, in the notes to the financial statements. As explained in greater detail below, investors have expressed a need for this information,[215] and we believe the final rules will allow investors to make better informed investment or voting decisions by eliciting more complete disclosure of financial statement effects and by improving the consistency, comparability, and reliability of the disclosures.

For similar reasons, we disagree with objections by commenters based on the non-delegation and major-questions doctrines.[216] The non-delegation objection is misplaced because the long-standing statutory authority that we rely on provides intelligible principles to which the Commission must conform in its rulemaking.[217] Indeed, the Supreme Court early in the Commission's history rejected a non-delegation challenge to one of the securities laws that the Commission administered, and the well-tested delegation of rulemaking authority that we exercise here likewise falls comfortably within the Court's holding that a delegation poses no constitutional difficulty when it provides standards that derive ''meaningful content from the purpose of the Act, its factual background and the statutory context in which they appear.'' [218] Also, the major-questions objection is misplaced because the Commission is not claiming to ''discover in a long-extant statute an unheralded power representing a

transformative expansion in [its] regulatory authority.''[219] Nor is it seeking to determine national environmental policy or dictate corporate policy, as commenters suggest.[220] Rather, it is adopting the final rules based on its long standing authority to require disclosures that provide investors with information that is important to their investment and voting decisions, as discussed above. Consistent with this authority and its traditional role, the Commission is agnostic as to whether and how issuers manage climate-related risks so long as they appropriately inform investors of material risks.

Finally, we disagree with commenters who raised objections to the proposed rules on First Amendment grounds.[221] The required disclosures are factual information about certain risks companies face to their businesses, finances, and operations–the type of information that companies routinely disclose when seeking investments from the public. And as discussed throughout this release, these required disclosures also advance crucial interests: the final rules respond to the growing investor need for more reliable information regarding climate-related risks by providing investors with information that is important to their investment and voting decisions. Further, the final rules have been appropriately tailored to serve those interests, including with a number of significant changes having been made from the proposal to take account of the burdens imposed by requiring such disclosures.

C. Disclosure of Climate-Related Risks

1. Definitions of Climate-Related Risks and Climate-Related Opportunities (Items 1500 and 1502(a))

a. Proposed Rule

The Commission proposed to require a registrant to disclose any climate-related risks reasonably likely to have a material impact on the registrant's business or consolidated financial statements.[222] As proposed, a registrant could also optionally disclose the actual and potential impacts of any climate-related opportunities it is pursuing.[223] The Commission proposed definitions of ''climate-related risks'' and ''climate-related opportunities'' that were substantially similar to the TCFD's corresponding definitions of those terms[224] to provide a common terminology that would allow registrants to disclose climate-related risks and opportunities in a consistent and comparable way. In the Proposing Release, the Commission expressed its belief that grounding the definitions in a framework that is already widely accepted could help limit the burden on registrants to identify and describe climate-related risks while improving the comparability and usefulness of the disclosures for investors.[225]

The Commission proposed to define ''climate-related risks'' to mean the actual or potential negative impacts of climate-related conditions and events on a registrant's consolidated financial statements, business operations, or value chains, as a whole.[226] The Commission proposed to define ''value chain'' to mean the upstream and downstream activities related to a registrant's operations.[227] Under the proposed definition, upstream activities would include activities by a party other than the registrant that relate to the initial stages of a registrant's production of a good or service (*e.g.,* materials sourcing, materials processing, and supplier activities). Downstream activities would include activities by a party other than the registrant that relate to processing materials into a finished product and delivering it or providing a service to the end user (*e.g.,* transportation and distribution, processing of sold products, use of sold products, end of life treatment of sold products, and investments).[228] The Commission proposed including a registrant's value chain within the definition of climate-related risks to capture the full extent of a registrant's potential exposure to climate-related risks.[229]

Climate-related conditions and events can present risks related to the physical impacts of the climate (''physical risks'') and risks related to a potential transition to a lower carbon economy (''transition risks''). The Commission proposed to define ''physical risks'' to include both acute and chronic risks to a registrant's business operations or the operations of those with whom it does business.[230] The Commission proposed to define ''acute risks'' to mean event-driven risks related to shorter-term extreme weather events, such as hurricanes, floods, and tornadoes.[231] Under the proposed rule, ''chronic risks'' would be defined to mean those risks that a business may face as a result of longer term weather patterns and related effects, such as sustained higher temperatures, sea level rise, drought, and increased wildfires, as well as related effects such as decreased arability of farmland, decreased habitability of land, and decreased availability of fresh water.[232] The Commission proposed to define transition risks to mean the actual or potential negative impacts on a registrant's consolidated financial statements, business operations, or value chains attributable to regulatory, technological, and market changes to address the mitigation of, or adaptation to, climate-related risks.[233] Transition risks would include, but not be limited to, increased costs attributable to climate-related changes in law or policy, reduced market demand for carbon-intensive products leading to decreased sales, prices, or profits for such products, the devaluation or abandonment of assets, risk of legal liability and litigation defense costs, competitive pressures associated with the adoption of new technologies, reputational impacts (including those stemming from a registrant's customers or business counterparties) that might trigger changes to market behavior, changes in consumer preferences or behavior, or changes in a registrant's behavior.[234]

The Commission proposed to require a registrant to specify whether an identified climate-related risk is a physical or transition risk so that investors can better understand the nature of the risk.[235] If a physical risk, the rule proposal would require a registrant to describe the nature of the risk, including whether it may be categorized as an acute or chronic risk.[236] A registrant would also be required to describe the location and nature of the properties, processes, or operations subject to the physical

risk.[237] The rule proposal defined ''location'' to mean a ZIP code or, in a jurisdiction that does not use ZIP codes, a similar subnational postal zone or geographic location.

The Commission proposed to require additional disclosure from a registrant that has identified a climate-related risk related to flooding or high water stress. As proposed, if a risk concerns the flooding of buildings, plants, or properties located in flood hazard areas, the registrant would be required to disclose the percentage of those assets that are located in flood hazard areas in addition to their location.[238] If a risk concerns the location of assets in regions of high or extremely high water stress, as proposed, the registrant would be required to disclose the amount of assets (*e.g.,* book value and as a percentage of total assets) located in those regions in addition to their location. The registrant would also be required to disclose the percentage of the registrant's total water usage from water withdrawn in those regions.[239]

The Commission proposed to require a registrant to describe the nature of an identified transition risk, including whether it relates to regulatory, technological, market (including changing consumer, business counterparty, and investor preferences), liability, reputational, or other transition-related factors, and how those factors impact the registrant.[240] In this regard, the proposed rule stated that a registrant that has significant operations in a jurisdiction that has made a GHG emissions reduction commitment may be exposed to transition risks related to the implementation of the commitment.[241]

As the Commission noted in the Proposing Release, climate-related conditions and any transition to a lower carbon economy may also present opportunities for registrants and investors.[242] The rule proposal defined ''climate-related opportunities'' to mean the actual or potential positive impacts of climate-related conditions and events on a registrant's consolidated financial statements, business operations, or value chains, as a whole.[243]

b. Comments

Many commenters supported the proposal to require a registrant to disclose any climate-related risks that are reasonably likely to have a material impact on its business or consolidated financial statements.[244] These commenters provided various reasons for supporting the proposal. For example, one commenter noted that it views material climate-related risks and opportunities as fundamental financial factors that impact company cash flows and the valuation investors attribute to those cash flows and stated that the proposed rules will lead to ''more consistent, comparable, and reliable disclosures that will enable investors to make better decisions on how and where to allocate capital.'' [245] Another commenter stated that the proposed requirements would provide a thorough foundation for disclosure of climate risks, including future risks.[246] A different commenter stated that the proposed disclosure requirement would ensure that investors receive specific, comparable details about registrants' climate-related risks, which are currently lacking from many registrants.[247] One other commenter stated that, based on its own research, most registrants are exposed to climate-related risks, and without sufficient information regarding transition risks and physical risks facing a registrant, investors may be unable to correctly value a registrant's securities, thus potentially paying too high or too low a price.[248] One commenter stated that, because long-term climate-related risks can quickly become financially impactful, the proposed requirement would elicit disclosure that, at a minimum, would indicate the quality of a company's governance and risk management.[249]

Many commenters supported the proposed definition of climate-related risk, including that the definition encompass both physical and transition risks, and further supported the proposed requirement to specify whether an identified climate-related risk is a physical or transition risk.[250] One commenter stated that the proposed definition of climate-related risk is comprehensive and would help ensure that registrants consider a broad spectrum of climate-related risks.[251] Another commenter expressed approval of the proposed definition of climate-related risk because it is substantially similar to the TCFD's definition of climate-related risk, which is familiar terminology for investors and companies alike and therefore should promote consistent and comparable disclosure across companies.[252] A different commenter stated that the definition of climate-related risk should include only the actual negative impacts of climate-related conditions and events, and not potential negative impacts, as proposed, but agreed that the definition should include both physical and transition risks because that would be consistent with the TCFD framework.[253] One other commenter stated that the proposed definition of climate-related risk is generally ''correct'' because it is similar to the TCFD definition and would facilitate comparability of climate-related disclosure, but recommended that the Commission address in the definition the intersection of climate-related risks and adverse consequences to local communities.[254]

A number of commenters supported including in the proposed definition of physical risk both acute and chronic risks, and further supported specifying whether an identified physical risk is acute or chronic.[255] One commenter stated that it supported the proposed disclosure of a physical risk, including whether the physical risk is acute or chronic, in addition to any transition risk, and noted that all these risk categories can have ''financial materiality.'' [256] This commenter did not, however, support requiring the disclosure of whether or how an acute risk and chronic risk may affect each other because of the complex interaction between the two types of risks.[257]

Another commenter similarly stated that, while it supported the disclosure of acute and chronic risks, because such risks are complex and may overlap, the Commission should clarify that companies can decide how to categorize acute and chronic risks and, where there may be overlap (*e.g.,* wildfires can be both an acute and chronic risk to a company), the risk only needs to be identified once.[258] A different commenter stated that it supported the proposed definition of climate-related risk, which includes acute and chronic risks within physical risk, because it aligned with the TCFD framework, and such alignment would be of significant benefit because it will help elicit comparable disclosures and help reduce the reporting burden.[259] One other commenter, while acknowledging that the proposed definition of physical risk aligned with the TCFD framework, recommended that the Commission include, in the definition of chronic risk, systemic threats to public health and safety.[260]

Several commenters supported the proposed requirement to describe the location and nature of the properties, processes, or operations subject to the physical risk.[261] Commenters stated that the proposed location disclosure would enable investors to more fully assess a registrant's exposure to physical risks, such as extreme storm events, flooding, water shortages, and drought, which may be geographically specific, and whether the registrant is adequately taking steps (*e.g.,* through adopting a transition plan) to mitigate or adapt to the physical risks.[262] One commenter stated that ''[i]nvestors and investment analysts are often tasked with understanding the risk that climate change poses to physical assets that are critical to the company's overall business model,'' including both facilities owned by the company and those owned by key suppliers, and recommended that the Commission ''require the disclosure of the locations of all material facilities *i.e.,* geographical concentrations that pose material risks of loss.''[263] Some of these commenters also supported defining location by the ZIP code or other subnational postal zone if the ZIP code is not available.[264] One commenter recommended using geographic coordinates to describe the location of assets subject to a material physical risk because they would better fit climate models.[265] Another commenter recommended requiring the disclosure of specific addresses, and not just ZIP codes, to identify the location of assets subject to a material physical risk to enable investors to fully assess the registrant's exposure to the physical risk.[266] This commenter also urged the Commission to require the proposed disclosure with respect to all of a registrant's locations that are material to its businesses rather than only the locations subject to a physical climate risk, stating that physical climate risk potentially impacts a registrant at all of its locations.[267]

Several commenters supported the proposed requirement to disclose the percentage of assets that are located in flood hazard areas if a registrant has determined that flooding is a material physical risk.[268] Several commenters also supported the proposed requirement to disclose the amount of assets (*e.g.,* book value and as a percentage of total assets) located in regions of high or extremely high water stress, and the percentage of the registrant's total water usage from water withdrawn in those regions, if a registrant has determined that high or extremely high water stress is a material physical risk.[269] Commenters stated that the proposed disclosure requirements would help investors understand the extent of the water-related risk to which a registrant is exposed.[270] Some commenters generally stressed the importance to investors of obtaining quantitative data from registrants about the physical risks to which they are subject and recommended that the Commission require registrants to similarly provide the percentage of assets or other quantitative data relevant to assessing a registrant's exposure to other material physical risks, such as heatwaves, droughts, and wildfires.[271]

With regard to flooding risk disclosure, some commenters recommended that the Commission require the use of Federal Emergency Management Agency's (''FEMA's'') flood hazard terminology and maps to help further the comparability of the disclosure.[272] One commenter recommended the use of a different flood model that it believed was more up-to-date and more comprehensive than FEMA's flood mapping.[273] Another commenter supported an approach that would allow for different definitions of ''flood hazard area'' or ''water-stressed area'' to be used as long as the registrant disclosed the source of the definitions together with the methodologies and assumptions used in disclosing the water-based physical risk.[274]

Several commenters supported the proposed provision requiring a registrant to describe the nature of an identified transition risk, including whether it relates to regulatory, technological, market (including changing consumer, business counterparty, and investor preferences), liability, reputational, or other transition-related factors, and how those factors impact the registrant.[275] Some commenters also supported the proposed definition of transition risk.[276] Several commenters stated that the Commission should include additional examples within the definition of transition risk, including the risk of impacts on local and indigenous communities and workers caused by a transition to a lower carbon economy.[277]

Several commenters supported including the negative impacts on a registrant's value chain in the definition of climate-related risk, as proposed.[278]

Continued

One commenter stated that because information concerning climate-related risks involving a registrant's value chain may be more important to investors than such risks involving a registrant's own operations, disclosure of climate-related risks in the value chain should be an integrated part of the broader disclosures about the material climate-related risks management is assessing, managing, and reporting to the board, despite the difficulty of providing such value chain information.[279] Another commenter stated that it supported including value chain impacts in the definition of climate-related risk as long as such impacts relate to direct impacts on a registrant's operations.[280] Some commenters also supported the proposed definition of value chain to mean the upstream and downstream activities related to a registrant's operations.[281] One commenter stated that the definition of value chain should be consistent with the definition provided by the GHG Protocol.[282]

Many other commenters opposed the proposed climate-related risk disclosure requirement.[283] Some of these commenters contended that the Commission's rules already require a registrant to disclose material climate risks, and that therefore there is no need for the proposed climate-related risk disclosure requirement.[284] Several other commenters stated that the proposed climate-related risk disclosure requirement would inundate investors with an extensive amount of granular information that is largely immaterial.[285] Commenters provided as an example of such immaterial disclosure the proposed requirement to disclose the ZIP codes of assets located in flood hazard areas or other regions in which a registrant's assets are subject to a material climate-related risk.[286] Some commenters stated that the highly detailed disclosure required by the proposed climate risk disclosure rule would confuse investors by causing them to believe that a climate-related risk is more important than other disclosed risks that are presented in less detail.[287] Some commenters also stated that the overly granular disclosure elicited by the proposed rule would potentially require registrants to disclose competitively sensitive information.[288] Other commenters stated that, due to uncertainties in climate science, and uncertainties regarding some of the underlying concepts upon which the proposed climate risk disclosure requirement is based, the disclosure of material climate-related risks would be unduly burdensome for many registrants.[289] Another commenter stated that a registrant should only be required to disclose a climate-related risk that management is assessing, managing, and reporting to the board, rather than disclosing information regarding any climate risk.[290]

Several commenters also opposed the proposed disclosure requirements concerning the percentage of assets located in flood zones and similar quantitative data for assets located in high water-stressed areas.[291] One commenter stated that flood risks and high water-stress risks are not comparable within a firm, across sectors, and across regions of the country, so investors are unlikely to make investment decisions based on this information.[292] This commenter further stated that the Commission has not justified singling out risks relating to flooding and high water stress for detailed prescriptive disclosures, which dilutes the importance of other material information.[293] One other commenter stated that the proposed flood risk requirement is not necessary because the majority of companies are not subject to such physical risk.[294] Other commenters stated that such granular disclosure for water-related physical risks would impose a heavy reporting burden for registrants and could raise competitive and security risk concerns.[295]

Several commenters also opposed the proposed transition risk disclosure requirement, including the proposed definition of transition risk.[296] Some commenters stated that the proposed requirement would result in overly granular disclosure that would not be decision-useful for investors and would be burdensome for registrants to produce.[297] One commenter stated that the proposed definition was overly broad and would require a registrant to make the difficult determination of whether a particular activity was undertaken to address a transition risk or was part of a registrant's normal business strategy.[298] Another commenter stated that it would be challenging for companies doing business in multiple markets to provide comparable, consistent, and reliable

Group to TC207 (June 17, 2022) (''US TAG TC207''); and Wellington Mgmt.

