FEDERAL REGISTER

Vol. 89 Tuesday,

No. 74 April 16, 2024

Pages 26755–27354

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 89 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register
Vol. 89, No. 74
Tuesday, April 16, 2024

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2023–1878; Project Identifier MCAI–2022–01582–E; Amendment 39–22711; AD 2024–06–06]

RIN 2120–AA64

Airworthiness Directives; Rolls-Royce Deutschland Ltd & Co KG Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2021–25–03 for all Rolls-Royce Deutschland Ltd & Co KG (RRD) Model Trent 7000–72 and Trent 7000–72C engines. AD 2021–25–03 required operators to revise the airworthiness limitation section (ALS) of their existing approved continuous airworthiness maintenance program by incorporating the revised tasks of the applicable time limits manual (TLM) for each affected engine model. Since the FAA issued AD 2021–25–03, the manufacturer again revised the TLM to introduce new or more restrictive tasks and limitations and associated thresholds and intervals for life-limited parts, which prompted this AD. This AD requires revising the ALS of the operator's existing approved engine maintenance or inspection program, as applicable, to incorporate new or more restrictive tasks and limitations and associated thresholds and intervals for life-limited parts, as specified in a European Union Aviation Safety Agency (EASA) AD, which is incorporated by reference. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective May 21, 2024.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of May 21, 2024.

ADDRESSES: *AD Docket:* You may examine the AD docket at *regulations.gov* under Docket No. FAA–2023–1878; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

- For service information identified in this final rule, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: *ADs@easa.europa.eu;* website: *easa.europa.eu.* You may find this material on the EASA website at *ad.easa.europa.eu.*
- You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call (817) 222–5110. It is also available at *regulations.gov* under Docket No. FAA–2023–1878.

FOR FURTHER INFORMATION CONTACT: Sungmo Cho, Aviation Safety Engineer, FAA, 2200 South 216th Street, Des Moines, WA 98198; phone: (781) 238–7241; email: *sungmo.d.cho@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2021–25–03, Amendment 39–21846 (86 FR 71135, December 15, 2021) (AD 2021–25–03). AD 2021–25–03 applied to all RRD Model Trent 7000–72 and Trent 7000–72C engines. AD 2021–25–03 required operators to revise the ALS of their existing approved continuous airworthiness maintenance program by incorporating the revised tasks of the applicable TLM for each affected model turbofan engine, as specified in EASA AD 2020–0244. The FAA issued AD 2021–25–03 to prevent the failure of critical rotating parts, which could result in failure of one or more engines, loss of thrust control, and loss of the airplane.

The NPRM published in the **Federal Register** on September 18, 2023 (88 FR 63888). The NPRM was prompted by EASA AD 2022–0248, dated December 14, 2022 (EASA AD 2022–0248) (also referred to as the MCAI), issued by EASA, which is the Technical Agent for the Member States of the European Union. The MCAI states that the manufacturer published a revised engine TLM to introduce new or more restrictive tasks and limitations and associated thresholds and intervals for life-limited parts.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2023–1878.

In the NPRM, the FAA proposed to require revising the ALS of the operator's existing approved engine maintenance or inspection program, as applicable, to incorporate new or more restrictive tasks and limitations and associated thresholds and intervals for life-limited parts, which are specified in EASA AD 2022–0248, described previously, except for any differences identified as exceptions in the regulatory text of this AD.

Discussion of Final Airworthiness Directive

Comments

The FAA received comments from two commenters. The commenters were the Air Line Pilots Association, International (ALPA) and Delta Air Lines, Inc. (DAL). ALPA supported the NPRM without change. The following presents the comments received on the NPRM from DAL and the FAA's response to each comment.

Request To Clarify the Definition of Approved Maintenance Program (AMP)

Delta requested that the FAA revise paragraph (h)(1) of the proposed AD to clarify the definition of the AMP and to refer to the operator's Continuous Airworthiness Maintenance Program (CAMP) instead. DAL stated that the FAA's definition of an AMP in paragraph (h)(1) of the proposed AD contradicts the definition of an AMP in paragraph (h)(4). DAL also noted that the definitions for an AMP in paragraph (h)(1) and (4) of the proposed AD are part of the operator's CAMP.

The FAA partially agrees. Paragraph (h)(4) of this AD has been revised to refer to the airworthiness limitations section of the ''existing approved

aircraft maintenance or inspection program'' rather than the ''existing approved engine maintenance or inspection program.'' However, paragraph (h)(1) of this AD was not changed as a result of this comment because a CAMP is a specific type of maintenance program, and this AD uses the term ''maintenance program'' generically to include an AMP and a CAMP.

Request To Allow Alternative Actions and Prohibit Relaxed Thresholds Intervals

DAL requested paragraph (i) of the proposed AD be revised to remove the ''no alternative actions'' statement and to clarify that only relaxed thresholds and intervals are not allowed unless they are specified in the provisions of the ''Ref. Publications'' section of EASA AD 2022–0248. DAL stated that paragraph (i) of the proposed AD does not allow any alternative thresholds and interval changes once the required TLM revision is incorporated into the operator's maintenance program. DAL noted that an operator may elect to incorporate stricter thresholds and intervals than prescribed in the TLM, which would allow the intervals and thresholds to be changed if they remain within the published limits of the TLM.

The FAA disagrees with the request. The FAA notes that paragraph (i) of this AD does not limit the operators from using more restrictive limits or from performing more frequent inspections. This paragraph requires the actions within the compliance time of the TLM, which specifies the completion of tasks at intervals of no more than a defined number of engine flight cycles and replacement of parts before exceeding published life limits. Based on this, replacement of a part at a more restrictive time would fall within compliance time of the TLM and will satisfy that particular requirement of the AD. The FAA did not change this AD as a result of these comments.

Conclusion

These products have been approved by the aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data, considered the comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. Except for minor editorial changes, and any other changes described previously, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Related Service Information Under 1 CFR Part 51

The FAA reviewed EASA AD 2022–0248, which specifies revising the ALS of the existing approved engine maintenance or inspection program, as applicable, to incorporate new or more restrictive tasks and limitations and associated thresholds and intervals for life-limited parts.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in **ADDRESSES**.

Costs of Compliance

The FAA estimates that this AD affects 40 engines installed on airplanes of U.S. registry.

The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Revise the ALS	1 work-hours × $85 per hour = $85	$0	$85	$3,400

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA has determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive 2021–25–03, Amendment 39–21846 (86 FR 71135, December 15, 2021); and

■ b. Adding the following new airworthiness directive:

2024–06–06 Rolls-Royce Deutschland Ltd & Co KG: Amendment 39–22711; Docket No. FAA–2023–1878; Project Identifier MCAI–2022–01582–E.

(a) Effective Date

This airworthiness directive (AD) is effective May 21, 2024.

(b) Affected ADs

This AD replaces AD 2021–25–03, Amendment 39–21846 (86 FR 71135, December 15, 2021).

(c) Applicability

This AD applies to Rolls-Royce Deutschland Ltd & Co KG Model Trent 7000–72 and Trent 7000–72C engines.

(d) Subject

Joint Aircraft System Component (JASC) Code 7200, Engine (Turbine/Turboprop).

(e) Unsafe Condition

This AD was prompted by the manufacturer revising the engine time limits manual (TLM) life limits of certain critical rotating parts and updating certain maintenance tasks. The FAA is issuing this AD to prevent the failure of critical rotating parts. The unsafe condition, if not addressed, could result in failure of one or more engines, loss of thrust control, and loss of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Except as specified in paragraph (h) of this AD: Perform all required actions within the compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2022–0248, dated December 14, 2022 (EASA AD 2022–0248).

(h) Exceptions to EASA AD 2022–0248

(1) Where EASA AD 2022–0248 defines the AMP as the approved Aircraft Maintenance Programme containing the tasks on the basis of which the scheduled maintenance is conducted to ensure the continuing airworthiness of each operated engine, this AD defines the AMP as the aircraft maintenance program containing the tasks on the basis of which the scheduled maintenance is conducted to ensure the continuing airworthiness of each operated airplane.

(2) Where EASA AD 2022–0248 refers to its effective date, this AD requires using the effective date of this AD.

(3) This AD does not require compliance with paragraphs (1), (2), (4), and (5) of EASA AD 2022–0248.

(4) Where paragraph (3) of EASA AD 2022–0248 specifies revising the approved AMP within 12 months after the effective date of EASA AD 2022–0248, this AD requires revising the airworthiness limitations section of the existing approved aircraft maintenance or inspection program, as applicable, within 90 days after the effective date of this AD.

(5) This AD does not adopt the Remarks paragraph of EASA AD 2022–0248.

(i) Provisions for Alternative Actions and Intervals

After performing the actions required by paragraph (g) of this AD, no alternative actions and associated thresholds and intervals, including life limits, are allowed unless they are approved as specified in the provisions of the ''Ref. Publications'' section of EASA AD 2022–0248.

(j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, AIR–520 Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the Manager, AIR–520 Continued Operational Safety Branch, send it to the attention of the person identified in paragraph (k) of this AD and email to: *ANE-AD-AMOC@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(k) Additional Information

For more information about this AD, contact Sungmo Cho, Aviation Safety Engineer, FAA, 2200 South 216th Street, Des Moines, WA 98198; phone: (781) 238–7241; email: *sungmo.d.cho@faa.gov.*

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2022–0248, dated December 14, 2022.

(ii) [Reserved]

(3) For EASA AD 2022–0248, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: *ADs@easa.europa.eu;* website: *easa.europa.eu.* You may find this EASA AD on the EASA website at *ad.easa.europa.eu.*

(4) You may view this service information at FAA, Airworthiness Products Section, Operational Safety Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call (817) 222–5110.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on March 15, 2024.

Victor Wicklund,

Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

[FR Doc. 2024–07872 Filed 4–15–24; 8:45 am]

BILLING CODE 4910–13–P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

14 CFR Part 1204

[NASA Document No: NASA–23–054; NASA Docket No: NASA–2023–0003]

RIN 2700–AE74

Delegations and Designations

AGENCY: National Aeronautics and Space Administration.

ACTION: Direct final rule.

SUMMARY: The National Aeronautics and Space Administration (NASA) is amending its delegations and designations rule to correct citations and titles throughout, to establish delegations of authority for Real Estate Contracting Officers, and to clarify regulatory text in specific sections.

DATES: This direct final rule is effective on June 17, 2024. Comments are due on or before May 16, 2024. If adverse comments are received, NASA will publish a timely withdrawal of the rule in the **Federal Register**.

ADDRESSES: Comments must be identified with RINs 2700–AE74 and may be sent to NASA via the Federal E-Rulemaking Portal: *https://www.regulations.gov.* Follow the online instructions for submitting comments. Please note that NASA will post all comments on the internet with changes, including any personal information provided.

FOR FURTHER INFORMATION CONTACT: Daniela Cruzado, 202–295–7589.

SUPPLEMENTARY INFORMATION:

Direct Final Rule and Significant Adverse Comments

NASA has determined that this rulemaking meets the criteria for a direct final rule because it makes changes to correct citations and titles throughout, to establish delegations of authority for Real Estate Contracting Officers, and to clarify regulatory text in specific sections. No opposition to the changes and no significant adverse comments are expected. However, if NASA receives significant adverse comments, it will withdraw this direct final rule by publishing a notice in the **Federal Register**. A significant adverse comment is one that explains: (1) Why the direct final rule is inappropriate, including challenges to the rule's underlying premise or approach; or (2) why the direct final rule will be ineffective or unacceptable without a change. In determining whether a comment necessitates withdrawal of this direct final rule, NASA will

consider whether it warrants a substantive response in a notice and comment process.

Background

Subpart 5 of part 1204, promulgated March 13, 1965 (30 FR 3378), established delegations and designations for NASA officials and other Government agencies acting on behalf of the Agency to carry out functions related to real estate and related matters, granting easements, leaseholds, permits, and licenses in real property, executing certificates of full faith and credit, and taking actions on liquidated damage. Sections 1204.501, 1204.503, and 1204.504 will be amended to correct citations and titles, and to clarify regulatory text in specific sections. Additionally, Sections 1204.503 and 1204.504 will be amended to establish delegation of authority for Real Estate Contracting Officers.

Statutory Authority

The National Aeronautics and Space Act (the Space Act), 51 U.S.C. 20113(a), authorizes the Administrator of NASA to make, promulgate, issue, rescind, and amend rules and regulations governing the manner of its operations and the exercise of the powers vested in it by law.

Regulatory Analysis

Executive Order (E.O.) 12866, Regulatory Planning and Review and E.O. 13563, Improving Regulation and Regulation Review

E.O.'s 13563 and 12866 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has been designated as ''not significant'' under E.O. 12866.

Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires an agency to prepare an initial regulatory flexibility analysis to be published at the time the proposed rule is published. This requirement does not apply if the agency ''certifies that the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities'' (5 U.S.C. 603). This rule removes one section from title 14 of the CFR and, therefore, does not have a significant economic impact on a substantial number of small entities.

Review Under the Paperwork Reduction Act

This direct final rule does not contain any information collection requirements subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Review Under E.O. 13132

E.O. 13132, ''Federalism,'' 64 FR 43255 (August 4, 1999) requires regulations be reviewed for Federalism effects on the institutional interest of states and local governments and, if the effects are sufficiently substantial, preparation of the Federal assessment is required to assist senior policy makers. The amendments will not have any substantial direct effects on state and local governments within the meaning of the E.O. Therefore, no Federalism assessment is required.

List of Subjects in 14 CFR Part 1204

Administrative practice and procedure, Authority delegation (Government agencies), Federal buildings and facilities.

Accordingly, under the authority of the National Aeronautics and Space Act, as amended, 51 U.S.C. 20113, NASA amends 14 CFR part 1204 as follows:

PART 1204—ADMINISTRATIVE AUTHORITY AND POLICY

Subpart 5—Delegations and Designations

■ 1. The authority citation for subpart 5 to part 1204 is revised to read as follows:

Authority: 51 U.S.C. 20113(a).

§ 1204.501 [Amended]

■ 2. Amend § 1204.501 as follows:
■ a. In paragraph (a) introductory text, add the words ''the Office of'' before the word ''Strategic'' and remove the words ''Integrated Asset Management'' and add in their place the words ''Facilities and Real Estate.''
■ b. In paragraph (a)(2)(i), remove the word ''to'' before the words ''sign declarations of taking.''
■ c. In paragraph (a)(2)(ii), add the text '', in accordance with statutory authority'' after the word ''reimbursement.''
■ d. In paragraph (a)(2)(iv), add the words ''in or over real property owned or'' before the word ''controlled.''
■ e. In paragraph (a)(2)(v):
■ i. Remove the phrase ''NASA-controlled'' and add in its place the phrase ''NASA-owned or -controlled.''
■ ii. Remove the word ''Comptroller'' and add in its place the words ''Office of the Chief Financial Officer.''

■ 3. Revise § 1204.503 to read as follows:

§ 1204.503 Delegation of authority to grant easements.

(a) *Scope.* 40 U.S.C. 1314 authorizes executive agencies to grant, under certain conditions, the easements as the head of the agency determines will not be adverse to the interests of the United States and subject to the provisions as the head of the agency deems necessary to protect the interests of the United States.

(b) *Delegation of authority.* The Assistant Administrator for the Office of Strategic Infrastructure and the Director, Facilities and Real Estate Division, are delegated authority to take actions in connection with the granting of easements.

(c) *Redelegation.* (1) The Real Estate Branch Chief may, subject to the restrictions in paragraph (d) of this section, exercise the authority of the National Aeronautics and Space Act of 1958, as amended, and 40 U.S.C. 1314 to authorize or grant easements in, over, or upon real property of the United States owned and/or controlled by NASA upon compliance with statute including a determination that such authorization or grant will not be adverse to the interests of the United States.

(2) The Real Estate Branch Chief may redelegate this authority to the appropriate warranted Real Estate Contracting Officer, in accordance with the requirements set forth in NASA Procedural Requirements (NPR) 8800.15, Real Estate Management Program.

(d) *Restrictions.* Except as otherwise specifically provided, no such easement shall be authorized or granted under the authority stated in paragraph (c) of this section unless:

(1) The responsible Center Director has provided approval that such grant is appropriate.

(2) The Center Director provides certification to the appropriate Real Estate Contracting Officer:

(i) That the interest in real property to be conveyed is not required for a NASA program.

(ii) That the grantee's exercise of rights under the easement will not be adverse to the interests of the United States or interfere with NASA operations.

(3) Monetary or other benefit, including any interest in real property, is received by the government as

consideration for the granting of the easement.

(4) The instrument granting the easement is on a form or template approved or directed to be used by the Real Estate Branch Chief, and provides at a minimum:

(i) For the termination of the easement, in whole or in part, and without cost to the Government, if there has been:

(A) A failure to comply with any term or condition of the easement;

(B) A nonuse of the easement for a consecutive two-year period for the purpose for which granted; or

(C) An abandonment of the easement.

(ii) That written notice of the termination shall be given to the grantee, or its successors or assigns, by the Assistant Administrator for the Office of Strategic Infrastructure or the Director, Facilities and Real Estate Division, and that termination shall be effective as of the date of the notice.

(iii) That restoration provisions are provided for in the agreement that protect the interests of the United States and ensure the grantee is responsible for removal of any and all improvements in or on NASA real property.

(iv) Such other reservations, exceptions, limitations, benefits, burdens, terms, or conditions as are set forth in the forms and templates for easements approved for NASA use by the Real Estate Branch Chief.

(e) *Waivers.* If, in connection with a proposed granting of an easement, the Real Estate Contracting Officer or Center Director determines that a waiver from any of the restrictions in paragraph (d) of this section is appropriate, authority for the waiver may be requested from the Assistant Administrator for the Office of Strategic Infrastructure or the Director, Facilities Real Estate Division.

(f) *Services of the Corps of Engineers.* In exercising the authority herein granted, the Real Estate Contracting Officer, under the applicable provisions of any cooperative agreement between NASA and the Corps of Engineers (in effect at that time), may:

(1) Utilize the services of the Corps of Engineers, U.S. Army.

(2) Delegate authority to the Corps of Engineers to execute, on behalf of NASA, grants of easements in real property, as authorized in this section, provided that the conditions set forth in paragraphs (d) and (e) of this section are complied with.

(g) *Distribution of documents.* One copy of each document granting an easement interest under this authority, including instruments executed by the Corps of Engineers, will be filed in the Central Depository for Real Property Documents at National Aeronautics and Space Administration, Office of Strategic Infrastructure, Facilities and Real Estate Division, Washington, DC 20546.

■ 4. Revise § 1204.504 to read as follows:

§ 1204.504 Delegation of authority to grant leaseholds, permits, and licenses in real property.

(a) *Delegation of authority.* The National Aeronautics and Space Act, as amended, authorizes NASA to grant agreements for the use of NASA-owned and/or -controlled real property. This authority is delegated to the Assistant Administrator for the Office of Strategic Infrastructure and the Director, Facilities Real Estate Division.

(b) *Definitions.* The following definitions will apply:

(1) Real Property refers to land, buildings, structures (including relocatable structures), air space, utility systems, improvements, and appurtenances annexed to land referred to as real property assets. For purposes of NASA use, the term real property also includes related personal property, also known as collateral equipment.

(2) State means the States of the Union, the District of Columbia, the Commonwealth of Puerto Rico, and the possessions of the United States.

(3) Person includes any corporation, partnership, firm, association, trust, estate, or other entity.

(c) *Redelegation.* (1) The Real Estate Branch Chief may, subject to the restrictions in paragraph (d) of this section, grant a leasehold, permit, or license to any Person or organization, including other Government agencies, a State, or political subdivision or agency thereof. This authority may not be exercised with respect to real property which is proposed for use by a NASA exchange and subject to the provisions of NASA Policy Directive 9050.6, NASA Exchange and Morale Support Activities.

(2) The Real Estate Branch Chief may redelegate this authority to the appropriate warranted Real Estate Contracting Officer, in accordance with the requirements set forth in NPR 8800.15.

(d) *Restrictions.* Except as otherwise specifically provided, no leasehold, permit, or license shall be granted under the authority stated in paragraph (c) of this section unless:

(1) The responsible Center Director has provided approval that such leasehold, permit, or license is appropriate.

(2) The Center Director provides certification to the appropriate Real Estate Contracting Officer:

(i) That the interest or rights to be granted are not required for a NASA program.

(ii) That the interests or rights to be granted will not be adverse to the interests of the United States nor interfere with NASA operations.

(3) That, in the case of leaseholds fair market value monetary consideration is received by NASA.

(4) The instrument granting the leasehold, permit, or license in real property is on a form or template approved by or directed to be used by the Real Estate Branch Chief, and provides, at a minimum:

(i) For unilateral termination by NASA in the event of:

(A) Default by the grantee; or

(B) Abandonment of the property by the grantee; or

(C) Force majeure circumstances including a determination by Congress, the President, or the NASA Administrator that the interest of the national space program, the national defense, or the public welfare require the termination of the interest granted, with advance, written notice provided to the grantee.

(ii) A liability waiver, indemnification requirements, environmental requirements, and insurance provisions as needed to suitably protect the United States from damages arising from the grantee's use of NASA real property.

(iii) That restoration provisions are provided for in the agreement that protect the interests of the United States and ensure the grantee is responsible for removal of any and all improvements in or on NASA real property.

(iv) Such other reservations, exceptions, limitations, benefits, burdens, terms, or conditions as are set forth in the forms and templates for leaseholds, permits, and licenses in real property approved by and directed for use by the Real Estate Branch Chief.

(e) *Waivers.* If, in connection with a proposed grant, the Real Estate Contracting Officer or Center Director determines that a waiver from any of the restrictions set forth in paragraph (d) of this section is appropriate, a request may be submitted to the Assistant Administrator for the Office of Strategic Infrastructure or the Director, Facilities Real Estate Division.

(f) *Distribution of documents.* One copy of each document granting an interest in real property will be filed in the Central Depository for Real Property Documents at: National Aeronautics and Space Administration, Office of

Strategic Infrastructure, Washington, DC 20546.

BILLING CODE 7510–13–P

FEDERAL TRADE COMMISSION

16 CFR Part 310

RIN 3084–AB19

Telemarketing Sales Rule

AGENCY: Federal Trade Commission.

ACTION: Final rule.

SUMMARY: The Federal Trade Commission (''FTC'' or ''Commission'') adopts amendments to the Telemarketing Sales Rule (''TSR'') that, among other things, require telemarketers and sellers to maintain additional records of their telemarketing transactions, prohibit material misrepresentations and false or misleading statements in business to business (''B2B'') telemarketing calls, and add a new definition for the term ''previous donor.'' These amendments are necessary to address technological advances and to continue protecting consumers, including small businesses, from deceptive or abusive telemarketing practices.

DATES: The amendments are effective May 16, 2024. However, compliance with 16 CFR 310.5(a)(2) is not required until October 15, 2024. The incorporation by reference of certain material listed in the rule is approved by the Director of the Federal Register as of May 16, 2024.

ADDRESSES: Relevant portions of the record of this proceeding, including this document, are available at *https://www.ftc.gov.*

FOR FURTHER INFORMATION CONTACT: Patricia Hsue, (202) 326–3132, *phsue@ftc.gov,* or Benjamin R. Davidson, (202) 326–3055, *bdavidson@ftc.gov,* Division of Marketing Practices, Bureau of Consumer Protection, Federal Trade Commission, 600 Pennsylvania Avenue NW, Mail Stop CC–6316, Washington, DC 20580.

SUPPLEMENTARY INFORMATION: This document states the basis and purpose for the Commission's decision to adopt amendments to the TSR that were proposed and published for public comment in the **Federal Register** on June 3, 2022 in a Notice of Proposed Rulemaking (''2022 NPRM'').[1] After careful review and consideration of the entire record on the issues presented in this rulemaking proceeding, including 26 public comments submitted by a variety of interested parties, the Commission has decided to adopt, with several modifications, the proposed amendments to the TSR intended to curb deceptive or abusive practices in telemarketing and improve the effectiveness of the TSR.

I. Background

Congress enacted the Telemarketing and Consumer Fraud and Abuse Prevention Act (''Telemarketing Act'' or ''Act'') in 1994 to curb abusive telemarketing practices and provide key anti-fraud and privacy protections to consumers.[2] The Act directed the Commission to adopt a rule prohibiting deceptive or abusive telemarketing practices.[3] The Act also directed the Commission to include, among other provisions, disclosure requirements and to consider recordkeeping requirements in its rulemaking.[4] Pursuant to the Act, the Commission promulgated the TSR on August 23, 1995.[5]

The Rule prohibits deceptive or abusive telemarketing practices, such as misrepresenting several categories of material information or making false or misleading statements to induce a person to pay for a good or service.[6] The Rule also requires sellers and telemarketers to make specific disclosures and keep certain records of their telemarketing activities.[7] The Commission determined that recordkeeping requirements were necessary to ''ascertain whether sellers and telemarketers are complying with the [. . .TSR], identify persons who are involved in any challenged practices, and [] identify customers who may have been injured.'' [8]

Since 1995, the Commission has amended the Rule on four occasions: (1) in 2003 to create the National Do Not Call (''DNC'') Registry and extend the Rule to telemarketing calls soliciting charitable contributions (''charity calls''); [9] (2) in 2008 to prohibit prerecorded messages (''robocalls'') in sales calls and charity calls; [10] (3) in 2010 to ban the telemarketing of debt relief services requiring an advance fee; [11] and (4) in 2015 to bar the use in telemarketing of certain payment mechanisms widely used in fraudulent transactions.[12]

Despite making significant amendments to the Rule, the Commission has not updated the recordkeeping provisions since the Rule's inception in 1995.[13] Evolutions in technology and the marketplace have made it more difficult for regulators to enforce the TSR, particularly provisions relating to the DNC Registry.[14] As a result, the Commission solicited comment during its regulatory review process on whether it should update the recordkeeping provisions, and subsequently proposed amending them in the 2022 NPRM.[15]

The 2022 NPRM also proposed applying the TSR's prohibitions on deceptive telemarketing to B2B calls.[16] The original TSR generally excluded

[11] *See* Statement of Basis and Purpose and Final Rule Amendments (''2010 TSR Amendments''), 75 FR 48458 (Aug. 10, 2010) (adding debt relief provisions including a prohibition on misrepresenting material aspects of debt relief services in Section 310.3(a)(2)(x)). The Commission subsequently published technical corrections to Section 310.4 of the TSR. 76 FR 58716 (Sept. 22, 2011).

[12] *See* Statement of Basis and Purpose and Final Rule Amendments (''2015 TSR Amendments''), 80 FR 77520 (Dec. 14, 2015) (prohibiting the use of remotely created checks and payment orders, cash-to-cash money transfers, and cash reload mechanisms).

[13] When the Commission decided in 2003 and 2010 to make substantive amendments to the TSR, it declined to modify the Rule's recordkeeping provisions. *See* 2003 TSR Amendments, 68 FR at 4645, 4653–54 (declining to implement any of the suggested recordkeeping revisions that were raised in the public comments); 2010 TSR Amendments, 75 FR at 48502.

[14] 2022 NPRM, 87 FR at 33679–81.

[15] The Commission issued the 2022 NPRM after it had embarked on a regulatory review of the TSR in 2014. In that review, it sought feedback on a number of issues, including the existing recordkeeping requirements. *See* 2014 TSR Rule Review, 79 FR 46732, 46735 (Aug. 11, 2014).

[16] 2022 NPRM, 87 FR at 33682–83.

B2B calls, except those selling office and cleaning supplies, because in the Commission's experience at the time, those calls were ''by far the most significant business-to-business problem area.'' [17] In 2003, the Commission considered extending the TSR's protections to B2B calls selling internet or web services, but decided against doing so for fear of chilling technological innovation.[18] It did, however, note it would ''continue to monitor closely'' B2B telemarketing practices in this area and ''may revisit the issue in subsequent Rule Reviews should circumstances warrant.'' [19] Since then, the Commission has continued to see small businesses harmed by deceptive B2B telemarketing, and the 2022 NPRM proposed extending Section 310.3(a)(2)'s prohibition on misrepresentations [20] and Section 310.3(a)(4)'s prohibition on false or misleading statements [21] to B2B calls.[22]

Finally, the 2022 NPRM proposed adding a definition for ''previous donor.'' In 2008 the Commission amended the TSR to prohibit robocalls, but allowed charity robocalls if the recipient is a ''member of, or previous donor to, a non-profit charitable organization on whose behalf the call is made.'' [23] The Commission intended this narrow exemption to apply only to consumers who had previously donated to the soliciting organization,[24] but the Commission did not define ''previous donor.'' [25] The new definition will clarify that telemarketers are prohibited from making charity robocalls unless the call recipient donated to the soliciting non-profit charitable organization (''charity'') within the last two years.[26]

II. Overview of the Proposed Amendments to the TSR

A. Recordkeeping

The TSR's recordkeeping provisions, which have remained unchanged since the Rule was promulgated in 1995, generally require telemarketers and sellers to keep for a 24-month period records of: (1) any substantially different advertisement, including telemarketing scripts; (2) lists of prize recipients, customers, and telemarketing employees directly involved in sales or solicitations; and (3) all verifiable authorizations or records of express informed consent or express agreement.[27] They may keep the records in any form and in the same manner and format as they would keep such records in the ordinary course of business, and they may allocate responsibilities of complying with the Rule's recordkeeping requirements between the seller and telemarketer.[28]

The telemarketing landscape has changed drastically since 1995. Technological advancements have made it easier and cheaper for unscrupulous telemarketers to engage in illegal telemarketing, resulting in a greater proliferation of unwanted calls.[29] Bad actors hide their identities by using technology to ''spoof'' or fake a calling number, making it more difficult for the Commission to identify the responsible parties or obtain records of their illegal telemarketing activities.[30] Technology also allows these bad actors to operate from anywhere in the world, posing additional challenges to the Commission's law enforcement efforts.[31]

The primary hurdles in enforcing the TSR in the current telemarketing landscape are in: (1) identifying the telemarketer and seller responsible for the telemarketing campaign; (2) obtaining call detail records; and (3) linking the content of the telemarketing calls with the call detail records to determine which TSR provisions might apply to the telemarketing activity.

As explained in more detail in the 2022 NPRM, to identify the responsible parties and obtain evidence of their telemarketing activities, the Commission often must issue civil investigative demands to multiple voice service providers to trace a call from the consumer to the telemarketer's voice provider.[32] In some instances, by the time the Commission has identified the relevant voice provider, the voice provider may not have retained records of the telemarketing calls such as the date, time, call duration, and disposition of each call, or the phone number(s) that placed and received each call (*i.e.* ''call detail records'').[33] As a result, the call detail records either no longer exist or are not available for law

[17] Original TSR, 60 FR at 43867, 43861.

[18] 2003 TSR Amendments, 68 FR at 4663; 2022 NPRM, 87 FR at 33682–83.

[19] 2003 TSR Amendments, 68 FR at 4663; 2022 NPRM, 87 FR at 33682–83.

[20] Section 310.3(a)(2) prohibits, among other things, misrepresenting: the total cost to purchase a good or service, material restrictions on the use of the good or service, material aspects of the central characteristics of the good or service, material aspects of the seller's refund policy, the seller's affiliation with or endorsement by any person or government agency, or material aspects of a negative option feature or debt relief service. *See* 16 CFR 310.3(a)(2)(i)–(x).

[21] Section 310.3(a)(4) prohibits making false or misleading statements to induce any person to pay for goods or services or induce a charitable contribution. *See* 16 CFR 310.3(a)(4).

[22] 2022 NPRM, 87 FR at 33682–83. When the Commission issued the 2022 NPRM, it also issued an Advance Notice of Proposed Rulemaking (''2022 ANPR'') in which it sought public comment on whether to extend all of the TSR's protections to B2B calls. 2022 ANPR, 87 FR 33662 (June 3, 2022). The Commission addresses the public comments submitted in response to the 2022 ANPR in a Notice of Proposed Rulemaking that the Commission is issuing simultaneously with this Final Rule.

[23] *See* 2008 TSR Amendments, 73 FR at 51185. To qualify for this narrow exemption, sellers and telemarketers must also comply with the provisions of Section 310.4(b)(1)(v)(B).

[24] *Id.*

[25] Pursuant to the USA PATRIOT Act, the Commission amended the TSR in 2003 to extend its coverage to charity calls. 2003 TSR Amendments, 68 FR at 4582. As part of that amendment, the Commission defined ''donor'' as ''any person solicited to make a charitable contribution.'' *Id.* at 4590.

[28] 16 CFR 310.5(b) & (c).

[29] *See, e.g.,* Prepared Statement of the Federal Trade Commission Before the United States Senate Committee on Commerce, Science and Transportation: Abusive Robocalls and How We Can Stop Them (Apr. 18, 2018), *available at https://www.ftc.gov/system/files/documents/public_statements/1366628/p034412_commission_testimony_re_abusive_robocalls_senate_04182018.pdf* (last visited Dec. 11, 2023); *see also* Prepared Statement of the Federal Trade Commission: Oversight of the Federal Trade Commission Before the United States Senate Committee on Commerce, Science, and Transportation (Aug. 5, 2020), *available at https://www.ftc.gov/system/files/documents/public_statements/1578963/p180101testimonyftcoversight20200805.pdf* (last visited Dec. 21, 2023).

From 2019 to 2023, the Commission received on average nearly 4 million Do Not Call complaints per year, and the DNC Registry currently has over 249 million active telephone numbers. FTC, Do Not Call Data Book 2023 (''2023 DNC Databook''), at 6 (Nov. 2023), *available at https://www.ftc.gov/system/files/ftc_gov/pdf/Do-Not-Call-Data-Book-2023.pdf* (last visited Dec. 11, 2023). By comparison, within one year of its launch, the DNC Registry had over 62 million active telephone numbers registered, and the Commission received over 500,000 Do Not Call complaints. *See* Annual Report to Congress for FY 2003 and 2004 Pursuant to the Do Not Call Implementation Act on Implementation of the National Do Not Call Registry, at 3 (Sept. 2005), *available at https://www.ftc.gov/sites/default/files/documents/reports/national-do-not-call-registry-annual-report-congress-fy-2003-and-fy-2004-pursuant-do-not-call/051004dncfy0304.pdf* (last visited Dec. 11, 2023); National Do Not Call Registry Data Book for Fiscal Year 2009, at 4 (Nov. 2009), *available at https://www.ftc.gov/sites/default/files/documents/reports_annual/fiscal-year-2009/091208dncadatabook.pdf* (last visited Dec. 11, 2023). Conversely, technological advancements have also reduced the burden and costs of recordkeeping. 2022 NPRM, 87 FR at 33685 n.95 and 33690–91.

[30] *See supra* note 29. On June 25, 2019, the FTC announced ''Operation Call it Quits,'' which included 94 actions against illegal robocallers, many of which used spoofing technology. *See* Press Release, FTC, Law Enforcement Partners Announce New Crackdown on Illegal Robocalls (June 25, 2019), *available at https://www.ftc.gov/news-events/press-releases/2019/06/ftc-law-enforcement-partners-announce-new-crackdown-illegal* (last visited Dec. 11, 2023).

[31] *See supra* note 29.

[32] 2022 NPRM, 87 FR at 33680–81.

[33] *Id.* at 33680. In other instances, voice providers assert it is cost prohibitive to retrieve because they only maintain records in an easily retrievable format for several months before archiving them in the ordinary course of business.

enforcement purposes, and the Commission cannot identify the bad actor responsible for the spoofed or otherwise illegal calls.[34]

Call detail records are also necessary to ascertain compliance with certain provisions of the TSR such as the DNC Registry.[35] And as detailed in the 2022 NPRM, even when the Commission and other law enforcers are successful in obtaining call detail records, the records alone do not contain sufficient information about the content of the calls for regulators to determine whether the telemarketer or seller has violated the TSR.[36]

The proposed amendments to the recordkeeping requirements addressed the challenges identified above. They included new recordkeeping requirements of telemarketing activity that telemarketers or sellers are in the best position to provide.[37] Specifically, the proposed amendments required the retention of the following new categories of information: (1) a copy of each unique prerecorded message, including each call a telemarketer makes using soundboard technology; [38] (2) call detail records of telemarketing campaigns; [39] (3) records sufficient to show a seller has an established business relationship (''EBR'') with a consumer; [40] (4) records sufficient to show a consumer is a previous donor to a particular charity; [41] (5) records of the service providers that a telemarketer uses to deliver outbound calls; [42] (6) records of a seller or charitable organization's entity-specific do-not-call registries; [43] and (7) records of the Commission's DNC Registry that were used to ensure compliance with this Rule.[44]

The proposed amendments also required the retention of other new records that help identify the nature and purpose of each call including: (1) the identity of the telemarketer who placed or received each call; (2) the seller or charitable organization for which the telemarketing call is placed or received; (3) the good, service, or charitable purpose that is the subject of the call; (4) whether the call is to a consumer or business, utilizes robocalls, or is an outbound call; and (5) the telemarketing script(s) and the robocall recording (if applicable) that was used in the call.[45] The proposed amendments also required the retention of records regarding the caller ID transmitted if the call was an outbound call, including the name and phone number that was transmitted, and records of the telemarketer's authorization to use the phone number and name that was transmitted.[46]

The proposed amendments also modified or clarified existing recordkeeping requirements to delineate more clearly the information telemarketers or sellers must keep to comply with those provisions, and specified what information is required to assert an exemption or affirmative defense to the TSR.[47] Specifically, the proposed amendments modified the recordkeeping provisions to require retention of a customer or prize recipient's last known telephone number and last known physical or email address, and the date a customer bought a good or service.[48] It modified the time period to keep records from two years to five years from the date the record is made, except for advertising materials under Section 310.5(a)(1) and service contracts under Section 310.5(a)(9), which require retention of records for five years from the date the records under those sections are no longer in use.[49]

The proposed amendments clarified that records of verifiable authorizations, express informed consent or express agreement (collectively, ''consent'') include a consumer's name and phone number, a copy of the consent requested in the same manner and format that it was presented to that consumer, a copy of the consent provided, the date the consumer provided consent, and the purpose for which consent was given and received.[50] The NPRM also proposed that if the telemarketer or seller requested consent verbally, the copy of consent requested did not require a recording of the conversation. A copy of the telemarketing script would suffice as a complete record of the consent requested. But the NPRM made clear that this proposal only applies to telemarketing calls where no other provision of the TSR requires a recording of consent.[51]

The proposed amendments also included new format requirements for records containing a phone number, time or call duration; [52] clarified that a

[34] *Id.*

[35] *Id.* at 33681.

[36] *Id.* at 33680–82.

[37] *Id.*

[38] Soundboard technology is technology that allows a live agent to communicate with a call recipient by playing recorded audio snippets instead of using his or her own live voice. *See* FTC Staff Opinion Letter on Soundboard Technology, at 1 (Nov. 10, 2016), *available at https://www.ftc.gov/system/files/documents/advisory_opinions/letter-lois-greisman-associate-director-division-marketing-practices-michael-bills/161110staffopsoundboarding.pdf* (last visited Dec. 11, 2023).

[39] The proposed amendments stated the call detail records include for each call a telemarketer places or receives, the calling number; called number; time, date, and duration of the call; and the disposition of the call, such as whether the call was answered, dropped, transferred, or connected. If the call was transferred, the record should also include the phone number or IP address that the call was transferred to as well as the company name, if the call was transferred to a company different from the seller or telemarketer that placed the call. 2022 NPRM, 87 FR at 33684.

[40] For each consumer with whom a seller asserts it has an established business relationship, the proposed amendments stated a seller must keep a record of the name and last known phone number of that consumer, the date the consumer submitted an inquiry or application regarding that seller's goods or services, and the goods or services inquired about. A seller may also show it has an established business relationship with a consumer if that consumer purchased, rented, or leased the seller's goods or services or had a financial transaction with the seller during the 18 months before the date of the telemarketing call. Another proposed amendment modifies the existing recordkeeping provisions to state that records of existing customers should also include the date of the financial transaction to establish EBR under these circumstances. *Id.* at 33685.

[41] If a telemarketer intends to assert that a consumer is a previous donor to a particular charity, the Commission proposed that for each such consumer the telemarketer must keep a record of that consumer's name and last known phone number, and the last date that consumer donated to the particular charity. The proposed amendments also included a new definition of ''previous donor.'' *Id.* at 33685.

[42] The proposed amendments stated that service providers include, but are not limited to, voice providers, autodialers, sub-contracting telemarketers, or soundboard technology platforms. The Commission did not intend for this provision to include every voice provider involved in delivering the outbound call and limited this provision to the service providers with which the seller or telemarketer has a business relationship. For each such entity, the seller or telemarketer must keep records of any applicable contracts, the date the contract was signed, and the time period the contract is in effect. The proposed amendments also stated that the records should be retained for five years after the contract expires or five years from the date the telemarketing activity covered by the contract ceases, whichever is shorter. *Id.* at 33685–86.

[43] For the entity-specific do-not-call registry, the Commission proposed requiring telemarketers and sellers to retain records of: (1) the consumer's name, (2) the phone number(s) associated with the DNC request, (3) the seller or charitable organization from which the consumer does not wish to receive calls, (4) the telemarketer that made the call; (5) the date the DNC request was made; and (6) the good or service being offered for sale or the charitable purpose for which contributions are being solicited. *Id.* at 33686.

[44] The Commission proposed requiring telemarketers or sellers to keep records of every version of the FTC's DNC Registry the telemarketer or seller downloaded to ensure compliance with the TSR. *Id.* at 33686.

[45] *Id.* at 33684.

[46] *Id.*

[47] *Id.* at 33680–82.

[48] *Id.* at 33686.

[49] *Id.*

[50] *Id.* at 33686–87. The proposed amendment also stated that for a copy of the consent provided under Sections 310.3(a)(3), 310.4(a)(7), 310.4(b)(1)(iii)(B)(1), or 310.4(b)(1)(v)(A), a complete record must include all of the requirements outlined in those respective sections.

[51] 2022 NPRM, 87 FR at 33686–87.

[52] The proposed amendments required records containing international phone numbers to comport

failure to keep each record required under Section 310.5 in a complete and accurate manner constitutes a violation of the TSR; and created a safe harbor for incomplete or inaccurate call detail records where the omission was temporary and inadvertent.[53] Finally, the Commission proposed modifying the compliance obligations in Section 310.5(e) to obligate both telemarketers and sellers to keep records if they fail to allocate recordkeeping obligations between themselves.[54]

B. B2B Telemarketing

The Original TSR exempted B2B calls other than those selling office and cleaning supplies, which the Commission considered the ''most significant business-to-business problem area'' at the time.[55] The Commission stated, however, it would reconsider the B2B exemption if ''additional [B2B] telemarking activities become problems.'' [56] In 2003, the Commission reconsidered the scope of the B2B exemption and proposed requiring B2B calls selling internet or web services to comply with the TSR because they had become an emerging area for fraud.[57] The Commission ultimately decided not to modify the B2B exemption because the Commission wanted to ''move cautiously so as not to chill innovation in the development of cost-efficient methods for small businesses to join in the internet marketing revolution.'' [58] But the Commission again noted it would ''continue to monitor closely'' the B2B telemarketing practices in this area and ''may revisit the issue in subsequent Rule Reviews should circumstances warrant.'' [59]

Since 2003, the Commission has continued to see small business harmed by numerous types of deceptive B2B telemarketing schemes,[60] including those selling business directory listings,[61] web hosting or design services,[62] search engine optimization services,[63] market-specific advertising opportunities,[64] payment processing services,[65] and schemes that impersonate the government.[66] For example, some of these schemes were the subject of a coordinated FTC-led crackdown on scams targeting small businesses, called ''Operation Main Street,'' announced in June 2018.[67]

To address these scams, the 2022 NPRM proposed applying the TSR's prohibitions against misrepresentations, as articulated in Sections 310.3(a)(2) and 310.3(a)(4), to B2B telemarketing. Specifically, sellers and telemarketers would be prohibited from making: (1) several types of material misrepresentations in the sale of goods or services; and (2) false or misleading statements to induce a person to pay for goods or services or to induce a charitable contribution (collectively, ''misrepresentations''). [68] The 2022 NPRM did not propose applying any other provisions of the TSR to B2B calls, such as recordkeeping, DNC Registry, or DNC fee access requirements.[69]

C. New Definition for ''Previous Donor''

The 2022 NPRM proposed adding a new definition for the term ''previous donor'' to clarify that telemarketers are prohibited from making charity robocalls unless the consumer donated to the soliciting charity within the last two years. When the Commission amended the TSR to prohibit robocalls

with International Telecommunications Union's Recommendation E.164 format and domestic numbers to comport with the North American Numbering plan. The Commission proposed that records containing time and call duration be kept to the closest whole second, and time must be recorded in Coordinated Universal Time (UTC). *Id.* at 33687.

[53] The Commission proposed a safe harbor for temporary and inadvertent errors in keeping call detail records if the telemarketer or seller can demonstrate that: (1) it has established and implemented procedures to ensure completeness and accuracy of its records under Section 310.5(a)(2); (2) it trained its personnel in the procedures; (3) it monitors compliance and enforces the procedures, and documents its monitoring and enforcement activities; and (4) any failure to keep accurate or complete records under Section 310.5(a)(2) was temporary and inadvertent. *Id.* at 33687.

[54] *Id.* at 33687.

[69] *Id.; see also* 16 CFR 310.5 (recordkeeping requirements); 310.8 (fee for access to the Do Not Call Registry).

in 2008,[70] it included a narrow exemption allowing charity robocalls to prior donors, recognizing a charity's strong interest in reaching consumers with ''whom the charity has an existing relationship—*i.e.* members of, or previous donors to[,] the non-profit organization on whose behalf the calls are made.'' [71] The Commission meant to limit the exemption to consumers with actual relationships to the soliciting organization, because allowing ''telefunders to make impersonal prerecorded cold calls on behalf of charities that have no prior relationship with the call recipients . . . would defeat the amendment's purpose of protecting consumers' privacy.'' [72] But in creating the exemption, the Commission did not update the definition of ''donor'' or include a definition of ''previous donor.'' Because ''donor'' is defined as ''any person solicited to make a charitable contribution,'' [73] the Commission's 2008 Amendment could be misinterpreted as allowing a telemarketer to send robocalls to any consumer it had previously *solicited* for a donation on behalf of a charity, regardless of whether the consumer donated to or has an existing relationship with that charity.

Adding a definition for ''previous donor'' makes clear a seller or telemarketer may only make charity robocalls to a donor who has previously provided a charitable contribution to that particular charity within the last two years.[74]

D. Overview of Public Comments Received in Response to the 2022 NPRM

In response to the 2022 NPRM,[75] the Commission received 26 comments [76] representing the views of State governments,[77] consumer groups,[78] consumers,[79] industry trade associations,[80] and businesses.[81] The vast majority of the comments focused on the proposed recordkeeping amendments. Commenters on behalf of government, individual consumers, and consumer advocacy groups generally supported amending the recordkeeping requirements but also submitted suggestions for additional amendments.[82] Industry groups and businesses had mixed comments. Some commenters did not support any recordkeeping amendments, citing the burden they would impose, while others were generally supportive or supportive of specific proposed amendments.[83]

Similarly, industry groups and businesses did not support applying the TSR's prohibitions against deceptive telemarketing to B2B calls; while government, individual consumers, and consumer organizations were supportive. Only three comments touched on the proposed amendment to add a new definition of ''previous donor.'' The comments and the basis for the Commission's adoption or rejection of the commenters' suggested modifications to the proposed amendments are analyzed in Section III below.

III. Final Amended Rule

The Commission has carefully reviewed and analyzed the record developed in this proceeding.[84] The record, which includes the Commission's law enforcement experience and that of its State and Federal counterparts, support the Commission's view the proposed amendments in the 2022 NPRM are necessary and appropriate to protect consumers, including small businesses, from deceptive or abusive telemarketing practices and ensure the Commission and other regulators can effectively and efficiently enforce the TSR.[85]

The Final Rule requires sellers and telemarketers to keep additional records of their telemarketing activities, prohibits misrepresentations in B2B telemarketing, and adds a new definition for previous donor. The Final Rule also implements several other clerical modifications as originally proposed in the 2022 NPRM.[86]

In some instances, the Commission has clarified or made modifications to its original proposal in response to the public comments submitted. The

[70] 2008 TSR Amendments, 73 FR at 51164.

[71] *Id.* at 51193.

[72] *Id.* at 51194.

[73] 16 CFR 310.2(p). The Commission declined to limit the definition of donor to those who have ''an established business relationship with the non-profit charitable organization'' because it wanted the term ''[to] encompass not only those who have agreed to make a charitable contribution but also any person who is solicited to do so, to be consistent with [the Rule's] use of the term 'customer.' '' 2003 TSR Amendments 68 FR at 4590.

[74] The Commission proposed that the definition of ''previous donor'' be limited to those who donated to a charity within the past two years so that consumers will not receive robocalls in perpetuity from organizations to which they have donated. The Commission chose two years to account for the possibility that consumers who donate annually may not necessarily donate exactly one year apart. 2022 NPRM, 87 FR at 33688.

[75] The Commission also received 114 unique comments in response to the 2014 Rule Review reflecting the opinions of State and Federal agencies, consumer advocacy groups, consumers, academics, and industry. 2022 ANPR, 87 FR at 33664. The comments addressing whether the Commission should amend the TSR's recordkeeping provisions are summarized in the 2022 NPRM. 2022 NPRM, 87 FR at 33682.

[76] Many commenters filed one comment in response to the 2022 ANPR or 2022 NPRM that addressed issues raised by both documents. Comments regarding the proposals in the 2022 NPRM will be addressed in this Final Rule. Comments regarding the proposals in the 2022 ANPR will be addressed in the Notice of Proposed Rulemaking that the Commission is issuing concurrently with this Final Rule (''2024 NPRM''). We cite public comments by name of the commenting organization or individual, the rulemaking (ANPR comments were assigned ''33'' and the NPRM comments were assigned ''34''), and the comment number. All comments submitted can be found at *www.regulations.gov*.

[82] Many of the consumer comments generally stated that they supported the recordkeeping amendments because they would help protect consumers from deceptive telemarketing and with enforcing the TSR. *See, e.g.,* Cassady 34–3; Chen 34–9; and Anonymous 34–11 and 34–3. One commenter generally urged more enforcement and larger penalties. Kowalski 33–7.

[83] One anonymous commenter did not support any recordkeeping because it required collection of too much data, which the commenter believed infringed on a consumer's privacy. Anonymous 34–4.

[84] The record includes the 2014 Rule Review, the 2022 NPRM, 2022 ANPR, and the law enforcement cases and experience referenced therein, which are hereby incorporated by reference.

[85] The Commission's decision to amend the Rule is made pursuant to the rulemaking authority granted by the Telemarketing Act to protect consumers, including small businesses, from deceptive or abusive practices. 15 U.S.C. 6102(a).

[86] 2022 NPRM, 87 FR at 33688.

Commission otherwise adopts the amendments proposed in the 2022 NPRM as set forth in Section VII—Congressional Review Act (''Final Rule'') below. The primary modifications and clarifications between the proposed rule published in the 2022 NPRM and the Final Rule are:

- The term ''prerecorded message'' includes telemarketing calls made using ''digital soundboard'' rather than ''soundboard technology'' to make clear the term includes any digital or sound technologies that sellers or telemarketers use to convey a verbal message to a consumer in telemarketing;
- Telemarketers and sellers will have one hundred and eighty days after the Final Rule is published to implement any new systems, software, or procedures necessary to comply with the new requirement that they keep call detail records under Section 310.5(a)(2);
- Sellers and telemarketers need not retain records of the calling number, called number, date, time, duration, and disposition of telemarketing calls under Sections 310.5(a)(2)(vii) and (x) for any calls made by an individual telemarketer who manually enters a single telephone number to initiate a call to that telephone number. Such sellers and telemarketers, however, must still comply with the other requirements under Section 310.5(a)(2);
- Modified Section 310.4(b)(2) to state it is also an abusive telemarketing act or practice and a violation of the TSR for any person to sell, rent, lease, purchase, or use any list established to comply with the TSR's recordkeeping requirements under Section 310.5. This modification makes clear telemarketers and sellers cannot use any consumer lists created for recordkeeping purposes for any other purpose;
- In obtaining written consent to contact a consumer using robocalls on behalf of a ''specific seller,'' the written agreement must identify the ''specific seller'' by its legal entity name to make clear that any agreement to receive robocalls is limited to that legal entity. The seller or telemarketer obtaining consent from the consumer must ensure the consumer understands which legal entity they have authorized to send robocalls;
- Where no provision of the TSR requires a recording of the call, the Final Rule modifies what was proposed in the NPRM and now states a complete record of consent that is verbally requested must include a recording of the consent requested as well as the consent provided, and that recording must make clear the purpose for which consent was provided;
- Service providers referenced under Section 310.5(a)(9) include any entity that provides ''digital soundboard'' technology rather than ''soundboard technology platforms'' to make clear sellers and telemarketers must retain records of any entity that provides any digital or sound technologies sellers or telemarketers use to convey a verbal message to a consumer in telemarketing;
- Sellers and telemarketers must retain records of their service providers under Section 310.5(a)(9) for five years from the date the contract expires;
- For records of the entity-specific DNC list under Section 310.5(a)(10), sellers and telemarketers must retain a record of the telemarketing entity that made the call and not the individual telemarketer;
- Under Section 310.5(a)(11), sellers and telemarketers need only retain records of which version of the FTC DNC Registry they used to comply with the TSR rather than the version itself. A record of which version used includes: (1) the name of the entity which accessed the registry; (2) the date the DNC Registry was accessed; (3) the subscription account number that was used to access the registry; and (4) the telemarketing campaign(s) for which it was accessed;
- The new formatting requirements under Section 310.5(b) apply to new records created after the Final Rule goes into effect;
- The safe harbor to retain call detail records under Section 310.5(a)(2) will grant sellers and telemarketers thirty days to correct any inadvertent errors from the date of discovery, if the seller or telemarketer who made the error otherwise complies with the other provisions of the safe harbor; and
- Under Section 310.5(e), sellers who delegate recordkeeping responsibilities to a telemarketer must also retain access rights to those records so the seller can produce responsive records in the event it has hired a telemarketer overseas.

A. Recordkeeping Requirements

The Final Rule requires sellers and telemarketers to maintain additional records that, in the Commission's law enforcement experience, are difficult for the Commission to obtain but are necessary to ensure compliance with the TSR.[87] The Final Rule also clearly defines the information telemarketers or sellers must retain to comply with existing provisions and specifies the records needed to assert an exemption or affirmative defense to the TSR. In this section, the Commission details the public comments it received in response to each proposed amendment to the recordkeeping requirements, and the Commission's response.

1. Section 310.5(a)(1)—Substantially Different Advertising Materials and Each Unique Prerecorded Message

Section 310.5(a)(1) currently requires sellers and telemarketers to keep records of ''all substantially different advertising, brochures, telemarketing scripts, and promotional materials.'' The 2022 NPRM proposed modifying Section 310.5(a)(1) to require retention of a copy of each unique robocall, including each call a telemarketer makes using soundboard technology.[88]

The Commission received five public comments addressing this proposal. The Enterprise Communications Advocacy Coalition (''ECAC'') and Sirius XM Radio (''Sirius'') object to this proposed amendment, stating it would be overly burdensome. Sirius states requiring the retention of each unique robocall would ''generate massive amounts of data that then needs to be searched, analyzed, secured, and retained, and will be extremely burdensome.'' [89] ECAC claims robocalls are ''typically stored as .wav files that are significantly larger than text files. While storage costs *may* have decreased over time, the expense associated with the storage of these large .wav files will be a significant burden on lawful telemarketers.'' [90]

The National Association of Attorneys General (on behalf of 43 State Attorneys General) (''NAAG''), Professional Association for Customer Engagement (''PACE''), and World Privacy Forum (''WPF'') all state they generally support this amendment.[91] PACE further states their members ''often keep copies of [each unique robocall] despite the TSR currently not requiring businesses to do so. Retaining these records will protect American consumers, who receive countless prerecorded messages, and protect companies, who will be able to prove compliance with the TSR.'' [92]

The Commission is not persuaded by ECAC's and Sirius' arguments. In the Commission's experience, robocalls are typically of short duration and the file sizes are minimal. As ECAC notes, the cost of storage may be decreasing every

[87] The Telemarketing Act authorizes the Commission to include recordkeeping requirements in the Rule. 15 U.S.C. 6102(a)(3).

[88] The 2022 NPRM also proposed changing the records retention period under this provision from two years to five years from the date that the records are no longer in use. *See infra* Section III.A.10 (Time Period to Keep Records).

[89] Sirius 34–18 at 8.

[90] ECAC 34–22 at 2.

[92] PACE 33–15 at 2.

year. Moreover, the Commission proposed requiring a copy of each *unique* robocall, not *every* robocall used. Finally, as some commenters have stated,[93] businesses typically keep these records in the ordinary course of business. In the FTC's law enforcement experience, records of each unique prerecorded message are necessary for the Commission to ensure compliance with the TSR, and requiring retention of each unique robocall should not impose an undue burden.

With respect to calls utilizing soundboard technology, the Commission sought comment on the burden that may be imposed by requiring sellers or telemarketers to keep each unique prerecorded message involving the use of soundboard technology, including how many telemarketers employ soundboard technology in telemarketing, how many calls they make using soundboard technology, the average duration of each call, and whether the telemarketer typically keeps recordings of such calls in the ordinary course of business.[94] The FTC's law enforcement experience demonstrates the use of soundboard technology is ongoing. The Commission did not receive any public comments regarding this issue. WPF did note, however, the Commission should be mindful of using technological language that is broad enough to encompass a variety of digital and other sound technologies and recommended the use of the term ''digital soundboard'' in lieu of ''soundboard technology.'' [95] In light of this recommendation, the Commission states that the term ''prerecorded message'' includes telemarketing calls made using ''digital soundboard'' rather than ''soundboard technology'' to make clear the term includes any digital or sound technologies that sellers or telemarketers use to convey a verbal message to a consumer in telemarketing. Some digital soundboard technologies allow a seller or telemarketer to mimic or clone the voice of a specific individual and calls using this technology would be subject to this provision of the TSR to the extent that the mimic or cloning creates a prerecorded message that is used in telemarketing.

WPF also ''encourage[s] the FTC to require telemarketers to keep a copy of the full range of materials involved in the advertising campaign, including transcripts.'' [96] The Commission notes the TSR's recordkeeping provisions already require telemarketers and sellers to retain a copy of each substantially different advertising, brochure, telemarketing script, and promotional material.[97] The 2022 NPRM simply clarified telemarketing scripts include robocall and upsell scripts, and the failure to keep one substantially different version of each record under Section 310.5(a)(1) is a violation of the TSR.[98]

2. Section 310.5(a)(2)—Call Detail Records

The 2022 NPRM proposed adding Section 310.5(a)(2) to require retention of call detail records, including, for each call a telemarketer places or receives: the calling number; called number; time, date, and duration of the call; and the disposition of the call, such as whether the call was answered, dropped, transferred, or connected. For transfers, the record included the phone number or IP address the call was transferred to and the company name, if transferred to a company different from the seller or telemarketer that placed the call. The 2022 NPRM also required the retention of other records regarding the nature and purpose of each call including: (1) the telemarketer who placed or received each call; (2) the seller or charity for which the telemarketing call is placed or received; (3) the good, service, or charitable purpose that is the subject of the call; (4) whether the call is to a consumer or business, utilizes robocalls, or is an outbound call; and (5) the telemarketing script(s) and robocall (if applicable) that was used in the call. Finally, the 2022 NPRM required retention of records regarding the caller ID transmitted for outbound calls, including the name and phone number transmitted, and records of the telemarketer's authorization to use that phone number and name.

The Commission received eight comments regarding this proposal. ECAC,[99] the National Federation of Independent Businesses (''NFIB''),[100] and Sirius [101] objected, stating that compliance with this provision would impose enormous expense on businesses engaged in lawful telemarketing.[102] ECAC states its members ''make hundreds of millions of calls each year'' and ''[f]actoring in the size of a CDR file'' multiplied by the number of calls its members make each year, ''the expense associated with this retention . . . would be massive.'' [103] ECAC also argues that, while its members likely keep information regarding the nature and purpose of the calls in the ordinary course of business, associating particular scripts with a particular call is unworkable because ''well-trained telemarketers are able to deviate from scripts or not use them at all'' and ''scripts are constantly changing and evolving to reflect consumer questions and concerns.'' [104]

Sirius argues the Commission's ''overly prescriptive'' approach would impair a business's ability to adapt to

[97] 16 CFR 310.5(a)(1).

[98] 2022 NPRM, 87 FR at 33684.

[99] ECAC 34–22 at 3.

[100] NFIB 33–4 at 4–5.

[101] Sirius 34–18 at 7.

[102] OCUL also generally objects to the proposed recordkeeping requirements as overly burdensome, stating it would require a significant investment to collect and retain new data points in a constricted time frame. OCUL 34–19 at 2.

Other commenters generally objected to the recordkeeping amendments, arguing that they require telemarketers and sellers to retain more information than they would in the ordinary course of business and are ''contrary to data minimization principles'' articulated by the Commission elsewhere. *See, e.g.,* Sirius 34–18 at 2, 4–6; NFIB 33–4 at 3–4. The Commission interprets these arguments to refer to the new requirement that sellers and telemarketers retain call detail records. NFIB lists other categories in their comment as examples of burden, such as records of established business relationships, customer lists, consent, and entity-specific DNCs or versions of the FTC's DNC Registry. NFIB 33–4 at 3–4. None of these categories, however, is new, and the TSR has always required telemarketers and sellers to keep these records. *See, e.g.,* 16 CFR 310.5(a)(3) and (5) (requiring records of consent and customer lists); 310.4(b)(3)(iii) and (iv) (requiring records of an entity-specific DNC or a version of the FTC's DNC Registry that a seller or telemarketer used to qualify for the safe harbor provisions); *see also* 2015 TSR Amendments, 80 FR at 77554 (stating the seller or telemarketer bears the burden of demonstrating the seller has an existing relationship with a customer whose number is on the DNC).

The Commission notes that the call detail records primarily reflect sellers' and telemarketers' business practices rather than implicate any consumer information. The only new items of consumer information that sellers and telemarketers are required to retain under the new recordkeeping amendments are a consumer's phone number and the option to retain the consumer's last known email address rather than a physical address. *See* proposed amendments under Sections 310.5(a)(2) (call detail records); (a)(3) (prize recipients); (a)(4) (customer records); and (a)(6) (previous donor). As explained in the 2022 NPRM, the Commission believes that telemarketers and sellers likely retain this information in the ordinary course of business. 2022 NPRM, 87 FR at 33684–85. Furthermore, they must already retain consumers' phone numbers to comply with the entity-specific DNC requirements. As discussed in additional detail in Section III.A.3—Prize Recipients and Customer Records, the Commission will prohibit use of any records created to comply with the TSR's recordkeeping requirements for any other purpose.

[103] ECAC 34–22 at 3.

[104] *Id.* at 4. The Commission does not find ECAC's argument persuasive. Even if a telemarketer deviates from a script, fails to use the script, or the company constantly updates the scripts, there is still *a* script associated with a particular call and in the Commission's law enforcement experience, telemarketers typically retain that information in the ordinary course of business.

changing market conditions and a company's ability to innovate. It would also impose ''significant administrative burdens'' and ''substantial transactional costs'' on sellers and telemarketers to establish contracts and systems to capture the information requested.[105] And NFIB argues sellers and telemarketers would ''incur substantial costs to: (1) establish in-house, or purchase from others, systems designed and built to accomplish the newly-mandated, extraordinarily-detailed recordkeeping, and (2) employ personnel to maintain and operate the systems.'' [106] At minimum, Sirius requests the Commission allow a ''phase-in'' period of a few years to allow companies sufficient time to adjust agreements, implement new systems, and build compliance plans.[107]

The Electronic Privacy and Information Center (on behalf of 13 advocacy groups) (''EPIC''), NAAG, WPF, and an individual consumer, all support the proposed amendments.[108] NAAG echoed the Commission's law enforcement experience and agreed the amendments are necessary to ensure compliance with the TSR and should not be overly burdensome to create and maintain these records.[109] EPIC stated they ''strongly support'' the amendment which rectifies ''a major weakness in the existing rule'' of requiring retention of only ''prizes awarded and sales'' which are of ''little use in identifying violations of the do-not-call rule'' without accompanying records of calls.[110] EPIC particularly applauded the amendment requiring retention of any caller ID information transmitted and the telemarketer's authorization to use that caller ID because spoofing has undermined consumers' faith in the U.S. telecommunication system, making it harder for emergency calls to reach consumers.[111] WPF and NAAG also commented that requiring records of call transfers and the identity of the recipient of those transfers is particularly important because it is ''otherwise impossible to trace fraudulent activity'' when transfers typically appear as a separate inbound call to the recipient in the voice provider's call records.[112] The individual consumer stated retaining call detail records was necessary to enforce the TSR and ''a fair compromise'' in comparison to requiring recordings of all telemarketing transactions which would be overly burdensome to small businesses.[113]

PACE notes some of its members are able to maintain the requested records and already do so in the ordinary course of business, but the proposed amendments may not be technically feasible for all members, particularly those who do not use software to engage in telemarketing but use employees in retail locations.[114] PACE members raised particular concerns about the technical capacity to record ''the duration of the call, disposition of the call, and to whom the call was transferred.'' [115]

As explained in the 2022 NPRM, the proposed addition of Section 310.5(a)(2) is necessary for the Commission to determine whether the TSR applies and which sections of the TSR the seller and telemarketer must comply with for a telemarketing campaign.[116] The Commission is cognizant this amendment will require some administrative costs in establishing a new recordkeeping system. In the 2022 NPRM, the Commission provided an estimate of those costs and invited comment about those estimates,[117] but did not receive any public comment specifically disputing its estimates. Nevertheless, in determining whether to implement the proposed amendments, the Commission considers whether the proposed amendments strike an appropriate balance between the goal of protecting consumers from deceptive or abusive telemarketing and the harm from imposing compliance burdens.

To address the concerns raised by the public comments, the Commission will provide a grace period of one hundred and eighty days from the date Section 310.5(a)(2) is published in the **Federal Register** for sellers and telemarketers to implement any new systems, software, or procedures necessary to comply with this new provision. Furthermore, the Commission will modify this amendment and provide an exemption for calls made by an individual telemarketer who manually enters a single telephone number to initiate a call. For such calls, the seller or telemarketer need not retain records of the calling number, called number, date, time, duration, and disposition of the telemarketing call under Sections 310.5(a)(2)(vii) and (x) but must otherwise comply with the other requirements under Section 310.5(a)(2). Making this modification should alleviate the general concerns commenters have raised regarding the feasibility and burden of creating and retaining call detail records. The Commission is not persuaded that requiring sellers and telemarketers to retain call detail records of their telemarketing campaigns would impose an undue burden if the seller or telemarketer can use automated mechanisms to conduct their campaigns instead of placing calls manually. In those situations, as PACE notes, the seller or telemarketer already maintains similar call detail records in the ordinary course of business.[118]

Nor is the Commission persuaded by Sirius' arguments that the proposed amendments are overly prescriptive and requiring retention of these records would stifle innovation. The proposed amendments merely identify the information sellers and telemarketers must retain. It does not dictate the form or ''look and feel'' of business records as Sirius' suggests. As discussed in more detail in Section III.A.11—Format of Records, the Commission believes the amendment to Section 310.5(a)(2) strikes the appropriate balance between providing specificity about the information sellers and telemarketers are required to keep without prescribing how it must do so.

EPIC and WPF's comments also suggested additional modifications to Section 310.5(a)(2). WPF requested the Commission consider requiring sellers and telemarketers to retain records of their use of voice biometrics in call centers, including whether voice biometrics recognition or voice emotion analysis software was used, whether a consumer's records were marked with any inferences from any voice biometric analysis, and whether that analysis was shared with any other parties.[119] The FTC's Policy Statement on Biometric Information notes significant privacy concerns regarding the collection and use of biometric information and the possibility such practices may be considered an ''unfair'' practice under Section 5 of the FTC Act.[120] Furthermore, the collection and use of such information might be considered abusive and violative of a consumer's right to privacy, which Congress gave the Commission the power to regulate

with respect to telemarketing.[121] Although the Commission does not believe it has the evidence now either to require the retention of voice biometric recognition data in telemarketing or place restrictions on its use, it will continue to monitor voice biometric use in telemarketing.

EPIC requested the Commission consider requiring telemarketers and sellers to also retain records of campaign IDs for each call, arguing it is necessary to tie the call detail records to a particular campaign.[122] The Commission recognizes the concern EPIC has raised and addressed it by requiring sellers and telemarketers to retain records that identify, *for each call,* the nature and purpose of that call, such as the seller or soliciting charity for whom the telemarketing call was placed, the good or service sold or the charitable purpose of the call, and the telemarketing script or the robocall recording that was used. This information is at least as comprehensive as a campaign ID. The Commission believes specifying the substantive information sellers and telemarketers are required to retain, rather than identifying a particular data category such as campaign ID that may be subject to change over time, will more effectively enable the Commission and other regulators to enforce the TSR.

Finally, EPIC requested the Commission consider requiring sellers and telemarketers to keep records of the originating or gateway telecommunications provider for each campaign, rather than any service provider the telemarketer is in a business relationship with, as the NPRM proposes.[123] The Commission believes requiring retention of the call detail records and records of the seller or telemarketer's service providers strikes an appropriate balance between the Commission's interest in having sufficient information to enforce the TSR and industry's concerns regarding burden.

3. Sections 310.5(a)(3) and (4)—Prize Recipients and Customer Records

The TSR currently requires telemarketers and sellers to retain the ''name and last known address'' of each prize recipient.[124] The 2022 NPRM proposed requiring sellers and telemarketers to also retain the last known telephone number and physical or email address for each prize recipient. The Commission received three comments regarding this proposal, and all were supportive of the amendment. PACE states it believes this was a ''prudent measure, and many telemarketers and sellers that reward prizes likely already comply with this proposal.'' [125] NAAG agrees, stating the requirement ''reflects current business practices'' and telemarketers and sellers ''likely keep such information in the regular course of their business.'' [126] WPF concurs, but also suggests the Commission consider requiring sellers and telemarketers to retain this data in an encrypted state.[127]

With respect to ''Customer Records'' under Section 310.5(a)(4), the TSR requires sellers or telemarketers to retain the ''name and last known address of each customer, the goods or services purchased, the date such goods or services were shipped or provided, and the amount paid by the customer for the goods or services.'' [128] Similarly, the Commission proposed modifying this provision to account for current business practices and require the retention of the customer's last known telephone number and the customer's last known physical address or email address. The Commission also proposed adding the date the consumer purchased the good or service to account for the new requirement that telemarketers and sellers keep records of each consumer with whom a seller intends to assert it has an EBR.[129]

The Commission received four comments regarding this amendment. NAAG and PACE support this proposal, and agree it is necessary to establish EBR and likely that telemarketers and sellers already retain this information in the ordinary course of business.[130] EPIC and WPF, however, do not support this amendment unless the Commission concurrently passes commensurate privacy protections.[131]

The Commission notes that, as it recognized in the 2022 NPRM, requiring sellers and telemarketers to retain additional personal identifying information (such as consumers' names, phone numbers, and either their physical or email address, in combination with goods or services they purchased) may raise privacy concerns.[132] The Commission emphasizes once more that sellers and telemarketers have an obligation under Section 5 of the FTC Act to adhere to the commitments they make about their information practices and take reasonable measures to secure consumers' data.[133]

But the Commission also recognizes the concerns raised by the comments. It agrees additional protections, similar to those it incorporated into the TSR when it prohibited the sale or use of any lists established or maintained to comply with the TSR's DNC Registry or entity-specific DNC,[134] should also apply to any lists of consumers that sellers or telemarketers create or maintain in order to comply with the amended recordkeeping provisions.

Thus, the Commission will amend Section 310.4(b)(2) to state it is also an abusive telemarketing act or practice and a violation of the TSR for any person to sell, rent, lease, purchase, or use any list established to comply with Section 310.5. Amending the TSR to specify that the sale or use of a list created to comply with the recordkeeping provisions is consistent with the Telemarketing Act's emphasis on privacy protection. The Act authorizes the Commission to regulate ''calls which the reasonable consumer would consider coercive or abusive of such consumer's right to privacy.'' [135] The Commission agrees with commenters that consumers would consider it coercive and an abuse of their right to privacy if telemarketers or sellers are allowed to use any consumer information they collect and maintain under the TSR's recordkeeping provisions for any other purpose.

4. Section 310.5(a)(5)—Established Business Relationship

The 2022 NPRM proposed adding Section 310.5(a)(5) to further clarify what records a seller must keep to ''demonstrate that the seller has an established business relationship'' with a consumer. Specifically, for each consumer with whom a seller asserts it

[131] EPIC 34–23 at 15; WPF 34–21 at 3. When consumer data is transferred as part of the sale, assignment, or change in ownership, dissolution, or termination of the business, EPIC also urges the Commission to require a successor to acknowledge liability for any TSR violations regarding the calls that those records document. EPIC 34–23 at 15–16. EPIC argues that this will deter a fraudulent seller or telemarketer from shutting their businesses and selling their assets, including customer lists, to a sham successor as a means of evading liability. The Commission does not believe such an amendment is necessary at this time.

has an established business relationship, the seller must keep a record of the name and last known phone number of that consumer, the date the consumer submitted an inquiry or application regarding that seller's goods or services, and the goods or services inquired about.[136]

The Commission received five comments addressing this proposed amendment. EPIC,[137] NAAG, and PACE all support this amendment, agreeing it is necessary for a seller to establish a business relationship with a consumer and it is likely businesses already retain such records.[138] The Ohio Credit Union League (''OCUL'') made a general objection stating it was unclear when a credit union member's business relationship begins or ends, while Sirius objected on the grounds ''it was unnecessary'' since ''sellers and telemarketers must already collect information sufficient to demonstrate an established business relationship to use as an affirmative defense.'' [139]

The Commission is not persuaded by either OCUL's or Sirius's objections. As the Commission noted in its 2022 NPRM, this requirement only applies if a seller intends to assert it has an established business relationship with a consumer.[140] As Sirius notes, sellers must already collect this information in the ordinary course of business and thus the amendment should not impose an additional burden.

5. Section 310.5(a)(6)—Previous Donor

Similar to the EBR requirements described above, the Commission also proposed adding Section 310.5(a)(6) to clarify that, if a telemarketer intends to assert that a consumer is a previous donor to a particular charity,[141] the telemarketer must keep a record, for each such consumer, of the name and last known phone number of that consumer, and the last date the consumer donated to the particular charity. The Commission received two comments on this proposed amendment. NAAG agreed with this proposed amendment, stating it was akin to the proposed amendment for EBR and should not ''impose any undue burden.'' [142] WPF concurred stating the new recordkeeping provision will ''serve to clarify the exemption for charitable donations.'' [143]

6. Section 310.5(a)(8)—Records of Consent

Section 310.5(a)(5) of the TSR requires sellers or telemarketers to keep records of ''[a]ll verifiable authorizations or records of express informed consent or express agreement required to be provided or received under this Rule.'' The Commission proposed modifying this provision to clarify what constitutes a complete record of consent sufficient for a telemarketer or seller to assert an affirmative defense.[144] It wanted to make clear that common practices previously employed by telemarketers or sellers, such as maintaining a list of IP addresses and timestamps as proof of consent, are insufficient to demonstrate that a consumer has, in fact, provided consent to receive robocalls or receive telemarketing calls when the consumer has registered her phone number on the DNC Registry.[145]

Specifically, the 2022 NPRM proposed that for each consumer from whom a seller or telemarketer states it has obtained consent, sellers or telemarketers must maintain records of that consumer's name and phone number, a copy of the consent requested in the same manner and format it was presented to that consumer, a copy of the consent provided, the date the consumer provided consent, and the purpose for which consent was given and received.[146] For a copy of the consent provided under Sections 310.3(a)(3), 310.4(a)(7), 310.4(b)(1)(iii)(B)(1), or 310.4(b)(1)(v)(A), a complete record must also include all of the requirements outlined in those respective sections.[147] The 2022 NPRM also stated if consent were requested verbally, a copy of the telemarketing script of the request would suffice as a copy of the consent requested, and a recording of the conversation was not necessary unless another provision of this Rule required it.[148]

The Commission received four comments regarding this proposed amendment. EPIC, NAAG, PACE, and WPF all generally support the proposed amendment.[149] PACE states it ''welcomes these provisions in order to better ascertain what records are necessary to assert an affirmative defense'' and the proposed records ''flow logically from the TSR.'' [150]

But EPIC, NAAG, and WPF also submitted suggestions on additional amendments, arguing the Commission should implement more stringent requirements. WPF suggests the Commission consider updating how a consumer ''may withdraw or revoke consent, and create responsibilities for telemarketers to provide a clear opportunity to revoke or consent in each communication.'' [151] EPIC asks the Commission to specify that in identifying the ''specific seller'' from whom a consumer has provided written express agreement to receive robocalls, the telemarketer or seller must retain records of the ''legal name of the seller whose goods [or] services are being promoted.'' [152] EPIC believes this will

[136] A seller may also show it has an established business relationship with a consumer if that consumer purchased, rented, or leased the seller's goods or services or had a financial transaction with the seller during the 18 months before the date of the telemarketing call. The Commission is modifying the existing recordkeeping provisions to state that records of existing customers should also include the date of the financial transaction to support the existence of an EBR under these circumstances. *See* Section III.A.3 (Prize Recipients and Customer Records).

[137] EPIC also urged the Commission to modify the EBR requirements to include consumers who purchased a good or service from the seller. EPIC 34–23 at 14. The Commission does not believe this is necessary since sellers and telemarketers must already keep records of customers, which includes consumers who purchased a good or service from the seller. 16 CFR 310.5(a)(3). Furthermore, as discussed in Section III.A.3—Prize Recipients and Customer Records above, the Commission is amending the customer records provision to include the date the consumer purchased the good or service to account for the new EBR recordkeeping requirements.

EPIC also urges the Commission to consider clarifying that EBR may only be asserted as an affirmative defense if the seller or telemarketer intentionally called the consumer *because* it has an established business relationship with the consumer. EPIC 34–23 at 15. The TSR does not currently contemplate the use of EBR in this manner but rather allows telemarketers and sellers to call a consumer if the seller can demonstrate it has an EBR with that consumer and otherwise meets other requirements under the TSR. Making any modifications to this framework would require additional consideration.

''reduce obfuscation'' on the ''scope of the consumer's consent'' and identify the proper defendant if ''legal action is necessary.'' [153]

The Commission believes WPF's recommendation is primarily applicable to transactions involving a negative option feature [154] where a consumer may wish to cancel a subscription plan and revoke billing authorization. The Commission published a Notice of Proposed Rulemaking regarding the Negative Option Rule (''Negative Option NPRM'') on April 24, 2023, which also addresses telemarketing transactions.[155] Because the proposed Negative Option Rule would apply a more comprehensive and consistent framework for negative option transactions regardless of the sales medium, the Commission declines to make any further amendments to the TSR to address WPF's comment at this time.

With respect to EPIC's request regarding the identification of a ''specific seller,'' the Commission stated in the Statement of Basis and Purpose finalizing the TSR amendments prohibiting robocalls that it used the term ''specific seller'' to ''make it clear that prerecorded calls may be placed only by or on behalf of the specific seller identified in the agreement.'' [156] The Commission wanted to ensure any agreement to receive robocalls would be limited to the seller identified in the agreement and could not be transferrable to any other party.[157] Requiring companies to use the legal entity name to identify the specific seller in the written agreement is a natural extension of the Commission's intention in using the term ''specific seller.'' Thus, the Commission states now that in identifying the specific seller in any written agreement, the seller should use its legal entity name to make clear any agreement to receive robocalls is limited to that specific legal entity. The Commission also states the burden will be on the seller or telemarketer to ensure and prove a consumer understands which specific legal entity would be permitted to send the consumer robocalls. In circumstances where the legal entity's name may not be recognizable to consumers, perhaps because the consumers would recognize a brand or product name but not the legal entity name, the seller or telemarketer may need to take extra steps to ensure the consumer has knowingly agreed to receive robocalls from the specific seller.

EPIC also requests the Commission require sellers and telemarketers to ''retain records regarding the owner of the website where consent was purportedly obtained'' and a record of ''the relevant webform completion, or of some other admissible evidence of the specific consumer providing consent via a specific web page on a specific date/time.'' [158] For telemarketers or sellers who obtain consumer consent via a website, the Commission believes the new recordkeeping provision requiring records of ''a copy of the request for consent in the same manner and format in which was presented to that consumer'' would require a telemarketer or seller to keep a copy of the web page or web pages that were used to request consent from the consumer. The copy of the web page could be maintained as screenshots so long as the screenshot accurately reflects what a consumer viewed in providing consent. Sellers and telemarketers who obtain consent via website will also need to keep ''a copy of the consent provided'' under the new recordkeeping provisions. The Commission believes a screenshot of the web page a consumer completed to provide consent could satisfy this requirement if the screenshot also accurately reflects what a consumer submitted in providing consent. The Commission declines to specify the format a company must use to keep a copy of consent requested or provided to allow businesses the flexibility of retaining records as they would in the ordinary course of business. Rather, it believes specifying the categories of information required to adequately reflect consent will provide sufficient guidance. The Commission cautions, however, an IP address with a timestamp is not sufficient as a record of consent. The Commission does not believe any additional amendments are necessary at this time.[159]

EPIC and NAAG also raised concerns regarding the Commission's statement regarding the records for verbal consent. In the 2022 NPRM, the Commission stated if a seller or telemarketer requests consent verbally, a telemarketing script would suffice as a record of the consent requested as long as no other provision of the TSR required a recording.[160] EPIC requests the Commission make clear the reference to verbal consent only applies to billing authorization under Section 310.4(a)(7), and any authorization required to receive robocalls or to receive telemarketing calls to phone numbers on the DNC Registry must be provided in writing. EPIC also raised concerns over whether the Commission's statement meant that a script is an ''acceptable record of the language the caller used to request consent'' or if ''the Commission is also suggesting that [a script] is an acceptable record of the consumer's grant of consent.'' [161] If the former, EPIC argues using a telemarketing script as a record of the request for consent is insufficient when telemarketers often fail to follow the scripts.[162] If the latter, EPIC argues it would ''eviscerate the recordkeeping requirement'' when the new consent requirements include '' 'a copy of the request provided.' '' [163] EPIC also argues allowing a recording of only the consent provided without the actual request for consent would allow the telemarketer or seller to record a series of the ''word 'yes,' which would be meaningless without any context.'' [164] NAAG takes it a step further and urges the Commission to require recordings of the entire telemarketing transaction whenever consent is requested verbally.[165]

The 2022 NPRM specifies that, with respect to requests for verbal consent where no provision of the TSR requires a recording, a telemarketing script would be sufficient for a copy of the *request* for consent. It did not propose that a telemarketing script would be sufficient as a record of the consent *provided.* But the Commission recognizes the concerns raised by NAAG and EPIC, that without a recording of the consent requested, a recording of the request provided would

[165] NAAG 34–20 at 10. NAAG has also urged the Commission to require a recording whenever a telemarketing call includes a negative option offer. NAAG 34–20 at 6. It also requests that the Commission require a full refund if a consumer complains of unauthorized charges and the seller is unable to provide a recording of the transaction as proof of consent. *Id.* Since the Commission has issued the Negative Option NPRM, the Commission will not address this comment here.

be meaningless. Given that industry has stated scripts are not ''set in stone'' and ''[w]ell-trained telemarketers are able to deviate from scripts or not use them at all,'' [166] the Commission states that, for a complete record of consent that is requested verbally and where no provision of the TSR requires a recording, a telemarketer or seller must retain a recording of the consent requested as well as the consent provided to comply with proposed Section 310.5(a)(8). In addition, the recording must make clear the purpose for which consent was provided. The Commission does not believe requiring a recording of both the consent requested and provided would result in additional burden to businesses since it believes most businesses would have made a recording of both to comply with the recordkeeping provisions in the ordinary course of business.

In further response to NAAG and EPIC's concern, the Commission does not believe a recording of the entire telemarketing transaction is necessary if it is not otherwise required by another provision of the TSR. To require a recording of the entire transaction whenever consent is requested would effectively require a recording of all telemarketing transactions that are subject to the TSR.[167]

The Commission reiterates that sellers and telemarketers remain obligated to comply with all requirements outlined in other consent provisions in the TSR.[168] For transactions involving preacquired account information, telemarketers and sellers must fulfill the requirements of Section 310.4(a)(7)(i) and (ii), which include recording the entire telemarketing transaction if there is a free-to-pay conversion feature. For consent to receive robocalls or calls to phone numbers on the DNC Registry, telemarketers and sellers must abide by the requirements of Sections 310.4(b)(1)(iii)(B)(1) and (b)(1)(v)(A), respectively, which include obtaining a consumer's written consent.[169] And for telemarketing transactions using certain payment methods, telemarketers and sellers must comply with Section 310.3(a)(3), which includes obtaining a consumer's authorization to be billed in writing or, if verbal consent is requested, a recording of the transaction that evidences a consumer has received specific information. The Commission reiterates this rule amendment does not modify the requirements for consent outlined in the TSR; rather it clarifies what records must be kept to demonstrate compliance with the existing requirements.

7. Section 310.5(a)(9)—Other Service Providers

The Commission proposed requiring sellers and telemarketers to keep records of all service providers the telemarketer uses to deliver an outbound call in their telemarketing campaigns, such as voice providers, autodialers, sub-contracting telemarketers, or soundboard technology platforms. The provision would only apply to the service providers with which the seller or telemarketer has a business relationship, and not to every service provider involved in delivering an outbound call. For each service provider, the seller or telemarketer would keep records of any applicable contracts, the date the contract was signed, and the time period the contract is in effect. The seller or telemarketer would keep such records for five years from the date the contract expires or five years from the date the telemarketing activity covered by the contract ceases, whichever is shorter.

The Commission received four comments on this proposal. EPIC, NAAG, PACE, and WPF all support the proposed amendment, but also suggested some modifications.[170] WPF repeated its request the Commission use broader terminology than ''soundboard technology platforms'' in defining service providers.[171] EPIC repeated its request the Commission require sellers and telemarketers to also keep records of which service provider they used for each telemarketing campaign to ensure those service providers are also complying with the TSR.[172]

The Commission clarifies that service providers referenced under this provision include any entity that provides ''digital soundboard'' technology rather than ''soundboard technology platforms,'' to make clear that sellers and telemarketers must retain records of any entity that provides any digital or sound technologies that sellers or telemarketers use to convey a verbal message to a consumer in telemarketing. This includes, for example, service providers that telemarketers or sellers use to mimic or clone the voice of an individual to deliver live and prerecorded outbound telemarketing calls. With respect to EPIC's concerns of ensuring service providers are also complying with the TSR, as discussed above in Section III.A.2—Call Detail Records, the Commission believes it is not necessary to require records of the service provider used per telemarketing campaign. Requiring retention of all call detail records *and* records of the service providers used in making outbound telemarketing calls would be sufficient for the Commission and other law enforcement agencies to enforce the TSR and strikes an appropriate balance against industry's concerns regarding burden.

PACE requests the Commission limit this provision to the service providers with which sellers and telemarketers have a direct contractual relationship rather than a ''business relationship.'' [173] PACE argues it would be unreasonable to expect a seller to maintain records of its telemarketers' voice providers when the contractual relationship is between the telemarketer and voice provider.[174] PACE also asks the Commission limit the five year retention time period from the date the contract expires rather than when the telemarketing activity covered by the contract ceases.[175] PACE expressed concerned one party to the contract might cease the telemarketing activity without informing the other party and it would be difficult to identify when the retention period is triggered.[176]

The Commission recognizes the potential for uncertainty in the scenario PACE raises and will modify the recordkeeping requirements accordingly to require retention of any records under this provision for five years from the date the contract expires.[177] With respect to PACE's request to limit the recordkeeping requirements to those service providers with whom sellers or telemarketers have a direct contractual relationship, the Commission is not persuaded that requiring records of service providers with which they have a business relationship would cause

[166] ECAC 34–22 at 4.

[167] The TSR states it is an abusive practice to ''cause billing information to be submitted for payment, directly or indirectly, without the express informed consent of the customer or donor.'' 16 CFR 310.4(a)(7). This prohibition applies to all telemarketing transactions subject to the TSR. Thus, requiring a recording of every telemarketing call whenever consent is requested would essentially mean that all telemarketing calls subject to the TSR would need to be recorded.

[168] *See* 16 CFR 310.3(a)(3), 310.4(a)(7), 310.4(b)(1)(iii)(B)(1), and 310.4(b)(1)(v)(A).

[169] The Commission reiterates that a seller or telemarketer may not use an oral recording of consent for any provision of the TSR that requires consent to be provided in writing.

[177] If, after the end of a fixed term contract, a service provider continues to provide services and the telemarketer or seller continues to pay for those services, the Commission will consider the contract extended until performance ceases.

additional burden. As explained in more detail in Section III.A.14—Compliance Obligation, the Commission will allow sellers and telemarketers to allocate recordkeeping responsibilities between themselves. In the scenario that PACE raises, a seller can simply require their telemarketer to retain records of all the service providers it uses to make outbound telemarketing calls on the seller's behalf.

8. Sections 310.5(a)(10)—Entity-Specific DNC List

The 2022 NPRM also proposed requiring telemarketers and sellers to maintain for five years records related to the entity-specific DNC list and its corresponding safe harbor provision under Section 310.4(b)(3)(iii).[178] Specifically, the Commission proposed requiring telemarketers and sellers to retain records of: (1) the consumer's name, (2) the phone number(s) associated with the DNC request, (3) the seller or charitable organization from which the consumer does not wish to receive calls, (4) the telemarketer that made the call; (5) the date the DNC request was made; and (6) the good or service being offered for sale or the charitable purpose for which contributions are being solicited.

The Commission received four comments on this proposal. NAAG, PACE, and WPF, generally support the provision, noting that businesses likely retain this information in the ordinary course of business, while ECAC raised concerns.[179] ECAC agrees that businesses likely keep most of the data listed in the proposed provision, but stated the requirements should not include retention of consumer phone numbers or records of the purpose of the call (*e.g.,* the good or service offered for sale or the charitable purpose of contributions solicited) because both are burdensome to retain and irrelevant to the entity-specific TSR provisions.[180] Instead, ECAC argues the Commission should modify the entity-specific DNC requirements so it prohibits calls to specific numbers rather than specific people, similar to how the DNC Registry is applied.[181] PACE also requested the Commission clarify that the new entity-specific DNC recordkeeping provision requires retention of the telemarketing *entity* that made the call rather than the *individual* telemarketer.[182]

The Commission clarifies that the new recordkeeping provision requires retention of the identity of the telemarketing company that made the call and not the individual telemarketer. This requirement is particularly important for sellers or charitable organizations who engage multiple telemarketing entities to sell their good or service or seek a charitable contribution through telemarketing. Sellers or charities already should know which telemarketing entity logged the consumer's request to cease receiving calls on their behalf and ensure all their telemarketers abide by that request.

Similarly, when a telemarketer engages in telemarketing on behalf of multiple sellers or charitable organizations, it is important to require the retention of records of the purpose of the call any time a consumer asks a telemarketer to add them to the entity-specific DNC list. Since the entity-specific DNC prohibition is seller or charitable organization specific, telemarketers already should retain this information in the ordinary course of business because telemarketers must keep track of which seller on whose behalf they cannot contact specific consumers.

With respect to ECAC's concerns that retaining consumer phone numbers is irrelevant and overly burdensome, the Commission notes the safe harbor provision for the entity-specific DNC list is phone-number based and not based on a consumer's name. Section 310.4(b)(3) states that a seller or telemarketer shall not be liable for violating the entity-specific DNC provisions if, among other things, they maintain and record a ''list of telephone numbers the seller or charitable organization may not contact, in compliance with [the entity-specific DNC provision.]'' [183] Telemarketers must already retain a consumer's phone number in the ordinary course of business to comply with the TSR; including it in the new recordkeeping provision would not impose additional burden on businesses.

9. Section 310.5(a)(11)—DNC Registry

The 2022 NPRM also proposed requiring telemarketers and sellers to maintain, for five years, records of every version of the FTC's DNC Registry the telemarketer or seller downloaded in implementing the process referenced in the safe harbor provision of Section 310.4(b)(3)(iv).[184]

The Commission received four comments on this provision. NAAG, PACE, and WPF generally support the proposed provision, but also request some clarifications or modifications, while ECAC generally objects to the requirement.[185] WPF notes it ''strongly support[s]'' the proposed changes, noting they would ensure the ''integrity of the Do Not Call Registry.'' [186] ECAC argues the Commission should not require records of every version of the DNC Registry used because it ''imposes significant costs and burdens'' that ''greatly exceed any marginal benefit'' to the Commission, particularly when many of its members outsource scrubbing responsibilities to third parties and may never download the DNC Registry in the first place.[187]

WPF requests the Commission require telemarketers to keep records of how many times they accessed the DNC Registry or parts of the DNC Registry.[188] PACE requests the Commission clarify how it believes sellers and telemarketers would comply with the proposal that they retain records of ''every version of the registry they have downloaded.'' [189] PACE states it would be ''redundant'' if the Commission is requiring businesses to ''maintain separate versions of the registry apart from the up-to-date one'' since most businesses only ''scrub against the current version'' of the registry in the ordinary course of business.[190] PACE would support requiring them to ''document the version of the registry they used'' since doing so would reduce ''redundancy and data storage costs associated with keeping expired registries.'' [191]

Given the objections raised, the Commission will modify this provision to clarify that sellers and telemarketers need not keep every version of the DNC Registry they accessed to comply with the TSR's safe harbor rules. Instead, sellers and telemarketers must retain records of which version they used by keeping records of: (1) the name of the entity which accessed the registry; (2) the date the DNC Registry was accessed; (3) the subscription account number that was used to access the registry; and (4) the telemarketing campaign(s) for which it was accessed. Amending this provision to retain this information will address ECAC's concerns that the seller or telemarketer may use a third-party service to access the DNC Registry, and PACE's concern that retaining the actual version of the DNC Registry would be

redundant and burdensome. It would also address WPF's request that sellers and telemarketers should keep records of the number of times they access the DNC Registry. Presumably, sellers and telemarketers only access the DNC Registry to ensure compliance with the TSR's DNC prohibitions since accessing the DNC Registry for any other purpose would be a violation of the TSR.[192]

10. Time Period To Keep Records

The Commission proposed changing the time period that telemarketers and sellers must keep records from two years to five years from the date the record is made, except for Sections 310.5(a)(1) and (a)(9),[193] where the Commission proposed requiring retention for five years from the date that records covered by those sections are no longer in use. The Commission received nine comments on this proposal.[194] EPIC, NAAG, and WPF support the proposal, citing as rationales for their support the amount of time necessary to complete an investigation of TSR violations and that telemarketers fail to comply with litigation holds that are issued while investigations are pending.[195] ECAC, NFIB, OCUL, PACE, Sirius, and the US Chamber of Commerce (''Chamber'') all object, raising burden concerns.[196] PACE stated the Commission cannot assume its proposal would not be unduly burdensome based on the fact that data storage costs have decreased since 2014.[197] This is particularly true for small businesses, according to PACE, when the Commission is simultaneously expanding the number of records that must be retained and the length of time those records must be retained.[198] Sirius and OCUL also argue the FTC should not require retention of records ''beyond the agency's statute of limitations.'' [199] Sirius argues the appropriate statute of limitations is three years,[200] and OCUL argues that while the TSR does not ''specify a statute of limitations,'' courts will ''apply the statute of limitations of the state where the case is filed,'' which is two years in Ohio.[201]

The Commission is not persuaded by the general burden concerns commenters have raised. None of the commenters provided any information on what the burden would be and why small businesses would not be able to comply with the new recordkeeping amendments. As mentioned in Section III.A.2—Call Detail Records, the Commission provided an estimate of the additional cost of complying with the new recordkeeping amendments but did not receive any comment or data on why its estimate is inaccurate.

Additionally, the Commission notes the statute of limitations for the FTC to seek civil penalties under the TSR is five years and not two or three years, as some commenters argued. Although the statute of limitations to seek *consumer redress* for TSR violations is three years under Section 19 of the FTC Act,[202] the applicable statute of limitations for *civil penalties* is five years under Section 5 of the FTC Act.[203] As such, the Commission believes it is appropriate and necessary to require the retention of records for five years. This requirement is particularly important when, as EPIC has noted, not all companies will comply with a litigation hold request while an investigation is pending, potentially leaving law enforcement agencies with no recourse in enforcing the TSR.[204]

11. Section 310.5(b)—Format of Records

The 2022 NPRM proposed modifying the formatting requirements to require records that include phone numbers comport with the International Telecommunications Union's Recommendation E.164 format for international phone numbers and North American Numbering plan for domestic phone numbers.[205] For records that include time and call duration, the 2022 NPRM proposed industry keep these records to the closest whole second, and record times in Coordinated Universal Time (UTC). The Commission received two comments on this proposal. Both commenters support the amendments, but also requested clarifications or modifications.

PACE asked the Commission to clarify that the new amendments requiring that time be kept in UTC format applies only to new records moving forward.[206] It also requested the Commission allow businesses a reasonable time to implement the proposed changes since it may require reprogramming software and IT systems.[207] The Commission clarifies that the new formatting requirements apply only to new records created after the proposed amendments go into effect. Additionally, as stated in Section III.A.2—Call Detail Records, the Commission will allow sellers and telemarketers a one hundred eighty-day grace period to implement any new systems, software, or procedures necessary to comply with that new provision. The Commission believes that should provide companies sufficient time to reprogram any software systems necessary to also comport with the new formatting requirements.

EPIC requests the Commission require companies to maintain records in a format that is easily retrievable and inexpensive to produce and make clear the regulated party is responsible for the cost of producing the records.[208] EPIC also requests the Commission impose more specific formatting requirements and require telemarketers and sellers to keep their records in a format that ''is commonly used to work with large data sets'' and ''easily readable'' such as ''separate columns for separate data points rather than every data point within the same single data field.'' [209] The Commission considered EPIC's suggestions and declines to impose more specific formatting requirements. Technology is advancing at such a rapid pace that the Commission is concerned more specific formatting requirements might become obsolete in the future. Moreover, in the Commission's experience, companies that use technologies such as an autodialer to make telemarketing calls rather than manual means typically retain records of those calls in an easily retrievable format. The Commission believes allowing companies to retain records as they would in the ordinary course of business strikes an appropriate balance between law enforcement's interest in obtaining the information necessary to enforce the TSR and industry's concerns

about burden. Finally, the Commission does not believe it is appropriate to require sellers and telemarketers to affirmatively bear the cost of producing records to private litigants regardless of the outcome of their suits as EPIC requests,[210] when Congress already included a provision in the Telemarketing Act that allows a court to award the cost of the suit and any reasonable attorney or expert witness fees to the prevailing party.[211]

12. Section 310.5(c)—Violation of Recordkeeping Provisions

The 2022 NPRM proposed clarifying that the failure to keep each record required by Section 310.5 in a complete and accurate manner constitutes a violation of the TSR.[212] The Commission received five comments on this proposal. EPIC and NAAG support the proposal, stating it is a ''common-sense approach in deterring deceptive telemarketers/sellers from harming consumers'' [213] and ''inaccurate or incomplete records are of little use.'' [214] PACE also supports the proposed clarification, stating the proposal is ''logical and in line with the spirit of the TSR and its accompanying legislation.'' [215] But PACE raised concerns about the requirement that records be kept in an accurate and complete manner, arguing that companies who fail to keep all or some records in a complete and accurate manner through inadvertent error should not be penalized in the same way as telemarketers and sellers who fail to keep all or some categories of records.[216] Instead, PACE urges leniency for situations where the failure is inadvertent rather than willful and requests the Commission provide ''a 30-day cure period when the alleged violation can be easily corrected.'' [217]

NFIB and Sirius object to this proposal.[218] Sirius proposes the Commission ''count violations by each *type* of record rather than by *each* record, as proposed.'' [219] NFIB argues allowing civil penalties for ''each erroneous error'' is as ''perverse as the evil the FTC states it is addressing, for it would allow the FTC to put a seller or telemarketer out of business for a relatively minor mistake that affected many records.'' [220] NFIB provides an example to illustrate its concerns describing a situation where a company ''made the relatively minor mistake of keeping calls in the time zone of the person called, rather than in Coordinated Universal Time (UTC) format.'' [221] NFIB believes in this situation the company would be facing astronomically high fines for the hundreds of thousands of calls it makes a year.[222] Instead, NFIB argues the FTC should provide a reasonable time period to cure these errors once discovered, such as 90 days, and only commence imposing fines for each week after the reasonable period expires.[223] According to NFIB, this would be a more balanced system that ''avoids both the extreme that a relatively minor design violation yields an astronomical fine that puts the seller or marketer out of business and the opposite extreme that a violation results in such a small fine that a seller or marketer accepts fines as an annoying but manageable cost of doing business.'' [224]

The Commission recognizes NFIB's and PACE's concerns regarding inadvertent errors resulting in large penalties and, thus, included a safe harbor provision for call detail records in the proposed amendments. As discussed in Section III.A.13—Safe Harbor for Incomplete or Inaccurate Records Pursuant to Section 310.5(a)(2) below, the Commission believes it has provided a reasonable grace period for sellers and telemarketers to cure any inadvertent deficiencies in their recordkeeping system before any civil penalties might apply and the proposed example NFIB raises would fall squarely within the safe harbor, provided the company followed the other requirements of the safe harbor.

Regarding Sirius's suggestion that failure to retain each *type* of record equal one violation, the Commission is not persuaded imposing civil penalties for each type of record would provide sufficient incentive for companies to abide by the recordkeeping provisions given the limited number of categories of records sellers and telemarketers are required to retain.[225]

13. Section 310.5(d)—Safe Harbor for Incomplete or Inaccurate Records Kept Pursuant to Section 310.5(a)(2)

The Commission proposed including a safe harbor provision for temporary and inadvertent errors in keeping call detail records pursuant to Section 310.5(a)(2). Specifically, the 2022 NPRM stated a seller or telemarketer would not be liable for failing to keep records under Section 310.5(a)(2) if it can demonstrate that: (1) it established and implemented procedures to ensure completeness and accuracy of its records under Section 310.5(a)(2); (2) it trained its personnel in the procedures; (3) it monitors compliance and enforces the procedures, and documents its monitoring and enforcement activities; and (4) any failure to keep accurate or complete records under Section 310.5(a)(2) was temporary and inadvertent.[226]

The Commission received four comments on this proposal. PACE states a ''safe harbor for maintaining call detail records is necessary'' while Sirius states it would ''provide a good foundation for seller and telemarketer compliance plans.'' [227] WPF states it does not ''object to the safe harbor proposed'' because it was ''narrow enough to allow companies to make the kinds of mistakes that occur in day to day business, and provides incentives to correct the errors.'' [228]

NFIB, however, states it does not deem the safe harbor sufficient because it is ''complex and limited'' and does not provide a ''great source of comfort to sellers and marketers in its current form.'' [229] Because the safe harbor would apply in the scenario NFIB posits above where a company fails to keep call times in UTC format, the Commission believes the safe harbor provides adequate protection against inadvertent and temporary errors. The Commission, however, will revise this provision to provide sellers or telemarketers thirty days to cure an inadvertent error, as PACE suggests.[230]

14. Section 310.5(e)—Compliance Obligations

The Commission proposed modifying the compliance obligations in Section 310.5(e) to state that, in the event the seller and telemarketer failed to allocate responsibility between themselves for

maintaining the required records, the responsibility for complying with the recordkeeping requirements would fall on both parties.[231] The Commission received four comments on this proposal. NAAG, PACE, and Sirius supported the proposal.[232] PACE states that ''not only do we consider this fair, but we believe it will encourage parties to negotiate their contracts and cease regarding TSR recordkeeping as an afterthought.'' [233]

EPIC, however, objects to this amendment and strongly urges the Commission to require both telemarketers and sellers to retain records rather than allowing them to allocate responsibilities.[234] Specifically, EPIC raises a concern that a seller may allocate responsibilities to a telemarketer that resides outside the United States and would not be subject to U.S. jurisdiction and process.[235] EPIC argues that if the Commission is inclined to designate only one party, it should be the seller who is responsible because the seller should be accountable for the telemarketers it hires, is less likely to be overseas and undercapitalized compared to telemarketers, and likely receives most of the sales proceeds.[236] But EPIC still believes the Commission should explicitly require both sellers and telemarketers be responsible for recordkeeping to prevent any gamesmanship where sellers move overseas to avoid liability.[237] In the event the Commission is not persuaded, EPIC also argues the Commission should require sellers to audit their telemarketers, including reviewing an actual production of preserved records, and require sellers who hire overseas telemarketers to require those telemarketers to have a U.S.-based agent so their records would be subject to U.S. jurisdiction and process.[238]

The Commission shares EPIC's concerns regarding gamesmanship and the challenges of obtaining records from overseas entities. The Commission is also concerned about sellers hiring unscrupulous telemarketers and disclaiming any responsibility for recordkeeping by allocating the responsibility to those telemarketers. The Commission notes that under the proposed amendment, sellers who allocate recordkeeping responsibilities to their telemarketers would be required to ''establish and implement practices and procedure to ensure the telemarketer is complying with the [TSR's recordkeeping provisions].'' [239] But given the concerns EPIC has raised, the Commission will modify this provision to also require sellers who allocate recordkeeping responsibilities to their telemarketer to retain access rights to those records so the seller can produce responsive records in the event it has hired a telemarketer overseas. Requiring sellers to ensure their telemarketers are abiding by the TSR's recordkeeping provisions and retain access to their telemarketer's records of telemarketing activities on the seller's behalf should not impose onerous obligations, and such access may never be necessary. Sellers likely already take such steps in the ordinary course of business, given that telemarketers are acting as their agents and their telemarketers' violations of the TSR could also expose them to liability under the TSR.

15. Authority To Require Recordkeeping

NFIB argues the new recordkeeping proposals exceed the FTC's statutory authority under the Telemarketing Act.[240] Section 6102(a) of the Telemarketing Act directs the Commission to: (1) prescribe rules prohibiting deceptive or abusive telemarketing acts or practices; [241] (2) include in those rules a definition of deceptive acts or abusive practices that shall include fraudulent charitable solicitations and may include actions that constitute assisting or facilitating such as credit card laundering; [242] and (3) include in those rules a specific list of abusive practices that govern patterns and timing of unsolicited calls, and disclosures of certain material information in sales or charity calls.[243] It also states at the end of Section 6102(a) that ''[i]n prescribing the rules described in this paragraph, the Commission shall also consider recordkeeping requirements.''

NFIB argues the directive to consider recordkeeping requirements applies only to the specific list of abusive practices under Section 6102(a)(3) and, since the other paragraphs are silent as to recordkeeping, the Act affirmatively prohibits the FTC from requiring recordkeeping.[244] The Commission does not agree. The language of the Act shows the directive to consider recordkeeping applies to the Act's mandate to promulgate rules addressing deceptive or abusive telemarketing practices and is not limited to the specific abusive practices identified in Section 6102(a)(3).

Section 6102(a) generally requires the Commission to promulgate rules regarding deceptive or abusive telemarketing acts or practices. Section 6102(a)(1) states: ''[t]he Commission *shall prescribe rules* prohibiting deceptive telemarketing acts or practices and other abusive telemarketing acts or practices.'' [245] Sections 6102(a)(2) and (a)(3) then identify specific provisions that Congress instructs the Commission to include, or consider including, when it promulgates its rules under Section 6102(a)(1). Section 6102(a)(2) directs the Commission to ''*include in such rules* respecting deceptive telemarketing acts or practices'' a definition of deceptive telemarketing acts or practices, which may include, among other things, credit card laundering.[246] Section 6102(a)(3) directs the Commission to ''*include in such rules* respecting other abusive telemarketing acts or practices'' specific requirements including: (1) ''a *requirement* that telemarketers may not undertake a pattern of unsolicited telephone calls which the reasonable consumer would consider coercive or abusive of such consumer's right to privacy''; (2) ''*restrictions* on the hours of the day and night when unsolicited telephone calls can be made to consumers''; (3) ''a *requirement* that any person engaged in telemarketing for the sale of goods or services'' make certain disclosures; and (4) ''a *requirement* that any person engaged in telemarketing for the solicitation of charitable contributions'' make certain disclosures.[247] At the end of Section 6102(a)(3), in a separate unnumbered sentence, the Act states ''[i]n *prescribing the rules* described in this paragraph, the Commission shall also consider recordkeeping requirements.'' [248] Thus, Congress directed the Commission to promulgate rules prohibiting deceptive or abusive telemarketing acts or practices under Section 6102(a)(1), and Sections 6102(a)(2) and (a)(3) merely inform what types of acts or practices the Commission should include, or consider including, when it promulgates those rules.[249]

Continued

NFIB's interpretation of Section 6102(a)(3) improperly divorces that provision from the rest of the statute. As discussed, Section 6102(a)(3) contains Congress's specific guidance regarding the types of rules the Commission must adopt or consider adopting to implement Section 6102(a)(1)'s general grant of authority to ban deceptive or abusive telemarketing practices. Section 6102(a)(3) states when the Commission ''prescrib[es] the rules described'' by Congress, it ''shall also consider recordkeeping requirements.'' This provision thus authorizes the Commission to adopt—or not adopt—recordkeeping requirements and declare violations of such requirements to be an abusive telemarketing practice.

But even if Section 6102(a)(3) did not expressly authorize the Commission to consider recordkeeping requirements, the Commission may still require recordkeeping under Section 6102(a)(1). Congress's purpose in enacting the Telemarketing Act was to prevent deceptive or abusive telemarketing acts or practices.[250] As the Commission has noted over the years, recordkeeping provisions prevent deceptive or abusive telemarketing acts or practices because they are necessary to effectively enforce the TSR.[251] NFIB's assertion that ''the rules for recordkeeping do not prevent or address deceptive or other abusive telemarketing acts or practices'' is not an accurate assertion [252] and it is undermined by the Commission's law enforcement experience and that of other enforcers.[253]

Even if Section 6102(a)(1) could be read as being silent on recordkeeping, that would not prohibit the Commission from including recordkeeping in any rules the Commission promulgates under this section of the Act. Rather, Congress directed the Commission to prescribe rules prohibiting deceptive telemarketing acts or practices and the Commission is granted authority to issue rules, including recordkeeping provisions, for any deceptive or abusive telemarketing acts or practices it identifies in promulgating the TSR.[254] Congress's silence would make sense given the Commission had yet to identify these deceptive or abusive acts or practices in the TSR at the time the Telemarketing Act was passed, and it was unknown whether and what form of recordkeeping would be necessary to ensure compliance.[255] Interpreting the Telemarketing Act to prohibit the Commission from requiring recordkeeping would contradict the Act's stated purpose—to ''enact legislation that will offer consumers necessary protection from telemarketing deception and abuse.'' [256]

Nothing in the text of the Act prevents the Commission from requiring persons to keep records substantiating their compliance with any requirement of the TSR. Nor does NFIB explain why Congress would have intended to deprive the Commission of records essential to the enforcement of the rule. NFIB's interpretation would give telemarketers and sellers a perverse incentive to commit deceptive and abusive practices while destroying any record of those violations.

Finally, even if a court determines the Act only permits recordkeeping for rules that address the specific acts and practices listed in Section 6102(a)(3), the TSR's recordkeeping provisions meet those criteria. The Final Rule requires recordkeeping for eleven general categories of information: (1) advertisements, including telemarketing scripts and robocall recordings; (2) call detail records; (3) prize recipients; (4) customers; (5) customer information to establish a business relationship; (6) previous donors; (7) telemarketers' employees; (8) consent; (9) service providers; (10) entity-specific DNC; and (11) versions of the FTC's DNC. Each of these categories is necessary to ensure compliance with the provisions of the TSR the Commission promulgated to address the specifics acts or practices identified in Section 6102(a)(3).

For example, Section 6102(a)(3)(A) of the Act requires the FTC to prohibit ''a pattern of unsolicited telephone calls which the reasonable consumer would consider coercive or abusive of such consumer's right to privacy.'' [257] Accordingly, the Commission promulgated Section 310.4(b) of the TSR to prohibit certain ''patterns of calls,'' [258] including prohibitions against robocalls, calls to consumers who have asked a specific seller to stop calling, and calls to consumers who have registered their phone numbers on the FTC's DNC Registry.[259] As explained in more detail in Section II—Overview of the Proposed Amendments to the TSR above, the Commission needs all eleven categories of information set forth in the Final Rule, including the requirement that sellers and telemarketers retain call detail records to ensure compliance with these prohibitions.[260]

Similarly, Section 6102(a)(3)(B) of the Act requires the FTC to place restrictions on when telemarketers can make unsolicited calls, while Sections 6102(a)(3)(C) and (D) require the FTC to mandate certain disclosures. The FTC promulgated Section 310.4(c) of the TSR

''In prescribing the rules described in this paragraph, the Commission shall consider recordkeeping requirements'' with Section 6102(a) rather than with Section 6102(a)(3). As such, it supports the Commission's position that the directive to consider recordkeeping refers generally to Section 6102(a) and is not limited to the specific acts and practices listed in Section 6102(a)(3). *See, e.g., https://www.govinfo.gov/content/pkg/USCODE-2011-title15/pdf/USCODE-2011-title15-chap87.pdf* (last visited November 21, 2023).

[253] *See, e.g.,* NAAG 34–20 at 3–10.

[254] *See. e.g., U.S. Sugar Corp.* v. *EPA,* 830 F.3d 579, 617–18 (D.C. Cir. 2016) (upholding EPA's authority to require recordkeeping in regulating even though Congress was silent on that issue because ''Congress plainly intended EPA to regulate sources burning 'any' solid waste, a goal presumably advanced by the recordkeeping presumption'').

[255] Congress has amended the Telemarketing Act numerous times over the years but made no changes to the recordkeeping provision. *See, e.g., supra* note 13. Given that the TSR has always included recordkeeping requirements since its inception in 1995 and the FTC has reported to Congress on its rulemaking efforts at various congressional hearings, Congress's silence on this issue can be interpreted as agreement with the FTC's statutory construction. *See, e.g., Washington All. of Tech. Workers* v. *U.S. Dep't of Homeland Sec.,* 50 F.4th 164, 182 (D.C. Cir. 2022) (quoting *Jackson* v. *Modly,* 949 F.3d 763, 772–73 (D.C. Cir. 2020)).

[256] 15 U.S.C. 6101(5). The Commission's position is also supported by the legislative history, which demonstrates that Congress intended for the Commission to consider recordkeeping requirements more broadly. *See* Senate Report at 7. The Senate Report references Section 3(a)(5) in an earlier version of the Act that directed the Commission to ''prescribe rules regarding telemarketing activities'' and in prescribing those rules to ''consider the inclusion of . . . (5) recordkeeping requirements.'' Telemarketing and Consumer Fraud and Abuse Prevention Act, S. 568, 103rd Cong. (1993). At minimum, this legislative history supports the position that the Commission may require recordkeeping for all abusive telemarketing acts or practices it identifies in promulgating the TSR and is not limited to those specific acts or practices listed in Section 6103(a)(3).

to prohibit calls to a person's residence outside of certain hours and Sections 310.4(d) and (e) to require telemarketers to disclose the identity of the seller or charity, the purpose of the call, the nature of the good or service being sold, and that no purchase is required to win a prize or participate in a prize promotion. The TSR's existing and amended recordkeeping requirements are necessary to ensure compliance with these provisions of the TSR. For example, call detail records are needed to ensure telemarketers abide by the call time restrictions, while the requirements to retain records of advertisements, telemarketing scripts, robocalls, consent, customers, prize recipients, and call details regarding the content of the call are required to determine whether a telemarketer has made the necessary disclosures.

B. Modification of the B2B Exemption

The 2022 NPRM proposed narrowing the B2B exemption to require B2B telemarketing calls to comply with Section 310.3(a)(2)'s prohibition on misrepresentations and Section 310.3(a)(4)'s prohibition on false or misleading statements.[261] The Commission received twelve comments on this proposal.[262] Rapid Financial Services, LLC and Small Business Financial Solutions, LLC (collectively, ''Rapid Finance''), EPIC, NAAG, USTelecom—The Broadband Association (''USTelecom''), WPF, and three anonymous commenters all support the proposal.[263] EPIC strongly supports the proposal, stating ''there is no reason to believe that phone-based attempts to exploit small business victims have diminished since the pandemic began.'' [264] NAAG states ''misrepresentations and false or misleading statements, in any form, are harmful to trade and commerce in general.'' [265] WPF argues ''there is no downside to this particular update—the FTC Act already prohibits such activity.'' [266] The anonymous commenters expressed concern over the harm that businesses suffer from deceptive telemarketing.[267]

USTelecom highlights small and medium-sized businesses (''SMBs''), in particular, ''can be disproportionately impacted by malicious B2B telemarketers'' and scammers primarily use phones as the primary means of contacting SMBs.[268] USTelecom also argues bad actors hide behind the B2B exemption and other legal ambiguities to avoid accountability, citing to a particularly pernicious example of a high-volume B2B telemarketing robocall campaign purporting to sell services that help SMBs boost their companies' Google listing that tied up the business's phone lines.[269]

Rapid Finance states, as a general matter, it ''does not oppose, and indeed supports the application of the TSR to B2B calls to prohibit material misrepresentations and false or misleading statements in B2B telemarketing transactions, including prohibiting the specific misrepresentations listed in Section 310.3(a)(2).'' [270] Rapid Finance explains its business customers are ''often the target of telemarketers seeking to peddle so-called debt settlement services to them.'' [271]

NFIB, Revenue Based Finance Coalition (''RBFC''), Third Party Payment Processors Association (''TPPPA''), and PACE all object to this proposed amendment.[272] RBFC argues amending the TSR to apply to deceptive B2B telemarketing would ''undermine the Supreme Court's interpretation of the FTC's authority to impose penalties,'' [273] citing *AMG Capital Management, LLC* v. *FTC.*[274] RBFC's arguments are inapposite because the Supreme Court's decision in *AMG* concerned the FTC's authority to obtain consumer redress under Section 13(b) of the FTC Act; [275] the decision did not address or implicate the Commission's authority to promulgate rules under the Telemarketing Act.

PACE and NFIB argue applying the TSR to B2B telemarketing exceeds the scope of the FTC's authority under the Telemarketing Act.[276] They claim the Telemarketing Act is limited to consumer harm because of its ''consistent use of consumer-oriented language'' and the focus on consumer harm in the statutory text and legislative history. [277] PACE also argues the Telemarketing Act's directive for the Commission to identify deceptive telemarketing practices is also limited to consumer harm, because the Commission itself has historically conceptualized deception from a consumer perspective in its policy statements.[278]

The Commission disagrees. The Telemarketing Act directs the FTC to promulgate a rule that addresses deceptive and abusive telemarketing practices which, in the Commission's law enforcement experience, includes B2B telemarketing. The language of the Act supports the Commission's position.

First, the Act defines ''telemarketing,'' as ''a plan, program, or campaign which is conducted to induce purchases of goods or services . . ., by use of one or more telephones and which involves more than one interstate telephone call.'' [279] The Act exempts from the definition of telemarketing ''the solicitation of sales through the mailing of a catalog'' which meet certain criteria and ''where the person making the solicitation does not solicit *customers* by telephone but only receives calls initiated by *customers* in response to the catalog during those calls. . . .'' [280] The Act only specifies that ''telemarketing'' must involve the use of one interstate telephone call but does not identify who must participate in the call. To the extent it identifies any participant, it uses the term *customers,* which includes businesses.[281]

Second, Section 6102(a)(1) directs the Commission to ''prescribe rules

[261] 2022 NPRM, 87 FR at 33687.

[262] The Commission received an additional ten comments addressing whether the Commission should generally repeal the B2B exemption in its entirety. The Commission addresses those comments in the 2024 NPRM, issued this same day.

[263] Anonymous 34–11, 33–11, and 33–13; EPIC 34–23 at 17; NAAG 34–20 at 10; Rapid Finance 34–17 at 3; USTelecom 33–14 at 3–4; WPF 34–21 at 4.

[275] 15 U.S.C. 53(b).

[276] NFIB 33–4 at 11; PACE 33–15 at 7–9.

[277] PACE 33–15 at 8; *see also* NFIB 33–4 at 11 (arguing all five findings in the Telemarketing Act reference consumer harm and not harm to businesses).

[278] PACE 33–15 at 7–9. NFIB raises separate objections to repealing the B2B exemption based on changing market forces described in the Commission's 2022 ANPR. NFIB 33–4 at 9–10. As explained in the 2024 NPRM that the Commission is issuing concurrently with this Final Rule, the Commission declined to move forward with narrowing the B2B exemption as proposed in the 2022 ANPR. As such, the Commission will not address NFIB's argument here since it is not applicable in requiring B2B telemarketing to comply with the TSR's misrepresentation provisions.

[279] 15 U.S.C. 6106(4).

[280] 15 U.S.C. 6106(4) (emphasis added).

[281] *See, e.g., Customer,* Merriam-Webster Dictionary, *available at https://www.merriam-webster.com/dictionary/customer* (last visited Feb. 1, 2024) (defining customer as ''one that purchases a commodity or service'').

prohibiting deceptive telemarketing acts or practices and other abusive telemarketing acts or practices.'' [282] Section 6102(a)(2) directs the Commission to include in its rules ''a definition of deceptive telemarketing acts or practices which shall include fraudulent charitable solicitations, and which may include acts or practices of entities or individuals that assist or facilitate deceptive telemarketing, including credit card laundering.'' [283] Congress used broad language, similar to the language of the FTC Act, in directing the FTC to promulgate a rule. The Act does not limit the scope of the rule promulgated under the Act to telemarketing that harms natural persons. Nor does the Act prohibit applying the rule to telemarketing that harms businesses or other organizations.

Third, Sections 6102(a)(3)(C) and (D) direct the Commission to require ''any person engaged in telemarketing'' to ''promptly and clearly disclose to the *person* receiving the call the purpose of the call is to'' sell a good or service or solicit a charitable solicitation.[284] Once again, Congress did not specify that the disclosure must be made to a natural person rather than a business. It simply specified that the disclosure be made to the person who received the call.

Although PACE and NFIB argue the Commission's authority is limited to addressing deceptive or abusive telemarketing practices that harm natural persons because of the Act's liberal use of the term ''consumer,'' [285] none of the Act's provisions described above uses the word ''consumer.'' Moreover, the Act never defines the term ''consumer.'' Given the Act's broad language, the most logical reading of the term ''consumer'' is that it encompasses *all*—including businesses—who consume a product or service.

The absence of a definition is notable when Congress *has* defined ''consumer'' in other contexts, such as when it enacted the Magnuson-Moss Warranty—Federal Trade Commission Improvement Act in 1975 (''Magnuson-Moss'').[286] Under Title I of Magnuson-Moss, which extended the Commission's jurisdiction over consumer product warranties, Congress narrowly defined ''consumer'' to mean a buyer of any ''consumer product'' which is ''normally used for personal, family, or household purposes.'' [287] Congress also clarified that the narrow definition of consumer was limited to Title I of the Magnuson-Moss Act and did not apply to Title II, which among other things, codified the FTC's ability to seek consumer redress by filing civil actions in Federal court.[288] Under Title II, Congress stated the term ''consumer'' in the FTC Act should still be construed broadly without the limitations imposed in section 101(3) of title I of S. 356.[289] Here, no such definition exists. If Congress had intended to limit the scope of the Telemarketing Act to those acts and practices directed at individuals rather than businesses, it would have done so.

The Commission's position is also supported by the legislative history. A Senate Report on the Act explained that, in directing the Commission to define ''fraudulent telemarketing acts or practices'' in its rulemaking, that Congress intended the rule ''to encompass the types of unlawful activities that are currently being addressed by the both the FTC and the States in their telemarketing cases.'' [290] The Report also stated Congress intends the ''rule to be flexible enough to encompass the changing nature of [fraudulent telemarketing] activity while at the same time providing telemarketers with guidance as to the general nature of prohibited conduct.'' [291] At the time the Telemarketing Act was passed, the Commission's law enforcement experience included cases against deceptive B2B telemarketing.[292] In promulgating the original TSR, the Commission considered exempting all B2B telemarketing but stated, given its ''extensive enforcement experience pertaining to deceptive telemarketing directed to businesses,'' it did not believe ''an across-the-board exemption for business-to-business contacts is appropriate.'' [293] Instead, the original TSR excluded from the B2B exemption telemarketing schemes that sell nondurable office or cleaning supplies because, in the Commission's law enforcement experience, these B2B schemes ''have been by far the most significant business-to-business problem area [that] such telemarketing falls within the Commission's definition of deceptive telemarketing acts or practices.'' [294] The Commission also stated it would reconsider the scope of the B2B exemption ''if additional business-to-business telemarketing activities become problems after the Final Rule has been in effect.'' [295] Each time the Commission has considered applying the TSR to other B2B telemarketing, it has done so based on its law enforcement experience in keeping with Congress's directive.[296]

But even if the term ''consumer'' is construed more narrowly to exclude businesses, the Act's language still supports the Commission's position that the Act allows it to regulate B2B telemarketing. First, one of the Act's findings states ''[c]onsumers and *others* are estimated to lose $40 billion a year in telemarketing fraud.'' [297] The legislative history makes clear Congress was concerned about telemarketing fraud against small businesses.[298] Second, the Act uses broad language in the definition of telemarketing, in its directives to promulgate rules regarding deceptive or abusive telemarketing under Section 6102(a)(1), and in its directives of what to include in those rules under Sections 6102(a)(2), (a)(3)(C), and (a)(3)(D). These provisions do not contain any reference to a ''consumer.'' [299] If Congress intended to construe consumer narrowly, Congress's *omission* of the term consumer from

[282] 15 U.S.C. 6102(a)(1).

[283] 15 U.S.C. 6102(a)(2).

[294] *Id.*

[295] *Id.* at 43862.

[296] 2022 NPRM, 87 FR at 33682–83. Although the Commission's law enforcement efforts have primarily focused on harms to small businesses, the Commission believes that the Telemarketing Act authorizes the Commission to apply the TSR to B2B telemarketing more broadly for the reasons stated here. Similar to the recordkeeping provision, the Commission notes that Congress has amended the Telemarketing Act numerous times but made no changes to prohibit the TSR's application to some B2B telemarketing. Congress's silence here can also be interpreted as agreement with the FTC's statutory construction. *See supra* note 255.

[297] 15 U.S.C. 6101(3) (emphasis added).

[298] The legislative history supports the Commission's position that, even assuming a narrower definition of consumer, the Telemarketing Act allows the Commission to regulate B2B telemarketing. The Senate Report on the Act explains that telemarketing fraud ''affects a cross section of Americans, including small business.'' Senate Report at 2.

[299] 15 U.S.C. 6102(a) and 6106(4).

these provisions of the Act demonstrates Congress did not intend to limit the TSR to telemarketing that harms only individual consumers.

Finally, RBFC and TPPPA make general objections that prohibiting misrepresentations in B2B telemarketing is unnecessary; that it would ''unduly burden legitimate business activities''; [300] and would not provide small businesses any additional protections when the FTC has authority already to pursue bad actors that harm businesses under the FTC Act.[301] RBFC also argues if the Commission were to prohibit misrepresentations in B2B telemarketing, it should only do so in the areas where there is a history of deception such as the top five scams identified in the Better Business Bureau's research report issued in 2018.[302]

The Commission is not persuaded by these arguments. The Commission notes that requiring B2B telemarketers to comply with the TSR's prohibitions against misrepresentations would provide the Commission with additional tools to obtain monetary redress for those harmed by illegal telemarketing and civil penalties against bad actors who violate the law, creating a deterrent effect. Importantly, the proposed amendment refrains from imposing any burdens on B2B sellers and telemarketers, including recordkeeping requirements. And, as commenters have noted, because businesses must already comply with the FTC Act, which prohibits deceptive or unfair conduct, complying with the TSR should not create significant burden.[303] The Commission also does not believe it should limit the prohibition against misrepresentations to just the five top scams identified in the BBB's 2018 report. The Commission has monitored deceptive telemarketing impacting small businesses since 1995 and has observed not only the increase in deceptive telemarketing but how easily scammers shift tactics and peddle different products or services to small businesses.[304] Given the Commission's extensive law enforcement experience in B2B telemarketing cases—including schemes involving deceptive business directory listings, web hosting or design, search engine optimization services, and government impersonators [305]—the Commission believes applying the TSR's prohibitions against misrepresentations in Section 310.3(a)(2) and 310.3(a)(4) is appropriate.

C. New Definition of ''Previous Donor''

The 2022 NPRM proposed adding a new definition for the term ''previous donor'' to identify consumers who have donated to a particular charity within the two-year period immediately preceding the date the consumer receives a robocall on behalf of that charity.[306] The Commission proposed including this new definition to make clear that telemarketers are allowed to place charity robocalls only to consumers who have previously donated to that charity within the last two years.[307]

The Commission received three comments on the new definition. WPF supports the new definition, stating it would ''clarify the exemption for charitable donations'' and ''effectively close what has been a fairly significant loophole.'' [308] EPIC also supports the new definition and the clarification that the robocall exemption only applies to consumers who have previously donated to the soliciting charity, but it also urges the Commission to emphasize the limited scope of this exemption from the general prohibition against robocalls.[309] One anonymous commenter objected to this new definition, arguing there should not be an exemption to place robocalls to prior donors in the first place.[310]

The Commission emphasizes the exemption to allow a telemarketer to place charity robocalls is narrow in scope and amending the TSR to add a new definition of ''previous donor'' will ensure the exemption remains narrow. The Commission understands some consumers do not want to receive any robocalls, including from charities they have supported through a donation. In such cases, the Commission notes that a consumer who does not want to receive such robocalls may request to be added to that charity's do-not-call list. If the consumer has done so, the exemption to place robocalls does not apply and it is a violation of the TSR for a telemarketer to place robocalls to the consumer on behalf of that charity.[311]

D. Corrections to the Rule

In the 2022 NPRM, the Commission proposed the following five corrections to the Rule:

- In all instances where Sections 310.6(b)(1), (b)(2), and (b)(3) cross-reference Sections 310.4(a)(1), (a)(7), (b), and (c), change these citations so that they cross-reference Sections 310.4(a)(1), (a)(8), (b), and (c).
- Modifying the time requirements in the definition of EBR from months to days as follows:
  - Changing the time requirement to qualify for EBR in Section 310.2(q)(1) from 18 months between the date of the telephone call and financial transaction to 540 days.
  - Changing the time requirement to qualify for EBR in Section 310.2(q)(2) from three months between the date of the telephone call and the date of the consumer's inquiry or application to 90 days.
- Adding an email address to Section 310.7 for State officials or private litigants to provide notice to the Commission that they intend to bring an action under the Telemarketing Act.
- Amending Section 310.5(a)(7) so it is consistent in form with the new proposed additions to Section 310.5(a).
- Amending Section 310.5(f) to remove an extraneous word.[312]

The Commission did not receive any comments on the proposed modifications and will implement the amendments as proposed.

The Commission will also make the following additional non-substantive modifications to the Rule:

- Change all references in the TSR from ''this Rule'' to ''this part.''
- Renumber the footnotes in the TSR so the first footnote starts at one.

Finally, as described in Section III.B—Modification of the B2B Exemption, some commenters did not understand the term ''consumer'' includes businesses. To address any confusion, the Commission will change references to ''consumer'' in the amendments of the recordkeeping requirements and definition of EBR to the defined term ''person.'' [313] The Commission will also modify the references to ''consumer'' and ''business'' in the new recordkeeping requirement to retain call

[300] TPPPA 34–14 at 2.

[301] RBFC 34–13 at 2–3.

[302] RBFC 34–13 at 3; *see also* Better Business Bureau, Scams and Your Small Business Research Report, at 7–8 (2018), *available at https://www.bbb.org/content/dam/bbb-institute-(bbbi)/files-to-save/bbb_smallbizscamsreport-final-06-18.pdf* (last visited Dec. 11, 2023). RBFC argues that any application of the TSR should be limited to the BBB's top five scams impacting small businesses including: ''(1) bank/credit card company imposters, (2) directory listing and advertising services; (3) fake invoice/supplier bills; (4) fake checks; and (5) tech support scams.'' RBFC 34–13 at 3.

[313] 310 CFR 310.2(y).

detail records in Section 310.5(a)(2)(iv) to ''individual consumer'' and ''business consumer.'' While these modifications do not substantively alter the scope or application of the TSR, the Commission believes they will resolve any remaining uncertainty.

IV. Paperwork Reduction Act

The current Rule contains various provisions that constitute information collection requirements as defined by 5 CFR 1320.3(c), the definitional provision within the Office of Management and Budget (''OMB'') regulations implementing the Paperwork Reduction Act (PRA). 44 U.S.C. chapter 35. OMB has approved the Rule's existing information collection requirements through October 31, 2025.[314] The 2022 NPRM's proposed amendments made changes in the Rule's recordkeeping requirements that increased the PRA burden as detailed below.[315] Accordingly, FTC staff submitted the 2022 NPRM and the associated Supporting Statement to OMB for review under the PRA.[316] On June 16, 2022, OMB directed the FTC to resubmit its request when the proposed rule is finalized.[317]

None of the public comments submitted addressed the estimated PRA burden included in the 2022 NPRM, but some commenters did raise general burden concerns.[318] Other commenters concurred that sellers and telemarketers likely retained the required records in the ordinary course of business and that the cost of electronic storage is decreasing.[319] The Commission's responses to those concerns are set forth in more detail in Section III—Final Amended Rule, and in some instances the Commission made modifications to the proposed rule to address the concerns and reduce the estimated PRA burden.

The Final Rule contains new recordkeeping requirements and modifications to existing recordkeeping requirements. The new recordkeeping provisions require sellers or telemarketers to retain: (1) a copy of each unique prerecorded message; (2) call detail records of telemarketing campaigns; (3) records sufficient to show a seller has an established business relationship with a consumer; (4) records sufficient to show a consumer is a previous donor to a particular charitable organization; (5) records regarding the service providers that a telemarketer uses to deliver outbound calls; (6) records of a seller or charitable organization's entity-specific do-not-call registries; and (7) records of which version of the Commission's DNC Registry were used to ensure compliance with this Rule. The Final Rule modifies existing recordkeeping requirements by: (1) changing the time-period for retaining records from two years to five years;[320] (2) clarifying the records necessary for sellers or telemarketers to demonstrate that the person it is calling has consented to receive the call; and (3) specifying the format for records that include phone numbers, time, or call duration.

As explained above and in the 2022 NPRM,[321] the Commission believes that for the most part, sellers and telemarketers already generate and retain these records either because the TSR already requires it or because they already do so in the ordinary course of business. For example, to comply with the TSR, sellers and telemarketers must already have a reliable method to identify whether they have a previous business relationship with a customer or whether the customer is a prior donor. They must also access the DNC Registry and maintain an entity-specific DNC registry. Moreover, sellers and telemarketers are also likely to keep records about their existing customers or donors and service providers in the ordinary course of business. The Final Rule now further requires telemarketers and sellers to keep call detail records of their telemarketing campaigns. Specifically, it requires sellers and telemarketers to keep call detail records of their telemarketing campaigns because in the Commission's experience, sellers and telemarketers use technologies that can easily generate these records. If a seller or telemarketer does not use such technology, however, and an individual telemarketer must manually enter a single telephone number to initiate a call to that number, then the seller or telemarketer does not need to retain records of the calling number, called number, date, time, duration and disposition of the telemarketing call under Sections 310.5(a)(2)(vii) and (x) of the Final Rule for those calls. The Commission made this modification to reduce the anticipated PRA burden for those sellers and telemarketers who manually place telemarketing calls. However, as a matter of caution, the Commission estimates the anticipated PRA burden will stay roughly the same as what was projected in 2022 NPRM, because that estimate was largely based on the use of automated mechanisms. Further, the Commission's enforcement of the Rule and review of the comments shows few sellers and telemarketers manually place telemarketing calls.[322] Thus, the anticipated PRA burden could be significantly lower than the estimates set out below.

A. Estimated Annual Hours Burden

The Commission estimates the PRA burden of the Final Rule based on its knowledge of the telemarketing industry and data compiled from the Do Not Call Registry. In calendar year 2022, 10,804 telemarketing entities accessed the Do Not Call Registry; however, 549 were exempt entities obtaining access to data.[323] Of the non-exempt entities, 6,562 obtained data for a single State. Staff assumes these 6,562 entities are operating solely intrastate, and thus would not be subject to the TSR. Therefore, Staff estimates approximately 3,693 telemarketing entities (10,804—549 exempt—6,562 intrastate) are currently subject to the TSR. The Commission also estimates there will be 75 new entrants to the industry per year.

The Commission has previously estimated that complying with the TSR's current recordkeeping requirements requires 100 hours for new entrants to develop recordkeeping systems that comply with the TSR and 1 hour per year for established entities to file and store records after their systems are created, for a total annual

[314] OMB Control No: 3084–0097, ICR Reference No: 202208–3084–001, available at *https://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=202208-3084-001* (last visited Dec. 11, 2023).

[315] 2022 NPRM, 87 FR at 33690–91.

[316] This PRA analysis focuses only on the information collection requirements created by or otherwise affected by these now final rule amendments.

[317] See OMB Control No. 3084–0097, ICR Reference 202204–3084–004, Notice of Office of Management and Budget Action (June 16, 2022).

[318] *See, e.g.,* ECAC 34–22 at 3; NFIB 33–4 at 4–5; Sirius 34–18 at 7–8.

[319] *See, e.g.,* NAAG 34–20 at 9; PACE 33–15 at 2–5.

[320] As described above in Section II.A—Recordkeeping and in the 2022 NPRM, changing industry practice including increased spoofing of Caller ID information has made it more difficult to identify the telemarketers and sellers responsible for particular telemarketing campaigns and has hindered evidence gathering. As a result, two years is no longer always a sufficient amount of time for the Commission to fully complete its investigations of noncompliance and therefore the Commission is increasing the required retention period for recordkeeping under the Rule. Given the decreasing cost of data storage, the Commission does not believe that changing the length of time sellers and telemarketers are required to keep records will be unduly burdensome. 2022 NPRM, 87 FR at 33680–82, 33686.

[321] 2022 NPRM, 87 FR at 33690–91.

[322] *See, e.g.,* PACE 33–15 at 2.

[323] *See* National Do not Call Registry Data Book for Fiscal Year 2022 (''Data Book''), *available at https://www.ftc.gov/system/files/ftc_gov/pdf/DNC-Data-Book-2022.pdf* (last visited Dec. 11, 2023). An exempt entity is one that, although not subject to the TSR, voluntarily chooses to scrub its calling lists against the data in the Registry.

recordkeeping burden of 4,385 hours for established entities and 7,500 hours for new entrants who must develop required record systems.[324]

Because the Final Rule contains new recordkeeping requirements, the Commission anticipates that in the first year after the proposed amendments take effect, every entity subject to the TSR would need to ensure that their recordkeeping systems meet the new requirements. The Commission estimates this undertaking will take 50 hours. This includes 10 hours to verify the entities are maintaining the required records, and 40 hours to create and retain call detail records. This yields an additional one-time burden of 184,650 hours for established entities (50 hours × 3,693 covered entities).

For new entrants, the Commission estimates that the new requirements will increase their overall burden for establishing new recordkeeping systems by 50 hours per year. This yields a total added burden for new entrants of 3,750 hours (50 hours × 75 new entrants per year) in addition to what OMB has already approved.[325]

B. Estimated Annual Labor Costs

The Commission estimates annual labor costs by applying appropriate hourly wage rates to the burden hours described above. The Commission estimates that established entities will employ skilled computer support specialists to modify their recordkeeping systems. Applying a skilled labor rate of $30.97/hour [326] to the estimated 184,650 burden hours for established entities yields approximately $5,718,611 in one-time labor costs during the first year after the amendments take effect.

As described above, the Commission estimates that with the Final Rule new entrants will spend approximately 50 additional hours per year to establish new recordkeeping systems. Applying a skilled labor rate of $30.97/hour to the estimated 3,750 burden hours for new entrants, the Commission estimates that the annual labor costs for new entrants would be approximately $116,138.

C. Estimated Non-Annual Labor Costs

Staff previously estimated the non-labor costs to comply with the TSR's recordkeeping requirements were *de minimis* because most affected entities would maintain the required records in the ordinary course of business. Staff estimated that the recordkeeping requirements could require $50 per year in office supplies to comply with the Rule's recordkeeping requirements. Because the Final Rule requires retention of additional records, Staff estimates that these requirements will increase to $60 per year in office supplies on average for each of the 3,768 covered entities per year in office supplies. This equates to roughly $226,080 in total for all covered entities.

The new recordkeeping requirements also require entities to retain call detail records and audio recordings of prerecorded messages used in calls. Staff estimates the costs associated with preserving these records will also be *de minimis.* The Commission regularly obtains call detail records from voice providers when investigating potential TSR violations, and these records are kept in databases with small file sizes even when the database contains information about a substantial number of calls. For example, the Commission received a 2.9 gigabyte database that contained information about 56 million calls. The Commission also received a 1.2 gigabyte database that contained information about 5.5 million calls. Similarly, audio files of most prerecorded messages will not be very large because prerecorded messages are typically short in duration. Storing electronic data is very inexpensive. Electronic storage can cost $.74 per gigabyte for onsite storage including hardware, software, and personnel costs.[327] Commercial cloud-based storage options are less expensive and can cost around $.20 per gigabyte per year.[328] The Commission estimates the non-labor costs associated with electronically storing audio files of prerecorded messages and call detail records will cost around $5 a year on average for each of the 3,768 covered entities per year for electronic storage. This equates to roughly $18,840 in total for all covered entities.

V. Regulatory Flexibility Act

The Regulatory Flexibility Act (''RFA''), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996, requires that the Commission conduct an analysis of the anticipated economic impact of the proposed amendments on small entities.[329] The RFA requires that the Commission provide an Initial Regulatory Flexibility Analysis (''IRFA'') with a proposed rule and a Final Regulatory Flexibility Analysis (''FRFA'') with the Final Rule unless the Commission certifies that the rule will not have a significant economic impact on a substantial number of small entities.[330]

As discussed in the 2022 NPRM, the Commission did not believe the proposed amendment requiring additional recordkeeping would have a significant economic impact upon small entities, although it may affect a substantial number of small businesses.[331] In the Commission's view, the proposed amendment would not significantly increase the costs of small entities that are sellers or telemarketers because the proposed amendments primarily require these entities to retain records that they are already generating and preserving in the ordinary course of business. The Commission also did not believe that the proposed amendments requiring small entities that are sellers or telemarketers to comply with the TSR's prohibitions on misrepresentations should impose any additional costs. Therefore, based on available information, the Commission certified that amending the Rule as proposed would not have a significant economic impact on a substantial number of small entities, and provided notice of that certification to the Small Business Administration (''SBA'').[332]

Notwithstanding the certification, the Commission also published an IRFA in the 2022 NPRM and invited comment on the impact the proposed amendments would have on small entities covered by the Rule.[333] The Commission did not receive any comments that provided empirical information on the burden the proposed amendments would have on small entities, but some commenters raised

[333] *Id.*

general burden concerns, in particular with respect to the recordkeeping requirement that sellers and telemarketers retain call detail records.[334] As discussed in more detail in Section III—Final Amended Rule, the Commission does not believe the Final Rule would impose significant additional burden since the recordkeeping amendments primarily require small entities that are sellers and telemarketers to retain records that they would keep in the ordinary course of business. The Commission also amended the Final Rule so that entities that do not utilize certain technology are not required to retain certain call detail records, to reduce the burden imposed on those entities.[335] Finally, the FTC Act already requires sellers and telemarketers that are small entities to comply with the Final Rule's prohibition against misrepresentations in telemarketing. Thus, the Commission certifies that the Final Rule would not have a significant economic impact on a substantial number of small entities and provides notice of that certification to the Small Business Administration (''SBA'').[336] The Commission has nonetheless deemed it appropriate as a matter of discretion to provide this FRFA.

A. Statement of the Need for, and Objectives of, the Rule

The Final Rule requires telemarketers and sellers to maintain additional records regarding their telemarketing transactions. As described in the 2022 NPRM [337] and in Section II—Overview of the Proposed Amendments to the TSR, the Final Rule updates the TSR's existing recordkeeping requirements so that the requirements comport with the substantial amendments to the TSR since the recordkeeping requirements were first made. The requirements are also necessary in light of the technological advancements that have made it easier and cheaper for unscrupulous telemarketers to engage in illegal telemarketing. The Final Rule also requires B2B telemarketers to comply with the TSR's prohibition on misrepresentations. These amendments are necessary to help protect businesses from deceptive telemarketing practices. The Final Rule also amends the definition of ''previous donor'' to clarify that a seller or telemarketer may not use prerecorded messages to solicit charitable donations on behalf of a charitable organization unless the recipient of the call previously donated to that charitable organization within the last two years.

B. Issues Raised by Public Comments in Response to the IRFA

As stated above, the Commission did not receive any comments relating to the IRFA or that provided empirical information on the burden the proposed amendments would have on small entities, but some commenters raised general burden concerns. The Commission details these concerns and its responses in more detail in Section III—Final Amended Rule.

Commenters stated, in particular, that requiring retention of call detail records and each version of the DNC used for compliance would cause significant burden to businesses. Commenters also argued changing the time period to retain records from two years to five years would also impose additional burdens.

To address concerns regarding the burden of retaining call detail records, the Final Rule provides an exemption for calls made by an individual telemarketer who manually enters a single telephone number to initiate those calls. For such calls, the seller or telemarketer does not need to retain records of the calling number, called number, date, time, duration, and disposition of the call. This modification should address burden concerns raised for small businesses which do not employ software or other technology to automate their telemarketing activity and still use manual operations.

The Final Rule also provides a one hundred and eighty-day grace period from the date Section 310.5(a)(2)—which requires retention of call detail records—is published in the **Federal Register** so sellers and telemarketers can implement any new systems, software, or procedures necessary to comply with this new provision. This modification similarly should alleviate commenters' concerns regarding the time necessary to come into compliance.

The Final Rule also modifies the recordkeeping requirement regarding DNC compliance and now requires records of which version of the DNC rather than each version used for compliance, significantly reducing the burden associated with this requirement. With respect to the time period to retain records, the Commission does not believe changing the time period to retain records would impose a significant burden because many businesses already retain the necessary records in the ordinary course of business.

C. Estimated Number of Small Entities to Which the Final Rule Will Apply

The Final Rule affects sellers and telemarketers engaged in ''telemarketing,'' defined by the Rule to mean ''a plan, program, or campaign which is conducted to induce the purchase of goods or services or a charitable contribution, by use of one or more telephones and which involves more than one interstate telephone call.'' [338] As noted above, staff estimate 3,693 telemarketing entities are currently subject to the TSR, and approximately 75 new entrants enter the market per year. For telemarketers, a small business is defined by the SBA as one whose average annual receipts do not exceed $25.5 million.[339] Because virtually any business could be a seller under the TSR, it is not possible to identify average annual receipts that would make a seller a small business as defined by the SBA. Commission staff are unable to determine a precise estimate of how many sellers or telemarketers constitute small entities as defined by SBA. The Commission sought comment on this issue but did not receive any information from commenters.

D. Projected Reporting, Recordkeeping, and Other Compliance Requirements, Including Classes of Small Entities and Professional Skills Needed To Comply

The Final Rule contains new recordkeeping requirements and modifications to existing recordkeeping requirements. The new recordkeeping requirements would require sellers or telemarketers to retain: (1) a copy of each unique prerecorded message; (2) call detail records of telemarketing campaigns; (3) records sufficient to show a seller has an established business relationship with a consumer; (4) records sufficient to show a consumer is a previous donor to a particular charitable organization; (5) records regarding the service providers that a telemarketer uses to deliver outbound calls; (6) records of a seller or charitable organization's entity-specific

[334] *See, e.g.,* NFIB 33–4 at 4–5; PACE 33–15 at 2.

[335] *Supra* Section III.A.2 (Call Detail Records).

[336] 5 U.S.C. 605(b).

[337] 2022 NPRM, 87 FR at 33678–84.

[338] 16 CFR 310.2(dd). The Commission notes that, as mandated by the Telemarketing Act, the interstate telephone call requirement in the definition excludes small business sellers and the telemarketers which serve them in their local market area, but may not exclude some small business sellers and telemarketers in multi-state metropolitan markets, such as Washington, DC.

[339] Telemarketers are typically classified as ''Telemarketing Bureaus and Other contact Centers,'' (NAICS Code 561422). *See* Table of Small Business Size Standards Matched to North American Industry Classification System Codes, *available at https://www.sba.gov/sites/sbagov/files/2023-06/Table%20of%20Size%20Standards_Effective%20March%2017%2C%202023%20%282%29.pdf* (last visited October 24, 2023).

do-not-call registries; and (7) records of which version of the Commission's DNC Registry that were used to ensure compliance with this Rule. The proposed modifications to the existing recordkeeping requirements would: (1) change the time period for retaining records from two years to five years; (2) clarify the records necessary for sellers or telemarketers to demonstrate that the person they are calling has consented to receive the call; and (3) specify the format for records that include phone numbers, time, or call duration. The small entities potentially covered by the proposed amendment will include all such entities subject to the Rule. The Commission has described the skills necessary to comply with these recordkeeping requirements in Section IV—Paperwork Reduction Act above.

E. Identification of Duplicative, Overlapping, or Conflicting Federal Rules

The Telephone Consumer Protection Act of 1991, 47 U.S.C. 227, and its implementing regulations, 47 CFR 64.1200 (collectively, ''TCPA'') contain recordkeeping requirements that may overlap with the recordkeeping requirements proposed by the new rule. For example, the proposed provision requiring sellers or telemarketers to keep a record of consumers who state they do not wish to receive any outbound calls made on behalf of a seller or telemarketer, 16 CFR 310.5(a)(10), overlaps to some degree with the TCPA's prohibition on a person or entity initiating a call for telemarketing unless such person or entity has procedures for maintaining lists of persons who request not to receive telemarketing calls including a requirement to record the request. The Final Rule's recordkeeping requirements do not conflict with the TCPA's recordkeeping requirements because sellers and telemarketers can comply with both sets of requirements simultaneously. Moreover, in the Commission's experience, the recordkeeping requirements under the TCPA do not lessen the need for the more robust recordkeeping requirements the Commission is proposing to further its law enforcement efforts. The Commission invited comment and information regarding any potentially duplicative, overlapping, or conflicting Federal statutes, rules, or policies and received one comment about a potential conflict.

OCUL argues the Commission cannot proceed with the proposed amendments until the Federal Communications Commission (''FCC'') has clarified whether it will allow the establishment of a new code that will inform the telemarketer placing the call why its call was blocked.[340] OCUL argues that this would lead to telemarketers and sellers being unable to keep complete or accurate records, subjecting them to violations, if they do not know why a call was blocked.[341] The Commission does not see a conflict between the FCC's ongoing rulemaking and the proposed amendments in the 2022 NPRM. The Final Rule does not require the telemarketer or seller to retain records detailing why a call was blocked. Simply stating that a call was blocked as a record of the disposition of the call will suffice.

F. Description of Steps Taken To Minimize Significant Economic Impact, if any, on Small Entities, Including Alternatives

The Commission has not proposed any specific small entity exemption or other significant alternatives to the proposed rule. The Commission has made every effort to avoid imposing unduly burdensome requirements on sellers and telemarketers by limiting the recordkeeping requirements to records that are both necessary for the Commission's law enforcement and typically already kept in the ordinary course of business. As detailed above in Sections III—Final Amended Rule and IV—Paperwork Reduction Act, the Commission has made additional modifications to the proposed amendments to further reduce the burden on small entities of complying with the Final Rule. These modifications include exempting sellers or telemarketers from retaining some call detail records for calls that are manually placed, and requiring sellers and telemarketers to retain records of which version of the FTC's DNC Registry they used rather than each version used for compliance.

VI. Incorporation by Reference

Consistent with 5 U.S.C. 552(a) and 1 CFR part 51, the Final Rule incorporates the specifications of the following standard issued by the International Telecommunications Union: ITU–T E.164: Series E: Overall Network Operation, Telephone Service, Service Operation and Human Factors (published 11/2010). The E.164 standard establishes a common framework for how international telephone numbers should be arranged so that calls can be routed across telephone networks. Countries use this standard to establish their own international telephone number formats and ensure that those numbers have the information necessary to route telephone calls successfully between countries.

This ITU standard is reasonably available to interested parties. The ITU provides free online public access to view read-only copies of the standard. The ITU website address for access to the standard is: *https://www.itu.int/en/pages/default.aspx.*

VII. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), the Office of Information and Regulatory Affairs designated these rule amendments as not a ''major rule,'' as defined by 5 U.S.C. 804(2).

List of Subjects in 16 CFR Part 310

Advertising; Consumer protection; Incorporation by reference; Reporting and recordkeeping requirements; Telephone; Trade practices.

For the reasons discussed in the preamble, the Federal Trade Commission amends title 16 of the Code of Federal Regulations, part 310, as follows:

PART 310—TELEMARKETING SALES RULE

■ 1. The authority for part 310 continues to read as follows:

Authority: 15 U.S.C. 6101–6108.

■ 2. In § 310.2,
■ a. Revise paragraph (q);
■ b. Redesignate paragraphs (aa) through (hh) as (bb) through (ii);
■ c. Add a new paragraph (aa).

The revisions and addition read as follows:

§ 310.2 Definitions.

* * * * *

(q) *Established business relationship* means a relationship between a seller and a person based on:

(1) The person's purchase, rental, or lease of the seller's goods or services or a financial transaction between the person and seller, within the 540 days immediately preceding the date of a telemarketing call; or

(2) The person's inquiry or application regarding a good or service offered by the seller, within the 90 days immediately preceding the date of a telemarketing call.

* * * * *

(aa) *Previous donor* means any person who has made a charitable contribution to a particular charitable organization within the 2-year period immediately preceding the date of the telemarketing

[340] OCUL 34–19 at 3.

[341] *Id.*

call soliciting on behalf of that charitable organization.

* * * * *

§ 310.3 [Amended]

■ 3. In § 310.3, redesignate footnotes 659 through 663 as footnotes 1 through 5.

■ 4. In § 310.4, revise paragraph (b)(2) and redesignate footnotes 664 through 666 as footnotes 1 through 3 to read as follows:

§ 310.4 Abusive telemarketing acts or practices.

* * * * *

(b) * * *

(2) It is an abusive telemarketing act or practice and a violation of this part for any person to sell, rent, lease, purchase, or use any list established to comply with § 310.4(b)(1)(iii)(A) or § 310.5, or maintained by the Commission pursuant to § 310.4(b)(1)(iii)(B), for any purpose except compliance with the provisions of this part or otherwise to prevent telephone calls to telephone numbers on such lists.

* * * * *

■ 5. Revise § 310.5 to read as follows:

§ 310.5 Recordkeeping requirements.

(a) Any seller or telemarketer must keep, for a period of 5 years from the date the record is produced unless specified otherwise, the following records relating to its telemarketing activities:

(1) A copy of each substantially different advertising, brochure, telemarketing script, and promotional material, and a copy of each unique prerecorded message. Such records must be kept for a period of 5 years from the date that they are no longer used in telemarketing;

(2) A record of each telemarketing call, which must include:

(i) The telemarketer that placed or received the call;

(ii) The seller or person for which the telemarketing call is placed or received;

(iii) The good, service, or charitable purpose that is the subject of the telemarketing call;

(iv) Whether the telemarketing call is to an individual consumer or a business consumer;

(v) Whether the telemarketing call is an outbound telephone call;

(vi) Whether the telemarketing call utilizes a prerecorded message;

(vii) The calling number, called number, date, time, and duration of the telemarketing call;

(viii) The telemarketing script(s) and prerecorded message, if any, used during the call;

(ix) The caller identification telephone number, and if it is transmitted, the caller identification name that is transmitted in an outbound telephone call to the recipient of the call, and any contracts or other proof of authorization for the telemarketer to use that telephone number and name, and the time period for which such authorization or contract applies; and

(x) The disposition of the call, including but not limited to, whether the call was answered, connected, dropped, or transferred. If the call was transferred, the record must also include the telephone number or IP address that the call was transferred to as well as the company name, if the call was transferred to a company different from the seller or telemarketer that placed the call; provided, however, that for calls that an individual telemarketer makes by manually entering a single telephone number to initiate the call to that number, a seller or telemarketer need not retain the records specified in paragraphs (a)(2)(vii) and (a)(2)(x) of this section.

(3) For each prize recipient, a record of the name, last known telephone number, and last known physical or email address of that prize recipient, and the prize awarded for prizes that are represented, directly or by implication, to have a value of $25.00 or more;

(4) For each customer, a record of the name, last known telephone number, and last known physical or email address of that customer, the goods or services purchased, the date such goods or services were purchased, the date such goods or services were shipped or provided, and the amount paid by the customer for the goods or services; [1]

(5) For each person with whom a seller intends to assert it has an established business relationship under § 310.2(q)(2), a record of the name and last known telephone number of that person, the date that person submitted an inquiry or application regarding the seller's goods or services, and the goods or services inquired about;

(6) For each person that a telemarketer intends to assert is a previous donor to a particular charitable organization under § 310.2(aa), a record of the name and last known telephone number of that person, and the last date that person donated to that particular charitable organization;

(7) For each current or former employee directly involved in telephone sales or solicitations, a record of the name, any fictitious name used, the last known home address and telephone number, and the job title(s) of that employee; provided, however, that if the seller or telemarketer permits fictitious names to be used by employees, each fictitious name must be traceable to only one specific employee;

(8) All verifiable authorizations or records of express informed consent or express agreement (collectively, ''Consent'') required to be provided or received under this part. A complete record of Consent includes the following:

(i) The name and telephone number of the person providing Consent;

(ii) A copy of the request for Consent in the same manner and format in which it was presented to the person providing Consent;

(iii) The purpose for which Consent is requested and given;

(iv) A copy of the Consent provided;

(v) The date Consent was given; and

(vi) For the copy of Consent provided under §§ 310.3(a)(3), 310.4(a)(7), 310.4(b)(1)(iii)(B)(*1*), or 310.4(b)(1)(v)(A), a complete record must also include all information specified in those respective sections of this part;

(9) A record of each service provider a telemarketer used to deliver an outbound telephone call to a person on behalf of a seller for each good or service the seller offers for sale through telemarketing. For each such service provider, a complete record includes the contract for the service provided, the date the contract was signed, and the time period the contract is in effect. Such contracts must be kept for 5 years from the date the contract expires;

(10) A record of each person who has stated she does not wish to receive any outbound telephone calls made on behalf of a seller or charitable organization pursuant to § 310.4(b)(1)(iii)(A) including: the name of the person, the telephone number(s) associated with the request, the seller or charitable organization from which the person does not wish to receive calls, the telemarketer that called the person, the date the person requested that she cease receiving such calls, and the goods or services the seller was offering for sale or the charitable purpose for which a charitable contribution was being solicited; and

(11) A record of which version of the Commission's ''do-not-call'' registry was used to ensure compliance with § 310.4(b)(1)(iii)(B). Such record must include:

(i) The name of the entity which accessed the registry;

[1] For offers of consumer credit products subject to the Truth in Lending Act, 15 U.S.C. 1601 *et seq.,* and Regulation Z, 12 CFR pt. 226, compliance with the recordkeeping requirements under the Truth in Lending Act, and Regulation Z, will constitute compliance with § 310.5(a)(4) of this part.

(ii) The date the ''do-not-call'' registry was accessed;

(iii) The subscription account number that was used to access the registry; and

(iv) The telemarketing campaign for which it was accessed.

(b) A seller or telemarketer may keep the records required by paragraph (a) of this section in the same manner, format, or place as they keep such records in the ordinary course of business. The format for records required by paragraph (a)(2)(vii) of this section, and any other records that include a time or telephone number, must also comply with the following:

(1) The format for domestic telephone numbers must comport with the North American Numbering plan;

(2) The format for international telephone numbers must comport with the standard established in the International Telecommunications Union's Recommendation ITU–T E.164: Series E: Overall Network Operation, Telephone Service, Service Operation and Human Factors, published 11/2010 (incorporated by reference, see paragraph (g)(1) of this section);

(3) The time and duration of a call must be kept to the closest second; and

(4) Time must be recorded in Coordinated Universal Time (UTC).

(c) Failure to keep each record required by paragraph (a) of this section in a complete and accurate manner, and in compliance with paragraph (b) of this section, as applicable, is a violation of this part.

(d) For records kept pursuant to paragraph (a)(2) of this section, the seller or telemarketer will not be liable for failure to keep complete and accurate records pursuant to this part if it can demonstrate, with documentation, that as part of its routine business practice:

(1) It has established and implemented procedures to ensure completeness and accuracy of its records;

(2) It has trained its personnel, and any entity assisting it in its compliance, in such procedures;

(3) It monitors compliance with and enforces such procedures, and maintains records documenting such monitoring and enforcement; and

(4) Any failure to keep complete and accurate records was temporary, due to inadvertent error, and corrected within 30 days of discovery.

(e) The seller and the telemarketer calling on behalf of the seller may, by written agreement, allocate responsibility between themselves for the recordkeeping required by this section. When a seller and telemarketer have entered into such an agreement, the terms of that agreement will govern, and the seller or telemarketer, as the case may be, need not keep records that duplicate those of the other. If by written agreement the telemarketer bears the responsibility for the recordkeeping requirements of this section, the seller must establish and implement practices and procedures to ensure the telemarketer is complying with the requirements of this section. These practices and procedures include retaining access to any record the telemarketer creates under this section on the seller's behalf. If the agreement is unclear as to who must maintain any required record(s), or if no such agreement exists, both the telemarketer and the seller are responsible for complying with this section.

(f) In the event of any dissolution or termination of the seller's or telemarketer's business, the principal of that seller or telemarketer must maintain all records required under this section. In the event of any sale, assignment, or other change in ownership of the seller's or telemarketer's business, the successor business must maintain all records required under this section.

(g) The material required in this section is incorporated by reference into this section with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is available for inspection at the Federal Trade Commission (FTC) and at the National Archives and Records Administration (NARA). Contact FTC at: FTC Library, (202) 326–2395, Federal Trade Commission, Room H–630, 600 Pennsylvania Avenue NW, Washington, DC 20580, or by email at *Library@ftc.gov.* For information on the availability of this material at NARA, email *fr.inspection@nara.gov* or go to *www.archives.gov/federal-register/cfr/ibr-locations.html.* It is available from: The International Telecommunications Union, Telecommunications Standardization Bureau, Place des Nations, CH–1211 Geneva 20; (+41 22 730 5852); *https://www.itu.int/en/pages/default.aspx.*

(1) Recommendation ITU–T E.164: Series E: Overall Network Operation, Telephone Service, Service Operation and Human Factors, published 11/2010.

(2) [Reserved]

■ 6. Amend § 310.6 as follows:

■ a. In paragraphs (b)(1), (b)(2), and (b)(3), remove the words ''§§ 310.4(a)(1), (a)(7), (b), and (c)'' and add, in their place, the words ''§ 310.4(a)(1), (a)(8), (b), and (c)''; and

■ b. Revise paragraph (b)(7) to read as follows:

§ 310.6 Exemptions.

* * * * *

(b) * * *

(7) Telephone calls between a telemarketer and any business to induce the purchase of goods or services or a charitable contribution by the business, *provided,* however that this exemption does not apply to:

(i) The requirements of § 310.3(a)(2) and(4); or

(ii) Calls to induce the retail sale of nondurable office or cleaning supplies; *provided,* however, that §§ 310.4(b)(1)(iii)(B) and 310.5 shall not apply to sellers or telemarketers of nondurable office or cleaning supplies.

■ 7. Amend § 310.7 by revising paragraph (a) to read as follows:

§ 310.7 Actions by states and private persons.

(a) Any attorney general or other officer of a State authorized by the State to bring an action under the Telemarketing and Consumer Fraud and Abuse Prevention Act, and any private person who brings an action under that Act, must serve written notice of its action on the Commission, if feasible, prior to its initiating an action under this part. The notice must be sent to the Office of the Director, Bureau of Consumer Protection, Federal Trade Commission, Washington, DC 20580, at *tsrnotice@ftc.gov* and must include a copy of the State's or private person's complaint and any other pleadings to be filed with the court. If prior notice is not feasible, the State or private person must serve the Commission with the required notice immediately upon instituting its action.

* * * * *

§§ 310.3, 310.4, 310.6, 310.8, 310.9 [Amended]

■ 8. In addition to the amendments set forth above, in 16 CFR part 310, remove the words ''this Rule'' and add, in their place, the words ''this part'' in the following places:

■ a. Section 310.3(a) introductory text, (b), (c) introductory text, (d) introductory text, and newly redesignated footnotes 2 and 5.

■ b. Section 310.4(a) introductory text, (a)(2)(ii), (b)(1) introductory text, (b)(2), (c), (d) introductory text, (e) introductory text, and newly redesignated footnotes 1 and 2;

■ c. Section 310.6(a) and (b) introductory text;

■ d. Section 310.8(a), (b), and (e); and

■ e. Section 310.9.

By direction of the Commission.

Joel Christie,

Acting Secretary.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 11, 73, and 74

[MB Docket No. 20–401; FCC 24–35; FR ID 213398]

Program Originating FM Broadcast Booster Stations

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In a Report and Order, the Federal Communications Commission (Commission) finds that allowing FM booster stations to originate content on a limited basis would serve the public interest. The Report and Order adopts rules to allow for the voluntary implementation of program originating FM booster stations, subject to future adoption of processing, licensing, and service rules proposed concurrently in a further notice of proposed rulemaking, published elsewhere in this issue of the **Federal Register**. The rule changes in this document are needed to expand the potential uses of FM booster stations, which currently may not originate programming. The intended effect is to allow radio broadcasters to provide more relevant localized programming and information to different zones within their service areas.

DATES: *Effective date:* May 16, 2024.

FOR FURTHER INFORMATION CONTACT: Albert Shuldiner, Chief, Media Bureau, Audio Division, (202) 418–2721, *Albert.Shuldiner@fcc.gov;* Irene Bleiweiss, Attorney, Media Bureau, Audio Division, (202) 418–2785, *Irene.Bleiweiss@fcc.gov.* For additional information concerning the Paperwork Reduction Act (PRA) information collection requirements contained in this document, contact Cathy Williams at (202) 418–2918, *Cathy.Williams@fcc.gov.*

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order (R&O), MB Docket No. 20–401; FCC 24–35, adopted on March 27, 2024, and released on April 2, 2024. The full text of this document will be available via the FCC's Electronic Comment Filing System (ECFS), *https://www.fcc.gov/cgb/ecfs/.* Documents will be available electronically in ASCII, Microsoft Word, and/or Adobe Acrobat. Alternative formats are available for people with disabilities (braille, large print, electronic files, audio format), by sending an email to *fcc504@fcc.gov* or calling the Commission's Consumer and Governmental Affairs Bureau at (202) 418–0530 (voice), (202) 418–0432 (TTY). The Commission published the notice of proposed rulemaking (NPRM) at 86 FR 1909 on January 11, 2021.