[279] *See* letter from PwC. This commenter provided the following examples of when climate-related risks involving a registrant's value chain may be more important to investors than such risks involving the registrant's own operations: the manufacturer of ''a product reliant on a rare mineral for which mining may be limited due to emissions created in extraction, precursor manufacturing, and transport, or, alternatively, a lender whose primary business is financing emissions-intensive operations.''

disclosure about transition risks given complex, dynamic, and varied global factors.[299] Other commenters stated that because the proposed definition of transition risk would require a registrant to consider impacts on its value chain, the resulting disclosures are likely to be overly detailed and could obscure more important information.[300] One other commenter stated that the proposed transition risk disclosure requirement would be difficult to comply with because of the speculative nature of certain transition risks.[301] A different commenter stated that because of the broad definition of transition risk, the Commission should provide additional guidance regarding the scope of the transition risk disclosure requirement.[302]

Many commenters opposed including the negative impacts on a registrant's value chain in the definition of, and related disclosure requirement concerning, its climate-related risks.[303] Commenters stated that the proposed definition would impose impractical burdens on registrants by forcing them to obtain and assess climate risk information about their third-party suppliers and customers over which they have little to no control.[304] Commenters in the agricultural sector were particularly opposed to the proposed definition because it would impose costs and burdens on farmer and rancher suppliers, many of whom are private entities, to produce the information needed by registrants to comply with the proposed climate-related risk requirement.[305] Other commenters stated that, due to the inability to obtain such third-party information, the proposed disclosure requirement is likely to elicit boilerplate disclosure about the climate-related risks of a registrant's value chain.[306] Because of these concerns, several commenters requested that the Commission remove the concept of value chain from the scope of the climate risk disclosure requirement.[307] More generally, several commenters stated that any Commission climate risk disclosure requirement should be more principles-based and grounded on traditional notions of materiality.[308]

Many commenters supported the proposed definition of climate-related opportunities because it is consistent with the TCFD definition.[309] Many commenters also supported keeping the disclosure of climate-related opportunities optional, as proposed.[310] Some of these commenters expressed the view that, while disclosure of climate-related opportunities can provide insight into a registrant's management of climate-related risks and its related strategy, mandatory disclosure of climate-related opportunities could lead to greenwashing.[311] Some commenters, however, stated that disclosure of climate-related opportunities should be mandatory because such opportunities are frequently related to the reduction of climate-related risks and would provide investors with a more balanced perspective of the overall impacts of climate on a company's business and operating performance.[312]

c. Final Rules

We are adopting final rules (Item 1502(a)) to require the disclosure of any climate-related risks that have materially impacted or are reasonably likely to have a material impact on the registrant, including on its business strategy, results of operations, or financial condition, with several modifications in response to commenter concerns.[313] We disagree with those commenters who stated that a climate-related risk disclosure provision was not necessary because the Commission's general risk factors disclosure rule already requires such disclosure.[314] In our view, a separate disclosure provision specifically focused on climate-related risks will help investors better understand a registrant's assessment of whether its business is, or is reasonably likely to be, exposed to a material climate-related risk, and thereby enhance investor protection. Many commenters indicated that the Commission's current disclosure rules, including the general risk factor provision, has not provided investors with disclosure of climate-related risks and their financial impacts at the level of detail sought by investors that would make the disclosure useful for their investment or voting decisions.[315] The final rules, by contrast, are responsive to investors' need for decision-useful information regarding registrants' material climate-related risks and will help ensure investors receive more consistent, comparable, and reliable disclosures about such risks.[316]

Furthermore, adopting a climate-related risk disclosure rule that uses similar definitions (set forth in Item 1500) and is based on the climate-related disclosure framework of the TCFD, with which many registrants and investors are already familiar, will assist in standardizing climate-related risk disclosure and help elicit more consistent, comparable, and useful information for investors and limit the reporting burden for those registrants that are already providing some climate-related disclosure based on the TCFD framework.

At the same time, we recognize that many commenters expressed significant concerns about the scope of the proposed rules, indicating that they may elicit too much detail, may be costly or burdensome, could result in competitive harm, or may obscure other material information.[317] We have sought to address these concerns by modifying the definition of climate-related risks, by making the climate-related risk disclosure requirements less prescriptive, and by specifying the time frames during which a registrant should describe whether any such material

risks are reasonably likely to manifest, as discussed below.[318]

The proposed rule would have required a registrant to describe any climate-related risks reasonably likely to have a material impact on the registrant, including on its business or consolidated financial statements. We have substituted ''results of operations'' and ''financial condition'' for ''consolidated financial statements'' here and in several of the final rule provisions to be more consistent with other Commission rules relevant to risk assessment, such as Item 303 of Regulation S–K regarding MD&A. We have used the term ''business strategy'' in the final rules to more closely align the final rules with the TCFD recommendation regarding the disclosure of the impacts of climate-related risks on strategy. These revisions do not create any substantive differences compared to the proposed rules but should facilitate compliance because many registrants should be familiar with the terminology used.

Similar to the rule proposal, the final rules define *climate-related risks* to mean the actual or potential negative impacts of climate-related conditions and events on a registrant's business, results of operations, or financial condition.[319] To make a registrant's determination of whether it is exposed to a material climate-related risk less burdensome, in response to commenters' concerns,[320] we have eliminated the reference to negative climate-related impacts on a registrant's value chain from the definition of climate-related risks. This change means that a climate-related risk involving a registrant's value chain would generally not need to be disclosed except where such risk has materially impacted or is reasonably likely to materially impact the registrant's business, results of operations, or financial condition. In addition, because a registrant may be able to assess the material risks posed by its value chain without having to request input from third parties in its value chain, this change will also limit the burdens of climate risk assessment on parties in a registrant's value chain that might have occurred under the rule proposal.[321]

Similar to the rule proposal, the definition of climate-related risks includes both physical risks and transition risks. Also similar to the proposed definition, the final rules define ''physical risks'' to include both acute and chronic risks to a registrant's business operations.[322] However, we are not including in the definition acute or chronic risks to the operations of those with whom a registrant does business, as proposed. This change addresses the concerns of commenters regarding burdens associated with obtaining climate risk information about their counterparties over which they lack control.[323]

Similar to the rule proposal, ''acute risks'' is defined as event-driven risks and may relate to shorter-term severe weather events, such as hurricanes, floods, tornadoes, and wildfires.[324] ''Chronic risks'' is defined as those risks that the business may face as a result of longer term weather patterns, such as sustained higher temperatures, sea level rise, and drought, as well as related effects such as decreased arability of farmland, decreased habitability of land, and decreased availability of fresh water.[325] These enumerated risks are provided as examples of the types of physical risks to be disclosed and many represent physical risks that have already impacted and may continue to impact registrants across a wide range of economic sectors.[326]

The final rules define ''transition risks'' largely as proposed to mean the actual or potential negative impacts on a registrant's business, results of operations, or financial condition attributable to regulatory, technological, and market changes to address the mitigation of, or adaptation to, climate-related risks.[327] For reasons discussed above in relation to the definition of ''climate-related risks,'' we are no longer including value chain impacts in the definition of ''transition risks.'' [328] The final rules' definition of ''transition risks'' includes the same non-exclusive list of examples of transition risks as the rule proposal. Transition risks include, but are not limited to, increased costs attributable to climate-related changes in law or policy, reduced market demand for carbon-intensive products leading to decreased sales, prices, or profits for such products, the devaluation or abandonment of assets, risk of legal liability and litigation defense costs, competitive pressures associated with the adoption of new technologies, reputational impacts (including those stemming from a registrant's customers or business counterparties) that might trigger changes to market behavior, changes in consumer preferences or behavior, or changes in a registrant's behavior.[329]

Although some commenters asked the Commission to provide additional examples of transition risks in the definition,[330] we decline to do so. The final rules' examples are non-exclusive [331] and, consistent with the TCFD framework, a registrant's description of its material transition risks should include any type of transition risk that is applicable based on its particular facts and circumstances.[332] The particular type of material transition risk disclosed may be one that is not included or only partially included in the definition. Not every manifestation of transition risk, however, may apply or be material to every registrant and transition risks are dynamic and may change over time.

The proposed rules would have required a registrant to disclose certain items of information about any material climate-related risk that a registrant has identified.[333] In order to help address commenters' concerns that the rule proposal was too burdensome and could result in the disclosure of immaterial information, we have revised Item 1502, as adopted, to be less prescriptive. In doing so, we have sought to strike an

---

[319] *See* 17 CFR 229.1500.

[320] *See supra* notes 303 and 304 and accompanying text.

[321] *See supra* notes 292303 and 293304 and accompanying text.

[322] *See* 17 CFR 229.1500

[323] *See, e.g.,* letter from Chamber.

[324] *See* 17 CFR 229.1500. *See infra* section II.K.3.c.v for a discussion of the phrase ''severe weather events'' as used in subpart 1500 of Regulation S–K and Article 14 of Regulation S–X.

[325] *See id.*

[326] As discussed in more detail in section II.K.3.c.v, although Article 14 of Regulation S–X requires a registrant to disclose certain financial effects of severe weather events and other natural conditions, which may include weather events that are not climate-related, subpart 1500 of Regulation S–K does not require the disclosure of material impacts from non-climate-related weather events.

[327] *See* 17 CFR 229.1500.

[328] As noted above, a registrant would only need to disclose the transition risk of a party in its value chain when such transition risk has materially impacted or is reasonably likely to materially impact the registrant itself.

[329] *See* 17 CFR 229.1500. For example, one source of transition risk may be the IRA, Public Law 117–169, which was signed into Federal law on Aug. 16, 2022, and includes various initiatives meant to encourage companies, states, and consumers to invest in and adopt renewable energy and other ''clean energy'' technologies. *See* The White House, *Building A Clean Energy Economy: A Guidebook To The Inflation Reduction Act's Investments In Clean Energy And Climate Action* (Dec. 2022) (''Inflation Reduction Act Guidebook''). If, as a result of the IRA, consumers, small businesses, and other entities switch to more energy efficient products and services, a registrant that produces or uses less energy efficient products could face material impacts to its business, results of operations, or financial condition.

[330] *See supra* note 277 and accompanying text.

[331] *See* 17 CFR 229.1500 (definition of transition risk).

[333] *See* Proposing Release, section II.B.1.

appropriate balance between providing investors with more consistent and decision-useful information about material climate-related risks while being conscious of the costs to registrants and investors of requiring specified disclosures that may not be relevant in every circumstance. The final rules provide that a registrant that has identified a climate-related risk pursuant to Item 1502 must disclose whether the risk is a physical or transition risk, providing information necessary to an understanding of the nature of the risk presented and the extent of the registrant's exposure to the risk.[334] The final rules then provide a non-exclusive list of disclosures that a registrant must disclose as applicable:

• If a physical risk, whether it may be categorized as an acute or chronic risk, and the geographic location and nature of the properties, processes, or operations subject to the physical risk;[335] and

• If a transition risk, whether it relates to regulatory, technological, market (including changing consumer, business counterparty, and investor preferences), or other transition-related factors, and how those factors impact the registrant.[336]

When proposing the climate-related disclosure rules, the Commission stated that in some instances, chronic risks might give rise to acute risks. For example, a drought (a chronic risk) might contribute to wildfires (an acute risk), or increased temperatures (a chronic risk) might contribute to severe storms (an acute risk). In such instances, the Commission indicated that a registrant should provide a clear and consistent description of the nature of the risk and how it may affect a related risk, as well as how those risks have evolved or are expected to evolve over time.[337]

The final rules require a registrant to provide information necessary to an understanding of the nature of the risk presented and the extent of the registrant's exposure to the risk. We agree, however, with commenters that indicated that requiring a discussion about the interaction of two related physical risks may, due to its complexity, increase the burden on the registrant without yielding a corresponding benefit for investors.[338] While a registrant may opt to provide such discussion, it is not a mandatory disclosure item under the final rules. We also agree with commenters that stated that, for complex and overlapping physical risks, registrants can determine how best to categorize the physical risk as either acute or chronic.[339] What is important is that a registrant describe the climate-related physical risks it faces clearly and consistently, including regarding the particular categories of physical risk. As a disclosed risk develops over time, for example where the category of physical risk has changed and/or the nature of the impact to the registrant has evolved, depending on the facts and circumstances, the registrant may need to describe the changed risk in order for an investor to understand the impact or reasonably likely impact of the risk on the registrant, including on its business strategy, results of operations, or financial condition.

Some commenters opposed proposed Item 1502 because in their view it would be difficult for a registrant to distinguish between a climate-related physical risk and an ordinary weather risk,[340] or between a business activity in response to a transition risk and one that is part of a routine business strategy.[341] While we recognize that application of some of the Commission's climate disclosure rules may initially be difficult for certain registrants, we expect that compliance will become easier as registrants grow more familiar with disclosing how climate-related factors may impact their business strategies.[342] In this regard, we note that many registrants are already providing some of the TCFD-recommended disclosures, although in a piecemeal fashion and largely outside of the registrant's Commission filings. In addition, we have modified the proposed rules in several places to require disclosure only if a registrant is already undertaking a particular analysis or practice or has already made a judgment that a particular risk is climate-related.[343] Further, the lengthy phase in periods for the final rules will provide registrants additional time to develop, modify, and implement any processes and controls necessary to the assessment and reporting of any material climate-related risk.[344]

The final rules include several changes from the proposal that mitigate some of the burdens of Item 1502(a), as it was proposed. For example, the rule proposal would have required a registrant to disclose the location and nature of the properties, processes, or operations subject to the physical risk, and to provide the ZIP code or other subnational postal zone.[345] The final rules we are adopting no longer require such disclosure and instead include, as one of the physical risk items that a registrant must disclose, as applicable, the geographic location and nature of the properties, processes, or operations subject to the identified physical risk.[346] This revision is intended to address the concern of many commenters that the proposed ZIP code disclosure requirement would be burdensome to produce and would likely not provide useful information for many investors.[347] This revision will give registrants the flexibility to determine the granularity of any location disclosures based on their particular facts and circumstances as long as they provide information necessary to understand the extent of the registrant's exposure to the material risk.

The proposal would have called for specific information about physical risks, such as disclosures relating to flooding and the location of assets in regions of high or extremely high water stress. In particular, the rule proposal would have required a registrant that faces a material physical risk due to flooding or water stress to disclose the percentage of buildings, plants, or properties that are located in flood hazard areas or the amount and percentage of assets located in water-stressed areas. In a change from the rule proposal, we have eliminated this proposed requirement in order to make the final rules less burdensome and permit the registrant to determine the particular metrics that it should disclose, if any, based on its particular facts and circumstances. Instead, the physical risk disclosure provision we are adopting is less prescriptive and subject to the general condition applicable to both physical and transition risk disclosure that, when describing a material climate-related risk, a registrant must provide information necessary to an

[334] *See* 17 CFR 229.1502(a).

[335] *See* 17 CFR 229.1502(a)(1)(i).

[336] *See* 17 CFR 229.1502(a)(1)(ii).

[337] *See* Proposing Release, section II.B.1.

[338] *See, e.g.,* letters from CEMEX; Eni SpA; and ERM CVS.

[339] *See* letter from IAA.

[340] In this regard, according to the National Oceanic and Atmospheric Administration (''NOAA''), weather refers to short-term changes in the atmosphere whereas climate describes what the weather is like over a long period of time in a specific area. *See* NOAA, *What's the Difference Between Weather and Climate?,* available at *https://www.ncei.noaa.gov/news/weather-vs-climate*.

[341] *See supra* notes 289 and 298.

[342] We also expect that compliance with the final rules will become easier as registrants commence disclosing climate-related information pursuant to other jurisdictions' climate disclosure requirements, to the extent those requirements are similar to the final rules.

[343] *See, e.g., infra* section II.D.

[344] *See infra* section II.O.

[345] *See* Proposing Release, section II.B.1.

[346] *See* 17 CFR 229.1502(a)(1).

[347] *See supra* note 286 and accompanying text.

understanding of the nature of the risk presented and the extent of the registrant's exposure to the risk.[348]

These revisions help address the concern of some commenters that the proposed disclosure requirements were too prescriptive and could result in overly granular and immaterial disclosure.[349] The less prescriptive approach of the final rules also addresses the concern of some commenters that the resulting disclosure could cause investor confusion by obscuring other disclosed risks that are presented in less detail.[350] We expect that the final rules will elicit disclosures more reflective of a registrant's particular business practices.

With respect to those commenters who stated that the required metrics disclosure should cover more than just water-related physical risks, the less prescriptive approach in the final rules eliminates any potential overemphasis on water-related physical risks and gives registrants flexibility to describe any physical risks they may be facing.[351] Finally, the revised approach in the final rules will allow a registrant's disclosures to adapt to changing circumstances over time, while still providing sufficient information for investors to understand and assess any such changes.

Similar to the physical risk rule provision, the final rule requires registrants to disclose the nature of any transition risk presented and the extent of the registrant's exposure to the risk. It also includes a non-exclusive list of disclosures the registrant must provide, as applicable, including whether the transition risk relates to regulatory, technological, market, or other transition-related factors, and how those factors impact the registrant.[352] Describing the nature of an identified transition risk in this manner will help investors understand the realized or potential material impacts of the identified transition risk and whether and how a registrant intends to mitigate or adapt to such risk.

Consistent with the rule proposal, the final rule provision states that a registrant that has significant operations in a jurisdiction that has made a GHG emissions reduction commitment should consider whether it may be exposed to a material transition risk related to the implementation of the commitment.[353] Including this guidance within the rule text will serve to remind registrants operating in such a jurisdiction that they may need to provide disclosure to investors about this specific type of transition risk.

The proposed rule provisions pertaining to governance, strategy, and risk management would have permitted a registrant, at its option, to describe any climate-related opportunities it was pursuing when responding to those provisions.[354] In this regard, the Commission proposed a definition of ''climate-related opportunities'' that was similar to the corresponding definition provided by the TCFD.[355] While we are retaining the optional approach to disclosure related to climate-related opportunities, unlike the proposed rules, the final rules do not refer to climate-related opportunities and therefore do not include a corresponding definition. We are treating the disclosure of climate-related opportunities the same as other voluntary disclosure. Accordingly, despite the absence of a corresponding provision, a registrant may elect to also include disclosure regarding any material climate-related opportunities it is pursuing or is reasonably likely to pursue in addition to disclosure regarding material climate-related risks.[356]

2. Time Horizons and the Materiality Determination (Item 1502(a))

a. Proposed Rule

The rule proposal would have required a registrant to describe any climate-related risks reasonably likely to have a material impact, which may manifest over the short, medium, and long term. The rule proposal also would have required the registrant to describe how it defines short-, medium-, and long-term time horizons, including how it takes into account or reassesses the expected useful life of the registrant's assets and the time horizons for its climate-related planning processes and goals.[357]

b. Comments

Many commenters supported the proposed requirement to describe any material climate-related risk that may manifest over the short, medium, and long term.[358] Commenters stated that the proposed time horizons are consistent with the time horizons recommended by the TCFD.[359] Commenters also stated that it is important to assess climate-related risks over multiple time periods because of the changing frequency and severity of climate-related events.[360]

Some commenters supported leaving the time periods undefined while requiring a registrant to specify how it defines short-, medium-, and long-term

[348] *See* 17 CFR 229.1502(a).

[349] *See, e.g.,* letters from ABA; CEMEX; NAM; and SIFMA.

[350] *See supra* note 287 and accompanying text. As described below, the addition of materiality qualifiers to certain of the final rule's climate risk disclosure requirements will also help address this concern by eliciting detailed disclosure only when it is material. *See infra* section II.D.

[351] *See, e.g.,* letters from CalPERS (recommending that the Commission should also require information on areas subject to droughts, heatwaves, and wildfires); IAA (recommending that the Commission require registrants to provide quantitative details of the volume or revenue (percentage) contribution for facilities located in areas subject to water scarcity, flood risk, wildfires, and other climate-related natural disasters); and Morningstar (recommending that the Commission go further in mandating quantitative disclosures related to a registrant's assets exposed to physical climate risk, as such data is important across economic sectors).

[352] *See* 17 CFR 229.1502(a) and 1502(a)(2). In a change from the proposal, the final rules omit a specific reference to liability and reputational factors from the transition risk disclosure required pursuant to Item 1502(a)(2). This change was made in order to conform more closely to the definition of ''transition risks'' in Item 1500, which refers to ''regulatory, technological, and market changes.'' Although this definition refers to impacts to a registrant's liability or reputation as non-exclusive examples of negative impacts resulting from such changes, the definition of transition risks also refers to other examples of negative impacts that are not specifically mentioned in Item 1502(a)(2). To streamline the Item 1502(a)(2) disclosure requirement, and to avoid giving undue emphasis to impacts to a registrant's liability or reputation over other transition risk-related impacts, we have removed the specific reference to liability and reputational factors and have retained the more general reference to ''other transition-related factors.'' A registrant that, due to regulatory, technological, or market changes, has incurred or is reasonably likely to incur a material negative impact to its reputation or liability will be required to include a description of such impact, together with any other material transition-related impact, in its disclosure pursuant to Item 1502(a)(2).

[353] *See* 17 CFR 229.1502(a)(2).

[354] *See* Proposing Release, sections II.B through II.E.

[355] *Compare* Proposing Release, section II.B (proposing to define ''climate-related opportunities to mean the actual or potential positive impacts of climate-related conditions and events on a registrant's consolidated financial statements, business operations, or value chains, as a whole) *with* TCFD, *Recommendations of the Task Force on Climate-related Financial Disclosures,* Appendix 5 (defining ''climate-related opportunity'' to mean ''the potential positive impacts related to climate change on an organization'').

[356] Registrants have a fundamental obligation not to make materially misleading statements or omissions in their disclosures and may need to provide such additional information as is necessary to keep their disclosures from being misleading. *See* 17 CFR 230.408 and 17 CFR 240.12b–20.

horizons, as proposed.[361] Commenters stated that the proposed approach aligns with the TCFD framework and would provide flexibility for registrants by allowing them to choose time periods that best fit their particular facts and circumstances.[362] Other commenters stated that the Commission should define short-, medium-, and long-term horizons to enhance the comparability of climate risk disclosure.[363] Commenters recommended various definitions for such time periods. For example, one commenter stated that the Commission should define short-term as 5 years, medium-term as 6 to 15 years, and long-term as 16 to 30 years.[364] Other commenters recommended defining short-term as one year, medium-term as 5 years, and long-term as 10 years.[365] Another commenter recommended defining short-term as 1 to 5 years, medium-term as 5 to 20 years, and long-term as 20 to 30 years.[366] One other commenter recommended defining medium-term as 5 to 10 years and long-term as 10 to 30 years.[367]

Many other commenters opposed the proposed requirement to disclose material climate-related risks as manifested over the short, medium, and long term.[368] Commenters stated that the proposed requirement ran counter to the traditional materiality standard by which a registrant determines if a risk is material to itself as a general matter rather than applying that standard over multiple different timeframes, and indicated that such an approach could require the registrant to engage in multiple different materiality analyses.[369] Commenters also stated that the proposed requirement, which could compel a registrant to consider circumstances many years into the future, would elicit risk disclosure that is highly speculative.[370] Some commenters stated that, instead of the proposed disclosure requirement, the Commission should impose the same temporal standard that registrants use in practice when preparing a registrant's MD&A (*i.e.,* when assessing the risks that are reasonably likely to have a material impact on future operations ''over whatever time period is relevant to a registrant's particular facts and circumstances'').[371] Some commenters recommended bifurcating the climate risk disclosures into short-term and long-term timeframes, without a medium-term timeframe, similar to certain MD&A disclosures.[372] One of those commenters stated that imposing a different temporal standard for climate risk disclosure would pose meaningful challenges to management as they seek to adapt their strategies and could result in misalignment of climate-related disclosures with ''other, potentially more critical, strategically relevant disclosure issues, including the financial statements and MD&A.'' [373]

c. Final Rule

In a change from the rule proposal, the final rule (Item 1502(a)) provides that in describing any climate-related risks that have materially impacted or are reasonably likely to have a material impact, a registrant should describe whether such risks are reasonably likely to manifest in the short-term (*i.e.,* the next 12 months) and separately in the long-term (*i.e.,* beyond the next 12 months).[374] This temporal standard is generally consistent with an existing standard in MD&A, which was recommended by some commenters.[375] That MD&A standard specifically requires a registrant to analyze its ability to generate and obtain adequate amounts of cash to meet its requirements and plans for cash in the short-term (*i.e.,* the next 12 months from the most recent fiscal period end required to be presented) and separately in the long-term (*i.e.,* beyond the next 12 months).[376] The existing MD&A standard also generally requires that a registrant ''provide insight into material opportunities, challenges and risks, such as those presented by known material trends and uncertainties, on which the company's executives are most focused for both the short and long term, as well as the actions they are taking to address these opportunities, challenges and risks.'' [377] We are adopting this temporal standard to address the concern of commenters that imposition of a different temporal standard (and, in particular, one that includes a ''medium term'' period) for climate risk disclosure would pose challenges and potentially conflict with a registrant's assessment of other risks and events that are reasonably likely to have a material impact on its future operations.[378] We note, however, that a registrant is not precluded from breaking down its description of risks reasonably likely to manifest beyond the next 12 months into components that may include more medium- and longer-term risks, if that is consistent with the registrant's assessment and management of the climate-related risk.

We are modeling the temporal standard in Item 1502(a) on this MD&A standard as recommended by commenters because the materiality determination that a registrant will be required to make regarding climate-related risks under the final rules is the same as what is generally required when preparing the MD&A section in a registration statement or annual report. MD&A requires a registrant to disclose material events and uncertainties known to management that are reasonably likely to cause reported financial information not to be necessarily indicative of future operating results or of future financial condition.[379] MD&A further requires the inclusion of descriptions and amounts of matters that have had a material impact on reported operations as well as matters that are reasonably likely to have a material impact on future operations.[380]

When evaluating whether any climate-related risks have materially impacted or are reasonably likely to have a material impact on the registrant, including on its business strategy,

results of operations, or financial condition, registrants should rely on traditional notions of materiality. As defined by the Commission and consistent with Supreme Court precedent, a matter is material if there is a substantial likelihood that a reasonable investor would consider it important when determining whether to buy or sell securities or how to vote or such a reasonable investor would view omission of the disclosure as having significantly altered the total mix of information made available.[381] The materiality determination is fact specific and one that requires both quantitative and qualitative considerations.[382]

The ''reasonably likely'' component of the rules we are adopting, as with the same standard in MD&A regarding known trends, events, and uncertainties, is grounded in whether disclosure of the climate-related risk would be material to investors and requires that management evaluate the consequences of the risk as it would any known trend, demand, commitment, event, or uncertainty. Accordingly, management should make an objective evaluation, based on materiality, including where the fruition of future events is unknown.[383]

D. Disclosure Regarding Impacts of Climate-Related Risks on Strategy, Business Model, and Outlook

1. Disclosure of Material Impacts (Item 1502(b), (c), and (d))

a. Proposed Rules

The Commission proposed to require a registrant to describe the actual and potential impacts on its strategy, business model, and outlook of those climate-related risks that it must disclose pursuant to proposed Item 1502(a).[384] The Commission further proposed to require a registrant to include in such description any impacts on its:

- Business operations, including the types and locations of its operations;
- Products or services;
- Suppliers and other parties in its value chain;
- Activities to mitigate or adapt to climate-related risks, including adoption of new technologies or processes;
- Expenditure for research and development; and
- Any other significant changes or impacts.

The proposed rules would have required a registrant to disclose the time horizon for each described impact (*i.e.,* as manifested in the short, medium, or long term, as defined by the registrant when determining its material climate-related risks).[385]

When proposing these disclosure requirements, the Commission stated that information about how climate-related risks have impacted or are likely to impact a registrant's strategy, business model, and outlook can be important for purposes of making an investment or voting decision about the registrant.[386] The Commission further noted that, in response to a request for public input,[387] several commenters had stated that many registrants included largely boilerplate discussions about climate-related risks and failed to provide a meaningful analysis of the impacts of those risks on their businesses.[388] The Commission proposed the disclosure requirements about climate-related impacts to elicit more robust and company-specific disclosure on this topic.[389]

The proposed rules also would have required a registrant to discuss whether and how it has considered the identified impacts as part of its business strategy, financial planning, and capital allocation.[390] In this regard, the proposed rules would have required a registrant to provide both current and forward-looking disclosures that facilitate an understanding of whether the implications of the identified climate-related risks have been integrated into the registrant's business model or strategy, including how resources are being used to mitigate climate-related risks. The proposed rules would have required the discussion to include how any of the climate-related financial metrics referenced in proposed Article 14 of Regulation S–X, the metrics referenced in the GHG emissions section of proposed subpart 1500 of Regulation S–K, or any of the targets referenced in the targets and goals section of proposed subpart 1500, relate to the registrant's business model or business strategy.[391]

In addition, the proposed rules would have required a registrant to provide a narrative discussion of whether and how any of its identified climate-related risks have affected or are reasonably likely to affect the registrant's consolidated financial statements.[392] The proposed rules would have required this discussion to include any of the climate-related financial metrics referenced in proposed Article 14 of Regulation S–X that demonstrate that the identified climate-related risks have had a material impact on the registrant's reported financial condition or operations.[393] This proposed provision was intended to provide climate-related disclosure that is similar to MD&A, and, as noted in the discussion above, the proposed rules would allow a registrant to provide such disclosure as part of its MD&A.

b. Comments

Many commenters supported the Commission's proposal to require a

[381] *See* 17 CFR 230.405 (definition of ''material''); 17 CFR 240.12b-2 (definition of ''material''). *See also Basic Inc.* v. *Levinson,* 485 U.S. 224, 231, 232, and 240 (1988) (holding that information is material if there is a substantial likelihood that a reasonable investor would consider the information important in deciding how to vote or make an investment decision; and quoting *TSC Industries, Inc.* v. *Northway, Inc.,* 426 U. S. 438, 449 (1977) to further explain that an omitted fact is material if there is ''a substantial likelihood that the disclosure of the omitted fact would have been viewed by the reasonable investor as having significantly altered the 'total mix' of information made available.'').

[382] *See Litwin* v. *Blackstone Group, L.P.,* 634 F.3d 706, 720 (2d Cir. 2011) (''[A] court must consider 'both quantitative and qualitative factors in assessing an item's materiality,' and that consideration should be undertaken in an integrative manner.''). *See also Business and Financial Disclosure Required by Regulation S–K,* Release No. 33–10064 (Apr. 13, 2016) [81 FR 23915 (Apr. 22, 2016)] (''Concept Release'') (discussing materiality in the context of, among other matters, restating financial statements). *See also* Staff Accounting Bulletin No. 99 (Aug. 12, 1999), available at *https://www.sec.gov/interps/account/sab99.htm* (emphasizing that a registrant or an auditor may not substitute a percentage threshold for a materiality determination that is required by applicable accounting principles). Staff accounting bulletins are not rules or interpretations of the Commission, nor are they published as bearing the Commission's official approval. They represent interpretations and practices followed by the Division of Corporation Finance and the Office of the Chief Accountant in administering the disclosure requirements of the Federal securities laws. Staff accounting bulletins and any other staff statements discussed in this release have no legal force or effect: they do not alter or amend applicable law, and they create no new or additional obligations for any person.

[383] *See, e.g.,* 2020 MD&A Adopting Release. As noted above, the materiality determination that a registrant will be required to make regarding climate-related risks under the final rules is the same as what is generally required when preparing the MD&A section of a registration statement or annual report. Accordingly, registrants can look to the guidance in the 2020 MD&A Adopting Release regarding application of the ''reasonably likely'' standard when considering their disclosure obligations under the various components of Item 1502. According to this guidance, the reasonably likely standard ''is not intended to, nor does it require, registrants to affirm the non-existence or non-occurrence of a material future event.'' Rather, ''it requires management to make a thoughtful and objective evaluation, based on materiality, including where the fruition of future events is unknown.'' 2020 MD&A Adopting Release, 86 FR at 2093.

registrant to describe the actual and potential impacts on its strategy, business model, and outlook of those climate-related risks that it has determined are reasonably likely to have a material impact on its business or consolidated financial statements.[394] Commenters indicated that detailed information about the actual and potential impacts of a registrant's identified climate-related risks is central to helping investors do the following: understand the extent to which a registrant's business strategy or business model may need to change to address those impacts; evaluate management's response to the impacts and the resiliency of the registrant's strategy to climate-related factors; and assess whether a registrant's securities have been correctly valued.[395] One commenter indicated that investors need more detailed information about the effects of climate-related risks because such risks can affect a company's operations and financials in a wide range of ways, including impacts on revenues, the useful life of assets, loan qualification, and insurance costs.[396] Other commenters stated that, despite the importance for investors of information about climate-related financial impacts, such information is currently underreported.[397]

Several commenters also supported the proposed requirement to include in the impacts description any impacts on, or any significant changes made to, a registrant's business operations, products or services, suppliers and other parties in its value chain, activities to mitigate or adapt to climate-related risks, including adoption of new technologies or processes and expenditure for research and development, and any other significant changes or impacts.[398] Commenters stated that the proposed enumerated disclosure items, including impacts related to a registrant's supply or value chain, are necessary to provide a comprehensive description of a registrant's identified climate-related risks, and are consistent with the types of impacts that a registrant may face and that are recommended for disclosure by the TCFD.[399] Commenters further stated that the proposed disclosure items would help investors understand the extent to which a registrant has taken actions to mitigate or adapt to a material climate-related risk.[400] One commenter, however, recommended that the final rules should clarify that the list of impacts are examples of impacts, to be disclosed if applicable, and not required items of disclosure.[401]

A number of commenters also supported the proposed requirement to disclose whether and how a registrant has considered any identified impacts as part of its business strategy, financial planning, and capital allocation because it would help investors assess a registrant's likely resiliency to climate-related impacts and because, due to its consistency with the TCFD's recommendations, the proposed disclosure requirement would lead to more consistent, comparable, and reliable climate-related disclosure.[402] Several commenters further supported the proposed provision requiring a registrant to provide a narrative discussion of whether and how any of its identified climate-related risks have affected or are reasonably likely to affect its consolidated financial statements.[403] Some of those commenters recommended that this narrative discussion should be part of a registrant's MD&A.[404] One commenter stated that the proposed provision would help investors understand how management views the realized or likely impacts of identified climate-related risks on a company's consolidated financial statements, which would then assist investors in their assessment of a registrant's climate risk management.[405] One commenter recommended adopting a climate disclosure framework, similar to MD&A, that focuses on providing investors with material climate-related information that management uses to make strategic decisions while allowing registrants to tailor the disclosure to fit their particular circumstances.[406] This commenter stated that requiring a discussion of climate-related impacts from management's perspective and encompassing impacts to the registrant, its suppliers, and other parties in its value chain would provide investors with what has primarily been missing from current Commission filings.[407] The Commission's Investor Advisory Committee similarly recommended requiring a separate ''Management Discussion of Climate-Related Risks and Opportunities'' in Form 10–K, similar to the disclosure required by Item 303 of Regulation S–K (MD&A), which would enhance investor understanding of management's views of climate-related risks and opportunities.[408]