Paperwork Reduction Act of 1995 Analysis

This document does not contain new or modified information collection requirements subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104–13. In addition, therefore, it does not contain any new or modified information collection burdens for small business concerns with fewer than 25 employees, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4).

Congressional Review Act

The Commission has determined, and the Administrator of the Office of Information and Regulatory Affairs, Office of Management and Budget, concurs, that these rules are non-major under the Congressional Review Act, 5 U.S.C. 804(2). The Commission will send a copy of the R&O to Congress and the Government Accountability Office (GAO) pursuant to 5 U.S.C. 801(a)(1)(A).

Synopsis

1. *Introduction.* In the R&O, the Commission expands the potential uses of FM boosters, which are low power, secondary stations that operate in the FM broadcast band. As a secondary service, FM booster stations are not permitted to cause adjacent-channel interference to other primary services or previously-authorized secondary stations. They must operate on the same frequency as the primary station, and have been limited to rebroadcasting the primary station's signal in its entirety (*i.e.,* no transmission of original content). Historically, the sole use of FM boosters has been to improve signal strength of primary FM stations in areas where reception is poor due to terrain or distance from the transmitter. The R&O amends the Commission's rules to allow FM and low power FM (LPFM) broadcasters to employ FM booster stations to originate programming for up to three minutes per hour. This represents a change from current requirements of 47 CFR 74.1201(f) and 74.1231 which, respectively, define FM booster stations as not altering the signal they receive from their primary FM station and prohibit FM boosters from making independent transmissions.

2. GeoBroadcast Solutions, LLC (GBS), the proponent of the rule changes, has developed technology designed to allow licensees of primary FM and LPFM broadcast stations to ''geo-target'' a portion of their programming by using FM boosters to originate different content for different parts of their service areas. Prior to proposing rule changes, GBS tested its technology under different conditions in three radio markets and concluded that the technology could be deployed for limited periods of time within the primary station's protected service contour without causing any adjacent-channel interference, and that any resulting co-channel interference (self-interference to the licensee's own signal) would be manageable and not detrimental to listeners. GBS filed a Petition for Rulemaking (Petition) seeking to allow FM boosters to originate programming. The Petition suggested that geo-targeted broadcasting can deliver significant value to broadcasters, advertisers, and listeners in distinct communities by broadcasting more relevant localized information and advancing diversity. Stations might, for example, air hyper-local news and weather reports most relevant to a particular community. Stations also might air advertisements or underwriting acknowledgements from businesses that are only interested in reaching small geographic areas, thereby enhancing the stations' ability to compete for local support. GBS pointed out that many other types of media, such as online content providers, cable companies, and newspapers are able to differentiate their content geographically, but that no such option has existed for radio broadcasting. On April 2, 2020, the Consumer and Governmental Affairs Bureau issued a

public notice seeking comment on the Petition. The Petition garnered significant public participation.

3. The Commission released a notice of proposed rulemaking (NPRM) on December 1, 2020, FCC 20–166, to seek comment on the GBS proposal and published a **Federal Register** summary on January 11, 2021, 86 FR 1909. The NPRM posed questions to determine whether—and if so, how—to change FM booster station rules to permit FM boosters to transmit original geo-targeted content. It asked whether booster program origination may result in self-interference that would be disruptive to listeners and whether there are alternatives to GBS's proposal. The NPRM also invited comment on whether to require programming originated by the FM booster station to be ''substantially similar'' to the primary station's programming, as GBS had proposed, and how to define that term. Additionally, the NPRM sought comment on the potential impact of GBS's proposal on primary station broadcasts, the Emergency Alert System (EAS), and digital HD Radio broadcasts. Finally, the NPRM asked commenters to address the potential public interest implications of geo-targeted content on localism, diversity, and competition in the media marketplace. GBS clarified in its comments that it was proposing that boosters be allowed to originate programming for up to three minutes per hour.

4. After the comment period closed, the Commission granted GBS's request for experimental authority to conduct additional tests and required GBS to report the results. The reports contained detailed information about the technology's operation in two additional radio markets, its compatibility with the EAS, and potential impact on digital FM broadcasts. Because this information was not available to the public during the NPRM comment cycle, the Commission issued a public notice on April 18, 2022, DA 22–429, opening the record for additional comments.

5. *Discussion.* The issues raised in this proceeding fall into three broad categories: (1) non-technical matters such as the advantages and disadvantages of program originating boosters from an economic and public interest perspective; (2) technical issues such as whether program originating boosters, if properly engineered, would cause harmful interference to their primary station or adjacent channel stations; and (3) administrative matters the Commission would need to address in order to authorize program originating boosters and respond to any resulting operational issues. The R&O resolves the first two categories by determining that program originating boosters limited to originating programming for three minutes per hour would serve the public interest and that concerns about the technology's impact on advertising revenue of other broadcasters and harmful interference are speculative. The R&O also concludes that properly engineered program originating boosters will not cause interference to the primary station or adjacent channel stations. Any interference concerns that arise in individual circumstances can be addressed by the Bureau through conditions imposed as part of the authorization process. Thus, the R&O, the Commission finds that it is in the public interest to allow FM and low power FM (LPFM) broadcasters to use FM booster stations to provide booster-originated content on a voluntary, limited basis, subject to certain restrictions described in the R&O, and further subject to the adoption of licensing, interference and service rules proposed in the concurrently adopted FNPRM that would be required to authorize broadcasters to originate programming on boosters on a permanent basis. The ability to originate content will enable broadcasters to serve specific geographic segments within their broadcast areas, could open up more affordable advertising to smaller and minority-owned businesses, and generally provide broadcasters and listeners options for more targeted and varied advertising and content.

6. *Non-technical Matters.* In order to distinguish between a booster station used only to fill in gaps in service and a program originating FM booster station, the R&O adopts a new definition of program originating boosters. As suggested by GBS, the definition provides that program originating boosters may air no more than three minutes per hour of booster-originated content. Commenters, while focusing on the overall pros and cons of booster-originated content, did not raise any concern that a three minute per hour limitation is too long or too short. The Commission believes that three minutes per hour is sufficient to achieve the technology's goals, and provides the best balance between the desire to offer broadcasters the flexibility to originate content on boosters, and the need for safeguards to minimize the risks of interference as the Commission assesses the rollout of this new technology. Given adoption of this three-minute limit, the Commission finds it unnecessary to further limit the definition of a program originating booster as one airing programming that is ''substantially similar'' to the main station's, as GBS had also proposed.

7. In addition, the R&O determines that the potential public interest advantages of program originating boosters outweigh potential disadvantages. It finds that concerns about the impact of program originating boosters on advertising revenue of other broadcasters are not supported by the record. Commenters differ on whether program originating boosters would be beneficial or harmful to stations, advertisers, listeners, the radio industry, and the overall economy. There is general consensus among the commenters that the radio industry has experienced declining revenues over the past decade, and continues to lose advertising market share to other media sources. However, while supporters view program originating boosters as a solution capable of reversing that trend, opponents believe such booster use would exacerbate these financial challenges. The record reflects that the potential costs and benefits of program originating boosters on broadcast revenue will likely vary from station to station and market to market. Because the use of boosters would be voluntary for stations and potentially beneficial to listeners and consumers, the R&O finds that the public interest will be served by providing each individual radio licensee the opportunity to evaluate whether or not program originating booster use would be advantageous under its own unique circumstances.

8. Commenters also differ in opinion on the potential impact of program originating boosters on advertising revenue. Supporting commenters state that program originating boosters can provide advertisers with better opportunities to direct messages to the listeners they want to reach, and may also provide listeners with content that is more relevant and engaging to their areas of interest. Opposing commenters, however, are concerned that targeted programming or advertising could result in intentional or inadvertent socio-economic ''redlining,'' giving advertisers the means to reach more ''desirable'' neighborhoods and to overlook others. Some argue that geo-targeting would make it easier for businesses to avoid advertising to minority and low-income communities. Other commenters dispute these arguments because their review of business and academic literature found no documented redlining by other types local media that can already offer geo-targeted content.

9. The R&O finds that program originating boosters could further the

public interest by enabling radio stations to seek new sources of revenue while providing audiences with hyper-local content. Program originating boosters could enhance the competitiveness of the overall FM radio industry by expanding the range of advertising opportunities available in the relevant geographic areas. The R&O acknowledges the concern in the comments that program originating boosters could drive down advertising rates and thereby could negatively impact radio stations' revenue, but concludes that this concern does not justify rejecting the authorization of program originating boosters. Whether a broadcaster could recoup any lost revenues by selling more spots could vary from market to market and from station to station. It would be up to each broadcaster to weigh its own individual circumstances, market, and needs of its community of license to arrive at a voluntary decision of whether to use boosters for limited program origination. Although the Commission agrees with some comments that the cost of building and operating multiple boosters may be too significant for some broadcasters, it finds that, in many ways, this concern is not different than the decisions that broadcasters routinely make about investment in technologies. The R&O rejects as speculative the argument that stations that would otherwise not adopt program originating boosters will allegedly be forced to do so in order to compete with lower advertising rates offered by those stations in a market that have adopted the technology. The R&O concludes that this theoretical risk does not outweigh the potential public interest benefits of the technology. Although the Commission has considered the concern that some broadcasters and advertisers might have an economic motivation to use program originating boosters to the disadvantage of certain communities or geographic areas, the Commission believes that such an outcome would be unlikely, based on commenter research finding no documentation of such practices by other local media offering targeted advertising. With respect to concerns that GBS is a single vendor with a proprietary technology, the Commission states that it has no reason to conclude that providers of program originating booster technologies will have a relationship with a broadcast licensee that is materially different from any other technology vendor. Nonetheless, the Commission emphasizes that existing broadcast ownership rules will continue to apply to licensees, including those that use program originating boosters.

10. *Technical Matters/Interference Issues.* With respect to technical issues, the Commission concludes that properly engineered program originating boosters will not cause objectionable co-channel interference to the primary station or adjacent channel interference to other stations. It further determines that such boosters, when properly engineered, are compatible with EAS and HD Radio.

11. *Co-Channel Self-Interference.* The main interference concern in the record is whether program originating boosters will cause self-interference to the primary station associated with the booster. Due to the fact that boosters operate on the same channel as the primary station and within the primary station's coverage area, there always is a risk of self-interference. Existing rules currently take this into account by permitting a booster to cause ''limited interference'' to its primary station provided it does not disrupt the existing service of its primary station or cause such interference within the boundaries of the principal community of its primary station. Because the purpose of programming originating boosters is to replace the signal of the primary station for limited periods, the R&O considers the extent to which self-interference is acceptable.

12. GBS and supporting commenters argue that program originating boosters can be configured to ensure that any co-channel interference will be brief. They base this assertion on the tests that GBS conducted. They also note that broadcasters have a business incentive to avoid self-interference to the greatest extent possible.

13. Opposing commenters reject these assertions, and are concerned that self-interference might diminish the audience experience and lead to listeners becoming frustrated, tuning away, and suspecting that their car radios are defective. These comments focus primarily on the methodology of the GBS tests, which they contend were optimized to avoid showing interference and inadequate by omitting critical scenarios. Even commenters that do not completely oppose the Petition urge the Commission to proceed cautiously and to require further testing.

14. The R&O finds the test record has shown that properly engineered program originating boosters can be implemented without causing more than a limited amount of co-channel interference. The R&O's decision to limit program origination to three minutes per hour combined with the economic incentive broadcasters have to minimize self-interference will help to reduce any potential for harmful interference from a booster's airing of programming different from that of the primary station. The Commission amends § 74.1203(c) to clarify that a booster's limited origination of programming does not cause interference into or disrupt the service of the primary station solely because it originates programming different from the primary station. The Commission also amends § 74.1203(c) to eliminate the specific prohibition on interference within the primary station's principal community as applied to program originating boosters. The Commission believes a broadcaster's economic incentive to avoid self-interference negates the ongoing need for this restriction as applied to program originating boosters. Retaining the restriction could impede the voluntary deployment of program originating boosters, and the corresponding public interest benefits, even in cases of a well-engineered transition zone located within the primary station's principal community. However, the Commission retains the requirement that all boosters may provide only ''limited'' interference to emphasize the Commission's expectation that booster stations minimize their impact on their primary station wherever possible. The Commission will not hesitate to address non-compliance if poorly engineered program originating booster systems result in unduly large transition zones or otherwise cause excessive interference.

15. *Adjacent Channel Interference.* The Commission finds that record does not contain any evidence that allowing boosters to originate programming increases their risk of generating adjacent channel interference. A limited number of commenters address adjacent channel interference. These commenters support the Commission's conclusion that program originating boosters will not cause harmful interference to first-adjacent or second adjacent channel stations.

16. The R&O finds that existing rules provide adequate protection to ensure boosters do not cause adjacent channel interference. These rules include a requirement that booster station signals must be contained within the coverage area of the primary station; operate with a signal 6 dB less than the signal of a first-adjacent channel full-service station; and be subject to a process for addressing any claims of actual interference. As an additional safeguard in this proceeding, however, the Commission adopts a notification requirement so that the Commission and interested parties are able to identify

which booster stations are originating content. This will allow the Commission to address more quickly any reports of interference or other issues that may arise through the introduction of program originating boosters.

17. *EAS Compatibility.* Consistent with the Commission's findings about overall interference from program originating boosters, the R&O concludes these stations can be implemented without causing harmful interference to the EAS. GBS tests in two markets document successful reception of EAS tones from both the primary station and the program originating booster. Engineering consultants hired by supporting commenters and GBS state that program origination on boosters will have no effect on EAS because the signals and data contained within the EAS tones will override any booster-originated content before it is delivered to the booster.

18. Opposing commenters, however, argue that the EAS tests were optimized and inadequate. Commenters also express concerns that individuals crossing an interference zone at a slow rate (which may be likely during an emergency situation when traffic would be heavier), could experience longer interruptions to emergency alerts.

19. The R&O notes that no commenter presented definitive evidence that program originating boosters are incompatible with the EAS or any evidence that the booster's substitution of programming caused a dead zone unable to receive an emergency alert. To ensure that listeners to program originating boosters receive timely emergency alerts, the R&O requires program originating boosters to receive and broadcast all emergency alerts in the same manner as their primary station. While the Commission concludes that this requirement will ensure that EAS messages are passed through, it states that in light of the significant concerns that interested parties have expressed about the EAS, and the importance of the EAS to public safety, the Commission will carefully monitor the implementation of program originating boosters and may revisit this issue if it receives reports of interference to EAS tests and alerts.

20. *Impact On HD Radio.* Consistent with findings about self-interference and EAS compatibility, the R&O concludes that it is possible for program originating boosters to minimize disruption to HD Radio. GBS, based on tests at one station airing HD Radio, reports that boosters can originate programming without material degradation of the listener's experience, when deployed with optimal system design and successful synchronization. Xperi, the developer of HD Radio, while having some reservations about the impact on HD due to GBS's limited testing, concludes that the listener experience was ''generally good'' when characterized by well-designed booster antennas to diminish transition zone size, and absent synchronization issues. Independent engineers specializing in HD Radio agree that when professionally designed and deployed with successful synchronization, the technology causes ''no appreciable degradation'' to HD Radio signals.

21. Yet, a number of commenters raise concerns that the impact of program originating boosters on digital radio has not been sufficiently examined because the one digital station used for GBS testing was protected by terrain obstructions, and because the test failed to assess HD3 and HD4 subchannels. Commenters also argue that program originating boosters could cause significant disruption to HD Radio in transition regions between the booster and primary signals, causing listener dissatisfaction. Xperi also asserts that its own testing confirmed signal degradation in transition zones due to frequent switching between main and zone audio programs, and loss of both physical and digital synchronization, resulting in audio outages. Commenters therefore request further testing and propose potential scenarios that have not yet been tested.

22. The Commission concludes that program originating boosters can be designed to minimize interference to or disruption of HD Radio signals. The R&O finds it significant that Xperi, the developer of HD Radio, has not opposed the adoption of program originating boosters even though it has a strong incentive to prevent interference to digital operations. The Commission also based its conclusion on its determination that the only potential interference concern of any significance from program originating boosters is co-channel interference from the booster to the primary station. Broadcasters that find they are unable to engineer boosters to avoid co-channel interference to their HD Radio operations can opt not to implement those boosters. The definition of program originating boosters adopted in the R&O, which limits program origination to three minutes per hour, further reduces the risk of widespread interference to HD Radio broadcasts. Nonetheless, the Commission recognizes commenter assertions that testing to date has not examined many typical digital radio implementations. If the Commission receives reports of significant disruption to digital broadcasts, it may revisit this issue.

23. Since current use of boosters is a response to weak signals caused by terrain, few stations now use multiple boosters. The new ability to originate programming over boosters has the potential to significantly increase the use of booster stations. Accordingly, in the FNPRM, the Commission seeks comment on a program originating booster cap or other measures, and whether they will be necessary to ensure compliance with the Local Community Radio Act of 2010 (LCRA), and its license availability requirements regarding FM translator stations, LPFM stations, and FM booster stations. During the interim when the Commission is considering these matters proposed in the FNPRM, it will limit to 25 the number of program originating boosters licensed to each full-service FM station.

24. *Part 5 Authorizations.* As of the effective date of the R&O and until the effective date of final service rules based on the proposals in the FNPRM, a licensed FM station may originate programming on a booster under a one-year, renewable experimental authorization obtained pursuant to 47 CFR part 5. The Commission views experimental use of program-originating boosters as an appropriate mechanism during the pendency of the FNPRM because it allows the FCC to closely monitor the rollout of the technology. In the FNPRM, the Commission seeks comment on the proposed processing, licensing, and service rules required to authorize broadcasters to originate programming on boosters on a permanent basis.

25. *Correction of Spelling Error.* The Commission also corrects an error in the spelling of the word ''radial'' in 47 CFR 74.1235.

Procedural Matters

Final Regulatory Flexibility Analysis

26. As required by the Regulatory Flexibility Act of 1980, as amended (RFA), an Initial Regulatory Flexibility Analysis (IRFA) was incorporated in the *Amendment of Section 74.1231(i) of the Commission's Rules on FM Broadcast Booster Stations,* Notice of Proposed Rulemaking (NPRM), released in December 2020 (86 FR 1909, January 11, 2021). The Federal Communications Commission (Commission) sought written public comment on the proposals in the NPRM, including comment on the IRFA. No comments were filed addressing the IRFA. The Final Regulatory Flexibility Analysis

(FRFA) conforms to the RFA. See 5 U.S.C. 604.

A. Need For, and Objectives of, the Report and Order

27. In the Report and Order, the Commission finds that it is in the public interest to allow FM and low power FM (LPFM) broadcasters to use FM booster stations to provide booster-originated content on a voluntary, limited basis, subject to certain restrictions described in the Report and Order, and further subject to the adoption of licensing, interference and service rules for origination of content on boosters as proposed in the concurrently adopted FNPRM. In order to distinguish between a fill-in station and a Program Originating FM booster station, the Report and Order adopts a new definition of program originating boosters. The ability to originate content will enable broadcasters to serve geographic segments of their broadcast areas, could open up more affordable advertising to smaller and minority-owned businesses, and will generally provide broadcasters and listeners options for more targeted and varied advertising and content that FM stations are not able to provide today.

28. The issues raised in this proceeding fall into three broad categories: (1) non-technical matters such as the advantages and disadvantages of program originating boosters from an economic and public interest perspective; (2) technical issues such as whether program originating boosters, if properly engineered, would cause harmful interference to their primary station or adjacent channel stations; and (3) administrative matters the Commission would need to address in order to authorize program originating boosters and respond to any resulting operational issues. The Report and Order resolves the first category by adopting a rule that determines program originating boosters limited to originating programming for three minutes per hour would serve the public interest. In addition, the Report and Order determines concerns about the technology's impact on advertising revenue of other broadcasters and harmful interference are not supported by the record. It also addresses the second category about interference by concluding that properly engineered program originating boosters will not cause interference to the primary station or adjacent channel stations. The Report and Order also requires that program originating boosters receive and broadcast all emergency alerts in the same manner as their primary station. While stations will not be permitted to install or operate program originating boosters pursuant to these rules until we adopt final service rules in response to the FNPRM and such rules have been reviewed by the Office of Management and Budget, the Commission provides that pending adoption and OMB review of such rules, stations can pursue experimental authorizations for installation and use of program originating boosters pursuant to part 5 of our rules. In the FNPRM, the Commission seeks comment on the proposed processing, licensing, and service rules required to authorize broadcasters to originate programming on boosters on a permanent basis.

B. Summary of Significant Issues Raised by Public Comments in Response to the IRFA

29. Parties that filed comments did not specifically reference the IRFA in their comments. Some commenters, however, expressed concern about increased costs, such as the cost of building and operating multiple boosters, particularly for smaller broadcasters, and the initial outlay to cover infrastructure and maintenance expenses, and additional expenses to hire and train staff, and purchase content management systems to feed secondary programming to the boosters. In addition, commenters claim the GeoBroadcast Solutions (GBS) proprietary technology could ultimately lead to unfavorable rates for small entities that are late adopters of the technology. These and other concerns are discussed in section F of this FRFA.

C. Response to Comments by the Chief Counsel for Advocacy of the Small Business Administration

30. Pursuant to the Small Business Jobs Act of 2010, which amended the RFA, the Commission is required to respond to any comments filed by the Chief Counsel for Advocacy of the Small Business Administration (SBA), and to provide a detailed statement of any change made to the proposed rules as a result of those comments. 5 U.S.C. 604(a)(3). The Chief Counsel did not file any comments in response to the proposed rules in this proceeding.

D. Description and Estimate of the Number of Small Entities to Which the Rules Apply

31. The RFA directs the agencies to provide a description of and, where feasible, an estimate of the number of small entities that may be affected by the rules adopted herein. 5 U.S.C. 604(a)(4). The RFA generally defines the term ''small entity'' as having the same meaning as the terms ''small business,'' ''small organization,'' and ''small government jurisdiction.'' Id. 601(6). In addition, the term ''small business'' has the same meaning as the term ''small business concern'' under the Small Business Act. Id. 601(3). A small business concern is one which: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA. 15 U.S.C. 632.

32. *Radio Stations.* This industry is comprised of ''establishments primarily engaged in broadcasting aural programs by radio to the public.'' Programming may originate in their own studio, from an affiliated network, or from external sources. The SBA small business size standard for this industry classifies firms having $41.5 million or less in annual receipts as small. 13 CFR 121.201. U.S. Census Bureau data for 2017 show that 2,963 firms operated in this industry during that year. Of this number, 1,879 firms operated with revenue of less than $25 million per year. Id. Based on this data and the SBA's small business size standard, we estimate a majority of such entities are small entities.

33. The Commission estimates that as of September 30, 2023, there were 4,452 licensed commercial AM radio stations and 6,670 licensed commercial FM radio stations, for a combined total of 11,122 commercial radio stations. Of this total, 11,120 stations (or 99.98%) had revenues of $41.5 million or less in 2022, according to Commission staff review of the BIA Kelsey Inc. Media Access Pro Database (BIA) on October 4, 2023, and therefore these licensees qualify as small entities under the SBA definition. In addition, the Commission estimates that as of September 30, 2023, there were 4,263 licensed noncommercial (NCE) FM radio stations, 1,978 low power FM (LPFM) stations, and 8,928 FM translators and boosters. The Commission however does not compile, and otherwise does not have access to financial information for these radio stations that would permit it to determine how many of these stations qualify as small entities under the SBA small business size standard. Nevertheless, given the SBA's large annual receipts threshold for this industry and the nature of radio station licensees, we presume that all of these entities qualify as small entities under the SBA small business size standard.

34. We note, however, that in assessing whether a business concern qualifies as ''small'' under the above definition, business (control) affiliations must be included. Our estimate, therefore, likely overstates the number of small entities that might be affected

by our action, because the revenue figure on which it is based does not include or aggregate revenues from affiliated companies. In addition, another element of the definition of ''small business'' requires that an entity not be dominant in its field of operation. We are unable at this time to define or quantify the criteria that would establish whether a specific radio or television broadcast station is dominant in its field of operation. Accordingly, the estimate of small businesses to which the rules may apply does not exclude any radio or television station from the definition of a small business on this basis and is therefore possibly over-inclusive. An additional element of the definition of ''small business'' is that the entity must be independently owned and operated. Because it is difficult to assess these criteria in the context of media entities, the estimate of small businesses to which the rules may apply does not exclude any radio or television station from the definition of a small business on this basis and similarly may be over-inclusive.

E. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements for Small Entities

35. The Report and Order adopts rules requiring compatibility between program originating boosters and the Emergency Alert System (EAS) as well as rules limiting program origination to three minutes per hour. Stations that wish to originate programming on a booster station may request experimental authorization pursuant to § 5.203 of the Commission's rules, which would require an application describing the nature, purpose, and duration of the experimental authorization, and require the station to file any supplemental reports that flow from this authorization. The Commission's Media Bureau is required to provide expedited treatment for any such requests. As discussed previously, the use of program originating boosters will be voluntary. To the extent that broadcasters choose to use boosters in this way, they will be required to follow the rules adopted in the Report and Order. We also note the Commission concurrently adopted an FNPRM in this proceeding, which proposes modified reporting requirements for FM booster stations.

F. Steps Taken To Minimize Significant Economic Impact on Small Entities and Significant Alternatives Considered

36. The RFA requires an agency to provide, ''a description of the steps the agency has taken to minimize the significant economic impact on small entities . . . including a statement of the factual, policy, and legal reasons for selecting the alternative adopted in the final rule and why each one of the other significant alternatives to the rule considered by the agency which affect the impact on small entities was rejected.'' 5 U.S.C. 604(a)(6). In the Report and Order, the Commission adopted measures authorizing program originating boosters to benefit the public by providing broadcasters and listeners with increased options for more targeted and varied advertising and content that many stations are not able to currently provide. We sought to weigh the impact of these measures on small entities against the public interest benefits gained from them and have determined that the benefits outweigh the costs. Commenters have asserted that while booster use causes advertising revenues to increase, the gains may be offset by increased costs. Other commenters claim purchasing program originating boosters will necessitate additional expenses, such as purchasing additional content management systems to feed the secondary programming to the boosters, new sales software to handle sub-areas, and hiring and retraining staff. In contrast, supporters of FM geotargeting claim the technology will enable small and minority-owned broadcasters to become more competitive by attracting new advertisers and listeners, and offer targeted advertisements relevant to the local community.

37. Commenters also raised concerns about the potential of GBS' proprietary technology to create unfavorable rates for small entities who are late adopters. However, we do not require broadcasters to use the GBS system. Other, more economical solutions that are in compliance with our interference rules may be viable options for broadcasters. Lastly, we considered concerns regarding the potential impact of program originating boosters on minority and female broadcasters, however, the record does not provide clear evidence concerning the potential impact to these entities. While we acknowledge and have considered these concerns, we have determined that the public interest benefits of localism, diversity, and competition obtained by the adopted rules outweigh those potential risks.

G. Report to Congress

38. The Commission will send a copy of the Report and Order, including the FRFA, in a report to Congress pursuant to the Congressional Review Act, 5 U.S.C. 801(a)(1)(A). In addition, the Commission will send a copy of the Report and Order, including the FRFA, to the Chief Counsel for Advocacy of the SBA. A copy of the Report and Order and FRFA (or summaries thereof) will also be published in the **Federal Register**. Id. 604(b).

39. Paperwork Reduction Act Analysis. This document does not contain new or modified information collection requirements subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104–13. In addition, therefore, it does not contain any new or modified information collection burdens for small business concerns with fewer than 25 employees, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4).

40. Congressional Review Act. The Commission has determined, and the Administrator of the Office of Information and Regulatory Affairs, Office of Management and Budget, concurs that these rules are ''non-major'' under the Congressional Review Act, 5 U.S.C. 804(2). The Commission will send a copy of the Report and Order to Congress and the Government Accountability Office pursuant to 5 U.S.C. 801(a)(1)(A).

Ordering Clauses

41. Accordingly, *it is ordered* that pursuant to the authority contained in sections 1, 2, 4(i), 7, 301, 302, 303, 307, 308, 309, 316, 319, and 324 of the Communications Act of 1934, 47 U.S.C. 151, 154, 157, 301, 302, 303, 307, 308, 309, 316, 319, and 324, the Report and Order *is adopted.*

42. *It is further ordered* that the Report and Order and the amendments to the Commission's rules set forth in Appendix B of the Report and Order *shall be effective* 30 days after publication of a summary in the **Federal Register**.

43. *It is further ordered* that the Commission's Office of the Secretary, Reference Information Center, *shall send* a copy of the Report and Order and Further Notice of Proposed Rulemaking, including the Final and Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration, and shall cause it to be published in the **Federal Register**.

44. *It is further ordered* that Office of the Managing Director, Performance Program Management, *shall send* a copy of the Report and Order and Further Notice of Proposed Rulemaking in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional Review Act, 5 U.S.C. 801(a)(1)(A).

Final Rules

For the reasons discussed in the preamble, the Federal Communications Commission amends 47 CFR parts 11, 73, and 74 as follows:

PART 11—EMERGENCY ALERT SYSTEM (EAS)

■ 1. The authority citation for part 11 continues to read as follows:

Authority: 47 U.S.C. 151, 154(i) and (o), 303(r), 544(g), 606, 1201, 1206.

■ 2. Amend § 11.11 by revising paragraph (a) introductory text, table 1 to paragraph (a), and paragraph (b) to read as follows:

§ 11.11 The Emergency Alert System (EAS).

(a) The EAS is composed of analog radio broadcast stations including AM, FM, Low-power FM (LPFM), and program originating FM booster stations; digital audio broadcasting (DAB) stations, including digital AM, FM, LPFM, and program originating FM booster stations; Class A television (CA) and Low-power TV (LPTV) stations; digital television (DTV) broadcast stations, including digital CA and digital LPTV stations; analog cable systems; digital cable systems which are defined for purposes of this part only as the portion of a cable system that delivers channels in digital format to subscribers at the input of a Unidirectional Digital Cable Product or other navigation device; wireline video systems; wireless cable systems which may consist of Broadband Radio Service (BRS), or Educational Broadband Service (EBS) stations; DBS services, as defined in § 25.701(a) of this chapter (including certain Ku-band Fixed-Satellite Service Direct to Home providers); and SDARS, as defined in § 25.201 of this chapter. These entities are referred to collectively as EAS Participants in this part, and are subject to this part, except as otherwise provided in this section. At a minimum EAS Participants must use a common EAS protocol, as defined in § 11.31, to send and receive emergency alerts, and comply with the requirements set forth in § 11.56, in accordance with the following tables:

TABLE 1 TO PARAGRAPH (a)—ANALOG AND DIGITAL BROADCAST STATION EQUIPMENT DEPLOYMENT REQUIREMENTS

EAS equipment requirement	AM & FM & program originating FM booster station	Digital AM & FM & program originating FM booster station	Analog & digital FM class D	Analog & digital LPFM & program originating FM booster station	DTV	Analog & digital class A TV	Analog & digital LPTV
EAS Decoder [1]	Y	Y	Y	Y	Y	Y	Y
EAS Encoder	Y	Y	N	N	Y	Y	N
Audio message	Y	Y	Y	Y	Y	Y	Y
Video message	N/A	N/A	N/A	N/A	Y	Y	Y

[1] EAS Participants may comply with the obligations set forth in § 11.56 to decode and convert CAP-formatted messages into EAS Protocol-compliant messages by deploying an Intermediary Device, as specified in § 11.56(b).

* * * * *

(b) Analog class D non-commercial educational FM stations as defined in § 73.506 of this chapter, digital class D non-commercial educational FM stations, analog LPFM stations as defined in §§ 73.811 and 73.853 of this chapter, digital LPFM stations, analog LPTV stations as defined in § 74.701(f), and digital LPTV stations as defined in § 74.701(k) of this chapter are not required to comply with § 11.32. Analog and digital LPTV stations that operate as television broadcast translator stations, as defined in § 74.701(b) of this chapter, are not required to comply with the requirements of this part. FM broadcast booster stations as defined in § 74.1201(f)(1) of this chapter and FM translator stations as defined in § 74.1201(a) of this chapter which entirely rebroadcast the programming of other local FM broadcast stations are not required to comply with the requirements of this part. Program originating FM booster stations as defined in § 74.1201(f)(2) of this chapter must comply with the requirements of this part as set forth in table 1 to paragraph (a) of this section. International broadcast stations as defined in § 73.701 of this chapter are not required to comply with the requirements of this part. Analog and digital broadcast stations that operate as satellites or repeaters of a hub station (or common studio or control point if there is no hub station) and rebroadcast 100 percent of the programming of the hub station (or common studio or control point) may satisfy the requirements of this part through the use of a single set of EAS equipment at the hub station (or common studio or control point) which complies with §§ 11.32 and 11.33.

* * * * *

PART 73—RADIO BROADCAST SERVICES

■ 3. The authority citation for part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 155, 301, 303, 307, 309, 310, 334, 336, 339.

■ 4. Amend § 73.860 by:

■ a. Removing the word ''and'' at the end of paragraph (b)(3);

■ b. Removing the period at the end of paragraph (b)(4) and adding ''; and'' in its place; and

■ c. Adding paragraph (b)(5).

The addition reads as follows:

§ 73.860 Cross-ownership.

* * * * *

(b) * * *

(5) Booster stations commonly owned by LPFM stations may conduct transmissions independent of those broadcast by the primary LPFM station for a period not to exceed three minutes of each broadcast hour. This is a strict hourly limit that may not be exceeded by aggregating unused minutes of program origination.

* * * * *

PART 74—EXPERIMENTAL RADIO, AUXILIARY, SPECIAL BROADCAST AND OTHER PROGRAM DISTRIBUTIONAL SERVICES

■ 5. The authority citation for part 74 continues to read as follows:

Authority: 47 U.S.C. 154, 302a, 303, 307, 309, 310, 325, 336 and 554.

■ 6. Amend § 74.1201 by revising paragraph (f) to read as follows:

§ 74.1201 Definitions.

* * * * *

(f) *FM broadcast booster station*—(1) *In general.* A station in the broadcasting service operated for the sole purpose of retransmitting the signals of an FM radio broadcast station, by amplifying and reradiating such signals, without significantly altering any characteristic of the incoming signal other than its amplitude. Unless specified otherwise, an FM broadcast booster station includes LPFM boosters as defined in paragraph (l) of this section.

(2) *Program originating FM booster station.* An FM broadcast booster station that retransmits the signals of an FM radio broadcast station or a low-power FM broadcast station, and that may replace the content of the incoming signal by originating programming for a period not to exceed three minutes of each broadcast hour. This is a strict hourly limit that may not be exceeded by aggregating unused minutes of program origination. A program originating FM booster station is subject to the same technical and interference protection requirements as are all FM broadcast booster stations, including but not limited to those set forth in §§ 74.1203 through 74.1262.

* * * * *

■ 7. Amend § 74.1203 by revising paragraph (c) to read as follows:

§ 74.1203 Interference.

* * * * *

(c) An FM broadcast booster station will be exempted from the provisions of paragraphs (a) and (b) of this section to the extent that it may cause limited interference to its primary station's signal, *provided* it does not disrupt the existing service of its primary station or cause such interference within the boundaries of the principal community of its primary station. A program originating FM booster station will be exempted from the provisions of paragraphs (a) and (b) to the extent that it may cause limited interference to its primary station's signal. A properly synchronized program originating FM booster station transmitting programming different than that broadcast by the primary station, subject to the limits set forth in § 74.1201(f)(2), is not considered to cause interference to its primary station solely because such originated programming differs from that transmitted by the primary station.

* * * * *

■ 8. Amend § 74.1231 by:
■ a. Revising paragraph (i);
■ b. Removing the note following paragraph (i); and
■ c. Adding paragraph (j).

The addition reads as follows:

§ 74.1231 Purpose and permissible service.

* * * * *

(i) FM broadcast booster stations provide a means whereby the licensee of an FM broadcast station may provide service to areas in any region within the primary station's predicted authorized service contour. An FM broadcast booster station is authorized to retransmit only the signals of its primary station which have been received directly through space and suitably amplified, or received by alternative signal delivery means including, but not limited to, satellite and terrestrial microwave facilities. The FM booster station shall not retransmit the signals of any other station nor make independent transmissions except as set forth in § 74.1201(f)(2), and except that locally generated signals may be used to excite the booster apparatus for the purpose of conducting tests and measurements essential to the proper installation and maintenance of the apparatus.

(j) In the case of an FM broadcast station authorized with facilities in excess of those specified by § 73.211 of this chapter, an FM booster station will only be authorized within the protected contour of the class of station being rebroadcast as predicted on the basis of the maximum powers and heights set forth in that section for the applicable class of FM broadcast station concerned.

■ 9. Amend § 74.1232 by revising paragraph (f) to read as follows:

§ 74.1232 Eligibility and licensing requirements.

* * * * *

(f) An FM broadcast booster station will be authorized only to the licensee or permittee of the FM radio broadcast station whose signals the booster station will retransmit, to serve areas within the protected contour of the primary station, subject to § 74.1231(j).

* * * * *

■ 10. Amend § 74.1235 by revising paragraph (b) introductory text to read as follows:

§ 74.1235 Power limitations and antenna systems.

* * * * *

(b) An application for an FM translator station, other than one for fill-in service which is covered in paragraph (a) of this section, will not be accepted for filing if it specifies an effective radiated power (ERP) which exceeds the maximum ERP (MERP) value determined in accordance with this paragraph (b). The antenna height above average terrain (HAAT) shall be determined in accordance with § 73.313(d) of this chapter for each of 12 distinct radials, with each radial spaced 30 degrees apart and with the bearing of the first radial bearing true north. Each radial HAAT value shall be rounded to the nearest meter. For each of the 12 radial directions, the MERP is the value corresponding to the calculated HAAT in the following tables that is appropriate for the location of the translator. For an application specifying a nondirectional transmitting antenna, the specified ERP must not exceed the smallest of the 12 MERP's. For an application specifying a directional transmitting antenna, the ERP in each azimuthal direction must not exceed the MERP for the closest of the 12 radial directions.

BILLING CODE 6712–01–P

Proposed Rules

Federal Register
Vol. 89, No. 74
Tuesday, April 16, 2024

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2024–1002; Project Identifier MCAI–2022–01574–R]

RIN 2120–AA64

Airworthiness Directives; Airbus Helicopters.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for all Airbus Helicopters Model AS350B, AS350BA, AS350B1, AS350B2, AS350D, AS355E, AS355F, AS355F1, AS355F2, and AS355N helicopters. This proposed AD was prompted by reports of debonding on the leading edge protection of certain part-numbered main rotor blades (MRBs). This proposed AD would require repetitively tap inspecting the MRB and, depending on the results, taking corrective action. This proposed AD would also prohibit installing an affected MRB on any helicopter unless its requirements are met. These actions are specified in a European Union Aviation Safety Agency (EASA) AD, which is proposed for incorporation by reference. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by May 31, 2024.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* (202) 493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2024–1002; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the EASA AD, any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For EASA material, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu.* You may find the EASA material on the EASA website *easa.europa.eu.*
- You may view this material at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Parkway, Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222–5110. The EASA material is also available at *regulations.gov* under Docket No. FAA–2024–1002.

Other Related Service Information: For Airbus Helicopters service information identified in this NPRM, contact Airbus Helicopters, 2701 North Forum Drive, Grand Prairie, TX 75052; phone (972) 641–0000 or (800) 232–0323; fax (972) 641–3775; or at *airbus.com/en/products-services/helicopters/hcare-services/airbusworld.* You may also view this service information at the FAA contact information under *Material Incorporated by Reference* above.

FOR FURTHER INFORMATION CONTACT: Dan McCully, Aviation Safety Engineer, FAA, 1600 Stewart Ave., Suite 410, Westbury, NY 11590; telephone (404) 474–5548; email *william.mccully@faa.gov*.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2024–1002; Project Identifier MCAI–2022–01574–R'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Dan McCully, Aviation Safety Engineer, FAA, 1600 Stewart Ave., Suite 410, Westbury, NY 11590; telephone (404) 474–5548; email *william.mccully@faa.gov.* Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

EASA, which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2022–0246, dated December 12, 2022 (EASA AD 2022–0246), to correct an unsafe condition for all Airbus Helicopters Model AS 350 B, AS 350 BA, AS 350 B1, AS 350 B2, AS 350 BB, AS 350 D, AS 355 E, AS 355 F, AS 355 F1, AS 355 F2, and AS 355 N helicopters.

This proposed AD was prompted by reports of debonding on the stainless steel leading edge protection of certain part-numbered MRBs. The FAA is

proposing this AD to address the debonding of the MRB leading edge protection. The unsafe condition, if not detected and corrected, could lead to significant unbalance of the main rotor, a high level of vibration, failure of the main rotor, failure of the main gearbox, and subsequent loss of control of the helicopter.

Related Service Information Under 1 CFR Part 51

EASA AD 2022–0246 requires repetitively tap inspecting affected MRBs and, depending on findings, either repairing or replacing the MRB. For certain helicopters, EASA AD 2022–0246 prohibits installing an affected MRB unless it is a serviceable part as defined within and is inspected following installation. For other certain helicopters, EASA AD 2022–0246 prohibits installing an affected MRB.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Other Related Service Information

The FAA also reviewed Airbus Helicopters Alert Service Bulletin No. AS350–05.01.07 and No. AS355–05.00.91, both Revision 0 and dated December 6, 2022. This service information specifies procedures for tap inspecting the stainless steel leading edge protection of the MRB and, depending on the results, repairing or sending the MRB for repair to Airbus Helicopters. The service information also specifies sending certain information to Airbus Helicopters.

FAA's Determination

These helicopters have been approved by EASA and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with the European Union, EASA has notified the FAA about the unsafe condition described in its AD. The FAA is proposing this AD after evaluating all known relevant information and determining that the unsafe condition described previously is likely to exist or develop on other helicopters of these same type designs.

Proposed AD Requirements in This NPRM

This proposed AD would require accomplishing the actions specified in EASA AD 2022–0246, described previously, as incorporated by reference, except for any differences identified as exceptions in the regulatory text of this proposed AD and except as discussed under ''Differences Between this Proposed AD and the EASA AD.''

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, the FAA proposes to incorporate EASA AD 2022–0246 by reference in the FAA final rule. This proposed AD would, therefore, require compliance with EASA AD 2022–0246 in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Using common terms that are the same as the heading of a particular section in EASA AD 2022–0246 does not mean that operators need comply only with that section. For example, where the AD requirement refers to ''all required actions and compliance times,'' compliance with this AD requirement is not limited to the section titled ''Required Action(s) and Compliance Time(s)'' in EASA AD 2022–0246. Service information referenced in EASA AD 2022–0246 for compliance will be available at *regulations.gov* under Docket No. FAA–2024–1002 after the FAA final rule is published.

Differences Between This Proposed AD and the EASA AD

EASA AD 2022–0246 applies to Model AS350BB helicopters, whereas this proposed AD would not because that model is not FAA-type certificated.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 405 helicopters of U.S. Registry. Labor rates are estimated at $85 per work-hour. Based on these numbers, the FAA estimates the following costs to comply with this proposed AD.

Tap inspecting affected MRBs for disbonding would take up to approximately 1 work-hour (up to three MRBs per helicopter) for an estimated cost of up to $85 per helicopter and $34,425 for the U.S. fleet, per inspection cycle. Replacing a blade would take approximately 6 work-hours and parts would cost up to approximately $84,000 for an estimated cost of up to $84,510 per MRB. The FAA has no data to determine the cost of or the number of helicopters that might need the MRB repaired.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

Airbus Helicopters: Docket No. FAA–2024–1002; Project Identifier MCAI–2022–01574–R.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by May 31, 2024.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Airbus Helicopters Model AS350B, AS350BA, AS350B1, AS350B2, AS350D, AS355E, AS355F, AS355F1, AS355F2, and AS355N helicopters, certificated in any category.

(d) Subject

Joint Aircraft Service Component (JASC) Code: 6210, Main Rotor Blades.

(e) Unsafe Condition

This AD was prompted by reports of debonding on the stainless steel leading edge protection of certain main rotor blades (MRBs). The FAA is issuing this AD to address the debonding of the MRB leading edge protection. The unsafe condition, if not addressed, could result in a significant unbalance of the main rotor, a high level of vibration, failure of the main rotor, failure of the main gearbox, and subsequent loss of control of the helicopter.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraphs (h) and (i) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety agency (EASA) AD 2022–0246, dated December 12, 2022 (EASA AD 2022–0246).

(h) Exceptions to EASA AD 2022–0246

(1) Where EASA AD 2022–0246 requires compliance in terms of flight hours, this AD requires using hours time-in-service.

(2) Where EASA AD 2022–0246 refers to its effective date, this AD requires using the effective date of this AD.

(3) Where the service information referenced in paragraphs (2) and (3) of EASA AD 2022–0246 specifies sending removed blade(s) to Airbus Helicopters, this AD does not require that action.

(4) This AD does not adopt the ''Remarks'' section of EASA AD 2022–0246.

(i) No Reporting Requirement

Although the service information referenced in EASA AD 2022–0246 specifies to submit certain information to the manufacturer, this AD does not include that requirement.

(j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the International Validation Branch, send it to the attention of the person identified in paragraph (k) of this AD. Information may be emailed to: *9-AVS-AIR-730-AMOC@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(k) Related Information

For more information about this AD, contact Dan McCully, Aviation Safety Engineer, FAA, 1600 Stewart Ave., Suite 410, Westbury, NY 11590; telephone (404) 474–5548; email *william.mccully@faa.gov.*

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2022–0246, dated December 12, 2022.

(ii) [Reserved]

(3) For EASA AD 2022–0246, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* internet *easa.europa.eu.* You may find the EASA material on the EASA website *ad.easa.europa.eu.*

(4) You may view this material at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Parkway, Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222–5110.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on April 9, 2024.

James D. Foltz,

Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

RIN 2120–AA66

Amendment of United States Area Navigation (RNAV) Route T–399 in the Vicinity of Clear, AK

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend United States Area Navigation Route (RNAV) T–399 in the vicinity of Clear, AK. The FAA is proposing this amendment to increase the lateral separation between T–399 and Restricted Area R–2206.

DATES: Comments must be received on or before May 31, 2024.

ADDRESSES: Send comments identified by FAA Docket No. FAA–2024–0438 and Airspace Docket No. 23–AAL–13 using any of the following methods:

* *Federal eRulemaking Portal:* Go to *www.regulations.gov* and follow the online instructions for sending your comments electronically.

* *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation, 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.

* *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

* *Fax:* Fax comments to Docket Operations at (202) 493–2251.

Docket: Background documents or comments received may be read at *www.regulations.gov* at any time. Follow the online instructions for accessing the docket or go to the Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FAA Order JO 7400.11H, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *www.faa.gov/air_traffic/publications/.* You may also contact the Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence

Avenue SW, Washington DC 20591; telephone: (202) 267–8783.

FOR FURTHER INFORMATION CONTACT: Steven Roff, Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend the airway structure as necessary to preserve the safe and efficient flow of air traffic within the National Airspace System.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it receives on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.dot.gov/privacy.*

Availability of Rulemaking Documents

An electronic copy of this document may be downloaded through the internet at *www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Operations office (see **ADDRESSES** section for address, phone number, and hours of operations). An informal docket may also be examined during normal business hours at the office of the Western Service Center, Federal Aviation Administration, 2200 South 216th St., Des Moines, WA 98198.

Incorporation by Reference

United States Area Navigation Routes are published in paragraph 6011 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11H, dated August 11, 2023, and effective September 15, 2023. These updates would be published in the next update to FAA Order JO 7400.11. That order is publicly available as listed in the **ADDRESSES** section of this document.

FAA Order JO 7400.11H lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

Background

On December 29, 2022, the FAA expanded Restricted Area R–2206 in the vicinity of Clear, AK. The expansion of this restricted area impeded the airway structure in the area at the time. Due to these impediments, the FAA amended several airways and established others to provide routing around the expanded restricted area. RNAV route T–399 was one of these routes and was established on December 29, 2022. Although the current design of T–399 does provide the appropriate separation between the route and R–2206, air traffic controllers at the Anchorage Air Route Traffic Control Center (ZAN ARTCC) have identified that additional lateral separation is needed, especially during periods when the ARTCC surveillance radar is limited. The SEAHK, AK, waypoint (WP) on T–399 is a turn point where northbound aircraft change from a northern flight path to a northeastern flight path and where southbound aircraft change from a southwest path to south. At times, aircraft initiate this turn prior to the SEAHK WP, causing air traffic controllers to intervene to ensure proper separation is maintained. This proposed amendment would relocate the SEAHK waypoint approximately 2.3 nautical miles (NM) to the west. Doing so would increase this segment of T–399s lateral spacing from R–2206, providing a 5 NM buffer from all areas of R–2206. This proposed route amendment would also require the inclusion of the EVIEE, AK, WP in the route description. The waypoint EVIEE is currently on T–399 but due to it not being a turning point, it is not included in the route description. This proposed amendment would make the EVIEE WP a turning point, thus requiring its inclusion in the route description. The EVIEE WP would be added to the route description between the PAWWW, AK, WP and the SEAHK, AK, WP.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 to amend RNAV Route T–399 in the vicinity of Clear, AK. This proposed amendment would increase the lateral separation between the RNAV route and Restricted Area R–2206. Specifically, the SEAHK, AK, WP would be relocated approximately 2.3 NM west from its current location. The SEAHK WP would be renamed to the WHYTT, AK, WP.

T–399: T–399 currently extends between the Talkeetna, AK (TKA), Very High Frequency Omnidirectional Range/Distance Measuring Equipment (VOR/DME) and the Nenana, AK (ENN), VOR/Tactical Air Navigation (VORTAC). The FAA proposes to move the SEAHK, AK, WP approximately 2.3 NM to the west and rename the route point to the WHYTT, AK, WP. Additionally, the FAA proposes to include the EVIEE, AK, WP in the route description. The EVIEE WP would be added between the PAWWW, AK, WP and the SEAHK, AK, WP.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant

rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11H, Airspace Designations and Reporting Points, dated August 11, 2023, and effective September 15, 2023, is amended as follows:

Paragraph 6011 United States Area Navigation Routes.

BILLING CODE 4910–13–P

FEDERAL TRADE COMMISSION

16 CFR Part 310

RIN 3084–AB19

Telemarketing Sales Rule

AGENCY: Federal Trade Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Trade Commission (''FTC'' or ''Commission'') proposes to amend the Telemarketing Sales Rule (''Rule'') to extend its coverage to inbound telemarketing calls by consumers to technical support services—*i.e.,* calls that consumers make in response to an advertisement through any medium or to a direct mail solicitation. The proposed amendment is necessary in light of the widespread deception and consumer injury caused by tech support scams. The amendment would provide the Commission with the ability to obtain stronger relief in cases involving tech support scams, including civil penalties and consumer redress.

DATES: Comments must be received by June 17, 2024.

ADDRESSES: Interested parties may file a comment online or on paper by following the instructions in the Request for Comment part of the **SUPPLEMENTARY INFORMATION** section below. Write ''Telemarketing Sales Rule (16 CFR part 310—NPRM) (Project No. R411001)'' on your comment, and file your comment online at *https://www.regulations.gov.* If you prefer to file your comment on paper, mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW, Mail Stop H–144 (Annex T), Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Benjamin R. Davidson, (202) 326–3055, *bdavidson@ftc.gov,* or Patricia Hsue, (202) 326–3132, *phsue@ftc.gov,* Division of Marketing Practices, Bureau of Consumer Protection, Federal Trade Commission, 600 Pennsylvania Avenue NW, Mail Stop CC–8528, Washington, DC 20580.

SUPPLEMENTARY INFORMATION:

I. Introduction

The Federal Trade Commission issues this notice of proposed rulemaking (''NPRM'') to invite public comment on a proposed amendment to the TSR that would require inbound technical support (''tech support'') calls to comply with the Rule.[1] The Rule is currently framed to exempt from its requirements: (1) calls initiated by a customer in response to an advertisement through any medium, and (2) calls initiated by a customer in response to a direct mail solicitation.[2] The proposal would specifically exclude tech support calls from these inbound call exemptions. The NPRM also explains the Commission's decision to refrain from proposing changes to the TSR that would: (1) require a notice and cancellation mechanism with negative option sales or (2) further address business to business (''B2B'') calls.[3]

This NPRM invites written comments on all issues raised by the proposed amendment, including answers to the specific questions set forth in Section IV of this Notice. The Commission has issued a final rule—published elsewhere in this same issue of the **Federal Register**—that, among other things, will require telemarketers and sellers to maintain additional records of their telemarketing transactions and prohibit material misrepresentations and false or misleading statements in B2B telemarketing calls.

II. Overview of the Telemarketing Sales Rule

Congress enacted the Telemarketing and Consumer Fraud and Abuse Prevention Act (''Telemarketing Act'' or ''Act'') in 1994 to curb deceptive and abusive telemarketing practices and provide anti-fraud and privacy protections for consumers receiving

[1] *See* 16 CFR part 310. References to the TSR will cite the section number (*e.g.,* § 310.6(b)(5)).

[2] *See* § 310.6(b)(5) and (b)(6). The exemptions currently exclude certain categories of calls that are likely to be deceptive, such as calls relating to investment opportunities and debt relief services.

[3] The Commission is concurrently issuing a Final Rule that would require B2B calls to comply with the TSR's prohibitions on deception.

telephone solicitations to purchase goods or services.[4] The Telemarketing Act directed the Commission to adopt a rule prohibiting deceptive or abusive telemarketing practices, including prohibiting telemarketers from undertaking a pattern of unsolicited calls that reasonable consumers would consider coercive or abusive of their privacy, restricting the time of day telemarketers may make unsolicited calls to consumers, and requiring telemarketers to promptly and clearly disclose that the purpose of the call is to sell goods or services.[5] The Act also directed the Commission to address in its rule other acts or practices that it found to be deceptive or abusive, including acts or practices of entities or individuals that assist and facilitate deceptive telemarketing, and to consider including recordkeeping requirements.[6] Finally, the Act authorized State Attorneys General, or other appropriate State officials, and private litigants to bring civil actions in federal district court to enforce compliance with the FTC's rule.[7]

Pursuant to the Act's directive, the FTC promulgated the TSR on August 23, 1995.[8] Since then, the Commission has amended the Rule's substantive provisions on four occasions: (1) in 2003 to, among other things, create the National Do Not Call Registry and extend the Rule to telemarketing calls soliciting charitable contributions; [9] (2) in 2008 to prohibit calls playing a recorded message (''robocalls'') selling a good or service or soliciting charitable contributions; [10] (3) in 2010 to ban the telemarketing of debt relief services requiring an advance fee; [11] and (4) in 2015 to bar the use in telemarketing of certain novel payment mechanisms widely used in fraudulent transactions.[12]

On June 3, 2022, the Commission issued an advance notice of proposed rulemaking (''ANPR'') and a separate notice of proposed rulemaking (''June NPRM'') [13] concerning several potential changes to the TSR. The June NPRM proposed amending the TSR's recordkeeping requirements and requiring B2B calls to comply with the TSR's prohibitions on several types of misrepresentations.[14] The TSR currently excludes most B2B calls from the Rule's coverage.[15] The ANPR sought comment on: (1) whether to further modify the TSR's treatment of B2B calls including removing the exemption entirely; (2) whether the Rule should require sellers of negative option products to provide consumers notice before they are billed and a simple mechanism to cancel the negative option; and (3) whether to extend the Rule to apply to inbound tech support calls.

III. Discussion of Comments

A. Negative Option

The Commission received seven comments that addressed whether the Rule should require a notice and cancellation mechanism with negative option sales.[16] Six of the comments supported creating additional protections for negative option sales, and one opposed any changes.

The Professional Association for Customer Engagement (''PACE'') opposed any changes to the Rule to address negative options. PACE claimed many consumers ''embrace negative option offers'' and regularly check their bank statements to identify and stop unwanted recurring charges.[17] PACE also argued requiring sellers or telemarketers to give notice to consumers before they are billed for recurring payments would ''amount to yet another nuisance.'' [18]

The other six commenters supported amending the Rule to create greater protections for negative option sales. Three of those comments expressed general support for the Rule requiring notice and a simple cancellation method for negative options sales.[19] The National Association of Attorneys General (''NAAG''), and the Electronic Privacy Information Center, along with thirteen other consumer organizations (''EPIC''), observed that negative options continue to grow in popularity.[20] NAAG's comment ''echoes sentiments expressed by State AGs for more than a decade,'' though those sentiments were directed to negative options generally as opposed to the specific benefits or risks of negative options sold by telemarketing.[21] NAAG noted negative option plans have become ''increasingly prevalent'' over the past decade ''especially as home delivery became more popular during the COVID–19 pandemic.'' [22] EPIC cited a prediction made by UBS that the ''subscription economy'' will more than double by 2025, and it noted the rise of a ''cottage industry'' to help consumers manage and cancel their subscriptions.[23]

Commenters also expressed concern for rules that would create inconsistent regulation of negative options. The Third Party Payments Association (''TPPA'') urged the FTC to use its rule making authority to ''promulgate consistent requirements across its various rules, regardless of sales channel, means of communication and/or method of obtaining payment authorization.'' [24] EPIC also noted Visa and Mastercard require sellers to provide advance notice before the end

[23] EPIC 33–17 at 7.

[24] TPPA 34–14 at 2.

of a trial period, and it cautioned ''leaving these safeguards up to individual companies will create a patchwork of different policies.'' [25]

At the same time the Commission has been considering amendments to the Rule, it has also been considering a broader rule that would address negative option sales regardless of the method through which the sale is made. On October 2, 2019, the Commission issued an advance notice of proposed rulemaking regarding the need for a ''Rule Concerning the Use of Prenotification Negative Option Plans,'' [26] and on April 24, 2023, the Commission issued a notice of proposed rulemaking (''Negative Option NPRM'').[27] The Negative Option NPRM would apply to sales calls made by telephone. It proposes a rule that would, among other things: require a clear and conspicuous disclosure of the negative option feature and its conditions; require sellers to obtain consumers' express informed consent to the negative option transaction; and require sellers to provide a simple mechanism to cancel the negative option that is at least as easy as the method used to initiate the transactions. Because the proposed Negative Option Rule addresses the commenters' suggestions including the preference for a rule that would apply to all transactions, instead of potentially creating different regulatory regimes depending on the sales channel, the Commission will not amend the TSR to address negative option transactions at this time.

B. Business to Business

The Commission received fifteen comments addressing the ANPR's question of whether the Commission should modify the TSR's B2B provision beyond the proposal in the June NPRM that would subject B2B calls to the TSR's prohibitions on misrepresentations. Ten comments supported removing the B2B exemption entirely, and five comments opposed making any changes. Eight of the ten comments supporting removing the B2B provision were made by consumers.[28] Two of the consumers referred to the B2B exemption as a ''loophole,'' and one complained about receiving unwanted B2B telemarketing calls.[29]

NAAG and EPIC supported removing the B2B exemption entirely. NAAG called the exemption a ''relic of a bygone era.'' [30] NAAG cited data showing that: in 2020 more than 62% of U.S. households did not have a landline; in 2020 only 26% of employees have employer-provided mobile phones; and in 2018 36% of workers participated in the gig economy in some capacity.[31] EPIC noted the ''operational realities of work have changed'' and the TSR should be amended to better reflect those realities.[32]

Several commenters who opposed making any changes to the Rule argued the Commission lacks the legal authority to remove the B2B exemption because the Telemarketing Act is focused on harms to consumers.[33] Three commenters supported keeping the B2B exemption without modification. The Chamber of Commerce asserted the B2B exemption ''has proven beneficial to the business community.'' [34] The Revenue Based Finance Coalition (''RBFC'') argued additional regulation of business activities is unwarranted ''given the sophistication of the parties to the transaction'' and regulation could ''increase the cost of capital available to small businesses.'' [35] TPPA also noted its members use telemarketing to engage with and acquire potential customers.[36]

The Commission is persuaded that it is appropriate to modify the B2B exemption to require compliance with the TSR's prohibitions on misrepresentation and false or misleading statements but not to require compliance with all other TSR requirements. The comments do not provide sufficient support to warrant modifying the B2B exemption beyond the proposal in the ANPR that would require all B2B calls to comply with the TSR's prohibitions on misrepresentations. The ANPR sought information about the market for B2B telemarketing generally, including whether businesses appreciate B2B telemarketing as a way to sell or buy products. The ANPR also sought comment on whether businesses believe they are harmed by B2B telemarketing or subject to unwanted B2B calls. The Commission noted it is ''particularly interested in seeking comment on the number of sellers or telemarketers who engage in telemarketing to businesses'' [37] and it asked about the kinds of goods or services that are sold through B2B telemarketing, as well as how often businesses receive B2B telemarketing calls.[38] Only three comments addressed these broader questions. TPPA claimed its members rely on telemarketing to sell their products, and two anonymous commenters claimed they receive an excessive volume of B2B telemarketing calls.[39] As NAAG and EPIC described, the Commission recognizes the increasing interchangeability of personal and business phones. But, as a whole, these comments do not adequately address the nature or scope of relevant problems, and they do not enable the Commission to assess related harm flowing from B2B telemarketing in order to craft proposed changes that would mitigate or address such harm. The Commission will consider further modifications to the B2B exemption at a later date if the record demonstrates any modifications may be warranted.

C. Tech Support

The Commission received ten comments addressing whether the TSR should require inbound tech support calls to comply with the TSR. Nine comments supported the proposal: six filed anonymously or by consumers and three filed by organizations.[40] NAAG ''wholeheartedly'' agreed with the proposal and believed that amending the TSR will have a ''substantial effect'' on tech support scams.[41] NAAG stated the scams ''have become one of the most prevalent scams in the nation over the past few years.'' [42] EPIC also supported the proposal and noted the ''serious nature of this fraud is comparable to that in the transactions already singled out for coverage of inbound calls.'' [43] USTelecom—The Broadband Association (''USTelecom'') also supported the proposal, noting tech support scams are a ''significant menace for both consumers and businesses.'' [44]

TPPA opposed ''prohibiting inbound telemarketing calls.'' [45] TPPA

[25] EPIC 33–17 at 8. EPIC also proposed that the Rule specify the timing, manner of delivery, and content of the notice and also set standards for cancellation.

[26] *See* ANPR, 84 FR 52393 (Oct. 2, 2019).

[27] 88 FR 24716 (Apr. 24, 2023).

[28] The comments are 34–9, 34–11, 33–5, 33–9, 33–10, 33–11, 33–12, and 33–13.

[29] *See* 33–5; 33–9.

[36] TPPA 34–14 at 2.

[37] ANPR, 87 FR at 33674.

[38] *Id.* at 33675.

[39] TPPA 34–14 at 2; 33–5; and 33–10.

[40] The comments are Jennifer Pierce 33–04; Kara V. 33–12; Anonymous 33–02; Anonymous 33–10; and Anonymous 33–11.

[41] NAAG 33–16 at 6.

[42] *Id.* at 7.

[43] EPIC 33–17 at 10.

[44] UST 33–14 at 7.

[45] TPPA 34–14 at 2. The ANPR did not propose prohibiting inbound tech support calls. It proposed requiring inbound tech support calls to comply with the TSR. It is not clear from TPPA's comment whether TPPA's concerns are limited to the effects of prohibiting tech support calls as opposed to merely requiring the calls to comply with the TSR.

acknowledged these scams disproportionately affect older adults, but it contended those problems will ''diminish over time'' as consumers become more familiar with technology.[46] TPPA also cautions that ''prohibiting'' inbound tech support calls could raise conflicts with the FTC's Policy Statement on Repair Restrictions, create confusion for consumers and businesses, and ''unduly burden legitimate business activity by prohibiting Inbound telemarketing of technical support services.''[47]

As explained below, the scope and severity of injury from tech support scams, including their impact on older adults, warrants amending the TSR.[48] The Commission is mindful of concerns the proposed amendment may unduly burden businesses, and the Commission seeks comment on whether the proposed Rule will burden businesses and how any undue burdens can be ameliorated.

IV. Proposed Rule

A. Overview of Tech Support Scams

Tech support scams can begin in a variety of ways. Sometimes the scammer places outbound calls to consumers warning them their computers have been infected.[49] Other scammers use deceptive computer pop-up messages that claim the consumer's computer has a problem and direct the consumer to call a phone number to fix the errors.[50] Still other scammers place advertisements with search engines that appear when consumers search for their computer company's tech support telephone number.[51] And sometimes, scammers pay computer security software companies so that when consumers call to activate their service, they reach the scammer and are pitched additional and unnecessary products and services.[52] Once consumers connect with the scammer, whether through outbound telemarketing or inbound telemarketing, the scammers deceive consumers about a variety of problems with their computers and dupe consumers into purchasing subscription tech support services or software they do not need.[53]

Although tech support scams have typically targeted consumers looking for help with computers, tech support scams also target consumers looking for help with other electronic devices, such as cellular phones and smart home devices. News stories report on consumers encountering tech support scams when they search for help with their iPhones[54] or look for support for their Kindle tablets.[55] In August 2022, Amazon filed a lawsuit alleging a tech support operation targeted consumers who were seeking help with their smart home doorbells and streaming video services.[56]

Consumer complaints about tech support scams have increased dramatically over the last few years, ranging from approximately 40,000 complaints in 2017 to nearly 115,000 complaints in 2021.[57] In 2018, consumers reported losing more than $55 million to these scams, with an average individual loss of approximately $400, and an average individual loss of approximately $500 for consumers over the age of 60.[58]

Moreover, tech support scams disproportionately harm older consumers, with consumers 60 years of age and older being five times more likely to report a financial loss to tech support scams compared to younger consumers.[59] Data shows tech support scams have consistently caused such disproportionate harm to older consumers. From 2015 to 2018, older consumers filed more reports on tech support scams than on any other fraud category.[60]

B. Law Enforcement and Other Responses

The Commission has responded to tech support scams through consumer education and law enforcement actions. For consumer education, the Commission has issued guidance to consumers including ''How to Spot, Avoid, and Report Tech Support Scams,''[61] and ''Keep tech support strangers out of your computer.''[62] The Commission has also responded to particular tech support campaigns with consumer education such as ''Fake Calls from Apple and Amazon Support: What you need to know,''[63] ''No gift cards for tech support scammers,''[64] and ''FTC asking for access to your computer? It's a scam.''[65] Other government agencies and consumer organizations have also

issued guidance on tech support scams.[66]

In addition to consumer education, the Commission and other State and Federal law enforcement partners have brought a multitude of actions against tech support scams. For example, on May 12, 2017, the Commission announced ''Operation Tech Trap'' which consisted of 29 law enforcement actions brought by the Commission and other law enforcement agencies against tech support schemes.[67] On March 7, 2019, the Department of Justice announced the largest-ever elder fraud sweep, which focused on tech-support scams and involved actions against ''more than 260 defendants from around the globe who victimized more than two million Americans.'' [68] The Commission has filed numerous tech support cases outside the scope of the sweeps.[69]

While the Commission has sued tech support scams for engaging in deceptive practices under the TSR where applicable, the Commission has brought cases under the FTC Act alone if the telemarketer's practices could arguably fall within an exception to the TSR. In *FTC* v. *PCCare247,* for example, the Commission used the FTC Act to seek monetary relief from a tech support operation that placed deceptive online advertisements to induce consumers to place inbound calls.[70] The calls at issue in *PCCare 247* may have fallen outside of the Rule to the extent they were telephone calls initiated by a consumer in response to an advertisement.[71] Similarly in *FTC* v. *Vylah Tec LLC,* the Commission used the FTC Act to seek monetary relief from a tech support operation that lured consumers by placing deceptive pop up messages warning consumers their computers had been infected with viruses.[72] The calls at issue in *Vylah Tec* may have fallen outside the Rule if a court were to determine that pop-up messages are a form of advertisement or a direct mail solicitation under the Rule.[73]

In April 2021, the Supreme Court's decision in *AMG Capital Management, LLC* v. *FTC* overturned forty years of precedent from the U.S. Circuit Courts of Appeal that held the Commission could take action under the FTC Act to return money unlawfully taken from consumers through deceptive practices.[74] As a result, the Commission is now limited in its ability to obtain monetary relief from tech support scams whose business practices, in some cases, arguably place the scams beyond the reach of the Rule. Amending the Rule will clarify all tech support scams are potentially subject to the Rule.

C. Discussion of the Proposed Rule

The proposed rule would define ''technical support service'' and amend the exemptions for calls in response to advertisements and calls in response to direct mail solicitations, to add technical support services to the categories of calls excluded from the exemptions.

1. Definition of Technical Support Service.

The proposed rule defines technical support services as ''any plan, program, software or service that is marketed to repair, maintain, or improve the performance or security of any device on which code can be downloaded, installed, run, or otherwise used, such as a computer, smartphone, tablet, or smart home product.'' This definition is broad enough to encompass a wide range of electronic devices.

A broad definition is necessary because, in the Commission's experience, tech support scams have shown an ability to evolve with changes in consumer behavior and technology. The Commission's first actions against tech support scams involved telemarketers making outbound calls to consumers in which the telemarketer claimed to be a Microsoft technician who had identified a virus on the consumer's computer.[75] As consumers learned that Microsoft does not call consumers to warn them about viruses on their computers, tech support scams began relying on intrusive popup messages that claimed the computers had been infected with viruses.[76] As web browsers began blocking popup messages, tech support scammers have taken other means to reach consumers, including placing advertisements that solicit inbound calls from consumers looking for tech support.[77] The techniques scammers use to alarm consumers have also evolved. Early tech support scams relied on ''red x's'' in a computer's event viewer while later scams have instructed consumers to download software programs that run

[70] *FTC* v. *PCCare247, Inc.,* 12–cv–7189 (S.D.N.Y. Oct. 3, 2012) (''PCCare247''), *available at https://www.ftc.gov/sites/default/files/documents/cases/2012/10/121003pccarecmpt.pdf* (last visited Jan. 31, 2022) (''PCCare247'').

[71] *See* § 310.6(b)(5). Even if the consumer's call was in response to an advertisement, the Rule would still apply to instances of upselling included in the call. Section 310.6(b)(5)(iii). If, for example, the consumer initiated a call for technical support with their computer and the consumer was pitched additional software products or computer services, that transaction would likely be an upsell under the Rule.

[72] *See, e.g., FTC* v. *Vylah Tec LLC,* No. 17–cv–228–FtM–99MRM (M.D. Fla. May 17, 2017) (''Vylah Tec''), *available at https://www.ftc.gov/system/files/documents/cases/162_3253_vylah_tec_llc_complant.pdf* (last visited Jan. 31, 2022).

[73] In an abundance of caution, the Commission pursued its claim regarding the pop-ups under section 5. The Commission, however, does not believe such pop-up messages are exempt under the Rule. The exemption in § 310.6(b)(5) ''applies to calls in response to television commercials, infomercials, home shopping programs, magazine and newspaper advertisements, and other forms of mass media advertising solicitation. . . . In the Commission's experience, calls responding to general media advertising do not typically involve the forms of deception and abuse the Act seeks to stem.'' 60 FR at 43860. The Commission also generally has not observed pop-up messages that contained the disclosures necessary to fall within the exemption for direct mail solicitations.

diagnostics of computers and exaggerated the risks the diagnostics reveal.[78] Scammers have also evolved from targeting computers to also targeting a variety of electronic devices.[79]

The unifying characteristic of tech support scams is that scammers attempt to profit from consumers' problems with technology and potential lack of familiarity with complicated electronic devices. As technology changes, tech support scams are likely to change as well, and the definition of tech support in the proposed rule is intended to be broad enough to encompass these changes.

The definition of tech support also excludes ''any plan, program, software, or services in which the person providing the repair obtains physical possession of the device being repaired.'' In the Commission's experience, tech support scams have not involved situations where the repair includes physical interaction with the device, such as replacing a computer hard drive or repairing a broken phone screen.[80] Whether this interaction involves face-to-face contact between the consumer and the person providing the repair or the consumer shipping the device to the repair person and waiting for a return shipment, the Commission believes tech support scams rarely involve physical repair of electronic devices.[81] The Rule currently exempts calls in which payment is not required until ''after a face-to-face sales or donation presentation by the seller.'' [82] In creating that exemption, the Commission explained the ''occurrence of a face-to-face meeting limits the incidence of telemarketing deception and abuse'' because the ''paradigm of telemarking fraud involves an interstate telephone call in which the customer has no other direct contact with the caller.'' [83] Here too, the ''paradigm'' of tech support scams are consumers speaking with third parties with whom they have limited contact and often at a time when they have been misled to believe they have a problem with their electronic device. Physical in-person repair does not involve the same pressures as remote tech support, and it is less conducive to scams. The Commission seeks comment on the proposed definition of tech support.

2. Requirements.

The proposed rule would add ''tech support services'' to the categories of calls excluded from the TSR's exemptions for inbound calls ''in response to an advertisement through any medium'' and inbound calls in response to ''a direct mail solicitation,'' including email.[84] The Commission created these exemptions in the original Rule based on its consideration of four factors: whether Congress intended certain types of sales activity to be exempt under the Rule; whether the conduct or business in question ''already is regulated extensively by Federal or State law''; whether the conduct ''lends itself easily to the forms of deception or abuse that the Act is intended to address''; and whether requiring business to comply the Rule would be ''unduly burdensome weighed against the likelihood that sellers or telemarketers engaged in fraud would use an exemption to circumvent Rule coverage.'' [85]

The Commission decided to create exemptions from the rule for calls in response to advertisements and direct mail solicitation because, in the Commission's experience, calls in response to these solicitations ''do not typically involve the forms of deception and abuse the Act seeks to stem.'' [86] At the same time, the Commission recognized ''some deceptive sellers or telemarketers use mass media or general advertising to entice their victims to call, particularly in relation to the sale of investment opportunities, specific credit-related programs'' and other areas.[87] The Commission decided to exclude certain categories of calls from the exemptions given its ''experience with the marketing of these deceptive telemarketing schemes.'' [88] The Commission's experience with tech support schemes also supports excluding tech support calls from the exemptions for inbound calls in response to advertisements and direct mail solicitations.

The Commission is mindful of the potential burden the proposed amendment may have on tech support businesses that do not engage in deceptive practices. The proposed amendment has been drafted in an attempt to minimize the burden on these businesses, and the Commission seeks comment on whether the burden would be undue or can be further reduced.

Two features of the proposed amendment would minimize the burden on legitimate tech support businesses. First, tech support calls ''that are not the result of any solicitation by a seller, charitable organization, or telemarketer'' would still be exempt under § 310.6(b)(5). As the Commission recognized when it created this exemption, these type of calls are not ''part of a telemarketing 'plan, program, or campaign * * * to induce the purchase of goods or services' under the Act.'' [89] The Commission further explained: ''This exemption covers incidental uses of the telephone that are not in response to a direction solicitation, *e.g.,* calls from a customer . . . to obtain information or customer technical support.'' [90] Under this exemption, as long as the call is not solicited, a consumer calling their computer manufacturer for technical support or a home security company about a disruption to their service would not be subject to the Rule unless, as part of that transaction, the company also engaged in an upsell.[91]

Second, excluding tech support where the person providing the service takes physical possession of the device will also limit the breadth of the rule. Consumer calls to a local repair shop or to the manufacturer of their device seeking physical repairs will not be subject to the Rule. The Commission seeks comment on whether it should consider other approaches to reduce any burden imposed by the Rule.

V. Request for Comment

The Commission seeks comments on all aspects of the proposed regulation. The Commission also seeks comments on the estimated burden that compliance with the proposed regulations will impose on sellers and telemarketers. In their replies, commenters should provide any available evidence and data that supports their position, such as empirical data on the costs of complying with the proposed amendment.

[78] *See* PCCare247; Elite IT.

[79] Supra notes 54–56.

[80] Tech support scammers sometimes obtain remote access to a computer or electronic device to perform diagnosis or service. The ''physical possession'' is not intended to apply when the tech support involves remote access to a device.

[81] The Commission's lawsuit against Office Depot is an exception to this pattern. *See FTC* v. *Office Depot Inc.,* 9:19-cv-80431 (S.D. Fla. Mar. 29, 2019) (alleging that Office Depot and Support.com deceived consumers who brought their computers into Office Depot stores for support services).

You can file a comment online or on paper. For the Commission to consider your comment, we must receive it on or before June 17, 2024. Write ''Telemarketing Sales Rule (16 CFR 310—NPRM) (Project No. R411001)'' on your comment. Your comment including your name and your State will be placed on the public record of this proceeding, including, to the extent practicable, on the *https://www.regulations.gov* website.

Because of the agency's heightened security screening, postal mail addressed to the Commission will be subject to delay. We strongly encourage you to submit your comment online through the *https://www.regulations.gov* website. To ensure the Commission considers your online comment, please follow the instructions on the web-based form.

If you file your comment on paper, write ''Telemarketing Sales Rule (16 CFR 310—NPRM) (Project No. R411001)'' on your comment and on the envelope, and mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW, Mail Stop H–144 (Annex T), Washington, DC 20580. If possible, please submit your paper comment to the Commission by overnight service.

Because your comment will be placed on the publicly accessible website, *https://www.regulations.gov,* you are solely responsible for making sure your comment does not include any sensitive or confidential information. In particular, your comment should not include any sensitive personal information, such as your or anyone else's Social Security number; date of birth; driver's license number or other State identification number, or foreign country equivalent; passport number; financial account number; or credit or debit card number. You are also solely responsible for making sure your comment does not include any sensitive health information, such as medical records or other individually identifiable health information. In addition, your comment should not include any ''trade secret or any commercial or financial information which . . . is privileged or confidential.'' 15 U.S.C. 46(f); *see* FTC Rule 4.10(a)(2), 16 CFR 4.10(a)(2). In particular, your comment should not include competitively sensitive information such as costs, sales statistics, inventories, formulas, patterns, devices, manufacturing processes, or customer names.

Comments containing material for which confidential treatment is requested must be filed in paper form, must be clearly labeled ''Confidential,'' and must comply with FTC Rule 4.9(c), 16 CFR 4.9(c). In particular, the written request for confidential treatment that accompanies the comment must include the factual and legal basis for the request and must identify the specific portions of the comment to be withheld from the public record. *See* FTC Rule 4.9(c), 16 CFR 4.9(c). Your comment will be kept confidential only if the General Counsel grants your request in accordance with the law and the public interest. Once your comment has been posted publicly at *www.regulations.gov,* as legally required by FTC Rule 4.9(b), 16 CFR 4.9(b), we cannot redact or remove your comment from the FTC website, unless you submit a confidentiality request that meets the requirements for such treatment under FTC Rule 4.9(c), 16 CFR 4.9(c), and the General Counsel grants that request.

Visit the FTC website to read this document and the news release describing it. The FTC Act and other laws the Commission administers permit the collection of public comments to consider and use in this proceeding as appropriate. The Commission will consider all timely and responsive public comments it receives on or before June 17, 2024. For information on the Commission's privacy policy, including routine uses permitted by the Privacy Act, see *https://www.ftc.gov/site-information/privacy-policy.*

In addition to the issues raised above, the Commission solicits public comment on the list of questions below regarding the costs and benefits of the proposed amendment. The Commission requests that comments provide the factual data upon which they are based. These questions are designed to assist the public and should not be construed as a limitation on the issues on which a public comment may be submitted.

A. Questions for Comments

1. Should the Commission finalize the proposed rule as a final rule? Why or why not? How, if at all, should the Commission change the proposed rule in promulgating a final rule?

2. Is the definition of ''technical support service'' clear and understandable? It is ambiguous in any way? How, if at all, should it be improved?

3. Is the definition of ''technical support service'' appropriately tailored? Is it overinclusive or underinclusive in any way? How, if at all, should it be improved?

4. Do you support excluding from the definition of technical support instances in which the person providing the repair obtains physical possession of the device being repaired? Why or why not?

5. Do you support the proposal to add technical support services to the list of calls that do not qualify for the exemptions for calls in response to advertisements and direct mail solicitations in § 310.6(b)(5) and § 310.6(b)(6)? Should the Commission consider other modifications to the Rule to address tech support scams?

6. Would the proposed rule place an undue burden on technical support operations that do not engage in deceptive acts or practices? If so, what burden would it impose and how can the burden be reduced?

7. Do you agree with the estimates in the Paperwork Reduction Analysis? Why or why not?

8. How many new calls would be subject to the TSR if the proposed rule is adopted?

9. Would the proposed rule disproportionately benefit or burden original equipment manufacturers? If so, how should the proposed rule be changed?

VI. Paperwork Reduction Act

The current Rule contains various provisions that constitute information collection requirements as defined by 5 CFR 1320.3(c), the definitional provision within the Office of Management and Budget (''OMB'') regulations implementing the Paperwork Reduction Act (PRA). 44 U.S.C. chapter 35. OMB has approved the Rule's existing information collection requirements through October 31, 2025 (OMB Control No. 3084–0097). The proposed amendment will newly require certain inbound tech support calls to comply with the Rule's recordkeeping and disclosure requirements. This will increase the PRA burden for sellers or telemarketers as detailed below. Accordingly, FTC staff is simultaneously submitting this notice of proposed rulemaking and the associated Supporting Statement to OMB for review under the PRA.[92]

A. Estimated Annual Hours Burden

The Commission estimates the PRA burden of the proposed amendment based on its knowledge of the telemarketing industry and data compiled from the Do Not Call Registry. The annual hours of burden for sellers or telemarketers will consist of two components: the time required to make disclosures and the costs of complying with the Rule's recordkeeping requirements.

[92] This PRA analysis focuses specifically on the information collection requirements created by or otherwise affected by the proposed amendment.

First the Commission estimates that the disclosure burden will take 19,566 hours. Calculating the disclosure burden requires estimating the number of inbound tech support calls that will now be subject to the TSR if the proposed amendment goes into effect. The Commission uses the same methodology it has used in the past to calculate the disclosure burden for categories of calls that are excluded from the TSR's exemptions for inbound calls.[93]

As it has in the past, the Commission estimates that there are 1.8 billion inbound telemarketing calls that result in sales, that consumer injury from telemarketing fraud is $40 billion a year, and that it takes seven seconds to make the disclosures required by the Rule in inbound calls.[94] The Commission estimates the disclosure burden for particular categories of calls that are excluded from the TSR's exemptions by extrapolating a percentage of those calls based on their complaint rates in the FTC's Consumer Sentinel system.[95] The resulting percentage of total fraud complaints must be adjusted to reflect the fact that only a relatively small percentage of telemarketing calls are fraudulent. To extrapolate the percentage of fraudulent telemarketing calls, staff divides a Congressional estimate of annual consumer injury from telemarketing fraud ($40 billion) [96] by available data on total consumer and business-to-business telemarketing sales ($310.0 billion projected for 2016),[97] or 13%. The two percentages are then multiplied together to determine the percentage of the 1.8 billion annual inbound telemarketing calls represented by each type of fraud complaint. That number is then rounded to the nearest ten. In 2022, there were 2,369,527 fraud complaints and 89,158 complaints about tech support.[98] Thus, the general sales disclosure burden is 19,566 hours (1.8 billion inbound calls ×the percentage of fraud complaints for tech support (89,158/2,369,527) ×the percentage of telemarketing calls that are estimated to be fraudulent (.13) ×the length of the disclosures (8 seconds per disclosure, ÷ 3,600 to convert to hours).

Second, the estimated recordkeeping burden is 104,250 hours. Estimating this burden requires estimating how many new telemarketing entities will be subject to the TSR if the proposed amendment goes into effect. To create this estimate, staff first estimates the number of existing telemarketing entities that engage in tech support sales. In calendar year 2022, 10,804 telemarketing entities accessed the Do Not Call Registry; however, 549 were ''exempt'' entities obtaining access to data.[99] Of the non-exempt entities, 6,562 obtained data for a single State. Staff assumes that these 6,562 entities are operating solely intrastate, and thus would not be subject to the TSR. Therefore, staff estimates that approximately 3,693 telemarketing entities (10,804—549 exempt—6,562 intrastate) are currently subject to the TSR. To estimate the percentage of those entities that sell tech support products and services, staff again relies on the percentage of fraud complaints for tech support out of the total fraud complaints. (89,158/2,369,527) which is multiplied by the number of telemarketing entities, (3,693) to produce the estimate that 139 telemarketing entities receive tech support calls.

If the proposed amendment goes into effect, additional businesses will likely be covered by the TSR. For example, tech support companies that advertise their products through general advertisements and do not engage in upselling may be subject to the Rule for the first time.[100] On the other hand, companies that market through a combination of advertisements and outbound telemarketing are already subject to the Rule. Companies that receive inbound calls from consumers with questions about their products who then engage in upsells of technical support services are also already subject to the Rule. The Commission estimates that the Proposed amendment will increase the number of telemarketing entities that receive inbound tech support calls by a factor of 5, which would mean that an additional 695 entities will be covered by the Rule.

The Commission estimates that after implementation of the separate Final Rule proceeding which, among other things, requires telemarketers and sellers to maintain additional records of their telemarketing transactions, complying with the TSR's current recordkeeping requirements requires 150 hours for new entrants to develop recordkeeping systems that comply with the TSR, for a total annual recordkeeping burden of 104,250 hours.[101]

B. Estimated Annual Labor Costs

The Commission estimates annual labor costs by applying appropriate hourly wage rates to the burden hours described above. The Commission estimates that the annual labor cost for disclosures will be $315,991. This total is the product of applying an assumed hourly wage of $16.15 for 19,566 hours of disclosures.[102] The Commission estimates that the annual labor cost for recordkeeping will be $3,228,623. This is calculated by applying a skilled labor rate of $30.97/hour [103] to the estimated 150 burden hours for the estimated 695 entities that will now be covered by the Rule ($30.97 × 150 × 695).

C. Estimated Annual Non-Labor Costs

The final rule published in this same issue of the **Federal Register** estimates that the annual non-labor costs are $55 a year, derived from $5 for electronically storing audio files, and $50 for storing the required records. The Commission thus estimates that the annual non-labor costs will be $38,255 (695 entries × $55).

The Commission invites comments on the accuracy of the FTC's burden estimates, including whether the methodology and assumptions used are valid. Specifically, the Commission invites comments on: (1) whether the

Under PRA requirements, OMB's Office of Information and Regulatory Affairs (OIRA) reviews Federal information collections.

VII. Regulatory Flexibility Act

The Regulatory Flexibility Act (''RFA''), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996, requires that the Commission conduct an analysis of the anticipated economic impact of the proposed amendment on small entities.[104] The RFA requires that the Commission provide an Initial Regulatory Flexibility Analysis (''IRFA'') with a proposed rule unless the Commission certifies that the rule will not have a significant economic impact on a substantial number of small entities.[105]

The Commission believes that the proposed amendment would not have a significant economic impact upon small entities, nor will it affect a substantial number of small businesses. In the Commission's view, the proposed amendment should not significantly increase the costs of small entities that are sellers or telemarketers. Therefore, based on available information, the Commission certifies that amending the Rules as proposed will not have a significant economic impact on a substantial number of small entities, and hereby provides notice of that certification to the Small Business Administration (''SBA''). Nonetheless, the Commission has determined that it is appropriate to publish an IRFA to inquire into the impact of the proposed amendment on small entities. The Commission invites comment on the burden on any small entities that would be covered and has prepared the following analysis.

A. Description of the Reasons the Agency Is Taking Action

The Commission proposes amending the TSR to explicitly exclude tech support calls from the exemptions for inbound calls by consumers in response to advertisements and direct mail solicitations from tech support services. As described in Section IV, the proposed amendment is intended to address the widespread harm caused by deceptive tech support services, which disproportionately impact older consumers compared to younger ones.

B. Statement of Objectives of, and Legal Basis for, the Proposed Amendment

The objective of the proposed amendment is to lessen the harm caused by deceptive tech support scams. The legal basis for the proposed amendment is the Telemarketing Act, which authorizes the Commission to issue rules to prohibit deceptive or abusive telemarketing practices.

C. Description and Estimated Number of Small Entities to Which the Rule Will Apply

The proposed amendment to the Rule affects sellers and telemarketers that sell technical support services through inbound telemarketing calls that are made in response to advertisements and direct mail solicitations. As noted above, staff estimates that there are 695 such entities that would be covered by the Rule. For telemarketers, a small business is defined by the SBA as one whose average annual receipts do not exceed $25.5 million.[106] It is not possible to identify how many of these entities would be a small business as defined by the SBA. Commission staff are unable to determine a precise estimate of how many sellers or telemarketers constitute small entities as defined by SBA. The Commission invites comment and information on this issue.

D. Projected Reporting, Recordkeeping, and Other Compliance Requirements, Including Classes of Small Entities and Professional Skills Needed To Comply

The proposed amendment would require sellers and telemarketers that sell technical support services through inbound telemarketing calls that are made in response to advertisements and direct mail solicitations to comply with the TSR's disclosure and recordkeeping requirements. The small entities potentially covered by the proposed amendment will include all such entities subject to the Rule. The Commission has described the skills necessary to comply with these recordkeeping requirements in Section VI above on the Paperwork Reduction Act.

E. Identification of Duplicative, Overlapping, or Conflicting Federal Rules

The Commission has not identified any other Federal statutes, rules, or policies currently in effect that may duplicate, overlap or conflict with the proposed amendment. The Commission invites comment and information regarding any potentially duplicative, overlapping, or conflicting Federal statutes, rules, or policies.

F. Significant Alternatives to the Proposed Amendment

The Commission believes that there are no significant alternatives to the proposed amendment but is seeking comment on whether the proposed rule places an undue burden on technical support operations that do not engage in deceptive acts or practices and, if so, how can the burden be reduced. The Commission has over many years pursued alternatives to the proposed amendment in the form of law enforcement and consumer outreach. The continued injury caused by these scams shows that the proposed amendment to the Rule is necessary.

VIII. Communications by Outside Parties to the Commissioners or Their Advisors

Written communications and summaries or transcripts of oral communications respecting the merits of this proceeding, from any outside party to any Commissioner or Commissioner's advisor, will be placed on the public record.[107]

List of Subjects in 16 CFR Part 310

Advertising; Consumer protection; Telephone; Trade practices.

[104] 5 U.S.C. 601 through 612.

[105] 5 U.S.C. 605.

[106] Telemarketers are typically classified as ''Telemarketing Bureaus and Other contact Centers,'' (NAICS Code 561422). *See* Table of Small Business Size Standards Matched to North American Industry Classification System Codes, *available at https://www.sba.gov/sites/sbagov/files/2023-06/Table%20of%20Size%20Standards_Effective%20March%2017%2C%202023%20%282%29.pdf.*

[107] *See* 16 CFR 1.26(b)(5).

For the reasons stated above, the Federal Trade Commission proposes to amend part 310 of title 16 of the Code of Federal Regulations as follows:

PART 310—TELEMARKETING SALES RULE

■ 1. The authority for part 310 continues to read as follows:

Authority: 15 U.S.C. 6101–6108.

■ 2. Amend § 310.2 by:
■ a. Redesignating paragraphs (ff) through (hh) as paragraphs (gg) through (ii); and
■ b. Adding new paragraph (ff).

The addition reads as follows:

§ 310.2 Definitions.

* * * * *

(ff) Technical Support Service means any plan, program, software, or service that is marketed to repair, maintain, or improve the performance or security of any device on which code can be downloaded, installed, run, or otherwise used, such as a computer, smartphone, tablet, or smart home product. Technical support service does not include any plan, program, software, or services in which the person providing the repair, maintenance, or improvement obtains physical possession of the device being repaired.

* * * * *

■ 3. Amend § 310.6 by revising paragraphs (b)(5)(i) and (b)(6)(ii) to read as follows:

§ 310.6 Exemptions.

* * * * *

(b) * * *

(5) * * *

(i) Calls initiated by a customer or donor in response to an advertisement relating to investment opportunities, debt relief services, technical support services, business opportunities other than business arrangements covered by the Franchise Rule or Business Opportunity Rule, or advertisements involving offers for goods or services described in § 310.3(a)(1)(vi) or § 310.4(a)(2) through (4);

* * * * *

(6) * * *

(ii) Calls initiated by a customer in response to a direct mail solicitation relating to prize promotions, investment opportunities, debt relief services, technical support services, business opportunities other than business arrangements covered by the Franchise Rule or Business Opportunity Rule, or goods or services described in § 310.3(a)(1)(vi) or § 310.4(a)(2) through (4);

* * * * *

By direction of the Commission.

Joel Christie,

Acting Secretary.

BILLING CODE 6750–01–P

DEPARTMENT OF COMMERCE

Patent and Trademark Office

37 CFR Part 42

[Docket No. PTO–P–2024–0014]

RIN 0651–AD79

Rules Governing Director Review of Patent Trial and Appeal Board Decisions

AGENCY: United States Patent and Trademark Office, Department of Commerce.

ACTION: Notice of proposed rulemaking.

SUMMARY: The United States Patent and Trademark Office (USPTO or Office) proposes new rules to govern the process for the review of Patent Trial and Appeal Board (PTAB or Board) decisions in America Invents Act (AIA) proceedings by the Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office (Director). Specifically, the USPTO proposes these rules in light of stakeholder feedback received in response to a request for comments (RFC). The proposed rules promote the accuracy, consistency, and integrity of PTAB decision-making in Leahy-Smith America Invents Act of 2011 (AIA) proceedings.

DATES: Comments must be received by June 17, 2024 to ensure consideration.

ADDRESSES: For reasons of Government efficiency, comments must be submitted through the Federal eRulemaking Portal at *www.regulations.gov*. To submit comments via the portal, one should enter docket number PTO–P–2024–0014 on the homepage and select ''search.'' The site will provide search results listing all documents associated with this docket. Commenters can find a reference to this notice and select the ''Comment'' icon, complete the required fields, and enter or attach their comments. Attachments to electronic comments will be accepted in Adobe® portable document format (PDF) or Microsoft Word® format. Because comments will be made available for public inspection, information that the submitter does not desire to make public, such as an address or phone number, should not be included in the comments.

Visit the Federal eRulemaking Portal for additional instructions on providing comments via the portal. If electronic submission of, or access to, comments is not feasible due to a lack of access to a computer and/or the internet, please contact the USPTO using the contact information below for special instructions.

FOR FURTHER INFORMATION CONTACT: Thomas Krause, Director Review Executive; Kalyan Deshpande, Vice Chief Administrative Patent Judge; or Amanda Wieker, Acting Vice Chief Administrative Patent Judge, at 571–272–9797.

SUPPLEMENTARY INFORMATION: The United States Patent and Trademark Office proposes new rules governing the process for the review of Patent Trial and Appeal Board decisions in AIA proceedings by the Under Secretary of Commerce for Intellectual Property and Director [1] of the United States Patent and Trademark Office.

This Notice of Proposed Rulemaking (NPRM) provides that a party to an AIA proceeding may request Director Review in that AIA proceeding of any decision on institution, any final written decision, or any decision granting rehearing of a decision on institution or a final written decision. The NPRM also sets forth the timing and format of a party's request for Director Review. In addition, the NPRM provides that the Director may initiate a review of any decision on institution, any final written decision, or any decision granting rehearing of a decision on institution or a final written decision on the Director's own initiative.

The NPRM addresses the impact of Director Review on the underlying proceeding at the PTAB, as well as the time by which an appeal to the U.S. Court of Appeals for the Federal Circuit must be filed.

[1] In this notice of proposed rulemaking, references to the ''Director'' include the Under Secretary of Commerce for Intellectual Property and Director of the USPTO, an individual serving as the Acting Director or one performing the functions and duties of the Director, or an individual designated to fill the Director's role in case of a conflict of interest. See Procedures for Recusal to Avoid Conflicts of Interest and Delegations of Authority, available at *https://www.uspto.gov/sites/default/files/documents/Director-Memorandum-on-Recusal-Procedures.pdf*. For example, if the Director has a conflict that requires the Director to be recused, the Deputy Under Secretary of Commerce for Intellectual Property and Deputy Director of the USPTO will take the required action. If the position of the Deputy Director is vacant, or if the Deputy Director also has a conflict, the Commissioner for Patents will take the required action, if no conflicts exist for the Commissioner.

Background

Development of This Notice of Proposed Rulemaking

On September 16, 2011, Congress enacted the AIA (Pub. L. 112–29, 125 Stat. 284 (2011)). The AIA established the PTAB,[2] which is made up of administrative patent judges (APJs) and four statutory members, namely the Director, the Deputy Director, the Commissioner for Patents, and the Commissioner for Trademarks. 35 U.S.C. 6(a). The Director is appointed by the President, by and with the advice and consent of the Senate. 35 U.S.C. 3(a)(1). APJs are appointed by the Secretary of Commerce in consultation with the Director. *Id.* 6(a). The PTAB hears and decides ex parte appeals of adverse decisions by examiners in applications for patents, applications for reissue, and reexamination proceedings, and proceedings under the AIA, including inter partes reviews (IPRs), post grant reviews (PGRs), covered business method (CBM) patent reviews,[3] and derivation proceedings, all in panels of at least three members. *Id.* 6(b), (c). Under the statute, the Director designates the members of each panel. *Id.* 6(c). The Director has delegated that authority to the Chief Judge of the PTAB. See PTAB Standard Operating Procedure 1 (Rev. 15) (SOP 1), Assignment of Judges to Panels, available at *www.uspto.gov/sites/default/files/documents/SOP%201%20R15%20FINAL.pdf.*

35 U.S.C. 6(c) states that ''[o]nly the Patent Trial and Appeal Board may grant rehearings'' of Board decisions. In *United States* v. *Arthrex, Inc.* (''*Arthrex*''), the Court held that the Appointments Clause of the Constitution (art. II, sec. 2, cl. 2) and the supervisory structure of the USPTO require the Director, a principal officer of the United States, to have the ability to review the PTAB's final written decisions in IPR proceedings. See *United States* v. *Arthrex, Inc.,* 141 S. Ct. 1970, 1986 (2021). The Court determined that ''35 U.S.C. 6(c) is unenforceable as applied to the Director insofar as it prevents the Director from reviewing the decisions of the PTAB on [the Director's] own.'' *Id.* at 1987. The Court added that:

this suit concerns only the Director's ability to supervise APJs in adjudicating petitions for inter partes review. We do not address the Director's supervision over other types of adjudications conducted by the PTAB, such as the examination process for which the Director has claimed unilateral authority to issue a patent.

Id. The Court thus held that ''the Director has the authority to provide for a means of reviewing PTAB decisions'' in IPR proceedings and ''may review final PTAB decisions and, upon review, may issue decisions [ ] on behalf of the Board.'' *Id.* (citations omitted). Additionally, the Court in *Arthrex* made clear that ''the Director need not review every decision of the PTAB,'' nor did it require the Director to accept requests for review or issue a decision in every case. *Id.* at 1988. Instead, ''[w]hat matters is that the Director have the discretion to review decisions rendered by APJs.'' *Id.* See *Arthrex, Inc.* v. *Smith & Nephew, Inc.,* 35 F.4th 1328, 1338 (Fed. Cir. 2022) (noting same); *CyWee Group Ltd.* v. *Google LLC,* 59 F.4th 1263, 1268 (Fed. Cir. 2023) (''[T]he Appointments Clause was intended to prevent unappointed officials from wielding too much authority, not to guarantee procedural rights to litigants, such as the right to seek rehearing from the Director.'' '' (quoting *Piano Factory Grp., Inc.* v. *Schiedmayer Celesta GmbH,* 11 F.4th 1363, 1374 (Fed. Cir. 2021)).

Following the *Arthrex* decision, in June 2021 the USPTO implemented an interim process for Director Review of final written decisions in AIA proceedings and published *Arthrex* Questions and Answers (Q&As), which was available on a USPTO web page. On April 22, 2022, the USPTO published two web pages to replace the *Arthrex* Q&As. Specifically, the USPTO published an ''Interim Process for Director Review'' web page,[4] setting forth more details on the interim process and additional suggestions and guidance for parties who wish to request Director Review. The USPTO also published a web page providing the status of all Director Review requests, available at *www.uspto.gov/patents/patent-trial-and-appeal-board/status-director-review-requests* (status web page). The status web page includes a spreadsheet that is updated monthly and has information about the proceedings in which Director Review has been granted. The updated interim process guidance increased clarity as the Office continued to update and improve the interim Director Review process based on experience and initial stakeholder feedback.

On July 20, 2022, the USPTO issued an RFC[5] on Director Review, Precedential Opinion Panel (POP) review,[6] and the internal circulation and review of PTAB decisions. 87 FR 43249–52.[7] The RFC is discussed in detail below. The USPTO considered stakeholder comments to the RFC as it worked to formalize the proposed rules for Director Review. The Office has continued to revise the interim Director Review process while also pursuing rulemaking.

On July 24, 2023, the USPTO modified the interim Director Review process to allow parties to request Director Review of decisions on institution in AIA proceedings, and to introduce a process by which the Director may delegate review of a Board decision to a Delegated Rehearing Panel (DRP). See ''Revised Interim Director Review Process'' web page (available at *www.uspto.gov/patents/ptab/decisions/revised-interim-director-review-process,* also called the Director Review web page); ''Delegated Rehearing Panel'' web page (available at *www.uspto.gov/patents/ptab/decisions/delegated-rehearing-panel*). These changes were based on the Office's experience with Director Review and stakeholder feedback. The USPTO made additional updates to the interim Director Review process on September 18, 2023, (updating processes related to Director Review of PTAB decisions on remand from the Director) and January 19, 2024 (updating processes related to requests for rehearing of Director Review decisions).

The rule proposed in this NPRM is consistent with the interim process. If the USPTO issues a final rule, the Director Review web page will be updated when the rule becomes effective. After the rule becomes effective, any further modifications to the Director Review process will be

[2] The PTAB was previously known as the Board of Patent Appeals and Interferences.

[3] Under section 18 of the AIA, the transitional program for post grant review of CBM patents sunset on September 16, 2020. AIA 18(a). Although the program has sunset, a few existing CBM proceedings, based on petitions filed before September 16, 2020, remain pending, for example, on appeal to the United States Court of Appeals for the Federal Circuit.

[4] This web page was superseded by the ''Revised Interim Director Review Process'' web page, discussed below.

[5] Request for Comments (RFC) on Director Review, Precedential Opinion Panel Review, and Internal Circulation and Review of Patent Trial and Appeal Board Decisions. 87 FR 43249–52 (July 20, 2022).

[6] The USPTO established the POP review process in 2018 and set forth that process in the Board's Standard Operating Procedure 2, revision 10. The POP process was used to establish binding agency authority concerning major policy or procedural issues, or other issues of exceptional importance in the limited situations where it was appropriate to create such binding agency authority through adjudication before the PTAB. The USPTO retired the POP process on July 24, 2023, in view of recent changes to the interim Director Review process.

[7] Available at *www.federalregister.gov/documents/2022/07/20/2022-15475/request-for-comments-on-director-review-precedential-opinion-panel-review-and-internal-circulation.*

consistent with the rule and will be reflected on the Director Review web page.

Request for Comments

As noted above, on July 20, 2022, the Office published an RFC on Director Review, POP review, and the internal circulation and review of PTAB decisions. 87 FR 43249–52. The RFC included the following questions pertinent to Director Review:

1. Should any changes be made to the interim Director Review process, and if so, what changes and why?
2. Should only the parties to a proceeding be permitted to request Director Review, or should third-party requests for Director Review be allowed, and if so, which ones and why?
3. Should requests for Director Review be limited to final written decisions in IPR and PGR? If not, how should they be expanded and why?
4. Should a party to a proceeding be able to request both Director Review and rehearing by the merits panel? If so, why and how should the two procedures interplay?
5. What criteria should be used in determining whether to initiate Director Review?
6. What standard of review should the Director apply in Director Review? Should the standard of review change depending on what type of decision is being reviewed?
7. What standard should the Director apply in determining whether or not to grant sua sponte Director Review of decisions on institution? Should the standard change if the decision on institution addresses discretionary issues instead of, or in addition to, merits issues?
8. Should there be a time limit on the Director's ability to reconsider a petition denial? And if so, what should that time limit be?
9. Are there considerations the USPTO should take with regard to the fact that decisions made on Director Review are not precedential by default, and instead are made and marked precedential only upon designation by the Director?
10. Are there any other considerations the USPTO should take into account with respect to Director Review?
11. Should the POP review process remain in effect, be modified, or be eliminated in view of Director Review? Please explain.
12. Are there any other considerations the USPTO should take into account with respect to the POP process?

Id. at 43252.

The RFC closed on October 19, 2022, and the Office received comments from intellectual property organizations, trade organizations, other organizations, and individuals. These comments are available at *www.regulations.gov/docket/PTO-P-2022-0023/comments* (collected responses to RFC). Responses to the specific questions asked in the RFC pertinent to Director Review or POP review are summarized briefly below.

In response to question 2, many commenters suggested that only parties to the proceeding should be permitted to request Director Review, consistent with the interim process. Some of these commenters suggested that limiting Director Review requests to the parties best promotes judicial economy and efficiency as the parties are best positioned to present the issues on review. Notably, some of these commenters also suggested that third parties could still participate when appropriate, either through amicus briefing or joinder. Other commenters suggested that allowing third-party requests would be preferred because PTAB decisions often have broad ramifications that affect non-parties.

In response to question 3, some commenters suggested that Director Review should be available for both final written decisions and decisions on institution, and especially for denials of institution. Some commenters argued that no other review mechanism existed for review of decisions on institution.[8] Other commenters suggested that Director Review should be available only for final written decisions, in part out of efficiency concerns. One commenter suggested that Director Review should be available for ex parte reexaminations and ex parte appeals. As discussed above, based on experience and in response to stakeholder feedback, the USPTO expanded the interim Director Review process to allow parties to request Director Review of decisions on institution in AIA proceedings.

In response to question 4, commenters were divided as to whether, consistent with the interim process, parties should be permitted to request either Director Review or panel rehearing, but not both. Those in favor of allowing parties to file requests for both types of rehearing argued that a decision may include some issues more appropriate for the original panel to reconsider, and other issues more appropriate for the Director to review. Those in favor of permitting parties to request only one form of rehearing argued that this reduces duplication, waste, inefficiency, and delay. Moreover, some argued that requiring a choice between panel rehearing and Director Review avoids potentially conflicting analyses between the Director and the panel.

In response to question 5, commenters did not agree on the criteria that should be used in determining whether to initiate Director Review. Some commenters suggested that Director Review should apply to issues of policy, while others suggested that policy should be made by formal rulemaking only. Similarly, some commenters stated that Director Review should be limited to important issues, such as policy, or statutory or regulatory interpretation, while others suggested that Director Review should consider all panel errors and abuses of discretion.

In response to question 6, some commenters suggested that the Director should apply de novo review for all issues on review. These commenters suggested that a standard that is deferential to the Board panel would not provide clear guidance. Other commenters favored de novo review on the basis that *Arthrex* requires the Director to substitute the Director's own judgment.

In response to question 7, commenters were divided on the appropriate standard for initiating sua sponte Director Review (*i.e.,* on the Director's own initiative). Some commenters suggested that the same standard of review should apply for all decisions, including sua sponte Director Review. The commenters also suggested that the same standard of review should apply to issues related to both the asserted merits of unpatentability and the Director's discretionary authority to institute an AIA proceeding. Several commenters suggested that sua sponte Director Review should be limited to extraordinary circumstances, including issues of exceptional importance to the USPTO or the patent community. One commenter suggested that sua sponte Director Review should be limited to extraordinary circumstances and only for decisions on institution.

In response to question 8, some commenters suggested that there should be a set time limit on the conclusion of Director Review, in particular when the Director reviews a denial of institution. The commenters generally suggested the need for certainty regarding timing and finality in both the grant of Director Review and the ultimate Director Review decision. One commenter suggested that no time limit would be necessary.

In response to question 9, all responsive commenters suggested that a Director Review decision should not be precedential by default. Some

[8] POP review was available for decisions on institution at the time of the RFC.

commenters suggested that decisions should be made precedential only when needed to ensure consistency and predictability, and only as applied to certain issues. Some commenters also suggested a clear process with objective criteria for determining when to make cases precedential. Other commenters suggested that a Director Review decision should never be precedential so as to not supplant rulemaking.

In response to questions 11 and 12, commenters were divided on the status of the POP review process. Commenters in favor of eliminating POP review suggested it was redundant with Director Review and that issues previously considered by the POP should be considered under Director Review instead. Commenters in favor of maintaining POP review suggested that it provides input and perspectives from other USPTO leaders, which are important for resolving issues of exceptional importance, policy, and PTAB procedure.

Some commenters provided additional considerations for Director Review and with respect to the interim process (see questions 1 and 10). Some suggested that the Director Review process should consider AIA and policy goals, for example: (1) promoting transparency, consistency, and fairness; (2) improving patent quality and litigation efficiency; and (3) broadening access to the patent system while safeguarding against low-quality patents and abusive behavior. Others suggested that Director Review decisions should explain the basis for granting Director Review and provide a reasoned rationale for each decision. Still others suggested that the USPTO should clarify the criteria used to determine whether to grant Director Review and eliminate overlapping and redundant reviews and rehearing.

The USPTO appreciates the public input provided in response to the RFC and has reviewed the individual responses thoroughly. In view of the comments, the USPTO's experience with the interim Director Review process, and public support for rulemaking with respect to Director Review, and in the interest of providing greater clarity, certainty, and predictability to parties participating in proceedings before the Board, the Office now issues this notice of proposed rulemaking (NPRM).

Proposed Director Review Process

Under the Director Review process proposed in this NPRM, which is consistent with the current interim process, a party may only request Director Review of: (1) a decision on whether to institute an AIA trial, (2) a final written decision in an AIA proceeding, or (3) a panel decision granting a request for rehearing of a decision on whether to institute a trial or a final written decision in an AIA proceeding. In the course of reviewing such an institution decision, final written decision, or panel rehearing decision, the Director may review any interlocutory decision rendered in reaching that decision. The Director may also grant review of those same decisions sua sponte. Third parties may not request Director Review or communicate with the USPTO concerning the Director Review of a particular case unless the Director invites them to do so.

Under the interim process, as described on the Director Review web page, requests for Director Review of Board decisions on whether to institute an AIA trial, or decisions granting rehearing of such a decision, are limited to decisions presenting: (a) an abuse of discretion, or (b) important issues of law or policy. Issues related to both discretion and the asserted merits of unpatentability may be raised, subject to limitations (a) and (b) above. Under the interim process, requests for Director Review of PTAB final written decisions, or decisions granting rehearing of such decisions, are available for decisions presenting: (a) an abuse of discretion, (b) important issues of law or policy, (c) erroneous findings of material fact, or (d) erroneous conclusions of law.

The interim Director Review process generally follows existing PTAB rehearing procedures under 37 CFR 42.71(d). Similarly, as proposed in this NPRM, to request Director Review, a party to an IPR, PGR, or derivation proceeding must file a request for rehearing pursuant to § 42.71(d) and subject to any further instructions provided by the Director. The Director Review web page further explains that the Director has instructed that parties must both file their rehearing request in the Patent Trial and Appeal Case Tracking System and send an email to the Director at *Director_PTABDecision_Review@uspto.gov*.

Under the process proposed in this NPRM, a party must file a request for rehearing by the Director within the time prescribed for a request for rehearing under 37 CFR 42.71(d), as appropriate for the type of decision for which review is sought. The Director may choose to extend the rehearing deadline for good cause. A timely request for rehearing by the Director will be considered a request for rehearing under 37 CFR 90.3(b)(1) and will reset the time for appeal to the Federal Circuit as set forth in that rule until a time after which all issues on Director Review in the proceeding are resolved, including any ancillary issues.

As proposed in this NPRM, requests for rehearing by the Director are limited to 15 pages (see § 42.24(a)(1)(v)). A Director Review request may not introduce new evidence.

Moreover, under the process proposed in this NPRM, parties are limited to requesting either: (1) Director Review, or (2) rehearing by the original panel, but may not request both. Requests for both Director Review and panel rehearing of the same decision are treated as a request for Director Review only, as described on the Director Review web page. However, as explained above, parties may request Director Review of a decision by a panel granting rehearing of a prior PTAB decision. ''[G]ranting rehearing'' here means that the rehearing decision modifies the holding or result of the underlying decision in some fashion. For example, where a Board panel changes the determination of the Final Written Decision for certain claims from unpatentable to not unpatentable in a rehearing decision, the petitioner may file a Request for Director Review of that new determination as to those claims. Rehearing is not ''granted,'' and thus a Request for Director Review is not available, for purposes of this rule if the panel: (1) provides a decision addressing the arguments in the request for rehearing but does not modify the underlying holding or result, or (2) denies the request for rehearing without further explanation.

Under the interim process, as explained on the Director Review web page, each request for Director Review is considered by an Advisory Committee that the Director has established to assist with the process. The Advisory Committee has at least 11 members and currently includes representatives from various business units within the USPTO who serve at the discretion of the Director. The Advisory Committee currently is chaired by a Director Review Executive and comprises members from the Office of the Under Secretary (not including the Director or Deputy Director); the PTAB (not including members of the original panel for each case under review); the Office of the Commissioner for Patents (not including the Commissioner for Patents or any persons involved in the examination of the challenged patent); the Office of the General Counsel (which includes the Office of the Solicitor); and the Office of Policy and International Affairs. The Advisory Committee meets periodically to

evaluate each request for Director Review.[9] Advisory Committee meetings may proceed with fewer than all members in attendance, as long as a quorum of seven members is present.

The Advisory Committee presents the Director with a recommendation. The recommendation includes either a consensus from the various members of the Advisory Committee, or notes differing views among the Advisory Committee members. The Director also receives each Director Review request, the underlying decision, and associated arguments and evidence. The Director determines whether to grant or deny the request for Director Review, or to delegate Director Review.[10] The Director may also consult others in the USPTO as needed, so long as those individuals consulted do not have a conflict of interest. Although the Advisory Committee and other individuals in the USPTO may advise the Director on whether a decision warrants review, the Director has sole discretion to resolve each request for Director Review. The Director's decision on each request will be communicated to the parties in the proceeding. Furthermore, Director Review grants and delegations will be posted on the PTAB website. Other determinations, such as Director Review denials, dismissals, and withdrawals, will be cataloged and posted on the PTAB website.

As proposed in this NPRM, in addition to allowing parties to request Director Review of certain decisions, the Director may order sua sponte Director Review. Under the interim process, as described on the Director Review web page, sua sponte Director Review is typically reserved for issues of exceptional importance, and the Director retains the authority to initiate review sua sponte of any other issue, as the Director deems appropriate. As explained in SOP 4, an internal post-issuance review team at the PTAB reviews issued decisions and, if warranted, flags certain AIA decisions as potential candidates for sua sponte Director Review. See PTAB SOP 4, at 1, 5. In addition, as described on the Director Review web page, the Director may also convene the Advisory Committee to make recommendations on decisions that the Director is considering for sua sponte Director Review. If the Director initiates a sua sponte review, the parties will be given notice and may be given an opportunity for briefing. The public will also be notified, and the Director may request amicus briefing. If briefing is requested, the procedures to be followed will be set forth.

As proposed in this NPRM, absent exceptional circumstances (which might include a remand from the Federal Circuit for the purpose of Director Review), the Director may initiate sua sponte review at any point within 21 days after the expiration of the period for filing a request for rehearing, pursuant to § 42.71(d), as appropriate to the type of decision (*i.e.,* a decision on institution or a final written decision) for which review is sought.

As proposed in this NPRM, a decision on institution, a final written decision, or a decision granting rehearing of such decision on institution of a final written decision shall become the decisions of the agency unless Director Review is requested or sua sponte review is initiated. Moreover, upon denial of a request for Director Review of a decision denying institution, a final written decision, or a decision granting rehearing of a final written decision, the Board's decision becomes the final agency decision.

As proposed in this NPRM, and consistent with the interim process, by default a request for Director Review or the initiation of sua sponte Director Review resets the time for appeal but does not stay or delay the time for the parties to take action in the underlying proceeding before the PTAB, unless the Director orders otherwise. As also proposed in this NPRM, if the Director grants a Director Review, the Director will issue an order or decision that will be made part of the public record, subject to any confidentiality requirements. A grant of Director Review that is not withdrawn will conclude with the issuance of a decision or order providing the Director's reasoning in the case.

As proposed in this NPRM, and consistent with the interim process, a party may appeal a Director Review decision of a final written decision, or rehearing thereof, to the United States Court of Appeals for the Federal Circuit using the same procedures for appealing other PTAB decisions under 35 U.S.C. 141(c), 319. Director Review decisions on decisions on institution are not appealable.

As proposed in this NPRM, and in consideration of the objectives of the Director Review process, the Director may, at their discretion, delegate the review of a Board decision in an AIA proceeding.

Under the interim process, decisions made on Director Review are not precedential by default, but may be designated as precedential by the Director. Additional implementation details of the interim process are provided on the Director Review web page. If a final rule issues and goes into effect, the Director Review web page will be updated or replaced with updated guidance on the effective date of such a final rule.

Application of Director Review Process to Date

As of April 1, 2024, the USPTO had received 328 compliant requests for Director Review under the interim process. Of those requests, the Director Review process was completed for 316 requests. Of the 316 completed requests, 18 requests were granted, 2 requests were delegated to the DRP, 5 requests were withdrawn, and the remaining 291 requests were denied. Additionally, sua sponte Director Review was initiated in 35 cases.

Since July 24, 2023, when the interim process for Director Review was expanded to allow for requests of decisions on institution, the majority of requests received have been from decisions on institution. Specifically, between July 24, 2023, and April 1, 2024, 27 requests for review of final written decisions and 82 requests for review of decisions on institution were received.

Discussion of Specific Rules

The USPTO proposes to add § 42.75, as follows:

Section 42.75: Proposed § 42.75(a) would set forth the general availability of Director Review.

Proposed § 42.75(b) would set forth the availability of sua sponte Director Review.

Proposed § 42.75(c) would set forth the availability of requests for Director Review and request requirements.

Proposed § 42.75(d) would set forth the finality of decisions subject to Director Review.

Proposed § 42.75(e) would set forth the Director Review process.

Proposed § 42.75(f) would provide for the delegation of a review by the Director.

[9] No member of the Advisory Committee may participate in the consideration of a request for Director Review if that member has a conflict of interest under the U.S. Department of Commerce USPTO Summary of Ethics Rules, available at *ogc.commerce.gov/sites/default/files/pto-summary_of_ethics_2022_0.pdf*. PTAB APJs who are Advisory Committee members will also follow the guidance on conflicts of interest set forth in the PTAB's SOP 1, and will recuse themselves from any discussion involving cases on which they are paneled.

[10] The current interim process in place for delegating Director Review is presented on the Delegated Rehearing Panel website (*www.uspto.gov/patents/ptab/decisions/delegated-rehearing-panel*). The process for delegation may change in the future, as required to accommodate needs of the Director, consistent with all applicable law.

Proposed § 42.75(g) would set forth provisions regarding communications with the Office.

Rulemaking Considerations

A. Administrative Procedure Act: The changes proposed by this NPRM involve rules of agency practice and procedure, and/or interpretive rules, and do not require notice-and-comment rulemaking. See *Perez* v. *Mortg. Bankers Ass'n,* 135 S.Ct. 1199, 1204 (2015) (explaining that interpretive rules ''advise the public of the agency's construction of the statutes and rules which it administers'' and do not require notice-and-comment rulemaking when issued or amended); *Cooper Techs. Co.* v. *Dudas,* 536 F.3d 1330, 1336–37 (Fed. Cir. 2008) (stating that 5 U.S.C. 553, and thus 35 U.S.C. 2(b)(2)(B), do not require notice-and-comment rulemaking for ''interpretative rules, general statements of policy, or rules of agency organization, procedure, or practice''); and *JEM Broadcasting Co.* v. *F.C.C.,* 22 F.3d 320, 328 (D.C. Cir. 1994) (explaining that rules are not legislative because they do not ''foreclose effective opportunity to make one's case on the merits'').

Nevertheless, the USPTO is publishing this proposed rule for comment to seek the benefit of the public's views on the Office's proposed regulatory changes.

B. Regulatory Flexibility Act: For the reasons set forth in this notice, the Senior Counsel for Regulatory and Legislative Affairs, Office of General Law, USPTO, has certified to the Chief Counsel for Advocacy of the Small Business Administration that the changes set forth in this NPRM would not have a significant economic impact on a substantial number of small entities. See 5 U.S.C. 605(b).

The changes in this NPRM are to expressly set forth the rules governing Director Review. The changes do not create additional procedures or requirements or impose any additional compliance measures on any party beyond the interim process for Director Review, nor do these changes cause any party to incur additional costs. Therefore, any requirements resulting from these proposed changes are of minimal or no additional burden to those practicing before the Board.

For the foregoing reasons, the proposed changes in this NPRM would not have a significant economic impact on a substantial number of small entities.

C. Executive Order 12866 (Regulatory Planning and Review): This NPRM has been determined to be not significant for purposes of Executive Order 12866 (September 30, 1993), as amended by Executive Order 14094 (April 6, 2023).

D. Executive Order 13563 (Improving Regulation and Regulatory Review): The Office has complied with Executive Order 13563 (January 18, 2011). Specifically, and as discussed above, the Office has, to the extent feasible and applicable: (1) made a reasoned determination that the benefits justify the costs of the proposed rule; (2) tailored the proposed rule to impose the least burden on society consistent with obtaining the regulatory objectives; (3) selected a regulatory approach that maximizes net benefits; (4) specified performance objectives; (5) identified and assessed available alternatives; (6) involved the public in an open exchange of information and perspectives among experts in relevant disciplines, affected stakeholders in the private sector, and the public as a whole, and provided online access to the rulemaking docket; (7) attempted to promote coordination, simplification, and harmonization across Government agencies and identified goals designed to promote innovation; (8) considered approaches that reduce burdens and maintain flexibility and freedom of choice for the public; and (9) ensured the objectivity of scientific and technological information and processes.

E. Executive Order 13132 (Federalism): This NPRM pertains strictly to Federal agency procedure and does not contain policies with federalism implications sufficient to warrant the preparation of a Federalism Assessment under Executive Order 13132 (August 4, 1999).

F. Executive Order 13175 (Tribal Consultation): This NPRM will not: (1) have substantial direct effects on one or more Indian tribes; (2) impose substantial direct compliance costs on Indian tribal governments; or (3) preempt tribal law. Therefore, a tribal summary impact statement is not required under Executive Order 13175 (November 6, 2000).

G. Executive Order 13211 (Energy Effects): This NPRM is not a significant energy action under Executive Order 13211 because it is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Therefore, a Statement of Energy Effects is not required under Executive Order 13211 (May 18, 2001).

H. Executive Order 12988 (Civil Justice Reform): This NPRM meets applicable standards to minimize litigation, eliminate ambiguity, and reduce burden as set forth in sections 3(a) and 3(b)(2) of Executive Order 12988 (February 5, 1996).

I. Executive Order 13045 (Protection of Children): This NPRM does not concern an environmental risk to health or safety that may disproportionately affect children under Executive Order 13045 (April 21, 1997).

J. Executive Order 12630 (Taking of Private Property): This NPRM will not affect a taking of private property or otherwise have taking implications under Executive Order 12630 (March 15, 1988).

K. Congressional Review Act: Under the Congressional Review Act provisions of the Small Business Regulatory Enforcement Fairness Act of 1996 (5 U.S.C. 801 *et seq.*), prior to issuing any final rule, the USPTO will submit a report containing the rule and other required information to the United States Senate, the United States House of Representatives, and the Comptroller General of the Government Accountability Office. The changes in this NPRM are not expected to result in an annual effect on the economy of $100 million or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic and export markets. Therefore, this NPRM will not be a ''major rule'' as defined in 5 U.S.C. 804(2).

L. Unfunded Mandates Reform Act of 1995: The changes set forth in this NPRM do not involve a Federal intergovernmental mandate that will result in the expenditure by State, local, and tribal governments, in the aggregate, of $100 million (as adjusted) or more in any one year, or a Federal private sector mandate that will result in the expenditure by the private sector of $100 million (as adjusted) or more in any one year, and will not significantly or uniquely affect small governments. Therefore, no actions are necessary under the provisions of the Unfunded Mandates Reform Act of 1995. See 2 U.S.C. 1501 *et seq.*

M. National Environmental Policy Act of 1969: This NPRM will not have any effect on the quality of the environment and is thus categorically excluded from review under the National Environmental Policy Act of 1969. See 42 U.S.C. 4321 *et seq.*

N. National Technology Transfer and Advancement Act of 1995: The requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) are not applicable because this NPRM does not contain provisions that involve the use of technical standards.

O. Paperwork Reduction Act of 1995: The Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3549) requires that the Office consider the impact of paperwork and other information collection burdens imposed on the public. This NPRM does not involve an information collection requirement that is subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995. In addition, this NPRM does not add any additional information requirements or fees for parties before the Board. Therefore, the Office is not resubmitting collection packages to OMB for its review and approval because the revisions in this NPRM do not materially change the information collections approved under OMB control number 0651–0069.

Notwithstanding any other provision of law, no person is required to respond to, nor shall any person be subject to, a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid OMB control number.

P. E-Government Act Compliance: The USPTO is committed to compliance with the E-Government Act to promote the use of the internet and other information technologies, to provide increased opportunities for citizen access to Government information and services, and for other purposes.

List of Subjects in 37 CFR Part 42

Administrative practice and procedure, Inventions and patents, Lawyers.

For the reasons set forth in the preamble, the Office proposes to amend 37 CFR part 42 as follows:

PART 42—TRIAL PRACTICE BEFORE THE PATENT TRIAL AND APPEAL BOARD

■ 1. The authority citation for part 42 is revised to read as follows:

Authority: 35 U.S.C. 2(b)(2), 3, 6, 134, 135, 143, 153, 311, 314, 316, 318, 324, 326; Pub. L. 112–29, 125 Stat. 284; and Pub. L. 112–274, 126 Stat. 2456.

■ 2. Add § 42.75 to read as follows:

§ 42.75 Director Review.

(a) *Director Review Generally.* In a proceeding under part 42, the Director may review any decision on institution under 35 U.S.C. 314 or 324, any final written decision under 35 U.S.C. 318 or 328, or any decision granting rehearing of such a decision. In the course of reviewing an institution decision, a final written decision, or a rehearing decision, the Director may review any interlocutory decision rendered by the Board in reaching that decision.

(b) *Sua Sponte Director Review.* The Director, on the Director's own initiative, may order sua sponte Director Review of a decision as provided in paragraph (a) of this section. Absent exceptional circumstances, any sua sponte Director Review will be initiated within 21 days after the expiration of the period for filing a request for rehearing pursuant to § 42.71(d).

(c) *Requests for Director Review.* A party to a proceeding under part 42 may file one request for Director Review of a decision as provided in paragraph (a) of this section, instead of filing a request for rehearing of that decision pursuant to § 42.71(d), subject to the limitations herein and any further guidance provided by the Director.

(1) *Timing.* The request must be filed within the time period set forth in § 42.71(d) unless an extension is granted by the Director upon a showing of good cause. No response to a Director Review request is permitted absent Director authorization.

(2) *Format and Length.* A request for Director Review must comply with the format requirements of § 42.6(a). Absent Director authorization, the request must comply with the length limitations for motions to the Board provided in § 42.24(a)(1)(v).

(3) *Content.* Absent Director authorization, a request for Director Review may not introduce new evidence.

(d) *Final Agency Decision.* A decision on institution, a final written decision, or a decision granting rehearing of such decision on institution or final written decision shall become the decision of the agency unless:

(1) A party requests rehearing or Director Review within the time provided by § 42.71(d); or

(2) In the absence of such a request, the Director initiates sua sponte review as provided by § 42.75(b). Upon denial of a request for Director Review of a final written decision or of a decision granting rehearing of a final written decision, the Board's decision becomes the final agency decision.

(e) *Process.* (1) *Effect on Underlying Proceeding.* Unless the Director orders otherwise, and except as provided in paragraph (e)(3) of this section, a request for Director Review or the initiation of review on the Director's own initiative does not stay the time for the parties to take action in the underlying proceeding.

(2) *Grant and scope.* If the Director grants Director Review, the Director shall issue an order or decision that will be made part of the public record, subject to the limitations of any protective order entered in the proceeding or any other applicable requirements for confidentiality. If the Director grants review and does not subsequently withdraw the grant, the Director Review will conclude with the issuance of a decision or order that provides the reasons for the Director's disposition of the case.

(3) *Appeal.* A party may appeal a Director Review decision of either a final written decision or a decision granting rehearing of a final written decision under 35 U.S.C. 318, 328, and 135 to the United States Court of Appeals for the Federal Circuit using the same procedures for appealing other decisions under 35 U.S.C. 141(c), 319. Director Review decisions on decisions on institution are not appealable. A request for Director Review of a final written decision or a decision granting rehearing of a final written decision, or the initiation of a review on the Director's own initiative of such a decision, will be treated as a request for rehearing under § 90.3(b)(1) and will reset the time for appeal until after all issues on Director Review in the proceeding are resolved.

(f) *Delegation.* The Director may delegate their review of a decision on institution, a final written decision, or a decision granting rehearing of such a decision, subject to any conditions provided by the Director.

(g) *Ex parte communications.* All communications from a party to the Office concerning a specific Director Review request or proceeding must copy counsel for all parties. Communications from third parties regarding a specific Director Review request or proceeding, aside from authorized amicus briefing, are not permitted and will not be considered.

Katherine K. Vidal,

Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office.

[FR Doc. 2024–07759 Filed 4–15–24; 8:45 am]

BILLING CODE 3510–16–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2021–0748; FRL–11882–01–R9]

Air Plan Revisions; Arizona; Maricopa County Air Quality Department

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve revisions to the Maricopa County Air Quality Department (MCAQD) portion of the Arizona State Implementation Plan (SIP). These revisions concern emissions of volatile organic compounds (VOCs), oxides of nitrogen (NO_X), particulate matter (PM), and oxides of sulfur (SO_X). We are proposing to approve local rules to regulate these emission sources under the Clean Air Act (CAA or the Act). We are taking comments on this proposal and plan to follow with a final action.

DATES: Comments must be received on or before May 16, 2024.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R09–OAR–2021–0748 at *https://www.regulations.gov.* For comments submitted at *Regulations.gov,* follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.* If you need assistance in a language other than English or if you are a person with a disability who needs a reasonable accommodation at no cost to you, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: La Kenya Evans-Hopper, EPA Region IX, 75 Hawthorne St., San Francisco, CA 94105; phone: (415) 972–3245; email: *evanshopper.lakenya@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, ''we,'' ''us,'' and ''our'' refer to the EPA.

Table of Contents

I. The State's Submittal

A. What rules are the county rescinding, and/or replacing?

On September 13, 2017, and November 13, 2023, the Arizona Department of Environmental Quality (ADEQ) submitted to the EPA requests from MCAQD to act on a series of rules from the existing SIP, including the rescission of various local rules. Table 1 lists the SIP-approved rules proposed to be rescinded from the SIP by this proposed rule with the dates that they were adopted by the MCAQD and previously approved into the SIP. We are proposing action on the entire November 13, 2023 submittal (''2023 SIP Submittal'') and a portion of the September 13, 2017 submittal (''2017 SIP Submittal''). Portions of other rules from the 2017 SIP Submittal were addressed in other rulemakings (see Table 3 and 87 FR 42324 (September 15, 2022)), and the remaining portions of the 2017 SIP Submittal will be addressed in a future rulemaking.[1]

TABLE 1—RULES TO BE RESCINDED

Rule No.	Title	Local adoption date	SIP approval date	FR citation
22	Permit Denial-Action-Transfer-Expiration-Posting-Revocation-Compliance.	August 12, 1971	July 27, 1972	37 FR 15080
28	Permit Fees	March 8, 1982	June 18, 1982	47 FR 26382
32 G	Other Industries	October 1, 1975	April 12, 1982	47 FR 15579
32 H	Fuel Burning Equipment for Producing Electric Power (Sulfur Dioxide).	October 1, 1975	April 12, 1982	47 FR 15579
32 J	Operating Requirements for an Asphalt Kettle.	June 23, 1980	April 12, 1982	47 FR 15579
32 K	Emissions of Carbon Monoxide	June 23, 1980	April 12, 1982	47 FR 15579
41 A	Monitoring	August 12, 1971	July 27, 1972	37 FR 15080
41 B	Monitoring	October 2, 1978	April 12, 1982	47 FR 15579
42	Testing and Sampling	August 12, 1971	July 27, 1972	37 FR 15080
74 C	Public Notification	June 23, 1980	April 12, 1982	47 FR 15579

Table 2 lists the submitted rule sections addressed by this proposal with the dates that they were adopted by the MCAQD and submitted by ADEQ on behalf of the MCAQD for inclusion into the SIP.

TABLE 2—SUBMITTED RULES

Rule No.	Title	Local revision date	EPA submission date
320 Section 306	Odors and Gaseous Air Contaminants, Limitation—Sulfur from Other Industries.	July 2, 2023	November 13, 2023.

[1] A summary of the status of the 2017 SIP Submittal is included in the docket for this action. See ''Maricopa Recodification Project, Submitted 2017, Rules Updates,'' March 2024, EPA Region 9.

TABLE 2—SUBMITTED RULES—Continued

Rule No.	Title	Local revision date	EPA submission date
320 Section 307	Odors and Gaseous Air Contaminants, Operating Requirements—Asphalt Kettles and Dip Tanks.	July 2, 2023	November 13, 2023.

On December 4, 2023, the EPA determined that the submittal for MCAQD Rule 320, section 306 and section 307 from the 2023 SIP Submittal, met the completeness criteria in 40 CFR part 51 Appendix V. On March 13, 2018, the 2017 SIP Submittal was deemed by operation of law to meet the completeness criteria in 40 CFR part 51 Appendix V. SIP submittals must meet the completeness criteria before formal EPA review.

B. What is the purpose of the rules and what is the impact of the EPA's rescissions?

Since initial SIP approval in the 1970s, Maricopa County has revised many of its rules to comply with the CAA national ambient air quality standards (NAAQS) requirements, and to implement reasonably available control technology (RACT) for various source categories in nonattainment areas. These rules were submitted to the EPA for incorporation into the Arizona SIP at various times. In 2016, the EPA reformatted the Arizona SIP as codified in the Code of Federal Regulations (CFR) into a tabulated ''notebook'' format. While developing the updated SIP tables for that conversion, the EPA worked closely with the ADEQ and local air agencies to clarify what was in their applicable SIP, including older provisions that had not been updated or replaced to reflect local rulemakings. The result of that coordination was the MCAQD's 2017 SIP submittal that requests to rescind or replace many obsolete rules in the federally enforceable SIP in favor of rules that reflect their current locally enforceable rulebook. The MCAQD also submitted an updated request on November 13, 2023, to replace Rule 32, sections G and J with Rule 320 sections 306 and 307. The 2023 SIP Submittal request supersedes the 2017 SIP Submittal request with respect to Rules 32, sections G and J. What follows is a summary of the rules identified in Table 1 that we are proposing for rescission and/or replacement in this rulemaking.

Rule 22 states that the Control Officer shall deny or revoke an Installation Permit and an Operating Permit if the applicant does not show that every machine, equipment, incinerator, device or other article usage (units; with or without air pollution control equipment) does not eliminate or reduce air pollution. If the Control Officer finds that such units under an Operating Permit are constructed not in accordance with the Installation Permit, the Control Office shall not accept any further application for an Operating Permit for these units. If the units are reconstructed in accordance with the Installation Permit, they may be permitted an Operating Permit. All permits are non-transferable and must be affixed to the unit. Rule 22 was superseded by Rule 200, Rule 210, Rule 220, Rule 240, and Rule 241.[2]

Rule 28 supplies the fees and fee schedules for Installation Permits and Annual Operating Permits. Rule 28 was included in the SIP to meet CAA section 110(a)(2)(L) that requires permitting fees under the new source review (NSR) preconstruction permitting program, until it is superseded by the fee requirement under the title V operating permits program (CAA sections 501–507). Since Maricopa County has an EPA approved title V operating permits program that includes a fee rule, permit fees are not required to be in the SIP.[3]

The following sections of Rule 32 are the subject of this proposed rule. The remainder of Rule 32 (sections A, B, C, D, E, and F) were removed from the SIP on July 15, 2022 (87 FR 42324). Rule 32, section G states that no person shall discharge sulfur, sulfur dioxide (SO_2), or sulfur equivalent, into the atmosphere in excess of 10% of the sulfur entering the process as feed. Rule 32, section G is being rescinded and replaced by analogous requirements in Rule 320, section 206 (submitted on November 13, 2023). Rule 32, section H applies to an installation that operate steam power to produce electric power with a resulting discharge of SO_2. With a two-hour maximum average, new sources shall not emit more than 0.80 pounds of SO_2 per million Btu, and existing sources shall not emit more than 1.0 pound of SO_2 per million Btu when coal or oil is fired. Existing sources firing on high sulfur oil shall not emit more than 2.2 pounds of SO_2 per million Btu in a two-hour average maximum. Issued permits prohibit the use of high sulfur oil unless the applicant demonstrates to the control office that a) sufficient quantities of low sulfur oil is not available for use, and b) that the SO_2 ambient air quality standards will not be violated. If an exemption is made, then the permittee must submit monthly reports to the bureau. The permit shall be modified when conditions justifying the use of high sulfur oil no longer exist. Rule 32, section H was superseded by Rule 322.[4] Rule 32, section J states that asphalt kettles shall be operated with good modern practices including, but not limited to: (1) maintain temperatures both below the asphalt flash point and the manufacture maximum recommended temperature, (2) except when charging, operate Kettles with a closed lid, (3) pump asphalt from the kettle, (4) draw asphalt through cocks without dipping, (5) fire kettle with clean burning fuel, and 6) maintain a clean, properly adjusted and good operating condition kettle. Rule 32, section J is being rescinded and replaced by analogous requirements in Rule 320, section 307 (submitted on November 13, 2023). Rule 32, section K states that the discharge of carbon monoxide (CO) from any process source shall be effectively controlled by secondary combustion. Rule 32, section K was superseded by Rule 322 and Rule 323.[5]

Rule 41, section A requires owners, lessees, or operators to provide, install, maintain, and operate air contaminant monitoring devices that are required to determine compliance acceptable to the Control Officer. Owners, lessees, or operators shall also provide monitoring information in writing to the Control Office, with the devices available for inspection during all reasonable times. Rule 41, section A was superseded by Arizona Revised Statute 36–780.[6] Rule 41, section B requires owners or operators of fossil fuel-fired steam generators, fluid bed catalytic cracking unit catalyst regenerators, sulfuric acid and nitric acid plants to install,

[3] Letter dated June 28, 2023, from Philip A. McNeely, Director, MCAQD, to Matthew Lakin, Acting Director, EPA Region IX, Subject: ''RE: Rule 28 (Permit Fees) Justification to Rescind from the Arizona State Implementation Plan (SIP) Without Replacement.''

[4] 87 FR 8418 (February 15, 2022).

[5] 88 FR 7879 (February 7, 2023).

[6] 47 FR 26382 (June 18, 1982).

calibrate, operate, and maintain all monitoring equipment to continually monitor opacity, NO_X, SO_2, oxygen and CO_2. The rule provides basic requirements for monitoring equipment and performance specifications as set forth in Title 40 CFR, Part 60, Chapter 1, Appendix B. SIP Rule 41, section B also provides requirements for the calibration of gases, cycling times, monitor location, combined effluents, span, and data reporting and recordkeeping. Sources of catalytic cracking unit catalyst regenerators, sulfuric acid and nitric acid plants that are applicable to Rule 41, section B are not currently located in Maricopa County. However, if a new source is constructed in the County for one of these categories, it will be subject to the New Source Performance Standards promulgated in 40 CFR part 60 and the New Source Review program, and would be exempted from Rule 41, section B. Therefore, Rule 41, section B is unenforceable or superseded by other requirements.

Rule 41, section B is being rescinded without replacement.

Rule 42 requires that an owner or operator test the openings in a system, stack, or the stack extension. If the facilities are not adequate for testing, the Control Office shall supply to the owner or operator, in writing, the necessary testing requirements for these facilities. Rule 42 does not specify emission limits or achieve any emission reductions, nor are any test methods specified in Rule 42. MCAQD rules now contain a section that identifies test methods for the rule and EPA reviews those methods when each rule is approved. Rule 42 is being rescinded without replacement.

Rule 74, section C states that the public shall have daily notifications for the concentrations of total suspended particles, CO, and ozone based on the Pollution Standard Index. Rule 74, section C was superseded by Rule 100.[7]

Additionally, Table 3 identifies rules from the 2017 SIP submittal that were requested to be rescinded and/or replaced but have since been superseded by action on other SIP submittals that contained the same rules.

TABLE 3—RULES SUPERSEDED BY DIFFERENT RULEMAKINGS

Rule No.	Title	SIP submittal date	SIP approved date	FR citation
100	General Provisions and Definitions	December 20, 2019	February 15, 2022	87 FR 8418
210	Title V Permit Provisions	December 20, 2019	February 15, 2022	87 FR 8418
220	Non-Title V Permit Provisions	December 20, 2019	February 15, 2022	87 FR 8418
322	Power Plant Operations	June 30, 2021	December 15, 2021	87 FR 8046
323	Fuel Burning Equipment from Industrial/ Commercial/Institutional (ICI) Sources.	June 30, 2021	February 7, 2023	88 FR 7879
336	Surface Coating Operations	June 22, 2017	January 1, 2021	86 FR 971

The EPA's technical support document (TSD) has more information about these rules.

II. The EPA's Evaluation and Action

A. How is the EPA evaluating the request for rescission, and/or replacement?

Once a rule has been approved as part of a SIP, the rescission of that rule from the SIP constitutes a SIP revision. To approve such a revision, the EPA must determine whether the revision meets relevant CAA criteria for stringency, if any, and complies with restrictions on relaxation of SIP measures under CAA section 110(l), and the General Savings Clause in CAA section 193 for SIP-approved control requirements in effect before November 15, 1990.

Stringency: Generally, rules must be protective of the NAAQS, and must require RACT in nonattainment areas for ozone. Maricopa County is currently designated as nonattainment for ozone and classified as Moderate for the 2008 8-hour NAAQS (see 40 CFR 81.303, 81 FR 26699).

Plan Revisions: States must demonstrate that SIP revisions would not interfere with attainment, reasonable further progress or any other applicable requirement of the CAA under the provisions of CAA section 110(l) and section 193.

Guidance and policy documents that we used to evaluate enforceability, revision/relaxation and rule stringency requirements for the applicable criteria pollutants include the following:

1. ''State Implementation Plans; General Preamble for the Implementation of Title I of the Clean Air Act Amendments of 1990,'' 57 FR 13498 (April 16, 1992); 57 FR 18070 (April 28, 1992).

2. Letter dated February 12, 1990, from Johnnie L. Pearson, Chief Regional Activities Section, ROB, to Chief, Air Branch, Region I–X, Subject: ''Review of State Regulation Recodifications.''

B. Do the rule rescissions, and/or replacements, meet the evaluation criteria?

We have concluded that the rules in Table 1 are appropriate for rescission, and/or replacement. The rule sections to be rescinded from the SIP without replacement either have already been superseded in the SIP by requirements that are at least as stringent or are requirements that do not address any particular CAA requirements, do not include definitions that are not otherwise defined elsewhere, do not include provisions that are necessary to implement or protect any of the NAAQS and do not fulfill RACT requirements. For the rule sections to be rescinded and replaced, the requirements are being replaced with analogous requirements that are at least as stringent. As such, the removal and/or replacement of the rules covered by this proposed rulemaking would not impact the overall stringency of the Arizona SIP. The reasons for the rule rescissions, and/or replacements, can be summarized into the following categories:

Category 1—Rules that do not establish emission limits or enforce the NAAQS: Rule 42 and Rule 28.

Category 2—Rules that have been superseded and are no longer needed in the SIP: Rule 22, Rule 32 sections G, H, and J, Rule 41, section A, and Rule 74, section C.

Category 3—Unenforceable Rules: Rule 32, section K and Rule 41, section B.

Category 4—Rules that are being rescinded and replaced: Rule 32, sections G and J are being replaced by Rules 320, sections 306 and 307.

In sum, the rules being rescinded and/or replaced address local issues and are no longer needed for the purposes for which SIPs are developed and approved, namely the implementation,

[7] 87 FR 8418 (February 15, 2022).

maintenance, and enforcement of the NAAQS.

The TSD has more information on our evaluation.

C. Public Comment and Proposed Action

As authorized in section 110(k)(3) of the Act, the EPA proposes to fully approve the requested rescission of the rules listed in Table 1 above, and subsequent replacement of SIP-approved rules, because they fulfill all relevant requirements. We will accept comments from the public on this proposal until May 16, 2024. If we take final action to approve the rescission, and/or replacement, of the submitted rules, our final action will remove the rescinded rules from the federally enforceable SIP, and replace these rules in the federally enforceable SIP as described.

III. Incorporation by Reference

In this rule, the EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is proposing to incorporate by reference Maricopa County Air Quality Department, Rule 320, Odors and Gaseous Air Contaminants, sections 306 and 307, revised on July 2, 2003, which regulate emissions of SO_2 from fossil fuel fired steam generators. In addition, the EPA is proposing to rescind Rule 22, Rule 28, Rule 32 sections H and K, Rule 41 sections A and B, Rule 42, and Rule 74 section C from the MCAQD SIP without replacement because the rules either have already been superseded in the SIP by requirements that are at least as stringent or are requirements that do not address any particular CAA requirements, do not include definitions that are not otherwise defined elsewhere, do not include provisions that are necessary to implement or protect any of the NAAQS and do not fulfill RACT requirements. The EPA has made, and will continue to make, these materials available through *https://www.regulations.gov* and at the EPA Region IX Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

IV. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this proposed action merely proposes to approve state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 14094 (88 FR 21879, April 11, 2023);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it proposes to approve a state program;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

Executive Order 12898 (Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629, Feb. 16, 1994) directs Federal agencies to identify and address ''disproportionately high and adverse human health or environmental effects'' of their actions on minority populations and low-income populations to the greatest extent practicable and permitted by law. The EPA defines environmental justice (EJ) as ''the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.'' The EPA further defines the term fair treatment to mean that ''no group of people should bear a disproportionate burden of environmental harms and risks, including those resulting from the negative environmental consequences of industrial, governmental, and commercial operations or programs and policies.''

The State did not evaluate environmental justice considerations as part of its SIP submittal; the CAA and applicable implementing regulations neither prohibit nor require such an evaluation. The EPA did not perform an EJ analysis and did not consider EJ in this action. Consideration of EJ is not required as part of this action, and there is no information in the record inconsistent with the stated goal of Executive Order 12898 of achieving environmental justice for people of color, low-income populations, and Indigenous peoples.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Nitrogen oxides, Ozone, Particulate matter, Recordkeeping requirements, Volatile organic compounds.

Dated: April 9, 2024.

Martha Guzman Aceves,

Regional Administrator, Region IX.

40 CFR Part 52

[EPA–R09–OAR–2023–0448; FRL–11677–01–R9]

Approval and Promulgation of Implementation Plans; State of California; Coachella Valley; Extreme Attainment Plan for 1997 8-Hour Ozone Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve state implementation plan (SIP) revisions submitted by the State of California to meet Clean Air Act (CAA) requirements for the 1997 8-hour ozone

national ambient air quality standards (NAAQS or ''standards'') in the Riverside County (Coachella Valley), CA nonattainment area (''Coachella Valley''). These SIP revisions address the ''Extreme'' nonattainment area requirements for the 1997 8-hour ozone standards, including the requirements for the attainment demonstration, reasonable further progress demonstration, and reasonably available control measures demonstration, among others.

DATES: Comments must be received on or before May 16, 2024.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R09–OAR–2023–0448 at *https://www.regulations.gov.* For comments submitted at *Regulations.gov,* follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.* If you need assistance in a language other than English or if you are a person with a disability who needs a reasonable accommodation at no cost to you, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: Tom Kelly, Geographic Strategies and Modeling Section (AIR–2–2), U.S. Environmental Protection Agency, Region IX, (415) 972–3856, *kelly.thomasp@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, ''we,'' ''us,'' and ''our'' refer to the EPA.

Table of Contents

I. The 1997 8-Hour Ozone Standards and the Coachella Valley Nonattainment Area

A. Background on the 1997 8-Hour Ozone Standards

Ground-level ozone is formed when oxides of nitrogen (NO_X) and volatile organic compounds (VOC) react in the presence of sunlight.[1] These two pollutants, referred to as ozone precursors, are emitted by many types of pollution sources, including on- and off-road motor vehicles and engines, power plants and industrial facilities, and smaller area sources such as lawn and garden equipment and paints.

Health effects associated with exposure to ground-level ozone include: reduced lung function, making it more difficult for people to breathe as deeply and vigorously as normal; irritated airways, causing coughing, sore or scratchy throat, pain when taking a deep breath and shortness of breath; increased frequency of asthma attacks; inflammation of and damage to the lining of the lung; increased susceptibility to respiratory infection; and aggravation of chronic lung diseases such as asthma, emphysema, and bronchitis. Ozone may continue to cause lung damage even when the symptoms have disappeared and breathing ozone may contribute to premature death, especially in people with heart and lung disease.[2]

In 1979, under section 109 of the Clean Air Act (CAA), the EPA established primary and secondary NAAQS for ozone at 0.12 parts per million (ppm) averaged over a 1-hour period.[3] On July 18, 1997, the EPA revised the primary and secondary standards for ozone to set the acceptable level of ozone in the ambient air at 0.08 ppm, averaged over an 8-hour period (''1997 8-hour ozone standards'').[4] The EPA set the 1997 8-hour ozone standards based on scientific evidence demonstrating that ozone causes adverse health effects at lower concentrations and over longer periods of time than was understood when the previous 1-hour ozone standards were set. The EPA determined that the 1997 8-hour standards would be more protective of human health, especially for children and adults who are active outdoors, and individuals with a pre-existing respiratory disease, such as asthma. The 8-hour ozone standards were further strengthened in 2008 and 2015.[5] Although the 1979 1-hour ozone standards and the 1997 8-hour ozone standards have subsequently been revoked following the promulgation of more stringent ozone standards, certain requirements that had applied under the revoked standards continue to apply under the anti-backsliding provisions of CAA section 172(e), including an approved attainment plan.[6]

B. The Coachella Valley 1997 8-Hour Ozone Nonattainment Area

Following promulgation of a new or revised NAAQS, the EPA is required by the CAA to designate areas throughout the nation as attaining or not attaining the standards. Effective June 15, 2004, the EPA designated nonattainment areas for the 1997 8-hour ozone standards.[7] The designations and classifications for

[1] The State of California uses the term Reactive Organic Gases (ROG) rather than VOC in some of its ozone-related SIP submissions. As a practical matter, ROG and VOC refer to the same set of chemical constituents and for simplicity, we refer to this set of gases as VOC.

[2] EPA, ''Fact Sheet, Final Revisions to the National Ambient Air Quality Standards for Ozone,'' March 2008.

[3] 44 FR 8202 (February 8, 1979).

[4] 62 FR 38856.

[5] In 2008, the EPA revised and strengthened the NAAQS for ozone by setting the acceptable level of ozone in the ambient air at 0.075 ppm, averaged over an 8-hour period. 73 FR 16436 (March 27, 2008). In 2015, the EPA further tightened the 8-hour ozone standards to 0.070 ppm. 80 FR 65292 (October 26, 2015). The EPA has approved most elements of the 2008 ozone attainment plan for the Coachella Valley. 85 FR 57714 (September 16, 2020). The EPA has yet to act on the Coachella Valley attainment plan for the 2015 ozone NAAQS, submitted electronically on February 23, 2023. This action applies only to the 1997 8-hour ozone standards and does not address requirements for the 2008 and 2015 8-hour ozone standards.

[6] 80 FR 12264, 12296 (March 6, 2015).

[7] 69 FR 23858 (April 30, 2004).

the 1997 8-hour ozone standards for California areas are codified at 40 CFR 81.305. In a rule governing certain facets of implementation of the 1997 8-hour ozone standards (the ''Phase 1 Rule''), the EPA classified the Coachella Valley as ''Serious'' nonattainment for the 1997 8-hour ozone standards, with an attainment date no later than June 15, 2013.[8] On November 28, 2007, the California Air Resources Board (CARB) requested that the EPA reclassify the Coachella Valley 1997 8-hour ozone nonattainment area from Serious to ''Severe-15.'' The EPA granted the reclassification, effective June 4, 2010, with an attainment date of not later than June 15, 2019.[9] On June 11, 2019, CARB requested another reclassification for the Coachella Valley, from Severe-15 to ''Extreme'' nonattainment, which the EPA granted in a final rule published July 10, 2019.[10] This reclassification to Extreme applied only to the portions of the Coachella Valley subject to state jurisdiction. At this time, areas of Indian country within the nonattainment area remain classified as Severe-15 for the 1997 8-hour ozone standards.[11] On January 15, 2020, we published a final rule setting a deadline of February 20, 2021, for the state to submit a SIP revision addressing the Extreme requirements of CAA section 182(e) and the revised title V and new source review rules for the Coachella Valley.[12]

The EPA previously approved many elements of the Coachella Valley's Severe attainment plan in a final rule dated June 12, 2017,[13] including the reasonably available control measure (RACM) demonstration as meeting the requirements of CAA section 172(c)(1) and 40 CFR 51.1105(a)(1) and 51.1100(o)(17); the rate of progress (ROP) and reasonable further progress (RFP) demonstrations as meeting the requirements of CAA sections 172(c)(2) and 182(c)(2)(B) and 40 CFR 51.1105(a)(1) and 51.1100(o)(4); the attainment demonstration as meeting the requirements of CAA section 182(c)(2)(A) and 40 CFR 51.1105(a)(1) and 51.1100(o)(12); and the demonstration that the SIP submittal provides for transportation control strategies and measures sufficient to offset any growth in emissions from growth in vehicle miles travelled (VMT) or the number of vehicle trips, and to provide for RFP and attainment, as meeting the requirements of CAA section 182(d)(1)(A) and 40 CFR 51.1105(a)(1) and 51.1100(o)(10). The EPA did not act on the contingency measures submitted with the Severe-15 attainment plan, which were subsequently withdrawn by CARB, and we did not act on the motor vehicle emissions budgets, because the associated transportation conformity demonstration is not required for a revoked NAAQS. The EPA also approved the Enhanced motor vehicle inspection and maintenance (I/M) program for the Coachella Valley in a final rule published on July 1, 2010.[14]

The Coachella Valley area is located within Riverside County.[15] The Coachella Valley is under the jurisdiction of the South Coast Air Quality Management District (SCAQMD or ''District''), which also oversees air quality in the upwind South Coast Air Basin. The District and CARB are responsible for adopting and submitting plans to attain the 1997 8-hour ozone standards for nonattainment areas in their jurisdiction.

Ground level ozone in the Coachella Valley ''is both directly transported from the [South Coast Air Basin] and formed photochemically from precursors emitted upwind and within the Coachella Valley.'' [16] The South Coast Air Basin is home to a much larger population than Coachella Valley and, based on inventory data from 2018, emissions of NO_X and VOC in the South Coast Air Basin are more than 20 times larger than those of Coachella Valley.[17] Therefore, attainment of the 1997 8-hour ozone standards in Coachella Valley is heavily dependent on upwind reductions in the South Coast Air Basin. The largest sources of precursors are at the coastal and central portions of South Coast Air Basin. The area's prevailing winds transport ozone precursors inland, forming ozone along the way. Maximum ozone concentrations occur ''in the inland valleys of the Basin, extending from eastern San Fernando Valley through the San Gabriel Valley into the Riverside-San Bernardino area and the adjacent mountains.'' [18] As pollution is further transported through the San Gorgonio Pass into the Coachella Valley, ozone concentrations typically decrease from dilution with cleaner air, but ozone standards are still exceeded.

Air quality in the Coachella Valley has steadily improved in recent years. Design values have declined from 0.108 ppm in 2003 to 0.087 ppm in 2022.[19] Design values are used to designate and classify nonattainment areas, as well as to assess progress towards meeting the air quality standards.[20]

II. CAA and Regulatory Requirements for Ozone Nonattainment Area SIPs

States must implement the 1997 8-hour ozone standards under Title 1, Part D of the CAA, which includes section 172, ''Nonattainment plan provisions,'' and subpart 2, ''Additional Provisions for Ozone Nonattainment Areas'' (sections 181–185).

To assist states in developing effective plans to address ozone nonattainment, the EPA issued an implementation rule for the 1997 8-hour ozone standards (''1997 Ozone Implementation Rule''). This rule was finalized in two phases. The first phase of the rule addressed classifications for the 1997 8-hour ozone standards; applicable attainment dates for the various classifications; the timing of emissions reductions needed for attainment; and identified applicable requirements, such as clean fuels for boilers.[21] The second phase addressed SIP submittal dates and the requirements for reasonably available control technology (RACT) and RACM, RFP, modeling and attainment demonstrations, contingency measures, and new source review.[22] The rule was codified at 40 CFR part 51, subpart X.

The EPA announced the revocation of the 1997 8-hour ozone standards and the anti-backsliding requirements that apply upon revocation in a rulemaking that established final implementation rules for the 2008 8-hour ozone NAAQS.[23] Under these anti-backsliding requirements, areas that were designated as nonattainment for the 1997 8-hour ozone standards at the time the standards were revoked continue to be subject to certain SIP requirements that had previously applied based on area classifications for the standards.[24] Thus, although the 1997 8-hour ozone standards have been revoked, the Coachella Valley remains subject to

many requirements for these standards as applicable to ''Extreme'' nonattainment areas.

We discuss the CAA and regulatory requirements for 1997 8-hour ozone nonattainment plans in more detail in the following section of this proposed rulemaking.

III. CARB's SIP Submittals To Address the Extreme Requirements for the 1997 8-Hour Ozone Standards in the Coachella Valley

A. CARB's SIP Submittals

1. The Coachella Valley Ozone Plan

On December 29, 2020, CARB submitted the ''Final Coachella Valley Extreme Area Plan for the 1997 8-Hour Ozone Standard,'' dated December 2020 (''Coachella Valley Ozone Plan'' or ''Plan''), to the EPA as a revision to the California SIP.[25] The Plan addresses many of the Extreme nonattainment area requirements for the Coachella Valley for the 1997 8-hour ozone standards.

The Coachella Valley Ozone Plan includes the District's resolution of approval for the Plan (District Board Resolution 20–22) and the executive order commemorating CARB's adoption of the Plan as a revision to the California SIP (Executive Order S–20–34).[26] The Plan addresses the requirements for emissions inventory; RACM demonstration and adopted control strategy; attainment demonstration; ROP and RFP demonstrations; and clean fuels for boilers.

The Plan is organized into an executive summary, seven sections, and three appendices. Section 1, ''Introduction,'' identifies the nonattainment area and the nonattainment status for all EPA ozone standards, including the 1997 8-hour ozone standards; provides a history of air quality planning for the 1997 8-hour ozone standards; and explains the purpose of the Plan. Section 2, ''Air Quality Trends,'' describes the formation of ground-level ozone generally and specific factors that contribute to ozone formation in the Coachella Valley, and provides historic monitoring data and related discussion. Section 3, ''Base Year and Future Year Emissions,'' describes the methodology used for the area's emissions inventories, citing to the ''Final 2016 Air Quality Management Plan'' (''2016 AQMP'')[27] where appropriate, and discusses the modeled inventories in detail. Section 4, ''Control Strategy,'' describes District and CARB rules that will achieve the emissions reductions relied upon in the Plan. Section 5, ''Future Air Quality,'' describes the modeling approach, including inputs, assumptions, methodology, and weight of evidence analysis (WOE). Section 6, ''Other Clean Air Act Requirements'' addresses various Extreme area requirements, including for RFP, RACT, RACM, contingency measures, offsetting of increases in VMT, NSR requirements, use of clean fuels or advanced control technology for boilers, and traffic control measures during heavy traffic hours. Sections 7 through 9 address various procedural requirements, including compliance with the California Environmental Quality Act, and notice and comment procedures. The Plan includes three supporting appendices, which describe the emissions inventories and existing District and CARB rules and regulations relied on in the Plan.

2. The Coachella Valley VMT Offset Demonstration

On March 18, 2021,[28] CARB submitted the ''VMT Offset Demonstration.''[29] The VMT Offset Demonstration is intended to show compliance with the requirement at CAA section 182(d)(1) for nonattainment areas classified Severe or Extreme to adopt sufficient transportation control strategies (TCSs) and transportation control measures (TCMs) to offset any growth in VMT.

The VMT Offset Demonstration contains an Executive Summary, Introduction, Methodology, Staff Recommendations, and appendices. The appendices contain the following sections: ''Sensitivity Test to Estimate Emissions for the 2023 Attainment Year with Motor Vehicle Control Program Frozen at 2002;'' ''EMFAC2014 Analysis;''[30] ''EMFAC2011 Analysis;''[31] and ''Summary.''

The VMT Offset Demonstration includes a base year emissions estimate and three different estimates for the 2023 attainment year. One estimate has 2023 on-road vehicle emissions controls frozen as the requirements existed in 2002. One estimate shows 2023 emissions freezing the VMT at the levels from 2002. The final estimate reflects expected emissions for 2023 based on the submitted control strategy, which, as described further in Section IV.E of this document, must be less than both previous estimates for 2023 for an adequate VMT offset demonstration.

As the VMT Offset Demonstration explains, several post-2002 emissions control measures are factored into EMFAC2017 (the latest CARB model for on-road emissions at the time the demonstration was prepared) and cannot be removed. To correct this, the VMT Offset Demonstration includes the results of a sensitivity analysis to determine the emissions reductions associated with CARB's Advanced Clean Cars program and the Truck and Bus Regulations (calculated using EMFAC2014), and the additional stringency of CARB's inspection and maintenance programs (calculated using EMFAC2011).

B. CAA Procedural and Administrative Requirements for SIP Submittals

CAA sections 110(a)(1) and (2) and 110(l) require a state to provide reasonable public notice and opportunity for public hearing prior to the adoption and submittal of a SIP or SIP revision. To meet this requirement, every SIP submittal should include evidence that the state provided adequate public notice and an opportunity for a public hearing, consistent with the EPA's implementing regulations in 40 CFR 51.102.

The SCAQMD provided public notice of its intent to approve the Coachella Valley Ozone Plan on November 4, 2020.[32] The public comment period ended with a public hearing on December 4, 2020; no comments were submitted during the public hearing.[33] The SCAQMD responded to written comments in Section 9 of the Plan. The SCAQMD Governing Board documented the adoption of the Plan in Board Resolution 20–22, dated December 4, 2020. In addition to the comment period and hearing, the SCAQMD convened several steering committees and advisory groups beginning in August

[25] Letter dated December 28, 2020, from Richard W. Corey, CARB, to John W. Busterud, EPA, Subject: ''Coachella Valley Extreme Area Plan for the 1997 8-Hour Ozone Standard'' (submitted electronically December 29, 2020).

[26] SCAQMD Board Resolution 20–22, December 4, 2020; Executive Order S–20–34, ''Coachella Extreme Ozone Plan SIP Submittal,'' December 28, 2020.

[27] SCAQMD, ''Final 2016 Air Quality Management Plan,'' dated March 2017, submitted electronically by CARB to the EPA on April 27, 2017, and approved by the EPA on September 16, 2020 (85 FR 57714). The 2016 AQMP includes a Coachella Valley attainment plan for the 2008 ozone standards.

[28] Letter dated March 15, 2021, from Richard W. Corey, CARB, to Deborah Jordan, EPA (submitted electronically March 18, 2021).

[29] CARB, ''Staff Report, 2020 Coachella Valley Vehicle Miles Traveled Emissions Offset Demonstration,'' January 22, 2021.

[30] EMFAC2014 is the 2014 version of CARB's Emissions Factor model.

[31] EMFAC2011 is the 2011 version of CARB's Emissions Factor model.

[32] SCAQMD, Proof of Publication for Notice of Public Hearing, dated November 4, 2020.

[33] SCAQMD, Draft Minutes of Public Hearing, dated December 4, 2020.

2020.[34] As documented in Executive Order S–20–34, CARB determined that the Plan met the requirements of the Act, adopted the Plan, and ordered it to be submitted to the EPA for inclusion in the SIP.

The Plan includes proof of publication for the notice of the District public hearings, as evidence that all hearings were properly noticed. Therefore, we find the Coachella Valley Ozone Plan meets the procedural requirements of CAA sections 110(a) and 110(l).

CARB provided public notice of its intent to approve the VMT Offset Demonstration on January 21, 2021. The public comment period ended with a board meeting on February 25, 2021. One person commented during the public meeting, urging progress in addressing air pollution in the Coachella Valley without directly addressing the VMT Offset Demonstration. The CARB Governing Board documented the adoption of the VMT Offset Demonstration in Board Resolution 21–1, dated February 25, 2021.

CAA section 110(k)(1)(B) requires that the EPA determine whether a SIP submittal is complete within 60 days of receipt. This section of the CAA also provides that any plan that the EPA has not affirmatively determined to be complete or incomplete is deemed complete by operation of law six months after the date of submittal. The SIP submittal for the Coachella Valley Ozone Plan became complete by operation of law on June 28, 2021, and the submittal for the VMT Offset Demonstration became complete by operation of law on September 18, 2021.

IV. Review of the Coachella Valley Ozone Plan

A. Emissions Inventories

1. Requirements for Emissions Inventories

CAA section 182(a)(1) requires each state with an ozone nonattainment area classified under subpart 2 to submit a ''comprehensive, accurate, current inventory of actual emissions from all sources'' of the relevant pollutants in accordance with guidance provided by the Administrator. While this inventory is not a specific requirement under the anti-backsliding provisions at 40 CFR 51.1105 and 51.1100(o), it provides support for demonstrations required under these anti-backsliding rules. Additionally, a baseline emissions inventory is needed for the attainment demonstration and for meeting RFP requirements. The 1997 Ozone Implementation Rule identifies 2002 as the baseline year for RFP purposes.[35] Emissions inventory guidance issued by EPA sets specific planning requirements pertaining to future milestone years for reporting RFP and to attainment demonstration years.[36] Key RFP analysis years in the RFP demonstration include 2008 and every subsequent 3 years until the attainment date.

We have evaluated the emissions inventories in the Coachella Valley Ozone Plan to determine if they are consistent with EPA guidance and adequate to support the Plan's RACM, RFP, ROP, and attainment demonstrations.

2. Emissions Inventories in the Coachella Valley Ozone Plan

Chapter 3 and Appendix I of the Plan contain detailed emissions estimates. The District's process for developing these emissions estimates followed a similar methodology to the inventories in the 2016 AQMP.[37] In general, Appendix III of the 2016 AQMP includes a more detailed discussion of this methodology, and the Plan explains relevant differences between the two emissions estimates.