Several commenters stated that, instead of requiring the disclosure of financial metrics concerning climate-related impacts in the financial statements, as proposed, the Commission should require registrants to consider material climate-related impacts when discussing the results of operations, capital resources, and liquidity under MD&A.[409] One commenter, responding to the Commission's proposed amendments to Regulation S–X, recommended requiring the disclosure of a registrant's actual discrete and separable climate-related expenditures, both expensed and capitalized, made during each fiscal year, which would be linked to and aligned with the risks, goals, and strategies companies would disclose under proposed Item 1502 of Regulation S–K.[410] The commenter's recommended expenditures disclosure would be included in the financial statements but would take the place of the proposed ''financial impacts'' disclosure under Regulation S–X and would be presented in tabular format and cover three distinct categories: climate-related events; transition activities for publicly disclosed climate-related targets and goals, such as those included in a company's sustainability report; and all other transition activities.[411] Another

commenter stated that if a registrant's financial estimates and assumptions are impacted by exposures to uncertainties associated with transition risks, the registrant should be required to provide qualitative disclosure about such impacts to its financial estimates and assumptions in its climate-related disclosure or in its MD&A instead of in the financial statements.[412]

Many other commenters, however, broadly opposed the proposed disclosure requirement regarding impacts from climate-related risks.[413] Some commenters stated that the proposed disclosure requirement was unnecessary because the Commission's existing rules already require a registrant to disclose material impacts from climate-related risks.[414] Some commenters expressed concern that the proposed disclosure requirement would result in disclosure of a large volume of information that is immaterial to investors and burdensome for registrants to produce.[415] Some commenters stated that the proposed requirement to disclose impacts on participants in a registrant's value chain was particularly onerous for registrants because of difficulties in collecting relevant and reliable information from third parties.[416] In this regard, some commenters stated that suppliers and other parties in a registrant's value chain may resist pressure to provide the data necessary to assess their climate risk exposure because they are private companies concerned about incurring increased costs or competitive harm.[417] Other commenters stated that the proposed disclosure requirement was too prescriptive and would not allow a registrant to tailor its disclosures according to its particular business or industry.[418] One commenter recommended that we delete the term ''business model'' because it is not otherwise used in Regulation S–K and might be interpreted by some registrants that do not have a business model as implying that they must adopt one.[419]

Some commenters generally supported the proposed impact disclosure provision but recommended that the Commission add a materiality qualifier to elicit disclosure of only the most likely and significant impacts, which they asserted would provide more useful information for investors and reduce a registrant's compliance burden.[420] Similarly, some commenters generally supported some form of climate disclosure while recommending that the Commission make the final rules more principles-based so that registrants could better tailor their disclosures to reflect their own particular facts and circumstances.[421]

c. Final Rules

The final rule provision (Item 1502(b)) will require a registrant to describe the actual and potential material impacts of any climate-related risk identified in response to Item 1502(a) on the registrant's strategy, business model, and outlook.[422] Information about the actual and potential material impacts of climate-related risks on a registrant's strategy, business model, and outlook is central to understanding the extent to which a registrant's business strategy or business model has changed, is changing, or is expected to change to address those impacts. This information is also central to evaluating management's response to the impacts and the resiliency of the registrant's strategy to climate-related factors as it pertains to the registrant's results of operations and financial condition. Numerous commenters on the proposal shared some or all of these views.[423]

The proposed rule did not specifically include a materiality qualifier when requiring a registrant to describe the actual and potential impacts of any identified climate-related risk in response to proposed Item 1502(a). In practice, however, proposed Item 1502(b) would have elicited disclosure focused on material impacts because proposed Item 1502(a) would have required a registrant to describe only those climate-related risks that the registrant had identified as having materially impacted or being reasonably likely to have a material impact on the registrant.[424] Nevertheless, we recognize that, as proposed, Item 1502(b) may have caused some confusion regarding the scope of the proposed disclosure requirement.[425] Some commenters misinterpreted the rule proposal as requiring the disclosure of actual or potential impacts of climate-related risks, regardless of their materiality.[426] We have, therefore, added an explicit materiality qualifier to Item 1502(b) to clarify that a registrant is only required to disclose material impacts of climate-related risks that it has identified in response to Item 1502(a). This clarifying amendment will help address commenters' concerns that the proposed rule could result in the disclosure of large amounts of immaterial information and thus be unduly burdensome for registrants.

Some commenters asserted that the proposed rule provision was not necessary because the Commission's existing rules generally require a registrant to disclose the effects of material risks, including climate-related risks.[427] However, as other commenters have stated, many companies do not discuss any climate-related risks in response to existing disclosure requirements.[428] Accordingly, a rule provision that specifically requires the disclosure of material impacts of climate-related risks, and lists the types of potential material impacts that must be described, if applicable, will provide investors access to this information on a more consistent and comparable basis.[429]

The final rule provision largely lists the same types of potential material impacts of climate-related risks as under the rule proposal. The list, which is intended to be non-exclusive, includes, as applicable, material impacts on the registrant's:

- Business operations, including the types and locations of its operations;
- Products or services;
- Suppliers, purchasers, or counterparties to material contracts, to the extent known or reasonably available;
- Activities to mitigate or adapt to climate-related risks, including adoption of new technologies or processes; and

• Expenditure for research and development.

If none of the listed types of impacts or any other impacts are material, a registrant need not disclose them. Similarly, if a registrant has identified a climate-related risk that has materially impacted or is reasonably likely to impact its business strategy, results of operations, or financial condition, but the actual and potential material impact on its strategy, business model, and outlook is not specifically listed in the final rule, the impact will need to be disclosed. By providing a non-exclusive list of material impacts of climate risks in the rule text, but not mandating that all or only these impacts be disclosed, the final rule will help elicit more meaningful and relevant disclosure without overburdening registrants or investors with the presentation of irrelevant information.

We have revised one of the types of potential material impacts listed in the proposal that referenced ''suppliers and other parties in [a registrant's] value chain,'' by replacing this phrase with ''[s]uppliers, purchasers, or counterparties to material contracts, to the extent known or reasonably available.'' This revision is intended to address the concern of some commenters that requiring a registrant to include material impacts to a registrant's value chain would be overly burdensome to both the registrant and to entities in the registrant's value chain.[430] Thus the final rule limits the scope of this specific topic to include only material impacts to the registrant's suppliers, purchasers, or counterparties to material contracts and further limits the information that should be disclosed about those impacts to information that is known or is reasonably available.[431] The adopted provision is consistent with the Commission's general rules regarding the disclosure of information that is difficult to obtain, which will apply to the final rules if their conditions are met.[432] Accordingly, as modified, this provision will help limit the compliance burden of the final rules by eliminating any potential need for registrants to undertake unreasonable searches or requests for information from their value chains.

Final Item 1502(c) will require a registrant to discuss whether and how the registrant considers any material impacts described in response to Item 1502(b) as part of its strategy, financial planning, and capital allocation.[433] Similar to the rule proposal, but modified to make Item 1502(c) less prescriptive, the final rule provision will require a registrant to include in its disclosure responsive to this provision, as applicable:

• Whether the impacts of the climate-related risks described in response to Item 1502(b) have been integrated into the registrant's business model or strategy, including whether and how resources are being used to mitigate climate-related risks; and

• How any of the targets referenced in Item 1504 [434] or in a described transition plan [435] relate to the registrant's business model or strategy.

As noted by several commenters, this provision will help investors assess a registrant's resiliency to impacts of climate-related risks, by providing information about how management considers the realized or likely impacts of identified material climate-related risks on a company's business model or strategy.[436]

In further response to commenters' concern that the proposed rules were overly prescriptive and could result in a volume of information that could be confusing for investors,[437] we have streamlined the Item 1502(c) disclosure requirement. For example, we have omitted from the final Item 1502(c) provision the proposed requirement to ''[p]rovide both current and forward-looking disclosures,'' [438] which should provide registrants with more flexibility to determine the appropriate disclosures needed in response to the requirement. We also have eliminated the requirement to describe how any of the financial statement metrics or GHG emissions metrics relate to the registrant's business model or business strategy.[439] Although a registrant may choose to include forward-looking information or discuss any climate-related metrics or financial information in response to Item 1502(c), the final rule leaves it up to each registrant to determine, based on its particular facts and circumstances, what disclosure is necessary to help investors understand whether and how management has incorporated the material impacts of its climate-related risks into its business strategy, financial planning, and capital allocation.

In addition, to further streamline the disclosure and reduce some of the redundancy in the rule proposal,[440] we have eliminated from Item 1502(c) the proposed disclosure requirement concerning the role that the use of carbon offsets or RECs has played in a registrant's climate-related strategy. Under the final rules, as part of its targets and goals disclosure,[441] a registrant will be required to provide disclosure concerning its use of carbon offsets or RECs if they constitute a material component of a registrant's plan to achieve its climate-related targets or goals.[442] Given this targets and goals disclosure requirement, explicitly requiring disclosure concerning the use of carbon offsets and RECs in the context of Item 1502(c) is not necessary.

We acknowledge the commenter who recommended that we delete the term ''business model'' in the proposed disclosure item; [443] however, we have retained the use of this term in the final rule because requiring a registrant to disclose a material impact on its business model caused by a climate-related risk will provide important information to investors about the effectiveness of the registrant's climate risk management that would otherwise be lost were we to omit this reference. In addition, registrants generally should be familiar with the term even if not previously used in Regulation S–K.[444] Moreover, the TCFD uses that term in connection with disclosure about the resilience of a company's strategy to climate-related risks, and as such, using the concept in the final rules will provide consistency for those registrants that have been providing climate-related information based on that framework.[445] If a registrant has not yet articulated a business model, or does not believe that its business model is or will be materially impacted by climate-related

risks, it need not provide the disclosure specified in this rule provision.

Proposed Item 1502(d) would have required a registrant to provide a narrative discussion of whether and how any climate-related risks described in response to proposed Item 1502(a) have affected or are reasonably likely to affect the registrant's consolidated financial statements.[446] When proposing Item 1502(d), the Commission explained that this provision was intended to elicit a discussion of the financial effects of climate-related risks similar to MD&A.[447] In a clarifying change from the proposal, and to address commenters' concern that the proposed rule could result in immaterial disclosure,[448] we have added materiality qualifiers to ''have affected'' and ''are reasonably likely to affect'' to clarify that Item 1502(d) requires a discussion only of material climate-related risks (*i.e.,* climate-related risks that a registrant has identified as having had or being reasonably likely to have a material effect on the registrant).[449] In a further change from the proposal, the final rules refer to the registrant's ''business, results of operations, and financial condition'' rather than ''consolidated financial statements.'' This is to reflect that the type of disclosure that is intended by this provision is more similar to that found in MD&A than that found in the notes to the financial statements.[450]

Proposed Item 1502(d) also would have required a discussion that included the financial statement metrics to be disclosed pursuant to proposed Article 14 of Regulation S–X. In a change from the proposal, Item 1502(d)(2) will require a registrant to describe quantitatively and qualitatively the material expenditures incurred and material impacts on financial estimates and assumptions that, in management's assessment, directly result from activities to mitigate or adapt to climate-related risks disclosed pursuant to Item 1502(b)(4).[451] Focusing the disclosure requirement on material expenditures that, based on management's assessment, were incurred as a direct result of the registrant's mitigation or adaptation activities will provide investors with a financial metric that is important to assessing the registrant's management of the disclosed risk, as well as assessing the financial impact of such activities. At the same time, linking the disclosure of the expenditures with management's assessment that they directly result from mitigation or adaptation activities will more closely align the disclosure requirement with how the registrant actually evaluates a material climate-related risk. This will not only provide investors with important information about a registrant's strategic decision-making concerning a material climate-related risk but should also help the registrant determine whether there are material expenditures that must be disclosed, thereby lowering the compliance burden, as some commenters noted.[452]

This disclosure requirement is intended to capture actual material expenditures, both capitalized and expensed, made during the fiscal year for the purpose of climate-related risk mitigation or adaptation. As one commenter noted, requiring the disclosure of material expenditures that are directly linked to a registrant's climate-related goals as part of a registrant's strategy or targets and goals disclosure under Regulation S–K,[453] instead of requiring the disclosure of climate-related financial impacts on line items under Regulation S–X, as proposed, will help reduce the compliance burden of the final rules while providing material information for investors.[454] Although this commenter recommended that such expenditures disclosure be presented in tabular format, the final rule provision does not specify a particular format. The final rule also does not require disclosure of ''discrete and separable'' expenditures, as the commenter suggested. A registrant may present the material expenditures disclosure in tabular or narrative form according to how it believes such information best fits within its overall climate risk disclosure.[455] Likewise, the final rules provide registrants with more flexibility than that suggested by the commenter to determine which and to what extent expenditures must be disaggregated or otherwise broken out. This disclosure requirement covers material expenditures for the mitigation or adaptation of both physical risks and transition risks. The final Regulation S–X provisions that we are adopting, on the other hand, do not cover financial impacts caused by transition risks.[456] This Regulation S–K provision, therefore, will elicit disclosures about material expenditures related to activities engaged in for the mitigation of and adaptation to climate-related risks in Commission filings while avoiding the difficulties of reporting such information in a note to the financial statements, as proposed.[457]

As discussed in more detail below,[458] we recognize that some commenters on the proposed Regulation S–X amendments expressed concern regarding the attribution of expenses to climate risk mitigation activities. Specifically, these commenters stated that registrants make business decisions, such as incurring an expenditure to purchase a piece of machinery that is more energy efficient, for multiple reasons, and as a result, a registrant's transition activities may be inextricably intertwined with its ordinary business activities.[459] Although similar concerns could arise with respect to Item 1502(d)'s expenditures disclosure requirement, subjecting the disclosure requirement to materiality rather than a bright-line threshold, as was proposed for the Regulation S–X amendments, and limiting the disclosure to material expenditures that, in ''management's assessment,'' are the direct result of

[446] *See* Proposing Release, section II.C.1.

[447] *See id.*

[448] *See supra* note 415 and accompanying text.

[449] *See* 17 CFR 229.1502(d)(1).

[450] As previously noted, several commenters recommended making or linking any climate-related financial disclosure requirements under or with MD&A disclosure requirements. *See supra* note 409 and accompanying text.

[451] *See* 17 CFR 229.1502(d)(2).

[452] *See, e.g.,* letters from Amazon; and PwC.

[453] *See infra* sections II.D.2.c and II.G.3.a for a similar material expenditures disclosure requirement, respectively, as part of a registrant's transition plan disclosure under Item 1502(e) and targets and goals disclosure under Item 1504 of Regulation S–K. To the extent that there is any overlapping disclosure of material expenditures in response to these Items, to avoid redundancy, a registrant should provide disclosure of material expenditures regarding the Item where, in its assessment, such disclosure is most appropriate, and then cross-reference to this disclosure when responding to the other Items.

[454] *See* letter from Amazon. As examples of transition activities expenditures, this commenter presented costs and expenses related to electrifying its delivery fleet, renewable energy purchases, and carbon offset purchases. *See id.,* Appendix A.

[455] The structured data requirements set forth in Item 1508 will facilitate investors' ability to find and analyze material expenditures disclosure regardless of whether provided in tabular or narrative form. *See infra* section II.M.3.

[456] *See infra* section II.K. In addition, in a change from the proposal, the amendments to Regulation S–X do not require the disclosure of expenditures to mitigate the risks of severe weather events and other natural conditions. Therefore, under Item 1502, investors will also receive information about expenditures related to the mitigation of physical risks that they will not otherwise receive in the disclosures required by the amendments to Regulation S–X.

[457] *See supra* notes 409 and 452 and accompanying text. The amendments to Regulation S–X will require the disclosure of expenditures related to carbon offsets and RECs, a type of transition activity, if carbon offsets and RECs have been used as a material component of a registrant's plans to achieve its disclosed climate-related targets or goals in a note to the financial statements. *See infra* section II.K.

[458] *See infra* sections II.K.2.b.iii, 3.b and c.

[459] *See infra* note 1892 and accompanying text.

mitigation or adaptation activities, will help to mitigate the compliance burden and related concerns. In addition, in responding to the final rules, registrants will have the flexibility to explain qualitatively the nature of the expenditure and how management has determined that it is a direct result of the disclosed transition activities, which may help alleviate concerns about potential liability exposure for attribution decisions.[460]

Requiring the disclosure of material impacts on financial estimates and assumptions that, from management's assessment, directly result from mitigation or adaptation activities will also provide investors with important information that will help them understand a registrant's climate risk management and assess any effects on its asset valuation and securities pricing.[461] Registrants will similarly have the flexibility to explain qualitatively the nature of the impact on financial estimates and assumptions and how, in management's assessment, it is a direct result of the disclosed mitigation or adaptation activities.