The Plan's emissions estimates are seasonally adjusted to summer emissions when ozone concentrations are highest. The Plan divides emissions into the four categories of ''point,'' ''area,'' ''on-road,'' and ''off-road'' sources, with point and area sources grouped as ''stationary sources'' in summary tables. The base year for the emissions estimates is 2018. As Chapter 3 of the Plan explains, that data was projected to 2020 and 2023. Appendix I also contains full emissions breakdowns projected back to 2002 (the baseline year for the RFP demonstration), and forward to 2020 (a milestone year in the RFP demonstration) and 2023 (the attainment year). Table 1 compares emissions for 2002, 2018, 2020, and 2023.

TABLE 1—COACHELLA VALLEY NO_X AND VOC EMISSIONS INVENTORY SUMMARIES FOR 2002, 2018, AND 2023

[Average summer weekday emissions in tons per day] [a]

Category	NO_X				VOC			
	2002	2018	2020	2023	2002	2018	2020	2023
Combined Point and Area Sources	1.40	1.59	1.14	1.18	7.63	7.18	7.74	8.32
On-Road Mobile Sources	41.07	11.18	9.53	6.85	10.47	3.89	3.33	2.90
Other Mobile Sources	11.77	5.56	5.10	4.30	4.76	3.30	3.23	3.22
Totals	54.24	18.33	15.77	12.33	22.85	14.37	14.30	14.44

[a] Source: Coachella Valley Ozone Plan, Appendix I for 2002, Table 3–1 for 2018, and Table 3–2 for 2023.

As described in the Plan, SCAQMD Rule 301 requires stationary sources emitting 4 tons per year (tpy) or more of NO_X or VOC to report facility emissions directly to the District.

Sources with NO_X and VOC emissions below these thresholds are classified as area sources. The area source category includes aggregated emissions data from processes that are individually small and widespread. CARB and SCAQMD jointly estimate emissions for more than 400 area source categories. Appendix I of the Plan includes aggregate categories, such as consumer products, but not every individual category (*e.g.,* hairspray). The Plan states that ''emissions from these sources are estimated using specific activity information and emission factors. Activity data are usually obtained from survey data or scientific reports, *e.g.,* Energy Information Administration reports for fuel consumption other than natural gas fuel, Southern California Gas Company for natural gas consumption, paint supplier data under SCAQMD

[34] SCAQMD, Governing Board Package for the Coachella Valley Extreme Area Plan, dated December 4, 2020, Public Process, page 3.

[35] 69 FR 23951, 23980 (April 30, 2004).

[36] 70 FR 71612.

[37] 2016 AQMP, approved by the EPA on September 16, 2020 (85 FR 57714).

Rule 314, 'Fees for Architectural Coatings,' and District databases.'' [38] Emission factors are values representing the amount of NO_X or VOC per amount of fuel, hours of operation, or some other measurement. The Plan's emission factors are based on ''rule compliance factors, source tests, manufacturer's product or technical specification data, default factors (mostly from AP–42, the EPA's published emission factor compilation), or weighted emission factors derived from the point source facilities' annual emissions reports.'' [39] Area source emissions are based on emissions projections for 2018 and 2023 from the 2016 AQMP, ''using growth and control factors derived from regulatory and socio-economic data.'' [40]

For on-road mobile source emissions, which consists of emissions from trucks, automobiles, buses, and motorcycles, the Plan uses the vehicle activity from the ''2016–2040 Regional Transportation Plan/Sustainable Communities Strategy'' (''2016–2040 RTP/SCS'') developed by the Southern California Association of Governments (SCAG). The Plan's mobile source emission factors come from CARB's 2017 emissions factor model, known as ''EMFAC2017,'' which was the latest model available for estimating on-road motor vehicle emissions in California at the time of its submission.[41]

The Plan also contains off-road NO_X and VOC inventories developed by CARB using category-specific methods and models.[42] The off-road mobile source category includes aircraft, trains, ships, and off-road vehicles and equipment used for construction, farming, commercial, industrial, and recreational activities. The 2016 AQMP provides the growth factors used to project base year emissions for the off-road sources.[43]

Future emissions forecasts are primarily based on demographic and economic growth projections provided by SCAG, and control factors developed by the District in reference to the 2018 base year. Growth factors used to project these baseline inventories are derived mainly from data obtained from SCAG.[44]

3. Proposed Action on the Emissions Inventories

We have reviewed the emissions inventories in the Coachella Valley Ozone Plan and the inventory methodologies used by the District and CARB for consistency with CAA section 182(a)(1) and EPA guidance. We find that the base year and projected attainment year inventories are comprehensive, accurate, and current inventories of actual and projected emissions of NO_X and VOC in the Coachella Valley as of the date of the submittal. Accordingly, we propose to find that these inventories provide an appropriate basis for the various other elements of the Coachella Valley Ozone Plan, including the RACM, ROP, RFP, and attainment demonstrations. The technical support document (TSD) accompanying this proposed rulemaking identifies SCAQMD rules submitted to the EPA for SIP approval after submittal of the Coachella Valley Ozone Plan and compares emissions in the Plan with emissions in the previously approved Severe attainment plan.[45]

B. Reasonably Available Control Measures Demonstration and Adopted Control Strategy

1. RACM Requirements

CAA section 172(c)(1) requires that each attainment plan provide for the implementation of all reasonable available control measures as expeditiously as practicable and provide for attainment of the NAAQS. The RACM demonstration requirement is a continuing applicable requirement for the Coachella Valley under the EPA's anti-backsliding rules that apply for revoked standards.[46]

The EPA has previously provided guidance interpreting the RACM requirement in the ''General Preamble for the Implementation of Title I of the Clean Air Act Amendments of 1990'' (''General Preamble'') [47] and in a memorandum entitled ''Guidance on Reasonably Available Control Measures (RACM) Requirements and Attainment Demonstration Submissions for the Ozone NAAQS,'' John Seitz, November 30, 1999 (''Seitz Memo''). In summary, EPA guidance provides that to address the requirement to adopt all RACM, states should consider all potentially reasonable control measures for source categories in the nonattainment area to determine whether they are reasonably available for implementation in that area and whether they would, if implemented individually or collectively, advance the area's attainment date by one year or more.[48]

Any measures that are necessary to meet these requirements that are not already either federally promulgated, part of the SIP, or otherwise creditable in SIPs must be submitted in enforceable form as part of a state's attainment plan for the area. CAA section 172(c)(6) requires nonattainment plans to include enforceable emissions limitations, and such other control measures, means or techniques (including economic incentives such as fees, marketable permits, and auctions of emission rights), as well as schedules and timetables for compliance, as may be necessary or appropriate to provide for attainment of such standards in such area by the applicable attainment date.[49]

The purpose of the RACM analysis is to determine whether or not control measures exist that are economically and technically reasonable and that provide emissions reductions that would advance the attainment date for nonattainment areas. The EPA defines RACM as any potential control measure for application to point, area, on-road, and non-road emission source categories that: (1) is technologically feasible; (2) is economically feasible; (3) does not cause ''substantial widespread and long-term adverse impacts;'' (4) is not ''absurd, unenforceable, or impracticable;'' and (5) can advance the attainment date by at least one year.[50]

For ozone nonattainment areas classified as Moderate or above, CAA section 182(b)(2) also requires implementation of RACT for all major sources of VOC and for each VOC source category for which the EPA has

[38] Id.

[39] Id. at 3–2.

[40] Id.

[41] EMFAC is short for EMission FACtor. The EPA announced the availability of the EMFAC2017 model for use in state implementation plan development and transportation conformity in California on August 15, 2019. 84 FR 41717. The EPA's approval of the EMFAC2017 emissions model for SIP and conformity purposes was effective on the date of publication of the notice in the **Federal Register**.

[44] 2016 AQMP, 7–25, and Appendix III, p. III–2–6.

[45] EPA, Region IX, ''Technical Support Document, Approval and Promulgation of Implementation Plans; State of California; Coachella Valley; Extreme Attainment Plan for 1997 8-Hour Ozone Standards, Docket: EPA–R09–OAR–2023–0448, Additional Supporting Information for Notice of Proposed Rulemaking,'' March 2024.

[46] See 40 CFR 51.1105(a)(1) and 51.1100(o)(17).

[47] See 57 FR 13498, 13560 (April 16, 1992). The General Preamble describes the EPA's preliminary view on how we would interpret various SIP planning provisions in title I of the CAA as amended in 1990, including those planning provisions applicable to the 1-hour ozone standards. The EPA continues to rely on certain guidance in the General Preamble to implement the 8-hour ozone standards under title I.

[48] General Preamble at 13560; see also Memorandum dated December 14, 2000, from John S. Seitz, Director, Office of Air Quality Planning and Standards, to Regional Air Directors, ''Additional Submission on RACM from States with Severe One-Hour Ozone Nonattainment Area SIPs.''

[49] See also CAA section 110(a)(2)(A).

[50] General Preamble at 13560.

issued a Control Techniques Guidelines document. CAA section 182(f) requires that RACT under section 182(b)(2) also apply to major stationary sources of NO_X. In Extreme areas, a major source is a stationary source that emits or has the potential to emit at least 10 tpy of VOC or NO_X.[51] Under the 1997 Ozone Implementation rule, states were required to submit SIP revisions meeting the RACT requirements of CAA sections 182(b)(2) and 182(f) no later than 27 months after designation for the 1997 8-hour ozone standards (September 15, 2006, for areas designated in April 2004) and to implement the required RACT measures no later than 30 months after that submittal deadline.[52] The EPA has approved the Severe area RACT SIP for the SCAQMD for the 1997 ozone standards, which included rules applicable to the Coachella Valley.[53] With the reclassification from Severe to Extreme nonattainment, the major source threshold shifts from 25 tpy to 10 tpy, changing the NO_X and VOC sources subject to the RACT requirements. While this action does not address the Coachella Valley's RACT demonstration, we will consider the rules in relevant RACT demonstrations as potentially addressing RACM demonstration requirements.

2. Control Strategy and RACM Demonstration in the Coachella Valley Ozone Plan

a. The District's Component of the RACM Demonstration

The RACM demonstration begins on page 6–12 of the Coachella Valley Ozone Plan. The Plan's RACM demonstration builds on the SCAQMD's prior RACM demonstrations for the Coachella Valley and South Coast Air Basin for the 2008 ozone standards in the 2016 AQMP, which the EPA approved in 2020.[54] The Plan supplements this demonstration by evaluating as potential RACM new rules put in place after the 2016 AQMP and rules for area sources. The SCAQMD compared its rules with rules from other air districts within California (*i.e.,* the Sacramento Metropolitan Air Quality Management District, the San Joaquin Valley Air Pollution Control District, the Ventura County Air Pollution Control District, the Antelope Valley Air Quality Management District, and the Mojave Desert Air Quality Management District) and from air quality agencies in Delaware and Texas.

The evaluation of other districts' and states' rules for stationary and area sources did not identify any rules as potential RACM. In all but a few cases, SCAQMD rules were as stringent or more stringent than other rules. Where other rules were more stringent, the SCAQMD still determined that its rules provided RACM-level controls. For example, the VOC control efficiency of SCAQMD Rule 461, ''Organic Liquid Loading,'' is less stringent than another rule (*i.e.,* 90 percent vs. 95 percent), but actual operational control efficiency at SCAQMD facilities exceeded the higher (95 percent) limit. In another example, SCAQMD Rule 1162, ''Polyester Resin Operations,'' which regulates more than 15 different categories of wood product coatings, has a lower limit than another district for one category, high-solid stains (240 grams per liter vs. 350 grams per liter), but ''for almost all categories, Rule 1136 is as stringent as the other agency's rule and provides RACM level of control for this source category.'' [55]

The Plan also highlights rules and programs revised since the completion of the 2016 AQMP that are anticipated to achieve additional reductions when fully implemented as planned. Table 4–1 of the Plan shows these measures have collectively further reduced emissions by 6.3 tons per day (tpd) of NO_X and 2.3 tpd of VOC.[56] These reductions would occur primarily in the South Coast Air Basin; however, as the Plan explains, the ozone air quality problems of the Coachella Valley are primarily caused by transported emissions from within the South Coast Air Basin. The TSD for this proposed rulemaking supplements the District's analysis with a discussion of rules adopted by the SCAQMD since the completion of the Coachella Valley Ozone Plan.

The 2016 AQMP included several commitments for additional emissions reductions, such as for the applications of zero or near-zero NO_X emissions appliances in the residential and commercial sectors (CMB–02), additional enhancement in reducing energy use in existing residential buildings (ECC–03), and co-benefits from existing residential and commercial building energy efficiency mandates (ECC–02). Collectively, these measures are expected to achieve 2.6 tpd of NO_X reductions by 2023 in the South Coast Air Basin.[57] Consistent with the emissions reductions from new and recently revised rules, the benefits achieved are primarily expected in the South Coast Air Basin.

b. Local Jurisdiction Component of the RACM Demonstration

With respect to on-road mobile sources, we note that SCAG is the designated metropolitan planning organization (MPO) for a large portion of southern California, including Coachella Valley, and SCAG's membership includes local jurisdictions within the Coachella Valley. For the 2016 AQMP, SCAG evaluated a list of possible transportation control measures (TCMs) as one element of the larger RACM evaluation for the plan. TCMs are, in general, measures designed to reduce emissions from on-road motor vehicles through reductions in VMT or traffic congestion.

In our final actions on the Severe area RACM requirements for the Coachella Valley for the 1997 and 2008 8-hour ozone standards,[58] we concluded that the evaluation processes undertaken by SCAG were consistent with the EPA's RACM guidance and found that there were no additional RACM, including no additional TCMs that would advance attainment of the 1997 8-hour ozone standards in the South Coast Air Basin.[59] More recently, we came to the same conclusion with respect to RACM and TCMs for the South Coast in our action on the ozone portion of the SCAQMD's ''Final 2012 Air Quality Management Plan.'' [60]

Although TCMs are implemented in the upwind South Coast Air Basin area to meet CAA requirements, neither the SCAQMD nor CARB rely on implementation of any TCMs in the Coachella Valley to demonstrate implementation of RACM in the Coachella Valley Ozone Plan. The SCAQMD and CARB justify the absence of TCMs in the Coachella Valley by reference to the significant influence of pollutant transport from the South Coast Air Basin on ozone conditions in the Coachella Valley.[61]

[51] CAA section 182(d).

[52] See 40 CFR 51.912(a). Following the reclassification of the Coachella Valley to Extreme nonattainment for the 1997 8-hour ozone standards, the EPA established a deadline of February 14, 2021, for the State to submit SIP revisions addressing the CAA section 182(b)(2) and 182(f) RACT requirements. 85 FR 2311, 2312 (January 15, 2020).

[53] 73 FR 76947 (December 18, 2008).

[54] The Coachella Valley Ozone Plan incorrectly identifies the EPA's approval of the RACM demonstration as 82 FR 26854 (June 12, 2017), but the actual approval was published at 85 FR 57714 (September 16, 2020).

[55] Coachella Valley Ozone Plan, Table 6–10 at p. 6–17.

[56] Table 4–1 does not total the emission reductions for all measures.

[59] See also 81 FR 75764 (November 1, 2016) (proposed rule for 1997 8-hour ozone standards).

[60] See 79 FR 29712, 29720 (May 23, 2014) (proposed rule); 79 FR 52526 (September 3, 2014) (final rule).

[61] See Coachella Valley Ozone Plan, p. 6–29.

c. The Statewide Component of the RACM Demonstration

CARB has primary responsibility for reducing emissions in California from new and existing on-road and off-road engines and vehicles, motor vehicle fuels, and consumer products. CARB has been a leader in the development of stringent control measures for on-road and off-road mobile sources, fuels, and consumer products. Because of this role, the Plan identifies CARB's 2016 State Strategy as a key component of the control strategy necessary to attain the State's ozone goals, which includes attaining the 1997 ozone NAAQS. The Plan states that California has received waivers and authorizations for over 100 regulations and lists several recent examples, such as rules governing light-, medium-, and heavy-duty vehicles; off-road vehicles and engines; and other sources including motorcycles, recreational boats, off-road recreational vehicles, cargo handling equipment, and commercial harbor craft.[62] The Plan highlights reductions achieved through ''more stringent engine emissions standards, in-use requirements, incentive funding, and other policies and initiatives'' since the EPA's 2019 approval of the South Coast Air Basin RACM demonstration for the 2008 ozone standards.[63]

The CARB portion of the RACM evaluation also covers consumer products. CARB regulates VOC emissions from more than 130 consumer products, with the most recent rule revisions in 2018. The federal regulations for consumer products were last amended in 1998.[64] Since submittal of the Plan, CARB has submitted additional consumer product regulations for approval into the SIP, but EPA has yet to act on this submittal.[65]

3. The EPA's Evaluation of the Control Strategy and RACM

We find that the Coachella Valley Ozone Plan includes a thorough update of the District's RACM demonstration for the 2008 ozone standards from the 2016 AQMP that we previously approved in 2020.[66] This updated demonstration focuses on new rules put in place by five California air districts and two states since completion of the 2016 AQMP, and we propose to find that it demonstrates that the District's stationary source controls represent RACM for the 1997 8-hour ozone standards.

With respect to mobile sources, we find that CARB's current program addresses the full range of mobile sources in the South Coast Air Basin and Coachella Valley through regulatory programs for both new and in-use vehicles. Moreover, we find that the process conducted by CARB to prepare the 2016 State Strategy was reasonably designed to identify additional available measures within CARB's jurisdiction, and that CARB has adopted those measures that are reasonably available. As noted in the TSD supporting this rulemaking, following submittal of the 2016 State Strategy, CARB has continued to submit mobile source control measures, such as the Heavy-Duty Inspection and Maintenance Regulation, which expands the inspection of heavy-duty trucks beyond particulate matter emissions to include the equipment controlling NO_X emissions.

With respect to TCMs, we find that SCAG's process for identifying additional TCM RACM and conclusion that the TCMs being implemented in the South Coast Air Basin are inclusive of all TCM RACM to be reasonably justified and supported. For the 2016 AQMP, given the minimal and diminishing emissions benefits generally associated with TCMs, no combination of TCMs implemented in the Coachella Valley could have contributed to advancing the attainment date in the Coachella Valley, and no TCMs are reasonably available for implementation in the Coachella Valley for the purposes of meeting the RACM requirement.[67]

Additionally, we find that CARB's consumer products program generally exceeds the controls in place throughout other areas of the country. The additional commitments included in the 2016 State Strategy further strengthen this program by achieving additional VOC reductions. Some of the committed measures have already been submitted to the EPA, including lower VOC emission limits for seven consumer product categories.[68]

While the Plan does not quantify the amount of reductions necessary to advance attainment by one year, in view of the current timing of this proposed approval, the Coachella Valley no longer has a practical opportunity to advance attainment prior to 2023. Therefore, the EPA is proposing to find that the Coachella Valley Ozone Plan provides for implementation of all RACM necessary to demonstrate expeditious attainment of the 1997 8-hour ozone standards in the Coachella Valley, consistent with the applicable requirements of CAA section 172(c)(1) and 40 CFR 51.1105(a)(1) and 51.1100(o)(17).

C. Attainment Demonstration

1. Statutory and Regulatory Requirements

CAA section 182(c)(2)(A) requires that a plan for an ozone nonattainment area classified Serious or above include a ''demonstration that the plan . . . will provide for attainment of the ozone [NAAQS] by the applicable attainment date. This attainment demonstration must be based on photochemical grid modeling or any other analytical method determined . . . to be at least as effective.'' The attainment demonstration predicts future ambient concentrations for comparison to the NAAQS, making use of available information on measured concentrations, meteorology, and current and projected emissions inventories of ozone precursors, including the effect of control measures in the Plan.

In accordance with 40 CFR 51.903(a), areas classified Extreme for the 1997 ozone NAAQS must demonstrate attainment as expeditiously as practicable, but no later than 20 years after the effective date of designation to nonattainment. The Coachella Valley was designated nonattainment for the 1997 ozone NAAQS effective June 15, 2004,[69] and accordingly, the area must demonstrate attainment of the standards by June 15, 2024. An attainment demonstration must show attainment of the standards by the calendar year prior to the attainment date, so in practice, Extreme nonattainment areas must demonstrate attainment in 2023.

The EPA's recommended procedures for modeling ozone as part of an attainment demonstration are contained in ''Modeling Guidance for Demonstrating Air Quality Goals for Ozone, $PM_{2.5}$, and Regional Haze,'' EPA 454/R–18–009, November 2018

[62] Coachella Valley Ozone Plan, p. 6–26.

[66] 85 FR 57714.

[67] While not required for CAA purposes, the 2016–2040 RTP/SCS includes a list of projects for the Coachella Valley, some of which represent the types of projects often identified as TCMs, such as traffic signalization projects and bike lane projects. 2016–2040 RTP/SCS, Appendix, ''Project List.''

[68] Letter dated April 25, 2023, from Steve S. Cliff, CARB to Martha Guzman, EPA Region IX, transmitting 2021 amendments to CARB's consumer product regulations (submitted electronically April 25, 2023).

[69] 69 FR 23858.

(''Modeling Guidance'').[70] The Modeling Guidance includes recommendations for a modeling protocol, model input preparation, model performance evaluation, use of model output for the numerical NAAQS attainment test, and modeling documentation. Air quality modeling is performed using meteorology and emissions from a base year, and the predicted concentrations from this base case modeling are compared to air quality monitoring data from that year to evaluate model performance.

Once the model performance is determined to be acceptable, future year emissions are simulated with the model. The relative (or percent) change in modeled concentrations due to future emissions reductions provides a relative response factor (RRF). Each monitoring site's RRF is applied to its monitored base period design value to provide the future design value for comparison to the NAAQS. The Modeling Guidance also recommends supplemental air quality analyses, which may be used as part of a weight of evidence (WOE) analysis. A WOE analysis corroborates the attainment demonstration by considering evidence other than the main air quality modeling attainment test, such as trends and additional monitoring and modeling analyses.

The Modeling Guidance also does not require a particular year to be used as the base year for 1997 8-hour ozone plans.[71] The Modeling Guidance states that the most recent year of the National Emissions Inventory may be appropriate for use as the base year for modeling, but that other years may be more appropriate when considering meteorology, transport patterns, exceptional events, or other factors that may vary from year to year.[72] Therefore, the base year used for the attainment demonstration need not be the same year used to meet the requirements for emissions inventories and RFP.

With respect to the list of adopted measures, CAA section 172(c)(6) requires that nonattainment area plans include enforceable emissions limitations, and such other control measures, means or techniques (including economic incentives such as fees, marketable permits, and auctions of emission rights), as well as schedules and timetables for compliance, as may be necessary or appropriate to provide for timely attainment of the NAAQS.[73]

2. Summary of the State's Submission

a. Photochemical Modeling

Chapter 5 of the Coachella Valley Ozone Plan includes a description of photochemical modeling performed by the SCAQMD for the 1997 8-hour ozone standards. The modeling relies on a 2018 model base year and projects design values to demonstrate attainment of the 1997 ozone NAAQS in 2023.

Chapter 5, ''Future Air Quality,'' of the Plan, includes a description of current air quality in the Coachella Valley, a summary of the ozone modeling approach, a model performance evaluation, results of the NAAQS attainment test, an unmonitored area analysis, an assessment of ozone sensitivity to NO_X and VOC reductions, and a WOE analysis. The Plan uses the same approach that is outlined in more detail in the 2016 AQMP, with some updates to the modeling platform, input databases, and emissions inventories. Like the 2016 AQMP, the Plan uses the EPA recommended Community Multiscale Air Quality Modeling System (CMAQ, version 5.0.2) modeling platform. An overview of the modeling approach and modeling protocol can be found in the 2016 AQMP, Appendix V, ''Modeling and Attainment Demonstrations,'' Chapter 1, ''Modeling Overview,'' and Chapter 2 ''Modeling Protocol.'' While the 2016 AQMP used 2012 as the model base year, the Plan uses 2018 as the model base year on which to develop meteorological conditions and emissions inventories. Meteorological fields were developed for 2018 using the Weather Research and Forecasting Model (WRF, version 4.0.3) from the National Center for Atmospheric Research. Input information and model evaluation for WRF version 4.03 can be found in the SCAQMD, ''Final 2022 Air Quality Management Plan,'' adopted December 2, 2022 (''2022 AQMP''), Appendix V, Chapter 3, ''Meteorological Modeling and Sensitivity Analyses.''

CMAQ and WRF are both recognized in the Modeling Guidance as technically sound, state-of-the-art models. The areal extent and the horizontal and vertical resolution used in these models is adequate for modeling Coachella Valley ozone. The WRF modeling uses routinely available meteorological and air quality data collected during 2018. Those data cover May through September, a period that spans the period of highest ozone concentrations in the Coachella Valley. The District evaluated the WRF model performance and concluded that the WRF simulation for 2018 provided representative meteorological fields that well characterized the observed conditions. The District's conclusions were supported by statistical metrics and hourly time series plots of water vapor mixing ratio, wind speed, direction, and temperature for the southern California domain as well an evaluation of the predicted planetary boundary layer height and the coast-to-inland temperature gradient.

Ozone model performance statistics are described in the Coachella Valley Ozone Plan at Chapter 5.[74] This chapter includes a table of statistics recommended in the Modeling Guidance and hourly ozone time series plots for 2018. The hourly time series and statistics show generally good model performance, though many individual daily ozone peaks are underpredicted.[75] Note that, because only relative changes are used from the modeling, the underprediction of ozone concentrations does not mean that future concentrations will be underestimated.

After model performance for the 2018 base case was accepted, the model was applied to develop RRFs for the attainment demonstration. This entailed running the model with the same meteorological inputs as before, but with adjusted emissions inventories to reflect the expected changes between 2018 and the 2023 attainment year. The base year or ''reference year'' modeling inventory was the same as the inventory for the modeling base case. The 2023 inventory projects the base year into the future by including the effect of economic growth and emissions control measures. The set of 153 days from May 1 through September 30, 2018, was simulated and analyzed to determine 8-hour average maximum ozone concentrations for the 2018 and 2023 emissions inventories. To develop the RRFs for the 1997 8-hour ozone standards, only the top 10 days were used, consistent with the Modeling Guidance.[76]

The Modeling Guidance addresses attainment demonstrations with ozone NAAQS based on 8-hour averages and for the 1997 ozone NAAQS the

[70] The EPA modeling guidance is available on the EPA website at: *https://www.epa.gov/scram/state-implementation-plan-sip-attainment-demonstration-guidance;* direct link: *https://www3.epa.gov/ttn/scram/guidance/guide/O3-PM-RH-Modeling_Guidance-2018.pdf.* Additional EPA modeling guidance can be found in 40 CFR 51 Appendix W, ''Guideline on Air Quality Models,'' 82 FR 5182 (January 17, 2017); available at *https://www.epa.gov/scram/clean-air-act-permit-modeling-guidance.*

[75] Coachella Valley Ozone Plan, Figure 5–2.

[76] Modeling Guidance, section 4.2.1.

Coachella Valley Ozone Plan carries out the attainment test procedure consistent with the Modeling Guidance. The RRFs are calculated as the ratio of future to base year concentrations; these were then applied to weighted base year design values for each monitor to arrive at future year design values.[77] Ozone is measured continuously at two locations in the Coachella Valley at the Palm Springs and Indio air monitoring stations. The modeled 2023 ozone design value at the Palm Springs site (the higher of the two sites) is 0.0832 ppm; this value demonstrates attainment of the 1997 ozone NAAQS.[78]

The Plan modeling includes an ''Unmonitored Area Analysis'' (UAA) to assess whether locations without a monitor can reach attainment; the standard attainment test procedure covers only locations with a monitor. A UAA is recommended in the Modeling Guidance, but not required in the 1997 Ozone Implementation Rule—Phase 2.[79] Consistent with EPA Guidance, the District calculated five-year weighted design values for all monitoring stations that meet EPA's data quality requirements within the modeling domain and spatially interpolated concentrations for the area between the design values. RRFs were then applied to the interpolated measurement field to calculate future year design values. The District asserts that when all valid ozone design values were interpolated, they were too sparsely populated near the boundary of Coachella Valley to reasonably guide design value contours. To compensate, the District excluded the Morongo monitor and added several pseudo-monitors throughout the domain to guide the interpolation.[80] With these modifications the predicted future design values are all below the level of the 1997 8-hour ozone standards throughout the domain.

In addition to the formal attainment demonstration, the Plan also contains a WOE demonstration that includes ambient ozone data and trends and a sensitivity analysis using CMAQ 5.3.1, a later version of the model to complement the regional photochemical modeling analyses.

b. Control Strategy

The control strategy for attainment of the 1997 ozone NAAQS in the Coachella Valley relies primarily on timely attainment in 2023 of the 1997 ozone NAAQS in the South Coast Air Basin. As described in the Coachella Valley Ozone Plan and in Section I.B of this document, the primary cause of ozone in the Coachella Valley is the transport of ozone and its precursors from the South Coast Air Basin.

Because ozone concentrations at the Palm Springs monitor—the only monitoring site currently exceeding the 8-hour 1997 ozone NAAQS—are more sensitive to changes in NO_X than VOCs,[81] the Plan's control strategy relies on NO_X reductions and limited VOC reductions. Since the EPA's promulgation of the 1997 ozone NAAQS, NO_X emissions in the South Coast Air Basin have declined by 76 percent.[82] Mobile sources, responsible for 80 percent of regional NO_X emissions, are the primary focus of future emissions reductions.

A thorough discussion of the SCAQMD's control strategy for the Coachella Valley appears in the 2016 AQMP. The 2016 AQMP provides the District's control strategy through the 2026 attainment year for the 2008 ozone standards. The Coachella Valley Ozone Plan provides an update to that discussion, specifically focusing on the measures implemented after the 2016 AQMP that result in emissions reductions by 2023.

The South Coast Air Basin control strategy for the 1997 ozone NAAQS relies on emissions reductions from already-adopted measures, commitments by the District to certain regulatory and nonregulatory initiatives and aggregate emissions reductions, and commitments by SCAQMD and CARB to certain regulatory and nonregulatory initiatives and aggregate emissions reductions. In the 2016 AQMP, already-adopted measures are expected to achieve approximately 66 percent of the NO_X reductions needed from a 2012 base year for the South Coast Air Basin to attain the 1997 ozone NAAQS in 2023. To address the remaining emissions reductions, which are shown in Table 2, the 2016 AQMP included District and CARB aggregate commitments to achieve additional emissions reductions by 2023. These reductions are discussed in the EPA's proposed approval of the 2016 AQMP for the South Coast Air Basin.[83]

TABLE 2—DISTRICT AND CARB AGGREGATE EMISSION REDUCTION COMMITMENTS FOR 2023

[tpd]

Plan	NO_X	VOC
SCAQMD[a]	23	6
CARB[b]	113	50–51
Total	136	56–57

[a] Source: 2016 AQMP at Table 4–10.
[b] Source: 2016 AQMP at Table 4–5.

The Plan updates this analysis to incorporate more recent SCAQMD and CARB rules and programs that continue to achieve emissions reductions in future baseline emissions for both the South Coast Air Basin and Coachella Valley. For SCAQMD, the revised regulations are Regulation XX, ''RECLAIM Program;'' Rule 1111, ''Reduction of NO_X Emissions form Natural-Gas-Fired, Fan-Type Central Furnaces,'' and the CLEANair Furnace Rebate Program; Rule 1146.2, ''Large Water Heater, Small Boilers and Process Heaters;'' and Rule 1147, ''NO_X Reductions from Miscellaneous Sources.'' The District's incentive programs include the Carl Moyer Memorial Air Quality Standards Attainment Program to retrofit and replace heavy-duty diesel engines;

[77] The Modeling Guidance recommends that RRFs be applied to the average of three 3-year design values centered on the base year. For a 2018 base year, recommended design values would be 2016–2018, 2017–2019, and 2018–2020. This amounts to a 5-year weighted average of individual year 4th high concentrations, centered on the base year of 2018, and so is referred to as a weighted design value. The Coachella Valley Ozone Plan was adopted in December 2020, before 2020 monitoring data was available, so the Plan instead uses design values for 2015–2017, 2016–2018, and 2017–2019.

Clean School Buses Incentives; and the Surplus Off-Road Opt-In for NO_X Program for low emission heavy duty engines for off-road diesel fleets.[84] For CARB, the regulations that continue to result in improved future emissions estimates include the Advanced Clean Cars program, the Truck and Bus Regulation, and the In-Use Large Spark Ignition Fleet Regulation.[85]

The Plan also highlights rules and programs that continue to achieve reductions that have not been factored into the future emissions estimates for SCAQMD and CARB. SCAQMD efforts include Rule 1117, ''Emissions of Oxides of Nitrogen form Glass Melting Furnaces;'' Rule 1134, ''Emissions of Oxides from Stationary Gas Turbines''; Rule 1135, ''Emissions of Oxides of Nitrogen from Electricity Generating Facilities;'' and facility-based mobile source measures covering marine ports railyards, warehouse/distribution centers, commercial developments and new developments and redevelopment projects.[86] Table 4–1 shows estimated reductions for these rules and facility-based mobile source measures. Some of the measures continue to increase reductions in future years, including adopted CARB regulations not reflected in the future emissions estimate such as the Innovative Clean Transit Regulation; the Zero-Emission Airport Shuttle Regulation; the Advanced Clean Truck regulation and the Omnibus Low-NO_X Regulation. All measures that achieve further emissions reduction and not reflected in the future 2023 emissions estimate serve to increase the likelihood that the Coachella Valley attains the 1997 ozone NAAQS.

c. Attainment Demonstration

Chapter 5 of the Coachella Valley Ozone Plan describes the Coachella Valley's progress toward attaining the 1997 ozone standards. The Plan summarizes the District's modeling for the area and concludes that the measures included in the control strategy (including CARB commitments) will result in the area attaining the standards no later than 2023. The WOE discussion provides additional discussion of air quality trends and projections in the Coachella Valley and determines that the area is on track to attain the 1997 ozone NAAQS by 2023.

[84] Coachella Valley Ozone Plan, pp. 4–2 to 4–4.

[85] The complete list of incentive programs is provided on pages 4–3 to 4–4 of the Coachella Valley Ozone Plan.

[86] Id. at 4–4 to 4–6.

3. The EPA's Review of the State's Submission

a. Photochemical Modeling

As discussed in Section III.A of this document, we are proposing to approve the base year emissions inventory for the attainment demonstration and to find that the future year emissions projections in the Coachella Valley Ozone Plan reflect appropriate calculation methods and that the latest planning assumptions are properly supported by SIP-approved stationary source and mobile source measures. The Plan employs the modeling protocol from the 2016 AQMP, and Appendix V of that document in particular, with updates to the modeling platform, input databases, and emissions inventory.[87] The discussion below addresses modeling information included in both the Plan and the 2016 AQMP. Because of the importance of ozone transport from the South Coast to attainment in the Coachella Valley, and the close interactions of the modeling for each area, we have considered the modeling for both the Coachella Valley and the South Coast Air Basin. Similar and additional discussion for the South Coast Air Basin can be found in our June 17, 2019 proposed action on the 2016 AQMP.[88]

Based on our review of the Coachella Valley Ozone Plan, the EPA finds that the photochemical modeling is adequate for purposes of supporting the attainment demonstration.[89] First, we note the discussion of modeling procedures, tests, and performance analyses called for in the Modeling Protocol (*i.e.,* 2016 AQMP, Appendix V, Chapter 2) and the good model performance (Coachella Valley Ozone Plan, Chapter 5). Second, we find the WRF meteorological model results and performance statistics, including hourly time series graphs of water vapor mixing ratio, wind speed, direction, and temperature for both the South Coast and the Coachella Valley, to be satisfactory and consistent with our Modeling Guidance.[90] Performance was evaluated for the winter season (January, November, and December 2018) and summer season (June, July, and August 2018).[91] Diurnal variation of temperature, humidity, and surface wind are well represented by WRF. Temperature and wind speed are more accurate in the summer season than in the winter months. The observed temperature gradient from the coast to inland was well characterized by WRF. Both the observational data and WRF simulation showed distinct diurnal variations in wind speed in the summer, with a strong sea breeze in the afternoon responsible for transport inland. In general, the WRF simulations reproduce the dominant wind direction as the measurement at each station. The diurnal cycle in PBL height was well captured by the simulations. Overall, the daily WRF simulation for 2018 provided representative meteorological fields that characterized the observed conditions well.

The model performance statistics for ozone are described in Chapter 5 of the Plan and are based on the statistical evaluation recommended in the Modeling Guidance. Model performance was provided for 8-hour daily maximum ozone in the nonattainment area. As noted in Section IV.C.2.a of this document, the statistics and hourly time series show generally good performance, and while many individual daily ozone peaks are underpredicted, this does not mean that future concentrations based on monitored data and modeled RRFs will be underestimated. In addition, the WOE analysis presented provides additional information with respect to the observational trends and further supports the model performance.

Notwithstanding the general sufficiency of the modeling, we find that the Plan's UAA analysis does not provide justification for excluding the Morongo monitor or for adding pseudo-monitors to alter the interpolation. We therefore conclude the UAA is not sufficiently supported, and we are not evaluating those results here. However, we conclude that based on the density of the ozone monitoring stations within the Coachella Valley and upwind, as well as the uncertainty in the interpolation due to complex topography, the attainment demonstration is adequately supported without a UAA. We recommend that CARB and SCAQMD evaluate the continuing adequacy of the existing monitors as part of their ambient air monitoring network 5-year network assessment.

The modeling shows that existing control measures from CARB and the District, together with the commitments in the 2016 AQMP and further updated in the Coachella Valley Ozone Plan, are sufficient to attain the 1997 8-hour ozone standards by 2023 at all monitoring sites in the Coachella Valley.

[87] Coachella Valley Ozone Plan, p. 5–2 and 5–8.

[88] 84 FR 28132.

[89] The EPA's review of the modeling and attainment demonstration is discussed in greater detail in section V of the TSD for this action (''Modeling and Attainment Demonstration'').

[90] Modeling Guidance, 30.

[91] Temperature, water vapor mixing ratio, and wind speed were evaluated in terms of normalized gross bias and normalized gross error.

We are proposing to find the air quality modeling adequate to support the attainment demonstration for the 1997 ozone NAAQS, based on reasonable meteorological and ozone modeling performance, and supported by the WOE analysis.

For additional information, please see the TSD for this action.

b. Control Strategy

The control strategy in the Coachella Valley Ozone Plan relies primarily on previously adopted and future emissions reductions detailed in the 2016 AQMP. As described in Section IV.C.2.b of this document, a significant portion of the emissions reductions needed to attain the 1997 ozone NAAQS in the South Coast by 2023 will be obtained through previously adopted measures in the SIP, and the balance of the reductions needed for attainment will result from enforceable commitments to take certain specific actions within prescribed periods and to achieve aggregate tonnage reductions of VOC or NO_X by specific years. The aggregate commitments provide the remaining additional upwind reductions necessary for the Coachella Valley to attain the 1997 ozone NAAQS in 2023. In our October 1, 2019 approval of the 2016 South Coast Ozone SIP, the EPA approved the control strategy to attain the 2008 ozone standards for the Coachella Valley by 2026, including CARB's and the District's aggregate commitments, for the South Coast to attain the 1997 ozone NAAQS.[92]

For the reasons described in that action and based on the District's demonstration specific to the Coachella Valley described in this section, we propose to find the District's control strategy acceptable for purposes of attaining the 1997 8-hour ozone standards in the Coachella Valley. For additional information, please see the TSD for this action.

c. Attainment Demonstration

Based on our proposed determinations that the photochemical modeling and control strategy are acceptable, we propose to approve the attainment demonstration for the 1997 ozone NAAQS in the Coachella Valley Ozone Plan as meeting the requirements of CAA section 182(c)(2)(A) and 40 CFR 51.1105(a)(1) and 51.1100(o)(12). This demonstration shows the area attaining the 1997 8-hour ozone standards by the outermost statutory attainment date of June 15, 2024.

[92] 84 FR 52005.

D. Rate of Progress and Reasonable Further Progress Demonstrations

1. Rate of Progress

For areas classified as Moderate or above, CAA section 182(b)(1) requires a SIP revision providing for ROP, defined as a one time, 15 percent actual VOC emissions reduction during the six years following the baseline year 1990, or an average of 3 percent per year. While the ROP demonstration is a potentially applicable continuing applicable requirement, the EPA has already approved the 15 percent VOC only ROP demonstration for Coachella Valley for the 1997 8-hour ozone standards, so this requirement has been met.[93]

2. Reasonable Further Progress

a. Requirements

CAA sections 172(c)(2) and 182(b)(1) require plans for nonattainment areas to provide for RFP. RFP is defined in CAA section 171(1) as ''such annual incremental reductions in emissions of the relevant air pollutant as are required by this part or may reasonably be required by the Administrator for the purpose of ensuring attainment of the applicable [NAAQS] by the applicable date.'' CAA section 182(c)(2)(B) requires ozone nonattainment areas classified as Serious or higher to submit no later than 3 years after designation for the 1997 8-hour ozone standards an RFP SIP providing for an average of 3 percent per year of VOC and/or NO_X emissions reductions for (*1*) the 6-year period immediately following the baseline year; and (*2*) all remaining 3-year periods after the first 6-year period out to the area's attainment date.[94] The RFP requirement is a continuing applicable requirement for the Coachella Valley under the EPA's anti-backsliding rules that apply once a standard has been revoked. See 40 CFR 51.1105(a)(1) and 51.1100(o)(4).

CAA section 182(c)(2)(C) allows for the substitution of NO_X emissions reductions in place of VOC reductions to meet the RFP requirements. According to the EPA's NO_X Substitution Guidance,[95] the substitution of NO_X reductions for VOC reductions must be done on a percentage basis, rather than a straight ton-for-ton exchange. There are two steps for substituting NO_X for VOC. First, an equivalency demonstration must show that the cumulative RFP emissions reductions are consistent with the NO_X and VOC emissions reductions determined in the ozone attainment modeling demonstration. Second, specified reductions in NO_X and VOC emissions should be accomplished after the initial 6-year ROP reductions are achieved and before the attainment date, consistent with the continuous RFP emission reduction requirement.[96]

Section 182(b)(1) requires that reductions exclude emissions reductions from four prescribed federal programs (*i.e.,* the federal motor vehicle control program, the federal Reid vapor pressure (RVP) requirements, any RACT corrections previously specified by the EPA, and any I/M program corrections necessary to meet the Basic I/M level); and (3) be calculated from an ''adjusted'' baseline relative to the year for which the reduction is applicable.

The adjusted base year inventory must exclude the emissions reductions from fleet turnover between 1990 and 1996 and from federal RVP regulations promulgated by November 15, 1990, or required under section 211(h) of the Act. The net effect of these adjustments is that states are not able to take credit for emissions reductions that would result from fleet turnover of current federal-standard cars and trucks, or from already existing federal fuel regulations. However, the SIP can take full credit for the benefits of any post-1990 vehicle emissions standards, as well as any other new federal or state motor vehicle or fuel programs that will be implemented in the nonattainment area, including Tier 1 exhaust standards, new evaporative emissions standards, reformulated gasoline, Enhanced I/M, California low emissions vehicle program, transportation control measures, etc.

b. RFP Demonstration in the State Submittal

The Coachella Valley Ozone Plan contains emissions estimates for the baseline, milestone, and attainment years.[97] Tables 3 and 4 show the RFP demonstration.[98] The RFP

[93] 82 FR 26854.

[94] Following the reclassification of the Coachella Valley to Extreme nonattainment for the 1997 8-hour ozone standards, the EPA established a deadline of February 14, 2021, for the state to submit SIP revisions addressing the CAA section sections 172(c)(2) and 182(b)(1) RFP requirements. 85 FR 2311, 2312.

[95] EPA Office of Air Quality Planning and Standards, ''NO_X Substitution Guidance,'' December 1993.

[96] As noted in Section IV.D.1 of this document, Coachella Valley has already met the 15 percent ROP demonstration requirement.

[97] Coachella Valley Ozone Plan, pp. 6–1 to 6–7.

[98] The years between 2002 and 2020 were addressed in the ''Staff Report, Proposed Updates to the 1997 8-Hour Ozone Standard, State Implementation Plans; Coachella Valley and Western Mojave Desert'' (''2014 SIP Update'') which covered the Coachella Valley's Severe area

demonstration calculates future year VOC targets from the 2002 baseline, consistent with CAA 182(c)(2)(B)(i), which requires reductions of ''at least 3 percent of baseline emissions each year,'' and it substitutes NO_X reductions for VOC reductions beginning in milestone year 2020 to meet VOC emission targets. The District concluded that RFP demonstration meets the applicable requirements for each milestone year as well as the attainment year.

TABLE 3—CALCULATION OF RFP DEMONSTRATION FOR COACHELLA VALLEY—VOC [a]

VOC emission calculations	2002 [b]	2020 [b]	2023 [b]

2. Required Percent Reductions from Base Year (%)	n/a	51%	60%
3. Target VOC Level (tpd)	n/a	11.2	9.1
4. Cumulative Milestone Year Shortfall (tpd)	n/a	3.1	5.3
5. Cumulative Shortfall in VOC (%)	n/a	13.6%	37.1%
6. Incremental Milestone Year Shortfall (%)	n/a	13.6%	23.5%

[a] Source: Table 6–1 of the Coachella Valley Ozone Plan.
[b] Units are tons per day (summer planning) unless otherwise noted.

TABLE 4—CALCULATION OF RFP DEMONSTRATION FOR COACHELLA VALLEY—NO_X [a]

NO_X emission calculations	2002 [b]	2020 [b]	2023 [b]
1. Baseline NO_X Emissions (tpd)	54.24	15.77	12.33
2. Reductions in NO_X Emissions since Base Year (tpd)	n/a	38.47	41.91
3. Percent Reductions in NO_X Emissions since Base Year	n/a	70.9%	77.3%
4. Previous NO_X Substitution (%)	n/a	n/a	13.6%
5. Percent Available for NO_X Substitution (%)	n/a	70.9%	63.7%
6. Incremental Milestone Year VOC Shortfall (%)	n/a	13.6%	23.5%
7. Percent Surplus Reduction (%)	n/a	57.3%	40.2%
8. RFP Compliance	n/a	Yes	Yes

[a] Source: Table 6–2 of the Coachella Valley Ozone Plan. Table 4 of this document has been adapted from Table 6–2 to remove adjustments related to use of excess NO_X emissions reductions to address the contingency measures requirements of CAA sections 179(c)(9) and 182(c)(9). Under the EPA's most recent guidance (described in Section IV.G.1 of this document), excess NO_X reductions may not be used for this purpose.
[b] Units are tons per day (summer planning) unless otherwise noted.

CAA section 182(b)(1)(D) prohibits states from taking credit for certain categories of measures in an RFP demonstration. The three categories of non-creditable measures identified in CAA sections 182(b)(1)(D)(iii)-(iv) achieved their reductions many years ago and reductions from these measures would have no effect for the RFP milestones modeled in the Plan.[99] All categories of non-creditable emissions are considered de minimis for the 2008 or 2015 ozone NAAQS (and therefore do not need to be calculated as part of in an RFP demonstration for these standards).[100] While emissions from the category identified in CAA section 182(b)(1)(D)(i) (''any measure relating to motor vehicle exhaust or evaporative emissions promulgated by the Administrator by January 1, 1990'') affect the demonstration for the 1997 8-hour ozone standards, the change in this effect becomes smaller with each successive milestone year. CARB has provided estimates for non-creditable emissions, which are less than 10 percent of the base year inventory. For more information about the correction to the non-creditable reductions in the 2014 SIP Update, including a revised RFP demonstration, see the TSD supporting this proposed rule.

3. Proposed Action on the ROP and RFP Demonstrations

As noted in Section IV.D.1 of this document, the EPA has already approved a 15-percent ROP plan for the Coachella Valley in our prior action on SCAQMD's submittal for the 1997 ozone NAAQS;[101] therefore, we find that the District and CARB have met the ROP requirement for this area.

Based on our review of the emissions inventory documentation in the Coachella Valley Ozone Plan, we find that CARB and the District have used the most recent planning and activity assumptions, emissions models, and methodologies in developing the RFP baseline and milestone year emissions inventories, and that the District and CARB have used an appropriate calculation method to demonstrate RFP. For these reasons, we have determined that the Plan demonstrates RFP in the 2023 attainment year, consistent with applicable CAA requirements and EPA guidance. We therefore propose to approve the Extreme RFP demonstration for the Coachella Valley for the 1997 ozone NAAQS under CAA sections 172(c)(2), 182(b)(1) and 182(c)(2) and 40 CFR 51.1105(a)(1) and 51.1100(o)(4).

E. Vehicle Miles Travelled Offset Demonstration

1. Requirements for a VMT Offset Demonstration

CAA section 182(d)(1)(A) requires a state to submit a revision for each area classified as Severe or above to identify and adopt specific enforceable transportation control strategies (TCSs) and TCMs to offset growth in emissions from growth in VMT or numbers of vehicle trips in such area. CAA section 182(d)(1)(A) also requires the SIP to attain reductions in motor vehicle emissions consistent with RFP demonstrations; and to implement measures as necessary to demonstrate attainment. We refer to CAA section 182(d)(1)(A) as the ''VMT offset requirement.'' The VMT offset requirement is a continuing applicable requirement for the Coachella Valley under the EPA's anti-backsliding rules

requirements for the 1997 ozone standards. 82 FR 26854.

[99] 80 FR 12264, 12274.
[100] 40 CFR 51.1110(a)(7) and 51.1310(a)(7).
[101] 82 FR 26854.

that apply once a standard has been revoked.[102]

In response to the Ninth Circuit Court of Appeals' decision in *Association of Irritated Residents* v. *EPA,*[103] we issued a memorandum titled ''Implementing Clean Air Act Section 182(d)(1)(A): Transportation Control Measures and Transportation Control Strategies to Offset Growth in Emissions Due to Growth in Vehicle Miles Travelled'' (''August 2012 Guidance'').[104] The August 2012 Guidance discusses the meaning of the terms TCSs and TCMs, and recommends that both TCSs and TCMs be included in the emissions calculations made for the purpose of determining the degree to which any hypothetical growth in emissions due to growth in VMT should be offset. Generally, TCS is a broad term that encompasses many types of controls (including, for example, motor vehicle emissions limitations, I/M programs, alternative fuel programs, other technology-based measures, and TCMs) that would fit within the regulatory definition of ''control strategy.'' [105] TCM is defined at 40 CFR 51.100(r) to mean ''any measure that is directed toward reducing emissions of air pollutants from transportation sources,'' including, but not limited to, measures listed in CAA section 108(f), and generally refers to programs intended to reduce the VMT, the number of vehicle trips, or traffic congestion, such as programs for improved public transit, designation of certain lanes for passenger buses and high-occupancy vehicles, trip reduction ordinances, and similar measures.

The August 2012 Guidance also explains how states may demonstrate that the VMT offset requirement is satisfied in conformance with the Court's ruling. In the approach recommended by the August 2012 Guidance, states develop one emission inventory estimate for the base year, and three different emissions inventory scenarios for the attainment year. Two of these scenarios would represent hypothetical emissions scenarios that would provide the basis to identify the ''growth in emissions'' due solely to the growth in VMT, and one that would represent projected actual motor vehicle emissions after fully accounting for projected VMT growth and offsetting emissions reductions obtained by all creditable TCSs and TCMs. The August 2012 Guidance contains specific details on how states might conduct the calculations.

The base year on-road VOC emissions inventory should be based on VMT in that year, and it should reflect all enforceable TCSs and TCMs in place in the base year. This would include vehicle emissions standards, state and local control programs such as I/M programs or fuel rules, and any additional implemented TCSs and TCMs that were already required by or credited in the SIP as of the base year.

The first of the emissions calculations for the attainment year would be based on the projected VMT and trips for that year and assume that no new TCSs or TCMs beyond those already credited in the base year inventory have been put in place since the base year. This calculation demonstrates how emissions would hypothetically change if no new TCSs or TCMs were implemented, and VMT and trips were allowed to grow at the projected rate from the base year. This estimate would show the potential for an increase in emissions due solely to growth in VMT and trips, representing a no action scenario. Emissions in the attainment year in this scenario may be lower than those in the base year due to fleet turnover to lower-emitting vehicles. Emissions may also be higher if VMT and/or vehicle trips are projected to sufficiently increase in the attainment year.

The second of the attainment year emissions calculations would also assume that no new TCSs or TCMs beyond those already credited have been put in place since the base year and would also assume no growth in VMT and trips between the base year and attainment year. Like the no-action attainment year estimate described previously, emissions in the attainment year may be lower than those in the base year due to fleet turnover, but the emissions would not be influenced by any growth in VMT or trips. This emissions estimate, the VMT offset ceiling scenario, would reflect the maximum attainment emissions that should be allowed to occur under the statute as interpreted by the Ninth Circuit because it shows what would happen under a scenario in which no offsetting TCSs or TCMs have yet been put in place and VMT and trips are held constant during the period from the area's base year to its attainment year.

These two hypothetical status quo estimates are necessary steps in identifying target emission levels. Comparison of the first two attainment year calculations would identify whether there was a hypothetical growth in emissions due to growth in VMT that needs to be offset, and as a result whether further TCMs or TCSs beyond those that have been adopted and implemented are needed.

The third calculation incorporates the emissions that are actually expected to occur in the area's attainment year after taking into account reductions from all enforceable TCSs and TCMs that were put in place after the baseline year. This estimate would be based on the VMT and trip levels expected to occur in the attainment year (*i.e.,* the VMT and trip levels from the first estimate) and all of the TCSs and TCMs expected to be in place and for which the SIP will take credit in the area's attainment year, including any TCMs and TCSs put in place since the base year. This represents the projected actual (attainment year) scenario. If this emissions estimate is less than or equal to the emissions ceiling that was established in the second of the attainment year calculations, the TCSs or TCMs for the attainment year would be sufficient to fully offset the hypothetical growth in emissions identified by comparison of the first two attainment year calculations.

If the projected actual attainment year emissions are greater than the VMT offset ceiling established in the second of the attainment year emissions calculations even after accounting for post-baseline year TCSs and TCMs, the state would need to adopt and implement additional TCSs or TCMs. To meet the VMT emissions offset requirement of section 182(d)(1)(A) as interpreted by the Ninth Circuit, the additional TCSs or TCMs would need to offset the growth in emissions and bring the actual emissions down to at least the same level as the attainment year VMT offset ceiling estimate in the second attainment year calculation.

2. The Coachella Valley VMT Offset Demonstration

The VMT Offset Demonstration uses EMFAC2017 to estimates on-road emissions. EMFAC2017 was the latest EPA-approved motor vehicle emissions model for California available at the time the VMT Offset Demonstration was prepared.[106] The EMFAC2017 results,

[102] 40 CFR 40 CFR 51.1105(a)(1) and 51.1100(o)(10).

[103] 632 F.3d. 584, 596–597 (9th Cir. 2011), reprinted as amended on January 27, 2012, 686 F.3d 668, further amended February 13, 2012 (ruling additional TCMs are required whenever vehicle emissions are projected to be higher than they would have been had VMT not increased, even when aggregate vehicle emissions are actually decreasing).

[104] EPA, Office of Transportation and Air Quality, ''Implementing Clean Air Act Section 182(d)(1)(A): Transportation Control Measures and Transportation Control Strategies to Offset Growth in Emissions Due to Growth in Vehicle Miles Travelled,'' EPA–420–B–12–053, August 2012.

[105] See, *e.g.,* 40 CFR 51.100(n).

[106] The EPA approved and announced the availability of EMFAC2017, the latest update to the EMFAC model for use by State and local governments to meet CAA requirements at that

however, were adjusted based on a sensitivity analysis using older previously approved EMFAC models, EMFAC2011 and EMFAC2014. As the VMT Offset Demonstration explains, several post-2002 emissions control measures are factored into EMFAC2017 and cannot be removed. To correct this, the VMT Offset Demonstration included the results of a sensitivity analysis to determine the emissions reductions associated with CARB's Advanced Clean Cars I program [107] and the Truck and Bus Regulations [108] with EMFAC2014, and the additional stringency of CARB's I/M programs [109] calculated using EMFAC2011.[110]

All of the EMFAC models calculate emissions from two combustion processes (*i.e.,* running exhaust and start exhaust) and four evaporative processes (*i.e.,* hot soak, running losses, diurnal losses, and resting losses). The models combine trip-based VMT data and speed distribution from the 2016–2040 RTP/SCS, along with vehicle data from the California Department of Motor Vehicles and the corresponding emission rates to calculate emissions.

Emissions from running exhaust, start exhaust, hot soak, and running losses are a function of how much a vehicle is driven. As such, emissions from these processes are directly related to VMT and vehicle trips, and the State included emissions from them in the calculations that provide the basis for the revised Coachella Valley VMT Offset Demonstration.[111] Resting and diurnal losses occur independently of vehicle activity were and not considered in the demonstration.[112]

The VMT Offset Demonstration also includes the previously described three attainment year scenarios (*i.e.,* no new measures; no VMT Growth or VMT offset ceiling; and projected actual) for 2023. Table 5 summarizes the emissions estimates for the base year and the three scenarios.

TABLE 5—VMT OFFSET INVENTORY SCENARIOS AND RESULTS FOR THE 1997 8-HOUR OZONE STANDARDS [a]

Scenario	VMT		Controls	VOC Emissions
	Year	1000 miles/day	Year	tpd
Base Year	2002	11,091	2002	8.5
No New Measures	2023	14,508	2002	2.8
No New Measures and No VMT Growth (VMT Offset Ceiling)	2002	11,091	2002	2.0
Projected Actual	2023	14,508	2018	1.9

[a] Source: Coachella Valley VMT Offset Demonstration, Table 1.

For the base year scenario, CARB ran the EMFAC2017 model for the 2002 RFP base year using VMT and starts data corresponding to those years. For the no new measures scenario, CARB estimated 2023 on-road vehicle emissions using EMFAC2017, considering the estimated increase in VMT,[113] but adding 0.33 tpd to account for the additional reductions associated with the Advanced Clean Cars I program, Truck and Bus Regulation, and I/M programs that are not creditable reductions in these calculations. Likewise, CARB added 0.25 tpd to the VMT offset ceiling to account for the same factors.

For the VMT offset ceiling scenario, the State ran the EMFAC2011 model for the attainment year but with VMT and starts data corresponding to base year values. Like the no action scenario, the EMFAC2011 model was adjusted to reflect VOC emissions levels in the attainment year without the benefits of the on-road motor vehicle control programs implemented after the base year. Thus, the VMT offset ceiling scenario reflects hypothetical VOC emissions if the State had not put in place any TCSs or TCMs after the base year and if there had been no growth in VMT or vehicle trips between the base year and the attainment year. As shown in Table 5, CARB estimates VMT offset ceiling VOC emissions to be 2.0 tpd in 2023.

The hypothetical growth in emissions due to growth in VMT and trips can be determined from the difference between the VOC emissions estimates under the no action scenario and the corresponding estimate for the VMT offset ceiling scenario. Based on the values in Table 5, the hypothetical growth in emissions due to growth in VMT and trips in the Coachella Valley would have been 0.8 tpd (*i.e.,* 2.8 tpd minus 2.0 tpd). This hypothetical difference establishes the level of emissions caused by growth in VMT that need to be offset by the combination of post-baseline year TCMs and TCSs and any necessary additional TCMs and TCSs.

For the projected actual scenario calculation, the State included the emissions benefits from TCSs and TCMs put in place since the base year.[114] In addition to the measures already discussed, a full list of CARB mobile source regulations from 1990 through the Plan's development appears in Attachment A–1 of the VMT Offset Demonstration. While some of these measures were adopted prior to 2002, all or part of their implementation occurred after 2002. CARB determined the area complied with the VMT Offset Demonstration because actual emissions did not exceed the VMT offset ceiling scenario calculation, in accordance with EPA guidance.[115]

3. The EPA's Evaluation of the VMT Offset Demonstration

CARB's VMT Offset Demonstration uses a 2002 RFP base year. This is the same year used for the Coachella Valley

time, in a rulemaking published at 84 FR 41717 (August 15, 2019).

[107] The EPA approved the Advanced Clean Car program in the California SIP on June 16, 2016 (81 FR 39424).

[108] The EPA approved the Truck and Bus Rule into the California SIP on April 4, 2012 (77 FR 20308).

[109] The EPA approved California's I/M program into the California SIP on July 1, 2010 (75 FR 38023).

[110] Two other control programs started after 2002, the Heavy-Duty Greenhouse Gas Regulation and Low Carbon Fuel Standard, have no impact on VOC emissions. VMT Offset Demonstration, p. 9, n. 9.

[111] VMT Offset Demonstration, p. 2.

[112] This fact is noted in several locations of the VMT Offset Demonstration, *e.g.,* p. 10.

[113] This estimate included an additional 0.33 tpd based on the sensitivity analysis conducted with the EMFAC2011 and EMFAC2014 models to account for the EMFAC reductions for CARB's Advanced Clean Cars I program, Truck and Bus Regulation, and I/M programs.

[114] As described in Section IV.B.2.c of this document, the TCMs are focused in the South Coast Air Basin, which heavily influences air quality in the Coachella Valley due to the downwind transport.

[115] EPA, Office of Transportation and Air Quality, ''Implementing Clean Air Act Section 182(d)(1)(A): Transportation Control Measures and Transportation Control Strategies to Offset Growth in Emissions Due to Growth in Vehicle Miles Travelled,'' EPA–420–B–12–053, August 2012.

Severe area VMT offset demonstration for the 1997 ozone NAAQS,[116] it corresponds to the Plan's baseline year for the RFP emissions inventory, and we find it appropriate for this demonstration.[117] Further, we find CARB's methodology incorporating sensitivity analysis to adjust for the periodic change in emissions control measures and the omission of resting and diurnal emissions appropriate.

As shown in Table 5, the VMT Offset Demonstration projects actual 2023 attainment-year VOC emissions of 1.9 tpd in the Coachella Valley, which is less than the VMT offset ceiling scenario value of 2.0 tpd. Therefore, the VMT Offset Demonstration shows that existing measures are sufficient to offset the increase due solely to VMT and additional trips, consistent with the methodology in the EPA's August 2012 Guidance, and that no new TCMs or TCSs are required for the area. We are proposing to approve the VMT Offset Demonstration.

F. Clean Fuels or Advanced Control Technology for Boilers

1. Statutory and Regulatory Requirements

Section 182(e)(3) of the CAA provides that SIPs for Extreme nonattainment areas require each new, modified, and existing electric utility and industrial and commercial boiler that emits more than 25 tpy of NO_X to either burn as its primary fuel natural gas, methanol, or ethanol (or a comparably low-polluting fuel), or use advanced control technology, such as catalytic control technologies or other comparably effective control methods.

Additional guidance on this requirement is provided in the General Preamble.[118] In the General Preamble, the EPA states that, for the purposes of CAA section 182(a)(3), a boiler should generally be considered as any combustion equipment used to produce steam and generally does not include a process heater that transfers heat from combustion gases to process streams.[119] In addition, boilers with rated heat inputs less than 15 million British thermal units (MMBtu) per hour that are oil- or gas-fired may generally be considered de minimis and exempt from these requirements because it is unlikely that they will exceed the 25 tpy NO_X emission limit.[120]

2. Summary of the State's Submission

The Coachella Valley Ozone Plan discusses compliance with the requirements of CAA section 182(e)(3) by reference to SCAQMD Rules 1146 (''Emissions of Oxides of Nitrogen from Industrial, Institutional, and Commercial Boilers, Steam Generators, and Process Heaters'') and 1135 (''Emissions of Oxides of Nitrogen from Electricity Generating Facilities'').[121] These rules require the best available retrofit control technology (BARCT) for existing boilers. New or modified sources with emissions increases are subject to California best available control technology (BACT) requirements, which are comparable to the federal lowest achievable emissions rate (LAER) requirements for major sources as defined in CAA section 171(3). Accordingly, the Plan concludes that no additional action is needed to satisfy the CAA section 182(e)(3) requirement for the Coachella Valley's reclassification to Extreme.

3. The EPA's Review of the State's Submission

In our previous evaluation of the 2016 AQMP, which includes a similar documentation of compliance with CAA 182(e)(3), we determined that SCAQMD Rules 1303, 1146, and 2004 satisfy the clean fuel or advanced control technology for boilers requirement in CAA section 182(e)(3) for the South Coast Air Basin.[122] For similar reasons, we find that the requirements for new, modified, and existing boilers in approved SCAQMD Rules 1303, 1146, and 2004 satisfy the clean fuel or advanced control technology for boilers requirement in CAA section 182(e)(3), and based on this finding, we propose to find the State has demonstrated that these requirements are met for the Coachella Valley for the 1997 ozone NAAQS.

G. Other CAA Requirements

1. Contingency Measures

Under the CAA, ozone nonattainment areas classified under subpart 2 as Serious or above must include in their SIPs contingency measures consistent with sections 172(c)(9) and 182(c)(9). CAA section 172(c)(9) requires states with nonattainment areas to provide for the implementation of specific measures to be undertaken if the area fails to make RFP or to attain the NAAQS by the applicable attainment date. Such measures must be included in the SIP as contingency measures to take effect in any such case without further action by the state or the EPA. CAA section 182(c)(9) requires states to provide contingency measures in the event that an ozone nonattainment area fails to meet any applicable RFP milestone. Contingency measures are additional controls or measures to be implemented in the event an area fails to make RFP or to attain the NAAQS by the attainment date.

In March 2023, the EPA announced a new draft guidance addressing the contingency measures requirement of section 172(c)(9), entitled ''DRAFT: Guidance on the Preparation of State Implementation Plan Provisions that Address the Nonattainment Area Contingency Measure Requirements for Ozone and Particulate Matter,'' and provided an opportunity for public comment.[123] The principal differences between this draft revised guidance and previous existing guidance on contingency measures relate to the EPA's recommendations concerning the specific amount of emissions reductions that implementation of contingency measures should achieve, and the timing for when the emissions reductions from the contingency measures should occur.

The Plan explains that the District intends to amend SCAQMD Rule 445, ''Wood Burning Devices,'' to include potential contingency provisions for Coachella Valley for the 1997 8-hour ozone standards.[124] To date, the EPA has not received a submittal to address the 1997 ozone contingency measures requirements of CAA sections 172(c)(9) and 182(c)(9) for the Coachella Valley. The EPA is not proposing action on the Coachella Valley contingency measures requirement for the 1997 ozone NAAQS in this rulemaking.

2. CAA Section 185 Fees

Under sections 182(d)(3), (e), and (f) and 185 of the Act, states with ozone nonattainment areas classified as Severe or Extreme are required to submit a revision to the SIP that would require major stationary sources of VOC or NO_X to pay a fee upon a failure to attain by the applicable attainment date. Under CAA section 185, this fee is calculated as $5,000 in 1990 dollars, adjusted for inflation, for every ton emitted by the source during the calendar year in excess of 80 percent of the source's

[116] 81 FR 75764, 75779.

[117] The 2002 RFP base year is also consistent with the approach described in the 1997 Ozone Implementation Rule—Phase 2. See 70 FR 71612, 71632.

[118] 57 FR 13498, 13523.

[119] 57 FR 13498, 13523.

[120] Id at 13524.

[121] Coachella Valley Ozone Plan, p. 6–31.

[122] 84 FR 28132, 28164.

[123] 88 FR 17571 (March 23, 2023).

[124] Coachella Valley Ozone Plan p. 6–30.

actual emissions in the applicable attainment year.[125]

While the EPA has approved SCAQMD Rule 317 into the SIP for the 1-hour ozone standards, the SCAQMD has not submitted a rule to address the requirement of CAA section 185 for the 1997 8-hour ozone standards. We are aware, however, that the SCAQMD is working to create to a rule to address this requirement, SCAQMD Rule 317.1, ''Clean Air Act Nonattainment Fees for the 8-Hour Ozone Standards.'' The SCAQMD has prepared a draft rule and held a workshop to discuss it on November 7, 2023.[126] The EPA is not proposing action on the CAA Section 185 fee requirement for the 1997 ozone NAAQS in this rulemaking.

3. New Source Review Rules

Section 182(a)(2)(C) of the CAA requires states to develop SIP revisions containing permit programs for each ozone nonattainment area. These SIP revisions must include requirements for permits in accordance with CAA sections 172(c)(5) and 173 for the construction and operation of each new or modified major stationary source for VOC and NO_X anywhere in the nonattainment area.[127] In addition, CAA section 182(e)(1) requires the permitting offset ratios for volatile organic compound and NO_X for major sources and modifications in an Extreme nonattainment area to be at least 1.5 to 1, or at least 1.2 to 1 if the plan requires all existing major sources in the nonattainment area to use the best available control technology. SCAQMD Rule 1302, ''Definitions,'' and Rule 2000, ''General'' (part of the RECLAIM regulations), have been submitted to address these requirements.[128] The EPA has not yet acted on this submittal.

4. Clean Fuels for Fleets

Section 182(c)(4)(A) of the CAA requires states to submit SIP revisions to implement the clean-fuel vehicle program for fleets described at CAA section 246 (''Clean Fuels Fleet Program'') in each ozone nonattainment area classified as Serious and above. Section 182(c)(4)(B) of the CAA allows states to opt out of the federal Clean Fuels Fleet Program by submitting a SIP revision consisting of a program or programs that will result in at least equivalent long-term reductions in ozone precursors and toxic air emissions.

In 1994, CARB submitted a SIP revision to the EPA to opt out of the Clean Fuels Fleet Program. The submittal included a demonstration that California's low-emissions vehicle program achieved emissions reductions at least as large as would be achieved by the federal program. The EPA approved the SIP revision to opt-out of the federal program on August 27, 1999.[129]

Recent EPA guidance for the 2008 and 2015 ozone standards[130] identifies several methods to demonstrate compliance with the Clean Fuels Fleet Program requirement. Among them, a state may submit a certification SIP revision if it has ''an approved [Clean Fuels Fleet Program] or substitute measure(s) that it is continuing to implement, and the state does not plan to make any changes to the program or substitute measure(s).''[131] Consistent with this guidance, the EPA approved the ''California Clean Fuels for Fleets Certification for the 70 ppb (2015) Ozone Standard,'' which included Coachella Valley, in a final rule dated May 25, 2023.[132] However, because the Plan does not contain a certification for the 1997 ozone standards, the EPA is taking no action regarding this requirement as part of this action.

5. Enhanced Monitoring

Section 182(c)(1) of the CAA requires that all ozone nonattainment areas classified as Serious or above implement measures to enhance and improve monitoring for ambient concentrations of ozone, NO_X, and VOC, and to improve monitoring of emissions of NO_X and VOC. The enhanced monitoring network for ozone is referred to as the photochemical assessment monitoring station (PAMS) network. The EPA promulgated final PAMS regulations on February 12, 1993.[133]

On November 10, 1993, CARB submitted to the EPA a SIP revision addressing the PAMS network for six ozone nonattainment areas in California, including the Southeast Desert, to meet the enhanced monitoring requirements of CAA section 182(c)(1) and the PAMS regulations.[134] The EPA determined that the PAMS SIP revision met all applicable requirements for enhanced monitoring and approved the PAMS submittal into the California SIP.[135]

Appendix B, ''Enhanced Ozone Monitoring Plan,'' of the District's Five-Year Monitoring Network Assessment, dated June 1, 2020, describes the District's plan to address the requirements of section 182(c)(1).[136] The EPA has approved the District's review, including the Enhanced Ozone Monitoring Plan in a letter dated October 28, 2020.[137]

Prior to 2006, the EPA's ambient air monitoring regulations in 40 CFR part 58 (''Ambient Air Quality Surveillance'') set forth specific SIP requirements (see former 40 CFR 52.20). In 2006, the EPA significantly revised and reorganized 40 CFR part 58.[138] Under revised 40 CFR part 58, SIP revisions are no longer required; rather, compliance with EPA monitoring regulations is established through review of required annual monitoring network plans.[139] Therefore, based on our review and approval of the 2020 Five-Year Network Monitoring Assessment we find the District has adequately addressed the enhanced monitoring requirements under CAA section 182(c)(1) for the Coachella Valley.

6. Enhanced Vehicle Inspection and Maintenance Programs

Section 182(c)(3) of the CAA requires states with ozone nonattainment areas classified as Serious or above to implement an enhanced motor vehicle inspection and maintenance program in those areas. The requirements for those programs are provided in CAA section 182(c)(3) and 40 CFR part 51, subpart S. The EPA approved the State of California's SIP revision addressing this requirement in a final rule dated July 1, 2010.[140]

V. Environmental Justice Considerations

We expect that this proposed action, if approved, will generally be neutral or contribute to a reduction in adverse environmental and health impacts on all

[125] CAA section 185(a) and (b).

[140] 75 FR 38023.

populations in the Coachella Valley, including people of color and low-income populations in the area. At a minimum, the approved action would not worsen any existing air quality and is expected to ensure the area is meeting requirements to attain air quality standards. Further, there is no information in the record indicating that this action is expected to have disproportionately high or adverse human health or environmental effects on a particular group of people. In responding to public concerns about environmental justice in eastern Coachella Valley, the Plan notes that (1) Assembly Bill 617 funding has reduced pollutant emissions in Eastern Coachella Valley by 63.1 tpy of NO_X, 7.5 tpy of VOC, and 5.3 tpy of diesel particulate matter,[141] and (2) the SCAQMD has provided $966,667 in energy efficiency upgrades, reducing energy costs for homes within designated environmental justice areas of Indio and Eastern Coachella Valley.[142] The 2016 AQMP also identifies an Environmental Justice Advisory Group established to ''advise and assist SCAQMD in protecting and improving public health in SCAQMD's most impacted communities through the reduction and prevention of air pollution.'' [143]

VI. The EPA's Proposed Action and Public Comment

For the reasons discussed in this document, the EPA is proposing to approve the California's SIP submittal for the Coachella Valley addressing the Extreme nonattainment areas for the 1997 ozone NAAQS. The EPA is proposing to approve the following elements of SCAQMD's ''Final Coachella Valley Extreme Area Plan for 1997 8 Hour Ozone Standard,'' dated December 2020, under CAA section 110(k)(3):

1. The RACM demonstration as meeting the requirements of CAA section 172(c)(1) and 40 CFR 51.1105(a)(1) and 51.1100(o)(17);

2. The ROP and RFP demonstrations as meeting the requirements of CAA sections 172(c)(2) and 182(c)(2)(B) and 40 CFR 51.1105(a)(1) and 51.1100(o)(4); and

3. The attainment demonstration as meeting the requirements of CAA section 182(c)(2)(A) and 40 CFR 51.1105(a)(1) and 51.1100(o)(12).

The EPA is also proposing to approve CARB's ''2020 Coachella Valley Vehicle Miles Traveled Emissions Offset Demonstration,'' release date January 22, 2022. The demonstration provides for transportation control strategies and measures sufficient to offset any growth in emissions from growth in VMT or the number of vehicle trips, and to provide for RFP and attainment, as meeting the requirements of CAA section 182(d)(1)(A) and 40 CFR 51.1105(a)(1) and 51.1100(o)(10). Additionally, we are proposing to find that the State has satisfied the clean fuel or advanced control technology for boilers requirement in CAA section 182(e)(3) for the Coachella Valley for the 1997 ozone NAAQS. The EPA is soliciting public comments on the issues discussed in this document. We will accept comments from the public on this action for the next 30 days. We will consider these comments before taking final action.

VII. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this proposed action merely proposes to approve state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993), 13563 (76 FR 3821, January 21, 2011) and 14094 (88 FR 21879, April 11, 2023);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it proposes to approve a state program;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the proposed action does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

Furthermore, Executive Order 12898, ''Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations'' (59 FR 7629, February 16, 1994), directs Federal agencies to identify and address ''disproportionately high and adverse human health or environmental effects'' of their actions on minority populations and low-income populations to the greatest extent practicable and permitted by law. The EPA defines environmental justice (EJ) as ''the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.'' The EPA further defines the term fair treatment to mean that ''no group of people should bear a disproportionate burden of environmental harms and risks, including those resulting from the negative environmental consequences of industrial, governmental, and commercial operations or programs and policies.''

The State did not evaluate environmental justice considerations as part of its SIP submittal; the CAA and applicable implementing regulations neither prohibit nor require such an evaluation. However, as described in Section IV of this document, the District has taken measures to address environmental justice concerns within the Coachella Valley. The EPA did not perform an EJ analysis and did not consider EJ in this action. Due to the nature of this proposed action, if finalized, this action is expected to have

[141] Coachella Valley Ozone Plan, p. 9–8. SCAQMD's website identifies Assembly Bill 617 Community Air Initiatives as ''community based efforts that focus on improving air quality and public health in environmental justice communities.'' See *http://www.aqmd.gov/nav/about/initiatives/environmental-justice/ab617-134.*

[142] Id.

[143] 2016 AQMP p. 9–7.

a neutral to positive impact on the air quality of Coachella Valley. Consideration of EJ is not required as part of this action, and there is no information in the record inconsistent with the stated goal of Executive Order 12898, to achieve environmental justice for people of color, low-income populations, and Indigenous peoples.

Petition To Remove the Stationary Combustion Turbines Source Category From the List of Categories of Major Sources of Hazardous Air Pollutants

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notification of denial of petition to delist.

SUMMARY: The U.S Environmental Protection Agency (EPA) is announcing the Agency's decision to deny a petition requesting the removal of the Stationary Combustion Turbines source category from the list of categories of major sources of hazardous air pollutants (HAP) subject to regulation the Clean Air Act (CAA). The petition was submitted jointly by American Fuel & Petrochemical Manufacturers, the American Petroleum Institute, the American Public Power Association, the Gas Turbine Association, the Interstate Natural Gas Association of America, and the National Rural Electric Cooperative Association (''the petitioners''). The EPA is denying the petition based on the EPA's determination that the petition is incomplete and because we have found that the submitted information is inadequate to determine that no source in the category emits HAP in quantities that may cause a lifetime risk of cancer greater than 1-in-1 million to the individual in the population who is most exposed to emissions of such pollutants from the source. We have reached this decision based on review of the risk analysis and other information submitted by petitioners and on consideration of turbine testing results received from a CAA information request. The EPA is denying the petition with prejudice and will deny any future petition to delist as a matter of law unless such future petition is accompanied by substantial new information or analysis.

DATES: Petitions for judicial review of this action must be filed June 17, 2024. See **SUPPLEMENTARY INFORMATION** for filing information.

ADDRESSES: In addition to being available in the docket, an electronic copy of this action is available on the internet. Following signature, the EPA will post a copy of this action at *https://www.epa.gov/stationary-sources-air-pollution/stationary-combustion-turbines-national-emission-standards.* Following publication in the **Federal Register**, the EPA will post the **Federal Register** version of this action at this same website.

FOR FURTHER INFORMATION CONTACT: For questions about this action contact Ms. Angela M. Ortega, Sector Policies and Programs Division (D243–01), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, P.O. Box 12055, Research Triangle Park, North Carolina 27711; telephone number: (919) 541–4197; and email address: *ortega.angela@epa.gov.*

SUPPLEMENTARY INFORMATION:

Docket. The EPA has established a docket for this rulemaking under Docket ID No. EPA–HQ–OAR–2020–0408.[1] All documents in the docket are listed in *https://www.regulations.gov.* Although listed, some information is not publicly available, *e.g.,* Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy. With the exception of such material, publicly available docket materials are available electronically in *https://www.regulations.gov.*

Judicial review. Section 307(b)(1) of the CAA governs judicial review of final actions by the EPA. This section provides, in part, that petitions for review must be filed in the United States Court of Appeals for the District of Columbia Circuit: (i) when the Agency action consists of ''nationally applicable regulations promulgated, or final actions taken, by the Administrator,'' or (ii) when such action is locally or regionally applicable, but ''such action is based on a determination of nationwide scope or effect and if in taking such action the Administrator finds and publishes that such action is based on such a determination.'' For locally or regionally applicable final actions, the CAA reserves to the EPA complete discretion to decide whether to invoke the exception in (ii).[2]

This final action is ''nationally applicable'' within the meaning of CAA section 307(b)(1). In this final action, the Administrator is denying a petition to delist the entire Stationary Combustion Turbines source category under CAA section 112(c)(9)(B). This action results in the continued applicability of the National Emission Standards for Hazardous Air Pollutants (NESHAP) for Stationary Combustion Turbines to all turbines meeting the rule's applicability criteria located in any state in the nation. For these reasons, this final action is nationally applicable.

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the District of Columbia Circuit within 60 days from April 16, 2024. Filing a petition for reconsideration of this final action by the Administrator does not affect the finality of this action for the purposes of judicial review, nor does it extend the time within which a petition for judicial review must be filed and shall not postpone the effectiveness of such rule or action.

Under CAA section 307(b)(2) (42 U.S.C. 7607(b)(2)), the requirements established by this final action may not be challenged separately in any civil or criminal proceedings brought by the EPA to enforce the requirements.

[1] As explained in a memorandum to the docket, the docket for this action includes the documents and information in Docket ID Nos. EPA–HQ–OAR–2017–0688 (Stationary Combustion Turbines NESHAP Risk and Technology Review), EPA–HQ–OAR–2003–0196 (Proposal to stay the enforcement of the combustion turbines National Emission Standards Hazardous Air Pollutants for new sources in the lean premix gas-fired turbines and diffusion flame gas-fired turbines subcategories), EPA–HQ–OAR–2003–0189 (Proposal to delist four subcategories from the Stationary Combustion Turbines source category), and EPA–HQ–OAR–2002–0060 (National Emission Standards for Hazardous Air Pollutants for Stationary Combustion Turbines).

[2] *Sierra Club* v. *EPA,* 47 F.4th 738, 745 (D.C. Cir. 2022) (''EPA's decision whether to make and publish a finding of nationwide scope or effect is committed to the agency's discretion and thus is unreviewable''); *Texas* v. *EPA,* 983 F.3d 826, 834–35 (5th Cir. 2020).

Organization of this document. The information in this preamble is organized as follows:

I. General Information

The EPA has received, has reviewed, and is now denying a petition that requests the removal of a source category from the list of major source categories of HAP, under CAA section 112. In section I.A., we summarize the action we are taking today. In section I.B., we provide information about the NESHAP program set forth in CAA section 112 and the regulatory history and information for the source category at issue. In section II., we discuss the delisting criteria outlined in the CAA and the Agency's process for delisting a source category. Section III. discusses the EPA's residual risk review methodologies and findings in the 2020 Stationary Combustion Turbines NESHAP Risk and Technology Review (2020 RTR) as well as the CAA section 114 information request that the EPA issued subsequent to the 2020 RTR. Section IV. presents the details of the petition to delist and the Agency's technical evaluation of the petition. Finally, in section V., we discuss the EPA's response to the petition.

A. What action is the EPA taking?

This action presents the Agency's decision to deny a petition requesting the removal of the Stationary Combustion Turbines source category from the list of categories of major sources of HAP subject to regulation under CAA section 112. The petition was submitted jointly by American Fuel & Petrochemical Manufacturers, the American Petroleum Institute, the American Public Power Association, the Gas Turbine Association, the Interstate Natural Gas Association of America, and the National Rural Electric Cooperative Association (''the petitioners'').

The EPA's decision is governed by CAA section 112(c)(9), which provides the EPA's discretionary authority to delist source categories and specifies the health risk criteria that must be met for a source category to be delisted. These criteria require the EPA to determine that no source in the category emits HAP in quantities which may cause a lifetime risk of cancer greater than 1-in-1 million to the individual in the population who is most exposed to emissions of such pollutants from the source and that HAP emissions from such source category would not result in adverse effects to human health or the environment before delisting a source category.

The EPA is denying the petition based on the EPA's determination that the petition is incomplete and because the petitioners did not present adequate information and analyses for each of the necessary subject areas, under CAA section 112(c)(9)(B). After receipt of the initial petition and the first supplement, the EPA requested that the petitioners provide information and data to support the stationary combustion turbine emission estimates provided by the petitioners; the requested information was not provided. As an additional and separate independent basis for the denial of the petition, the EPA has determined that the petitioners' requested conclusions are not supported by the evidence. The EPA is denying the petition with prejudice and will deny any future petition to delist as a matter of law unless such future petition is accompanied by substantial new information or analysis.

B. Background Information

In this section, the EPA provides a brief overview of HAP regulation under CAA section 112, the regulatory history of the Stationary Combustion Turbines source category, information about the source category and its HAP emissions, and information about delisting petitions concerning this source category.

1. HAP Regulation Under CAA Section 112

CAA section 112 establishes the framework for regulation of HAP. CAA section 112(c)(1) requires the EPA to publish a list of both categories and subcategories of major and area sources of HAP. A source category on the list is required to meet the specifically defined emission standards that depend on the HAP emitted and whether a source is a major source or an area source. Major sources of HAP are those stationary sources or group of stationary sources under common control (*e.g.,* facilities) that emit or that have the potential to emit 10 tons per year or more of any specific HAP or 25 tons per year or more of any combination of HAP. An area source is any source of HAP that is not a major source. CAA section 112(c)(2) further requires the EPA to promulgate standards under CAA section 112(d) for all listed source categories according to the schedule specified in CAA section 112(e). CAA section 112(d)(6) requires the EPA to review these standards and revise them as necessary, with consideration of developments in practices, processes, and control technologies, every 8 years (the ''technology review''), and CAA section 112(f)(2) requires the EPA to assess the risk to public health remaining after application of the technology-based standards and revise the standards, if necessary, to provide an ample margin of safety to protect public health or to prevent, taking into consideration costs, energy, safety, and other relevant factors, an adverse environmental effect. When the two reviews are combined into a single rulemaking, it is commonly referred to as the ''risk and technology review'' (RTR).

2. Regulatory History of and Information About the Stationary Combustion Turbines Source Category

On July 16, 1992, the EPA published the initial list of source categories, which included the Stationary Turbines source category (57 FR 31576). This source category was subsequently renamed the Stationary Combustion Turbines source category (64 FR 63025; November 18, 1999). CAA section 112(c)(2) further requires the EPA to promulgate standards under CAA section 112(d) for all listed source categories according to the schedule specified in CAA section 112(e). The EPA promulgated the NESHAP for Stationary Combustion Turbines on March 5, 2004 (69 FR 10512). The standards are codified at 40 CFR part 63, subpart YYYY and apply to stationary combustion turbines at major sources of HAP. There are no requirements under 40 CFR part 63, subpart YYYY for stationary combustion turbines located at area sources. The RTR for the Stationary Combustion Turbines NESHAP was proposed on April 12, 2019 (84 FR 15046) and finalized on March 9, 2020 (85 FR 13524).[3]

The Stationary Combustion Turbines source category covered by the NESHAP

[3] The EPA readopted the existing standards under CAA section 112(f)(2) (85 FR 13530).

includes approximately 1,015 turbines at 310 facilities.[4] Within the Stationary Combustion Turbines source category are the following eight subcategories: lean premix gas-fired turbines, lean premix oil-fired turbines, diffusion flame gas-fired turbines, diffusion flame oil-fired turbines, turbines which burn landfill or digester gas or gasified municipal solid waste, turbines of less than 1 megawatt (MW) rated peak power output, emergency turbines, and turbines operated on the North Slope of Alaska. Stationary combustion turbines are typically located at power plants, compressor stations, landfills, and industrial facilities such as chemical plants. These turbines are generally operated using natural gas, distillate oil, landfill gas, jet fuel, or process gas.

Emissions of HAP in the exhaust gases of turbines are the result of combustion of the gaseous and liquid fuels. The HAP present in these exhaust gases include formaldehyde, toluene, benzene, acetaldehyde, and metallic HAP (*e.g.,* cadmium, chromium, manganese, lead, and nickel). Of these HAP, benzene, nickel subsulfide, and hexavalent chromium are classified as known human carcinogens, and formaldehyde, acetaldehyde, lead, nickel carbonyl, and cadmium are classified as probable human carcinogens. Exposure to the various HAP emitted by stationary combustion turbines is associated with a variety of adverse health effects. These adverse health effects include chronic (long-term) health disorders (*e.g.,* effects on the central nervous system, damage to the kidneys, and irritation of the lung, skin, and mucus membranes); and acute health disorders (*e.g.,* effects on the kidney and central nervous system, alimentary effects such as nausea and vomiting, and lung irritation and congestion).

Mercury has been measured in the exhaust gas from landfill gas-fired turbines. Gaseous mercury emitted into the air eventually can be deposited into soil and water bodies, where microorganisms can convert it into methylmercury, a highly toxic form of mercury that bio-accumulates in fish tissue and in other aquatic creatures. People are primarily exposed to mercury by consuming contaminated fish. Methylmercury exposure is a particular concern for people of childbearing age, developing fetuses, and young children, because studies have linked exposure to high levels of methylmercury to damage to the developing nervous system. Children exposed to methylmercury while they are in the womb can have negative impacts to their cognitive thinking, memory, attention, language, fine motor skills, and visual spatial skills. Animals can absorb mercury through water, air, and soil or from eating certain plants. Mercury can harm an animal's ability to reproduce and to care for their young.

3. Delisting Petitions Concerning the Stationary Combustion Turbines Source Category

During the 2004 Stationary Combustion Turbines NESHAP rulemaking, the EPA received a petition from the Gas Turbine Association to delist two subcategories of stationary combustion turbines under CAA section 112(c)(9).[5] The petitioners requested the EPA to create and delist two subcategories—lean premix turbines firing natural gas with limited oil backup and a low-risk subcategory where facilities would make site-specific demonstrations regarding risk levels. On April 7, 2004, the EPA proposed to delist the following four subcategories: lean premix gas-fired turbines, diffusion flame gas-fired turbines, emergency turbines, and turbines located on the North Slope of Alaska (69 FR 18327). At the same time, the EPA proposed to stay the effectiveness of the NESHAP for new lean premix gas-fired and diffusion flame gas-fired turbines (69 FR 18338). On August 18, 2004, the EPA finalized the administrative stay of the effectiveness of the NESHAP for new lean premix gas-fired and diffusion flame gas-fired turbines, pending the outcome of the proposed subcategory delisting (69 FR 51184). The proposal to delist the four subcategories was never finalized in light of the 2007 decision in *Natural Resources Defense Council* v. *EPA,* 489 F.3d 1364 (D.C. Cir. 2007), which addressed limits on the EPA's ability to delist subcategories. This court decision is discussed in more detail in section II.A.

On August 28, 2019, the EPA received the petition being acted on here, which seeks to remove the Stationary Combustion Turbines source category from the list of categories of major sources under CAA section 112. The petitioners submitted a supplement to the source category delisting petition on November 21, 2019; a second supplement to the source category delisting petition on December 2, 2020; and a revised version of the second supplement to the delisting petition on March 15, 2021. The EPA has fully considered all the petitioners' submissions in this final decision to deny the petition. Delisting of the Stationary Combustion Turbines source category from the list of major sources would result in removal of the regulatory requirements specified in the NESHAP for Stationary Combustion Turbines in 40 CFR 63.6080–6175 of 40 CFR part 63, subpart YYYY.

II. Treatment of Petitions To Delist a Source Category From Regulation Under CAA Section 112

In this section, the EPA sets out the specific criteria under the CAA that apply for removing a source category from the list of source categories. CAA section 112(c)(9)(B) specifies certain criteria that must be satisfied in order for the EPA to grant a petition to remove a source category from the list of source categories regulated for HAP emissions. The EPA's consideration of petitions to delist is bound by these criteria and informed by prior court decisions interpreting this provision of the CAA.

A. What is a source category delisting petition and what are the criteria for delisting a source category?

A source category delisting petition is a formal request to the EPA from an individual or group to remove a specific source category from the CAA section 112 list of categories of major sources and area sources under CAA section 112(c)(9)(B). The Administrator must grant or deny such a petition to delete a source category within 1 year after a petition is filed and is determined to be complete.[6] See CAA section 112(c)(9)(B). Delisting of a source category would result in the removal of applicable regulatory requirements under CAA section 112 for such source category. CAA section 112(c)(9)(B) contains the discretionary authority to delist a source category and provides in relevant part: ''The Administrator may delete any source category from the list under this subsection, on petition of any person or on the Administrator's own motion, whenever the Administrator makes the following determination or determinations, as applicable: [. . .].''

CAA section 112(c)(9)(B) further specifies three criteria for deletion of a source category from the list. The first criterion is specific to carcinogenic HAP and is specified in CAA section 112(c)(9)(B)(i). The criterion states that, in the case of HAP emitted by sources in the category that may result in cancer

[4] Turbine NESHAP Unit List—Updated October 2023. Docket ID No. EPA–HQ–OAR–2020–0408.

[5] Petition to Delist Two Subcategories of Combustion Turbines. Docket ID No. EPA–HQ–OAR–2003–0189–0014.

[6] As stated previously, the EPA has determined that the current petition to delist the Stationary Combustion Turbines source category is not complete.

in humans, a determination must be made that ''no source in the category (or group of sources in the case of area sources) emits such hazardous air pollutants in quantities which may cause a lifetime risk of cancer greater than one in one million to the individual in the population who is most exposed to emissions of such pollutants from the source (or group of sources in the case of area sources).''

The second criterion is specific to non-carcinogenic HAP and the third criterion is specific to environmental effects. These criteria are specified in CAA section 112(c)(9)(B)(ii). In the case of HAP that may result in adverse health effects in humans other than cancer or adverse environmental effects, the second criterion states that a determination must be made that ''emissions from no source in the category or subcategory concerned (or group of sources in the case of area sources) exceed a level which is adequate to protect public health with an ample margin of safety'' and the third criterion states that a determination must be made that ''no adverse environmental effect will result from emissions from any source (or from a group of sources in the case of area sources).''

Further, to assist the EPA in making judgments about whether a pollutant causes adverse environmental effects, CAA section 112(a)(7) defines an ''adverse environmental effect'' as ''[A]ny significant and widespread adverse effect, which may reasonably be anticipated, to wildlife, aquatic life, or other natural resources, including adverse impacts on populations of endangered or threatened species or significant degradation of environmental quality over broad areas.''

For source categories that emit carcinogenic HAP, CAA section 112(c)(9)(B)(i) sets a lifetime cancer risk threshold for delisting of 1-in-1 million. This level differs from the acceptable risk determination used in other rulemakings under CAA section 112. For instance, for standards promulgated under CAA section 112(f)(2), an excess lifetime cancer risk to the most exposed individual of 100-in-1 million is ordinarily the upper bound of acceptability. This level was established in the Benzene NESHAP (54 FR 38044; September 14, 1989) and was incorporated into the 1990 CAA Amendments in CAA section 112(f)(2)(B).[7]

When considering delisting decisions under CAA section 112(c)(9)(B), the EPA construes this provision as calling for a high level of confidence before a determination can be made that the criteria for delisting are satisfied. For example, for purposes of deleting the non-mercury cell chlorine production subcategory under CAA section 112(c)(9)(B)(ii), the EPA ''obtained chlorine and HCl emission estimates from every known major source facility in the non-mercury cell chlorine production subcategory using our authority under section 114 of the CAA and conducted risk assessments for each facility.''[8]

For source categories that emit HAP that may result in adverse health effects (non-cancer risks), CAA section 112(c)(9)(B)(ii) requires HAP emissions to be below a level providing an ample margin of safety. In the context of a source category delisting and CAA section 112(c)(9)(B)(ii), the EPA interprets an ''ample margin of safety'' as such that the chronic and acute concentrations that a person may be exposed to should be less than the concentrations that may elicit an adverse non-cancer health effect (*i.e.,* each of the ratios should be less than one). This interpretation has been applied in a prior subcategory delisting action under CAA section 112(c)(9)(B)(ii) for the non-mercury cell chlorine production subcategory (68 FR 70947).

For the purposes of determining whether the delisting criteria under CAA section 112(c)(9)(B) are satisfied, risk evaluations must be based on emission estimates that assume the controls required under CAA section 112 are not in place unless they are also known to be required under a different regulatory authority. This is because a final notice granting a delisting petition of, for example, the Stationary Combustion Turbines source category from the list of major sources would result in removal of the regulatory requirements specified in the NESHAP for stationary combustion turbines.

The EPA views CAA section 112(c)(9)(B) as providing discretionary authority for delisting source categories that satisfy the criteria contained therein. ''The Administrator *may* delete any source category from the list under this subsection, on petition of any person . . . , whenever the Administrator makes the following determination or determinations, as applicable,'' (CAA section 112(c)(9)(B) (Emphasis added)). The Agency reads this provision as allowing for delisting of a source category upon the Administrator determining that the statutory criteria are satisfied. However, it does not foreclose the exercise of the Administrator's discretion in forming a final decision on whether to delist. (''The Administrator *may* delete . . .'' and not ''The Administrator [*must*] delete . . .'' (Emphasis supplied). The EPA interprets ''may'' in CAA section 112(c)(9)(B)(i) as being directional towards a determination that is based on reasonably health protective assumptions to account for uncertainties in any supporting analysis. The final decision involves the consideration and balancing of factors that are uniquely within the Administrator's expertise, including policy choices, and predictions on ''the frontiers of scientific knowledge.'' *Nat'l Lime Ass'n* v. *EPA,* 627 F.2d 416, 454 (D.C. Cir. 1980).[9]

Questions as to whether pollutant emissions from a source category present adverse health and environmental effects and questions regarding the kinds of effects that can come from exposure to those emissions may, in certain instances, border on the frontiers of scientific knowledge and are given to be quite uncertain due to either insufficient or inconsistent data.[10] For example, there could be limited scientific knowledge of the effects of pollutant exposure on human health and the environment. There could also be limited emissions data from the source category. Further, some

[7] The maximum individual lifetime cancer risk is the ''estimated risk that a person living near a plant would have if he or she were exposed to the maximum pollutant concentrations for 70 years.'' National Emissions Standards for Hazardous Air Pollutants: Benzene Emissions from Maleic Anhydride Plants, Ethylbenzene/Styrene Plants, Benzene Storage Vessels, Benzene Equipment Leaks, and Coke By-Product Recovery Plants (Benzene NESHAP) (54 FR 38044, 38045; September 14, 1989).

[8] National Emission Standards for Hazardous Air Pollutants: Chlorine and Hydrochloric Acid Emissions from Chlorine Production: Final decision to delete subcategory (68 FR 70948, 70951; December 19, 2003). See also 66 FR 21933, where the EPA explained and agreed with the use of certain health effect studies in delisting petition for Methanol. (''As the [Health Effects Institute] Health Review Committee noted in its commentary, the experiments in this study were 'well designed and executed with appropriate quality control and quality assurance procedures. Thus, one can have confidence in the data.' '').

[9] ''[A]n agency [has] latitude to exercise its discretion in accordance with the remedial purposes of the controlling statute where relevant facts cannot be ascertained or are on the frontiers of scientific inquiry.'' 627 F.2d 454.

[10] ''Where a statute is precautionary in nature, the evidence difficult to come by, uncertain, or conflicting because it is on the frontiers of scientific knowledge, the regulations designed to protect the public health, and the decision that of an expert administrator, we will not demand rigorous step-by-step proof of cause and effect. Such proof may be impossible to obtain if the precautionary purpose of the statute is to be served.'' *Id.,* at 454 n.143 citing *Ethyl Corp.* v. *EPA,* 541 F.2d 1, 28–29 (D.C. Cir. 1976).

pollutants have no known safe level of exposure.[11] The Administrator is not required to base his determination solely on a single parameter or measure and has the discretion to weigh various factors or data differently. The Administrator's decision to delist (or to deny a petition to delist) a source category is made on a case-by-case basis and involve a thorough and comprehensive review of factual issues, scientific evidence, and data provided in support of a delisting petition.

The EPA also views CAA section 112(c)(9)(B) as allowing the Administrator to balance the likelihood of adverse health effects against limited scientific data and to err on the side of caution in making decisions considering uncertainties in scientific data. Any projections, assessments, and estimations must be reasonable and not based on conjecture. While use of the term ''adequate''' further indicates that the Administrator must weigh the potential uncertainties and their likely significance, uncertainties concerning the risks of adverse health or environmental effects may be mitigated if the Administrator can determine that projected exposures are sufficiently low to provide reasonable assurance that adverse health effects will not occur. Similarly, uncertainties concerning the magnitude of projected exposures may be mitigated if the Administrator can determine that the levels which might cause adverse health or environmental effects are sufficiently high to provide reasonable assurance that exposures will not reach harmful levels. But as a part of the requisite demonstration called for by CAA section 112(c)((9)(B), a petitioner must present data that are adequate to support a delisting decision, and thus, resolve any uncertainties associated with missing information.

The Administrator will not remove a source category from the list of source categories covered under CAA section 112 merely because of the inability to conclude that HAP emissions from sources within that source category will cause adverse effects on human health or the environment. Thus, the EPA will not grant a petition to remove a source category if there are uncertainties relating to health effects or if the Administrator does not have sufficient information to make the requisite determination under CAA section 112(c)(9)(B).[12] We note that the Administrator's discretion is neither unbounded nor limitless, but rather constrained by the EPA's duty to protect human health and welfare.[13] This is because the CAA is a protective or preventive statute [14] considering that one of its stated purposes under CAA section 101(b)(1) is ''to protect and enhance the quality of the Nation's air resources so as to promote the public health and welfare.'' Such statutes do not call for certitude of harm but rather accord a decision maker discretion and flexibility in taking regulatory action that is protective of both public health and the environment.

Further, when considering delisting petitions under CAA section 112(c)(9)(B), the EPA is guided by relevant decisions of the United States Court of Appeals for the District of Columbia (D.C. Circuit or court). Specifically, in 2007, the court held in *Natural Resources Defense Council* v. *EPA,* 489 F.3d 1364, 1373 (D.C. Cir. 2007) (vacating portions of the Plywood Maximum Achievable Control Technology (MACT) standards), that the EPA had no authority to create and delist a ''low-risk subcategory'' under CAA section 112(c)(9)(B)(i).[15] According to the court, only subcategories with no carcinogenic HAP emissions and satisfying CAA section 112(c)(9)(B)(ii) could be removed from the CAA section 112(c)(1) list of categories and subcategories (*e.g.,* deletion of the non-mercury cell chlorine production subcategory (68 FR 70947; December 19, 2003)). Otherwise, subcategories with any carcinogenic HAP emissions could only be removed as part of a complete removal of the entire source category under CAA section 112(c)(9)(B)(i), noting that the criteria in CAA section 112(c)(9)(B)(ii) would also need to be satisfied if applicable.

Further, in another key case, *New Jersey* v. *EPA,* 517 F.3d 574, 582 (D.C. Cir. 2008), the court vacated the EPA's action that delisted coal- and oil-fired electric utility steam generating units (EGUs) holding that ''because section 112(c)(9) governs the removal of '*any* source category' from the section 112(c)(1) list, and nothing in the CAA exempts EGUs from section 112(c)(9), the only way the EPA could remove EGUs from the section 112(c)(1) list was by satisfying section 112(c)(9)'s requirements.'' (Emphasis in original). Since then, the court has upheld our reading of CAA section 112(c)(9) as calling for application of criteria contained therein.[16] For instance, in *White Stallion Energy Ctr., LLC* v. *EPA,* 748 F.3d 1222 (D.C. Cir. 2013) the court upheld the EPA's denial of a petition to delist coal-fired EGUs finding that the EPA was correct in rejecting a delisting petition because it ''did not demonstrate that EPA could make either of the two predicate findings required for delisting under section 112(c)(9)(B).'' *Id.,* at 1248. Additionally, in *American Forest and Paper Ass'n* v. *EPA,* 294 F.3d at 119 (construing section 112(b) and upholding the EPA's denial of the petition to delist methanol as a HAP), the court held that ''[t]he statutory language unambiguously places on a delisting petitioner the burden to make a showing that there is adequate data about a substance to determine exposure to it *may* not reasonably be anticipated to cause adverse effects.''

Finally, an additional relevant decision addresses setting MACT standards for listed source categories under CAA section 112. In *Louisiana Environmental Action Network* v. *EPA,* 955 F.3d 1088 (D.C. Cir. 2020) (*LEAN*), the court held that when the ''EPA reviews an existing standard that fails to address many of the listed air toxics the source category emits, adding limits for those overlooked toxics is a 'necessary' revision under section 112(d)(6).'' *Id.,* at 1091. The EPA must now set MACT

[11] ''The Administrator may apply his expertise to draw conclusions from suspected, but not completely substantiated, relationships between facts, from trends among facts, from theoretical projections from imperfect data, from probative preliminary data not yet certifiable as 'fact,' and the like.'' *Id.*

[12] *See American Forest and Paper Ass'n* v. *EPA* 294 F.3d 113, 119 (D.C. Cir. 2002) (upholding the EPA's denial of the petition to delist methanol as a HAP) ''EPA's interpretation easily passes muster under *Chevron.* The statutory language unambiguously places on a delisting petitioner the burden to make a showing that there is adequate data about a substance to determine exposure to it *may* not reasonably be anticipated to cause adverse effects. This is precisely what EPA has construed it to require.'' (Emphasis in original; cleaned up) (66 FR 21930; May 2, 2001) (Where the Administrator is acting on a delisting petition, ''the burden remains on a petitioner to demonstrate that the available data support an affirmative determination that emissions of a substance may not be reasonably anticipated to result in adverse effects on human health or the environment.'').

[13] *See Massachusetts* v. *EPA,* 127 S. Ct. 1438, 1462. (The goal of the CAA is ''to protect and enhance the quality of the Nation's air resources so as to promote the public health and welfare and the productive capacity of its population.'' CAA section 101(b)(1)).

[14] *Ethyl Corp.,* 541 F.2d at 29 n.56 (''Under the Clean Air Act the Administrator's flexibility is derived not from a command to act, but from a precautionary statute that necessarily includes risk assessment if its preventive purpose is to be achieved.''). The CAA is ''to assure that regulatory action can effectively prevent harm before it occurs; to emphasize the predominant value of protection of public health.'' H.R. Rep. No. 95–294, 95th Cong., 1st Sess. 49 (1977).

[15] To accord with this decision, the EPA is denying the petition to delist two subcategories of stationary combustion turbines that the EPA received during the 2004 Stationary Combustion Turbines NESHAP rulemaking.

[16] *See U.S. Sugar Corp.* v. *EPA,* 830 F.3d 579 (D.C. Cir. 2016) (upholding the EPA's decision to remove source categories from CAA section 112(c)(6) without applying CAA section 112(c)(9)).

standards in the context of a CAA section 112(d)(6) review where there are gaps in existing MACT standards.

B. What is the process for delisting a source category?

In this section, the EPA describes the Agency's process for consideration of petitions to delist source categories under CAA section 112(c)(9)(B).

Although the delisting action for a listed source category is not subject to the formal rulemaking procedures under CAA section 307(d), it is the EPA's practice to publish and solicit public comments on relevant aspects of the Agency's consideration of such a complete petition in the **Federal Register**. See *American Forest and Paper Ass'n* v. *EPA,* 294 F.3d 113, 117 n.3 (D.C. Cir. 2002) (''Section 112(b) does not contemplate a formal rulemaking and is not among the sections enumerated in section 307(d)(1) (although other subsections of section 112 are included there).'').

The EPA's petition review process proceeds in two phases: a completeness determination and a technical review.[17] During the completeness determination, we conduct a broad review of the petition to determine whether all the necessary subject areas are addressed and whether reasonable information and analyses are presented for each of these subject areas.[18] Once the petition is determined to be complete, we place a notice of receipt of a complete petition in the **Federal Register**.[19] That **Federal Register** document announces a public comment period on the petition and starts the technical review phase of our decision-making process. The technical review involves a thorough scientific review of the petition to determine whether the data, analyses, interpretations, and conclusions in the petition are appropriately supported and technically sound. The technical review will also determine whether the petition satisfies the necessary requirements of CAA section 112(c)(9)(B) and adequately supports a decision to delist the source category. All comments and data submitted during the public comment period are considered during the technical review. The decision to either grant or deny a petition is made after a comprehensive technical review of both the petition and the information received from the public to determine whether the petition satisfies the requirements of CAA section 112(c)(9)(B). Here, the review process is not proceeding to the second phase due to the EPA's determination that the petition is incomplete because the petitioners did not address all the necessary subject areas under CAA section 112(c)(9)(B) and did not present reasonable information and analyses for each these subject areas.

If the Administrator decides to grant a petition, the Agency publishes a written explanation of the Administrator's decision, along with a proposed rule to delete the source category. The proposed rule is open to public comment and public hearing and all additional substantive information received is considered prior to the issuance of a final rule.[20] If the Administrator decides to deny the petition, the Agency publishes a notice of its denial, along with a written explanation of the basis for denial.[21] A decision to deny a petition is a final Agency action subject to review in the Circuit Court of Appeals for the District of Columbia under CAA section 307(b).

A denial of a petition may take one of two forms. The EPA may deny the petition with prejudice, in which case any future petition will be denied as a matter of law unless it is accompanied by substantial new evidence; or the EPA may deny the petition without prejudice, in which case the EPA will consider future petitions without the presentation of substantial new evidence. The EPA will issue a denial with prejudice when there are adequate data available that lead the EPA to conclude that emissions from a source category may cause a lifetime risk of cancer greater than 1-in-1 million to the individual in the population who is most exposed to emissions of pollutants from a source category; or where there are adequate data available that lead the EPA to conclude that emissions from a pollutant can be anticipated to result in adverse effects to human health or the environment. Additionally, the EPA will issue a denial with prejudice when the EPA concludes that the available evidence cannot support a determination that emissions from a source category may not cause a lifetime risk of cancer greater than 1-in-1 million to the individual in the population who is most exposed to emissions of such pollutants; or when the EPA concludes that the available evidence cannot support a determination that emissions from the source category may not reasonably be anticipated to result in adverse effects to human health or the environment and, therefore, that substantial new information or analyses would be necessary to allow the Agency to make the requisite determination under CAA section 112(c)(9)(B).[22]

III. Risk Review Methodology and Findings

In this section, the Agency presents the risk assessment and risk assessment methodology that are the underpinnings of the findings for the 2020 RTR for the Stationary Combustion Turbines source category under CAA section 112(f)(2). It bears note that under CAA section 112(f)(2) the excess lifetime cancer risk to the most exposed individual of 100-in-1 million is ordinarily the upper

[17] See, *e.g.,* 70 FR 30407; May 26, 2005 (Notice of receipt of a complete petition to delist 4,4'-methylene diphenyl diisocyanate as a HAP); 64 FR 42125; August 3, 1999 (Notice of receipt of a complete petition to delist ethylene glycol monobutyl ether as a HAP); 64 FR 38668, 38669; July 19, 1999 (Notice of receipt of a complete petition to delist methanol as a HAP); 64 FR 33453; June 23, 1999 (Notice of receipt of a complete petition to delist Methyl Ethyl Ketone as a HAP).

[18] As an additional and separate independent basis for denial, the EPA may deny a petition that is not complete if the petitioners did not address all the necessary subject areas under CAA section 112(c)(9)(B) and did not present reasonable information and analyses for each of the subject areas. See, *e.g.,* Notice of denial of petition to delist five glycol ethers as a HAP (58 FR 4164, 4165; January 13, 1993) (The EPA explained that: ''Although public information indicated that over 140 million pounds of these substances are used annually in the U.S. and that there is a general trend towards greater usage, the petitioner did not provide measurements or estimates regarding the emissions associated with such use. In the absence of such information, EPA cannot make the substantive determination contemplated by CAA Section 112(b)(3)'').

[19] The EPA did not make a completeness determination for the petition because the petitioners did not address all the necessary subject areas under CAA section 112(c)(9)(B) and did not present reasonable information and analyses for each these subject areas.

[20] See, *e.g.,* 68 FR 65648; November 21, 2003 (Proposal to Delist Ethylene Glycol Monobutyl Ether: Request for Comment); 68 FR 32605; May 30, 2003 (Proposed Rule to Delist Methyl Ethyl Ketone (MEK): Request for Comment).

[21] See, *e.g.,* 66 FR 21929; May 2, 2001 (Denial of the petition to delist methanol as a HAP).

[22] A denial with prejudice serves a vital administrative purpose. It prevents the endless resubmission of essentially identical petitions (with only peripheral or trivial changes) in the wake of an EPA decision on the merits of a petition. Thereby, once the EPA has denied a petition to delist based on a full consideration of the merits, any future petition to remove the same source category will not trigger another full evaluation of the merits unless it includes substantial data or analyses that were not present in the earlier petition. Conversely, the EPA may issue a denial without prejudice, for example, where there has not been a complete examination of the merits of a petition, and where, therefore, the EPA has not reached a decision on the petition that is based on a robust evaluation of the underlying technical data and analyses. For example, where a petition obviously lacks some element necessary for the EPA to properly evaluate the petition, the EPA may deny such petition without prejudice and allow the petitioner to re-submit the petition with the necessary additional information without a determination that the additional information constitutes substantial new data or analysis. See, *e.g.,* Notice of Denial (58 FR 4164; January 13, 1993) (denying without prejudice a petition to remove five glycol ethers from the list of HAP).

bound of acceptability, in contrast to CAA section 112(c)(9)(B)(i) which sets out a risk threshold of 1-in-1 million for delisting source categories that emit carcinogenic HAP. On April 12, 2019, the EPA proposed the RTR for the Stationary Combustion Turbines NESHAP (84 FR 15046). The EPA finalized the RTR on March 9, 2020, and based on the risk assessment performed for this source category readopted the existing standards under CAA section 112(f)(2) (85 FR 13524).[23] Additional emissions data collection efforts by the EPA after the 2020 RTR are also discussed in this section.

A. The EPA's Risk Assessment Methodology

The EPA's risk assessment methodology for the 2020 RTR is described in detail in the *Residual Risk Assessment for the Stationary Combustion Turbines Source Category in Support of the 2020 Risk and Technology Review Final Rule,* Docket ID No. EPA–HQ–OAR–2017–0688–0131 (''Risk Report''). The risk assessment estimated the maximum individual lifetime cancer risk, population at increased cancer risk, total estimated cancer incidence, maximum chronic non-cancer hazard index, and maximum acute non-cancer risk hazard quotient. The EPA performed a three-tier screening assessment of the potential multipathway health risks, as well as a three-tier screening assessment of the potential adverse environmental risks. The risk modeling dataset includes emissions data for three emissions scenarios: actual emissions, allowable emissions, and acute emissions.

B. The EPA's 2020 Risk Review Findings

Pursuant to CAA section 112(f)(2), the EPA conducted a residual risk review for the Stationary Combustion Turbines source category. Risk modeling was conducted for all the facilities known by the EPA at the time to be subject to the Stationary Combustion Turbines NESHAP, which totaled 253 stationary combustion turbine facilities. Additional information obtained after risk modeling refined our estimate of facilities in the source category to 244. The total emissions of HAP from modeled facilities were approximately 5,300 tons per year. The HAP emitted in the largest quantities were formaldehyde, n-hexane, acetaldehyde, toluene, xylenes (mixed), hydrochloric acid, propylene oxide, ethyl benzene, benzene, and acrolein. Emissions of these pollutants made up over 99 percent of the total HAP emissions by mass. Emissions of persistent and bioaccumulative HAP (PB–HAP) included lead compounds, arsenic compounds, cadmium compounds and mercury compounds. Emissions of environmental HAP included the above PB–HAP plus hydrochloric acid.

The results of the chronic inhalation cancer risk assessment based on actual emissions indicated that the estimated maximum individual lifetime cancer risk was 3-in-1 million, with formaldehyde, acetaldehyde, propylene oxide and arsenic compounds from combustion turbines as the major contributors to the risk. The total estimated cancer incidence was 0.04 excess cancer cases per year, or one excess case in every 25 years. Approximately 153,000,000 people live within 50 kilometers of the 253 modeled facilities, and 42,000 people were estimated to have cancer risks at or above 1-in-1 million. The 2020 RTR, where the Agency was acting under CAA section 112(f)(2), showed that the Stationary Combustion Turbines source category did not meet the statutory criteria for delisting described in section II.A. of this preamble. More information concerning the risk analysis can be found in the Risk Report.

C. CAA Section 114 Information Request

In May 2020, the EPA received a petition for reconsideration of the 2020 RTR. One of the issues listed in the petition for reconsideration was the EPA's failure to set limits for unregulated HAP in the Stationary Combustion Turbines NESHAP, citing *LEAN.* The EPA granted the petition for reconsideration on August 13, 2020. In April 2022, the EPA, acting under authority of CAA section 114, requested operating information and emissions data from six companies that own and operate turbines subject to the Stationary Combustion Turbines NESHAP. A request was sent to a seventh company in September 2022. The requests were sent for the purpose of obtaining emissions data to be used in an upcoming separate rulemaking to establish emission standards for turbines subject to the Stationary Combustion Turbines NESHAP that do not currently have standards in the rule. Requests for operating information included annual hours of turbine operation and annual turbine heat input for 2016–2020. Responses were required within 3 months of receipt of the request. The request mandated testing of selected turbines for emissions of formaldehyde, acid gases (hydrogen fluoride and hydrogen chloride), metallic HAP, particulate matter (PM), and carbon monoxide. The 22 turbines that were tested ranged in size from 1 to 269 MW and included both simple cycle and combined cycle units. The turbines were operated on natural gas, distillate oil, or landfill gas. Some turbines were equipped with an oxidation catalyst. Submittal of the required data from emissions testing was required within 9 months of receipt of the request. The responses to the requests are included in the docket for this action, Docket ID No. EPA–HQ–OAR–2020–0408.

IV. Evaluation of the Petition

In this section, the EPA presents the details of the petition to delist and of the Agency's technical evaluation of the petition. In section IV.A., the EPA presents the details of the petition to delist; and, in section IV.B., the EPA presents the petitioners' risk assessment methodology. In section IV.C., the EPA discusses deficiencies in the petitioners' estimates of HAP emissions for the Stationary Combustion Turbines source category; and, in section IV.D., the EPA presents the gaps in the petitioners' data that include missing emissions data from a large number of affected sources and uncertainty in the HAP emission estimates for the Stationary Combustion Turbines source category.

In general, the EPA found that the petitioners did not present reasonable and complete information and analyses for each of the affected sources, such as HAP emission measurements from stack testing or fuel content analyses for all sources subject to the Stationary Combustion Turbines source category. In the absence of such requisite information, the EPA did not make a completeness determination for the petition. And, in conducting the technical review of the information provided, the EPA cannot make the substantive determination contemplated under CAA section 112(c)(9)(B).

A. Description of the Petition

As stated previously, on August 28, 2019, the EPA received a joint petition from the American Fuel & Petrochemical Manufacturers, the American Petroleum Institute, the American Public Power Association, the Gas Turbine Association, the Interstate Natural Gas Association of America, and the National Rural Electric Cooperative Association to remove the Stationary Combustion Turbines source category from the list of categories of major sources regulated under CAA section

[23] 85 FR at 13530. (*See NRDC* v. *EPA,* 529 F.3d at 1083. ''If EPA determines that the existing technology-based standards provide an 'ample margin of safety,' then the Agency is free to readopt those standards during the residual risk rulemaking.'').

112. That petition claimed that the HAP emissions from affected sources in the Stationary Combustion Turbines source category that were identified in the proposed RTR meet the criteria for delisting. The petitioners submitted the first supplement to the petition on November 21, 2019. That supplement included risk analyses for additional units that were identified in a comment to the proposed RTR for the Stationary Combustion Turbines NESHAP. The petitioners claimed that all three statutory criteria for delisting were satisfied based on the results of this risk assessment.

After receipt of the first supplement to the petition, a second set of additional turbines that were not evaluated in either the petition or first supplement to the petition were identified by the EPA as being subject to the rule. The EPA therefore requested that the petitioners provide analyses for the second set of additional units. The EPA also asked for further explanation on the following issues: (1) whether the petitioners' analyses were based on emission factors without corroboration by emissions data and whether it accounted for operation of units at partial loads; (2) whether arsenic emission factors used in the petition analyses would be adequately justified for oil-fired turbines; and (3) whether the acute multiplier used in estimating acute risk at two facilities was adequately justified. The petitioners submitted a second supplement to the petition on December 2, 2020, in response to the EPA's concerns regarding the completeness of the petition. Finally, the petitioners submitted a revised version of the second supplement on March 15, 2021, correcting an error in the estimated hexavalent chromium emissions at one source. The petition and all the supplements to the petition are available for review in the docket, Docket ID No. EPA–HQ–OAR–2020–0408. The EPA has fully considered all the petitioners' submissions in this decision to deny the petition.

In general, the petitioners' initial petition and subsequent supplements to the petition provided both revised HAP emission estimates and a revised evaluation of the 2020 RTR risk analysis.[24] The petitioners revised HAP emission estimates and revised risk evaluation, however, were primarily based on emission factors and historical fuel usage data for a subset of the turbines that are subject to CAA section 112.

The initial petition and supplements provided by the petitioners contained the following information:

- Revised emission estimates for formaldehyde, which is one of the organic HAP that is a contributor to risk for stationary combustion turbines firing natural gas or distillate fuel oil;
- Revised emission estimates for arsenic, which is one of the metallic HAP that is a contributor to risk for stationary combustion turbines;
- Revised emission estimates for other HAP (organic and metallic) based on fuel use, emission factors, and permit limits for volatile organic compounds (VOCs);
- Measurements of the arsenic content in distillate fuel oil at certain facilities;
- Revised acute emission estimates for certain facilities;
- Other revisions including adjustments to stack parameters and locations, and removal of sources that were no longer operating;
- Analyses of the inhalation acute and chronic (cancer and non-cancer) risks for each source in the category, based on the revised HAP emission estimates;
- Analyses of the multipathway chronic (cancer and non-cancer) risks for each source in the category, based on the revised HAP emission estimates;
- Analyses of the environmental effects, based on the revised and updated emission estimates; and
- New emission estimates and analyses for the facilities not previously reviewed in the 2020 RTR risk analysis.

The petitioners argued that delisting of the source category was warranted based on the following results from their analyses:

- A maximum lifetime inhalation cancer risk for the most exposed individual of 0.76-in-1 million;
- A maximum acute inhalation hazard quotient (*i.e.,* the ratio of acute exposure concentration to the concentration at which no acute adverse health effect is observed) of 0.52;
- A maximum chronic (non-cancer) inhalation hazard index (*i.e.,* the ratio of chronic exposure concentration to the concentration at which no chronic adverse health effect is observed) of 0.03;
- A maximum multipathway cancer risk for the most exposed individual of 0.007-in-1 million; and
- A maximum multipathway chronic hazard index of 0.12.
- All facilities were below environmental screening thresholds.

B. Petitioners' Risk Assessment Methodology

As previously referenced, the petitioners' initial petition and subsequent supplements to the petition provided both revised HAP emission estimates and a revised evaluation of the 2020 RTR risk analysis. The petitioners also included risk analyses that covered additional units that were identified by the EPA as subject to the Stationary Combustion Turbines NESHAP after submittal of the initial petition. The petitioners' risk assessments, however, did not address whether the emission controls that reduce HAP emissions, such as oxidation catalysts, that are installed on some turbines were installed due to the requirements of the Stationary Combustion Turbines NESHAP or for other regulatory requirements.[25] The petitioners' risk assessments also did not address the effect of delisting the Stationary Combustion Turbines source category on the emission estimates used for their analysis. This is requisite information because deleting a source category from the list of major sources would result in removal of the regulatory requirements specified in the applicable NESHAP.

In some instances, the petitioners performed additional analyses that they claimed made their results more conservative. For inhalation risks, the petitioners conducted an additional analysis that accounted for the effects of building downwash,[26] which they indicated has the potential to increase risk. The petitioners also evaluated the non-cancer risks by summing the hazard quotients among all HAP regardless of the target organ. For multipathway health risks, the petitioners further performed a site-specific multipathway risk assessment for one facility with five stationary combustion turbines. According to the petitioners' multipathway risk assessment, four of those units exclusively fire natural gas while one fires refinery fuel gas. This facility was evaluated in the initial petition risk analysis and was re-evaluated in the first supplement to the petition. All other facilities showed low multipathway risks in a more general analysis by the petitioners and so they

[24] As described in section III.B. of this preamble, the 2020 RTR showed that the Stationary Combustion Turbines source category did not meet the statutory criteria for delisting.

[25] As mentioned previously, the EPA proposed to remove the stay of effectiveness of the standards for new lean premix gas-fired and diffusion flame gas-fired turbines on April 12, 2019 (84 FR 15046), prior to the submittal of the petition to delist in August 2019. The EPA finalized the removal of the stay on March 9, 2022 (87 FR 13183).

[26] Downwash means the downward movement of pollutant plumes immediately after stack release due to obstacles such as buildings or smokestacks.

did not perform site-specific multipathway risk assessments.

In general, the risk assessment methodology used in the petitioners' analyses estimated the same risk parameters as those used by the EPA in the risk assessment for the 2020 RTR, including maximum individual lifetime cancer risk, population at increased cancer risk, total estimated cancer incidence, maximum chronic non-cancer hazard index, maximum acute non-cancer risk hazard quotient, multipathway health risks, and adverse environmental risks. However, while the petitioners' risk modeling methodology was similar to the EPA's, there are deficiencies in the petitioners' estimates of the emissions from the source category which were used to determine the values of the petitioners' risk modeling results, as discussed further in sections IV.C. and IV.D.

C. Basis for Emission Estimates

The following section discusses deficiencies in the petitioners' analyses that support the EPA's conclusions that the petition is incomplete and that there are inadequate data to determine that no source in the category emits HAP in quantities which may cause a lifetime risk of cancer greater than 1-in-1 million to the individual in the population who is most exposed to emissions of such pollutants from the source.

The EPA identified several deficiencies in the submitted petition. First, the petitioners relied on emission factors and fuel sampling which are not adequate for determining site-specific emissions with the necessary certainty; and the petitioners failed to provide any site-specific emissions testing data. Notably, the Agency afforded petitioners the opportunity to provide additional information and data, which petitioners declined. Second, the petitioners significantly underestimated the formaldehyde emissions from some turbines, as demonstrated by site-specific turbine formaldehyde emissions testing data collected by the EPA. Third, to assess the potential health impacts from short-term exposures, the petitioners used a multiplier for acute risks that is far lower than the standard multiplier the EPA applied in the 2020 RTR, which was supported by measured emissions data, and the petitioners did not explain why their multiplier is more appropriate than the EPA's own multipliers. And fourth, the petitioners failed to explain whether the emission estimates they used would continue to be applicable if the source category were delisted.

1. Reliance on Emission Factors

As stated previously, a source category may be delisted only if the EPA has a high level of confidence that emissions from *no* source in the category or subcategory exceed a level which is adequate to protect public health with an ample margin of safety. The emission estimates used by the petitioners to assess the risks from the source category relied almost entirely on emission factors. The EPA has long viewed emission factors as not supplying sufficient certainty regarding *site-specific emissions* that would provide confidence that no source in the category exceeds the criteria for delisting. While emission factors are a widely used tool for estimating emissions, the EPA as well as state and local air pollution control agencies usually prefer data from source-specific emission tests or continuous emission monitoring systems (CEMS) for estimating a source's emissions because those data provide the best representation of the source's emissions. The EPA notes that the introduction to *AP–42: Compilation of Air Emission Factors from Stationary Sources* states that ''[b]ecause emission factors essentially represent an average of a *range* of emission rates, approximately half of the subject sources will have emission rates greater than the emission factor and the other half will have emission rates less than the emission factor.'' [27] In the same document, the EPA also noted that ''[a]verage emissions differ significantly from source to source and, therefore, emission factors frequently may not provide adequate estimates of the average emissions for a specific source.'' Further, for example, the North Carolina Department of Environmental Quality states the following regarding estimating emissions: ''Usually, results from continuous emission monitoring data are the preferred way to establish emissions. However, this is not often possible or practical, except for larger facilities such as electric utilities. Use of site-specific stack tests under a single or a range of representative conditions is usually the next preferable method.'' [28] After receipt of the initial petition and first supplement, the EPA requested that the petitioners provide HAP emission measurements from stack testing to corroborate the HAP emissions estimated by the petitioners based on emission factors and fuel content analyses, where possible. In response to the EPA's request, however, the petitioners indicated via email that a ''detailed measurement campaign is out of the scope for this study.'' [29]

In multiple instances, the petitioners' emission estimates were based on permit limits or emission factors of other pollutants (VOC and PM) that were then used to approximate the emissions of organic HAP (*e.g.,* formaldehyde) and metallic HAP (*e.g.,* arsenic). This introduces further uncertainty in the emission estimates for this source category. Moreover, the petitioners stated in the petition that ''combustion turbines' PM emissions are not a strong predictor of metallic HAP emissions.'' Regarding arsenic, in the 2020 RTR, arsenic emissions were one of the primary drivers for risk at sources firing distillate oil. The petitioners stated that metallic HAP emissions from oil-fired turbines are constituents of the fuel, and that the arsenic emissions estimated by the EPA for the 2020 RTR were biased upward because ''regulations requiring lower sulfur content for diesel fuel have resulted in lower arsenic content, if any, for these fuels, because the techniques used to remove sulfur from fuels necessarily remove metals such as arsenic also.'' One example of such regulation is the 15 parts per million by weight (ppmw) sulfur standard for ultra-low sulfur diesel fuel in 40 CFR 1090.305. The petitioners, however, did not provide references supporting the statement that the arsenic content in ultra-low sulfur diesel fuel is universally lower or documenting that stationary combustion turbines in the source category are required to use ultra-low sulfur diesel fuel. Rather, the new source performance standards (NSPS) for stationary combustion turbines (units constructed, modified, or reconstructed after February 18, 2005) require the use of only fuel having a sulfur content that is equivalent to a sulfur dioxide content less than 0.06 pounds per million British thermal units (lb/MMBtu) (*i.e.,* approximately 500 ppmw of sulfur content in distillate fuel oil) for turbines located on the continent and 0.42 lb/MMBtu (4,000 ppmw) for turbines in non-continental areas (71 FR 38497; July

[29] Email from Eladio Knipping, Electric Power Research Institute to Nick Hutson, Melanie King, and Greg Honda, EPA. Subject: FW: Response to EPA Feedback on EPRI CT Reports. April 15, 2020. Docket ID No. EPA–HQ–OAR–2020–0408.

6, 2006 and 40 CFR part 60, NSPS subpart KKKK, at 40 CFR 60.4300). Notably, permitted thresholds for stationary combustion turbines vary, but the source identified to have the highest cancer risk in the 2020 RTR is permitted to combust diesel fuel with a sulfur content up to 1,500 ppmw (permit available in the docket to this rulemaking, Docket ID No. EPA–HQ–OAR–2020–0408), which further demonstrates that there is no assurance that turbines are using ultra-low sulfur diesel fuel.

The petitioners also provided summary fuel analysis reports from a few stationary combustion turbines in the source category. In those cases, fuel arsenic concentrations reported by the petitioners were below the limit of detection of the instruments. The petitioners, however, did not provide any information regarding the methods and procedures that were used for the fuel sampling and the determination of the detection limits for arsenic. Instead, results were only indicated by a qualitative statement that the measurement was below the limit of detection. Additionally, raw data were not provided. After receipt of the first supplement to the petition, the EPA asked the petitioners to provide more detail regarding the methods used for the fuel measurements, including calibration data and information on the determination of non-detects.[30] The petitioners indicated that such information would be provided, but the second supplement only included more summary fuel sampling results and did not provide the more detailed information requested by the EPA. Without this information, the EPA cannot evaluate whether the quality of the data is adequate or assess whether the detection limits are accurate and, therefore, cannot determine whether the arsenic emissions estimated for these facilities are representative of their actual emissions.

2. The Measured Rates for Formaldehyde Emissions

Formaldehyde was the HAP emitted in the largest quantities from stationary combustion turbines evaluated in the EPA's 2020 risk analysis (see Table 3.1–1 of Risk Report). An examination of the formaldehyde emission rates measured during the CAA section 114 testing showed emissions that are significantly higher for some turbines than those estimated in the petition analysis (as well as the 2020 RTR). For instance, formaldehyde emissions at the two landfill gas-fired turbines at the BMW Manufacturing facility averaged 0.28 lb/hour (for unit GT05) and 0.65 lb/hour (for unit GT06) during the CAA section 114 testing. Multiplying the hourly emission rate by the highest annual hours of operation on 100 percent landfill gas for the turbines reported for the CAA section 114 request, which occurred in the year 2016, yields annual formaldehyde emissions of 0.80 tons/year for unit GT05 and 1.85 tons/year for unit GT06. The formaldehyde emissions assumed for those units in the petition analysis were 0.0096 tons/year for each turbine. The measured emissions were 80 times higher than estimated for unit GT05 and 190 times higher than estimated for unit GT06. A similar analysis of the formaldehyde emissions for units 7 and 8 at Northern Natural Gas's Waterloo Compressor Station showed that the measured formaldehyde emissions were 31 times (unit 7) and 18 times (unit 8) higher than the estimated emissions.[31] These differences in the measured formaldehyde emissions versus the petitioners' estimated formaldehyde emissions demonstrate that the petitioners' data are not adequate for purposes of the Administrator's determination under CAA section 112(c)(9)(B).

These higher measured formaldehyde emissions may also indicate that the EPA's finding in the 2020 RTR of a maximum individual lifetime cancer risk for the Stationary Combustion Turbines source category of 3-in-1 million may be a significant underestimation. But the EPA has also long acknowledged that the maximum individual lifetime cancer risk, under CAA section 112(f)(2), ''does not necessarily reflect the true risk, but [rather] displays a conservative risk level which is an upper-bound that is unlikely to be exceeded.'' [32] Moreover, as previously explained, for delisting source categories that emit carcinogenic HAP, CAA section 112(c)(9)(B)(i) sets a lifetime cancer risk to the most exposed individual threshold of 1-in-1 million, which differs significantly from the acceptable risk determination for standards promulgated under CAA section 112(f)(2), where a lifetime cancer risk to the most exposed individual of 100-in-1 million is ordinarily the upper bound of acceptability. And, ultimately, sources would remain subject to standards promulgated under CAA section 112(f)(2) in contrast to removal of all CAA section 112 regulatory requirements if the EPA grants a delisting petition under CAA section 112(c)(9)(B).[33]

3. Acute Multiplier

The acute multiplier used by the petitioners to assess the health impacts from short-term exposures to HAP emissions for two facilities is not adequately supported by the evidence. As discussed previously, the risk analyses for both the 2020 RTR and the petition evaluated the acute health risks posed by actual baseline emissions. To assess the potential health impacts from short-term exposures, the petitioners estimated worst-case 1-hour HAP emission rates (''acute emissions'') from each turbine included in their analysis. For most sources, the petitioners' analysis used an acute multiplier of 10 times the average annual hourly emission rate for each turbine. Use of this value is consistent with the acute multiplier used by the EPA in the 2020 RTR, as discussed in the March 6, 2019, memorandum titled *Review of the Acute Multiplier Used to Derive Hourly Emission Rates for the Stationary Combustion Turbines Risk Analysis* that reviewed the acute multiplier and that is available in the docket for the Stationary Combustion Turbines RTR (Docket ID No. EPA–HQ–OAR–2017–0688–0070).

As discussed in the memorandum, the basis for the use of a default acute multiplier of 10 in the 2020 RTR is a study of short-term emissions variability in a heavily industrialized four-county area in Texas.[34] At the time of the RTR proposal, the EPA evaluated the suitability of the default acute multiplier of 10 by reviewing available stack test data for formaldehyde emissions from stationary combustion turbines to determine the variability of hourly test runs. To determine the emissions variability, the average formaldehyde concentration for each unit was calculated using all available

valid stack test data for that unit, and then the concentration of formaldehyde for each hourly test run was divided by that unit's average to determine the run-to-average emissions ratio. The highest run-to-average ratio in the EPA's analysis for the 2020 RTR was 6.7. For two facilities, Salinas River Cogeneration and Sargent Canyon Cogeneration, the petitioners stated that using the EPA's default ratio of 10 in their analysis yielded acute hazard quotients exceeding 1. The petitioners then used a value of 2 for the acute multiplier in their analysis for those two facilities and justified this based on the ratio of hours in the year to annual operating hours at those facilities, rather than on information regarding worst-case emissions data. The petitioners did not provide any information to show how a comparison of the hours in the year to annual operating hours was relevant for an analysis of potential worst-case 1-hour HAP emission rates or how a multiplier of 2 was more valid than the multiplier used for the 2020 RTR, which was based on actual hourly emissions data. The EPA believes that the petitioners' approach does not adequately account for spikes in emissions and variability in emission rates at non-baseload conditions (*e.g.,* startup, part-load operation). At lower loads, more incomplete combustion may occur and result in proportionately greater organic HAP emissions. Furthermore, the oxidation catalysts used to control organic HAP emissions for some turbines may not operate effectively during startup until the catalyst reaches its appropriate operating temperature.

After receipt of the initial petition and the first supplement, the EPA discussed these issues with the petitioners. The petitioners indicated that they would provide an expanded justification for the use of an acute multiplier of 2.[35] The discussion of the acute multiplier for Salinas River Cogeneration and Sargent Canyon Cogeneration in the second supplement did not address the questions raised by the EPA. Instead, it just restated the petitioners' previous justification for using the ratio of hours in the year to annual operating hours. Therefore, the petitioners have not adequately demonstrated that an acute multiplier of 2 is appropriate for the turbines at the Salinas River Cogeneration and Sargent Canyon Cogeneration facilities and, therefore, that the hazard quotients for those two facilities are below 1.

4. Accounting for Potential Increases in Emissions

As previously noted, emission estimates in the petition analyses were primarily based on emission factors and historical fuel usage data. For the purposes of determining whether the delisting criteria under CAA section 112(c)(9)(B) are satisfied, risk evaluations must be based on emission estimates that assume the controls required under CAA section 112 are not in place unless they are also known to be required under a different regulatory authority. This is because deleting a source category from the list of major sources would result in removal of the regulatory requirements specified in the applicable NESHAP. However, the petitioners' emission estimates for those units with oxidation catalyst were based on controlled emissions, and the petitioners did not specify whether those oxidation catalysts were installed to meet the Stationary Combustion Turbines NESHAP or to satisfy regulatory requirements under other EPA programs (*e.g.,* new source review (NSR) or prevention of significant deterioration (PSD) permits).[36] As a result, the petitioners did not explain—and the EPA was not able to determine based on the information submitted—whether the emissions estimates and risk assessment presented by the petitioners account for potential increases in emissions that might result from delisting the Stationary Combustion Turbines source category.

D. HAP and Turbines Not Included in Petition

Regarding HAP emissions, in addition to the deficiencies discussed in section IV.C., the emission estimates in the information submitted by the petitioners do not include several HAP that have been demonstrated to be emitted by stationary combustion turbines and do not include one-fourth of the turbines in the source category. As discussed in section III.C., the EPA required testing of stationary combustion turbines to obtain data on emissions of formaldehyde, acid gases (hydrogen fluoride and hydrogen chloride), and metallic HAP. The emissions testing showed that there are measurable emissions of metallic HAP from turbines operating on natural gas and landfill gas. The risk analysis submitted by the petitioners did not include metallic HAP emissions for natural gas and landfill gas turbines. Several metallic HAP (arsenic, cadmium, lead, and mercury compounds) and acid gases are included in both the EPA's health risk analysis and screening for adverse environmental effects.

Regarding the universe of affected sources, the EPA has identified an additional 245 turbines that are subject to the Stationary Combustion Turbines NESHAP that were not included in the petitioners' risk analyses. These additional turbines include units that are owned and operated by companies that are members of the organizations that submitted the petition to delist.[37] The EPA has identified a total of 1,015 turbines that are subject to the NESHAP. Hence, the petitioners' analyses do not account for nearly one-fourth of the turbines that are subject to the Stationary Combustion Turbines NESHAP. This contrasts with, for example, the delisting of the non-mercury cell chlorine production subcategory where the EPA ''obtained chlorine and HCl emission estimates from every known major source facility in the non-mercury cell chlorine production subcategory using our authority under section 114 of the CAA and conducted risk assessments for each facility.'' [38] As previously noted, a petitioner must provide a detailed assessment of the available data concerning the potential adverse human health and environmental effects and the potential for human and environmental exposures from the source category that is to be delisted. Such data must demonstrate that no source in the category or subcategory emits HAP in quantities which may cause a lifetime risk of cancer greater than 1-in-1 million to the individual in the population who is most exposed to emissions of such pollutants from the source or that no source in the category exceeds a level which is adequate to protect public health with an ample margin of safety and no adverse environmental effect will result from emissions from that source category.

V. What is the rationale for denying the petition?

The EPA is denying the petition because the EPA has determined that the petition is incomplete. The petitioners did not address all the necessary subject areas under CAA

[35] Email from Eladio Knipping, Electric Power Research Institute to Nick Hutson, Melanie King, and Greg Honda, EPA. Subject: FW: Response to EPA Feedback on EPRI CT Reports. April 15, 2020. Docket ID No. EPA–HQ–OAR–2020–0408.

[36] As discussed previously, the EPA proposed to remove the stay of the standards for new lean premix gas-fired and diffusion flame gas-fired turbines on April 12, 2019 (84 FR 15046), prior to the submittal of the petition to delist in August 2019. The EPA finalized the removal of the stay on March 9, 2022 (87 FR 13183).

[37] Turbine NESHAP Unit List—Updated October 2023. Docket ID No. EPA–HQ–OAR–2020–0408.

[38] 68 FR 70951.

section 112(c)(9)(B) and did not present adequate information and analyses for the requested determination. As stated previously, CAA section 112(c)(9)(B)(i) requires the EPA to determine that *no* source in the category emits HAP in quantities which may cause a lifetime risk of cancer greater than 1-in-1 million to the individual in the population who is most exposed to emissions of such pollutants from the source. Here, the petition and all the supplements to the petition did not include HAP emissions measurements for all of the HAP emitted by the Stationary Combustion Turbines source category.[39] The risk analysis submitted by the petitioners did not include metallic HAP emissions for natural gas and landfill gas turbines, which the CAA section 114 information request results demonstrated are emitted from turbines operating on both natural gas and landfill gas. Further, the petitioners' analyses did not include nearly one-fourth of the stationary combustion turbines that are subject to the Stationary Combustion Turbines NESHAP. For the fuel sampling data and the acute multiplier, the petitioners did not provide information requested by the EPA that is necessary to evaluate the adequacy of the data. The EPA also afforded petitioners opportunities to address the above referenced identified gaps in the data and information underpinning their petition, which petitioners declined. For these reasons, the EPA cannot conclude that the petitioners have demonstrated that the maximum individual lifetime cancer risk from all stationary combustion turbines subject to CAA section 112 is less than the 1-in-1 million delisting threshold under CAA section 112(c)(9)(B)(i).

The EPA construes CAA section 112(c)(9)(B)(i) as calling for the Administrator to make a determination that the criteria for delisting are satisfied. Any such determination must be supported by measured emissions data or otherwise reasonably account for operational variability.[40] This is because delisting of a source category would result in the removal of applicable regulatory requirements under CAA section 112 for such source category. The EPA cannot grant a petition to delist a source category if there are major uncertainties that must be addressed for the EPA to have sufficient information to make the requisite substantive determination, under CAA section 112(c)(9)(B)(i). And the burden remains on a petitioner to demonstrate that the available data support an affirmative determination that HAP emissions from a source category may not be reasonably anticipated to result in adverse effects on human health or the environment. *See American Forest and Paper Ass'n* v. *EPA,* 294 F.3d at 119 (''The statutory language unambiguously places on a delisting petitioner the burden to make a showing that there is adequate data about a substance to determine exposure to it *may* not reasonably be anticipated to cause adverse effects.'' (Emphasis in original; cleaned up)).

In addition to the incompleteness of the petition, the EPA's technical review identified major uncertainties in the emission estimates provided by the petitioners that are an additional and separate independent basis for denial of the petition. The results of the 2020 RTR risk analysis (based on actual emissions), under CAA section 112(f)(2), indicated that the estimated maximum individual lifetime cancer risk is 3-in-1 million. The petitioners' analyses contained in their submittals claimed a maximum individual lifetime cancer risk of 0.76-in-1 million as support for their petition to delist under CAA section 112(c)(9). But the petitioners' analyses, which included revised HAP emission estimates and a revised evaluation of the 2020 RTR risk analysis, were primarily based on emission factors and historical fuel usage data for a subset of the turbines that are subject to CAA section 112.

The petitioners also did not include any stack testing on the turbines that they analyzed to determine actual emissions. As stated previously, emission factors do not provide sufficient certainty regarding site-specific emissions that would provide confidence that no source in the category exceeds the criteria for delisting. In addition, the CAA section 114 emissions testing showed actual formaldehyde emissions for some turbines that are significantly higher than those estimated by the petitioners. Lastly, the petitioners did not explain whether the emission estimates they relied on would continue to be applicable if the EPA were to delist the source category. Overall, and as shown in section IV., the petitioners did not provide sufficient data or analyses for the purpose of estimating maximum offsite pollutant concentrations that would enable the Administrator to make the substantive determination contemplated by CAA section 112(c)(9)(B).[41]

The EPA has concluded that the available evidence is inadequate to support a determination that no source in the Stationary Combustion Turbines source category emits such HAP in quantities which may cause a lifetime risk of cancer greater than 1-in-1 million to the individual in the population who is most exposed to emissions of such pollutants from the source category as called for under CAA section 112(c)(9)(B)(i). Because the petition is denied under CAA section 112(c)(9)(B)(i) for the reasons stated above, the EPA finds that it is not necessary to make any determinations as to whether any source in the category exceeds a level which is adequate to protect public health with an ample margin of safety and presents adverse environmental effects under CAA section 112(c)(9)(B)(ii).

For the reasons stated in this section, the EPA concludes that the petitioners have not demonstrated that the Stationary Combustion Turbines source category may be delisted under CAA section 112(c)(9)(B)(i). This means that the petitioners have failed to meet the delisting criteria outlined in CAA section 112(c)(9)(B)(i), and the EPA must deny the petition. Finally, because the EPA has determined that the petitioners did not address all the necessary subject areas under CAA section 112(c)(9)(B) and did not present adequate information and analyses for each of the subject areas, the EPA is denying the petition with prejudice. Any future petition to delist will be denied as a matter of law unless such future petition is accompanied by substantial new information or analysis.

Michael S. Regan,

Administrator.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 73 and 74

[MB Docket No. 20–401, FCC 24–35; FR ID 213399]

Program Originating FM Broadcast Booster Stations

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: In this document, the Federal Communications Commission (Commission or FCC) seeks comment on revising Commission rules to establish processing, licensing, and service rules that will enable full power FM and low power FM (LPFM) broadcast stations to originate programming using FM booster stations. In a concurrently adopted Report and Order (R&O), published elsewhere in this issue of the **Federal Register**, the Commission found that it would be in the public interest to provide broadcasters flexibility to use program originating boosters, subject to certain safeguards needed to address concerns raised in the record. This further notice of proposed rulemaking (FNPRM) seeks comment on the details of implementing these safeguards and on a number of proposed rule changes.

DATES: Comments due on or before May 16, 2024; reply comments due on or before June 17, 2024.

ADDRESSES: Pursuant to §§ 1.415 and 1.419 of the Commission's rules, 47 CFR 1.415, 1.419, interested parties may file comments and reply comments on or before the dates indicated on the first page of this document. Comments may be filed using the Commission's Electronic Comment Filing System (ECFS). See Electronic Filing of Documents in Rulemaking Proceedings, 63 FR 24121 (1998). You may submit comments, identified by MB Docket No. 20–401, FCC 24–35, by any of the following methods:

- *Electronic Filers:* Comments may be filed electronically using the internet by accessing the ECFS: *https://apps.fcc.gov/ecfs/.*
- *Paper Filers:* Parties who choose to file by paper must file an original and one copy of each filing.
- Filings can be sent by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.
- Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9050 Junction Drive, Annapolis Junction, MD 20701.
- U.S. Postal Service first-class, Express, and Priority mail must be addressed to 45 L Street NE, Washington, DC 20554.
- Effective March 19, 2020, and until further notice, the Commission no longer accepts any hand or messenger delivered filings. This is a temporary measure taken to help protect the health and safety of individuals, and to mitigate the transmission of COVID–19. See FCC Announces Closure of FCC Headquarters Open Window and Change in Hand-Delivery Policy, Public Notice, DA 20–304 (March 19, 2020). *https://www.fcc.gov/document/fcc-closes-headquarters-open-window-and-changes-hand-delivery-policy.*
- *People with Disabilities:* To request materials in accessible formats for people with disabilities (braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov* or call the Consumer & Governmental Affairs Bureau at 202–418–0530 (voice), 202–418–0432 (TTY).

FOR FURTHER INFORMATION CONTACT: Albert Shuldiner, Chief, Media Bureau, Audio Division, (202) 418–2721, *Albert.Shuldiner@fcc.gov;* Irene Bleiweiss, Attorney, Media Bureau, Audio Division, (202) 418–2785, *Irene.Bleiweiss@fcc.gov.* For additional information concerning the Paperwork Reduction Act (PRA) information collection requirements contained in this document, contact Cathy Williams at (202) 418–2918, *Cathy.Williams@fcc.gov.*

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's FNPRM, FCC 24–35, adopted March 27, 2024 and released April 2, 2024. The full text of this document is available by downloading the text from the Commission's website at: *https://docs.fcc.gov/public/attachments/FCC-24-35A1.pdf.*

Paperwork Reduction Act of 1995 Analysis: This document proposes new or modified information collection requirements. The Commission, as part of its continuing effort to reduce paperwork burdens and pursuant to the Paperwork Reduction Act of 1995, Public Law 104–13, invites the general public and the Office of Management and Budget (OMB) to comment on these information collection requirements. In addition, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the Commission seeks specific comment on how it might further reduce the information collection burden for small business concerns with fewer than 25 employees.

Providing Accountability Through Transparency Act: Consistent with the Providing Accountability Through Transparency Act, Public Law 118–9, a summary of this document will be available on: *https://www.fcc.gov/proposed-rulemakings.*

Synopsis

Background

1. In a notice of proposed rulemaking (NPRM) adopted on December 1, 2020, and published on January 11, 2021, at 86 FR 1909, the Commission sought public comment on a proposal by GeoBroadcast Solutions, LLC (GBS) to allow a new use for FM booster stations. FM boosters are low power, secondary stations that operate in the FM broadcast band. They must operate on the same frequency as the primary station, and have been limited to rebroadcasting the primary station's signal in its entirety (*i.e.,* no transmission of original content). Historically, the sole use of FM boosters has been to improve signal strength of primary FM stations in areas where reception is poor due to terrain or distance from the transmitter. GBS developed technology designed to allow licensees of primary FM and LPFM broadcast stations to geographically target a portion of their programming by using FM boosters to originate different content for different parts of their service areas. Stations might, for example, use the technology to air hyper-local news and weather reports most relevant to a particular community. Stations also might air advertisements or underwriting acknowledgements from businesses that wish or can only afford to focus their reach on small geographic areas, thereby enhancing the stations' ability to compete for local support. Such program origination over boosters cannot be accomplished on a permanent basis under existing rules.

2. Upon consideration of comments both supporting and opposing the GBS proposal, the Commission concluded that program originating boosters would serve the public interest if properly engineered and subject to various safeguards. In the concurrently adopted R&O, the Commission authorizes program originating boosters in the near term under part 5 of the rules (47 CFR 5.1 to 5.602), which pertains to experimental use of new technologies. FM and LPFM broadcasters will have the flexibility to use FM boosters to originate geographically targeted programming on a voluntary basis for

up to three minutes per hour. However, the R&O notes that permanent use of program originating boosters cannot commence until the Commission adopts additional rule changes and establishes details for implementing safeguards to address concerns raised in the record. Accordingly, the Commission has adopted the FNPRM, which proposes and seeks comments on such rule changes and asks additional related questions.

Program Origination Notification

3. To address concerns in the comments about the potential impact of program originating boosters on existing FM service, the R&O concludes that it is imperative for the Commission to adopt a notification requirement for program originating boosters. This would enable the Media Bureau to keep track of which stations are using boosters to originate content and to respond to any complaints that may arise. The FNPRM proposes to require broadcasters originating programming on a booster to file a notification 15 days prior to commencing origination. The proposed rule would also require broadcasters that permanently discontinue originating programming on a booster to file a notification within 30 days after termination. The Commission seeks comment on this proposal and the proposed text of 47 CFR 74.1206 set out in appendix C of the FNPRM. Would the information collected in the proposed FM Booster Notification constitute ''data assets'' for purposes of the OPEN Government Data Act, Public Law 115–435 (2019)? If so, would the collected information constitute ''public data assets'' as defined in 44 U.S.C. 3502 (22)? Is there any reason the Commission should not make such information publicly available?

Section 74.1204(f)

4. Section 74.1204(f) of the rules (47 CFR 74.1204(f)) addresses claims of predicted interference outside a protected station's contour when a translator station construction permit application is pending. Unlike the actual interference rule in § 74.1203, which addresses both translator and booster stations, the predicted interference rule in § 74.1204(f) addresses only translator stations. The FNPRM seeks comment on whether to modify § 74.1204(f) to include a mechanism to address predicted interference while booster construction permit applications remain pending. The Commission believes this will help ensure that broadcasters do not invest in developing booster stations that will cause interference that must be resolved under § 74.1203 once the booster commences broadcasts. It also proposes to apply this new mechanism to any booster applications that are pending at the time the modifications to § 74.1204 are adopted. The Commission seeks comment on these proposals.

Synchronization

5. The FNPRM seeks comment on whether the Commission should adopt a requirement that broadcasters synchronize their primary station and booster signals to reduce and eliminate self-interference. GBS's engineering consultant emphasized in the comments that synchronization is critical to successful booster implementation. One commenter, Anderson, emphasizes the importance for any booster system, but particularly those in a program originating system, to be synchronized in carrier frequency, pilot phase, and audio frames for analog FM. In the R&O, the Commission concluded that broadcasters have strong economic incentives to avoid self-interference to their primary station's signal. In light of that conclusion, it believes broadcasters deploying program originating boosters will employ a technology that uses synchronization. Is there any need to adopt a separate synchronization requirement as an additional safeguard? If the Commission were to adopt a synchronization requirement, what level of synchronization would be appropriate? Should the Commission adopt any standards with regard to synchronizing any or all of the elements discussed by Anderson? Would stations require new or specialized equipment to maintain proper synchronization or is that a routine part of existing booster station operations? Do station signals change enough to require constant monitoring and recalibration and if so, how does this affect our ability to develop and apply a standard? Or would a synchronization requirement impose an unnecessary burden on booster station operations? The Commission seeks comment on these questions.

Notification to Emergency Alert System (EAS) Participants

6. The R&O requires program originating boosters to receive and broadcast all emergency alerts in the same manner as their primary station, and codifies this requirement by amending 47 CFR 11.11 to explicitly make all EAS requirements that are applicable to full-service AM and FM stations and LPFM stations equally applicable to program originating FM boosters. In its comments, the Federal Emergency Management Agency (FEMA) recommended a requirement that FM primary stations implementing program originating boosters must notify all EAS participants monitoring that primary station of the booster's program origination. The Commission seeks comment on this proposal. Does the Commission's proposal to require all program originating boosters to broadcast emergency alerts negate the need for this FEMA proposal?

7. As stated in the R&O, the Commission believes its requirement that program originating boosters broadcast all emergency alerts will ensure no disruptions to the EAS, but the Commission will monitor the rollout of program originating boosters to ensure they do not cause interruptions to the EAS. Should the Commission adopt any requirement for broadcasters using program originating boosters to report EAS-related problems or interference to the Commission? What would be the best means for broadcasters to provide this information to the Commission? Should it require that licensees also submit this information to FEMA?

Part 74 Licensing Issues

8. The Commission proposes to clarify certain operational issues for program originating boosters. The FNPRM proposes to reorganize and clarify 47 CFR 74.1231 by changing the current Note to a new paragraph (j), which clarifies grandfathered superpowered FM stations will be able to implement booster stations only within the standard (*i.e.,* non-superpowered) maximum contour for their class of station. We believe this helps to minimize interference risks by further isolating program originating boosters from adjacent FM broadcast stations. Also, the FNPRM proposes to add a new paragraph (k) that requires booster stations to suspend operations any time their primary stations are not broadcasting and to file notices of suspended operations pursuant to § 73.1740 of the rules (47 CFR 73.1740). This change codifies more explicitly existing requirements. Finally, the Commission proposes to modify 47 CFR 74.1232 to clarify that a booster station may not broadcast programming that is not permitted by its FM primary station's authorization. This will ensure that program originating boosters are not used in a manner that is inconsistent with the primary station. The Commission seeks comment on the proposed rule changes. The FNPRM also takes this opportunity to remind broadcasters that licensees of noncommercial FM stations may not use

booster stations for commercial broadcasts.

Cap on Program Originating FM Boosters and Other LCRA Issues

9. The FNPRM proposes to amend 47 CFR 74.1232(g) to limit full-service FM stations to 25 program originating booster stations. This cap on the number of program originating FM booster stations would represent a change from the current rule, which imposes no numerical limit on FM booster stations. The Commission is bound by Section 5 of the Local Community Radio Act of 2010, Public Law 111–371 (LCRA), to ensure when licensing new FM booster stations that ''licenses are available'' to FM translators and LPFM stations. The ability of other secondary service applicants to locate within an existing full-service FM station's service contour is ordinarily constrained by the full-service FM primary station itself. Despite this, the Commission does not yet know the extent of demand for program originating FM booster stations, nor the impact that potentially large numbers of such stations in a market could have on spectrum availability on adjacent channels where new FM translators and LPFM stations might conceivably wish to locate. Accordingly, it concludes in the R&O that a limit on the number of program originating boosters a station can operate may be needed to ensure that an increase in booster stations resulting from the decision to authorize program originating boosters is consistent with the LCRA.

10. The R&O notes that some commenters have expressed concern about the effect of additional boosters on the FM noise floor. Would a program originating FM booster cap address such concerns? The Commission tentatively concludes that a limit of 25 program originating boosters per full-service FM primary station is a reasonable compromise. In seeking comment on this number, the Commission also notes that imposing an artificially low number of program originating boosters could make it harder for licensees to design and deploy boosters in a way that minimizes the risks of interference. It does not propose an overall per market limit. The Commission seeks comment on these tentative conclusions as well as any alternative number for the cap. GBS studies evaluated geotargeting deployments with up to nine boosters. Thus, the Commission tentatively concludes that a 25 program originating booster station cap should not impose an undue burden on the rollout of this technology while at the same time ensuring consistency with the LCRA. It also seeks input on any alternatives. The Commission asks that any alternative proposals be accompanied by detailed justifications, as well as a discussion of the effect any alternative program originating booster cap or alternative approach to limiting program originating boosters might have on other stations, both full-service and secondary, and on the local FM noise floor generally.

11. The FNPRM also seeks comment on whether there are other requirements needed to ensure compliance with the LCRA. The R&O concluded that authorization of program originating boosters is consistent with the LCRA. However, the FNPRM seeks input on any remaining concerns about compliance with the LCRA. Currently, LPFM stations are permitted to originate programming 100 percent of the time, while FM translators and boosters do not originate programming. What difference, if any, does allowing some FM boosters to originate programming for five percent of each broadcast hour make to the relative status of the secondary services? The Commission seeks comment on these matters.

12. Additionally, in discussing any proposed LCRA-based requirements in licensing program originating FM booster stations, the Commission asks commenters specifically to enumerate the costs and benefits of their proposals or any alternatives set forth by commenters. This should include the costs of preparing any proposed application showings, or of licensing an FM booster in such a manner as to comply with the LCRA. Commenters should also quantify projected costs and benefits, identify supporting evidence and any underlying assumptions, and explain any difficulties faced in trying to quantify benefits and costs of the proposals and how the Commission might nonetheless evaluate them.

Political Broadcasting and Advertising

13. If program originating boosters are widely adopted, candidates and issue advertisers may seek to use program originating booster stations to target their message to particular subsets of a market, which has political broadcasting and recordkeeping implications. As an initial matter, the Commission tentatively concludes that, to the extent an FM booster station originates programming, it should be subject to the full array of political programming requirements that are applicable to full power broadcast stations. These obligations ensure that candidates for elective office have access to broadcast facilities and certain other media platforms and foster transparency about entities sponsoring advertisements. The FNPRM therefore proposes to adopt a new provision (47 CFR 74.1290) to make all political programming requirements applicable to program originating FM booster stations. It also proposes to require broadcasters originating programming on a booster to maintain a political file for the booster in the same political file as the booster's primary station. Thus, the Commission proposes to amend 47 CFR 73.3526 (online public inspection file of commercial stations) and 47 CFR 73.3527 (online public inspection file of noncommercial educational stations) to appropriately reflect the obligation of licensees of program originating FM booster stations to maintain an online political file for each such station. LPFM stations operating program originating boosters will need to maintain a physical political file consistent with existing requirements. The FNPRM invites comment on this proposal.

14. *Political Files.* Applying the full array of political programming requirements to program originating FM booster stations raises several additional issues on which the FNPRM seeks comment. First, it asks how licensees should comply with the political file requirements in 47 CFR 73.1943 and 47 U.S.C. 315(e) for program originating booster stations. For example, these sections require commercial licensees to maintain online political files for requests for the purchase of broadcast time by or on behalf of all legally qualified candidates for public office and by or on behalf of issues advertisers whose ads communicate a message relating to any political matter of national importance. The requirement applies to both full service noncommercial stations and LPFM stations to the extent that they make time available without charge for use by a candidate. What is the best location for records of such commercial and noncommercial use of broadcast time on a program originating booster station? The FNPRM notes that booster stations are not required to maintain a public file. Should records of political use of broadcast time on a program originating booster station be commingled with records of requests for the use of broadcast time on the licensee's primary station so long as they are appropriately labeled to identify the station on which the use was made? Alternatively, should licensees be required to create a political file subfolder for each of its booster stations into which it would place records of requests for the purchase or free use of broadcast time?

15. Would candidates and members of the public know that a political message

that they have heard originated on a booster station (as opposed to the licensee's primary station) and know where to locate records of the message in the station's political file? How should LPFM stations, which are not currently required to have an online public inspection file, keep publicly available records of political use of their program originating boosters? For example, should they keep a physical file for the booster with the LPFM station's files consistent with requirements for political use of the LPFM station? The Commission invites comment on all of these questions and any additional issues that follow from requiring licensees to maintain records of requests for the purchase of political time and of time made available without charge for use by a candidate on their program originating booster stations.

16. *Equal Opportunities.* Targeted advertising also raises questions about how licensees should comply with obligations related to equal opportunities. Under 47 CFR 73.1941 and 47 U.S.C. 315(a), if a licensee permits a legally qualified candidate for any public office to use its station, it must, with some exceptions, permit all other legally qualified candidates for the same office to also use its station. Should candidates who are requesting equal opportunities in response to an advertisement or noncommercial announcement that was broadcast on a particular program originating booster station be entitled to use only that booster station, essentially treating individual booster stations and a licensee's primary station as separate facilities for equal opportunities purposes?

17. *Reasonable Access.* Similar questions arise with respect to how licensees should entertain requests for reasonable access by Federal candidates on program originating booster stations. Under 47 CFR 73.1944 and 47 U.S.C. 312(a)(7), commercial broadcast stations must permit candidates for Federal office to purchase reasonable amounts of advertising time. In determining what is ''reasonable'' for reasonable access purposes, should licensees treat their program originating booster and primary stations as separate facilities? For example, should the amount of time that a Federal candidate has purchased on a licensee's primary station affect the amount of time to which the same candidate is entitled to purchase on one of the licensee's program originating booster stations, and vice versa?

18. *Candidate Rates.* Program originating booster stations raise additional questions about how licensees should apply candidate rates. Pursuant to 47 CFR 73.1942 and 47 U.S.C 315(b), during the 45-day period preceding a primary or primary run-off election, and the 60 day period preceding a general or special election, stations must charge candidates in connection with their campaigns no more than the station's lowest unit charge for the same class and amount of time during the same period. In determining lowest unit charges, should licensees treat their program originating booster stations and primary stations as separate facilities? Is it reasonable to expect that the lowest unit rates on a licensee's program originating booster station would be different from the lowest unit rates on its primary station?

Licensing Issues

19. The FNPRM also seeks comment on whether to require vendors of program originating technology and patent owners in program originating technology to abide by the Commission's patent policy or any other guidelines common to open standards, which require that licenses be available to all parties on fair, reasonable and nondiscriminatory terms. Would such a step be necessary or an appropriate exercise of Commission authority in light of the fact that the Report and Order does not endorse a particular technical approach? Parties suggesting that we do consider any requirements should provide detailed information, including how long such requirements should last and our authority to adopt such requirements.

Other Safeguards

20. Are there any other non-technical safeguards on program originating boosters that might be useful? For example, two members of Congress who support geo-targeted content, nevertheless suggest that the Commission should consider requiring licensees of program originating boosters to certify that they are being responsive to needs and issues of their service areas, especially minority communities. This appears to be a response to concerns of a non-technical nature, such as the potential for redlining by advertisers or licensees. Although the Commission finds no current evidence of factors to cause redlining, it seeks comment on whether a safeguard in the form of a reporting condition might generally be useful to address non-technical concerns. If so, what information should licensees certify to, and how often?

Digital Equity and Inclusion

21. The Commission, as part of its continuing effort to advance digital equity for all, including people of color, persons with disabilities, persons who live in rural or Tribal areas, and others who are or have been historically underserved, marginalized, or adversely affected by persistent poverty or inequality, invites comment on any equity-related considerations and benefits (if any) that may be associated with the proposals and issues discussed herein. Specifically, it seeks comment on how the FNPRM's proposals may promote or inhibit advances in diversity, equity, inclusion, and accessibility, as well the scope of the Commission's relevant legal authority.

22. The Commission will send a copy of the FNPRM including the IRFA, to the Chief Counsel for Advocacy of the SBA. A copy of this FNPRM and IRFA (or summaries thereof) will also be published in the **Federal Register**.

Initial Regulatory Flexibility Act Analysis

23. As required by the Regulatory Flexibility Act of 1980, as amended (RFA), the Federal Communications Commission (Commission) has prepared this Initial Regulatory Flexibility Act Analysis (IRFA) of the possible significant economic impact on a substantial number of small entities by the policies and rules proposed in the FNPRM. Written public comments are requested on this IRFA. Comments must be identified as responses to the IRFA and must be filed by the deadlines for comments specified in the **DATES** section of this FNPRM. The Commission will send a copy of the FNPRM, including this IRFA, to the Chief Counsel for Advocacy of the Small Business Administration (SBA). In addition, the FNPRM and IRFA (or summaries thereof) will be published in the **Federal Register**.

A. Need for, and Objectives of, the Proposed Rules

24. The FNPRM seeks further comment on processing, licensing, and service rules for program originating FM booster stations, or program originating boosters, which provide targeted programming to specific areas within their primary FM stations' service areas. Through the FNPRM, the Commission sets out a number of proposed changes to the rules, detailed in Appendix C, and seeks comment on these proposed rule changes.