We recognize that registrants may need to develop new systems and adjust their DCPs to ensure the accurate tracking and reporting of material expenditures and material impacts on financial estimates and assumptions that directly result from climate-related mitigation or adaptation activities.[462] To accommodate such development and adjustment, we are providing an additional phase in for the requirement to disclose this information in the context of Item 1502. Accordingly, a registrant will not be required to comply with the Item 1502(d)(2) requirement until the fiscal year immediately following the fiscal year of its initial compliance date for subpart 1500 disclosures based on its filer status.[463]

2. Transition Plan Disclosure (Items 1500 and 1502(e))

a. Proposed Rule

The Commission proposed to require a registrant that has adopted a transition plan as part of its climate-related risk management strategy to describe the plan, including the relevant metrics and targets used to identify and manage any physical and transition risks.[464] The proposed requirements were intended to help investors understand how a registrant intends to address identified climate-related risks and any transition to a lower carbon economy while managing and assessing its business operations and financial condition. The Commission proposed to define ''transition plan'' to mean a registrant's strategy and implementation plan to reduce climate-related risks, which may include a plan to reduce its GHG emissions in line with its own commitments or commitments of jurisdictions within which it has significant operations. To allow for an understanding of a registrant's progress to meet its plan's targets or goals over time, the proposed rules would have required the registrant to update its disclosure about its transition plan each fiscal year by describing the actions taken during the year to achieve the plan's targets or goals.[465]

The proposed rules would have further required a registrant that has adopted a transition plan to discuss, as applicable:

- How the registrant plans to mitigate or adapt to any identified physical risks, including but not limited to those concerning energy, land, or water use and management; and
- How the registrant plans to mitigate or adapt to any identified transition risks, including the following:
  - Laws, regulations, or policies that:
    - Restrict GHG emissions or products with high GHG footprints, including emissions caps; or
    - Require the protection of high conservation value land or natural assets;
  - Imposition of a carbon price; and
  - Changing demands or preferences of consumers, investors, employees, and business counterparties.

The proposed rules provided that a registrant that has adopted a transition plan may also describe how it plans to achieve any identified climate-related opportunities, such as:

- The production of products that may facilitate the transition to a lower carbon economy, such as low emission modes of transportation and supporting infrastructure;
- The generation or use of renewable power;
- The production or use of low waste, recycled, or other consumer products that require less carbon intensive production methods;
- The setting of conservation goals and targets that would help reduce GHG emissions; and
- The provision of services related to any transition to a lower carbon economy.

b. Comments

Many commenters supported the proposed provision requiring a registrant that has adopted a transition plan to describe the plan, including the relevant metrics and targets used to identify and manage any physical and transition risks.[466] Commenters stated that information about a registrant's transition plan would help investors evaluate the seriousness of stated corporate intentions to identify and manage climate-related risks, including the credibility of climate-related targets and progress made toward those targets.[467] Several commenters stated that information regarding a registrant's transition plan is important to help investors evaluate a registrant's management of its identified climate-related risks and help them assess the resiliency of a registrant's strategy in a potential transition to a lower carbon economy.[468] Some commenters specifically supported requiring disclosure, as applicable, of a registrant's plan to mitigate or adapt to identified physical risks, as proposed, and further stated that there are no transition risks, as identified in the rule proposal, that should be excluded from the transition plan disclosure requirement.[469] Other commenters stated that the proposed requirement would help provide more consistent and comparable disclosure about companies' transition plans, which, despite the

[460] We note also that the ''significant contributing factor'' attribution principle applicable to certain disclosures required by the final rules in the financial statements, as well as any other guidance we provide below regarding the presentation of the disclosures in the financial statements, does not pertain to the expenditure disclosure in Regulation S–K. *See infra* section II.K.3.c.

[468] *See, e.g.,* letters from CalPERS; Calvert; ICGN; Morningstar; PRI; PwC; and Soros Fund.

[469] *See, e.g.,* letters from Anthesis; Calvert; and TotalEnergies.

importance of such information, is currently lacking.[470] As previously noted, one other commenter recommended requiring the disclosure of a registrant's climate-related expenditures, both expensed and capitalized, made during each fiscal year, which would be linked to and aligned with the risks, goals, and strategies that the registrant would disclose under proposed Item 1502 of Regulation S–K.[471]

One commenter stated that the Commission should require a registrant that has a transition plan to disclose how it is aligned with the goals of the Paris Agreement.[472] Another commenter similarly indicated that the proposed transition plan disclosure requirement would help investors evaluate the extent to which a registrant's plan is aligned with global climate-related goals.[473] A few commenters stated that mandatory disclosure of a transition plan would not raise competitive harm concerns.[474] One commenter recommended that we revise the transition plan disclosure requirement so that it aligns more with the TCFD's recommended disclosure of transition plans, which focuses solely on transition risk and does not include the mitigation or adaptation of physical risk.[475] According to this commenter, a transition plan ''is not a tool for addressing physical risks, and disclosures on how an organization would address, manage and reduce the impact of physical risks should be disclosed under the risk management or targets sections.'' [476]

A number of commenters opposed the proposed requirement to describe a transition plan if one has been adopted.[477] Some commenters stated that the proposed disclosure requirement was too prescriptive and would likely create a disincentive for the adoption of transition plans.[478] Some commenters also stated that the proposed requirement would compel the disclosure of confidential business information and raise competitive harm concerns.[479] One commenter asserted that the proposed requirement is not necessary because the Commission's existing rules, which require disclosure of any material change to a previously disclosed business strategy, would arguably elicit disclosure of a registrant's transition plan.[480] Other commenters recommended that the Commission reduce the prescriptive nature of the proposed transition plan disclosure provision by requiring disclosure only of elements of a transition plan or transition activities that are material.[481] One other commenter similarly recommended requiring the disclosure only of a material transition plan that has been approved by the board of directors.[482] Still other commenters stated that transition plan disclosure should be voluntary.[483]

Some commenters supported the proposed provision specifying that a registrant may disclose how it plans to achieve any climate-related opportunities.[484] Commenters stated that information about whether and how a registrant intends to achieve climate-related opportunities, such as by creating products and services to facilitate a transition to a lower carbon economy, would be helpful for investors when comparing registrants' climate-related preparedness for the purpose of making investment decisions.[485] One commenter recommended that the Commission require, rather than permit, the disclosure of how a registrant plans to achieve any climate-related opportunities mentioned in its transition plan in order to discourage deceptive statements.[486]

Some commenters supported the proposed provision requiring a registrant to update its disclosure about its transition plan each fiscal year by describing the actions taken during the year to achieve the plan's targets or goals.[487] Several of these commenters stated that the updating provision was necessary to help investors track a registrant's progress toward meeting a transition plan's goals and to enable investors to make or alter their investment decisions based on current climate-related information.[488] One of these commenters stated that ''[c]ompanies that try to distinguish themselves by releasing a public transition plan often are not required to provide updates as to how they are progressing against those targets, significantly limiting an investor's ability to assess management's success in reaching their goals.'' [489] A few of these commenters further stated that the proposed updating requirement would not act as a disincentive to the adoption of a transition plan because companies that intend to follow through on their transition plan commitments will want to assess their progress in achieving them and report on such progress and any climate-related opportunities they may be pursuing.[490]

Other commenters, however, opposed the proposed updating requirement.[491] One commenter stated that the proposed requirement would be burdensome for registrants and would act as a disincentive to the adoption of a transition plan.[492] Another commenter stated that, due to the long timeline of transition plans, annual progress updates would in many cases not provide meaningful information for investors.[493] This commenter recommended that there should instead be a requirement to annually report any actions taken to achieve transition plans that are material to the registrant, as well as any material positive or negative deviations from the plan or changes to it that are material to the registrant.[494] Another commenter stated that a registrant should have to update its

transition plan disclosure only when the registrant believes it is appropriate to do so, and such updating should occur at most on an annual basis.[495]

c. Final Rule

After considering comments received, we are adopting, with modifications from the proposal, a final rule provision (Item 1502(e)) that will require a registrant to describe a transition plan if it has adopted the plan to manage a material transition risk.[496] Like the rule proposal, the final rules define (in Item 1500) a ''transition plan'' to mean a registrant's strategy and implementation plan to reduce climate-related risks, which may include a plan to reduce its GHG emissions in line with its own commitments or commitments of jurisdictions within which it has significant operations.[497] The final rules do not mandate that registrants adopt a transition plan; if a registrant does not have a plan, no disclosure is required.

As noted in the Proposing Release, registrants may adopt transition plans to mitigate or adapt to climate-related risks as an important part of their climate-related risk management strategy, particularly if the registrant has made commitments, or operates in a jurisdiction that has made commitments, to reduce its GHG emissions.[498] We recognize that not every registrant has a transition plan and, as noted above, this rulemaking does not seek to prescribe any particular tools, strategies, or practices with respect to climate-related risks. If, however, a registrant has adopted such a plan, information regarding the plan is important to help investors evaluate a registrant's management of its identified climate-related risks and assess the potential impacts of a registrant's strategy to achieve its short- or long-term climate-related targets or goals on its business, results of operations, and/or its financial condition. Moreover, a registrant's transition plan may have a significant impact on its overall business strategy, for example, where companies operate in jurisdictions with laws or regulations in place designed to move them away from high emissions products and services.[499] Because the steps a registrant plans to take pursuant to its transition plan may have a material impact on its business, results of operations, or financial condition, investors have sought more detailed disclosure about transition plans.[500]

We disagree with commenters that stated that transition plan disclosure should be voluntary[501] and that a transition plan disclosure requirement was not necessary because the Commission's existing business description rules would arguably elicit sufficient disclosure of a registrant's transition plan.[502] As other commenters noted, many registrants are not providing decision-useful information about their transition plans under the Commission's existing disclosure rules.[503] While existing Item 101 of Regulation S–K may result in some disclosure regarding transition plans in response to the general requirements of that rule, mandatory disclosure about transition plans will help ensure that investors receive the information they need to evaluate a registrant's management of material climate-related risks and the impact of those plans on its results of operations and financial condition in a more consistent and predictable manner.

We are cognizant, however, of commenters' concerns that the proposed transition plan disclosure provision was overly prescriptive and could result in immaterial disclosure or discourage registrants from adopting a transition plan to avoid having to describe the plan in detail.[504] To address these concerns, we have significantly streamlined the transition plan disclosure provision and revised the provision so that the description of a transition plan is only required if a registrant has adopted the plan to manage a material transition risk. Unlike the proposed rule, the final rule does not list the types of transition risks and factors related to those risks that must be disclosed, if applicable.[505] Instead, a registrant that is required to provide transition plan disclosure will have the flexibility to provide disclosure that addresses the particular facts and circumstances of its material transition risk.[506] We also note that, as with scenario analysis and use of internal carbon price disclosure, a registrant's transition plan disclosure will be subject to a safe harbor.[507]

Similar to the proposed rule, the final rule requires a registrant to update its annual report disclosure about the transition plan each fiscal year by describing any actions taken during the year under the plan, including how such actions have impacted the registrant's business, results of operations, or financial condition.[508] This updating requirement will help investors understand the registrant's progress under the plan over time, track the impacts of a transition plan on a registrant's business and, as noted by commenters, help inform investment decisions.[509] We disagree with the view of commenters who stated that this updating requirement would result in disclosure of information that is not meaningful for investors.[510] Investors have indicated that they need periodic information regarding the steps a registrant has taken to achieve an announced climate-related target or goal in order to evaluate a registrant's ongoing management of a material transition risk for the purpose of informing their investment or voting decisions.[511] Once a registrant has provided disclosure about a transition plan it has adopted to manage a material climate risk, we do not expect that it would be particularly burdensome for the company to disclose updated information about actions taken under the plan on a going forward basis.[512] Disclosure of the steps a registrant intends to make under a transition plan, and whether it has taken those steps, will help investors assess the financial impacts of the plan on the registrant's business, results of operations, or financial condition.[513] Moreover,

[504] *See supra* notes 478 and 481 and accompanying text.

[505] *See* Proposing Release, section II.E.2.

[506] As discussed above, transition risk is defined as the actual or potential negative impacts on a registrant's business, results of operations, or financial condition attributable to regulatory, technological, and market changes to address the mitigation of, or adaptation to, climate-related risks, such as increased costs attributable to changes in law or policy, reduced market demand for carbon-intensive products leading to decreased prices or profits for such products, the devaluation or abandonment of assets, risk of legal liability and litigation defense costs, competitive pressures associated with the adoption of new technologies, and reputational impacts (including those stemming from a registrant's customers or business counterparties) that might trigger changes to market behavior, consumer preferences or behavior, and registrant behavior. *See* 17 CFR 229.1500.

[507] *See infra* section II.J.3.

[508] *See* 17 CFR 229.1502(e)(1).

[512] We note that such an update would not be required where disclosure of the underlying transition plan would not be currently required (*e.g.,* because the plan is no longer used to manage a material transition risk).

[513] *See, e.g.,* letters from AGs of Cal. *et al.;* BNP Paribas; and Morningstar.

requiring this information on an annual basis will allow investors to take into account current climate-related information in their investment and voting decisions more consistently than they would be able to if registrants were required to update their climate-related information less frequently or only when they deemed it appropriate.[514]

We recognize that some commenters asserted that an updating requirement would act as a disincentive to the adoption of a transition plan. This effect may be attenuated, as some commenters indicated,[515] if registrants that have disclosed a plan wish to inform investors about progress achieved pursuant to the plan. In any event, if a registrant is using a transition plan to manage a material transition risk, we think it is appropriate for registrants to provide ongoing disclosure about the plan so that investors can assess its impact on the registrant's business.[516] As previously noted, however, we are agnostic about whether or how a registrant is managing its climate-related risks, and the final rules are intended neither to incentivize nor disincentivize the use of a transition plan or any other climate risk management tool.

In a modification of the proposed rule, which would have generally required the disclosure of the relevant metrics and targets used to identify and manage transition risk under a transition plan, the final rule will require a registrant, as part of its updating disclosure, to include quantitative and qualitative disclosure of material expenditures incurred and material impacts on financial estimates and assumptions as a direct result of the disclosed actions taken under the plan.[517] While this provision is similar to Item 1502(d), Item 1502(e) differs in that it is intended to elicit disclosure about material expenditures and material impacts on financial estimates and assumptions that directly result from actions taken under a transition plan (*e.g.,* material expenditures made for climate-related research and development). Item 1502(e) is not limited to disclosure concerning expenditures and impacts that directly result from mitigation or adaptation activities; [518] however, to the extent that a registrant's disclosure made in response to Item 1502(d) or Item 1502(e) overlap with each other or with disclosure required under any other subpart 1500 provision,[519] the registrant need not repeat the disclosure.

Similar to Item 1502(d), the disclosure requirement under Item 1502(e) is intended to capture material expenditures, both capitalized and expensed, made during the fiscal year under a transition plan, and to more closely align with how the registrant actually makes strategic decisions about taking actions under a transition plan. This provision will provide an important metric to help investors assess a registrant's climate risk management and the financial impact of a transition plan while also helping to limit the compliance burden, as some commenters noted.[520] We have not qualified Item 1502(e) by referring to management's assessment as we have done in Item 1502(d) (*i.e.,* material expenditures and material impacts that, in management's assessment, directly result from the disclosed actions). We believe that if a registrant has adopted a transition plan to manage a material transition risk, it is likely that management will oversee actions taken under the plan and, therefore, any material expenditures or material impacts on financial estimates and assumptions that are disclosed will have been assessed by management as being the direct result of such actions.

As under Item 1502(d), when responding to Item 1502(e), a registrant will have flexibility to explain qualitatively the nature of a material expenditure or material impact on its financial estimates or assumptions and how it directly resulted from the disclosed actions taken under the plan. Additionally, when considering which expenditures related to actions taken under a disclosed plan are material over the relevant period and therefore require disclosure, if individual expenditures do not appear to be material, registrants should consider whether overall expenditures related to actions taken under the plan are material in the aggregate and, if so, provide appropriate disclosure. For example, a series of individually immaterial expenditures could be the result of the same action or related actions under the plan, and those expenditures could be material in the aggregate. With respect to the disclosure of material impacts on financial estimates and assumptions as a direct result of the disclosed actions, to the extent that such information is disclosed in response to Rule 14–02(h) of Regulation S–X, a registrant would be able to cross-reference to such disclosure.[521]

Similar to Item 1502(d)(2), to allow for the development of systems, controls, and procedures to track and report material expenditures and material impacts on financial estimates and assumptions directly resulting from actions taken under a transition plan, we are phasing in compliance with Item 1502(e)(2). A registrant will not be required to comply with either provision until the fiscal year immediately following the fiscal year of its initial compliance date for the subpart 1500 rules based on its filer status.[522]

As recommended by one commenter,[523] we have removed the reference to physical risks that was in the proposed rule.[524] This change will make the transition plan disclosure requirement more consistent with voluntary disclosures that are based on the TCFD's recommendations,[525] which may mitigate the costs and complexity of complying with the final rule for registrants already familiar with the TCFD's framework.[526] A registrant that faces a material physical risk, however, will still be required to disclose how it is managing that risk as part of its risk management disclosure.[527] These revisions will elicit material information for investors about how a registrant

[514] *See supra* note 495 and accompanying text.

[515] *See supra* note 490 and accompanying text.

[516] To the extent that a registrant no longer uses a transition plan to manage a material climate risk, disclosure under this item, including the requirement for updates, would not be required.

[517] *See* 17 CFR 229.1502(e)(2).