25. In the FNPRM, the Commission proposes to retain the requirement that a booster station may cause only limited interference to its primary station's signal, but also proposes to eliminate the current rule provision barring any interference to the primary station's

signal within the boundaries of the community of license. Additionally, the Commission proposes a notification requirement in which licensees of authorized booster stations will be required to file a notification of their intention to originate programming rather than implementing a separate application process for boosters that originate programming that could introduce greater delay for broadcasters seeking to operate such booster stations. The Commission also asks whether it should codify technical specifications for synchronization of the program originating booster's signal with that of the FM primary station, as well as whether imposing such a requirement would be an unnecessary burden on broadcasters.

26. In the Report and Order, we required program originating boosters to receive and broadcast all emergency alerts in the same manner as their primary station, by codifying this requirement through an amendment of § 11.11 of the rules (47 CFR 11.11). The FNPRM seeks comment regarding whether any additional requirements will be needed regarding the interaction of program originating boosters and the Emergency Alert System (EAS).

27. Additionally, the Commission proposes to add a new section to the rules (47 CFR 74.1206) requiring that a program originating booster formally notify the Commission through the Media Bureau's Licensing and Management System (LMS) of the commencement and suspension of operations. Other proposed rule additions and amendments include a requirement that a program originating booster suspend operations when its FM primary station suspends operations, and to so notify the Commission. The FNPRM also proposes that the programming originated by an FM booster station must conform to that broadcast by the FM primary station, *e.g.,* a booster re-transmitting a noncommercial educational (NCE) FM station may also only broadcast NCE content. The FNPRM also seeks comment on whether information collected in the proposed FM Booster Notification constitutes ''data assets'' for purposes of the OPEN Government Data Act and, if so, whether the collected information constitutes ''public data assets.''

28. The Commission further proposes to amend 47 CFR 74.1232(g) to limit each full-service FM station to using up to 25 FM booster stations. This cap represents a change from the current rule, which imposes no numerical limit on FM booster stations. This proposal is based on the decision in the Report and Order that a limit on the number of boosters a station can operate is needed to ensure that an increase in booster stations resulting from our decision to authorize program originating boosters is consistent with the Local Community Radio Act of 2010 (LCRA).

29. The FNPRM also addresses issues regarding political broadcasting. To the extent that political advertising may be broadcast over a program originating booster, the Commission proposes that such a booster station must follow all of the Commission's political broadcasting rules. These would include rules requiring the maintenance of an online political file, provision of equal opportunity and reasonable access to political candidates, and limiting the rates charged to political candidates for airtime. Finally, the FNPRM also asks whether vendors of these technologies should abide by the Commission's patent policy or any other guidelines common to open standards, which require that licenses be available to all parties on fair, reasonable, and nondiscriminatory terms.

B. Legal Basis

30. The proposed action is authorized pursuant to sections 1, 2, 4(i), 7, 301, 302, 303, 307, 308, 309, 316, 319, 324, and 403 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154, 157, 301, 302, 303, 307, 308, 309, 316, 319, 324, and 403.

C. Description and Estimate of the Number of Small Entities To Which the Proposed Rules Will Apply

31. The RFA directs agencies to provide a description of, and where feasible, an estimate of the number of small entities that may be affected by the proposed rules, if adopted. The RFA generally defines the term ''small entity'' as having the same meaning as the terms ''small business,'' ''small organization,'' and ''small governmental jurisdiction.'' In addition, the term ''small business'' has the same meaning as the term ''small business concern'' under the Small Business Act (SBA). A ''small business concern'' is one which: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA.

32. *Small Businesses, Small Organizations, Small Governmental Jurisdictions.* Our actions, over time, may affect small entities that are not easily categorized at present. We therefore, describe three broad groups of small entities that could be directly affected herein. First, while there are industry specific size standards for small businesses that are used in the regulatory flexibility analysis, according to data from the Small Business Administration's (SBA) Office of Advocacy, in general a small business is an independent business having fewer than 500 employees. These types of small businesses represent 99.9% of all businesses in the United States, which translates to 33.2 million businesses.

33. Next, the type of small entity described as a ''small organization'' is generally ''any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.'' The Internal Revenue Service (IRS) uses a revenue benchmark of $50,000 or less to delineate its annual electronic filing requirements for small exempt organizations. Nationwide, for tax year 2020, there were approximately 447,689 small exempt organizations in the U.S. reporting revenues of $50,000 or less according to the registration and tax data for exempt organizations available from the IRS.

34. Finally, the small entity described as a ''small governmental jurisdiction'' is defined generally as ''governments of cities, counties, towns, townships, villages, school districts, or special districts, with a population of less than fifty thousand.'' U.S. Census Bureau data from the 2017 Census of Governments indicate there were 90,075 local governmental jurisdictions consisting of general purpose governments and special purpose governments in the United States. Of this number, there were 36,931 general purpose governments (county, municipal, and town or township) with populations of less than 50,000 and 12,040 special purpose governments—independent school districts with enrollment populations of less than 50,000. Accordingly, based on the 2017 U.S. Census of Governments data, we estimate that at least 48,971 entities fall into the category of ''small governmental jurisdictions.''

35. *Radio Stations.* This industry is comprised of ''establishments primarily engaged in broadcasting aural programs by radio to the public.'' Programming may originate in their own studio, from an affiliated network, or from external sources. The SBA small business size standard for this industry classifies firms having $41.5 million or less in annual receipts as small. U.S. Census Bureau data for 2017 show that 2,963 firms operated in this industry during that year. Of this number, 1,879 firms operated with revenue of less than $25 million per year. Based on this data and the SBA's small business size standard, we estimate a majority of such entities are small entities.

36. The Commission estimates that as of September 30, 2023, there were 4,452 licensed commercial AM radio stations and 6,670 licensed commercial FM radio stations, for a combined total of 11,122 commercial radio stations. Of this total, 11,120 stations (or 99.98%) had revenues of $41.5 million or less in 2022, according to Commission staff review of the BIA Kelsey Inc. Media Access Pro Database (BIA) on October 4, 2023, and therefore these licensees qualify as small entities under the SBA definition. In addition, the Commission estimates that as of September 30, 2023, there were 4,263 licensed noncommercial (NCE) FM radio stations, 1,978 low power FM (LPFM) stations, and 8,928 FM translators and boosters. The Commission however does not compile, and otherwise does not have access to financial information for these radio stations that would permit it to determine how many of these stations qualify as small entities under the SBA small business size standard. Nevertheless, given the SBA's large annual receipts threshold for this industry and the nature of radio station licensees, we presume all of these entities qualify as small entities under the above SBA small business size standard.

37. We note, however, that in assessing whether a business concern qualifies as ''small'' under the above definition, business (control) affiliations must be included. Our estimate, therefore, likely overstates the number of small entities that might be affected by our action, because the revenue figure on which it is based does not include or aggregate revenues from affiliated companies. In addition, another element of the definition of ''small business'' requires that an entity not be dominant in its field of operation. We are unable at this time to define or quantify the criteria that would establish whether a specific radio or television broadcast station is dominant in its field of operation. Accordingly, the estimate of small businesses to which the rules may apply does not exclude any radio or television station from the definition of a small business on this basis and is therefore possibly over-inclusive. An additional element of the definition of ''small business'' is that the entity must be independently owned and operated. Because it is difficult to assess these criteria in the context of media entities, the estimate of small businesses to which the rules may apply does not exclude any radio or television station from the definition of a small business on this basis and similarly may be over-inclusive.

D. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements for Small Entities

38. The FNPRM proposes modified reporting requirements that, if adopted, may impact compliance requirements for small entities. The Commission seeks comment on whether FM licensees and permittees employing program originating boosters should provide notice through the Licensing and Management System (LMS) prior to commencing program origination, and whether it should similarly provide LMS notice when suspending operations. Should the Commission ultimately decide to adopt these requirements, they would likely result in a modified paperwork obligation for small and other entities. The Commission will have to consider the benefits and costs of allowing program originating booster licensees to submit certain notifications in LMS. If adopted, the Commission will seek approval of and submit the corresponding burden estimates to account for this modified reporting requirement. Additionally, small entities may determine they will need to hire professionals to comply with the rule changes proposed in the FNPRM, if adopted. We expect the comments we receive from the parties in the proceeding, including cost and benefit analyses, will help the Commission to identify and evaluate compliance costs and burdens for small businesses that may result from the proposed rules and additional matters discussed in the FNPRM.

E. Steps Taken To Minimize the Significant Economic Impact on Small Entities, and Significant Alternatives Considered

39. The RFA requires an agency to describe any significant alternatives, specifically for small businesses, that it has considered in reaching its proposed approach, which may include the following four alternatives (among others): ''(1) the establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for such small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for such small entities.''

40. The Commission has sought to minimize the economic impact on small entities, as well as consider significant alternatives and weigh their potential impact to those entities. In the FNPRM, we take the step of proposing to modify rules to facilitate limited program origination by FM booster stations.

41. In addition, the FNPRM seeks to avoid imposing additional burdens on small radio stations where practicable. For example, the FNPRM proposes to add a new § 74.1206 to the rules, which would prescribe LMS notification of the commencement or suspension of program originating booster service. The majority of Commission notifications in the media services are delivered through LMS, which is less burdensome than requiring separate mail or electronic mail notification. Further, our proposed rule also simplifies notification and certification requirements for broadcasters that permanently discontinue originating programming on a booster to file a notification of termination within 30 days. We believe that unlike other alternatives for compliance, this approach will provide adequate notice to the Commission while minimizing the regulatory burden for broadcast stations.

42. At this time, the Commission does not have supporting data to determine if there will or will not be an economic impact on small businesses as a result of the proposed rule amendments and/or additions. To assist in the Commission's evaluation of the economic impact on small entities, as a result of actions that have been proposed in the FNPRM, and to better explore options and alternatives, the Commission has sought comment from the parties. In particular, the Commission seeks comment on whether any of the burdens associated with the filing, recordkeeping and reporting requirements described above can be minimized for small entities. Additionally, the Commission seeks comment on whether any potential costs associated with our FM Booster Station requirements can be alleviated for small entities. The Commission expects to more fully consider the economic impact and alternatives for small entities following the review of comments filed in response to the FNPRM.

F. Federal Rules That May Duplicate, Overlap, or Conflict With the Proposed Rule

43. None.

Ordering Clauses

44. *It is further ordered* that, pursuant to sections 1, 2, 4(i), 7, 301, 302, 303, 307, 308, 309, 316, 319, 324, and 403 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154, 157, 301, 302, 303, 307, 308, 309, 316, 319, 324,

and 403, the Further Notice of Proposed Rule Making *is adopted*.

44. *It is further ordered* that, pursuant to applicable procedures set forth in §§ 1.415 and 1.419 of the Commission's rules, 47 CFR 1.415, 1.419, interested parties may file comments on the further notice of proposed rulemaking in MB Docket No. 20–401 on or before thirty (30) days after publication in the **Federal Register** and reply comments on or before sixty (60) days after publication in the **Federal Register**.

List of Subjects in 47 CFR Part 73 and 74

Communications equipment, Radio, Reporting and recordkeeping requirements.

Federal Communications Commission.

Marlene Dortch,

Secretary.

For the reasons discussed in the preamble, the Federal Communications Commission proposes to amend 47 CFR parts 73 and 74 as follows:

PART 73—RADIO BROADCAST SERVICES

■ 1. The authority citation for part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 155, 301, 303, 307, 309, 310, 334, 336, 339.

■ 2. Revise § 73.801 to read as follows:

§ 73.801 Broadcast regulations applicable to LPFM stations.

The following rules are applicable to LPFM stations:

(a) Part 11—Emergency Alert System (EAS).

(1) Section 11.11 The Emergency Alert System (EAS).

(2) [Reserved]

(b) Part 73—Radio Broadcast Services.

(1) Section 73.201 Numerical definition of FM broadcast channels.

(2) Section 73.220 Restrictions on use of channels.

(3) Section 73.267 Determining operating power.

(4) Section 73.277 Permissible transmissions.

(5) Section 73.297 FM stereophonic sound broadcasting.

(6) Section 73.310 FM technical definitions.

(7) Section 73.312 Topographic data.

(8) Section 73.318 FM blanketing interference.

(9) Section 73.322 FM stereophonic sound transmission standards.

(10) Section 73.333 Engineering charts.

(11) Section 73.503 Licensing requirements and service.

(12) Section 73.508 Standards of good engineering practice.

(13) Section 73.593 Subsidiary communications services.

(14) Section 73.1015 Truthful written statements and responses to Commission inquiries and correspondence.

(15) Section 73.1030 Notifications concerning interference to radio astronomy, research and receiving installations.

(16) Section 73.1201 Station identification.

(17) Section 73.1206 Broadcast of telephone conversations.

(18) Section 73.1207 Rebroadcasts.

(19) Section 73.1208 Broadcast of taped, filmed, or recorded material.

(20) Section 73.1210 TV/FM dual-language broadcasting in Puerto Rico.

(21) Section 73.1211 Broadcast of lottery information.

(22) Section 73.1212 Sponsorship identification; list retention; related requirements.

(23) Section 73.1213 Antenna structure, marking and lighting.

(24) Section 73.1216 Licensee-conducted contests.

(25) Section 73.1217 Broadcast hoaxes.

(26) Section 73.1250 Broadcasting emergency information.

(27) Section 73.1300 Unattended station operation.

(28) Section 73.1400 Transmission system monitoring and control.

(29) Section 73.1520 Operation for tests and maintenance.

(30) Section 73.1540 Carrier frequency measurements.

(31) Section 73.1545 Carrier frequency departure tolerances.

(32) Section 73.1570 Modulation levels: AM, FM, and TV aural.

(33) Section 73.1580 Transmission system inspections.

(34) Section 73.1610 Equipment tests.

(35) Section 73.1620 Program tests.

(36) Section 73.1650 International agreements.

(37) Section 73.1660 Acceptability of broadcast transmitters.

(38) Section 73.1665 Main transmitters.

(39) Section 73.1692 Broadcast station construction near or installation on an AM broadcast tower.

(40) Section 73.1745 Unauthorized operation.

(41) Section 73.1750 Discontinuance of operation.

(42) Section 73.1920 Personal attacks.

(43) Section 73.1940 Legally qualified candidates for public office.

(44) Section 73.1941 Equal opportunities.

(45) Section 73.1943 Political file.

(46) Section 73.1944 Reasonable access.

(47) Section 73.3511 Applications required.

(48) Section 73.3512 Where to file; number of copies.

(69) Section 73.3589 Threats to file petitions to deny or informal objections.

(70) Section 73.3591 Grants without hearing.

(71) Section 73.3593 Designation for hearing.

(72) Section 73.3598 Period of construction.

(73) Section 73.3599 Forfeiture of construction permit.

(74) Section 73.3999 Enforcement of 18 U.S.C. 1464 (restrictions on the transmission of obscene and indecent material).

(c) Part 74—Experimental Radio, Auxiliary, Special Broadcast and Other Program Distributional Services.

(1) Section 74.1201 Definitions.

(2) Section 74.1203 Interference.

(3) Section 74.1206 Program originating FM booster station notifications.

(4) Section 74.1231 Purpose and permissible service.

(5) Section 74.1232 Eligibility and licensing requirements.

(6) Section 74.1290 Political programming rules applicable to program originating FM booster stations.

■ 3. Amend § 73.3526 by adding paragraph (a)(3) to read as follows:

§ 73.3526 Online public inspection file of commercial stations.

(a) * * *

(3) Every permittee or licensee of a program originating FM booster station, as defined in § 74.1201(f)(2) of this chapter, shall maintain in the political file of its primary station the records required in § 73.1943 of this part for each such program originating FM booster station.

* * * * *

■ 4. Amend § 73.3527 by adding paragraph (a)(3) to read as follows:

§ 73.3527 Online public inspection file of noncommercial educational stations.

(a) * * *

(3) Every permittee or licensee of a program originating FM booster station, as defined in § 74.1201(f)(2) of this chapter, in the noncommercial educational broadcast service shall maintain in the political file of its primary station the records required in § 73.1943 of this part for each such program originating FM booster station.

* * * * *

PART 74—EXPERIMENTAL RADIO, AUXILIARY, SPECIAL BROADCAST AND OTHER PROGRAM DISTRIBUTIONAL SERVICES

■ 5. The authority citation for part 74 continues to read as follows:

Authority: 47 U.S.C. 154, 302a, 303, 307, 309, 310, 325, 336, and 554.

■ 6. Amend § 74.1204 by

■ a. Removing the Note to paragraph (a)(4);

■ b. Adding paragraph (a)(5); and

■ c. Revising paragraphs (f) and (i).

The revisions and addition read as follows:

§ 74.1204 Protection of FM broadcast, FM Translator and LP100 stations.

(a) * * *

(5) For the purposes of determining overlap pursuant to this paragraph, LP100 stations, LPFM applications, and LPFM permits that have not yet been licensed must be considered as operating with the maximum permitted facilities. All LPFM TIS stations must be protected on the basis of a nondirectional antenna.

* * * * *

(f)(1) An application for an FM translator station will not be granted even though the proposed operation would not involve overlap of field strength contours with any other station, as set forth in paragraph (a) of this section, if grant of the authorization will result in interference to the reception of a regularly used, off-the-air signal of any authorized co-channel, first, second or third adjacent channel broadcast station, including previously authorized secondary service stations within the 45 dBμ field strength contour of the desired station.

(2) An application for an FM broadcast booster station will not be granted even though the proposed operation would not involve overlap of field strength contours with any other station, as set forth in paragraph (i) of this section, if grant of the authorization will result in interference to the reception of a regularly used, off-the-air signal of any authorized co-channel, first, second or third adjacent channel broadcast station, other than the booster's primary station, but including previously authorized secondary service stations within the 45 dBμ field strength contour of the desired station.

(3) Interference, with regard to either an FM translator station or an FM broadcast booster station application, is demonstrated by:

(i) The required minimum number of valid listener complaints as determined using Table 1 to § 74.1203(a)(3) of this part and defined in § 74.1201(k) of this part;

(ii) A map plotting the specific location of the alleged interference in relation to the complaining station's 45 dBμ contour;

(iii) A statement that the complaining station is operating within its licensed parameters;

(iv) A statement that the complaining station licensee has used commercially reasonable efforts to inform the relevant translator or booster licensee of the claimed interference and attempted private resolution; and

(v) U/D data demonstrating that at each listener location the undesired to desired signal strength exceeds −20 dB for co-channel situations, −6 dB for first-adjacent channel situations or 40 dB for second- or third-adjacent channel situations, calculated using the methodology set out in paragraph (b) of this section.

* * * * *

(i) FM broadcast booster stations shall be subject to the requirement that the signal of any first adjacent channel station must exceed the signal of the booster station by 6 dB at all points within the protected contour of any first adjacent channel station, except that in the case of FM stations on adjacent channels at spacings that do not meet the minimum distance separations specified in § 73.207 of this chapter, the signal of any first adjacent channel station must exceed the signal of the booster by 6 dB at any point within the predicted interference free contour of the adjacent channel station.

* * * * *

■ 7. Add § 74.1206 to read as follows:

§ 74.1206 Program originating FM booster station notifications.

(a) A program originating FM booster station must electronically file an FM Booster Program Origination Notification with the Commission in LMS, before commencing or after terminating the broadcast of booster-originated content subject to the provisions of § 74.1201(f)(2) of this part. Such a notification must be filed within 15 days before commencing origination, or within 30 days after terminating origination.

(b) Every FM Booster Program Origination Notification must include the following information in machine-readable format:

(1) The call sign and facility identification number of the program originating FM booster station;

(2) If applicable, the date on which the program originating FM booster station will commence or has terminated originating content;

(3) The name and telephone number of a technical representative the Commission or the public can contact in the event of interference;

(4) A certification that the program originating FM booster station complies with all Emergency Alert System (EAS) requirements in part 11 of this chapter;

(5) A certification that the program originating FM booster station will originate programming for no more than three minutes of each broadcast hour; and

(6) A certification that the program originating FM booster station has been properly synchronized to minimize interference to the primary station.

■ 8. Amend § 74.1231 by revising paragraph (j) and adding paragraph (k) to read as follows:

§ 74.1231 Purpose and permissible service.

* * * * *

(j) In the case of a superpowered FM broadcast station, authorized with facilities in excess of those specified by § 73.211 of this chapter, an FM booster station will only be authorized within the protected contour of the class of

station being rebroadcast as predicted based on the maximum facilities set forth in § 73.211 for the applicable class of FM broadcast station being rebroadcast.

(k) An FM broadcast booster station, as defined in § 74.1201(f)(1) or (f)(2) of this part, must suspend operations at any time its primary station is not operating. If a full-service FM broadcast station suspends operations, in addition to giving the notification specified in § 73.1740(a)(4) of this chapter, each FM broadcast booster station and program originating FM booster station must also file a notification under § 73.1740(a)(4) of this chapter that it has suspended operations.

■ 9. Amend § 74.1232 by revising the first sentence of paragraph (g), redesignating paragraph (h) as paragraph (i), and adding new paragraph (h). The revision and addition read as follows:

§ 74.1232 Eligibility and licensing requirements.

* * * * *

(g) No numerical limit is placed upon the number of FM booster stations which may be licensed to a single licensee. No more than twenty five (25) program originating FM booster stations may be licensed to a single full-service FM broadcast station. * * *

(h) A program originating FM booster station, when originating programming pursuant to the limits set forth in § 74.1201(f)(2) of this part, may not broadcast programming that is not permitted by its primary station's authorization (*e.g.,* a program originating FM booster station licensed to a noncommercial educational primary station may only originate programming consistent with § 73.503 of this chapter).

* * * * *

■ 10. Add § 74.1290 to read as follows:

§ 74.1290 Political programming rules applicable to program originating FM booster stations.

To the extent a program originating FM booster station originates programming different than that broadcast by its primary station, pursuant to the limits set forth in § 74.1201(f)(2) of this part, it shall comply with the requirements in §§ 73.1212 (Sponsorship identification), 73.1940 (Legally qualified candidates for public office), 73.1941 (Equal opportunities), 73.1942 (Candidate rates), 73.1943 (Political file), and 73.1944 (Reasonable access), of this chapter.

Federal Register
Vol. 89, No. 74
Tuesday, April 16, 2024

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

Farm Service Agency

[Docket ID: FSA–2024–0004]

Information Collection Request; Representation for CCC and FSA Loans and Authorization To File a Financing Statement

AGENCY: Commodity Credit Corporation and Farm Service Agency, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act requirement, the Commodity Credit Corporation (CCC) and the Farm Service Agency (FSA) are requesting comments from all interested individuals and organizations on an extension with revision of a currently approved information collection that supports CCC and FSA loan programs. The information collection is necessary to gather data regarding the applicant which is required on a financing statement, and to obtain the applicant's permission to file a financing statement prior to the execution of a security agreement.

DATES: We will consider comments we receive by June 17, 2024.

ADDRESSES: We invite you to submit comments on this notice. You may submit comments electronically through the Federal eRulemaking Portal: Go to *https://www.regulations.gov* and search for Docket ID FSA–2024–0004. Follow the online instructions for submitting comments. All comments received will be posted without change and will be publicly available on *https://www.regulations.gov.*

You may also send comments to the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

Comments will be available for inspection online at *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, contact Angela Pope by email at: *Angela.Pope@usda.gov.* Persons with disabilities who require alternative means for communication should contact the USDA Target Center at (202) 720–2600 (voice).

SUPPLEMENTARY INFORMATION:

Title: Representations for Commodity Credit Corporation or Farm Service Agency Loans and Authorization to File a Financing Statement and Related Documents.

OMB Control Number: 0560–0215.

Expiration Date of Approval: August 31, 2024.

Type of Request: Extension with a revision.

Abstract: The CCC and FSA are requesting comments from all interested individuals and organizations on an extension with revision of a currently approved information collection that supports CCC and FSA loan programs. We are requesting a 3-year extension for the collection.

Form CCC–10, ''Representations for Commodity Credit Corporation or Farm Service Agency Loans and Authorization to File a Financing Statement and Related Documents'' is necessary to:

(a) Gather or verify basic data, provided by a CCC or FSA loan applicant, that is required on a financing statement filed by CCC or FSA to perfect a security interest in collateral used to secure a loan; and

(b) Obtain applicant permission to file a financing statement prior to the execution of a security agreement.

The number of burden hours is being revised in this request. The number of burden hours decreased from 385 hours to 298 hours due to fewer producers who are new to FSA loan programs who had not previously provided applicable data and less time spent by producers who review the data on the form each time they apply for a FSA loan.

For the following estimated total annual burden on respondents, the formula used to calculate the total burden hours is the estimated average time per response multiplied by the estimated total annual of responses.

Estimated Annual Burden: The public reporting burden for this information collection is estimated to average 5 minutes per response (0.08 hours).

Respondents: Individual producers and farming entities.

Estimated Number of Respondents: 3,734.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Response: 3,734.

Estimated Average Time per response: 0.08 (average 5 minutes).

Estimated Total Annual Burden on Respondents: 298.

We are requesting comments on all aspects of this information collection to help us to:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Evaluate the quality, ability and clarity of the information technology; and

(4) Minimize the burden of the information collection on those who respond through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information.

All responses to this notice, including names and addresses when provided, will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

USDA Non-Discrimination Policy

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family or parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA

(not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Individuals who require alternative means of communication for program information (for example, braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or the USDA TARGET Center at (202) 720–2600 (voice and text telephone (TTY)) or dial 711 for Telecommunications Relay Service (both voice and text telephone users can initiate this call from any telephone). Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD–3027, found online at *https://www.usda.gov/oascr/how-to-file-aprogram-discrimination-complaint* and at any USDA office or write a letter addressed to USDA and provide in the letter all the information requested in the form. To request a copy of the complaint form, call (866) 632–9992. Submit your completed form or letter to USDA by: (1) mail to: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250–9410; (2) fax: (202) 690–7442; or (3) email: *program.intake@usda.gov.*

USDA is an equal opportunity provider, employer, and lender.

Zach Ducheneaux,

Administrator, Farm Service Agency, and Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3411–E2–P

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

[Docket No. FSIS–2024–0003]

Notice of Request To Renew an Approved Information Collection: Consumer Complaint Monitoring System

AGENCY: Food Safety and Inspection Service (FSIS), U.S. Department of Agriculture (USDA).

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 and Office of Management and Budget (OMB) regulations, FSIS is announcing its intention to renew an approved information collection regarding its Consumer Complaint Monitoring System (CCMS) web portal. There are no changes to the existing information collection. The approval for this information collection will expire on September 30, 2024.

DATES: Submit comments on or before June 17, 2024.

ADDRESSES: FSIS invites interested persons to submit comments on this **Federal Register** notice. Comments may be submitted by one of the following methods:

- *Federal eRulemaking Portal:* This website provides commenters the ability to type short comments directly into the comment field on the web page or to attach a file for lengthier comments. Go to *https://www.regulations.gov.* Follow the on-line instructions at that site for submitting comments.
- *Mail:* Send to Docket Clerk, U.S. Department of Agriculture, Food Safety and Inspection Service, 1400 Independence Avenue SW, Mailstop 3758, Washington, DC 20250–3700.
- *Hand- or courier-delivered submittals:* Deliver to 1400 Independence Avenue SW, Jamie L. Whitten Building, Room 350–E, Washington, DC 20250–3700.

Instructions: All items submitted by mail or electronic mail must include the Agency name and docket number FSIS–2024–0003. Comments received in response to this docket will be made available for public inspection and posted without change, including any personal information, to *https://www.regulations.gov.*

Docket: For access to background documents or comments received, call 202–720–5046 to schedule a time to visit the FSIS Docket Room at 1400 Independence Avenue SW, Washington, DC 20250–3700.

FOR FURTHER INFORMATION CONTACT: Gina Kouba, Office of Policy and Program Development, Food Safety and Inspection Service, USDA, 1400 Independence Avenue SW, Mailstop 3758, South Building, Washington, DC 20250–3700; 202–720–5046.

SUPPLEMENTARY INFORMATION:

Title: Consumer Complaint Monitoring System.

OMB Number: 0583–0133.

Type of Request: Renewal of an approved information collection.

Abstract: FSIS has been delegated the authority to exercise the functions of the Secretary (7 CFR 2.18, 2.53), as specified in the Federal Meat Inspection Act (FMIA) (21 U.S.C. 601, *et seq.*), the Poultry Products Inspection Act (PPIA) (21 U.S.C. 451, *et seq.*), and the Egg Products Inspection Act (EPIA) (21 U.S.C. 1031, *et seq.*). These statutes mandate that FSIS protect the public by verifying that meat, poultry, and egg products are safe, wholesome, unadulterated, and properly labeled.

FSIS is requesting renewal of an approved information collection regarding its Consumer Complaint Monitoring System (CCMS) web portal. There are no changes to the existing information collection. The approval for this information collection will expire on September 30, 2024.

FSIS tracks consumer complaints about meat, poultry, and egg products. Consumer complaints are usually filed when food makes a consumer sick, causes an allergic reaction, is not properly labeled (misbranded), or contains a foreign object. FSIS uses a web portal to allow consumers to electronically file a complaint with the Agency about a meat, poultry, or egg product. FSIS uses this information to look for trends that will enhance the Agency's food safety efforts.

FSIS has made the following estimates based upon an information collection assessment:

Estimate of burden: The public reporting burden for this collection of information is estimated to average 15 minutes per response.

Estimated annual number of respondents: The CCMS web portal will have approximately 3,000 respondents.

Estimated average number of responses per respondent: 1.

Estimated annual number of responses: 3,000.

Estimated Total Annual Burden on Respondents: The total annual burden time is estimated to be about 750 hours for respondents using the CCMS web portal.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record. Copies of this information collection assessment can be obtained from Gina Kouba, Office of Policy and Program Development, Food Safety and Inspection Service, USDA, 1400 Independence Avenue SW, Mailstop 3758, South Building, Washington, DC 20250–3700; 202–720–5046.

Comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of FSIS' functions, including whether the information will have practical utility; (b) the accuracy of FSIS' estimate of the burden of the proposed collection of information, including the validity of the method and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information, including through the use of appropriate automated, electronic, mechanical, or

other technological collection techniques, or other forms of information technology. Comments may be sent to both FSIS, at the addresses provided above, and the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Washington, DC 20253.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, FSIS will announce this **Federal Register** publication on-line through the FSIS web page located at: *https://www.fsis.usda.gov/federal-register.*

FSIS will also announce and provide a link to this **Federal Register** publication through the FSIS *Constituent Update,* which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, and other types of information that could affect or would be of interest to our constituents and stakeholders. The *Constituent Update* is available on the FSIS web page. Through the web page, FSIS can provide information to a much broader, more diverse audience. In addition, FSIS offers an email subscription service which provides automatic and customized access to selected food safety news and information. This service is available at: *https://www.fsis.usda.gov/subscribe.* Options range from recalls to export information, regulations, directives, and notices. Customers can add or delete subscriptions themselves and have the option to password protect their accounts.

USDA Non-Discrimination Statement

In accordance with Federal civil rights law and USDA civil rights regulations and policies, USDA, its Mission Areas, agencies, staff offices, employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Program information may be made available in languages other than English. Persons with disabilities who require alternative means of communication to obtain program information (*e.g.,* Braille, large print, audiotape, American Sign Language) should contact the responsible Mission Area, agency, or staff office; the USDA TARGET Center at (202) 720–2600 (voice and TTY); or the Federal Relay Service at (800) 877–8339.

To file a program discrimination complaint, a complainant should complete a Form AD–3027, *USDA Program Discrimination Complaint Form,* which can be obtained online at *https://www.usda.gov/forms/electronic-forms,* from any USDA office, by calling (866) 632–9992, or by writing a letter addressed to USDA. The letter must contain the complainant's name, address, telephone number, and a written description of the alleged discriminatory action in sufficient detail to inform the Assistant Secretary for Civil Rights (ASCR) about the nature and date of an alleged civil rights violation. The completed AD–3027 form or letter must be submitted to USDA by:

(1) *Mail:* U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250–9410;

(2) *Fax:* (833) 256–1665 or (202) 690–7442; or

(3) *Email: program.intake@usda.gov*.

USDA is an equal opportunity provider, employer, and lender.

Paul Kiecker,

Administrator.

BILLING CODE 3410–DM–P

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

[Docket No. FSIS–2024–0005]

Notice of Request To Renew an Approved Information Collection: Animal Disposition Reporting

AGENCY: Food Safety and Inspection Service (FSIS), U.S. Department of Agriculture (USDA).

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 and Office of Management and Budget (OMB) regulations, FSIS is announcing its intention to renew an approved information collection regarding requirements for animal disposition reporting in the Public Health Information System. There are no changes to the existing information collection. The approval for this information collection will expire on September 30, 2024.

DATES: Submit comments on or before June 17, 2024.

ADDRESSES: FSIS invites interested persons to submit comments on this **Federal Register** notice. Comments may be submitted by one of the following methods:

- *Federal eRulemaking Portal:* This website provides commenters the ability to type short comments directly into the comment field on the web page or to attach a file for lengthier comments. Go to *https://www.regulations.gov.* Follow the on-line instructions at that site for submitting comments.
- *Mail:* Send to Docket Clerk, U.S. Department of Agriculture, Food Safety and Inspection Service, 1400 Independence Avenue SW, Mailstop 3758, Washington, DC 20250–3700.
- *Hand- or courier-delivered submittals:* Deliver to 1400 Independence Avenue SW, Jamie L. Whitten Building, Room 350–E, Washington, DC 20250–3700.

Instructions: All items submitted by mail or electronic mail must include the Agency name and docket number FSIS–2024–0005. Comments received in response to this docket will be made available for public inspection and posted without change, including any personal information, to *https://www.regulations.gov.*

Docket: For access to background documents or comments received, call 202–720–5046 to schedule a time to visit the FSIS Docket Room at 1400 Independence Avenue SW, Washington, DC 20250–3700.

FOR FURTHER INFORMATION CONTACT: Gina Kouba, Office of Policy and Program Development, Food Safety and Inspection Service, USDA, 1400 Independence Avenue SW, Mailstop 3758, South Building, Washington, DC 20250–3700; 202–720–5046.

SUPPLEMENTARY INFORMATION:

Title: Animal Disposition Reporting.

OMB Number: 0583–0139.

Type of Request: Renewal of an approved information collection.

Abstract: FSIS has been delegated the authority to exercise the functions of the Secretary (7 CFR 2.18, 2.53), as specified in the Federal Meat Inspection Act (FMIA) (21 U.S.C. 601, *et seq.*), and the Poultry Products Inspection Act (PPIA) (21 U.S.C. 451, *et seq.*). These statutes mandate that FSIS protect the public by verifying that meat and poultry products are safe, wholesome, and properly labeled.

FSIS is requesting renewal of the approved information collection

regarding animal disposition reporting in the Public Health Information System. There are no changes to the existing information collection. The approval for this information collection will expire on September 30, 2024.

In accordance with 9 CFR 320.6, 381.180, 352.15, and 354.91, establishments that slaughter meat, poultry, exotic animals, and rabbits are required to maintain certain records regarding their business operations and to report this information to the Agency as required. Poultry slaughter establishments complete FSIS Form 6510–7 after each shift and submit it to the Agency. Swine slaughter establishments operating under NSIS submit their records under OMB approval number 0583–0171. Other slaughter establishments provide their business records to FSIS to report the necessary information for entry into PHIS.

FSIS uses this information to plan inspection activities, to develop sampling plans, to target establishments for testing, to develop the Agency budget, and to develop reports to Congress. FSIS also provides this data to other USDA agencies, including the National Agricultural Statistics Service (NASS), the Animal and Plant Health Inspection Service (APHIS), and the Agricultural Marketing Service (AMS), for their publications and for other functions.

FSIS has made the following estimates as part of an information collection assessment:

Estimate of Burden: FSIS estimates that it will take slaughter establishments an average of two minutes per response to collect and submit this information to FSIS.

Respondents: Slaughter establishments.

Estimated Number of Respondents: 1,159.

Estimated Number of Annual Responses per Respondent: 600.

Estimated Total Annual Burden on Respondents: 23,180 hours.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record. Copies of this information collection assessment can be obtained from Gina Kouba, Office of Policy and Program Development, Food Safety and Inspection Service, USDA, 1400 Independence Avenue SW, Mailstop 3758, South Building, Washington, DC 20250–3700; 202–720–5046.

Comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of FSIS' functions, including whether the information will have practical utility; (b) the accuracy of FSIS' estimate of the burden of the proposed collection of information, including the validity of the method and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques, or other forms of information technology. Comments may be sent to both FSIS, at the addresses provided above, and the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Washington, DC 20253.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, FSIS will announce this **Federal Register** publication on-line through the FSIS web page located at: *https://www.fsis.usda.gov/federal-register.*

FSIS will also announce and provide a link to this **Federal Register** publication through the FSIS *Constituent Update,* which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, and other types of information that could affect or would be of interest to our constituents and stakeholders. The *Constituent Update* is available on the FSIS web page. Through the web page, FSIS can provide information to a much broader, more diverse audience. In addition, FSIS offers an email subscription service which provides automatic and customized access to selected food safety news and information. This service is available at: *https://www.fsis.usda.gov/subscribe.* Options range from recalls to export information, regulations, directives, and notices. Customers can add or delete subscriptions themselves and have the option to password protect their accounts.

USDA Non-Discrimination Statement

In accordance with Federal civil rights law and USDA civil rights regulations and policies, USDA, its Mission Areas, agencies, staff offices, employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Program information may be made available in languages other than English. Persons with disabilities who require alternative means of communication to obtain program information (*e.g.,* Braille, large print, audiotape, American Sign Language) should contact the responsible Mission Area, agency, or staff office; the USDA TARGET Center at (202) 720–2600 (voice and TTY); or the Federal Relay Service at (800) 877–8339.

To file a program discrimination complaint, a complainant should complete a Form AD–3027, *USDA Program Discrimination Complaint Form,* which can be obtained online at *https://www.usda.gov/forms/electronic-forms,* from any USDA office, by calling (866) 632–9992, or by writing a letter addressed to USDA. The letter must contain the complainant's name, address, telephone number, and a written description of the alleged discriminatory action in sufficient detail to inform the Assistant Secretary for Civil Rights (ASCR) about the nature and date of an alleged civil rights violation. The completed AD–3027 form or letter must be submitted to USDA by:

(1) *Mail:* U.S. Department of Agriculture Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250–9410;

(2) *Fax:* (833) 256–1665 or (202) 690–7442; or

(3) *Email: program.intake@usda.gov.*

USDA is an equal opportunity provider, employer, and lender.

Paul Kiecker,

Administrator.

BILLING CODE 3410–DM–P

DEPARTMENT OF AGRICULTURE

National Agricultural Statistics Service

Notice of Intent To Request Revision and Extension of a Currently Approved Information Collection

AGENCY: National Agricultural Statistics Service (NASS), USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this

notice announces the intention of the National Agricultural Statistics Service (NASS) to request revision and extension of a currently approved information collection, Cost of Pollination Survey. This survey gathers data related to the costs incurred by farmers to improve the pollination of their crops through the use of honey bees and other pollinators. A revision to burden hours will be needed due to changes in the size of the target population, sampling design, and/or questionnaire length.

DATES: Comments on this notice must be received by June 17, 2024 to be assured of consideration.

ADDRESSES: You may submit comments, identified by docket number 0535–0258, by any of the following methods:

- *Email: omb officer@nass.usda.gov.* Include docket number above in the subject line of the message.
- *eFax:* (855) 838–6382.
- *Mail:* Mail any paper, disk, or CD–ROM submissions to: Richard Hopper, NASS Clearance Officer, U.S. Department of Agriculture, Room 5336 South Building, 1400 Independence Avenue SW, Washington, DC 20250–2024.
- *Hand Delivery/Courier:* Hand deliver to: Richard Hopper, NASS Clearance Officer, U.S. Department of Agriculture, Room 5336 South Building, 1400 Independence Avenue SW, Washington, DC 20250–2024.

FOR FURTHER INFORMATION CONTACT: Joseph L. Parsons, Associate Administrator, National Agricultural Statistics Service, U.S. Department of Agriculture, (202) 720–4557. Copies of this information collection and related instructions can be obtained without charge from Richard Hopper, NASS—OMB Clearance Officer, at (202) 720–2206 or at *omb officer@nass.usda.gov.*

SUPPLEMENTARY INFORMATION:

Title: Cost of Pollination Survey.

OMB Control Number: 0535–0258.

Expiration Date of Approval: January 31, 2025.

Type of Request: Intent to Seek Approval to Revise and Extend an Information Collection for 3 years.

Abstract: The primary objective of the National Agricultural Statistics Service (NASS) is to prepare and issue state and national estimates of crop and livestock production, prices, and disposition; as well as economic statistics, environmental statistics related to agriculture, and to conduct the Census of Agriculture.

Pollinators (honey bees, bats, butterflies, hummingbirds, etc.) are vital to the agricultural industry for pollinating numerous food crops for the world's population. Concern for honey bee colony mortality has risen since the introduction of *Varroa* mites in the United States in the late 1980s and the appearance of Colony Collapse Disorder in the mid-2000s.

The 2018 Farm Bill (extended until September 2024) directs the implementation and coordination of USDA pollinator health research efforts as recommended by the Federal Pollinator Health Task Force (established in 2014 by Presidential Memorandum). The Task Force's plan involved conducting research and collecting data for the following categories: Status & Trends, Habitats, Nutrition, Pesticides, Native Plants, Collections, Genetics, Pathogens, Decision Tools, and Economics. The pollinators have been classified into Honey Bee, Native Bee, Wasp, Moth/Butterfly, Fly, and Vertebrate. The departments that conducted the bulk of the research were the Department of the Interior (DOI), the Environmental Protection Agency (EPA), the National Science Foundation (NSF), the Smithsonian Institute (SI), and the United States Department of Agriculture (USDA).

NASS was given the tasks of collecting economic data related to honey bees and quantifying the number of colonies that were lost or reduced. NASS is approved to conduct the annual Bee and Honey Inquiry (operations with five or more colonies) and the quarterly Colony Loss Survey (operations with five or more colonies) under OMB # 0535–0153.

NASS will collect economic data from crop farmers who rely on pollinators for their crops (fruits, nuts, vegetables, etc.). Data relating to the targeted crops are collected for the total number of acres that rely on honey bee pollination, the number of honey bee colonies that were used on those acres, and any cash fees associated with honey bee pollination. Crop Farmers are also asked if beekeepers who were hired to bring their bees to their farm were notified of pesticides used on the target acres, how many acres they were being hired to pollinate, and how much they were being paid to pollinate the targeted crops.

Authority: These data will be collected under the authority of 7 U.S.C. 2204(a). Individually identifiable data collected under this authority are governed by section 1770 of the Food Security Act of 1985 as amended, 7 U.S.C. 2276, which requires USDA to afford strict confidentiality to non-aggregated data provided by respondents. This Notice is submitted in accordance with the Paperwork Reduction Act of 1995 (Public Law 104–113) and the Office of Management and Budget regulations at 5 CFR part 1320.

All NASS employees and NASS contractors must also fully comply with all provisions of the Confidential Information Protection and Statistical Efficiency Act (CIPSEA) of 2018, title III of Public Law 115–435, codified in 44 U.S.C. ch. 35. CIPSEA supports NASS's pledge of confidentiality to all respondents and facilitates the agency's efforts to reduce burden by supporting statistical activities of collaborative agencies through designation of NASS agents, subject to the limitations and penalties described in CIPSEA. NASS uses the information only for statistical purposes and publishes only tabulated total data.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 15 minutes per response. Publicity materials and an instruction sheet for reporting via internet will account for 5 minutes of additional burden per respondent. Respondents who refuse to complete a survey will be allotted 2 minutes of burden per attempt to collect the data.

Respondents: Farmers.

Estimated Number of Respondents: 16,100.

Estimated Total Annual Burden on Respondents: 5,300 hours.

Comments: Comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, through the use of appropriate automated, electronic, mechanical, technological, or other forms of information technology collection methods. All responses to this notice will become a matter of public record and be summarized in the request for OMB approval.

Signed at Washington, DC, April 9, 2024.

Joseph L. Parsons,

Associate Administrator.

BILLING CODE 3410–20–P

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

[Docket No. ATBCB–2024–0002]

Agency Information Collection Activities; Submission of Renewed Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery for OMB Review

AGENCY: Architectural and Transportation Barriers Compliance Board.

ACTION: 30-Day notice

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (PRA), the Architectural and Transportation Barriers Compliance Board (Access Board) has submitted to the Office of Management and Budget (OMB) a request for renewal of its existing generic clearance to continue to collect qualitative feedback on agency services and programs.

DATES: Send comments on or before May 16, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review —Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Attorney Advisor Wendy Marshall, (202) 272–0043, *marshall@access-board.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Under the PRA and its implementing regulations (5 CFR part 1320), Federal agencies must obtain approval from OMB for each collection of information they conduct or sponsor (*e.g.,* contractually-required information collection by a third-party). ''Collection of information,'' within the meaning of the PRA, includes agency requests that pose identical questions to, or impose reporting or recording keeping obligations on, ten or more persons, regardless of whether response to such request is mandatory or voluntary. See 5 CFR 1320.3(c); see also 44 U.S.C. 3502(3). In February 2024, the Access Board published a 60-day notice concerning the proposed renewal of its existing generic clearance for the collection of qualitative feedback, which expires on May 31, 2024. (OMB Control No. 3014–0011) 89 FR 8401 (Feb. 7, 2024). We received no comments in response to this 60-day notice.

II. Overview of Requested Generic Clearance Renewal

The Access Board is providing notice that it has requested OMB renewal of our existing generic clearance for the collection of qualitative feedback with regard to agency program and services. OMB approval is requested for three years. To date, we have found the feedback garnered through qualitative customer satisfaction surveys (and similar information collections) to be beneficial, by providing useful insights in experiences, perceptions, opinions, and expectations regarding Access Board services or focusing attention on areas in need of improvement. We are seeking approval to continue our current efforts to solicit qualitative feedback from customers across our agency programs and services. Online surveys will be used unless the customer contacts the agency by phone for technical assistance or an individual otherwise expresses a preference for another survey format (*i.e.,* fillable form in portable document format or paper survey). In addition, paper surveys may be used to garner feedback from participants at in-person trainings or similar events. Provided below is an overview of the existing generic clearance for which the Access Board seeks renewal.

OMB Control Number: 3014–0011.

Title: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

Type of Request: Extension without change.

Abstract: The proposed information collection activity facilitates collection of qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Federal Government's commitment to improving service delivery. By qualitative feedback we mean information collections that provide useful insights on perceptions and opinions but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insight into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training, or changes in operations might improve delivery of services. These collections will allow for ongoing, collaborative, and actionable communications between the Access Board and its customers and stakeholders.

Respondents/Affected Public: Individuals and households; businesses and organizations; State, local or Tribal government.

Burden Estimates: In the table below (table 1), the Access Board provides estimates for the annual reporting burden under this proposed information collection. The Access Board does not anticipate incurring any capital or other direct costs associated with this information collection. Nor will there be any costs to respondents, other than their time.

TABLE 1—ESTIMATED ANNUAL BURDEN HOURS

Type of collection	Number of respondents	Frequency of response (per year)	Average response time (mins.)	Total burden (hours)
Customer feedback surveys	3,870	1	4	258

(Note: Total burden hours per collection rounded to the nearest full hour.)

Request for Comment: The Access Board seeks comment on any aspect of the proposed renewal of its existing generic clearance for the collection of qualitative feedback on agency service delivery, including (a) whether the proposed collection of information is necessary for the Access Board's performance; (b) the accuracy of the estimated burden; (c) ways for the Access Board to enhance the quality, utility, and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. Comments will be summarized and included in our request for OMB's

approval of renewal of our existing generic clearance.

Christopher Kuczynski,

General Counsel.

BILLING CODE 8150–01–P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[S–67–2024]

Foreign-Trade Zone 262; Application for Subzone; Hamilton Beach Brands, Inc.; Byhalia, Mississippi

An application has been submitted to the Foreign-Trade Zones (FTZ) Board by the Northern Mississippi FTZ, Inc., grantee of FTZ 262, requesting subzone status for the facility of Hamilton Beach Brands, Inc., located in Byhalia, Mississippi. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the FTZ Board (15 CFR part 400). It was formally docketed on April 11, 2024.

The proposed subzone (47.95 acres) is located at 647 East Stonewall Road in Byhalia, Mississippi. No authorization for production activity has been requested at this time. The proposed subzone would be subject to the existing activation limit of FTZ 262.

In accordance with the FTZ Board's regulations, Camille Evans of the FTZ Staff is designated examiner to review the application and make recommendations to the Executive Secretary.

Public comment is invited from interested parties. Submissions shall be addressed to the FTZ Board's Executive Secretary and sent to: *ftz@trade.gov.* The closing period for their receipt is May 28, 2024. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to June 10, 2024.

A copy of the application will be available for public inspection in the ''Online FTZ Information Section'' section of the FTZ Board's website, which is accessible via *www.trade.gov/ftz.*

For further information, contact Camille Evans at *Camille.Evans@trade.gov.*

Dated: April 11, 2024.

Elizabeth Whiteman,

Executive Secretary.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; SABIT Participant Application, Participant Surveys, Alumni Survey

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before June 17, 2024.

ADDRESSES: Interested persons are invited to submit written comments by mail to Tracy Rollins, POC, Director SABIT Program, International Trade Administration, 1401 Constitution Avenue NW, HCHB 12030, Washington, DC 20230, or by email to *tracy.rollins@trade.gov* or *PRA@trade.gov.* Please reference OMB Control Number 0625–0225 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Tracy Rollins, POC, Director SABIT Program, International Trade Administration, address: 1401 Constitution Avenue NW, HCHB 12030, Washington, DC 20230, telephone: (202) 482–0392, or by email: *tracy.rollins@trade.gov* .

SUPPLEMENTARY INFORMATION:

I. Abstract

The SABIT Program of the Department of Commerce's International Trade Administration (ITA), is a key element in the U.S. Government's efforts to support the economic transition of Eurasia (the former Soviet Union) and to support economic growth in other regions of the world, including countries in Europe, South Asia, and the Middle East, et al. SABIT develops and implements two-week training programs in the United States for groups of up to 20 business and government professionals from Eurasia and other regions. These professionals meet with U.S. government agencies, non-governmental organizations and private sector companies in order to learn about various business practices and principles. This unique private sector-U.S. Government partnership was created in order to tap into the U.S. private sector's expertise and to assist developing regions in their transition to market-based economies while simultaneously boosting trade between the United States and other countries. SABIT also develops and implements virtual events for its alumni and other participants that provide industry-specific training on best practices for business and management and fosters contacts with U.S. organizations. Participant applications are needed to enable SABIT to find the most qualified participants for the training programs. Participant pre-program surveys and post- program surveys provide insight as to what the participants have learned, and they are used to improve the content and administration of future programs. Such monitoring and evaluations is required by law (Foreign Aid and Transparency and Accountability Act of 2016). Alumni success story reports/surveys track the success of the program as regards to business ties between the U.S. and the countries SABIT covers. These alumni surveys also serve to provide evaluation information as required under the Foreign Aid and Transparency and Accountability Act of 2016).

The closing date for participant applications is based upon the starting date of the program and is published with the application and on the program's website at *www.trade.gov/sabit-program.* Pursuant to section 632(a) of the Foreign Assistance Act of 1961, as amended, funding for the programs will be provided through the Agency for International Development (AID).

The SABIT Program has revised the collection instruments. The instruments are very similar to those used by SABIT in past years. However, some wording has been changed to reflect the changing needs of SABIT over time. The changes are relatively minor and most of them are rephrasing of wording. Instructions for filling out the form, methods of submission, and the order of questions have been revised on the Participant Application. These revisions are not expected to increase the response time to complete the instruments. SABIT

only accepts Participant Applications, Pre- and Post-Program surveys, and Alumni Surveys electronically. This is a change from the last collection request.

II. Method of Collection

Participant applications are electronic and are found on *sabit.smapply.us* when available. Pre-program and Post-program surveys are provided electronically with a link to a Survey Monkey site. Alumni Surveys are also gathered via Survey Monkey electronic, web-based forms.

III. Data

OMB Control Number: 0625–0225.
Form Number(s): None.
Type of Review: Regular submission (revision of a currently approved information collection).
Affected Public: Individuals or households; Business or other for-profit organizations.
Estimated Number of Respondents: 3,500.
Estimated Time per Response: Participant application, 3 hours; participant pre-program survey, 1 hour; participant post-program survey, 1 hour; alumni survey, 1 hour.
Estimated Total Annual Burden Hours: 8,500.
Estimated Total Annual Cost to Public: $14,500.
Respondent's Obligation: Voluntary.
Legal Authority: Section 632(a) of the Foreign Assistance Act of 1961, as amended (the ''FAA''), and pursuant to the Department of State, Foreign Operations, and Related Programs Appropriations Act, 2018 (Div. K, P.L. 115–141); Foreign Aid and Transparency and Accountability Act of 2016.

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

International Trade Administration

[A–588–838]

Clad Steel Plate From Japan: Continuation of Antidumping Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: As a result of the determinations by the U.S. Department of Commerce (Commerce) and the U.S. International Trade Commission (ITC) that revocation of the antidumping duty (AD) order on clad steel plate from Japan would likely lead to the continuation or recurrence of dumping and material injury to an industry in the United States, Commerce is publishing a notice of continuation of this AD order.

DATES: Applicable April 10, 2024.

FOR FURTHER INFORMATION CONTACT: Gregory Taushani, AD/CVD Operations, Office II, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–1012.

SUPPLEMENTARY INFORMATION:

Background

On July 2, 1996, Commerce published in the **Federal Register** the AD order on clad steel plate from Japan.[1] On November 1, 2023, the ITC instituted,[2] and Commerce initiated,[3] the fifth sunset review of the *Order,* pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act). As a result of its review, Commerce determined that revocation of the *Order* would likely lead to the continuation or recurrence of dumping, and therefore, notified the ITC of the magnitude of the margins of dumping likely to prevail should the *Order* be revoked.[4]

On April 10, 2024, the ITC published its determination, pursuant to sections 751(c) and 752(a) of the Act, that revocation of the *Order* would likely lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.[5]

Scope of the Order

The scope of the order is all clad[6] steel plate of a width of 600 millimeters (mm) or more and a composite thickness of 4.5 mm or more. Clad steel plate is a rectangular finished steel mill product consisting of a layer of cladding material (usually stainless steel or nickel) which is metallurgically bonded to a base or backing of ferrous metal (usually carbon or low alloy steel) where the latter predominates by weight. Stainless clad steel plate is manufactured to American Society for Testing and Materials (ASTM) specifications A263 (400 series stainless types) and A264 (300 series stainless types).

Stainless clad steel plate is manufactured to American Society for Testing and Materials (ASTM) specifications A263 (400 series stainless types) and A264 (300 series stainless types). Nickel and nickel-base alloy clad steel plate is manufactured to ASTM specification A265. These specifications

[1] *See Notice of Antidumping Order: Clad Steel Plate from Japan,* 61 FR 34421 (July 2,1996) (*Order*).

[2] *See Clad Steel Plate from Japan; Institution of Five-Year Reviews,* 88 FR 75026 (November 1, 2023).

[3] *See Initiation of Five-Year (Sunset) Reviews,* 88 FR 74977 (November 1, 2023).

[4] *See Clad Steel Plate from Japan: Final Results of the Expedited Fifth Sunset Review of the Antidumping Duty Order,* 89 FR 15973 (March 6, 2024), and accompanying Issues and Decision Memorandum.

[5] *See Clad Steel Plate from Japan,* 89 FR 25281 (April 10, 2024) (*ITC Final Determination*).

[6] Cladding is the association of layers of metals of different colors or natures by molecular interpenetration of the surfaces in contact. This limited diffusion is characteristic of clad products and differentiates them from products metalized in other manners (*e.g.,* by normal electroplating). The various cladding processes include pouring molten cladding metal onto the basic metal followed by rolling; simple hot-rolling of the cladding metal to ensure efficient welding to the basic metal; any other method of deposition of superimposing of the cladding metal followed by any mechanical or thermal process to ensure welding (*e.g.,* electrocladding), in which the cladding metal (nickel, chromium, *etc.*) is applied to the basic metal by electroplating, molecular interpenetration of the surfaces in contact then being obtained by heat treatment at the appropriate temperature with subsequent cold rolling. *See* Harmonized Commodity Description and Coding System Explanatory Notes, Chapter 72, General Note (IV)(C)(2)(e).

are illustrative but not necessarily all-inclusive.

Clad steel plate within the scope of the order is classifiable under the Harmonized Tariff Schedule of the United States (HTSUS) 7210.90.10.00. Although the HTSUS subheading is provided for convenience and customs purposes, our written description of the scope of the order is dispositive.

Continuation of the Order

As a result of the determinations by Commerce and the ITC that revocation of the *Order* would likely lead to continuation or recurrence of dumping and material injury to an industry in the United States, pursuant to section 751(d)(2) of the Act, Commerce hereby orders the continuation of the *Order.* U.S. Customs and Border Protection will continue to collect AD cash deposits at the rates in effect at the time of entry for all imports of subject merchandise.

The effective date of the continuation of the *Order* will be April 10, 2024.[7] Pursuant to section 751(c)(2) of the Act and 19 CFR 351.218(c)(2), Commerce intends to initiate the next five-year reviews of the *Order* not later than 30 days prior to fifth anniversary of the date of the last determination by the ITC.

Administrative Protective Order (APO)

This notice also serves as a final reminder to parties subject to an APO of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

This five-year (sunset) review and this notice are in accordance with sections 751(c) and 751(d)(2) of the Act, and published in accordance with section 777(i) of the Act and 19 CFR 351.218(f)(4).

Dated: April 10, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

National Institute of Standards and Technology

National Artificial Intelligence Advisory Committee

AGENCY: National Institute of Standards and Technology, Department of Commerce.

ACTION: Notice of open meeting.

SUMMARY: The National Institute of Standards and Technology (NIST) announces that the National Artificial Intelligence Advisory Committee (NAIAC or Committee) will hold an open meeting in-person and virtually via web conference on May 2, 2024, from 10:00 a.m.–4:00 p.m. eastern time. The primary purpose of this meeting is for the Committee to report working group findings, identify actionable recommendations, and receive public briefings. The briefings are from outside subject matter experts to the full Committee from areas such as industry, nonprofit organizations, the scientific community, the defense and law enforcement communities, and other appropriate organizations. The final agenda will be posted on the NAIAC Upcoming Meeting Page on the NIST website at *https://www.nist.gov/itl/national-artificial-intelligence-advisory-committee-naiac.*

DATES: The NAIAC will meet on Thursday, May 2, 2024, from 10:00 a.m.–4:30 p.m. eastern time.

ADDRESSES: The meeting will be held in-person and virtually via web conference from the U.S. Department of Commerce, Herbert C. Hoover Federal Building, located at 1401 Constitution Ave., N.W, Washington, DC 20230. For instructions on how to attend and/or participate in the meeting, please see the **SUPPLEMENTARY INFORMATION** section of this notice.

FOR FURTHER INFORMATION CONTACT: Cheryl L. Gendron, Designated Federal Officer, Information Technology Laboratory, National Institute of Standards and Technology, Telephone: (301) 975–2785, email address: *cheryl.gendron@nist.gov.* Please direct any inquiries to the committee at *naiac@nist.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to the Federal Advisory Committee Act, as amended, 5 U.S.C. 1001 *et seq.,* notice is hereby given that the NAIAC will meet virtually as set forth in the **DATES** section of this notice. The meeting will be open to the public.

The NAIAC is authorized by section 5104 of the National Artificial Intelligence Initiative Act of 2020 (Pub. L. 116–283), in accordance with the provisions of the Federal Advisory Committee Act, as amended (FACA), 5 U.S.C. 1001 *et seq.* The Committee advises the President and the National Artificial Intelligence Initiative Office on matters related to the National Artificial Intelligence Initiative. Additional information on the NAIAC is available at *ai.gov/naiac/.*

The agenda items may change to accommodate NAIAC business. The final agenda will be posted on the NAIAC Upcoming Meeting Page on the NIST website at *https://www.nist.gov/itl/national-artificial-intelligence-advisory-committee-naiac.*

Comments: Individuals and representatives of organizations who would like to offer comments and suggestions related to items on the Committee's agenda for this meeting are invited to submit comments in advance of the conference. Approximately ten minutes will be reserved for public comments, as time allows, which will be heard on a first-come, first-served basis. Speakers maybe limited to two minutes each. Please note that all comments submitted via email will be treated as public documents and will be made available for public inspection. All comments must be submitted via email with the subject line ''May 2, 2024, NAIAC Public Meeting'' to *naiac@nist.gov* by 5 p.m. eastern time, April 30, 2024. NIST will not accept comments accompanied by a request that part or all of the comment be treated confidentially because of its business proprietary nature or for any other reason. Therefore, do not submit confidential business information or otherwise sensitive, protected, or personal information, such as account numbers, Social Security numbers, or names of other individuals.

Virtual Meeting Registration Instructions: The meeting will be broadcast via web conference. Registration is required to view the web conference. Instructions on how to register will be made available at *https://www.nist.gov/itl/national-artificial-intelligence-advisory-committee-naiac.* Registration will remain open until the conclusion of the meeting.

In-Person Admittance Instruction: Limited space is available on a first-come, first-served basis for anyone who wishes to attend in person. Registration is required for in-person attendance. Registration details will be posted on the NAIAC Upcoming Meeting Page on the NIST website at *https://www.nist.gov/itl/national-artificial-intelligence-advisory-committee-naiac.* Registration for in-person attendance

will close at 5 p.m. Eastern time on Tuesday, April 30, 2024, or if the space is full.

Alicia Chambers,

NIST Executive Secretariat.

BILLING CODE 3510–13–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; An Observer Program for At Sea Processing Vessels in the Pacific Coast Groundfish Fishery

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on January 31, 2024 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic & Atmospheric Administration (NOAA), Commerce.

Title: An Observer Program for At Sea Processing Vessels in the Pacific Coast Groundfish Fishery.

OMB Control Number: 0648–0500.

Form Number(s): None.

Type of Request: Regular submission (extension of a current information collection).

Number of Respondents: 268 (5 providers (supplying a total of 75 observers or catch monitors) and 263 fishing vessels).

Average Hours per Response: For providers: 15 minutes for observer training/briefing/debriefing registration, notification of observer physical examination, observer status reports, other reports on observer harassment, safety concerns, or performance problems, catch monitor status reports, and other catch monitor reports on harassment, prohibited actions, illness or injury, or performance problems; 5 minutes for observer safety checklist submission to NMFS, observer provider contracts, observer information materials, catch monitor provider contracts, and catch monitor informational materials; 10 minutes for certificate of insurance; 7 minutes for catch monitor training/briefing registration, notification of catch monitor physical examination, and catch monitor debriefing registration. For vessels: 10 minutes for fishing departure reports and cease-fishing reports.

Total Annual Burden Hours: 620 hours.

Needs and Uses: This is a request for extension of an approved information collection. In 2011, the National Marine Fisheries Service (NMFS) mandated observer requirements for the West Coast groundfish trawl catch shares program. For all fishery sectors, observers must be obtained through third-party observer provider companies operating under permits issued by NMFS. The regulations at §§ 660.140(h), 660.150(j), and 660.160(g), specify observer coverage requirements for trawl vessels and define the responsibilities for observer providers, including reporting requirements. Regulations at § 660.140(i) specify requirements for catch monitor coverage for first receivers. Data collected by observers are used by NMFS to estimate total landed catch and discards, monitor the attainment of annual groundfish allocations, estimate catch rates of prohibited species, and as a component in stock assessments. These data are necessary to comply with the Magnuson-Stevens Act requirements to prevent overfishing. In addition, observer data is used to assess fishing related mortality of protected and endangered species.

Affected Public: Business or other for-profit organizations.

Frequency: Reporting on occasion, weekly, or yearly.

Respondent's Obligation: Mandatory.

Legal Authority: The regulations at §§ 660.140(h), 660.150(j), and 660.160(g), specify observer coverage requirements for trawl vessels and define the responsibilities for observer providers, including reporting requirements. Regulations at § 660.140(i) specify requirements for catch monitor coverage for first receivers.

This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the collection or the OMB Control Number 0648–0500.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Southeast Region Dealer and Interview Family of Forms

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on January 24th, 2024 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic and Atmospheric Administration, Commerce.

Title: Southeast Region Dealer and Interview Family of Forms.

OMB Control Number: 0648–0013.

Form Number(s): NOAA Form 88–12B.

Type of Request: Regular submission [revision and renewal of a current information collection].

Number of Respondents: 1,829.

Average Hours per Response: Dealer reporting for monitoring Federal fishery annual catch limits (ACLs): coastal fisheries dealers reporting, 10 minutes; mackerel dealer reporting (gillnet), 10 minutes. Bio profile data from Trip Interview programs (TIP): Fin Fish interviews, 10 minutes.

Total Annual Burden Hours: 1,826.

Needs and Uses: This request is for a revision and renewal of a current information collection. Fishery quotas are established for many species in the fishery management plans developed by the Gulf of Mexico Reef Fish Fishery Management Council, the South Atlantic Fishery Management Council, and The Caribbean Fishery Management Council. The Southeast Fisheries Science Center has been delegated the responsibility to monitor these quotas. To do so in a timely manner, seafood dealers that handle these species are required to report the purchases (landings) of these species. It was discovered that the USVI trip interviews were being double counted with the Vessel trip interviews. We have made the changes to remove the USVI interviews for accuracy.

The frequency of these reporting requirements varies depending on the magnitude of the quota (*e.g.,* lower quota usually requires more frequent reporting) and the intensity of fishing effort. The most common reporting frequency is weekly. Daily reporting is only used for one fishery. In addition, information collection included in this family of forms includes interview with fishermen to gather information on the fishing effort, location and type of gear used on individual trips. This data collection is conducted for a subsample of the fishing trips and vessel/trips in selected commercial fisheries in the Southeast region and commercial fisheries of the US Caribbean. Fishing trips and individuals are selected at random to provide a viable statistical sample. These data are used for scientific analyses that support critical conservation and management decisions made by national and international fishery management organizations. This data collection is authorized under 50 CFR part 622.5.

Affected Public: Business and other for-profit organizations.

Frequency: Dealer reporting for monitoring Federal fishery annual catch limits (ACLs) are estimated to transmit data 173 times annually. Vessels selected for Trip Interview programs (TIP): Fin Fish interviews are estimated to be encountered 2.3 times annually.

Respondent's Obligation: Mandatory.

Legal Authority: 50 CFR part 622.5.

This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the collection or the OMB Control Number 0648–0013.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

BILLING CODE 3510–22–P

CONSUMER FINANCIAL PROTECTION BUREAU

Community Bank Advisory Council Meeting

AGENCY: Consumer Financial Protection Bureau.

ACTION: Notice of public meeting.

SUMMARY: Under the Federal Advisory Committee Act (FACA), this notice sets forth the announcement of a public meeting of the Community Bank Advisory Council (CBAC or Council) of the Consumer Financial Protection Bureau (CFPB or Bureau). The notice also describes the functions of the Council.

DATES: The meeting date is Tuesday, April 30, 2024, from approximately 1:00 p.m. to 3:30 p.m., eastern time. This meeting will be held virtually and is open to the general public. Members of the public will receive the agenda and dial-in information when they RSVP.

FOR FURTHER INFORMATION CONTACT: Kim George, Outreach and Engagement Associate, Advisory Board and Councils, External Affairs Division, at 202–450–8617, or email: *CFPB_CABandCouncilsEvents@cfpb.gov.* If you require this document in an alternative electronic format, please contact *CFPB_Accessibility@cfpb.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Section 2 of the CBAC charter provides that pursuant to the executive and administrative powers conferred on the CFPB by section 1012 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act), the Director of the CFPB renews the discretionary Community Bank Advisory Council under agency authority in accordance with the provisions of the Federal Advisory Committee Act (FACA), as amended, 5 U.S.C. 10.

Section 3 of the CBAC charter states that the purpose of the CBAC is to advise the CFPB in the exercise of its functions under the Federal consumer financial laws as they pertain to community banks with total assets of $10 billion or less.

II. Agenda

The CBAC will discuss broad policy matters related to the Bureau's Unified Regulatory Agenda and general scope of authority.

If you require any additional reasonable accommodation(s) in order to attend this event, please contact the Reasonable Accommodations team at *CFPB_ReasonableAccommodations@cfpb.gov,* 48 business hours prior to the start of this event.

Written comments will be accepted from interested members of the public and should be sent to *CFPB_CABandCouncilsEvents@cfpb.gov,* a minimum of seven (7) days in advance of the meeting. The comments will be provided to the CBAC members for consideration. Individuals who wish to join this meeting must RSVP via this link *https://surveys.consumerfinance.gov/jfe/form/SV_bvGIZiRMvYCFijs.*

III. Availability

The Council's agenda will be made available to the public on Monday, April 29, 2024, via *consumerfinance.gov.*

A recording and summary of this meeting will be available after the meeting on the Bureau's website *consumerfinance.gov.*

Jocelyn Sutton,

Deputy Chief of Staff, Consumer Financial Protection Bureau.

BILLING CODE 4810–AM–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Board of Regents, Uniformed Services University of the Health Sciences; Notice of Federal Advisory Committee Meeting

AGENCY: Under Secretary of Defense for Personnel and Readiness (USD(P&R)), Department of Defense (DoD).

ACTION: Notice of Federal advisory committee meeting.

SUMMARY: The DoD is publishing this notice to announce that the following Federal advisory committee meeting of the Board of Regents, Uniformed Services University of the Health Sciences (BoR USUHS) will take place.

DATES: Friday, May 17, 2024, open to the public from 7:30 a.m. to 11:30 a.m. (EDT).

ADDRESSES: Uniformed Services University of the Health Sciences, 4301 Jones Bridge Road, Everett Alvarez Jr. Board of Regents Room (D3001), Bethesda, MD 20814. The meeting will be held both in-person and virtually. To participate in the meeting, see the Meeting Accessibility section for instructions.

FOR FURTHER INFORMATION CONTACT: Annette Askins-Roberts, Designated Federal Officer (DFO), at (301) 295–3066 or *bor@usuhs.edu.* Mailing address is 4301 Jones Bridge Road, Bethesda, MD 20814. Website: *https://www.usuhs.edu/ao/board-of-regents.*

SUPPLEMENTARY INFORMATION: This meeting is being held under the provisions of chapter 10 of title 5, United States Code (U.S.C.) (commonly known as the ''Federal Advisory Committee Act'' or ''FACA''), 5 U.S.C. 552b (commonly known as the ''Government in the Sunshine Act''), and sections 102–3.140 and 102–3.150 of title 41, Code of Federal Regulations (CFR).

Purpose of the Meeting: The purpose of the meeting is to provide advice and recommendations to the Secretary of Defense, through the USD(P&R), on academic and administrative matters critical to the full accreditation and successful operation of Uniformed Services University (USU). These actions are necessary for USU to pursue its mission, which is to educate, train, and comprehensively prepare uniformed services health professionals, officers, scientists, and leaders to support the Military and Public Health Systems, the National Security and National Defense Strategies of the United States, and the readiness of our Uniformed Services.

Agenda: The schedule includes opening comments from the Chair; an update from the Assistant Secretary of Defense for Health Affairs; a report by the President of USU; an End of the Academic Year Summary; an update on the School of Medicine Admissions Process; an update on the USU Accreditation Policy and Middle States Commission on Higher Education; and a brief on the 5-Year National Disaster Medical Systems Pilot Program.

Meeting Accessibility: Pursuant to Federal statutes and regulations (5 U.S.C. Appendix, 5 U.S.C. 552b, and 41 CFR 102–3.140 through 102–3.165), the meeting will be held in-person and virtually and is open to the public from 7:30 a.m. to 11:30 a.m. Seating is on a first-come basis. Members of the public wishing to attend the meeting virtually should contact Ms. Angela Bee via email at *bor@usuhs.edu* no later than five business days prior to the meeting.

Written Statements: Pursuant to 5 U.S.C. 1009(a)(3) and 41 CFR 102–3.140, the public or interested organizations may submit written comments to the BoR USUHS about its approved agenda pertaining to this meeting or at any time regarding the BoR USUHS' mission. Individuals submitting a written statement must submit their statement to Ms. Askins-Roberts at the address noted in the **FOR FURTHER INFORMATION CONTACT** section. Written statements that do not pertain to a scheduled meeting of the BoR USUHS may be submitted at any time. If individual comments pertain to a specific topic being discussed at the planned meeting, then these statements must be received at least five calendar days prior to the meeting. Otherwise, the comments may not be provided to or considered by the Board until a later date. The DFO will compile all timely submissions with the BoR USUHS' Chair and ensure such submissions are provided to BoR USUHS members before the meeting.

Dated: April 11, 2024.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 2024–08057 Filed 4–15–24; 8:45 am]

BILLING CODE 6001–FR–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Meeting Notice—Military Justice Review Panel (MJRP)

AGENCY: Department of Defense (DoD).

ACTION: Notice of meeting.

SUMMARY: The DoD is publishing this notice to announce that the MJRP will host a meeting on April 23–24, 2024.

DATES: Tuesday, April 23, 2024—Open to the public from 9:30 a.m. to 11 a.m.; 11:15 a.m. to 12:45 p.m. and 1:45 p.m. to 3 p.m. Pacific Standard Time. Wednesday, April 24, 2024—MJRP administrative session.

ADDRESSES: This meeting will be held at Joint Base Lewis-McChord, Washington. The open sessions of the meeting can be accessed virtually. For those who would like to attend, please send registration information to *whs.pentagon.em.mbx.mjrp@mail.mil*, providing your name, email, organization (if applicable), and telephone number.

FOR FURTHER INFORMATION CONTACT: Mr. Pete L. Yob, 703–693–3857 (Voice), *louis.p.yob.civ@mail.mil* (Email). Mailing address is MJRP, One Liberty Center, 875 N. Randolph Street, Suite 150, Arlington, Virginia 22203. The most up-to-date changes to the meeting agenda can be found on the website: *https://mjrp.osd.mil.*

SUPPLEMENTARY INFORMATION: Pursuant to section 5521 of the National Defense Authorization Act (NDAA) for Fiscal Year (FY) 2017, as amended by section 531(k) of the FY 2018 NDAA, the Secretary of Defense established the MJRP to conduct independent periodic reviews and assessments of the operation of the Uniform Code of Military Justice (UCMJ). (10 United States Code section946. Art. 146 (effective Jan 1, 2019)).

Purpose of the Meeting: Pursuant to UCMJ, Article 146, the MJRP shall conduct independent periodic reviews and assessments of the operation of the UCMJ. This will be the tenth meeting held by the MJRP. On April 23, 2024, the MJRP will hold three open sessions. The first session will be composed of a panel of Commanding Officers from each of the Armed Services. After a break, the MJRP will hear from a panel of Senior Enlisted Advisors followed by a panel discussion with practitioners with military and civilian experience. On April 23, 2024, the MJRP will conduct a session for administrative matters.

Dated: April 8, 2024.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 6001–FR–P

DEPARTMENT OF EDUCATION

National Assessment Governing Board

Executive Committee Meeting

AGENCY: National Assessment Governing Board, Department of Education.

ACTION: Notice of open and closed meetings.

SUMMARY: This notice sets forth the agenda, time, and instructions to access the meeting of the National Assessment Governing Board's (hereafter referred to as Governing Board or Board) special meeting of the Executive Committee. This notice provides information about the meeting to members of the public who may be interested in attending the meetings and/or providing written comments related to the work of the Governing Board. The meeting will be held virtually as noted below. Members

of the public must register in advance to attend the meeting. A registration link will be posted on *www.nagb.gov* no later than two business days prior to the meeting.

DATES: The Executive Committee Meeting will be held on the following date:

- May 1, 2024, from 2 to 4 p.m., EDT

FOR FURTHER INFORMATION CONTACT: Angela Scott, Designated Federal Official (DFO) for the Governing Board, 800 North Capitol Street NW, Suite 825, Washington, DC 20002, telephone: (202) 357–7502, fax: (202) 357–6945, email: *Angela.Scott@ed.gov.*

SUPPLEMENTARY INFORMATION:

Statutory Authority and Function: The Governing Board is established under the National Assessment of Educational Progress Authorization Act, (20 U.S.C. 9621). Information on the Governing Board and its work can be found at *www.nagb.gov.* Notice of the meeting is required under section 1009(a)(2) of 5 U.S.C. chapter 10 (Federal Advisory Committees).

The Governing Board formulates policy for the National Assessment of Educational Progress (NAEP) administered by the National Center for Education Statistics (NCES). The Governing Board's responsibilities include:

(1) selecting the subject areas to be assessed; (2) developing appropriate student achievement levels; (3) developing assessment objectives and testing specifications that produce an assessment that is valid and reliable, and are based on relevant widely accepted professional standards; (4) developing a process for review of the assessment which includes the active participation of teachers, curriculum specialists, local school administrators, parents, and concerned members of the public; (5) designing the methodology of the assessment to ensure that assessment items are valid and reliable, in consultation with appropriate technical experts in measurement and assessment, content and subject matter, sampling, and other technical experts who engage in large scale surveys; (6) measuring student academic achievement in grades 4, 8, and 12 in the authorized academic subjects; (7) developing guidelines for reporting and disseminating results; (8) developing standards and procedures for regional and national comparisons; (9) taking appropriate actions needed to improve the form, content use, and reporting of results of an assessment; and (10) planning and executing the initial public release of NAEP reports.

Executive Committee Meeting

Wednesday, May 1, 2024

Executive Committee (Virtual)

2 p.m.–2:30 p.m. (EDT) Open Session
2:30 p.m.–4 p.m. (EDT) Closed Session

The Executive Committee will meet in open session on Wednesday, May 1, 2024, from 2 p.m. to 2:30 p.m. to review the agenda for the May 2024 Quarterly Board meeting, receive an update from the Governing Board's Executive Director and to discuss progress on the Strategic Vision refresh. The committee will meet in closed session from 2:30 to 4 p.m., to receive updates on the NAGB budget from the Governing Board's Executive Director and updates from National Center for Educational Statistics (NCES) Commissioner on the NAEP Cost Structure Review, contracting process and the NAEP Budget. The meeting will adjourn at 4 p.m. The briefing and discussion may impact current and future NAEP contracts and budgets and must be kept confidential to maintain the integrity of the Federal acquisition process. Public disclosure of this confidential information would significantly impede implementation of the NAEP assessment program if conducted in open session. Such matters are protected by exemption 9(B) of section 552b(c) of title 5 of the United States Code.

Instructions for Accessing and Attending the Meetings: Members of the public may attend the May 1, 2024, Executive Committee meeting virtually. A request for registration information should be sent to *nagb@ed.gov* no later than April 29. A link to the final meeting agenda and information on how to register for virtual attendance for the open sessions will be posted on the Governing Board's website at *www.nagb.gov* no later than two business days prior to the meeting. Registration is required to join the meeting virtually.

Public Comment: Written comments related to the work of the Governing Board and its standing committees may be submitted to the attention of the DFO no later than 10 business days prior to the meeting. Written comments may be submitted either via email to *Angela.Scott@ed.gov* in hard copy to the address listed above.

Access to Records of the Meeting: Pursuant to 5 U.S.C. 1009, the public may inspect the meeting materials at *www.nagb.gov,* which will be posted no later than five business days prior to each meeting. The public may also inspect the meeting materials and other Governing Board records at 800 North Capitol Street NW, Suite 825, Washington, DC 20002, by emailing *Angela.Scott@ed.gov* to schedule an appointment.

Reasonable Accommodations: The meeting location is accessible to individuals with disabilities. If you will need an auxiliary aid or service to participate in the meeting (*e.g.,* interpreting service, assistive listening device, or materials in an alternate format), notify the DFO listed in this notice no later than ten working days prior to each meeting date.

Electronic Access to this Document: The official version of this document is the document published in the **Federal Register**. Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: *www.gpo.gov/fdsys.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Adobe Portable Document Format (PDF). To use PDF, you must have Adobe Acrobat Reader, which is available free at the Adobe website. You may also access documents of the Department published in the **Federal Register** by using the article search feature at: *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Authority: Public Law 107–279, title III, section 301—National Assessment of Educational Progress Authorization Act (20 U.S.C. 9621).

Lesley Muldoon,

Executive Director, National Assessment Governing Board (NAGB), U.S. Department of Education.

[FR Doc. 2024–08015 Filed 4–15–24; 8:45 am]

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Arbitration Panel Decisions Under the Randolph-Sheppard Act

AGENCY: Office of Special Education and Rehabilitative Services, Department of Education.

ACTION: Notice.

SUMMARY: This notice lists arbitration panel decisions under the Randolph-Sheppard Act that the Department of Education (Department) has made publicly available in accessible electronic format during the first quarter of calendar year 2024. All decisions are available on the Department's website and by request.

FOR FURTHER INFORMATION CONTACT: James McCarthy, U.S. Department of

Education, 400 Maryland Avenue SW, Room 4A212, Washington, DC 20202–2800. Telephone: (202) 245–6458. Email: *james.mccarthy@ed.gov.*

If you are deaf, hard of hearing, or have a speech disability and wish to access telecommunications relay services, please dial 7–1–1.

SUPPLEMENTARY INFORMATION: For the purpose of providing individuals who are blind with remunerative employment, enlarging their economic opportunities, and stimulating greater efforts to make themselves self-supporting, the Randolph-Sheppard Act, 20 U.S.C. 107 *et seq.* (Act), authorizes individuals who are blind to operate vending facilities on Federal property and provides them with a priority for doing so. The vending facilities include, among other things, cafeterias, snack bars, and automatic vending machines. The Department administers the Act and designates an agency in each participating State—the State licensing agency (SLA)—to license individuals who are blind to operate vending facilities on Federal and other property in the State.

The Act provides for arbitration of disputes between SLAs and vendors who are blind and between SLAs and Federal agencies before three-person panels, convened by the Department, whose decisions constitute final agency action. 20 U.S.C. 107d–1. The Act also makes these decisions matters of public record and requires their publication in the **Federal Register**. 20 U.S.C. 107d–2(c).

The Department publishes lists of Randolph-Sheppard Act arbitration panel decisions in the **Federal Register**. The full texts of the decisions listed are available on the Department's website (see below) or by request (see 82 FR 41941 (Sept. 5, 2017)). Older, archived decisions are also added to the Department's website as they are digitized.

Throughout 2023 and the last quarter of 2022, the Department received eight new decisions issued by Randolph-Sheppard arbitration panels that were made publicly available during the first quarter of 2024. The following table lists these eight decisions from most recent to oldest based on their decision dates.

Case name	Docket No.	Date	State
Sparks v. *Business Enterprises of Texas, Texas Workforce Commission*	R–S/22–08	12/21/2023	Texas.
Conway v. *State of Illinois, Department of Human Services, Business Enterprise Program For The Blind.*	R–S/22–05	12/11/2023	Illinois.
Mitchell v. *Louisiana Workforce Commission*	R–S/22–07	12/7/2023	Louisiana.
Mahler v. *Texas Workforce Commission*	R–S/22–09	10/13/2023	Texas.
Kean v. *South Carolina Commission For The Blind*	R–S/18–02	10/11/2023	South Carolina.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

President's Advisory Commission on Advancing Educational Equity, Excellence, and Economic Opportunity for Hispanics

AGENCY: President's Advisory Commission on Advancing Educational Equity, Excellence, and Economic Opportunity for Hispanics, U.S. Department of Education.

ACTION: Announcement of an open meeting.

SUMMARY: This notice sets forth the agenda for the May 3, 2024, meeting of the President's Advisory Commission on Advancing Educational Equity, Excellence, and Economic Opportunity for Hispanics (Commission), and how members of the public may attend the meeting and submit written comments pertaining to the work of the Commission.

DATES: The meeting of the Commission will be held on Friday, May 3, 2024, from 9 a.m. to 3 p.m. eastern daylight time.

ADDRESSES: Eisenhower Executive Office Building, 1650 Pennsylvania Avenue, Washington, DC 20504. Members of the public can attend virtually.

FOR FURTHER INFORMATION CONTACT: Emmanuel Caudillo, Designated Federal Official, President's Advisory Commission on Advancing Educational Equity, Excellence, and Economic Opportunity for Hispanics, U.S. Department of Education, 400 Maryland Avenue SW, Room 7E220, Washington, DC 20202, telephone: (202) 377–4988, or email: *Emmanuel.Caudillo@ed.gov.*

SUPPLEMENTARY INFORMATION:

The Commission's Statutory Authority and Function: The Commission is established by Executive Order 14045 (September 13, 2021) and continued by Executive Order 14109 (September 29, 2023). The Commission is also governed by the provisions of 5 U.S.C. chapter 10 (Federal Advisory Committees), which sets forth standards for the formation and use of advisory committees. The Commission's duties are to advise the President, through the Secretary of Education, on matters pertaining to educational equity and economic opportunity for the Hispanic and Latino community in the following areas: (i) what is needed for the development, implementation, and coordination of educational programs and initiatives at the U.S. Department of Education (Department) and other agencies to improve educational opportunities and outcomes for Hispanics and Latinos; (ii) how to promote career pathways for in-demand jobs for Hispanic and Latino students, including registered apprenticeships, internships, fellowships, mentorships, and work-based learning initiatives; (iii) ways to strengthen the capacity of institutions, such as Hispanic-serving Institutions, to equitably serve Hispanic and Latino students and increase the participation of Hispanic and Latino students, Hispanic-serving school districts, and the Hispanic community in the programs of the Department and other agencies; (iv) how to increase public awareness of and generate solutions for the educational and training challenges and equity disparities that Hispanic and Latino students face and the causes of these challenges; and (v) approaches to establish local and national partnerships with public, private, philanthropic, and nonprofit stakeholders to advance the mission and objectives of this order, consistent with applicable law. Notice of this meeting is required by section 1009(a)(2) of 5 U.S.C. chapter 10 (Federal Advisory Committees).

Meeting Agenda: The agenda for the Commission meeting builds upon conversations and information shared in the Commission's five prior meetings and continues their engagement on advancing educational equity and economic opportunity for Hispanics. Specifically, during the meeting, the Commission will (1) receive updates and vote on recommendations from the Commission's four subcommittees: Advancing PreK–12 Educational Equity; Advancing Higher Education and Hispanic Serving Institutions (HSIs); Strengthening Economic Opportunity & Workforce Development; and Strengthening Public Partnerships and Public Awareness; (2) hear presentations from federal and community leaders on topics related to Executive Order 14045; and (3) and discuss strategies to advance the Commission's approved recommendations from prior meetings and next steps towards advancing duties of the Commission, as outlined by Executive Order 14045.

Access to the Meeting: Members of the public may register to attend the meeting virtually by accessing the link at *https://www.ed.gov/hispanicinitiative* or emailing *WhiteHouseHispanicInitiative@ed.gov* by 5 p.m. EDT on Thursday, May 2, 2024. Instructions on how to access the meeting will be emailed to members of the public that register to attend and will be posted to *https://www.ed.gov/hispanicinitiative* no later than Thursday, May 2, 2024, by 6 p.m. EDT.

Public Comment: Written comments pertaining to the work of the Commission may be submitted electronically to *WhiteHouseHispanicInitiative@ed.gov* by 5 p.m. EDT on Thursday, May 2, 2024. Include in the subject line: ''Written Comments: Public Comment.'' The email must include the name(s), title, organizations/affiliation, mailing address, email address, and telephone number of the person(s) making the comment. Comments should be submitted as a Microsoft Word document or in a medium compatible with Microsoft Word (not a PDF file) that is attached to the electronic mail message (email) or is provided in the body of an email message. Please do not send material directly to members of the Commission.

Reasonable Accommodations: The meeting platform and access code are accessible to individuals with disabilities. If you will need an auxiliary aid or service for the meeting (*e.g.,* interpreting service, assistive listening device, or materials in an alternate format), notify the contact person listed in this notice at least one week before the meeting date. Although we will attempt to meet a request received after that date, we may not be able to make available the requested auxiliary aid or service because of insufficient time to arrange it.

Access to Records of the Meeting: The Department will post the official report of the meeting on the Commission's website, at *https://sites.ed.gov/hispanic-initiative/presidential-advisory-commission* no later than 90 days after the meeting. Pursuant to 5 U.S.C. 1009(b), the public may request to inspect records of the meeting, and other Commission records, at 400 Maryland Avenue SW, Washington, DC, by emailing *Emmanuel.Caudillo@ed.gov* or by calling (202) 377–4988, to schedule an appointment.

Electronic Access to this Document: The official version of this document is the document published in the **Federal Register**. Free internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: *www.gpo.gov/fdsys.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or PDF. To use PDF, you must have Adobe Acrobat Reader, which is available free at the site. You also may access documents of the Department published in the **Federal Register** by using the article search feature at: *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Authority: Executive Order 14045 (September 13, 2021) and continued by Executive Order 14109 (September 29, 2023).

Alexis Barrett,

Chief of Staff, Office of the Secretary.

[FR Doc. 2024–08036 Filed 4–15–24; 8:45 am]

BILLING CODE P

DEPARTMENT OF ENERGY

Energy Information Administration

Agency Information Collection Proposed Extension

AGENCY: U.S. Energy Information Administration (EIA), Department of Energy (DOE).

ACTION: Notice.

SUMMARY: EIA invites public comment on the proposed three-year extension, with changes, to the Natural Gas Data Collection Program, OMB Control Number 1905–0175, as required under the Paperwork Reduction Act of 1995. The surveys covered by this request include; Form EIA–176, *Annual Report of Natural and Supplemental Gas Supply and Disposition;* Form EIA–191, *Monthly Underground Natural Gas Storage Report;* Form EIA–191L, *Monthly Liquefied Natural Gas Storage Report;* Form EIA–757, *Natural Gas Processing Plant Survey;* Form EIA–857, *Monthly Report of Natural Gas Purchases and Deliveries to Consumers;* Form EIA–910, *Monthly Natural Gas Marketer Survey;* and Form EIA–912, *Weekly Natural Gas Storage Report.* The

Natural Gas Data Collection Program provides information on natural gas storage, supply, processing, distribution, consumption, and prices, by sector, within the United States.

DATES: EIA must receive all comments on this proposed information collection no later than May 16, 2024. If you anticipate any difficulties in submitting your comments by the deadline, contact the email address listed in the **ADDRESSES** section of this notice as soon as possible.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* You can find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: If you need additional information, contact Michael Kopalek, U.S. Energy Information Administration, by phone at (202) 586–4001 or by email at *Michael.Kopalek@eia.gov.* The forms and instructions are available on EIA's website at *www.eia.gov/survey/.*

SUPPLEMENTARY INFORMATION: This information collection request contains:

(1) *OMB No.:* 1905–0175;

(2) *Information Collection Request Title:* Natural Gas Data Collection Program.

(3) *Type of Request:* Three-year extension with changes.

(4) *Purpose:* The surveys included in the Natural Gas Data Collection Program collect information on natural gas storage, supply, processing, transmission, distribution, consumption by sector, and consumer prices. The data collected supports public policy analyses and produces estimates of the natural gas industry. The statistics generated from these surveys are published on EIA's website, *https://www.eia.gov,* and are used in various EIA information products, including the *Weekly Natural Gas Storage Report* (WNGSR), *Natural Gas Monthly* (NGM), *Natural Gas Annual* (NGA), *Monthly Energy Review* (MER), *Short-Term Energy Outlook* (STEO), and *Annual Energy Outlook* (AEO).

(4a) *Proposed Changes to Information Collection:*

Form EIA–176, Annual Report of Natural and Supplemental Gas Supply and Disposition

Form EIA–176 collects data on natural, synthetic, and supplemental gas supplies, their disposition, and certain revenues by state. EIA considers volumes of blended hydrogen to fall under the purview of current Form EIA–176, and as such will instruct respondents to report them on Line 6.0, ''Supplemental Gaseous Fuel Supplies,'' under the sub-header ''Other.'' During the previous collection package, EIA modified the survey instructions to include Renewable Natural Gas (RNG) producers who inject high-Btu RNG into an interstate pipeline, intra-state pipeline, or natural gas distribution company system. As such, EIA requests an increase in respondent count and burden to accommodate the addition of new respondents to the survey frame.

Form EIA–757, Natural Gas Processing Plant Survey

Form EIA–757 collects information on the capacity, status, and operations of natural gas processing plants, and monitors constraints to natural gas supplies during catastrophic events, such as hurricanes. Schedule A of Form EIA–757 collects baseline operating and capacity information from all respondents on a triennial basis or less frequently. Schedule B is used on an emergency standby basis and may be activated during natural disasters or other energy disruptions. Schedule B collects data from a sample of respondents in the affected areas.

EIA proposes to discontinue collection of Form EIA–757 Schedule A, and burden hours have been adjusted downward accordingly. EIA has investigated potential consolidation of the EIA–757 Schedule A survey with another, more frequent natural gas processing plant survey, the EIA–64A Survey (OMB number 1905–0057). As a result of this, EIA proposes that the EIA–64A Survey will absorb several key data items from the EIA–757 Schedule A Survey in order to reduce overall respondent burden and eliminate duplicative data collection efforts.

EIA–757 Schedule B is a standby survey to be used in instances of a natural disaster or incident resulting in widespread closures of natural gas processing plants. Since the agency has not used the survey at any point in the last six years, EIA is reducing the requested burden hours by 50% to allow its use once every three years, rather than twice every three years.

Form EIA–857, Monthly Report of Natural Gas Purchases and Deliveries to Consumers

Form EIA–857 collects monthly data on the volumes of natural gas delivered to consumers by end-use sector and by state, as well as certain associated revenues and heat content. EIA is increasing the requested burden to accommodate increased sample coverage, parallel to the increased scope of the EIA–176, the universe from which this survey's sample is drawn.

Form EIA–912, Weekly Natural Gas Storage Report

Form EIA–912 collects information on weekly inventories of natural gas in underground storage facilities. EIA is slightly decreasing the requested burden to more accurately reflect demonstrated sample sizes over the past six years.

Form EIA–191, Monthly Underground Natural Gas Storage Report

Form EIA–191 collects information on monthly inventories of natural gas in underground storage, as well as storage facility information. EIA is updating the instructions to clarify that respondent contact information collected in Part 1 of the survey form is not considered public information.

Form EIA–191L, Monthly Liquefied Natural Gas Storage Report

Form EIA–191L collects information on monthly inventories of liquefied natural gas (LNG) in aboveground storage, as well as LNG storage facility information. EIA is updating the instructions to clarify that respondent contact information collected in Part 1 of the survey form is not considered public information.

Form EIA–910, Monthly Natural Gas Marketer Survey Has No Changes

(5) *Annual Estimated Number of Respondents:* 3,045;

(6) *Annual Estimated Number of Total Responses:* 16,087;

(7) *Annual Estimated Number of Burden Hours:* 56,916;

(8) *Annual Estimated Reporting and Recordkeeping Cost Burden:* $5,188,463 (56,916 burden hours times $91.16 per hour.)

EIA estimates that respondents will have no additional costs associated with the surveys other than the burden hours and the maintenance of the information during the normal course of business.

Comments are invited on whether or not: (a) The proposed collection of information is necessary for the proper performance of agency functions, including whether the information will have a practical utility; (b) EIA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used, is accurate; (c) EIA can improve the quality, utility, and clarity of the information it will collect; and (d) EIA can minimize the burden of the collection of information on respondents, such as automated

collection techniques or other forms of information technology.

Statutory Authority: 15 U.S.C. 772(b) and 42 U.S.C. 7101 *et seq.*

Signed in Washington, DC, on April 11, 2024.

Samson A. Adeshiyan,

Director, Office of Statistical Methods and Research, U.S. Energy Information Administration.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 7189–000]

Green Lake Water Power Company; Notice of Authorization for Continued Project Operation

The license for the Green Lake Hydroelectric Project No. 7189 was issued for a period ending March 31, 2024.

Section 15(a)(1) of the FPA, 16 U.S.C. 808(a)(1), requires the Commission, at the expiration of a license term, to issue from year-to-year an annual license to the then licensee(s) under the terms and conditions of the prior license until a new license is issued, or the project is otherwise disposed of as provided in section 15 or any other applicable section of the FPA. If the project's prior license waived the applicability of section 15 of the FPA, then, based on section 9(b) of the Administrative Procedure Act, 5 U.S.C. 558(c), and as set forth at 18 CFR 16.21(a), if the licensee of such project has filed an application for a subsequent license, the licensee may continue to operate the project in accordance with the terms and conditions of the license after the minor or minor part license expires, until the Commission acts on its application. If the licensee of such a project has not filed an application for a subsequent license, then it may be required, pursuant to 18 CFR 16.21(b), to continue project operations until the Commission issues someone else a license for the project or otherwise orders disposition of the project.

If the project is subject to section 15 of the FPA, notice is hereby given that an annual license for Project No. 7189 is issued to Green Lake Water Power Company for a period effective April 1, 2024, through March 31, 2025, or until the issuance of a new license for the project or other disposition under the FPA, whichever comes first.

If issuance of a new license (or other disposition) does not take place on or before March 31, 2025, notice is hereby given that, pursuant to 18 CFR 16.18(c), an annual license under section 15(a)(1) of the FPA is renewed automatically without further order or notice by the Commission, unless the Commission orders otherwise.

If the project is not subject to section 15 of the FPA, notice is hereby given that Green Lake Water Power Company is authorized to continue operation of the Green Lake Hydroelectric Project under the terms and conditions of the prior license until the issuance of a subsequent license for the project or other disposition under the FPA, whichever comes first.

Dated: April 10, 2024.

[Docket No. IC24–8–000]

Commission Information Collection Activities (FERC–598) Comment Request; Extension

AGENCY: Federal Energy Regulatory Commission, DOE

ACTION: Notice of information collection and request for comments.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995 (PRA), the Federal Energy Regulatory Commission (Commission or FERC) is soliciting public comment on the currently approved information collection, FERC–598, Self-Certification for Entities Seeking Exempt Wholesale Generator Status or Foreign Utility Company Status, OMB Control Number 1902–0166, which will be submitted to the Office of Management and Budget (OMB) for review.

DATES: Comments on the collection of information are due May 16, 2024.

ADDRESSES: Send written comments on FERC–598 to OMB through *www.reginfo.gov/public/do/PRAMain.* Attention: Federal Energy Regulatory Commission Desk Officer. Please identify the OMB Control Number (1902–0166) in the subject line of your comments. Comments should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.*

Please submit copies of your comments to the Commission. You may submit copies of your comments (identified by Docket No. IC24–8–000) by one of the following methods. Electronic filing through *https://www.ferc.gov/ferc-online/overview* is preferred.

- *Electronic Filing:* Documents must be filed in acceptable native applications and print-to-PDF, but not in scanned or picture format.
- For those unable to file electronically, comments may be filed by U.S. Postal Service mail or by hand (including courier) delivery.

○ *Mail via U.S. Postal Service Only:* Addressed to: Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE, Washington, DC 20426.

○ *Hand (including courier) Delivery:* Deliver to: Federal Energy Regulatory Commission, Secretary of the Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

Instructions: OMB submissions must be formatted and filed in accordance with submission guidelines at *www.reginfo.gov/public/do/PRAMain.* Using the search function under the ''Currently Under Review'' field, select Federal Energy Regulatory Commission; click ''submit,'' and select ''comment'' to the right of the subject collection. FERC submissions must be formatted and filed in accordance with submission guidelines at *https://www.ferc.gov/ferc-online/overview.* For user assistance, contact FERC Online Support by email at *ferconlinesupport@ferc.gov,* or by phone at: (866) 208–3676 (toll-free).

Docket: Users interested in receiving automatic notification of activity in this docket or in viewing/downloading comments and issuances in this docket may do so at *https://www.ferc.gov/ferc-online/overview.*

FOR FURTHER INFORMATION CONTACT: Jean Sonneman may be reached by email at *DataClearance@FERC.gov,* or telephone at (202) 502–6362.

SUPPLEMENTARY INFORMATION:

Title: FERC–598, Self-Certification for Entities Seeking Exempt Wholesale Generator or Foreign Utility Company Status.

OMB Control No.: 1902–0166.

Type of Request: Three-year renewal of FERC–598.

Abstract: Under 42 U.S.C. 16452(a), public utility holding companies and their associates must maintain, and make available to the Commission, certain books, accounts, memoranda, and other records. The pertinent records are those that the Commission has determined: (1) are relevant to costs incurred by a public utility or natural gas company that is an associate company of such holding company; and (2) are necessary or appropriate for the protection of utility customers with respect to jurisdictional rates.

Public utility holding companies and their associates may seek exemption from this requirement. The pertinent statutory and regulatory provisions, 42 U.S.C. 16454 and 18 CFR 366.7, authorize such entities to file with the Commission a notice of self-certification demonstrating that they are ''exempt wholesale generators'' (EWGs) or ''foreign utility companies'' (FUCOs). If the Commission takes no action on a good-faith self-certification filing within 60 days after the date of filing, the applicant is exempt from the requirements of 42 U.S.C. 16452(a).

An EWG is defined as ''any person engaged directly, or indirectly through one or more affiliates . . . and exclusively in the business of owning or operating, or both owning and operating, all or part of one or more eligible facilities and selling electric energy at wholesale.'' [1] A FUCO is defined as ''any company that owns or operates facilities that are not located in any state and that are used for the generation, transmission, or distribution of electric energy for sale or the distribution at retail of natural or manufactured gas for heat, light, or power, if such company: (1) derives no part of its income, directly or indirectly, from the generation, transmission, or distribution of electric energy for sale or the distribution at retail of natural or manufactured gas for heat, light, or power, within the United States; and (2) [n]either the company nor any of its subsidiary companies is a public-utility

[1] 18 CFR 366.1.

company operating in the United States.'' [2]

In the case of EWGs, the person filing a notice of self-certification must also file a copy of the notice of self-certification with the state regulatory authority of the state in which the facility is located. In addition, that person must represent to the Commission in its submission that it has filed a copy of the notice with the appropriate state regulatory authority.[3]

Type of Respondents: EWGs and FUCOs.

Estimate of Annual Burden: [4] The Commission estimates the total annual burden and cost [5] for this information collection as follows.

FERC–598

[Self-certification for entities seeking exempt wholesale generator status or foreign utility company status]

A. Number of respondents (EWGs and FUCOs)	B. Annual number of responses per respondent	C. Total number of responses (Column A × Column B)	D. Average burden hrs. & cost ($) per response	E. Total annual burden hours & total annual cost (Column C × Column D)	F. Average Cost per respondent ($) (Column E ÷ Column 1)
300	1	300	6 hrs.; $600	1,800 hrs.; $180,000	$600

Comments: Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: April 10, 2024.

Debbie-Anne Reese,

Acting Secretary.

[Docket No. CP24–80–000]

Mississippi Hub, LLC; Notice of Scoping Period Requesting Comments on Environmental Issues for the Proposed MS Hub Capacity Expansion Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental document that will discuss the environmental impacts of the MS Hub Capacity Expansion Project involving construction and operation of facilities by Mississippi Hub, LLC (MS Hub) in Simpson, Covington, and Jefferson Davis Counties, Mississippi. The Commission will use this environmental document in its decision-making process to determine whether the project is in the public convenience and necessity.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies regarding the project. As part of the National Environmental Policy Act (NEPA) review process, the Commission takes into account concerns the public may have about proposals and the environmental impacts that could result from its action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. This gathering of public input is referred to as ''scoping.'' The main goal of the scoping process is to focus the analysis in the environmental document on the important environmental issues. Additional information about the Commission's NEPA process is described below in the *NEPA Process and Environmental Document* section of this notice.

By this notice, the Commission requests public comments on the scope of issues to address in the environmental document. To ensure that your comments are timely and properly recorded, please submit your comments so that the Commission receives them in Washington, DC on or before 5:00 p.m. Eastern Time on May 10, 2024. Comments may be submitted in written form. Further details on how to submit comments are provided in the *Public Participation* section of this notice.

Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. Your input will help the Commission staff determine what issues it needs to evaluate in the environmental document. Commission staff will consider all written comments during the preparation of the environmental document.

If you submitted comments on this project to the Commission before the opening of this docket on March 5, 2024, you will need to file those comments in Docket No. CP24–80–000 to ensure they are considered as part of this proceeding.

This notice is being sent to the Commission's current environmental mailing list for this project. State and local government representatives should notify their constituents of this proposed project and encourage them to comment on their areas of concern.

If you are a landowner receiving this notice, a pipeline company representative may contact you about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The company would seek to negotiate a mutually acceptable easement agreement. You are not required to enter into an agreement. However, if the Commission approves the project, the Natural Gas Act conveys the right of eminent domain to the company. Therefore, if you and the company do not reach an easement agreement, the pipeline company could initiate condemnation proceedings in court. In such instances, compensation would be determined by a judge in accordance with state law. The Commission does not subsequently grant, exercise, or oversee the exercise of that eminent domain authority. The

[2] *Id.*

[3] 18 CFR 366.7(a).

[4] ''Burden'' is the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, refer to 5 CFR 1320.3.

[5] The Commission staff thinks that the average respondent for this collection is similarly situated to the Commission, in terms of salary plus benefits. Based upon FERC's FY 2024 annual full-time equivalent average of $207,786 (for salary plus benefits), the average hourly cost is $100 per hour.

courts have exclusive authority to handle eminent domain cases; the Commission has no jurisdiction over these matters.

MS Hub provided landowners with a fact sheet prepared by the FERC entitled ''An Interstate Natural Gas Facility On My Land? What Do I Need To Know?'' which addresses typically asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. This fact sheet along with other landowner topics of interest are available for viewing on the FERC website (*www.ferc.gov*) under the Natural Gas, Landowner Topics link.

Public Participation

There are three methods you can use to submit your comments to the Commission. Please carefully follow these instructions so that your comments are properly recorded. The Commission encourages electronic filing of comments and has staff available to assist you at (866) 208–3676 or *FercOnlineSupport@ferc.gov.*

(1) You can file your comments electronically using the eComment feature, which is located on the Commission's website (*www.ferc.gov*) under the link to FERC Online. Using eComment is an easy method for submitting brief, text-only comments on a project;

(2) You can file your comments electronically by using the eFiling feature, which is located on the Commission's website (*www.ferc.gov*) under the link to FERC Online. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on ''eRegister.'' You will be asked to select the type of filing you are making; a comment on a particular project is considered a ''Comment on a Filing''; or

(3) You can file a paper copy of your comments by mailing them to the Commission. Be sure to reference the project docket number (CP24–80–000) on your letter. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

Additionally, the Commission offers a free service called eSubscription which makes it easy to stay informed of all issuances and submittals regarding the dockets/projects to which you subscribe. These instant email notifications are the fastest way to receive notification and provide a link to the document files which can reduce the amount of time you spend researching proceedings. Go to *https://www.ferc.gov/ferc-online/overview* to register for eSubscription.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members, and others access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202)502–6595 or *OPP@ferc.gov.*

Summary of the Proposed Project

In Simpson County, MS Hub would make the following modifications to its existing MS Hub Storage Facility:

- increase the certificated capacity of Gas Storage Caverns No. 1 and No. 2 by a total of 3.87 billion cubic feet (Bcf);
- construct three new gas storage caverns Nos. 4, 5, and 6 totaling approximately 33.9 Bcf of working gas capacity;
- construct three electric motor-driven compressor units each rated at 7,000 horsepower (hp) and two Caterpillar model G3616 A4 reciprocating internal combustion engine natural gas-fired compressor units each rated at 5,500 hp, and dehydration and ancillary equipment at the existing Gas Handling Facility; and
- expand the existing Leaching Facility for the solution mining of each cavern by installing additional pumps, water tanks and separators.

Also in Simpson County, MS Hub would construct:

- one meter skid and one filter separator on the existing Southern Natural Gas (''SONAT'') Meter Station site;
- four raw water wells Nos. 6 through 9;
- one new saltwater disposal well No. 9; and
- two saltwater disposal wells Nos. 5 and 7 collocated at the existing raw water well No. 3 and saltwater disposal well No. 3 wellpad.

In Covington County, MS Hub would construct:

- two meter skids, two flow control skids, and one filter separator on the existing Transcontinental Gas Pipeline (''Transco'') Meter Station site;
- one meter skid and one filter separator on the existing Southeast Supply Header (''SESH'') Meter Station site; and
- one booster compressor station (''MS Hub Booster Station'') and associated equipment at the site of the existing Transco Meter Station consisting of three Solar Mars model 100–16000S natural gas-fired turbine compression units each rated at 13,486 hp.

In Jefferson Davis County, MS Hub would construct:

- two saltwater disposal wells Nos. 6 and 8 at the existing raw water well No. 4 and saltwater disposal well No. 4 wellpad.

As the MS Hub Facility is currently operational, the facilities contemplated by the project would be added to complement the current infrastructure. Upon completion, the project would add up to 0.7 Bcf per day of injection capacity, and up to 1.0 Bcf per day of delivery capacity, but would not increase MS Hub's maximum certificated capacity withdrawal and injection levels. With the additional injection and delivery capacity, the MS Hub Storage Facility would be capable of providing additional high-turn services to the Gulf Coast and Southeast market areas.

The general location of the project facilities is shown in appendix 1.[1]

Land Requirements for Construction

Construction of the project facilities would disturb about 108.3 acres. Following construction, MS Hub would maintain about 75.6 acres for permanent operation of the project's facilities; the remaining acreage would be restored and revert to former uses.

NEPA Process and the Environmental Document

Any environmental document issued by the Commission will discuss impacts that could occur as a result of the construction and operation of the proposed project under the relevant general resource areas:

- geology and soils;
- water resources and wetlands;
- vegetation and wildlife;
- threatened and endangered species;
- cultural resources;
- land use;
- socioeconomics;

[1] The appendices referenced in this notice will not appear in the **Federal Register**. Copies of the appendices were sent to all those receiving this notice in the mail and are available at *www.ferc.gov* using the link called ''eLibrary.'' For instructions on connecting to eLibrary, refer to the last page of this notice. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll free, (886) 208–3676 or TTY (202) 502–8659.

- environmental justice;
- air quality and noise; and
- reliability and safety.

Commission staff will also evaluate reasonable alternatives to the proposed project or portions of the project and make recommendations on how to lessen or avoid impacts on the various resource areas. Your comments will help Commission staff identify and focus on the issues that might have an effect on the human environment and potentially eliminate others from further study and discussion in the environmental document.

Following this scoping period, Commission staff will determine whether to prepare an Environmental Assessment (EA) or an Environmental Impact Statement (EIS). The EA or the EIS will present Commission staff's independent analysis of the issues. If Commission staff prepares an EA, a *Notice of Schedule for the Preparation of an Environmental Assessment* will be issued. The EA may be issued for an allotted public comment period. The Commission would consider timely comments on the EA before making its decision regarding the proposed project. If Commission staff prepares an EIS, a *Notice of Intent to Prepare an EIS/ Notice of Schedule* will be issued, which will open up an additional comment period. Staff will then prepare a draft EIS which will be issued for public comment. Commission staff will consider all timely comments received during the comment period on the draft EIS and revise the document, as necessary, before issuing a final EIS. Any EA or draft and final EIS will be available in electronic format in the public record through eLibrary [2] and the Commission's natural gas environmental documents web page (*https://www.ferc.gov/industries-data/natural-gas/environment/environmental-documents*). If eSubscribed, you will receive instant email notification when the environmental document is issued.

With this notice, the Commission is asking agencies with jurisdiction by law and/or special expertise with respect to the environmental issues of this project to formally cooperate in the preparation of the environmental document.[3] Agencies that would like to request cooperating agency status should follow the instructions for filing comments provided under the *Public Participation* section of this notice.

Consultation Under Section 106 of the National Historic Preservation Act

In accordance with the Advisory Council on Historic Preservation's implementing regulations for section 106 of the National Historic Preservation Act, the Commission is using this notice to initiate consultation with the applicable State Historic Preservation Office(s), and to solicit their views and those of other government agencies, interested Indian tribes, and the public on the project's potential effects on historic properties.[4] The environmental document for this project will document findings on the impacts on historic properties and summarize the status of consultations under section 106.

Environmental Mailing List

The environmental mailing list includes federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American Tribes; other interested parties; and local libraries and newspapers. This list also includes all affected landowners (as defined in the Commission's regulations) who are potential right-of-way grantors, whose property may be used temporarily for project purposes, or who own homes within certain distances of aboveground facilities, and anyone who submits comments on the project and includes a mailing address with their comments. Commission staff will update the environmental mailing list as the analysis proceeds to ensure that Commission notices related to this environmental review are sent to all individuals, organizations, and government entities interested in and/or potentially affected by the proposed project.

If you need to make changes to your name/address, or if you would like to remove your name from the mailing list, please complete one of the following steps:

(1) Send an email to *GasProjectAddressChange@ferc.gov* stating your request. You must include the docket number CP24–80–000 in your request. If you are requesting a change to your address, please be sure to include your name and the correct address. If you are requesting to delete your address from the mailing list, please include your name and address as it appeared on this notice. This email address is unable to accept comments.

OR

(2) Return the attached ''Mailing List Update Form'' (appendix 2).

Additional Information

Additional information about the project is available from the Commission's Office of External Affairs, at (866) 208–FERC, or on the FERC website at *www.ferc.gov* using the eLibrary link. Click on the eLibrary link, click on ''General Search'' and enter the docket number in the ''Docket Number'' field. Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at *FercOnlineSupport@ferc.gov* or (866) 208–3676, or for TTY, contact (202) 502–8659. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

Public sessions or site visits will be posted on the Commission's calendar located at *https://www.ferc.gov/news-events/events* along with other related information.

Dated: April 10, 2024.

Debbie-Anne A. Reese,

Acting Secretary.

Federal Energy Regulatory Commission

[Docket No. AC24–40–000]

Black Hills Shoshone Pipeline, LLC; Notice of Filing

Take notice that on April 5, 2024, Black Hills Shoshone Pipeline LLC, submitted a request for a two year waiver of the Federal Energy Regulatory Commission's (Commission) requirement to provide its certified public accountant (CPA) certification statement for the 2023 FERC Form No. 2–A on the basis of the calendar year ending December 31.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to

the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant. On or before the comment date, it is not necessary to serve motions to intervene or protests on persons other than the Applicant.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document.

The Commission strongly encourages electronic filings of comments, protests, and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* In lieu of electronic filing, you may submit a paper copy which must reference the Project docket number.

To file via USPS: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

To file via any other courier: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

Comment Date: 5:00 p.m. Eastern Time on May 10, 2024.

Dated: April 10, 2024.

Debbie-Anne A. Reese,

Acting Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2420–000]

PacifiCorp; Notice of Authorization for Continued Project Operation

The license for the Cutler Hydroelectric Project No. 2420 was issued for a period ending March 31, 2024.

Section 15(a)(1) of the FPA, 16 U.S.C. 808(a)(1), requires the Commission, at the expiration of a license term, to issue from year-to-year an annual license to the then licensee(s) under the terms and conditions of the prior license until a new license is issued, or the project is otherwise disposed of as provided in section 15 or any other applicable section of the FPA. If the project's prior license waived the applicability of section 15 of the FPA, then, based on section 9(b) of the Administrative Procedure Act, 5 U.S.C. 558(c), and as set forth at 18 CFR 16.21(a), if the licensee of such project has filed an application for a subsequent license, the licensee may continue to operate the project in accordance with the terms and conditions of the license after the minor or minor part license expires, until the Commission acts on its application. If the licensee of such a project has not filed an application for a subsequent license, then it may be required, pursuant to 18 CFR 16.21(b), to continue project operations until the Commission issues someone else a license for the project or otherwise orders disposition of the project.

If the project is subject to section 15 of the FPA, notice is hereby given that an annual license for Project No. 2420 is issued to PacifiCorp for a period effective April 1, 2024, through March 31, 2025, or until the issuance of a new license for the project or other disposition under the FPA, whichever comes first.

If issuance of a new license (or other disposition) does not take place on or before March 31, 2025, notice is hereby given that, pursuant to 18 CFR 16.18(c), an annual license under section 15(a)(1) of the FPA is renewed automatically without further order or notice by the Commission, unless the Commission orders otherwise.

If the project is not subject to section 15 of the FPA, notice is hereby given that PacifiCorp is authorized to continue operation of the Cutler Hydroelectric Project under the terms and conditions of the prior license until the issuance of a subsequent license for the project or other disposition under the FPA, whichever comes first.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–11843–01–R9]

Approval of Clean Air Act General Permit Request for Coverage for New Minor Source Gasoline Dispensing Facility in Indian Country Within California for Oak Creek Travel Center

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final action.

SUMMARY: This notice announces that the U.S. Environmental Protection Agency (EPA), Region 9 issued an approval to the Fort Independence Indian Community of Paiute Indians of the Fort Independence Indian Reservation (Fort Independence Indian Community) under the Clean Air Act's Tribal Minor New Source Review (NSR) Program. The EPA approved the Fort Independence Indian Community's Request for Coverage under the General Air Quality Permit for New or Modified Minor Source Gasoline Dispensing Facilities in Indian Country within California for the Oak Creek Travel Center. This approval authorizes the construction of the Oak Creek Travel Center under the Tribal Minor NSR Program.

DATES: The EPA's approval of the Request for Coverage for the Oak Creek Travel Center was issued by the EPA and became effective on March 6, 2024. Pursuant to section 307(b)(1) of the Clean Air Act, judicial review of this final agency decision, to the extent it is available, may be sought by filing a petition for review in the United States Court of Appeals for the Ninth Circuit within 60 days of June 17, 2024.

FOR FURTHER INFORMATION CONTACT: Noelle Mushro, EPA Region 9, (415) 972–3987, *Mushro.noelle@epa.gov.* The EPA's final approval decision, the Technical Support Document for this action, and all other supporting information are available through *www.regulations.gov* under Docket ID No. EPA–R09–OAR–2023–0249.

SUPPLEMENTARY INFORMATION:

Notice of Final Action

The EPA approved the Fort Independence Indian Community's Request for Coverage under the General Air Quality Permit for New or Modified Minor Source Gasoline Dispensing Facilities in Indian Country (Gasoline Dispensing Facility General Permit) [1] on

[1] The Gasoline Dispensing Facility General Permit was issued by the EPA under the Tribal Minor NSR

Continued

March 6, 2024. This approval pertains to the construction and operation of the Oak Creek Travel Center (Source), a gasoline dispensing facility, to be located on the Fort Independence Indian Reservation, in Independence, California. The EPA issued the approval pursuant to the provisions of Clean Air Act sections 110(a) and 301(d) and the EPA's Tribal Minor NSR Program at 40 CFR 49.151–49.164. The EPA based its approval on its determination that the Source meets the criteria qualifying it for coverage and that the Source is eligible for coverage under the Gasoline Dispensing Facility General Permit.

The EPA's Clean Air Act approval for the Source is a final agency action for purposes of judicial review only for the issue of whether the Source qualifies for coverage under the Gasoline Dispensing Facility General Permit. 40 CFR 49.156(e)(6).

Dated: April 9, 2024.

Martha Guzman Aceves,

Regional Administrator, Region IX.

Asbestos Part 2 Supplemental Evaluation Including Legacy Uses and Associated Disposals; Draft Risk Evaluation Under the Toxic Substances Control Act; Notice of Availability, Webinar and Request for Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA or the Agency) is announcing the availability of and seeking public comment on a draft document titled ''Draft Risk Evaluation for Asbestos Part 2: Supplemental Evaluation Including Legacy Uses and Associated Disposals of Asbestos'' and is announcing a webinar on May 13, 2024. EPA is evaluating legacy uses and associated disposals of asbestos including chrysotile asbestos, five additional fiber types, asbestos-containing talc, and Libby asbestos. EPA has used the best available science to preliminarily determine that asbestos poses unreasonable risk to human health.

DATES:

Webinar: May 13, 2024, 3–4 p.m. EST. To receive the webcast meeting link and audio teleconference information before the meeting, you must register by 12 p.m. on April 25, 2024. To allow EPA time to process your request for special accommodations before the webinar, please submit your request to EPA by 5 p.m. EST on May 6, 2024.

Written comments: Submit your comments on or before June 17, 2024.

ADDRESSES:

Webinar: Register online at *https://usepa.zoomgov.com/meeting/register/vJItf-mgrjotGpHKg8v4EMI8cejAiOoZWbI.*

Special accommodations: Please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Written comments: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPPT–2021–0254, online at *https://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *https://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT:

For webinar information: Chloe Durand, Project Management and Operations Division (7407M), Office of Chemical Safety and Pollution Prevention, Environmental Protection Agency, 1201 Constitution Ave. NW, Washington, DC 20004; telephone number: (202) 564–8820; email address: *durand.chloe@epa.gov.*

For technical information: Peter Gimlin, Existing Chemical Risk Management Division (7404M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 566–0515; email address: *gimlin.peter@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. Does this action apply to me?

This action is directed to the public in general and may be of particular interest to those involved in the manufacture, processing, distribution, use, and disposal of asbestos,-containing materials (ACMs) including construction professionals and individuals completing do-it-yourself (DIY) activities in buildings with ACMs, related industry trade organizations, non-governmental organizations with an interest in human and environmental health, state and local governments, Tribal Nations, and/or those interested in the assessment of risks involving chemical substances and mixtures regulated under TSCA. As such, the Agency has not attempted to describe all the specific entities that this action might apply to. If you need help determining applicability, consult the technical contact listed under **FOR FURTHER INFORMATION CONTACT**.

B. What is the Agency's authority for taking this action?

The draft risk evaluation is issued pursuant to TSCA section 6, 15 U.S.C. 2605, which requires that EPA conduct risk evaluations on chemical substances and identifies the minimum components EPA must include in all chemical substance risk evaluations. Each risk evaluation must be conducted consistent with the best available science, be based on the weight of the scientific evidence, and consider reasonably available information. 15 U.S.C. 2625(h), (i), and (k).

C. What action is the Agency taking?

The Agency is announcing the availability of and soliciting comment on the document titled ''Draft Risk Evaluation for Asbestos Part 2: Supplemental Evaluation Including Legacy Uses and Associated Disposals of Asbestos,'' which is available in the docket. EPA is also announcing a stakeholder engagement opportunity through a webinar where EPA will give an informational presentation on the document.

For more information about the TSCA risk evaluation process, which is the second phase of the EPA three phase process for ensuring the safety of existing chemicals, go to *https://www.epa.gov/assessing-and-managing-chemicals-under-tsca/how-epa-evaluates-safety-existing-chemicals.*

D. What should I consider as I prepare my comments?

1. Submitting CBI

Do not submit CBI to EPA through *https://www.regulations.gov* or email. If you wish to include CBI in your comment, please follow the applicable instructions at *https://www.epa.gov/dockets/commenting-epa-dockets#rules* and clearly mark the information that you claim to be CBI. Information so marked will not be disclosed except in

Program on May 1, 2019, and the permit became effective June 12, 2019. 84 FR 20879 (May 13, 2019). This permit is available at *https://www.epa.gov/caa-permitting/air-permits-gas-stations-tribal-lands-california.*

accordance with procedures set forth in 40 CFR parts 2 and 703, as applicable.

2. Tips for preparing your comments

When preparing and submitting your comments, see the commenting tips at *https://www.epa.gov/dockets/commenting-epa-dockets.*

II. Background

When EPA designated asbestos as one of the first 10 existing chemicals to undergo risk evaluation under TSCA, as amended in 2016, the risk evaluation focused on chrysotile asbestos, the only type of asbestos fiber where manufacture (including import), processing, and distribution in commerce for use was known, intended, or reasonably foreseen in the U.S. In *Safer Chemicals, Healthy Families* v. *EPA,* 943 F.3d 397 (9th Cir. 2019) the court held that EPA's Risk Evaluation Procedural Rule (82 FR 33726, July 20, 2017 (FRL–9964–38)) should not have excluded ''legacy uses'' (*i.e.,* uses without ongoing or prospective manufacturing, processing, or distribution) and ''associated disposals'' (*i.e.,* future disposal of legacy uses) from the definition of conditions of use. As a result, the risk evaluation for asbestos was split into two parts.

1. *Asbestos (Part 1: Chrysotile Asbestos).* The final risk evaluation for Asbestos (Part 1: Chrysotile Asbestos) was released in January 2021 (86 FR 89, January 4, 2021; FRL–10017–43), covering all intended, known, or reasonably foreseen import, processing, and distribution of chrysotile asbestos; uses of chrysotile asbestos that have been imported, processed, and distributed; and disposal of such chrysotile asbestos uses. The final rule to address the unreasonable risk identified in the Asbestos Part 1 risk evaluation was issued in March 2024 (89 FR 21970, March 28, 2024; FRL–8332–01–OCSPP).

2. *Asbestos Part 2: Supplemental Evaluation Including Legacy Uses and Associated Disposals of Asbestos.* Legacy uses and associated disposals of chrysotile asbestos, 5 additional fiber types, asbestos-containing talc, and Libby asbestos are the subject of the ''Draft Risk Evaluation for Asbestos Part 2: Supplemental Evaluation Including Legacy Uses and Associated Disposals of Asbestos'' (also referred to as the Asbestos Part 2 Draft Risk Evaluation), which is scheduled to be finalized on or before December 1, 2024, per the consent decree in the case *Asbestos Disease Awareness Organization et al* v. *Regan et al,* 4:21- cv-03716 (N.D. Cal.).

In the Asbestos Part 2 Draft Risk Evaluation, EPA preliminarily concludes that asbestos, as a chemical substance and as evaluated in part 1 and part 2 of the risk evaluation, presents an unreasonable risk of injury to health under its conditions of use. This single unreasonable risk determination for asbestos would replace the previous unreasonable risk determinations made for asbestos by individual conditions of use and supersede the determinations (and withdraw the associated order) of no unreasonable risk for the conditions of use identified in the TSCA section 6(i)(1) no unreasonable risk order. This draft determination does not alter any of the underlying technical or scientific information that informs the risk characterization in part 1, and as such the hazard, exposure, and risk characterization sections of part 1 are not changed by this revision.

III. Request for Public Comment

EPA seeks feedback on the assessment of risk for asbestos as presented in the Asbestos Part 2 Draft Risk Evaluation and welcomes specific input on each section of the Asbestos Part 2 Draft Risk Evaluation. EPA is also seeking input on the take-home exposure scenarios, as well as the non-cancer endpoints used to characterize risk. EPA also specifically seeks public comment on the draft single risk determination for asbestos where the Agency intends to determine that asbestos, as a chemical substance, presents an unreasonable risk of injury to health when evaluated under its conditions of use. However, EPA is not requesting public comment on the hazard, exposure, or risk characterization sections of part 1, as those sections remain unchanged.

EPA encourages all potentially interested parties, including individuals, governmental and non-governmental organizations, non-profit organizations, academic institutions, research institutions, and private sector entities to comment on the Asbestos Part 2 Draft Risk Evaluation.

To the extent possible, the Agency asks commenters to please cite any public data related to or that supports responses, and to the extent permissible, describe any supporting data that is not publicly available.

Authority: 15 U.S.C. 2601 *et seq.*

Dated: April 9, 2024.

Michal Freedhoff,

Assistant Administrator, Office of Chemical Safety and Pollution Prevention.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OLEM–2020–0527; FRL–11611–01 OLEM]

Interim PFAS Destruction and Disposal Guidance; Notice of Availability for Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability for public comment.

SUMMARY: The National Defense Authorization Act for Fiscal Year 2020 (FY 2020 NDAA) was signed into law on December 19, 2019. Section 7361 of the FY 2020 NDAA directs the U.S. Environmental Protection Agency (EPA) to publish interim guidance on the destruction and disposal of perfluoroalkyl and polyfluoroalkyl substances (PFAS) and materials containing PFAS and to update the guidance at least every three years, as appropriate. The EPA is releasing an update to the December 20, 2020, interim guidance for public comment. The updated guidance builds on information pertaining to technologies that may be feasible and appropriate for the destruction or disposal of PFAS and PFAS-containing materials. The 2024 interim guidance also identifies key data gaps and uncertainties that must be resolved before the EPA can issue more definitive recommendations about PFAS destruction and disposal technologies.

DATES: Comments must be received on or before October 15, 2024.

ADDRESSES: You may send comments, identified by Docket ID No. EPA–HQ–OLEM–2020–0527, by any of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov* (our preferred method). Follow the online instructions for submitting comments.
- *Mail:* U.S. Environmental Protection Agency, EPA Docket Center, OLEM Docket, Mail Code 28221T, 1200 Pennsylvania Avenue NW, Washington, DC 20460.
- *Hand Delivery or Courier (by scheduled appointment only):* EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Avenue NW, Washington, DC 20004. The Docket Center's hours of operations are 8:30 a.m.–4:30 p.m., Monday–Friday (except Federal Holidays).

Instructions: All submissions received must include the Docket ID No. for this rulemaking. Comments received may be posted without change to *https://www.regulations.gov/,* including any personal information provided. For

detailed instructions on sending comments and additional information on the rulemaking process, see the ''Public Participation'' heading of the **SUPPLEMENTARY INFORMATION** section of this document. For further information on EPA Docket Center services and the current status, please visit us online at *https://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Cindy Frickle, Office of Superfund Remediation and Technology Innovation (5203T), Environmental Protection Agency, 1200 Pennsylvania Avenue NW, Washington, DC 20460; telephone number 202–566–0927; email address: *frickle.cindy@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

This interim guidance provides a summary of EPA's current knowledge of technologies for destruction or disposal of PFAS and PFAS-containing materials. The primary audience of this guidance is decision makers who need to identify the most effective means for destroying or disposing of PFAS-containing materials and wastes. The audience may also include regulators, waste managers, and the public, including affected communities.

Barry N. Breen,

Principal Deputy Assistant Administrator, Office of Land and Emergency Management.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–11868–01–OEJECR;-EPA–HQ–OEJECR–2024–0146]

National Environmental Justice Advisory Council; Notification of Public Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notification for a public meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act (FACA), the U.S. Environmental Protection Agency (EPA) hereby provides notice that the National Environmental Justice Advisory Council (NEJAC) will meet on the dates and times described below. Due to unforeseen administrative circumstances, EPA is announcing this meeting with less than 15 calendar days public notice. The meeting is open to the public. For additional information about registering to attend the meeting or to provide public comment, please see ''REGISTRATION'' under **SUPPLEMENTARY INFORMATION**. Pre-Registration is required.

DATES: The NEJAC will convene an in-person and virtual public meeting on April 23–25, 2024, in Houston, Texas. On Tuesday, April 23, 2024, the public meeting will start at approximately 9:00 a.m. and end approximately at 8:00 p.m., Central Time. The public meeting continues Wednesday, April 24, 2024, and Thursday, April 25, 2024, from approximately 9:00 a.m. to 6:00 p.m., Central Time. The meeting discussions will focus on several topics including, but not limited to, workgroup updates, final recommendations for council consideration, presentations, panels, and discussions on potential charges with various EPA national program offices. A public comment period relevant to current NEJAC charges and recommendations will be considered by the NEJAC on Tuesday, April 23, 2024, approximately at 6:00 p.m. to 8:00 p.m., Central Time (see **SUPPLEMENTARY INFORMATION**). Members of the public wishing to participate during the public comment period must register by 11:59 p.m., Central Time, April 16, 2024.

ADDRESSES: The NEJAC meeting will be held at the Omni Houston Hotel, Four Riverway, Houston, Texas 77056.

FOR FURTHER INFORMATION CONTACT: Paula Flores-Gregg, NEJAC Designated Federal Officer, U.S. EPA; email: *nejac@epa.gov;* telephone: (214) 665–8123. Additional information about the NEJAC is available at *https://www.epa.gov/environmentaljustice/national-environmental-justice-advisory-council.*

SUPPLEMENTARY INFORMATION: The Charter of the NEJAC states that the advisory committee ''will provide independent advice and recommendations to the Administrator about broad, cross-cutting issues related to environmental justice. The NEJAC's efforts will include evaluation of a broad range of strategic, scientific, technological, regulatory, community engagement, and economic issues related to environmental justice.''

Registration: Individual registration is required for the public meeting. No two individuals can share the same registration link. Information on how to register is located at *https://www.epa.gov/environmentaljustice/national-environmental-justice-advisory-council-meetings.* Registration to attend the meeting is available through the scheduled meeting days. The deadline to sign up to speak during the public comment period will close at 11:59 p.m., Central Time, April 16, 2024. When registering, please provide your name, organization, city and state, and email address. Please also indicate whether you would like to provide oral public comment during the meeting, or whether you are submitting written comments at the time of registration.

A. Public Comment

The NEJAC is interested in receiving public comments relevant to the following charges and recommendations:

(1) Cumulative Impacts Framework Charge.

(2) Consultation on the EPA Policy on Environmental Justice for working with Federally Recognized Tribes and Indigenous Peoples Update.

Individuals or groups making remarks during the oral public comment period will be limited to three (3) minutes. Please be prepared to briefly describe your comments; including your recommendations on what you want the NEJAC to advise the EPA to do. Submitting written comments for the record are strongly encouraged. You can submit your written comments in three different ways, (1.) by using the webform at *https://www.epa.gov/environmentaljustice/forms/national-environmental-justice-advisory-council-nejac-public-comment,* (2.) by sending comments via email to *nejac@epa.gov* and (3.) by creating comments in the Docket ID No. EPA–HQ–OEJECR–2024–0146 at *http://www.regulations.gov.* Written comments can be submitted through May 7, 2024. More information about the NEJAC's current charges can be found here.

B. Information about Services for Individuals With Disabilities or Requiring English Language Translation Assistance

For information about access or services for individuals requiring assistance, please contact Paula Flores-Gregg, at (214) 665–8123 or via email at *nejac@epa.gov.* To request special accommodations for a disability or other assistance, please submit your request at least seven (7) working days prior to the meeting, to give EPA sufficient time to process your request. All requests should be sent to the email or phone number listed in the **FOR FURTHER INFORMATION CONTACT** section.

Theresa Segovia,

Principal Deputy Assistant Administrator, Office of Environmental Justice and External Civil Rights.

BILLING CODE 6560–50–P

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of an Open Meeting of the FDIC Advisory Committee on Community Banking

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Notice of open meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, notice is hereby given of a meeting of the FDIC Advisory Committee on Community Banking. The Advisory Committee will provide advice and recommendations on a broad range of policy issues that have particular impact on small community banks throughout the United States and the local communities they serve. The meeting is open to the public. The public's means to observe this meeting of the Advisory Committee on Community Banking will be both in-person and via a Webcast live on the internet. In addition, the meeting will be recorded and subsequently made available on-demand approximately two weeks after the event. To view the live event, visit *http://fdic.windrosemedia.com.*

DATES: Thursday, May 2, 2024, from 9 a.m. to 3 p.m.

ADDRESSES: The meeting will be held in the FDIC Board Room on the sixth floor of the FDIC building located at 550 17th Street NW, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Requests for further information concerning the meeting may be directed to Debra A. Decker, Committee Management Officer of the FDIC at (202) 898–8748.

SUPPLEMENTARY INFORMATION:

Agenda: The agenda will include a discussion of issues that are of interest to community banks. The agenda is subject to change. Any changes to the agenda will be announced at the beginning of the meeting.

Type of Meeting: The meeting will be open to the public, limited only by the space available on a first-come, first-served basis. For security reasons, members of the public will be subject to security screening procedures and must present a valid photo identification to enter the building. Observers requiring auxiliary aids (*e.g.,* sign language interpretation) for this meeting should email *DisabilityProgram@fdic.gov* to make necessary arrangements. This meeting of the Advisory Committee on Community Banking will also be Webcast live via the internet at *http://fdic.windrosemedia.com.* For optimal viewing, a high-speed internet connection is recommended. To view the recording, visit *http://fdic.windrosemedia.com/index.php?category=Community+Banking+Advisory+Committee.* Written statements may be filed with the Advisory Committee before or after the meeting.

Federal Deposit Insurance Corporation.

Dated at Washington, DC, on April 11, 2024.

James P. Sheesley,

Assistant Executive Secretary.

[FR Doc. 2024–08037 Filed 4–15–24; 8:45 am]

BILLING CODE 6714–01–P

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice to All Interested Parties of Intent To Terminate Receiverships

Notice is hereby given that the Federal Deposit Insurance Corporation (FDIC or Receiver), as Receiver for the institutions listed below, intends to terminate its receivership for said institutions.

NOTICE OF INTENT TO TERMINATE RECEIVERSHIPS

Fund	Receivership name	City	State	Date of appointment of receiver
10334	Firstier Bank	Louisville	CO	01/28/2011
10463	Nova Bank	Berwyn	PA	10/26/2012

The liquidation of the assets for each receivership has been completed. To the extent permitted by available funds and in accordance with law, the Receiver will be making a final dividend payment to proven creditors. Based upon the foregoing, the Receiver has determined that the continued existence of the receiverships will serve no useful purpose. Consequently, notice is given that the receiverships shall be terminated, to be effective no sooner than thirty days after the date of this notice. If any person wishes to comment concerning the termination of any of the receiverships, such comment must be made in writing, identify the receivership to which the comment pertains, and be sent within thirty days of the date of this notice to: Federal Deposit Insurance Corporation, Division of Resolutions and Receiverships, Attention: Receivership Oversight Section, 600 North Pearl, Suite 700, Dallas, TX 75201. No comments concerning the termination of the above-mentioned receiverships will be considered which are not sent within this timeframe.

(Authority: 12 U.S.C. 1819)

Federal Deposit Insurance Corporation.

Dated at Washington, DC, on April 11, 2024.

James P. Sheesley,

Assistant Executive Secretary.

BILLING CODE 6714–01–P

FEDERAL MARITIME COMMISSION

[Docket No. FMC–2023–0016]

Request for Information

AGENCY: Federal Maritime Commission.

ACTION: Request for information.

SUMMARY: The Federal Maritime Commission (the Commission) seeks public comment on questions related to maritime data accuracy to continue the process of gathering information to inform possible future Commission activities with a focus on information related to containers moving through marine terminals. In particular, the Commission seeks responses on what data elements are communicated between transportation service providers and importers/exporters. The Commission also seeks information on how changes to information are conveyed and where communication is most likely to break down or information is most likely to be conveyed inaccurately.

DATES: Submit comments on or before 11:59 p.m. eastern standard time (EST) on June 17, 2024.

ADDRESSES: The Commission will collect comments through the Federal eRulemaking Portal at *www.regulations.gov,* under Docket No.

FMC–2023–0016. Please refer to the ''Public Participation'' heading under the **SUPPLEMENTARY INFORMATION** section of this notice for detailed instructions on how to submit comments, including instructions on how to request confidential treatment.

FOR FURTHER INFORMATION CONTACT: David Eng, Secretary; Phone: (202) 523–5725; Email: *secretary@fmc.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Containerized cargo in international trade moves between the control of numerous entities. While some key data elements are readily shared between supply chain participants, the lack of timely and accurate access to some data elements can lead to inefficiencies, as was seen during the COVID–19 pandemic. Additionally, the lack of data standardization reduces the ability to move cargo in an effective way.

Improved communication and data availability could ease the flow of data and potentially provide positive results including fewer and shorter duration instances of congestion; quicker movement of import and export shipments; assessment of fewer storage fees; and a reduction in non-government cargo holds thereby improving supply chain effectiveness and efficiency.

II. Request for Information/Notice of Inquiry

The Maritime Transportation Data Initiative (MTDI), led by Commissioner Carl Bentzel, examined the issue of data usage and sharing within the supply chain served by international ocean carriers. Commissioner Bentzel released a report in May 2023 summarizing the information he gathered and his initial findings.[1]

The Commission now seeks additional information to expand the information gathered from the MTDI and the Commission's August 23, 2023, Request for Information (88 FR 55697) related to data availability, accuracy, and exchange. This Request places particular emphasis on data accuracy.

A common theme revealed by the MTDI was that information on container pick up/return was difficult to gather accurately or predict. MTDI participants cited challenges such as determining who should provide the information, information changing frequently, and changes not being conveyed to shipping entities. These points have been reiterated to the Commission via numerous avenues, including by the National Shipper Advisory Committee.[2] The Commission created the prior Request for Information to understand some of the data challenges that entities throughout the supply chain face.[3] The purpose of this Request for Information is to continue the process of gathering information to inform possible future Commission activities with a focus on information related to containers moving through marine terminals. The purpose of these questions is to seek information about data accuracy, not information about specific customers/partners and commenters should not name specific customers/partners when responding. The Commission has segmented the questions into categories specific to certain stakeholders, but it is also interested in hearing from the public, who may respond to all of the questions.

Vessel Operators and Marine Terminal Operators

1. How do you communicate the vessel schedule and any changes regarding the vessel schedule to the beneficial cargo owners (BCO) and/or their agents? Please include the communication method and the timeline.
2. What share of vessels change their schedule within the last week prior to arrival at a scheduled port? What are the most common reasons for a vessel schedule to change?
3. What are the primary reasons for changes to the vessel schedule? What indicators can BCOs use to predict changes to vessel schedule?
4. How do you communicate the Early Return Date (ERD), and any changes to it, to BCOs and/or their agents? Please include the communication method and the timeline.
5. What are the primary reasons for changes to ERD? What indicators can BCOs use to predict changes to ERD?
6. What share of ERDs change within a week prior to the window? What are the most common reasons for an ERD to change in the last week?
7. How do you access information related to the availability of intermodal rail services? Please include the communication method and the timeline.
8. How do you access information related to the in-transit services of intermodal rail? Please include the communication method and the timeline.
9. Are there any metrics or pieces of information that are not clearly defined or missing entirely from the maritime supply chain? If so, please list and define.

Importers

10. What were the primary causes of penalty fees for missing a container pick up window?
11. What pick up information (such as vessel schedule or container availability) is most likely to change or be conveyed differently by different supply chain entities?
12. Who do you rely upon to obtain information pertaining to container pick up and any changes to it? Please include all entities that provide information, the communication method, and the timeline of when you receive the information.
13. How do you find out that a vessel schedule has changed?
14. How many days prior to the vessel arrival do you need the date to be finalized? Please indicate the conditions which affect the number of days you need.
15. How often do you attempt to pick up a container that you believe to be available, but it is not available? What are the most common reasons for this occurrence?
16. How frequently do you attempt to retrieve a container, but necessary equipment (such as chassis or rail service) is not available? What are the most common reasons for this occurrence?
17. Are there any metrics or pieces of information that are not clearly defined or missing entirely from the maritime supply chain? If so, please list and define.

Exporters

18. What were the primary causes of penalty fees for missing a container return window?
19. What container return information (such as vessel schedule or ERD) is most likely to change or be conveyed differently by different shipping entities?
20. Who do you rely upon to obtain information pertaining to container return and any changes to that information. Please include all entities that provide information, the communication method, and the timeline of when you receive the information.
21. How do you learn that a vessel schedule has changed?

[1] Available at *www.fmc.gov/wp-content/uploads/2023/04/MTDIReportandViews.pdf.*

[2] See *www.fmc.gov/wp-content/uploads/2023/05/Consistencyandalignmentofdata.pdf, www.fmc.gov/wp-content/uploads/2022/12/Draft-NSAC-ContainerLevelDataAlignment.pdf, www.fmc.gov/wp-content/uploads/2022/12/Draft-NSACIntermodalDataAlignment.pdf, www.fmc.gov/wp-content/uploads/2022/12/DRAFT–NSAC-ShipmentLevelDataAlignment.pdf* for National Shipper Advisory Committee recommendations.

[3] Previous Request for Information is posted in the docket at *www.regulations.gov/document/FMC–2023–0016–0001.*

22. How many days prior to the container return window do you need the ERD date to be finalized? Please indicate the conditions which affect the number of days you need.

23. How often do you attempt to export a container within what you believe to be the return window, and you end up being too early or too late? What are the most common reasons for this occurrence?

24. How frequently do you attempt to export a container, but necessary equipment (such as chassis or rail service) is not available? What are the most common reasons for this occurrence?

25. Are there any metrics or pieces of information that are not clearly defined or missing entirely from the maritime supply chain? If so, please list and define.

III. Public Participation

How do I prepare and submit comments?

You may submit comments by using the Federal eRulemaking Portal at *www.regulations.gov,* under Docket No. FMC–2023–0016. Please follow the instructions provided on the Federal eRulemaking Portal to submit comments.

How do I submit confidential business information?

The Commission will provide confidential treatment for identified confidential information to the extent allowed by law. If you would like to request confidential treatment, pursuant to 46 CFR 502.5, you must submit the following, by email, to *secretary@fmc.gov:*

- A transmittal letter requesting confidential treatment that identifies the specific information in the comments for which protection is sought and demonstrates that the information is a trade secret or other confidential research, development, or commercial information.
- A confidential copy of your comments, consisting of the complete filing with a cover page marked ''Confidential-Restricted,'' and the confidential material clearly marked on each page.
- A public version of your comments with the confidential information excluded. The public version must state ''Public Version—confidential materials excluded'' on the cover page and on each affected page and must clearly indicate any information withheld.

Will the Commission consider late comments?

The Commission will consider all comments received before the deadline on the comment closing date indicated above under **DATES**. To the extent possible, we may also consider comments received after that date.

How can I read comments submitted by other people?

You may read the comments received by the Commission at *www.regulations.gov,* under Docket No. FMC–2023–0016.

By the Commission.

David Eng,

Secretary.

BILLING CODE 6730–02–P

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company

The notificants listed below have applied under the Change in Bank Control Act (Act) (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors that are considered in acting on the applications are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The public portions of the applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank(s) indicated below and at the offices of the Board of Governors. This information may also be obtained on an expedited basis, upon request, by contacting the appropriate Federal Reserve Bank and from the Board's Freedom of Information Office at *https://www.federalreserve.gov/foia/request.htm.* Interested persons may express their views in writing on the standards enumerated in paragraph 7 of the Act.

Comments received are subject to public disclosure. In general, comments received will be made available without change and will not be modified to remove personal or business information including confidential, contact, or other identifying information. Comments should not include any information such as confidential information that would not be appropriate for public disclosure.

Comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Ann E. Misback, Secretary of the Board, 20th Street and Constitution Avenue NW, Washington DC 20551–0001, not later than May 1, 2024.

A. Federal Reserve Bank of Minneapolis (Stephanie Weber, Assistant Vice President) 90 Hennepin Avenue, Minneapolis, Minnesota 55480–0291. Comments may also be sent electronically to *MA@mpls.frb.org:*

1. *Luke Reiter, Cold Spring, Minnesota; John Reiter, Belgrade, Minnesota; and Nicholas Reiter, Otsego, Minnesota;* to join the Reiter Family Control Group, a group acting in concert, to acquire voting shares of First Bancshares, Inc., of Cold Spring, and thereby indirectly acquire voting shares of Granite Bank, both of Cold Spring, Minnesota.

Board of Governors of the Federal Reserve System.

Michele Taylor Fennell,

Deputy Associate Secretary of the Board.

BILLING CODE P

FEDERAL TRADE COMMISSION

Agency Information Collection Activities; Proposed Collection; Comment Request; Extension

AGENCY: Federal Trade Commission.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (PRA), the Federal Trade Commission (FTC or Commission) is seeking public comment on its proposal to extend for an additional three years the current PRA clearance for its information collection requirements in the Power Output Claims for Amplifiers Utilized in Home Entertainment Products (''Amplifier Rule'' or ''Rule''). This clearance expires on April 30, 2024.

DATES: Comments must be filed by May 16, 2024.

ADDRESSES: Interested parties may file a comment online or on paper, by following the instructions in the Request for Comment part of the **SUPPLEMENTARY INFORMATION** section below. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. The reginfo.gov web link is a United States Government

website produced by the Office of Management and Budget (OMB) and the General Services Administration (GSA). Under PRA requirements, OMB's Office of Information and Regulatory Affairs (OIRA) reviews Federal information collections.

FOR FURTHER INFORMATION CONTACT: Hong Park, Attorney, Division of Enforcement, Bureau of Consumer Protection, Federal Trade Commission, (202) 326–2158, *hpark@ftc.gov.*

SUPPLEMENTARY INFORMATION:

Title: Amplifier Rule, 16 CFR part 432.

OMB Control Number: 3084–0105.

Type of Review: Extension of a currently approved collection.

Estimated Annual Hours of Burden: 462 hours (308 testing hours; 154 disclosure hours).

Likely Respondents and Estimated Burden: (a) Testing—High fidelity manufacturers—308 new products/year × 1 hour each = 308 hours; and (b) Disclosures—High fidelity manufacturers—[(308 new products/year × 1 specification sheet) + (308 new products/year × 1 brochure)] × 15 minutes per specification sheet or brochure = 154 hours.

Frequency of Response: Periodic.

Estimated Annual Labor Cost: $28,019 per year ($17,131 for testing + $10,888 for disclosures).

Abstract: The Amplifier Rule assists consumers by standardizing the measurement and disclosure of power output and related performance characteristics of amplifiers in stereos and other home entertainment equipment. The Rule also specifies the test conditions necessary to make the disclosures that the Rule requires.

Request for Comment

On January 19, 2024, the FTC sought public comment on the information collection requirements associated with the Rule. 89 FR 3658. No germane comments were received. Pursuant to the OMB regulations, 5 CFR part 1320, that implement the PRA, 44 U.S.C. 3501 *et seq.,* the FTC is providing this second opportunity for public comment while seeking OMB approval to renew the pre-existing clearance for the Rule.

Your comment—including your name and your State—will be placed on the public record of this proceeding. Because your comment will be made public, you are solely responsible for making sure that your comment does not include any sensitive personal information, such as anyone's Social Security number; date of birth; driver's license number or other state identification number, or foreign country equivalent; passport number; financial account number; or credit or debit card number. You are also solely responsible for making sure that your comment does not include any sensitive health information, such as medical records or other individually identifiable health information. In addition, your comment should not include any ''trade secret or any commercial or financial information which . . . is privileged or confidential'' —as provided by section 6(f) of the FTC Act, 15 U.S.C. 46(f), and FTC rule 4.10(a)(2), 16 CFR 4.10(a)(2)—including in particular competitively sensitive information such as costs, sales statistics, inventories, formulas, patterns, devices, manufacturing processes, or customer names.

Josephine Liu,

Assistant General Counsel for Legal Counsel.

BILLING CODE 6750–01–P

GENERAL SERVICES ADMINISTRATION

[Notice–PBS–2024–04; Docket No. 2024–0002; Sequence No. 9]

Notice of Availability for a Final Supplemental Environmental Impact Statement and Floodplain Assessment and Statement of Findings for the International Falls Land Port of Entry Modernization and Expansion Project in International Falls, Minnesota

AGENCY: Public Buildings Service (PBS), General Services Administration (GSA).

ACTION: Notice of Availability (NOA); Public Notice of Floodplain Assessment and Statement of Findings.

SUMMARY: This notice announces the availability of the Final Supplemental Environmental Impact Statement (SEIS), which examines potential environmental impacts from the modernization and expansion of the International Falls Land Port of Entry (LPOE) in International Falls, Minnesota. The existing International Falls LPOE is owned and managed by GSA and is operated by the U.S. Department of Homeland Security's Customs and Border Protection (CBP). The Final SEIS describes the purpose and need for the project; alternatives considered; the existing environment that could be affected; the potential impacts resulting from each of the alternatives; and proposed mitigation commitments. The Final SEIS also includes a Floodplain Assessment and Statement of Findings as a result of construction in a floodplain at the International Falls LPOE. Based on impacts analyses and public comments, GSA has identified Alternative 1 (Full Build) as described in the Final SEIS as its preferred alternative. Alternative 1 has also been identified as the environmentally preferred alternative.

DATES: The Final SEIS Wait Period begins with publication of this NOA in the **Federal Register** and will last until Monday, May 20, 2024. Written comments must be received by the last day of the Wait Period (see **ADDRESSES** section of this NOA on how to submit comments). After the Wait Period, GSA will issue the Record of Decision (ROD).

ADDRESSES: Members of the public may submit comments by one of the following methods. All comments will be considered equally and will be part of the public record.

- *Email: michael.gonczar@gsa.gov.* Please include '*International Falls LPOE SEIS'* in the subject line of the message.
- *Mail: ATTN:* Michael Gonczar, International Falls LPOE SEIS; U.S. General Services Administration, Region 5; 230 S. Dearborn Street, Suite 3600, Chicago, IL 60604.

FOR FURTHER INFORMATION CONTACT: Questions or comments on the Final SEIS should be directed to: Michael Gonczar, NEPA Program Manager, GSA, at 312–810–2326, or via email to *michael.gonczar@gsa.gov.* See **ADDRESSES** section of this NOA on how to submit comments.

Additional information and an electronic copy of the Final SEIS, may be found online on the following website: *https://www.gsa.gov/about-us/gsa-regions/region-5-great-lakes/buildings-and-facilities/minnesota/international-falls-land-port-of-entry.*

SUPPLEMENTARY INFORMATION: The Final SEIS has considered previous input provided during the scoping and Draft SEIS comment periods.

Background

The existing 1.6-acre LPOE is located on the south bank of the Rainy River and serves as the port of entry to people and vehicles crossing the International Bridge that connects International Falls, Minnesota to the town of Fort Frances, Ontario, Canada. The International Falls Land Port of Entry Improvements Study Final EIS, released in 2011, assessed the potential environmental impacts associated with the proposed action of replacing the undersized International Falls LPOE with a new LPOE facility ''to improve safety, security, and functionality.'' A total of ten build alternatives were considered, and a preferred action alternative was identified. This alternative would

consist of demolishing the existing building, constructing new facilities at the existing LPOE, and expanding the LPOE to meet the required space standards and increased security requirements of the Federal Inspection Services. This alternative would move the majority of the LPOE improvements and operations to an approximately 20-acre site southeast of the existing site between 4th Street and Rainy River. GSA signed and released a ROD in January 2012 that identified a preferred alternative as it best satisfied the purpose and needs of the project with the least overall adverse impacts to the environment. The ROD stated that the preferred alternative would have less-than-significant impacts on the natural and social environment of the study area and International Falls, including minor changes or impacts to surface water, surface water runoff, traffic, increased lighting, and hazardous substances.

Since 2011, GSA has identified the following changes to the project, which differ from the preferred alternative described in the 2011 EIS:

- There have been proposed changes in tenants and use of the space. The U.S. Food and Drug Administration and the U.S. Department of Agriculture/Animal Plant Health Inspection Services/-Plant Protection and Quarantine (USDA/APHIS–PPQ) will need space and facilities at the LPOE.
- The Packaging Corporation of America (PCA) has acquired Boise, Inc. and has a different timber unloading operation occurring adjacent to the proposed acquisition parcel, which will require modifications to the original site plan at the LPOE and offsite on PCA lands.
- A section of First Creek between Route 11 and the Rainy River that was previously contained in a culvert was identified following the 2011 EIS. The culvert has been removed and is now daylighted, requiring impacts analysis.
- There has been an increase in the proposed usable square feet (USF) for overall building space needed, based on the addition of a maintenance building and expansion in the sizes of all other buildings per updated agency requirements.
- Stormwater management would be redesigned in the 300-foot section of First Creek due to two new areas of pavement crossing the creek or installation of a new culvert.
- The Resolute Paper Mill in Fort Frances, Ontario has since closed and rail traffic across the bridge has ceased.
- New renewable energy technologies are being considered for implementation at the expanded and modernized LPOE, including solar and geothermal technologies.
- New LPOE access points for privately owned vehicles (POVs) and pedestrians are being considered. After publication of the Draft SEIS, the proposed location of the LPOE access point for POVs and pedestrians shifted from a point on Highway 53 and 2nd Street to points located near or at the proposed commercially owned vehicle (COV) access point on State Route 11 due to site constraints.

GSA has prepared a Final SEIS to assess the potential impacts of these updates, which were not assessed in the 2011 EIS.

Alternatives Under Consideration

The Proposed Action, defined as Alternative 1 (Full Build) in the Final SEIS and GSA's preferred alternative, would consist of modernization and expansion of existing International Falls LPOE facilities as previously considered in the 2011 EIS, but to consider the above project changes. GSA also considered the No Action Alternative, which assumes that GSA would not expand or modernize the International Falls LPOE.

The purpose of the Proposed Action is for GSA to support CBP's mission by bringing the International Falls LPOE operations in line with current land port design standards and operational requirements of CBP while addressing existing deficiencies identified with the ongoing port operations. Generally, the deficiencies described in the 2011 EIS remain at the LPOE. The deficiencies fall into two broad categories: deficiencies in the overall site layout and substandard building conditions. Therefore, in order to bring the International Falls LPOE operations in line with CBP's design standards and operational requirements, the Proposed Action is needed to (1) improve the capacity and functionality of the International Falls LPOE to meet future demand, while maintaining the capability to meet border security initiatives; (2) address spatial and layout constraints that lead to traffic congestion and safety issues for the employees and users of the LPOE; and (3) provide adequate space and facilities for the federal agencies to accomplish their missions.

The Final SEIS addresses the potential environmental impacts of the proposed alternatives on environmental resources including geology and soils, water resources, biological resources, air quality, noise, transportation and traffic, land use and visual resources, infrastructure and utilities, socioeconomics, cultural resources, human health and safety, and environmental justice. Additionally, findings from maritime and terrestrial surveys are included in the cultural resources discussion, and findings from the Phase II Environmental Site Assessment are included in the human health and safety discussion. Based on the analysis presented in the Final SEIS, adverse impacts to transportation and traffic, land use and visual resources, and human health and safety may experience major adverse impacts due to an increase in traffic conflicts between vehicles and bikers/pedestrians along the Rainy Lake Bike Trail. Impacts for the remaining resource areas would be less-than-significant (*i.e.,* negligible, minor, or moderate), adverse or beneficial. Impact reduction measures to reduce potential adverse effects are presented in the Final SEIS.

GSA is currently undergoing formal consultation with the State Historic Preservation Officer (SHPO) and consulting parties to follow coordination procedures as required under Section 106 of the NHPA to determine impacts to historic properties. Mitigation measures may be determined in consultation between GSA, SHPO, and applicable consulting parties.

Under the Endangered Species Act (ESA), GSA coordinated with the U.S. Fish and Wildlife Service (USFWS) per Section 7 requirements to determine effects to federally protected species. There would be no adverse effects to federally threatened or endangered species. Correspondence with USFWS and the findings are incorporated in the Final SEIS.

The Proposed Action would take place within the 1-percent-annual-chance floodplain and 0.2-percent-annual-chance floodplain at the International Falls LPOE. In compliance with Executive Order 11988 (Floodplain Management), GSA prepared a Floodplain Assessment and Statement of Findings addressing potential impacts on floodplains, which is included in the Final SEIS. As described in the Final SEIS, GSA would follow federal, state, and local regulatory compliance requirements and incorporate design standards at the International Falls LPOE to minimize impacts to floodplains.

William Renner,

Director, Facilities Management and Services Programs Division, Great Lakes Region 5, U.S. General Services Administration.

GENERAL SERVICES ADMINISTRATION

[Notice–WWICC–2024–01; Docket No. 2024–0011; Sequence No. 1]

World War One Centennial Commission; Notification of Upcoming Public Advisory Meeting

AGENCY: World War One Centennial Commission.

ACTION: Meeting notice.

SUMMARY: Notice of this meeting is being provided according to the requirements of the Federal Advisory Committee Act. This notice provides the schedule and agenda for the May 7, 2024, meeting of the World War One Centennial Commission (the Commission). The meeting is available to the public. Dial in information will be provided upon request.

DATES: *Meeting date:* The meeting will be held on Tuesday, May 7, 2024, starting at 9 a.m. eastern daylight time (EDT) and ending no later than 12 p.m. EDT.

ADDRESSES: This meeting will be held in person and also available virtually. The meeting will convene in person at 1455 Pennsylvania Avenue NW, Suite 400, Washington, DC. Virtual attendance is by reservation. Requests for dial in information may be made to *daniel.dayton@worldwar1centennial.org.*

Written Comments may be submitted to the Commission and will be made part of the permanent record of the Commission. Comments must be received by 5 p.m. EDT, on May 3, 2024, and may be provided by email to *daniel.dayton@worldwarlcentennial.org.*

Contact Mr. Daniel S. Dayton at *daniel.dayton@worldwarlcentennial.org* to register to comment during the meeting's 30-minute public comment period. Registered speakers/organizations will be allowed five (5) minutes and will need to provide written copies of their presentations. Requests to comment, together with presentations for the meeting must be received by 5 p.m. EDT, on Friday May 3, 2024. Please contact Mr. Dayton at the email address above to obtain meeting materials.

FOR FURTHER INFORMATION CONTACT: Daniel S. Dayton, Designated Federal Officer, World War 1 Centennial Commission, 1455 Pennsylvania Avenue NW, Suite 400, Washington, DC 20004. 202–380–0725 (note: this is not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The World War One Centennial Commission was established by Public Law 112–272 (as amended), as a commission to ensure a suitable observance of the centennial of World War I, to provide for the designation of memorials to the service of members of the United States Armed Forces in World War I, and for other purposes.

Under this authority, the Committee will plan, develop, and execute programs, projects, and activities to commemorate the centennial of World War I, encourage private organizations and State and local governments to organize and participate in activities commemorating the centennial of World War I, facilitate and coordinate activities throughout the United States relating to the centennial of World War I, serve as a clearinghouse for the collection and dissemination of information about events and plans for the centennial of World War I, and develop recommendations for Congress and the President for commemorating the centennial of World War I. Further, the Commission oversees the design and construction of the national World War I Memorial in Washington, DC.

Agenda

Old Business

- WWICC Program Review
- Public Comment Period

New Business

- Status of the National WWI Memorial
  - Ongoing Maintenance
  - Sculpture Completion and Installation
- A Soldier's Journey: First Illumination ceremony briefing
- Financial Report
- Legislative Report
- Commission Sunset
  - Commission Closing Document Review and Approval

Chairman's Remarks

Adjourn

David Coscia,

Agency Liaison Officer, Office of Presidential & Congressional Agency Liaison Services, General Services Administration.

BILLING CODE 6820–95–P

GENERAL SERVICES ADMINISTRATION

[Notice–MRB–2024–02; Docket No. 2024–0002; Sequence No. 18]

GSA Acquisition Policy Federal Advisory Committee; Notification of Upcoming Web-Based Public Meeting

AGENCY: Office of Government-wide Policy (OGP), General Services Administration (GSA).

ACTION: Meeting notice.

SUMMARY: GSA is providing notice of a meeting of the GSA Acquisition Policy Federal Advisory Committee (hereinafter ''the Committee'' or ''the GAP FAC'') in accordance with the requirements of the Federal Advisory Committee Act (FACA), as amended. This meeting will be open to the public, accessible via webcast. Information on attending and providing written public comment is under the **SUPPLEMENTARY INFORMATION** section.

DATES: The GAP FAC will hold an open public meeting on Wednesday, May 22, 2024, from 9 a.m. to 1 p.m. eastern standard time (EST).

ADDRESSES: The meeting will be accessible via webcast. Registrants will receive the webcast information before the meeting.

FOR FURTHER INFORMATION CONTACT: Boris Arratia, Designated Federal Officer, OGP, 703–795–0816, or email: *boris.arratia@gsa.gov;* or Stephanie Hardison, OGP, 202–258–6823, or email: *stephanie.hardison@gsa.gov.* Additional information about the Committee, including meeting materials and agendas, are available on-line at *https://gsa.gov/policy-regulations/policy/acquisition-policy/gsa-acquisition-policy-federal-advisory-committee.*

SUPPLEMENTARY INFORMATION:

The GAP FAC continues to serve as an advisory body to GSA's Administrator on how GSA can use its acquisition tools and authorities to target the highest priority Federal acquisition challenges. The GAP FAC Committee continues to provide recommendations that will help advise GSA's Administrator on emerging acquisition issues, challenges, and opportunities to support its role as America's buyer.

Purpose of the Meeting

The purpose of this meeting is for each of the three subcommittees (Policy and Practice, Industry Partnerships, and Acquisition Workforce) to present recommendations to the full Committee. The Committee will, in turn, deliberate

and vote on GAP FAC recommendations to be delivered to the GSA Administrator.

Meeting Agenda

- Opening Remarks
- Acquisition Workforce Subcommittee Recommendations and Discussion
- Industry Partnerships Subcommittee Recommendations and Discussion
- Policy and Practices Subcommittee Recommendations and Discussion
- Vote on Recommendations
- Closing Remarks and Adjourn

Meeting Registration

This meeting is open to the public and will be accessible by webcast. Registration information is located on the GAP FAC website: *https://www.gsa.gov/policy-regulations/policy/acquisition-policy/gsa-acquisition-policy-federal-advisory-committee.* Public attendees who want to attend virtually will need to register no later than 5 p.m. EST, on Tuesday, May 21, 2024 to obtain the meeting webcast information. All registrants will be asked to provide their name, affiliation, and email address. After registration, individuals will receive webcast access information details via email.

Public Comments

Written public comments are being accepted via email at *gapfac@gsa.gov.* To submit a written public comment, please email at *gapfac.gsa.gov* and include your name, organization name (if applicable).

Special Accommodations

For information on services for individuals with disabilities, or to request accommodation of a disability, please contact the Designated Federal Officer at least 10 business days prior to the meeting to give GSA as much time as possible to process the request. Closed captioning and live American Sign Language (ASL) interpreter services will be available.

Jeffrey A. Koses,

Senior Procurement Executive, Office of Acquisition Policy, Office of Government-wide Policy.

BILLING CODE 6820–RV–P

GENERAL SERVICES ADMINISTRATION

[Notice–MVAC 2024–01; Docket No. 2024–0002; Sequence No 16]

Notice of Inquiry Regarding PFAS in Products

AGENCY: Office of Acquisition Policy, General Services Administration.

ACTION: Notice; request for information (RFI).

SUMMARY: As part of its on-going commitment to advancing sustainable acquisition, the General Services Administration (GSA) is exploring opportunities to reduce or eliminate potential per-and polyfluoroalkyl substances (PFAS) chemicals with the intent to reduce exposure from products offered to the Government through GSA's contract solutions. GSA is publishing this notice to request comments to help us understand potential areas for focus, and to identify potential unintended negative impacts. At this time, GSA has not determined whether or not it should work towards a notice of proposed rule-making to address this topic.

DATES: Interested parties should submit written comments to the Regulatory Secretariat as noted below on or before June 17, 2024.

ADDRESSES: Submit comments in response to this inquiry to: Regulations.gov: *https://www.regulations.gov.* Submit comments via the Federal eRulemaking portal by searching for ''GSA PFAS Inquiry''. Follow the instructions provided at the ''Comment Now'' screen. Please include your name, company name (if any), and ''GSA PFAS Inquiry'' on your attached document.

Instructions: Comments received generally will be posted without change to *https://www.regulations.gov,* including any personal and/or business confidential information provided. To confirm receipt of your comment(s), please check *https://www.regulations.gov,* approximately two to three days after submission to verify posting.

FOR FURTHER INFORMATION CONTACT: For clarification of content, contact Ms. Adina Torberntsson, Procurement Analyst, at *gsarpolicy@gsa.gov* or 720–475–0568. For information pertaining to status or publication schedules, contact the Regulatory Secretariat at *GSARegSec@gsa.gov* or 202–501–4755. Please cite GSA PFAS Inquiry.

SUPPLEMENTARY INFORMATION:

I. Background

Per- and polyfluoroalkyl substances, known as PFAS, are a widely used class of chemicals which break down very slowly over time. Since PFAS chemicals are slow to break down, and have been used in several manufacturing processes, they are ubiquitously found throughout the environment. PFAS has been detected in air, water, soil, and even human blood. Several studies have linked PFAS to health risks and environmental risks.[1] To help reduce the risk of further exposure to these chemicals, the Government can work towards reducing PFAS containing products through procurement.

The GSA Acquisition Policy Federal Advisory Committee (GAP FAC) was established to provide recommendations specific to GSA to drive regulatory, policy, and process changes in acquisition. The GAP FAC recommended that GSA should move forward with reducing PFAS through government procurement and that GSA should consider product categories that have already been identified by other state and federal programs, specifically: furniture, carpets, rugs, curtains, cookware, food service ware, food packaging materials, cutlery, dishware, paints, cleaning products, stain and water resistant treatments, flooring, and floor care products (''Recommended Categories'').

While much has been learned by connecting with government experts and the GSA GAP FAC, GSA would like to similarly learn from industry partners.

II. Purpose

In 2021, Executive Order 14057 [2] outlined an approach to catalyzing clean energy industries and jobs through federal sustainability. The implementing instructions (OMB Memo M–22–06 [3]) directed federal purchasers to prioritize the procurement of products that do not contain PFAS. This inquiry is an important step towards implementing these instructions by learning more on how to successfully reduce or eliminate potential PFAS exposure through products procured by the Government. GSA has been engaged in a PFAS and product working group to better understand where PFAS is found in the marketplace.

GSA invites comment on the issues discussed in this notice to help inform future rulemaking on how to best reduce

[1] See EPA website on PFAS *https://www.epa.gov/pfas/pfas-explained.*

[2] E.O. 14057 Catalyzing Clean Energy Industries and Jobs Through Federal Sustainability.

[3] OMB Memo M–22–06.

federal procurement of products that either intentionally or unintentionally contain PFAS while minimizing any unnecessary burdens on our industry and logistics partners.

III. Request for Operational Information

GSA seeks responses to the questions listed below. Please explain the reasoning behind your responses in detail. Also, please provide any data, studies, or other evidence that supports your response.

In your response please include your contact information, your business socio-economic category if applicable, and a little bit about your business (such as if you represent a manufacturer, distributor, reseller, or other).

To help GSA review comments efficiently, identify the question to which you are responding by its associated number and letter (*e.g.,* ''III.3a'') or whether you are commenting on a topic not listed below.

1. Aside from a product's ecolabel, are there other ways to identify if a product contains PFAS?

2. Considering GSA's goal to reduce products containing PFAS, what product categories have the greatest opportunity for GSA to reduce or eliminate PFAS exposure?

3. What should GSA consider in terms of defining if a product has reduced or eliminated PFAS?

4. What product areas should GSA exclude at this time and why?

5. Are there unintended impacts GSA should anticipate?

a. If so, what mitigation strategies should GSA consider?

6. What is the potential impact on domestic manufacturing if GSA establishes PFAS reduction requirements that reduce or prohibit PFAS, or eliminate them entirely?

7. What limitations exist for you to identify PFAS in the products that you offer?

8. Would your answers to questions #6 and #7 be different if only intentionally added PFAS (or when a PFAS containing chemical is included in a product that serves an intended function in the product) was the focus of this inquiry?

9. What is the potential impact on small businesses including socio-economic small businesses if GSA establishes PFAS reduction requirements or prohibited PFAS entirely?

10. How long should GSA give contractors to reduce PFAS?

11. What type of exception process should GSA consider?

12. What information is readily available for you to determine if your products contain PFAS chemicals?

a. If there is not information readily available, what type of tools would help you determine if PFAS is present (*e.g.,* supply chain mapping, specific ecolabels, etc.)

13. Would it be more impactful for GSA to target a specific product type or chemical signature in products to meet the goal of reducing or eliminating PFAS?

14. Are there existing industry manufacturing standards or oversight that address PFAS reduction or elimination?

IV. Request for Economic Data and Consumer Research

Aside from the questions listed above, GSA also seeks to better understand the bigger picture regarding what industry changes are in fact feasible from an economic perspective. GSA seeks economic data and consumer research to help increase its understanding of the market. In your response please consider some of the questions highlighted below. You do not have to answer all of these in your response. The intent of the following are simply things to consider.

1. What will the estimated costs be to either reduce or eliminate PFAS within your industry?

2. Is there a large price differential between a product that contains PFAS and an alternative product?

3. How would a reduction or elimination of PFAS containing products impact your company's ability to compete?

4. To what extent is your industry already moving to better understand and reduce the presence of PFAS in products as a result of broader market forces or policies being considered or enacted by entities other than the federal government?

Jeffrey A. Koses,

Senior Procurement Executive, Office of Governmentwide Policy, U.S. General Services Administration.

[FR Doc. 2024–07927 Filed 4–15–24; 8:45 am]

BILLING CODE 6820–61–P

GOVERNMENT PUBLISHING OFFICE

Depository Library Council Meeting

AGENCY: U.S. Government Publishing Office.

ACTION: Notice of meeting.

SUMMARY: The Depository Library Council (DLC) will meet virtually on Thursday, May 2, 2024. The sessions will take place from 12:30 p.m. to 5:15 p.m. (EDT). The meetings will take place online, and anyone can register to attend at *https://www.fdlp.gov/about/events-and-conferences/2024-depository-library-council-virtual-meeting*. Closed captioning will also be provided. The purpose is to discuss matters affecting the Federal Depository Library Program and its transition to a digital program. All sessions are open to the public.

DATES: May 2, 2024.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[CMS–1819–N]

Public Meeting on June 25, 2024 Regarding New and Reconsidered Clinical Diagnostic Laboratory Test Codes for the Clinical Laboratory Fee Schedule for Calendar Year 2025

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice.

SUMMARY: This notice announces a public meeting to receive comments and recommendations (including data on which recommendations are based) on the appropriate basis for establishing payment amounts for new or substantially revised Healthcare Common Procedure Coding System codes being considered for Medicare payment under the Clinical Laboratory Fee Schedule for calendar year 2025. This meeting also provides a forum for those who submitted certain reconsideration requests regarding final determinations made last year on new test codes and for the public to provide comment on the requests.

DATES:

Clinical Laboratory Fee Schedule (CLFS) Annual Public Meeting Date: The public meeting is scheduled for Tuesday, June 25, 2024 from 9:00 a.m. to 5:00 p.m., Eastern Daylight Time (E.D.T.).

Deadline for Submission of Presentations and Written Comments: All presenters for the CLFS Annual Public Meeting must register and submit their presentations electronically to our CLFS dedicated email box, *CLFS_Annual_Public_Meeting@cms.hhs.gov,* by May 30, 2024 at 5:00 p.m., E.D.T. All written comments (non-presenter comments) must also be submitted electronically to our CLFS dedicated email box, *CLFS_Annual_Public_Meeting@cms.hhs.gov,* by May 30, 2024, at 5:00 p.m., E.D.T. Any presentations or written comments received after that date and time will not be included in the meeting and will not be reviewed.

Deadline for Submitting Requests for Special Accommodations: Requests for special accommodations must be received no later than May 30, 2024 at 5:00 p.m. E.D.T.

Publication of Proposed Determinations: We intend to publish our proposed determinations for new test codes and our proposed determinations for reconsidered codes (as described later in section II, ''Format'' of this notice) for calendar year 2025 by early September 2024.

Deadline for Submission of Written Comments Related to Proposed Determinations: Comments in response to the proposed determinations will be due by early October 2024.

ADDRESSES: The CLFS Annual Public Meeting will be held virtually and in-person at the Centers for Medicare & Medicaid Services (CMS), Central Building, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

Where to Submit Written Comments: Interested parties should submit all written comments on presentations and proposed determinations electronically to our CLFS dedicated email box, *CLFS_Annual_Public_Meeting@cms.hhs.gov* (the specific date for the publication of these determinations and the deadline for submitting comments regarding these determinations will be published on the CMS website).

FOR FURTHER INFORMATION CONTACT: Rasheeda Arthur, (410) 786–3434.

The CLFS Policy Team and submit all inquiries to the CLFS dedicated email box, *CLFS_Annual_Public_Meeting@cms.hhs.gov* with the subject entitled ''CLFS Annual Public Meeting Inquiry.''

SUPPLEMENTARY INFORMATION:

I. Background

Section 531(b) of the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (BIPA) (Pub. L. 106–554) required the Secretary of the Department of Health and Human Services (the Secretary) to establish procedures for coding and payment determinations for new clinical diagnostic laboratory tests under part B of title XVIII of the Social Security Act (the Act) that permit public consultation in a manner consistent with the procedures established for implementing coding modifications for International Classification of Diseases, Tenth Revision, Clinical Modification (ICD–10–CM). The procedures and Clinical Laboratory Fee Schedule (CLFS) public meeting announced in this notice for new tests are in accordance with the procedures published on November 23, 2001 in the **Federal Register** (66 FR 58743) to implement section 531(b) of BIPA.

Section 942(b) of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) (Pub. L. 108–173) added section 1833(h)(8) of the Act. Section 1833(h)(8)(A) of the Act requires the Secretary to establish by regulation procedures for determining the basis for, and amount of, payment for any clinical diagnostic laboratory test (CDLT) for which a new or substantially revised Healthcare Common Procedure Coding System (HCPCS) code is assigned on or after January 1, 2005. A code is considered to be substantially revised if there is a substantive change to the definition of the test or procedure to which the code applies (for example, a new analyte or a new methodology for measuring an existing analyte-specific test). (See section 1833(h)(8)(E)(ii) of the Act and 42 CFR 414.502)).

Section 1833(h)(8)(B) of the Act sets forth the process for determining the basis for, and the amount of, payment for new tests. Pertinent to this notice, sections 1833(h)(8)(B)(i) and (ii) of the Act require the Secretary to make available to the public a list that includes any such test for which establishment of a payment amount is being considered for a year and, on the same day that the list is made available, cause to have published in the **Federal Register** notice of a meeting to receive comments and recommendations (including data on which recommendations are based) from the public on the appropriate basis for establishing payment amounts for the tests on such list. This list of codes for which the establishment of a payment amount under the CLFS is being considered for calendar year (CY) 2025 will be posted on the Centers for Medicare & Medicaid Services (CMS) website concurrent with the publication of this notice and may be updated prior to the CLFS Annual Public Meeting. The

CLFS Annual Public Meeting list of codes can be found on the CMS website at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/ClinicalLabFeeSched/index.html?redirect=/ClinicalLabFeeSched/.* Section 1833(h)(8)(B)(iii) of the Act requires that we convene the public meeting not less than 30 days after publication of the notice in the **Federal Register**. The CLFS requirements regarding public consultation are codified at 42 CFR 414.506.

Two bases of payment are used to establish payment amounts for new CDLTs. The first basis, called ''crosswalking,'' is used when a new CDLT is determined to be comparable to an existing test, multiple existing test codes, or a portion of an existing test code. New CDLTs that were assigned new or substantially revised codes prior to January 1, 2018, are subject to provisions set forth under § 414.508(a). For a new CDLT that is assigned a new or significantly revised code on or after January 1, 2018, CMS assigns to the new CDLT code the payment amount established under § 414.507 of the comparable existing CDLT. Payment for the new CDLT code is made at the payment amount established under § 414.507. (See § 414.508(b)(1)).

The second basis, called ''gapfilling,'' is used when no comparable existing CDLT is available. When using this method, instructions are provided to each Medicare Administrative Contractor (MAC) to determine a payment amount for its part B geographic area for use in the first year. In the first year, for a new CDLT that is assigned a new or substantially revised code on or after January 1, 2018, the MAC-specific amounts are established using the following sources of information, if available: (1) charges for the test and routine discounts to charges; (2) resources required to perform the test; (3) payment amounts determined by other payers; (4) charges, payment amounts, and resources required for other tests that may be comparable or otherwise relevant; and (5) other criteria CMS determines appropriate. In the second year, the test code is paid at the median of the MAC-specific amounts. (See § 414.508(b)(2)).

Under section 1833(h)(8)(B)(iv) of the Act and § 414.506(d)(1) CMS, taking into account the comments and recommendations (and accompanying data) received at the CLFS Annual Public Meeting, develops and makes available to the public a list of proposed determinations with respect to the appropriate basis for establishing a payment amount for each code, an explanation of the reasons for each determination, the data on which the determinations are based, and a request for public written comments on the proposed determinations. Under section 1833(h)(8)(B)(v) of the Act and § 414.506(d)(2), taking into account the comments received on the proposed determinations during the public comment period, CMS then develops and makes available to the public a list of final determinations of payment amounts for tests along with the rationale for each determination, the data on which the determinations are based, and responses to comments and suggestions received from the public.

Section 216(a) of the Protecting Access to Medicare Act of 2014 (PAMA) (Pub. L. 113–93) added section 1834A to the Act. The statute requires extensive revisions to the Medicare payment, coding, and coverage requirements for CDLTs. Pertinent to this notice, section 1834A(c)(3) of the Act requires the Secretary to consider recommendations from the expert outside advisory panel established under section 1834A(f)(1) of the Act when determining payment using crosswalking or gapfilling processes. In addition, section 1834A(c)(4) of the Act requires the Secretary to make available to the public an explanation of the payment rates for the new test codes, including an explanation of how the gapfilling criteria and panel recommendations are applied. These requirements are codified in § 414.506(d) and (e).

After the final determinations have been posted on the CMS website, the public may request reconsideration of the basis and amount of payment for a new CDLT as set forth in § 414.509. Pertinent to this notice, those requesting that we reconsider the basis for payment or the payment amount as set forth in § 414.509(a) and (b), may present their reconsideration requests at the following year's CLFS Annual Public Meeting provided the requestor made the request to present at the CLFS Annual Public Meeting in the written reconsideration request. For purposes of this notice, we refer to these codes as the ''reconsidered codes.'' The public may comment on the reconsideration requests. (See the CY 2008 Physician Fee Schedule final rule with comment period published in the **Federal Register** on November 27, 2007 (72 FR 66275 through 66280) for more information on these procedures.)

II. Format

We are following our usual process, including an annual public meeting to determine the appropriate basis and payment amount for new and reconsidered codes under the CLFS for CY 2025. The public hybrid meeting will be conducted virtually and will occur on-site at the CMS Central Building.

This meeting is open to the public. Registration is only required for those interested in presenting public comments during the meeting or attending the meeting in-person at the CMS campus at the address specified in the **ADDRESSES** section of this notice. If attending the meeting in-person, on-site check-in for visitors will be held from 8:30 a.m. to 9:00 a.m. E.D.T., followed by opening remarks.

During this hybrid meeting, registered persons from the public may discuss and make recommendations for specific new and reconsidered codes for the CY 2025 CLFS. The Medicare Advisory Panel on Clinical Diagnostic Laboratory Tests (Advisory Panel on CDLTs) will participate in this CLFS Annual Public Meeting by gathering information and asking questions to presenters, and will hold its next public meeting, virtually and in-person, on July 25 and 26, 2024. The public meeting for the Advisory Panel on CDLTs will focus on the discussion of and recommendations for test codes presented during the June 25, 2024 CLFS Annual Public Meeting. The Panel meeting also will address any other CY 2025 CLFS issues that are designated in the Panel's charter and specified on the meeting agenda. The announcement for the next meeting of the Advisory Panel on CDLTs is included in a separate notice published elsewhere in this issue of the **Federal Register**.

Due to time constraints, presentations must be brief, lasting no longer than 10 minutes. Written presentations must be electronically submitted to CMS on or before May 30, 2024. In addition, if presenting in-person, presenters should make copies available for approximately 50 meeting participants, since CMS will not be providing additional copies to the public. Presentation slots will generally be assigned based upon chronological order of receipt of presentation materials. In the event there is not enough time for presentations by everyone who is interested in presenting, we will only accept written presentations from those who submitted written presentations within the submission window and were unable to present due to time constraints. Presentations should be sent via email to our CLFS dedicated email box, *CLFS_Annual_Public_Meeting@cms.hhs.gov.* In addition, individuals may also submit requests after the CLFS Annual Public Meeting to obtain electronic versions of the

presentations. Requests for electronic copies of the presentations after the public meeting should be sent via email to our CLFS dedicated email box, noted above.

Presenters should submit all presentations using a standard PowerPoint template. In addition to the standard PowerPoint template available, presenters may also provide the same information from the PowerPoint presentation into a provided Excel worksheet template. Submitting the same information that is requested for the PowerPoint presentation into the Excel worksheet template will aid with triaging and reviewing recommendation information during the meeting and after the meeting, during the code review process. The standard PowerPoint presentation and Excel worksheet templates are available on the CMS website, at *https://www.cms.gov/medicare/payment/fee-schedules/clinical-laboratory-fee-schedule-clfs/annual-public-meetings,* under the ''Meeting Notice and Agenda'' heading.

For reconsidered and new codes, presenters should address all of the following five items:

- Reconsidered or new code(s) with the most current code descriptor.
- Test purpose and method with a brief comment on how the new test is different from other similar analyte or methodologies found in tests already on the CLFS.
- Test costs.
- Charges.
- Recommendation with rationale for one of the two bases (crosswalking or gapfilling) for determining payment for reconsidered and new tests.

Additionally, presenters should provide the data on which their recommendations are based. Presentations regarding reconsidered and new test codes that do not address the above five items for presenters may be considered incomplete and may not be considered by CMS when making a determination. However, we may request missing information following the meeting to prevent a recommendation from being considered incomplete.

Taking into account the comments and recommendations (and accompanying data) received at the CLFS Annual Public Meeting, we intend to post our proposed determinations with respect to the appropriate basis for establishing a payment amount for each new test code and our proposed determinations with respect to the reconsidered codes along with an explanation of the reasons for each determination, the data on which the determinations are based, and a request for public written comments on these determinations on our website by early September 2024. The CMS website is *https://www.cms.gov/medicare/payment/fee-schedules/clinical-laboratory-fee-schedule-clfs/annual-public-meetings.* Interested parties may submit written comments on the proposed determinations for new and reconsidered codes by early October 2024, electronically to our CLFS dedicated email box, *CLFS_Annual_Public_Meeting@cms.hhs.gov* (the specific date for the publication of the determinations on the CMS website, as well as the deadline for submitting comments regarding the determinations, will be published on the CMS website). Final determinations for new test codes to be included for payment on the CLFS for CY 2025 and reconsidered codes will be posted our website in November 2024, along with the rationale for each determination, the data on which the determinations are based, and responses to comments and suggestions received from the public. The final determinations with respect to reconsidered codes are not subject to further reconsideration. With respect to the final determinations for new test codes, the public may request reconsideration of the basis and amount of payment as set forth in § 414.509.

III. Registration Instructions

The Division of Ambulatory Services in the CMS Center for Medicare is coordinating the CLFS Annual Public Meeting registration. Beginning May 1, 2024 and ending May 30, 2024, registration may be completed by presenters and in-person attendees. Individuals who intend to view and/or listen to the meeting virtually do not need to register. Presenter registration and individuals who intend to attend the meeting at the CMS campus must register by sending an email to CMS's CLFS dedicated email box, *CLFS_Annual_Public_Meeting@cms.hhs.gov.* The subject of the email should state ''Presenter or In-Person Attendee Registration for CY 2024 CLFS Annual Laboratory Meeting.'' All of the following information must be submitted when registering:

- Speaker or In-Person Attendee name.
- Organization or company name.
- Telephone numbers.
- Email address that will be used by the presenter to connect to the virtual meeting.
- New or Reconsidered Code (s) for which presentation is being submitted (if applicable).
- Presentation (if applicable).
- Excel Worksheet (if applicable).

Registration details may not be revised once they are submitted. If registration details require changes, a new registration entry must be submitted by the date specified in the **DATES** section of this notice. Additionally, registration information must reflect individual-level content and not reflect the name of an organization. For example, an organization cannot request to register a group of individuals without specifying registration details for each individual being registered. See section V for further information.

After registering, a confirmation email will be sent upon receipt of the registration. The email will provide information to the presenter or in-person attendee in preparation for the meeting. Registration is only required for individuals giving a presentation during the meeting or attending the meeting at the CMS campus. Presenters or in-person attendees must register by the deadline specified in the **DATES** section of this notice.

If you are not presenting during the CLFS Annual Public Meeting or cannot attend in person, you may view the meeting via webinar or listen-only by teleconference. If you would like to listen to or view the meeting, teleconference dial-in and webinar information will appear on the final CLFS Annual Public Meeting agenda, which will be posted on the CMS website when available at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/ClinicalLabFeeSched/index.html?redirect=/ClinicalLabFeeSched/.*

IV. Special Accommodations

Individuals viewing or listening to the meeting who are hearing or visually impaired and have special requirements, or a condition that requires special assistance, should send an email to the CMS resource box (*CDLT_Annual_Public_Meeting@cms.hhs.gov*). The deadline for submitting this request is listed in the **DATES** section of this notice.

V. Security, Building, and Parking Guidelines

This hybrid meeting will be held in a Federal government building; therefore, Federal security measures are applicable. In planning your arrival time, we recommend allowing additional time to clear security. We suggest that you arrive at the CMS campus and parking facilities between 8:00 a.m. and 8:45 a.m. E.D.T., so that you will be able to arrive promptly at the meeting by 9:00 a.m. E.D.T. Individuals who are not registered in

advance will not be permitted to enter the building and will be unable to attend the meeting. We note that the public may not enter the CMS building earlier than 8:15 a.m. E.D.T. (45 minutes before the convening of the meeting).

Security measures include the following:

- Presentation of government-issued photographic identification to the Federal Protective Service or Guard Service personnel. Persons without proper identification may be denied access to the building.
- Interior and exterior inspection of vehicles (this includes engine and trunk inspection) at the entrance to the grounds. Parking permits and instructions will be issued after the vehicle inspection.
- Passing through a metal detector and inspection of items brought into the building. We note that all items brought to CMS, whether personal or for the purpose of demonstration or to support a demonstration, are subject to inspection. We cannot assume responsibility for coordinating the receipt, transfer, transport, storage, set-up, safety, or timely arrival of any personal belongings or items used for demonstration or to support a demonstration.

VI. Collection of Information Requirements

This document does not impose information collection requirements, that is, reporting, recordkeeping, or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

The Administrator of CMS, Chiquita Brooks-LaSure, having reviewed and approved this document, authorizes Vanessa Garcia, who is the **Federal Register** Liaison, to electronically sign this document for purposes of publication in the **Federal Register**.

Vanessa Garcia,

Federal Register Liaison, Centers for Medicare & Medicaid Services.

[FR Doc. 2024–08005 Filed 4–15–24; 8:45 am]

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifiers: CMS–10573]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by June 17, 2024.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to *http://www.regulations.gov.* Follow the instructions for ''Comment or Submission'' or ''More Search Options'' to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number: ____, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, please access the CMS PRA website by copying and pasting the following web address into your web browser: *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.*

FOR FURTHER INFORMATION CONTACT: William N. Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS–10573 Reform of Requirements for Long-Term Care Facilities

Under the PRA (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collection

1. *Type of Information Collection Request:* Revision of a currently approved collection; *Title of Information Collection:* Reform of Requirements for Long-Term Care Facilities; *Use:* The purpose of this package is to request Office of Management and Budget (OMB) approval of the collection of information requirements for the requirements of participation for Long-Term Care (LTC) facilities that must be met in order to participate in the Medicare and Medicaid Programs. LTC facilities include skilled nursing facilities (SNFs) as defined in section 1819(a) of the Social Security Act in the Medicare program and nursing facilities (NFs) as defined in 1919(a) of the Act in the

Medicaid program. SNFs and NFs provide skilled nursing care and related services for residents who require medical or nursing care, or rehabilitation services for the rehabilitation of injured, disabled, or sick persons. In addition, NFs provide health-related care and services to individuals who because of their mental or physical condition require care and services (above the level of room and board) which can be made available to them only through institutional facilities, and is not primarily for the care and treatment of mental diseases. SNFs and NFs must care for their residents in such a manner and in such an environment as will promote maintenance or enhancement of the quality of life of each resident and must provide to residents services to attain or maintain the highest practicable physical, mental, and psychosocial well-being of each resident, in accordance with a written plan of care, which describes the medical, nursing, and psychosocial needs of the resident and how such needs will be met and is updated periodically.

The primary users of this information will be State agency surveyors, CMS, and the LTC facilities for the purposes of ensuring compliance with Medicare and Medicaid requirements as well as ensuring the quality of care provided to LTC facility residents. The ICs specified in the regulations may be used as a basis for determining whether a LTC is meeting the requirements to participate in the Medicare program. In addition, the information collected for purposes of ensuring compliance may be used to inform the data provided on CMS' Nursing Home Compare website and as such used by the public in considering nursing home selections for services.

We are revising this information collection request to include new requirements proposed at 42 CFR 483.35 and 483.71. The proposed requirements were discussed in detail in the proposed rule that published September 6, 2023 (88 FR 61352). The discussion related to proposed requirements and the associated information collection burden begins on page 61391. We are not making any other revisions to the information collection request at this time.

Form Number: CMS–10573 (OMB control number: 0938–1363); *Frequency:* Occasionally; *Affected Public:* Private Sector: Business or other for-profit and not-for-profit institutions; *Number of Respondents:* 15,600; *Total Annual Responses:* 18,687,318 *Total Annual Hours:* 30,309,662. (For policy questions regarding this collection contact Diane Corning at 410–786–8486.)

William N. Parham, III

Director, Division of Information Collections and Regulatory Impacts, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[CMS–1824–N]

Medicare Program; Meeting Announcement for the Medicare Advisory Panel on Clinical Diagnostic Laboratory Tests, July 25–26, 2024

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice.

SUMMARY: This notice announces the public meeting dates for the Medicare Advisory Panel on Clinical Diagnostic Laboratory Tests (the Panel) on Thursday, July 25, 2024 and Friday, July 26, 2024. The purpose of the Panel is to advise the Secretary of the Department of Health and Human Services and the Administrator of the Centers for Medicare & Medicaid Services on issues related to clinical diagnostic laboratory tests.

DATES:

Meeting Dates: The hybrid (in-person and virtual) meeting of the Panel is scheduled for Thursday, July 25, 2024 from 10:00 a.m. to 4:00 p.m., Eastern Daylight Time (E.D.T.) and Friday, July 26, 2024, from 10:00 a.m. to 4:00 p.m., E.D.T. The Panel is also expected to participate virtually in the Clinical Laboratory Fee Schedule (CLFS) Annual Public Meeting for Calendar Year (CY) 2025 on Tuesday, June 25, 2024, to gather information and ask questions to presenters. Notice of the CLFS Annual Public Meeting for CY 2025 is published elsewhere in this issue of the **Federal Register**.

Deadline for Meeting Registration: All stand-by speakers for the Panel meeting must register electronically to our CDLT Panel dedicated email box, *CDLTPanel@cms.hhs.gov* by June 1, 2024.

In-Person Attendance: If attending the meeting in person at the CMS Headquarters, registration is required and must be completed by May 30, 2025. For more information on how to register as an in-person attendee, see the ''Registration Instructions'' (section IV of this notice).

Virtual Attendee Only: The public may also view this meeting via webinar or listen-only via teleconference. If attending the meeting via webinar, or listen-only via teleconference, registration is not required for non-speakers.

Webinar and Teleconference Meeting Information: Teleconference dial-in instructions, and related webinar details will be posted on the meeting agenda, which will be available on the CMS website approximately 2 weeks prior to the meeting at *https://www.cms.gov/Regulations-and-Guidance/Guidance/FACA/AdvisoryPanelonClinicalDiagnosticLaboratoryTests.html.* A preliminary agenda is described in section II of this notice.

ADDRESSES: The Panel meeting will be held *virtually* and *in-person* at the campus of the Centers for Medicare & Medicaid Services (CMS), Central Building, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

FOR FURTHER INFORMATION CONTACT: The CLFS Policy Team via email, *CDLTPanel@cms.hhs.gov;* or Rasheeda Arthur, (410) 786–3434. The CMS Press Office, for press inquiries, (202) 690–6145.

SUPPLEMENTARY INFORMATION:

I. Background

The Medicare Advisory Panel on Clinical Diagnostic Laboratory Tests (CDLTs) (the Panel) is authorized by section 1834A(f)(1) of the Social Security Act (the Act) (42 U.S.C. 1395m–1), as established by section 216(a) of the Protecting Access to Medicare Act of 2014 (PAMA) (Pub. L. 113–93), enacted on April 1, 2014. The Panel is subject to the Federal Advisory Committee Act (FACA), as amended (5 U.S.C. appendix 2), which sets forth standards for the formation and use of advisory panels.

Section 1834A(f)(1) of the Act directs the Secretary of the Department of Health and Human Services (the Secretary) to consult with an expert outside advisory panel established by the Secretary, composed of an appropriate selection of individuals with expertise in issues related to clinical diagnostic laboratory tests, which may include the development, validation, performance, and application of such tests. Such individuals may include molecular pathologists, researchers, and individuals with expertise in laboratory science or health economics.

The Panel will provide input and recommendations to the Secretary and the Administrator of the Centers for

Medicare & Medicaid Services (CMS), on the following:

- The establishment of payment rates under section 1834A of the Act for new clinical diagnostic laboratory tests, including whether to use ''crosswalking'' or ''gap filling'' processes to determine payment for a specific new test.
- The factors used in determining coverage and payment processes for new clinical diagnostic laboratory tests.
- Other aspects of the payment system under section 1834A of the Act.

A notice announcing the establishment of the Panel and soliciting nominations for members was published in the October 27, 2014 **Federal Register** (79 FR 63919 through 63920). In the August 7, 2015 **Federal Register** (80 FR 47491), we announced membership appointments to the Panel along with the first public meeting date for the Panel, which was held on August 26, 2015. Subsequent meetings of the Panel and membership appointments were also announced in the **Federal Register**.

II. Agenda

The Agenda for the July 25 and July 26, 2024 hybrid Panel meeting will provide for discussion and comment on the following topics as designated in the Panel's charter:

- Calendar Year (CY) 2025 Clinical Laboratory Fee Schedule (CLFS) new and reconsidered test codes, which will be posted on the CMS website at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/ClinicalLabFeeSched/Laboratory_Public_Meetings.html.*
- Other CY 2025 CLFS issues designated in the Panel's charter and further described on our Agenda.

A detailed Agenda will be posted approximately 2 weeks before the meeting, on the CMS website at *https://www.cms.gov/medicare/payment/fee-schedules/clinical-laboratory-fee-schedule-clfs/clfs-advisory-panel.* The Panel will make recommendations to the Secretary and the Administrator of CMS regarding crosswalking and gap filling for new and reconsidered laboratory tests discussed during the CLFS Annual Public Meeting for CY 2025. The Panel will also provide input on other CY 2025 CLFS issues that are designated in the Panel's charter and specified on the meeting agenda.

III. Meeting Participation

This meeting is open to the public. Stand-by speakers may participate in the meeting in-person via teleconference and webinar. A stand-by speaker is an individual who will speak on behalf of a company or organization if the Panel has any questions during the meeting about technical information described in the public comments or presentation previously submitted or presented by the organization or company at the recent CLFS Annual Public Meeting for CY 2025 on June 25, 2024. The public may also attend the hybrid meeting in-person or view and/or listen-only to the meeting via teleconference and webinar.

IV. Registration Instructions

Beginning May 1, 2024 and ending May 30, 2024 at 5:00 p.m. E.D.T., registration for stand-by speakers and in-person attendees may be completed by sending an email to the following resource box: *CDLTPanel@cms.hhs.gov.*

If you are registering (for example, stand-by speaker or in-person attendee), the subject of the email should state ''Registration for CDLT Panel Meeting.'' Note: No registration is required for participants who plan to view the Panel meeting via webinar or listen via teleconference.

In the email, all of the following information must be submitted when registering:

- Name.
- Indicate if you are registering as a ''Stand-by speaker'' or ''In-Person Attendee.''
- Organization or company name.
- Email addresses that will be used by the speaker in order to connect to the virtual meeting.
- New or Reconsidered Code(s) for which the company or organization you are representing submitted a comment or presentation, if applicable.

Registration details may not be revised once they are submitted. If registration details require changes, a new registration entry must be submitted by the date specified in the **DATES** section of this notice. Additionally, registration information must reflect individual-level content and not reflect an organization name. Also, we request organizations register all individuals at the same time. That is, one individual may register multiple individuals at the same time.

After registering, a confirmation email will be sent upon receipt of the registration. The email will provide information to the attendee in preparation for the meeting. Registration is only required for stand-by speakers and members of the public attending the meeting at the CMS campus (address specified in the **ADDRESSES** section of this notice). All registration must be submitted by the deadline specified in the **DATES** section of this notice. We note that no registration is required for participants who plan to view the Panel meeting via webinar or listen via teleconference.

V. Panel Recommendations and Discussions

The Panel's recommendations will be posted approximately 2 weeks after the meeting on the CMS website at *https://www.cms.gov/Regulations-and-Guidance/Guidance/FACA/AdvisoryPanelonClinicalDiagnosticLaboratoryTests.html.*

VI. Security, Building, and Parking Guidelines

The hybrid meeting will be virtual and will be held in a Federal Government building; therefore, Federal security measures are applicable. In planning your arrival time, we recommend allowing additional time to clear security. We suggest that you arrive at the CMS campus and parking facilities between 9:00 a.m. and 10:00 a.m. E.D.T., so that you will be able to arrive promptly at the meeting by 10:00 a.m. E.D.T. Individuals who are not registered in advance will not be permitted to enter the building and will be unable to attend the meeting. We note that the public may not enter the CMS building earlier than 9:15 a.m. E.D.T. (45 minutes before the convening of the meeting).

- Presentation of government-issued photographic identification to the Federal Protective Service or Guard Service personnel. Persons without proper identification may be denied access to the building.
- Interior and exterior inspection of vehicles (this includes engine and trunk inspection) at the entrance to the grounds. Parking permits and instructions will be issued after the vehicle inspection.
- Passing through a metal detector and inspection of items brought into the building. We note that all items brought to CMS, whether personal or for the purpose of demonstration or to support a demonstration, are subject to inspection. We cannot assume responsibility for coordinating the receipt, transfer, transport, storage, set-up, safety, or timely arrival of any personal belongings or items used for demonstration or to support a demonstration.

VII. Special Accommodations

Individuals attending, viewing, or listening to the meeting who are hearing or visually impaired and have special requirements, or a condition that requires special assistance, should send an email to the resource box (*CDLTPanel@cms.hhs.gov*). The

deadline for submitting this request is listed in the **DATES** section of this notice.

VIII. Copies of the Charter

The Secretary's Charter for the Medicare Advisory Panel on CDLT's is available on the CMS website at *https://www.cms.gov/medicare/payment/fee-schedules/clinical-laboratory-fee-schedule-clfs/clfs-advisory-panel* or you may obtain a copy of the charter by submitting a request to the contact listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

IX. Collection of Information Requirements

This document does not impose information collection requirements, that is, reporting, recordkeeping, or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

The Administrator of CMS, Chiquita Brooks-LaSure, having reviewed and approved this document, authorizes Vanessa Garcia, who is the Federal Register Liaison, to electronically sign this document for purposes of publication in the **Federal Register**.

Vanessa Garcia,

Federal Register Liaison, Centers for Medicare & Medicaid Services.

[FR Doc. 2024–08008 Filed 4–15–24; 8:45 am]

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Community Living

Agency Information Collection Activities: Submission for OMB Review; Public Comment Request; Prevention and Public Health Fund Evidence-Based Falls Prevention Program Information Collection; OMB Control Number 0985–0039

AGENCY: Administration for Community Living, Department of Health and Human Services.

ACTION: Notice.

SUMMARY: The Administration for Community Living (ACL) is announcing that the proposed collection of information listed above has been submitted to the Office of Management and Budget (OMB) for review and clearance as required under the Paperwork Reduction Act of 1995. This 30-day notice collects comments on the information collection requirements related to the proposed extension of this ACL Prevention and Public Health Fund Evidence-Based Falls Prevention Program Information Collection.

DATES: Comments on the collection of information must be submitted electronically by 11:59 p.m. ET or postmarked. May 16, 2024.

ADDRESSES: Submit written comments and recommendations for the proposed information collection within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.*

Find the information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. By mail to the Office of Information and Regulatory Affairs, OMB, New Executive Office Bldg., 725 17th St. NW, Rm. 10235, Washington, DC 20503, Attention: OMB Desk Officer for ACL.

FOR FURTHER INFORMATION CONTACT: Donna Bethge, Administration for Community Living. Washington, DC 20201, or *Donna.Bethge@acl.hhs.gov,* (202) 795–7659.

SUPPLEMENTARY INFORMATION: In compliance with the Paperwork Reduction Act (44 U.S.C. 3506), the Administration for Community Living (ACL) has submitted the following proposed collection of information to OMB for review and clearance. The Evidence-Based Falls Prevention Grant Program is financed through the Prevention and Public Health Fund (PPHF). The statutory authority for cooperative agreements under the most recent program announcement (FY 2023) is contained in the Older Americans Act, title IV; and the Patient Protection and Affordable Care Act, (Prevention and Public Health Fund). The Falls Prevention Grant Program awards competitive grants to implement and promote the sustainability of evidence-based Falls Prevention programs that have been proven to provide older adults and adults with disabilities with education and tools to help them reduce falls and/or risk of falls and fall-related injuries and supports a National Falls Prevention Resource Center that provides technical assistance, education, and resources for the national Falls Prevention network of partners. OMB approval of the existing set of Falls Prevention data collection tools (OMB Control Number, 0985–0039) expires on 04/30/2024. This data collection continues to be necessary for the monitoring of program operations and outcomes. ACL currently uses and proposes to continue to use the following tools to collect information for each program:

(1) a Program Information Cover Sheet and an Attendance Log, completed by the program leaders, to record the location of agencies that sponsor programs and will allow mapping of the delivery infrastructure; and

(2) a Participant Information Form and a Participant Post Program Survey to be completed by participants.

ACL intends to continue using an online data entry system for the program and participant survey data.

This IC collects demographic data from grantees receiving programs and services funded by HHS. ACL will adhere to best practices for collection of all demographic information when this information is collected for the programs listed in accordance with OMB guidance.

This includes, but is not limited to, guidance specific to the collection of sexual orientation and gender identity (SOGI) items that align with Executive Order 13985 on Advancing Racial Equity and Support for Underserved Communities Through the Federal Government, Executive Order 14075 on Advancing Equality for Lesbian, Gay, Bisexual, Transgender, Queer, and Intersex Individuals, and Executive Order 13988 on Preventing and Combating Discrimination on the Basis of Gender Identity and Sexual Orientation. Understanding these disparities can and should lead to improved service delivery for ACL's programs and populations served.

Comments in Response to the 60-day Federal Register Notice (FRN)

ACL published a 60-day FRN on December 14, 2023, at 88 FR 86657. ACL received fifty-four comments from the public, feedback from four focus groups (that included a subset of current and past falls prevention grantees and program administrators) and input from subject matter experts during the 60-day public comment period. A public comment summary table and ACL response is provided below.

PARTICIPANT INFORMATION FORM AND PARTICIPANT POST PROGRAM SURVEY

Comment	Response
Several comments suggested incorporating inclusive sexual orientation and gender identity question(s).	HHS and ACL, as an operating division of HHS, recognize the importance of collecting Sexual Orientation and Gender Identity (SOGI) data to better assess diversity and equity in evidence-based program scaling and participation. ACL has incorporated more inclusive questions and responses.
Several comments suggested adding a question to ask if the participant was a caregiver.	ACL has adopted this suggestion.
Suggestions were received to edit the question regarding chronic conditions: • Include additional conditions (*e.g.,* Hearing Loss and Vision Impairment among others). • Increase possible responses (including length of diagnosis, don't remember or not sure).	ACL reviewed the chronic condition question and: • Adopted suggestions of certain conditions that most aligned to fall risk and the growing prevalence of these conditions in the aging population. • Additional responses were not adopted at this time.
Several comments received suggested revising the social isolation and loneliness question as it combines two different conditions.	ACL has adopted the suggestion to separate the single question into two questions in efforts to better analyze and report the information collected.
Multiple comments made suggestions for the existing question 11 regarding falls: • Change formatting for clarification • Change Primary Care Physician to Health Care Provider • Edit and reorder answers for 11 b and c. Add 'urgent care' and 'blank response'. • Distinguish the difference between telling family/friend verse telling a healthcare provider.	ACL adopted the following suggestions: • Corrected formatting. • Changed language from Primary Care Physician to Health Care Provider. • Combined question b and c to reduce burden and added Urgent Care Center as a response option.
Some comments suggested changing language in the existing question 13: • Make language consistent with existing question 11, changing "During the last 4 weeks" to "In the past 3 months". • Remove "to what extent" • Provide an example such as "avoiding a friend's home that has steps to enter", "avoiding areas with uneven ground," etc.".	ACL adopted these suggestions by adjusting language: • Changed "During the last 4 weeks" to "In the Past 3 months" for consistency across the collection. • Removed "to what extent" for language simplification. • Added clarifying example of "avoiding situations with stairs or uneven ground".
There were several comments surrounding existing question 14: • Rephrase language to clarify the question and produce more useful feedback. • Replace existing question 14 with a validated outcome measure using activities of daily living (ADLs) to rate confidence. • A physical function question would be a better fit to define level of independence more clearly.	ACL adopted the suggestions by replacing the existing question 12 and 14 with questions that rate falls confidence level surrounding activities of daily living (ADLs).
Many comments received made suggestions for existing question 15: • Change language to lower reading level • Include descriptions for certain terms • Define 'vigorously' and 'moderately' more clearly and include examples in laymen's terms.	ACL adopted some modifications to the question: • Modified language to replicate wording from the Physical Activity Guidelines. • Added examples of activity from the Physical Activity Guidelines.
Several comments suggested adding the following questions to the forms: • Reason for taking the class • Collect name, date of birth, and insurance information • How did you hear about this class? Use of a mobility aid to include cane, walker, wheelchair, crutches, prosthesis, orthosis, others.	ACL did not adopt these suggestions. These questions can be added as an optional question by grantees when appropriate.
For Participant Post Program Survey only Many comments suggested changes to the existing question 8 and 9 • Remove the redundancy of question 8 and 9 • Adjust questions to action-oriented responses rather than feelings or intent • Suggest "I increased my activity level" rather than "I feel more comfortable increasing my activity level.". • Suggest moving some questions under a different heading • Recategorize "recommend program to friend" • Remove questions that are not relevant to falls prevention programs that have a different focus area.	ACL adopted the suggestions by: • Reviewing and removing the redundancy of question 8 and 9. • Combining the questions to reduce burden. • Removing any questions that were not core questions that spanned all program areas. Removed questions like "I have made safety modifications in my home . . .". These can be optional questions added by grantees when appropriate. • Language was adjusted to be action oriented.

FALL PREVENTION COVERSHEET

Comment	Response
A few comments suggested that program leaders do not know the funding source	ACL added language to clarify that the form should be adapted by the grantee to only include applicable funding sources.
Several comments suggested adding questions to capture: • Mode of delivery • Program setting • Whether facilitators are paid staff, volunteers or other • Whether the program is an adaptation	ACL has adopted 2 of the suggestions: • A question was added to indicate mode of delivery. • A question was added clarifying if facilitators are paid staff, volunteers or other. ACL did not adopt adding a question about adaptation.

FALL PREVENTION ATTENDANCE LOG

Comment	Response
A suggestion was submitted to add a column for the total number of classes attended and a check box if the participant was considered a completer.	ACL adopted the suggestion add a column for the total number of classes attended. ACL did not adopt adding a box to check if a participant was a completer due to the variability of definition of a completer across programs.
A suggestion was submitted to add space for the date of each session and names of leaders/coaches.	ACL did not adopt this suggestion. The form can be modified by the grantee.
Some comments suggested that for ease of data entry, the participant identification number is too long.	ACL acknowledges these comments.

COMMENTS RELEVANT TO ALL FORMS

Comment	Response
Some commenters suggested changes to the collection of data, *i.e.,* prefilled forms and positive remarks to prevent falls.	ACL will provide the documents in Word format. If resources allow, we will provide fillable PDFs for grantee use.
One respondent commented that the burden of data entry falls on the program coordinators taking hours to enter different forms.	ACL acknowledges the comment.

Estimated Program Burden: ACL estimates the burden of this collection of information as follows:

Respondent/data collection activity	Number of respondents	Responses per respondent	Hours per response	Annual burden hours
Program leaders (Program Information Cover Sheet, Attendance Log).	480 leaders	Twice a year (one set per program).	.50	480
Data entry staff (Program Information Cover Sheet, Attendance Log, Participant Information Survey, Participant Post Program Survey).	48 data entry staff	Once per program × 938 programs.	.50	469
Program participants (Participant Information Survey)	12,265	1	.10	1,226
Program participants (Participant Post Program Survey)	7,359	1	.10	735
Total Burden Hours				2,910

Dated: April 10, 2024.

Alison Barkoff,

Principal Deputy Administrator for the Administration for Community Living, performing the delegable duties of the Administrator and the Assistant Secretary for Aging.

BILLING CODE 4154–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–N–1336]

Center for Drug Evaluation and Research Center for Clinical Trial Innovation

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is publishing this notice to announce the establishment of the Center for Drug Evaluation and Research (CDER) Center for Clinical Trial Innovation (C3TI). C3TI aims to be a central hub within CDER that supports innovative approaches to clinical trials that are designed to improve the quality and efficiency of drug development and regulatory decision making. C3TI's mission is to promote existing and future CDER clinical trial innovation activities through enhanced communication and collaboration. Existing CDER clinical development innovation programs will continue to operate according to their established processes with C3TI serving to synthesize lessons learned across those programs. C3TI will also be providing additional opportunities for sponsors of innovative clinical trials in the project areas described below to interact with CDER staff with the goal of fostering knowledge sharing both internally and externally.

DATES: The applicable date of this notice is April 15, 2024.

FOR FURTHER INFORMATION CONTACT: Kevin Bugin, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 22, Rm. 6312, Silver Spring, MD 20993–0002, 301–796–2302, *Kevin.Bugin@fda.hhs.gov* or *CDERClinicalTrialInnovation@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

CDER guides and fosters drug development by providing scientific and regulatory advice and direction. Evolving understanding of disease biology and molecular pharmacology, advancements in drug discovery, and growth in novel therapeutics have the potential to transform the development of promising new therapies. These changes in the drug development landscape can be further facilitated by novel clinical trial designs, innovative strategies for trial execution, and the expanding range of drug development tools. Similarly, later stages of development, including in the postmarketing setting, can benefit from innovative approaches to study design and analysis. These innovative approaches can include adoption of new statistical approaches, incorporation of pragmatic trial elements, the implementation of point-of-care trials, and wider adoption of selective safety data collection.

With this changing landscape in mind, CDER has many ongoing efforts to advance innovation in clinical trial design and conduct. These CDER efforts have led to improvements in more efficiently designing and conducting

clinical trials that are intended to generate evidence of safety and effectiveness of therapies that in turn showcase the value of clinical trial innovations. CDER leads or co-leads several ongoing programs to advance innovation, and CDER recognizes that additional innovative areas would benefit from the enhanced interactions that are the staple of these programs.

CDER also recognizes that opportunities exist to further enhance the adoption of clinical trial innovations, including the amplification of lessons learned across CDER's robust clinical innovation programs. On October 17, 2023, CDER solicited public comments on the barriers and facilitators to incorporating successful or promising innovative clinical trial approaches in drug development programs. These public comments were discussed as part of a public workshop led by the Duke-Margolis Institute for Health Policy, under a cooperative agreement with FDA, on March 19 and 20, 2024. Topics addressed during the workshop included, but were not limited to, those listed below:

- Evolution of clinical research and the current state of trial innovation
- Regulatory and compliance considerations
- Patient-centric and recruitment considerations
- Infrastructure and organizational considerations
- Global regulatory collaboration on clinical trial innovation
- Collaborations across industry, academia, and FDA to leverage innovation
- Future directions on clinical trial innovation

As a result of these discussions and internal deliberation, FDA is establishing C3TI to further enhance clinical trial innovation for drug development and regulatory decision making. C3TI will serve as a central hub to (1) facilitate the sharing of lessons learned across CDER's existing clinical trial innovation programs, (2) communicate and collaborate with external parties about innovative clinical trials, and (3) manage a C3TI Demonstration Program that will expand opportunities for sponsors of innovative clinical trials in the areas described below that are under a pre-investigational new drug application (pre-IND) or IND to interact with CDER staff.

II. Goals of C3TI

Specifically, C3TI aims to:

- Assist stakeholders involved in clinical research in staying current with clinical trial innovations
- Improve the efficiency and effectiveness of clinical trials
- Help increase the participation of diverse populations in clinical trials
- Enhance the quality of clinical trial data
- Accelerate the development of safe and effective new drugs
- Serve as a central hub for knowledge management and coordinating lessons learned across CDER's clinical trial innovation programs
- Establish a C3TI Demonstration Program that will include case examples from ongoing development programs in the project areas described below to spur innovation across therapeutic areas

III. Activities of C3TI

C3TI provides a single CDER location to engage stakeholders and assist with non-product-specific questions on innovative clinical trial approaches. C3TI maintains a website at *fda.gov/C3TI* to centralize information on existing and new CDER clinical trial innovation efforts, including links to existing websites and resources. C3TI can be contacted at *CDERClinicalTrialInnovation@fda.hhs.gov.* Additionally, C3TI will coordinate and act as a liaison to facilitate information sharing with external stakeholders, as appropriate and permitted by law, when they engage CDER on general clinical trial innovation matters. It will also support knowledge sharing internally through various mechanisms, such as discussion forums and communications, and a centralized knowledge repository. This repository will curate knowledge about completed CDER clinical trial innovation activities and maintain a comprehensive portfolio of ongoing efforts and knowledge resources.

A critical component of C3TI is expanding the subject areas that could benefit from enhanced communication between CDER and sponsors and serve as case examples to spur further innovation. Therefore, C3TI will manage a demonstration program that includes three initial subject matter/project areas described below. The program is for selected sponsors of innovative clinical trials in certain initial project areas under a pre-IND or IND with CDER that are intended to support new drug product approvals or changes to approved drug product labeling and that will serve as case examples that can be shared both internally and externally to foster innovation across therapeutic areas. If selected, sponsors will have the opportunity for enhanced communication and interaction with CDER staff. Because the goal of selecting these case examples from clinical trials under a pre-IND or IND is to ultimately share lessons learned more broadly with the clinical trial community, participating sponsors and FDA will agree on aspects of the development program that FDA can disclose even before a drug is approved.

The three initial project areas under the C3TI Demonstration Program are (1) point-of-care or pragmatic trials, (2) Bayesian analyses, and (3) trials using selective safety data collection. More information about the C3TI Demonstration Program, including how to participate and how the program differs from existing clinical trial innovation programs, is available on the C3TI website: *fda.gov/C3TI.*

IV. Paperwork Reduction Act of 1995

For the C3TI Demonstration Program, FDA will request information from no more than nine sponsors. Initial statements of interest from sponsors interested in being evaluated for participation in the C3TI Demonstration Program are not ''information'' in accordance with 5 CFR 1320.3(h)(1). Thus, this notice contains no new collection of information.

This notice also refers to previously approved FDA collections of information. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521). The collections of information in 21 CFR part 312 have been approved under OMB control number 0910–0014. The collections of information relating to formal meetings between sponsors or applicants and FDA has been approved under OMB control number 0910–0001.

Dated: April 9, 2024.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

[Document Identifier: OS–0990–0330]

Agency Information Collection Request; 30-Day Public Comment Request

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: In compliance with the requirement of the Paperwork

Reduction Act of 1995, the Office of the Secretary (OS), Department of Health and Human Services (HHS), is publishing the following summary of a proposed collection for public comment.

DATES: Comments on the ICR must be received on or before May 16, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Sherrette Funn, *Sherrette.Funn@hhs.gov* or (202) 264–0041, or *PRA@HHS.GOV.* When submitting comments or requesting information, please include the document identifier 0990–0330–60D and project title for reference.

SUPPLEMENTARY INFORMATION: Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Title of the Collection: Appellant Climate Survey.

Type of Collection: Revision.

OMB No. 0990–0330, HHS, OS, Office of Medicare Hearings and Appeals.

Abstract:

The Department of Health and Human Services under the Office of Medicare Hearings and Appeals is doing the annual OMHA Appellant Climate Survey. This is a survey of Medicare beneficiaries, providers, suppliers, or their representatives who participated in a hearing before an Administrative Law Judge (ALJ) from OMHA. Appellants dissatisfied with the outcome of their Level 2 Medicare appeal may request a hearing before an OMHA ALJ. The Appellant Climate Survey will be used to measure appellant satisfaction with their OMHA appeals experience, as opposed to their satisfaction with a specific ruling. OMHA was established by the Medicare Prescription Drug, Improvement, and Modernization Act (MMA) of 2003 (Pub. L. 108–173) and became operational on July 1, 2005. The MMA legislation also directed HHS to consider the feasibility of conducting hearings using telephone or video-teleconference (VTC) technologies. In carrying out this mandate, OMHA makes use of both telephone and VTC to provide appellants with a vast nationwide network of Field Offices for hearings. The first 3-year administration cycle of the OMHA survey began in fiscal year (FY) 2008, a second 3-year cycle began in FY 2011, a third 3-year cycle began in FY 2014, a fourth 3-year cycle began in FY 2018, and a fifth 3-year cycle began in FY 2021. The survey will continue to be conducted annually over a 3-year period with the next data collection cycle beginning in FY 2024.

The survey instrument includes several changes from the prior 3-year cycle: Added a new section, ''Request for Hearing.'' The section focuses on how customers requested a hearing, how satisfied they were with the method they used to request a hearing, and about the clarity of form OMHA–100 (Request for ALJ Hearing or Review of Dismissal).

Changed ''Hard Copy, internet and Phone Information'' section to ''Communications and Web Tools'' section.

Added a brief statement about when customers should have received the ''Notice of Nondiscrimination'' document.

Added two satisfaction questions for appellants who used the e-Appeal Portal—one about updates the portal provides on their appeal and another about using the portal for uploading documents electronically.

Changed ''Telephone Hearing'' section to ''Hearing.'' The appellant is asked what type of hearing they had (telephone or video) and satisfaction with using that method. If they attended a telephone hearing, appellants will be asked whether they were offered the option of a video hearing; if not, they will be asked if they would have participated in a video hearing if offered.

Data collection instruments and recruitment materials will be offered in English and Spanish. The estimated total number of respondents across all 3 years is 2,400 (800 respondents each FY for FY 2024, FY 2025, and FY2026). The estimated total annual burden hours expected across all years is 600 hours (200 hours each FY for FY 2024, FY 2025, and FY 2026).

The survey will be conducted annually, and survey respondents will consist of Medicare beneficiaries and non-beneficiaries (*i.e.,* providers, suppliers) who participated in a hearing before an OMHA ALJ. OMHA will draw a representative, nonredundant sample of appellants whose cases have been closed in the first 6 months of the surveyed fiscal year.

ESTIMATED ANNUALIZED BURDEN HOUR TABLE

Forms (if necessary)	Respondents (if necessary)	Number of respondents	Number responses per respondent	Average burden per response (in hours)	Total burden hours
	Beneficiaries	400	1	15/60	100
	Non-Beneficiaries	400	1	15/60	100
Total		800	1	15/60	200

Sherrette A. Funn,

Paperwork Reduction Act Reports Clearance Officer, Office of the Secretary.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Government-Owned Inventions; Availability for Licensing

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The invention listed below is owned by an agency of the U.S. Government and is available for licensing to achieve expeditious commercialization of results of federally-funded research and development. Foreign patent applications are filed on selected inventions to extend market coverage for companies and may also be available for licensing.

FOR FURTHER INFORMATION CONTACT: Dawn Taylor-Mulneix at 301–767–5189, or *dawn.taylor-mulneix@nih.gov.* Licensing information may be obtained by communicating with the Technology Transfer and Intellectual Property Office, National Institute of Allergy and Infectious Diseases, 5601 Fishers Lane, Rockville, MD 20852: tel. 301–496–2644. A signed Confidential Disclosure Agreement will be required to receive copies of unpublished information related to the invention.

SUPPLEMENTARY INFORMATION: Technology description follows:

Human Monoclonal Antibodies That Target Plasmodium Falciparum Sporozoites

Description of Technology

Malaria is one of the world's deadliest infectious diseases, causing an estimated 249 million cases and 608,000 deaths annually, with children in the regions of Africa and South Asia being most vulnerable. Approx 2,000 cases of malaria are reported in the United States each year, by travelers from malaria-risk countries. Malaria is a mosquito-borne parasitic disease transmitted through the bite of infected female mosquitoes, which introduces *Plasmodium* sporozoites into the bloodstream of the human host. There are five Plasmodium parasite species that cause malaria in humans, of which, the vast majority of life-threatening cases are caused by infection with *Plasmodium falciparum* parasites.

Researchers at NIAID have developed 11 human monoclonal antibodies that bind to a unique site on the circumsporozoite protein (CSP) on Plasmodium falciparum sporozoites that is not targeted by any known monoclonal antibodies. These antibodies do not bind to recombinant forms of CSP and as such bind to a processed or post-translational form of the protein processed by the sporozoites. In vivo studies have shown several of these antibodies can substantially reduce liver parasite burden in a mouse model of malaria. These antibodies can work cooperatively with known antibodies that target the repeat region of CSP. Some of these novel antibodies have shown enhanced protection in an animal model when combined with known protective monoclonal antibodies against sporozoites, suggesting that together they may form an effective cocktail to prevent malaria.

This technology is available for licensing for commercial development in accordance with 35 U.S.C. 209 and 37 CFR part 404, as well as for further development and evaluation under a research collaboration.

Potential Commercial Applications

- Prophylactic and preventative treatment against malaria.

Competitive Advantages

- These antibodies bind to a unique site on the circumsporozoite protein (CSP) on Plasmodium falciparum sporozoites that is distinct from the targets of pre-existing mAbs.
- These monoclonal antibodies can be used alone or in combination with existing antibodies.

Development Stage

- Pre-Clinical

Inventors: Joshua Tan, Ph.D., Cherrelle Dacon, Ph.D., both of NIAID.

Publications: n/a.

Intellectual Property: HHS Reference No. E–212–2022–0. U.S. Provisional Patent Application No. 63/409,016, filed on September 22, 2022, and PCT Patent Application No. PCT/US2023/074791, filed on September 21, 2023.

Licensing Contact: To license this technology, please contact Dawn Taylor-Mulneix at 301–767–5189, or *dawn.taylor-mulneix@nih.gov,* and reference E–212–2022.

Collaborative Research Opportunity: The National Institute of Allergy and Infectious Diseases is seeking statements of capability or interest from parties interested in collaborative research to further develop, evaluate, or commercialize this technology. Areas of specific interest include (a) testing developability of these antibodies (*e.g.,* biophysical characteristics, cross-reactivity, pharmacokinetics, toxicity), (b) pre-clinical model assessment, and (c) human clinical trials. For collaboration opportunities, please contact Dawn Taylor-Mulneix at 301–767–5189, or *dawn.taylor-mulneix@nih.gov.*

BILLING CODE 4140–01–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615–0014]

Agency Information Collection Activities; Revision of a Currently Approved Collection: Declaration of Financial Support

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: 60-day notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration Services (USCIS) invites the general public and other Federal agencies to comment upon this proposed revision of a currently approved collection of information. In accordance with the Paperwork Reduction Act (PRA) of 1995, the information collection notice is published in the **Federal Register** to obtain comments regarding the nature of the information collection, the categories of respondents, the estimated burden (*i.e.* the time, effort, and resources used by the respondents to respond), the estimated cost to the respondent, and the actual information collection instruments.

DATES: Comments are encouraged and will be accepted for 60 days until June 17, 2024.

ADDRESSES: All submissions received must include the OMB Control Number 1615–0014 in the body of the letter, the agency name and Docket ID USCIS–2006–0072. Submit comments via the Federal eRulemaking Portal website at *https://www.regulations.gov* under e-Docket ID number USCIS–2006–0072.

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Chief, telephone number (240) 721–3000 (This is not a toll-free number. Comments are not accepted via telephone message). Please note contact information provided here is solely for questions regarding this

notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS website at *https://www.uscis.gov,* or call the USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).

SUPPLEMENTARY INFORMATION:

Comments

You may access the information collection instrument with instructions or additional information by visiting the Federal eRulemaking Portal site at: *https://www.regulations.gov* and entering USCIS–2006–0072 in the search box. Comments must be submitted in English, or an English translation must be provided. All submissions will be posted, without change, to the Federal eRulemaking Portal at *https://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of *https://www.regulations.gov.*

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Revision of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Declaration of Financial Support.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* I–134; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Individuals or households. DHS and consular officers of the Department of State (DOS) use Form I–134 to determine whether, at the time of the beneficiary's application, petition, or request for certain immigration benefits, that beneficiary has sufficient financial support to pay for expenses for the duration of their temporary stay in the United States.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection I–134 is 2,500 and the estimated hour burden per response is 1.65 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 4,125 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $10,625.

Dated: April 8, 2024.

Samantha L Deshommes,

Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

BILLING CODE 9111–97–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615–0122]

Agency Information Collection Activities; Revision of a Currently Approved Collection: USCIS Online Account Access

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: 30-Day notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration Services (USCIS) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. The purpose of this notice is to allow an additional 30 days for public comments.

DATES: Comments are encouraged and will be accepted until May 16, 2024.

ADDRESSES: Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, must be submitted via the Federal eRulemaking Portal website at *http://www.regulations.gov* under e-Docket ID number USCIS–2011–0015. All submissions received must include the OMB Control Number 1615–0122 in the body of the letter, the agency name and Docket ID USCIS–2011–0015.

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Chief, telephone number (240) 721–3000 (This is not a toll-free number; comments are not accepted via telephone message.). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS website at *http://www.uscis.gov,* or call the USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).

SUPPLEMENTARY INFORMATION:

Comments

The information collection notice was previously published in the **Federal Register** on August 14, 2023, at 88 FR 55065, allowing for a 60-day public comment period. USCIS did receive two comments in connection with the 60-day notice.

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at: *http://www.regulations.gov* and enter USCIS–2011–0015 in the search box. Comments must be submitted in English, or an English translation must be provided. The comments submitted to USCIS via this method are visible to the Office of Management and Budget and comply with the requirements of 5 CFR 1320.12(c). All submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide.

Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of *http://www.regulations.gov.*

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection Request:* Revision of a Currently Approved Collection.

(2) *Title of the Form/Collection:* USCIS Online Account Access.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* OMB–62; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary: Individuals or households.* In order to create a new USCIS Online Account, members of the public (*i.e.* users) must submit a valid email address; create a password; select their preferred method for interacting with a two-step verification process (authentication app, text message, or email); and provide responses to five password reset questions of their choice. Any given email address may be associated with only one USCIS Online Account; users may not establish multiple accounts using the same email address. A user is required to complete a two-step verification process upon creation of a new account and during each subsequent log-in. USCIS makes use of the information received during the account creation process to set up the user's profile. Once the account is established/the user has logged in, the user can edit/add certain profile information or select a USCIS online system with which to interact.

The myUSCIS system's registrant account is being enhanced to allow companies to set up company administrator accounts with company and personal profiles and to file Form I–129 petitions in addition to H–1B Registrations. The company account will have functionality that allows a company administrator to invite company members to join a company group and collaborate on H–1B Registrations and Form I–129 petitions. Company members will complete a personal profile. The burden to respondents for creating company and personal profiles, and for creating and accepting/declining invitations to join a company group, is being captured under OMB Control Number 1615–0122.

USCIS systems currently accessible by logging in through the USCIS Online Account Access process are: myUSCIS, the Freedom of Information Act electronic request system (FIRST), and myE-Verify. These systems serve specific, unique purposes and may require the user to provide information beyond what is required to create an account/log in through the USCIS Online Account Access process. Each system may be considered a collection of information in its own right and be covered by its own OMB Control Number. USCIS may add additional online systems for public use in the future.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection USCIS Online Account Access process for Individuals or Households is 4,240,000 and the estimated hour burden per response is 0.167 hours; the estimated total number of respondents for the information collection USCIS Online Account Access process for Businesses or other for-profit is 1,060,000 and the estimated hour burden per response is 0.167 hours; the estimated total number of respondents for the information collection for Account Interactions is 300,000 and the estimated hour burden per response is 0.315 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 979,600 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $0.

Dated: April 8, 2024.

Samantha L. Deshommes,

Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS–HQ–IA–2024–0059; FXIA16710900000–245–FF09A30000]

Foreign Endangered Species; Receipt of Permit Applications

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of permit applications; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service, invite the public to comment on applications to conduct certain activities with foreign species that are listed as endangered under the Endangered Species Act (ESA). With some exceptions, the ESA prohibits activities with listed species unless Federal authorization is issued that allows such activities. The ESA also requires that we invite public comment before issuing permits for any activity otherwise prohibited by the ESA with respect to any endangered species.

DATES: We must receive comments by May 16, 2024.

ADDRESSES:

Obtaining Documents: The applications, application supporting materials, and any comments and other materials that we receive will be available for public inspection at *https://www.regulations.gov* in Docket No. FWS–HQ–IA–2024–0059.

Submitting Comments: When submitting comments, please specify the name of the applicant and the permit number at the beginning of your comment. You may submit comments by one of the following methods:

- *Internet: https://www.regulations.gov.* Search for and submit comments on Docket No. FWS–HQ–IA–2024–0059.
- *U.S. mail:* Public Comments Processing, Attn: Docket No. FWS–HQ–IA–2024–0059; U.S. Fish and Wildlife

Service Headquarters, MS: PRB/3W; 5275 Leesburg Pike; Falls Church, VA 22041–3803.

For more information, see Public Comment Procedures under **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Brenda Tapia, by phone at 703–358–2185 or via email at *DMAFR@fws.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION:

I. Public Comment Procedures

A. How do I comment on submitted applications?

We invite the public and local, State, Tribal, and Federal agencies to comment on these applications. Before issuing any of the requested permits, we will take into consideration any information that we receive during the public comment period.

You may submit your comments and materials by one of the methods in **ADDRESSES**. We will not consider comments sent by email or to an address not in **ADDRESSES**. We will not consider or include in our administrative record comments we receive after the close of the comment period (see **DATES**).

When submitting comments, please specify the name of the applicant and the permit number at the beginning of your comment. Provide sufficient information to allow us to authenticate any scientific or commercial data you include. The comments and recommendations that will be most useful and likely to influence agency decisions are: (1) Those supported by quantitative information or studies; and (2) those that include citations to, and analyses of, the applicable laws and regulations.

B. May I review comments submitted by others?

You may view and comment on others' public comments at *https://www.regulations.gov* unless our allowing so would violate the Privacy Act (5 U.S.C. 552a) or Freedom of Information Act (5 U.S.C. 552).

C. Who will see my comments?

If you submit a comment at *https://www.regulations.gov,* your entire comment, including any personal identifying information, will be posted on the website. If you submit a hardcopy comment that includes personal identifying information, such as your address, phone number, or email address, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. Moreover, all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

II. Background

To help us carry out our conservation responsibilities for affected species, and in consideration of section 10(c) of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), we invite public comments on permit applications before final action is taken. With some exceptions, the ESA prohibits certain activities with listed species unless Federal authorization is issued that allows such activities. Permits issued under section 10(a)(1)(A) of the ESA allow otherwise prohibited activities for scientific purposes or to enhance the propagation or survival of the affected species. Service regulations regarding prohibited activities with endangered species, captive-bred wildlife registrations, and permits for any activity otherwise prohibited by the ESA with respect to any endangered species are available in title 50 of the Code of Federal Regulations in part 17.

III. Permit Applications

We invite comments on the following applications.

Applicant: International Elephant Foundation c/o Fort Worth Zoo, Fort Worth, TX; Permit No. PER8478987

The applicant requests authorization to import biological samples from African elephants (*Loxodonta africana*) and Asian elephants (*Elephas maximus*) from various countries for the purpose of scientific research. This notification covers activities to be conducted by the applicant over a 5-year period.

Applicant: U.S. Fish and Wildlife Service, Office of Law Enforcement, Training and Development Unit, Brunswick, GA; Permit No. PER9624348

The applicant requests authorization to import seized biological samples of unknown origin from any location for law enforcement and educational purposes. This notification covers activities to be conducted by the applicant over a 5-year period.

Applicant: U.S. Fish and Wildlife Service, Office of Law Enforcement, Training and Development Unit, Brunswick, GA; Permit No. PER9625280

The applicant requests authorization to export and re-export seized biological samples of unknown origin to any location for law enforcement and educational purposes. This notification covers activities to be conducted by the applicant over a 5-year period.

Applicant: Peck's Wildwood Wildlife Park and Nature Center, Minocqua, WI; Permit No. PER9700548

The applicant requests a captive-bred wildlife registration under 50 CFR 17.21(g) for the following species, to enhance the propagation or survival of the species. This notification covers activities to be conducted by the applicant over a 5-year period.

Common name	Scientific name
Ring-tail lemur	*Lemur catta.*
Brown lemur	*Eulemur fulvus.*
Black-and-white-ruffed lemur.	*Varecia variegata.*
Red-ruffed lemur	*Varecia rubra.*
African leopard	*Panthera pardus pardus.*
Cotton-top marmoset	*Saguinus oedipus.*
Snow leopard	*Panthera uncia.*
White-handed gibbon	*Hylobates lar.*
Radiated tortoise	*Astrochelys radiata.*
African penguin	*Spheniscus demersus.*
Bengal tiger	*Panthera tigris tigris.*
Siamang	*Symphalangus syndactylus.*
Arabian oryx	*Oryx leucoryx.*
Golden-rumped tamarin.	*Leontopithecus chrysomelas.*

IV. Next Steps

After the comment period closes, we will make decisions regarding permit issuance. If we issue permits to any of the applicants listed in this notice, we will publish a notice in the **Federal Register**. You may locate the notice announcing the permit issuance by searching *https://www.regulations.gov* for the permit number listed above in this document. For example, to find information about the potential issuance of Permit No. 12345A, you would go to *regulations.gov* and search for ''12345A''.

V. Authority

We issue this notice under the authority of the Endangered Species Act

of 1973, as amended (16 U.S.C. 1531 *et seq.*), and its implementing regulations.

Brenda Tapia,

Supervisory Program Analyst/Data Administrator, Branch of Permits, Division of Management Authority.

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[BLM_MT_FRN_MO4500178507]

Public Meeting for the Missouri Basin Resource Advisory Council

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of public meeting.

SUMMARY: In accordance with the Federal Land Policy and Management Act of 1976 and the Federal Advisory Committee Act of 1972, the U.S. Department of the Interior, Bureau of Land Management (BLM) Missouri Basin Resource Advisory Council (RAC) will meet as follows.

DATES: The Missouri Basin RAC will meet on May 16, 2024, from 8 a.m. to 12 p.m. Mountain Time.

ADDRESSES: The meeting will be held at the DoubleTree by Hilton, 27 N 27th Street, Billings MT, 59101. A virtual participation option will also be available. Individuals that prefer to participate virtually must register with the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice at least 2 weeks in advance.

FOR FURTHER INFORMATION CONTACT: Mark Jacobsen, Missouri Basin RAC Coordinator, BLM Eastern Montana/Dakotas District, 111 Garryowen Road, Miles City, MT 59301; telephone: (406) 233–2831; email: *mjacobse@blm.gov.*

Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Mark Jacobsen. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The 15-member RAC advises the Secretary of the Interior, through the BLM, on a variety of planning and management issues associated with public land management in Central and Eastern Montana, and North and South Dakota. Meeting agenda topics may include North-Central and Eastern Montana/Dakotas District reports; presentations on the Upper Missouri River Breaks National Monument Left Coulee Access, the Snowy River CO2 Sequestration Project, and results of the North Dakota 2024 oil and gas lease sales; a public comment period; and other topics that may arise. A final agenda will be posted on the RAC's web page at *https://www.blm.gov/get-involved/resource-advisory-council/near-you/montana-dakotas/missouri-basin-rac* 2 weeks in advance of the meeting. The meeting is open to the public with a public comment period offered at 11:30. Written comments to the RAC can be emailed in advance to the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice. Depending on the number of persons wishing to comment and time available, the time for individual oral comments may be limited. Before including your address, phone number, email address, or other personal identifying information in your comments, please be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Please make requests in advance for sign language interpreter services, assistive listening devices, or other reasonable accommodations. We ask that you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice at least 7 business days prior to the meeting to give the BLM sufficient time to process your request. All reasonable accommodation requests are managed on a case-by-case basis.

(Authority: 43 CFR 1784.4–2)

Wendy Warren,

Eastern Montana/Dakotas District Manager.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[BLM_ID_FRN_MO4500178277]

Notice of Public Meetings of the Idaho Resource Advisory Council

AGENCY: Bureau of Land Management, Department of the Interior.

ACTION: Notice of public meetings.

SUMMARY: In accordance with the Federal Land Policy and Management Act of 1976 and the Federal Advisory Committee Act of 1972, the U.S. Department of the Interior Bureau of Land Management (BLM) Idaho Resource Advisory Council (RAC) will meet as indicated below.

DATES: The Idaho RAC will participate in a field tour on Tuesday, May 14, 2024, from 9:00 a.m. to approximately 4:00 p.m. Pacific Time (PT). The RAC will then hold an in-person meeting on Wednesday, May 15, from 9:00 a.m. to 5:00 p.m. PT, with public comments accepted at 3:00 p.m.

The RAC will hold an in-person meeting on Friday, July 11, from 9:00 a.m. to 5:00 p.m., Mountain Time (MT), with public comments accepted at 3:00 p.m.

The RAC will participate in a field tour on Wednesday, October 9, from 9:00 a.m. to approximately 4:00 p.m. MT. The RAC will then hold an in-person meeting on Thursday, October 10, from 9:00 a.m. to 5:00 p.m. MT, with public comments accepted at 3:00 p.m. Virtual participation options will be available for the May 15, July 11, and October 10 meetings.

Public notice of any changes to this schedule will be posted on the Idaho RAC web page listed below 15 days in advance of each meeting.

ADDRESSES: The May 14 field tour will commence and conclude and the May 15 meeting will be held at the Interagency Natural Resources Center, 3232 W. Nursery Rd., Coeur d'Alene, ID 83815.

The July 11 meeting will be held at the BLM Idaho State Office, 1387 S. Vinnell Way, Boise, ID 83709.

The October 9 field tour will commence and conclude and the October 10 meeting will be held at the BLM Pocatello Field Office, 4350 Cliffs Dr., Pocatello, ID 83204.

Virtual attendance for each meeting will be offered via Zoom. Agendas, zoom registration, and participation information will be available on the Idaho RAC web page 30 days in advance of the meetings at *http://tinyurl.com/3ajxvapd.*

FOR FURTHER INFORMATION CONTACT: Idaho RAC Coordinator MJ Byrne, telephone: 208–373–4006, email: *mbyrne@blm.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The 15-member Idaho RAC advises the Secretary of the Interior, through the BLM, on a variety of public land issues in Idaho. Their diverse perspectives are represented in commodity, non-commodity, and local area interests. The Idaho RAC serves in an advisory capacity to BLM officials concerning issues relating to land use planning and management of public land resources located within the State of Idaho.

On May 14, the RAC will tour BLM managed recreation sites. The May 15 agenda items include presentations and discussions on proposed recreation fee increases within the Coeur d'Alene District and the Salmon Field Office, updates from the State and District Offices, and a pre-season fire outlook. The July 11 agenda items include presentations on renewable energy, recreation, restoration and fuels treatments, fire status, and updates from the State and District Offices. On October 9, the RAC will tour BLM managed restoration and fuels treatments sites showcasing Bipartisan Infrastructure Law and Inflation Reduction Act projects. The October 10 agenda items include presentations and discussions on proposed recreation fee increases within the Idaho Falls and Twin Falls Districts, presentations on restoration and fuels treatments, renewable energy, recreation, a fire season recap, and updates from the State and District Offices.

All meetings and field tours are open to the public, but members of the public who wish to participate in the tours must provide their own transportation and meals. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should contact the BLM (see **FOR FURTHER INFORMATION CONTACT**) at least seven business days prior to the meeting to give the Department of the Interior sufficient time to process your request. All reasonable accommodation requests are managed on a case-by-case basis. Each Idaho RAC meeting will have time allocated for public comments. Depending on the number of persons wishing to speak and the time available, the amount of time for oral comments may be limited. Written public comments may be sent to the BLM Idaho State Office listed in the **ADDRESSES** section of this notice. All comments received at least one week prior to the meeting will be provided to the Idaho RAC. Please include ''RAC comment'' in your submission.

Before including your address, phone number, email address, or other personal identifying information in your comments, please be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comments to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. Detailed summary minutes for the Idaho RAC meetings will be maintained in the BLM Idaho State Office and will be available for public inspection and reproduction during regular business hours within 30 days of the meetings. Previous minutes and agendas are also available on the Idaho RAC web page listed above.

(Authority: 43 CFR 1784.4–2)

June Shoemaker,

Acting BLM Idaho State Director.

BILLING CODE 4331–19–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[BLM_CO_FRN_MO4500178328]

Call for Nominations for Colorado Rocky Mountain Resource Advisory Council

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of call for nominations.

SUMMARY: The purpose of this notice is to request public nominations for the Bureau of Land Management (BLM) Colorado's Rocky Mountain Resource Advisory Council (RAC) to fill one existing vacancy. The RAC provides advice and recommendations to the BLM on land use planning and management of the National System of Public Lands within its geographic area.

DATES: All nominations must be received no later than May 16, 2024.

ADDRESSES: Nominations and completed applications should be sent to Levi Spellman, BLM Rocky Mountain District Office, 3028 East Main Street, Cañon City, CO 81212; phone: (719) 269–8553; email: *lspellman@blm.gov.*

FOR FURTHER INFORMATION CONTACT: Kirby-Lynn Shedlowski, BLM Colorado Deputy Communications Director, Denver Federal Center, Building 40 Lakewood, CO 80215; telephone: (303) 239–3671; email: *kshedlowski@blm.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Kirby-Lynn Shedlowski. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The Federal Land Policy and Management Act (FLPMA) directs the Secretary of the Interior to involve the public in planning and issues related to management of lands administered by the BLM. Section 309 of FLPMA (43 U.S.C. 1739) directs the Secretary to establish 10- to 15-member citizen-based advisory councils that are consistent with the Federal Advisory Committee Act (FACA). As required by the applicable regulations, RAC membership must be balanced and representative of the various interests concerned with the management of the public lands. The BLM regulations governing the operation of RACs are found at 43 CFR subpart 1784.

The RAC is seeking nominations for individuals who hold State, county, or local elected office.

Individuals may nominate themselves or others. Nominees must be residents of the State of Colorado. The BLM will evaluate nominees based on their education, training, experience, and knowledge of the geographic area of the RAC. Nominees should demonstrate a commitment to collaborative resource decision-making.

The following must accompany all nominations:

—A completed RAC application, which can either be obtained through your local BLM office or online at: *https://www.blm.gov/sites/default/files/docs/2022-05/BLM-Form-1120-19_RAC-Application.pdf*

—Letters of reference from represented interests or organizations; and

—Any other information that addresses the nominee's qualifications.

Simultaneous with this notice, BLM Colorado will issue a press release providing additional information for submitting nominations.

(Authority: 43 CFR 1784.4–1)

Douglas J. Vilsack,

BLM Colorado State Director.

BILLING CODE 4331–16–P

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–NAGPRA–NPS0037758; PPWOCRADN0–PCU00RP14.R50000]

Notice of Intended Repatriation: David A. Fredrickson Archaeological Collections Facility at Sonoma State University, Rohnert Park, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), Sonoma State University intends to repatriate certain cultural items that meet the definition of objects of cultural patrimony and that have a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural items in this notice may occur on or after May 16, 2024.

ADDRESSES: Doshia Dodd, Sonoma State University, 1801 East Cotati Avenue, Rohnert Park, CA 94928, telephone (530) 514–8472, email *Doshia.dodd@sonoma.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of Sonoma State University, and additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

A total of three lots of cultural items have been requested for repatriation. The three lots of objects of cultural patrimony each include flaked stone tools and debitage; dietary bone remains; groundstone objects; late 19th—early 20th century glass, ceramic and metal items; and soil samples. Based on records concerning the cultural items and the institution in which they were housed, there is no evidence of the three lots of cultural items being treated with hazardous substances.

One lot of cultural items was removed from archaeological site CA–SAC–436 in Sacramento County, CA. The items were removed in 1994 during archaeological work carried out by Stewart/Gerike Consultants related to an excavation at the Rancho Seco Park, and were curated at Sonoma State University after completion of the project. The cultural items have remained in possession of Sonoma State since their curation, under the Accession Number 94–12.

Two lots of cultural items were removed from archaeological sites P–34–002166 and P–34–004714 in Sacramento County, CA. The items were removed in 2014 during archaeological work carried out by ECORP Consulting, Inc. related to an infrastructure support project for the Folsom South of U.S. Highway 50 Specific Plan Project, and were curated at Sonoma State University after completion of the project. The cultural items have remained in possession of Sonoma State since their curation, under the Accession Numbers 2015–20 (for P–34–002166) and 2015–22 (P–34–004714).

Determinations

Sonoma State University has determined that:

- The three lots of objects of cultural patrimony described in this notice have ongoing historical, traditional, or cultural importance central to the Native American group, including any constituent sub-group (such as a band, clan, lineage, ceremonial society, or other subdivision), according to the Native American traditional knowledge of an Indian Tribe or Native Hawaiian organization.
- There is a reasonable connection between the cultural items described in this notice and the Buena Vista Rancheria of Me-Wuk Indians of California; Chicken Ranch Rancheria of Me-wuk Indians of California; Guidiville Rancheria of California; Ione Band of Miwok Indians of California; Shingle Springs Band of Miwok Indians, Shingle Springs Rancheria (Verona Tract), California; Tule River Indian Tribe of the Tule River Reservation, California; United Auburn Indian Community of the Auburn Rancheria of California; Wilton Rancheria, California; and the Yocha Dehe Wintun Nation, California.

Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on or after May 16, 2024. If competing requests for repatriation are received, Sonoma State University must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural items are considered a single request and not competing requests. Sonoma State University is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Notice of Intended Repatriation: University of Pennsylvania Museum of Archaeology and Anthropology, Philadelphia, PA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the University of Pennsylvania Museum of Archaeology and Anthropology (Penn Museum) intends to repatriate certain cultural items that meet the definition of an object of cultural patrimony and that has a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural item in this notice may occur on or after May 16, 2024.

ADDRESSES: Dr. Christopher Woods, Williams Director, University of Pennsylvania Museum of Archaeology and Anthropology, 3260 South Street, Philadelphia, PA 19104–6324, telephone (215) 898–4050, email *director@pennmuseum.org.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Penn Museum, and additional information on the

determinations in this notice, including the results of consultation, can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

A total of one cultural item has been requested for repatriation. The one object of cultural patrimony is a wampum belt (PM# NA3878). The Penn Museum purchased the wampum belt from merchant Albert E. Barnes in 1913. It is unclear how or from whom Mr. Barnes acquired the wampum belt. Photographic evidence shows the wampum belt around the neck of Passamaquoddy Wampum Keeper Sachem Sopiel Selmore (b. 1803—d. 1903) in 1901.

Determinations

The Penn Museum has determined that:

- The one object of cultural patrimony described in this notice has ongoing historical, traditional, or cultural importance central to the Native American group, including any constituent sub-group (such as a band, clan, lineage, ceremonial society, or other subdivision), according to the Native American traditional knowledge of an Indian Tribe or Native Hawaiian organization.
- There is a reasonable connection between the cultural items described in this notice and the Passamaquoddy Tribe.

Requests for Repatriation

Additional, written requests for repatriation of the cultural item in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural item in this notice to a requestor may occur on or after May 16, 2024. If competing requests for repatriation are received, the Penn Museum must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural item are considered a single request and not competing requests. The Penn Museum is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3004 and the implementing regulations, 43 CFR 10.9.

Notice of Inventory Completion: Boston Children's Museum, Boston, MA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), Boston Children's Museum has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after May 16, 2024.

ADDRESSES: Melissa Higgins, Vice President of Programs & Exhibits, Boston Children's Museum, 308 Congress Street, Boston, MA 02201, telephone (617) 986–3692, email *higgins@bostonchildrensmuseum.org.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of Boston Children's Museum, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing partial skeletons of at least two individuals have been reasonably identified. The two lots of associated funerary objects include Pottery Sherds, Flint Flake, Carbonized Beans, and Animal Bones. Remains and associated funerary objects were donated in 1969 by Dr. Jack Calvert, who was involved in archeological digs as part of the work of James Tuck in 1965–1967. The Remains and associated funerary objects are believed to have been removed from New York State as part of these digs. Accession records note them originating from the Cabin Site (tly 1–1), though there is a possibility that they originated from one of several sites in the area. Due to geographic origin, the remains are reasonably believed to be culturally affiliated with the Onondaga Nation. There is no documentation of hazardous substances being used to treat these individuals or materials.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location or acquisition history of the human remains and associated funerary objects described in this notice.

Determinations

Boston Children's Museum has determined that:

- The human remains described in this notice represent the physical partial skeletal remains of two individuals of Native American ancestry.
- The two lots of objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a reasonable connection between the human remains and associated funerary objects described in this notice and the Onondaga Nation.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after May 16, 2024. If competing requests for repatriation are received, the Boston Children's Museum must determine the most appropriate

requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The Boston Children's Museum is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: April 9, 2024.

Notice of Inventory Completion: Western Washington University, Department of Anthropology, Bellingham, WA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Western Washington University (WWU) has completed an inventory of associated funerary objects and has determined that there is a cultural affiliation between the associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the associated funerary objects in this notice may occur on or after May 16, 2024.

ADDRESSES: Dr. Judith Pine, Western Washington University, Department of Anthropology, Arntzen Hall 340, 516 High Street, Bellingham, WA 98225, telephone (360) 650–4783, email *pinej@wwu.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of WWU, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Human remains representing, at least, four individuals have been reasonably identified and were reported in a Notice of Inventory Completion published in the **Federal Register** on December 22, 2023 (88 FR 88642). The 63 associated funerary objects associated with those human remains are 63 level bags (lots) containing fragments of fauna/shell, button, charcoal, worked antler and bone, worked slate, metal, rocks and residue and are newly identified.

45–SK–37 is located in Skagit County, Washington. The site was excavated in 1960 by Dr. Herbert Taylor of Western Washington State College, now known as Western Washington University. Taylor was supervising a field school excavation with students from the college. No known individuals were identified. No hazardous chemicals are known to have been used to treat the human remains or associated funerary objects while in the custody of WWU.

The human remains and associated funerary objects have been determined to be Native American based on ethnographic, geographic, and archeological evidence. Comparison of the location of site 45–SK–37 with Suttles and Lane's map indicates that it is in an area associated with Nookachamps, Kikiallus, and Swinomish (Suttles and Lane 1990, Handbook of North American Indians, Volume 7, Northwest Coast: Figure 1). Many descendants of these cultural entities are today associated with the Swinomish Indian Tribal Community, as confirmed through consultation.

From Site 45– SK–37 in Skagit County, WA, four individuals and 63 associated funerary objects were removed.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is clearly identified by the information available about the associated funerary objects described in this notice.

Determinations

WWU has determined that:

- The 63 objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a reasonable connection between the human remains and associated funerary objects described in this notice and the Swinomish Indian Tribal Community.

Requests for Repatriation

Written requests for repatriation of the associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the associated funerary objects in this notice to a requestor may occur on or after May 16, 2024. If competing requests for repatriation are received, WWU must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the associated funerary objects are considered a single request and not competing requests. WWU is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: April 9, 2024.

Notice of Inventory Completion: Longyear Museum of Anthropology, Colgate University, Hamilton, NY

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Longyear Museum of Anthropology (LMA) has completed an inventory of human remains and has determined that there is a cultural affiliation between the human remains and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains in this notice may occur on or after May 16, 2024.

ADDRESSES: Kelsey Olney-Wall, Repatriation Manager, University Museums, Colgate University, 13 Oak Drive, Hamilton, NY 13346, telephone (315) 228–7677, email *kolneywall@colagate.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the LMA, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual has been reasonably identified. No associated funerary objects are present. The preponderance of evidence suggests that the human remains representing one individual were removed from Chatham County, GA, between 1937 and 1939 by physical anthropologist Dr. Frederick S. Hulse. The human remains were removed from an unknown archaeological site, possibly the Irene Mound site. The human remains came into the LMA collections after 1949 when Dr. Hulse left Colgate University.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location or acquisition history of the human remains described in this notice.

Determinations

The LMA has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- There is a reasonable connection between the human remains described in this notice and The Muscogee (Creek) Nation.

Requests for Repatriation

Written requests for repatriation of the human remains in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains in this notice to a requestor may occur on or after May 16, 2024. If competing requests for repatriation are received, the LMA must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains are considered a single request and not competing requests. The LMA is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: April 9, 2024.

Notice of Intended Repatriation: University of California, Davis, Davis, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the University of California, Davis (UC Davis) intends to repatriate certain cultural items that meet the definition of unassociated funerary objects or objects of cultural patrimony and that have a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural items in this notice may occur on or after May 16, 2024.

ADDRESSES: Megon Noble, NAGPRA Project Manager, University of California, Davis, 412 Mrak Hall, One Shields Avenue, Davis, CA 95616, telephone (530) 752–8501, email *mnoble@ucdavis.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of UC Davis, and additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

A total of 149 cultural items have been requested for repatriation. The 46 unassociated funerary objects are 45 lots of debitage and chipped stone (including quartz items), and one mano fragment. In 1981, these cultural items were removed from CA–SAC–408 (Accession 281) during a surface collection and test excavation conducted by DL True, R. Jackson, and J. Offerman.

The 90 unassociated funerary objects are 17 lots of groundstone, 30 lots of flakes, 35 lots of unmodified stone, one lot of bone, and six lots of historic material. One projectile point is currently missing. In 1986, these items were removed from CA–SAC-Cripple Creek (Accession 385) near Citrus Heights, Sacramento County, CA during a test excavation conducted by DL True, C. Slaymaker, and P. Bouey.

The six unassociated funerary objects include four lots of chipped stone and two lots of groundstone. Between 1987 and 1988, these items were removed from CA–SAC–320 (Accession 391) during surface and limited test excavations conducted by DL True, C. Slaymaker, and S. Griset as part of a permit review by the Sacramento County Community Planning and Development Department.

The two unassociated funerary objects include one pestle and one open pestle fragment. Between 1987 and 1988, these items were removed from CA–SAC–406A (Accession 391) during surface and limited test excavations conducted by DL True, C. Slaymaker, and S. Griset as part of a permit review by the Sacramento County Community Planning and Development Department.

The four unassociated funerary objects include four lots of debitage. Between 1987 and 1988, these items were removed from CA–SAC-Folsom Shooting Club (Accession 391) during surface and limited test excavations conducted by DL True, C. Slaymaker, and S. Griset as part of a permit review by the Sacramento County Community Planning and Development Department.

The one object of cultural patrimony includes one handstone/mano. Around 1980, this item was donated to the UC Davis Department of Anthropology Teaching Collection (UCDA). Provenience information is limited to ''Sacramento, CA (1980).''

Determinations

The UC Davis has determined that:

- The 148 unassociated funerary objects described in this notice are reasonably believed to have been placed intentionally with or near human remains, and are connected, either at the time of death or later as part of the death rite or ceremony of a Native American culture according to the Native American traditional knowledge of a lineal descendant, Indian Tribe, or Native Hawaiian organization. The unassociated funerary objects have been identified by a preponderance of the evidence as related to human remains, specific individuals, or families, or removed from a specific burial site or burial area of an individual or individuals with cultural affiliation to an Indian Tribe or Native Hawaiian organization.
- The one object of cultural patrimony described in this notice have ongoing historical, traditional, or cultural importance central to the Native American group, including any constituent sub-group (such as a band, clan, lineage, ceremonial society, or other subdivision), according to the Native American traditional knowledge of an Indian Tribe or Native Hawaiian organization.
- There is a reasonable connection between the cultural items described in this notice and the Wilton Rancheria, California.

Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on or after May 16, 2024. If competing requests for repatriation are received, the UC Davis must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural items are considered a single request and not competing requests. The UC Davis is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3004 and the implementing regulations, 43 CFR 10.9.

Notice of Inventory Completion: Kansas State University, Manhattan, KS

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), Kansas State University has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after May 16, 2024.

ADDRESSES: Megan Williamson, Department of Sociology, Anthropology, and Social Work, Kansas State University, 204 Waters Hall, 1603 Old Claflin Place, Manhattan, KS 66506–4003, telephone (785) 532–6005, email *mwillia1@ksu.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of Kansas State University, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, 13 individuals have been reasonably identified. The 19,174 associated funerary objects are 8,397 unmodified stone, 7,004, burned/unidentifiable bone fragments, 2,900 chipped stone debris, 260 bone beads, 177 debitage, 142 shell beads, 112 faunal, 63 projectile points (whole & fragmented), 35 ceramic sherds, 17 shell fragments, 16 scrapers, eight worked chert, seven glass fragments, four limestone pieces, four staples, three pellets, two bullets, two quartzite, two spokeshaves, two bifaces, two core fragments, two bullet casings, two unidentifiable metal fragments, two bullets, one bolt, one plastic handle, one baseball, one fossilized shell, one Kansas pipestone, one knife fragment, one chopper, one drill fragment, and one Minnie ball. Missing from the original inventory above are 44 projectile points, three projectile point fragments, one Kansas pipestone, and two ceramic sherds. It is believed that these items were unlawfully removed by non-NAGPRA and departmental staff before the assemblage was relocated to our current more secure facilities.

The 13 individuals were removed from Geary County, KS, during the 1970s. Excavated by Kansas State University under the direction of Dr. Patricia J. O'Brien in May & June of 1974. The excavation of Witt Mound 2 was later completed in May/June of 1979. The removed assemblage has since been under the stewardship of Kansas State University since then.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location or acquisition history of the human remains and associated funerary objects described in this notice.

Determinations

Kansas State University has determined that:

- The human remains described in this notice represent the physical remains of 13 individuals of Native American ancestry.
- The 19,174 objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a reasonable connection between the human remains and associated funerary objects described in this notice and the Kaw Nation, Oklahoma; Pawnee Nation of Oklahoma; The Osage Nation; Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota; and the Wichita and Affiliated Tribes (Wichita, Keechi, Waco, & Tawakonie), Oklahoma.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary

objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after May 16, 2024. If competing requests for repatriation are received, Kansas State University must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. Kansas State University is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Notice of Intended Repatriation: Sierra Joint Community College District, Rocklin, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Sierra Joint Community College District intends to repatriate certain cultural items that meet the definition of objects of cultural patrimony and that have a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural items in this notice may occur on or after May 16, 2024.

ADDRESSES: Melissa Leal, Sierra Joint Community College District, 5100 Sierra College Blvd., Rocklin, CA 95677, telephone (916) 624–3333, email *mleal@nierracollege.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Sierra Joint Community College District and additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

A total of three lots of object of cultural patrimony have been requested for repatriation. The three lots of objects of cultural patrimony are three lots of modified stones. One lot of cultural item was removed from CA–PLA–606/H (Twelve Bridges Project) in Lincoln, CA. One lot of cultural item is from a personal donor and was removed in Auburn Ravine, Gold Hill Area, CA. One lot of cultural item was collected on the Rocklin Campus of Sierra College in 2016.

Determinations

The Sierra Joint Community College District has determined that:

- The three lots of objects of cultural patrimony described in this notice have ongoing historical, traditional, or cultural importance central to the Native American group, including any constituent sub-group (such as a band, clan, lineage, ceremonial society, or other subdivision), according to the Native American traditional knowledge of an Indian Tribe or Native Hawaiian organization.
- There is a reasonable connection between the cultural items described in this notice and the United Auburn Indian Community of the Auburn Rancheria of California.

Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on or after May 16, 2024. If competing requests for repatriation are received, Sierra Joint Community College District must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural items are considered a single request and not competing requests. The Sierra Joint Community College District is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3004 and the implementing regulations, 43 CFR 10.9.

Notice of Inventory Completion: University of California, Davis, Davis, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the University of California Davis (UC Davis) has completed an inventory of associated funerary objects and has determined that there is a cultural affiliation between associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the associated funerary objects in this notice may occur on or after May 16, 2024.

ADDRESSES: Megon Noble, Repatriation Coordinator, University of California, Davis, 412 Mrak Hall, One Shields Avenue, Davis, CA 95616, telephone (530) 752–8501, email *mnoble@ucdavis.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of UC Davis, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Six associated funerary objects from CA–SAC–75 and CA–SAC–164 (UC Davis Accession 391) were removed from Sacramento County, CA. The five associated funerary objects removed from CA–SAC–75 are five pieces of groundstone. The one associated funerary object removed from CA–SAC–164 is one lot of midden with faunal remains intermixed. 1987–1988 surface collections and limited test excavations were conducted by DL True, C. Slaymaker, and S. Griset as part of a permit review by the Sacramento County Community Planning and Development Department. Both sites are known to have burials, however UC Davis does not hold any human remains for these sites.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location or acquisition history of the associated funerary objects described in this notice.

Determinations

UC Davis has determined that:

- The six objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a reasonable connection between the human remains and associated funerary objects described in this notice and the Buena Vista Rancheria of Me-Wuk Indians of California; Chicken Ranch Rancheria of Me-Wuk Indians of California; Ione Band of Miwok Indians of California; Jackson Band of Miwuk Indians; Shingle Springs Band of Miwok Indians, Shingle Springs Rancheria (Verona Tract), California; United Auburn Indian Community of the Auburn Rancheria of California; and the Wilton Rancheria, California.

Requests for Repatriation

Written requests for repatriation of the associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the associated funerary objects in this notice to a requestor may occur on or after May 16, 2024. If competing requests for repatriation are received, UC Davis must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the associated funerary objects are considered a single request and not competing requests. UC Davis is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: April 9, 2024.

Melanie O'Brien,

Manager, National NAGPRA Program.

Notice of Inventory Completion: California State University, Sacramento, Sacramento, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), California State University, Sacramento has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after May 16, 2024.

ADDRESSES: Dr. Mark Wheeler, Chief of Staff to President Luke Wood, California State University, Sacramento, 6000 J Street Sacramento, CA 95819, telephone (916) 460–0490, email *mark.wheeler@csus.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of California State University, Sacramento, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

In 1957, human remains representing, at minimum, one individual were removed from CA–YOL–13 in Yolo County by F.A. Riddell and W.H. Olsen of the State Indian Museum. It is not known how the collection came into the possession of California State University, Sacramento. Occupation of the site is estimated to have occurred during the Late Period. The one associated funerary object is a flaked stone.

At an unknown date, associated funerary objects were removed from CA–YOL–13 and Hall Mound by Anthony Zallio. In 1951, Zallio's estate donated the collections to California State University, Sacramento. Ancestral remains from the collections were previously repatriated in 2015, but objects from the sites were not requested during the repatriation. The 56 associated funerary objects removed from these sites includes ground and flaked stones; modified bones, shells and stones; and floral remains.

In 1960, human remains representing, at minimum, five individuals were removed from several sites in Yolo County by students from Sacramento State University (now California State University, Sacramento) under the direction of Dr. William Beeson. These sites include CA–YOL–18, CA–YOL–44, CA–YOL–51, and CA–YOL–58. The collections have been housed at California State University, Sacramento since this survey. The 48 associated funerary objects removed from these sites includes flaked and ground stones; faunal remains; modified bones, stones and shells; and unmodified stones.

Human remains representing, at minimum, two individuals, were removed from CA–YOL–45 by an unknown individual who donated a collection to the University in 1956, and during a 1960 survey of the site by students from Sacramento State University (now California State University, Sacramento) under the direction of Dr. William Beeson. Occupation of the site is estimated to have occurred during at least the Late Period. Anthony Zallio also collected human remains and cultural objects from the site, which were donated to the University in 1951. Human remains and funerary objects in the Zallio collection originating from this site were previously repatriated in 2015, but

several objects were not requested at that time and are included in this notice. The 6,208 associated funerary objects removed from this site include flaked and ground stones; faunal remains; historic materials; modified bones, stones and shells; and unmodified stones. Of this number, 99 objects are currently missing from the collection. California State University, Sacramento continues to look for these 99 missing objects.

At an unknown date, associated funerary objects were removed from either CA–YOL–45 and CA–YOL–52. It is not known how these objects came into the possession of California State University, Sacramento. They were determined to come from either CA–YOL–45 or CA–YOL–52 based on their inclusion with other objects from these sites. The five associated funerary objects include flaked stones and modified bones.

In 1978, human remains representing, at minimum, 10 individuals, were removed from an unnamed site in Yolo County, California by Dr. Jerald Johnson of California State University, Sacramento as part of a salvage excavation. The human remains and artifacts were transported back to California State University, Sacramento for evaluation and curation. The 28 associated funerary objects removed from this site include baked clay objects; ground and flaked stones; faunal remains; modified shells; and floral remains.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is clearly identified by the information available about the human remains and associated funerary objects described in this notice.

Determinations

California State University, Sacramento has determined that:

- The human remains described in this notice represent the physical remains of 18 individuals of Native American ancestry.
- The 6,346 objects described in this notice are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a reasonable connection between the human remains and associated funerary objects described in this notice and the Cachil DeHe Band of Wintun Indians of the Colusa Indian Community of the Colusa Rancheria, California; Ione Band of Miwok Indians of California; Kletsel Dehe Wintun Nation of the Cortina Rancheria (*previously* listed as Kletsel Dehe Band of Wintun Indians); Shingle Springs Band of Miwok Indians, Shingle Springs Rancheria (Verona Tract), California; United Auburn Indian Community of the Auburn Rancheria of California; Wilton Rancheria, California; and the Yocha Dehe Wintun Nation, California.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the Responsible Official identified in **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after May 16, 2024. If competing requests for repatriation are received, California State University, Sacramento must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. California State University, Sacramento is responsible for sending a copy of this notice to the Indian Tribes identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

[NPS–WASO–NAGPRA–NPS0037766; PPWOCRADN0–PCU00RP14.R50000]

Notice of Intended Repatriation: Sierra Joint Community College District, Rocklin, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Sierra Joint Community College District intends to repatriate certain cultural items that meet the definition of unassociated funerary objects and that have a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural items in this notice may occur on or after May 16, 2024.

ADDRESSES: Melissa Leal, Sierra Joint Community College District, 5100 Sierra College Blvd., Rocklin, CA 95677, telephone (916) 624–3333, email *mleal@sierracollege.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Sierra Joint Community College District and additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

A total of one lot of unassociated funerary objects have been requested for repatriation. The one lot consists of one paint resource from Badge Creek Mound, Hwy 5 and Cosumnes Road.

Determinations

The Sierra Joint Community College District has determined that:

- The one lot of unassociated funerary objects described in this notice have ongoing historical, traditional, or cultural importance central to the Native American group, including any constituent sub-group (such as a band, clan, lineage, ceremonial society, or other subdivision), according to the Native American traditional knowledge of an Indian Tribe or Native Hawaiian organization.
- There is a reasonable connection between the cultural items described in this notice and the Wilton Rancheria, California.

Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on or after May 16, 2024. If competing requests for repatriation are received, Sierra Joint Community College District must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural items are considered a single request and not competing requests. The Sierra Joint Community College District is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3004 and the implementing regulations, 43 CFR 10.9.

Dated: April 9, 2024.

Notice of Intent To Repatriate Cultural Items: California State University, Sacramento, Sacramento, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), California State University, Sacramento, Sacramento, CA intends to repatriate certain cultural items that meet the definition of unassociated funerary objects and that have a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural items in this notice may occur on or after May 16, 2024.

ADDRESSES: Dr. Mark Wheeler, Chief of Staff to President Luke Wood, California State University, Sacramento, 6000 J Street Sacramento, CA 95819, telephone (916) 460–0490, email *mark.wheeler@csus.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of California State University, Sacramento, and additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

The 106 cultural items were removed from several sites in Yolo County, CA. At an unknown date, cultural items were removed from an unknown site in Yolo County near Clarksburg, CA–YOL–07, and CA–YOL–49 by Anthony Zallio. In 1951, Zallio's estate donated the collections to California State University, Sacramento. In 1970, cultural items were removed from CA–YOL–47 by an unknown individual associated with California State University, Sacramento. In 1960, cultural items from CA–YOL–42 were found during a survey conducted by students from Sacramento State University (now California State University, Sacramento) under the direction of Dr. William Beeson. Additional objects determined to be from Yolo County, but with no associated site name, number or other documentation were also located in the University's collections. It is not known how these objects came into the University's possession. The 101 unassociated funerary objects include faunal and floral remains; flaked and ground stones; modified bones, shells, and stones; and unmodified stones. The five objects of cultural patrimony include flaked stones, and modified bones and shells.

Determinations

California State University, Sacramento, Sacramento, CA has determined that:

- The 101 unassociated funerary objects described above are reasonably believed to have been placed intentionally with or near individual human remains, and are connected, either at the time of death or later as part of the death rite or ceremony and are believed, by a preponderance of the evidence, to have been removed from a specific burial site of an individual or individuals with cultural affiliation to an Indian Tribe or Native Hawaiian organization.
- The five objects of cultural patrimony described in this notice have ongoing historical, traditional, or cultural importance central to the Native American group, including any constituent sub-group (such as a band, clan, lineage, ceremonial society, or other subdivision), according to the Native American traditional knowledge of an Indian Tribe or Native Hawaiian organization.
- There is a reasonable connection between the cultural items described in this notice and the Yocha Dehe Wintun Nation, California.

Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on or after May 16, 2024. If competing requests for repatriation are received, California State University, Sacramento must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural items are considered a single request and not competing requests. California State University, Sacramento is responsible for sending a copy of this notice to the Indian Tribe identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3004 and the implementing regulations, 43 CFR 10.9.

Notice of Inventory Completion: Grand Rapids Public Museum, Grand Rapids, MI

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Grand Rapids Public Museum has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after May 16, 2024.

ADDRESSES: Alex Forist, Chief Curator, 272 Pearl Street NW, Grand Rapids, MI 49504, telephone (616) 929–1809, email *aforist@grpm.org.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Grand Rapids Public Museum, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual has been reasonably identified. The two associated funerary objects are pottery sherds. At an unknown date, the related ancestral remains and associated funerary objects were removed from Walnut Canyon, AZ, by an unknown individual. At an unknown date, Mrs. Ernest T. Ross acquired the ancestral remains and funerary objects from an unknown individual. In 1923, she donated the ancestral remains and funerary objects to the Grand Rapids Public Museum. The GRPM's records describe the remains and funerary objects as ''cliff dweller'' from Walnut Canyon, Arizona.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location or acquisition history of the human remains and associated funerary objects described in this notice.

Determinations

The Grand Rapids Public Museum has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- The two objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a reasonable connection between the human remains and associated funerary objects described in this notice and the Fort McDowell Yavapai Nation, Arizona; Havasupai Tribe of the Havasupai Reservation, Arizona; Hopi Tribe of Arizona; Hualapai Indian Tribe of the Hualapai Indian Reservation, Arizona; Kaibab Band of Paiute Indians of the Kaibab Indian Reservation, Arizona; Navajo Nation, Arizona, New Mexico, & Utah; San Carlos Apache Tribe of the San Carlos Reservation, Arizona; San Juan Southern Paiute Tribe of Arizona; Tonto Apache Tribe of Arizona; White Mountain Apache Tribe of the Fort Apache Reservation, Arizona; Yavapai-Apache Nation of the Camp Verde Indian Reservation, Arizona; Yavapai-Prescott Indian Tribe; and the Zuni Tribe of the Zuni Reservation, New Mexico.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after May 16, 2024. If competing requests for repatriation are received, the Grand Rapids Public Museum must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The Grand Rapids Public Museum is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: April 9, 2024.

BILLING CODE 4312–52–P

DEPARTMENT OF THE INTERIOR

Office of Natural Resources Revenue

[Docket No. ONRR–2011–0019; DS63644000 DRT000000.CH7000 234D1113RT, OMB Control Number 1012–0001]

Agency Information Collection Activities; Accounts Receivable Confirmations Reporting

AGENCY: Office of Natural Resources Revenue (''ONRR''), Interior.

ACTION: Notice of Information Collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (''PRA''), ONRR is proposing to renew an information collection. Through this Information Collection Request (''ICR''), ONRR seeks renewed authority to collect information related to the paperwork requirements under the Chief Financial Officers Act of 1990 (''CFO Act'') covering the collection of royalties and other mineral revenues due, which obligations are accounted for as accounts receivables.

DATES: Interested persons are invited to submit comments on or before June 17, 2024.

ADDRESSES: All comment submissions must (1) reference ''OMB Control Number 1012–0001'' in the subject line; (2) be sent to ONRR before the close of the comment period listed under **DATES**; and (3) be sent using the following method:

Electronically via the Federal eRulemaking Portal: Please visit *https://www.regulations.gov.* In the Search Box, enter the Docket ID Number for this ICR renewal (''ONRR–2011–0019'') to locate the document and click the ''Comment Now!'' button. Follow the prompts to submit your comment prior to the close of the comment period.

Docket: To access the docket to view the ICR **Federal Register** publications, go to *https://www.regulations.gov* and search ''ONRR–2011–0019'' to view renewal notices recently published in the **Federal Register**, publications associated with prior renewals, and applicable public comments received for this ICR. ONRR will make the comments submitted in response to this notice available for public viewing at *https://www.regulations.gov.*

OMB ICR Data: You may also view information collection review data for this ICR, including past OMB approvals, at *https://www.reginfo.gov/public/do/PRASearch.* Under the ''OMB Control Number'' heading enter ''1012–0001'' and click the ''Search'' button located at the bottom of the page. To view the ICR renewal or OMB approval status, click

on the latest entry (based on the most recent date). On the ''View ICR—OIRA Conclusion'' page, check the box next to ''All'' to display all available ICR information provided by OMB.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, please contact Thomas Anthony, Financial Services, by email at *Thomas.Anthony@onrr.gov* or by telephone at (303) 231–3708.

Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: Pursuant to the PRA, 44 U.S.C. 3501, *et seq.,* and 5 CFR 1320.5, all information collections as defined in 5 CFR 1320.3, require approval by OMB. ONRR may not conduct or sponsor, and you are not required to respond to, a collection of information unless it displays a currently valid OMB control number.

As part of ONRR's continuing effort to reduce paperwork and respondent burdens, ONRR is inviting the public and other Federal agencies to comment on new, proposed, revised, and continuing collections of information in accordance with the PRA and 5 CFR 1320.8(d)(1). This helps ONRR assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand ONRR's information collection requirements and provide the requested data in the desired format.

ONRR is especially interested in public comments addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of ONRR's estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. ONRR will include or summarize each comment in its request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask ONRR in your comment to withhold your personal identifying information from public review, ONRR cannot guarantee that it will be able to do so.

Abstract: (a) General Information: The Secretary of the United States Department of the Interior (''Secretary'') is responsible for mineral resource development on Federal and Indian lands and the Outer Continental Shelf. Laws pertaining to Federal and Indian mineral leases are posted at *https://onrr.gov/references/statutes.* Pursuant to the Federal Oil and Gas Royalty Management Act of 1982 (''FOGRMA'') and other laws, the Secretary's responsibilities include maintaining a comprehensive inspection, collection, and fiscal and production accounting and auditing system that: (1) accurately determines mineral royalties, interest, and other payments owed, (2) collects and accounts for such amounts in a timely manner, and (3) disburses the funds collected. *See* 30 U.S.C. 1701 and 1711. ONRR performs these mineral revenue management responsibilities for the Secretary. *See* Secretarial Order No. 3306.

ONRR collects, audits, and disburses royalties, interest, and other payments owed by lessees on minerals produced from Federal and Indian lands. Such information is generally available within the records of the lessee or others involved in the development, transport, processing, purchase, or sale of such minerals. Specifically, companies submit financial information to ONRR on a monthly basis by submitting form ONRR–2014 (Report of Sales and Royalty Remittance for oil and gas reported in OMB Control Number 1012–0004), and form ONRR–4430 (Solid Minerals Production and Royalty Report reported in OMB Control Number 1012–0010). These royalty reports result in accounts receivables and capture most of the mineral revenues that ONRR collects.

The basis for the data that a company submits on forms ONRR–2014 and ONRR–4430 is generally available within the records of the lessee or others involved in developing, transporting, processing, purchasing, or selling such minerals. The information that ONRR collects under this ICR includes data necessary to ensure that ONRR's accounts receivables are accurately based on the value of the mineral production, as reported to ONRR on forms ONRR–2014 and ONRR–4430.

(b) Information Collections: Every year, under the CFO Act, the Office of Inspector General (''OIG'') or its agent audits the accounts receivable portions of the Department of the Interior's financial statements, which includes accounts receivables based on ONRR forms ONRR–2014 and ONRR–4430. Accounts receivable confirmations are a common practice in the audit business. Due to a continuous increase in scrutiny of financial audits, a third-party confirmation of the validity of ONRR's financial records is necessary.

As part of CFO Act audits, the OIG or its agent selects a sample of accounts receivable items based on forms ONRR–2014 and ONRR–4430 and provides the sample items to ONRR. ONRR then identifies the company names and addresses for the sample items selected and creates accounts receivable confirmation letters. In order to meet the CFO Act's requirements, the letters must be on ONRR letterhead and the Deputy Director for ONRR, or his or her designee, must sign the letters. The letter requests third-party confirmation responses by a specified date on whether ONRR's accounts receivable records agree with royalty payor records for the following items: (1) customer identification; (2) royalty invoice number; (3) payor assigned document number; (4) date of ONRR receipt; (5) original amount the payor reported; and (6) remaining balance due to ONRR. The OIG or its agent mails the letters to the payors, instructing them to respond directly to confirm the accuracy and validity of selected royalty receivable items and amounts. In turn, it is the responsibility of the payors to verify, research, and analyze the amounts and balances reported on their respective forms ONRR–2014 and ONRR–4430.

Title of Collection: Accounts Receivable Confirmations.

OMB Control Number: 1012–0001.

Form Number: None.

Type of Review: Extension of a currently approved collection.

Respondents/Affected Public: Businesses.

Total Estimated Number of Annual Respondents: 24 randomly selected mineral payors from Federal and Indian lands and the OCS.

Total Estimated Number of Annual Responses: 24.

Estimated Completion Time per Response: ONRR estimates that each

response will take 15 minutes for payors to complete.

Total Estimated Number of Annual Burden Hours: 6 hours.

Respondent's Obligation: Voluntary.

Frequency of Collection: Annual.

Total Estimated Annual Non-Hour Burden Cost: ONRR did not identify any ''non-hour cost'' burden associated with this collection of information.

An agency may not conduct, or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the PRA of 1995 (44 U.S.C. 3501 *et seq.*).

Howard M. Cantor,

Director, Office of Natural Resources Revenue.

BILLING CODE 4335–30–P

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

[RR040U2000, XXXR4081G3, RX.05940913.FY19400]

Public Meeting of the Glen Canyon Dam Adaptive Management Work Group

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of public meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act of 1972, the Bureau of Reclamation (Reclamation) is publishing this notice to announce that a Federal Advisory Committee meeting of the Glen Canyon Dam Adaptive Management Work Group (AMWG) will take place. The meeting is open to the public.

DATES: The meeting will be held virtually on Wednesday, May 15, 2024, beginning at 9 a.m. (MDT) and concluding five (5) hours later in the respective time zones.

ADDRESSES: The virtual meeting held on Wednesday, May 15, 2024, may be accessed at *https://rec.webex.com/rec/j.php?MTID=mb125cd42a41ba24a5102bec2bd5650a2;* Meeting Number: 2820 785 2032, Password: AMP15. Phone Number: (415) 527–5035.

FOR FURTHER INFORMATION CONTACT: Mr. William Stewart, Bureau of Reclamation, telephone (385) 622–2179, email at *wstewart@usbr.gov.* Individuals who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The Glen Canyon Dam Adaptive Management Program (GCDAMP) was implemented as a result of the Record of Decision on the Operation of Glen Canyon Dam Final Environmental Impact Statement to comply with consultation requirements of the Grand Canyon Protection Act (Pub. L. 102–575) of 1992. The AMWG makes recommendations to the Secretary of the Interior concerning Glen Canyon Dam operations and other management actions to protect resources downstream of Glen Canyon Dam, consistent with the Grand Canyon Protection Act. The AMWG meets two to three times a year.

Agenda: The AMWG will meet to receive updates on: (1) current basin hydrology and water year 2024 operations; (2) experiments considered for implementation in 2024; and (3) long-term funding considerations. The AMWG will also discuss other administrative and resource issues pertaining to the GCDAMP. To view a final copy of the agenda and documents related to the above meeting, please visit Reclamation's website at *https://www.usbr.gov/uc/progact/amp/amwg.html.*

Meeting Accessibility/Special Accommodations: The meeting is open to the public. Please make requests in advance for sign language interpreter services, assistive listening devices, or other reasonable accommodations. We ask that you contact Mr. William Stewart (see **FOR FURTHER INFORMATION CONTACT** section of this notice) at least seven (7) business days prior to the meeting to give the Department of the Interior sufficient time to process your request. All reasonable accommodation requests are managed on a case-by-case basis.

Public Disclosure of Comments: Time will be allowed for any individual or organization wishing to make extemporaneous and/or formal oral comments. Depending on the number of persons wishing to speak, and the time available, the time for individual comments may be limited. Interested parties should contact Mr. William Stewart (see **FOR FURTHER INFORMATION CONTACT**) for placement on the public speaker list for this meeting. Members of the public may also choose to submit written comments by emailing them to *wstewart@usbr.gov.* Due to time constraints during the meeting, the AMWG is not able to read written public comments. All written comments will be made part of the public record and will be provided to the AMWG members.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 5 U.S.C. ch. 10.

William Stewart,

Adaptive Management Group Chief, Resources Management Division, Upper Colorado Basin—Interior Region 7.

BILLING CODE 4332–90–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1335]

Certain Integrated Circuits, Mobile Devices Containing the Same, and Components Thereof; Notice of Commission Decision Not To Review an Initial Determination Terminating the Investigation in its Entirety Based on Settlement; Termination of the Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review an initial determination (''ID'') (Order No. 84) of the presiding Administrative Law Judge (''ALJ'') terminating the above-captioned investigation in its entirety based on settlement. The investigation is terminated.

FOR FURTHER INFORMATION CONTACT: Houda Morad, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 708–4716. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be

obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: On October 19, 2022, the Commission instituted this investigation under section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337 (''section 337''), based on a complaint filed by Daedalus Prime LLC (''Daedalus'') of Bronxville, New York. *See* 87 FR 63528–29 (Oct. 19, 2022). The complaint alleges a violation of section 337 based upon the importation into the United States, the sale for importation, and the sale within the United States after importation of certain integrated circuits, mobile devices containing the same, and components thereof by reason of infringement of certain claims of U.S. Patent Nos. 8,775,833 (''the '833 patent''); 8,898,494 (''the '494 patent''); 10,049,080 (''the '080 patent''); and 10,705,588 (''the '588 patent''). *See id.* The notice of investigation names the following respondents: Samsung Electronics Co., Ltd. of Suwon-si, Republic of Korea and Samsung Electronics America, Inc. of Ridgefield Park, New Jersey (collectively, ''Samsung'') and Qualcomm Inc. (''Qualcomm'') of San Diego, California. *See id.* The Office of Unfair Import Investigations (''OUII'') is also a party to the investigation. *See id.*

On July 19, 2023, the Commission terminated the investigation as to Samsung based on settlement. *See* Order No. 39 (June 21, 2023), *unreviewed by* Comm'n Notice (July 19, 2023).

The Commission also terminated the investigation as to claims 6–19 of the '588 patent and all asserted claims of the '494, '833, and '080 patents, based on the withdrawal of the allegations in the complaint as to those claims. *See* Order No. 31 (May 18, 2023), *unreviewed by* Comm'n Notice (June 12, 2023); Order No. 32 (May 18, 2023), *unreviewed by* Comm'n Notice (June 12, 2023); Order No. 42 (June 30, 2023), *unreviewed by* Comm'n Notice (July 28, 2023); Order No. 49 (Aug. 1, 2023), *unreviewed by* Comm'n Notice (Aug. 28, 2023); Order No. 59 (Aug. 14, 2023), *unreviewed by* Comm'n Notice (Sept. 11, 2023).

On February 29, 2024, complainant Daedalus and respondent Qualcomm (collectively, ''the Private Parties'') filed a joint motion to terminate the investigation in its entirety based on settlement. On March 11, 2024, OUII filed a response supporting the joint motion to terminate.

On March 12, 2024, the ALJ issued the subject ID (Order No. 84) granting the joint motion to terminate the investigation based on settlement. Pursuant to Commission Rule 210.21(b) (19 CFR 210.21(b)), the ID notes that the Private Parties included public and confidential versions of the settlement agreement between them. *See* ID at 3. The ID also notes that ''the Private Parties represent that there are no other agreements, written or oral, express or implied, between them concerning the subject matter of this Investigation.'' *Id.* The ID further notes that ''in the absence of extraordinary circumstances, termination of an investigation will be readily granted to a complainant during the prehearing stage of an investigation.'' *Id.* at 2.

No petition for review of the subject ID was filed. The Commission has determined not to review the subject ID. The investigation is terminated.

The Commission's vote for this determination took place on April 11, 2024.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: April 11, 2024.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2024–08025 Filed 4–15–24; 8:45 am]

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1397]

Certain Cellular Base Station Communication Equipment, Components Thereof, and Products Containing Same; Notice of Institution of Investigation

AGENCY: U.S. International Trade Commission

ACTION: Notice.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on March 11, 2024, under section 337 of the Tariff Act of 1930, as amended, on behalf of Motorola Mobility LLC of Chicago, Illinois. A supplement was filed on March 19, 2024. The complaint, as supplemented, alleges violations of section 337 based upon the importation into the United States, the sale for importation, and the sale within the United States after importation of certain cellular base station communication equipment, components thereof, and products containing same by reason of the infringement of certain claims of U.S. Patent No. 11,076,304 (''the '304 patent'') and U.S. Patent No. 11,711,706 (''the '706 patent''). The complaint further alleges that an industry in the United States exists as required by the applicable Federal Statute.

The complainant requests that the Commission institute an investigation and, after the investigation, issue a limited exclusion order and cease and desist orders.

ADDRESSES: The complaint, except for any confidential information contained therein, may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at (202) 205–2000. General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.*

FOR FURTHER INFORMATION CONTACT: Pathenia M. Proctor, The Office of Unfair Import Investigations, U.S. International Trade Commission, telephone (202) 205–2560.

SUPPLEMENTARY INFORMATION:

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, and in section 210.10 of the Commission's Rules of Practice and Procedure, 19 CFR 210.10 (2024).

Scope of Investigation: Having considered the complaint, the U.S. International Trade Commission, on April 10, 2024, *Ordered That*—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended, an investigation be instituted to determine whether there is a violation of subsection (a)(1)(B) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain products identified in paragraph (2) by reason of infringement of one or more of claims 10–18 of the '304 patent and claims 15–20 of the '706 patent, and whether an industry in the United States exists as required by subsection (a)(2) of section 337;

(2) Pursuant to section 210.10(b)(1) of the Commission's Rules of Practice and

Procedure, 19 CFR 210.10(b)(1), the plain language description of the accused products or category of accused products, which defines the scope of the investigation, is ''cellular base station communication equipment, specifically 5G NR radio units and baseband units, components thereof, and products containing same'';

(3) Pursuant to Commission Rule 210.50(b)(1), 19 CFR 210.50(b)(1), the presiding administrative law judge shall take evidence or other information and hear arguments from the parties or other interested persons with respect to the public interest in this investigation, as appropriate, and provide the Commission with findings of fact and a recommended determination on this issue, which shall be limited to the statutory public interest factors set forth in 19 U.S.C. 1337(d)(1), (f)(1), (g)(1);

(4) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is: Motorola Mobility LLC, 222 W. Merchandise Mart Plaza, Suite 1800, Chicago, Illinois 60654.

(b) The respondents are the following entities alleged to be in violation of section 337, and are the parties upon which the complaint is to be served: Ericsson AB, Torshamnsgatan 23, Kista, 16480 Stockholm, Sweden; Telefonaktiebolaget LM Ericsson, Torshamnsgatan 21, Kista, SE–164 83, Stockholm, Sweden; Ericsson Inc., 6300 Legacy Drive, Plano, TX 75024.

(c) The Office of Unfair Import Investigations, U.S. International Trade Commission, 500 E Street SW, Suite 401, Washington, DC 20436; and

(5) For the investigation so instituted, the Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding Administrative Law Judge.

Responses to the complaint and the notice of investigation must be submitted by the named respondents in accordance with section 210.13 of the Commission's Rules of Practice and Procedure, 19 CFR 210.13. Pursuant to 19 CFR 201.16(e) and 210.13(a), as amended in 85 FR 15798 (March 19, 2020), such responses will be considered by the Commission if received not later than 20 days after the date of service by the complainant of the complaint and the notice of investigation. Extensions of time for submitting responses to the complaint and the notice of investigation will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter an initial determination and a final determination containing such findings, and may result in the issuance of an exclusion order or a cease and desist order or both directed against the respondent.

By order of the Commission.
Issued: April 10, 2024.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 332–600]

USMCA Automotive Rules of Origin: Economic Impact and Operation, 2025 Report

AGENCY: United States International Trade Commission.

ACTION: Scheduling of a public hearing.

SUMMARY: The U.S. International Trade Commission (Commission) has scheduled a public hearing for Investigation No. 332–600, *USMCA Automotive Rules of Origin: Economic Impact and Operations, 2025 Report,* for October 8, 2024.

DATES:

September 24, 2024: Deadline for filing requests to appear at the public hearing.

September 26, 2024: Deadline for filing prehearing briefs and statements.

October 1, 2024: Deadline for filing electronic copies of oral hearing statements (testimony).

October 8, 2024: Public hearing.

October 16, 2024: Deadline for filing posthearing briefs.

November 18, 2024: Deadline for filing all other written submissions.

July 1, 2025: Transmittal of Commission report to the President, the House Committee on Ways and Means, and the Senate Committee on Finance.

ADDRESSES: All Commission offices, including the Commission's hearing rooms, are located in the U.S. International Trade Commission Building, 500 E Street SW, Washington, DC. All written submissions should be addressed to the Secretary, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

FOR FURTHER INFORMATION CONTACT: Project Leader Mitch Semanik (202–205–2034 or *mitchell.semanik@usitc.gov*), or Deputy Project Leaders Nathan Lotze (202–205–3231 or *nathan.lotze@usitc.gov* or 202–205–3231) and Aaron Woodward (202–205–2663 or *aaron.woodward@usitc.gov*) for information specific to these investigations. For information on the legal aspects of this investigation, contact Brian Allen (202–205–3034 or *brian.allen@usitc.gov*) or William Gearhart (202–205–3091 or *william.gearthart@usitc.gov*) of the Commission's Office of the General Counsel. The media should contact Jennifer Andberg, Office of External Relations (202–205–3404 or *jennifer.andberg@usitc.gov*). Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal at 202–205–1810. General information concerning the Commission may be obtained by accessing its internet address (*https://www.usitc.gov*). Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000.

SUPPLEMENTARY INFORMATION:

Background: The 2025 report will be the second of five reports that section 202A(g)(2) of the United States-Mexico-Canada Agreement Implementation Act (19 U.S.C. 4532(g)(2)) (''USMCA Implementation Act'') requires that the Commission provide on the USMCA automotive rules of origin (ROOs) and their impact on the U.S. economy, effect on U.S. competitiveness, and relevancy considering recent technology changes. In particular, the USMCA Implementation Act requires that the Commission report on the following:

(1) The economic impact of the USMCA automotive ROOs on U.S. gross domestic product; U.S. exports and imports; U.S. aggregate employment and employment opportunities; production, investment, use of productive facilities, and profit levels in the U.S. automotive industries and other pertinent industries; wages and employment of workers in the U.S. automotive sector; and the interests of U.S. consumers.

(2) The operation of the ROOs and their effects on the competitiveness of the United States with respect to

production and trade in automotive goods, taking into account developments in technology, production processes, or other related matters.

(3) Whether the ROOs are relevant in light of technological changes in the United States.

(4) Such other matters as the Commission considers relevant to the economic impact of the ROOs, including prices, sales, inventories, patterns of demand, capital investment, obsolescence of equipment, and diversification of production in the United States.

The USMCA Implementation Act requires that the Commission transmit its report on July 1, 2025. The Commission is directed to submit additional reports on USMCA automotive ROOs every two years thereafter until 2031.

Public hearing: A public hearing in connection with this investigation will be held beginning at 9:30 a.m., October 8, 2024, in the Main Hearing Room of the U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. The hearing can also be accessed remotely using the WebEx videoconference platform. A link to the hearing will be posted on the Commission's website at *https://www.usitc.gov/calendarpad/calendar.html.*

Requests to appear at the hearing should be filed with the Secretary to the Commission no later than 5:15 p.m., September 24, 2024, in accordance with the requirements in the ''Written Submissions'' section below. Any requests to appear as a witness via videoconference must be included with your request to appear. Requests to appear as a witness via videoconference must include a statement explaining why the witness cannot appear in person; the Chairman, or other person designated to conduct the investigation, may at their discretion for good cause shown, grant such requests. Requests to appear as a witness via videoconference due to illness or a positive COVID–19 test result may be submitted by 3 p.m. the business day prior to the hearing.

All prehearing briefs and statements should be filed no later than 5:15 p.m., September 26, 2024. To facilitate the hearing, including the preparation of an accurate written public transcript of the hearing, oral testimony to be presented at the hearing should be submitted to the Commission electronically no later than 5:15 p.m., October 1, 2024. All posthearing briefs and statements should be filed no later than 5:15 p.m., October 16, 2024. Posthearing briefs and statements should address matters raised at the hearing. For a description of the different types of written briefs and statements, see the ''Definitions of types of documents that may be filed'' section below.

In the event that, as of the close of business on September 24, 2024, no witnesses are scheduled to appear at the hearing, the hearing will be canceled. Any person interested in attending the hearing as an observer or nonparticipant should check the Commission's website as indicated above for information concerning whether the hearing will be held.

Written submissions: In lieu of or in addition to participating in the hearing, interested parties are invited to file written submissions concerning this investigation. All written submissions should be addressed to the Secretary, and should be received no later than 5:15 p.m., November 18, 2024. All written submissions must conform to the provisions of section 201.8 of the Commission's *Rules of Practice and Procedure* (19 CFR 201.8), as temporarily amended by 85 FR 15798 (March 19, 2020). Under that rule waiver, the Office of the Secretary will accept only electronic filings at this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, *https://edis.usitc.gov*). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice. Persons with questions regarding electronic filing should contact the Office of the Secretary, Docket Services Division (202–205–1802), or consult the Commission's Handbook on Filing Procedures.

Definitions of types of documents that may be filed; Requirements: In addition to requests to appear at the hearing, this notice provides for the possible filing of four types of documents: prehearing briefs, oral hearing statements, posthearing briefs, and other written submissions.

(1) *Prehearing briefs* refers to written materials relevant to the investigation and submitted in advance of the hearing, and includes written views on matters that are the subject of the investigation, supporting materials, and any other written materials that you consider will help the Commission in understanding your views. You should file a prehearing brief particularly if you plan to testify at the hearing on behalf of an industry group, company, or other organization, and wish to provide detailed views or information that will support or supplement your testimony.

(2) *Oral hearing statements (testimony)* refers to the actual oral statement that you intend to present at the hearing. Do not include any confidential business information (CBI) in that statement. If you plan to testify, you must file a copy of your oral statement by the date specified in this notice. This statement will allow Commissioners to understand your position in advance of the hearing and will also assist the court reporter in preparing an accurate transcript of the hearing (*e.g.,* names spelled correctly).

(3) *Posthearing briefs* refers to submissions filed after the hearing by persons who appeared at the hearing. Such briefs: (a) should be limited to matters that arose during the hearing; (b) should respond to any Commissioner and staff questions addressed to you at the hearing; (c) should clarify, amplify, or correct any statements you made at the hearing; and (d) may, at your option, address or rebut statements made by other participants in the hearing.

(4) *Other written submissions* refers to any other written submissions relevant to the investigation that interested persons wish to make, regardless of whether they appeared at the hearing or filed a prehearing or posthearing brief, and may include new information or updates of information previously provided.

In accordance with the provisions of section 201.8 of the Commission's Rules of Practice and Procedure (19 CFR 201.8), the document must identify on its cover (1) the investigation number and title and the type of document filed (*i.e.,* prehearing brief, oral statement of (name), posthearing brief, or written submission), (2) the name and signature of the person filing it, (3) the name of the organization that the submission is filed on behalf of, and (4) whether it contains CBI. If it contains CBI, it must comply with the marking and other requirements set out below in this notice relating to CBI. Submitters of written documents (other than oral hearing statements) are encouraged to include a short summary of their position or interest at the beginning of the document, and a table of contents when the document addresses multiple issues.

Confidential business information: Any submissions that contain CBI must also comply with the requirements and procedures in section 201.6 of the Commission's *Rules of Practice and Procedure* (19 CFR 201.6). Among other things, section 201.6 of the rules requires that the cover of the document and the individual pages be clearly marked as to whether they are the ''confidential'' or ''nonconfidential'' version, and that the CBI is clearly identified by means of brackets. All written submissions, except for CBI,

will be made available for inspection by interested persons.

The Commission will not include any CBI in its report. However, all information, including CBI, submitted in this investigation may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission, including under 5 U.S.C. appendix 3; or (ii) by U.S. Government employees and contract personnel for cybersecurity purposes. The Commission will not otherwise disclose any CBI in a way that would reveal the operations of the firm supplying the information.

Summaries of views of interested persons: Interested persons wishing to have a summary of their views included in the report should include a summary with a written submission no later than November 18, 2024, and must use the Commission template, which can be downloaded from *https://www.usitc.gov/docket_services/documents/firm_or_organization_summary_word_limit.pdf.* The Commission template must be uploaded as a separate attachment to the written submission filing in EDIS. The summary may not exceed 500 words and should not include any CBI. The summary will be published as provided only if it utilizes the Commission-provided template, meets these requirements, and is germane to the subject matter of the investigation. The Commission will list the name of the organization furnishing the summary and will include a link where the written submission can be found.

By order of the Commission.

Issued: April 11, 2024.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Antitrust Division

Notice Pursuant to the National Cooperative Research and Production Act of 1993—Training & Readiness Accelerator II

Notice is hereby given that, on January 15, 2024, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* (''the Act''), Training & Readiness Accelerator II (''TReX II'') has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership. The notifications were filed for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, Highlight Technologies, Inc., Fairfax, VA; Viasat, Inc., Tempe, AZ; Inspired Engineering Solutions LLC, Niceville, FL; E.O. Solutions LLC, Kula, HI; Vega Technology Group LLC, North Canton, OH; DESE Research, Inc., Huntsville, AL; Waltonen Engineering, Inc., Warren, MI; Origami Software Solutions, Inc., Norfolk, VA; Radius Method, Boca Raton, FL; Scientific Applications & Research Associates, Inc., Cypress, CA; Raven Defense Corp., Albuquerque, NM; Technology and Communications Systems, Inc., Safety Harbor, FL; Expedition Technology, Inc., Herndon, VA; DTCUBED LLC, Sewell, NJ; Skaion Corp., North Chelmsford, MA; Laser Shot, Inc., Stafford, VA; Laulima Systems LLC, Charlottesville, VA; II–VI Aerospace & Defense, Murrieta, CA; Torrey Pines Logic, Inc., San Diego, CA; Theissen Training Systems, Inc., Gainesville, FL; Aunautic Technologies, National City, CA; Advanced Fiber Systems, Inc., Ann Arbor, MI; Corps Solutions LLC, Stafford, VA; The Boeing Company, St. Louis, MO; Aderas, Inc., Reston, VA; Immobileyes, Inc., Kent, OH; MSI Defense Solutions, LLC, Mooresville, NC; Riverside Research, Arlington, VA; L3 Technologies, Simi Valley, CA; F3EA, Inc., Savannah, GA; Engeniusmicro, Huntsville, AL; VK Integrated Systems, Clarksville, TN; Defense Industry Advisors LLC, Dayton, OH; Technovative Applications, Brea, CA; National Technical Systems, Belcamp, MD; Virginia Tech Applied Research Corporation, Arlington, VA; Planned Systems International, Inc., Columbia, MD; SciTec, Inc., Princeton, NJ; Applied Training Solutions LLC, Greensburg, PA; Hermeus Corporation, Atlanta, GA; BlackOhm LLC, Tempe, AZ; Tybram LLC Jacksonville, FL; Spectral Sciences, Inc., Burlington, MA; Orolia Government Systems, Inc., Rochester, NY; nLIGHT DEFENSE Systems, Inc., Longmont, CO; Mass Virtual, Inc., Orlando, FL; Applied Physical Electronics LLC, Spicewood, TX; Setter Research, Inc., Greensboro, NC; and Blackrock Strategy, LLC, Huntsville, AL, have been added as parties to this venture.

Also, NAL Research Corp., Manassas, VA; Action Engineering, Golden, CO; BrainSim Technologies, Inc., Pennsylvania Furnace, PA; FactualVR, Inc., Jersey City, NJ; Design Interactive, Inc. Orlando, FL; Rise8, Inc., Tampa, FL; Vega Technology Group LLC, North Canton, OH; SparkCognition Government Services, Austin, TX; Metateq, Eugene, OR; Netrist Solutions LLC, Charleston, SC; Next Earth LLC, Ashburn, VA; CMA Technologies, Inc., Orlando, FL; W R Systems, Ltd., Fairfax, VA; and NTELX, Inc., Asheville, NC, have withdrawn as parties to this venture.

No other changes have been made in either the membership or planned activity of the group research project. Membership in this group research project remains open, and TReX II intends to file additional written notifications disclosing all changes in membership.

On February 17, 2023, TReX II filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on June 13, 2023 (88 FR 38536).

The last notification was filed with the Department on October 20, 2023. A notice was published in the **Federal Register** pursuant to section 6(b) of the Act on December 15, 2023 (88 FR 86938).

Notice Pursuant to the National Cooperative Research and Production Act of 1993—UHD Alliance, Inc.

Notice is hereby given that, on January 25, 2024, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* (''the Act''), UHD Alliance, Inc. (''UHD Alliance'') filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership. The notifications were filed for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, Qualcomm Incorporated, San Diego, CA; and Formovie (Chongqing) Innovative Technology Co., Ltd., Beijing, PEOPLE'S REPUBLIC OF CHINA have withdrawn as parties to this venture.

No other changes have been made in either the membership or planned activity of the group research project. Membership in this group research project remains open, and UHD Alliance intends to file additional written notifications disclosing all changes in membership.

On June 17, 2015, UHD Alliance filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on July 17, 2015 (80 FR 42537).

The last notification was filed with the Department on August 30, 2023. A notice was published in the **Federal Register** pursuant to section 6(b) of the Act on October 6, 2023(88 FR 69673).

Suzanne Morris,

Deputy Director Civil Enforcement Operations, Antitrust Division.

BILLING CODE P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Material Modification to Consent Decree Under the Clean Water Act

On April 10, 2024, the Department of Justice lodged a proposed material modification to a Consent Decree (''Decree'') with the United States District Court for the Eastern District of Kentucky in the lawsuit entitled *United*

States and Commonwealth of Kentucky v. *Lexington-Fayette Urban County Government,* Civil Action No. 5:06–cv–386–KSF.

The Consent Decree—entered by the court in 2011—resolved alleged violations of the Clean Water Act stemming from Lexington-Fayette Urban County Government's (''LFUCG'') operation of its sanitary sewer system and wastewater treatment plant. The Decree—including a First Material Modification entered by the court in 2015—required LFUCG to complete remedial projects to its sewer system and wastewater treatment plant to eliminate sanitary sewer overflows by December 31, 2026. The proposed material modification extends the final compliance deadline for remedial projects by four years to December 31, 2030, as well as making changes to reporting frequency and methods.

The publication of this notice opens a period for public comment on the proposed modification. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States and Commonwealth of Kentucky* v. *Lexington-Fayette Urban County Government,* D.J. Ref. No. 90–5–1–1–08858. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	*Send them to:*
By email	*pubcomment-ees.enrd@usdoj.gov.*
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

During the public comment period, the proposed modification, along with the previously entered Consent Decree and First Material Modification, may be examined and downloaded at this Justice Department website: *http://www.justice.gov/enrd/consent-decrees.* If you require assistance accessing the proposed material modification, you may request assistance by email or by mail to the addresses provided above for submitting comments.

Scott D. Bauer,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Safe Drinking Water Act

On April 9, 2024, the Department of Justice lodged a proposed Consent Decree with the United States District Court for the Eastern District of California in the lawsuit entitled *United States* v. *Grindstone Indian Rancheria of Wintun-Wailaki Indians of California,* Civil Action No. 2:24–cv–01044–KJM–CKD.

The proposed Consent Decree would resolve claims against the Grindstone Indian Rancheria of Wintun-Wailaki Indians of California (''Defendant'') arising under sections 1414(g) and 1431 of the Safe Drinking Water Act (''SDWA''), 42 U.S.C. 300g–3(g) and 300i, and the SDWA's National Primary Drinking Water Regulations at 40 CFR part 141, as well as for its failure to comply with the requirements of two administrative orders issued by the United States Environmental Protection Agency pertaining to Defendant's noncompliance with the SDWA and its regulations at the Grindstone Indian Rancheria Public Water System. The proposed Consent Decree resolves these claims and includes a civil penalty of $8,963 and injunctive relief including, but not limited to, demonstrating compliance with surface water treatment requirements, providing boil water notices and alternative water supply, retaining at least two full time operators for the drinking water system, providing annual reporting to its customers, providing operating reports to EPA, and developing and implementing an extensive operation and maintenance plan for the water system.

The publication of this notice opens a period for public comment on the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States* v. *Grindstone Indian Rancheria of Wintun-Wailaki Indians of California, D.J. Ref. No. 90–5–1–1–12322.* All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	*Send them to:*
By email	*pubcomment-ees.enrd@usdoj.gov.*
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Any comments submitted in writing may be filed by the United States in whole or in part on the public court docket without notice to the commenter.

During the public comment period, the proposed Consent Decree may be examined and downloaded at this Justice Department website: *https://www.justice.gov/enrd/consent-decrees.* If you require assistance accessing the proposed Consent Decree, you may request assistance by email or by mail to the addresses provided above for submitting comments.

Scott Bauer,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Comprehensive Environmental Response, Compensation, and Liability Act

On April 11, 2024, the Department of Justice lodged a proposed consent decree with the United States District Court for the District of New Jersey in the lawsuit entitled *United States, New Jersey Department of Environmental Protection, the Commissioner of the New Jersey Department of Environmental Protection, and the Administrator of the New Jersey Spill Compensation Fund* v. *PPG Industries, Inc.,* Civil Action No. 2:24–04771.

The United States filed this lawsuit under the Comprehensive Environmental Response, Compensation, and Liability Act (''CERCLA''), on behalf of the U.S. Environmental Protection Agency (''EPA''). The New Jersey Department of Environmental Protection, the Commissioner of the New Jersey Department of Environmental Protection, and the Administrator of the New Jersey Spill Compensation Fund (collectively, ''NJDEP'') are co-plaintiffs. PPG Industries, Inc. (''PPG'') is the defendant named in the complaint. The complaint seeks injunctive relief and reimbursement of response costs in connection with the Riverside Industrial

Park Superfund Site (''Site'') located in Newark, New Jersey.

Under the proposed consent decree, PPG is required to (a) design and implement the components of the remedy selected for the Site in EPA's September 28, 2021, Record of Decision that relate to waste material, sewer water, soil gas, and soil/fill material, and (b) perform groundwater monitoring and implement institutional controls (the ''Work''). The estimated cost of the Work is about $15 million. PPG will also reimburse the United States $2,883,120 and NJDEP $116,880 for past costs relating to the Site and will pay the United States and NJDEP for future response costs they incur relating to the Work. In return, the United States agrees not to sue or take administrative action under sections 106 and 107 of CERCLA against PPG for the Work, EPA past costs relating to the Site, and future response costs EPA will incur relating to the Work. NJDEP also agrees not to sue or take administrative action against PPG for NJDEP past costs relating to the Site and for future response costs NJDEP will incur relating to the Work.

The publication of this notice opens a period for public comment on the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States and NJDEP* v. *PPG Industries, Inc,* D.J. Ref. No. 90–11–2–12543. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	*Send them to:*
By email	*pubcomment-ees.enrd@usdoj.gov.*
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Any comments submitted in writing may be filed in whole or in part on the public court docket without notice to the commenter.

During the public comment period, the proposed consent decree may be examined and downloaded at this Justice Department website: *https://www.justice.gov/enrd/consent-decrees.* If you require assistance accessing the proposed consent decree, you may request assistance by email or by mail to the addresses provided above for submitting comments.

Henry S. Friedman,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree

In accordance with Departmental Policy, 28 CFR 50.7, notice is hereby given that a proposed Consent Decree in *United States* v. *Villegas,* Civil Action No. 1:24-cv-962, was lodged with the United States District Court for the District of Colorado on April 10, 2024.

This proposed Consent Decree concerns a complaint filed by the United States against Defendants Thomas and Amy Villegas, pursuant to 33 U.S.C. 1311(a) and 33 U.S.C. 1319(b), to obtain injunctive relief from the Defendants for violating the Clean Water Act by discharging pollutants without a permit into waters of the United States. The Clean Water Act violations concern filling, grading, and excavation activities conducted in Lincoln County, Nebraska, along a braided channel of the Platte River. The proposed Consent Decree resolves these allegations by requiring the Defendants to restore impacted areas.

The Department of Justice will accept written comments relating to this proposed Consent Decree for thirty (30) days from the date of publication of this Notice. Please address comments by mail to Phillip Dupré, United States Department of Justice, Environment and Natural Resources Division, Environmental Defense Section, Post Office Box 7611, Washington, DC 20044, or by email to *pubcomment_eds.enrd@usdoj.gov* and refer to *United States* v. *Villegas,* DJ No. 90–5–1–1–22164.

The proposed Consent Decree may be examined at the Clerk's Office, United States District Court for the District of Colorado, 901 19th Street, Denver, CO 80294. In addition, the proposed Consent Decree may be examined electronically at *https://www.justice.gov/enrd/consent-decrees.*

Cherie Rogers,

Assistant Section Chief, Environmental Defense Section, Environment and Natural Resources Division.

BILLING CODE P

DEPARTMENT OF LABOR

Employee Benefits Security Administration

Proposed Information Collection Request Submitted for Public Comment; Retirement Savings Lost and Found

AGENCY: Employee Benefits Security Administration, Department of Labor.

ACTION: Notice.

SUMMARY: The Department is proposing to collect information voluntarily in order to establish the Retirement Savings Lost and Found online searchable database described in section 523 of the Employee Retirement Income Security Act of 1974 (ERISA) and to connect missing participants and other individuals who have lost track of their retirement benefits with such benefits. The proposal solicits specific information from administrators of retirement plans subject to ERISA. Pursuant to the Paperwork Reduction Act of 1995 (PRA), the Department of Labor's Employee Benefits Security Administration (Department or EBSA) is soliciting comments on the proposed information collection request (ICR) described below.

DATES: Written comments must be submitted to the office shown in the **ADDRESSES** section on or before June 17, 2024.

ADDRESSES: James Butikofer, U.S. Department of Labor, Employee Benefits Security Administration, Office of Research and Analysis, 200 Constitution Avenue NW, N–5718, Washington, DC 20210, *ebsa.opr@dol.gov.*

SUPPLEMENTARY INFORMATION:

I. Introduction and Summary of Burden

This notice requests public comment on the Department's proposed collection of information from plan administrators of retirement plans subject to ERISA for the purpose of establishing the Retirement Savings Lost and Found online searchable database to reunite workers with retirement benefits earned over their working lives and to help the Department assist them in that effort. A summary of the current burden estimates follows:

Agency: Employee Benefits Security Administration, U.S. Department of Labor.

Title: Retirement Savings Lost and Found.

OMB Control Number: 1210–NEW.

Affected Public: Not-for-profit institutions, Businesses or other for-profits.

Respondents: 359,368.

Responses: 359,368.
Estimated Total Burden Hours: 239,579.
Estimated Total Burden Cost (Operating and Maintenance): $0.

II. Description

A. Background

Section 303 of the SECURE 2.0 Act of 2022, which was enacted on December 29, 2022 (SECURE 2.0),[1] amended part 5 of subtitle B of title I of ERISA to add Section 523, which requires the Department, not later than 2 years after the date of enactment and in consultation with the Secretary of the Treasury, to create an online searchable database, to be known as the Retirement Savings Lost and Found. Among other things, SECURE 2.0 requires that this database allow retirement savers who may have lost track of their retirement plan to search for the contact information of their plan administrator in order to make a claim for benefits that may be owing to the individual under the plan.

Separate from the database required by SECURE 2.0, the Department administers the Terminated Vested Participants Project (TVPP or missing participant program). The TVPP has three key objectives for defined benefit pension plans. First, to ensure these plans maintain adequate census and other records necessary to determine (a) the identity and address of participants and beneficiaries due benefits under the plan, (b) the amount of benefits due under the plan, and (c) when participants and beneficiaries are eligible to commence benefits. Second, to ensure these plans have appropriate procedures for advising participants with vested accrued benefits of their eligibility to apply for benefits as they near normal retirement age and the date they must start required minimum distributions under federal tax law. Third, to ensure these plans implement appropriate search procedures for terminated participants and beneficiaries for whom they have incorrect or incomplete information. Since 2017, the Department has recovered more than $6.7 billion for such ''missing'' participants and beneficiaries.

The Department's experience indicates that retirement plan administrators lose track of participants and beneficiaries, and participants and beneficiaries lose track of their retirement benefits for many reasons. For example, sometimes plans may be unable to communicate with individuals who separated from service with deferred vested benefits, or their designated beneficiaries, because of inadequate recordkeeping practices, ineffective processes for communicating with such participants and beneficiaries, and faulty procedures for searching for participants and beneficiaries for whom they have incorrect or incomplete contact information. In addition, sometimes after workers change jobs, their former employers that sponsor the retirement plans go out of business or go through corporate events such as a merger, consolidation, or spinoff.

There is no more fundamental purpose of a retirement plan under ERISA than paying promised benefits. See 29 U.S.C. 1001. Losing track of individuals after long years of plan participation deprives workers and their families their full earned retirement benefits. The Department believes that it is united with plan sponsors and administrators in the goal of making sure that workers and their beneficiaries receive the retirement benefits they earned and were promised. By providing the data requested by this proposed ICR to enable the Department to establish and maintain the Retirement Savings Lost and Found online searchable database, retirement plans will make it more likely that promised benefits will be paid.

As an initial matter, the Department is seeking voluntary participation in this proposed ICR. The Department had planned to use data that plan administrators submitted to the Internal Revenue Service (IRS) on Form 8955–SSA (Annual Registration Statement Identifying Separated Participants With Deferred Vested Benefits). However, citing concerns under section 6103 of the Internal Revenue Code (Code),[2] IRS has now indicated that it will not authorize the release of this data to the Department for the purpose of communicating either directly with participants and beneficiaries about retirement plans that may still owe them retirement benefits or indirectly through the Retirement Savings Lost and Found online searchable database. Accordingly, the Department is proposing to request plan administrators to voluntarily furnish the information specified below directly to the Department.

By collecting this data, the Department is optimistic that it can work together with plan administrators to further reduce the number of missing participants and promote the payment of promised benefits, thus, helping plan administrators and other fiduciaries resolve issues and inaccuracies in the plans' books and records, and better comply with their fiduciary obligations.

B. Overview of Requested Data

This notice proposes to request that plan administrators (or their authorized representatives, such as recordkeepers) voluntarily provide the information described in sections III through V below. This information is needed by the Department to establish the Retirement Savings Lost and Found online searchable database no later than December 29, 2024. The Retirement Savings Lost and Found online searchable database will enable individuals to locate benefits they are owed by providing them with contact information for their plan administrator, the designated trustee or issuer described in section 401(a)(31)(B) of the Code, or the issuer of an annuity described in section 523(e)(3)(C) of ERISA.

Section 523(e) of ERISA expressly authorizes the Department to collect information described in sections 6057(b)(1) through (4) and 6057(a)(2)(A) and (B) of the Code. It also authorizes the Department to collect the names and social security numbers of participants and former participants described in Code section 6057(a)(2)(C) (*i.e.,* individuals who separated from service covered under their plans and who are entitled to deferred vested benefits) and identify those who were fully paid their deferred vested benefits. Finally, it also authorizes the Department to collect the names and social security numbers of each participant or former participant in the plan with respect to whom vested benefits were distributed under section 401(a)(31)(B) of the Code or to whom a deferred annuity contract was distributed.

Much of the foregoing information is currently reported to the IRS on Form 8955–SSA.[3] The information reported on Forms 8955–SSA is generally provided by the IRS to the Social Security Administration (SSA). The SSA then provides the reported information to separated vested participants when they file for social security benefits. Pursuant to section 523(c) of ERISA, the Department consulted with the Secretary of the Treasury and IRS on the Retirement Savings Lost and Found online

[1] Consolidated Appropriations Act, 2023, H.R. 2617.

[2] See 26 U.S.C. 6103 (confidentiality and disclosure of returns and return information).

[3] The Form 8955–SSA is the designated successor to Schedule SSA (Form 5500). The Schedule SSA attachment to the Form 5500 was the vehicle the IRS used to collect this information until the Schedule SSA was replaced by the stand-alone IRS Form 8955–SSA.

searchable database and had planned to use the data reported on Form 8955–SSA to populate the database. As noted above, however, the IRS has now declined to give this information to the Department to establish and maintain the Retirement Savings Lost and Found online searchable database, citing concerns under section 6103 of the Code.

In addition to the data elements specifically described in section 523(e) of ERISA, the Department is asking for the voluntary submission of additional data. The additional data requested consists mainly of mailing addresses, email addresses, and telephone numbers of separated vested participants and beneficiaries. It also includes an identification of any separated vested participant of normal retirement age or older owed a vested benefit, and who has been unresponsive to plan communications about their vested benefits or whose contact information the plan has reason to believe is no longer accurate. Based on its experience with the missing participant program, the Department believes this additional data may increase the efficiency and effectiveness of locating missing participants. Although this proposed ICR is voluntary, the Department notes that, in addition to the specific grant of authority in section 523(e) of ERISA, mentioned above, the Department has general authority to investigate and collect information under other sections of ERISA, including sections 504 and 505 of ERISA, as well as to verify participants' and beneficiaries' identities under the Retirement Savings Lost and Found online searchable database. The Department further notes that, although this proposed ICR does not impose any new recordkeeping requirements, the Department expects plans that follow best practices will already have much of this additional information on file.

Section 523(c) of ERISA, in relevant part, provides that in establishing the Retirement Savings Lost and Found online searchable database, the Department, in consultation with the Secretary of the Treasury, shall take all necessary and proper precautions to ensure that individuals' plan and personal information maintained by the Retirement Savings Lost and Found online searchable database is protected. Consistent with this provision, the Department will hold the data specifically required by section 523(e) of ERISA secure, verify the identity of participants and beneficiaries seeking access to the data, and limit disclosure to carry out the purposes of section 523 of ERISA. Section VI of this document describes the data security measures in more detail.

To provide an easy and efficient process for plans to furnish the information requested by this proposed ICR, the Department is proposing that plan administrators would provide the information in an attachment to their 2023 Form 5500 Annual Return/Report of Employee Benefit Plan or 2023 Form 5500–SF Short Form Annual Return/Report of Small Employee Benefit Plan, as applicable, (collectively Form 5500) using the all-electronic ERISA Filing Acceptance System (EFAST2). The information would be filed with the Form 5500 in accordance with instructions in EFAST2. Although the information would be submitted through EFAST2 along with the plan's Form 5500, the attachment itself would not be considered part of the Form 5500 annual report filing for purposes of Title I of ERISA. As the agency moves forward with the program, it is looking into providing other simple and efficient means of furnishing the data to the Retirement Savings Lost and Found online searchable database.

Finally, in an effort to establish the most effective Retirement Savings Lost and Found online searchable database possible, this proposed ICR asks for specific information dating back to the date a covered plan became subject to ERISA. The Department recognizes that some plans may not have retained such historical data. Nevertheless, to the extent that information is available, the Department encourages plan administrators to provide historic information from the date the plan first became subject to ERISA or as far back as possible, if shorter.

III. Plans With Separated Vested Participants

For any plan with a participant or former participant described in 26 U.S.C. 6057(a)(2)(C) (''separated vested participant''), provide the following information with respect to that plan:

1. Name and plan number of plan as reflected on the most recent Form 5500 Annual Return/Report of Employee Benefit Plan or Form 5500–SF Short Form Annual Return/Report of Employee Benefit Plan (individually and collectively ''Form 5500''). If the plan had names other than the name on the most recent Form 5500, provide the prior names and plan numbers and include the date of change.

2. Name, employer identification number (EIN), mailing address, and telephone number of the plan administrator as reflected on the most recent Form 5500. If the plan had plan administrators other than the plan administrator on the most recent Form 5500, provide the names and EINs of the prior plan administrators and include the date of change.

3. Name, EIN, mailing address, and telephone number of the plan sponsor as reflected on the most recent Form 5500, if different than the plan administrator. If the plan had plan sponsors other than the plan sponsor on the most recent Form 5500, provide the names and EINs of the prior plan sponsors and include the date of change.

4. Name, date of birth, mailing address, email address, telephone number, and social security number (SSN) of each separated vested participant.

5. Nature, form, and amount of benefit of each separated vested participant.

6. If the vested benefit of each such separated vested participant was fully paid in a form other than an annuity (*i.e.,* lump sum payout) to the separated vested participant, provide the date and the amount of the distribution.

7. If an annuity form of benefit, state whether the separated vested participant has begun receiving benefits, the date of the annuity commencement, and the monthly benefit.

8. Name, date of birth, mailing address, email address, telephone number, and SSN of any separated vested participant of normal retirement age or older that is owed a vested benefit, and who has been unresponsive to plan communications about their benefits or whose contact information as set forth in paragraph 4 above, the plan has reason to believe is no longer accurate.

9. Name, date of birth, mailing address, email address, telephone number, and SSN of any designated beneficiary of the separated vested participant.

10. With respect to any participant whose benefit was transferred to the plan in the manner described in Line 9 of the Form 8955–SSA, provide the name and plan number of the transferor plan. Include the date of transfer to the plan.

IV. Plans That Distributed Benefits Under Section 401(a)(31)(B) of the Internal Revenue Code

For any plan that distributed benefits under section 401(a)(31)(B) of the Code, provide the following information with respect to the plan:

1. Name of plan and plan number as reflected on the most recent Form 5500. If the plan had names other than the name on the most recent Form 5500, provide the prior names and plan numbers to include the date of change.

2. Name, EIN, mailing address, and telephone number of the plan administrator as reflected on the most recent Form 5500. If the plan had plan administrators other than the plan administrator on the most recent Form 5500, provide the names and EINs of the prior plan administrators and include the date of change.

3. Name, EIN, mailing address, and telephone number of the plan sponsor as reflected on the most recent Form 5500, if different than the plan administrator. If the plan had plan sponsors other than the plan sponsor on the most recent Form 5500, provide the names and EINs of the prior plan sponsors and include the date of change.

4. Name, date of birth, mailing address, email address, telephone number and SSN of each participant or former participant with respect to whom any amount of the vested benefit was distributed under section 401(a)(31)(B) of the Code.

5. With respect to such participant or former participant, the name of the designated trustee or issuer described in section 401(a)(31)(B) of the Code.

6. With respect to such participant or former participant, the address of the designated trustee or issuer described in section 401(a)(31)(B) of the Code.

7. With respect to such participant or former participant, the amount of the distribution.

8. With respect to such participant or former participant, the account number of the individual retirement plan to which the amount was distributed.

9. With respect to such participant or former participant, the name, date of birth, mailing address, email address, telephone number, and SSN of any designated beneficiary.

V. Plans That Distributed Annuities

For any plan that distributed benefits pursuant to an annuity contract described in 29 CFR 2510.3–3(d)(2)(ii), provide the following information with respect to the plan:

1. Name and plan number of plan as reflected on the most recent Form 5500. If the plan had names other than the name on the most recent Form 5500, provide the prior names and plan numbers to include the date of change.

2. Name, EIN, mailing address, and telephone number of the current plan administrator as reflected on the most recent Form 5500. If the plan had plan administrators other than the plan administrator on the most recent Form 5500, provide the names and EINs of the prior plan administrators and include the date of change.

3. Name, EIN, mailing address, and telephone number of plan sponsor as reflected on the most recent Form 5500, if different than the plan administrator. If the plan had plan sponsors other than the plan sponsor on the most recent Form 5500, provide the names and EINs of the prior plan sponsors and include the date of change.

4. Name, date of birth, SSN, mailing address, email address, and telephone number of each participant or former participant with respect to whom an annuity contract, described in 29 CFR 2510.3–3(d)(2)(ii), was distributed.

5. With respect to such participant or former participant, the name of the issuer of the annuity contract.

6. With respect to such participant or former participant, the address of the issuer of the annuity contract.

7. With respect to such participant or former participant, the contract or certificate number.

8. With respect to such participant or former participant, the name, date of birth, mailing, address, email address, telephone number, and SSN of any designated beneficiary.

VI. Method of Transmitting Data

To minimize public burden, plan administrators (or their authorized representatives, such as recordkeepers) will be able to electronically submit this data described in this proposed ICR as an attachment to this year's EFAST2 filing. The Department also is looking to establish a portal for plan administrators to submit the information directly into the Lost and Found database as an alternative to submitting the information as an attachment to the Form 5500 using EFAST2. The Department will provide the spreadsheet file template (CSV format), and intends to make available a model format that plan administrators could use to submit the information.

Multiple security measures will be in place to protect plan participant and beneficiary data (*i.e.,* Social Security numbers) in the Department's Lost and Found online searchable database. A public user will have no access to sensitive data. Government access to the data will also be strictly controlled, which will be encrypted both at rest and in transit. The database will implement extensive logging and monitoring mechanisms, and sensitive data masking techniques will be implemented to mask personally identifiable information.

VII. Focus of Comments

The Department is particularly interested in comments that:

- Evaluate whether the collections of information are necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the collections of information;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* by permitting electronic submissions of responses.

Comments submitted in response to this notice will be summarized and/or included in the ICRs for OMB approval of the information collection; they will also become a matter of public record.

Signed in Washington, DC, on April 9, 2024.

Lisa M. Gomez,

Assistant Secretary, Employee Benefits Security Administration, U.S. Department of Labor.

[FR Doc. 2024–07968 Filed 4–15–24; 8:45 am]

BILLING CODE 4510–29–P

DEPARTMENT OF LABOR

Employment and Training Administration

Workforce Innovation and Opportunity Act (WIOA) 2024 Lower Living Standard Income Level (LLSIL)

AGENCY: Employment and Training Administration (ETA), Labor.

ACTION: Notice.

SUMMARY: Title I of WIOA requires the U.S. Secretary of Labor (Secretary) to update and publish the LLSIL tables annually, for uses described in the law (including determining eligibility for youth). WIOA defines the term ''low-income individual'' as (*inter alia*) one whose total family annual income does not exceed the higher level of the poverty line or 70 percent of the LLSIL. This issuance provides the Secretary's annual LLSIL for 2024 and references the current 2024 Health and Human Services ''Poverty Guidelines.''

DATES: This notice will be published April 16, 2024.

FOR FURTHER INFORMATION CONTACT: Contact Donald Haughton, Department of Labor, Employment and Training Administration, 200 Constitution Avenue NW, Room C–4526, Washington, DC 20210; Telephone: 202–693–2874 or Email address:

haughton.donald.w@dol.gov. Individuals with hearing or speech impairments may access the telephone number above via their state's telecommunications relay service (TRS) by dialing 7–1–1 to make TTY calls.

Federal Youth Employment Program Information: Sara Hastings, Department of Labor, Employment and Training Administration, 200 Constitution Avenue NW, Room N–4464, Washington, DC 20210; Telephone: 202–693–3599; Email: *hastings.sara@dol.gov.* Individuals with hearing or speech impairments may access the telephone number above via their state's telecommunications relay service (TRS) by dialing 7–1–1 to make TTY calls.

SUPPLEMENTARY INFORMATION: The purpose of WIOA is to provide workforce investment activities through statewide and local workforce investment systems that increase the employment, retention, and earnings of participants. WIOA programs are intended to increase the occupational skill attainment by participants and the quality of the workforce, thereby reducing welfare dependency and enhancing the productivity and competitiveness of the Nation.

LLSIL is used for several purposes under the WIOA. Specifically, WIOA Section 3(36) defines the term ''low-income individual'' for eligibility purposes, and Sections 127(b)(2)(C) and 132(b)(1)(B)(v)(IV) define the terms ''disadvantaged youth'' and ''disadvantaged adult'' in terms of the poverty line or LLSIL for State formula allotments. The Governor and state and local workforce development boards use the LLSIL for determining eligibility for youth and adults for certain services. ETA encourages Governors and state/local boards to consult the WIOA Final Rule and ETA guidance for more specific guidance in applying LLSIL to program requirements. The U.S. Department of Health and Human Services (HHS) published the most current poverty-level guidelines in the **Federal Register**, January 17, 2024. The HHS 2024 Poverty guidelines may also be found on the internet at *https://aspe.hhs.gov/topics/poverty-economic-mobility/poverty-guidelines.*

ETA will have the 2024 LLSIL and the HHS Poverty guidelines available on its website at *www.dol.gov/agencies/eta/llsil.*

WIOA Section 3(36)(B) defines LLSIL as ''that income level (adjusted for regional, metropolitan, urban and rural differences and family size) determined annually by the Secretary of Labor based on the most recent lower living family budget issued by the Secretary.'' The most recent lower living family budget was issued by the Secretary in fall 1981. The four-person urban family budget estimates, previously published by the U.S. Bureau of Labor Statistics (BLS), provided the basis for the Secretary to determine the LLSIL. BLS terminated the four-person family budget series in 1982, after publication of the fall 1981 estimates. Currently, BLS provides data to ETA, which ETA then uses to develop the LLSIL tables, as provided in the Appendices to this **Federal Register** notice.