[518] *See supra* section II.D.1.c for a discussion of Item 1502(d)(2)'s requirement to disclose material expenditures and material impacts on financial estimates and assumptions directly resulting from mitigation or adaptation activities.

[519] For example, Item 1504(c)(2) requires similar disclosure regarding material impacts that directly result from actions taken by a registrant to achieve a disclosed target or goal. *See infra* section II.G.3. To the extent that there is any overlapping disclosure of material expenditures in response to Items 1502(d)(2), 1502(e), and 1504(c)(2), to avoid redundancy, a registrant should provide disclosure of material expenditures regarding the Item where, in its assessment, such disclosure is most appropriate, and then cross-reference to this disclosure when responding to the other Items.

[520] *See, e.g.,* letters from Amazon; and PWC.

[521] We remind registrants that while they are permitted to cross-reference to information in their financial statements to satisfy their Regulation S–K disclosure obligations, they are not permitted to cross-reference to Regulation S–K disclosures in their financial statements, unless otherwise specifically permitted or required by the Commission's rules or by U.S. Generally Accepted Accounting Principles (''U.S. GAAP'') or International Financial Reporting Standards (''IFRS'') as issued by the International Accounting Standards Board (''IASB''), whichever is applicable. *See* 17 CFR 230.411 and 17 CFR 240.12b–23.

intends to reduce its exposure to a material transition risk while limiting the burdens on registrants and providing them more flexibility to determine what aspects of the transition plan should be disclosed in light of their facts and circumstances.

We are cognizant that some commenters expressed concern that the proposed transition plan disclosure requirement would result in the disclosure of confidential or proprietary information that could cause competitive harm to the registrant.[528] Modifying the transition plan disclosure provision to focus on material expenditures and material impacts on financial estimates and assumptions, rather than all relevant metrics and targets, will help to mitigate this concern by providing registrants with more flexibility to determine what is necessary to disclose in order to describe the plan. Similarly, modifying the transition plan disclosure provision to require disclosure only when a plan has been adopted to manage a material transition risk will further help to mitigate this concern. This added flexibility regarding transition plan disclosure will also help address concerns that the final rule could act as a disincentive to adoption of transition plans.[529] While the final rules seek neither to incentivize nor disincentivize the adoption of transition plans, we recognize that the compliance burdens of disclosure may influence some registrants' decisions with respect to risk management practices and have therefore sought to mitigate such effects.

We decline to follow the recommendation of one commenter to limit the transition plan disclosure requirement to only material transition plans that have been formally approved by a registrant's board of directors.[530] We do not believe that board approval should be the determining factor in whether disclosure is provided. Such a provision would fail to elicit disclosure of a material transition plan adopted by senior management that, due to a registrant's particular corporate governance structure, is not required to be subject to a board vote but nevertheless has significant potential implications for the registrant's financial condition or results of operations. Like the proposal, the final rule does not require a registrant to disclose climate-related opportunities included in its transition plan. Nevertheless, as previously mentioned, a registrant may still elect to describe any opportunities that it intends to achieve as part of its transition plan discussion or when responding to any of the Item 1502 provisions.[531] We decline, however, to follow the recommendation of one commenter to require the disclosure of how a registrant intends to achieve any climate-related opportunities that are a part of its transition plan.[532] Consistent with the rule proposal, we have determined to treat disclosure regarding climate-related opportunities as optional, among other reasons, to allay any anti-competitive concerns that might arise from a requirement to disclose a particular business opportunity.[533] We believe those concerns could be exacerbated by requiring disclosure not only of the existence of opportunities in the transition plan but also how the registrant intends to achieve those opportunities.

3. Disclosure of Scenario Analysis If Used (Items 1500 and 1502(f))

a. Proposed Rule

The Commission proposed to require a registrant to describe the resilience of its business strategy in light of potential future changes in climate-related risks.[534] In connection with this disclosure, the Commission proposed to require a registrant to describe any analytical tools, such as scenario analysis, that the registrant uses to assess the impact of climate-related risks on its business and consolidated financial statements, and to support the resilience of its strategy and business model in light of foreseeable climate-related risks.[535] The Commission proposed to define scenario analysis to mean a process for identifying and assessing a potential range of outcomes of various possible future climate scenarios, and how climate-related risks may impact a registrant's operations, business strategy, and consolidated financial statements over time.[536] The proposed definition included an example of how registrants might use scenario analysis.[537]

The Commission proposed to require a registrant that uses scenario analysis to assess the resilience of its business strategy to climate-related risks to disclose the scenarios considered (*e.g.,* an increase of no greater than 3 deg;C, 2 deg;C, or 1.5 deg;C above pre-industrial levels), including the parameters, assumptions, and analytical choices, and the projected principal financial impacts on the registrant's business strategy under each scenario. The Commission further proposed that such disclosure should include both qualitative and quantitative information.[538]

b. Comments

Several commenters supported the proposed rule requiring a registrant to describe any analytical tools, such as scenario analysis, that the registrant uses to assess the impact of climate-related risks on its business and consolidated financial statements, and to support the resilience of its strategy and business model in light of foreseeable climate-related risks.[539] One commenter stated that scenario analysis has emerged as a key analytical tool for assessing potential climate-related impacts on a company by allowing market participants to understand multiple possible outcomes while still reflecting a realistic level of uncertainty.[540] This commenter further indicated that disclosure of scenario analysis if used would allow investors to review the general models and projections used by the company in its planning and capital allocation strategy, and would greatly assist investors in understanding a firm's resilience and assumptions about the effects of climate change.[541] Another commenter supported the disclosure of scenario analysis if used because of the importance to investors of forward-looking assessments of climate-related

[541] *See id.; see also* letters from ICI (stating that "[i]nformation about scenario analysis can help investors evaluate the resilience of the company's business strategy in the face of various climate scenarios that could impose potentially different climate-related risks"); and Wellington Mgmt. (stating that "disclosure of a scenario analysis enables investors to assess an issuer's risk management process and whether an issuer is considering different climate risk outcomes in its planning").

risks in understanding the resilience of a company's climate-related strategy.[542]

Some commenters recommended that the Commission require all registrants to provide scenario analysis disclosure in their climate risk reporting, regardless of whether they otherwise use scenario analysis.[543] One such commenter stated that requiring scenario analysis disclosure is essential if a registrant's disclosure of material climate-related risks is to be decision-useful for investors.[544] According to that commenter, because scenario analysis requires a registrant to make assumptions regarding different global temperature increase pathways and various potential pathways of decarbonization involving regulatory, technological, and behavioral responses, investors need to know the assumptions and parameters considered by the registrant in order to understand the registrant's disclosure of likely climate-related impacts.[545] One other commenter stated that, ''all else being equal,'' registrants that conduct strong scenario analyses should have more intrinsic value in the securities they offer than issuers that do not plan sufficiently for climate risk.[546]

One commenter stated that the proposed scenario analysis disclosure requirement struck an appropriate balance by requiring registrants to share any scenario analysis that they are otherwise conducting for their business operations while avoiding imposing a potentially difficult or burdensome requirement on those registrants that have not yet conducted such analysis.[547] Some commenters similarly stated that, due to cost concerns, they could only support a requirement to disclose scenario analysis if it was limited to situations in which a registrant has actually used such analysis in its assessment of climate-related risks.[548] Other commenters supported the proposed scenario analysis disclosure requirement but only if the use of scenario analysis reflected an expected material impact on the registrant's business strategy, financial planning, and capital raising.[549] Still other commenters recommended that the Commission require a registrant that does not currently use scenario analysis to explain why it does not do so to prevent the disclosure requirement from acting as a disincentive to the adoption of scenario analysis.[550]

Several commenters opposed or expressed concerns about the proposed requirement to disclose scenario analysis, if used.[551] Some commenters stated that the proposed requirement could result in the disclosure of confidential business information.[552] Other commenters stated that a scenario analysis disclosure requirement that is not qualified by materiality would act as a disincentive to the use of scenario analysis as a climate-related tool.[553] Still other commenters opposed the proposed disclosure requirement because it was too prescriptive and would be costly and burdensome to fulfill.[554] Because of the above concerns, some commenters stated that the disclosure of scenario analysis should be voluntary.[555] Other commenters stated that the required scenario analysis disclosure should be limited to high level trends or material drivers and impacts, and should not cover more detailed parameters, assumptions, and analytical choices underlying the scenario analysis, as proposed.[556] One commenter stated that scenario analysis disclosure should only be required when it is broadly used by senior management and the board as part of their strategic planning process and when integrated and material to a publicly announced climate-related strategy or initiative.[557]

Some commenters recommended that the Commission require the use of certain publicly available scenario models, such as those published by the Intergovernmental Panel on Climate Change (''IPCC''), the International Energy Agency (''IEA''), or the Network of Central Banks and Supervisors for Greening the Financial System (''NGFS''), to enhance the comparability of the scenario analysis disclosure.[558] Other commenters stated that it should be up to each registrant to choose those scenarios that best fit its particular business or industry and tailor its disclosure accordingly.[559]

c. Final Rule

We are adopting a final rule (Item 1502(f)) requiring the disclosure of scenario analysis under certain circumstances. The disclosure of a registrant's use of scenario analysis can provide important forward-looking information to help investors evaluate the resilience of the registrant's strategy under various climate-related circumstances.[560] Scenario analysis has increasingly been recognized as an important analytical tool in assessing a company's climate-related risk exposure,[561] and investors have increasingly sought information from registrants about their use of scenario analysis and expressed a need for improved disclosure about such use.[562]

[542] *See* letter from Bloomberg; *see also* letter from Morningstar (stating that scenario analysis is an important analytical tool in which companies may project their performance and results subject to various changes, including, but not limited to, policy interventions, technological advancement, or environmental and physical challenges, and that such analysis would help investors understand circumstances under which the value of a company could be at risk, and how a company's strategy may—or may not—move it forward toward long-term value creation and sustainability).

[560] *See supra* notes 540–542 and accompanying text.

[561] *See, e.g.,* letter from AllianceBernstein (stating that ''[s]cenario analysis is particularly important for those registrants in emissions-intensive industries where such analysis can demonstrate the quality of impairment testing and increase confidence in asset values''). The Federal Reserve Board's climate scenario analysis pilot program, in which six of the nation's largest banks are voluntarily participating, further demonstrates the increased recognition of scenario analysis as an important tool to assess climate-related financial risks. *See* Board of Governors of the Federal Reserve System, *Federal Reserve Board announces that six of the nation's largest banks will participate in a pilot climate scenario analysis exercise designed to enhance the ability of supervisors and firms to measure and manage climate-related financial risks* (Sept. 29, 2022), available at *https://www.federalreserve.gov/newsevents/pressreleases/other20220929a.htm*.

[562] *See, e.g.,* letters from AllianceBernstein (stating that ''[w]hile many registrants claim to perform scenario analysis, however, there is little disclosure around assumptions used in these models and how registrants use results impact strategy, business and capital allocation decisions,

Although some commenters recommended that we require all registrants to include scenario analysis disclosure in their climate risk reporting,[563] we recognize that not every registrant conducts scenario analysis and, as noted above, this rulemaking does not seek to prescribe any particular tools, strategies, or practices with respect to climate-related risks but rather, when material, to provide investors with the information they need to evaluate the climate-related risks faced by the registrant and their potential impacts on the registrant's business, results of operations, or financial condition. Therefore, similar to the proposed rule, the final rule's scenario analysis disclosure requirement will depend on whether and how a registrant uses such analysis. Importantly, the rule will not require any registrant to conduct scenario analysis.

We are, however, adopting modifications in the final rules. For example, we have added a materiality qualifier regarding the disclosure of scenario analysis to address commenters' concern that the proposed requirement could result in disclosure of immaterial information that would be burdensome and costly to produce.[564] We also note that, as with transition plan and use of internal carbon price disclosure, a registrant's scenario analysis disclosure will be subject to a safe harbor.[565] The final rule provides that, if a registrant uses scenario analysis [566] to assess the impact of climate-related risks on its business, results of operations, or financial condition, and if, based on the results of scenario analysis, a registrant determines that a climate-related risk is reasonably likely to have a *material* impact on its business, results of operations, or financial condition, then the registrant must describe each such scenario,[567] including a brief description of the parameters, assumptions, and analytical choices used, as well as the expected material impacts, including financial impacts, on the registrant under each such scenario.[568] We are adopting this disclosure requirement because, if a registrant has used scenario analysis to assess and manage a material climate-related risk, investors need to understand how it conducted that analysis in order to evaluate the registrant's conclusions regarding material impacts on its business, results of operations, or financial condition.

We also have streamlined the proposed scenario analysis disclosure requirements to reduce redundancy in the final rules. For example, we have eliminated the introductory provision in the rule proposal requiring a registrant to describe the resilience of its business strategy in light of potential future changes in climate-related risks. Because companies use scenario analysis to test the resilience of their business strategies under varying future climate scenarios, and because such use is explained in the definition of scenario analysis (in Item 1500) that we are adopting largely as proposed,[569] if registrants are required to disclose their use of scenario analysis under the final rules, such disclosure likely would include a description of the resilience of their strategies under various climate scenarios.

The rule proposal would have required a registrant to disclose ''any analytical tools, such as scenario analysis'' that it uses to assess the impact of climate-related risks on its business. In a modification of the proposed rule, we have eliminated the reference to ''any analytical tools'' to clarify that the disclosure required by this provision should concern the registrant's use of scenario analysis rather than any other analytical tools. We note that the TCFD's guidance discusses scenario analysis as the primary tool to help companies assess the impacts of climate-related risks on their business strategies, and therefore this change should eliminate any confusion about what other analytical tools might fall under the scope of the requirements.[570]

In another change from the rule proposal, we have added the term ''brief'' to modify the ''description of the parameters, assumptions, and analytical choices used'' prong of the scenario analysis disclosure provision. The adopted provision will continue to elicit disclosure that will enhance investors' assessment of the resiliency of a registrant's strategy while also mitigating the compliance burden for registrants. Requiring a *brief* description of the parameters, assumptions, and analytical choices used, together with a description of the projected *material* financial impacts on the registrant's business strategy under each scenario, should help elicit disclosure that neither burdens investors with immaterial detail nor unduly adds to a registrant's compliance burden. As with disclosure related to transition plans, we reiterate that our focus in adopting these requirements is neither on incentivizing nor disincentivizing any particular risk management practice but rather on providing investors with the information they need with respect to the particular practices of a registrant in order to make informed investment and voting decisions.

These revisions to the proposed rule also address commenters' concern that the required scenario analysis disclosure could result in the disclosure of confidential business information.[571] If a registrant has used scenario analysis to determine that an identified climate-related risk is likely to have a material impact on its business, results of operations, or financial condition, it is important for investors to receive disclosure about that material impact. The registrant will not, however, be required to provide a lengthy description of the underlying parameters and assumptions that may be more likely to reveal confidential business information.

Although some commenters recommended that we require the use of one or more climate scenario models,[572] the final rules do not impose any specific risk management model. By requiring disclosure based on whether a registrant has determined to conduct scenario analysis as part of its consideration of material climate-related risks, a registrant will be able to select the climate scenario model or models that it believes best fits its particular industry or business, or its climate risk assessment approach. This approach will provide useful information to investors about the resilience of a registrant's climate-related business

making their results challenging to compare''); and Ceres (citing evidence from the Climate Action 100+ Benchmark that companies' ''scenario analyses leave much room for improvement'').

[563] *See supra* note 543 and accompanying text.

[564] *See supra* note 554 and accompanying text.

[565] *See infra* section II.J.3.

[566] We are largely adopting the definition of scenario analysis, as proposed. *See* 17 CFR 229.1500 (''Scenario analysis means a process for identifying and assessing a potential range of outcomes of various possible future climate scenarios, and how climate-related risks may impact a registrant's business strategy, results of operations, and financial condition over time.'') We have deleted from the definition the example that ''registrants might use scenario analysis to test the resilience of their strategies under certain future climate scenarios, such as those that assume global temperature increases of 3 °C, 2 °C, and 1.5 °C above pre-industrial levels'' because we do not wish to convey the impression that these scenarios are required should a registrant elect to conduct scenario analysis.

[567] *See* 17 CFR 229.1502(f). Conversely, if a registrant conducts scenario analysis and determines from its results that it is not likely to be materially impacted by a climate-related risk, no disclosure about its use of scenario analysis is required under Item 1502(f).

[568] *See id.*

[569] *See* 17 CFR 229.1500.

[570] *See* TCFD, *supra* note 332.

[571] *See supra* note 552 and accompanying text.

[572] *See supra* note 558 and accompanying text.

strategy while also helping to limit the registrant's compliance burden relating to scenario analysis disclosure under the final rules.

The proposed scenario analysis disclosure provision would have included as an example of potential scenarios to be considered ''an increase of no greater than 3 °C, 2 °C, or 1.5 °C above pre-industrial levels.'' [573] Because this was for illustrative purposes only, and because we have removed the same example from the definition of scenario analysis to avoid conveying the impression that these scenarios are required,[574] we have also removed the example from Item 1502(f).