This notice updates the LLSIL to reflect cost of living increases for 2023, by calculating the percentage change in the most recent 2023 Consumer Price Index for All Urban Consumers (CPI–U) for an area to the 2023 CPI–U, and then applying this calculation to each of the previously published 2023 LLSIL figures. The 2024 LLSIL tables will be available on the ETA LLSIL website at *www.dol.gov/agencies/eta/llsil.*

The website contains updated figures for a four-person family in Table 1, listed by region for both metropolitan and non-metropolitan areas. Incomes in all of the tables are rounded up to the nearest dollar. Since program eligibility for ''low-income individuals,'' ''disadvantaged adults,'' and ''disadvantaged youth'' may be determined by family income at 70 percent of the LLSIL, pursuant to WIOA Section 3(36)(A)(ii) and Section 3(36)(B), respectively, those figures are listed as well.

I. Jurisdictions

Jurisdictions included in the various regions, based generally on the Census Regions of the U.S. Department of Commerce, are as follows:

A. Northeast

Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and the U.S. Virgin Islands.

B. Midwest

Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

C. South

Alabama, American Samoa, Arkansas, Delaware, District of Columbia, Florida, Georgia, Northern Marianas, Oklahoma, Palau, Puerto Rico, South Carolina, Kentucky, Louisiana, Marshall Islands, Maryland, Micronesia, Mississippi, North Carolina, Tennessee, Texas, Virginia, and West Virginia.

D. West

Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming. Additionally, the LLSIL Excel file provides separate figures for Alaska, Hawaii, and Guam.

Data for selected Metropolitan Statistical Areas (MSAs) are also available. These are based on annual CPI–U changes for a 12-month period ending in December 2023. The updated LLSIL figures for these MSAs and 70 percent of LLSIL are also available in the LLISL Excel file.

The LLSIL Excel file also lists each of the various figures at 70 percent of the updated 2024 LLSIL for family sizes of one to six persons. Please note, for families larger than six persons, an amount equal to the difference between the six-person and the five-person family income levels should be added to the six-person family income level for each additional person in the family. Where the poverty level for a particular family size is greater than the corresponding 70 percent of the LLSIL figure, the figure is shaded.

The LLSIL Excel file also indicates 100 percent of LLSIL for family sizes of one to six, and is used to determine self-sufficiency as noted at Section 3(36)(A)(ii) and Section 3(36)(B) of WIOA.

II. Use of These Data

Governors should designate the appropriate LLSILs for use within the State using the LLSIL Excel files on the website. The Governor's designation may be provided by disseminating information on MSAs and metropolitan and non-metropolitan areas within the state or it may involve further calculations. An area can be part of multiple LLSIL geographies. For example, an area in the State of New Jersey may have four or more LLSIL figures. All cities, towns, and counties that are part of a metro area in New Jersey are a part of the Northeast metropolitan; some of these areas can also be a portion of the New York City MSA. New Jersey also has areas that are part of the Philadelphia MSA, a less populated area in New Jersey may be a part of the Northeast non-metropolitan. If a workforce investment area includes areas that would be covered by more than one LLSIL figure, the Governor may determine which is to be used.

A state's policies and measures for the workforce investment system shall be accepted by the Secretary to the extent that they are consistent with WIOA and WIOA regulations.

III. Disclaimer on Statistical Uses

It should be noted that publication of these figures is only for the purpose of meeting the requirements specified by WIOA as defined in the law and regulations. BLS has not revised the lower living family budget since 1981, and has no plans to do so. The four-person urban family budget estimates series were terminated by BLS in 1982. The CPI–U adjustments used to update LLSIL for this publication are not precisely comparable, most notably because certain tax items were included in the 1981 LLSIL, but are not in the CPI–U. Thus, these figures should not be used for any statistical purposes, and are valid only for those purposes under WIOA as defined in the law and regulations.

Laura P. Watson,

Deputy Assistant Secretary for Employment and Training, Labor.

BILLING CODE 4510–FN–P

DEPARTMENT OF LABOR

Employment and Training Administration

Workforce Innovation and Opportunity Act; Native American Employment and Training Council

AGENCY: Employment and Training Administration, U.S. Department of Labor.

ACTION: Notice of meeting.

SUMMARY: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (FACA), as amended, and Section 166(i)(4) of the Workforce Innovation and Opportunity Act (WIOA), notice is hereby given of the next meeting of the Native American Employment and Training Council (NAETC or Council), as constituted under WIOA.

DATES: The meeting will begin at 1 p.m., (Eastern Daylight Time) on Thursday, May 16, 2024, and continue until 5 p.m. The meeting will reconvene at 9:00 a.m., on Friday, May 17, 2024, and adjourn at 5 p.m. The period from 3 p.m. to 4 p.m., on May 17, 2024, is reserved for participation and comment by members of the public.

ADDRESSES: The meeting will be held in person at the Rosen Plaza Hotel, 9700 International Dr., Orlando, FL 32819. The meeting will also be accessible virtually on the *Zoom.gov* platform. To join the meeting use the following URL: *https://www.zoomgov.com/j/1600140228?pwd=YkZCQmFmTzdqQkwzais1UDZXQlJRZz09.*

SUPPLEMENTARY INFORMATION: Council members and members of the public are encouraged to logon to *Zoom.gov* early to allow for connection issues and troubleshooting.

The meeting will be open to the public. Members of the public not present may submit a written statement by Friday, May 10, 2024, to be included in the record of the meeting. Statements are to be submitted to the U.S. Department of Labor Division of Indian and Native American Programs (DINAP) at *DINAP@dol.gov.* Persons who need special accommodations should contact Nathaniel Coley at 202–693–4287 or *Coley.Nathaniel.D@dol.gov* two business days before the meeting. The formal agenda will focus on the following topics: (1) Updates from the Employment and Training Administration; (2) Overview of the Federal Advisory Committee Act; (3) Election of NAETC Officers (4) DINAP updates; (5) NAETC sub-committee and workgroup updates; and (6) public comment.

FOR FURTHER INFORMATION CONTACT: Nathaniel Coley, Designated Federal Officer, Division of Indian and Native American Programs, Employment and Training Administration, U.S. Department of Labor, Room S–4209, 200 Constitution Avenue NW, Washington, DC 20210. Telephone number (202) 693–4287 (VOICE) (this is not a toll-free number) or *coley.nathaniel.d@dol.gov.*

Laura P. Watson,

Deputy Assistant Secretary for Employment and Training, Labor.

BILLING CODE 4510–FR–P

DEPARTMENT OF LABOR

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Attestation for Employers Seeking To Employ H–2B Nonimmigrant Workers Under the Consolidated Appropriations Act, 2023, as Extended by the Continuing Appropriations Act, 2024 and Other Extensions Act

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Employment and Training Administration (ETA)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that the agency receives on or before May 16, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Michael Howell by telephone at 202–693–6782, or by email at *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: This information collection request (ICR) supports the Temporary Final Rule (TFR), Exercise of Time-Limited Authority to Increase the Numerical Limitation for Fiscal Year 2024 for H–2B Temporary Nonagricultural Worker Program and Portability Flexibility for H–2B Workers Seeking To Change Employers, which is being promulgated by the Department of Labor (DOL or Department) and the Department of Homeland Security (DHS) (collectively, the Departments). For additional substantive information about this ICR, see the related notice published in the **Federal Register** on November 17, 2023 (88 FR 80394).

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not

display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Agency: DOL–ETA.

Title of Collection: Attestation for Employers Seeking to Employ H–2B Nonimmigrant Workers Under Section 303 of Division O of the Consolidated Appropriations Act, 2023, Public Law 117–328, as extended by sections 101(6) and 106 of Division A of the Continuing Appropriations Act, 2024 and Other Extensions Act, Public Law 118–15

OMB Control Number: 1205–0556.

Affected Public: State, Local and Tribal Governments.

Total Estimated Number of Respondents: 4,358.

Total Estimated Number of Responses: 4,358.

Total Estimated Annual Time Burden: 32,472 hours.

Total Estimated Annual Other Costs Burden: $0.

(Authority: 44 U.S.C. 3507(a)(1)(D))

Michael Howell,

Senior Paperwork Reduction Act Analyst.

[FR Doc. 2024–07969 Filed 4–15–24; 8:45 am]

BILLING CODE 4510–FN–P

DEPARTMENT OF LABOR

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Workforce Innovation and Opportunity Act Joint Quarterly Narrative Performance Report

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Employment and Training Administration (ETA)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that the agency receives on or before May 16, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Michael Howell by telephone at 202–693–6782, or by email at *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: This information collection includes data validation for the Senior Community Service Employment Program (SCSEP), and a streamlined quarterly narrative report template to support the (1) reporting, (2) recordkeeping, and (3) program evaluation requirements for the following grant programs: National Dislocated Worker Grants (DWG), H–1B grant programs (started July 1, 2016 or later), National Farmworker Jobs Program (NFJP), Reentry Employment Opportunities (REO) youth and adult grant programs, SCSEP, and YouthBuild (YB). This information collection does not increase the burden on grantees. SCSEP data validation assesses the accuracy of data collected and reported to ETA on program activities and outcomes. The accuracy and reliability of program reports submitted by states and grantees using federal funds are fundamental elements of good public administration and are necessary tools for maintaining and demonstrating system integrity. The data validation requirement for employment and training programs strengthens the workforce system by ensuring that accurate and reliable information on program activities and outcomes is available. The WIOA Joint Quarterly Narrative Performance Report provides a detailed account of program activities, accomplishments, and progress toward performance outcomes during the quarter. It also provides information on grant challenges and timeline progress, as well as the opportunity to share success stories. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on December 8, 2023 (88 FR 85655).

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Agency: DOL–ETA.

Title of Collection: Workforce Innovation and Opportunity Act Joint Quarterly Narrative. Performance Report.

OMB Control Number: 1205–0448.

Affected Public: State, Local and Tribal Governments.

Total Estimated Number of Respondents: 1,320.

Total Estimated Number of Responses: 5,580.

Total Estimated Annual Time Burden: 64,950 hours.

Total Estimated Annual Other Costs Burden: $0.

BILLING CODE 4510–FN–P

DEPARTMENT OF LABOR

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Training Plans and Records of Training, for Underground Miners and Miners Working at Surface Mines and Surface Areas of Underground Mines

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Mine Safety and Health Administration (MSHA)-sponsored information collection request (ICR) to the Office of

Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that the agency receives on or before May 16, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Michael Howell by telephone at 202–693–6782, or by email at *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: Federal Mine Safety and Health Act of 1977 (Mine Act) Public Law 95–164, as amended, recognizes that education and training is an important element of Federal efforts to make the nation's mines safe. Section 115(a) of the Mine Act states that ''each operator of a coal or other mine shall have a health and safety training program which shall be approved by the Secretary.'' 30 CFR 48.3 and 48.23 require training plans for underground and surface mines, respectively. Training plans are required to be submitted for approval to the MSHA District Manager for the area in which the mine is located. These standards are intended to ensure that miners will be effectively trained in matters affecting their health and safety, with the goal of reducing the occurrence of injury and illness in the nation's mines. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on September 18, 2023 (88 FR 63978).

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

Agency: DOL–MSHA.

Title of Collection: Training Plans and Records of Training, for Underground Miners and Miners Working at Surface Mines and Surface Areas of Underground Mines.

OMB Control Number: 1219–0009.

BILLING CODE 4510–43–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2009–0025]

UL LLC: Grant of Expansion of Recognition and Modification to the NRTL Program's List of Appropriate Test Standards

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice.

SUMMARY: In this notice, OSHA announces the final decision to expand the scope of recognition for UL LLC, as a Nationally Recognized Testing Laboratory (NRTL). Additionally, OSHA announces the final decision to add two test standards to the NRTL Program's List of Appropriate Test Standards.

DATES: The expansion of the scope of recognition becomes effective on April 16, 2024.

FOR FURTHER INFORMATION CONTACT: Information regarding this notice is available from the following sources:

Press inquiries: Contact Mr. Frank Meilinger, Director, OSHA Office of Communications, U.S. Department of Labor; telephone (202) 693–1999 or email *meilinger.francis2@dol.gov.*

General and technical information: Contact Mr. Kevin Robinson, Director, Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, U.S. Department of Labor; telephone (202) 693–1911 or email *robinson.kevin@dol.gov.*

SUPPLEMENTARY INFORMATION:

I. Notice of Final Decision

OSHA hereby gives notice of the expansion of the scope of recognition of UL LLC, (UL) as a NRTL. UL's expansion covers the addition of three test standards to the NRTL scope of recognition.

OSHA recognition of a NRTL signifies that the organization meets the requirements specified in 29 CFR 1910.7. Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products covered within the scope of recognition. Each NRTL's scope of recognition includes (1) the type of products the NRTL may test, with each type specified by the applicable test standard; and (2) the recognized site(s) that has/have the technical capability to perform the product-testing and product-certification activities for test standards within the NRTL's scope. Recognition is not a delegation or grant of government authority; however, recognition enables employers to use products approved by the NRTL to meet OSHA standards that require product testing and certification.

The agency processes applications by NRTLs or applicant organizations for initial recognition, as well as for expansion or renewal of recognition, following requirements in Appendix A to 29 CFR 1910.7. This appendix requires that the agency publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the application and provides a preliminary finding. In the second notice, the agency provides the final decision on the application. These notices set forth the NRTL's scope of recognition or modifications of that scope. OSHA maintains an informational web page for each NRTL, including UL, which details that NRTL's scope of recognition. These pages are available from the OSHA website at *https://www.osha.gov/dts/otpca/nrtl/index.html.*

UL submitted an application, dated July 26, 2022 (OSHA–2009–0025–0059) to expand the NRTL scope of recognition to include three additional test standards. OSHA staff performed a detailed analysis of the application packet and other pertinent information.

OSHA did not perform any on-site reviews in relation to these applications.

OSHA published the preliminary notice announcing UL's expansion application in the **Federal Register** on February 9, 2024 (89 FR 9179). The agency requested comments by February 26, 2024, but it received no comments in response to this notice.

To obtain or review copies of all public documents pertaining to the UL application, go to *http://www.regulations.gov* or contact the Docket Office, Occupational Safety and Health Administration, U.S. Department of Labor. Docket No. OSHA–2009–0025 contains all materials in the record concerning UL's recognition. Contact the OSHA Docket Office at (202) 693–2350 (TTY (877) 889–5627) for assistance in locating docket submissions.

II. Final Decision and Order

OSHA staff examined UL's expansion application, its capability to meet the requirements of the test standards, and other pertinent information. Based on its review of this evidence, OSHA finds that UL meets the requirements of 29 CFR 1910.7 for expansion of its recognition, subject to the limitations and conditions listed in this notice. OSHA, therefore, is proceeding with this final notice to grant UL's expanded scope of recognition. OSHA limits the expansion of UL's recognition to testing and certification of products for demonstration of conformance to the test standards listed below in Table 1.

TABLE 1—TEST STANDARDS FOR INCLUSION IN UL'S NRTL SCOPE OF RECOGNITION

Test standard	Test standard title
UL 6420	Equipment Use for System Isolation and Rated as a Single Unit.
UL 6200 *	Controllers for Use in Power Production.
UL 62091 *	Low-Voltage Switchgear and Controlgear—Controllers for Drivers of Stationary Fire Pump.

* Represents the standards that OSHA will add to the NRTL Program's List of Appropriate Test Standards.

In this notice, OSHA also announces the final decision to add two new test standards to the NRTL Program's List of Appropriate Test Standards. Table 2 below lists the standards that are new to the NRTL Program. OSHA has determined that these test standards are appropriate test standards and will add them to the NRTL Program's List of Appropriate Test Standards.

TABLE 2—STANDARDS OSHA WILL ADD TO THE NRTL PROGRAM'S LIST OF APPROPRIATE TEST STANDARDS

Test standard	Test standard title
UL 6200	Controllers for Use in Power Production.
UL 62091	Low-Voltage Switchgear and Controlgear—Controllers for Drivers of Stationary Fire Pump.

The American National Standards Institute (ANSI) may approve the test standards listed above as American National Standards. However, for convenience, we may use the designation of the standards-developing organization for the standard as opposed to the ANSI designation. Under the NRTL Program's policy (see OSHA Instruction CPL 01–00–004, Chapter 2, Section VIII), any NRTL recognized for a particular test standard may use either the proprietary version of the test standard or the ANSI version of that standard. Contact ANSI to determine whether a test standard is currently ANSI-approved.

A. Conditions

In addition to those conditions already required by 29 CFR 1910.7, UL must abide by the following conditions of the recognition:

1. UL must inform OSHA as soon as possible, in writing, of any change of ownership, facilities, or key personnel, and of any major change in its operations as a NRTL, and provide details of the change(s);

2. UL must meet all the terms of its recognition and comply with all OSHA policies pertaining to this recognition; and

3. UL must continue to meet the requirements for recognition, including all previously published conditions on UL's scope of recognition, in all areas for which it has recognition.

Pursuant to the authority in 29 CFR 1910.7, OSHA hereby expands the scope of recognition of UL as a NRTL, subject to the limitations and conditions specified above. Additionally, OSHA will add two standards to the NRTL List of Appropriate Test Standards.

III. Authority and Signature

James S. Frederick, Deputy Assistant Secretary of Labor for Occupational Safety and Health, authorized the preparation of this notice. Accordingly, the agency is issuing this notice pursuant to 29 U.S.C. 657(g)(2), Secretary of Labor's Order No. 8–2020 (85 FR 58393, Sept. 18, 2020)), and 29 CFR 1910.7.

Signed at Washington, DC.

James S. Frederick,

Deputy Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2007–0042]

TUV Rheinland of North America, Inc.: Applications for Expansion of Recognition

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice.

SUMMARY: In this notice, OSHA announces the applications of TUV Rheinland of North America, Inc., for expansion of the scope of recognition as a Nationally Recognized Testing Laboratory (NRTL) and presents the agency's preliminary finding to grant the applications.

DATES: Submit comments, information, and documents in response to this notice, or requests for an extension of time to make a submission, on or before May 1, 2024.

ADDRESSES: Comments may be submitted as follows:

Electronically: You may submit comments, including attachments, electronically at *http://*

www.regulations.gov, the Federal eRulemaking Portal. Follow the online instructions for submitting comments.

Instructions: All submissions must include the agency's name and the docket number for this rulemaking (Docket No. OSHA–2007–0042). All comments, including any personal information you provide, are placed in the public docket without change and may be made available online at *https://www.regulations.gov.* Therefore, OSHA cautions commenters about submitting information they do not want made available to the public, or submitting materials that contain personal information (either about themselves or others), such as Social Security numbers and birthdates.

Docket: To read or download comments or other material in the docket, go to *http://www.regulations.gov.* Documents in the docket (including this **Federal Register** notice) are listed in the *http://www.regulations.gov* index; however, some information (*e.g.,* copyrighted material) is not publicly available to read or download through the website. All submissions, including copyrighted material, are available for inspection through the OSHA Docket Office. Contact the OSHA Docket Office at (202) 693–2350 (TTY (877) 889–5627) for assistance in locating docket submissions.

Extension of comment period: Submit requests for an extension of the comment period on or before May 1, 2024 to the Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue NW, Room N–3653, Washington, DC 20210, or by fax to (202) 693–1644.

FOR FURTHER INFORMATION CONTACT: Information regarding this notice is available from the following sources:

Press inquiries: Contact Mr. Frank Meilinger, Director, OSHA Office of Communications, U.S. Department of Labor, telephone: (202) 693–1999; email: *meilinger.francis2@dol.gov.*

General and technical information: Contact Mr. Kevin Robinson, Director, Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, U.S. Department of Labor, phone: (202) 693–1911 or email: *robinson.kevin@dol.gov.*

SUPPLEMENTARY INFORMATION:

I. Notice of the Applications for Expansion

OSHA is providing notice that TUV Rheinland of North America, Inc. (TUVRNA), is applying for an expansion of current recognition as a NRTL. TUVRNA requests the addition of two test standards to the NRTL scope of recognition.

OSHA recognition of a NRTL signifies that the organization meets the requirements specified in 29 CFR 1910.7. Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products covered within the scope of recognition. Each NRTL's scope of recognition includes (1) the type of products the NRTL may test, with each type specified by the applicable test standard and (2) the recognized site(s) that has/have the technical capability to perform the product-testing and product-certification activities for test standards within the NRTL's scope. Recognition is not a delegation or grant of government authority; however, recognition enables employers to use products approved by the NRTL to meet OSHA standards that require product testing and certification.

The agency processes applications by a NRTL for initial recognition, as well as for an expansion or renewal of recognition, following requirements in Appendix A to 29 CFR 1910.7. This appendix requires that the agency publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the application and provides the preliminary finding. In the second notice, the agency provides the final decision on the application. These notices set forth the NRTL's scope of recognition or modifications of that scope. OSHA maintains an informational web page for each NRTL, including TUVRNA, which details that NRTL's scope of recognition. These pages are available from the OSHA website at *http://www.osha.gov/dts/otpca/nrtl/index.html.*

TUVRNA currently has ten facilities (sites) recognized by OSHA for product testing and certification, with the headquarters located at: TUV Rheinland of North America, Inc., 295 Foster Street, Suite 100, Littleton, Massachusetts 01460. A complete list of TUVRNA sites recognized by OSHA is available at *https://www.osha.gov/nationally-recognized-testing-laboratory-program/tuv.*

II. General Background on the Applications

TUVRNA submitted two applications, dated August 25, 2023 (OSHA–2007–0042–0074), to expand recognition as a NRTL to include two additional test standards. OSHA staff performed a detailed analysis of the application packets and reviewed other pertinent information. OSHA did not perform any on-site reviews in relation to these applications.

Table 1 shows the test standards found in TUVRNA's applications for expansion for testing and certification of products under the NRTL Program.

TABLE 1—PROPOSED APPROPRIATE TEST STANDARDS FOR INCLUSION IN TUVRNA'S NRTL SCOPE OF RECOGNITION

Test standard	Test standard title
UL 1557	Electrically Isolated Semiconductor Devices.
UL 1577	Optical Isolators.

III. Preliminary Finding on the Applications

TUVRNA submitted acceptable applications for expansion of the scope of recognition. OSHA's review of the application files and pertinent documentation preliminarily indicates that TUVRNA can meet the requirements prescribed by 29 CFR 1910.7 for expanding its recognition to include the addition of the two test standards shown in Table 1, above, for NRTL testing and certification. This preliminary finding does not constitute an interim or temporary approval of TUVRNA's applications.

OSHA seeks public comment on this preliminary determination.

IV. Public Participation

OSHA welcomes public comment as to whether TUVRNA meets the requirements of 29 CFR 1910.7 for expansion of recognition as a NRTL. Comments should consist of pertinent written documents and exhibits.

Commenters needing more time to comment must submit a request in writing, stating the reasons for the request by the due date for comments. OSHA will limit any extension to 10 days unless the requester justifies a longer time period. OSHA may deny a request for an extension if it is not adequately justified.

To review copies of the exhibits identified in this notice, as well as comments submitted to the docket, contact the Docket Office, Occupational Safety and Health Administration, U.S.

Department of Labor. These materials also are generally available online at *https://www.regulations.gov* under Docket No. OSHA–2007–0042 (for further information, see the ''*Docket*'' heading in the section of this notice titled **ADDRESSES**).

OSHA staff will review all comments to the docket submitted in a timely manner. After addressing the issues raised by these comments, staff will make a recommendation to the Assistant Secretary of Labor for Occupational Safety and Health on whether to grant TUVRNA's application for expansion of the scope of recognition. The Assistant Secretary will make the final decision on granting the applications. In making this decision, the Assistant Secretary may undertake other proceedings prescribed in appendix A to 29 CFR 1910.7.

OSHA will publish a public notice of the final decision in the **Federal Register**.

V. Authority and Signature

James S. Frederick, Deputy Assistant Secretary of Labor for Occupational Safety and Health, 200 Constitution Avenue NW, Washington, DC 20210, authorized the preparation of this notice. Accordingly, the agency is issuing this notice pursuant to 29 U.S.C. 657(g)(2), Secretary of Labor's Order No. 8–2020 (85 FR 58393; Sept. 18, 2020), and 29 CFR 1910.7.

Signed at Washington, DC, on April 10, 2024.

James S. Frederick,

Deputy Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Office of Workers' Compensation Programs

Advisory Board on Toxic Substances and Worker Health

AGENCY: Office of Workers' Compensation Programs, DOL.

ACTION: Announcement of meeting.

SUMMARY: The Advisory Board on Toxic Substances and Worker Health (Advisory Board) for the Energy Employees Occupational Illness Compensation Program Act (EEOICPA) will meet May 8–9, 2024, in Oak Ridge, Tennessee, near the Oak Ridge covered facilities.

ADDRESSES: The Advisory Board will meet at the Comfort Inn Oak Ridge, 433 S Rutgers Ave., Oak Ridge, Tennessee 37830. Telephone: 865–481–8200.

Submission of comments, requests to speak, materials for the record, and requests for special accommodations: You must submit comments, materials, requests to speak at the Advisory Board meeting, and requests for accommodations by May 1, 2024, identified by the Advisory Board name and the meeting date of May 8–9, 2024, by any of the following methods:

- *Electronically:* Send to: *EnergyAdvisoryBoard@dol.gov* (specify in the email subject line, for example ''Request to Speak: Advisory Board on Toxic Substances and Worker Health'').
- *Mail, express delivery, hand delivery, messenger, or courier service:* Submit one copy to the following address: U.S. Department of Labor, Office of Workers' Compensation Programs, Advisory Board on Toxic Substances and Worker Health, Room S–3522, 200 Constitution Ave. NW, Washington, DC 20210.

Instructions: Your submissions must include the Agency name (OWCP), the committee name (the Advisory Board), and the meeting date (May 8–9, 2024). Due to security-related procedures, receipt of submissions by regular mail may experience significant delays. For additional information about submissions, see the **SUPPLEMENTARY INFORMATION** section of this notice.

OWCP will make available publicly, without change, any comments, requests to speak, and speaker presentations, including any personal information that you provide. Therefore, OWCP cautions interested parties against submitting personal information such as Social Security numbers and birthdates.

FOR FURTHER INFORMATION CONTACT: For further information regarding this meeting, you may contact Ryan Jansen, Designated Federal Officer, at *jansen.ryan@dol.gov,* or Carrie Rhoads, Alternate Designated Federal Officer, at *rhoads.carrie@dol.gov,* U.S. Department of Labor, 200 Constitution Avenue NW, Suite S–3524, Washington, DC 20210, telephone (202) 343–5580. This is not a toll-free number.

For press inquiries: Ms. Laura McGinnis, Office of Public Affairs, U.S. Department of Labor, Room S–1028, 200 Constitution Ave. NW, Washington, DC 20210; telephone (202) 693–4672; email *Mcginnis.Laura@DOL.GOV.*

SUPPLEMENTARY INFORMATION: The Advisory Board will meet: Tuesday, May 7, 2024, for a fact-finding site visit to the Oak Ridge National Laboratory and other facilities, accompanied by the Designated Federal Officer; Wednesday, May 8, 2024, from 9:00 a.m. to 5:00 p.m. Pacific time; and Thursday, May 9, 2024, from 8:30 a.m. to 11:00 a.m. Eastern Daylight time in Oak Ridge, Tennessee. Some Advisory Board members may attend the meeting by teleconference. The teleconference number and other details for participating remotely will be posted on the Advisory Board's website, *http://www.dol.gov/owcp/energy/regs/compliance/AdvisoryBoard.htm,* 72 hours prior to the commencement of the first meeting date. Advisory Board meetings are open to the public.

Public comment session: Wednesday, May 8, from 4:15 p.m. to 5:00 p.m. Pacific time. Please note that the public comment session ends at the time indicated or following the last call for comments, whichever is earlier. Members of the public who wish to provide public comments should plan to either be at the meeting location or call in to the public comment session at the start time listed.

The Advisory Board is mandated by section 3687 of EEOICPA. The Secretary of Labor established the Board under this authority and Executive Order 13699 (June 26, 2015). The purpose of the Advisory Board is to advise the Secretary with respect to: (1) the Site Exposure Matrices (SEM) of the Department of Labor; (2) medical guidance for claims examiners for claims with the EEOICPA program, with respect to the weighing of the medical evidence of claimants; (3) evidentiary requirements for claims under part B of EEOICPA related to lung disease; (4) the work of industrial hygienists and staff physicians and consulting physicians of the Department of Labor and reports of such hygienists and physicians to ensure quality, objectivity, and consistency; (5) the claims adjudication process generally, including review of procedure manual changes prior to incorporation into the manual and claims for medical benefits; and 6) such other matters as the Secretary considers appropriate. The Advisory Board sunsets on December 19, 2029.

The Advisory Board operates in accordance with the Federal Advisory Committee Act (FACA) (5 U.S.C. 10) and its implementing regulations (41 CFR part 102–3).

Agenda: The tentative agenda for the Advisory Board meeting includes:

- Review and follow-up on Advisory Board's previous recommendations, data requests, and action items;
- Review responses to submitted Board questions;
- Working group presentations;
- Review of Board tasks, structure and work agenda;

• Consideration of any new issues; and

• Public comments.

OWCP transcribes and prepares detailed minutes of Advisory Board meetings. OWCP posts the transcripts and minutes on the Advisory Board web page, *http://www.dol.gov/owcp/energy/regs/compliance/AdvisoryBoard.htm,* along with written comments, speaker presentations, and other materials submitted to the Advisory Board or presented at Advisory Board meetings.

Public Participation, Submissions and Access to Public Record

Advisory Board meetings: All Advisory Board meetings are open to the public. Information on how to participate in the meeting remotely will be posted on the Advisory Board's website.

Submission of comments: You may submit comments using one of the methods listed in the **ADDRESSES** section. Your submission must include the Agency name (OWCP) and date for this Advisory Board meeting (May 8–9, 2024). OWCP will post your comments on the Advisory Board website and provide your submissions to Advisory Board members.

Because of security-related procedures, receipt of submissions by regular mail may experience significant delays.

Requests to speak and speaker presentations: If you want to address the Advisory Board at the meeting you must submit a request to speak, as well as any written or electronic presentation, by May 1, 2024, using one of the methods listed in the **ADDRESSES** section. Your request may include:

• The amount of time requested to speak;

• The interest you represent (*e.g.,* business, organization, affiliation), if any; and

• A brief outline of the presentation.

PowerPoint presentations and other electronic materials must be compatible with PowerPoint 2010 and other Microsoft Office 2010 formats. The Advisory Board Chair may grant requests to address the Board as time and circumstances permit.

Electronic copies of this **Federal Register** notice are available at *http://www.regulations.gov.* This notice, as well as news releases and other relevant information, are also available on the Advisory Board's web page at *http://www.dol.gov/owcp/energy/regs/compliance/AdvisoryBoard.htm.*

Signed at Washington, DC.

Christopher Godfrey,

Director, Office of Workers' Compensation Programs.

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

[NARA–2024–028]

National Industrial Security Program Policy Advisory Committee (NISPPAC); Meeting

AGENCY: Information Security Oversight Office (ISOO), National Archives and Records Administration (NARA).

ACTION: Notice of Federal Advisory Committee meeting.

SUMMARY: We are announcing an upcoming National Industrial Security Program Policy Advisory Committee (NISPPAC) meeting in accordance with the Federal Advisory Committee Act and implementing regulations.

DATES: The meeting will be on May 1, 2024 from 10 a.m.–1 p.m. EDT.

ADDRESSES: This meeting will be a virtual meeting. See **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: Heather Harris Pagán, ISOO Program Analyst, by telephone at 202.357.5351 or by email at *ISOO@nara.gov.* Contact ISOO at *ISOO@nara.gov* and the NISPPAC at *NISPPAC@nara.gov.*

SUPPLEMENTARY INFORMATION: This meeting is open to the public in accordance with the Federal Advisory Committee Act (5 U.S.C. app 2) and implementing regulations at 41 CFR 102–3. The Committee will discuss National Industrial Security Program policy matters.

Procedures: Members of the public must register in advance for the virtual meeting through the Intellor link *https://events.intellor.com/?do=register&t=7&p=507793* if they wish to attend. NISPPAC members, ISOO employees, and speakers should send an email to *NISPPAC@nara.gov* for the appropriate registration information instead of registering with the above link.

Merrily Harris,

Committee Management Officer.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2024–0069]

Monthly Notice; Applications and Amendments to Facility Operating Licenses and Combined Licenses Involving No Significant Hazards Considerations

AGENCY: Nuclear Regulatory Commission.

ACTION: Monthly notice.

SUMMARY: Pursuant to section 189a.(2) of the Atomic Energy Act of 1954, as amended (the Act), the U.S. Nuclear Regulatory Commission (NRC) is publishing this regular monthly notice. The Act requires the Commission to publish notice of any amendments issued, or proposed to be issued, and grants the Commission the authority to issue and make immediately effective any amendment to an operating license or combined license, as applicable, upon a determination by the Commission that such amendment involves no significant hazards consideration (NSHC), notwithstanding the pendency before the Commission of a request for a hearing from any person.

DATES: Comments must be filed by May 16, 2024. A request for a hearing or petitions for leave to intervene must be filed by June 17, 2024. This monthly notice includes all amendments issued, or proposed to be issued, from March 1, 2024, to March 28, 2024. The last monthly notice was published on March 19, 2024.

ADDRESSES: You may submit comments by any of the following methods, however, the NRC encourages electronic comment submission through the Federal rulemaking website.

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2024–0069. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* Office of Administration, Mail Stop: TWFN–7–A60M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Kathleen Entz, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone: 301–415–2464; email: *Kathleen.Entz@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2024–0069, facility name, unit number(s), docket number(s), application date, and subject when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2024–0069.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.
- NRC's PDR: The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (*https://www.regulations.gov*). Please include Docket ID NRC–2024–0069, facility name, unit number(s), docket number(s), application date, and subject, in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *https://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Notice of Consideration of Issuance of Amendments to Facility Operating Licenses and Combined Licenses and Proposed No Significant Hazards Consideration Determination

For the facility-specific amendment requests shown in this notice, the Commission finds that the licensees' analyses provided, consistent with section 50.91 of title 10 of *the Code of Federal Regulations* (10 CFR) ''Notice for public comment; State consultation,'' are sufficient to support the proposed determinations that these amendment requests involve NSHC. Under the Commission's regulations in 10 CFR 50.92, operation of the facilities in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The Commission is seeking public comments on these proposed determinations. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determinations.

Normally, the Commission will not issue the amendments until the expiration of 60 days after the date of publication of this notice. The Commission may issue any of these license amendments before expiration of the 60-day period provided that its final determination is that the amendment involves NSHC. In addition, the Commission may issue any of these amendments prior to the expiration of the 30-day comment period if circumstances change during the 30-day comment period such that failure to act in a timely way would result, for example in derating or shutdown of the facility. If the Commission takes action on any of these amendments prior to the expiration of either the comment period or the notice period, it will publish in

the **Federal Register** a notice of issuance. If the Commission makes a final NSHC determination for any of these amendments, any hearing will take place after issuance. The Commission expects that the need to take action on any amendment before 60 days have elapsed will occur very infrequently.

A. Opportunity To Request a Hearing and Petition for Leave To Intervene

Within 60 days after the date of publication of this notice, any person (petitioner) whose interest may be affected by any of these actions may file a request for a hearing and petition for leave to intervene (petition) with respect to that action. Petitions shall be filed in accordance with the Commission's ''Agency Rules of Practice and Procedure'' in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.309. If a petition is filed, the Commission or a presiding officer will rule on the petition and, if appropriate, a notice of a hearing will be issued.

Petitions must be filed no later than 60 days from the date of publication of this notice in accordance with the filing instructions in the ''Electronic Submissions (E-Filing)'' section of this document. Petitions and motions for leave to file new or amended contentions that are filed after the deadline will not be entertained absent a determination by the presiding officer that the filing demonstrates good cause by satisfying the three factors in 10 CFR 2.309(c)(1)(i) through (iii).

If a hearing is requested, and the Commission has not made a final determination on the issue of no significant hazards consideration, the Commission will make a final determination on the issue of no significant hazards consideration, which will serve to establish when the hearing is held. If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing would take place after issuance of the amendment. If the final determination is that the amendment request involves a significant hazards consideration, then any hearing held would take place before the issuance of the amendment unless the Commission finds an imminent danger to the health or safety of the public, in which case it will issue an appropriate order or rule under 10 CFR part 2.

A State, local governmental body, Federally recognized Indian Tribe, or designated agency thereof, may submit a petition to the Commission to participate as a party under 10 CFR 2.309(h) no later than 60 days from the date of publication of this notice. Alternatively, a State, local governmental body, Federally recognized Indian Tribe, or agency thereof may participate as a non-party under 10 CFR 2.315(c).

For information about filing a petition and about participation by a person not a party under 10 CFR 2.315, see ADAMS Accession No. ML20340A053 (*https://adamswebsearch2.nrc.gov/webSearch2/main.jsp?AccessionNumber=ML20340A053*) and on the NRC's public website at *https://www.nrc.gov/about-nrc/regulatory/adjudicatory/hearing.html#participate.*

B. Electronic Submissions (E-Filing)

All documents filed in NRC adjudicatory proceedings, including documents filed by an interested State, local governmental body, Federally recognized Indian Tribe, or designated agency thereof that requests to participate under 10 CFR 2.315(c), must be filed in accordance with 10 CFR 2.302. The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases, to mail copies on electronic storage media, unless an exemption permitting an alternative filing method, as further discussed, is granted. Detailed guidance on electronic submissions is located in the ''Guidance for Electronic Submissions to the NRC'' (ADAMS Accession No. ML13031A056) and on the NRC's public website at *https://www.nrc.gov/site-help/e-submittals.html.*

To comply with the procedural requirements of E-Filing, at least 10 days prior to the filing deadline, the participant should contact the Office of the Secretary by email at *Hearing.Docket@nrc.gov,* or by telephone at 301–415–1677, to (1) request a digital identification (ID) certificate, which allows the participant (or its counsel or representative) to digitally sign submissions and access the E-Filing system for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a petition or other adjudicatory document (even in instances in which the participant, or its counsel or representative, already holds an NRC-issued digital ID certificate). Based upon this information, the Secretary will establish an electronic docket for the proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on the NRC's public website at *https://www.nrc.gov/site-help/e-submittals/getting-started.html.* After a digital ID certificate is obtained and a docket created, the participant must submit adjudicatory documents in Portable Document Format. Guidance on submissions is available on the NRC's public website at *https://www.nrc.gov/site-help/electronic-sub-ref-mat.html.* A filing is considered complete at the time the document is submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. ET on the due date. Upon receipt of a transmission, the E-Filing system time-stamps the document and sends the submitter an email confirming receipt of the document. The E-Filing system also distributes an email that provides access to the document to the NRC's Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the document on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before adjudicatory documents are filed to obtain access to the documents via the E-Filing system.

A person filing electronically using the NRC's adjudicatory E-Filing system may seek assistance by contacting the NRC's Electronic Filing Help Desk through the ''Contact Us'' link located on the NRC's public website at *https://www.nrc.gov/site-help/e-submittals.html,* by email to *MSHD.Resource@nrc.gov,* or by a toll-free call at 1–866–672–7640. The NRC Electronic Filing Help Desk is available between 9 a.m. and 6 p.m., ET, Monday through Friday, except Federal holidays.

Participants who believe that they have good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing stating why there is good cause for not filing electronically and requesting authorization to continue to submit documents in paper format. Such filings must be submitted in accordance with 10 CFR 2.302(b)–(d). Participants filing adjudicatory documents in this manner are responsible for serving their documents on all other participants. Participants granted an exemption under 10 CFR 2.302(g)(2) must still meet the electronic formatting requirement in 10 CFR 2.302(g)(1), unless the participant also seeks and is granted an exemption from 10 CFR 2.302(g)(1).

Documents submitted in adjudicatory proceedings will appear in the NRC's

electronic hearing docket, which is publicly available at *https://adams.nrc.gov/ehd,* unless excluded pursuant to an order of the presiding officer. If you do not have an NRC-issued digital ID certificate as previously described, click ''cancel'' when the link requests certificates and you will be automatically directed to the NRC's electronic hearing dockets where you will be able to access any publicly available documents in a particular hearing docket. Participants are requested not to include personal privacy information such as social security numbers, home addresses, or personal phone numbers in their filings unless an NRC regulation or other law requires submission of such information. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants should not include copyrighted materials in their submission.

The following table provides the plant name, docket number, date of application, ADAMS accession number, and location in the application of the licensees' proposed NSHC determinations. For further details with respect to these license amendment applications, see the applications for amendment, which are available for public inspection in ADAMS. For additional direction on accessing information related to this document, see the ''Obtaining Information and Submitting Comments'' section of this document.

LICENSE AMENDMENT REQUESTS

Constellation Energy Generation, LLC; Quad Cities Nuclear Power Station, Units 1 and 2; Rock Island County, IL	
Docket Nos	50–254, 50–265.
Application date	June 8, 2023, as supplemented by letter dated March 19, 2024.
ADAMS Accession Nos	ML23159A249, ML24079A122.
Location in Application of NSHC	Pages 7–8 of Attachment 1.
Brief Description of Amendments	The proposed amendments request adoption of Technical Specification Task Force (TSTF) Traveler 505 (TSTF–505), Revision 2, ''Provide Risk-Informed Extended Completion Times—RITSTF [Risk Informed TSTF] Initiative 4b.'' The NRC provided notice of consideration of the amendment request in the **Federal Register** on August 8, 2023 (88 FR 53537). On March 19, 2024, Constellation Energy Generation, LLC, supplemented the amendment to adopt TSTF–505 to also adopt TSTF–591 ''Revised Risk-Informed Completion Time (RICT) Program.'' The relevant no significant hazard considerations provided in the license amendment request dated June 8, 2023, remain applicable to the amendment request. This notice supersedes the previous notice in its entirety.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Jason Zorn, Associate General Counsel, Constellation Energy Generation, 4300 Winfield Road Warrenville, IL 60555.
NRC Project Manager, Telephone Number	Robert Kuntz, 301–415–3733.

Indiana Michigan Power Company; Donald C. Cook Nuclear Plant, Unit 1; Berrien County, MI	
Docket No	50–315.
Application date	March 6, 2024.
ADAMS Accession No	ML24073A067.
Location in Application of NSHC	Pages 5–6 of Enclosure 2.
Brief Description of Amendment	The proposed amendment will add the Completion Time requirement ''Immediately'' to Technical Specification (TS) 3.4.12, ''Low Temperature Overpressure Protection (LTOP) System,'' Actions Table to Condition F, Required Action F.2. Currently in Unit 1 TS 3.4.12, Condition F Completion Time for Required Action F.2 is left blank.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Robert B. Haemer, Senior Nuclear Counsel, Indiana Michigan Power Company, One Cook Place, Bridgman, MI 49106.
NRC Project Manager, Telephone Number	Scott Wall, 301–415–2855.

Indiana Michigan Power Company; Donald C. Cook Nuclear Plant, Units 1 and 2; Berrien County, MI	
Docket Nos	50–315, 50–316.
Application date	January 26, 2023, as supplemented by letters dated August 2, 2023; February 27, 2024.
ADAMS Accession Nos	ML23026A284, ML23214A289, ML24058A357.
Location in Application of NSHC	Pages 6–7 of Enclosure 3 of the February 27, 2024, supplement.
Brief Description of Amendments	On March 21, 2023, the NRC published a notice of consideration of approval of the application in the **Federal Register** (88 FR 17036). The original proposed amendments would have reclassified the wide range neutron flux instrumentation as Category 3 instrumentation and would have revised Technical Specification (TS) Table 3.3.3–1, ''Post Accident Monitoring Instrumentation,'' to remove Function 1, Neutron Flux, from the list of required post-accident monitoring instrumentation. By supplement dated February 27, 2024, the scope of the amendment request was revised such that Neutron Flux remains as Function 1 in TS Table 3.3.3–1, ''Post Accident Monitoring Instrumentation,'' but a note would be added to the table indicating that Function 1, Neutron Flux, channels are not required to be environmentally qualified.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Robert B. Haemer, Senior Nuclear Counsel, Indiana Michigan Power Company, One Cook Place, Bridgman, MI 49106.
NRC Project Manager, Telephone Number	Scott Wall, 301–415–2855.

LICENSE AMENDMENT REQUESTS—Continued

Nebraska Public Power District; Cooper Nuclear Station; Nemaha County, NE	
Docket No	50–298.
Application date	February 16, 2024.
ADAMS Accession No	ML24047A273.
Location in Application of NSHC	Pages 8–10 of Attachment 1.
Brief Description of Amendment	The proposed amendment revises the allowable value for Cooper Nuclear Station Technical Specification (TS) 3.3.5.1, ''Emergency Core Cooling System (ECCS) Instrumentation,'' Table 3.3.5.1–1, ''Emergency Core Cooling System Instrumentation,'' Function 3.f, ''High Pressure Coolant Injection Pump Discharge Flow—Low (Bypass),'' from greater than or equal to 490 gallons per minute (gpm) to greater than or equal to 523 gpm. The proposed change to the TS is due to a planned replacement of the flow-indicating switch with a different model.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	John C. McClure, Vice President, Governmental Affairs and General Counsel Nebraska Public Power District, P.O. Box 499, Columbus, NE 68601.
NRC Project Manager, Telephone Number	Thomas Byrd, 301 415–3719.
Southern Nuclear Operating Company, Inc.; Edwin I. Hatch Nuclear Plant, Units 1 and 2; Appling County, GA	
Docket Nos	50–321, 50–366.
Application date	February 20, 2024.
ADAMS Accession No	ML24051A239.
Location in Application of NSHC	Pages E–19 to E–21 of the Enclosure.
Brief Description of Amendments	The proposed amendments would modify the licensing basis to implement a change to the approved voluntary implementation of the provisions of 10 CFR 50.69, ''Risk-informed categorization and treatment of structures, systems and components for nuclear power reactors.'' The proposed amendments would incorporate the use of an alternative seismic method into the previously approved 10 CFR 50.69 categorization process, in addition to the plant-specific Edwin I. Hatch Nuclear Plant seismic probabilistic risk assessment.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Millicent Ronnlund, Vice President and General Counsel, Southern Nuclear Operating Co., Inc., P.O. Box 1295, Birmingham, AL 35201–1295.
NRC Project Manager, Telephone Number	Dawnmathews Kalathiveettil, 301–415–5905.
Virginia Electric and Power Company; Surry Power Station, Unit Nos. 1 and 2; Surry County, VA	
Docket Nos	50–280, 50–281.
Application date	February 19, 2024.
ADAMS Accession No	ML24051A178.
Location in Application of NSHC	Pages 3–5 of the Enclosure.
Brief Description of Amendments	The proposed amendments would change the Surry Power Station, Unit Nos. 1 and 2, technical specifications to adopt Technical Specifications Task Force (TSTF) Traveler TSTF–577, Revision 1, ''Revised Frequencies for Steam Generator Tube Inspections'' related to steam generator tube inspection and reporting changes based on operating history.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	W.S. Blair, Senior Counsel, Dominion Energy Services, Inc., 120 Tredegar St., RS–2, Richmond, VA 23219.
NRC Project Manager, Telephone Number	John Klos, 301–415–5136.

III. Notice of Issuance of Amendments to Facility Operating Licenses and Combined Licenses

During the period since publication of the last monthly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

A notice of consideration of issuance of amendment to facility operating license or combined license, as applicable, proposed NSHC determination, and opportunity for a hearing in connection with these actions, were published in the **Federal Register** as indicated in the safety evaluation for each amendment.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.22(b) and has made a determination based on that assessment, it is so indicated in the safety evaluation for the amendment.

For further details with respect to each action, see the amendment and associated documents such as the Commission's letter and safety evaluation, which may be obtained using the ADAMS accession numbers indicated in the following table. The safety evaluation will provide the ADAMS accession numbers for the application for amendment and the **Federal Register** citation for any environmental assessment. All of these items can be accessed as described in the ''Obtaining Information and Submitting Comments'' section of this document.

LICENSE AMENDMENT ISSUANCES

Aerotest Operations Inc., Aerotest Radiography and Research Reactor, San Ramon, CA

Docket No	50–228.
Amendment Date	March 6, 2024.
ADAMS Accession No	ML23310A104 (Package).
Amendment Nos	7.
Brief Description of Amendment	The license amendment approved the decommissioning plan for the Aerotest Radiography and Research Reactor and provided conditions for when changes to the decommissioning plan require NRC approval.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

Constellation Energy Generation, LLC; Quad Cities Nuclear Power Station, Units 1 and 2; Rock Island County, IL

Docket No	50–254, 50–265.
Amendment Date	March 15, 2024.
ADAMS Accession No	ML23340A155.
Amendment Nos	299 (Unit 1), 295 (Unit 2).
Brief Description of Amendments	The amendments adopted Technical Specifications Task Force (TSTF) Traveler 564 (TSTF–564), Revision 2, ''Safety Limit MCPR [Minimum Critical Power Ratio].'' The adoption of TSTF–564 revised the technical specification safety limit on MCPR.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

DTE Electric Company; Fermi, Unit 2; Monroe County, MI

Docket No	50–341.
Amendment Date	March 4, 2024.
ADAMS Accession No	ML24002B181.
Amendment No	228.
Brief Description of Amendment	The amendment revised the Note for Technical Specification 3.4.5, ''RCS [reactor coolant system] Pressure Isolation Valve (PIV), Action A.1, to remove the word ''check'' and make the Action applicable to all valves.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

Duke Energy Carolinas, LLC; Catawba Nuclear Station, Units 1 and 2; York County, SC

Docket Nos	50–413, 50–414.
Amendment Date	March 8, 2024.
ADAMS Accession No	ML24017A065.
Amendment Nos	319 (Unit 1), 315 (Unit 2).
Brief Description of Amendments	The amendments revised Technical Specification 3.7.11, ''Control Room Area Chilled Water System (CRACWS),'' to allow a completion time of 24 hours to restore one of the two CRACWS trains to operable status.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

Duke Energy Carolinas, LLC; McGuire Nuclear Station, Units 1 and 2; Mecklenburg County, NC

Docket Nos	50–369, 50–370.
Amendment Date	March 26, 2024.
ADAMS Accession No	ML24031A540.
Amendment Nos	330 (Unit 1), 309 (Unit 2).
Brief Description of Amendments	The amendments modified technical specification requirements to permit the use of risk-informed completion times in accordance with Technical Specifications Task Force (TSTF) Traveler TSTF–505, Revision 2, ''Provide Risk-Informed Extended Completion Times—Risk Informed Technical Specification Task Force Initiative 4b.''
Public Comments Received as to Proposed NSHC (Yes/No).	No.

Energy Northwest; Columbia Generating Station; Benton County, WA

Docket No	50–397.
Amendment Date	March 7, 2024.
ADAMS Accession No	ML24047A042.
Amendment No	273.
Brief Description of Amendment	The amendment revised the Columbia Generating Station renewed facility operating license and technical specifications, including editorial changes and the removal of obsolete information.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

LICENSE AMENDMENT ISSUANCES—Continued

Entergy Operations, Inc.; Arkansas Nuclear One, Unit 1; Pope County, AR	
Docket No	50–313.
Amendment Date	March 14, 2024.
ADAMS Accession No	ML24031A644.
Amendment No	282.
Brief Description of Amendment	The amendment revised Arkansas Nuclear One, Unit 1 Technical Specification 3.3.1, ''Reactor Protection System (RPS) Instrumentation,'' Table 3.3.1–1, ''Reactor Protection System Instrumentation,'' to reflect plant modifications to the RPS instrumentation associated with reactor trip on main turbine trip on low fluid oil pressure.
Public Comments Received as to Proposed NSHC (Yes/No).	No.
Tennessee Valley Authority; Sequoyah Nuclear Plant, Units 1 and 2; Hamilton County, TN	
Docket Nos	50–327, 50–328.
Amendment Date	March 26, 2024.
ADAMS Accession No	ML24040A206.
Amendment Nos	367 (Unit 1), 361 (Unit 2).
Brief Description of Amendments	The amendments revised the Sequoyah Nuclear Plant, Units 1 and 2, Updated Final Safety Analysis Report to reflect the results of a new hydrologic analysis.
Public Comments Received as to Proposed NSHC (Yes/No).	No.
Virginia Electric and Power Company, Dominion Nuclear Company; North Anna Power Station, Units 1 and 2; Louisa County, VA	
Docket Nos	50–338, 50–339.
Amendment Date	March 18, 2024.
ADAMS Accession No	ML24005A004.
Amendment Nos	296 (Unit 1), 279 (Unit 2).
Brief Description of Amendment(s)	The amendments allowed relocation of the Technical Support Center to a building outside the Protected Area.
Public Comments Received as to Proposed NSHC (Yes/No).	No.
Wolf Creek Nuclear Operating Corporation; Wolf Creek Generating Station, Unit 1; Coffey County, KS	
Docket No	50–482.
Amendment Date	March 8, 2024.
ADAMS Accession No	ML24016A070.
Amendment No	240.
Brief Description of Amendment	The amendment deleted the requirements for the Power Range Neutron Flux Rate—High Negative Rate Trip function, which is specified in Wolf Creek Generating Station, Unit 1, Technical Specification Table 3.3.1–1, ''Reactor Trip System Instrumentation.''
Public Comments Received as to Proposed NSHC (Yes/No).	No.

IV. Notice of Issuance of Amendments to Facility Operating Licenses and Combined Licenses and Final Determination of No Significant Hazards Consideration and Opportunity for a Hearing (Exigent Circumstances or Emergency Situation)

Since publication of the last monthly notice, the Commission has issued the following amendment. The Commission has determined for this amendment that the application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

Because of exigent circumstances or emergency situation associated with the date the amendment was needed, there was not time for the Commission to publish, for public comment before issuance, its usual notice of consideration of issuance of amendment, proposed NSHC determination, and opportunity for a hearing.

In circumstances where failure to act in a timely way would have resulted, for example, in derating or shutdown of a nuclear power plant or in prevention of either resumption of operation or of increase in power output up to the plant's licensed power level (an emergency situation), the Commission may not have had an opportunity to provide for public comment on its NSHC determination. In such case, the license amendment has been issued without opportunity for comment prior to issuance. Nonetheless, the State has been consulted by telephone whenever possible.

Under its regulations, the Commission may issue and make an amendment immediately effective, notwithstanding the pendency before it of a request for a hearing from any person, in advance of the holding and completion of any required hearing, where it has determined that NSHC is involved. The Commission has applied the standards of 10 CFR 50.92 and has made a final determination that the amendments involve NSHC. The basis for this determination is contained in the NRC staff safety evaluation related to each action. Accordingly, the amendment has been issued and made effective as indicated. For those amendments that have not been previously noticed in the **Federal Register**, within 60 days after the date of publication of this notice, any persons (petitioner) whose interest

may be affected by this action may file a request for a hearing and petition for leave to intervene (petition) with respect to the action. Petitions shall be filed in accordance with the guidance concerning the Commission's ''Agency Rules of Practice and Procedure'' in 10 CFR part 2 as discussed in section II.A of this document.

Unless otherwise indicated, the Commission has determined that the amendment satisfies the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for this amendment. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated in the safety evaluation for the amendment.

For further details with respect to these actions, see the amendment and associated documents such as the Commission's letter and safety evaluation, which may be obtained using the ADAMS accession numbers indicated in the following table. The safety evaluation will provide the ADAMS accession number(s) for the application for amendment and the **Federal Register** citation for any environmental assessment. All of these items can be accessed as described in the ''Obtaining Information and Submitting Comments'' section of this document.

LICENSE AMENDMENT ISSUANCE—EMERGENCY CIRCUMSTANCES

NextEra Energy Seabrook, LLC; Seabrook Station, Unit No. 1; Rockingham County, NH	
Docket No	50–443.
Amendment Date	March 8, 2024.
ADAMS Accession No	ML24067A262.
Amendment No	173.
Brief Description of Amendment	The amendment revised Technical Specification (TS) ¾.8.1, ''A.C. Sources—Operating,'' to provide a one-time modification of the allowed outage time for Seabrook TS 3.8.1.1 action a.3 from 72 hours to 30 days when one offsite circuit is inoperable. The amendment allows the licensee to replace the 3B Reserve Auxiliary Transformer at power within 30 days from the start of the outage for the Seabrook Station, Unit No. 1. The amendment was issued under emergency circumstances as provided in the provisions of 10 CFR 50.91(a)(5) because of the time critical nature of the amendment.
Local Media Notice (Yes/No)	No.
Public Comments Requested as to Proposed NSHC (Yes/No).	No.

Dated: April 5, 2024.

For the Nuclear Regulatory Commission.

Jamie Pelton,

Deputy Director, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

PENSION BENEFIT GUARANTY CORPORATION

Submission of Information Collection for OMB Review; Comment Request; Survey of Nonparticipating Single Premium Group Annuity Rates

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of request for extension of OMB approval.

SUMMARY: The Pension Benefit Guaranty Corporation (PBGC) is requesting that the Office of Management and Budget (OMB) extend approval, under the Paperwork Reduction Act, of a collection of information (OMB control number 1212–0030, expiring July 31, 2024). The purpose of this information collection is to survey insurance company rates for pricing annuity contracts to obtain information needed to set actuarial assumptions. The American Council of Life Insurers conducts this voluntary survey for PBGC. This notice informs the public of PBGC's request and solicits public comment on the collection.

DATES: Comments must be submitted by May 16, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. All comments received will be posted without change to PBGC's website, *www.pbgc.gov,* including any personal information provided. Do not submit comments that include any personally identifiable information or confidential business information.

Copies of the collection of information may be obtained by writing to Disclosure Division (*disclosure@pbgc.gov*), Office of the General Counsel, Pension Benefit Guaranty Corporation, 445 12th Street SW, Washington, DC 20024–2101, or calling 202–229–4040 during normal business hours. If you are deaf or hard of hearing, or have a speech disability, please dial 7–1–1 to access telecommunications relay services.

FOR FURTHER INFORMATION CONTACT: Gregory Katz (*katz.gregory@pbgc.gov*), Attorney, Regulatory Affairs Division, Office of the General Counsel, Pension Benefit Guaranty Corporation, 445 12th Street SW, Washington DC 20024–2101, 202–229–3829. If you are deaf or hard of hearing, or have a speech disability, please dial 7–1–1 to access telecommunications relay services.

SUPPLEMENTARY INFORMATION: PBGC's regulations prescribe actuarial valuation methods and assumptions (including interest rate assumptions) to be used to determine the actuarial present value of benefits under single-employer plans in involuntary or distress terminations (29 CFR part 4044) and the present value of benefits and certain assets under multiemployer plans that undergo a mass withdrawal of contributing employers (29 CFR part 4281). In each month immediately preceding the start of a new calendar quarter, PBGC publishes the interest assumption to be used under those regulations for plans terminating or undergoing mass withdrawal during the next quarter.

The interest assumption is intended to reflect current conditions in the group annuity markets. To determine the interest assumption, PBGC gathers premium rate data from insurance companies that are providing annuity contracts to terminating pension plans

through a quarterly survey. The American Council of Life Insurers (ACLI) distributes the survey and provides PBGC with ''double blind'' data (*i.e.,* PBGC is unable to match responses with the insurance companies that submitted them). PBGC also uses the information from the surveys to determine the interest assumption it uses to value benefits payable to participants and beneficiaries in PBGC-trusteed plans for purposes of PBGC's financial statements.

PBGC is making conforming, clarifying, and editorial changes to the survey forms and instructions.

The existing collection of information was approved under OMB control number 1212–0030 (expires July 31, 2024). On February 2, 2024, PBGC published in the **Federal Register** (at 89 FR 7418) a notice informing the public of its intent to request an extension of this collection of information. No comments were received. PBGC is requesting that OMB extend approval of the collection for three years. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

This voluntary survey is directed at insurance companies most, if not all, of which are members of ACLI. The survey is conducted quarterly and approximately 10 insurance companies will be asked to participate. PBGC estimates that about six insurance companies will respond to the survey each quarter, and that each survey will require approximately 30 minutes to complete and return. The total burden is estimated to be 12 hours (30 minutes per survey × four surveys per year × six respondents per quarter).

Issued in Washington, DC, by

Gregory Katz,

Deputy Assistant General Counsel for Regulatory Affairs, Pension Benefit Guaranty Corporation.

BILLING CODE 7709–02–P

OFFICE OF PERSONNEL MANAGEMENT

[Docket ID: OPM–2024–0009]

Submission for Review: Renewal of an Existing Information Collection, USAJOBS Resume Builder, Application Profile, and USAJOBS Career Explorer, OMB Control No. 3206–0219

AGENCY: Office of Personnel Management.

ACTION: 60-Day notice and request for comments.

SUMMARY: The Office of Personnel Management (OPM) offers the general public and other Federal agencies the opportunity to comment on revisions to a currently approved information collection request (ICR): OMB Control No. 3206–0219, USAJOBS Resume Builder, Application Profile, and Career Explorer.

DATES: Comments are encouraged and will be accepted until June 17, 2024.

ADDRESSES: Interested persons are invited to submit written comments on the proposed information collection by one of the following means:

- *Federal eRulemaking Portal: https://www.regulations.gov.*

All submissions received must include the agency name and docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *https://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: A copy of this information collection request, with applicable supporting documentation, may be obtained by contacting the Human Resources Solution, Office of Personnel Management, 1900 E Street NW, Washington, DC 20415, Attention: Cori Schauer, or via electronic mail to *usajobsengagement@opm.gov* or 202–606–1800.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501–3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. This notice complies with that requirement and solicits comments on the proposed ICR described below.

USAJOBS is the Federal Government's centralized source for most Federal jobs and employment information, including both positions that are required by law to be posted at that location and positions that can be posted there at an agency's discretion, see 5 U.S.C. 3327 and 3330. The Applicant Profile, Resume Builder, and Career Explorer are three components of the USAJOBS application system. USAJOBS reflects the minimal critical elements collected across the Federal Government to begin an application for Federal jobs under the authority of 5 U.S.C. 1104, 1302, 3301, 3304, 3320, 3361, 3393, and 3394, and Civil Service Rule II, codified at 5 CFR part 2. OPM proposes to renew a currently approved collection with revisions. A 32-question career quiz was added to aid job seekers in matching their skills to Federal job series. The quiz is voluntary. OPM is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

Analysis

BILLING CODE 6325–43–P

POSTAL REGULATORY COMMISSION

[Docket No. R2024–2; Order No. 7036]

Market Dominant Price Adjustment

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is recognizing a recently filed Postal Service notice of inflation-based rate adjustments affecting market dominant domestic and international products and services, along with proposed classification changes. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* May 9, 2024.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction

On April 9, 2024, the Postal Service filed a notice of price adjustments affecting Market Dominant domestic and international products and services, along with proposed classification changes to the Mail Classification Schedule (MCS).[1] The intended effective date for the planned price adjustments is July 14, 2024. Notice at 1. The Notice, which was filed pursuant to 39 CFR part 3030, triggers a notice-and-comment proceeding. 39 CFR 3030.125.

II. Overview of the Postal Service's Filing

The Postal Service's filing consists of the Notice, which the Postal Service represents addresses data and information required under 39 CFR 3030.122 and 39 CFR 3030.123; two attachments (Attachments A and B) to the Notice; three appended sets of workpapers; and six public library references and one non-public library reference.

Attachment A presents the planned price and related product description changes to the MCS. Notice, Attachment A. Attachment B presents the price cap calculation. *Id.* Attachment B. The three appended sets of workpapers present projections related to the proposed continuation of the First-Class Mail and Marketing Mail Growth Incentives. *Id.* at 31.

The first five public library references provide supporting documentation for the five classes of mail, and the sixth public library reference shows the banked rate adjustment authority for each class of mail over the last five years.[2] The Postal Service also filed a library reference pertaining to the two international mail products within First-Class Mail (Outbound Single-Piece First-Class Mail International and Inbound Letter Post) under seal and applied for non-public treatment of those materials.[3]

The Postal Service's planned percentage changes by class are, on average, as follows:

Market dominant class	Planned price adjustment (%)
First-Class Mail	7.755
USPS Marketing Mail	7.755
Periodicals	9.754
Package Services	7.755
Special Services	7.755

Notice at 5. Price adjustments for products within classes vary from the average. *See, e.g., id.* at 7, 10 (Table 4 showing range for First-Class Mail products and Table 6 showing range for USPS Marketing Mail products).

The Postal Service identifies the effect of its proposed price and classification changes on the MCS in Attachment A. *Id.* at 40; *id.* Attachment A. The Postal Service also seeks approval for the following seven promotions for the indicated periods:

- Informed Delivery Add-On/Upgrade Promotion (January 1–December 31, 2025);
- Sustainability Add-On/Upgrade Promotion (January 1–December 31, 2025);

Id. at 32–37. Additionally, the Postal Service proposes a new Catalog Incentive for certain USPS Marketing Mail and Package Services products that is intended to improve reporting and analysis of catalog data and proposes continuing other previously approved incentives within First-Class Mail and USPS Marketing Mail. *Id.* at 8, 11, 14–15, 25, 29–32.

III. Initial Administrative Actions

Pursuant to 39 CFR 3030.124(a), the Commission establishes Docket No. R2024–2 to consider the planned price adjustments for Market Dominant postal products and services, as well as the related classification changes, identified in the Notice. The Commission invites comments from interested persons on whether the Postal Service's planned price adjustments are consistent with applicable statutory and regulatory requirements. 39 CFR 3030.125. The applicable statutory and regulatory requirements the Commission considers in its review are the requirements of 39 CFR part 3030, Commission directives and orders, and 39 U.S.C. 3626, 3627, and 3629. 39 CFR 3030.126(b). Comments are due no later than May 9, 2024. 39 CFR 3030.124(f). The Commission will not accept late-filed comments as it is not practicable due to the expedited timeline for this proceeding. *See* 39 CFR 3030.126(b). The Commission notes that its review in this proceeding is limited to ensuring that the proposed prices comply with the requirements of 39 CFR part 3030, Commission directives and orders, and 39 U.S.C. 3626, 3627, and 3629. The Commission has opened a separate proceeding that requests comments on the broader aspects of the Market Dominant ratemaking system.[4]

The public portions of the Postal Service's filing are available for review on the Commission's website (*http://www.prc.gov*). Comments and other material filed in this proceeding will be available for review on the Commission's website, unless the information contained therein is subject to an application for non-public treatment. The Commission's rules on

[1] United States Postal Service Notice of Market-Dominant Price Change, April 9, 2024 (Notice).

[2] USPS Notice of Filing Public Library References, April 9, 2024, at 1.

[3] USPS Notice of Filing Non-Public International Mail Workpapers and Application for Non-Public Treatment of Materials Filed Under Seal, April 9, 2024, at 1, Attachment 1.

[4] Docket No. RM2024–4, Advance Notice of Proposed Rulemaking on the Statutory Review of the System for Regulating Rates and Classes for Market Dominant Products, April 5, 2024, at 23–24 (Order No. 7032).

non-public materials (including access to documents filed under seal) appear in 39 CFR part 3011.

Pursuant to 39 U.S.C. 505, the Commission appoints R. Tim Boone to represent the interests of the general public (Public Representative) in this proceeding.

IV. Ordering Paragraphs

It is ordered:

1. The Commission establishes Docket No. R2024–2 to consider the planned price adjustments for Market Dominant postal products and services, as well as the related classification changes, identified in the Postal Service's April 9, 2024 Notice.

2. Comments on the planned price adjustments and related classification changes are due no later than May 9, 2024.

3. Pursuant to 39 U.S.C. 505, R. Tim Boone is appointed to serve as an officer of the Commission to represent the interests of the general public (Public Representative) in this proceeding.

4. The Commission directs the Secretary of the Commission to arrange for prompt publication of this notice in the **Federal Register**.

By the Commission.

Erica A. Barker,

Secretary.

BILLING CODE 7710–FW–P

POSTAL REGULATORY COMMISSION

[Docket Nos. MC2024–227 and CP2024–233; MC2026–228 and CP2024–234]

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* April 18, 2024.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction

The Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to negotiated service agreement(s). The request(s) may propose the addition or removal of a negotiated service agreement from the Market Dominant or the Competitive product list, or the modification of an existing product currently appearing on the Market Dominant or the Competitive product list.

Section II identifies the docket number(s) associated with each Postal Service request, the title of each Postal Service request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 (Public Representative). Section II also establishes comment deadline(s) pertaining to each request.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.[1]

The Commission invites comments on whether the Postal Service's request(s) in the captioned docket(s) are consistent with the policies of title 39. For request(s) that the Postal Service states concern Market Dominant product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3622, 39 U.S.C. 3642, 39 CFR part 3030, and 39 CFR part 3040, subpart B. For request(s) that the Postal Service states concern Competitive product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3040, subpart B. Comment deadline(s) for each request appear in section II.

II. Docketed Proceeding(s)

1. *Docket No(s).:* MC2024–227 and CP2024–233; *Filing Title:* USPS Request to Add Priority Mail & USPS Ground Advantage Contract 215 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* April 10, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3040.130 through 3040.135, and 39 CFR 3035.105; *Public Representative:* Jennaca D. Upperman; *Comments Due:* April 18, 2024.

2. *Docket No(s).:* MC2024–228 and CP2024–234; *Filing Title:* USPS Request to Add Priority Mail & USPS Ground Advantage Contract 216 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* April 10, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3040.130 through 3040.135, and 39 CFR 3035.105; *Public Representative:* Almaroof Agoro; *Comments Due:* April 18, 2024.

This Notice will be published in the **Federal Register**.

Erica A. Barker,

Secretary.

POSTAL SERVICE

Privacy Act; System of Records

AGENCY: Postal Service®.

ACTION: Notice of modified systems of records.

SUMMARY: The United States Postal Service™ (USPS™) is proposing to revise two General Privacy Act Systems of Records. These updates are being made to support enhanced security and analysis to anticipate user issues and provide resolution.

DATES: These revisions will become effective without further notice on May 16, 2024, unless, in response to comments received on or before that date result in a contrary determination.

ADDRESSES: Comments may be submitted via email to the Privacy and Records Management Office, United States Postal Service Headquarters (*privacy@usps.gov*). To facilitate public inspection, arrangements to view copies of any written comments received will be made upon request.

FOR FURTHER INFORMATION CONTACT: Janine Castorina, Chief Privacy and Records Management Officer, Privacy and Records Management Office, 202–268–3069 or *uspsprivacyfedregnotice@usps.gov.*

SUPPLEMENTARY INFORMATION: This notice is in accordance with the Privacy Act requirement that agencies publish their systems of records in the **Federal Register** when there is a revision, change, or addition, or when the agency establishes a new system of records. The

Postal Service is proposing revisions to three existing systems of records (SOR) to support the implementation of voluntary mentorship programs and related applications.

I. Background

This notice is in accordance with the Privacy Act requirement that agencies publish their systems of records in the **Federal Register** when there is a revision, change, or addition, or when the agency establishes a new system of records. The Postal Service is proposing to modify two SORs to support user experience enhancement analytics:

USPS SOR 550.100 Commercial Information Technology Resources-Applications

USPS SOR 550.200 Commercial Information Technology Resources-Administrative

II. Rationale for Changes to USPS Privacy Act Systems of Records

User experience is integral to the continued, seamless operation of any technology solution. Identifying pain points, areas of frustration, and common technology failures are paramount to positive user interaction. To that end, USPS will deploy a new tool to anticipate, identify, and provide remediation support for problems that may plague users in their technological interactions. Accordingly, USPS will modify USPS SOR 550.100 Commercial Information Technology Resources—Applications and USPS SOR 550.200 Commercial Information Technology Resources—Administrative as follows:

USPS SOR 550.100 Commercial Information Technology Resources—Applications

—Four new purposes: 13, 14, 15, and 16

USPS SOR 550.200 Commercial Information Technology Resources—Administrative

—Two new categories of records: 119 and 120.

III. Description of the Modified Systems of Records

Pursuant to 5 U.S.C. 552a(e)(11), interested persons are invited to submit written data, views, or arguments on this proposal. A report of the proposed revisions to this SOR has been sent to Congress and to the Office of Management and Budget for their evaluations. The Postal Service does not expect that this modified system of records will have any adverse effect on individual privacy rights. Accordingly, for the reasons stated above, the Postal Service proposes revisions included in this system of records presented in its entirety as follows:

SYSTEM NAME AND NUMBER:

550.100 Commercial Information Technology Resources—Applications.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

All USPS facilities and contractor sites.

SYSTEM MANAGER(S):

For records of computer access authorizations: Chief Information Officer and Executive Vice President, United States Postal Service, 475 L'Enfant Plaza SW, Washington, DC 20260.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

39 U.S.C. 401, 403, and *404.*

PURPOSE(S) OF THE SYSTEM:

1. To provide event registration services to USPS customers, contractors, and other third parties.

2. To allow task allocation and tracking among team members.

3. To allow users to communicate by telephone, instant-messaging, and email through local machine and web-based applications on desktop and mobile operating systems.

4. To share your personal image via your device camera during meetings and web conferences, if you voluntarily choose to turn the camera on, enabling virtual face-to-face conversations.

5. To provide for the creation and storage of media files, including video recordings, audio recordings, desktop recording, and web-based meeting recordings.

6. To provide a collaborative platform for viewing video and audio recordings.

7. To create limited use applications using standard database formats.

8. To review distance driven by approved individuals for accurate logging and compensation.

9. To develop, maintain, and share computer code.

10. To comply with Security Executive Agent Directive (SEAD) 3 requirements for self-reporting of unofficial foreign travel pertaining to covered individuals who have access to classified information or who hold a sensitive position.

11. To administer and maintain a secure board portal software that provides leadership with instant access to information they need before, during and after meetings, making board and committee interactions more efficient and productive by promoting collaboration and information sharing among USPS Board of Governors (BOG) and Executive Leadership Team (ELT).

12. To facilitate the software component of USPS-sponsored voluntary mentorship programs.

13. To monitor IT systems for software, hardware and application issues and aggregate results for diagnosis.

14. To measure user experience and utilization and provide proactive remediation to experience interruptions.

15. To organize user technology groupings by high-level to provide preventative technology support.

16. Collecting user sentiment via application interactions for the purpose of measuring digital employee experience and thereby improving results.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

1. Individuals with authorized access to USPS computers, information resources, and facilities, including employees, contractors, business partners, suppliers, and third parties.

2. Individuals participating in web-based meetings, web-based video conferencing, web-based communication applications, and web-based collaboration applications.

3. USPS Board of Governors, administrators, and USPS Executive Leadership Team.

CATEGORIES OF RECORDS IN THE SYSTEM:

1. *Third-party Information records:* Records relating to non-Postal, third-party individuals utilizing an information system, application, or piece of software, including: Third-Party Name, Third Party Date Request, Third Party Free Text, Guest User Information.

2. *Collaboration application records:* Records relating to web-conferencing and web-collaboration applications, including; Collaborative Group Names, Collaborative Group IDs, Action Name, Number Of Actions Sent, Number Of Action Responses, Employee Phone Number, Collaborative Group Chat History, Profile Information, Collaborative Group Membership, Contacts, Project Owner, Project Creator, Event Start Time, Event Status, Event Organizer, Event Presenter, Event Producer, Event Production Type, Event Recording Setting, Total Number Of Event Media Viewings, Number Of Active Users, Number Of Active Users In Collaborative Groups, Number Of Active Collaborative Group Communication Channels, Number Of Messages Sent, Number Of Calls Participated In, Last Activity Date Of A User, Number Of Guest Users In A Collaborative Group, Event Name, Event Description, Event Start Date, Event End Date, Video Platform Group Name,

Video Platform Group Email Alias, Video Platform Group Description, Video Platform Group Classification, Video Platform Group Access Level, Video Platform Channel Name, Video Platform Channel Description, Video Platform Channel Access, Video Platform Live Event Recording, Total Number Of Video Conferences, Add Room Member To Collaborative Group, Attachment Downloaded From Collaborative Group, Attachment Uploaded From Collaborative Group, Direct Message Started From Collaborative Group, Invite Sent From Collaborative Group, Message Edited From Collaborative Group, Message Posted In Collaborative Group, Remove Room Member From Collaborative Group, Room Created In Collaborative Group, Add Service Account Permission To Enterprise Collaborative Group, Remove Service Account Permission To Enterprise Collaborative Group, Added User To Enterprise Collaborative Group, Added User Role To Enterprise Collaborative Group, Removed User From Enterprise Collaborative Group, Request To Join Enterprise Collaborative Group, Approve Join Request From Enterprise Collaborative Group, Reject Join Request From Enterprise Collaborative Group, Invite User To Enterprise Collaborative Group, Accept Invitation For Enterprise Collaborative Group, Reject Invitation For Enterprise Collaborative Group, Revoke Invitation For Enterprise Collaborative Group, Join Enterprise Collaborative Group, Ban User Including With Moderation In Enterprise Collaborative Group, Unban User From Enterprise Collaborative Group, Add All Users In Domain For Enterprise Collaborative Group, Create Group In Enterprise Collaborative Group, Delete Group In Enterprise Collaborative Group, Create Namespace In Enterprise Collaborative Group, Delete Namespace In Enterprise Collaborative Group, Change Info Setting In Enterprise Collaborative Group, Add Info Setting In Enterprise Collaborative Group, Remove Info Setting In Enterprise Collaborative Group, Add Member Role In Enterprise Collaborative Group, Remove User Role In Enterprise Collaborative Group, Membership Expiration Added In Enterprise Collaborative Group, Membership Expiration Removed In Enterprise Collaborative Group, Membership Expiration Updated In Enterprise Collaborative Group, ACL Permission Changed In Collaborative Group, Collaborative Group Invitation Accepted, Join Request Approved, User Joined Collaborative Group, User Requested To Join Collaborative Group, Collaborative Group Basic Setting Changed, Collaborative Group Created, Collaborative Group Deleted, Collaborative Group Identity Setting Changed, Collaborative Group Info Setting Added, Collaborative Group Info Setting Changed, Collaborative Group Info Setting Removed, Collaborative Group New Member Restriction Changed, Collaborative Group Post Reply Settings Changed, Collaborative Group Spam Moderation Settings Changed, Collaborative Group Topic Setting Changed, Collaborative Group Message Moderated, User Posts Will Always Be Posted, User Added To Collaborative Group, User Banned From Collaborative Group, User Invitation Revoked From A Collaborative Group, User Invited To Collaborative Group, User Join Request Rejected From A Collaborative Group, User Reinvited To Collaborative Group, User Removed From Collaborative Group, Call Event Abuse Report Submitted, Call Event Endpoint Left, Call Event Livestream Watched, Individual Form Response, Form Respondent Email Address, Whiteboard Software Updated, Whiteboard Reboot Requested, Whiteboard Export Requested, Attachment Deleted, Attachment Uploaded, Note Content Edited, Note Created, Note Deleted, Note Permissions Edited.

3. *Communication Application Records:* Enterprise Social Network User Name, Enterprise Social Network User State, Enterprise Social Network User State Change Date, Enterprise Social Network User Last Activity Date, Number Of Messages Posted By An Enterprise Social Network User In Specified Time Period, Number Of Messages Viewed By An Enterprise Social Network User, Number Of Liked Messages By An Enterprise Social Network User, Products Assigned To A Enterprise Social Network User, Home Network Information, External Network Information, External Network Name, External Network Description, External Network Image, Network Creation Date, Network Usage Policy, External Network User Name, External Network User Email Address, External Group Name, Number Of Users On A Network, Network ID, Live Event Video Links, Files Added Or Modified In Enterprise Social Network, Message ID, Thread ID, Message Privacy Status, Full Body Of Message, Chat User Action, Chat Room Member Added, Chat Attachment Downloaded, Chat Attachment Uploaded, Chat Room Blocked, Chat User Blocked, Chat Direct Message Started, Chat Invitation Accepted, Chat Invitation Declined, Chat Invitation Sent, Chat Message Edited, Chat Message Posted, Chat Room Member Removed, Chat Room Created.

4. *Multimedia records:* Records relating to media associated with or originating from an information system, including; Video Platform User ID, Video Name, Videos Uploaded By User, Videos Accessed By User, Channels Created By User, User Group Membership, Comments Left By User On Videos, Screen Recordings, Video Transcript, Deep Search Captions, Video Metadata, Audio Metadata, Phone Number, Time Phone Call Started, User Name, Call Type, Phone Number Called To, Phone Number Called From, Called To Location, Called From Location, Telephone Minutes Used, Telephone Minutes Available, Charges For Use Of Telephone Services, Currency Of Charged Telephone Services, Call Duration, Call ID, Conference ID, Phone Number Type, Blocked Phone Numbers, Blocking Action, Reason For Blocking Action, Blocked Phone Number Display Name, Date And Time Of Blocking, Call Start Time, User Display Name, SIP Address, Caller Number, Called To Number, Call Type, Call Invite Time, Call Failure Time, Call End Time, Call Duration, Number Type, Media Bypass, SBC FQDN, Data Center Media Path, Data Center Signaling Path, Event Type, Final SIP, Final Vendor Subcode, Final SIP Phrase, Unique Customer Support ID.

5. *Limited Use Application records:* Records relating to applications with a specific, limited use, including; Application Authoring Application Name, Application Authoring Application Author, Voice Search Text Strings, Miles Driven, Mileage Rates, Country Currency, Destination, Destination Classification, Car Make, Car Model, Working Hours, Total Number Of Monthly Drives, Total Number Of Monthly Miles, Total Number Of Personal Drives, Total Number Of Personal Drives, Users Allowed To Access Application, Application Authoring Application Security Settings, Total Number Of Cloud-Based Searches Performed, Total Number Of Cloud-Based Search Queries From Web Browsers, Total Number Of Cloud-Based Search Queries From Android Operating Systems, Total Number Of Cloud-Based Search Queries From iOS Operating Systems, Data Visualization Report Email Delivery Added, Data Visualization Asset Created, Data Visualization Data Exported, Data Visualization Asset Deleted, Data Visualization Report Downloaded, Data Visualization Asset Edited, Data Visualization Asset Restored, Data Visualization Report

Email Delivery Stopped, Data Visualization Asset Trashed, Data Visualization Report Email Delivery Updated, Data Visualization Asset Viewed, Data Visualization Link Sharing Access Type Changed, Data Visualization Link Sharing Visibility Changed, Data Visualization User Sharing Permissions Changed.

6. *Development Records:* Records relating to applications used for the creation, sharing, or modification of software code, including: Data Repository User ID, Data Repository Password, Data Repository User Address, Data Repository Payment Information, Data Repository User First Name, Data Repository User Last Name, Data Repository Profile Picture, Data Repository Profile Biography, Data Repository Profile Location, Data Repository User Company, Data Repository User Preferences, Data Repository User Preference Analytics, Data Repository Transaction Date, Data Repository Transaction Time, Data Repository Transaction Amount Charged, Data Repository web pages Viewed, Data Repository Referring website, Data Repository Date Of web page Request, Data Repository Time Of web page Request, Data Repository User Commits, Data Repository User Commit Comment Body Text, Data Repository Pull Request Comment Body Text, Data Repository Issue Comment Body Text, Data Repository User Comment Body Text, Data Repository User Authentication, Language Of Device Accessing Data Repository, Operating System Of Device Accessing Data Repository, Application Version Of Device Accessing Data Repository, Device Type Of Device Accessing Data Repository, Device ID Of Device Accessing Data Repository, Device Model Of Device Accessing Data Repository, Device Manufacturer Of Device Accessing Data Repository, Browser Version Of Device Accessing Data Repository, Client Application Information Of Device Accessing Data Repository, Data Repository User Usage Information, Data Repository Transactional Information, Data Repository API Notification Status, Data Repository API Issue Status, Data Repository API Pull Status, Data Repository API Commit Status, Data Repository API Review Status, Data Repository API Label, Data Repository API User Account Signin Status, Data Repository API Schedule Status, Data Repository API Schedule List.

7. *Unofficial Foreign Travel Monitoring:* Records relating to covered individuals for the administration of the SEAD 3 program, including: Title, Name Of Traveler, Information Type: Pre-Travel And Post-Travel, Start Date Of Travel, End Date Of Travel, Carrier Of Transportation, Countries You Are Visiting, Passport Number, Passport Expiration Date, Names And Association Of Foreign National Travel Companions, Planned Foreign Contacts, Emergency Contact Name, Emergency Contact Phone Number, Emergency Contact Relationship, Post-Travel Questions Relating To Activity, Events, And Interactions.

8. *Cloud-based storage records:* Records relating to activity within cloud-based storage systems, including: Number Of Files Made Publicly Available, Number Of Files Made Available With A Link, Number Of Files Shared With Domain Users, Number Of Files Shared With Domain Users Through Link, Number Of Files Shared With Users Outside Domain, Number Of Files Shared With User Or Group In Domain, Number Of Files Not Shared At All, Number Of Spreadsheet Documents Added, Number Of Text Documents Added, Number Of Presentation Documents, Number Of Form Documents Added, Number Of Other Files Added, Number Of Files Edited, Number Of Files Viewed, Number Of Files Added, Total Cloud Storage Space Used, Last Time Storage Accessed By User, Item Added To Folder, Item Approval Cancelled, Comment Added On Approval Of Item, Due Date Time Change Requested, Item Approval Requested, Reviewer Change Requested For Item Approval, Item Approval Reviewed, Document Copy Created, Document Created, Document Deleted, Document Downloaded, Document Shared As Email Attachment, Document Edited, Label Applied, Label Value Changed, Label Removed, Item Locked, Item Moved, Item Previewed, Item Printed, Item Removed From Folder, Item Renamed, Item Restored, Item Trashed, Item Unlocked, Item Uploaded, Item Viewed, Security Update Applied To File, Security Update Applied To All Files In Folder, Publish Status Changed, Editor Settings Changed, Link Sharing Access Type Changed, Link Sharing Access Changed From Parent Folder, Link Sharing Visibility Changed, Link Sharing Visibility Changed From Parent Folder, Security Update Removed From File, Membership Role Changed, Shared Storage Settings Changed, Spreadsheet Range Enabled, User Sharing Permissions Changed, User Sharing Permissions Changed From Parent Folder, User Storage Updated, File Viewed, File Renamed, File Created, File Edited, File Previewed, File Printed, File Updated, File Deleted, File Uploaded, File Downloaded, File Shared.

9. *Email Application records:* Records relating to regular use of email applications, including: Email Body Text, Email Metadata, Total Number Of Emails Sent, Total Number Of Emails Received, Total Number Of Emails Sent And Received, Last Time User Accessed Email Client Through A Post Office Protocol (POP) Mail Server, Last Time User Accessed Email Client Through An internet Message Access Protocol (IMAP) Mail Server, Last Time User Accessed Through Web-Based Server, Total Email Client Storage Space Used, Calendar Access Level(S) Changed, Calendar Country Changed, Calendar Created, Calendar Deleted, Calendar Description Changed, Calendar Location Changed, Calendar Time zone Changed, Calendar Title Changed, Calendar Notification Triggered, Calendar Subscription Added, Calendar Subscription Deleted, Calendar Event Created, Calendar Event Deleted, Calendar Event Guest Added, Calendar Event Guest Auto-Response, Calendar Event Guest Removed, Calendar Event Guest Response Changed, Calendar Event Modified, Calendar Event Removed From Trash, Calendar Event Restored, Calendar Event Start Time Changed, Calendar Event Title Modified, Successful Availability Lookup Of A Calendar Between Email Clients, Successful Availability Lookup Of Email Client Resource, Successful Email Client Resource List Lookup, Unsuccessful Availability Lookup Of A Calendar On Email Client, Unsuccessful Availability Lookup Of Email Client Resource, Unsuccessful Email Client Resource List Lookup.

10. *Web Browser Records:* Records relating to activity within a web browser, including: Web Browser Password Changed, Web Browser Password Reused, Malware Detected in Transferred Content for User, Sensitive Data Detected In Transferred Content, Unsafe website Visit Detected For User.

11. USPS Board of Governors name, email, and collaborative meeting records used to store meeting material such as presentations, briefing documents/memos, meeting minutes/notes, and responses to various board inquiries, presentation briefing documents, and memos.

12. Mentorship Application Information: Match Data Stored About A User, Program Membership Status, Program Eligibility, Program Enrollment Date, Program Participation Preference, Mentor/Mentee Capacity, Preferred Mentors, Accepting New Matches Status, Recommended Mentors, Declined Recommendation Reason,

Active Mentor/Mentee/Peer Relationships, Relationship Start/End Date, User Who Requested The Relationship, Relationship Status, Action Item/Checklist Item Progress, Mentorship Agreements, Pairing Health, Mentor/Mentee/Peer Relationship Requests, Mentor/Mentee/Peer Relationship Extension Requests, Mentor/Mentee/Peer Request Introduction Notes, Mentor/Mentee/Peer Request Preferred Match Duration, Past Mentor/Mentee/Peer Relationships, Active Group Membership As A Mentor/Mentee/Peer, Group Name, Group Start/End Date, Group Status, Past Group Membership As A Mentor/Mentee/Peer.

13. Mentoring Session Data Stored For A User: Status, Default Admin Agenda, Custom User Agenda Start/End Date Time, Mentee/Mentor Feedback, 1–4 Star Rating, Free Text Session Feedback, Private Session Notes, Shared Session Notes, User Booking Session, Session Calendar Event And Videoconferencing Details, Session Attendance, Session Topics.

14. Program Survey Data Stored For A User: Survey Status, Custom Admin Supplied Question Responses, Program Admin Data, Reporting Column Preferences, Program Admin Support Contact.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Standard routine uses 1. through 9. apply. In addition:

(a) To appropriate agencies, entities, and persons when (1) the Postal Service suspects or has confirmed that there has been a breach of the system of records; (2) the Postal Service has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the Postal Service (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the Postal Service's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

RECORD SOURCE CATEGORIES:

Employees; contractors; customers; USPS Board of Governors.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Automated database, computer storage media, and paper.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

1. Records relating to third-parties are retrievable by name and email address.

2. Records relating to collaboration are retrievable by name, email address, and user ID.

3. Records relating to communication are retrievable by name, email address, and user ID.

4. Records pertaining to multimedia are retrievable by username and media title.

5. Records relating to application development are retrievable by user ID and application name.

6. Records relating to limited use applications are retrievable by name, email address, and user ID.

7. Records relating to Unofficial Foreign Travel Monitoring for covered individuals are retrievable by name.

8. Records relating to Cloud-based storage are retrievable by name, email address, and user ID.

9. Records relating to Email Applications are retrievable by name, email address, and user ID.

10. Records relating to Web Browsers are retrievable by name, email address, and user ID.

11. USPS Board of Governors secure board portal collaboration software data is retrievable by date, meeting information, committee name, and other session collaboration details.

12. Records relating to mentorship programs are retrievable by mentee name

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

1. Records relating to third parties are retained for twenty-four months.

2. Records relating to collaboration are retained for twenty-four months.

3. Records relating to communication are retained for twenty-four months.

4. Multimedia recordings are retained for twenty-four months.

5. Records relating to application development are retained for twenty-four months.

6. Records relating to limited use applications are retained for twenty-four months.

7. Records relating to Unofficial Foreign Travel Monitoring for covered individuals are retained for twenty-five years.

8. Records relating to Cloud-based storage are retained for twenty-four months.

9. Records relating to Email Applications are retained for twenty-four months.

10. Records relating to Web Browsers are retained for twenty-four months.

11. USPS Board of Governors secure board portal collaboration software data is retained up to twelve months from the close of the corresponding event.

12. Records relating to mentorship programs are retained for twenty-four months.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Paper records, computers, and computer storage media are located in controlled-access areas under supervision of program personnel. Computer access is limited to authorized personnel with a current security clearance, and physical access is limited to authorized personnel who must be identified with a badge.

Access to records is limited to individuals whose official duties require such access. Contractors and licensees are subject to contract controls and unannounced on-site audits and inspections.

Computers are protected by encryption, mechanical locks, card key systems, or other physical access control methods. The use of computer systems is regulated with installed security software, computer logon identifications, and operating system controls including access controls, terminal and transaction logging, and file management software.

RECORD ACCESS PROCEDURES:

Requests for access must be made in accordance with the Notification Procedure and USPS Privacy Act regulations regarding access to records and verification of identity under *39 CFR 266.5.*

CONTESTING RECORD PROCEDURES:

See Notification Procedure and Record Access Procedures above.

NOTIFICATION PROCEDURES:

Customers and employees wanting to know if other information about them is maintained in this system of records must address inquiries in writing to the Chief Information Officer and Executive Vice President and include their name and address.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

December 1, 2023; *88 FR 83981;* May 11, 2021; *86 FR 25899;* January 31, 2022; *87 FR 4957.*

SYSTEM NAME AND NUMBER:

550.200 Commercial Information Technology Resources—Administrative.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

All USPS facilities and contractor sites.

SYSTEM MANAGER(S):

For records of computer access authorizations: Chief Information Officer and Executive Vice President, United States Postal Service, 475 L'Enfant Plaza SW, Washington, DC 20260.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

39 U.S.C. 401, 403, and 404.

PURPOSE(S) OF THE SYSTEM:

1. To provide active and passive monitoring and review of information system applications and user activities.

2. To generate logs and reports of information system application and user activities.

3. To provide a means of auditing commercial information system activities across applications and users.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

1. Individuals with authorized access to USPS computers, information resources, and facilities, including employees, contractors, business partners, suppliers, and third parties.

2. Individuals participating in web-based meetings, web-based video conferencing, web-based communication applications, and web-based collaboration applications.

CATEGORIES OF RECORDS IN THE SYSTEM:

1. General Audit Log activities: DateTime, IP Address, User Activity, User Item Accessed, Activity Detail, Object ID, Record Type, Client IP Address, CorrelationID, CreationTime, EventData, EventSource, ItemType, OrganizationID, UserAgent, USerKEy, UserType, Version, Workload.

2. File and page activities: Accessed file, Change retention label for a file, Deleted file marked as a record, Checked in file, Changed record status to locked, Changed record status to unlocked, Checked out file, Copied file, Discarded file checkout, Deleted file, Deleted file from recycle bin, Deleted file from second-stage recycle bin, Detected document sensitivity mismatch, Detected malware in file, Deleted file marked as a record, Downloaded file, Modified file, Moved file, Recycled all minor versions of file, Recycled all versions of file, Recycled version of file, Renamed file, Restored file, Uploaded file, Viewed page, View signaled by client, Performed search query.

3. Folder activities: Copied folder, Created folder, Deleted folder, Deleted folder from recycle bin, Deleted folder from second-stage recycle bin, Modified folder, Moved folder, Renamed folder, Restored folder.

4. Cloud-based Enterprise Storage activities: Created list, Created list column, Created list content type, Created list item, Created site column, Created site content type, Deleted list, Deleted list column, Deleted list content type, Deleted list item, Deleted site column, Deleted site content type, Recycled list item, Restored list, Restored list item, Updated list, Updated list column, Updated list content type, Updated list item, Updated site column, Updated site content type.

5. Sharing and access request activities: Added permission level to site collection, Accepted access request, Accepted sharing invitation, Blocked sharing invitation, Created access request, Created a company shareable link, Created an anonymous link, Created secure link, Deleted secure link, Created sharing invitation, Denied access request, Removed a company shareable link, Removed an anonymous link, Shared filer, folder, or site, Unshared file folder or site, Updated access request, Updated an anonymous link, Updated sharing invitation, Used a company shareable link, Used an anonymous link, Used secure link, User added to secure link, User removed from secure link, Withdrew sharing invitation.

6. Synchronization activities: Allowed computer to sync files, Blocked computer from syncing files, Downloaded files to computer, Downloaded file changes to computer, Uploaded files to document library, Uploaded file changes to document library.

7. Site permissions activities: Added site collection admin, Added user of group to Cloud-based Enterprise Storage group, Broke permission level inheritance, Broke sharing inheritance, Created group, Deleted group, Modified access request setting, Modified ''Members Can Share'' setting, Modified permission level on site collection, Modified site permissions, Removed site collection admin, Removed permission level from site collection, Removed user or group from Cloud-based Enterprise Storage group, Requested site admin permissions, Restored sharing inheritance, Updated group.

8. Site administration activities: Added allowed data location, Added exempt user agent, Added geo location admin, Allowed user to create groups, Cancelled site geo move, Changed a sharing policy, Changed deice access policy, Changed exempt user agents, Changed network access policy, Completed site geo move, Created Sent To connection, Created site collection, Deleted orphaned hub site, Deleted Sent To connection, Deleted site, Enabled document preview, Enabled legacy workflow, Enabled Office on Demand, Enabled result source for People Searched, Enabled RSS feeds, Failed site swap, Joined site to hub site, Registered hub site, Removed allowed data location, Removed geo location admin, Renamed site, Scheduled site rename, Scheduled site swap, Scheduled site geo move, Set host site, Set storage quota for geo location, Swapped site, Unjoined site from hub site, Unregistered hub site.

9. Cloud-based Email Server mailbox activities: Created mailbox item, Copied messages to another folder, User signed in to mailbox, Accessed mailbox items, Sent message using Send On Behalf permissions, Purged messages from mailbox, Moved messages to Deleted Items folder, Moved messages to another folder, Sent message using Send As permissions, Sent message, Updated message, Deleted messages from Deleted Items folder, New-Inbox Rule Create-Inbox Rule from email web application, Set-Inbox Rule Modify inbox rule from email web application, Update inbox rules from email web application, Added delegate mailbox permissions, Removed delegate mailbox permissions, Added permissions to folder, Modified permissions of folder, Removed permissions from folder, Added or removed user with delegate access to calendar folder, Labeled message as a record.

10. Retention policy and retention level activities: Created retention label, Created retention policy, Configured settings for a retention policy, Deleted retention label, Deleted retention policy, Deleted settings from a retention policy, Updated retention label, Updated retention policy, Updated settings for a retention policy, Enabled regulatory record option for retention labels.

11. User administration activities: Added user, Deleted user, Set license properties, Reset user password, Changed user password, Changed user license, Updated user, Set property that forces user to change password, Organization Signup, Organization Creation, User creation without organization, Password reset requested, Disable user, Login success, Login success reauthenticate, Login failure, Login failure reauthentication, Logout, User permission change, Role permission change, Environment permissions change, Create role, Edit role—add user, Edit role—remove user, Edit role—change external group mapping, Delete role.

12. Enterprise User Administration group administration activities: Added group, Updated group, Deleted group, Added member to group, Removed member from group.

13. Application administration activities: Added service principal, Removed a service principal from the directory, Set delegation entry, Removed credentials from a service principal, Added delegation entry, Added credentials to a service principal, Removed delegation entry.

14. Role administration activities: Added member to Role, Removed a user from a directory role, Set company contact information.

15. Directory administration activities: Added a partner to the directory, Removed a partner from the directory, Added domain to company, Removed domain from company, Updated domain, Set domain authentication, Verified domain, Updated the federation settings for a domain, Verified email verified domain, Turned on Enterprise Information Technology Account Administration sync, Set password policy, Set company information.

16. eDiscovery activities: Created content search, Deleted content search, Changed content search, Started content search, Stopped content search, Started export of content search, Started export report, Previewed results of content search, Purged results of content search, Started analysis of content search, Removed export of content search, Removed preview results of content search, Removed purse action performed on content search, Removed analysis of content search, Removed search report, Content search preview item listed, Content search preview item viewed, Content search preview item downloaded, Downloaded export of content search, Created search permissions filter, Deleted search permissions filter, Changed search permissions filter, Created hold in eDiscovery case, Deleted hold in eDiscovery case, Changed hold in eDiscovery case, Created eDiscovery case, Deleted hold in eDiscovery case, Changed hold in eDiscovery case, Created eDiscovery case, Deleted eDiscovery data, Changed hold in eDiscovery case, Added member to eDiscovery case, Removed member from eDiscovery case, Changed eDiscovery case membership, Created eDiscovery administrator, Deleted eDiscovery administrator, Changed eDiscovery administrator membership, Remediation action created, Item deleted using Remediation, Created workingset search, Updated workingset search, Deleted workingset search, Previewed workingset search, Document viewed, Document annotated, Document downloaded, Tag created, Tag edited, Tag deleted, Tag files, Tag job, Created review set, Added Cloud-based productivity software data, Added non-office data, Added data to another workingset, Added remediated data, Run algo job, Run export job, Run burn job, Run error remediation job, Run load comparison job, Updated case settings.

17. eDiscovery system command activities: Created content search, Deleted content search, Changed content search, Started content search, Stopped content search, created content search action, Deleted content search action, Created search permissions filter, Deleted search permissions filter, Changed search permissions filter, Created hold in eDiscovery case, Deleted hold in eDiscovery case, Changed hold in eDiscovery case, Created search query for eDiscovery case hold, Deleted search query for eDiscovery case hold, Changed search query for eDiscovery case hold, Created eDiscovery case, Deleted eDiscovery case, Changed eDiscovery case, Added member to eDiscovery case, Removed member from eDiscovery case, Changed eDiscovery case membership, Created eDiscovery administrator, Deleted eDiscovery administrator, Changed eDiscovery administrator membership.

18. Data Analysis application activities: Viewed program dashboard, Created program dashboard, Edited program dashboard, Deleted program dashboard, Shared program dashboard, Printed program dashboard, Copied program dashboard, Viewed program tile, Exported program tile data, Viewed program report, Deleted program report, Printed program report page, Created program report, Edited program report, Copied program report, Exported program artifact to another file format, Export program activity events, Updated program workspace access, Restored program workspace, Updated program workspace, Viewed program metadata, Created program dataset, Deleted program dataset, Created program group, Deleted program group, Added program group members, Retrieved program groups, Retrieved program dashboard, Retrieved data sources from program dataset, Retrieved upstream data flows from program dataflow, Retrieved data sources from program dataflow, Removed program group members, Retrieved links between datasets and dataflows, Created organizational program content pack, Created program app, Installed program app, Updated program app, Updated organization's program settings, Started program trial, Started program extended trial, Analyzed program dataset, Created program gateway, Deleted program gateway, Added data source to program gateway, Removed data source from program gateway, Changed program gateway admins, Changed program gateway data source users, Set scheduled refresh on program dataset, Unpublished program app, Deleted organizational program content pack, Renamed program dashboard, Edited program dataset, Updated capacity display name, Changed capacity state, Updated capacity admin, Changed capacity user assignment, Migrated workspace to a capacity, Removed workspace from a capacity, Retrieved program workspaces, Shared program report, Generated program Embed Token, Discover program dataset data sources, Updated program dataset data sources, Requested program dataset refresh, Binded program dataset to gateway, Changed program dataset data sources, Requested program dataset refresh, Binded program dataset to gateway, Changed program dataset connections, Took over program dataset, Updated program gateway data source credentials, Imported file to program, Updated program dataset parameters, Generated program dataflow SAS token, Created program dataflow, Updated program dataflow, Deleted program dataflow, Viewed program dataflow, Exported program dataflow, Set scheduled refresh on program dataflow, Requested program dataflow refresh, Received program dataflow secret from Key Vault, Attached dataflow storage account, Migrated dataflow storage location, Updated dataflow storage assignment permissions, Set dataflow storage location for workspace, Took ownership of program dataflow, Canceled program dataflow refresh, Created program email subscription, Updated program email subscription, Deleted program email subscription, Created program folder, Deleted program folder, Updated program folder, Added program folder access, Deleted program folder access, Updated program folder access, Posted program comment, Deleted program comment, Analyzed program report, Viewed program usage metrics, Edited program dataset endorsement, Edited program dataflow endorsement, Edited program report endorsement, Edited program app endorsement, Retrieved list of modified workspaces in program tenant, Sent a scan request in program tenant, Retrieve scan result in program tenant, Inserted snapshot for user in program tenant, Updated snapshot for user in program tenant, Deleted snapshot for user in program tenant, Inserted snapshot for

user in program tenant, Updated snapshot for user in program tenant, Deleted snapshot for user in program tenant, Retrieved snapshots for user in program tenant, Edited program certification permission, Took over a program data source, Updated capacity custom settings, Created workspace for program template app, Deleted workspace for program template app, Updated settings for program template app, Updated testing permissions for program template app, Created program template app, Deleted program template app, Promoted program template app, Installed program template app, Updated parameters for installed program template app, Created install ticker for installing program template app, Updated an organizational custom visual, Created an organizational custom visual, Deleted an organizational custom visual, Custom visual requested Enterprise Information Technology Account Administration access token, Customer visual requested Cloud-based productivity software access token, Connected to program dataset from external app, Created program dataset from external app, Deleted program dataset from external app, Edited program dataset from external app, Requested program dataset refresh from external app, Requested SAS token for program storage, Requested account key for program storage, Assigned a workspace to a deployment pipeline, Removed a workspace from a deployment pipeline, Deleted deployment pipeline, Created deployment pipeline, Deployed to a pipeline stage, Updated deployment pipeline configuration, Updated deployment pipeline access, Added external resource, Added link to external resource, Deleted link to external resource, Updated featured tables, Applied sensitivity label to program artifact, Changed sensitivity label for program artifact, Deleted sensitivity label from program artifact.

19. Productivity Analysis activities: Updated privacy setting, Updated data access setting, Uploaded organization data, Created meeting exclusion, Updated preferred meeting exclusion, Execute query, Canceled query, Deleted result, Downloaded report, Accessed Odata link, Viewed query visualization, Viewed explore, Created partition, Updated partition, Deleted partition, User logged in, User logged out.

20. Briefing email activities: Updated user privacy settings, Updated organization privacy settings.

21. Cloud-based Collaboration Application activities: Created team, Deleted team, Added channel, Deleted channel, Changed organization setting, Changed team setting, Changed channel setting, User signed in to Cloud-based Collaboration Application, Added members, Changed role of members, Removed members, Added bot to team, Removed bot from team, Added tab, Removed tab, Updated tab, Added connector, Removed connector, Updated connector, Downloaded analytics report, Upgraded Cloud-based Collaboration Application device, Blocked Cloud-based Collaboration Application device, Unblocked Cloud-based Collaboration Application device, Changed configuration of Cloud-based Collaboration Application device, Enrolled Cloud-based Collaboration Application device, Installed app, Upgraded app, Uninstalled app, Published app, Updated app, Deleted app, Deleted all organization apps, Performed action on card, Added scheduling group, Edited scheduling group, Deleted scheduling group, Added shift, Edited shift, Deleted shift, Added time off, Edited time off, Deleted time off, Added open shift, Edited open shift, Deleted open shift, Shared schedule, Clocked in using Time clock, Clocked out using Time clock, Started break using Time clock, Ended break using Time clock, Added Time clock entry, Edited Time clock entry, Deleted Time clock entry, Added shift request, Responded to shift request, Canceled shift request, Changed schedule setting, Added workforce integration, Accepted off shift message.

22. Cloud-based Collaboration Application approvals activities: Created new approval request, Viewed approval request details, Approved approval request, Rejected approval request, Canceled approval request, Shared approval request, File attached to approval request, Reassigned approval request, Added e-signature to approval request.

23. Enterprise Social Network activities: Changed data retention policy, Changed network configuration, Changed network profile settings, Changed private content mode, Changed security configuration, Created file, Created group, Deleted group, Deleted message, Downloaded file, Exported data, Shared file, Suspended network user, Suspended user, Updated file description, Updated file name, Viewed file.

24. Enterprise Customer Relationship Management activities: Accessed out-of-box entity (deprecated), Accessed custom entity (deprecated), Accessed admin entity (deprecated), Performed bulk actions (deprecated), All Enterprise Customer Relationship Management activities, Accessed Enterprise Customer Relationship Management admin center (deprecated), Accessed internal management tool (deprecated), Signed in or out (deprecated), Activated process or plug-in (deprecated).

25. Information Systems Infrastructure Automation activities: Created flow, Edited flow, Deleted flow, Edited flow permissions, Deleted flow permissions, Started a Flow paid trial, Renewed a Flow paid trial.

26. Application authoring program activities: Created app, Edited app, Deleted app, Launched app, Published app, Marked app as Hero, Marked app as Featured, Edited app permission, Restored app version.

27. Enterprise Automation DLP activities: Created DLP Policy, Updated DLP Policy, Deleted DLP Policy.

28. Video platform activities: Created video, Edited video, Deleted video, Uploaded video, Downloaded video, Edited video permission, Viewed video, Shared video, Liked video, Unliked video, Commented on video, Deleted video comment, Uploaded video text track, Deleted video text track, Uploaded video thumbnail, Deleted video thumbnail, Replaced video permissions and channel links, Marked video public, Marked video private, Created Video platform group, Edited Video platform group, Deleted Video platform group, Edited Video platform group memberships, Created Video platform channel, Edited Video platform channel, Deleted a Video platform channel, Replaced Video platform channel thumbnails, Edited Video platform user settings, Edited tenant settings, Edited global role members, Deleted Video platform user, Deleted Video platform user's data report, Edited Video platform user, Exported Video platform user's data report, Downloaded Video platform user's data report, Video Platform Event Date, Video Platform Event Name, Video Platform Event Description, Video Platform Meeting Code, Video Platform Participant Identifiers.

29. Content explorer activities: Accessed item.

30. Quarantine activities: Previewed Quarantine message, Deleted Quarantine message, Released Quarantine message, Exported Quarantine message, Viewed Quarantine Message's header.

31. Customer Key Service Encryption activities: Fallback to Availability Key.

32. Form application activities: Created form, Edited form, Moved form, Deleted form, Viewed form, Previewed form, Exported form, Allowed share form for copy, Added form co-author, Removed form co-author, Viewed response page, Created response, Updated response, Deleted all

responses, Deleted response, Viewed responses, Viewed response, Created summary link, Deleted summary link, Updated from phishing status, Updated user phishing status, Sent premium form product invitation, Updated form setting, Updated user setting, Listed forms.

33. Sensitivity label activities: Applied sensitivity label to site, Removed sensitivity label from site, Applied sensitivity label to file, Changed sensitivity label applied to file, Removed sensitivity label from file.

34. Local machine communications platform system command activities: Set tenant federation.

35. Search activities: Performed email search, Performed Cloud-based Enterprise Storage search.

36. Security analytics activities: Attempted to compromise accounts.

37. Device activities: Printed file, Deleted file, Renamed file, Created file, Modified file, Read file, Captured screen, Copied file to removable media, Copied file to network share, Copied file to clipboard, Uploaded file to cloud, File accessed by an unallowed application.

38. Information barrier activities: Removed segment from site, Changed segment of site, Applied segment to site.

39. On-premises DLP scanning activities: Matched DLP rule, Enforced DLP rule.

40. Individual Productivity Analytics activities: Updated user settings, Updated organization settings.

41. Exact Data Match (EDM) activities: Created EDM schema, Modified EDM schema, Removed EDM scheme, Completed EDM data upload, Failed EDM data upload.

42. Enterprise Information System Information Protection activities: Accessed file, Discovered file, Applied sensitivity label, Updated sensitivity label, Removed sensitivity label, Removed file, Applied protection, Changed protection, Removed protection, Received AIP heartbeat.

43. Data Repository Team Discussion Post Actions: Team Discussion Post Updated, Team Discussion Post Destroyed.

44. Data Repository Team Discussion Post Reply Actions: Team Discussion Post Reply Updated, Team Discussion Post Reply Destroyed.

45. Data Repository Enterprise Actions: Self-Hosted Runner Removed, Self-Hosted Runner Registered, Self-Hosted Runner Group Created, Self-Hosted Runner Group Removed, Self-Hosted Runner Removed From Group, Self-Hosted Runner Added To Group, Self-Hosted Runner Group Member List Updated, Self-Hosted Runner Group Configuration Changed, Self-Hosted Runner Updated.

46. Data Repository Hook Actions: Hook Created, Hook Configuration Changed, Hook Destroyed, Hook Events Altered.

47. Data Repository Integration Installation Request Actions: Integration Installation Request Created, Integration Installation Request Closed.

48. Data Repository Issue Action: Issue Destroyed.

49. Data Repository Org Actions: Secret Action Created, Member Creation Disabled, Two Factor Authentication Requirement Disabled, Member Creation Enabled, Two Factor Authentication Enabled, Member Invited, Self-Hosted Runner Registered, Secret Action Removed, Member Removed, Outside Collaborator Removed, Self-Hosted Runner Removed, Self-Hosted Runner Group Created, Self-Hosted Runner Group Removed, Self-Hosted Runner Group Updated, Secret Action Updated, Repository Default Branch Name Updated, Default Repository Permission Updated, Member Role Updated, Member Repository Creation Permission Updated.

50. Data Repository Organization Label Actions: Default Label Created, Default Label Updated, Default Label Destroyed.

51. Data Repository Oauth Application Actions: Oauth Application Created, Oauth Application Destroyed, Oauth Application Secret Restet, Oauth Application Token Revoked, Oauth Application Transferred.

52. Data Repository Profile Picture Actions: Organization Profile Picture Updated.

53. Data Repository Project Actions: Project Board Created, Project Board Linked, Project Board Renamed, Project Board Updated, Project Board Deleted, Project Board Unlinked, Project Board Permissions Updated, Project Board Team Permissions Updated, Project Board User Permission Updated.

54. Data Repository Protected Branch Actions: Branch Protection Enabled, Branch Protection Destroyed, Branch Protection Enforced For Administrators, Branch Enforcement Of Required Code Owner Enforced, Stale Pull Request Dismissal Enforced, Branch Commit Signing Updated, Pull Request Review Updated, Required Status Check Updated, Requirement For Branch To Be Up To Date Before Merging Changed, Branch Update Attempt Rejected, Branch Protection Requirement Overridden, Force Push Enabled, Force Push Disabled, Branch Deletion Enabled, Branch Deletion Disabled, Linear Commit History Enabled, Linear Commit History Disabled.

55. Data Repository Repo Actions: User Visibility Changed, Actions Enabled For Repository, Collaboration Member Added, Topic Added To Repository, Repository Archived, Anonymous Git Read Access Disabled, Anonymous Git Read Access Enabled, Anonymous Git Read Access Setting Locked, Anonymous Git Read Access Setting Unlocked, New Repository Created, Secret Created For Repository, Repository Deleted, Repository Enabled, Secret Removed, User Removed, Self-Hosted Runner Registered, Topic Removed From Repository, Repository Renamed, Self-Hosted Runner Updated, Repository Transferred, Repository Transfer Started, Repository Unarchived, Secret Action Updated.

56. Data Repository Dependency Graph Actions: Dependency Graph Disabled, Dependency Graph Disabled For New Repository, Dependency Graph Enabled, Dependency Graph Enabled For New Repository.

57. Data Repository Secret Scanning Actions: Secret Scanning Disabled For Individual Repository, Secret Scanning Disabled For All Repositories, Secret Scanning Disabled For New Repositories, Secret Scanning Enabled For Individual Repository, Secret Scanning Enabled For All Repositories, Secret Scanning Enabled For New Repositories.

58. Data Repository Vulnerability Alert Actions: Vulnerable Dependency Alert Created, Vulnerable Dependency Alert Dismissed, Vulnerable Dependency Alert Resolved.

59. Data Repository Team Actions: Member Added To Team, Repository Added To Team, Team Parent Changed, Team Privacy Level Changed, Team Created, Member Demoted In Team, Team Destroyed, Member Promoted In Team, Member Removed From Team, Repository Removed From Team.

60. Data Repository Team Discussion Actions: Team Discussion Disabled, Team Discussion Enabled.

61. Data Repository Workflow Actions: Workflow Run Cancelled, Workflow Run Completed, Workflow Run Created, Workflow Run Deleted, Workflow Run Rerun, Workflow Job Prepared.

62. Data Repository Account Actions: Billing Plan Change, Plan Change, Pending Plan Change, Pending Subscription Change.

63. Data Repository Advisory Credit Actions: Accept Credit, Create Credit, Decline Credit, Destroy Credit.

64. Data Repository Billing Actions: Change Billing Type, Change Email.

65. Data Repository Bot Alerts Actions: Disable Bot, Enable Bot.

66. Data Repository Bot Alerts for New Repository Actions: Disable Alerts, Enable Alerts.

67. Data Repository Bot Security Alerts for Update Actions: Disable Security Update Alerts, Enable Security Update Alerts.

68. Data Repository Bot Security Alerts for New Repository Actions: Disable New Repository Security Alerts, Enable New Repository Security Alerts.

69. Data Repository Environment Actions: Create Actions Secret, Delete, Remove Actions Secret, Update Actions Secret.

70. Data Repository Git Actions: Clone, Fetch, Push.

71. Data Repository Marketplace Agreement Signature Actions: Create.

72. Data Repository Marketplace Listing Actions: Approve, Create, Delist, Redraft, Reject.

73. Data Repository Members Can Create Pages Actions: Enable, Disable.

74. Data Repository Organization Credential Authorization Actions: Security Assertion Markup Language Single-Sign On Authorized, Security Assertion Markup Language Single-Sign On Deauthorized, Authorized Credentials Revoked.

75. Data Repository Package Actions: Package Version Published, Package Version Deleted, Package Deleted, Package Version Restored, Package Restored.

76. Data Repository Payment Method Actions: Payment Method Cleared, Payment Method Created, Payment Method Updated.

77. Data Repository Advisory Actions: Security Advisory Closed, Common Vulnerabilities And Exposures Advisory Requested, Data Repository Security Advisory Made Public, Data Repository Security Advisory Withdrawn, Security Advisory Opened, Security Advisory Published, Security Advisory Reopened, Security Advisory Updated.

78. Data Repository Content Analysis: Data Use Settings Enabled, Data Use Settings Disabled.

79. Data Repository Sponsors Actions: Repo Funding Link Button Toggle, Repo Funding Links File Action, Sponsor Sponsorship Cancelled, Sponsor Sponsorship Created, Sponsor Sponsorship Preference Changed, Sponsor Sponsorship Tier Changed, Sponsored Developer Approved, Sponsored Developer Created, Sponsored Developer Profile Updated, Sponsored Developer Request Submitted For Approval, Sponsored Developer Tier Description Updated, Sponsored Developer Newsletter Sent, Sponsored Developer Invited From Waitlist, Sponsored Developer Joined From Waitlist.

80. Administrator audit log events: Admin privileges grant, Group events, Marketplace login audit change, Auto provisioning automatically disabled.

81. Group enterprise audit log events: Add service account permission, Remove service account permission, Add user, Add user role, Remove user, Request to join, Approve join request, Reject join request, Invite user, Accept invitation, Reject invitation, Revoke invitation, Join, Ban user including with moderation, Unban user, Add all users in domain, Create group, Delete group, Create namespace, Delete namespace, Change info setting, Add info setting, Remove info setting, Add member role, Remove user role, Membership expiration added, Membership expiration removed, Membership expiration updated.

82. Software vendor employee interaction events: Event date, Software product name, Software vendor employee email, Software vendor employee home office location, Software vendor employee access justification, Justification tickets, Log ID, Software product resource accessed name.

83. Login events: Two-step verification enabled, Two-step verification disabled, Account password change, Account recovery email change, Account recovery phone change, Account recovery secret question change, Account recovery secret answer change, Advanced Protection enroll, Advanced Protection unenroll, Failed login, Government-backed attack attempt, Leaked password detected, Login challenged, Login verification, Logout, Out of domain email forwarding enabled, Successful login, Suspicious Login, Suspicious login blocked, Suspicious login from less secure app blocked, Suspicious programmatic login locked, User suspended, User suspended through spam relay, User suspended through spam, User suspended through suspicious activity.

84. OAuth Token audit log events: OAuth event description, OAuth event name, OAuth user, OAuth application name, OAuth client ID, OAuth scope, OAuth event data, OAuth logged activity IP address.

85. Rules audit log events: Rule event name, Rule event description, Rule triggering user, Rule name, Rule type, Rule resource name, Resource ID, Resource title, Resource type, Resource owner, Recipients, Data source, Actor IP address, Rule severity, Scan type, Matched trigger, Matched detectors, Triggered actions, Suppressed actions, Date, Device ID, Device type.

86. SAML audit log events: SAML event description, SAML Event name, SAML triggering user, SAML application name, SAML user organization name, Initiated by, Failure type, Response status, Second level status, SAML logged activity IP address, SAML event date.

87. Calendar application audit log events: Activity name, Activity description, Calendar user, Calendar ID, Event title, Event ID, User agent, Recipient email, Message ID, Remote Exchange Web Server URL, Error code, Requested window start, Requested window end, Date, Calendar logged activity IP address.

88. Context-Aware Access audit log events: Event name, Context-Aware access user, Context-Aware access logged activity IP address, Device ID, Access level applied, Context-Aware access event date.

89. Web browser audit log events: Web browser event name, Web browser event date, Web browser event reason, Device name, Device user, Web browser profile user name, URL generating event, Operating System of Web Browser, Web browser triggered rule reason, Web browser event result, Web browser content name, Web browser content size, Web browser content hash, Web browser content type, Web browser trigger type, Web browser trigger user, Web browser user agent, Web browser client type.

90. Data Visualization audit log events: Asset name, Event description, User, Event name, Date, Asset type, Owner, Asset ID, IP address, Connector type, visibility, Prior visibility.

91. Devices audit log events: Device ID, Event description, Date, Event name, User, Device type, Application hash, Serial number, Device model, OS version, Policy name, Policy status code, Windows OS edition, Account registration change, Device action event, Device application change, Device compliance status, Device compromise, Device OS update, Device ownership, Device settings change, Device status changed on Apple portal, Device sync, Failed screen unlock attempts, Sign out user, Suspicious activity, Work profile support.

92. Cloud-based web storage application audit log events: Cloud-based web storage application event name, Cloud-based web storage application event description, Cloud-based web storage application item type, Cloud-based web storage application item ID, Cloud-based web storage application item visibility, Cloud-based web storage application item prior visibility, Cloud-based web storage application user, Cloud-based web storage application visitor Boolean value, Cloud-based web storage

application file owner, Cloud-based web storage application event date, Cloud-based web storage application event IP address.

93. Groups audit log events: Groups event name, Groups event description, Groups event user, Groups event date.

94. Chat audit log events: Chat event name, Chat event description, Chat event user, Chat event date.

95. Whiteboard application audit log events: Whiteboard application ID Whiteboard application event description, Whiteboard application event name, Whiteboard application event user, Whiteboard application event date.

96. Note application audit log events: Note application event name, Note application event description, Note application event user, Note application event note owner, Note application event date, Note application note URI, Note application attachment URI.

97. Password vault audit log events: Password vault actor, Password vault event timestamp, Password vault event name, Password vault application username, Password vault application installation name, Password vault application credential name.

98. Takeout audit log events: Takeout event description, Takeout products requested, Takeout Job ID, Takeout event date, Takeout event IP address.

99. User accounts audit log events: User account event description, User account event date, User account event IP address, two-step verification disable, two-step verification enroll, Account password change, Account recovery email change, Account recovery phone change, Account recovery secret question change, Account recovery secret answer change.

100. Voice audit log events: Voice event name, Voice event description, Voice event date, Voice event user, Voice receiving phone number, Voice placing phone number, Voice call duration, Voice group message status, Voice call cost, Auto Attendant couldn't route to voicemail recipient, Auto attendant deleted, Auto attendant failed to transfer to a user, Auto attendant published, Auto attendant received a voicemail, Auto attendant voicemail failed to deliver, Auto attendant voicemail failed to forward.

101. User setting changes: 2-Step Verification Scratch Codes Of User Deleted, New 2-Step Verification Scratch Codes Generated For User, 3-Legged Oauth Device Tokens Revoked, 3-Legged Oauth Token Revoked, Add Recovery Email For User, Add Recovery Phone For User, Admin Privileges Granted For User, Admin Privileges Revoked For User, Application Specific Password Revoked For User, Automatic Contact Sharing Changed For User, Bulk Upload Notification, User Invite Cancelled, Custom Attribute Changed, External Id Changed, Gender Changed, Ims Changed, IP Whitelisted, Keywords Changed, User Location Changed, User Organization Changed, User Phone Numbers Changed, User Recovery Email Changed, User Recovery Phone Changed, User Relation Changed, User Address Changed, User Email Monitor Created, Data Transfer Requested For User, Delegated Admin Privileges Granted, Account Information Dump Deleted, Email Monitor Deleted, Mailbox Dump Deleted, Profile Photo Deleted, First Name Changed, Gmail Account Reset, Last Name Changed, Mail Routing Destination Created, Mail Routing Destination Deleted, Nickname Created, Nickname Deleted, Password Changed, Password Change Required On Next Login, Recovery Email Removed, Recovery Phone Removed, Account Information Requested, Mailbox Dump Requested, User Invite Resent, Cookies Reset For User And Forced Relogin, Security Key Registered For User, Security Key Revoked, User Invite Sent, Temporary Password Viewed, 2-Step Verification Turned Off, User Session Unblocked, Profile Photo Updated, User Advanced Protection Unenroll, User Archived, User Birthdate Changed, User Created, User Deleted, User Downgraded From Social Media Application, User Enrolled In 2-Step Verification, User List Downloaded, User Org Unit Changed, User Put In 2-Step Verification Grace Period, User Renamed, User Strong Auth Unenrolled, User Suspended, User Unarchived, User Undeleted, User Unsuspended, User Upgraded To Social Media Application.

102. Application Authoring application audit log elements: App synced, App edited, App added, App deleted, App invocation added, App invocation edited, App invocation deleted, App invocation action performed, App read call made, App bot invocation.

103. Organizational Administrative Data Elements: Set Terms and Conditions, Modify Terms and Conditions, Set org custom theme, Edit org custom theme, Add custom policy, Delete custom policy, Create User IdP Profile, Create environment, Delete environment, Rename environment, Edit domain name, Create business group, Edit business group name, Edit business group entitlement, Delete business group.

104. API audit log elements: Create API, Delete API, Import API, Update label of API, Update consumer endpoint of API, Update endpoint URI of API, Calendar API kind, Application API client version, Create API version, Delete API version, Import API, Edit name of API version, Edit description of API version, Edit API URL of API version, Add tag to API, Remove tag from API, Deprecate API, Set T&Cs, Create RAML, Modify RAML, Create endpoint, Update existing endpoint, Deploy proxy, Update deployed proxy, Redeploy proxy, Create SLA tier, Modify SLA tier, Deprecate SLA tier, Delete SLA tier, Apply policy, Edit policy, Remove policy, Create project, Delete project, Delete files, Rename project, Clean branch, Create branch, Delete branch, Save branch, Delete file, Move file, Import project, Publish to Exchange, Publish to API Platform, Add dependencies, Remove dependencies, Change dependencies, Reload dependencies, Merge Branch, Share project, Sync with Data Repository, Unsync with Data Repository, Modify organization settings, Rename branch, Modify project settings.

105. API Metadata: Create an API instance, Delete an API instance, Update an API instance.

106. Application Data: Create application, Delete application, Reset client secret, Request access, Request tier change, Request tier change approval, Approve application, Revoke application, Restore application, Create Mocking Service link, Delete Mocking Service link, Create/modify/delete Object store, Upload file, Delete file, Update file.

107. Private Portals audit log events: Create portal, Modify portal association, Delete portal, Add portal page, Make portal page visible, Delete portal page, Edit portal page, Hide portal page, Set portal theme, Modify portal theme, Modify portal security, Create a page, Update a page, Delete a page, Publish a portal.

108. Public Portals audit log events: Update a domain, Delete a domain, Create a page, Delete a page, Update a page, Create a portal, Publish a portal, Delete a portal, Update a portal.

109. Identity Management audit log events: Create identity provider configuration, Edit identity provider configuration, Delete identity provider configuration, Warning, Create identity management key, Set primary identity management key, Delete identity management key.

110. Connected App audit log events: Create Connected Application, Edit Connected Application, Delete Connected Application, Update Scope Assignments, Application Authorization Approved, Application Authorization Denied, Token Retrieval Success, Token

Retrieval Failed, Revoke Access/Refresh Tokens.

111. Team audit log events: Create Team, Update Team, Move Team, Add Members, Remove Members, Add Permissions, Remove Permissions, Edit External Group Mappings, Delete Team.

112. ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Standard routine uses 1. through 9. apply. In addition:

a. To appropriate agencies, entities, and persons when (1) the Postal Service

suspects or has confirmed that there has been a breach of the system of records; (2) the Postal Service has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the Postal Service (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the Postal Service's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

RECORD SOURCE CATEGORIES:

Employees; contractors; customers.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Automated database, computer storage media, and paper.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records relating to system administration are retrievable by user ID.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records relating to system administration are retained for twenty-four months.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Paper records, computers, and computer storage media are located in controlled-access areas under supervision of program personnel. Computer access is limited to authorized personnel with a current security clearance, and physical access is limited to authorized personnel who must be identified with a badge.

Access to records is limited to individuals whose official duties require such access. Contractors and licensees are subject to contract controls and unannounced on-site audits and inspections.

Computers are protected by encryption, mechanical locks, card key systems, or other physical access control methods. The use of computer systems is regulated with installed security software, computer logon identifications, and operating system controls including access controls, terminal and transaction logging, and file management software.

RECORD ACCESS PROCEDURES:

Requests for access must be made in accordance with the Notification Procedure above and USPS Privacy Act regulations regarding access to records and verification of identity under 39 CFR 266.5.

CONTESTING RECORD PROCEDURES:

See Notification Procedure and Record Access Procedures above.

NOTIFICATION PROCEDURES:

Customers wanting to know if other information about them is maintained in this system of records must address inquiries in writing to the Chief Information Officer and Executive Vice President and include their name and address.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

POSTAL SERVICE

Change in Classes of General Applicability for Competitive Products

AGENCY: Postal Service™.

ACTION: Notice of a change in classes of general applicability for competitive products.

SUMMARY: This notice sets forth changes in classes of general applicability for competitive products.

DATES: *Applicable date:* July 14, 2024.

FOR FURTHER INFORMATION CONTACT: Christopher C. Meyerson, 202–268–7820.

SUPPLEMENTARY INFORMATION: On February 8, 2024, pursuant to their authority under 39 U.S.C. 3632 and 3642, the Governors of the Postal Service established classification changes for rate categories for vendor-assisted electronic money transfer, which are within the International Money Transfer Service—Outbound product found at Mail Classification Schedule section 2620.3. The Governors' Decision and the record of proceedings in connection with such decision are reprinted below in accordance with section 3632(b)(2).

Sarah Sullivan,

Attorney, Ethics and Legal Compliance.

Decision of the Governors of the United States Postal Service on Mail Classification Schedule Changes Concerning International Money Transfer Service—Outbound and International Money Transfer Service—Inbound (Governors' Decision No. 24–2)

February 8, 2024

Statement of Explanation and Justification

Pursuant to our authority under section 404(b) and Chapter 36 of title 39, United States Code, the Governors establish classification changes to the International Money Transfer Service (IMTS)—Outbound product and the IMTS—Inbound product, to occur in three phases.

As for the first phase, the IMTS—Outbound product includes an Electronic Money Transfer service that enables customers to make payments or transfer funds to individuals or firms in foreign destinations. Electronic money transfers are available through the Sure Money (DineroSeguro) service, which is based on an agreement with a financial services company. During the last few years there have been significant declines in the number of electronic money transfers purchased from the Postal Service, and despite substantial historical price increases, the Sure Money (DineroSeguro) service has not covered its costs. Thus, the Postal Service intends to terminate the Sure Money (DineroSeguro) service by removing the prices and price categories in Mail Classification Schedule section 2620 that concerns IMTS—Outbound.

As for the second and third phases, IMTS—Outbound enables customers to make payments or transfer funds to individuals or firms in foreign destinations. This product includes hardcopy international postal money orders, which may be offered in cooperation with foreign postal operators. IMTS—Inbound provides a service to foreign postal operators for cashing of hard copy international postal money orders sent to recipients in the United States. During the last few years there have been significant declines in the number of international postal money orders sold and cashed by the Postal Service, and despite substantial historical price increases, the international postal money order service has not covered its costs.

Currently, both the outbound and inbound international postal money

order services are based on underlying bilateral agreements executed with various foreign postal operators. During the last few years, there have been significant declines in the number of international postal money orders purchased. Thus, the Postal Service intends to terminate both the outbound and inbound international postal money order services, first by terminating the sales of international postal money orders and removing the text concerning the IMTS—Outbound product from the Mail Classification Schedule, and then by terminating the cashing of international postal money orders and removing the text concerning the IMTS—Inbound product from the Mail Classification Schedule.

We have evaluated the classification changes to IMTS—Outbound and IMTS—Inbound in this context in accordance with 39 U.S.C. 3632 and § 3642. We approve the changes, finding that they are appropriate, and are consistent with the applicable criteria.

Order

We direct management to coordinate with the U.S. Department to State concerning the termination of the underlying bilateral agreements in order to determine the consistency of this action with the Universal Postal Union Postal Payment Services Agreement, and to file with the Postal Regulatory Commission the required documents and supporting documents consistent with this Decision. The changes in classification to the Mail Classification Schedule set forth herein shall be implemented in the following three phases,

- The removal of prices for Sure Money (DineroSeguro) for IMTS—Outbound from the Mail Classification Schedule, effective July 14, 2024, or as soon as practicable thereafter (Phase I),
- The removal of the IMTS—Outbound product from the Mail Classification Schedule, effective October 1, 2024, or as soon as practicable thereafter (Phase II),
- The removal of the IMTS—Inbound product from the Mail Classification Schedule, effective October 1, 2025, or as soon as practicable thereafter (Phase III).

By The Governors:

/s/

Roman Martinez IV,
Chairman, Board of Governors.

United States Postal Service Offie of the Board of Governors

Certification of Governors' Vote on Governors' Decision No. 24–2

Consistent with 39 U.S.C. 3632(a), I hereby certify that, on February 8, 2024, the Governors voted on adopting Governors' Decision No. 24–2, and that a majority of the Governors then holding office voted in favor of that Decision.

/s/

February 8, 2024
Michael J. Elston,
Secretary of the Board of Governors.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99937; File No. SR–CBOE–2024–017]

Self-Regulatory Organizations; Cboe Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Fees for the Cboe Silexx Platform

April 10, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on April 1, 2024, Cboe Exchange, Inc. (the ''Exchange'' or ''Cboe Options'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1).
[2] 17 CFR 240.19b–4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe Exchange, Inc. (the ''Exchange'' or ''Cboe Options'') proposes to amend fees for the Cboe Silexx platform. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (*http://www.cboe.com/AboutCBOE/CBOELegalRegulatoryHome.aspx*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend fees for the Cboe Silexx platform (''Silexx platform''),[3] effective April 1, 2024.

By way of background, the Silexx platform consists of a ''front-end'' order entry and management trading platform (also referred to as the ''Silexx terminal'') for listed stocks and options that supports both simple and complex orders, and a ''back-end'' platform which provides a connection to the infrastructure network. From the Silexx platform (*i.e.,* the collective front-end and back-end platform), a Silexx user has the capability to send option orders to U.S. options exchanges, send stock orders to U.S. stock exchanges (and other trading centers), input parameters to control the size, timing, and other variables of their trades, and also includes access to real-time options and stock market data, as well as access to certain historical data. The Silexx platform is designed so that a user may enter orders into the platform to send to an executing broker (including Trading Permit Holders (''TPHs'')) of its choice with connectivity to the platform, which broker will then send the orders to Cboe Options (if the broker is a TPH) or other U.S. exchanges (and trading centers) in accordance with the user's instructions. The Silexx front-end and back-end platforms are a software application that is installed locally on a user's desktop. Silexx grants users licenses to use the platform, and a firm or individual does not need to be a TPH to license the platform.

The Exchange offers several versions of its Silexx platform. Originally, the Exchange offered the following versions of the Silexx platform: Basic, Pro, Sell-Side, Pro Plus Risk and Buy-Side Manager (''Legacy Platforms''). The Legacy Platforms are designed so that a User may enter orders into the platform to send to the executing broker, including TPHs, of its choice with connectivity to the platform. The executing broker can then send orders to Cboe Options (if the broker-dealer is a TPH) or other U.S. exchanges (and trading centers) in accordance with the User's instructions. Users cannot directly route orders through any of the Legacy Platforms to an exchange or trading center nor is the platform integrated into or directly connected to Cboe Options' System. In 2019, the Exchange made available a new version of the Silexx platform, Silexx FLEX, which supports the trading of FLEX Options and allows authorized Users with direct access to the Exchange to establish connectivity and submit orders directly to the Exchange.[4] In 2020, the Exchange made an additional version of the Silexx platform available, Cboe Silexx, which supports the trading of non-FLEX Options and allows authorized Users with direct access to the Exchange to establish connectivity and submit orders directly to the Exchange.[5] Cboe Silexx is essentially the same platform as Silexx FLEX, with the same applicable functionality, except that it additionally supports non-FLEX trading. Use of the Silexx platform is completely optional.

The Exchange has adopted fees for additional functionality that users may purchase in connection with their use of the Silexx platform. The Exchange offers each type of additional functionality as a convenience and use of each type of additional functionality is discretionary and not compulsory. For example, for the Legacy platforms, the Exchange assesses a fee for use of the ''Staged Orders, Drop Copies, and Order Routing Functionality for FIX Connections (sessions) Using Third-Party FIX Router'' feature. This functionality provides firms with the ability to receive staged orders, receive ''drop copies'' of order fill messages, and route orders to executing brokers through a third-party FIX router.

By way of background, Financial Information eXchange (''FIX'') is an industry-standard, non-proprietary API that permits market participants to connect to exchanges. FIX connectivity provides users with the ability to receive ''drop copy'' order fill messages from their executing brokers. These fill messages allow customers to update positions, risk calculations, and streamline back-office functions. Additionally, FIX connections can be updated to permit the platform to receive orders sent from another system and then route these orders through the platform for execution (staged orders) as well as provide users with the ability to route orders in various ways to executing brokers (such as designation of a market to which the broker is to route an order received from the platform and use of a broker's ''smart router'' functionality). Some users have connections to third-party FIX routers, who currently normalize the format of messages of their client. To the extent a FIX router has a connection to the Silexx platform, users that also have connections to these routers may elect to receive staged orders, drop copies, and order routing functionality through a FIX router. Additionally, the Silexx platform permits users to elect to receive daily transmission of equity order reports related to order users submit through the platform.

As noted above, for the Legacy Platforms, the Exchange assesses a fee for use of the ''Staged Orders, Drop Copies, and Order Routing Functionality for FIX Connections (sessions) Using Third-Party FIX Router'' feature. Currently, the Exchange assesses a fee of $500 per month per FIX connection, and such fee is waived for FLEX and Cboe Silexx. Similarly, the Exchange assesses a fee for orders routed via FIX into Cboe Silexx,

[3] Cboe Silexx, Inc. (''Cboe Silexx''), which is a subsidiary of the Exchange's parent, Cboe Global Markets, Inc., offers the Silexx platform.

[4] *See* Securities Exchange Act Release No. 87028 (September 19, 2019) 84 FR 50529 (September 25, 2019) (SR–CBOE–2019–061). Only Users authorized for direct access and who are approved to trade FLEX Options may trade FLEX Options via Cboe Silexx. Only authorized Users and associated persons of Users may establish connectivity to and directly access the Exchange, pursuant to Rule 5.5 and the Exchange's technical specifications.

[5] *See* Securities Exchange Act Release No. 88741 (April 24, 2020) 85 FR 24045 (April 30, 2020) (SR–CBOE–2020–040). Only authorized Users and associated persons of Users may establish connectivity to and directly access the Exchange, pursuant to Rule 5.5 and the Exchange's technical specifications.

applicable to each TPH broker to whom a TPH customer using a non-Cboe Silexx workstation sends orders electronically to a TPH broker's Silexx workstation. The fee is $500 per month for each TPH broker with a Silexx workstation to which the TPH customer sends orders.

The Exchange now proposes to adopt an additional order routing fee for Cboe Silexx, effective April 1, 2024. Particularly, the Exchange proposes to adopt a ''FIX order routing out of Cboe Silexx'' fee which would be payable by each receiving trading firms (such as an executing broker) that maintains a FIX router connected to the Silexx platform to receive orders electronically from a Silexx workstation, The proposed fee is $500 per month per receiving trading firm, regardless of how many Silexx workstations it connects to.

The proposed fee is substantially similar to the ''FIX order routing into Cboe Silexx'' fee, which assesses $500 per month for each receiving Trading Permit Holder that uses a non-Silexx workstation to send orders electronically into (as compared to out of) a TPH broker's Cboe Silexx workstation to which the TPH customer sends orders. Additionally, the Silexx Fees Schedule also currently provides for a ''Staged Orders, Drop Copies, and Order Routing Functionality for FIX Connections (sessions) Using Third-Party FIX Router'' fee set forth in the Silexx Fees Schedule, which is applicable to Legacy Platforms and currently waived for FLEX and Cboe Silexx. As noted above, Silexx users that have connections to these third-party FIX routers may elect to receive staged orders, drop copies, and order routing functionality through the FIX route. Establishing the monthly fee for the Cboe Silexx platform will allow for Cboe Silexx's recoupment of the costs of maintaining and supporting FIX order routing out of Cboe Silexx to third-party entities.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[6] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[7] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[8] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. Additionally, the Exchange also believes the proposed rule change is consistent with Section 6(b)(4) of the Act, which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Trading Permit Holders and other persons using its facilities.

In particular, the Exchange believes the proposed monthly fee for FIX order routing out of Cboe Silexx is reasonable, equitable, and not unfairly discriminatory because the fee will apply uniformly to all receiving trading firms that elect to establish and maintain a FIX router connection to the Cboe Silexx platform. The Exchange notes that each additional type of Silexx functionality, including FIX order routing out of Cboe Silexx, are available to all market participants, and users have discretion to determine which, if any, types of functionality to purchase. The Exchange believes the monthly fee for FIX order routing out of Cboe Silexx functionality, as proposed, is reasonable, as the fee is the same as an analogous fee currently charged for similar functionality on the Legacy Platforms, and as well as for Cboe Silexx as it relates to FIX order routing into Cboe Silexx functionality. Additionally, the Exchange believes the proposed fee is reasonable as it accounts for administrative costs that Cboe Silexx is incurring, but not charging users, to maintain support for these third-party FIX routers.

Finally, the Exchange notes that use of the platform is discretionary and not compulsory, as users can choose to route orders, including to Cboe Options, without the use of the platform. The Exchange makes the platform available as a convenience to market participants, who will continue to have the option to use any order entry and management system available in the marketplace to send orders to the Exchange and other exchanges; the platform is merely an alternative offered by the Exchange.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed change will not impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because the proposed rule change will apply to similarly situated participants uniformly, as described in detail above. The Exchange notes that each additional type of Silexx functionality is available to all market participants, and users have discretion to determine which, if any, types of functionality to purchase.

The Exchange does not believe that the proposed rule changes will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because the proposed change applies only to Cboe Options. Additionally, Cboe Silexx is similar to types of products that are widely available throughout the industry, including from some exchanges, at similar prices. To the extent that the proposed changes make Cboe Options a more attractive marketplace for market participants at other exchanges, such market participants are welcome to become Cboe Options market participants. Further, the proposed rule change relates to an optional platform. As discussed, the use of the platform continues to be completely voluntary and market participants will continue to have the flexibility to use any entry and management tool that is proprietary or from third-party vendors, and/or market participants may choose any executing brokers to enter their orders. The Cboe Silexx platform is not an exclusive means of trading, and if market participants believe that other products, vendors, front-end builds, etc. available in the marketplace are more beneficial than Cboe Silexx, they may simply use those products instead, including for routing orders to the Exchange (indirectly or directly if they are authorized Users). Use of the functionality is completely voluntary.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

[6] 15 U.S.C. 78f(b).

[7] 15 U.S.C. 78f(b)(5).

[8] *Id.*

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [9] and paragraph (f) of Rule 19b–4 [10] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–CBOE–2024–017 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–CBOE–2024–017. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–CBOE–2024–017 and should be submitted on or before May 7, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[11]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99934; File No. SR–MEMX–2024–12]

Self-Regulatory Organizations; MEMX LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Exchange's Fee Schedule

April 10, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that, on March 28, 2024, MEMX LLC (''MEMX'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing with the Commission a proposed rule change to amend the Exchange's fee schedule applicable to Members [3] (the ''Fee Schedule'') pursuant to Exchange Rules 15.1(a) and (c). The Exchange proposes to implement the changes to the Fee Schedule pursuant to this proposal on April 1, 2024. The text of the proposed rule change is provided in Exhibit 5.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend the Fee Schedule to: (i) modify the Liquidity Provision Tiers by modifying the required criteria under Liquidity Provision Tier 1 and modifying the required criteria under Liquidity Provision Tier 2; (ii) modify NBBO Setter Tier 1 by modifying the required criteria under such tier; (iii) modify the Tape B Volume Tier 1 by increasing the rebate provided and modifying the required criteria under such tier; (iv) modify the Cross Asset Tiers by adopting new Cross Asset Tiers 1 and 2 and re-numbering the existing Cross Asset Tier 1 to Cross Asset Tier 3; (v) modify the Displayed Liquidity Incentive (''DLI'') Additive Rebate Tier 1 by reducing the rebate provided and modifying the required criteria under such tier; and (vi) adopt a new Display Price-Sliding Tier, each as further described below.

The Exchange first notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient. More specifically, the Exchange is only one of 16 registered equities exchanges, as well as a number of alternative trading systems and other off-exchange venues, to which market participants may direct their order flow. Based on publicly available information, no single registered equities exchange currently has more than approximately 16% of the total market share of executed

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Exchange Rule 1.5(p).

volume of equities trading.[4] Thus, in such a low-concentrated and highly competitive market, no single equities exchange possesses significant pricing power in the execution of order flow, and the Exchange currently represents approximately 2.5% of the overall market share.[5] The Exchange in particular operates a ''Maker-Taker'' model whereby it provides rebates to Members that add liquidity to the Exchange and charges fees to Members that remove liquidity from the Exchange. The Fee Schedule sets forth the standard rebates and fees applied per share for orders that add and remove liquidity, respectively. Additionally, in response to the competitive environment, the Exchange also offers tiered pricing, which provides Members with opportunities to qualify for higher rebates or lower fees where certain volume criteria and thresholds are met. Tiered pricing provides an incremental incentive for Members to strive for higher tier levels, which provides increasingly higher benefits or discounts for satisfying increasingly more stringent criteria.

Liquidity Provision Tiers

The Exchange currently provides a base rebate of $0.0015 per share for executions of Added Displayed Volume.[6] The Exchange also currently offers Liquidity Provision Tiers 1–5 under which a Member may receive an enhanced rebate for executions of Added Displayed Volume by achieving the corresponding required volume criteria for each such tier. The Exchange now proposes to modify the Liquidity Provision Tiers by modifying the required criteria under Liquidity Provision Tier 1 and modifying the required criteria under Liquidity Provision Tier 2, as further described below.

First, with respect to Liquidity Provision Tier 1, the Exchange currently provides an enhanced rebate of $0.0033 per share for executions of Added Displayed Volume for Members that qualify for such tier by achieving: (1) an ADAV[7] (excluding Retail Orders) that is equal to or greater than 0.45% of the TCV; or (2) a Step-Up ADAV[8] (excluding Retail Orders) of the TCV from September 2023 that is equal to or greater than 0.05%, an ADV[9] that is equal to or greater than 0.50% of the TCV, and a Non-Displayed ADAV[10] that is equal to or greater than 5,000,000 shares; or (3) an ADAV that is equal to or greater than 0.30% of the TCV and a Non-Displayed ADAV that is equal to or greater than 7,000,000 shares.[11] The Fee Schedule indicates that criteria (2) of Liquidity Provision Tier 1 will expire no later than March 31, 2024. Now, given the expiration of criteria (2) of Liquidity Provision Tier 1, it is necessary to modify the Fee Schedule to delete this criteria (2) as well as the footnote under the Liquidity Provision Tiers pricing table that indicates its expiration, as both are no longer applicable and otherwise obsolete. As such, the Exchange now proposes to modify the required criteria under Liquidity Provision Tier 1 such that a Member would qualify for such tier by achieving: (1) an ADAV (excluding Retail Orders) that is equal to or greater than 0.45% of the TCV; or (2) an ADAV that is equal to or greater than 0.30% of the TCV and a Non-Displayed ADAV that is equal to or greater than 7,000,000 shares. Thus, such proposed change would keep criteria (1) intact, delete existing criteria (2) (based on a Step-Up ADAV from September 2023 threshold) and the corresponding footnote, and re-number existing criteria (3) as the new criteria (2). The Exchange is not proposing to change the rebate provided under such tier.

With respect to Liquidity Provision Tier 2, the Exchange currently provides an enhanced rebate of $0.0032 per share for executions of Added Displayed Volume for members that qualify for such tier by achieving: (1) an ADAV that is equal to or greater than 0.25% of the TCV and a Non-Displayed ADAV that is equal to or greater than 4,000,000 shares; or (2) a Step-Up Displayed ADAV of the TCV from September 2023 that is equal to or greater than 0.10% and a Displayed ADAV (excluding Retail Orders) that is equal to or greater than 0.20% of the TCV.[12] The Fee Schedule indicates that criteria (2) of Liquidity Provision Tier 2 will expire no later than March 31, 2024. Now, given the expiration of criteria (2) of Liquidity Provision Tier 2, it is necessary to modify the Fee Schedule to delete this criteria (2) as well as the footnote under the Liquidity Provision Tiers pricing table that indicates its expiration, as both are no longer applicable and otherwise obsolete. As such, the Exchange now proposes to modify the required criteria under Liquidity Provision Tier 2 such that a Member would qualify for such tier by achieving: (1) an ADAV that is equal to or greater than 0.25% of the TCV and a Non-Displayed ADAV that is equal to or greater than 4,000,000 shares; or (2) an ADAV that is equal to or greater than 0.35% of the TCV. Thus, such proposed change would keep the existing criteria (1) intact with no changes, delete existing criteria (2) (based on a Step-Up Displayed ADAV from September 2023 threshold) and the corresponding footnote, and replace it with a new criteria (2) that consists of an ADAV threshold. The Exchange is not proposing to change the rebate provided under such tier.

The Exchange believes that the tiered pricing structure for executions of Added Displayed Volume under the Liquidity Provision Tiers provides an incremental incentive for Members to strive for higher volume thresholds to receive higher enhanced rebates for such executions and, as such, is intended to encourage Members to maintain or increase their order flow, primarily in the form of liquidity-adding volume, to the Exchange, thereby contributing to a deeper and more liquid market to the benefit of all Members and market participants. The Exchange believes that the Liquidity Provision Tiers, as modified by the proposed changes described above, reflect a reasonable and competitive pricing structure that is right-sized and consistent with the Exchange's overall pricing philosophy of encouraging added and/or displayed liquidity. Specifically, the Exchange believes that, after giving effect to the proposed

[4] Market share percentage calculated as of March 28, 2024. The Exchange receives and processes data made available through consolidated data feeds (*i.e.,* CTS and UTDF).

[5] *Id.*

[6] The base rebate for executions of Added Displayed Volume is referred to by the Exchange on the Fee Schedule under the existing description ''Added displayed volume'' with a Fee Code of ''B'', ''D'' or ''J'', as applicable, on execution reports.

[7] As set forth on the Fee Schedule, ''ADAV'' means the average daily added volume calculated as the number of shares added per day, which is calculated on a monthly basis, and ''Displayed ADAV'' means ADAV with respect to displayed orders.

[8] As set forth on the Fee Schedule, ''Step-Up ADAV'' means ADAV in the relevant baseline month subtracted from current ADAV.

[9] As set forth on the Fee Schedule, ''ADV'' means average daily volume calculated as the number of shares added or removed, combined, per day. ADV is calculated on a monthly basis.

[10] As set forth on the Fee Schedule, ''Non-Displayed ADAV'' means ADAV with respect to non-displayed orders (including orders subject to Display-Price Sliding that receive price improvement when executed and Midpoint Peg orders).

[11] The pricing for Liquidity Provision Tier 1 is referred to by the Exchange on the Fee Schedule under the existing description ''Added displayed volume, Liquidity Provision Tier 1'' with a Fee Code of ''B1'', ''D1'' or ''J1'', as applicable, to be provided by the Exchange on the monthly invoices provided to Members.

[12] The proposed pricing for Liquidity Provision Tier 2 is referred to by the Exchange on the Fee Schedule under the existing description ''Added displayed volume, Liquidity Provision Tier 2'' with a Fee Code of ''B2'', ''D2'' or ''J2'', as applicable, to be provided by the Exchange on the monthly invoices provided to Members.

changes described above, the rebate for executions of Added Displayed Volume provided under each of the Liquidity Provision Tiers remains commensurate with the corresponding required criteria under each such tier and is reasonably related to the market quality benefits that each such tier is designed to achieve.

NBBO Setter Tier

The Exchange currently offers NBBO Setter Tier 1 under which a Member may receive an additive rebate of $0.0002 per share for a qualifying Member's executions of Added Displayed Volume (other than Retail Orders) that establish the NBBO and have a Fee Code B [13] (such orders, ''Setter Volume''), and an additive rebate of $0.0001 per share for executions of Added Displayed Volume (other than Retail Orders) that do not establish the NBBO (*i.e.,* Fee Codes D and J) [14] by achieving: (1) an ADAV with respect to orders with Fee Code B that is equal to or greater than 0.10% of the TCV; or (2) an ADAV with respect to orders with Fee Code B that is equal to or greater than 0.05% of the TCV and a Step-Up ADAV with respect to orders with a Fee Code B that is equal to or greater than 75% of the Member's December 2023 ADAV with respect to orders with a Fee Code B. Now, the Exchange proposes to modify the required criteria under NBBO Setter Tier 1 such that a Member would now qualify for such tier by achieving: (1) an ADAV with respect to orders with Fee Code B that is equal to or greater than 0.10% of the TCV; or (2) an ADAV with respect to orders with Fee Code B that is equal to or greater than 0.05% of the TCV or 5,000,000 shares and a Step-Up ADAV with respect to orders with a Fee Code B that is equal to or greater than 75% of the Member's March 2024 ADAV with respect to orders with a Fee Code B. Thus, such proposed change keeps the first alternative criteria intact with no changes but modifies the second alternative criteria by adding an alternative 5,000,000 share ADAV threshold and referencing a more recent baseline month in the Step-Up portion of the criteria. Given the more recent baseline month, the Exchange also proposes that criteria (2) of NBBO Setter Tier 1 will expire no later than September 30, 2024. As such, the Exchange proposes to indicate this in the existing note under the NBBO Setter Tier pricing table on the Fee Schedule, by deleting the existing expiration of July 31, 2024, and replacing it with the new expiration date of September 30, 2024.

The Exchange believes that the proposed modified alternative criteria provides an incremental incentive for Members to strive for higher ADAV on the Exchange to receive the additive rebate for qualifying executions of Added Displayed Volume under such tier, and thus, it is designed to encourage Members that do not currently qualify for such tier to increase their overall orders that add liquidity to the Exchange. The Exchange believes that the tier, as proposed, would further incentivize increased order flow to the Exchange, thereby contributing to a deeper and more liquid market to the benefit of all Members. The Exchange is not proposing to change the amount of the additive rebates provided under such tier.

Tape B Volume Tier

The Exchange currently offers Tape B Volume Tier 1 under which qualifying Members may receive an additive rebate of $0.0001 per share for executions of Added Displayed Volume (excluding Retail Orders) in Tape B Securities (such orders, ''Tape B Volume'') by achieving: (1) a Step-Up Tape B ADAV [15] of the Tape B TCV from October 2023 that is equal to or greater than 0.10% (excluding Retail Orders); and (2) a Tape B ADAV that is equal to or greater than 0.25% of the Tape B TCV (excluding Retail Orders). The $0.0001 per share additive rebate is provided in addition to the rebate that is otherwise applicable to each of a qualifying Members' orders that constitutes Tape B Volume (including a rebate provided under another pricing tier/incentive).[16] Now, the Exchange proposes to increase the additive rebate provided for executions of Tape B Volume to $0.0002 per share, and to modify the required criteria such that a Member would now qualify for such tier by achieving a Tape B ADAV that is equal to or greater than 0.30% of the Tape B TCV (excluding Retail Orders). Accordingly, the new criteria eliminates the Step-Up Tape B ADAV requirement and increases the Tape B ADAV of the Tape B TCV requirement from 0.25% to 0.30%. In light of the removal of the Step-Up Tape B ADAV requirement, the Exchange also proposes to delete the language under the Tape B Volume Tier pricing table on the Fee Schedule that indicates Tape B Volume Tier 1 will expire no later than April 30, 2024.

The purpose of modifying the required criteria and increasing the additive rebate provided for executions of Tape B Volume is for business and competitive reasons, as the Exchange believes that such changes would incentivize Members to submit additional order flow in Tape B Securities, thereby promoting price discovery and market quality on the Exchange.

Cross Asset Tiers

The Exchange currently offers Cross Asset Tier 1 under which a Member may receive an enhanced rebate for executions of Added Displayed Volume in securities priced at or above $1.00 per share by achieving the corresponding required volume criteria for such tier on the Exchange's equity options platform, MEMX Options. The Exchange now proposes to renumber the existing Cross Asset Tier 1 as Cross Asset Tier 3, and adopt new Cross Asset Tiers 1 and 2, each as described below.

First, the Exchange proposes to adopt Cross Asset Tier 1 under which the Exchange would provide an enhanced rebate of $0.0033 per share for executions of Added Displayed Volume for Members that qualify for such tier by achieving an Options ADAV [17] in the Market Maker [18] capacity that is equal to or greater than 250,000 contracts on MEMX Options and an ADAV on MEMX Equities that is equal to or greater than 0.30% of the TCV. The Exchange proposes to provide Members that qualify for Cross Asset Tier 1 a rebate of 0.075% of the total dollar volume of the transaction for executions of orders in securities priced below $1.00 per share that add displayed liquidity to the Exchange, which is the

[13] The Exchange notes that orders with Fee Code B include orders, other than Retail Orders, that establish the NBBO.

[14] The Exchange notes that orders with Fee Code J include orders, other than Retail Orders, that establish a new BBO on the Exchange that matches the NBBO first established on an away market. Orders with Fee Code D include orders that add displayed liquidity to the Exchange but that are not Fee Code B or J, and thus, orders with Fee Code B, D or J include all orders, other than Retail Orders, that add displayed liquidity to the Exchange.

[15] As set forth in the Fee Schedule, ''Step-Up Tape B ADAV'' means the ADAV in Tape B securities as a percentage of the TCV in the relevant baseline month subtracted from the current ADAV in Tape B securities as a percentage of the TCV.

[16] The pricing for the Tape B Volume Tier is referred to by the Exchange on the Fee Schedule under the description ''Tape B Volume Tier'' with a Fee Code of ''b'' to be appended to the otherwise applicable Fee Code assigned by the Exchange on the monthly invoices for qualifying executions.

[17] As set forth on the Fee Schedule, a Member's ''Options ADAV'' for purposes of equities pricing means the average daily added volume calculated as a number of contracts added on MEMX Options per day by the Member, which is calculated on a monthly basis.

[18] As set forth on the MEMX Options Fee Schedule, ''Market Maker'' applies to any order for the account of a registered Market Maker. ''Market Maker'' shall have the meaning set forth in Rule 16.1 of the MEMX Rulebook.

same rebate that is applicable to the majority of executions on the Exchange for all Members (*i.e.,* including those that do not qualify for any tier).

The Exchange further proposes to adopt Cross Asset Tier 2 under which the Exchange would provide an enhanced rebate of $0.0027 per share for executions of Added Displayed Volume for Members that qualify for such tier by achieving an Options ADAV in the Market Maker capacity that is equal to or greater than 150,000 contracts on MEMX Options. The Exchange proposes to provide Members that qualify for Cross Asset Tier 2 a rebate of 0.075% of the total dollar volume of the transaction for executions of orders in securities priced below $1.00 per share that add displayed liquidity to the Exchange, which is the same rebate that is applicable to the majority of executions on the Exchange for all Members (*i.e.,* including those that do not qualify for any tier).

Lastly, given the adoption of the aforementioned tiers, the Exchange proposes to renumber the current Cross Asset Tier 1 as Cross Asset Tier 3. The Exchange is not proposing to modify the rebate provided nor the criteria required under this re-numbered tier, however, the adoption of the new Cross Asset Tiers 1 and 2 as well as the re-numbering requires certain modifications to the notes below the Cross Asset Tier pricing table on the Fee Schedule. Specifically, the Exchange is proposing to add a note stating that the definition of Market Maker is set forth in the MEMX Options Fee Schedule, to renumber the existing notes, and to replace prior references in the notes to Cross Asset Tier 1 with Cross Asset Tier 3.

The proposed new Cross Asset Tier 1 and Cross Asset Tier 2 are designed to encourage Members to maintain or increase their order flow to the MEMX Options Exchange in the Market Maker capacity in order to qualify for the proposed enhanced rebate for executions of Added Displayed Volume. The Exchange believes that the addition of the new Cross Asset Tier 1 and Cross Asset Tier 2 would encourage the submission of additional order flow in the Market Maker capacity on MEMX Options, thereby contributing to a deeper and more robust and well-balanced market ecosystem on the Exchange to the benefit of all Members and market participants. As a result of achieving a higher rebate for activity on MEMX Options, and given the equities component of Cross Asset Tier 1, the Exchange further believes that the proposed tiers will encourage greater participation on MEMX Equities by qualifying participants, thereby contributing to a deeper and more robust and well-balanced market ecosystem on the Exchange to the benefit of all Members and market participants.

DLI Additive Rebate

The Exchange currently offers the DLI Additive Rebate Tier 1 under which a Member may receive an additive rebate for a qualifying Member's executions of Added Displayed Volume (other than Retail Orders) that otherwise qualify for the applicable rebate under Liquidity Provision Tier 1 or Liquidity Provision Tier 2 as well as the applicable criteria under DLI Tier 1.[19] The Exchange now proposes to modify the DLI Additive Rebate Tier 1 by decreasing the additive rebate provided and updating the required applicable criteria under Liquidity Provision Tiers 1 and 2 in accordance with this proposal, as further described below.

As noted above, under DLI Additive Rebate Tier 1, the Exchange currently provides an additive rebate of $0.0001 per share for executions of Added Displayed Volume that first meet the criteria under DLI Tier 1, which include achieving: (1) an NBBO time of at least 25% in an average of at least 1,000 securities per trading day during the month; and (2) an ADAV that is equal to or greater than 0.10% of the TCV,[20] as well as the applicable criteria under Liquidity Provision Tier 1 or Liquidity Provision Tier 2. Under Liquidity Provision Tier 1, the Exchange is now proposing (as described above) Members will received the enhanced rebate by achieving: (1) an ADAV (excluding Retail Orders) that is equal to or greater than 0.45% of the TCV; or (2) an ADAV that is equal to or greater than 0.30% of the TCV and a Non-Displayed ADAV that is equal to or greater than 7,000,000 shares. Thus, the Exchange proposes to modify the criteria for the DLI Additive Rebate to correspond to the modifications to Liquidity Provision Tier 1 criteria described above. Under Liquidity Provision Tier 2, the Exchange is now proposing (as described above) that Members will receive the enhanced rebate by achieving: (1) an ADAV that is greater than or equal to 0.25% of the TCV and a Non-Displayed ADAV that is equal to or greater than 4,000,000 shares; or (2) an ADAV that is greater than or equal to 0.35% of the TCV. Thus, the Exchange proposes to modify the criteria for the DLI Additive Rebate to correspond to the modifications to Liquidity Provision Tier 2 criteria described above. Again, the Exchange notes that Members qualify for the DLI Additive rebate by achieving both the criteria under DLI Tier 1 and either Liquidity Provision Tier 1 or Liquidity Provision Tier 2.

Additionally, the Exchange proposes to reduce the additive rebate under the DLI Additive Rebate Tier 1 to $0.00005 per share. Other than the criteria changes noted above associated with the Exchange's proposed changes to the required criteria under Liquidity Provision Tiers 1 and 2, the Exchange does not propose to make any additional changes to the criteria required under the DLI Additive Rebate Tier 1. The purpose of reducing the additive rebate under the DLI Additive Rebate Tier 1, which the Exchange believes represents a modest reduction, is for business and competitive reasons, as the Exchange believes that such reduction would decrease the Exchange's expenditures with respect to its transaction pricing in a manner that is still consistent with the Exchange's philosophy of encouraging added displayed liquidity as well as consistently quoting at the NBBO on the Exchange.[21]

Display-Price Sliding Tier

Currently, the Exchange provides a base rebate of $0.0008 per share for executions of orders subject to Display-Price Sliding that add liquidity to the Exchange and receive price improvement over the order's ranked price when executed (such orders, ''Added Price-Improved Volume'') in securities priced at or above $1.00 per share.[22] Further, such orders are subject to the Exchange's Non-Display Add Tiers such that a Member that qualifies for a Non-Display Add Tier would receive the rebates provided under such tier that are applicable to executions of orders that add non-displayed liquidity to the Exchange with respect to its

[19] This pricing is referred to by the Exchange on the Fee Schedule under the existing description ''DLI Additive Rebate'' with a Fee Code of ''q'' to be appended to the otherwise applicable Fee Code for qualifying executions.

[20] The enhanced rebate provided under DLI Tier 1 is $0.0031 per share for executions of Added Displayed Volume.

[21] In light of the newly proposed Display-Price Sliding Tier set forth below, the Exchange also proposes to include Fee Code ''I'' as a possible fee code to which the DLI additive rebate may apply in the note under the DLI Additive Rebate pricing table in the Fee Schedule.

[22] The pricing for executions of Added Price-Improved Volume is referred to by the Exchange on the Fee Schedule under the existing description ''Added volume, order subject to Display-Price Sliding that receives price improvement when executed'' with a Fee Code of ''P'' to be provided by the Exchange on the monthly invoices provided to Members.

executions of Added Price-Improved Volume.[23]

As background regarding the mechanics of Added Price-Improved Volume, the Exchange notes that pursuant to the Exchange's Display-Price Sliding functionality, an order that would lock or cross a protected quotation is ranked on the Exchange's order book at the locking price and displayed at one minimum price variation less aggressive than the locking price. For bids, this means that a price slid order is displayed at one minimum price variation less than the current national best offer, and for offers, this means that a price slid order is displayed at one minimum price variation more than the current national best bid. Additionally, Exchange Rule 11.10(a)(4)(D) allows an order subject to the Display-Price Sliding process that is not executable at its most aggressive price to be executed at one-half minimum price variation less aggressive than the price at which it is ranked. Specifically, in the event an order submitted to the Exchange on the side opposite such a price slid order is a market order or a limit order priced more aggressively than an order displayed on the Exchange's order book (*i.e.,* the incoming order is priced more aggressive than the locking price), the Exchange will execute the incoming order at, in the case of an incoming sell order, one-half minimum price variation less than the price of the displayed order, and, in the case of an incoming buy order, at one-half minimum price variation more than the price of the displayed order.

Based on this functionality, orders executed as described above will receive price improvement over the price at which such orders are ranked. Because price slid orders subject to the order handling process described above will receive price improvement, the Exchange provides the base rebate noted above of $0.0008 per share.

Now, the Exchange proposes to adopt a volume-based tier, referred to by the Exchange as the Display-Price Sliding Tier, under which the Exchange will provide an enhanced rebate for executions of Added Price-Improved Volume for qualifying Members who meet a certain specified Added Price-Improved Volume threshold on the Exchange, as further described below.

Specifically, under Display-Price Sliding Tier 1, the Exchange is proposing that if a Member achieves an ADAV with respect to orders subject to Display-Price Sliding that receive price improvement when executed (*i.e.* Added Price-Improved Volume) (excluding Retail Orders) that is equal to or greater than 5,000,000 shares, the Exchange will provide a rebate for those Added Price-Improved Volume executions equaling the highest possible rebate otherwise achieved for that Member for its Added Displayed Volume during that month. In order to ascertain the applicable rebate, at the end of each month, if a Member's Added Price-Improved Volume ADAV equals or exceeds 5,000,000 shares, the applicable executions (which are currently assigned a Fee Code of ''P'') will be assigned the Fee Code ''I'', and the Exchange will provide that Member's highest Added Displayed Volume[24] rebate for all of its transactions marked ''I'' during that month, plus any otherwise achieved additive rebates under the Tape B Volume Tier and DLI Additive Rebate Tier.[25] As an example, if Member A meets the criteria under the Display-Price Sliding Tier 1 for its Added Price-Improved Volume, and that Member also met the required criteria during that month under Liquidity Provision Tier 1, as well as the required criteria under the Tape B Volume Tier, the Exchange would provide a total enhanced rebate of $0.0035 per share (*i.e.* the $0.0033 rebate under Liquidity Provision Tier 1 plus the proposed $0.0002 additive rebate under the Tape B Volume Tier) for its total Added Price-Improved Volume executed during that month. In this same example, if Member A also achieved the required criteria under Cross Asset Tier 1 (which provides an enhanced rebate of $0.00026 per share), it would still receive $0.0035 per share for its Added-Price Improved Volume given that the under the proposed Display-Price Sliding Tier, the *highest* possible rebate otherwise achieved for the Member's Added Displayed Volume is awarded.

Along those same lines, as noted on the Fee Schedule, to the extent a Member qualifies or multiple fees/rebates with respect to a particular transaction, the lowest fee/highest rebate shall apply. Accordingly, in the event that the rebate a Member would be awarded for its Added-Price Improved Volume by meeting the criteria under the Non-Display Add Tiers exceeds the rebate it would be awarded by also meeting the criteria under the Display-Price Sliding Tier, the Exchange proposes that it will continue to mark those executions ''P'' and award the rebate earned under the Non-Display Add Tiers, if applicable.

The Exchange proposes to provide Members that qualify for Display-Price Sliding Tier 1 a rebate of 0.075% of the total dollar volume of the transaction for executions of orders in securities priced below $1.00 per share that add displayed liquidity to the Exchange, which is the same rebate that is applicable to the majority of executions on the Exchange for all Members (*i.e.,* including those that do not qualify for any tier).

The Exchange believes that the proposed Display-Price Sliding Tier provides an incremental incentive for Members to maintain or strive for higher ADAV on the Exchange in Added Price-Improved Volume in order to receive the enhanced rebate provided under the tier. The Exchange believes that this resulting additional displayed, liquidity-adding volume, would contribute to a more robust and well-balanced market ecosystem on the Exchange to the benefit of all Members and market participants and, in turn, enhance the attractiveness of the Exchange as a trading venue.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the provisions of Section 6 of the Act,[26] in general, and with Sections 6(b)(4) and 6(b)(5) of the Act,[27] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

As discussed above, the Exchange operates in a highly fragmented and competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient, and the Exchange represents only a small percentage of the overall market. The Commission and the courts have repeatedly expressed their preference for competition over

[23] Executions of Added Price-Improved Volume for Members that qualify for the Non-Display Add Tiers receive a Fee Code of ''P1'', ''P2'', ''P3'', or ''P4'', as applicable, for such executions on the monthly invoices provided to Members.

[24] Specifically, the possible rebates are those that the Exchange is proposing to identify in the Transaction Fees table on the Fee Schedule with the Fee Code ''I'' and include the base rebate for Added Displayed Volume, as well as the enhanced rebates under the Liquidity Provision Tiers, DLI Tiers, and Cross Asset Tiers.

[25] Given that the additive rebate under the NBBO Setter Tier is only applied towards executions of Added Displayed Volume with the Fee Codes B, D or J, the Exchange is not proposing that any Added Price-Improved Volume be awarded the NBBO Setter Tier Additive Rebate.

[26] 15 U.S.C. 78f.

[27] 15 U.S.C. 78f(b)(4) and (5).

regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and also recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [28]

The Exchange believes that the ever-shifting market share among the exchanges from month to month demonstrates that market participants can shift order flow or discontinue to reduce use of certain categories of products, in response to new or different pricing structures being introduced into the market. Accordingly, competitive forces constrain the Exchange's transaction fees and rebates, and market participants can readily trade on competing venues if they deem pricing levels at those other venues to be more favorable. The Exchange believes the proposal reflects a reasonable and competitive pricing structure designed to incentivize market participants to direct additional order flow, including displayed, liquidity-adding, aggressively priced orders to the Exchange, as well as to the Exchange's equity options platform, MEMX Options, which the Exchange believes would promote price discovery and enhance liquidity and market quality on the Exchange and on MEMX Options to the benefit of all Members and market participants.

The Exchange notes that volume-based incentives and discounts have been widely adopted by exchanges, including the Exchange, and are reasonable, equitable and not unfairly discriminatory because they are open to all members on an equal basis and provide additional benefits or discounts that are reasonably related to the value to an exchange's market quality associated with higher levels of market activity, such as higher levels of liquidity provision and/or growth patterns, and the introduction of higher volumes of orders into the price and volume discovery process. The Exchange believes that the Liquidity Provision Tiers 1 and 2 and NBBO Setter Tier 1, each as modified by the proposed changes to the required criteria under such tier, the Tape B Volume Tier as modified by the proposed changes to the additive rebate and required criteria under such tier, the proposed new Cross Asset Tiers 1 and 2, the DLI Additive Rebate as modified by the proposed changes to the additive rebate and required criteria under such tier, and the new proposed Display-Price Sliding Tier are reasonable, equitable and not unfairly discriminatory for these same reasons, as such tiers would provide Members with an incremental incentive to achieve certain volume thresholds on the Exchange (and in the case of the Cross Asset Tiers, MEMX Options), are available to all Members on an equal basis, and, as described above, are designed to encourage Members to maintain or increase their order flow, including in the form of displayed, liquidity-adding, and/or NBBO-setting orders to the Exchange in order to qualify for an enhanced rebate for executions of Added Displayed Volume or Added Price-Improved Volume, as applicable, thereby contributing to a deeper, more liquid and well balanced market ecosystem on the Exchange to the benefit of all Members and market participants. The Exchange also believes that such tiers reflect a reasonable and equitable allocation of fees and rebates, as the Exchange believes that the enhanced rebate for executions of Added Displayed Volume under the proposed modified Liquidity Provision Tiers 1 and 2 and the proposed new Cross Asset Tiers 1 and 2, the additive rebates for executions of Added Displayed Volume under the proposed modified NBBO Setter Tier 1, Tape B Volume Tier 1, and DLI Additive Rebate Tier 1, as well as the enhanced rebate for executions of Added Price-Improved Volume under the new proposed Display-Price Sliding Tier, each remains commensurate with the corresponding required criteria under each such tier and is reasonably related to the market quality benefits that each such tier is designed to achieve, as described above. In addition, the Exchange believes that the proposed Display-Price Sliding Tier, which will award the highest Added Displayed Volume rebate possible to qualifying Members, is reasonable and equitable because orders subject to Display-Price Sliding are, in fact, displayed on the Exchange and thus contribute to price discovery and other benefits to the Exchange and the market generally, but also can be executed at prices not displayed on the Exchange, as described above. The Exchange also believes it is reasonable, equitable and not unfairly discriminatory to provide Members that qualify for the newly proposed Cross Asset Tiers 1 and 2 and Display-Price Sliding Tier with the same rebate for executions of orders in securities priced below $1.00 per share that add displayed liquidity to the Exchange as is applicable to the majority of executions on the Exchange for all Members (*i.e.* including those that do not qualify for any tier).

As it relates to the proposed Cross Asset Tiers 1 and 2, to the extent a Member participates on the Exchange but not on MEMX Options, the Exchange believes that the proposal is still reasonable, equitably allocated and non-discriminatory with respect to such Member based on the overall benefit to the Exchange resulting from the success of MEMX Options. Particularly, the Exchange believes such success allows the Exchange to continue to provide and potentially expand its existing incentive programs to the benefit of all participants on the Exchange, whether they participate on MEMX Options or not. The proposed pricing program is also fair and equitable in that membership on MEMX Options is available to all market participants which would provide them with access to the benefits on MEMX Options provided by the proposal, even where a member of MEMX Options is not necessarily eligible for the proposed enhanced rebates on the Exchange. Lastly, the Exchange believes that the proposal is still reasonable, equitably allocated and non-discriminatory because as a result of achieving a higher rebate for activity on MEMX Options, and given the equities component of Cross Asset Tier 1, the Exchange further believes that the newly proposed Cross Asset Tiers 1 and 2 will encourage greater participation on MEMX Equities by qualifying participants, thereby contributing to a deeper and more robust and well-balanced market ecosystem on the Exchange to the benefit of all Members and market participants.

For the reasons discussed above, the Exchange submits that the proposal satisfies the requirements of Sections 6(b)(4) and 6(b)(5) of the Act [29] in that it provides for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities and is not designed to unfairly discriminate between customers, issuers, brokers, or dealers. As described more fully below in the Exchange's statement regarding the burden on competition, the Exchange believes that its transaction pricing is subject to significant competitive forces, and that the proposed fees and rebates described herein are appropriate to address such forces.

[28] Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005).

[29] 15 U.S.C. 78f(b)(4) and (5).

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposal will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Instead, as discussed above, the proposal is intended to incentivize market participants to direct additional order flow, including displayed, liquidity-adding, and/or aggressively priced orders to the Exchange, and MEMX Options, thereby enhancing liquidity and market quality on the Exchange to the benefit of all Members and market participants, as well as to generate additional revenue and decrease the Exchange's expenditures with respect to its transaction pricing in a manner that is still consistent with the Exchange's overall pricing philosophy of encouraging added displayed liquidity. As a result, the Exchange believes the proposal would enhance its competitiveness as a market that attracts actionable orders, thereby making it a more desirable destination venue for its customers. For these reasons, the Exchange believes that the proposal furthers the Commission's goal in adopting Regulation NMS of fostering competition among orders, which promotes ''more efficient pricing of individual stocks for all types of orders, large and small.'' [30]

Intramarket Competition

As discussed above, the Exchange believes that the proposal would incentivize Members to submit additional order flow, including displayed, liquidity-adding and/or NBBO setting orders to both the Exchange and MEMX Options, thereby enhancing liquidity and market quality on the Exchange to the benefit of all Members, as well as enhancing the attractiveness of the Exchange as a trading venue, which the Exchange believes, in turn, would continue to encourage market participants to direct additional order flow to the Exchange. Greater liquidity benefits all Members by providing more trading opportunities and encourages Members to send additional orders to the Exchange, thereby contributing to robust levels of liquidity, which benefits all market participants. The opportunity to qualify for the proposed modified Liquidity Provision Tiers 1 and 2, the newly proposed Cross Asset Tiers 1 and 2, and newly proposed Display-Price Sliding Tier, and thus receive the proposed enhanced rebate for executions of Added Displayed Volume and/or Added Price-Improved Volume under such tiers, would be available to all Members that meet the associated volume requirements in any month. Similarly, the opportunity to qualify for the proposed modified criteria under the NBBO Setter Tier, the proposed modified rebate and criteria under the Tape B Volume Tier, and the proposed modified rebate and criteria under the DLI Additive Rebate Tier 1, and thus receive the additive rebate for executions of Added Displayed Volume, would continue to be available to all Members that meet the associated volume requirements in any month. For the foregoing reasons, the Exchange believes the proposed changes would not impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Intermarket Competition

As noted above, the Exchange operates in a highly competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient. Members have numerous alternative venues that they may participate on and direct their order flow to, including 15 other equities exchanges and numerous alternative trading systems and other off-exchange venues. As noted above, no single registered equities exchange currently has more than approximately 16% of the total market share of executed volume of equities trading. Thus, in such a low-concentrated and highly competitive market, no single equities exchange possesses significant pricing power in the execution of order flow. Moreover, the Exchange believes that the ever-shifting market share among the exchanges from month to month demonstrates that market participants can shift order flow or discontinue to reduce use of certain categories of products, in response to new or different pricing structures being introduced into the market. Accordingly, competitive forces constrain the Exchange's transaction fees and rebates, including with respect to Added Displayed Volume and Added Price-Improved Volume, and market participants can readily choose to send their orders to other exchange and off-exchange venues if they deem fee levels at those other venues to be more favorable. As described above, the proposed changes represent a competitive proposal through which the Exchange is seeking to generate additional revenue with respect to its transaction pricing and to encourage the submission of additional order flow to the Exchange through volume-based tiers, which have been widely adopted by exchanges, including the Exchange. Accordingly, the Exchange believes the proposal would not burden, but rather promote, intermarket competition by enabling it to better compete with other exchanges that offer similar pricing incentives to market participants.

Additionally, the Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [31] The fact that this market is competitive has also long been recognized by the courts. In *NetCoalition* v. *SEC,* the D.C. Circuit stated as follows: ''[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'. . .''.[32] Accordingly, the Exchange does not believe its proposed pricing changes impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change is effective upon filing pursuant to Section

[30] *See supra* note 28.

[31] *Id.*

[32] *NetCoalition* v. *SEC,* 615 F.3d 525, 539 (D.C. Cir. 2010) (quoting Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770, 74782–83 (December 9, 2008) (SR–NYSE–2006–21)).

19(b)(3)(A)[33] of the Act and subparagraph (f)(2) of Rule 19b–4[34] thereunder, because it establishes a due, fee, or other charge imposed by the Exchange.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[35] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–MEMX–2024–12 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–MEMX–2024–12. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–MEMX–2024–12 and should be submitted on or before May 7, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[36]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–609, OMB Control No. 3235–0706]

Proposed Collection; Comment Request; Extension: Form ABS–EE

Upon Written Request Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') is soliciting comments on the collection of information summarized below. The Commission plans to submit this existing collection of information to the Office of Management and Budget for extension and approval.

Form ABS–EE (17 CFR 249.1401) is filed by asset-backed issuers to provide asset-level information for registered offerings of asset-backed securities at the time of securitization and on an ongoing basis required by Item 1111(h) of Regulation AB (17 CFR 229.1111(h)). The purpose of the information collected on Form ABS–EE is to implement the disclosure requirements of Section 7(c) of the Securities Act of 1933 (15 U.S.C. 77g(c)) to provide information regarding the use of representations and warranties in the asset-backed securities markets. Form ABS–EE takes approximately 50.87152 hours per response to prepare and is filed by 5,463 securitizers annually. We estimate that 25% of the approximately 50.87152 hours per response (12.71788 hours) is prepared by the securitizers internally for a total annual reporting burden of 69,478 hours (12.71788 hours per response × 5,463 responses).

Written comments are invited on: (a) whether this proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden imposed by the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication by June 17, 2024.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

Please direct your written comment to David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549 or send an email to: *PRA_Mailbox@sec.gov.*

Dated: April 11, 2024.

Vanessa A. Countryman,

Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–270, OMB Control No. 3235–0292]

Proposed Collection; Comment Request; Extension: Form F–6–Registration Statement

Upon Written Request Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') is soliciting comments on the collection of information summarized below. The Commission

plans to submit this existing collection of information to the Office of Management and Budget for approval.

Form F–6 (17 CFR 239.36) is a form used by foreign companies to register the offer and sale of American Depositary Receipts (ADRs) under the Securities Act of 1933 (15 U.S.C. 77a *et seq.*). Form F–6 requires disclosure of information regarding the terms of the depository bank, fees charged, and a description of the ADRs. No special information regarding the foreign company is required to be prepared or disclosed, although the foreign company must be one which periodically furnishes information to the Commission. The information is needed to ensure that investors in ADRs have full disclosure of information concerning the deposit agreement and the foreign company. Form F–6 takes approximately 1.35 hour per response to prepare and is filed by 366 respondents annually. We estimate that 25% of the 1.35 hour per response (0.338 hours) is prepared by the filer for a total annual reporting burden of 124 hours (0.338 hours per response × 366 responses).

Written comments are invited on: (a) whether this proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden imposed by the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication by June 17, 2024.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

Please direct your written comment to David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549 or send an email to: *PRA_Mailbox@sec.gov.*

Dated: April 10, 2024.

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99931; File No. SR–CboeBZX–2024–024]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Fee Schedule

April 10, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on April 1, 2024, Cboe BZX Exchange, Inc. (''Exchange'' or ''BZX'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Exchange, Inc. (the ''Exchange'' or ''BZX'') proposes to amend its Fee Schedule. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (*http://markets.cboe.com/us/equities/regulation/rule_filings/BZX/*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fee Schedule applicable to its equities trading platform (''BZX Equities'') by: (1) introducing a new Add Volume Tier; and (2) modifying the Single MPID Investor Tiers. The Exchange proposes to implement these changes effective April 1, 2024.

The Exchange first notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient. More specifically, the Exchange is only one of 16 registered equities exchanges, as well as a number of alternative trading systems and other off-exchange venues that do not have similar self-regulatory responsibilities under the Securities Exchange Act of 1934 (the ''Act''), to which market participants may direct their order flow. Based on publicly available information,[3] no single registered equities exchange has more than 17% of the market share. Thus, in such a low-concentrated and highly competitive market, no single equities exchange possesses significant pricing power in the execution of order flow. The Exchange in particular operates a ''Maker-Taker'' model whereby it pays rebates to members that add liquidity and assesses fees to those that remove liquidity. The Exchange's Fee Schedule sets forth the standard rebates and rates applied per share for orders that provide and remove liquidity, respectively. Currently, for orders in securities priced at or above $1.00, the Exchange provides a standard rebate of $0.00160 per share for orders that add liquidity and assesses a fee of $0.0030 per share for orders that remove liquidity.[4] For orders in securities priced below $1.00, the Exchange provides a standard rebate of $0.00009 per share for orders that add liquidity and assesses a fee of 0.30% of the total dollar value for orders that remove liquidity.[5] Additionally, in response to the competitive environment, the Exchange also offers tiered pricing which provides Members opportunities to qualify for higher rebates or reduced fees where certain volume criteria and thresholds are met.

[3] *See* Cboe Global Markets, U.S. Equities Market Volume Summary, Month-to-Date (March 22, 2024), available at *https://www.cboe.com/us/equities/market_statistics/.*

[4] *See* BZX Equities Fee Schedule, Standard Rates.

[5] *Id.*

Tiered pricing provides an incremental incentive for Members to strive for higher tier levels, which provides increasingly higher benefits or discounts for satisfying increasingly more stringent criteria.

Add/Remove Volume Tiers

Under footnote 1 of the Fee Schedule, the Exchange offers various Add/Remove Volume Tiers. In particular, the Exchange offers seven Add Volume Tiers that provide enhanced rebates for orders yielding fee codes B,[6] V[7] and Y[8] where a Member reaches certain add volume-based criteria. The Exchange now proposes to introduce a new Add Volume Tier. The proposed criteria for Add Volume Tier 8 is as follows:

• Add Volume Tier 8 provides a rebate of $0.0031 per share in securities priced at or above $1.00 to qualifying orders (*i.e.,* orders yielding fee codes B, V, or Y) where a Member: (1) has an ADAV[9] as a percentage of TCV[10] ≥ 0.50%; and (2) Member has a Tape B ADV[11] ≥ 1.50% of the Tape B TCV; and (3) Member has a Remove ADV ≥ 0.30% of the TCV.

The proposed Add Volume Tier 8 is intended to provide an additional opportunity to incentivize Members to add displayed liquidity on the Exchange. Like other Add Volume Tiers on the Exchange, Add Volume Tier 8 is designed to give members an additional opportunity to receive an enhanced rebate for orders meeting the applicable criteria. The Exchange believes the addition of Add Volume Tier 8 will encourage Members to grow their volume on the Exchange, thereby contributing to a deeper and more liquid market, which benefits all market participants and provides greater execution opportunities on the Exchange.

Single MPID Investor Tiers

Under footnote 4 of the Fee Schedule, the Exchange offers Single MPID Investor Tiers. In particular, the Exchange offers one Single MPID Investor Tier that provides enhanced rebates for orders yielding fee codes B, V and Y where an MPID reaches certain add volume-based criteria. Now, the Exchange proposes to modify the criteria of Single MPID Investor Tier 1 and introduce a new Single MPID Investor Tier. The current criteria of Single MPID Investor Tier 1 is as follows:

• Single MPID Investor Tier 1 provides an enhanced rebate of $0.0032 per share in Tape B securities priced at or above $1.00 and an enhanced rebate of $0.0033 per share in Tapes A and C securities priced at or above $1.00 to qualifying orders (*i.e.,* orders yielding fee codes B, V, or Y) where: (1) MPID has a Step-Up ADV[12] as a percentage of TCV ≥ 0.10% from May 2021; or MPID has a Step-Up ADV ≥ 10,000,000 from May 2021; and (2) MPID has an ADAV as a percentage of TCV ≥ 0.50%; or MPID has an ADAV ≥ 45,000,000.

The proposed criteria of Single MPID Investor Tier 1 is as follows:

• Single MPID Investor Tier 1 provides an enhanced rebate of $0.0032 per share in Tape B securities priced at or above $1.00 and an enhanced rebate of $0.0033 per share in Tapes A and C securities priced at or above $1.00 to qualifying orders (*i.e.,* orders yielding fee codes B, V, or Y) where: (1) MPID has an ADAV as a percentage of TCV ≥ 0.45% or MPID has an ADAV ≥ 45,000,000; and (2) MPID has an ADAV ≥ 0.05% of the TCV as Non-Displayed orders that yield fee codes HB,[13] HI,[14] HV[15] or HY.[16]

The Exchange also proposes to introduce Single MPID Investor Tier 2. The proposed criteria for proposed Single MPID Investor Tier 2 is as follows:

• Proposed Single MPID Investor Tier 2 provides an enhanced rebate of $0.0032 per share in Tape B securities priced at or above $1.00 and an enhanced rebate of $0.0033 per share in Tapes A and C securities priced at or above $1.00 to qualifying orders (*i.e.,* orders yielding fee codes B, V, or Y) where: (1) MPID removes an ADV ≥ 0.60% of the TCV; and (2) MPID has an ADAV ≥ 0.05% of the TCV as Non-Displayed orders that yield fee codes HB, HI, HV or HY.

The Exchange believes that the proposed modification to Single MPID Investor Tier 1 and the introduction of proposed Single MPID Investor Tier 2 will incentivize Members to increase their overall order flow, both add and remove volume, to the Exchange, thereby contributing to a deeper and more liquid market, which benefits all market participants and provides greater execution opportunities on the Exchange. Incentivizing an increase in both liquidity adding volume and liquidity removing volume, through both revised and new criteria and enhanced rebate opportunities, encourages liquidity adding Members on the Exchange to contribute to a deeper, more liquid market and encourages liquidity removing Members on the Exchange to increase transactions and take execution opportunities provided by such activity, together providing for overall enhanced price discovery and price improvement opportunities on the Exchange. As such, increased overall order flow benefits all Members by contributing towards a robust and well-balanced market ecosystem.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[17] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[18] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[19] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers as well as Section 6(b)(4)[20] as it is designed to provide for the equitable

[6] Fee code B is appended to displayed orders that add liquidity to BZX in Tape B securities.

[7] Fee code V is appended to displayed orders that add liquidity to BZX in Tape A securities.

[8] Fee code Y is appended to displayed orders that add liquidity to BZX in Tape C securities.

[9] ''ADAV' means average daily added volume calculated as the number of shares added per day. ADAV is calculated on a monthly basis.

[10] ''TCV'' means total consolidated volume calculated as the volume reported by all exchanges and trade reporting facilities to a consolidated transaction reporting plan for the month for which the fees apply.

[11] ''ADV'' means average daily volume calculated as the number of shares added or removed, combined, per day, calculated on a monthly basis.

[12] ''Step-Up ADV'' means ADV in the relevant baseline month subtracted from current day ADV.

[13] Fee code HB is appended to non-displayed orders that add liquidity to BZX in Tape B securities.

[14] Fee code HI is appended to non-displayed orders that receive price improvement while adding liquidity to BZX.

[15] Fee code HV is appended to non-displayed orders that add liquidity to BZX in Tape A securities.

[16] Fee code HY is appended to non-displayed orders that add liquidity to BZX in Tape C securities.

[17] 15 U.S.C. 78f(b).

[18] 15 U.S.C. 78f(b)(5).

[19] *Id.*

[20] 15 U.S.C. 78f(b)(4).

allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities.

As described above, the Exchange operates in a highly competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient. The Exchange believes that its proposal to introduce Add Volume Tier 8, modify Single MPID Investor Tier 1, and introduce Single MPID Investor Tier 2 reflects a competitive pricing structure designed to incentivize market participants to direct their order flow to the Exchange, which the Exchange believes would enhance market quality to the benefit of all Members. Additionally, the Exchange notes that relative volume-based incentives and discounts have been widely adopted by exchanges,[21] including the Exchange,[22] and are reasonable, equitable and non-discriminatory because they are open to all Members on an equal basis and provide additional benefits or discounts that are reasonably related to (i) the value to an exchange's market quality and (ii) associated higher levels of market activity, such as higher levels of liquidity provision and/or growth patterns. Competing equity exchanges offer similar tiered pricing structures, including schedules or rebates and fees that apply based upon members achieving certain volume and/or growth thresholds, as well as assess similar fees or rebates for similar types of orders, to that of the Exchange.

In particular, the Exchange believes its proposal to introduce Add Volume Tier 8, modify Single MPID Investor Tier 1, and introduce Single MPID Investor Tier 2 is reasonable because the revised tiers will be available to all Members and provide all Members with an opportunity to receive an enhanced rebate. The Exchange further believes its proposal to introduce Add Volume Tier 8, modify Single MPID Investor Tier 1, and introduce Single MPID Investor Tier 2 will provide a reasonable means to encourage liquidity adding displayed orders in Members' order flow to the Exchange and to incentivize Members to continue to provide liquidity adding and liquidity removing volume to the Exchange by offering them an opportunity to receive an enhanced rebate on qualifying orders. An overall increase in activity would deepen the Exchange's liquidity pool, offer additional cost savings, support the quality of price discovery, promote market transparency and improve market quality, for all investors.

The Exchange believes that its proposal to introduce Add Volume Tier 8, modify Single MPID Investor Tier 1, and introduce Single MPID Investor Tier 2 is reasonable as the proposed criteria do not represent a significant departure from the criteria currently offered in the Fee Schedule. The Exchange also believes that the proposal represents an equitable allocation of fees and rebates and is not unfairly discriminatory because all Members continue to be eligible for proposed Add Volume Tier 8 and the Single MPID Investor Tiers and have the opportunity to meet the tiers' criteria and receive the corresponding enhanced rebate if such criteria is met. Without having a view of activity on other markets and off-exchange venues, the Exchange has no way of knowing whether this proposed rule change would definitely result in any Members qualifying for proposed Add Volume Tier 8 and the Single MPID Investor Tiers. While the Exchange has no way of predicting with certainty how the proposed changes will impact Member activity, based on the prior month's volume, the Exchange anticipates that at least one Member will be able to satisfy proposed Add Volume Tier 8, at least three Members will be able to satisfy proposed Single MPID Investor Tier 1, and at least two Members will be able to satisfy proposed Single MPID Investor Tier 2. The Exchange also notes that proposed changes will not adversely impact any Member's ability to qualify for enhanced rebates offered under other tiers. Should a Member not meet the proposed new criteria, the Member will merely not receive that corresponding enhanced rebate.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Rather, as discussed above, the Exchange believes that the proposed change would encourage the submission of additional order flow to a public exchange, thereby promoting market depth, execution incentives and enhanced execution opportunities, as well as price discovery and transparency for all Members. As a result, the Exchange believes that the proposed changes further the Commission's goal in adopting Regulation NMS of fostering competition among orders, which promotes ''more efficient pricing of individual stocks for all types of orders, large and small.''

The Exchange believes the proposed rule changes do not impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. Particularly, the Exchange's proposal to introduce Add Volume Tier 8, modify Single MPID Investor Tier 1, and introduce Single MPID Investor Tier 2 will apply to all Members equally in that all Members are eligible for the new and modified tiers, have a reasonable opportunity to meet the proposed tiers' criteria and will receive the enhanced rebate on their qualifying orders if such criteria is met. The Exchange does not believe the proposed changes burden competition, but rather, enhance competition as they are intended to increase the competitiveness of BZX by amending existing pricing incentives in order to attract order flow and incentivize participants to increase their participation on the Exchange, providing for additional execution opportunities for market participants and improved price transparency. Greater overall order flow, trading opportunities, and pricing transparency benefits all market participants on the Exchange by enhancing market quality and continuing to encourage Members to send orders, thereby contributing towards a robust and well-balanced market ecosystem.

Next, the Exchange believes the proposed rule changes does not impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. As previously discussed, the Exchange operates in a highly competitive market. Members have numerous alternative venues that they may participate on and direct their order flow, including other equities exchanges, off-exchange venues, and alternative trading systems. Additionally, the Exchange represents a small percentage of the overall market. Based on publicly available information, no single equities exchange has more than 17% of the market share.[23] Therefore, no exchange possesses significant pricing power in the execution of order flow. Indeed, participants can readily choose to send their orders to other exchange and off-exchange venues if they deem fee levels at those other venues to be more favorable. Moreover, the Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities

[21] *See e.g.,* EDGX Equities Fee Schedule, Footnote 1, Add/Remove Volume Tiers.

[22] *See e.g.,* BZX Equities Fee Schedule, Footnote 1, Add/Remove Volume Tiers.

[23] *Supra* note 3.

markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [24] The fact that this market is competitive has also long been recognized by the courts. In *NetCoalition* v. *Securities and Exchange Commission,* the D.C. Circuit stated as follows: ''[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'. . . .''.[25] Accordingly, the Exchange does not believe its proposed fee change imposes any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [26] and paragraph (f) of Rule 19b–4 [27] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–CboeBZX–2024–024 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–CboeBZX–2024–024. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–CboeBZX–2024–024 and should be submitted on or before May 7, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[28]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99932; File No. SR–CboeBYX–2024–010]

Self-Regulatory Organizations; Cboe BYX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Fee Schedule

April 10, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on April 1, 2024, Cboe BYX Exchange, Inc. (''Exchange'' or ''BYX'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BYX Exchange, Inc. (the ''Exchange'' or ''BYX'') proposes to amend its Fee Schedule. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (*http://markets.cboe.com/us/equities/regulation/rule_filings/BYX/*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fee Schedule applicable to its equities trading platform (''BYX Equities'') by modifying the criteria of Remove Volume Tier 6. The Exchange proposes to implement these changes effective April 1, 2024.

The Exchange first notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient. More specifically, the Exchange is only one of 16 registered equities exchanges, as well as a number of alternative trading systems and other off-exchange venues that do not have similar self-regulatory responsibilities under the Securities Exchange Act of 1934 (the ''Act''), to which market participants may direct their order flow. Based on publicly available information,[3] no single registered equities exchange has more than 17% of the market share. Thus, in such a low-concentrated and highly competitive market, no single equities exchange possesses significant pricing power in the execution of order flow. The Exchange in particular operates a ''Taker-Maker'' model whereby it pays credits to members that remove liquidity and assesses fees to those that add liquidity. The Exchange's Fee Schedule sets forth the standard rebates and rates applied per share for orders that remove and provide liquidity, respectively. Currently, for orders in securities priced at or above $1.00, the Exchange provides a standard rebate of $0.00200 per share for orders that remove liquidity and assesses a fee of $0.00200 per share for orders that add liquidity.[4] For orders in securities priced below $1.00, the Exchange does not assess any fees for orders that add liquidity, and provides a rebate in the amount of 0.10% of the total dollar value for orders that remove liquidity.[5] Additionally, in response to the competitive environment, the Exchange also offers tiered pricing which provides Members opportunities to qualify for higher rebates or reduced fees where certain volume criteria and thresholds are met. Tiered pricing provides an incremental incentive for Members to strive for higher tier levels, which provides increasingly higher benefits or discounts for satisfying increasingly more stringent criteria.

Remove Volume Tiers

Under footnote 1 of the Fee Schedule, the Exchange currently offers various Add/Remove Volume Tiers. In particular, the Exchange offers two Remove Volume Tiers that each provide an enhanced rebate for Members' qualifying orders yielding fee codes BB,[6] N[7] and W[8] where a Member reaches certain add volume-based criteria. The Exchange now proposes to amend Remove Volume Tier 6 by lowering the share amount required in the second prong of criteria. The current criteria for Remove Volume Tier 6 is as follows:

- Remove Volume Tier 6 provides a rebate of $0.0013 per share in securities priced at or above $1.00 to qualifying orders (*i.e.,* orders yielding fee codes BB, N, or W) where (1) Member has a combined Auction ADV[9] and ADV[10] ≥ 0.08% of the TCV;[11] and (2) Member has a combined Auction ADV and ADAV[12] ≥ 5,000,000 shares.

The proposed criteria for Remove Volume Tier 6 is as follows:

- Remove Volume Tier 6 provides a rebate of $0.0013 per share in securities priced at or above $1.00 to qualifying orders (*i.e.,* orders yielding fee codes BB, N, or W) where (1) Member has a combined Auction ADV and ADV ≥ 0.08% of the TCV; and (2) Member has a combined Auction ADV and ADAV ≥ 3,500,000 shares.

The Exchange believes that the proposed modification to current Remove Volume Tier 6 will continue to incentivize Members to add volume to the Exchange, thereby contributing to a deeper and more liquid market, which benefits all market participants and provides greater execution opportunities on the Exchange. While the proposed criteria in Remove Volume Tier 6 is less difficult to achieve than the current criteria, the revised criteria continue to remain commensurate with the rebate that will be received upon a Member satisfying the proposed criteria.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[13] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[14] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[15] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers as well as Section 6(b)(4)[16] as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities.

As described above, the Exchange operates in a highly competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient. The Exchange believes that its proposal to modify the criteria of Remove Volume Tier 6 reflects a competitive pricing structure designed to incentivize market participants to direct their order flow to the Exchange, which the Exchange believes would enhance market quality to the benefit of all Members. Additionally, the Exchange notes that relative volume-based incentives and discounts have been widely adopted by

[16] 15 U.S.C. 78f(b)(4).

exchanges,[17] including the Exchange,[18] and are reasonable, equitable and non-discriminatory because they are open to all Members on an equal basis and provide additional benefits or discounts that are reasonably related to (i) the value to an exchange's market quality and (ii) associated higher levels of market activity, such as higher levels of liquidity provision and/or growth patterns. Competing equity exchanges offer similar tiered pricing structures, including schedules or rebates and fees that apply based upon members achieving certain volume and/or growth thresholds, as well as assess similar fees or rebates for similar types of orders, to that of the Exchange.

In particular, the Exchange believes its proposal to modify the criteria of Remove Volume Tier 6 is reasonable because the tier will be available to all Members and provide all Members with an opportunity to receive a higher enhanced rebate. The Exchange further believes that proposed Remove Volume Tier 6 will provide a reasonable means to encourage adding displayed orders in Members' order flow to the Exchange and to incentivize Members to continue to provide volume to the Exchange by offering them an opportunity to receive a higher enhanced rebate on qualifying orders. An overall increase in activity would deepen the Exchange's liquidity pool, offers additional cost savings, support the quality of price discovery, promote market transparency and improve market quality, for all investors.

The Exchange believes proposed Remove Volume Tier 6 is reasonable as it does not represent a significant departure from the criteria currently offered in the Fee Schedule. The Exchange also believes that the proposal represents an equitable allocation of fees and rebates and is not unfairly discriminatory because all Members will be eligible for the tier and have the opportunity to meet the tier's criteria and receive the corresponding enhanced rebate if such criteria are met. Without having a view of activity on other markets and off-exchange venues, the Exchange has no way of knowing whether these proposed rule changes would definitely result in any Members qualifying for the new proposed tiers. While the Exchange has no way of predicting with certainty how the proposed changes will impact Member activity, based on the prior months volume, the Exchange anticipates that at least one Member will be able to satisfy proposed Remove Volume Tier 6. The Exchange also notes that the proposed changes will not adversely impact any Member's ability to qualify for reduced fees or enhanced rebates offered under other tiers. Should a Member not meet the proposed new criteria, the Member will merely not receive that corresponding enhanced rebate.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Rather, as discussed above, the Exchange believes that the proposed change would encourage the submission of additional order flow to a public exchange, thereby promoting market depth, execution incentives and enhanced execution opportunities, as well as price discovery and transparency for all Members. As a result, the Exchange believes that the proposed changes further the Commission's goal in adopting Regulation NMS of fostering competition among orders, which promotes ''more efficient pricing of individual stocks for all types of orders, large and small.''

The Exchange believes the proposed rule change does not impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. Particularly, proposed Remove Volume Tier 6 will apply to all Members equally in that all Members are eligible for the tier and enhanced rebate, have a reasonable opportunity to meet the proposed tier's criteria and will receive the enhanced rebate on their qualifying orders if such criteria is met. The Exchange does not believe the proposed change burdens competition, but rather, enhances competition as it is intended to increase the competitiveness of BYX by amending existing pricing incentives in order to attract order flow and incentivize participants to increase their participation on the Exchange, providing for additional execution opportunities for market participants and improved price transparency. Greater overall order flow, trading opportunities, and pricing transparency benefits all market participants on the Exchange by enhancing market quality and continuing to encourage Members to send orders, thereby contributing towards a robust and well-balanced market ecosystem.

Next, the Exchange believes the proposed rule changes does not impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. As previously discussed, the Exchange operates in a highly competitive market. Members have numerous alternative venues that they may participate on and direct their order flow, including other equities exchanges, off-exchange venues, and alternative trading systems. Additionally, the Exchange represents a small percentage of the overall market. Based on publicly available information, no single equities exchange has more than 17% of the market share.[19] Therefore, no exchange possesses significant pricing power in the execution of order flow. Indeed, participants can readily choose to send their orders to other exchange and off-exchange venues if they deem fee levels at those other venues to be more favorable. Moreover, the Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [20] The fact that this market is competitive has also long been recognized by the courts. In *NetCoalition* v. *Securities and Exchange Commission,* the D.C. Circuit stated as follows: ''[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'. . . .''.[21] Accordingly, the Exchange does not believe its proposed fee change imposes any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [22] and paragraph (f) of Rule 19b–4 [23] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–CboeBYX–2024–010 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–CboeBYX–2024–010. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–CboeBYX–2024–010 and should be submitted on or before May 7, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[24]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99938; File No. 4–698]

Joint Industry Plan; Notice of Filing of Amendment to the National Market System Plan Governing the Consolidated Audit Trail Regarding Cost Savings Measures

April 10, 2024.

I. Introduction

On March 27, 2024, the Consolidated Audit Trail, LLC (''CAT LLC''), on behalf of the following parties to the National Market System Plan Governing the Consolidated Audit Trail (the ''CAT NMS Plan'' or ''Plan''):[1] BOX Exchange LLC; Cboe BYX Exchange, Inc., Cboe BZX Exchange, Inc., Cboe EDGA Exchange, Inc., Cboe EDGX Exchange, Inc., Cboe C2 Exchange, Inc., Cboe Exchange, Inc., Financial Industry Regulatory Authority, Inc., Investors Exchange LLC, Long-Term Stock Exchange, Inc., MEMX, LLC, Miami International Securities Exchange LLC, MIAX Emerald, LLC, MIAX PEARL, LLC, Nasdaq BX, Inc., Nasdaq GEMX, LLC, Nasdaq ISE, LLC, Nasdaq MRX, LLC, Nasdaq PHLX LLC, The NASDAQ Stock Market LLC, New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., NYSE Chicago, Inc., and NYSE National, Inc. (collectively, the ''Participants,'' ''self-regulatory organizations,'' or ''SROs'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') pursuant to Section 11A(a)(3) of the Securities Exchange Act of 1934 (''Exchange Act''),[2] and Rule 608 thereunder,[3] a proposed amendment to the CAT NMS Plan to amend existing requirements for the consolidated audit trail (''CAT'') regarding costs saving measures for operating the CAT (the ''Cost Savings Amendments'').[4] Set forth in Section II is the statement of purpose and summary of the amendment, along with information required by Rules 608(a)(4) and 608(a)(5) under the Exchange Act,[5] and *Exhibit A,* which contains the proposed revisions to the CAT NMS Plan, all substantially as prepared and submitted by the Participants to the Commission.[6] The Commission is publishing this notice to solicit comments from interested persons on the amendment.[7]

II. Description of the Plan

As described further below, the Cost Savings Amendments are expected to result in approximately $23.0 million in new annual cost savings in the first year with limited impact on the regulatory function of the CAT.[8] Specifically, the Cost Savings Amendment would:

[6] *See* Transmittal Letter, *supra* note 4. Unless otherwise defined herein, capitalized terms used herein are defined as set forth in the CAT NMS Plan.

[7] 17 CFR 242.608.

[8] All cost and savings projections are estimates only and reflect the current state and costs of CAT operations, including the current number of exchanges. Cost savings estimates are based on, among other factors: current CAT NMS Plan requirements; reporting by Participants, Industry Members and market data providers; observed data rates and volumes; current discounts, reservations and cost savings plans; and associated cloud fees. Actual future savings could be more or less than estimated due to changes in any of these variables. S3 Intelligent Tier storage fees in production are allocated at a ratio of 1 (S3 Frequent Access): 1 (S3 Infrequent Access): 8 (S3 Archive Instant Access) based on current operations and regulatory usage.

Continued

(1) optimize processing and storage requirements for Options Market Maker [9] quotes in Listed Options [10] (''Options Market Maker Quotes''), without eliminating them entirely from the CAT;

(2) permit the Plan Processor to move raw unprocessed data and interim operational copies of CAT Data older than 15 days to a more cost-effective storage tier; and

(3) permit the Plan Processor to provide an interim CAT-Order-ID on an ''as requested'' basis rather than each day.

In addition, the Cost Savings Amendments would incorporate into the CAT NMS Plan the Commission's recent exemptive order providing that data from industry testing for both Industry Members and Participants may be deleted after three months, which is estimated to result in additional cost savings of approximately $1 million per year, and would extend such relief to include test data related to the customer account and information system.[11]

The proposed changes to the CAT NMS Plan to implement the Cost Savings Amendments are set forth in *Exhibit A* to this filing.[12] CAT LLC continues to explore further changes to the CAT NMS Plan and expects to file future amendments that would result in additional cost savings without compromising the regulatory goals of the CAT.

Requirements Pursuant to Rule 608(a)

A. Description of the Proposed Amendments to the CAT NMS Plan

1. Optimize Processing and Storage Requirements for Options Market Maker Quotes

(a) Overview

Options Market Maker Quotes are the single largest data source for the CAT, comprising approximately 98% of all options exchange events and approximately 75% of all transaction volume stored in the CAT.[13] Under the CAT NMS Plan, Options Exchanges are required to report Options Market Maker Quotes to the CAT, and such quotes must be processed and assembled to create a complete order lifecycle. The number of quotes that result in an execution is extremely low; as a result, the vast majority of Options Market Maker Quote lifecycles consist of just two events—the quote and its subsequent cancellation.

The costs associated with processing and storing Options Market Maker Quotes under the CAT NMS Plan are significant—approximately $30 million in 2023.[14] CAT LLC has been focused on reducing these costs. In November 2023, the Commission granted exemptive relief that would allow the Plan Processor to create options quote lifecycles only once; this options quotes ''single pass'' proposal is expected to result in annual savings of approximately $5.4 million upon implementation in April 2024.[15] Even with these savings, the costs related to Options Market Maker Quotes continue to far outweigh the regulatory benefit.

Under the proposed amendments, Options Market Maker Quotes in Listed Options and related Reportable Events will be subject to ingestion only and will not be subject to any linkage requirements. These changes would result in approximately $20.0 million in additional annual savings, without eliminating Options Market Maker Quotes entirely from the CAT. Options Exchanges will continue to report Options Market Maker Quotes in the same manner they do today, but the Plan Processor will only ingest and store them. Options Market Maker Quotes will no longer be subject to validation, feedback, linkage and lifecycle processing, or Plan Processor enrichments (*e.g.,* next event timestamp, lifecycle sequence number, CAT-Lifecycle-ID). The elimination of linkage and feedback processes will remove Options Market Maker Quotes from Options Market Replay, OLA Viewer, and All-Related Lifecycle Event queries. Executions that result from Options Market Maker Quotes will identify the *quoteId* of the quote that resulted in an execution, but will appear as orphaned lifecycle events. Options Market Maker Quotes will no longer be accessible via DIVER, but will remain accessible through BDSQL and Direct Read interfaces.

These changes would significantly reduce the costs of the CAT with limited impact on the regulatory function of the CAT. As noted, the vast majority of Options Market Maker Quote lifecycles do not involve any execution or allocation and usage data demonstrates that such data is very rarely accessed by regulators. Under the proposed amendments, regulators will still have access to unlinked Options Market Maker Quotes data by T+1 at 12:00 p.m. ET. All necessary information for the eliminated enrichments would be available to regulators, but regulators would need to derive the enrichments themselves; upon request, the Plan Processor would provide regulators with the code required in order to do so. As a result of these changes, the cost impact of Options Market Maker Quotes on the CAT would be reduced from approximately $24.4 million (inclusive of anticipated savings resulting from the

Savings projections are primarily based on production environments, which represent approximately two-thirds of all cloud fees. For additional information on the cost savings estimates relevant to each proposal, *see infra* notes 20, 24, 29 and 30.

[9] Section 1.1 of the CAT NMS Plan defines an ''Options Market Maker'' as ''a broker-dealer registered with an exchange for the purpose of making markets in options contracts on the exchange.''

[10] Section 1.1 of the CAT NMS Plan defines a ''Listed Option'' as having ''the meaning set forth in Rule 600(b)(35) of Regulation NMS.'' Rule 600(b)(35) has since been redesignated as Rule 600(b)(43), which defines a ''Listed Option'' as ''any option traded on a registered national securities exchange or automated facility of a national securities association.''

[11] Exchange Act Release No. 99023 (Nov. 27, 2023), 88 FR 84026 (Dec. 1, 2023).

[12] Because the Commission has acknowledged that Appendix C was not intended to be continually updated once the CAT NMS Plan was approved, CAT LLC is not proposing to update Appendix C to reflect the proposed amendments. *See* Exchange Act Release No. 89632 (Aug. 21, 2020), 85 FR 65990 (Oct. 16, 2020).

[13] Under Section 1.1 of the CAT NMS Plan, a ''Reportable Event'' ''includes, but is not limited to, the original receipt or origination, modification, cancellation, routing, execution (in whole or in part) and allocation of an order, and receipt of a routed order.'' Section 1.1 of the CAT NMS Plan states that an ''order'' ''has, with respect to Eligible Securities, the meaning set forth in SEC Rule 613(j)(8).'' SEC Rule 613(j)(8), in turn, states that ''[t]he term order shall include: (i) Any order received by a member of a national securities exchange or national securities association from any person; (ii) Any order originated by a member of a national securities exchange or national securities association; or (iii) Any bid or offer.'' Accordingly, the definition of an ''order'' includes Options Market Maker Quotes, and Reportable Events include events related to Options Market Maker Quotes.

[14] Although Options Market Maker Quotes are the single largest data source for the CAT, there is not a linear relationship between volume and costs; rather, a combination of volume and processing complexity drive costs. While Options Market Maker Quotes represent a significant percentage of data volume, life-cycling this data is less compute intensive because the vast majority of quotes have just two events and involve only a single venue. Despite this relatively limited processing complexity, the cost impact of storing and processing Options Market Maker Quotes remains a significant percentage of overall CAT costs.

[15] Exchange Act Release No. 98848 (Nov. 2, 2023); 88 FR 77128 (Nov. 8, 2023). The exemption order allows the Plan Processor to create lifecycle linkages for Options Market Maker Quotes only once by T+2 at 8 a.m. ET (as opposed to requiring both an interim lifecycle by T+1 at 9 p.m. ET and a final lifecycle by T+5 at 8 a.m. ET). To the extent the proposed amendments are approved, the Plan Processor would no longer be required to create any lifecycle linkages for Options Market Maker Quotes.

implementation of the options quotes ''single pass'' proposal referenced above) to approximately $4.0 million annually.

The Participants believe that the anticipated savings associated with this proposal substantially outweigh the limited regulatory impact on the CAT.[16]

(b) Current CAT NMS Plan Requirements

The CAT NMS Plan contains broad requirements relating to the current reporting of, linkage and lifecycle processing of, and regulator access to Options Market Maker Quotes and related Reportable Events.

First, Section 6.3(d) of the CAT NMS Plan requires each Participant to record and electronically report to the Central Repository details for each order and each Reportable Event, including all Options Market Maker Quotes and related Reportable Events.[17] Under Section 6.4(d)(iii) of the CAT NMS Plan, ''[w]ith respect to the reporting obligations of an Options Market Maker with regard to its quotes in Listed Options, Reportable Events required pursuant to Section 6.3(d)(ii) and (iv) shall be reported to the Central Repository by an Options Exchange in lieu of the reporting of such information by the Options Market Maker.'' Section 6.4(d)(iii) also requires that, pursuant to the Compliance Rules of the Options Exchanges, Options Market Makers are required to report to the Options Exchange the time at which a quote in a Listed Option is sent to the Options Exchange (and, if applicable, any subsequent quote modifications and/or cancellation time when such modification or cancellation is originated by the Options Market Maker). Such time information shall be reported to the Central Repository by the Options Exchange in lieu of reporting by the Options Market Maker.

Second, CAT NMS Plan broadly requires all CAT Data reported to the Central Repository to be processed and assembled to create the complete lifecycle of each Reportable Event. The Plan Processor uses a ''daisy chain approach'' to link all Reportable Events and create a complete lifecycle of each order. Under this approach, ''a series of unique order identifiers assigned to all order events handled by CAT Reporters are linked together by the Central Repository and assigned a single CAT-generated CAT-Order-ID that is associated with each individual order event and used to create the complete lifecycle of an order.'' [18] Data processing timelines are described in Section 6.1 and Section 6.2 of Appendix D of the CAT NMS Plan.

Finally, the CAT NMS Plan provides that regulators will have access to processed CAT Data through an online-targeted query tool and user-defined direct queries and bulk extracts. These requirements are described in Section 8.1 and Section 8.2 of Appendix D of the CAT NMS Plan.

(c) Estimated Cost Savings

As described above, the proposed changes would result in approximately $20.0 million in annual cost savings in the first year with limited impact on the regulatory function of the CAT.[19] Given that the vast majority of Options Market Maker Quotes do not involve any execution or allocation and are used for limited regulatory purposes, the current cost associated with processing and storing such quotes—approximately $30 million in 2023—far outweighs the regulatory value. Although they will no longer be subject to validation, feedback, linkage and lifecycle processing, or Plan Processor enrichments (*e.g.,* next event timestamp, lifecycle sequence number, CAT-Lifecycle-ID), Options Market Maker Quotes will continue to be reported and ingested in the same manner they are today, and unlinked data will remain accessible to regulators by T+1 at 12:00 p.m. through BDSQL and Direct Read interfaces.

(d) Proposed Revisions to CAT NMS Plan

Given the scope of requirements relating directly or indirectly to the current reporting of, linkage and lifecycle processing of, and regulator access to Options Market Maker Quotes and related Reportable Events that currently appear throughout the CAT NMS Plan, CAT LLC proposes to add a general provision to Appendix D that would expressly override any inconsistency with respect to Options Market Maker Quotes. The effect of this provision will be to override any requirements that generally apply to Reportable Events in the specific circumstance of Options Market Maker Quotes.

New Section 3.4 of Appendix D would be entitled ''Requirements for Options Market Maker Quotes in Listed Options'' and would state the following:

''3.4 Requirements for Options Market Maker Quotes in Listed Options

The provisions of this section shall govern the processing and storage of Options Market Maker Quotes in Listed Options and related Reportable Events and shall override any conflicting provisions in the CAT NMS Plan, this Appendix D, or Exchange Act Rule 17a–1.

Options Market Maker Quotes in Listed Options must be reported to the Central Repository as provided under Section 6.4(d)(iii) of the CAT NMS Plan. This data will undergo ingestion only and such unlinked data will be made available to regulators by T+1 at 12:00 p.m. Eastern Time. Options Market Maker Quotes in Listed Options will not be subject to any requirement to link and create an order lifecycle, and will not undergo any validation, feedback, linkage, or enrichment processing. Options Market Maker Quotes in Listed Options will be accessible through BDSQL and Direct Read interfaces only and will not be accessible through the online targeted query tool.''

In addition, CAT LLC proposes to amend certain provisions of Appendix D to include cross-references to new Section 3.4. First, CAT LLC proposes to amend Section 3 of Appendix D of the CAT NMS Plan to add the following statement: ''As described in Section 3.4 of Appendix D, Options Market Maker Quotes in Listed Options and related Reportable Events will be subject to ingestion only and will not be subject to any linkage requirements.'' Second, CAT LLC proposes to amend Section 6.1 of Appendix D of the CAT NMS Plan to add the following statement: ''For the avoidance of doubt, processing and storage of Options Market Maker Quotes in Listed Options and related Reportable Events shall be governed by Section 3.4 of Appendix D.'' Finally, CAT LLC proposes to amend Section 8.1.1 of Appendix D of the CAT NMS Plan to add the following statement: ''As described in Section 3.4 of Appendix D, Options Market Maker Quotes in Listed Options and related Reportable Events will be accessible through BDSQL and Direct Read interfaces only and will not be accessible through the online targeted query tool.''

[16] The Participants continue to evaluate additional cost savings measures and alternatives, which may include in the future continuing to evaluate eliminating Options Market Maker Quotes entirely from the CAT. Any such changes would require the submission of a proposed Plan amendment or exemption request to the SEC for consideration and approval.

[17] *See supra* note 13.

[18] Appendix D, Section 3 of the CAT NMS Plan at D–8.

[19] For a discussion of how cost savings estimates are calculated, *see supra* note 8. This estimate represents additional savings to be achieved following the implementation of the options quotes ''single pass'' proposal targeted for the end of April 2024. This estimate assumes an approximate 65% reduction in compute runtime associated with options exchange events, and an approximate 80% reduction in storage footprint through the elimination of versioned options quote data (*e.g.,* interim, final, DIVER-optimized, OLA copies).

2. Move Raw Unprocessed Data and Interim Operational Copies of CAT Data Older Than 15 Days to a More Cost-Effective Storage Tier

(a) Overview

Under the current CAT NMS Plan, CAT Data must be ''directly available and searchable electronically without manual intervention for at least six years,'' and within certain query tool response times.[20] This requirement applies not only to the final corrected data version that is delivered to regulators by T+5 at 8 a.m. ET, but also to raw unprocessed data and the various types of interim operational data that do not provide any value to CAT Reporters or to regulators after T+5, as well as copies of all submission and feedback files provided to CAT Reporters as part of the correction process (collectively, ''Operational Data'').

Specifically, interim operational data includes all processed, validated and unlinked data made available to regulators by T+1 at 12:00 p.m. ET, and all iterations of processed data made available to regulators between T+1 and T+5 (*i.e.,* the interim data version available at T+1 at 9:00 p.m. ET). Under the CAT NMS Plan, the Plan Processor is required to make such data directly available and searchable electronically by regulators without any manual intervention. When a regulator queries CAT data, the CAT provides the latest, most current version to the user. Interim operational data is supplanted in all CAT query tools by the final version of corrected data that is made available at T+5 at 8:00 a.m. ET, but remains available to regulators after T+5 ''without manual intervention'' in accordance with the CAT NMS Plan via the use of CAT data management APIs. Regulators generally access the latest, corrected version of CAT data; accordingly, interim operational data generally does not provide any regulatory value after the final corrected data version is delivered by T+5 at 8 a.m. ET. After four years of operation, the Plan Processor has not seen any regulatory usage of this interim operational data.

Subject to the Commission's approval, significant cost savings could be achieved by archiving Operational Data older than 15 days to a more cost-effective storage tier that is optimized for infrequent access. Operational Data not older than 15 days, as well as all final, corrected data, would remain accessible ''without manual intervention'' within required query tool response times.

In each case, it would require some ''manual intervention'' by the Plan Processor to obtain such archived data for regulators. Under Section 10.3 of Appendix D of the CAT NMS Plan, the Plan Processor maintains a CAT Help Desk to, among other things, assist Participants' regulatory staff and the SEC with questions and issues regarding obtaining and using CAT Data for regulatory purposes. Upon request by the SEC or one of the Participants to the CAT Help Desk, archived data would be restored by the Plan Processor to an accessible storage tier, at which point it would be available and searchable electronically by regulatory users in the same manner it is today. The Plan Processor will develop policies and procedures to ensure the confidentiality of any regulator requests to obtain Operational Data. Archived data will be restored generally within several hours or business days of a request, depending on the volume and size of the date range of the requested data restore. For example, a request to restore a single day of data may take less than 24 hours, whereas a request to restore a year's worth of data may take several days. To put this in context, when the Commission adopted the CAT NMS Plan, it noted that ''[m]ost current data sources do not provide direct access to most regulators, and data requests can take as long as *weeks or even months* to process.'' [21]

Accordingly, the Participants believe that the anticipated savings associated with optimizing storage costs as described herein substantially outweigh the minimal impact on regulatory access to CAT Data.

(b) Current CAT NMS Plan Requirements

Generally, Section 1.4 of Appendix D of the CAT NMS Plan provides that the Plan Processor must ''[m]ake data directly available and searchable electronically without manual intervention for at least six years.'' Section 6.5(b)(i) of the CAT NMS Plan provides that, ''[c]onsistent with Appendix D, Data Retention Requirements, the Central Repository shall retain the information collected pursuant to paragraphs (c)(7) and (e)(7) of SEC Rule 613 in a convenient and usable standard electronic data format that is directly available and searchable electronically without any manual intervention by the Plan Processor for a period of not less than six (6) years.''

In addition, with respect to raw unprocessed data and interim operational copies of data created between T+1 and T+5, Section 6.2 of Appendix D of the CAT NMS Plan provides that, ''[p]rior to 12:00 p.m. Eastern Time on T+1, raw unprocessed data that has been ingested by the Plan Processor must be available to Participants' regulatory staff and the SEC,'' and ''[b]etween 12:00 p.m. Eastern Time on T+1 and T+5, access to all iterations of processed data must be available to Participants' regulatory staff and the SEC.''

Under the current CAT NMS Plan, CAT Data must be accessible to regulatory users without ''manual intervention.'' Obtaining data from archive storage initially would require some manual intervention by the Plan Processor (*i.e.,* via request to the FINRA CAT Help Desk). Upon request, data would be restored by the Plan Processor to an accessible storage tier, at which point it would be available and searchable electronically by regulatory users in the same manner it is today.

In addition, Section 8.1.2 of Appendix D of the CAT NMS Plan sets forth certain performance requirements for the OTQT, including timeframes in which results must be returned for various types of queries.[22]

(c) Estimated Cost Savings

Based on current data volumes, archiving Operational Data older than 15 days is expected to result in approximate annual cost savings of approximately $1.0 million.[23] CAT LLC believes that these cost savings substantially outweigh the minimal impact on regulatory access to CAT Data.

(d) Proposed Revisions to CAT NMS Plan

CAT LLC proposes to amend the CAT NMS Plan to permit the Plan Processor

[20] CAT Data is available to the Participants' regulatory staff and to the SEC for regulatory purposes only.

[21] Exchange Act Release No. 79318 (Nov. 15, 2016), 81 FR 84696, 84833 (Nov. 23, 2016) (emphasis added). *See also* Exchange Act Release No. 67457, 77 FR 45722, 45729 (Aug. 1, 2012) (noting that obtaining audit trail data ''can take days or weeks, depending on the scope of the information requested,'' and that the Commission ''must commit a significant amount of time and resources to process and cross-link the data from the various formats used by different SROs before it can be analyzed and used for regulatory purposes'').

[22] *See also* Exchange Act Release No. 98848 (Nov. 2, 2023), 88 FR 77128 (Nov. 8, 2023) (granting conditional exemptive relief from certain performance requirements related to the online targeted query tool).

[23] For a discussion of how cost savings estimates are calculated, *see supra* note 8. This estimate represents additional savings to be achieved following the implementation of the options quotes ''single pass'' proposal targeted for the end of April 2024, which eliminates interim operational copies of options quotes.

to move Operational Data older than 15 days to a more cost-effective storage tier. Specifically, CAT LLC proposes to add new Section 6.3 to Appendix D of the CAT NMS Plan. New Section 6.3 would be entitled ''Exceptions to Data Availability Requirements'' and would state the following:

''6.3 Exceptions to Data Availability Requirements

Notwithstanding any other provision of the CAT NMS Plan, this Appendix D, or Exchange Act Rule 17a–1, the following types of data may be retained in an archive storage tier, in which case they will be made available upon request by Participant regulatory staff or the SEC to the CAT Help Desk. Archived data is not directly available and searchable electronically without manual intervention and will not be subject to any query tool performance requirements until it is restored to an accessible storage tier.

- All raw unprocessed data (*i.e.,* as submitted data) and interim operational data older than 15 days. Interim operational data includes all processed, validated and unlinked data made available to regulators by T+1 at 12:00 p.m. ET, and all iterations of processed data made available to regulators between T+1 and T+5, but excludes the final version of corrected data that is made available at T+5 at 8:00 a.m. ET.
- All submission and feedback files older than 15 days.

In addition, CAT LLC proposes to add references to new Section 6.3 of Appendix D throughout the CAT NMS Plan. Specifically, CAT LLC proposes to add the phrase ''subject to the exceptions in Section 6.3 of Appendix D'' to Section 6.5(d)(i) and Section 1.4 of Appendix D.

3. Provide an Interim CAT-Order-ID on an ''As Requested'' Basis

(a) Overview

CAT LLC proposes to amend the CAT NMS Plan to provide for delivery of an interim CAT-Order-ID on an ''as requested'' basis, rather than on a regular ongoing basis. Specifically, where there is an immediate regulatory need (for example, in the case of a major market event), upon request of a senior officer of the Division of Trading and Markets, the Division of Enforcement, or the Division of Examinations to CAT LLC, the Plan Processor would be directed create an interim CAT-Order-ID and make it available to regulators by T+1 at 9 p.m. ET if the request is received prior to T+1 at 8 a.m. ET, or generally within 14 hours of receiving the request if such request was received after T+1 at 8 a.m. ET. This would preserve the SEC's ability to obtain an interim CAT-Order-ID on an as needed basis, while avoiding the substantial cost of delivering an interim CAT-Order-ID on a regular ongoing basis.

Subject to the proposals described above with respect to Options Market Maker Quotes, there would be no change to any other aspect of the CAT NMS Plan requirements for the processing of data, error feedback, and final delivery of data to regulators by T+5 at 8 a.m. ET, and no impact to Industry Members. Consistent with current CAT NMS Plan requirements, prior to 12:00 p.m. ET on T+1, regulators will continue to have access to raw unprocessed data that has been ingested by the Plan Processor, and between 12:00 p.m. on T+1 and T+5, regulators will continue to have access to all iterations of unlinked, processed data.

This change is estimated to result in approximately $2 million in annual compute savings, with minimal regulatory impact. Based on current data volumes, the estimated cost of an ad hoc interim CAT-Order-ID delivery is approximately $10,000 to $12,000 per request.[24] CAT LLC would add a separate line item to its budget to reflect costs related to any SEC requests to generate an interim CAT-Order-ID.

The Participants believe that the anticipated savings associated with this change substantially outweigh the minimal regulatory impact.

(b) Current CAT NMS Plan Requirements

Appendix D, Section 6.1 of the CAT NMS Plan states that ''Noon Eastern Time T+1 (transaction date + one day)'' is the deadline for ''initial data validation, lifecycle linkages and communication of errors to CAT Reporters.'' The CAT NMS Plan further explains that the Plan Processor must ''link and create the order lifecycle'' using a ''daisy chain approach,'' in which, ''a series of unique order identifiers assigned to all order events handled by CAT Reporters are linked together by the Central Repository and assigned a single CAT-generated CAT-Order-ID that is associated with each individual order event and used to create the complete lifecycle of an order.'' [25]

Pursuant to a Commission exemptive order, the Plan Processor assigns an interim CAT-Order-ID by T+1 at 9 p.m. ET, rather than by the T+1 at noon Eastern Time deadline set forth in the CAT NMS Plan.[26] The Plan Processor subsequently provides a final CAT-Order-ID at T+5 at 8 a.m. ET, pursuant to the following timeline:

T+1 @8 a.m. ET: Initial submissions due
T+1 @12 p.m. ET: Initial data validation, communication of errors to CAT Reporters; unlinked data available to regulators
T+1 @9 p.m. ET: Interim CAT-Order-ID available [27]
T+3 @8 a.m. ET: Resubmission of corrected data
T+4 @8 a.m. ET: Final lifecycle assembly begins, reprocessing of late submissions and corrections
T+5 @8 a.m. ET: Corrected data available to Participant regulatory staff and the SEC

CAT LLC proposes to clarify that the Plan does not require assignment of interim CAT-Order-IDs on a regular ongoing basis; rather, interim CAT-Order-IDs shall be provided on an ''as requested'' basis. Specifically, upon request of a senior officer of the Division of Trading and Markets, the Division of Enforcement, or the Division of Examinations to CAT LLC, the Plan Processor would be directed create an interim CAT-Order-ID and make it available to regulators by T+1 at 9 p.m. ET if the request is received prior to T+1 at 8 a.m. ET, or generally within 14 hours of receiving the request if such request was received after T+1 at 8 a.m. ET. There would be no change to any other aspect of the processing timeline.

(c) Estimated Cost Savings

Based on current data volumes, providing for delivery of an interim CAT-Order-ID on an ''as requested'' basis, rather than on a regular ongoing basis, is estimated to result in approximately $2 million in annual

[24] This cost savings estimate has been calculated assuming the Plan Processor's implementation of functionality to provide a final CAT-Order-ID and lifecycle linkage for options quotes by T+2 at 8 a.m. ET (in lieu of T+5 at 8 a.m. ET), which is expected in April 2024.

[25] Appendix D, Section 3 of the CAT NMS Plan at D–8.

[26] Exchange Act Release No. 98848 (Nov. 2, 2023), 88 FR 77128 (Nov. 8, 2023). *See also* Exchange Act Release No. 97530 (May 18, 2023), 88 FR 33655 (May 24, 2023); Exchange Act Release No. 95234 (July 8, 2022), 87 FR 42247 (July 14, 2022); Exchange Act Release No. 90688 (Dec. 16, 2020), 85 FR 83634 (Dec. 22, 2020).

[27] The Commission's exemptive order provides that the Plan Processor will no longer be required to provide an interim CAT-Order-ID for Options Quotes once it has developed and implemented the functionality to provide a final CAT-Order-ID and lifecycle linkage for Options Quotes by T+2 at 8 a.m. ET, including all enrichments currently provided for such order events at T+5 at 8 a.m. ET. When late or corrected data is received for Options Quotes between T+1 at 8 a.m. ET and T+4 at 8 a.m. ET, the Plan Processor must run, on an ad hoc basis, a second processing cycle such that lifecycle linkage and all enrichments currently provided for such order events are performed by T+5 at 8 a.m. ET. *See* Exchange Act Release No. 98848 (Nov. 2, 2023), 88 FR 77128, 77130 (Nov. 8, 2023). To the extent the proposed amendments are approved, the Plan Processor would no longer be required to create any lifecycle linkages for Options Market Maker Quotes.

savings.[28] CAT LLC believes that these cost savings are readily justified given the minimal impact on regulatory access to CAT Data.

Based on current data volumes, the estimated cost of an ad hoc interim CAT-Order-ID delivery is approximately $10,000 to $12,000 per request.[29] CAT LLC would add a separate line item to its budget to reflect costs related to any SEC requests to generate an interim CAT-Order-ID.

While CAT LLC believes it would be reasonable and appropriate to incur such cost to address a pressing regulatory need on an as needed basis, such as in the event of a market event, the substantial cost of delivering an interim CAT-Order-ID on a continuous basis outweighs any regulatory benefit.

(d) Proposed Revisions to CAT NMS Plan

CAT LLC proposes to amend the CAT NMS Plan to eliminate the requirement to provide an interim CAT-Order-ID on a regular ongoing basis. Specifically, CAT LLC proposes to delete the phrase ''lifecycle linkages'' from the following bullet in Section 6.1 of Appendix D of the CAT NMS Plan: ''Noon Eastern Time T+1 (transaction date + one day)—Initial data validation, lifecycle linkages and communication of errors to CAT Reporters.'' Similarly, CAT LLC proposes to delete the phrase ''Life Cycle Linkage'' from the second box in Figure A in Section 6.1 of Appendix D of the CAT NMS Plan. The box currently states the following: ''12:00 p.m. ET T+1 Initial Validation, Life Cycle Linkage, Communication of Errors.'' With the change, this box would state ''12:00 p.m. ET T+1 Initial Validation, Communication of Errors.''

CAT LLC also proposes to amend the CAT NMS Plan to require CAT LLC to provide an interim CAT-Order-ID on an ''as requested'' basis. Specifically, CAT LLC proposes to add the following provision to Section 6.1 of Appendix D of the CAT NMS Plan: ''Where there is an immediate regulatory need (for example, in the case of a major market event), upon request of a senior officer of the Division of Trading and Markets, the Division of Enforcement, or the Division of Examinations to CAT LLC, the Plan Processor shall be directed to create an interim CAT-Order-ID and make it available to regulators by T+1 at 9 p.m. ET if the request is received prior to T+1 at 8 a.m. ET, or generally within 14 hours of receiving the request if such request was received after T+1 at 8 a.m. ET.''

4. Incorporate Exemptive Relief Permitting Deletion of Industry Test Data Older Than Three Months and Include CAIS Data

(a) Overview; Prior Commission Exemptive Order

CAT Reporters engage in testing related to the reporting of order and transaction data to the CAT, both pursuant to required testing and on a voluntary basis. In connection with this testing, CAT LLC, through the Plan Processor, retains the test data submitted by Industry Members and Participants, feedback files related to such data, and output files that hold the detailed transactions, referred to herein as ''Industry Test Data''.[30]

On June 2, 2023, CAT LLC requested exemptive relief from Rule 17a–1 under the Exchange Act and certain provisions of the CAT NMS Plan relating to the retention of Industry Test Data beyond three months.[31] On November 27, 2023, the Commission granted the requested relief.[32] The exemptive request and the Commission's order apply only to Industry Test Data related to the CAT order and transaction system, not to the customer account and information system (''CAIS'').

CAT LLC is now proposing to incorporate the exemptive relief into the CAT NMS Plan to clarify that data from industry testing for both Industry Members and Participants may be deleted after three months. In addition, the amendments would apply to Industry Test Data related to both transaction system and CAIS data.

(b) Current CAT NMS Plan Requirements; Exchange Act Rule 17a–1

Appendix D of the CAT NMS Plan specifically requires the retention of Industry Test Data for three months only.[33] Specifically, Appendix D of the CAT NMS Plan states that ''[d]ata from industry testing must be saved for three months.'' [34] Separate from this specific three-month retention requirement in Appendix D of the CAT NMS Plan, Rule 17a–1 under the Exchange Act and other more general recordkeeping provisions of the CAT NMS Plan set forth lengthier record retention periods of five and six years, respectively. Rule 17a–1 under the Exchange Act requires every national securities exchange and national securities association ''to keep and preserve at least one copy of all documents, including all correspondence, memoranda, papers, books, notices, accounts, and other such records as shall be made or received by it in the course of its business as such and in the conduct of its self-regulatory activity,'' [35] and to keep all such documents ''for a period of not less than five years, the first two years in an easily accessible place, subject to the destruction and disposition provisions of Rule 17a–6.'' [36] The CAT is a facility of each of the Participants to the CAT NMS Plan. In addition, Section 9.1 of the CAT NMS Plan, the general recordkeeping provision for the CAT NMS Plan, incorporates by reference the requirements of Rule 17a–1 under the Exchange Act. Specifically, Section 9.1 of the CAT NMS Plan states, in relevant part, that ''[t]he Company shall maintain

[28] For a discussion of how cost savings estimates are calculated, *see supra* note 8. This estimate represents additional savings to be achieved following the implementation of the options quotes ''single pass'' proposal targeted for the end of April 2024, which eliminates options quotes from the interim lifecycle processing. The average typical daily compute costs for interim lifecycle processing (Linker and ETL data processing) is estimated to be approximately $8,000/day to $10,000/day for a typical day based on current data volumes (including savings attributable to the daily ODCR and Compute Savings Plans), which totals approximately $2 million per year based on 252 trading days per year.

[29] This estimate includes compute and storage costs for a daily ad hoc interim lifecycle processing, assuming the implementation of the options quotes ''single pass'' proposal, and is based on on demand rates for a typical day with average data volumes, less options quotes data volumes and their associated storage needs. The estimated number of authorized ad hoc runs per year that would be requested by the SEC cannot be predicted by CAT LLC or the Plan Processor.

[30] Separately, CAT LLC, through the Plan Processor, also retains operational metrics associated with industry testing for six years in accordance with the Plan. Specifically, Section 1.2 of Appendix D of the CAT NMS Plan requires that ''[o]perational metrics associated with industry testing (including but not limited to testing results, firms who participated, and amount of data reported and linked) must be stored for the same duration as the CAT production data.'' The proposed amendments do not affect such operational metrics.

[31] *See* Letter from Brandon Becker, CAT NMS Plan Operating Committee Chair, to Vanessa Countryman, Secretary, Commission, dated June 2, 2023, *https://catnmsplan.com/sites/default/files/2023-06/06.02.23-Exemptive-Request-Test-Data-Retention.pdf.* As noted in the exemptive request, CAT LLC does not believe that Industry Test Data constitutes documents covered by Rule 17a–1 under the Exchange Act and adheres to its view that the specific three-month period for Industry Test Data supersedes the more general, longer retention periods in the CAT NMS Plan, but submitted the exemptive request to obtain regulatory clarity in light of the SEC staff's comments that the longer retention periods set forth in Rule 17a–1 under the Exchange Act and the CAT NMS Plan may apply to Industry Test Data.

[32] Exchange Act Release No. 99023 (Nov. 27, 2023), 88 FR 84026 (Dec. 1, 2023).

[33] Ordinarily, specific provisions in a statute or regulation prevail over general provisions which might appear to the contrary. *See, e.g., RadLAX Gateway Hotel, LLC* v. *Amalgamated Bank,* 566 U.S. 639, 645 (2012) (*citing Morales* v. *Trans World Airlines, Inc.,* 504 U.S. 374, 384 (1992)).

[34] Appendix D, Section 1.2 of the CAT NMS Plan at D–4.

[35] Rule 17a–1(a) under the Exchange Act.

[36] Rule 17a–1(b) under the Exchange Act.

complete and accurate books and records of the Company in accordance with SEC Rule 17a–1.''

(c) Estimated Cost Savings

Prior to the Commission's exemptive order, the Plan Processor had been retaining Industry Test Data beyond the three-month period prescribed by Appendix D of the CAT NMS Plan; eliminating Industry Test Data older than three months as permitted by the exemptive order is expected to achieve approximately $1 million per year in savings. The proposed amendments would not generate additional cost savings beyond those achievable pursuant to the exemptive order, but would incorporate the exemptive relief into the CAT NMS Plan itself.

Proposed Revisions to CAT NMS Plan

CAT LLC proposes to amend the CAT NMS Plan to clarify that Industry Test Data related to both the CAT order and transaction system and to CAIS may be deleted after three months. Specifically, CAT LLC proposes to revise the following bullet in Section 1.2 of Appendix D of the CAT NMS Plan: ''Data from industry testing must be saved for three months. Operational metrics associated with industry testing (including but not limited to testing results, firms who participated, and amount of data reported and linked) must be stored for the same duration as the CAT production data.'' CAT LLC proposes to add the following as the second sentence of the bullet: ''Notwithstanding any other provision of the CAT NMS Plan, this Appendix D, or Exchange Act Rule 17a–1, such test data (whether related to the CAT order and transaction system or the customer account and information system) may be deleted by the Plan Processor after three months.'' With this phrase, the bullet would state: ''Data from industry testing must be saved for three months. Notwithstanding any other provision of the CAT NMS Plan, this Appendix D, or Exchange Act Rule 17a–1, such test data (whether related to the CAT order and transaction system or the customer account and information system) may be deleted by the Plan Processor after three months. Operational metrics associated with industry testing (including but not limited to testing results, firms who participated, and amount of data reported and linked) must be stored for the same duration as the CAT production data.''

B. Governing or Constituent Documents

Not applicable.

C. Implementation of Amendment

The Participants propose to implement the proposal upon approval of the proposed amendment to the CAT NMS Plan.

D. Development and Implementation Phases

Not applicable.

E. Analysis of Impact on Competition

CAT LLC does not believe that the proposed amendment would result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Exchange Act. Indeed, CAT LLC believes that the proposed amendments will have a positive impact on competition, efficiency and capital formation. The proposed amendments will provide substantial savings in CAT costs while providing minimal impact on the regulatory use of CAT Data. Such substantial savings would inure to the benefit of all participants in the markets for NMS Securities and OTC Equity Securities, including Participants, Industry Members, and most importantly, the investors.

F. Written Understanding or Agreements Relating To Interpretation of, or Participation in Plan

Not applicable.

G. Approval by Plan Sponsors in Accordance With Plan

Section 12.3 of the CAT NMS Plan states that, subject to certain exceptions, the CAT NMS Plan may be amended from time to time only by a written amendment, authorized by the affirmative vote of not less than two-thirds of all of the Participants, that has been approved by the SEC pursuant to Rule 608 of Regulation NMS under the Exchange Act or has otherwise become effective under Rule 608 of Regulation NMS under the Exchange Act. In addition, the proposed amendment was discussed during Operating Committee meetings. The Participants, by a vote of the Operating Committee taken on March 26, 2024, have authorized the filing of this proposed amendment with the SEC in accordance with the CAT NMS Plan.

H. Description of Operation of Facility Contemplated by the Proposed Amendment

Not applicable.

I. Terms and Conditions of Access

Not applicable.

J. Method of Determination and Imposition, and Amount of, Fees and Charges

Not applicable.

K. Method and Frequency of Processor Evaluation

Not applicable.

L. Dispute Resolution

Not applicable.

ARTICLE VI

FUNCTIONS AND ACTIVITIES OF CAT SYSTEM

. . .

Section 6.5. Central Repository.

. . .

(b) Retention of Data.

(i) Consistent with Appendix D, Data Retention Requirements, the Central Repository shall retain the information collected pursuant to paragraphs (c)(7) and (e)(7) of SEC Rule 613 in a convenient and usable standard electronic data format that is directly available and searchable electronically without any manual intervention by the Plan Processor for a period of not less than six (6) years**, subject to the exceptions in Section 6.3 of Appendix D**. Such data when available to the Participant regulatory staff and the SEC shall be linked.

(ii) The Plan Processor shall implement and comply with the records retention policy contemplated by Section 6.1(d)(i) (as such policy is reviewed and updated periodically in accordance with Section 6.1(d)(i)).

* * * * *

APPENDIX D

. . .

1.2 Technical Environments

The architecture must include environments for production, development, quality assurance testing, disaster recovery, industry-wide coordinated testing, and individual on-going CAT Reporter testing. The building and introduction of environments available to CAT Reporters may be phased in to align with the following agreed upon implementation milestones:

The architecture must include environments for production, development, quality assurance testing, disaster recovery, industry-wide coordinated testing, and individual on-going CAT Reporter testing. The building and introduction of environments available to CAT Reporters may be phased in to align with the following agreed upon implementation milestones:

- Development environment – the development environment must be created to build, develop, and maintain enhancements and new requirements. This environment must be separate from those listed below.

- Quality assurance environment – a quality assurance (QA) environment must be created to allow simulation and testing of all applications, interfaces, and data integration points contained in the CAT System.
    - The QA environment shall be able to simulate end-to-end production functionality and perform with the same operational characteristics, including processing speed, as the production environment.
    - The QA environment shall support varied types of changes, such as, but not limited to, the following:
        - Application patches;
        - Bug fixes;
        - Operating system upgrades;
        - Introduction of new hardware or software components;
        - New functionality;
        - Network changes;
        - Regression testing of existing functionality;
        - Stress or load testing (simulation of production-level usage); and
        - Recovery and failover.
    - A comprehensive test plan for each build and subsequent releases must be documented.
- Production environment – fully operational environment that supports receipt, ingestion, processing and storage of CAT Data. Backup/disaster recovery components must be included as part of the production environment.
- Industry test environment –
    - The Plan Processor must provide an environment supporting industry testing (test environment) that is functionally equivalent to the production environment, including:
        - End-to-end functionality (e.g., data validation, processing, linkage, error identification, correction and reporting mechanism) from ingestion to output, sized to meet the standards of the production SLA;
        - Performance metrics that mirror the production environment; and
        - Management with the same information security policies applicable to the production environment.
    - The industry test environment must also contain functionality to support industry testing, including:
        - Minimum availability of 24x6;
        - Replica of production data when needed for testing;
        - Data storage sized to meet varying needs, dependent upon scope and test scenarios; and
        - Support of two versions of code (current and pending).

- The industry test environment must support the following types of industry testing:
  - Technical upgrades made by the Plan Processor;
  - CAT code releases that impact CAT Reporters;
  - Changes to industry data feeds (e.g., SIP, OPRA, etc.);
  - Industry-wide disaster recovery testing;
  - Individual CAT Reporter and Data Submitter testing of their upgrades against CAT interfaces and functionality; and
  - Multiple, simultaneous CAT Reporter testing.
- The industry test environment must be a discrete environment separate from the production environment.
- The Plan Processor must provide the linkage processing of data submitted during coordinated, scheduled, industry-wide testing. Results of the linkage processes must be communicated back to Participants as well as to the Operating Committee.
- Data from industry testing must be saved for three months. **Notwithstanding any other provision of the CAT NMS Plan, this Appendix D, or Exchange Act Rule 17a-1, such test data (whether related to the CAT order and transaction system or the customer account and information system) may be deleted by the Plan Processor after three months.** Operational metrics associated with industry testing (including but not limited to testing results, firms who participated, and amount of data reported and linked) must be stored for the same duration as the CAT production data.
- The Plan Processor must provide support for industry testing, including testing procedures, coordination of industry testing, publish notifications, and provide help desk support during industry testing.
- The Participants and the SEC must have access to industry test data.

. . .

1.4 Data Retention Requirements

The Plan Processor must develop a formal record retention policy and program for the CAT, to be approved by the Operating Committee, which will, at a minimum:

- Contain requirements associated with data retention, maintenance, destruction, and holds;
- Comply with applicable SEC record-keeping requirements;
- Have a record hold program where specific CAT Data can be archived offline for as long as necessary;
- Store and retain both raw data submitted by CAT Reporters and processed data; and
- Make data directly available and searchable electronically without manual intervention for at least six years**, subject to the exceptions in Section 6.3 of Appendix D**.

. . .

3. Reporting and Linkage Requirements

All CAT Data reported to the Central Repository must be processed and assembled to create the complete lifecycle of each Reportable Event. Reportable Events must contain data elements sufficient to ensure the same regulatory coverage currently provided by existing regulatory reporting systems that have been identified as candidates for retirement.

Additionally, the Central Repository must be able to:

- Assign a unique CAT-Reporter-ID to all reports submitted to the system based on sub-identifiers, (e.g., MPIDs, ETPID, trading mnemonic) currently used by CAT Reporters in their order handling and trading processes.

- Handle duplicate sub-identifiers used by members of different Participants to be properly associated with each Participant.

- Generate and associate one or more Customer-IDs with all Reportable Events representing new orders received from a Customer(s) of a CAT Reporter. The Customer-ID(s) will be generated from a Firm Designated ID provided by the CAT Reporter for each such event, which will be included on all new order events.

- Accept time stamps on order events handled electronically to the finest level of granularity captured by CAT Reporters. Additionally, the CAT must be able to expand the time stamp field to accept time stamps to an even finer granularity as trading systems expand to capture time stamps in ever finer granularity. The Plan Processor must normalize all processed date/time CAT Data into a standard time zone/format.

In addition, the data required from CAT Reporters will include all events and data elements required by the Plan Processor in the Technical Specifications to build the:

- Life cycle of an order for defined events within a CAT Reporter;

- Life cycle of an order for defined events intra-CAT Reporter; and

- State of all orders across all CAT Reporters at any point in time.

The Plan Processor must use the "daisy chain approach" to link and create the order lifecycle. In the daisy chain approach, a series of unique order identifiers, assigned to all order events handled by CAT Reporters are linked together by the Central Repository and assigned a single CAT-generated CAT-Order-ID that is associated with each individual order event and used to create the complete lifecycle of an order.

By using the daisy chain approach the Plan Processor must be able to link all related order events from all CAT Reporters involved in the lifecycle of an order. At a minimum, the Central Repository must be able to create the lifecycle between:

- All order events handled within an individual CAT Reporter, including orders routed to internal desks or departments with different functions (e.g., an internal ATS);

- Customer orders to "representative" orders created in firm accounts for the purpose of facilitating a customer order (e.g., linking a customer order handled on a riskless principal basis to the street-side proprietary order);
- Orders routed between broker-dealers;
- Orders routed from broker-dealers to exchanges;
- Orders sent from an exchange to its routing broker-dealer;
- Executed orders and trade reports;
- Various legs of option/equity complex orders; and
- Order events for all equity and option order handling scenarios that are currently or may potentially be used by CAT Reporters, including:
    - Agency route to another broker-dealer or exchange;
    - Riskless principal route to another broker-dealer or exchange capturing within the lifecycle both the customer leg and street side principal leg;
    - Orders routed from one exchange through a routing broker-dealer to a second exchange;
    - Orders worked through an average price account capturing both the individual street side execution(s) and the average price fill to the Customer;
    - Orders aggregated with other orders for further routing and execution capturing both the street side executions for the aggregated order and the fills to each customer order;
    - Complex orders involving one or more options legs and an equity leg, with a linkage between the option and equity legs;
    - Complex orders containing more legs than an exchange's order management system can accept, causing the original order to be broken into multiple orders;
    - Orders negotiated over the telephone or via a negotiation system;
    - Orders routed on an agency basis to a foreign exchange;
    - Execution of customer order via allocation of shares from a pre-existing principal order;
    - Market maker quotes; and
    - Complex orders involving two or more options legs.

Additionally, the Central Repository must be able to:

- Link each order lifecycle back to the originating Customer;
- Integrate and appropriately link reports representing repairs of original submissions that are rejected by the CAT due to a failure to meet a particular data validation;
- Integrate into the CAT and appropriately link reports representing records that are corrected by a CAT Reporter for the purposes of correcting data errors not identified in the data validation process;

- Assign a single CAT-Order-ID to all events contained within the lifecycle of an order so that regulators can readily identify all events contained therein; and

- Process and link Manual Order Events with the remainder of the associated order lifecycle.

As described in Section 3.4 of Appendix D, Options Market Maker Quotes in Listed Options and related Reportable Events will be subject to ingestion only and will not be subject to any linkage requirements.

. . .

3.4 Requirements for Options Market Maker Quotes in Listed Options

The provisions of this section shall govern the processing and storage of Options Market Maker Quotes in Listed Options and related Reportable Events and shall override any conflicting provisions in the CAT NMS Plan, this Appendix D, or Exchange Act Rule 17a-1.

Options Market Maker Quotes in Listed Options must be reported to the Central Repository as provided under Section 6.4(d)(iii) of the CAT NMS Plan. This data will undergo ingestion only and such unlinked data will be made available to regulators by T+1 at 12:00 p.m. Eastern Time. Options Market Maker Quotes in Listed Options will not be subject to any requirement to link and create an order lifecycle, and will not undergo any validation, feedback, linkage, or enrichment processing. Options Market Maker Quotes in Listed Options will be accessible through BDSQL and Direct Read interfaces only and will not be accessible through the online targeted query tool.

. . .

6.1 Data Processing

CAT order events must be processed within established timeframes to ensure data can be made available to Participants' regulatory staff and the SEC in a timely manner. The processing timelines start on the day the order event is received by the Central Repository for processing. Most events must be reported to the CAT by 8:00 a.m. Eastern Time the Trading Day after the order event occurred (referred to as transaction date). The processing timeframes below are presented in this context. All events submitted after T+1 (either reported late or submitted later because not all of the information was available) must be processed within these timeframes based on the date they were received.

The Participants require the following timeframes (Figure A) for the identification, communication and correction of errors from the time an order event is received by the processor:

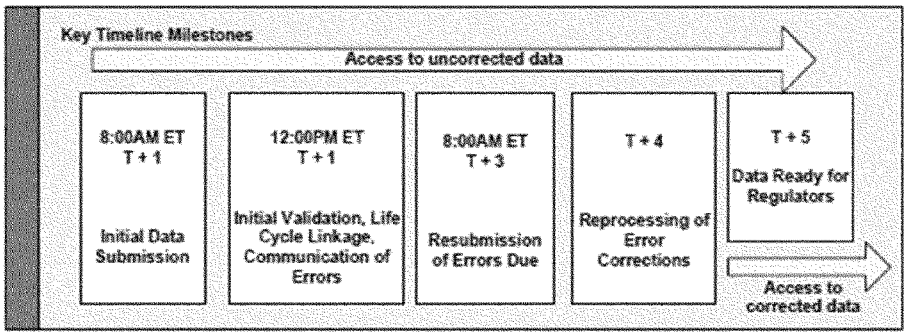
- Noon Eastern Time T+1 (transaction date + one day) – Initial data validation**[, lifecycle linkages]** and communication of errors to CAT Reporters;

- 8:00 a.m. Eastern Time T+3 (transaction date + three days) – Resubmission of corrected data; and

- 8:00 a.m. Eastern Time T+5 (transaction date + five days) – Corrected data available to Participant regulatory staff and the SEC.

Late submissions or re-submissions (after 8:00 a.m.) may be considered to be processed that day if it falls within a given time period after the cutoff. This threshold will be determined by the Plan Processor and approved by the Operating Committee. In the event that a significant portion of the data has not been received as monitored by the Plan Processor, the Plan Processor may decide to halt processing pending submission of that data.

Figure A: CAT Central Repository Data Processing Timelines



{**changes to second box in chart:** 12:00 PM ET T+1 Initial Validation, **[Life Cycle Linkage,]** Communication of Errors}

Where there is an immediate regulatory need (for example, in the case of a major market event), upon request of a senior officer of the Division of Trading and Markets, the Division of Enforcement, or the Division of Examinations to CAT LLC, the Plan Processor shall be directed to create an interim CAT-Order-ID and make it available to regulators by T+1 at 9 p.m. ET if the request is received prior to T+1 at 8 a.m. ET, or generally within 14 hours of receiving the request if such request was received after T+1 at 8 a.m. ET.

For the avoidance of doubt, processing and storage of Options Market Maker Quotes in Listed Options and related Reportable Events shall be governed by Section 3.4 of Appendix D.

. . .

6.3 Exceptions to Data Availability Requirements

Notwithstanding any other provision of the CAT NMS Plan, this Appendix D, or Exchange Act Rule 17a-1, the following types of data may be retained in an archive storage tier, in which case they will be made available upon request by Participant regulatory staff or the SEC to the CAT Help Desk. Archived data is not directly available and searchable electronically without manual intervention and will not be subject to any query tool performance requirements until it is restored to an accessible storage tier.

- **All interim raw unprocessed data (i.e., as submitted data) and operational data older than 15. Interim operational data includes all processed, validated and unlinked data and made available to regulators by T+1 at 12:00 p.m. ET, and all iterations of processed data made available to regulators between T+1 and T+5, but excludes the final version of corrected data that is made available at T+5 at 8:00 a.m. ET.**

- **All submission and feedback files older than 15 days.**

. . .

8.1 Regulator Access

The Plan Processor must provide Participants' regulatory staff and the SEC with access to all CAT Data for regulatory purposes only. Participants' regulatory staff and the SEC will access CAT Data to perform functions, including economic analyses, market structure analyses, market surveillance, investigations, and examinations.

The CAT must be able to support, at a minimum, 3,000 regulatory users within the system. It is estimated that approximately 20% of all users will use the system on a daily or weekly basis while approximately 10% of all users will require advanced regulator-user access, as described below. Furthermore, it is estimated that there may be approximately 600 concurrent users accessing the CAT at any given point in time. These users must be able to access and use the system without an unacceptable decline in system performance.[37]

As stated in Appendix D, Data Security, the Plan Processor must be able to support an arbitrary number of user roles. Defined roles must include, at a minimum:

- Basic regulator users – Individuals with approved access who plan to use the Central Repository to run basic queries (e.g., pulling all trades in a single stock by a specific party).

- Advanced regulator users – Individuals with approved access who plan to use the Central Repository to construct and run their own complex queries.

Regulators will have access to processed CAT Data through two different methods, an online-targeted query tool and user-defined direct queries and bulk extracts.

As described in Section 3.4 of Appendix D, Options Market Maker Quotes in Listed Options and related Reportable Events will be accessible through BDSQL and Direct Read interfaces only and will not be accessible through the online targeted query tool.

III. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the amendment is consistent with the Exchange Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number 4–698 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number 4–698. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed amendment that are filed with the Commission, and all written communications relating to the proposed amendment between the Commission and any person, other than those that may be withheld from the

[37] Specific performance requirements will be included in the SLA.

public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal offices of the Participants. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number 4–698 and should be submitted on or before May 7, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[38]

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011–01–P

[38] 17 CFR 200.30–3(a)(85).

SMALL BUSINESS ADMINISTRATION

Privacy Act of 1974; System of Records

AGENCY: U.S. Small Business Administration.

ACTION: Notice of a modified system of records.

SUMMARY: The U.S. Small Business Administration (SBA) proposes to modify its system of records titled, Small Business Investment Company Information System (SBICIS) (SBA 40), to update its inventory of records systems subject to the Privacy Act of 1974, as amended. Publication of this notice complies with the Privacy Act and the Office of Management and Budget (OMB) Circular A–108 and Circular A–130. System of Records Notice (SORN) titled, Small Business Investment Company Information System (SBA 40), serves as a centralized and automated framework for the organization, retrieval, and analysis of SBIC information which supports the SBA's oversight and risk management roles for the SBIC program.

DATES: Submit comments on or before May 16, 2024. This revised system will be effective upon publication. Routine uses will become effective on the date following the end of the comment period unless comments are received which result in a contrary determination.

ADDRESSES: You may submit comments on this notice, identified by [DOCKET NUMBER SBA–2023–0014], by any of the following methods:

Federal e-Rulemaking Portal: *http://www.regulations.gov:* Follow the instructions for submitting comments. Mail/Hand Delivery/Courier: Submit written comments to: Kerry Vance, Director, Information Technology and Data Strategy, Office of Investment and Innovation, U.S. Small Business Administration, 409 3rd Street SW, Washington, DC 20416.

FOR FURTHER INFORMATION CONTACT: General questions, please contact Kerry Vance, Director, Information Technology and Data Strategy, Office of Investment and Innovation, U.S. Small Business Administration, 409 3rd Street SW, Washington, DC 20416 or via email, *Kerry.Vance@sba.gov,* telephone 202–205–6160 or Kelvin L. Moore, Chief Information Security Officer, Office of the Chief Information Officer, U.S. Small Business Administration, 409 3rd Street SW, Suite 4000, Washington, DC 20416, email address: *Kelvin.Moore@sba.gov,* telephone 202–921–6273. For Privacy related matters, please contact LaWanda Burnette, Chief Privacy Officer, Office of the Chief Information Officer, or via email to *Privacyofficer@sba.gov.*

SUPPLEMENTARY INFORMATION: The Privacy Act of 1974 (5 U.S.C. 552a), as amended, embodies fair information practice principles in a statutory framework governing how federal agencies collect, maintain, use, and disseminate individuals' personal information. The Privacy Act applies to records about individuals that are maintained in a ''system of records.'' A system of records is any group of records under the control of a federal agency from which information is retrieved by the name of an individual or by a number, symbol or any other identifier assigned to the individual. The Privacy Act requires each federal agency to publish in the **Federal Register** a System of Records Notice (SORN) identifying and describing each system of records the agency maintains, the purpose for which the agency uses the Personally Identifiable Information (PII) in the system, the routine uses for which the agency discloses such information outside the agency, and how individuals can exercise their rights related to their PII information.

The modified Privacy Act system of records titled Small Business Investment Company Information System (SBICIS) (SBA 40) will be used to provide notice to current and former (i) prospective Small Business Investment Company license applicants, (ii) SBIC applicants, (iii) SBICs (solely for the purpose of this SORN, the term ''SBIC'' refers to each of (i), (ii), and (iii). This includes managers, executives, members, and employees associated or affiliated with an SBIC, and personal and professional references for certain of the foregoing. It also includes SBIC investors, SBIC portfolio companies, certain SBIC portfolio company employees, SBIC service providers, and certain other individuals associated, affiliated or involved with an SBIC.

Additionally, this modification to the system of records Small Business Investment Company Information System (SBICIS) (SBA 40) also includes changing the short name to SBA SBICIS 40 to easily identify the system short name with its numeric value. Lastly, this modification adds three new routine uses: (H), (I) and (J), respectively.

This system of records is comprised of electronic records managed by the Office of Investment and Innovation (OII). SBA SBICIS 40 will not have any undue impact on the privacy of individuals and its use is compatible with collection.

SYSTEM NAME AND NUMBER:

Small Business Investment Company Information System (SBA SBICIS 40).

SECURITY CLASSIFICATION:

Controlled Unclassified Information

SYSTEM LOCATION:

SBA Headquarters, 409 3rd Street SW, Washington, DC 20416 and vendor cloud platform.

SYSTEM MANAGER(S):

Kerry Vance, Director, Information Technology and Data Strategy, Office of Investment and Innovation, U.S. Small Business Administration, 409 3rd Street SW, Washington, DC 20416 or via email *Kerry.Vance@sba.gov,* telephone 202–205–6160.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Small Business Investment Act of 1958, as amended, 15 U.S.C. 661, *et seq.*

CATEGORIES OF RECORDS IN THE SYSTEM:

Personal and commercial information (including name, address, telephone number, credit history, background information, business information, employer identification number, SBIC License number, financial information, investor commitments, identifying number or other personal identifiers, regulatory compliance information) on individuals and portfolio companies named in SBIC files.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the information contained in this system may be disclosed to authorized entities, as is determined to be relevant and necessary, outside SBA as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

A. To the Department of Justice (DOJ), including offices of the U.S. Attorneys, or other Federal agency conducting litigation or in proceedings before any court, adjudicative, or administrative body, when it is deemed by the SBA to be relevant or necessary to the litigation or SBA has an interest in such litigation when any of the following are a party to the litigation or have an interest in the litigation: (1) Any employee or former employee of the SBA in his or her official capacity; (2) Any employee or former employee of the SBA in his or her individual capacity when DOJ or SBA has agreed to represent the employee or a party to the litigation or have an interest in the litigation; or (3) The United States or any agency thereof.

B. To a Congressional office from the record of an individual in response to an inquiry from that Congressional office made at the request of the individual. The member's access rights are no greater than those of the individual.

C. To the National Archives and Records Administration (NARA) or General Services Administration (GSA) pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

D. To an agency or organization, including the SBA's Office of Inspector General, for the purpose of performing audit or oversight operations as authorized by law, but only such information as is necessary and relevant to such audit or oversight function.

E. To appropriate agencies, entities, and persons when: (1) The SBA suspects or has confirmed that the security or confidentiality of information processed and maintained by the SBA has been compromised, (2) the SBA has determined that as a result of the suspected or confirmed compromise, there is a risk of identity theft or fraud, harm to economic or property interests, harm to an individual, or harm to the security or integrity of this system or other systems or programs (whether maintained by SBA or any other agency or entity) that rely upon the compromised information; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the SBA's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

F. To another Federal agency or Federal entity, when the SBA determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in: (1) Responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

G. To another agency or agent of a government jurisdiction within or under the control of the U.S., lawfully engaged in national security or homeland defense when disclosure is undertaken for intelligence, counterintelligence activities (as defined by 50 U.S.C. 3003(3)), counterterrorism, homeland security, or related law enforcement purposes, as authorized by U.S. law or Executive Order.

H. To other Federal agencies or Federal entities when mandated by executive orders or statute, or as documented by a Memorandum of Understanding or Memorandum of Agreement or Information Exchange Agreement or Data Sharing Agreement (''Agreements'') and approved by the applicable Authorizing Officials in compliance with the Privacy Act of 1974, as amended, 5 U.S.C. 552a and SBA's policies. These Agreements may be subject to review and approval by SBA's Office of General Counsel and SBA's Senior Agency Official for Privacy or designee and are for the purpose of performing analysis, metrics, or reports in support of marketing or initiatives and programs that SBICs may opt into participate in without any obligation or commitment.

I. To other Federal agencies or Federal entities in aggregate and anonymized for the purpose of marketing, trends, statistical analysis, forecasting, reporting, and research where the information must preserve anonymity.

J. To SBA contractors, grantees, interns, regulators, and experts who have been engaged by SBA to assist in the performance and performance improvement of a service related to this system of records and who need access to the records to perform this activity which may also include for regulatory purposes. Recipients of these records shall be required to comply with the requirements of the Privacy Act of 1974, as amended, 5 U.S.C. 552a.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

SBICIS records are retrieved by SBIC or Portfolio Company Name, affiliation with a particular SBIC personal identifier, SBA identifier, employer identification number, or any other data field that would enable SBA to perform its official duties.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records are maintained in accordance with SBA Standard Operating Procedure (SOP) 00 41 latest edition, applicable General Records Schedules (GRS) and are disposed of in accordance with applicable SBA policies.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Information stored by SBICIS is stored electronically and supported by the applicable Privacy Impact Assessment(s). Data is protected through the implementation of access controls—least permissions, role-based user permissions, event logging, monitoring, security assessment and authorization reviews, encryption transmission and encrypted data at rest. Safeguards implemented comply to SBA policies, industry best practices, and Federal Government standards, memoranda, and circulars.

RECORD ACCESS PROCEDURES:

Individuals wishing to request access to records about them should submit a Privacy Act request to the SBA Chief, Freedom of Information and Privacy Act Office, U.S. Small Business Administration, 409 Third St. SW, Eighth Floor, Washington, DC 20416 or *FOIA@sba.gov.* Individuals must provide their full name, mailing address, personal email address, telephone number, and a detailed description of the records being requested. Individuals requesting access must also follow SBA's Privacy Act regulations regarding verification of identity and access to records (13 CFR part 102 subpart B).

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

BILLING CODE 8026–09–P

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Notice of Establishment and Request for Nominations for the Seasonal and Perishable Agricultural Products Advisory Committee

AGENCY: Office of the United States Trade Representative.

ACTION: Notice and request for applications.

SUMMARY: The Office of the United States Trade Representative (USTR) and the U.S. Department of Agriculture (USDA) have established a new trade advisory committee known as the Seasonal and Perishable Agricultural Products Advisory Committee (Committee) to provide advice and recommendations to the U.S. Trade Representative and the Secretary of Agriculture in connection with U.S. trade policy that concerns administrative actions and legislation that would promote the competitiveness of Southeastern U.S. producers of seasonal and perishable agricultural products. USTR is accepting applications from qualified individuals interested in serving a four year term as a Committee member.

DATES: USTR will accept nominations on a rolling basis for Committee membership for an initial four-year charter term.

FOR FURTHER INFORMATION CONTACT: Anthony Reyes at *MBX.USTR.IAPE@USTR.EOP.GOV* or 202–881–4804.

SUPPLEMENTARY INFORMATION:

1. Background

Section 135(c) of the Trade Act of 1974, as amended (19 U.S.C. 2155(c)), authorizes the President to establish appropriate sectoral or functional trade advisory committees. The President delegated that authority to the U.S. Trade Representative in Executive Order 11846, section 4(d), issued on March 27, 1975.

Pursuant to this authority, the U.S Trade Representative, jointly with the Secretary of Agriculture, established the Committee to provide advice and recommendations to them on trade policy and development matters that have a significant relationship to administrative actions and legislation that would promote the competitiveness of Southeastern U.S. producers of seasonal and perishable agricultural products.

The Committee meets as needed in person or by virtual or telephone conference, generally four times per year, at the call either of the U.S. Trade Representative and the Secretary of Agriculture or their designee, depending on various factors such as the level of activity of trade negotiations and the needs of the U.S. Trade Representative and the Secretary of Agriculture.

II. Membership

The U.S. Trade Representative and Secretary of Agriculture jointly appoint up to 25 members who represent the views and interests of Southeast U.S. producers of seasonal and perishable agricultural products. In addition to general trade, investment, and development issues, members must have expertise in areas such as:

- growing and selling seasonal and perishable fruits and vegetables.
- understanding the needs and market dynamics affecting producers of seasonal and perishable fruits and vegetables in the Southeastern United States.
- understanding the existing state and federal support programs and resources for producers of seasonal and perishable fruits and vegetables.
- developing and presenting actionable recommendations to U.S. government officials.

To ensure that the Committee is broadly representative, USTR and USDA will consider qualified representatives of key sectors and groups of the economy with an interest in seasonal and perishable produce within the Southeastern United States. Fostering diversity, equity, inclusion and accessibility (DEIA) is one of the top priorities.

The U.S. Trade Representative and the Secretary of Agriculture appoint members jointly and members serve at their discretion. Members serve for a term of up to four years or until the Committee is scheduled to expire. The U.S. Trade Representative and the Secretary of Agriculture may reappoint individuals for any number of terms.

The U.S. Trade Representative and the Secretary of Agriculture are committed to a trade agenda that advances racial equity and supports underserved communities and will seek advice and recommendations on trade policies that eliminate social and economic structural barriers to equality and economic opportunity, and to better understand the projected impact of proposed trade policies on communities of color and underserved communities. USTR and USDA strongly encourage diverse backgrounds and perspectives and makes appointments to the Committee without regard to political affiliation and in accordance with equal opportunity practices that promote diversity, equity, inclusion, and accessibility. USTR and USDA strive to ensure balance in terms of sectors, demographics, and other factors relevant to USTR's needs.

Committee members serve without either compensation or reimbursement of expenses. Members are responsible for all expenses they incur to attend meetings or otherwise participate in Committee activities. Committee members must be able to obtain and maintain a security clearance in order to serve and have access to classified and trade sensitive documents. They must meet the eligibility requirements at the time of appointment and at all times during their term of service.

Committee members are appointed to represent their sponsoring U.S. entity's interests on U.S. trade policy that affects the competitiveness of Southeastern U.S. producers of seasonal and perishable agricultural products, and thus the foremost consideration for applicants is their ability to carry out the goals of section 135(c) of the Trade Act of 1974, as amended. Other criteria include the applicant's knowledge of and expertise in international trade issues as relevant to the work of the Committee, USTR and USDA. USTR anticipates that almost all Committee members will serve in a representative capacity with a limited number serving in an individual capacity as subject matter experts. These members, known as special government employees, are subject to conflict of interest rules and may have to complete a financial disclosure report.

III. Request for Nominations

USTR is soliciting nominations for membership on the Committee. To apply for membership, an applicant must meet the following eligibility criteria at the time of application and at all times during their term of service as a Committee member:

1. The person must be a U.S. citizen.
2. The person cannot be a full-time employee of a U.S. governmental entity.
3. If serving in an individual capacity, the person cannot be a federally registered lobbyist.
4. The person cannot be registered with the U.S. Department of Justice under the Foreign Agents Registration Act.
5. The person must be able to obtain and maintain a security clearance.
6. For representative members, who will comprise almost all of the Committee, the person must represent a U.S. organization whose members (or funders) have a demonstrated interest in issues relevant to agricultural trade or have personal experience or expertise in agricultural trade.

7. For eligibility purposes, a ''U.S. organization'' is an organization established under the laws of the United States, that is controlled by U.S. citizens, by another U.S. organization (or organizations), or by a U.S. entity (or entities), determined based on its board of directors (or comparable governing body), membership, and funding sources, as applicable. To qualify as a U.S. organization, more than 50 percent of the board of directors (or comparable governing body) and more than 50 percent of the membership of the organization to be represented must be U.S. citizens, U.S. organizations, or U.S. entities. Additionally, at least 50 percent of the organization's annual revenue must be attributable to nongovernmental U.S. sources.

8. For members who will serve in an individual capacity, the person must possess subject matter expertise regarding international trade issues.

In order to be considered for Committee membership, interested persons should submit the following to the Office of Intergovernmental Affairs and Public Engagement at *MBX.USTR.IAPE@USTR.EOP.GOV:*

- Name, title, affiliation, and contact information of the individual requesting consideration.
- If applicable, a sponsor letter on the organization's letterhead containing a brief description of the manner in which international trade affects the organization and why USTR should consider the applicant for membership.
- The applicant's personal resume.
- An affirmative statement that the applicant and the organization they represent meet all eligibility requirements.

USTR will consider applicants who meet the eligibility criteria in accordance with equal opportunity practices that promote diversity, equity, inclusion, and accessibility, based on the following factors:

- Ability to represent the sponsoring U.S. entity's or U.S. organization's and its subsector's interests on trade matters.
- Knowledge of and experience in U.S. trade policy that affects the competitiveness of Southeastern U.S. producers of seasonal and perishable agricultural products trade and environmental matters, as described in more detail in Part II above, that is relevant to the work of the Committee, USTR and USDA.
- How they will contribute to trade policies that eliminate social and economic structural barriers to equality and economic opportunity and to understanding of the projected impact of proposed trade policies on communities of color and underserved communities.
- Ensuring that the Committee is balanced in terms of points of view, demographics, geography, and entity or organization size.

Roberto Soberanis,

Assistant U.S. Trade Representative for Intergovernmental Affairs and Public Engagement, Office of the United States Trade Representative.

BILLING CODE 3390–F4–P

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

Agency Information Collection Activities: Revision of an Approved Information Collection; Comment Request; Reporting and Recordkeeping Requirements Associated With Liquidity Coverage Ratio: Liquidity Risk Measurement, Standards, and Monitoring

AGENCY: Office of the Comptroller of the Currency (OCC), Treasury.

ACTION: Notice and request for comment.

SUMMARY: The OCC, as part of its continuing effort to reduce paperwork and respondent burden, invites comment on a continuing information collection, as required by the Paperwork Reduction Act of 1995 (PRA). In accordance with the requirements of the PRA, the OCC may not conduct or sponsor, and the respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. The OCC is soliciting comment concerning a revision to its information collection titled, ''Reporting and Recordkeeping Requirements Associated with Liquidity Coverage Ratio: Liquidity Risk Measurement, Standards, and Monitoring.''

DATES: Comments must be received by June 17, 2024.

ADDRESSES: Commenters are encouraged to submit comments by email, if possible. You may submit comments by any of the following methods:

- *Email: prainfo@occ.treas.gov.*
- *Mail:* Chief Counsel's Office, Attention: Comment Processing, Office of the Comptroller of the Currency, Attention: 1557–0323, 400 7th Street SW, Suite 3E–218, Washington, DC 20219.
- *Hand Delivery/Courier:* 400 7th Street, SW, Suite 3E–218, Washington, DC 20219.
- *Fax:* (571) 293–4835.

Instructions: You must include ''OCC'' as the agency name and ''1557–0323'' in your comment. In general, the OCC will publish comments on *www.reginfo.gov* without change, including any business or personal information provided, such as name and address information, email addresses, or phone numbers. Comments received, including attachments and other supporting materials, are part of the public record and subject to public disclosure. Do not include any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure.

Following the close of this notice's 60-day comment period, the OCC will publish a second notice with a 30-day comment period. You may review comments and other related materials that pertain to this information collection beginning on the date of publication of the second notice for this collection by the method set forth in the next bullet.

- *Viewing Comments Electronically:* Go to *www.reginfo.gov.* Hover over the ''Information Collection Review'' tab and click on ''Information Collection Review'' from the drop-down menu. From the ''Currently under Review'' drop-down menu, select ''Department of Treasury'' and then click ''submit.'' This information collection can be located by searching OMB control number ''1557–0323'' or ''Reporting and Recordkeeping Requirements Associated with Liquidity Coverage Ratio: Liquidity Risk Measurement, Standards, and Monitoring.'' Upon finding the appropriate information collection, click on the related ''ICR Reference Number.'' On the next screen, select ''View Supporting Statement and Other Documents'' and then click on the link to any comment listed at the bottom of the screen.
- For assistance in navigating *www.reginfo.gov,* please contact the Regulatory Information Service Center at (202) 482–7340.

FOR FURTHER INFORMATION CONTACT: Shaquita Merritt, Clearance Officer, (202) 649–5490, Chief Counsel's Office, Office of the Comptroller of the Currency, 400 7th Street SW, Washington, DC 20219. If you are deaf, hard of hearing, or have a speech disability, please dial 7–1–1 to access telecommunications relay services.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501 *et seq.*), Federal agencies must obtain approval from the OMB for each collection of information that they conduct or sponsor.

''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) to include agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of title 44 generally requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, the OCC is publishing notice of the revision of this collection.

Title: Reporting and Recordkeeping Requirements Associated with Liquidity Coverage Ratio: Liquidity Risk Measurement, Standards, and Monitoring. *OMB Control No.:* 1557–0323.

Type of Review: Regular.

Affected Public: Businesses or other for-profit.

Description: The Office of the Comptroller of the Currency (OCC), the Board of Governors of the Federal Reserve System (the Board), and the Federal Deposit Insurance Corporation (FDIC) (collectively, the agencies) implemented a quantitative liquidity requirement, known as the liquidity coverage ratio (LCR), and a stable funding requirement, known as the net stable funding ratio (NSFR), that apply to certain large banking organizations. For the OCC, these standards are implemented through 12 CFR part 50, Liquidity Risk Measurement Standards. The LCR is designed to promote the short-term resilience of the liquidity risk profile of covered banking organizations and promote improvements in the measurement and management of liquidity risk. The NSFR is designed to reduce the likelihood that disruptions to a banking organization's regular sources of funding will compromise its liquidity position, promote effective liquidity risk management, and support the ability of banking organizations to provide financial intermediation to businesses and households across a range of market conditions.

Twelve CFR part 50 applies to large national banks and Federal savings associations. Banks that must comply with part 50 (covered banks) generally include GSIB depository institutions (*i.e.,* depository institutions of global systemically important bank holding companies) supervised by the OCC; Category II national banks and Federal savings associations ; Category III national banks and Federal savings associations; [1] and any national bank or Federal savings association for which the OCC has determined that application of part 50 is appropriate in light of certain risk factors. The reporting and recordkeeping requirements contained in this collection are used to monitor covered banks' compliance with the LCR and NSFR.

The OCC proposes to revise the ''Reporting and Recordkeeping Requirements Associated with the Liquidity Coverage Ratio: Liquidity Risk Measurement, Standards, and Monitoring'' information collection to account for three recordkeeping requirements in part 50, contained in sections 50.4(a), 50.22(a)(1) and (a)(4), that had not been previously cleared by the OCC under the Paperwork Reduction Act (PRA).

Section-by-Section Analysis

The reporting and recordkeeping requirements are found in sections 50.4, 50.22, 50.40, 50.109, and 50.110.

Reporting Requirements

Section 50.40(a) requires a covered bank to notify the OCC on any business day when its LCR is calculated to be less than the minimum requirement set by section 50.10.

Section 50.40(b) provides that if a covered bank is required to calculate its LCR on the last business day of each calendar month and its LCR is below the minimum requirement in section 50.10 on the last business day of the applicable calendar month, or if the OCC has determined that the covered bank is otherwise materially noncompliant, then the covered bank must promptly consult with the OCC to determine whether the covered bank must provide to the OCC a plan for achieving compliance with the minimum liquidity requirement in section 50.10 and all other requirements of part 50. Section 50.40(b) further provides that if a covered bank is required to calculate its LCR each business day and its LCR is below the minimum requirement in section 50.10 for three consecutive business days, or if the OCC has determined that the covered bank is otherwise materially noncompliant, the covered bank must promptly provide to the OCC a plan for achieving compliance with the minimum liquidity requirement in section 50.10 and all other requirements of part 50.

The liquidity plan must include, as applicable, (1) an assessment of the covered bank's liquidity position; (2) the actions the covered bank has taken and will take to achieve full compliance, including a plan for adjusting the covered bank's risk profile, risk management, and funding sources in order to achieve full compliance and a plan for remediating any operational or management issues that contributed to noncompliance; (3) an estimated time frame for achieving full compliance; and (4) a commitment to provide a progress report to the OCC at least weekly until full compliance is achieved.

Section 50.110 requires a covered bank to take certain actions following any NSFR shortfall. Section 50.110(a) requires a covered bank to notify the OCC of the shortfall no later than 10 business days (or such other period as the OCC may otherwise require by written notice) following the date that any event has occurred that would cause or has caused the covered bank's NSFR to be less than 1.0.

Section 50.110(b) requires a covered bank to submit to the OCC, within 10 business days of certain triggering events (or such other period as the OCC may otherwise require by written notice), its plan for remediation of its NSFR to at least 1.0. This submission is required if the covered bank has or should have provided notice to the OCC that its NSFR is or will become less than 1.0, the covered bank's reports or disclosures to the OCC indicate that the NSFR is less than 1.0, or the OCC notifies the covered bank that a plan is required and provides a reason for requiring such a plan. Section 50.110(b) also requires a covered bank that has submitted such a plan to report to the OCC at least monthly, or at such other frequency as required by the OCC, on its progress to achieve compliance.

The NSFR remediation plan must include, as applicable, (1) an assessment of the covered bank's liquidity profile; (2) the actions the covered bank has taken and will take to achieve a net stable funding ratio equal to or greater than 1.0 as required under section 50.100, including (a) a plan for adjusting the covered bank's liquidity profile; (b) a plan for remediating any operational or management issues that contributed to noncompliance with the NSFR requirement; and (3) an estimated time frame for achieving full compliance with section 50.100.

Recordkeeping Requirements

Section 50.4(a)(1) provides that in order for a covered bank to recognize an agreement as a qualifying master netting agreement for the purpose of section 50.3, the covered bank must conduct a sufficient legal review to conclude with

[1] Category II and III national banks and Federal savings associations are defined in 12 CFR 50.3.

a well-founded basis (and maintain sufficient written documentation of that legal review) that: (i) the agreement meets the requirements of the definition of qualifying master netting agreement in section 50.3 and (ii) in the event of a legal challenge, the relevant judicial and administrative authorities would find the agreement to be legal, valid, binding, and enforceable under the law of the relevant jurisdictions.

Section 50.4(a)(2) also requires a covered bank to establish and maintain written procedures to monitor possible changes in relevant law and to ensure that the agreement continues to satisfy the requirements of the definition of qualifying master netting agreement in section 50.3.

Section 50.22(a)(1) requires a covered bank to demonstrate the operational capability to monetize the bank's HQLA (*i.e.,* high-quality liquid assets) by implementing and maintaining procedures and systems to monetize any HQLA at any time in accordance with relevant standard settlement periods and procedures and periodically monetizing a sample of the HQLA that reflects the composition of the covered bank's eligible HQLA.

Section 50.22(a)(2) requires a covered bank to implement policies that require the eligible HQLA to be under the control of the management function in the covered bank that is charged with managing liquidity risk. The management function must evidence its control over the HQLA by segregating the HQLA from other assets, with the sole intent to use the HQLA as a source of liquidity, or by demonstrating the ability to monetize the assets and making the proceeds available to the liquidity management function without conflicting with a business or risk management strategy of the covered bank.

Section 50.22(a)(4) requires a covered bank to implement and maintain policies and procedures that determine the composition of its eligible HQLA on each calculation date by identifying, determining, and ensuring certain required steps.

Section 50.22(a)(5) requires a covered bank to have a documented methodology that results in a consistent treatment for determining that the covered bank's eligible HQLA meets the requirements of section 50.22.

Section 50.109(b) provides that if a covered bank includes an ASF (*i.e.,* available stable funding) amount in excess of the RSF (*i.e.,* required stable funding) amount of the consolidated subsidiary, it must implement and maintain written procedures to identify and monitor applicable statutory, regulatory, contractual, supervisory, or other restrictions on transferring assets from the consolidated subsidiaries. These procedures must document which types of transactions the institution could use to transfer assets from a consolidated subsidiary to the institution and how these types of transactions comply with applicable statutory, regulatory, contractual, supervisory, or other restrictions.

Estimated Burden

Estimated Frequency of Response: On occasion, annual.

Estimated Number of Respondents: 15.

Estimated Total Annual Burden: 735 hours.

Comments submitted in response to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on:

(a) Whether the collection of information is necessary for the proper performance of the functions of the OCC, including whether the information has practical utility;

(b) The accuracy of the OCC's estimate of the burden of the collection of information;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Patrick T. Tierney,

Assistant Director,Office of the Comptroller of the Currency.

BILLING CODE P

DEPARTMENT OF THE TREASURY

Agency Information Collection Activities; Proposed Collection; Comment Request; Request for Transfer of Property Seized/Forfeited by a Treasury Agency

AGENCY: Departmental Offices, U.S. Department of the Treasury.

ACTION: Notice of information collection; request for comment.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other federal agencies to comment on the proposed information collection listed below, in accordance with the Paperwork Reduction Act of 1995.

DATES: Written comments must be received on or before June 17, 2024.

ADDRESSES: Send comments regarding the burden estimate, or any other aspect of the information collection, including suggestions for reducing the burden, to Treasury PRA Clearance Officer, 1750 Pennsylvania Ave. NW, Suite 8100, Washington, DC 20220, or email at *PRA@treasury.gov.*

FOR FURTHER INFORMATION CONTACT: Copies of the submissions may be obtained from Spencer W. Clark by emailing *PRA@treasury.gov,* calling (202) 927–5331, or viewing the entire information collection request at *www.reginfo.gov.*

SUPPLEMENTARY INFORMATION:

Title: Request for Transfer of Property Seized/Forfeited by a Treasury Agency.

OMB Control Number: 1505–0152.

Type of Review: Revision of a currently approved collection.

Description: Form TD F 92–22.46 is necessary for State and local law enforcement agencies to apply for the sharing of seized assets from the Treasury Forfeiture Fund after participating in joint investigations with the Federal government. Treasury will be updating the form to include collection of the SAM/Unique Entity ID number for the requesting State or local agency.

Form: TD F 92–22.46.

Affected Public: State and local law enforcement agencies.

Estimated Number of Respondents: 1,000.

Frequency of Response: On occasion.

Estimated Total Number of Annual Responses: 7,000.

Estimated Time per Response: 30 minutes.

Estimated Total Annual Burden Hours: 3,500.

Request for Comments: Comments submitted in response to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will become a matter of public record. Comments are invited on: (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on

respondents, including through the use of technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services required to provide information.

Authority: 44 U.S.C. 3501 *et seq.*

Spencer W. Clark,

Treasury PRA Clearance Officer.

Improvements to Generator Interconnection Procedures and Agreements

AGENCY: Federal Energy Regulatory Commission.

ACTION: Order on rehearing and clarification.

SUMMARY: In this order, the Federal Energy Regulatory Commission addresses arguments raised on rehearing, sets aside, in part, and clarifies Order No. 2023, which amended the Commission's regulations and its pro forma Large Generator Interconnection Procedures, pro forma Large Generator Interconnection Agreement, pro forma Small Generator Interconnection Procedures, and pro forma Small Generator Interconnection Agreement to address interconnection queue backlogs, improve certainty, and prevent undue discrimination for new technologies.

DATES: This rule is effective May 16, 2024.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Background

1. On July 28, 2023, the Federal Energy Regulatory Commission (Commission) issued Order No. 2023.[1] Order No. 2023 required all public utility transmission providers to adopt revised *pro forma* Large Generator Interconnection Procedures (LGIP), *pro forma* Large Generator Interconnection Agreements (LGIA), *pro forma* Small Generator Interconnection Procedures (SGIP), and *pro forma* Small Generator Interconnection Agreements (SGIA).[2] These revisions ensure that interconnection customers are able to interconnect to the transmission system in a reliable, efficient, transparent, and timely manner, and will prevent undue discrimination.[3] In Order No. 2023, the Commission adopted a comprehensive package of reforms in three general categories: (1) reforms to implement a first-ready, first-served cluster study process, (2) reforms to increase the speed of interconnection queue processing, and (3) reforms to incorporate technological advancements into the interconnection process.

2. To implement a first-ready, first served cluster study process, Order No. 2023: (1) required transmission providers to post public interconnection information in an interactive heatmap to provide interconnection customers information before they enter the queue; (2) eliminated individual serial feasibility and system impact studies and created a cluster study; (3) created a range of allowable allocations of cluster study costs; (4) required transmission providers to use a proportional impact method to assign network upgrade costs within a cluster; (5) required increased financial commitments and readiness requirements from interconnection customers, including increased study deposits, site control, commercial readiness deposits, an LGIA deposit, and required transmission providers to institute penalties for withdrawn interconnection requests; and (6) created a transition mechanism for moving to the cluster study process adopted in Order No. 2023 from the existing serial study process.[4]

3. To increase the speed of interconnection queue processing, Order No. 2023: (1) eliminated the reasonable efforts standard for completing interconnection studies and adopted study delay penalties applicable when transmission providers fail to complete interconnection studies

[1] *Improvements to Generator Interconnection Procs. & Agreements,* Order No. 2023, 88 FR 61014 (Sept. 6, 2023), 184 FERC ¶ 61,054 (2023).

[2] *Id.* P 1 n.1 (''Section 201(e) of the Federal Power Act (FPA) defines ''public utility'' to mean ''any person who owns or operates facilities subject to the jurisdiction of the Commission under this subchapter.'' 16 U.S.C. 824(e). A non-public utility that seeks voluntary compliance with the reciprocity condition of a tariff may satisfy that condition by filing a tariff, which includes the *pro forma* LGIP, the *pro forma* SGIP, the *pro forma* LGIA, and the *pro forma* SGIA. *See Standardization of Generator Interconnection Agreements & Procs.,* Order No. 2003, 68 FR 49846 (Aug. 19, 2003), 104 FERC ¶ 61,103, at PP 1, 616 (2003), *order on reh'g,* Order No. 2003–A, 69 FR 15932 (Mar. 26, 2004), 106 FERC ¶ 61,220, *order on reh'g,* Order No. 2003–B, 70 FR 265 (Jan. 4, 2005), 109 FERC ¶ 61,287 (2004), *order on reh'g,* Order No. 2003–C, 70 FR 37661 (June 30, 2005), 111 FERC ¶ 61,401 (2005), *aff'd sub nom. Nat'l Ass'n of Regul. Util. Comm'rs* v. *FERC,* 475 F.3d 1277 (D.C. Cir. 2007) (*NARUC* v. *FERC*). As stated in the *pro forma* LGIP, *pro forma* LGIA, *pro forma* SGIP, and *pro forma* SGIA, transmission provider ''shall mean the public utility (or its designated agent) that owns, controls, or operates transmission or distribution facilities used for the transmission of electric energy in interstate commerce and provides transmission service under the [Transmission Provider's Tariff]. The term . . . should be read to include the Transmission Owner when the Transmission Owner is separate from the Transmission Provider.'' *Pro forma* LGIP section 1; *pro forma* LGIA art. 1; *pro forma* SGIP attach. 1; *pro forma* SGIA attach. 1.'').

[3] Order No. 2023, 184 FERC ¶ 61,054 at P 1.

[4] *Id.* P 5.

by the deadlines in their tariff; and (2) established a more detailed affected system study process in the *pro forma* LGIP, including *pro forma* affected system agreements and uniform modeling standards.[5]

4. To incorporate technological advancements into the interconnection process, Order No. 2023: (1) required transmission providers to allow more than one generating facility to co-locate on a shared site behind a single point of interconnection and share a single interconnection request; (2) required transmission providers to evaluate the proposed addition of a generating facility to an existing interconnection request prior to deeming such an addition a material modification; (3) required transmission providers to allow interconnection customers to access the surplus interconnection service process once the original interconnection customer has an executed LGIA or requests the filing of an unexecuted LGIA; (4) required transmission providers, at the request of the interconnection customer, to use operating assumptions in interconnection studies that reflect the proposed charging behavior of electric storage resources; (5) required transmission providers to evaluate an enumerated list of alternative transmission technologies during the study process; (6) required each interconnection customer requesting to interconnect a non-synchronous generating facility to submit to the transmission provider certain specific models of the generating facility; (7) established ride through requirements during abnormal frequency conditions and voltage conditions within the ''no trip zone'' defined by NERC Reliability Standard PRC–024–3 or successor mandatory ride through reliability standards; and (8) required that all newly interconnecting large generating facilities provide frequency and voltage ride through capability consistent with any standards and guidelines that are applied to other generating facilities in the balancing authority area on a comparable basis.[6]

5. The Commission received 32 timely filed requests for rehearing and/or clarification, and two additional requests for clarification.[7] The rehearing requests raise issues related to nearly all reforms adopted in Order No. 2023.

6. Pursuant to *Allegheny Defense Project* v. *FERC,*[8] the rehearing requests filed in this proceeding may be deemed denied by operation of law. However, as permitted by section 313(a) of the Federal Power Act (FPA),[9] we are modifying the discussion in Order No. 2023, setting aside the order, in part, and clarifying the order, as discussed below.[10]

7. Specifically, we set aside the order, in part, to specify that: (1) where an interconnection customer is in the interconnection queue of a transmission provider that currently uses, or is transitioning to, a cluster study process and the transmission provider proposes on compliance to adopt new readiness requirements for its annual cluster study, the interconnection customer must comply with the transmission provider's new readiness requirements within 60 days of the Commission-approved effective date of the transmission provider's compliance filing, where such readiness requirements are applicable given the status of the individual interconnection customer in the queue; (2) a network upgrade that is required for multiple interconnection customers in a cluster may be considered a stand alone network upgrade if all such interconnection customers mutually agree to exercise the option to build; (3) transmission providers must complete their determination that an interconnection request is valid by the close of the cluster request window such that only interconnection customers with valid interconnection requests proceed to the customer engagement window; and (4) acceptable forms of security for the Commercial Readiness Deposit and deposits prior to the Transitional Serial Study, Transitional Cluster Study, Cluster Restudy and the Interconnection Facilities Study should include not only cash or an irrevocable letter of credit, but also surety bonds or other forms of financial security that are reasonably acceptable to the transmission provider.

8. Additionally, we grant several clarifications on the following topics, as further discussed below: (1) conflicts with ongoing queue reform efforts; (2) public interconnection information; (3) cluster study process; (4) allocation of cluster network upgrade costs; (5) shared network upgrades; (6) withdrawal penalties; (7) study delay penalty and appeal structure; (8) affected systems; (9) revisions to the material modification process to require consideration of generating facility additions; (10) availability of surplus interconnection service; (11) operating assumptions for interconnection studies; (12) consideration of the enumerated alternative transmission technologies in interconnection studies; and (13) ride-through requirements.

9. Finally, in light of the revisions made to the *pro forma* LGIP, *pro forma* LGIA, *pro forma* SGIP, and *pro forma* SGIA herein, we extend the deadline for transmission providers to submit compliance filings until the effective date of this order (*i.e.,* the new deadline for compliance with Order No. 2023 will be 30 days after the publication of this order in the **Federal Register**, and must include the further revisions reflected in this order).

II. Discussion

A. Need for Reform

1. Order No. 2023

10. The Commission stated that it found substantial evidence in the record to support the conclusion that the existing *pro forma* generator interconnection procedures and agreements were unjust, unreasonable, and unduly discriminatory or preferential.[11] Therefore, pursuant to FPA section 206, the Commission concluded that certain revisions to the *pro forma* open access transmission tariff and the Commission's regulations were necessary to ensure rates that are just, reasonable, and not unduly discriminatory or preferential. Specifically, the Commission found that the existing *pro forma* generator interconnection procedures and agreements were insufficient to ensure that interconnection customers are able to interconnect to the transmission system in a reliable, efficient, transparent, and timely manner, thereby ensuring that rates, terms, and conditions for Commission-jurisdictional services are just, reasonable, and not unduly discriminatory or preferential. The

[9] 16 U.S.C. 825*l*(a) (''Until the record in a proceeding shall have been filed in a court of appeals, as provided in subsection (b), the Commission may at any time, upon reasonable notice and in such manner as it shall deem proper, modify or set aside, in whole or in part, any finding or order made or issued by it under the provisions of this chapter.'').

[10] *Allegheny Def. Project,* 964 F.3d at 16–17. In Appendices C, D, E, and F, we provide the revisions to the provisions of the *pro forma* LGIP, *pro forma* LGIA, *pro forma* SGIP, and *pro forma* SGIA made in this order on rehearing and clarification. Additionally, these Appendices reflect several non-substantive corrections in these appendices to address stylistic inconsistencies or clerical errors in some of the new and revised *pro forma* provisions.

[11] Order No. 2023, 184 FERC ¶ 61,054 at P 37.

Commission stated that, absent reform, the interconnection process will continue to cause interconnection queue backlogs, longer development timelines, and increased uncertainty regarding the cost and timing of interconnecting to the transmission system. The Commission explained that these backlogs and delays, and the resulting timing and cost uncertainty, hinder the timely development of new generation and thereby stifle competition in the wholesale electric markets resulting in rates, terms, and conditions that are unjust, unreasonable, and unduly discriminatory or preferential.

11. The Commission cited recent data to support its findings that the dramatic increase in the number of interconnection requests and limited transmission capacity are increasing interconnection queue backlogs across all regions of the country.[12] This data indicated that, as of the end of 2022, there were over 10,000 active interconnection requests in interconnection queues throughout the United States, representing over 2,000 gigawatts (GW) of potential generation and storage capacity.[13] These interconnection requests and the generating facilities they represent amount to the largest interconnection queue size on record, more than four times the total volume (in GW) of the interconnection queues in 2010, and a 40% increase over the interconnection queue size from just the year prior. The Commission explained that these trends are not exclusive to any specific region of the country; rather, every region, including regional transmission organizations (RTO), independent system operators (ISO), and non-RTOs/ISOs, has faced an increase in both interconnection queue size and the length of time interconnection customers are spending in the interconnection queue prior to commercial operation in recent years. The Commission noted that the uncertainty and delays in the interconnection queues have resulted in fewer than 25% of interconnection requests, by capacity, reaching commercial operation between 2000 and 2017 in *any* region of the country—with some regions as low as 8%.

12. The Commission also cited recent data that interconnection customers are waiting longer in the interconnection queue before withdrawing their interconnection requests, even as overall interconnection study timelines are increasing in many regions.[14] Despite efforts to address these challenges, the Commission observed that interconnection queue backlogs and delays have persisted and worsened. For generating facilities built in 2022, wait times in the interconnection queue saw a marked increase from 2.1 years for generating facilities built in 2000–2010 to roughly five years for generating facilities built in 2022.

13. The Commission explained that delays in the interconnection study process are an important contributor to interconnection queue backlogs nationwide.[15] The Commission cited recent interconnection study metrics transmission providers filed with the Commission, as required by Order No. 845, which showed that of the 2,179 interconnection studies completed in 2022, 68% were issued late. At the end of 2022, an additional 2,544 studies were delayed (*i.e.,* ongoing and past their deadline). All of the RTOs/ISOs except CAISO and most non-RTO/ISO transmission providers (14 of 38) reported pending delayed studies at the end of 2022.

14. The Commission found that numerous factors have contributed to the increasing volume of interconnection requests, including a rapidly changing resource mix, market forces, and emerging technologies.[16] The Commission also found that available transmission capacity has been largely or fully used in many regions, creating situations where interconnection customers face significant network upgrade cost assignments to interconnect their proposed generating facilities. As an example, the Commission cited a U.S. DOE report that found that interconnection costs in MISO doubled for generating facilities for which the interconnection studies were completed between 2019 and 2021 as compared to those completed prior to 2019, and cost estimates tripled for proposed generating facilities still active in the interconnection queue between the same time periods.[17] The Commission also noted that other reports show similar cost increases in NYISO and PJM.[18] The Commission found that this combination of increased volume of interconnection requests and insufficient transmission capacity and therefore higher costs to interconnect, which can result in interconnection request withdrawals, has resulted in longer interconnection queue processing times and larger, more delayed interconnection queues.

15. The Commission explained that interconnection queue backlogs and delays have created uncertainty for interconnection customers regarding the timing and cost of ultimately interconnecting to the transmission system, which may lead to an increase in costs to consumers.[19] The Commission stated that delayed interconnection study results or unexpected cost increases can disrupt numerous aspects of generating facility development and such uncertainty, either on the part of transmission providers or interconnection customers, is ultimately passed through to consumers through higher transmission or energy rates. The Commission explained that increases in energy rates may result from wholesale customers having limited access to new and more competitive supplies of generation and that, conversely, efficient interconnection queues and well-functioning wholesale markets deliver benefits to consumers by driving down wholesale electricity costs.

16. Overall, due to continuing and increasing interconnection queue backlogs and study delays, the Commission found that the Commission's existing rules contained in the *pro forma* LGIP, *pro forma* LGIA, *pro forma* SGIP, and *pro forma* SGIA resulted in rates, terms, and conditions for Commission-jurisdictional services that are unjust, unreasonable, and unduly discriminatory or preferential.[20] The Commission found that the problems described above lead to an inability of interconnection customers to interconnect to the transmission system in a reliable, efficient, transparent, and timely manner, and

[19] *Id.* P 43.

[20] *Id.* P 44.

hindered the timely development of new generation, thereby stifling competition in the wholesale electric markets. Therefore, the Commission found that reform to the Commission's existing *pro forma* generator interconnection procedures and agreements was necessary.

17. The Commission based its findings that the *pro forma* LGIP, *pro forma* LGIA, *pro forma* SGIP, and *pro forma* SGIA must be reformed on the following features: (1) the information (or lack thereof) available to prospective interconnection customers and the commitments required of them to enter and progress through the interconnection queue; (2) the reliance on a serial first-come, first-served study process and the reasonable efforts standard that transmission providers are held to for meeting interconnection study deadlines; (3) the protocols (or lack thereof) for affected system studies; (4) the provisions for studying new generating facility technologies and evaluating the list of alternative transmission technologies enumerated in Order No. 2023; and (5) the modeling or performance requirements (or lack thereof) for non-synchronous generating facilities, including wind, solar, and electric storage facilities.[21] The Commission further explained each of these five features.

18. First, the Commission explained that, without a process by which an interconnection customer can obtain information about potential interconnection costs at a specific location or point of interconnection prior to submitting an interconnection request, it is difficult for interconnection customers to assess the commercial viability of a specific proposed generating facility prior to entering the interconnection queue.[22] The Commission also found that the *pro forma* interconnection procedures and agreements failed to include meaningful financial commitments and readiness requirements to enter and stay in the interconnection queue and lacked stringent requirements to establish the commercial viability of proposed generating facilities. As a result, the Commission explained, interconnection customers often submit multiple interconnection requests for proposed generating facilities at various points of interconnection, knowing that not all of them will reach commercial operation, as an exploratory mechanism to obtain information to allow the interconnection customer to choose to proceed with the interconnection request representing the most favorable site in terms of potential interconnection-related costs.

19. Second, the Commission explained that the existing serial first-come, first-served study process created incentives for interconnection customers to submit exploratory or speculative interconnection requests pursuant to which interconnection customers seek to secure valuable queue positions as early as possible, even if they are not prepared to move forward with the proposed generating facility.[23] Such generating facilities are often not commercially viable: thus, the interconnection customers ultimately withdraw their interconnection requests from the interconnection queue, which triggers reassessments and possible restudies by the transmission provider that can delay the timing and increase the cost to interconnect for lower-queued interconnection requests. The Commission found that the lack of access to information about a specific location or point of interconnection prior to submitting an interconnection request, the lack of any meaningful financial commitments in the *pro forma* interconnection procedures and agreements for interconnection customers to enter and stay in the interconnection queue, as well as the existing serial first-come, first-served study process, together incentivized interconnection customers to submit speculative interconnection requests that contribute to interconnection study backlogs, delays, and uncertainty, and, in turn, unjust and unreasonable Commission-jurisdictional rates.[24]

20. The Commission also found that interconnection queue backlogs and delays, and the accompanying uncertainty, have been further compounded because transmission providers have limited incentive to perform interconnection studies in a timely manner.[25] The Commission stated that, despite pervasive delays in completing interconnection studies by transmission providers, transmission providers have faced few, if any, consequences for failing to meet their tariff-imposed study deadlines under the reasonable efforts standard. The Commission therefore found that the existing *pro forma* LGIP requirement for transmission providers to make a reasonable effort to meet interconnection study deadlines contributes to the interconnection study backlogs, delays, and uncertainty that erects barriers to new generation, resulting in Commission-jurisdictional rates that are unjust and unreasonable.

21. Third, the Commission found that, without requirements for how and when transmission providers should complete affected system studies, those studies often lag behind those completed by the transmission provider to whose transmission system the interconnection customer proposes to interconnect (the host transmission provider) and are sometimes completed very late in the interconnection process, causing an additional round of delays and cost uncertainty for interconnection customers.[26] Additionally, for transmission providers that have procedures for how to complete affected system studies in their tariffs or other documents (*e.g.,* business practice manuals or joint operating agreements), the Commission found that those procedures are not consistent, may be hard for interconnection customers to locate, and may not represent the actual practices in use by the transmission provider, thus still creating uncertainty for interconnection customers. As a result, the Commission found that the lack of consistent requirements for affected system modeling and procedures results in Commission-jurisdictional rates that are unjust, unreasonable, and unduly discriminatory or preferential.

22. Fourth, the Commission found that the Commission's *pro forma* LGIP failed to accommodate the operating characteristics and technical capabilities of electric storage resources when it comes to specific interconnection procedures and modeling.[27] The Commission noted that interconnection queues predominantly consist of new technologies which have operating characteristics that differ from synchronous resources and were not anticipated when the Commission established the *pro forma* generator interconnection procedures and agreements in Order Nos. 2003 and 2006. The Commission noted that the existing *pro forma* generator interconnection procedures and agreements did not contemplate the operating characteristics or technical capabilities of electric storage resources, leading to electric storage resources being studied under inappropriate operating assumptions (*e.g.,* charging at full capacity during peak load conditions) that result in the assignment of unnecessary network upgrades which increase costs to interconnection customers. Therefore, the Commission found that the inability to modify

[21] *Id.* P 45.

[22] *Id.* P 46.

[23] *Id.* P 47.

[24] *Id.* P 48.

[25] *Id.* P 50.

[26] *Id.* P 51.

[27] *Id.* P 52.

operating assumptions for electric storage resources pursuant to the *pro forma* LGIP resulted in Commission-jurisdictional rates that are unjust, unreasonable, and unduly discriminatory or preferential.

23. The Commission also found that the existing *pro forma* interconnection procedures regarding material modifications did not provide for consistent evaluation of technology additions to an existing interconnection request, and that automatically deeming a request to add a generating facility to an existing interconnection request to be a material modification creates a significant barrier to access to the transmission system.[28]

24. Finally, the Commission found that the *pro forma* LGIP and *pro forma* SGIP failed to require the consideration of alternative transmission technologies that can be used as network upgrades and can be deployed more quickly and at a lower cost than, traditional network upgrades.[29] The Commission found that failing to require transmission providers to evaluate the enumerated list of alternative transmission technologies resulted in interconnection customers paying more than is just and reasonable to reliably interconnect new generating facilities, ultimately creating Commission-jurisdictional rates that are unjust, unreasonable, and unduly discriminatory or preferential.

25. Fifth, the Commission found that the Commission's existing *pro forma* LGIP and *pro forma* SGIP did not include a modeling requirement for non-synchronous generating facilities, which is necessary to enable the transmission provider to assess and model the facility's ability to respond appropriately to transmission system disturbances.[30] The Commission explained that interconnection customers must submit accurate and validated models, which will prevent study delays and ensure that transmission providers identify the necessary interconnection facilities and network upgrades to accommodate the interconnection request and thus allow the appropriate assignment of interconnection costs to the interconnection request. Therefore, the Commission found that the lack of a modeling requirement for non-synchronous generating facilities in the *pro forma* LGIP and *pro forma* SGIP results in rates that are unjust, unreasonable, and unduly discriminatory or preferential. Additionally, the Commission explained that the physical characteristics of synchronous generating facilities allow them to continue to inject electric current during transmission system disturbances, as required by the *pro forma* LGIA and *pro forma* SGIA.[31] However, non-synchronous generating facilities did not face a comparable requirement and many cease injecting current during system disturbances through ''momentary cessation,'' which creates reliability issues on the transmission system. The Commission stated that, without requirements for non-synchronous generating facilities to remain connected to and synchronized with the transmission system during system disturbances, interconnection studies may not accurately model expected behavior and identify the appropriate interconnection facilities and network upgrades to accommodate the interconnection request, skewing the assignment of interconnection costs. As a result, the Commission found that the lack of comparable requirements for non-synchronous generating facilities to remain ''connected to and synchronized with the [t]ransmission [s]ystem'' in the *pro forma* LGIA and *pro forma* SGIA results in rates that are unjust, unreasonable, and unduly discriminatory or preferential.

26. The Commission further found that the reforms adopted in Order No. 2023 will improve the efficiency of study processes, reduce interconnection queue backlogs, and thereby ensure just, reasonable, and not unduly discriminatory or preferential rates.[32] The Commission explained that the majority of the individual reforms that the Commission adopted have already been implemented in one or more regions in order to improve the interconnection process, demonstrating incremental improvements. The Commission compiled a package of such reforms that, in their entirety, have not yet been adopted by any region, and will ensure that interconnection customers are able to interconnect to the transmission system in a reliable, efficient, transparent, and timely manner.

2. Requests for Rehearing and Clarification

27. Dominion seeks rehearing, asserting that the Commission exceeded its FPA section 206 authority by declaring all existing interconnection tariffs, including recently accepted reforms by PJM and Dominion Energy South Carolina (DESC), as unjust, unreasonable, and unduly discriminatory or preferential without substantial evidence.[33] Dominion asserts that the Commission did not establish a sufficient legal foundation to generically find that all tariffs are unjust and unreasonable.[34] Similarly, Indicated PJM TOs argue that the Commission arbitrarily and capriciously relied on inapposite and stale evidence to impose a generic replacement rate on early adopters of the cluster study approach.[35] PJM also argues that the generic findings underlying Order No. 2023 cannot apply to its Interconnection Process Reform Task Force (IPRTF) Tariff, which was filed and approved during the time period between issuance of the NOPR and Order No. 2023.[36] Therefore, PJM contends, the data underlying Order No. 2023 is stale as to PJM and its use does not constitute reasoned decision-making based on substantial evidence.

28. Dominion acknowledges that the Commission is able to rely on generic rulemakings to support an industry wide solution, but that Order No. 2023 goes beyond the limits of this authority.[37] Dominion argues that Order No. 2023's mandate is unlike the generic rulemaking upheld by the D.C. Circuit in *Transmission Access Policy Study Group* v. *FERC* because the rule at issue in that case, Order No. 888, represented a paradigm shift for which a generic rulemaking is appropriate.[38] Dominion asserts that the other generic rulemakings upheld by the courts similarly involve more wholesale reform than Order No. 2023, such as the expansion and creation of new Order No. 1000 planning obligations upheld in *S.C. Pub. Serv. Auth.,* or the Order No. 637 requirement for gas pipelines to permit segmentation where

[32] *Id.* P 59.

[33] Dominion Rehearing Request at 2.

[34] *Id.* at 14 (citing *S.C. Pub. Serv. Auth.* v. *FERC,* 762 F.3d 71, 65 (D.C. Cir. 2014) (*S.C. Pub. Serv. Auth.*) (''To regulate a practice affecting rates pursuant to Section 206, the Commission must find that the existing practice is 'unjust, unreasonable, unduly discriminatory or preferential,' and that the remedial practice it imposes is 'just and reasonable.' These findings must be supported by 'substantial evidence[.]'''); *Emera Me.* v. *FERC,* 854 F.3d 9, 25 (D.C. Cir. 2017) (*Emera Me.*) (''[A] finding that an existing rate is unjust and unreasonable is the 'condition precedent' to FERC's exercise of its section 206 authority to change that rate. Section 206, therefore, imposes a 'dual burden' on FERC. Without a showing that the existing rate is unlawful, FERC has no authority to impose a new rate.'')).

[35] Indicated PJM TOs Rehearing Request at 7, 17.

[36] PJM Rehearing Request at 25–26.

[37] Dominion Rehearing Request at 12.

[38] *Id.* (citing *Transmission Access Pol'y Study Grp.* v. *FERC,* 225 F.3d 667 (D.C. Cir. 2000) (*TAPS*), *aff'd sub nom. N. Y.* v. *FERC,* 535 U.S. 1 (2002)); *see also* Indicated PJM TOs Rehearing Request at 14.

operationally feasible, upheld in *Interstate Natural Gas Association of America* v. *FERC.*[39] Dominion contends that the Commission's generic findings in Order No. 2023 are disproportionate to the evidence the Commission relies on. Similarly, Indicated PJM TOs assert that the Commission's generic finding is overbroad because many RTOs/ISOs have already adopted the core reforms in Order No. 2023.[40]

29. Dominion further argues that, while the courts have held that the Commission can address case-by-case discrepancies between the generic determination and specific tariffs during compliance filings, this cannot be considered an unlimited way for the Commission to avoid its obligation under the Administrative Procedure Act (APA) to rely on substantial evidence when making FPA section 206 decisions.[41] Dominion asserts that, because the Commission recently accepted revisions to PJM's and DESC's tariffs to address the same issue that Order No. 2023 attempts to address, the Commission must consider those tariffs individually and may not sweep them up in a generic determination based on evidence of queue backlogs made under previous tariffs and regions.

30. Dominion argues that Order No. 2023 was arbitrary and capricious because it relied on out-of-date data and ignored contrary data.[42] Dominion asserts that, although the Commission is not required to rely on ''empirical evidence,'' the Commission must support its findings with substantial, up-to-date, evidence and cannot ignore new circumstances.[43] Dominion asserts that Order No. 2023 does not reflect reasoned decision-making as it relates to PJM and DESC because it relies on queue delays and backlogs that predate PJM's and DESC's revised interconnection reforms and it does not consider those currently effective interconnection reforms. Indicated PJM TOs point out that the Order No. 845 data the Commission relied on is stale because it concerns PJM's previous serial study process, and the Commission's reliance on that data is inconsistent with its decision to omit SPP's data from its consideration.[44]

31. Dominion argues that the Commission ignored evidence that PJM and DESC had recently adopted interconnection reforms to address the same problem addressed by Order No. 2023.[45] Indicated PJM TOs state that the Commission points repeatedly to problems associated with a serial study approach, which are irrelevant to regions that already implemented cluster studies.[46] Dominion and Indicated PJM TOs argue that the Commission should have considered whether PJM's, DESC's, and other similarly situated transmission providers' reforms are working or even had a chance to be fully implemented.[47] Dominion argues that the Commission cited no evidence to demonstrate that PJM's tariff is unjust and unreasonable, and that it would be difficult to do so because PJM's transitional process began on July 10, 2023, so there is no data available to determine whether it is successful.[48] Similarly, Dominion notes that DESC's transition process began on June 13, 2022, was based on 12 months of stakeholder engagement, and includes many components of Order No. 2023. Dominion contends that reasoned decision-making should at least require the Commission to consider all relevant information, including information about the efficacy of reforms in existing tariffs that are attempting to address the same problem the Commission is relying upon to make its FPA section 206 determination.[49]

32. Dominion also states that Order No. 2023 directly acknowledges that CAISO and some non-RTO/ISO transmission providers had no delayed studies at the end of 2022.[50] Dominion argues that, instead of supporting the Commission's finding that all interconnection processes are unjust and unreasonable, Order No. 2023 acknowledges that the problem is not as widespread as suggested and that intervening reforms similar to what Order No. 2023 requires may already be addressing the problem used to justify the FPA section 206 finding.

33. Dominion states that, where an industry-wide solution is imposed for a problem that only exists in isolated pockets, ''the disproportion of remedy to ailment would, at least at some point, become arbitrary and capricious.'' [51] Dominion states that the Order No. 2023 compliance obligation essentially requires all existing processes to re-prove the justness and reasonableness of their processes, creating a remedy that is ''disproportionate'' to the identified problem.[52]

34. Dominion asks the Commission to confirm that, if compliance filings are required of early adopters like PJM and DESC, the Commission has the burden under FPA section 206 to find that existing processes recently adopted are unjust and unreasonable.[53] Dominion asserts that the Commission must hew to the constraints created by FPA section 206 and cannot shift the burden to individual early adopters to defend their current rates.

3. Determination

35. We sustain our finding in Order No. 2023 [54] that the existing *pro forma* generator interconnection procedures and agreements are unjust, unreasonable, and unduly discriminatory or preferential.[55] We also continue to find that Order No. 2023's revisions to the *pro forma* open access transmission tariff and the Commission's regulations are necessary to ensure rates that are just, reasonable, and not unduly discriminatory or preferential.

36. We note that Dominion's rehearing request misstates the Commission's generic finding as ''declaring all existing interconnection tariffs, including recently accepted reforms by PJM and DESC, as unjust, unreasonable, and unduly

discriminatory or preferential.'' [56] The findings in Order No. 2023 relate to the Commission's existing *pro forma* generator interconnection procedures and agreements, which, among other things, relied on a serial first-come, first-served study process.[57] The Commission did not make any findings regarding specific transmission provider's tariffs, and it was not required to do so under FPA section 206.[58] Issues regarding the individual tariffs of specific transmission providers that currently deviate from the existing *pro forma* generator interconnection procedures and agreements will be addressed on an individual basis on compliance.[59]

37. We disagree with Dominion's argument that Order No. 2023 goes beyond the limits of our authority to rely on a generic rulemaking to support an industry-wide solution. As noted above, Order No. 2023 adopts reforms to the existing *pro forma* interconnection procedures and agreements, which themselves were adopted as an industry-wide reform to identified, industry-wide problems.[60] All three of the cases Dominion relies on support the Commission's authority to issue Order No. 2023.

38. When the D.C. Circuit upheld Order No. 888 in *TAPS,* the court specifically explained that the Commission can rely on general findings of systemic conditions to impose an industry-wide remedy under FPA section 206.[61] The court agreed with the Commission that specific evidence regarding individual utilities' behavior is not required under FPA section 206. Similarly, when upholding Order No. 637 in *INGAA,* the D.C. Circuit stated that ''our cases have long held that the Commission may rely on 'generic' or 'general' findings of a systemic problem to support imposition of an industry-wide solution.'' [62] The D.C. Circuit explicitly rejected an argument that the Commission impermissibly shifted the burden of proof merely by requiring *pro forma* filings.[63] Several years later, when upholding Order No. 1000 in *S.C. Pub. Serv. Auth.,* the D.C. Circuit once again affirmed the Commission's ability to promulgate nationwide rules, in lieu of case-by-case adjudication, to solve a nationwide problem.[64] The court explained that, even though some regions had already satisfied some requirements of the rule, the deficiencies identified by the Commission did not only exist in ''isolated pockets,'' and ''[a]bsent such an extreme 'disproportion of remedy to ailment,' the Commission could reasonably proceed to address a systemic problem with an industry-wide solution.'' [65] Nothing in this precedent indicates that the Commission's authority to promulgate generic rulemakings under FPA section 206 depends upon the rule representing a paradigm shift. Rather, the precedent is clear that, where the Commission finds a systemic, nationwide problem that renders the rates, terms, and conditions for Commission-jurisdictional services unjust, unreasonable, unduly discriminatory, or preferential, the Commission has authority to implement a nationwide solution.[66]

39. Here, substantial evidence indicates that interconnection queue delays and backlogs are a nationwide problem, not a problem that only exists in isolated pockets. As explained in Order No. 2023, interconnection queue backlogs are increasing across all regions of the country, and ''every single region has faced an increase in both interconnection queue size and the length of time interconnection customers are spending in the interconnection queue prior to commercial operation in recent years. This is true for RTO/ISO and non-RTO/ISO regions alike.'' [67] ''[T]he uncertainty and delays in the interconnection queues have resulted in fewer than 25% of interconnection requests, by capacity, reaching commercial operation between 2000 and 2017 in *any* region of the country—with some regions as low as 8%.'' [68] Appendix B to Order No. 2023 shows that most transmission providers in the country were late in completing interconnection studies in 2022.[69] We acknowledge that the data collected in compliance with Order No. 845 regarding PJM's queue reflected PJM's previous study process, which was recently reformed. However, excluding PJM's data would not change our overall conclusion that interconnection queue backlogs and late interconnection studies are a significant problem in most regions of the country. To the contrary, we continue to find that ''the challenges being faced across the country will be further compounded in the future,'' [70] and that the multiple factors contributing to interconnection queue backlogs, longer development timelines, and increased uncertainty regarding the cost and timing of interconnecting to the transmission system, including increasing volume of interconnection requests, increased complexity in interconnection studies, and insufficient transmission capacity, are industry-wide challenges likely to persist and potentially worsen in the future.[71]

40. Moreover, due to the early stages of PJM's reforms, the instant record does not contain any information regarding the effects of such reforms, including whether PJM is meeting all study deadlines on time, the overall length of time to reach interconnection, or the portion of interconnection customers reaching commercial operation. Nor does the record support that any region, including PJM, is unaffected by the underlying factors that are persistent and increasing drivers of widespread interconnection queue delays and backlogs. Therefore, we continue to find that the systemic problems identified in Order No. 2023 warrant a nationwide solution.

41. In response to Dominion's contention that the Commission ignored evidence regarding recent queue reform efforts, we note that Order No. 2023 specifically referenced these ongoing queue reform efforts. The Commission stated:

> We recognize that many transmission providers have adopted or are in the process of adopting similar reforms to those adopted in this final rule. We do not intend to disrupt these ongoing transition processes or stifle further innovation. On compliance, transmission providers can propose deviations from the requirements adopted in this final rule—including deviations seeking to minimize interference with ongoing transition plans—and demonstrate how those deviations satisfy the standards [72] discussed

[72] Specifically, where transmission providers propose variations to the Order No. 2023 transition

above, which the Commission will consider on a case-by-case basis.[73]

In fact, in the NOPR underlying Order No. 2023, the Commission made clear that it reviewed these recent queue reform efforts, learned from them, and considered them in formulating a number of its proposals.[74]

42. However, as explained above, the Commission was not required to make FPA section 206 findings specific to PJM or DESC's queue reforms. The details of a specific transmission provider's tariff, and whether its recent queue reform complies with the new requirements of Order No. 2023, are appropriately handled on an individual basis on compliance.

43. We disagree with Dominion's argument that Order No. 2023's acknowledgement that some transmission providers had no delayed studies in 2022 indicates that the problem is not as widespread as suggested. The fact that a few transmission providers complete studies on time does not mean that the problem exists only in isolated pockets. As the D.C. Circuit explained in *S.C. Pub. Serv. Auth.,* the fact that a problem may not exist in every single region of the country ''is as unastonishing as it is irrelevant, because petitioners have not shown that the deficiencies identified by the Commission exist[] only in isolated pockets.'' [75]

44. Moreover, substantial evidence indicates that these nationwide interconnection queue delays and backlogs result in rates, terms, and conditions in the wholesale electric markets that are unjust, unreasonable, and unduly discriminatory or preferential.[76] Interconnection queue delays and backlogs result in longer development timelines, uncertainty regarding the cost and timing of interconnecting to the transmission system, and ultimately higher rates, as ''wholesale customers hav[e] limited access to new and more competitive supplies of generation.'' [77]

45. Further, we believe that the remedies adopted in Order No. 2023 are proportional to the issues identified. As explained in detail in Order No. 2023, each of the reforms the Commission adopted are directly related to the need to reform the *pro forma* generator interconnection procedures and agreements to ensure that interconnection customers are able to interconnect to the transmission system in a reliable, efficient, transparent, and timely manner, and will prevent undue discrimination.[78]

46. Further, we also believe that a generic, nationwide rulemaking is justified by the need for consistent interconnection policies that apply to all public utility transmission providers.[79] We continue to find that it is necessary to apply the reforms in Order No. 2023 on a nationwide basis to ensure that interconnection customers are able to interconnect to the transmission system in a reliable, efficient, transparent, and timely manner, and to prevent undue discrimination. We further note that some of the critical reforms of Order No. 2023 could only have been achieved through a nationwide rulemaking; for instance, standardization of the affected systems study process requires rules that apply to all jurisdictional transmission providers.

47. For the reasons stated above, we disagree with Dominion's argument that the Commission bears the burden on compliance to find that recently adopted existing processes that deviate from the *pro forma* generator interconnection procedures and agreements are unjust and unreasonable.[80] We reiterate that the findings in Order No. 2023 relate to the Commission's existing *pro forma* generator interconnection procedures and agreements.[81] We note that, on compliance, the Commission will apply the consistent with or superior to standard for non-RTO transmission providers and the independent entity variation standard for RTOs/ISOs when analyzing deviations from the Commission's *pro forma* LGIP, *pro forma* LGIA, *pro forma* SGIP and/or *pro forma* SGIA.[82]

48. In response to Indicated PJM TOs' contention that the Commission failed to grapple with the fact that many RTOs/ISOs already adopted the Commission's core substantive reforms before Order No. 2023 was issued, we acknowledge that many transmission providers have adopted many of the reforms in Order No. 2023. As explained above, that is not an accident. The Commission carefully examined recent queue reform proposals to identify best practices to implement nationwide. However, no transmission provider has yet adopted *all* of the reforms in Order No. 2023. For example, no transmission provider has eliminated the reasonable efforts standard for completing interconnection studies on time. We continue to believe that this broad suite of reforms, as a whole, is necessary to ensure that interconnection customers are able to interconnect to the transmission system in a reliable, efficient, transparent, and timely manner, thereby ensuring that rates, terms, and conditions for Commission-jurisdictional services are just, reasonable, and not unduly discriminatory or preferential.[83]

49. Regarding Indicated PJM TOs' argument that the Commission should have waited for recent queue reforms to be fully implemented before determining whether additional reforms are required, we disagree. Transmission providers across the country have been working on regional queue reform for well over a decade.[84] These proposals are filed at varying intervals, and at any given time, multiple transmission providers may be in the process of proposing or implementing new queue processes. By the time one or two particular transmission providers implement one set of queue reforms, it is likely that other transmission providers would be in the process of proposing or implementing their next queue reform. The Commission would

process, the Commission will evaluate such proposals under the consistent with or superior to standard for non-RTO transmission providers and the independent entity variation standard for RTOs/ISOs.

[83] Order No. 2023, 184 FERC ¶ 61,054 at P 59.

[84] *Id.* P 16, n.39.

be waiting a very long time indeed if it could not issue a generic rulemaking while any individual transmission provider pursues its own regional queue reform.[85]

50. Furthermore, we note that the Commission has historically taken a gradual approach to addressing problems with respect to interconnection queue backlogs. In Order No. 845, for instance, the Commission implemented a number of specific reforms, but held off on other reforms in favor of collecting further information from transmission providers.[86] In doing so, the Commission noted that ''[t]his information could also be useful to the Commission in determining if additional action is required to address interconnection study delays.'' [87] In Order No. 2023, the Commission determined that additional action was required to address interconnection study delays.[88] The reforms in Order No. 845 have not eliminated the problems of interconnection queue backlogs and delayed interconnection studies; rather, these problems have only grown, notwithstanding the Commission's previous reforms. We maintain that the reforms in Order No. 2023 are necessary to ensure that interconnection customers are able to interconnect to the transmission system in a reliable, efficient, transparent, and timely manner, thereby ensuring that rates, terms, and conditions for Commission-jurisdictional services are just, reasonable, and not unduly discriminatory or preferential.

B. Arguments Regarding Conflicts With Ongoing Queue Reform Efforts and Evaluation of Variations on Compliance

1. Order No. 2023 Requirements

51. The Commission addressed commenters' concerns regarding Order No. 2023's impact on early adopters of similar queue reforms or those queues currently in transition to a cluster study process. The Commission recognized that many of the individual reforms that the Commission adopted in Order No. 2023 are incremental improvements that one or more regions had already implemented.[89] The Commission explained that Order No. 2023 uses some of these individual and incremental improvements as a basis for a broad suite of reforms that, in their entirety, have not yet been adopted by any region.

52. Additionally, the Commission rejected requests to presume that any transmission provider's tariff meets the requirements of Order No. 2023.[90] The Commission recognized that many transmission providers have adopted or are in the process of adopting similar reforms to those adopted in Order No. 2023 and clarified that the Commission did not intend to disrupt these ongoing transition processes or stifle further innovation.[91] The Commission emphasized that the provisions of Order No. 2023 are not intended to interfere with the timely completion of those in-progress cluster studies and transition processes.[92] The Commission explained that, on compliance, transmission providers can propose deviations from the requirements adopted in Order No. 2023, including deviations seeking to minimize interference with ongoing transition plans,[93] provided that the reason for the variation is sufficiently justified, and may continue to propose solutions to interconnection issues under FPA section 205.[94]

53. Therefore, consistent with Order Nos. 888, 890, 2003, 2006, and 845, the Commission adopted the NOPR proposal to continue to apply the consistent with or superior to standard when considering proposals from non-RTO/ISO transmission providers to deviate from the requirements of Order No. 2023.[95] Consistent with Order Nos. 2003, 2006, and 845, the Commission adopted the NOPR proposal to continue to use the ''independent entity variation'' standard when considering such proposals from RTOs/ISOs.[96] Consistent with Order Nos. 888, 890, 2003, 2006, and 845, the Commission adopted the NOPR proposal to continue to allow non-RTO/ISO transmission providers to use the regional differences rationale to seek variations made in response to established (*i.e.,* approved by the Applicable Reliability Council) reliability requirements.[97] The Commission explained that Order No. 2023 makes no changes to the standards used to judge requested variations, as described in Order Nos. 888, 890, 2003, 2006, and 845.