To further streamline the scenario analysis disclosure requirement, we have removed the proposed provision stating that the disclosure should include both qualitative and quantitative information.[575] We recognize that, as noted by some commenters, scenario analysis practices are still evolving,[576] and that, in the early stages of use, a registrant's disclosure regarding its use of scenario analysis may be qualitative. As a registrant's use of scenario analysis becomes more sophisticated, we would expect its disclosure of the results of scenario analysis to become more quantitative, particularly when discussing the expected material financial impacts on the registrant's business strategy, under each considered scenario, which, like the proposed rule, must be addressed should a registrant be required to disclose its use of scenario analysis. Streamlining the proposed scenario analysis disclosure requirement in this way will enable a registrant to determine the mix of qualitative and quantitative disclosure that best fits its particular circumstances when satisfying its obligations under the final rule.

We decline to follow the recommendation of one commenter who stated that disclosure of scenario analysis should only be required when integrated and material to a publicly announced climate-related strategy or initiative.[577] Conditioning the disclosure requirement in this way could deprive investors of needed information solely because the registrant has not yet announced the corresponding strategy or initiative.

4. Disclosure of a Maintained Internal Carbon Price (Item 1502(g))

a. Proposed Rule

The Commission proposed to define an internal carbon price to mean an estimated cost of carbon emissions used internally within an organization.[578] The Commission also proposed that, if a registrant maintains an internal carbon price, it would have to disclose:

- The price in units of the registrant's reporting currency per metric ton of carbon dioxide equivalent (''CO_2e'');
- The total price, including how the total price is estimated to change over time, if applicable;
- The boundaries for measurement of overall CO_2e on which the total price is based, if different from the GHG emission organizational boundary required pursuant to the proposed GHG emissions disclosure provision; and
- The rationale for selecting the internal carbon price applied.[579]

The proposed rules would have further required a registrant to describe how it uses an internal carbon price to evaluate and manage climate-related risks. In addition, the proposed rules would have required a registrant that uses more than one internal carbon price to provide the proposed disclosures for each internal carbon price and to disclose its reasons for using different prices.[580]

b. Comments

Several commenters supported the rule proposal requiring a registrant to disclose information about a maintained internal carbon price because of the important role played by internal carbon pricing in the management of climate-related risks.[581] One commenter stated that internal carbon pricing has become an important mechanism to help companies manage risks and capitalize on emerging opportunities in the transition to a low-carbon economy.[582] According to this commenter, in the event that governments adopt a carbon tax, registrants that have not begun using internal carbon pricing could find themselves increasingly vulnerable due to their failure to internalize the cost into their business.[583] A different commenter stated that an internal carbon price is a multifaceted tool that enables a registrant to embed a shadow cost for carbon in all carbon mitigation investment decisions, or impose an internal carbon fee by charging business units for their emissions and using the revenue generated to support investment into clean technologies.[584] Other commenters similarly stated that an internal carbon price can assist companies in steering capital expenditures, research and design, and other financing decisions toward projects with reduced emissions.[585] One commenter asserted that nearly half of the world's largest companies factor a cost of carbon into their business plans.[586] Other commenters recommended that the Commission require a registrant that does not use internal carbon pricing to explain its reason for not doing so, as to prevent the proposed disclosure requirement from acting as a disincentive toward the use of this tool.[587]

Most of the above commenters supported requiring a registrant that uses internal carbon pricing to disclose the proposed items, including:

- The price in units of the registrant's reporting currency per metric ton of CO_2e;
- The total price;
- The rationale for selecting the internal carbon price applied; and
- How it uses internal carbon price to evaluate and manage climate-related risks.[588]

Some commenters also supported requiring the disclosure of the methodology used to develop and apply an internal carbon price.[589] In this regard, one commenter stated that while many companies claim to utilize

Commenters also supported requiring a registrant that uses more than one internal carbon price to provide the proposed disclosures for each internal carbon price and to explain why it uses different internal carbon prices. *See, e.g.,* letters from Amer. for Fin. Reform, Sunrise Project *et al.;* Anthesis; ERM CVS; and NY City Comptroller.

[589] *See, e.g.,* letters from AllianceBernstein; Anthesis; ERM CVS; Microsoft; and PRI.

internal carbon pricing, it is challenging for investors to assess ''the validity and strength'' of such pricing without transparency on methodology, price, and application.[590] Other commenters stated that the proposed disclosure details are important for investors to assess the reasonableness, applicability, comparability, and accuracy of internal carbon pricing by registrants.[591] These commenters supported requiring the disclosure of the boundaries for measurement of overall CO_2e on which the total price is based,[592] including when those boundaries are different than the organizational boundaries used to measure a registrant's GHG emissions, in order to increase the transparency underlying the use of internal carbon pricing.[593]

Several other commenters, however, opposed the proposed internal carbon disclosure requirement.[594] Some commenters stated that the proposed requirement could result in competitive harm for registrants,[595] such as through potential disclosure of confidential or proprietary business information.[596] For example, commenters asserted that such disclosures ''would divulge sensitive information to . . . competitors'' [597] and noted that registrants ''us[ing] internal prices of carbon in their operations may often be doing so for pricing or other competitive purposes'' [598] and ''private companies and state-owned enterprises that compete in a registrant's sector would not need to provide the same type and level of information as public companies.'' [599] Other commenters indicated that the proposed disclosure requirement was too prescriptive and, lacking a materiality qualifier, would result in the disclosure of information that is not decision-useful for investors and costly to produce.[600] Because of these concerns, commenters stated that the proposed disclosure requirement would act as a disincentive to the use of internal carbon pricing.[601] Accordingly, some commenters recommended that the Commission provide exceptions to any internal carbon price disclosure requirements (such as exclusions for information that is competitively sensitive),[602] a separate safe harbor or exemption from liability for internal carbon price disclosure,[603] or a phase in period for these requirements.[604] One commenter stated that disclosure of internal carbon pricing should be required only when it is broadly used by senior management and the board as part of their strategic planning process and when integrated and material to a publicly announced climate-change strategy or initiative.[605] Finally, one commenter, who was concerned that the proposed internal carbon pricing requirement would require the disclosure of proprietary information, recommended that the Commission adopt an alternative approach to obtain carbon price-related disclosures, such as an approach similar to the Financial Accounting Standards Board's (''FASB'') standardized measure of oil and gas, or SMOG.[606]

c. Final Rule

The final rule (Item 1502(g)) will require a registrant that uses internal carbon pricing to disclose certain information about the internal carbon price, if such use is material to how it evaluates and manages a climate-related risk that, in response to Item 1502(a), it has identified as having materially impacted or is reasonably likely to have a material impact on the registrant, including on its business strategy, results of operations, or financial condition.[607] As commenters have noted, many registrants use internal carbon pricing as a planning tool, among other purposes: to help identify climate-related risks and opportunities; as an incentive to drive energy efficiencies to reduce costs; to quantify the potential costs the company would incur should a carbon tax be put into effect; and to guide capital investment decisions.[608] Information about a registrant's use of internal carbon pricing will help investors evaluate how a registrant is managing climate-related risks, particularly transition risks, and the effectiveness of its business strategy to mitigate or adapt to such risks.

At the same time, we recognize commenters' concern that, without a materiality qualifier, the proposed rule could have resulted in the disclosure of internal carbon pricing data that would not be decision-useful for investors and would be burdensome for registrants to produce.[609] To address this concern, in a change from the proposed rule, which would have required internal carbon pricing disclosure whenever a registrant maintains an internal carbon price, the final rule will require this disclosure only when the registrant's use of internal carbon pricing is material to how it evaluates and manages a climate-related risk identified in response to Item 1502(a).

If a registrant's use of internal carbon pricing is material, similar to the proposed rule, the final rule will require it to disclose in units of the registrant's reporting currency:

- The price per metric ton of CO_2e; and
- The total price, including how the total price is estimated to change over the time periods referenced in Item 1502(a), as applicable.[610]

Similar to the proposed rule, if a registrant uses more than one internal carbon price to evaluate and manage a material climate-related risk, it must provide the required disclosures for each internal carbon price, and disclose its reasons for using different prices.[611] We also have included a provision, similar to the rule proposal and as

[590] *See. e.g.,* letter from AllianceBernstein; *see also* letter from Paradice Invest. Mgmt. (stating that ''[w]here a company does use an internal carbon price, unless transparency is provided on what the price is and how it is set, investors cannot determine whether this is appropriate and what the financial implications may be'').

recommended by some commenters,[612] stating that if the scope of entities and operations involved in the use of a described internal carbon price is materially different than the organizational boundaries used for the purpose of calculating a registrant's GHG emissions pursuant to the final rule, the registrant must briefly describe this difference.[613]

We are requiring disclosure of this information because, as commenters noted, it will help investors understand a registrant's internal carbon pricing practice and how such practice has contributed to the registrant's overall evaluation and planning regarding climate-related risk.[614] Increased transparency about internal carbon pricing by registrants that use an internal carbon price to evaluate and manage a material climate-related risk, in particular a material transition risk, will help investors understand the assumptions and analyses made by registrants when determining and managing the likely financial impacts of such risks on the company. Moreover, including a requirement to disclose any material difference in the boundaries used for internal carbon pricing and GHG emissions measurement will help minimize investor confusion about the scope of entities and operations included in a registrant's application of internal carbon pricing and improve transparency about the methodology underlying the use of internal carbon pricing so that investors may better compare such use across registrants.[615]

To streamline the internal carbon price disclosure requirement and to reduce redundancy, we have eliminated the proposed requirement to describe how a registrant uses an internal carbon price to evaluate and manage climate-related risks.[616] If a registrant is required to provide internal carbon pricing disclosure under the final rules, the registrant is likely to describe how it uses an internal carbon price to evaluate and manage a material climate-related risk when responding to other final rule provisions, such as when describing a related transition plan,[617] even if the description of internal carbon pricing is less detailed because it is part of a broader narrative discussion. To further streamline the internal carbon price disclosure requirement, we have eliminated from the final rule the proposed requirements to disclose the rationale for selecting the internal carbon price applied.[618]

By streamlining the internal carbon price disclosure requirement in this way and adding materiality qualifiers, the final rules will help ensure that investors receive material information about the registrant's use of internal carbon pricing to inform their investment and voting decisions while limiting the compliance burden for registrants. Moreover, eliminating the proposed requirement to provide a separate narrative description of how a registrant uses an internal carbon price and the rationale for selecting the internal carbon price applied will help address commenters' concerns that the proposed disclosure requirement would result in the disclosure of confidential or proprietary information and act as a disincentive to using an internal carbon pricing mechanism.[619] We also note that, as with transition plan and scenario analysis disclosure, disclosure of a registrant's use of an internal carbon price will be subject to a safe harbor.[620] Because of these changes to the proposed rule, we believe that it is unnecessary to adopt an exemption or exception to the internal carbon price disclosure requirement, as some commenters recommended,[621] or a separate phase in for the disclosure requirement, as recommended by other commenters.[622]

E. Governance Disclosure

1. Disclosure of Board Oversight (Item 1501(a))

a. Proposed Rules

The proposed rules would have required a registrant to disclose a number of items related to a board of directors' oversight of climate-related risks, largely based on the TCFD framework. First, the Commission proposed to require the identification of any board members or board committees responsible for the oversight of climate-related risks,[623] whether an existing committee, such as the audit committee or risk committee, or a separate committee established to focus on climate-related risks. Next, the proposed rules required detailed disclosure of whether any member of a registrant's board of directors possessed expertise in climate-related risk.[624] Additionally, the proposal required a description of the processes and frequency by which the board or board committee discusses climate-related risks,[625] including disclosure of how the board is informed about climate-related risks, and how frequently the board considers such risks. These proposed disclosure items were intended to afford investors with transparency into how a registrant's board considers climate-related risks and any relevant qualifications of board members.[626]

The proposed rules would also have required disclosure about whether and how the board or board committee considered climate-related risks as part of its business strategy, risk management, and financial oversight.[627] This disclosure was intended to give investors information regarding how the board or board committee considers climate-related risks when reviewing and guiding business strategy and major plans of action; when setting and monitoring implementation of risk management policies and performance objectives; when reviewing and approving annual budgets; and when overseeing major expenditures, acquisitions, and divestitures. The proposed disclosure requirement sought to provide investors with information to assess the degree to which a board's consideration of climate-related risks has been integrated into a registrant's strategic business and financial planning, and its overall level of preparation to maintain its shareholder value.

The proposed rules also would have required disclosure about whether and how the board sets climate-related targets or goals and how it evaluates progress, including the establishment of any interim targets or goals.[628] This proposed requirement was intended to help investors evaluate whether and how a board is preparing to mitigate or adapt to material transition risks. Finally, the proposed rule provided that, if applicable, a registrant may describe the board of directors' oversight of climate-related opportunities.

While the goal of these governance-related proposals was to elicit decision-useful information about the board's oversight of climate-related risks for investors, the proposal neither required nor encouraged any particular board composition or board practices. Similarly, the proposal was not intended to affect how a registrant

operates, at any level, either through management or the board of directors.

b. Comments

A number of commenters supported the Commission's proposed board oversight disclosures.[629] Some of these commenters stated that investors currently lack easily accessible and comparable information regarding how registrants' governance structures contribute to the evaluation and assessment of material climate-related risks,[630] while others stated the proposed rules would allow investors to understand the governance context in which financial results are achieved.[631] One commenter expressed particular support for those aspects of the proposal that aligned with the TCFD framework.[632] Another commenter suggested that registrants should be required to describe board member training, expertise, or skill-building related to the understanding of climate-related financial risks and opportunities.[633]

Other commenters opposed the proposed board oversight disclosures, stating that the proposals were overly prescriptive,[634] duplicative,[635] and should be integrated into existing disclosure requirements.[636] Commenters that opposed the board oversight provisions expressed concern that the proposed rules narrowly focused on board members' climate expertise and could have a negative overall impact on governance by limiting the flexibility of companies to fill limited numbers of board seats with the individuals best suited to a given company's needs, including individuals' suitability to whole-of-the-board undertakings.[637] These commenters stated that registrants may be better served appointing directors with wide ranging expertise rather than technical skills in one particular area.[638] Other commenters stated that the Commission was placing an undue emphasis on board oversight of climate risk, disproportionate to disclosure requirements in other areas.[639] Some commenters asserted that Regulation S–K already requires the disclosure of information that allows for investors to adequately assess a registrant's board of directors [640] while another commenter stated that the Commission should enhance existing disclosure requirements rather than adopt a new rule.[641] Other commenters noted that the proposed rules went beyond the requirements of the TCFD, in particular as it pertains to board-level expertise.[642]

With respect to the proposed requirement to identify any board members or board committees responsible for the oversight of climate-related risks, some commenters were supportive of the proposal.[643] However, many commenters were opposed or expressed concerns about the proposed requirement.[644] Several commenters stated that the identification of key personnel could lead to poaching and would undermine registrant's efforts to retain individuals with climate expertise.[645]

Other commenters highlighted the difficulty that small or specialized companies could face if the proposed disclosure requirement creates pressure to appoint individuals with climate expertise, as it elevates climate expertise at the expense of other skills that are arguably more important to their business.[646]

Some commenters were supportive of the proposal for detailed disclosure of whether any member of a registrant's board of directors possessed expertise in climate-related risk, with some also recommending that the Commission require additional detailed disclosures.[647] For example, one of these commenters suggested that the rules should require disclosure of whether and how the board brings in additional expertise and conducts training for board members.[648] Other commenters, however, asserted that this proposed disclosure requirement would drive registrants to appoint board members with climate expertise, at the potential expense of more relevant areas, and stated that the Commission's rules should not influence registrants' decisions regarding the composition of their boards.[649] Some suggested that this proposed disclosure requirement would result in the expansion of boards, driving up costs for registrants, even those that do not currently have a need for particularized climate-related expertise.[650] Others asserted that, by designating specific board members as having climate-related expertise, the

provision would discourage the full engagement of the board on climate-related matters.[651]

Commenters expressed mixed views on the proposal to describe the processes and frequency by which the board or board committee discusses climate-related risks, including disclosure of how the board is informed about climate-related risks, and how frequently the board considers such risks. One commenter stated that this aspect of the Commission's proposal would help ensure that the board was receiving and processing consistent information on climate-related risk.[652] Others went further, asserting that directors have a fiduciary responsibility to conduct increased oversight of climate-related risks, and that the proposal would require registrants to report whether and how its board was fulfilling these responsibilities.[653] Some commenters stated that this proposed disclosure requirement was too detailed, would invite micromanagement of both the board and management, and be potentially misleading to investors.[654] Commenters also stated that disclosure of when and how often boards meet on climate-related matters could lead to changes in how board time and resources are allocated, without necessarily improving the quality of climate-related risk disclosure.[655] Some commenters pointed out that the Commission does not require registrants to report on how frequently other topics are considered by the board of directors and asserted that requiring the disclosure of this information with respect to climate-related risks would be out of step with other governance disclosure rules.[656] According to these commenters, the proposed disclosure requirements were so prescriptive that they singled out climate-related disclosures for presentation in a level of detail that was not consistent with the Commission's overall disclosure regime. Other commenters stated that the information was simply unnecessary and could lead to boilerplate disclosures.[657] Some commenters cautioned that, by requiring this level of detail, the Commission was inadvertently discouraging companies from engaging in internal decision making that would then have to be disclosed under the proposal.[658]

Regarding the proposal for disclosure on whether and how the board considers climate-related risks as part of its business strategy, risk management, and financial oversight, a number of commenters agreed that registrants should disclose this information as it is currently ''unnecessarily difficult'' for investors to assess whether there is ''effective oversight of risks to firm value, including material environmental risks.'' [659] However, a number of commenters expressed concerns with the granularity of the proposal and urged the Commission to take a less-prescriptive approach more consistent with the Commission's overall disclosure regime.[660] Some commenters urged the Commission to adopt a materiality qualifier to avoid eliciting immaterial or overly granular information and bring the requirements more in line with other required disclosures.[661]

Commenters were divided on the proposal related to disclosure of board oversight of targets and goals, particularly how the board sets such targets and monitors progress. Commenters supportive of the proposal stated that investors need more granular governance disclosures to assess whether the board has sufficient experience in managing dynamic climate-related risk.[662] In contrast, other commenters asserted that the proposal would require the expenditure of significant resources by registrants while offering little in the way of benefit to investors.[663] Other commenters expressed the view that the proposal should focus on management's role in setting targets and goals, given that the board's role is more appropriately focused on monitoring the targets and goals that management sets.[664]

c. Final Rule

We are adopting the proposed requirements to disclose board oversight of climate-related risks (Item 1501(a)), with some modifications to address the concerns of commenters. These disclosures will enhance investors' ability to evaluate a registrant's overall management of climate-related risks by improving their understanding of the board's role in overseeing those risks.[665] The final rule will require a description of a board of directors' oversight of climate-related risks, as proposed.[666] The final rule will also require the identification, if applicable, of any board committee or subcommittee responsible for the oversight of climate-related risks and a description of the processes by which the board or such committee or subcommittee is informed about such risks. Further, if there is a target or goal disclosed pursuant to § 229.1504 or transition plan disclosed pursuant to § 229.1502(e)(1), the final rule will require disclosure of whether and how the board oversees progress against the target or goal or transition plan.[667] These disclosures are not required for registrants that do not exercise board oversight of climate-related risks.

Despite the concerns expressed by several commenters, the proposed rules were not intended to shift governance behaviors, including board composition or board practices. Similarly, the final rules neither seek to influence registrants' decisions about how to manage climate-related risks nor does their design incorporate, reflect, or favor any governance structure or process. Rather, consistent with our statutory authority, the final rules focus on disclosure of registrants' existing or developing climate-related risk governance practices. We recognize that registrants have varied reasons for pursuing different oversight arrangements, and some registrants may reasonably determine that climate-related risks are not among the most pressing issue facing the company. The final rules will provide investors with the information they need to understand and evaluate those oversight arrangements and make informed

[663] *See, e.g.,* letters from American Securities Association (June 13, 2022) (''ASA''); Morningstar; and PGIM (stating that only registrants with material climate-related exposure should be required to provide detailed disclosure of board management of climate-related risk).

[664] *See, e.g.,* letter from National Association of Corporate Directors (June 13, 2022).

[665] *See, e.g.,* letters from Ceres; PRI; and RMI.

[666] We are also adding Instruction 1 to Item 1501 to clarify that in the case of a foreign private issuer with a two-tier board of directors, the term ''board of directors'' means the supervisory or non-management board. In the case of a foreign private issuer meeting the requirements of 17 CFR 240.10A–3(c)(3), the term board of directors' means the issuer's board of auditors (or similar body) or statutory auditors, as applicable.

[667] The proposed governance provision stated that a registrant may also describe the board of directors' oversight of climate-related opportunities. As previously mentioned, although the final rules do not contain a similar provision, a registrant may elect to provide such disclosure as part of its governance disclosure.

investment decisions in light of their overall investment objectives and risk tolerance. Furthermore, as stated above, these disclosure requirements apply to those registrants the boards of which exercise oversight of climate-related risks; no disclosure is required for registrants that do not have information responsive to the disclosure requirements.

We are not adopting some of the more prescriptive elements of the proposal in response to commenter concerns. Specifically, we are eliminating the proposed requirements to disclose:

- The identity of specific board members responsible for climate-risk oversight;
- Whether any board member has expertise in climate-related risks and the nature of the expertise;
- How frequently the board is informed of such risks; and
- Information regarding whether and how the board sets climate-related targets or goals, including interim targets or goals.

While the proposal would have required this disclosure only to the extent applicable, we appreciate the concerns of some commenters who stated that these elements of the proposal could have unintended effects on the registrant's governance structure and processes by focusing on one area of risk at the expense of others. In addition, some commenters raised concerns that the level of detail required by the proposal would cause registrants to divulge sensitive internal board processes. It may be that a registrant, in describing "the board of directors' oversight of climate-related risks," will find it necessary to disclose, or otherwise choose to disclose, some or all of the information called for by the proposal. But, by adopting a more streamlined rule, we intend to eliminate any misperception that this information is required for all registrants, particularly those without existing processes or information to disclose.

We are, however, adopting the proposed requirement to identify any board committee or subcommittee responsible for the oversight of climate-related risks, if a registrant has such a committee or subcommittee. This information is important to an understanding of how the board is managing such risk and will not be burdensome to disclose. Moreover, the provision simply requires the registrant to identify any committee or subcommittee that has been tasked with managing climate-related risks and is not designed to influence decisions about whether and how the board allocates responsibility for oversight of such risk. We are also adopting a requirement, albeit modified from the proposal, to describe whether and how the board of directors oversees progress against disclosed climate-related targets, goals, or transition plans. By tying this disclosure requirement to circumstances in which the registrant has a disclosed climate-related target, goal, or transition plan, the final rule will avoid generating detailed disclosure about matters that are not important to investors. In addition, in light of commenter concerns regarding the proposed disclosure of whether and how the board of directors establishes any final or interim targets or goals,[668] we are omitting this requirement from the final rule. Overall, the less prescriptive approach to disclosure in the final rule will facilitate investors' understanding of how a registrant intends to manage a target or goal that is material to its business while discouraging boilerplate disclosures and avoiding any unintended adverse effects on the board's governance structures.

We are also adopting the proposed requirement to describe the processes by which the board or any board committee or subcommittee is informed about climate-related risks, while eliminating the requirement to describe the frequency of these discussions. While some commenters stated that it would be helpful to investors for registrants to disclose both the processes and frequency of these discussions,[669] other commenters expressed concern that this disclosure will shift governance behavior.[670] The final rules balance investors' need to understand the board's governance of climate-related risks in sufficient detail to inform an investment or voting decision with concerns that the proposal could inadvertently pressure registrants to adopt specific or inflexible climate-risk governance practices or organizational structures or otherwise influence the conduct of the board. By retaining the requirement to disclose the process by which the board is informed, investors will have meaningful information that they can use to assess the conduct of boards in dealing with climate-related risks while avoiding overly detailed or granular disclosures that could unduly influence such processes.

Although some commenters asserted that registrants may feel pressure to appoint certain individuals with climate expertise,[671] we reemphasize that the Commission remains agnostic about whether and/or how registrants govern climate-related risks. Registrants remain free to elect whether and how to establish or retain the procedures and practices that they determine best fit their business. The focus of the final rules remains on investor protection and improving investors' access to comparable and consistent climate-related disclosures. The final rules are focused on disclosure and do not require, and are not formulated to prompt, registrants to change their governance or other business practices.

We are not, as suggested by some commenters, adopting a materiality qualifier for this portion of the final rule. As discussed above, we have revised the final rule from the proposal to make the disclosure requirement less prescriptive. As such, registrants will have additional flexibility to determine how much detail to provide about the board's oversight of climate-related risk. These revisions help mitigate some commenters' concerns that the rule will require disclosure of immaterial information. The specific information called for by the final rule will provide important context for an investor to evaluate the extent to which the board is evaluating climate-related risks. If a board of directors determines to oversee a particular risk, the fact of such oversight being exercised by the board is likely material to investors given other demands on the board's time and attention.[672] Moreover, unlike management, which likely oversees many more routine matters, some of which may not be material to investors, we expect that any risks elevated to the board level will be material to the company and limited in number. Accordingly, we do not believe that a materiality qualifier is necessary for this provision.

2. Disclosure of Management Oversight (Item 1501(b))

a. Proposed Rules

Similar to the proposed disclosures on board oversight, the proposed rules would have required a registrant to disclose a number of items, as applicable, about management's role in the assessment and management of climate-related risks. First, the Commission proposed to require registrants to disclose whether certain management positions or committees are responsible for assessing and managing climate-related risks and, if so, to identify such positions or

[670] *See supra* note 655.

[671] *See supra* note 646.

[672] See discussion *infra* section II.E.2.c (regarding our reasons for adding a materiality qualifier to Item 1501(b)).

committees and disclose the relevant expertise of the position holders or members in such detail as necessary to fully describe the nature of the expertise.[673] This proposed requirement was intended to better inform investment or voting decisions by providing information on the extent to which management addresses climate-related risks. Additionally, the proposed rules would have required disclosure about the processes by which the responsible managers or management committees are informed about and monitor climate-related risks.[674] Finally, the proposed rule would have also required disclosure about whether the responsible positions or committees report to the board or board committee on climate-related risks and how frequently this occurs.[675] These proposed disclosure items were intended to help investors understand management's processes to identify, assess, and manage climate-related risks. Under the proposal, if applicable, a registrant also could elect to describe management's role in assessing and managing climate-related opportunities.

b. Comments

Many commenters generally supported the proposed requirement to disclose management oversight of climate-related risks,[676] and expressed support for the proposed requirement to describe management's role in assessing and managing climate-related risks.[677] These commenters stated that investors are interested in procuring comprehensive and standardized information that allows for an examination of how management monitors and assesses climate-related risk. Some supportive commenters stated that there is currently a lack of detailed and available information on how registrants manage climate-related risks.[678] Commenters were generally supportive of the proposals that aligned with the TCFD, including the proposal to require a description of management's role in assessing and managing climate-related risks.[679] A few commenters also recommended that the final rule require more detailed disclosure, including organizational diagrams so that reporting lines to the executive management and board of directors are disclosed [680] and information about executive management remuneration linked to climate-based incentives.[681]

By contrast, some commenters expressed concerns that the proposals were overly prescriptive, and would require disclosure of potentially proprietary and sensitive information about management structure and individual employees.[682] These commenters further expressed concerns that disclosure of such information would cause competitive harm.[683] Another commenter stated that the Commission could elicit more helpful information by adopting a principles-based approach that would allow registrants to tailor disclosures to their specific business, thereby avoiding unnecessary reporting burdens and the production of boilerplate language that provides little value to investors.[684]

With respect to the proposed requirement to describe management's role in assessing and managing climate-related risks, some commenters emphasized how critical this information is to investors, explaining that the current lack of transparent and standardized information prevents investors from assessing the operating environments of the companies in which they invest.[685] Another commenter stated that the requirement would be unduly burdensome for many companies, particularly smaller companies that either do not maintain a large management team or have not established formalized internal controls to produce the proposed disclosures on climate-related risks.[686]

Commenters expressed mixed views about the proposal to require disclosure of the management positions or committees responsible for assessing and managing climate-related risks and the identity of such positions or committees. Some commenters were concerned that the disclosure of management positions or committees could reveal proprietary information about the internal structure of registrants.[687] On the other hand, some commenters emphasized the relevance of these proposed disclosures,[688] with many of these commenters explicitly tying this information to the need for transparency about compensation practices.[689] Supportive commenters also emphasized that the proposed disclosure requirements would allow investors to evaluate the capabilities and preparedness of a company's executive management, who are often tasked with incorporating climate-related risk management into business practices and decisions.[690] One commenter indicated that this proposal would provide different information to investors than the proposed information about boards, as it would allow investors to understand the operational expertise and accountability that exists in relation to how a registrant is overseeing such risk.[691] Commenters stated that investors are seeking particularized information about management's role in dealing with climate-related risks given that effective oversight requires business-level understanding of these risks.'' [692]

Some commenters supported the proposed requirement to disclose the relevant expertise or identity of management position holders or members responsible for managing climate related risk, stating that such disclosures would provide investors with a general understanding of how management's climate expertise is deployed, as well as whether and how climate-related risk is integrated in the organization.[693] In contrast, many commenters stated that this disclosure would require registrants to publish

[693] *See, e.g.,* letters from PRI; and NEI.

detailed descriptions of in-house staff and management's reliance on such staff.[694] Other commenters asserted that the universe of climate-related experts is limited, and that the proposed requirements would increase the competition for executives with climate-related expertise.[695] Some commenters further asserted that the proposed rules would encourage the recruitment of climate experts, who are already scarce, and constrain registrants' ability to produce climate disclosures and institute climate-related strategies.[696] Other commenters were skeptical of the value added by disclosing the relevant expertise or identity of management, stating that these positions turn over frequently and more generalized disclosures of the management process would afford investors with better quality information.[697]

Many commenters were supportive of the proposal to require registrants to describe the processes by which the management positions or committees responsible for climate-related risks are informed about and monitor climate-related risks.[698] These commenters stated that this information was highly relevant to and sought after by investors, and would provide the kind of detailed and standardized information that is currently unavailable in current disclosures.[699] Other commenters expressed concerns regarding the utility of this information.[700] Some commenters stated that, by requiring this kind of disclosure, the Commission was placing an undue priority on climate-related risks above other more pressing business risks.[701] Other commenters stated that a high-level summary of the management of material climate-related risks was sufficient and would avoid the expense of producing excessive and unnecessary information.[702] In addition, commenters representing smaller registrants or registrants in particular industries stated that their management of climate-related risks are appropriately tailored to their size and scale and asserted that the proposed rule unduly pressures such registrants into a one-sized-fits-all approach.[703]

Commenters were divided on the proposal to require disclosure of whether and how frequently such positions or committees report to the board or a committee of the board on climate-related risks. Commenters supportive of the proposal stated that the disclosure would allow investors to analyze how boards integrate climate-related information into the overall risk management structure and how this information affects decision-making.[704] Other commenters suggested that this disclosure would drive unwelcome changes in current business practice and structure, potentially diverting attention and resources away from other material risks or other matters.[705]

Commenters also provided views on the proposal to allow, but not require, registrants to disclose the board's oversight of, and management's role in, assessing and managing climate-related opportunities. While some commenters supported allowing such disclosure to be optional and not mandatory,[706] others indicated that how companies are responding to highly dynamic opportunities is material information and therefore should be required to be disclosed.[707] One commenter stated that climate-related opportunity reporting is likely to be adopted in both the EU and UK, and therefore, to streamline mandatory disclosures for dually-listed companies, the commenter recommended that the Commission require this disclosure, except for opportunities unrelated to a registrant's principal line of business.[708]

c. Final Rule

We are adopting the proposed requirement to disclose management oversight of climate related risks (Item 1501(b)) with some modifications to address the concerns of commenters. The final rules will, like the proposed rules, require that registrants describe management's role in assessing and managing climate-related risks. As commenters stated, investors need information about how management-level staff assess and manage material climate-related risks to make informed investment and voting decisions. However, we are limiting the disclosure required by this final rule provision to material climate-related risks, as suggested by commenters,[709] given the multitude of climate-related matters that may be overseen by management. The final rules also specify that a registrant should address, as applicable, the following non-exclusive list of disclosure items when describing management's role in assessing and managing the registrant's material climate-related risks:

- Whether and which management positions or committees are responsible for assessing and managing climate-related risks, and the relevant expertise of such position holders or committee members in such detail as necessary to fully describe the nature of the expertise;
- The processes by which such positions or committees assess and manage climate-related risks; and
- Whether such positions or committees report information about such risks to the board of directors or a committee or subcommittee of the board of directors.

The non-exclusive list of disclosures in Item 1501(b) should help elicit specific information about management's oversight of climate-related risks and thereby mitigate any tendency towards boilerplate disclosures. At the same time, by focusing the disclosure on management's role in assessing and managing material climate-related risks, the final rules will provide registrants with the flexibility to tailor the disclosures based on their particular governance structure. Given these changes, we believe the final rule appropriately balances investors' needs for information to understand management's involvement in assessing

and managing material climate risks with concerns that a more prescriptive rule could have adverse consequences on registrants' governance practices or organizational structures.

We reiterate, as we did above with respect to our rules requiring disclosure of board oversight of climate-related risks, that the final rule does not seek to influence decisions about how to manage climate-related risks or otherwise change registrant behavior. Rather, the final rule seeks to elicit disclosure about existing oversight practices that will allow investors to make better informed judgments about registrants' oversight processes and mechanisms in light of their overall investment objectives and risk tolerance. Furthermore, the final rule does not require registrants that do not engage in the oversight of material climate-related risk to disclose any information.

We are mindful of the suggestions of some commenters that we adopt additional requirements to disclose information related to management oversight of climate-related risks, including descriptions of internal positions and reporting structures and detailed information about climate-based remuneration. However, consistent with our overall goal to streamline the proposed requirements and to focus on management's oversight of material climate-related risk, we are not including such additional disclosure elements in the final rule.[710]

We are adopting the proposal requiring a description of the relevant expertise of position holders or members responsible for assessing and managing climate-related risk.[711] While we considered the view of commenters that this could cause registrants to feel compelled to find and hire management with such expertise, regardless of whether that is the most sensible use of managerial resources given the registrant's particular facts and circumstances, the added qualification that disclosure is only required where the risk is material mitigates this concern. We agree with commenters that asserted that this information will be helpful to understanding a registrant's ability to manage climate-related risks given the direct role that management will play in overseeing any such risks yet emphasize that registrants are required to make this disclosure only if they have identified a material climate risk.