2. Requests for Rehearing and Clarification

54. Several entities request clarification regarding the scope of the application of Order No. 2023 to transmission providers that have already transitioned to, or that are in the process of transitioning to, a cluster study process.[98]

55. Clean Energy Associations and IPP Coalition ask the Commission to clarify that *all* existing cluster study processes must comport with the requirements of Order No. 2023, whether the transmission provider currently operates a cluster study process or is currently undergoing a transition to a

cluster study process.[99] Clean Energy Associations and IPP Coalition argue that interconnection customers that are currently in a cluster study process should be required to satisfy the requirements of Order No. 2023, including site control requirements, within an identified time horizon (*e.g.,* 60–90 days of the compliance filing) or withdraw from the interconnection queue without penalty.[100] Clean Energy Associations and IPP Coalition argue that, if some transmission providers are not required to transition to a process that is compliant with Order No. 2023, projects currently in the queue that are not ready to proceed will not face the increased readiness requirements and delay reforms to new queue requests, undermining the central purpose of Order No. 2023.[101]

56. Clean Energy Associations and IPP Coalition argue that, absent clarification, the Commission risks leaving in place a potentially problematic oversight.[102] Specifically, Clean Energy Associations and IPP Coalition assert that the notion that transmission providers that have adopted or are currently transitioning to a cluster study process will not be required to implement a new transition process runs counter to the requirement that transmission providers may seek approval, on a case-by-case basis, to maintain variations from the *pro forma* LGIP and *pro forma* LGIA.[103] According to Clean Energy Associations and IPP Coalition, the fact that a transmission provider has an existing cluster study does not exempt that provider from its compliance obligation or the need to update its process to reflect the material elements of Order No. 2023.

57. NV Energy requests that the Commission clarify whether the new tariff changes are applicable to all interconnection customers, including those that currently participate in a cluster study process or have executed LGIAs.[104] Specifically, NV Energy requests that the Commission clarify if interconnection customers will be required to update their respective study deposits, provide commercial readiness deposits correlating to the amounts required at the various stages of the process, and update their site control documentation in order to remain in the queue.[105] NV Energy requests a one-time ability for existing interconnection customers of transmission providers who currently conduct cluster studies to withdraw penalty-free from the queue if they are unable to provide the updated study deposits, site control, commercial readiness deposits, etc.

58. NV Energy additionally requests clarification on whether a queued interconnection customer, whether in a current cluster study, with an executed facilities study agreement, or with an executed LGIA, must provide the heightened proof of site control by the effective date of the new tariff changes.[106] NV Energy seeks clarity on whether: (1) existing queued interconnection customers are required to provide 90% of site control if not impacted by a regulatory limitation and are currently within the cluster study phase of the process; (2) existing queued interconnection customers with executed facilities studies agreements are required to provide 100% of site control if the site is not impacted by a regulatory limitation; (3) existing queued interconnection customers who are impacted by a regulatory limitation are required to update their deposit in lieu of site control to the new deposit amounts; and (4) existing queued interconnection customers with executed LGIAs who are impacted by a regulatory limitation are required to provide site control within 180 days of executing their respective LGIAs.

59. EEI asks the Commission to clarify that Order No. 2023 does not require transmission providers to re-file and seek approval for portions of their existing LGIA and LGIP that have previously been approved by the Commission and are not directly impacted by Order No. 2023.[107] EEI argues that it would be inappropriate for the Commission to require transmission providers to re-file and seek approval for such portions of their existing LGIAs and LGIPs because the Commission provided no notice that it was going to review or reconsider every change it has previously approved for LGIAs and LGIPs, and thus transmission providers were not given an opportunity to defend previously approved changes.[108] EEI argues that it would be a significant administrative burden for transmission providers to re-justify every change that the Commission has already approved.[109]

60. PJM asks the Commission to provide a clearer signal as to how it will take into account recently approved reforms such as PJM's IPRTF.[110] PJM states that its recent queue reform meets the Commission's intent in promulgating Order No. 2023, substantially satisfies its requirements, and is superior for the PJM region.[111] PJM explains that there are differences between the implementation mechanisms in its IPRTF Tariff and Order No. 2023, but that these mechanisms serve the same goals and offer the same protections and benefits.[112]

61. PJM states that it has begun its transition period, and unless the Commission provides more clarity as to how it will review recently approved queue reform processes in the Order No. 2023 compliance process, it will create substantial uncertainty that will distract from the effort to process the queue backlog.[113] PJM seeks clarification that it will not be required to implement Order No. 2023 in a manner that would modify or undermine the procedures recently accepted by the Commission, and that the Commission will review PJM's request for an independent entity variation holistically, by examining whether the package as a whole is consistent with or superior to the goals and requirements of Order No. 2023 rather than forcing PJM to engage in an item-by-item justification of every variation from the minutiae of Order No. 2023's requirements.[114] PJM explains that requiring it to overhaul its tariff or justify each difference from the new *pro forma* will risk that some elements will be retained while other balancing elements will be changed, upsetting the balance that led to stakeholder approval.[115] PJM states that proceeding element by element through compliance will also provide intervenors an opportunity to re-litigate issues on which they did not prevail, which is contrary to judicial principles and would be a poor use of time.[116] PJM also explains that the elements of its tariff are interdependent, such that a

[115] *Id.* at 15.

[116] *Id.* at 16.

piecemeal approach could undermine the entire tariff.

62. If the Commission does not provide the requested clarifications, PJM seeks rehearing because the Commission should have established a presumption that ongoing, recently approved interconnection queue reform packages comply with Order No. 2023.[117] PJM explains that Order No. 2023 is internally inconsistent because it seeks to expedite the interconnection queue, and recognizes the efforts of on-going queue reform, but refuses to grant a presumption, which will cause delay and inefficiency.[118] PJM argues that it would be arbitrary and capricious and inconsistent with reasoned decision-making to require modification of PJM's tariff based on a generic rulemaking.[119] PJM also argues that failure to grant this rehearing will undermine confidence in the use of stakeholder processes.[120]

63. To the extent that the Commission does not grant PJM's request to provide a clear signal on rehearing that it will consider whether the entire package of IPRTF reforms as a whole meets the goals of Order No. 2023 rather than forcing PJM to engage in an extensive justification of every variation from every detail in Order No. 2023, PJM requests rehearing.[121]

64. Dominion argues that the Commission should cure the deficiencies in Order No. 2023's approach to compliance for early adopters like DESC and PJM.[122] Dominion suggests that the Commission could simply not require entities that have already transitioned or are in the process of transitioning to a first-ready, first-served cluster study construct to file compliance filings. Dominion alternatively argues that the Commission could defer those entities' obligations to modify their tariffs, pending an appropriate period of time to gather evidence about whether their particular, Commission-approved reforms need to be further modified. Dominion asserts that this approach would be within the Commission's statutory bounds, is administratively efficient, and maintains the settled expectations of the stakeholders that worked diligently and collaboratively to develop transmission provider-specific reforms. Dominion asserts that the Commission has on several occasions directed entities to provide reports so that it can monitor situations before deciding it is necessary to take action.[123] Dominion argues that the Commission could then require such early adopters to provide an additional report after a period of time determined by the Commission, such as two full cluster cycles following the transition, that would update the Commission on processing time under the proposed rule.

65. Dominion argues that, if the reports demonstrate that early adopters' processes are not meeting the goals of Order No. 2023, the Commission would then have a sufficient record, through the reports, to determine whether to direct further changes to conform with Order No. 2023.[124] Dominion contends that this compliance path for early adopters is superior to Order No. 2023's proposal and would allow transmission providers to demonstrate that the desired aim of Order No. 2023—facilitating quicker, more efficient interconnection processes—is being achieved.

66. Revised Early Adopter Coalition and PacifiCorp state that, to the extent a transmission provider does not seek or is not granted a variance for its existing interconnection reforms, such transmission provider appears to be required to immediately adopt the reforms in Order No. 2023 without any ability to start from a clean slate like other transmission providers utilizing a transition study process or to conclude any ongoing studies.[125] Revised Early Adopters Coalition and PacifiCorp argue that Order No. 2023 does not appear to allow early adopters of interconnection reforms an option to open the initial cluster request window under Order No. 2023 after the conclusion of the study of existing interconnection requests.[126] Revised Early Adopters Coalition and PacifiCorp assert that, because many early adopters are currently in the process of one or more cluster studies, not allowing such early adopters to use a transition cluster study process is both unworkable for such transmission providers and also contrary to Order No. 2023's assurance that ''the provisions of this final rule are not intended to interfere with the timely completion of those in-progress cluster studies and transition processes.'' [127]

67. Revised Early Adopters Coalition and PacifiCorp state that Order No. 2023 also appears to require early adopters to undertake an initial cluster request window prior to completion of cluster studies and/or restudies currently underway.[128] Revised Early Adopters Coalition and PacifiCorp argue that this would be an unexplained departure from prior precedent and the Commission's own statements in Order No. 2023.[129] Revised Early Adopters Coalition and PacifiCorp assert that this will also interfere with the timely completion of current cluster studies because it will divert already strained resources to preparing for and implementing Order No. 2023's new provisions. Revised Early Adopters Coalition and PacifiCorp further argue that this will put early adopters in the difficult, if not impossible, situation of having to undertake new cluster studies under Order No. 2023 that are reliant on outcomes of existing, not-yet-completed, cluster studies.

68. Revised Early Adopters Coalition and PacifiCorp ask the Commission to clarify that early adopters of similar interconnection reforms, to the extent they do not seek or are not granted variances for their existing interconnection reforms, may conclude their pending/existing studies before transition to the new Order No. 2023 process.[130] Revised Early Adopters Coalition and PacifiCorp alternatively request that the Commission grant rehearing to permit such study flexibility for those transmission providers who have already adopted similar reforms to Order No. 2023. PacifiCorp argues that, without this flexibility, new cluster studies pursuant to Order No. 2023 may not be reliable as they will need to rely upon

[130] Revised Early Adopters Coalition Rehearing Request at 2; PacifiCorp Rehearing Request at 15.

assumptions, including ''higher priority requests'' that were studied in prior interconnection studies and assumed to be in service.[131] PacifiCorp emphasizes that this flexibility is imperative, given the size of its queue—326 active interconnection requests, accounting for over 59 gigawatts of requests.

69. Revised Early Adopters Coalition and PacifiCorp further assert that Order No. 2023 puts early adopters of interconnection reforms in a uniquely disadvantaged position of having to simultaneously administer two types of interconnection processes and, as a result, potentially expose them to greater likelihood of penalties than other transmission providers.[132] Revised Early Adopters Coalition asserts that exposing early adopters to such outsized risks would be arbitrary and capricious as well as discriminatory.[133]

70. Revised Early Adopters Coalition and PacifiCorp explain that, if permitted the flexibility above, any transmission provider that currently has one or more ongoing cluster studies pursuant to its Commission-accepted cluster study processes, and who has not sought and received a variance, would commence new cluster studies only after all pending interconnection request cluster studies (or restudies) have concluded and only under updated tariff provisions that are consistent with or superior to Order No. 2023.[134] Revised Early Adopters Coalition and PacifiCorp state that allowing such providers to conclude their existing cluster studies before transition to the new *pro forma* study approach will preserve the interests of current interconnection customers that have been participating in the existing cluster study process as well as ease the administrative burden for such transmission providers.

71. Revised Early Adopters Coalition and PacifiCorp also request, in the alternative, that the Commission allow early adopters to use a transition process similar to other transmission providers, if such a process better suits their needs and facilitates expedient queue processing.[135] Revised Early Adopters Coalition and PacifiCorp request that, either through clarification or rehearing, the Commission ensure that early adopters have the flexibility to choose either Order No. 2023's transition process or the ability to implement Order No 2023's reforms after completing any existing cluster studies and restudies.

72. WIRES argues that Order No. 2023 also includes new requirements that need clarification or further consideration by the Commission.[136] WIRES states that it generally agrees that the shift from a serial study process to a cluster study process is likely to result in greater efficiency and provide more certainty but argues that the Commission has not explained how this new requirement will sync up with ongoing efforts that are already under way. WIRES requests that the Commission clarify how it plans to accommodate those ongoing efforts.

3. Determination

73. We clarify that all transmission providers, including those with existing cluster study processes, have a compliance obligation to review and modify their current *pro forma* interconnection procedures and *pro forma* interconnection agreements to comply with Order No. 2023. However, we continue to find that transmission providers that have already adopted a cluster study process or are currently undergoing a transition to a cluster study process will not be required to implement the transition process laid out in Order No. 2023,[137] and thus further clarify that such transmission providers are not required to file *pro forma* LGIP section 5 (Procedures for Interconnection Requests Submitted Prior to Effective Date of the Cluster Study) and the related appendices in their compliance filings.

74. However, in response to the arguments raised by Revised Early Adopters Coalition and PacifiCorp, we note that Order No. 2023 does not prohibit such transmission providers from adopting the transition process established in Order No. 2023. Therefore, a transmission provider that does not seek or is not granted a variance for its existing cluster study process and adopts the reforms in Order No. 2023 would be able to use the Order No. 2023 transition process. Where transmission providers propose variations to the Order No. 2023 transition process, the Commission will evaluate such proposals under the consistent with or superior to standard for non-RTO transmission providers and the independent entity variation standard for RTOs/ISOs. A transmission provider currently conducting a cluster study process that does not propose to conduct an Order No. 2023 transition process must comply with the remaining requirements of Order No. 2023 other than the transition process.

75. We further grant clarification in response to requests seeking to clarify the applicability of the Order No. 2023 readiness requirements to a transmission provider currently conducting a cluster study process. On compliance, unless it proposes a variation, such a transmission provider must adopt the Order No. 2023 readiness requirements;[138] those new readiness requirements are then to be applied based on the interconnection customer's progress in the queue as of 60 calendar days after the Commission-approved effective date of the transmission provider's compliance filing. Within 60 calendar days of the Commission-approved effective date of the transmission provider's Order No. 2023 compliance filing, interconnection customers that have not executed an LGIA or requested an LGIA to be filed unexecuted with the Commission must meet the transmission provider's new readiness requirements for the relevant study phase, such as updating their respective study deposits, providing commercial readiness deposits correlating to the amounts required at the various stages of the process, and demonstrating site control. Interconnection customers that must meet the transmission provider's new readiness requirements may withdraw within the 60 days after the Commission-approved effective date of the transmission provider's Order No. 2023 compliance filing without being subject to Order No. 2023 withdrawal penalties. If the interconnection customer chooses to withdraw outside this 60-day timeline, the interconnection customer will be subject to the new withdrawal penalties. To reflect these clarifications, we set aside Order No. 2023, in part, and add new section 5.1.2 to the *pro forma* LGIP.[139]

[139] New *pro forma* LGIP section 5.1.2 (Transmission Providers with Existing Cluster Study Processes or Currently in Transition) states that if Transmission Provider is not conducting a transition process under Section 5.1.1, it will continue processing interconnection requests under its current Cluster Study Process. Within 60

Continued

76. In response to NV Energy, we clarify that the requirement to meet the new site control requirements also requires that a queued interconnection customer, whether in a current cluster study or with an executed facilities study agreement (but not an interconnection customer with an executed LGIA or that has requested an LGIA to be filed unexecuted with the Commission), that is facing regulatory limitations must also submit the applicable deposit and information regarding the specific limitation within 60 days after the Commission-approved effective date of the transmission provider's compliance filing. An interconnection customer that withdraws within the 60-day period instead of submitting the applicable deposit and information will not be subject to Order No. 2023 withdrawal penalties.

77. We agree with EEI that transmission providers need only re-file and seek approval for previously approved variations where those provisions are modified by Order No. 2023. As the Commission explained in Order No. 2023, the Commission adopted requirements that are part of the *pro forma* LGIP, *pro forma* LGIA, *pro forma* SGIP, and *pro forma* SGIA and the Commission therefore only addressed the interaction of the requirements adopted with existing requirements that are part of the *pro forma* process and not variations thereto.[140] Transmission providers may seek variations from Order No. 2023's requirements on compliance provided the reason for the variation is sufficiently justified.[141] Transmission providers may also continue to propose interconnection process enhancements beyond Order No. 2023 through a separate filing under FPA section 205.

78. We reject requests to presume that any transmission provider's tariff meets the requirements of Order No. 2023.[142] As explained above, while the majority of reforms adopted herein are based on individual and incremental improvements that one or more regions have already implemented, no transmission provider has yet to adopt the entirety of Order No. 2023's broad suite of reforms.[143] Thus, we are unpersuaded by PJM's arguments on rehearing that ongoing, recently approved interconnection queue reform packages presumably already comply with Order No. 2023. Applying a presumption to transmission providers who recently adopted some similar reforms, but not all the reforms contained herein, will only result in incomplete change that fails to fulfill or further delays the comprehensive reform required by Order No. 2023. Additionally, because the Commission continues to find that the record supports a generic rulemaking,[144] the Commission reiterates that it did not need to make a finding specific to each transmission provider's tariff to require compliance with Order No. 2023.[145] Therefore, we also remain unpersuaded by Dominion's arguments on rehearing to defer the tariff modifications of, or to not require compliance filings from, transmission providers that have already transitioned or are in the process of transitioning to a cluster study process or to defer those entities' obligations to modify their tariffs.

79. In response to requests for clarification regarding how the Commission will review the compliance filings of entities that already adopted reforms, we continue to find, consistent with the Commission's statements in Order No. 2023, that transmission providers may explain specific circumstances on compliance and justify why any deviations from the *pro forma* LGIP, *pro forma* LGIA, *pro forma* SGIP, and *pro forma* SGIA are either consistent with or superior to the reforms adopted in Order No. 2023 for non-RTO transmission providers or merit an independent entity variation for RTOs/ISOs.[146] An item-by-item justification must be offered for each variation from the *pro forma* provisions modified in Order No. 2023; general statements alone are insufficient under the consistent with or superior to or the independent entity variation standard. Region-specific concerns like those raised by PJM and Dominion are appropriately addressed on compliance where the Commission will review the compliance filings on a case-by-case basis.

C. Reforms To Implement a First-Ready, First-Served Cluster Study Process

1. Public Interconnection Information

a. Order No. 2023 Requirements

80. In Order No. 2023, the Commission adopted section 6.1 (Publicly Posted Interconnection Information) of the *pro forma* LGIP to require transmission providers to maintain and make publicly available an interactive visual representation of available interconnection capacity (commonly known as a ''heatmap'') as well as a table of relevant interconnection metrics that is produced in response to user-specified input about their prospective generating facility.[147] The table will allow prospective interconnection customers to see certain estimates of a potential generating facility's effect on the transmission provider's transmission system. Specifically, the Commission required transmission providers to post on their public website a heatmap of estimated incremental injection capacity (in MW) available at each point of interconnection to the whole transmission provider's footprint under N–1 conditions, as well as provide a table of results in response to a specific user's input showing the estimated impact of the addition of the proposed project (based on the user-specified MW amount, voltage level, and point of interconnection) for each monitored facility impacted by the proposed project on: (1) the distribution factor; (2) the MW impact (based on the proposed project size and the distribution factor); (3) the percentage impact on the monitored facility (based on the MW values of the proposed project and the monitored facility rating); (4) the percentage of power flow on the monitored facility before the proposed project; and (5) the percentage power flow on the monitored facility after the injection of the proposed project. The Commission required that heatmaps be calculated under N–1 conditions and studied based on the power flow model of the transmission system used in the most recent cluster study or restudy, and with the transfer simulated from each point of interconnection to the whole transmission provider's footprint (to approximate NRIS), and with the incremental capacity at each point of interconnection decremented by the existing and queued generation at that location (based on the existing or requested interconnection service limit of such generation). The Commission required transmission providers to

calendar days of the Commission-approved effective date of Transmission Provider's Order No. 2023 compliance filing, Interconnection Customers that have not executed an LGIA or requested an LGIA to be filed unexecuted must meet the requirements of Sections 3.4.2, 7.5, or 8.1 of this LGIP, based on Interconnection Customer's Queue Position. Any Interconnection Customer that fails to meet these requirements within 60 calendar days of the Commission-approved effective date of this LGIP shall have its Interconnection Request deemed withdrawn by Transmission Provider pursuant to Section 3.7 of this LGIP. In such case, Transmission Provider shall not assess the Interconnection Customer any Withdrawal Penalty.

update their heatmaps within 30 calendars days after the completion of each cluster study and cluster restudy. Further, the Commission clarified that transmission providers are not required to make their heatmaps available until after their transition period.[148]

b. Requests for Rehearing and Clarification

81. Clean Energy Associations ask the Commission to clarify that transmission providers may use ERIS or NRIS assumptions for their heatmaps, as appropriate for their particular region.[149] Clean Energy Associations argue that the requirement to use only NRIS assumptions fails to account for regional differences and could reduce the value of providing a heatmap. For example, Clean Energy Associations assert that in SPP and MISO, ERIS is the primary driver of determining network upgrades for new generation. If the Commission declines to grant clarification, Clean Energy Associations seek rehearing of the requirement to use NRIS assumptions for heatmaps.

82. Non-RTO Providers request rehearing and modification of Order No. 2023's requirement that non-RTO/ISO transmission providers develop interactive heatmap websites.[150] Non-RTO Providers assert that the mandate is arbitrary and capricious and contrary to reasoned decision-making. Non-RTO Providers state that the Commission did not perform an adequate cost-benefit analysis to weigh the high cost and administrative burden on non-RTO transmission providers against the ''limited and speculative benefits'' of the heatmaps for non-RTO/ISO interconnection customers.[151] Non-RTO Providers assert that the mandate will require the 37 non-RTO/ISO regions [152] to each develop separate heatmap websites. Non-RTO Providers estimate that the cumulative upfront cost for these 37 heatmap websites is $7.4 million, and that the cumulative annual maintenance cost for the 37 heatmap websites is $666,000. Non-RTO Providers assert that the heatmaps will require regular attention from interconnection engineers who will otherwise be focused on transitioning to cluster studies. Non-RTO Providers contend that the heatmap requirement amounts to a penalty on non-RTO/ISO transmission providers, who cannot socialize the costs as broadly as RTOs/ISOs can.[153] Non-RTO Providers request that the Commission reverse the mandate on rehearing and (1) issue a modified version of section 6.1 of the *pro forma* LGIP for non-RTO regions that allows static public information postings of interconnection capacity based on cluster study results and (2) adopt a voluntary approach for the potential development and maintenance of interactive heatmaps in non-RTO regions.

83. Non-RTO Providers note that the heatmap concept is a novel concept and that transmission providers have no special expertise in website development.[154] Non-RTO Providers contend that the legal question on rehearing is whether the benefits of a proposed reform can reasonably be said to outweigh the costs and assert that the Commission did not provide sufficient legal foundation under FPA section 206 to justify the mandate. Non-RTO Providers aver that the Commission did not acknowledge that interactive websites make financial sense only when done at scale. Therefore, Non-RTO Providers agree that the costs of the requirement are justified for RTO/ISO regions, which would require seven websites to serve approximately two-thirds of the nation's transmission system, but not for non-RTO/ISO regions, which would have to develop 37 websites to serve the remaining one-third of the transmission system. Non-RTO Providers explain that the Commission appears to prohibit non-RTO/ISO regions from developing joint, regional heatmaps to reduce the number of websites needed, which they claim demonstrates that the cost burden and administrative burden on engineering staff to non-RTO/ISO regions was not adequately considered.[155]

84. Non-RTO Providers contend that the Commission wrongly relies on Clean Energy Associations' proposition that the heatmaps will be automated to conclude that engineering resources will not be strained by the heatmap requirement.[156] Non-RTO Providers state that such updates will require one or two full-time employees to prepare data for the first three weeks of a given 30-day update period and send the updated data to the vendor during the last week. Non-RTO Providers contend that the N–1 conditions reflected by the heatmap will offer no practical value to prospective interconnection customers but will result in five times as many engineering staff in non-RTOs/ISOs making heatmap updates compared to those in RTOs/ISOs.[157] Non-RTO Providers contend that the Commission did not adequately address these discrepancies in arguing that non-RTOs/ISOs have the technical capacity to create heatmaps.

85. Further, Non-RTO Providers argue that the record does not demonstrate that the incremental rate increase to non-RTO/ISO regions from the heatmaps will be justified by meaningful overall queue efficiency improvements for non-RTO/ISO customers in the long run.[158] For example, Non-RTO Providers contend that the Commission failed to consider that heatmaps could increase speculative interconnection requests if many interconnection customers seek to interconnect at the same uncongested points reflected by the heatmap. For the above reasons, Non-RTO Providers argue that the connection between improving queue efficiency and benefits to transmission customers is too tenuous to support a FPA section 206 finding that the heatmap mandate is just and reasonable for non-RTO transmission providers.[159]

86. Non-RTO Providers claim that the Commission erred by failing to consider a non-interactive website alternative for the public information posting mandate in non-RTO regions.[160] Non-RTO Providers state that the Commission never explains why such information needs to be provided in an interactive heatmap format, rather than in static public information postings regarding system conditions after each cluster study or restudy.

87. In the alternative to granting rehearing, Non-RTO Providers propose that the Commission revise section 6.1 of the *pro forma* LGIP to allow static data postings and adopt a voluntary funding approach for heatmap development in non-RTO Regions.[161] In particular, Non-RTO Providers state that they are not opposed to providing increased public access to base case data after cluster studies have been performed that shows the estimated incremental injection capacity (in megawatts) available at each bus in the transmission provider's footprint under N–1 conditions in table format. Non-RTO Providers explain that data in this format could still be uniform and

[161] *Id.* at 10.

standardized to the Commission's specifications.[162] Non-RTO Providers state that with the voluntary funding approach, website developers aligned with any of the relevant stakeholders, including transmission providers and prospective interconnection customers and even the Commission itself, would be free to develop their own voluntary interactive heatmaps based on this publicly available data.

88. NV Energy requests clarification on (1) whether the heatmap must include proposed network upgrades with capacity amounts to reflect the available transfer capacity or only the existing facilities and (2) when a heatmap must be made available and posted to OASIS by transmission providers that do not conduct a new transition period.[163] NV Energy asserts that, presently, the heatmap will provide limited value and will be consistently red [164] because interconnection requests greatly exceed the available capacity or load.[165] NV Energy asks if the heatmap requirement for transmission providers already conducting cluster studies could be implemented at the same time as study penalties (after the third cluster study cycle/three years), which would allow transmission providers to issue requests for proposals for the necessary heatmap software for implementation and would allow suspended projects to withdraw as well as remove from the queue those that fail to (1) submit complete applications, (2) meet various deadlines, and (3) reach commercial readiness.

89. PacifiCorp likewise seeks clarification on when transmission providers will be required to submit heatmaps for those transmission providers that do not conduct a transition cluster study process because the Commission is not requiring transmission providers to submit heatmaps until *after* the transition period ends.[166]

90. Public Interest Organizations assert that the Commission erred by not providing an adequate method for prospective interconnection customers to obtain information about potential interconnection costs at a specific location prior to submitting an interconnection request, and that the limited information publicly available to interconnection customers will lead to unjust, unreasonable, unduly discriminatory, and preferential rates.[167] Public Interest Organizations also note that the level of cost uncertainty for different interconnection customers is not balanced because transmission owner affiliates, particularly in non-RTO/ISO regions, have greater access to interconnection cost information relative to independent power producers. Public Interest Organizations contend that the Commission's decision to not adopt the proposed informational studies and optional solicitation studies make Order No. 2023's adopted reforms insufficient to remedy its finding that the *pro forma* interconnection procedures ''fail[ ] to contain a process by which an interconnection customer can obtain information about potential interconnection costs at a specific location or point of interconnection prior to submitting an interconnection request.'' [168] Public Interest Organizations explain that both the informational studies and optional solicitation studies were specifically intended to provide additional cost information to prospective interconnection customers, while the public access information requirement was intended to provide high-level information to assist interconnection customers with comparing multiple points of interconnection and estimate congestion.[169]

91. Public Interest Organizations state that many parties suggested that the Commission add more data to the heatmap to provide information for interconnection customers to readily identify network upgrades, which would help them estimate the costs to interconnect their project before they join the interconnection queue.[170] Public Interest Organizations note, for example, that NextEra suggested including information on the circuit and ratings of equipment, and Public Interest Organizations argued that the heatmaps should include information on the number of megawatts that could be interconnected without substantial costs, among other suggestions. Public Interest Organizations argue that, without such additional data, interconnection customers continue to bear the burden of determining potential costs, and that not all interconnection customers possess the resources to use software or hire consultants to extract meaningful data from the heatmaps. Public Interest Organizations contend that the heatmap requirement ultimately falls short of providing a reasonable method for interconnection customers to predict potential network upgrade costs prior to entering the queue, leading interconnection customers to make the ''rational'' decision to submit multiple interconnection requests to obtain information, which contributes to study delays and withdrawals. For these reasons, Public Interest Organizations request the Commission revisit the record to evaluate and adopt requirements that transmission providers must also make available the additional data that will allow all customers to estimate the potential network upgrade costs using reasonable efforts.

92. Public Interest Organizations further assert that the Commission's decision not to require more information be made publicly available to potential interconnection customers is arbitrary and capricious, contrary to the weight of the comments and record, and not based on substantial evidence.[171] Public Interest Organizations argue that the Commission's finding that adding any additional data requirements to assist interconnection customers is outweighed by the potential burden to transmission providers failed to consider countervailing evidence of the benefits of additional data. Public Interest Organizations assert that the benefits of providing cost information prior to interconnection customers submitting an interconnection request is clear: fewer speculative interconnection requests and therefore less backlogged queues. However, Public Interest Organizations contend that MISO's heatmap demonstrates that a heatmap alone is not enough. Public Interest Organizations also argue that the marginal burden on transmission providers to provide additional heatmap data is minimal as they can take advantage of automation.

93. PJM seeks rehearing of Order No. 2023's blanket requirement to update the heatmap 30 calendar days after completion of each cluster study because PJM states that it is unreasonable for such a large, multi-state RTO like PJM with hundreds of expected interconnection requests in each cluster.[172] PJM states that publishing study results to its interconnection screening tool, queue scope, requires detailed, precise analysis using the latest inputs available at the time and would hold PJM to an unrealistically strict and expedited

[162] *Id.* at 11.

schedule of updating data, tools, simulations, and results, and the fact that such publishing would be necessary several times a year is burdensome and adds to the scope of study work required, taking resources away from other processing efforts. PJM instead anticipates annually published studies. PJM also states that ''the models'' are already made available to interconnection customers via a Critical Energy Infrastructure Information (CEII) request and can provide information about points of interconnection.

94. PJM requests rehearing of Order No. 2023's clarification in P 162, which it interprets as stating that transmission providers must absorb heatmap costs but are not barred from seeking recovery of them through their transmission rates (and paid by interconnection customers).[173] PJM states that interconnection customers, rather than transmission providers or transmission customers, benefit from heatmap posting, so there is no good reason that transmission providers must always charge the costs of maintaining and posting heatmaps to transmission service customers rather than considering other structures such as fees for prospective developers not yet in the queue. PJM states that this rule departs from the Commission's and judicial cost-causation principles, requiring that costs should be paid by those who benefit from their incurrence,[174] and it does so (by assigning heatmap costs to transmission providers or transmission customers) without explanation, presents free-ridership issues, and would be arbitrary and capricious.[175] PJM asserts that not granting rehearing of this item would set a precedent that transmission providers must absorb or pass on to transmission customers costs that are caused by or that benefit interconnection customers only.

c. Determination

95. We deny Clean Energy Associations' request for the Commission to clarify that transmission providers may use ERIS or NRIS assumptions for their public heatmaps. As the Commission explained in Order No. 2023, generating facilities seeking NRIS are generally subject to more stringent study requirements.[176] Therefore, requiring transmission providers to produce heatmap results that approximate NRIS assumptions will provide actionable information on the viability of a given proposed generating facility to both ERIS and NRIS customers. On the other hand, requiring heatmaps to approximate ERIS assumptions would not be helpful to NRIS customers. Even in regions where ERIS may be more commonly selected or lead to a greater number of network upgrades, we find that the use of stricter NRIS assumptions would more consistently alert prospective interconnection customers to the possibility of required network upgrades compared to ERIS assumptions. We therefore find that using NRIS assumptions as a baseline would prevent false negatives, in which the heatmap incorrectly indicates to prospective interconnection customers that their projects would not trigger network upgrades. This finding reasonably balances the resources required of transmission providers in making heatmaps available with the value of providing non-binding system impact information to all prospective interconnection customers ahead of entering the interconnection queue. We note, however, that Order No. 2023 states that ''if transmission providers find value in providing additional or different information [than required by Order No. 2023], they may propose such variations on compliance.'' [177] Therefore, if a transmission provider believes that it would be informative to interconnection customers, it may propose on compliance an option for heatmap users to view results using ERIS assumptions in addition to NRIS assumptions. As such, we reiterate that ''heatmaps must be calculated under N–1 conditions and studied based on the power flow model of the transmission system with the transfer simulated from each point of interconnection to the whole transmission provider's footprint (to approximate NRIS), and with the incremental capacity at each point of interconnection decremented by the existing and queued generation at that location (based on the existing or requested interconnection service limit of such generation).'' [178] For the same reasons noted above, we are unpersuaded by the arguments raised in Clean Energy Associations' alternative request for rehearing.

96. We are also unpersuaded by Non-RTO Providers' argument that the Commission failed to properly evaluate the costs and benefits of the heatmap requirement for non-RTO/ISO regions and that they cannot socialize the costs as broadly as RTOs/ISOs. First, without a comparison to estimated heatmap costs for RTO/ISO regions, Non-RTO Providers' cost estimates do not support its assertion that the cost of developing interactive heatmaps is more burdensome for non-RTO/ISO regions.[179] While RTO/ISO regions do have larger customer bases from which to recover costs, their heatmaps will also reflect larger and potentially more complex power systems and need to accommodate a larger pool of users and, therefore, may cost more.

97. We further disagree that the labor requirements Non-RTO Providers refer to will be overly burdensome relative to RTO/ISO regions. First, as the Commission clarified in Order No. 2023, transmission providers are not required to update their heatmaps on a rolling 30-day basis, but rather within 30 days of the completion of a cluster study or restudy.[180] Thus, transmission providers will likely update their heatmaps at most two times per year, accounting for one cluster study and one cluster restudy.

98. Second, to Non-RTO Providers' argument that annual heatmap maintenance would divert attention from interconnection engineers who would otherwise be focused on transitioning to cluster studies, we reiterate that transmission providers are not required to make heatmaps available until *after* their transition period, which will help ensure that transmission providers' implementation of this final rule, beginning with the transition period, has begun to reduce backlogged interconnection queues.

[173] *Id.* at 42–43.

[174] *Id.* at 43 (citing *Transmission Plan. & Cost Allocation by Transmission Owning & Operating Pub. Utils.,* Order No. 1000–A, 77 FR 32184 (May 31, 2012), 139 FERC ¶ 61,132 at P 578). PJM includes an excerpt from Commissioner Christie's concurrence to Order No. 2023, which states, ''Commission policy may dictate that interconnection queue efficiency benefits transmission customers; however, that should not result in the costs of a requirement that best benefits interconnection customers, and really prospective interconnection customers that may ultimately not seek to interconnect, being recovered from consumers through transmission rates carte blanche. The Commission simply cannot ask retail consumers to foot the bill for every single ''efficiency,'' especially where many of these ''efficiencies'' largely benefit generation developers and then get folded into transmission rates and receive an ROE.'' Order No. 2023, concur op. (Comm'r Christie) at P 22.

[180] Order No. 2023, 184 FERC ¶ 61,054 at P 141.

99. Third, Non-RTO Providers' cost estimates are based on an extrapolation of one transmission provider's initial estimate, and Non-RTO Providers do not describe any assumptions of this estimate beyond the assertion that, after each cluster study or restudy, it would take two full-time engineers several weeks to ''prepare the data'' before having a vendor update the heatmap.[181] We are unpersuaded by this assertion because, as Order No. 2023 states, transmission providers must use the results of their most recent cluster study or restudy to update the heatmap.[182] Therefore, to update their heatmaps, little additional analysis should be required beyond what transmission providers have already completed for their cluster studies and restudies. We recognize that engineering labor will likely be required during heatmap website development, either directly, in developing the software and processes, or in consultation with the firm developing the heatmap. However, we believe that it is feasible for transmission providers, or their heatmap developers, to develop their heatmap websites to accept their base case files as inputs for each update such that little to no modification of the base case files and data is necessary. To that point, and Non-RTO Providers' concern that transmission providers have no special expertise in website development, we note that Order No. 2023 does not require transmission providers themselves to develop the requisite software and processes, and they may contract with firms whose expertise includes website development and data management. Further, Order No. 2023 does not preclude transmission providers from proposing on compliance to develop joint, regional heatmaps.

100. Finally, we disagree that Non-RTO Providers' proposal to require that transmission providers post only static data and allow other entities to voluntarily develop heatmaps accomplishes the goals outlined in Order No. 2023. The purpose of the heatmap requirement is, in part, to provide comparable information to all interconnection customers, prior to entering the queue, regardless of the transmission provider. Non-RTO Providers' proposal would not ensure such comparability, but rather would favor interconnection customers that have more resources to devote towards modeling and favor some transmission providers' own proposed generation. Thus, interconnection customers that cannot afford to process the static data Non-RTO Providers propose to post would still need to submit speculative interconnection requests to obtain information. Further, the voluntary funding approach Non-RTO Providers propose would not ensure that non-RTO/ISO regions have public interconnection information available and therefore would discriminate against interconnection customers seeking to interconnect outside of RTO/ISO regions.

101. In response to NV Energy's request for clarification on whether heatmaps must include proposed network upgrades or only existing facilities, we reiterate that heatmaps must be based on the power flow model and base case assumptions used in the most recent cluster study or restudy. Therefore, heatmaps will incorporate in-service network upgrades and network upgrades proposed for clusters higher queued than the most recent cluster study or restudy, as the base case and power flow models for any cluster will include proposed network upgrades for higher queued clusters.

102. We agree with NV Energy and PacifiCorp on the need for clarification regarding when heatmaps must be made available by transmission providers that do not conduct transition processes. We therefore clarify that transmission providers that do not conduct transition periods do not need to make their heatmap available until 360 calendar days after the Commission-approved effective date of the transmission provider's Order No. 2023 compliance filing. This timeline will give transmission providers that do not conduct transition periods the same amount of time as transitioning transmission providers (*i.e.,* completion of the transitional cluster study within 360 days after the Commission-approved effective date of the compliance filing) to develop their heatmaps. Further, while we agree that heatmaps for some transmission providers may initially appear as all red, which indicates no available interconnection capacity, we reiterate our finding that an all red heatmap still ''sends a valuable signal to interconnection customers regarding where proposed generating facilities may be more or less economic to interconnect prior to entering the interconnection queue.'' [183] We are therefore unpersuaded that such a result necessitates delaying the posting of the interactive heatmap.

103. We are also unpersuaded by NV Energy's request for clarification that transmission providers that do not conduct transition processes because they already use cluster studies should be required to post publicly available heatmaps only after three cluster cycles, similar to the transition to study delay penalties. This would delay transmission providers already using cluster studies, and their potential interconnection customers, from realizing the benefits of a heatmap (*e.g.,* a reduced volume of speculative interconnection requests) for more than twice as long as those transmission providers who do conduct a transition process and their potential interconnection customers.

104. We are unpersuaded by Public Interest Organizations' assertion that the Commission erred in not requiring transmission providers to include additional data in their heatmaps that would assist interconnection customers in estimating interconnection costs at potential points of interconnection. We further disagree with Public Interest Organizations' contention that the Commission did not fully consider the record on this matter in coming to its decision. On the contrary, as numerous commenters explain—and as the Commission stated in Order No. 2023—cost estimates produced prior to an interconnection customer entering the queue would be highly uncertain and subject to a high degree of change depending on the actions of other interconnection customers in the queue and study results, and therefore would provide little to no value to interconnection customers in terms of improving cost certainty.[184] We believe this to be true regardless of whether the transmission provider or the interconnection customer produces those cost estimates. Further, Public Interest Organizations do not argue that cost estimates should be directly incorporated into transmission providers' heatmaps, but rather that transmission providers should include additional information in their heatmaps that would allow interconnection customers to ascertain information about potential costs at points of interconnection. At the same time, however, Public Interest Organizations argue that many interconnection customers lack the resources to develop cost estimates based on transmission providers' heatmaps. Thus, Public Interest Organizations' proposal would not only increase the burden on transmission providers but require interconnection

[181] Non-RTO Providers Rehearing Request at 6.

[182] Order No. 2023, 184 FERC ¶ 61,054 at PP 139–140.

[183] *Id.* P 157.

[184] *See id.* P 138.

customers themselves to dedicate more resources towards developing cost estimates that are likely to change once they enter the queue. We therefore continue to find that the heatmap requirements set forth in Order No. 2023 strike a reasonable balance between the burden on transmission providers to develop and maintain heatmaps and the benefit of providing interconnection customers with sufficient information to identify viable points of interconnection, given that cost estimates produced prior to entering the queue would be unreliable. We note, however, that, consistent with the Commission's statements in Order No. 2023, transmission providers may explain specific circumstances on compliance and justify why any deviations are either consistent with or superior to the *pro forma* LGIP or merit an independent entity variation in the context of RTOs/ISOs.[185]

105. We are unpersuaded by PJM's request to modify the requirement for transmission providers to update their heatmaps within 30 calendar days of completing a cluster study or restudy. We find PJM's argument regarding its queue scope tool to be inapposite. As the Commission explained in Order No. 2023, because the heatmap should use the results of the most recent cluster study or restudy, the heatmap requirement should require minimal additional analysis beyond the cluster study or restudy and should not necessitate detailed analysis.[186] Transmission providers must simply make the data and assumptions used in the analyses they already completed available in a public, interactive form. Updating heatmaps within 30 calendar days of completion of a cluster study or restudy will also ensure that interconnection customers can use the heatmap during the customer engagement window to determine whether to proceed in the queue or withdraw. Finally, we disagree that interconnection customers' ability to request CEII achieves the same goal as the heatmap requirement. The heatmaps are intended to improve transparency and ease the burden of producing interconnection-related information for prospective interconnection customers. On the other hand, requests for CEII typically require an entity to submit certain identifying information and/or legal documents like non-disclosure agreements and require the transmission provider to review and verify such information, and weigh the need for the information against the potential harm of its release, before potentially granting access to a protected part of its website or OASIS portal.[187] Reliance on such a process would impose an unnecessary burden on the prospective interconnection customer, the transmission provider, and other interested stakeholders because, as commenters explain, the information to be published in transmission providers' heatmaps does not raise CEII concerns.[188]

106. Further, we are unpersuaded by PJM's request to modify the finding in Order No. 2023 that transmission providers must bear the costs associated with their heatmaps or recover them through transmission rates to the extent they are recoverable consistent with Commission accounting and ratemaking policy. First, transmission providers already maintain interconnection information and other related information online for the purposes of transparency and facilitating participation amongst various stakeholders. Thus, we disagree with PJM's requested modification because transmission providers may recover the costs associated with heatmaps through transmission rates to the extent they are recoverable consistent with Commission accounting and ratemaking policy. Second, we disagree that interconnection customers are the sole or primary beneficiaries of the heatmap requirement, and that transmission providers themselves do not benefit from it. The heatmap requirement will reduce the number of speculative interconnection requests submitted to transmission providers by providing prospective interconnection customers with information to evaluate the viability of their potential interconnection requests, thus improving overall queue efficiency for the benefit of both transmission providers and prospective interconnection customers.

2. Cluster Study Process

a. Order No. 2023 Requirements

107. In Order No. 2023, the Commission revised the *pro forma* LGIP and *pro forma* LGIA to require transmission providers to study interconnection requests in clusters.[189] The Commission adopted numerous revisions to the *pro forma* LGIP and *pro forma* LGIA to effectuate this change. Specifically, and as relevant here, the Commission revised the definitions of material modification and stand alone network upgrades, and defined interconnection facilities study report.[190] The Commission adopted section 3.1.2 (Submission) of the *pro forma* LGIP to require an interconnection customer to select a definitive point of interconnection when executing the cluster study agreement.[191] The Commission adopted section 3.4.1 (Cluster Request Window), section 3.4.4 (Deficiencies in Interconnection Request), and section 3.4.5 (Customer Engagement Window) of the *pro forma* LGIP to provide a process for interconnection customers to submit a cluster study interconnection request.[192] The Commission adopted section 3.4.6 (Cluster Study Scoping Meetings) of the *pro forma* LGIP to require transmission providers to hold a scoping meeting with interconnection customers in the cluster.[193] The Commission revised section 3.5.2 (Requirement to Post Interconnection Study Metrics) of the *pro forma* LGIP to require transmission providers to post metrics for cluster study and restudy processing time.[194]

108. The Commission adopted several revisions to the *pro forma* LGIP related to the process by which interconnection customers can make an interconnection request. The Commission revised section 4.1 (Queue Position) of the *pro forma* LGIP to provide that all interconnection requests within a cluster be considered equally queued and accordingly modified the definition of queue position.[195] The Commission renamed and revised section 4.2 (General Study Process) of the *pro forma* LGIP to require transmission providers to perform interconnection studies within the cluster study process.[196] The Commission revised section 4.4 (Modifications) of the *pro forma* LGIP to provide that moving a point of interconnection shall result in the loss of a queue position if it is deemed a material modification by the transmission provider.[197] The Commission also revised section 4.4.1 of the *pro forma* LGIP to incorporate the material modification process as part of the cluster study process.[198] The Commission revised section 4.4.5 of the *pro forma* LGIP to require that interconnection customers receive an

[198] *Id.* P 285.

extension of fewer than three cumulative years of the generating facility's commercial operation date without requiring them to request such an extension from the transmission provider.[199]

109. The Commission adopted revisions to the *pro forma* LGIP to implement several cluster study provisions. The Commission replaced section 6 (Interconnection Feasibility Study) of the *pro forma* LGIP with the new public interconnection information requirements as discussed in section II.C.1 of Order No. 2023.[200] The Commission revised section 7 (Cluster Study) of the *pro forma* LGIP to set out the requirements and scope of the cluster study agreement, as well as the cluster study and restudy procedures.[201] The Commission revised section 7.4 (Cluster Study Procedures) of the *pro forma* LGIP to permit transmission providers to use subgroups in their cluster study process if they so choose.[202] The Commission revised section 8.5 (Restudy) of the *pro forma* LGIP to make clear that restudies can be triggered by the withdrawal or modification by a higher- or equally-queued interconnection requests.[203] The Commission revised sections 11.1 (Tender) and 11.3 (Execution and Filing) of the *pro forma* LGIP regarding the tendering, execution, and filing of the LGIA to incorporate the site control demonstrations and LGIA deposit requirements of Order No. 2023.[204]

b. Requests for Rehearing and Clarification

110. Clean Energy Associations contend that the Commission acted arbitrarily and capriciously and failed to engage in reasoned decision-making by changing the definition of stand alone network upgrades such that only ''single customers'' are eligible to build them.[205] Clean Energy Associations claim that, when considered with the shift to a cluster study process and other stated goals for the sharing of network upgrade costs amongst interconnection customers, the revised definition effectively forecloses the opportunity for any future interconnection customer to exercise their discretion to build stand alone network upgrades or identified transmission provider interconnection facilities. Additionally, Clean Energy Associations aver that the revisions ignore the relationship of the option to build to the project sponsor, nearly eliminating the benefits of the option to build, such as controlling project schedules.[206] Finally, Clean Energy Associations assert that the Commission's reasoning is based on a hypothetical situation which has not occurred since Order No. 845, or possibly ever.

111. Clean Energy Associations argue that the Commission's assertion that ''confusion and potentially lengthy negotiations and/or disputes'' would result without revisions to the definition of stand alone network upgrades is unsupported by the record of this proceeding.[207] Clean Energy Associations note that transmission providers already using cluster studies have operated for years under the Order No. 845 definition, demonstrating that the revisions were not necessary. Clean Energy Associations explain that Order No. 2023 neither cites previous instances of confusion or lengthy disputes regarding the construction of stand alone network upgrades, nor any other facts or evidence that would support a finding that the current definition is insufficient or inadequate. Clean Energy Associations also note that one transmission provider using cluster studies supported the concept of allowing stand alone network upgrades to be shared among interconnection customers.[208]

112. Clean Energy Associations contend that this aspect of Order No. 2023 is arbitrary and capricious because the Commission fails to acknowledge or adequately explain departures from its precedent.[209] Clean Energy Associations note that Order No. 845 explains that the option to build benefits the interconnection process by giving interconnection customers more control and certainty, and that interconnection customers are in the best position to determine if the option to build in their interest. However, Clean Energy Associations assert that the revised definition removes interconnection customers' ability to exercise their discretion regarding the option to build for the majority of network upgrades identified in a cluster study, and modifies the *status quo* by reducing the number of network upgrades that would qualify as stand alone network upgrades because the proportional impact method of cost allocation will reduce the likelihood of finding a single customer 100% responsible for a network upgrade.[210] Clean Energy Associations contend that this renders the Order No. 845 policy moot and is inconsistent with the Commission's intent in Order No. 2023 to maintain the status quo.

113. Clean Energy Associations state that the Commission can redress this error on rehearing by (1) reversing its decision to revise the definition of stand alone network upgrade, and (2) requiring transmission providers to address, in their compliance filings and OATTs, the process through which interconnection customers with shared network upgrades that qualify as stand alone network upgrades can exercise their option to build.[211] Alternatively, Clean Energy Associations suggest that the Commission require transmission providers to allow the interconnection customers amongst whom a stand alone network upgrade was shared to unanimously exercise the option to build and, then, to either select a third party to construct the upgrade or to determine responsibility for doing so amongst themselves. Clean Energy Associations assert that this would prevent the concern of disputes among interconnection customers within a cluster. Clean Energy Associations state that both of these options would be consistent with, and would preserve, the policy set forth in Order No. 845, while also addressing the Commission's concerns that disputes or confusion may arise and further delay the interconnection process, while striking an appropriate balance between the Commission's policy and efforts in Order No. 845 and Order No. 2023, honoring both efforts and further enhancing and benefiting the interconnection process.

114. Clean Energy Associations state that the Commission erred in finding that modifications to project size can only be made during the customer engagement window and that interconnection customers must select a single, definitive point of interconnection at that time.[212] Clean Energy Associations assert that the record does not support the conclusion that the customer engagement window is sufficient for the interconnection customer to enter the cluster study with confidence in its project size and definitive point of interconnection and, thus, this timeline does not reflect an appropriate balance that will reduce the need for restudies and delays. Clean Energy Associations assert the

opposite—that the record indicates that failure to provide flexibility to interconnection customers to modify project size and point of interconnection after receipt of initial cluster study results will increase the likelihood of withdrawals and cascading restudies by not allowing interconnection customers to make beneficial adjustments earlier in the interconnection process that could be determinative in a project's decision to stay in the cluster or withdraw. Clean Energy Associations disagree with the Commission's conclusion that the extended 60 calendar day customer engagement window is sufficient to provide interconnection customers with ''time to consider information collected during this period of engagement with the transmission provider,'' [213] which will allow customers to determine when to withdraw their interconnection requests and avoid penalties while improving queue efficiency due to fewer late-stage cluster study withdrawals. Clean Energy Associations assert that, prior to the cluster study, it is difficult for an interconnection customer to make any informed conclusion about expected costs of potential network upgrades and such costs' impact on project viability, which the interconnection customer must learn from the cluster study.

115. The 60-day customer engagement window, Clean Energy Associations assert, only provides interconnection customers 46 calendar days to evaluate publicly posted information and make any potential project modifications prior to entering the cluster study, and any such early-acquired information will be incomplete, lacking modeling data, new model sets, and other study assumptions such as confidential merit order dispatch lists used by transmission providers to set up power transfers from new generators, despite publicly posted information by transmission providers.[214] Clean Energy Associations state that substantial information gained through the study process may necessitate a change in point of interconnection, making choosing a single point of interconnection implausible. They claim that not requiring transmission owners to attend scoping meetings further limits an interconnection customer's access to information. Clean Energy Associations assert that an interconnection customer will not have sufficient time and information to evaluate project viability during the customer engagement window or modify project size and location in response to pre-study information obtained during that window.

116. Clean Energy Associations assert that limiting post-initial cluster study entry modifications to the interconnection request to those the transmission provider deems not to be material ignores record evidence that this practice will not result in a more reliable, efficient, transparent, and timely interconnection process.[215] Clean Energy Associations assert that allowing flexibility in project size reductions through the initial cluster study will allow for optimization of projects based on official study results, resulting in fewer withdrawals due to increased project viability and contribution to reliability through reduced impacts to the transmission provider's system, which it asserts will be less disruptive to the interconnection process than a full withdrawal. Clean Energy Associations state that, likewise, inability to change the point of interconnection or to submit an alternate point of interconnection could cause delays and can trigger the restudy of an entire cluster. Clean Energy Associations assert that the record demonstrates that interconnection customers lack sufficient time or information to optimize project characteristics prior to entering the initial cluster study, and that flexibility to make beneficial modifications after receipt of initial study results would reduce rather than increase uncertainty, restudy, and administrative burden.

117. Clean Energy Associations further state that the option to instead pursue a material modification exemption does not provide sufficient flexibility because: (1) it leaves this determination to the discretion of the transmission provider; and (2) it ignores that minor project modifications that could have slight impacts on other interconnection customers in the same cluster might nonetheless be far less disruptive than project withdrawal.[216] Clean Energy Associations argue that the material modification review is often based on ''opaque assumptions'' available only to the transmission provider and may divert resources at a relatively more intense part of the study process.

118. Clean Energy Associations note that SPP, PJM, and MISO have adopted provisions allowing 50%–100% reduction allowance and minor point of interconnection changes, and also permit smaller size adjustments similar to that found in *pro forma* LGIP section 4.4.2 through the initial cluster restudy, which Clean Energy Associations state belie the Commission's assertion that the timing for modifications in Order No. 2023 reflects a natural translation of the timing for modification in the existing serial study process to a cluster study process.[217] Clean Energy Associations therefore request that the Commission grant rehearing and modify the language in revised *pro forma* LGIP section 4.4.1 to allow modifications to project size (specifically, up to a 60% size reduction) prior to entering the cluster restudy, and to allow minor modifications to project size (specifically, up to a 15% size reduction) after the receipt of a cluster restudy but prior to the start of the facilities study. Clean Energy Associations further request that the Commission grant rehearing and allow interconnection customers the option to present a primary and alternative definitive point of interconnection in an electrically proximate area, provided that the transmission provider and transmission owner verify the alternative as acceptable during the customer engagement window and prior to the scoping meeting.

119. IPP Coalition also asks the Commission to reconsider its requirement that customers identify a single point of interconnection and, instead, allow for an electrically proximate alternative point of interconnection that is verified as acceptable by the transmission provider during the cluster study customer engagement window and listed in the cluster study agreement.[218] IPP Coalition asserts that electrically proximate point of interconnection locations can be effectively implemented within a study process without materially impacting a study process, and that this general standard should be applied consistently to a potential change, whether it is sought by an interconnection customer as part of the interconnection request or ultimately required on the basis of a public policy decision.

120. Ørsted requests that the Commission clarify that, in circumstances where state or federal agency policy or regulation requires a change to the point of interconnection, projects should be restudied based upon the new regulatory or statutory requirements.[219] Alternatively, Ørsted requests that the Commission clarify that, in such circumstances, the transmission provider, the state, or the

[219] Ørsted Rehearing Request at 11.

interconnection customer may request a waiver of applicable tariff and LGIA/LGIP provisions that might be affected in order to comply with the federal or state regulatory requirement.

121. Clean Energy Associations state that the Commission should grant rehearing and amend Order No. 2023 to stipulate that, if an interconnection customer submits an interconnection request at least 15 business days prior to the close of the cluster request window, and if failure by the transmission provider to issue a deficiency notice within five business days of receipt results in the interconnection customer having fewer than 10 business days to respond to the deficiency notice prior to the close of the customer request window, the interconnection customer shall still be granted a full 10 business days to respond prior to facing the consequences outlined in revised *pro forma* LGIP section 3.4.4.[220] Clean Energy Associations state that, to ensure a full 10 business days to respond, an interconnection customer would have to submit its interconnection request more than 15 business days before the close of the cluster request window to account for the five business day window for the transmission provider to issue a deficiency notice, and that even if an interconnection customer submitted its interconnection request more than 15 business days before the close of the cluster window, the interconnection customer may be left with fewer than 10 business days to provide a response in the event that the transmission provider failed to meet the five business day notification requirement. Clean Energy Associations state that, because of this oversight, an interconnection customer may, through no fault of its own, have as little as one day to respond to a deficiency notice. Clean Energy Associations argue that revised *pro forma* LGIP section 3.4.4 includes significant consequences for interconnection customers that fail to meet the 10 business-day deadline, but no consequences for transmission providers that fail to meet the five-business day deficiency notice deadline. Clean Energy Associations argue that the Commission acted arbitrarily and capriciously and failed to engage in reasoned decision-making by failing to account for potential delay on the part of the transmission provider.

122. Clean Energy Associations and Ørsted argue that the Commission acted arbitrarily and capriciously and failed to engage in reasoned decision-making when it declined to require transmission owners to attend scoping meetings.[221] Clean Energy Associations and Ørsted state that requiring transmission owners to attend may help RTOs/ISOs address potential challenges sooner, avoiding penalties caused by transmission owner delays. Clean Energy Associations and Ørsted assert that the purpose of the customer engagement window is to provide interconnection customers with information to help them determine the viability of their proposed generating facilities earlier in the process, and without transmission owners in these meetings, interconnection customers are deprived of critical information necessary to determine the costs and commercial viability of their projects.[222] Ørsted additionally states that transmission owners are fully responsible for design of network upgrades, including both substation and system network upgrades, as well as play an important role in informing point of interconnection decisions by providing information about the existing grid conditions and capabilities as well as information related to interconnection requirements.[223] Ørsted therefore argues that the transmission owner is in the best position to give interconnection customers a sense of the work required to expand the transmission facilities to accommodate new interconnection customers, and that a failure to include transmission owners in these meetings deprives interconnection customers of critical information necessary to determine the costs and commercial viability of their projects. Ørsted asserts that not requiring transmission owners to attend the scoping meeting creates an additional burden on both the interconnection customer and the transmission owner because customer will need to schedule separate meetings with the transmission owners to get additional information.

123. EEI, NYISO, and NYTOs seek rehearing of Order No. 2023's elimination of the feasibility study.[224] EEI argues that carrying out physical feasibility studies, which determine whether the project is ''physically constructable'' to the point of interconnection, early in the interconnection process will allow for the early disqualification of infeasible interconnection requests, which will save resources.[225] NYTOs contend that analyzing feasibility is especially needed in highly congested areas like New York City and Long Island, where geographic and environmental limitations often restrict the ability to interconnect new generation at certain locations, which cannot be reflected in a heatmap.[226] NYISO and NYTOs note that, because physical feasibility issues are particularly important in New York, NYISO needs to address early in the interconnection study process which proposed projects will be eligible to make use of those limited points of interconnection.[227] NYISO and NYTOs assert that the Commission's determination to eliminate the feasibility study and replace it with a heatmap to provide project developers with a rough indication of interconnection capacity before they submit their interconnection requests will not address critical physical feasibility issues.

124. EEI asks the Commission to clarify that provisional interconnection service requests will continue to be processed as received and outside the cluster study process.[228] EEI states that the Commission may have inadvertently failed to include provisional service in its response to PacifiCorp's comments regarding processing interconnection requests (including provisional service requests) in Order No. 2023.

125. EEI requests that the Commission clarify how the 150-day study deadline applies to cascading restudies.[229] EEI states that a withdrawal has the potential to trigger the restudy of every subsequent cluster, which will have to be conducted in turn. EEI specifically asks the Commission to clarify that transmission providers have 150 days to complete the restudy from the initiation of the restudy, rather than from when the interconnection customers are informed that the restudy is needed. EEI argues that this clarification is necessary so that transmission providers have the full 150-day period for each restudy.

126. MISO asks the Commission to clarify that Order No. 2023's statements that decline to allow transmission providers the flexibility to set their own study deadlines were intended to respond to requests to allow transmission providers to establish deadlines for specific study clusters other than through deadlines fixed in

their tariffs, and were not intended to preempt transmission providers from proposing to maintain existing tariff-defined study deadlines that may differ from the *pro forma* LGIP's 150 day schedule.[230] MISO explains that it uses a three-phase process that has a different length than the one phase process in the *pro forma,* and MISO's tariff includes fixed study deadlines for each phase that are not subject to discretionary adjustment.

127. NYISO asserts that the one-size-fits-all, 150-calendar day cluster study timeframe is arbitrary and capricious, does not reflect reasoned decision-making, and is not based on substantial evidence.[231] NYISO states that the timeframes for the cluster restudy and facilities studies are also arbitrary and capricious and deficient. NYISO asserts that the Commission did not establish a basis for the 150-day timeframe, but rather stated that the timeframe for performing the stability analyses, power flow analyses, and short circuit analyses was based on the record without providing detail as to what in the record supports that conclusion. NYISO also claims the Commission cites to a limited number of parties, none of which it claims performs such studies, in support of the 150-day timeframe.

128. NYISO contends that the Commission has not considered the impact to the study timeline of any evaluations required to address applicable reliability requirements.[232] NYISO explains that in New York, for example, the system impact study encompasses numerous steps critical to evaluating reliability impacts of proposed generating facilities, which must be performed to fully evaluate a proposed interconnection under all Applicable Reliability Requirements. NYISO notes that in New York, Applicable Reliability Requirements include Northeast Power Coordinating Council rules and New York State Reliability Council rules, which are often more stringent than NERC rules because of New York's unique transmission system complexities, including congestion around New York City and Long Island, and an influx of offshore wind generation.

129. NYISO contends that the Commission has also failed to consider how the size or complexity of the cluster could affect the study timeframe.[233] NYISO explains that the system impact study timeframe is driven by the study scope (*e.g.,* whether the study addresses physical feasibility), the number of impacted parties, the complexity of the project, and unique challenges at the project's point of interconnection. NYISO further explains that, for a system impact study to effectively evaluate a proposed interconnection, the transmission provider requires accurate modeling data from an interconnection customer, study cases built for the proposed project, and precise thermal, voltage, steady state, and short circuit analyses. NYISO explains that accomplishing this requires a potential several-month collaboration with transmission owners to: (1) build applicable study base cases and the associated auxiliary study files; (2) complete any short circuit base cases necessary to determine point of interconnection requirements; (3) build pre-and post-project steady-state base cases that represent various system conditions (*e.g.,* summer peak load, winter peak load, and spring light load conditions).[234] NYISO further explains that it: (1) collaborates with applicable transmission owners and/or interconnection customers to determine upgrade solutions that constitute the least cost solution to mitigate reliability violations consistent with good utility practice and all applicable reliability requirements; (2) must sometimes iteratively redo the reliability analyses to ensure network upgrades can be reliably interconnected; and (3) must conduct stability analysis, transfer analysis, deliverability analysis, short circuit analysis, NPCC/NYSRC bulk power system transmission facility testing analysis, sub-synchronous torsional interaction screening analysis, and additional analyses. NYISO states that the study results must be summarized and shared with impacted parties and stakeholders and reviewed by the appropriate NYISO committees and subcommittees. NYISO avers that, if it had to comply with the 150-day timeline, it may likely be forced to eliminate this review and approval process.[235]

130. Additionally, NYISO asserts that cluster studies are unlikely to create the time savings expected by the Commission.[236] NYISO disagrees with the Commission's statement that the transmission provider ''will be conducting only one interconnection study, or at most a small number of interconnection studies, at a time, allowing them to devote more resources to completing the studies in a timely manner'' because, NYISO argues, this statement does not accurately reflect the type and amount of work required for the cluster study that it proposes and the resources that will need to be committed to such study.[237] NYISO explains that a large portion of cluster study work is spent identifying network upgrades at or near points of interconnection for individual projects or subsets of projects within the cluster which, as NYISO asserts, effectively requires transmission providers to perform individual studies within the broader cluster study and requiring resources similar to that of a serial study.[238] NYISO contends that only a small portion of cluster study work involves assessing the impacts on the system of the cluster as a whole. NYISO adds that each additional project in the cluster adds to the total amount of work required because each project must be modeled.

131. Further, NYISO argues that efficiencies gained by transitioning to a cluster study may be offset by increased participation and resultant large clusters.[239] NYISO contends that the more stringent study deposit, commercial readiness, and site control rules adopted in Order No. 2023 will not materially reduce the number of projects entering interconnection queues. NYISO notes that it and other RTOs/ISOs haves adopted similar rules without seeing a corresponding decrease in projects entering and progressing through their queues.[240] NYISO states that, if the Commission does establish a firm deadline for cluster study completion, it should define a maximum number of projects in a cluster or allow for extending the 150-day timeframe according to cluster size.

132. NYISO requests that the Commission allow RTOs/ISOs to propose alternative study deadlines as independent entity variations.[241] NYISO argues that requiring a single, firm study timeframe for all transmission providers does not recognize that interconnection study process requirements, challenges, reliability criteria, and queue size will be different in each region. In the alternative, NYISO requests that the Commission grant clarification that

[241] *Id.* at 15–16.

Order No. 2023 was not intended to prevent RTOs/ISOs from proposing region-specific study deadlines for some or all future studies in their individual Order No. 2023 compliance filings.

133. NYISO also asks the Commission to confirm that, during the 45-day cluster request window, the interconnection customer is limited to one 10-business day opportunity (or shorter at the end of the request window) to cure a deficiency in its application.[242] Further, NYISO asks the Commission to confirm that it did not intend to require the transmission provider to issue a second deficiency notice even if time allowed for such notice in the cluster request window and that, if the interconnection customer fails to fully cure its application within its single cure period, its application will be withdrawn. NYISO notes that section 3.4.4 of the *pro forma* LGIP provides that: ''At any time, if Transmission Provider finds that the technical data provided by Interconnection Customer is incomplete or contains errors, Interconnection Customer and Transmission Provider shall work expeditiously and in good faith to remedy such issues.'' NYISO argues that the Commission should clarify that this language is not intended to extend the time period by which an interconnection customer must address deficiencies for the transmission provider's acceptance of a valid, complete interconnection request, but instead is simply intended to permit the transmission provider and interconnection customer to address any minor issues that may be discovered later in the interconnection process, subject to applicable deadlines. NYISO proposes revisions to section 3.4.4 of the *pro forma* LGIP which it states would accomplish this clarification.

134. NYISO asks the Commission to confirm that the transmission provider may complete its determination that an interconnection request is valid into the customer engagement window, including assessing any updated information provided by the interconnection customer, within its permitted deficiency cure period in the cluster request window.[243] NYISO also requests confirmation that the transmission provider is not required to permit interconnection customers to address any further deficiencies identified in the customer engagement window. Further, NYISO states the Commission should confirm that, if the transmission provider determines in the customer engagement window that an interconnection customer's updated interconnection request remains deficient and is not valid, the transmission provider may withdraw the project upon such determination. In particular, NYISO notes that Paragraph 234 of Order No. 2023 appears to reject withdrawals for interconnection requests that are not deemed valid until the close of the customer engagement window. NYISO argues that this statement is inconsistent with the Commission's requirements to not permit interconnection customers to cure deficiencies during the customer engagement window and to limit participation in the Scoping Meeting during that window to only customers ''whose valid Interconnection Requests were received in the Cluster Request Window.'' [244]

135. NYISO requests rehearing of the requirement that transmission providers post an anonymized list of the projects eligible to participate in the cluster study during the customer engagement window.[245] NYISO argues that the requirement creates another administrative burden on the transmission provider for which the Commission has not provided a reasonable basis and could result in the unequal public disclosure of certain information to only a subset of developers. NYISO asserts that the Commission has not provided support for this anonymity requirement, aside from a general assertion that such requirement is appropriate ''to reduce opportunities for developers to gain competitive advantage over others before interconnection requests have been finalized and accepted by the transmission provider.'' [246] NYISO further states that the Commission has not provided a description of any means by which publicly identifying the developers of projects with valid interconnection requests would provide the developer or other parties with a competitive advantage. NYISO also explains that its OATT requires transmission providers to publicly post queue information that includes certain identifying information about valid interconnection requests. NYISO argues that the proposed requirement would therefore require a further administrative step for NYISO to have to conceal certain information in its publicly posted queue, including the developer's name and/or the status of the project, as well as take additional steps to maintain the projects' anonymity, such as masking information in any other public communications.[247] Further, NYISO notes that the group scoping meeting required during the customer engagement window will reveal many of the cluster participants, and that even if developer names are not provided during the meeting, many developers in a region are aware of the employees of other developers in that region. Therefore, NYISO argues that anonymity of developer names will not mask the identity of the underlying developers from other cluster participants but would simply give them an information advantage over other developers. Finally, NYISO explains that in many cases, such information would be public anyway, such as through a developer posting its projects on its website or participating in public request for proposals, permitting processes, Commission submissions, or other federal, state, or local proceedings.

136. NewSun argues that the 30-day timeline permitted following receipt of the cluster study report for interconnection customers to execute the facilities study agreement and provide deposits is arbitrary and capricious because it is commercially unreasonable, counterproductive to the Commission's goals of reducing withdrawals and restudies, fails to address record evidence, and inconsistent with the rationale provided in Order No. 2023.[248] NewSun argues that the 30-day timeline does not leave time for the proper review and discussion of the study information, especially where third party information is involved, or where the interconnection customer's understanding of the information (even assuming the study was without errors) is contingent upon study results meetings. NewSun explains that it takes time to, for example, read the report, formulate questions, set up meetings with consultants, run financial models, and engage with outside bankers and financiers.[249] NewSun asserts that companies with ''near infinite resources can just play chicken with their balance sheets, many of whom can merely post a letter of credit (by paying points) to proceed, and/or make the strategic decision to hold their noses and stay in, hope it works out, and just treat withdrawal penalties as a cost of doing business,'' while companies like NewSun have to arrange cash-backed

[247] *Id.* at 46–47.

[248] NewSun Rehearing Request at 7–8.

[249] *Id.* at 8–9.

letter of credit facilities which takes longer than 30 days to arrange.[250] NewSun states that forcing all interconnection customers, big and small, to make such huge decisions in short windows creates biases towards ''nose-holding behavior, fearful exits, and inability to thoughtfully consider outcomes—or changes—much less to collaborate and/or adapt to avoid delay-causing or costly upgrades.[251]

137. NewSun requests rehearing of the requirement that, if any interconnection customer withdraws from the cluster after receiving the cluster study report and the transmission provider concludes that such withdrawal triggers a restudy, the transmission provider has 30 days from the cluster study report meeting (or cluster restudy report meeting, if applicable) to notify affected interconnection customers.[252] NewSun states that notice of restudy will occur up to 10 days after the interconnection customer is required to sign a facilities study agreement and make the associated deposit 10% of the estimated network upgrade costs. NewSun states that, because the time frames for notice of restudy and for execution of the facilities study agreement overlap, the interconnection customer almost certainly will not know if a restudy—which entails potentially significant additional delays and increases in interconnection costs—is required before it is required to commit to a facilities study and making deposits that in many cases will requiring financing of millions or even tens of millions of dollars in financial security. NewSun asserts that, even if the transmission provider somehow manages to give the interconnection customers notice of intent to conduct a cluster restudy and tolls the due date for the facilities study agreement and 10% network upgrade deposit within 30 days of furnishing the cluster study report, the interconnection customer will have only 20 days to increase the amount on deposit to 5% of its estimated network upgrade costs. NewSun notes that this decision point could require financing of millions of dollars and, even in cases where monies may have already been financed, if refunds are not received, they cannot be recycled or reused. NewSun seeks rehearing of these timing issues and requests that the Commission change the 30-calendar day timeline to 60 days, as well as make several other changes to multiple timelines in Order No. 2023.[253]

138. PJM argues that the Commission erred in its apparent requirement that transmission providers determine whether a change in a project's point of interconnection is a material modification.[254] PJM explains that it interprets Order No. 2023 to mean that transmission providers will need to evaluate every single request from interconnection customers for a change to their point of interconnection to determine whether it is a material modification. PJM asserts, however, that analyzing each request would consume already limited engineering time, and that most change requests come from developers seeking to optimize their projects mid-process instead of performing their due diligence in advance of entering the queue. PJM also implies that most changes to points of interconnection would result in a material modification. PJM asks the Commission to clarify that transmission providers need not evaluate every single request to change a point of interconnection to determine if it would be a material modification. PJM recommends instead that the Commission allow transmission providers to establish rules that (1) changes to a project's point of interconnection may be made at certain defined points in the cluster cycle, and (2) changes to points of interconnection outside those defined times would be presumed material modifications. PJM seeks rehearing on this issue if the Commission declines to provide its requested clarification.

139. NYTOs seek clarification of Order No. 2023's elimination of queue priority and finding that all interconnection requests in a cluster should hold equal priority.[255] NYTOs explain that there is at least one instance in which interconnection priority is necessary: if it is not physically possible to connect all interconnection requests at a single point of interconnection, but it is feasible to connect some of the requests, then prioritization based on request dates should be applied to determine which interconnection customers have priority to proceed. NYTOs explain that this scenario occurs when the number of interconnection requests exceeds the available points of interconnection at a substation, and the substation cannot be expanded due to physical space or environmental limitations. NYTOs explain that allowing for this prioritization is critical in highly congested areas like New York City and Long Island. NYTOs state that the Commission should clarify that providing interconnection queue priority in this situation is permissible, at least under the independent entity variation. If the clarification is not provided, NYTOs request rehearing on the grounds that in the absence of such priority, the Commission acted arbitrarily and capriciously by failing to consider all aspects of the problem.

140. Several commenters request rehearing regarding reforms the Commission did not adopt in Order No. 2023. AEP argues that the Commission failed to adequately consider the need for, benefits of, and record support for enhanced generation retirement replacement processes and erred in deeming the generation retirement replacement process beyond the scope of this proceeding.[256] AEP states that four parties commented on the importance of generator replacement programs and argues that, while the Commission may not be able to direct with specificity the generator replacement reforms required, it has sufficient evidence to provide guidance on the basic requirements for such programs.[257] MISO asks the Commission to clarify that Order No. 2023 does not require transmission providers with Commission-approved generator replacement processes to change, abandon, or re-justify these processes on compliance.[258] Alternatively, if the Commission did intend to require transmission providers with existing generator replacement processes to re-justify those processes, MISO requests rehearing.[259] AEP urges the Commission to include in the *pro forma* LGIP an option for transmission providers to process some interconnection requests outside the cluster study process where required for LSEs to meet reserve margin requirements.[260] AEP argues that, if not included in the *pro forma* LGIP, AEP asks the Commission, in the alternative, to remain open to the future consideration of tariff revisions that allow for such outside-the-cluster reviews or fast-track processing.[261]

c. Determination

141. We agree with Clean Energy Associations that revisions to the definition of stand alone network

[260] AEP Rehearing Request at 24–25.

[261] *Id.* at 25–26.

upgrades in the *pro forma* LGIP and *pro forma* LGIA and option to build section of the *pro forma* LGIA are necessary to maintain the pre-Order No. 2023 *status quo* opportunity for interconnection customers to exercise the option to build as part of the cluster study process. Accordingly, we set aside this aspect of Order No. 2023 and modify the definition of stand alone network upgrades in section 1 (Definitions) of the *pro forma* LGIP and *pro forma* LGIA as follows, with brackets indicating deletions:

Stand Alone Network Upgrades shall mean Network Upgrades that are not part of an Affected System that an Interconnection Customer may construct without affecting day-to-day operations of the Transmission System during their construction [and the following conditions are met: (1) a Substation Network Upgrade must only be required for a single Interconnection Customer in the Cluster and no other Interconnection Customer in that Cluster is required to interconnect to the same Substation Network Upgrades, and (2) a System Network Upgrade must only be required for a single Interconnection Customer in the Cluster, as indicated under the Transmission Provider's Proportional Impact Method]. Both Transmission Provider and Interconnection Customer must agree as to what constitutes Stand Alone Network Upgrades and identify them in Appendix A to the Standard Large Generator Interconnection Agreement. If Transmission Provider and Interconnection Customer disagree about whether a particular Network Upgrade is a Stand Alone Network Upgrade, Transmission Provider must provide Interconnection Customer a written technical explanation outlining why Transmission Provider does not consider the Network Upgrade to be a Stand Alone Network Upgrade within 15 days of its determination.

142. Accordingly, we also modify article 5.1.3 (Option to Build) of the *pro forma* LGIA as follows, with italicized language indicating additions:

Individual or Multiple Interconnection Customer*s* shall have the option to assume responsibility for the design, procurement and construction of Transmission Provider's Interconnection Facilities and Stand Alone Network Upgrades on the dates specified in Article 5.1.2, *if the requirements of this Article 5.1.3 are met. When multiple Interconnection Customers exercise this option, multiple Interconnection Customers may agree to exercise this option provided (1) all Transmission Provider's Interconnection Facilities and Stand Alone Network upgrades constructed under this option are only required for Interconnection Customers in a single Cluster and (2) all impacted Interconnection Customers execute and provide to Transmission Provider an agreement regarding responsibilities, and payment for, the construction of Transmission Provider's Interconnection Facilities and Stand Alone Network Upgrades planned to be built under this option.* Transmission Provider and *the individual Interconnection Customer or each of the multiple* Interconnection Customer*s* must agree as to what constitutes Stand Alone Network Upgrades and identify such Stand Alone Network Upgrades in Appendix A. Except for Stand Alone Network Upgrades, Interconnection Customer shall have no right to construct Network Upgrades under this option.

143. We find that this revision to the definition of stand alone network upgrades and addition to the option to build section in the *pro forma* LGIA will allow interconnection customers to exercise the option to build whether the stand alone network upgrade is attributable to a single interconnection customer or a shared network upgrade shared by multiple interconnection customers. These revisions will also avoid potentially lengthy disputes between interconnection customers, which was the Commission's original concern in Order No. 2023, because, for interconnection customers with shared network upgrades that qualify as stand alone network upgrades, interconnection customers must mutually agree to such agreement outside the transmission provider's interconnection process and thus will not slow down that process.[262] We clarify that, for such circumstances, we expect such a written agreement among the relevant interconnection customers to be reached among the interconnection customers on their own and outside of the transmission provider's interconnection process. Further, we clarify that, if no mutual agreement is reached among the interconnection customers, no interconnection customer will have the ability to exercise the option to build a stand alone network upgrade that is a shared network upgrade.

144. We are unpersuaded by Clean Energy Associations' argument that the Commission should modify the allowed reductions in project size in *pro forma* LGIP sections 4.4.1 and 4.4.2. We find that implementing Clean Energy Associations' requested change under a cluster study process is likely to lead to delays in the interconnection study process. Therefore, we continue to rely on the transmission provider to assess such a change under *pro forma* LGIP section 4.4 (Modifications), where the transmission provider would be able to assess whether modifications to project size (*e.g.,* up to a 60 percent reduction) would have a material impact on the cost or timing of any interconnection requests with an equal or later queue position.

145. We disagree with Clean Energy Associations' argument that the customer engagement window is too short. We note that Order No. 2023 required transmission providers to develop a heatmap of public interconnection information to provide interconnection customers with information prior to submitting an interconnection request, which should obviate the need for a longer engagement window. We further note that Order No. 2023 adopted readiness requirements to encourage interconnection customers to submit commercially viable interconnection requests, so interconnection customers should be relatively confident in the viability of their interconnection requests.[263]

146. We also are unpersuaded by Clean Energy Associations' request regarding circumstances in which the transmission provider fails to issue a deficiency notice within five business days. We find the requested revision unnecessary because a transmission provider taking longer than five business days to issue the deficiency notice would violate its tariff requirements to issue such a notice within five business days. We find that the requirement for interconnection customers to cure deficiencies before the close of the cluster request window is necessary to ensure the timely processing of the interconnection queue.

147. We disagree with Ørsted's and Clean Energy Associations' requests to require transmission owners (when not the transmission provider) to attend scoping meetings. The *pro forma* LGIP contemplates that the transmission owner and transmission provider may be the same entity, except in the case of an RTO/ISO, in which case the transmission owner does not have operational control of the facilities and does not perform cluster studies. We note that transmission providers have incentive, particularly in light of the study delay penalties adopted in Order No. 2023, to facilitate interconnection customers' access to information they need in order to efficiently navigate the interconnection study process. Accordingly, we will not require transmission owners to attend scoping meetings where the transmission owner and transmission provider are separate entities. However, RTOs/ISOs may seek an independent entity variation and propose to require attendance of any entities they feel are necessary to provide critical information to interconnection customers.

[262] Order No. 2023, 184 FERC ¶ 61,054 at P 193.

[263] *Id.* P 691.

148. We disagree with requests that the Commission include a feasibility study as part of the interconnection process. The NOPR did not propose, and Order No. 2023 did not adopt, a feasibility study. We reiterate our findings in Order No. 2023 that the move from a serial interconnection process to the new cluster study process, coupled with the Commission's heatmap requirements, render the feasibility study redundant and an unnecessary burden on transmission provider resources.

149. However, in response to requests for clarification that transmission providers can continue performing feasibility studies as an independent entity variation, we reiterate that transmission providers may explain specific circumstances on compliance and justify why any deviations are either consistent with or superior to the *pro forma* LGIP, *pro forma* LGIA, *pro forma* SGIP, and/or *pro forma* SGIA or merit an independent entity variation in the context of RTOs/ISOs.

150. In response to EEI's request that the Commission clarify that provisional interconnection service requests continue to be processed as received, we clarify that Order No. 2023 did not modify the process for transmission providers to study provisional interconnection service requests.

151. In response to EEI's request that the Commission clarify how the 150-day study deadline applies to restudies, we clarify that transmission providers have 150 days from the point that they inform interconnection customers of the restudy to complete each restudy, which must occur within 30 calendar days after the cluster study report meeting. We further clarify that, in the case of multiple restudies, we expect that the transmission provider will not definitively know whether to initiate a restudy of later-in-time clusters—and thus inform those interconnection customers that restudy is needed—until it has completed the initial restudy.

152. In response to Clean Energy Associations and IPP Coalition, we continue to find, as the Commission did in Order No. 2023, that interconnection customers must select a definitive point of interconnection to be studied when executing the cluster study agreement. As the Commission explained in Order No. 2023, requiring interconnection customers to select one definitive point of interconnection when executing the cluster study agreement allows the interconnection customer to submit its interconnection request with a proposed point of interconnection, participate in the scoping meeting during the customer engagement window, and receive feedback on its proposed point of interconnection. We continue to believe that this strikes the right balance between allowing for flexibility and potential adjustments to the point of interconnection, based on discussion with the transmission provider and the transmission provider's detailed knowledge of its transmission system, and providing transmission providers with the information necessary to conduct the cluster study, thus reducing the potential for restudies that would be required if interconnection customers could change their points of interconnection later in the process.[264]

153. Similarly, we continue to believe that allowing multiple points of interconnection (whether they are ''electrically proximate'' or not) to be studied before the interconnection customer is required to select the definitive point of interconnection fails to take into account the fact that, if an interconnection customer changes the definitive point of interconnection after the cluster study, it may impact the study results of the other interconnection customers in the cluster and could lead to restudies and delays. It may be the case that an ''electrically proximate'' point of interconnection location can be effectively implemented within a study process without materially impacting a study process, and the current process allows the transmission provider to determine whether that change to the point of interconnection will be considered a material modification. We find this sufficient to address IPP Coalition's concern.

154. We find Ørsted's request for clarification regarding circumstances where a regulatory limitation requires a change to the point of interconnection to be beyond the scope of Order No. 2023. The Commission did not adopt a process to change the point of interconnection when there is a regulatory limitation in Order No. 2023. In such a circumstance, changes to the point of interconnection are addressed in section 4.4 of the *pro forma* LGIP, which governs modifications to an interconnection request.

155. We disagree with PJM's request for clarification, and in the alternative, rehearing, that transmission providers need not evaluate whether every request to change an interconnection customer's point of interconnection is a material modification. First, while we agree that evaluating a change of point of interconnection will require engineering labor, we note that the availability of the public interactive heatmap will provide interconnection customers with far more transparency into the viability of the points of interconnection on the transmission provider's system prior to entering the interconnection queue. Thus, we expect the heatmap requirement to reduce the frequency with which interconnection customers request changes to their point of interconnection, as they will be better informed prior to submitting an interconnection request. The *pro forma* LGIP defines ''material modifications'' as ''those modifications that have a material impact on the cost or timing of any Interconnection Request with an equal or later Queue Position.'' [265] Other than that provision, we leave the determination of what constitutes a material modification to the transmission providers' currently-effective processes for determining materiality. We are unpersuaded that (1) interconnection customers should be limited to one change to their point of interconnection and (2) that all changes to points of interconnection should be presumed to be material outside of certain points in the cluster study, because interconnection customers already have a relatively limited window in which to request changes to points of interconnection. *Pro forma* LGIP sections 3.1.2, 4.4, and 4.4.3 make clear that a request to change an interconnection customer's point of interconnection that comes after the return of the executed cluster study agreement shall constitute a material modification. We find these provisions to address PJM's concern regarding point of interconnection change requests that arise from ''project developers seeking to optimize their projects in mid-process'' [266] by limiting most point of interconnection change requests to early in the study process and presuming those later in the study process to be material modifications. We also find that this approach strikes a reasonable balance between the use of engineering labor to advance feasible projects and reducing late-stage interconnection request modifications or withdrawals that could slow down the study process or lead to restudy. For these reasons, we find that the existing *pro forma* LGIP provisions referenced above adequately address PJM's concerns, and therefore no clarification or rehearing is necessary.

156. As we explain in detail below in section D.1.c.ii, we are unpersuaded by NYISO's assertions that the 150-day cluster study deadline is unjust and unreasonable and that the Commission's

[264] *Id.* P 200.

[265] *Pro forma* LGIP, section 1 (Definitions).

[266] PJM Rehearing Request at 44.

determination reflects arbitrary and capricious decision-making. As we note below, and consistent with the Commission's statements in Order No. 2023, transmission providers may explain specific circumstances on compliance and justify why any deviations are either consistent with or superior to the *pro forma* LGIP or merit an independent entity variation in the context of RTOs/ISOs. Accordingly, we grant MISO's and NYISO's requests for clarification that Order No. 2023 does not preempt transmission providers from proposing tariff-defined study deadlines that may differ from the *pro forma* LGIP's 150-day schedule. Rather, the statements MISO and NYISO refer to in Order No. 2023 decline to allow transmission providers flexibility to set *ad-hoc* deadlines beyond their standard, tariff-defined deadlines.

157. NYISO requests that the Commission clarify that, during the 45-day cluster request window, interconnection customers are limited to one 10-business day opportunity to cure a deficiency in their applications. We disagree with NYISO's interpretation of the applicable *pro forma* LGIP language and note that NYISO offers no argument to support this interpretation. We therefore clarify that interconnection customers must receive as many cure periods as needed to remedy a deficient interconnection request, as long as the end of such cure periods fall prior to the last day of the 45-day cluster request window. In other words, if an interconnection customer fails to fully cure its application within the first cure period, transmission providers must issue a second (or third) deficiency notice to an interconnection customer during the cluster request window, if time allows. We clarify that, if a transmission provider finds an interconnection request to be deficient less than 10 days before the close of the cluster request window, the interconnection customer may have until the close of the cluster request window to cure those deficiencies.[267]

158. NYISO seeks clarification regarding the sentence in section 3.4.4 of the *pro forma* LGIP, which reads ''At any time, if Transmission Provider finds that the technical data provided by Interconnection Customer is incomplete or contains errors, Interconnection Customer and Transmission Provider shall work expeditiously and in good faith to remedy such issues.'' We grant NYISO's requested clarification that this language is not meant to extend the time period by which an interconnection customer must address deficiencies for the transmission provider's acceptance of a valid, complete interconnection request, but instead is simply intended to permit the transmission provider and interconnection customer to address any issues that may be discovered in the interconnection process, subject to applicable deadlines. In other words, the interconnection customer and transmission provider shall work expeditiously and in good faith to remedy any errors or incomplete information (that do not merit finding the interconnection request deficient) either during the cluster request window or later, *i.e.,* during the customer engagement window. We decline to modify the *pro forma* LGIP as proposed by NYISO because it is unnecessary.

159. NYISO seeks further clarification around when a transmission provider must complete its determination that an interconnection request is valid, the timeline in which an interconnection customer may cure deficiencies in its application, and treatment of interconnection requests deemed invalid during the customer engagement window. We clarify that the transmission provider must complete its determination that an interconnection request is valid by the close of the cluster request window, and therefore, interconnection customers must also cure deficient interconnection requests by the close of the cluster request window. In other words, only interconnection customers with valid interconnection requests, for which there is no need to cure deficiencies, proceed to the customer engagement window. As such, transmission providers may not continue determining whether interconnection requests are valid into the customer engagement window. This means that there is no need for transmission providers to deem interconnection requests withdrawn during the customer engagement window, as all invalid interconnection requests will already have been deemed withdrawn at the close of the cluster request window. We acknowledge NYISO's confusion regarding Paragraph 234 of Order No. 2023, which rejects the notion of withdrawing invalid interconnection requests before the end of the customer engagement window. We set aside Paragraph 234 of Order No. 2023 and clarify that an interconnection customer's cure period ends at the close of the cluster request window at the latest. Nevertheless, interconnection customers with valid interconnection requests may work with the transmission provider, per section 3.4.4 of the *pro forma* LIGP and as explained above, to resolve minor errors or incompletions in technical data throughout the process, without the need for the transmission provider to deem an interconnection request deficient, invalid, or withdrawn. To improve clarity with regard to these issues, we modify section 3.4.5 of the *pro forma* LGIP as follows, with italics indicating additions and brackets indicating deletions:

> At the end of the Customer Engagement Window, all Interconnection Requests deemed valid that have executed a Cluster Study Agreement in the form of Appendix 2 to this LGIP shall be included in the Cluster Study. Any Interconnection Requests *for which the Interconnection Customer has not executed a Cluster Study Agreement* [not deemed valid at the close of the Customer Engagement Window] shall be deemed withdrawn (without the cure period provided under Section 3.7 of this LGIP) by Transmission Provider, the application fee shall be forfeited to the Transmission Provider, and the Transmission Provider shall return the study deposit and Commercial Readiness Deposit to Interconnection Customer. Immediately following the Customer Engagement Window, Transmission Provider shall initiate the Cluster Study described in Section 7 of this LGIP.

160. We also modify *pro forma* LGIP section 3.4.4 to clarify that all items in *pro forma* LGIP section 3.4.2 must be received during the cluster request window. Taken together, these modifications make clear that the condition to proceed from the cluster request window to the customer engagement window is a valid interconnection request, and the condition to proceed from the customer engagement window is an executed cluster study agreement.

161. We are unpersuaded by NYISO's arguments to modify the requirement for transmission providers to post an anonymized list of the projects eligible to participate in the cluster study during the customer engagement window. NYISO's position is that the requirement would complicate NYISO's own specific processes, rather than the processes of transmission providers more broadly. Consistent with the Commission's statements in Order No. 2023, transmission providers may explain specific circumstances on compliance and justify why any deviations are either consistent with or superior to the *pro forma* LGIP, *pro forma* LGIA, *pro forma* SGIP, and/or *pro forma* SGIA or merit an independent entity variation in the context of RTOs/ISOs.

162. We disagree with NewSun's request to extend the 30-calendar day

[267] *See* Order No. 2023, 184 FERC ¶ 61,054 at P 226.

period for an interconnection customer to execute the facilities study agreement. The NOPR did not propose, and Order No. 2023 did not adopt, any modifications to section 8.1 of the *pro forma* LGIP regarding the 30-calendar day period. We believe that 30 calendar days is a sufficient amount of time to meet the requirements of *pro forma* LGIP section 8.1. We believe that 30-calendar day timeframe balances providing certainty about the timeline for the interconnection process and ensuring that studies progress in a timely manner while providing sufficient time for an interconnection customer to execute the facilities study agreement and submit the appropriate deposit. We note that, while the Commission implemented changes in Order No. 2023 such as the commercial readiness deposit in *pro forma* LGIP section 8.1 that increase certain burdens on interconnection customers with the goal of discouraging speculative requests, the Commission also implemented changes such as the new study delay penalty structure that reasonably incentivizes transmission providers to ensure the timely processing of interconnection requests.[268]

163. However, we are persuaded by NewSun's arguments regarding the overlapping timelines for the notice of restudy and execution of the facilities study agreement (with associated deposits). Therefore, we modify sections 7.3 and 8.1 of the *pro forma* LGIP to remove the requirement for transmission providers to tender an interconnection facilities study agreement simultaneously with issuance of a cluster study (or restudy) report. We modify section 8.1 of the *pro forma* LGIP to clarify that transmission providers shall tender the interconnection facilities study agreement within 5 business days after the transmission provider notifies interconnection customers that no further restudies are required. This modification addresses NewSun's concern that an interconnection customer will not know if a restudy is required before the interconnection customer is required to commit to a facilities study and make the required deposits.

164. Regarding NYTOs' request for clarification about equal queue priority, we continue to find that, under the *pro forma* LGIP, interconnection requests studied in the same cluster have equal queue priority.[269] To address the situation that NYTOs describe, which appears specific to New York, we reiterate that NYISO, as an ISO, may explain its specific circumstances on compliance and justify why any deviations merit an independent entity variation.

165. We are not persuaded by arguments raised by several commenters regarding reforms not adopted in Order No. 2023. We are not persuaded by AEP's argument that the Commission should have included a generator replacement process in the *pro forma* LGIP. The NOPR did not propose such a process, and we continue to believe that the record in this proceeding is insufficient to require such a process generically. To AEP's alternative request for clarification, we clarify that nothing in Order No. 2023 limits transmission providers' ability to make an FPA section 205 filing, and we will continue to assess such filings on a case-by-case basis. In response to MISO, we clarify that Order No. 2023 does not require transmission providers to change, eliminate, or re-justify existing Commission-approved generator replacement processes on compliance. We reiterate our determination in Order No. 2023 that comments concerning generator replacement processes are beyond the scope of Order No. 2023.[270]

166. We also disagree with AEP's argument that the Commission should include an option for processing some interconnection requests outside the cluster study process. We continue to find, as the Commission did in Order No. 2023, that, based on the record before us, establishing a separate interconnection process outside the cluster study process could detract from transmission providers' efforts to efficiently process cluster studies.[271]

167. Finally, we revise the *pro forma* LGIP to correct inadvertent errors and add minor, clarifying edits as follows. First, we revise section 3.4.6 to correct an inadvertent omission of the word ''or'' to clarify that the non-disclosure agreement used for the group cluster study scoping meeting will provide for confidentiality of identifying information *or* commercially sensitive information, consistent with the discussion in Order No. 2023.[272] Second, we also revise *pro forma* LGIP section 7.5 to clarify that cluster restudies can be triggered by withdrawal of a higher-queued interconnection customer, and that interconnection customers being restudied are responsible for the cost of any restudy, except as provided in section 3.7. Third, we revise *pro forma* LGIP section 3.5.2.4 to clarify that the requirement to track and post metrics on interconnection queue withdrawals includes each stage of the study process. Fourth, we revise *pro forma* LGIP section 3.4.6 to remove the phrase ''and one or more available alternative Point(s) of Interconnection,'' consistent with the discussion in Order No. 2023.[273] Fifth, we revise the *pro forma* LGIP definition of ''interconnection study'' to reference all interconnection studies discussed in the *pro forma* LGIP.

3. Allocation of Cluster Network Upgrade Costs

a. Order No. 2023 Requirements

168. In Order No. 2023, the Commission added new section 4.2.1 (Cost Allocation for Interconnection Facilities and Network Upgrades) to the *pro forma* LGIP to require that transmission providers (1) allocate network upgrade costs based on the proportional impact method and (2) allocate the costs of substation network upgrades on a per capita basis.[274] To implement this requirement, the Commission added definitions for proportional impact method, substation network upgrades, and system network upgrades to the *pro forma* LGIP and *pro forma* LGIA and modified the existing definition of stand alone network upgrades. The Commission also required transmission providers to allocate the costs of interconnection facilities (*i.e.,* both the interconnection customer's interconnection facilities and transmission provider's interconnection facilities) on a per capita basis.[275] The Commission further provided that interconnection customers may agree to share interconnection facilities, that the per capita cost allocation will apply only where interconnection customers agree to share interconnection facilities, and that interconnection customers may choose a different cost sharing arrangement upon mutual agreement.

169. The Commission found that transmission providers must provide tariff provisions that describe the method they will use for allocating costs of each type of network upgrade, but

[268] *See id.* P 962. We also note that MISO and SPP currently only provide for 15 days to enter the facilities study phase (called Decision Point 2 in their respective generator interconnection procedures), and they each require a 20% commercial readiness deposit to enter the facilities study, whereas Order No. 2023 only requires a 10% deposit.

[269] *Id.* P 858.

[270] *See id.* PP 1736, 1743.

[271] *Id.* P 392.

[272] *Id.* P 247.

[273] *Id.* P 202 (declining to permit interconnection customers to submit multiple alternative points of interconnection).

[274] *Id.* P 453.

[275] *Id.* P 454.

specific metrics and thresholds for implementing the allocation, or other specific technical information, may be included in business practice manuals, or publicly posted on the transmission provider's website.[276] The Commission found that, in particular, the technical information surrounding implementation of the proportional impact method by a particular transmission provider does not need to be included in the transmission provider's tariff under the rule of reason because these provisions are properly classified as implementation details that do not significantly affect rates, terms, and conditions of service.

170. In response to requests for the Commission to direct transmission providers to use a specific type of proportional impact method or distribution factor analysis and apply minimum distribution factor thresholds that will be used to evaluate NRIS and ERIS requests, the Commission stated that it was unpersuaded that such level of prescription is needed to ensure just, reasonable, and not unduly discriminatory or preferential rates.[277] The Commission stated that, instead, it believes that flexibility for transmission providers to develop such details as part of their compliance filings—and in their business practice manuals, where consistent with the rule of reason—is important to ensure that the proportional impact method used by each transmission provider reflects the characteristics of its region (*e.g.,* types of network upgrade facilities identified in the region, or preferred analyses in the region for determining the share of the need for the specific network upgrade type).

b. Requests for Rehearing and Clarification

171. Generation Developers request clarification that Order No. 2023 does not prejudge whether any implementation detail regarding the proportional impact method needs to be included in the tariff rather than in a business practice manual, and that Order No. 2023 gives transmission providers flexibility to develop a method consistent with the Commission's rule of reason.[278] Generation Developers express concern that Order No. 2023 could be misinterpreted such that any implementation detail regarding the proportional impact method does not significantly affect rates and thus need not be included in the tariff. Generation Developers aver that the Commission has recognized that the rule of reason must be applied on a case-by-case basis and thus it would be inappropriate to make a generic determination that any specific detail can be placed in a business practice manual.[279] Generation Developers further argue that the Commission currently lacks the information necessary to make such a determination because whether a specific threshold or metric will significantly affect rates depends on several factors that will be detailed in the transmission provider's Order No. 2023 compliance filings.

172. Longroad Energy requests rehearing of Order No. 2023's decision to not require minimum impact thresholds for purposes of the proportional impact method.[280] Longroad Energy argues that minimum impact thresholds are necessary to ensure that interconnection customers are not required to finance network upgrades for which they have a de minimis impact.[281] Longroad Energy avers that the absence of a minimum impact threshold is administratively burdensome for transmission providers because they must track a larger number of interconnection requests. Longroad Energy asserts that interconnection customers may be exposed to construction delays for network upgrades for which they only have a de minimis impact. Longroad Energy notes that the Commission has accepted minimum impact thresholds in other instances.[282] Longroad Energy further argues that minimum impact thresholds are necessary to prevent any withdrawing interconnection request from materially impacting the remaining interconnection customers and thus triggering a withdrawal penalty.[283] Finally, Longroad Energy requests clarification that Order No. 2023 does not preclude a transmission provider from using minimum impact thresholds.

173. Clean Energy Associations request clarification that substation network upgrade cost allocation is based on the number of interconnection facilities (*i.e.,* generator tie lines) connecting to the substation at the point of interconnection and not based on the number of generating facilities connecting to the substation.[284] Clean Energy Associations explain that it is the number of interconnection facilities, not the number of generating facilities, that drive substation expansion. Clean Energy Associations request that the Commission clarify that the transmission provider should first allocate substation network upgrade costs on a per capita basis for each interconnection facility connecting to the substation, and secondly divide those costs between the multiple generating facilities using that interconnection facility.

174. Clean Energy Associations also request clarification that substation network upgrades are at distinctive voltage levels.[285] Clean Energy Associations explain that definitive selection of a point of interconnection requires a voltage level to be specified as well as a substation, and that expansion costs for different voltage levels are normally unrelated and may be very different.

c. Determination

175. In response to Generation Developers' request for clarification regarding the location of details on the implementation of the proportional impact method, we clarify that, consistent with the rule of reason, the Commission will consider the details of the transmission provider's proposed proportional impact method and whether those details should be in the tariff in its individual Order No. 2023 compliance filing.

176. We are unpersuaded by Longroad Energy's request for rehearing to require all transmission providers to use minimum impact thresholds. We reiterate the Commission's finding in Order No. 2023 that it is appropriate for transmission providers to propose such details in their Order No. 2023 compliance filings to ensure that the method used by each transmission provider reflects the characteristics of its region.[286] For example, different regions may identify different types of network upgrades or have preferred analyses for identifying specific network upgrade types. We disagree with Longroad Energy's assertion that minimum impact thresholds are necessary to prevent any withdrawal

[285] *Id.* at 55–56.

[286] Order No. 2023, 184 FERC ¶ 61,054 at P 463.

from triggering a withdrawal penalty, as the transmission provider must still assess whether the withdrawal has a material impact on the cost or timing of equal or lower-queued interconnection requests in accordance with section 3.7.1 of the *pro forma* LGIP. In response to Longroad Energy's request for clarification, we clarify that Order No. 2023 does not preclude transmission providers from proposing a minimum impact threshold.

177. In response to Clean Energy Associations' request for clarification regarding substation network upgrade cost allocation, we clarify that the cost allocation is based on the number of interconnection facilities connecting to the substation located at the point of interconnection. Accordingly, to allocate such costs per capita to each generating facility in accordance with section 4.2.1.1.a of the *pro forma* LGIP, the transmission provider must first allocate the costs of substation network upgrades on a per capita basis for each interconnection facility connecting to the substation, and then allocate those costs on a per capita basis between each generating facility using the interconnection facility.

178. We also grant Clean Energy Associations' request for clarification that substation network upgrades are at distinct voltage levels. Accordingly, we modify section 4.2.1.1.a of the *pro forma* LGIP as follows, with brackets indicating deletions and italics indicating additions:

> Substation Network Upgrades, including all switching stations, shall be allocated *first to Interconnection Facilities interconnecting to the substation at the same voltage level, and then per capita* to each Generating Facility *sharing the Interconnection Facility* [interconnecting at the same substation].

4. Shared Network Upgrades

a. Order No. 2023 Requirements

179. In Order No. 2023, the Commission declined to adopt the NOPR proposal to implement cost sharing of network upgrades between interconnection customers in an earlier cluster and interconnection customers in a subsequent cluster.[287] The Commission stated that it declined to adopt the NOPR proposal because of its potentially significant administrative burden and because Order No. 2023's cluster network upgrade cost allocation reform would address the ''first mover/free rider'' issue that motivated the NOPR proposal.

[287] *Id.* PP 486–488.

b. Requests for Rehearing and Clarification

180. Shell requests clarification that Order No. 2023 does not prohibit existing mechanisms of inter-cluster cost sharing of network upgrades and that the Commission will not prohibit inter-cluster cost sharing in the future.[288] Shell avers that network upgrade cost sharing between initial and subsequent interconnection customers is common in the industry, for example in the ISO–NE market.

c. Determination

181. We clarify that Order No. 2023 does not require transmission providers to eliminate, change, or re-justify existing tariff mechanisms regarding cost sharing of network upgrades between earlier-in-time and later-in-time clusters because such provisions are not impacted by the requirements of Order No. 2023. We reiterate that transmission providers need only seek approval to maintain previously approved variations from the *pro forma* LGIP and *pro forma* LGIA if such variations are impacted by the requirements of Order No. 2023.

5. Increased Financial Commitments and Readiness Requirements

a. Financial Security Generally

i. Order No. 2023 Requirements

182. In Order No. 2023, the Commission modified sections 3.4.2(vi), 5.1.1.1, 5.1.1.2, 7.5, and 8.1(3) of the *pro forma* LGIP to require that an interconnection customer pay the commercial readiness deposit and deposits prior to the transitional serial study, transitional cluster study, cluster restudy and the interconnection facilities study via cash or a letter of credit.[289] The Commission also established a *pro forma* two-party affected system facilities construction agreement in Appendix 11 to the *pro forma* LGIP and a *pro forma* multiparty affected system facilities construction agreement in Appendix 12 to the *pro forma* LGIP.[290] In section 4.1 of Appendix 11 to the *pro forma* LGIP and section 4.1 of Appendix 12 to the *pro forma* LGIP, the Commission required that an affected system interconnection customer provide financial security to the transmission provider in an amount sufficient to cover the costs for constructing, procuring, and installing the applicable portion of affected system network upgrade(s) in the form of a guarantee, a surety bond, a letter of credit or other form of security that is reasonably acceptable to transmission provider, at the affected system interconnection customer's option.

[288] Shell Rehearing Request at 14–15.

[289] Order No. 2023, 184 FERC ¶ 61,054 at P 690.

[290] *Id.* P 1193.

ii. Requests for Rehearing and Clarification

183. Clean Energy Associations request clarification or, in the alternative, rehearing that acceptable forms of security for the commercial readiness deposit, transitional serial study deposit, and transitional cluster study deposit are not limited to only irrevocable letters of credit and cash.[291] Clean Energy Associations assert that the Commission did not explain the decision to list these forms of security to the exclusion of other forms, such as surety bonds or other forms of security that may be acceptable to the transmission provider, and ignored comments in the record explicitly requesting flexibility for these alternative forms of security to be considered.

184. Similarly, Longroad Energy requests rehearing to allow generator interconnection customers to pay deposits or provide security in the form of cash, irrevocable letter of credit, surety bond, or other reasonably acceptable form of financial security, at the generator interconnection customer's discretion.[292] Additionally, if the interconnection customer submits its required deposit or security in the form of a letter of credit or surety bond, and ultimately some or all of the security is drawn by the transmission provider, Longroad Energy argues that the interconnection customer should be given the option to pay the amount due in cash rather than drawing on the letter of credit or bond. Longroad Energy argues that limiting the acceptable forms of financial assurance to only irrevocable letters of credit and cash is arbitrary and capricious and an unexplained departure from Commission precedent in Order No. 2003.[293] In addition to the deposits mentioned by Clean Energy Associations, Longroad Energy requests rehearing regarding the acceptable form of security for the deposits prior to the cluster restudy and the interconnection facilities study.[294] Longroad Energy notes that Order No. 2023 explicitly allows surety bonds or other forms of reasonably acceptable financial security for affected system network upgrade

[291] Clean Energy Associations Rehearing Request at 63–65.

[292] Longroad Energy Rehearing Request at 12.

[293] *Id.* at 9–14.

[294] *Id.* at 10–11.

deposits but not other deposits, which is unduly discriminatory.[295]

iii. Determination

185. We are persuaded by Clean Energy Associations and Longroad Energy's arguments on rehearing. We believe that allowing surety bonds or other forms of financial security that are reasonably acceptable to the transmission provider for the commercial readiness deposit and all study deposits will help ensure that interconnection customers do not face unjust and unreasonable or unduly discriminatory hurdles to the interconnection of new generation through limitations on the acceptable forms of financial security. We find that acceptable forms of security for the commercial readiness deposit and deposits prior to the transitional serial study, transitional cluster study, cluster restudy and the interconnection facilities study should include not only cash or an irrevocable letter of credit, but also surety bonds or other forms of financial security that are reasonably acceptable to the transmission provider. Accordingly, we modify sections 3.4.2, 5.1.1.1, 5.1.1.2, 7.5, and 8.1 of the *pro forma* LGIP to reflect this finding.

186. However, we are not persuaded by Longroad Energy's request that, if the interconnection customer submits its required deposit or security in the form of a letter of credit or surety bond, the interconnection customer should be given the option to pay any amount drawn by the transmission provider in cash rather than drawing on the letter of credit or surety bond. Longroad Energy did not provide sufficient reasoning or evidence as to why this clarification is necessary to ensure just and reasonable and not unduly discriminatory or preferential rates. However, we clarify that we do not preclude transmission providers from allowing interconnection customers to pay cash in lieu of drawing on a previously submitted letter of credit or surety bond.

b. Increased Study Deposits

i. Order No. 2023 Requirements

187. In Order No. 2023, the Commission adopted the following study deposit framework in section 3.1.1.1 (Study Deposit) of the *pro forma* LGIP: [296]

Size of proposed generating facility associated with interconnection request	Amount of deposit
>20 MW <80 MW	$35,000 + $1,000/MW.
≥80 MW <200 MW ..	$150,000.
≥200 MW	$250,000.

The Commission required transmission providers to collect this study deposit once, upon entry into the cluster.[297]

ii. Determination

188. Given that interconnection customers developing small generating facilities requesting NRIS submit their interconnection requests under the relevant transmission providers' LGIP,[298] we modify 3.1.1.1 as follows to clarify the applicable study deposits in such instances:

Size of proposed generating facility associated with interconnection request under the *pro forma* LGIP	Amount of deposit
<80 MW	$35,000 + $1,000/MW.
≥80 MW <200 MW ..	$150,000.
≥200 MW	$250,000.

189. We also modify section 3.1.1.1 of the *pro forma* LGIP to clarify that the $5,000 application fee is non-refundable. We also modify section 13.3 of the *pro forma* LGIP to remove language ''or offset against the cost of any future Interconnection Studies associated with the applicable Cluster prior to beginning of any such future Interconnection Studies,'' given that the study deposit structure under Order No. 2023 includes an initial study deposit at the beginning of the study process, rather than separate deposits before each phase of study.

c. Demonstration of Site Control

i. Order No. 2023 Requirements

190. In Order No. 2023, the Commission adopted revisions to the *pro forma* LGIP and *pro forma* LGIA to add more stringency to the site control requirements and to help prevent speculative interconnection requests from entering the interconnection queue.[299] The Commission found that, taken together, these reforms will help ensure that commercially viable interconnection requests with demonstrated site control or with demonstrated regulatory limitations will be able to enter the interconnection queue, thereby reducing the negative impacts of speculative interconnection requests.

191. As relevant to the requests for rehearing and clarification, in Order No. 2023, the Commission revised: (1) the definition for ''site control'' in section 1 of the *pro forma* LGIP and in article 1 of the *pro forma* LGIA; [300] and (2) section 3.4.2 of the *pro forma* LGIP to include a limited option for interconnection customers to submit a deposit in lieu of site control when they submit their interconnection request—only if qualifying regulatory limitations prohibit the interconnection customer from obtaining site control.[301]

192. Also relevant to the requests for clarification, in Order No. 2023, the Commission clarified that deposits in lieu of site control for interconnection customers with regulatory limitations are refundable and cannot be applied to the costs of interconnection studies or withdrawal penalties.[302] The Commission also clarified that the site control demonstration requirements apply only to the land needed for the generating facility and explained that, because it did not propose site control requirements for interconnection facilities in the NOPR, it declined to address comments suggesting alternative site control requirements for interconnection facilities or network upgrades.[303]

ii. Requests for Rehearing and Clarification

193. IPP Coalition requests rehearing and urges the Commission to establish a requirement for full site control over generator interconnection facilities without a deposit in lieu of site control demonstration option at the facilities study phase.[304] IPP Coalition contends that Order No. 2023 limited site control requirements to ''the land needed for

[300] *Id.* P 584 (''Site Control shall mean the exclusive land right to develop, construct, operate, and maintain the Generating Facility over the term of expected operation of the Generating Facility. Site Control may be demonstrated by documentation establishing: (1) ownership of, a leasehold interest in, or a right to develop a site of sufficient size to construct and operate the Generating Facility; (2) an option to purchase or acquire a leasehold site of sufficient size to construct and operate the Generating Facility for such purpose; or (3) any other documentation that clearly demonstrates the right of Interconnection Customer to exclusively occupy a site of sufficient size to construct and operate the Generating Facility. Transmission Provider will maintain acreage requirements for each Generating Facility type on its OASIS or public website.'').

[301] *Id.* P 605.

[302] *Id.* P 612.

[303] *Id.* P 604.

[304] IPP Coalition Rehearing Request at 6.

the generating facility'' and declined to extend any site control requirements to the interconnection customer's interconnection facilities without substantive consideration and a reasoned response to the comments urging such a requirement,[305] which is contrary to reasoned decision-making principles in violation of the APA. IPP Coalition argues that requiring site control for interconnection facilities would increase the quality of interconnection study results and increase certainty for interconnection customers as the interconnection process becomes more costly and risky to navigate. IPP Coalition further argues that the record reflects that such a requirement could prevent gaming and reduce the risk of more speculative projects delaying the interconnection process.[306]

194. Clean Energy Associations ask the Commission to clarify that the revised definition of site control in the *pro forma* LGIP and *pro forma* LGIA is not meant to impose term requirements on site control.[307] Further, Clean Energy Associations urge the Commission to clarify and modify the definition of site control to prevent future confusion and misinterpretation by transmission providers regarding any term requirements for site control. Clean Energy Associations assert that Order No. 2023 revised the definition of site control in a way that is not discussed in the order or in the preceding NOPR to include the words ''right to develop, *construct, operate, and maintain* the Generating Facility *over the term of expected operation* of the Generation Facility'' (emphasis added).[308] Clean Energy Associations assert that this revision implies that a lease option or other form of site control must have a term that is valid for the entire life of the generating facility. Clean Energy Associations argue that such a term is contrary to standard industry practice,[309] is unnecessary to ensure that developers have sufficient rights to develop, construct, operate, and maintain their generating facilities, and unnecessarily increases the cost of development, resulting in rates to consumers that are unjust and unreasonable.[310]

195. ACP requests that the Commission clarify that, in their compliance filings, transmission providers may seek to expand opportunities for interconnection customers to submit deposits in lieu of demonstrating 90% site control when submitting an interconnection request to address other exigent circumstances beyond regulatory constraints.[311] ACP argues that land acquisition in dense urban areas where battery storage facilities are more frequently sited is much more difficult and costly to achieve at the time an interconnection request is submitted than is typically the case for project sites much further from load. ACP asserts that denying such flexibility on compliance could result in key battery storage projects and other projects near load being unable to move forward, endangering grid reliability where and when those resources are most needed.[312] ACP argues that this clarification would not alter any aspect of Order No. 2023 but would provide valuable information to transmission providers and interconnection customers in developing effective compliance filings.[313]

196. In the event the point of interconnection must change due to a new government policy or regulatory requirement, Ørsted requests clarification that any deposits submitted in lieu of site control would still be treated as refundable and the project would not be subject to withdrawal penalties if the change cannot be accommodated.[314]

iii. Determination

197. We are unpersuaded by IPP Coalition's request for rehearing of the Commission's decision to apply site control demonstration requirements only to the land needed for the generating facility. We reiterate that the Commission did not propose site control requirements for interconnection facilities in the NOPR. While we note that some comments were submitted on this topic,[315] we continue to find the record insufficient for the Commission to assess alternative site control requirements for interconnection facilities and impose them on a nationwide basis. We also note that some of the comments that were submitted argued that interconnection customers require flexibility when siting interconnection facilities because the route for such facilities may not be identified until the very end of the interconnection process.[316]

198. We are also unpersuaded by Clean Energy Associations' request for clarification and to modify the definition of site control to avoid imposing term limits. We disagree with Clean Energy Associations that Order No. 2023 revised the definition of site control in a way that was not discussed in the NOPR and note that the proposed definition of site control in the NOPR included the words ''right to develop, construct, operate, and maintain the Generating Facility over the term of expected operation of the Generation Facility.'' [317] We find that allowing interconnection customers to submit site control documentation with a term shorter than the expected operation of the generating facility would increase risks for all parties. For example, in the event a shorter lease expires, an interconnection customer could face property rights disputes that threaten its ability to operate its generating facility, which in turn, could jeopardize the transmission provider's ability to reliably operate its transmission system. Consistent with Order No. 2023, we find that it is the interconnection customer's responsibility to obtain exclusive site control over the term of expected operation of the generating facility.

199. We are further unpersuaded by ACP's request for clarification. We reiterate that, because a deposit in lieu of site control does not demonstrate that an interconnection customer has the exclusive right to develop a site, it does not indicate that an interconnection customer is ready to proceed with construction and commercial operation of the generating facility. As a result, we believe that allowing transmission providers to expand the option for interconnection customers to submit a deposit in lieu of demonstrating site

[305] *Id.* at 3–4 (citing AEE Initial Comments at 18; AEP Initial Comments at 21–23; Cypress Creek Initial Comments at 22; Enel Initial Comments at 41–42; MISO Initial Comments at 56; National Grid Initial Comments at 22–23; and Shell Reply Comments at 23).

[306] *Id.* at 4–5 (citing Order No. 2023, 184 FERC ¶ 61,054 at PP 537–539).

[307] Clean Energy Associations Rehearing Request at 63.

[308] *Id.* at 61.

[309] Clean Energy Associations states that the standard industry practice is to execute a development lease with a development term and an extended term. Clean Energy Associations explain that the development term typically lasts until the start of construction, is less than ten years, and expires if not extended by the interconnection customer. Clean Energy Associations further explain that, when an interconnection customer is ready to begin construction, the lease grants the customer the unilateral right to enter the extended term at a pre-determined higher payment rate. *Id.*

[310] *Id.* at 62–63.

[311] ACP Clarification Request at 1–3.

[312] *Id.* at 3 (also arguing that lease options available in dense urban areas typically have shorter terms than the phases of interconnection studies that determine project feasibility and capacity deliverability, which in turn can serve to justify more definitive site control).

[313] *Id.* at 4.

[314] Ørsted Rehearing Request at 11.

[315] Order No. 2023, 184 FERC ¶ 61,054 at PP 535–539.

[316] *Id.* P 535.

[317] NOPR, 179 FERC ¶ 61,194, at app. B, section 1.

control to address other exigent circumstances, beyond regulatory limitations, would not help to prevent speculative, commercially non-viable interconnection requests from entering the interconnection queue. In cases where it is particularly challenging or costly to achieve exclusive site control, the interconnection customer may not be ready to proceed with the construction and commercial operation of the generating facility, and therefore it may be inappropriate to submit an interconnection request for such a facility. Thus, we decline to clarify that transmission providers may expand the option for interconnection customers to submit a deposit in lieu of demonstrating site control.

200. In the event a new regulatory limitation requires a change to the point of interconnection that cannot be accommodated and results in an interconnection request being withdrawn, we grant Ørsted's request for clarification and clarify that any deposits submitted by the interconnection customer in lieu of site control must be refundable. Nevertheless, the interconnection customer may be subject to a withdrawal penalty. We acknowledge that certain interconnection customers, such as offshore wind resources, may be required to modify their point of interconnection, after they have already submitted an interconnection request, in response to a state or federal policy or regulation. However, the Commission did not adopt a process for interconnection customers to modify their point of interconnection due to a regulatory limitation in Order No. 2023. An interconnection customer can request to modify its interconnection request pursuant to section 4.4 of the *pro forma* LGIP, but if the transmission provider determines that the change to the point of interconnection is a material modification, and the interconnection customer elects to withdraw its interconnection request, the interconnection customer may be subject to a withdrawal penalty.

d. Commercial Readiness

i. Order No. 2023 Requirements

201. In Order No. 2023, the Commission revised sections 3.4.2, 7.5, 8.1, and 11.3 of the *pro forma* LGIP to require interconnection customers to submit commercial readiness deposits to help reduce the submission of speculative, commercially non-viable interconnection requests into interconnection queues.[318] The Commission found that, because the interconnection customer's total commercial readiness deposit held by the transmission provider increases as the interconnection process proceeds, this approach will encourage interconnection customers not ready to proceed through the interconnection process—or whose projects become commercially non-viable during the interconnection process—to withdraw earlier in the process, thereby lessening the incidence of late-stage withdrawals that result in delays and restudies.[319]

202. The Commission declined to adopt the non-financial commercial readiness demonstrations proposed in the NOPR because they were not necessary to address the need for reform—providing additional deterrence of speculative, commercially non-viable interconnection requests—given the significant, increasing commercial readiness deposits adopted instead.[320] The Commission also indicated that the non-financial commercial readiness demonstrations proposed in the NOPR may not necessarily serve as appropriate indicators of a proposed generating facility's commercial viability on a national basis, or may not match the timelines of state procurement efforts.[321] Additionally, the Commission expressed concern that the proposed non-financial commercial readiness demonstrations could incentivize power purchasers in some regions to execute purchase contracts with interconnection customers whose generating facilities will later be determined to be commercially non-viable.[322]

203. Because the Commission did not adopt the non-financial commercial readiness demonstrations proposed in the NOPR, the Commission found that it was unnecessary to address commenter concerns that certain non-financial commercial readiness demonstrations could provide an unduly discriminatory or preferential advantage to projects being developed by transmission providers or their affiliates.[323] Although the Commission found that commercial readiness deposits are sufficient to address the need for reform in this proceeding, the Commission stated that this finding does not preclude transmission providers from proposing to adopt non-financial commercial readiness demonstrations on compliance, provided they meet the requirements of the relevant standards (*i.e.,* an independent entity variation or the ''consistent with and superior to'' standard) when requesting a variation.[324]

ii. Requests for Rehearing and Clarification

204. Clean Energy Associations request that the Commission clarify Order No. 2023 by indicating the evaluation framework to determine if non-financial commercial readiness criteria are unduly discriminatory or preferential.[325] Clean Energy Associations urge the Commission to clarify how it will ensure that any additional non-financial commercial readiness demonstrations that a transmission provider may propose will not provide an unduly or preferential advantage to projects being developed by the transmission provider or its affiliates. Clean Energy Associations further request that the Commission clarify whether it will require a proposing transmission provider to use the *pro forma* readiness requirements before, or along with, implementing non-financial demonstrations. In the alternative, Clean Energy Associations seek rehearing on the basis that the Commission failed to meaningfully respond to evidence that the non-financial commercial readiness demonstrations present ample opportunity for non RTO/ISO transmission providers to discriminate against independent power producers.[326] Clean Energy Associations argue that it is nearly impossible for independent power producers to enter the queue by making a non-financial demonstration of commercial readiness, whereas transmission providers may be able to use non-financial readiness demonstrations to grant their own projects preferential contracts, resulting in undue discrimination against independent power producers.[327]

[318] Order No. 2023, 184 FERC ¶ 61,054 at P 690.

[325] Clean Energy Associations Rehearing Request at 67.

[326] *Id.* (citing ACORE Reply Comments at 4; ACPA And Renew Northeast Reply Comments at 4–6; AEE Initial Comments at 20; AEE Reply Comments at 12; Alliant Energy Initial Comments at 5–6; Clean Energy Associations Initial Comments at 34–35; CREA/New Sun Initial Comments at 57; CREA and NewSun Energy Reply Comments at 22–45; Cypress Creek Initial Comments at 22–23; Enel Initial Comments at 44; ENGIE Initial Comments at 5; ENGIE Reply Comments at 2–3; EPSA Initial Comments at 9; Fervo Energy Reply Comments at 6–7; New Jersey Commission Reply Comments at 6–8; NextEra Initial Comments at 25; NextEra Reply Comments at 14–16; Pine Gate Initial Comments at 27; PIOs Initial Comments at 29–30; R Street Initial Comments at 13; SEIA Initial Comments at 25; and Vistra Initial Comments at 6).

[327] *Id.* at 68–69 (citing Order No. 2023, 184 FERC ¶ 61,054 at P 667).

iii. Determination

205. We are unpersuaded by Clean Energy Associations' arguments on rehearing that the Commission must establish an evaluation framework to determine if non-financial commercial readiness criteria are unduly discriminatory or preferential. The Commission did not adopt non-financial commercial readiness demonstrations in Order No. 2023, and therefore such an evaluation framework is not needed to evaluate compliance with Order No. 2023. Rather, we reiterate the Commission's finding that non-financial commercial readiness demonstrations are not necessary to address the need for reform—providing additional deterrence of speculative, commercially non-viable interconnection requests—given the significant, increasing commercial readiness deposits the Commission adopted in Order No. 2023. Given that the Commission did not adopt non-financial commercial readiness demonstrations, we do not need to respond to arguments that such demonstrations could be unduly discriminatory. As such, we are not prejudging any compliance proposals that might include non-financial commercial readiness demonstrations, and transmission providers may explain specific circumstances on compliance and justify why any deviations from Order No. 2023 are either consistent with or superior to the *pro forma* LGIP or merit an independent entity variation in the context of RTOs/ISOs.[328]

e. Withdrawal Penalties

i. Order No. 2023 Requirements

206. In Order No. 2023, the Commission added the term ''withdrawal penalty'' to section 1 of the *pro forma* LGIP; revised section 3.7 of the *pro forma* LGIP; and added sections 3.7.1, 3.7.1.1, and 3.7.1.2 related to withdrawal penalties to the *pro forma* LGIP.[329] The Commission required transmission providers to apply withdrawal penalties to an interconnection customer if: (1) the interconnection customer withdraws its interconnection request at any point in the interconnection process; (2) the interconnection customer's interconnection request has been deemed withdrawn by the transmission provider at any point in the interconnection process; or (3) the interconnection customer's generating facility does not reach commercial operation (such as when an interconnection customer's LGIA is terminated prior to reaching commercial operation).[330] However, a withdrawal penalty must only be assessed if the withdrawal has a material impact on the cost or timing of any interconnection requests with an equal or lower queue position. The Commission stated that the interconnection customer will also be exempt from paying a withdrawal penalty if (1) the interconnection customer withdraws its interconnection request after receiving the most recent cluster study report and the network upgrade costs assigned to the interconnection customer's request have increased 25% compared to the previous cluster study report, or (2) the interconnection customer withdraws its interconnection request after receiving the individual facilities study report and the network upgrade costs assigned to the interconnection customer's request have increased by more than 100% compared to costs identified in the cluster study report.[331]

207. The Commission required a transmission provider to assess a withdrawal penalty on an interconnection customer with a proposed generating facility that does not reach commercial operation based either on the actual study costs or on a percentage of the interconnection customer's assigned network upgrade costs, depending on what phase the interconnection customer withdraws its interconnection request.[332] Thus, the withdrawal penalty for an interconnection customer will be calculated as the greater of the study deposit or: (1) two times the study cost if the interconnection customer withdraws during the cluster study or after receipt of a cluster study report; (2) 5% of the interconnection customer's identified network upgrade costs if the interconnection customer withdraws during the cluster restudy or after receipt of any applicable restudy reports; (3) 10% of the interconnection customer's identified network upgrade costs if the interconnection customer withdraws during the facilities study, after receipt of the individual facilities study report, or after receipt of the draft LGIA; or (4) 20% of the interconnection customer's identified network upgrade costs if, after executing, or requesting to file unexecuted, the LGIA, the interconnection customer's LGIA is terminated before its generating facility achieves commercial operation.

208. The Commission required transmission providers to use the withdrawal penalty funds as follows: (1) to fund studies and restudies in the same cluster; (2) if withdrawal penalty funds remain, to offset net increases in costs borne by other remaining interconnection customers from the same cluster for network upgrades shared by both the withdrawing and non-withdrawing interconnection customers prior to the withdrawal; and (3) if any withdrawal penalty funds remain, to be returned to the withdrawing interconnection customer.[333]

209. Section 3.7.1.2.1 of the *pro forma* LGIP describes the transmission provider's handling of withdrawal penalty funds and the first step of distributing them to fund studies and restudies.[334] For a single cluster, the transmission provider shall hold all withdrawal penalty funds until all interconnection customers in that cluster have: (1) withdrawn or been deemed withdrawn; (2) executed an LGIA; or (3) requested an LGIA to be filed unexecuted. Any withdrawal penalty funds collected shall first be used to fund studies for interconnection customers in the same cluster that have executed an LGIA or requested an LGIA to be filed unexecuted. Distribution of the withdrawal penalty funds for such study costs shall not exceed the total actual study costs.

210. The Commission adopted section 3.7.1.2.2 of the *pro forma* LGIP, which provides that if, after the first distribution step is complete, withdrawal penalty funds remain, the transmission provider must proceed to the second step of distributing them to offset net increases in network upgrade cost assignments driven by the withdrawal.[335] The transmission provider will determine if the withdrawn interconnection customers, at any point in the cluster study process, shared cost assignment for one or more network upgrades with any remaining interconnection customers in the same cluster based on the cluster study report, cluster restudy report(s), interconnection facilities study report, and any subsequent issued restudy report for the cluster.

211. If the transmission provider determines that withdrawn interconnection customers shared cost assignment for network upgrades with remaining interconnection customers in the same cluster, the transmission provider will calculate the remaining interconnection customers' net increase in costs (*i.e.,* financial impact) due to a shared cost assignment for network

[334] *Id.* P 801.

[335] *Id.* P 802.

upgrades with the withdrawn interconnection customer.[336] It will then distribute withdrawal penalty funds as described in section 3.7.1.2.3 of the *pro forma* LGIP, depending on whether the withdrawal occurred before the withdrawing interconnection customer executed an LGIA (*i.e.,* during the cluster study process) or afterward.

212. If the transmission provider determines that more than one interconnection customer in the same cluster was financially impacted by the same withdrawn interconnection customer, the transmission provider will apply the relevant withdrawn interconnection customer's withdrawal penalty to reduce the financial impact to each impacted interconnection customer based on each withdrawn interconnection customer's proportional share of the financial impact.[337] Each interconnection customer's proportional share will be determined by either the proportional impact method if the net cost increase is related to a system network upgrade or on a per capita basis if the net cost increase is related to a substation network upgrade.

213. Section 3.7.1.2.4 of the *pro forma* LGIP details the process by which the transmission provider will provide amended LGIAs to any interconnection customers in the cluster that qualify for distribution of withdrawal penalty funds under this framework.[338] To account for withdrawals that occurred *during the cluster study process,* the transmission provider must do the following: within 30 calendar days of all interconnection customers in the same cluster having: (1) withdrawn or been deemed withdrawn; (2) executed an LGIA; or (3) requested an LGIA to be filed unexecuted, determine if, and to what extent, any interconnection customers qualify to have their increased network upgrade costs offset by withdrawal penalty funds and provide such interconnection customers with an amended LGIA that provides the reduction in network upgrade cost assignment and associated reduction to the interconnection customer's financial security requirements.

214. To account for withdrawals that occurred in the same cluster after the withdrawing interconnection customer executed an LGIA, or requests the filing of an unexecuted LGIA, the transmission provider must do the following: within 30 calendar days of such withdrawal or termination, determine if, and to what extent, any interconnection customers qualify to have their increased network upgrade costs offset by withdrawal penalty funds and provide such interconnection customers with an amended LGIA that provides the reduction in network upgrade cost assignment and associated reduction to the interconnection customer's financial security requirements.[339]

215. For any given withdrawal, if the transmission provider determines that there are no network upgrade cost assignments in the withdrawn interconnection customer's cluster shared with the withdrawn interconnection customer, or if the transmission provider determines that the withdrawn interconnection customer's withdrawal did not cause a net increase in the shared cost assignment for any remaining interconnection customers in the cluster, the transmission provider must return the remaining withdrawal penalty to the withdrawn interconnection customer.[340] Such remaining withdrawal penalties will be returned to withdrawn interconnection customers based on the proportion of each withdrawn interconnection customer's contribution to the total amount of withdrawal penalty funds collected for the cluster. The transmission provider must make such disbursement within 60 calendar days of the date on which all interconnection customers in the same cluster have either: (1) withdrawn or been deemed withdrawn; (2) executed an LGIA; or (3) requested an LGIA to be filed unexecuted.

216. Finally, section 3.7.1.2.5 of the *pro forma* LGIP provides that if, after the first and second distribution steps are complete, some or all of an interconnection customer's withdrawal penalty remains, the transmission provider must return the balance of the withdrawn interconnection customer's withdrawal penalty funds to the withdrawn interconnection customer.[341]

ii. Requests for Rehearing and Clarification

217. NYISO states that the Commission's withdrawal penalty structure adopted in Order No. 2023 does not reflect reasoned decision-making as it is unnecessarily complicated and establishes significant new administrative burdens on the transmission provider that are at odds with the intent of Order No. 2023 to enable transmission providers to more efficiently and timely process interconnection requests.[342] NYISO states that the Commission's framework substantially deviates from its straightforward proposal in the NOPR, in which the transmission provider would solely use the collected penalties to offset study costs for the cluster. NYISO asserts that the Commission has not provided a reasonable basis for expanding this process to insert an additional layer to address offsetting increases in network upgrade costs for shared network upgrades. NYISO states that the new requirements will require the transmission provider to keep track of multiple penalty streams tied to each withdrawing developer, of which there will likely be a substantial number, across multiple studies while also requiring the performance of extensive analysis concerning the impact of the withdrawal of each of these projects on the remaining projects. NYISO asserts that the Commission should select one approach that can be reasonably implemented without requiring the commitment of significant additional resources or, alternatively, should permit each transmission provider to determine how such collected penalty costs can be best put to use in its region.[343]

218. NYISO states that, if the Commission elects to retain its withdrawal penalty approach, NYISO requests rehearing and/or clarification of certain elements of these requirements.[344] First, NYISO states that the Commission should clearly establish that withdrawal penalties cannot exceed the dollar amount secured by transmission providers. NYISO asserts that transmission providers cannot be responsible for and should not have to incur the administrative resource and expense of having to hunt down or to enter into litigation with withdrawn interconnection customers to obtain any withdrawal penalties that they fail to pay, and should not be required to pass on any gaps in uncollected penalty amounts to their market participants. NYISO therefore argues that the Commission should modify the withdrawal penalty rules: (1) to permit the transmission provider to require increases in deposits from interconnection customers when it becomes evident that the secured amount is not sufficient to offset penalty amounts; and/or (2) to establish that, in the event of a gap between the secured amount and withdrawal penalties, the transmission provider is not required to

[344] *Id.* at 49–50.

pay out any uncollected amount under the penalty distribution rules or to recover such difference from its market participants.

219. Clean Energy Associations request rehearing and state that, while they support the inclusion of the penalty-free withdrawal provisions as a necessary protection for interconnection customers, the thresholds set by the Commission are unjust and unreasonable and will result in significant uncertainty for interconnection customers and inefficient queue processing.[345] Clean Energy Associations first argue that the 100% increase in network upgrade costs threshold for penalty-free withdrawal from the interconnection queue at the facilities study stage (compared to costs identified in a previous cluster study report) requires interconnection customers to withstand an unjust and unreasonable cost increase at such a late stage. Clean Energy Associations state that requiring a 100% increase after the facilities study for a penalty-free withdrawal is arbitrary and capricious, as well as unjust and unreasonable because it would serve to effectively penalize interconnection customers for determinations beyond their control, at a late phase when costs should become more certain—not subject to potential doubling. Clean Energy Associations assert that this is inconsistent with Order No. 2023's goal and justification for subjecting interconnection customers to increasing cost and risk in the form of higher milestone payments and withdrawal penalties as they move through the stages of the interconnection process, which is intended to incentivize interconnection customers to drop out as soon as they learn that their projects are commercially non-viable.[346] Clean Energy Associations submit that the Commission should lower this threshold to a 50% cost increase post-study for a penalty-free withdrawal, consistent with the penalty-free withdrawal provisions approved in SPP, MISO, and PJM.[347]

220. NYISO explains that the Order No. 2023 withdrawal penalty requirements establish certain exceptions to an interconnection customer's responsibility for withdrawal penalties, including in cases in which the transmission provider determines that ''the withdrawal does not have a material impact on the cost or timing of any Interconnection Request with an equal or lower Queue Position.'' [348] NYISO argues that the Commission should eliminate this material impact threshold exception, which it argues is inconsistent with the Commission's rationale for the withdrawal penalties, is not well defined, and will create an additional administrative, time-intensive burden on transmission providers. NYISO states that an interconnection customer's withdrawal at the conclusion of a study phase made use of the transmission provider's limited time and resources to the detriment of other interconnection customers that are ready to proceed and the overall time for completing the study phase, and that this harm occurs regardless of whether or not the actual study results indicate that the withdrawal of its project has a material impact on the cost or timing of other interconnection requests.

221. NYISO further states that the Commission neither defined nor provided guidance concerning what constitutes a material impact, leaving it instead to the transmission provider to determine.[349] NYISO argues that this creates significant inefficiencies and administrative burdens to require transmission providers to assess each withdrawing project—which could potentially be dozens—at each study phase and determine on a case-by-case basis what individual impact that project has on the cost and timing of any interconnection request with an equal or lower queue position. NYISO states that this would require reviewing such impacts for not only all other projects participating in the cluster, but also all other lower queued large and small generating facilities in a transmission provider's interconnection queue. NYISO argues that this time intensive analysis required upon each withdrawal is counter to one of the primary goals of Order No. 2023: to increase efficiencies in the interconnection process.

222. Clean Energy Associations also seek clarification to provide consistency and objectivity regarding what constitutes a material impact resulting from a withdrawal.[350] Clean Energy Associations urge the Commission to clarify that transmission providers must develop criteria to use in assessing materiality and include such criteria in their compliance filings and tariffs, and suggest modifications to *pro forma* LGIP section 3.7.1.[351] Clean Energy Associations assert that such clarification would still allow transmission providers the deference to make materiality determinations, but would also provide interconnection customers with a clear understanding of how materiality will be determined by each provider, while also ensuring consistent treatment of interconnection customers by transmission providers and consistent application of the required withdrawal penalty approach. Clean Energy Associations also ask the Commission to clarify that, when a transmission provider makes a materiality determination after a withdrawal, that such determination or other information associated therewith be made available along with and at the same time as the penalty revenue posting required by revised *pro forma* LGIP section 3.7.1.2. Clean Energy Associations argue that, absent the mechanisms requested in this clarification, the Commission and interconnection customers would have little or no visibility into transmission providers' implementation of the immateriality exemption, the inconsistent application of which could have significant impacts on competition and could result in undue discrimination and preferential treatment amongst similarly situated interconnection customers.

223. WIRES states that Order No. 2023 provides that any withdrawal penalty funds collected by the transmission provider are to be distributed among the remaining interconnection customers in the relevant cluster.[352] Specifically, WIRES explains that Order No. 2023 indicates that such withdrawal penalties are to be used to reduce any net increases to the existing network upgrade cost assignments to remaining customers that saw increased costs as a result of the withdrawing customer. WIRES states that, read together with new section 3.7.1.2.2 of the *pro forma,* the new rule provides that penalty revenues are not directly returned to non-withdrawing customers; rather, the transmission provider is to use those funds to reduce the costs of network upgrades that are ultimately assigned to non-withdrawing interconnection customers. WIRES states that, because penalty revenues do not appear to be directly returned to non-withdrawing customers, it is unclear *how* the rule requires the transmission provider to use those funds to reduce the interconnection customers' network upgrade cost assignment. As a consequence, WIRES asserts that Order No. 2023 could be read to require the

[352] WIRES Rehearing Request at 9–10.

transmission provider to reduce its construction costs included in rates associated with the network upgrade and preclude it from earning a return on the full cost of the network upgrades that transmission owners develop to serve the needs of the cluster. WIRES claims that, in effect, the withdrawal penalty crediting mechanism could infringe upon a transmission provider's right to self-fund network upgrades and earn a return of and on their investment. WIRES argues that the Commission's proposed rule never specified, much less suggested, that withdrawal penalties would be used to offset network upgrade costs, and the Commission should clarify that the Order No. 2023 withdrawal penalty distribution may be used to offset payment amounts by the remaining interconnection customers to the transmission owner but does not affect the overall revenue requirement for the network upgrades.

224. WIRES states that the Commission could also clarify that the withdrawal penalty funds are to be distributed directly to remaining interconnection customers as cash payments, which it claims would achieve the Commission's apparent objectives without impermissibly interfering with a transmission owner's right to fund network upgrades.[353] WIRES states that, absent the Commission granting the above clarification, WIRES seeks rehearing on the basis that the Commission failed to provide adequate notice and opportunity for public comment on the consequences, impacts, and legality of, and possible alternatives to, this new withdrawal penalty distribution scheme prior to issuing Order No. 2023 as required by the Administrative Procedure Act, and failed to consider the effects of its withdrawal distribution penalty.

225. NYISO requests that the Commission confirm or otherwise clarify the timeframes for the specific withdrawal penalty application process steps from the date on which all interconnection customers in the cluster have either withdrawn or been deemed withdrawn, executed an LGIA, or requested the LGIA be filed unexecuted.[354] NYISO states that it understands the transmission provider to have the following responsibilities within either 30 or 60 calendar days of this start date. NYISO understands that the transmission provider must within 30 days: (1) determine the use of the collected withdrawal penalty funds for study costs; (2) refund study costs; (3) determine the use of any remaining collected withdrawal penalty funds for net increases to network upgrade costs; and (4) provide an amended LGIA in the case of any offset of increases to network upgrade costs. NYISO states that it further understands that the transmission provider must return any remaining security to interconnection customer within 60 calendar days. NYISO requests that the Commission confirm these are the intended deadlines or clarify the actual deadlines for these responsibilities.

226. NYISO next states that *pro forma* LGIP section 3.7.1.2.1 indicates that the transmission provider must use the collected withdrawal penalties first ''to fund studies conducted under the cluster study process,'' and that the cluster study process is defined to include all of the interconnection studies and re-studies.[355] However, NYISO states that section 3.7.1.2.1 elsewhere describes distributing withdrawal penalties only in the context of the cluster study. NYISO asks the Commission to clarify whether this tariff language was intended to apply solely to distribution of penalty funds for cluster study costs or for all the interconnection studies—*e.g.,* cluster re-studies and the interconnection facilities study.

227. NYISO also asks the Commission to clarify whether the requirements in *pro forma* LGIP section 3.7.1.2.2 for refunding any penalty amounts not used to offset study costs and net increases in upgrade costs are intended to be the same or different from the requirements for distributing such remaining penalty funds under section 3.7.1.2.5.[356] NYISO requests that the Commission provide an expanded version of the helpful example it provided in Paragraph 808 of Order No. 2023 that walks through the different potential variations of this process.

228. Clean Energy Associations and Shell ask the Commission to clarify the scope of the withdrawal penalty contained in revised *pro forma* LGIP sections 5.1.1.1 and 5.1.1.2.[357] Clean Energy Associations state that the withdrawal penalty definition's reference to revised *pro forma* LGIP section 3.7.1, and its subsection 3.7.1.1, leads to a conclusion that every withdrawal penalty is to be calculated consistent with revised *pro forma* LGIP section 3.7.1.[358] Clean Energy Associations and Shell state that section 5 of the revised *pro forma* LGIP procedures for the transitional cluster study process refers to the withdrawal penalty provisions of section 3.7, but that certain cross references are unclear.[359] Clean Energy Associations argue that the Commission should clarify whether the term ''Withdrawal Penalty'' in revised *pro forma* LGIP sections 5.1.1.1 and 5.1.1.2 either: (1) should not be capitalized so that the revised *pro forma* LGIP section 1 defined term ''Withdrawal Penalty,'' and its corresponding reference to the calculation in *pro forma* LGIP section 3.7.1, do not apply to withdrawals during the transition process; or (2) a new term ''Transitional Withdrawal Penalty'' should be defined as a specific withdrawal penalty that applies only during the transition process and is calculated pursuant to Revised *pro forma* LGIP sections 5.1.1.1 and 5.1.1.2.[360] Clean Energy Associations and Shell further argue that the Commission also should clarify whether the term ''study cost,'' as used in the calculation of the transitional withdrawal penalty, includes the cost of the entire cluster study or the study cost that has been assigned to the withdrawing interconnection customer up to the point of its withdrawal.

229. Clean Energy Associations ask the Commission to clarify that the new penalty-free withdrawal thresholds will apply to transitional projects.[361] Clean Energy Associations argue that this clarification will increase project certainty and fairly allow projects that go through the transition to proceed in good faith without the risk that new results that show substantially higher costs will not allow them to withdraw penalty-free.

iii. Determination

230. We deny NYISO's rehearing request as it pertains to the withdrawal penalty structure. Specifically, we disagree with NYISO's assertion that the withdrawal penalty structure adopted in Order No. 2023 is unnecessarily complicated and burdensome on transmission providers and that it does not reflect reasoned decision-making. While NYISO asserts that the requirement to distribute withdrawal penalties to remaining interconnection customers facing net increases of costs

[361] Clean Energy Associations Rehearing Request at 74–75.

for shared network upgrades will complicate and slow the interconnection study process, we continue to find that the benefits of reducing the harm of such cost shifts outweighs the potential for added complexity. We continue to maintain that incorporating such a mechanism will decrease the risk that very large cost shifts due to withdrawals result in cascading withdrawals,[362] which in turn create substantial uncertainty, cost, and inefficiency for the interconnection study process. Moreover, the tracking of withdrawal penalty funds is necessary to ensure that funds related to individual interconnection customers' withdrawals are appropriately allocated. The concern of ensuring transparency to interconnection customers regarding such funds outweighs the perceived burden to transmission providers, especially because transmission providers are likely to track the impact of an interconnection customer's withdrawal regardless: this is valuable information to the transmission provider because withdrawals could lead to a study delay and accompanying penalty for the transmission provider and such information could be useful to the transmission provider in an appeal.

231. We grant NYISO's request to clarify that withdrawal penalties cannot exceed the dollar amount collected from interconnection customers that have withdrawn from the interconnection study process secured by transmission providers. As stated in section 3.7.1.2.1 of the *pro forma* LGIP, withdrawal penalty funds are collected from the cluster for the purposes of (1) funding studies conducted under the cluster study process for interconnection customers in the same cluster that have executed the LGIA or requested the LGIA to be filed unexecuted, and (2) reducing net increases, for interconnection customers in the same cluster, in interconnection customers' network upgrade cost assignment and associated financial security requirements. The total amount of funds used for (1) and (2) must not exceed the total amount of withdrawal penalty funds collected from the cluster. We accordingly modify the language in *pro forma* LGIP section 3.7.1.2.1 to reflect this clarification. Given this clarification, we need not adopt NYISO's request for additional modifications.

232. We are unpersuaded by Clean Energy Associations' request for rehearing as it pertains to the 100% increase in network upgrade costs requirement after the facilities study phase for penalty-free withdrawal. We disagree that the thresholds for penalty-free withdrawal laid out in Order No. 2023 expose interconnection customers to unjust and unreasonable cost increases. We continue to find that the trigger thresholds are set at an amount providing sufficient room for estimates to change as the cluster evolves while limiting interconnection customer exposure to withdrawal penalties when such estimates change by a significant amount. We acknowledge that the thresholds for penalty-free withdrawal are higher at later stages of the interconnection study process, but continue to find that this structure is reasonable, given the greater harms of late-stage withdrawals and the importance of incentivizing earlier withdrawal of non-viable interconnection requests. An interconnection customer will know to factor in both the cost estimates and the potential withdrawal penalty but also the exemption trigger thresholds as it makes the business decision to proceed in the interconnection queue. Accordingly, we retain the penalty-free withdrawal threshold exemptions set forth in Order No. 2023.

233. We disagree with NYISO's and Clean Energy Associations' requests for the Commission to define materiality in the context of the withdrawal penalty exceptions in *pro forma* LGIP section 3.7.1. Consistent with the Commission's finding in Order No. 2003,[363] we find it unnecessary to revise *pro forma* LGIP section 3.7.1 to specify what constitutes a material impact on the cost or timing of any interconnection request with an equal queue position. We also note a discrepancy between the *pro forma* LGIP language in section 3.7.1 and the withdrawal penalty framework as described in Order No. 2023. Accordingly, we revise section 3.7.1 such that there will be no withdrawal penalty assessed if the withdrawal does not have a material impact on any interconnection request in the same cluster. Withdrawal penalty funds are allocated to those interconnection customers in the same cluster as the withdrawing interconnection customer, so we find it necessary for clarity to remove the reference to lower-queued interconnection customers, as adopted in Order No. 2023. We note that the materiality of the impact caused by a withdrawal could depend on the factors pertaining to the individual project (size, location, type) and other projects in the cluster (proximity to the withdrawing project, size of remaining projects relative to the withdrawing project), as well as the configuration of the transmission provider's transmission system. Therefore, we leave it to the transmission provider to make this determination of materiality. We are also unpersuaded by Clean Energy Associations' request for clarification that, when a transmission provider makes a materiality determination after a withdrawal regarding a delay in timing or increase in cost of network upgrades of other proposed generating facilities in the same cluster, such determination or other information associated therewith be made available along with and at the same time as the penalty revenue posting required by revised *pro forma* LGIP section 3.7.1.2. The benefit to the interconnection customers would not outweigh the substantial burden on transmission providers to detail the materiality determination for each individual withdrawal.

234. In response to WIRES, we clarify that using the Order No. 2023 withdrawal penalties to offset financial security payment amounts provided to the transmission provider by the remaining interconnection customers would not reduce the total network upgrade cost that a transmission provider places in rate base. When the Order No. 2023 withdrawal penalties are used to offset financial security payment amounts, some network upgrade payments will come from the withdrawal penalties and some will come from the remaining interconnection customer, but the fact that a portion of the network upgrade payment comes from withdrawal penalties does not reduce the total network upgrade cost that a transmission provider places in rate base. Order No. 2023 provides that an interconnection customer's reduced network upgrade cost obligation will be effectuated by the transmission provider amending the interconnection customer's LGIA or reducing the network upgrade cost estimate provided to the interconnection customer if there is not yet an LGIA to provide a reduction in network upgrade cost assignment and an associated reduction in the interconnection customer's financial security requirement.[364] Given this clarification, we believe it unnecessary to address WIRES' alternative request for clarification that these withdrawal penalty disbursements must be distributed as cash payments. For the same reasons, we believe it unnecessary to address WIRES' alternative request for rehearing

[362] Order No. 2023, 184 FERC ¶ 61,054 at P 799.

[363] Order No. 2003, 106 FERC ¶ 61,220 at P 168.

[364] Order No. 2023, 184 FERC ¶ 61,054 at P 806.

regarding notice of the new withdrawal penalty regime.

235. We are persuaded by NYISO's request to clarify the timeframes for the specific withdrawal penalty application process steps. The transmission provider is required to complete the following steps within 30 calendar days of all interconnection customers in the cluster having either withdrawn or been deemed withdrawn, executed an LGIA, or requested the LGIA be filed unexecuted: (1) apply a refund to invoiced study costs for interconnection customers that remain in the cluster (per *pro forma* LGIP section 3.7.1.2.1); (2) determine whether withdrawn interconnection customers, at any point in the cluster study process, shared cost assignment for one or more network upgrades with any remaining interconnection customers in the same cluster (per *pro forma* LGIP section 3.7.1.2.2); (3) where the withdrawn interconnection customers have shared a cost assignment for one or more network upgrades with any remaining interconnection customers in the same cluster, transmission provider is to perform the calculations described in *pro forma* LGIP subsection 3.7.1.2.3(a) to determine the reduction in the remaining interconnection customers' net increase in network upgrade costs and associated financial security requirements (per *pro forma* LGIP section 3.7.1.2.4); and (4) where applicable, provide interconnection customers with an amended LGIA that provides the reduction in network upgrade cost assignment and associated reduction to the interconnection customer's financial security requirements (per *pro forma* LGIP section 3.7.1.2.4).

236. Where the transmission provider conducts step (2) above and determines that a withdrawn interconnection customer did not share cost assignments with remaining interconnection customers or cause a net increase in the cost assignment for any remaining interconnection customers in the same cluster, the transmission provider must return any remaining withdrawal penalty funds to the withdrawn interconnection customer(s) within 60 calendar days of all interconnection customers in the cluster having either withdrawn or been deemed withdrawn, executed an LGIA, or requested the LGIA be filed unexecuted (per *pro forma* LGIP section 3.7.1.2.2). The 60-day period here allows the transmission provider time to focus on steps 1–4 in the previous paragraph before it must disburse funds to withdrawn interconnection customers.

237. We grant NYISO's request to clarify that *pro forma* LGIP section 3.7.1.2.1 requires the transmission provider to use the collected withdrawal penalties first to fund all the interconnection studies conducted for interconnection customers in the cluster—including cluster restudies and the interconnection facilities study. We accordingly modify the language in section 3.7.1.2.1 of the *pro forma* LGIP to be inclusive of these studies.

238. We grant NYISO's request to clarify the difference between the requirements to return withdrawal penalty funds to withdrawn interconnection customers in *pro forma* LGIP sections 3.7.1.2.2 and 3.7.1.2.5. *Pro forma* LGIP section 3.7.1.2.2 establishes that, where the interconnection customer's withdrawal *does not cause* a net increase in the shared cost assignment for any remaining interconnection customers' network upgrades in the same cluster, the withdrawal penalty funds returned to the withdrawn interconnection customers will be net of the amount used to pay the study costs for interconnection customers in the same cluster that did not withdraw. *Pro forma* LGIP section 3.7.1.2.5 addresses the case where any interconnection customer's withdrawal *does cause* a net increase in the shared cost assignment for any remaining interconnection customers' network upgrades. In this case, the withdrawal penalty funds returned to the withdrawn interconnection customers will be net of both the study costs and the amount paid to offset net increases in shared cost assignments for network upgrades.

239. We are not persuaded by NYISO's request for an expanded version of the withdrawal penalty example included in Order No. 2023 because another purely illustrative example is unnecessary.

240. We agree with Clean Energy Associations and Shell regarding the withdrawal penalty contained in *pro forma* LGIP sections 5.1.1.1 and 5.1.1.2. We agree that it is necessary to distinguish the transition process withdrawal penalty of nine times study costs from the withdrawal penalty assessed under the normal cluster study process which is calculated based on *pro forma* LGIP section 3.7.1. Accordingly, we modify section 1 to define ''transitional withdrawal penalty,'' [365] and modify *pro forma* LGIP sections 5.1.1, 5.1.1.1, and 5.1.1.2 to reference the transitional withdrawal penalty.

241. We grant Clean Energy Associations' and Shell's requests for clarification of whether the term ''study cost,'' as used in the calculation of the transitional withdrawal penalty, includes the cost of the entire cluster study or the study cost that has been assigned to the withdrawing interconnection customer up to the point of withdrawal, inclusive of any costs incurred in the transition process under the transitional serial facilities study or transitional cluster study. We clarify that study costs include all costs incurred by the interconnection customer in the transmission provider's existing interconnection study process prior to the Commission-approved effective date of the transmission provider's Order No. 2023 compliance filing. For example, where a transmission provider was operating under the previous *pro forma* LGIP, the study costs would include the amount incurred by the interconnection customer for the completion of its interconnection feasibility study, interconnection system impact study, and the interconnection facilities study. As explained in Order No. 2023 and *pro forma* LGIP sections 5.1.1.1 and 5.1.1.2, study costs for purposes of calculating this withdrawal penalty will also include any costs incurred in the transition process under the transitional serial facilities study or transitional cluster study.

242. In response to Clean Energy Associations, we decline to clarify that the penalty-free withdrawal thresholds will apply to transitional projects. We find it important to the goal of reducing speculative behavior that any interconnection customer that enters the transition process is required to pay a penalty if it does not reach commercial operation. We note that interconnection customers can elect not to enter the transition process and instead enter the transmission provider's first annual cluster study where the withdrawal penalty exemptions will be applied. We also note that the penalty-free exemption provisions are more appropriate for the normal cluster study process where the withdrawal penalty could be much higher than the nine times study costs amount assessed as the transitional withdrawal penalty.

243. We also add minor, clarifying edits to *pro forma* LGIP section 3.7.1

[365] Transitional Withdrawal Penalty shall mean the penalty assessed by Transmission Provider to an Interconnection Customer that has entered the Transitional Cluster Study or Transitional Serial Interconnection Facilities Study and chooses to withdraw or is deemed withdrawn from Transmission Provider's interconnection queue or whose Generating Facility does not otherwise reach Commercial Operation. The calculation of the Transitional Withdrawal Penalty is set forth in sections 5.1.1.1 and 5.1.1.2 of this LGIP.

and 3.7.1.1(a) to reference cluster restudies, where appropriate.

6. Transition Process

a. Order No. 2023 Requirements

244. In Order No. 2023, the Commission established a transition process for moving to the first-ready, first-served cluster study process.[366] The Commission required transmission providers to offer existing interconnection customers up to three transition options, depending on which phase of the serial study process their interconnection requests are in: (1) a transitional serial study, (2) a transitional cluster study, and (3) withdrawal from the interconnection queue without penalty.

245. The Commission agreed with commenters that, given current interconnection queue backlogs in multiple regions, it is essential that the Commission craft a transition process to give interconnection customers, along with other market participants time to adjust to new processes and requirements.[367] The Commission explained that the transition process will create an efficient way to prioritize and process interconnection requests based on how far they have advanced through the interconnection process and their level of commercial readiness.

246. The Commission required transmission providers to offer the transitional serial study option to interconnection customers that have been tendered a facilities study agreement, even if they have not yet executed the agreement, as of 30 calendar days after the filing date of the transmission provider's initial filing to comply with Order No. 2023.[368] Similarly, the Commission required transmission providers to offer the transitional cluster study option to interconnection customers with an assigned queue position as of 30 calendar days after the filing date of the transmission provider's initial filing to comply with Order No. 2023. The Commission found that the adopted transition process appropriately balances the need to move expeditiously to the new cluster study process with the need to respect the investments and expectations of interconnection customers at an advanced stage in the existing interconnection process.[369]

247. The Commission stated that interconnection customers will have 120 calendar days after the publication of Order No. 2023 to achieve eligibility for the transition process (90 calendar days for transmission providers to submit compliance filings, plus the 30-calendar day eligibility cut-off).[370] The Commission also required the transmission provider to tender the appropriate transitional study agreements to eligible interconnection customers no later than the Commission-approved effective date of the transmission provider's compliance filing with Order No. 2023.[371] The Commission stated that this will help ensure that interconnection customers are informed about their eligibility for the transitional studies (including the associated requirements and deadlines) in a timely manner.

248. The Commission also adopted transition process deposits, withdrawal penalties, and deadlines.[372] The Commission required that: (1) interconnection customers electing the transitional serial study must provide a deposit equal to 100% of the interconnection facility and network upgrade costs allocated to the interconnection customer in the system impact study; and (2) interconnection customers electing the transitional cluster study must provide a deposit equal to $5 million.[373] The Commission explained that the transition process is anticipated to involve more interconnection customers than standard annual clusters (due to existing interconnection queue backlogs), which greatly increases the risk of late-stage withdrawals. The Commission found that adopting deposit requirements for the transitional studies higher than those adopted for the cluster study process will help to ensure that the transitional process is used by interconnection customers that intend to proceed with their proposed generating facilities. In response to arguments that the proposed deposit amounts are arbitrary and/or excessive, the Commission explained that the deposit amounts are ''based on expected costs to the extent practicable and that only a portion of these deposits are ultimately at-risk.'' [374] The Commission noted that the withdrawal penalty is set at nine times the study cost with the remainder of deposits to be refunded. The Commission also noted that existing interconnection customers that are currently in an interconnection queue can opt to withdraw their interconnection requests without penalty and wait for the first standard cluster study with associated lower deposit requirements.

249. In response to EDF Renewable's claim that the transitional serial study deposit conflicts with the Commission's intentions in Order No. 2003,[375] the Commission found that the heightened need to avoid late-stage withdrawals during the transition process—a need that the Commission could not have anticipated in Order No. 2003—warrants the use of this requirement for the transitional serial study.[376]

250. As noted earlier, the Commission established a transitional study withdrawal penalty equaling nine times the study cost.[377] The Commission explained that the withdrawal penalty plays an important role in deterring speculative interconnection requests in both the standard cluster study and the transition process. The Commission disagreed with commenters that call for a lower penalty to apply during the transition process, given that the risk of withdrawals is heightened during the transition process. The Commission noted that, regardless of the cause, a withdrawal may cause harm to other interconnection customers in the transition process and therefore found it appropriate to impose penalties on those that choose to withdraw, notwithstanding that withdrawal may at times be due to circumstances beyond the interconnection customer's control. The Commission explained that interconnection customers will bear the risk of withdrawal penalties and should consider that risk in deciding whether to elect to join a transition process.

b. Requests for Rehearing and Clarification

251. Clean Energy Associations ask that the Commission grant rehearing to revise the deposit amounts required for customers entering the transitional serial or transitional cluster process, and revise the withdrawal penalty amounts for customers that proceed through the transitional process.[378] Clean Energy

[377] *Id.* P 860.

[378] Clean Energy Associations Rehearing Request at 36–39.

Associations argue that the Commission acted arbitrarily and capriciously by imposing excessive and arbitrary deposit requirements and withdrawal penalties on interconnection customers electing to proceed through transitional studies. Clean Energy Associations assert that the Commission ignored substantial record evidence, failed to ''articulate a rational connection between the facts found and the choice made,'' and failed to respond meaningfully to the arguments of commenters.[379]

252. Clean Energy Associations argue that the Commission failed to provide any record evidence to support the $5 million deposit amount required for an interconnection customer to proceed to a transitional cluster study, nor did it meaningfully respond to contrary evidence that the transitional serial study deposit would be unduly burdensome or have unintended consequences that frustrate the purpose of Order No. 2023.[380] Clean Energy Associations argue that there is no discussion in the record of how Order No. 2023's calculus relates to expected costs, nor practical limitations to more accurately estimating those costs.[381] Clean Energy Associations assert that the $5 million amount originates from a single utility's claim that $5 million is consistent with interconnection costs on its system, and not from Commission reasoning or evidence that this figure is appropriate on a *pro forma* basis. Clean Energy Associations argue that establishment of a flat deposit amount is inconsistent with the Commission's own determination elsewhere in Order No. 2023, where the Commission found that study deposits under the new cluster study process should differ based on project size and estimated network upgrade costs, depending on the stage of the process.[382] Clean Energy Associations also contend that this deposit requirement could become a barrier to entry for smaller projects that do not have the ability to put up a $5 million deposit, and for which a $5 million deposit would have little linkage to actual upgrade costs or project economics, which the Commission acknowledged was the appropriate driver for deposit amounts.

253. Clean Energy Associations also argue that the Commission inappropriately disregarded EDF Renewable's concern that Order No. 2023 conflicts with Order No. 2003, which specifically rejected a proposal to require customers to post security up front for the total cost of such facilities.[383] Clean Energy Associations note that the Commission justifies its alternative approach due to the heightened need to avoid late-stage withdrawals during the transition process, but argues that the Commission failed to provide substantial evidence to further explain or support this heightened need.

254. Clean Energy Associations request rehearing of the transition process set forth in revised *pro forma* LGIP section 5.1.1.2 because they argue that the scope of the transition cluster group established by the Commission is too broad.[384] Clean Energy Associations assert that the Commission unjustly and unreasonably groups customers that submitted interconnection requests on the eve of the transmission providers' Order No. 2023 compliance filing with customers that have been pending in the queue for substantially longer periods of time.[385] Clean Energy Associations state that recently-accepted queue reform transmission procedures have commonly implemented a ''cut-off'' date for transitional study entry that coincides with notice of the relevant reforms.[386] Clean Energy Associations argue that this prevents ''mixing'' future interconnection customers' applications with existing interconnection customers relative to transitional studies. Clean Energy Associations argue that treating new and future interconnection customers the same as customers that have been waiting for an extended period of time to begin their studies is unjust and unreasonable.

255. Clean Energy Associations and Shell request that the Commission revise the transitional cluster study process and sections 5.1.1.2 to set the July 28, 2023 issuance date of Order No. 2023 as the date of eligibility for transitional cluster study participation.[387] Shell asserts that *pro forma* LGIP section 5.1.1.2 is too broad because it treats new and future generator interconnection customers the same as interconnection customers that may have been waiting in the queue for years.[388] Shell contends that the regulatory expectations of existing and new customers subject to queue reform are fundamentally different because existing customers submitted their requests under one queue structure and new customers will submit their requests with reasonable notice of the new structure. Shell argues that allowing the transitional cluster study to remain open for several months beyond the Order No. 2023 issuance date may provide an opportunity for interconnection customers to develop strategies that will overwhelm specific transitional cluster studies with unnecessarily high volumes of new interconnection requests, which may enable them to alter the progress of the transitional cluster study by strategically withdrawing a specific subset of these generator interconnection requests at each decision point.[389] Shell asserts that this is akin to the queue speculation the Commission is trying to discourage pursuant to Order No. 2023. Shell states that this may allow new interconnection requests to manipulate the transitional cluster study process, thereby triggering multiple restudies until they achieve a result that favors their projects.

256. Clean Energy Associations also ask the Commission to clarify that any interconnection requests submitted after the Order No. 2023 issuance date will be placed in the first cluster study that follows the transitional cluster study.[390] Shell states that compliance filings that include interconnection requests in a transitional cluster study queued after

the deadline should explain why their proposed cut-off date for the transitional cluster study will advance the goals of facilitating the reduction of queue backlogs in a more efficient and cost-effective manner.[391]

c. Determination

257. We are unpersuaded by Clean Energy Associations' request to revise the deposit amounts required for customers entering the transitional serial or transitional cluster process, and to revise the withdrawal penalty amounts for customers that proceed through the transitional process. As the Commission explained in Order No. 2023, the transition process is anticipated to involve more interconnection customers than standard annual clusters due to existing interconnection queue backlogs.[392] With more interconnection customers than normal, there is an increased risk of late-stage withdrawals leading to restudies and delays that would further frustrate the goals of Order No. 2023. We continue to find that adopting deposit requirements for the transition studies that are higher than those adopted for the cluster study process will help to lower the risk of restudies and delays resulting from late-stage withdrawals from the transition studies. This requirement is necessary to ensure that the transition process is used by interconnection customers that accept the heightened financial risks and nevertheless remain confident in the commercial viability of their proposed generating facilities.

258. We further note that the Commission explained in Order No. 2023 that the transitional deposit amounts are based on expected costs ''to the extent practicable.'' [393] In the case of the transitional cluster study, it is not practical to create deposits based on individualized estimates of network upgrade costs because, unlike the transitional serial study, projects entering the transitional cluster study are not required to have any previous study results on which such estimates could be based. Therefore, the Commission reasonably relied upon available evidence as to general network upgrade cost estimates.[394] We further note that no comments in the record provided a more persuasive estimate.

259. Additionally, we disagree with Clean Energy Associations' argument that a flat deposit is inconsistent with other Order No. 2023 requirements because we find that the need for strict transition requirements warrants the use of a flat deposit. Furthermore, as the Commission explained, only a portion of these deposits are ultimately at risk, and there is no withdrawal penalty if existing interconnection customers currently in the queue opt to withdraw and wait for the first standard cluster study with associated lower deposit requirements rather than proceed in the transitional cluster.[395] For similar reasons, we also decline to modify the withdrawal penalty amount. In light of the heightened risk of withdrawals leading to restudies and delays during the transition process, we disagree with Clean Energy Associations' argument that the withdrawal penalty is excessive and arbitrary.
